02/11/2026 — Personal inventory history/theory source candidate / AWAITING EXACT CI

Before-source claim3509/head8dbb8398/treee05c6e01 passed docsCI41408166469 and merged14a0dcae6 BEFORE source. Same retained access owner and bounded source branch. Two new independent keys inventory.history.read and inventory.expected.read require inventory.read; source catalogue23, review55families/344candidates. Existing profiles and accounts gain no automatic new right. Owner editor receives only the integrated keys.

Existing selected-store personal readers now admit FINALIZED list/detail only with history authority (preserving the old finalizer's existing detail exception). Theory visibility is independent from finalize; explicit DTO fields omit cost/retail/actors/events/raw scope/snapshot. Grant/session/company/licence and captured field/history revisions are checked around reads, with lifecycle generation/maintenance/retirement fencing. Canonical FINALIZED FREE history includes only counted lines. The actual native view/search/count table is reused; finalized personal views have no count/clear/bulk controls even with stale action flags. Uncounted personal rows and incomplete quantity differences display unknown, preserving Owner arithmetic and all report/value/review algorithms.

Local Node20.20.2: final native/mounted/privacy/old-cost group39PASS/0FAIL/0SKIP; broader earlier set62PASS/0FAIL/1nativeSKIP, overlapping not additive. Work build/TABLE_SERVICE PASS. PostgreSQL fixture extended for genuine Owner-provisioned/PIN-authenticated minimal rights, foreign scope, optional-field withdrawal during reads, lifecycle transitions, FREE filtering, denied audit/export/report/writers and unchanged line/stock/financial controls. Local native runtime unavailable (no DB; attempted temporary binary cannot load system ICU and cannot initialize under the available filesystem identity); no fake native PASS or weakened CI gate. Full exact PR/main CI must execute native proof unskipped before ordinary guarded healthy release. No hosted grant/credential/business write, schema/worker or native report/writer change. Hosted acceptance NOT TESTED/AWAITING LAB; no manual/numbered closure. Existing200history/10000detail row limits refuse whole over-limit results; full pagination remains a separate residual.

The independent report owner retains all reconciliation/value/review/correction/export and blocked hosted review-write scope. Remaining BackOffice matrix, cost/retail/actor/report permissions and explicit company/recovery authority remain OPEN with retained owners. Single next action is full exact source CI and release of this bounded two-right batch, then measured hosted read-only acceptance; never replay accepted counts/stock/provider/financial operations.

02Nov2026 — INVENTORY-RECONCILIATION-01 / TEST AUTHORIZED / WAITING FOR NORMAL LOGIN / NOT TESTED

Same retained receiving owner feat/inventory-cost-display-20261102; no release/second claimant. User request f6ce2729-ff51-4d70-94f7-d0808c42ff83 explicitly says «ξεκινα» in response to ONE synthetic report-only+1 on existing LAB TEST1/pair8f6dcacc→d9f81c39 and immediate ONE actual-receipt revoke. That exact test is now authorized; do not request the same correction permission again. Stock/count/financial/role/grant/email actions and unrelated links remain unauthorized.

Actual blocker is ordinary authentication: previous browser session absent; complete secure password/device form advanced to2FA, but the site returned «Η επιβεβαίωση έληξε. Συνδέσου ξανά.» No correction or revoke submitted. Fresh read-only SQL07:57:02.803063UTC gives0review rows; independently healthy2512d6bb. This is NOT a36control baseline or new functional PASS. Accepted3503/3505/3506 read/export/cost PASS, native5189+8/0/0 and original records remain protected. Administrative auth/authorization status only; accepted manual/PDF and peer FTEXT artifacts remain unchanged.

Single next action ordinary authentication handoff, visible signed-in verification, then fresh report source/head/36controls/stock/shift/other-audit/original-line before EACH of the two authorized audit-row actions. Verify one correction receipt, revoke exactly it, prove restored final result/only2append-only reviews and unchanged business data. Never replay on uncertain response; verify receipt. No bypass of2FA or direct/alternative mutation. Checkpoint2026-11-02-inventory-review-authorized-auth-handoff.md. Full warehouse/time/global identity/original-invoice/canonical-writer/access scope stays OPEN with retained owners; same owner remains assigned while login is pending.

02/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / HISTORY + THEORETICAL VISIBILITY / BOUNDED ACCESS-ONLY CLAIM BEFORE SOURCE

Same retained BackOffice access owner, feat/backoffice-inventory-history-access-20261102. Continue merged field-contract3497 after recovery of the repository from its authoritative Git source. The independently owned report/value implementation3495 and later reviewed-result/missing-cost work are now merged; preserve its residual ownership and all new scoped PASS3504/3505 on2512d6bb. This is NOT a hand-back of report math/value/correction/link/PDF/XLSX work and grants no authority for hosted review writes. Read current full active/tracker/pending/checklist, own field contract, current reconciliation/cost records and inventory manual before this claim. Whole BackOffice rights scope remains OPEN.

Bounded first access-only source: two independent Owner-selected store rights, inventory.history.read and inventory.expected.read, each requiring inventory.read. Existing scoped personal list/detail endpoints only: history permits listing/opening FINALIZED stocktakes, while theoretical visibility permits expected quantity and computed quantity difference without conferring finalize. Existing finalizer's detail visibility remains unchanged; old defaults/accounts gain no right automatically. Actual real EMPLOYEE identity, exact store/company/licence/session/grant checks and field masks stay binding. Recheck captured field/history rights and lifecycle generation before/after reads, refuse mixed/stale responses, and keep finalized screens non-writing. Use the existing native layout/count table, never an Owner-role/API shim.

No native audit/investigation/reconciliation/export route admission, cost/retail/actor visibility, writer/count/finalize/stock/invoice/financial algorithm, schema, worker, provider, hosted grant/credential/business change. Source surface is shared staff permission/catalogue data, personal inventory reader, personal workspace/native delegated display flags and focused/native tests; one monthly all-rights fixture count updates21→23 without changing any monthly authority. The active report owner's calculations/reviews remain untouched. Current catalogue21 before this claim; proposed two keys are NOT executable until integrated after this claim is green/main.

Required engineering proof: each right alone/read-only/count versus finalize, old finalizer compatibility, final/nonfinal and foreign-store/company/object scope, recursive absence of cost/retail/snapshot/audit identity fields, late grant withdrawal/lifecycle transition, stale mounted data and no audit/report/export/write escalation. Full exact PR/main CI and guarded exact healthy release before new hosted acceptance. New functions NOT TESTED/AWAITING LAB; no manual/numbered PASS closure. Single next action after green merged claim: implement this bounded two-right native personal history/quantity visibility adapter. All broader report/export/cost and other BackOffice permission coverage remains assigned/open.

02Nov2026 02:11 UTC — INVENTORY-RECONCILIATION-COST-04 / SCOPED LAB PASS / FULL REQUEST OPEN

Same retained receiving owner after narrow transfer3492 and before-source claim3504/e307d838. Source3505/b6ed568b/tree83567660 merged2512d6bb. Exact fullPR41372217192/job125045223227 and main41373653467/job125049468383 all5SUCCESS/5189server+8backup/0FAIL/0SKIP; actual mounted1446/1447 and native1490/1504/1514 executed. Ordinary guard41374971127/job125053158480 Verify/Trigger/WaitSUCCESS; Renderdep-dbjurph42hec73e4n6gg LIVE01:58:48UTC; independenthealth02:00:14 exact2512. No manual trigger/bypass.

Actual native SA support/CloudChrome3/virtual LAB/existing finalized pair8f6dcacc→d9f81c39 TEST1 read only: operational row/footer nowΆγνωστο/unvaluedcount1, quantities5/4/−1 and retail4.80 unchanged. Both actual CSVs verify blank cost, Full Audit blank difference value; first failed synchronization was not counted as evidence, one new read-only export produced the verified file. Reconciliation retains initial−1+review0=final−1/unknown money. Original lineunitCost0/theory5/count4/time unchanged; all36source/control full-row count+digests, stock4/latestmove, MAIN0sums/transactions,7536otheraudits and0reviews identical before02:00:40→after02:11:27UTC. No stock/count/finalize/invoice/sale/payment/grant/financial action, provider replay, email or charge.

Legacy table/CSV missing-cost FAIL is CLOSED for this observed desktop flow; source3 read/source/PDF10pages/XLSX12sheets/count-history PASS remains protected. Checkpoint2026-11-02-inventory-cost-display.md and source-evidence cross-reference, manual inventory/PASS.md, exact artifacts/checksums in CHECKPOINTS/EVIDENCE/inventory-cost-display-20261102 and both regenerated canonical PDF mirrors synchronized. Known positive-cost/delegated behavior has actual mounted/native CI proof, not invented hosted samples; physical originals/warehouse times/other devices are not newly certified.

Full INVENTORY-RECONCILIATION-01 remains OPEN/ASSIGNED to the same receiving owner, no release/second claimant. Hosted LINK/CORRECTION/REVOKE acceptance remains BLOCKED/NOT TESTED after automatic approval review rejected a hosted write under read-only actual DB authorization. No retry/bypass. Remaining physical warehouse/count-time capture, company-wide reusable identity beyond comparison links, physical-original invoice verification and canonical writer/access integrations stay with retained owners. Single next action wait explicit permission for one synthetic report-only+1 on this comparison and one actual-receipt revoke, with fresh head/source/36controls before each and zero business changes; do not accept confirm before authorization.

02Nov2026 — INVENTORY-RECONCILIATION-COST-04 / HISTORICAL CANDIDATE / SUPERSEDED BY 02:11 LAB RECEIPT

Same retained owner feat/inventory-cost-display-20261102 after BEFORE SOURCE claim3504/cbc5d0bf/docsCI41371187003SUCCESS/mergee307d838. Actual hosted3bc8734f source3 read/evidence/PDF10pages/XLSX12sheets/36unchanged controls PASS remains protected; legacy FastCount row/footer0.00€ is still the observed installed FAIL, not yet fixed in LAB.

Bounded candidate normalizes missing/nonpositive/nonfinite unit cost to unknown in read-only table/footer/selected-cost and blank legacy CSV/FullAudit cost fields. Adds visible unvalued-item count only where values were already authorized; delegated masking, all quantity/retail and count/clear/bulk-zero/delete/finalize handlers unchanged. Minimal shared cost helper, no route/schema/grant/business writer change. Actual mounted table/export tests first reproduced0.00 UI/0 CSV, then11focusedPASS/0FAIL/0SKIP plus Work build18.12s. Correct npm server-workspace full local4846tests/4508PASS/0FAIL/338explicit infrastructureSKIP in175.78s, no simultaneous build; no unrelated test or threshold changed. Full exact PR/main CI with all3native inventory cases unskipped and ordinary guard/health required before same-pair read-only row/footer/CSV retest. No native or hosted PASS inferred from local checks.

Checkpoint2026-11-02-inventory-cost-display.md; source3 measured receipt3504/manual/evidence/canonical PDFs retained. Whole request OPEN/assigned: warehouse/time capture, reusable global identity, physical-original invoice/retained writers and hosted review-write acceptance. The latter remains BLOCKED by automatic approval review/read-only actual DB authorization; no retry/bypass or protected business replay. No stock/count/invoice/financial mutation, email or charge. Single next action exact fullCI, main/normalguard/health, measured read-only legacy cost/export acceptance and immediate manual/register/PDF closure.

02Nov2026 01:05 UTC — INVENTORY-RECONCILIATION-01 / SOURCE3 SCOPED LAB PASS / HISTORICAL COST FAIL CLOSED 02:11 / FULL REQUEST OPEN

Same retained receiving owner after approved narrow transfer3492; no release or overlapping owner. Source3503/0c2073a5 merged3bc8734f; exact fullPR41367109177 and main41368593139 all5SUCCESS/5187server+8backup/0FAIL/0SKIP/all3native executed. Ordinary guard41369820163, Renderdep-dbju01rbc2fs73ds1er0 LIVE00:59:36UTC, independenthealth01:00:10 exact3bc. Actual native SA support/LAB/read-only existing pair8f6dcacc→d9f81c39 TEST1 now10−5=5expected/count4/initial−1+correction0=final−1, unknown money; accepted self-consumption included once, original10/4/8/4 preserved. Real PDF10pages/XLSX12sheets match and retain1transaction/46documents/544lines/3events. All36source/control count+digests, stock4/latestmovement, MAIN0sums/transactions,7536otheraudits and0reviews unchanged before01:00:46→after01:05:12UTC. Scoped read/source/display/export PASS only; physical-original verification/stock eligibility/arrival coverage remains false, no confirmed loss or business replay. Manual/checkpoint/evidence/canonical PDFs synchronized in this receipt.

Actual separate FAIL: old InventoryFastCount row/footer still show0.00€ for missing cost while new report/initial summary correctly unknown. ASSIGNED BEFORE SOURCE feat/inventory-cost-display-20261102, same owner, checkpoint2026-11-02-inventory-cost-display.md; claim must be green/main. One bounded read-only cost/value projection and legacy CSV-null serialization fix in InventoryFastCount/InventoryV2Center with actual mounted/totals/export regression; no quantity/retail/count/finalize/clear/bulk-zero/delete/rights/writer change. Exact fullCI/main/normalguard/health then same-pair read-only retest and immediate closure required.

Hosted LINK/CORRECTION/REVOKE writes remain BLOCKED after automatic approval rejection: actual DB authorization is read-only. No retry/alternative mutation/confirmed hosted write PASS. Full request remains OPEN/assigned: physical warehouse/time capture, company-wide reusable identity beyond pair links, physical-original invoice verification and retained canonical invoice/count writer extensions/acceptance. Existing BackOffice/lifecycle/monthly/invoice owners retained. No production migration, real stock/financial action, email or charge. Next action green/main bounded cost-display claim, then implement it; later exact synthetic report-only+1/revoke still requires explicit authorization. Evidence CHECKPOINTS/EVIDENCE/inventory-reconciliation-source-evidence-20261102; source checkpoint2026-11-01-inventory-reconciliation-source-evidence.md/manual inventory/PASS.md.

02Nov2026 — INVENTORY-RECONCILIATION-EVIDENCE-03 / HISTORICAL CALENDAR CANDIDATE / SUPERSEDED BY 01:05 LAB RECEIPT

Same owner. Real new regression proved invoice-midnight falsely became late on the opening count day; red expectednull vs80 before, green after using existing shared Greece calendar-day utility. Actual count/transaction/posting instants remain separate, old documents remain uncertain; invoice issue days have no invented clock time. Cross-offset same-Greek-day duplicate/VAT candidate and native package-invoice midnight regression included. No writer/schema/rights change. Prior exact8d1170ad local full4843/4505PASS/0FAIL/338SKIP, full solo repass after unchanged DAILY QR timing; new focused39/36PASS/0FAIL/3nativeSKIP, Work build PASS, new full rerun pending.41366137645 is superseded, not final CI proof. Exact new full/native CI, main/guard/health and read-only LAB required. All source3502 read/export/cancel PASS and retained owners protected; hosted review mutations remain BLOCKED/NOT TESTED after automatic approval rejection on read-only actual DB authorization. No retry/bypass. Checkpoint2026-11-01-inventory-reconciliation-source-evidence.md; full remaining request OPEN/ASSIGNED.

02Nov2026 — INVENTORY-RECONCILIATION-EVIDENCE-03 / HISTORICAL SOURCE CANDIDATE / SUPERSEDED BY 01:05 LAB RECEIPT

Same retained owner feat/inventory-source-evidence-20261101; claim3501/151044ae/docsCI41362046332/merge9e26c89 before source. Read-only completed consumption/audited-return sources, exact posting precedence/late-sync identity, invoice quantities/packages/gifts/value-credit/canonical/duplicate checks and non-stock operational/price/barcode context implemented. Physical versus recorded-book expectations separate system zeroing; ambiguous/missing evidence does not produce a confirmed physical loss. Original count history/operator/source metadata, matching detailed UI/PDF/XLSX and explicit store-pool/unknown-warehouse scope. No count/invoice/stock/financial/schema/right writer takeover or email/charge.

Protected source3500 exact1e293f93 fullPR/main5176+8/0/0 and normal guard41363154340/live23:46:20UTC retained. Actual read/export/cancel scoped PASS3502/befd5fcf/docsCI41365053415/merge7e4e8374/manual/evidence/both PDF mirrors is complete and must not be replayed as a business transaction. Hosted LINK/CORRECTION/REVOKE write acceptance remains BLOCKED/NOT TESTED after automatic approval rejected accepting its confirmation on a read-only actual DB session; dismissed/form cleared/0reviews/all controls unchanged. No workaround authorized.

New local focused38/35PASS/0FAIL/3nativeSKIP; Work build/PDF QA passed. Prior local full4504PASS/0FAIL/338SKIP; later unchanged DAILY QR timing failure passes isolation, solo rerun pending. New native SQL/read invariance, direct+derived dedup, audited returns, boxes/gifts/value-credit/alias, late facts, foreign/global context and limits plus prior review authority/races must execute in full CI. Exact-main/ordinary guarded release/health before read-only LAB. No whole-task PASS; remaining independent warehouse/time capture, reusable identity beyond pair and retained writer/original-evidence scope OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-inventory-reconciliation-source-evidence.md. Single next action publish candidate/run full unskipped CI.

2026-11-01T23:55Z — INVENTORY-RECONCILIATION-01 / SCOPED READ-ONLY UI + PDF/XLSX + CANCEL LAB PASS / REVIEW WRITES BLOCKED

Same owner, no release/second takeover. Installed1e293f931ec5b0f153ba60dddf4fe5c22181def2 after3500/d942 fullPR41360489566 and exactmain41361950951 all5SUCCESS/5176server+8backup/0FAIL/0SKIP including actual native1493. Normal guard41363154340/job125017681131 Verify/Trigger/WaitSUCCESS; Renderdep-dbjsrqjbc2fs73dpa8rg LIVE23:46:20.376543UTC, independenthealth exact1e293f93. Before-source evidence claim3501/docsCI41362046332 green/main9e26c89 remains assigned; its new source3 adapter is not yet deployed.

Actual native SA support, virtual LABcmtpopbgo000trhb5ng9ytiru, CloudChrome tab3, no POS/payment/physical-terminal transaction. Existing finalized pair8f6dcacc→d9f81c39, TEST1/b1466a68 only read. UI initial-2/correction0/final-2 and unknown money, originalcount4 preserved. Actual Greek PDF legible within page margins; actual XLSX6sheets agrees and now preserves numeric immutable COUNT/RECOUNT history10/4/8/4 (expected11/5/5/5). The earlier Decimal count-history export FAIL is CLOSED by this measured read/export retest. This proves read/display/export and cancelled confirmation only, not complete physical loss: known historical self-consumption is a separate missing source assigned to adapter3; mismatch remains visible and loss UNCONFIRMED.

Fresh before23:50:18.432773UTC/after23:55:13.435484UTC all16 LAB/N40control full-row count/digests identical. LAB counts43shifts/27countEvents/90sales/95moves/4stocktakes/18lines/110stocks/134transactions. Exact TEST1stock4/latestmove10Oct11:49:05.817 unchanged; openMAIN0cash/0cards/0transactions/sum0, IRIS numeric field unavailable but UI0 and complete row/transaction digests unchanged.

Other7536WorkforceAuditLog rows same digeste68f8222ae067d7a09981bf532b7563b; controlstoreempty stays0. No stock/count/sale/finalization/payment/charge/email or old fixture replay.

One prepared report-only synthetic+1 confirmation was opened, but automatic approval review rejected accepting it: the actual database session is authorized read-only even for a hosted LAB audit-row write. It was dismissed, form cleared, persistedreviewrows remain0 and no indirect retry/bypass attempted. Hosted LINK/CORRECTION/REVOKE acceptance is BLOCKED/NOT TESTED, not a code FAIL and not granted by the conditional plan. Requires explicit permission for that exact hosted synthetic correction and its revoke. Native isolated write/race/session/idempotency proof remains separate CI evidence.

Checkpoint CHECKPOINTS/CHANGES/2026-11-01-inventory-reconciliation-reviews.md; manual docs/manual/inventory/PASS.md and evidence CHECKPOINTS/EVIDENCE/inventory-reconciliation-reviews-20261101. Only completed read/export/cancel scope leaves active pending; full source3, hosted review-write acceptance and broader requested scope remain OPEN/ASSIGNED to this owner. Do not replay protected inventory fixtures or mark whole task PASS.

01/11/2026 — INVENTORY-RECONCILIATION-REVIEWS-02 / SAME OWNER / ASSIGNED BEFORE SOURCE

Same receiving INVENTORY-RECONCILIATION-01 owner after explicit user-approved narrow transfer3492. The user requested the full inventory method, including confirmed cross-code identity and post-count corrections. This separate documentation-only claim authorizes the next reviewed-results source slice after THIS claim is green/main, while the independent first read-only candidate3495 completes its own exact combined CI/release. It supersedes only the earlier conditional plan's sequencing; it does not authorize merging an unverified first candidate or state-changing hosted tests. No second owner, schema or shared permission-writer takeover.

Exact new source: server/src/services/inventory-reconciliation-reviews.js plus corresponding contract/projection/native tests; own existing reconciliation calculation/source/handler, inventory-v2-audit route and InventoryReconciliationPanel adapter after the first source is incorporated. Branch feat/inventory-reconciliation-reviews-20261101. Use append-only existing WorkforceAuditLog records scoped by company/store/lifecycle generation/exact finalized stocktake pair, explicit reason/evidence, actor/payload-bound request receipt, source fingerprint/review head and Store-row serialization. Native existing Owner/SA confirmation only; no staff/counter cost or review admission, no original count/stock/invoice write, email, charge, new table/migration/worker/rights/default or provider replay.

LINK/REVOKE must preserve original product identities; no description-based matching. CORRECTION adjusts the reported result only, preserves the initial count and references evidence; refuse unknown starting results and duplicate/conflicting replay. Canonical reviewed-group cost is explicit and missing/nonpositive cost stays unknown. Show initial + reviewed correction = final per group and derive separate shortage/surplus/net totals and exports from the final rows. Umbrella -244/+233 with a confirmed relation must yield -11; glasses -263/+240 must yield -23 without adding intervening sales twice. Both are NOT IMPLEMENTED/NOT TESTED at this claim.

Original first-source7b212cfb fullCI41354201196 all5SUCCESS/5162PASS0FAIL0SKIP including native case1491. Combinedeacb1f26/full41355936706 still pending; its runtime/test blobs remain identical. No deployment/LAB PASS inferred. Full/native/exact-main CI and normal guarded delivery required before any measured LAB review action. Formal compatible design docs/architecture/inventory-reconciliation-reviewed-results.md; checkpoint CHECKPOINTS/CHANGES/2026-11-01-inventory-reconciliation-reviews.md. Other BackOffice access owner contract and all invoice/lifecycle/monthly scopes remain retained. Single next action: green/main this claim, then implement the new review contract/repository/projection with isolated native invariance proof.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / AUDIT FIELD CONTRACT REVIEW / NARROW TRANSFER PRESERVED

Same retained access owner; docs/backoffice-audit-permission-contract-20261101. Newer user-approved claim3492/6352b57 transfers inventory audit/investigation/report value-field extension ONLY to INVENTORY-RECONCILIATION-01. PR3495 head7b212cfb is active and explicitly preserves delegated denial. This supersedes this page's older next-action ownership for that overlapping extension; no silent hand-back or second implementation. All other BackOffice permission scope remains assigned here.

Completed read-only field/endpoint review in docs/roadmap/BACKOFFICE_INVENTORY_READ_PERMISSION_CONTRACT.md: draft versus finalized history, nested expected/cost/retail/actor/source leaks, legacy raw snapshot/scope/free text, FREE CSV/JSON mismatch, missing-cost versus zero, paid Loss Detection/source rights, scoped fresh read/export/fingerprint and unchanged finalizer compatibility. Native implementation and actual hosted acceptance NOT TESTED/OPEN. Existing21 grantable rights/defaults unchanged; no new checkbox/key/route, code/worker/schema or hosted grant/credential/business action. Baseline main06a2f95 and independently healthy5c3e9eac, read21:56:49UTC. New monthly/C2 actual scoped acceptance3493 and shared-cost receipts/claims remain with their owners; no accepted test repeated.

Full all-functions access assignment remains retained, excluding the explicit transferred extension. Report/value implementation stays with the active3495 owner. Single next action: use the merged/stable canonical report DTO and the reviewed field matrix to claim a bounded access-only integration; do not bypass the current staff denial or fabricate placeholder rights while that contract is pending. No functional PASS/manual/numbered closure. This is completed classification work and a dependency record, not installation of the requested report permissions.

01/11/2026 — INVENTORY-RECONCILIATION-01 / OWNER APPROVED NARROW TRANSFER / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ CENTRAL-BACKOFFICE-ACCESS-01 — ASSIGNED feat/inventory-reconciliation-20261101 for the inventory audit/investigation/report value-field extension ONLY. The owner explicitly approved this overlap in the current conversation after the conflict was disclosed. All other BackOffice permissions, native clear/bulk-zero/delete, company authority, monthly capture/lifecycle, invoice/OCR and other assignments remain with their retained owners.

Requested scope: selected-store reconciliation between stocktakes, per-product count-time boundaries, evidence-backed movements and late entries, explicit identity/correction history, missing-cost handling, separate shortage/surplus/net results and authorized display/PDF/Excel. Preserve canonical count/finalize writers, blind-counter masking, original events, tenant/store/module/licence gates and all accepted flows. No automatic employee charge/email or real-store stock/financial mutation. LAB only with fresh before/after/control evidence; local/CI results are not LAB PASS.

Preflight baseline main d3f0f949fe9d568e1d687b1a4c9dc1b7df934dd9; public health observed ok=true/revision5c3e9eacb69ce2c0df801eb5dd9aecf04506d69e. Existing seven ledger/audit source-contract tests PASS; no new runtime/LAB acceptance. Existing investigation uses one stocktake start-to-finalization window, and number(value||0) collapses unknown costs to zero; neither proves two-stocktake reconciliation. Full requested implementation OPEN. Before-source claim must be green/main before runtime edits. Exact bounded first source: new reconciliation calculation/source/report modules and endpoint in existing inventory-v2 audit router plus existing InventoryV2Center integration, focused functional/native/store-isolation tests. No schema or invoice-writer changes in this first slice; durable identity/correction/schema extensions require a separately recorded compatible design before they can be called implemented.

Checkpoint CHECKPOINTS/CHANGES/2026-11-01-inventory-reconciliation.md. Single next action: publish this claim green/main, then implement the read-only same-identity stocktake reconciliation slice with honest coverage/missing-evidence status, retaining the full remaining request.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / THREE INDEPENDENT INVENTORY ACTIONS INSTALLED / FULL SCOPE RETAINED OPEN

Same retained owner. Source PR3481 is delivered in exact healthye1fcbe04d3097cc3fd856227307d2ad6cb05df0f. Owner-selected inventory.clear, inventory.bulk-zero and inventory.delete are now independently executable, each requiring inventory.read only. Grant catalogue21; old profiles/accounts receive no automatic new right. Review catalogue55families/342candidates remains non-authorizing. Same real EMPLOYEE identity and native InventoryV2Center/InventoryFastCount controls; ordinary counting, clearing, selected-zero and draft deletion are distinct rights. No role promotion, company authority, schema/worker change or hosted grant/credential/business write by this page.

Exact selected-store API admission and fresh transaction-time account/session/grant/license/module/lifecycle checks precede replay and mutation. Native parent/line locks, all-line versions and COUNT/RECOUNT/CLEAR semantics retained; durable actor/payload-bound operation receipts survive draft deletion. Identical retries retain the exact saved UUID/version/line set and uncertain replies freeze navigation. Finalized drafts cannot be changed; delete requires explicit confirmation. No stock posting by clear/zero/delete; finalization remains its separate existing right and canonical writer. Owner handlers/defaults, blind count/cost masking and every previously accepted Owner behavior preserved.

Final head 2149b4a3ed78ec254a90b534fb99f53dc8868ada, tree 8642da3572ce85ea0c2c054163eadc702988d439. FullPRCI41340962428/job124950965782 and exactmainCI41342282483/job124955066416 both all5SUCCESS,5136server+8backup/0FAIL/0SKIP with complete build/browser/HTTP. Initialf68dc6ed/41338933308 failed5121/2/0: review catalogue lacked two new action names and independent monthly personal-capture fixture expected18 instead21. Both contracts corrected without weakening authority tests or changing peer runtime; new native PostgreSQL action cohort passed even in that failed run. Intermediateb925/5f99 had no new full CI because peer record/PDF conflicts; final branch preserves main3c6 and all peer source/accepted receipts. Local sets overlap and are not additive; actual final unskipped CI above is authoritative engineering proof.

Ordinary guardeddeploy41343627981/job124958750840 SUCCESS: full exact-main CI/freshness guard, rollback artifact 13097883014, SHA256 dff15e060e80f053599e742dd3a859ca71172c2cd1c5e5f03bd2dea7738755bc, actual pinned trigger19:50:25UTC and exact healthy19:56:22UTC. Workflow-definition head9a990bb is later peer documentation, NOT the deployed revision; actual target and health aree1fcbe04. Independent public/api/health HTTP200/ok=true confirmed exacte1fcbe04 at19:56:32UTC. Prior independent19:51 health wasb5eab88. This is release verification, not functional LAB/USER PASS. Evidence CHECKPOINTS/EVIDENCE/common-backoffice-permissions-20261101/inventory-actions-release.json.

Preserve peer monthly capture source b5eab88 and its separate DATA HOLD, C2 invoice-date claim3482, scoped AI-cost assistant acceptance3483 and provider/shared-cost audit3485. No accepted provider/payment/stock operation replayed. All peer runtime paths are unchanged; only the monthly fixture catalogue-length assertion changes18→21 while all genuine identity/capture denials and PG18 checks remain. Company authority/recovery proposal is still NOT INSTALLED. Hosted personal visual/write acceptance remains NOT TESTED/AWAITING USER; no manual or numbered PASS closure.

Full requested all-functions scope remains ASSIGNED/OPEN with CENTRAL-BACKOFFICE-ACCESS-01. Remaining inventory conversion, audit/investigation/value fields, import/zones/catalogue/delegation; broader native commerce/per-action coverage and separately reviewed company authority/app-worker-recovery compatibility remain OPEN. Single next action: classify the actual native audit/investigation read/export fields and expected/cost visibility before introducing any further executable right; preserve existing finalizer visibility and blind counters until a reviewed compatibility decision. Same owner continues, no second claim or transferred/unowned scope. Final receipt branch docs/backoffice-inventory-actions-release-20261101.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / THREE INDEPENDENT INVENTORY ACTIONS / SOURCE CANDIDATE

Same retained owner feat/backoffice-inventory-actions-20261101, continuation of3480/201a01a. Added inventory.clear, inventory.bulk-zero and inventory.delete independently, each requires inventory.read only. Grant catalogue21 in this source candidate; old profiles and all existing accounts gain no right automatically. Owner editor is data driven and now exposes each implemented checkbox. Real native InventoryV2Center/InventoryFastCount show only each granted action, including clear/selected-zero without ordinary counting. Actual EMPLOYEE/session/store identity retained; exact API admission and fresh transaction-time grant/license/module/lifecycle checks precede replay and writes. Parent/line locks, all-line versions, atomic COUNT/RECOUNT/CLEAR events, durable actor/payload-bound receipts and explicit draft-delete confirmation. Identical retries reuse the exact saved request; uncertain replies freeze navigation. Known rejections refresh scoped state. Owner native handlers/defaults unchanged. No schema, hosted grants/credentials or business writes.

Local mounted/UI suite20PASS/0FAIL/0SKIP; overlapping broader staff/native suite49PASS/0FAIL/3SKIP (isolated PostgreSQL absent locally); Work build PASS. Native PostgreSQL HTTP tests added for independent rights/denial, foreign line/store, atomic versions, normalized exact/conflicting replay, concurrent writers, transaction-time withdrawal, finalization protection and deletion replay with durable audit plus stock/financial controls. These DB checks remain NOT TESTED locally; full CI must execute them. No functional LAB/USER PASS, manual or numbered closure. Full exact PR/main CI and guarded healthy release still required. All-functions scope remains ASSIGNED/OPEN; remaining inventory conversion/audit/value/import/zones/delegation, broader native commerce and separate company authority continue with this owner.

01/11/2026 - C2 GENUINE OCTOBER REPORT / SCOPED LAB PASS / PARENT RESIDUALS OPEN

Retained C owner feat/invoice-month-audit-20261028 / original worker /root/invoice_new; bounded continuation feat/c2-stored-invoice-date-20261101, no ownership transfer. Exact installed5c3e9eacb69ce2c0df801eb5dd9aecf04506d69e/mainCI41348911362 all5SUCCESS5148server+8backup/0FAIL0SKIP; naturalguard41350280601/Renderdep-dbjqkgu7bikc7389ei10 LIVE21:10:13.807941UTC, exacthealthy21:10:32.1922161UTC. Genuine personal SuperAdmin/native support issuer, selected LAB/generation0/Cloud Chrome, actual report21:15:59UTC(UI seconds):12logical/7unposted/7uploaded-review/0duplicates/9identity-review/0credits/all-monthpending0. All12rows seen/unknown dates0; four31Oct opaque pairs retain UNPOSTED+review, orphan09Oct operator-header-only retains unknown amount/identity/open reconciliation. C2 actual report/five-date observation completed; not physical OCR/header, identity-complete or source-authenticity PASS. E1 preview manual remains separate. No independently measured report-before/after delta:18fresh controls below cover the subsequent D8 capture window. New usage docs/manual/monthly-invoice-audit/PASS.md; full receipt CHECKPOINTS/CHANGES/2026-10-28-invoice-month-audit-source.md. C2 desktop-report acceptance is removed from live pending scope; remaining roles/devices/physical accuracy and parent C/items8/9/E2E3 remain OPEN. Prior C2 claim/engineering text is historical below, not a new instruction to repeat acceptance.

HISTORICAL OWNED CLAIM / ENGINEERING EVIDENCE - SUPERSEDED ONLY FOR THIS ACCEPTED SLICE

Current C2 engineering status (01/11/2026, PR3484): source implemented after green before-source claim3482/ada1e65 and root SOURCE GO; retained owner/three source blobs unchanged. Original4ee888 fullCI41341285711 all5SUCCESS5138+8/0FAIL0SKIP; firstcombined693d fullCI41342780182 all5SUCCESS5143+8/0/0 with actual registered C2 case7, incoming inventory case17, genuine D8PG16/18/all21capabilities and Chromium. Documentation-forwardfe6 fullCI41344421069 was still IN PROGRESS when this revised candidate was prepared; no result inferred. The revised seven-path composition requires its own full CI and main full CI before ordinary guarded exact release. AWAITING LAB; no new USER/LAB/manual PASS. Unknown date/source quality stays HOLD; known stored operator date never certifies physical-date/source authenticity, posting or reconciliation. Exact source/runtime/CI history: CHECKPOINTS/CHANGES/2026-10-28-invoice-month-audit-source.md.

Documentation integration rule for this candidate: status is updated only inside this existing C2 block; all peer prefixes/suffixes/history retained. Current-main PDFs are preserved byte-for-byte as claim/history baselines and do not certify this candidate status; candidate PDF synchronization is deferred to the required real PASS closure. Before-source claim/PDF was already green main ada1e65. Any actual PASS closure MUST immediately update checkpoint, active/tracker/pending, relevant manual and canonical PDF in the same PR; no waiver of that gate. Parent C/report/email/inventory scope remains OPEN.

ASSIGNED retained C owner feat/invoice-month-audit-20261028, original worker /root/invoice_new under central coordinator codex/central-four-streams-20261018; current central helper executes only this named continuation. Documentation branch docs/c2-stored-invoice-date-claim-20261101. No ownership transfer or parallel invoice/OCR claim. Root authorized this documentation-only publication after PR3473 merged exact main b5eab88d79cb0a85a89033c22bb0429aaebad3c4. Independent design review CLEAR on plan6bb7db38711772f1d1aae1006f08fd0d6b4f27d49c58e938a8544ac52ae78303; root approved final plan1d38b3013f114feacc9e1a5d97d67ae39d66ff32065dd485a3d0ae17654a7e40 including explicit separate representation-map and protected posting regression. Source NOT STARTED; claim must be applicable-CI green/main and root SOURCE GO before source edits. No new LAB/USER/manual PASS.

Read-only October LAB investigation found four exact bidirectional source/order pairs with existing31Oct issue dates whose literal opaque alphanumeric identifiers fail the unchanged trailing-digit parser, plus one unresolved second-page finding with saved operator-header date and explicit primary pageJobIds membership. Existing originals remain stored; no new upload/reprocess/draft/payment/deletion is needed for this metadata correction. Page2 viewed original has body lines and no visible date/header: stored operator metadata is not physical-date/source-authenticity/line-reconciliation proof. Existing primary COMPLETED_WITH_REVIEW/reconciliationRequired and failed secondary remain unresolved. Strict source freeze currently correctly HOLDs unknown issue dates; no snapshot was captured by this investigation.

Exactly3 existing source/test paths after source GO: server/src/services/monthly-invoice-audit.js; server/test/monthly-invoice-audit.test.js; server/test/monthly-invoice-audit-postgres.test.js. A recognizes only exact scoped bidirectional supplier/opaque-literal/date/type representation links, preserving numeric/alias helpers. Opaque joins MUST NOT populate numeric validOrders or satisfy approved projection/posting proof: an APPROVED pair with plausible StockPosting remains unposted unless the unchanged independent proof qualifies. B reads only SQL-prebounded fixed V1 header/page metadata, actual terminal stage/status, explicit at-most5 distinct page IDs/indexes and existing validated DOC corroboration. Reject malformed/oversized/foreign/conflicting/competing/cyclic/ambiguous roles or attachment jobs; fingerprint every new projected field. Keep orphan row/status/identity review, unknown amount and reconciliation diagnostics. No raw JSON/original/OCR bytes in the report.

Derive corroborated issueDay BEFORE month selection; known issue date controls membership, receivedAt is selection fallback only when date remains unknown and never becomes issueDay. Test both month directions and unknown/HOLD. Canonical exact decimal corroboration preserves old credit/zero semantics. Raw rows/sourceCounts remain represented. Snapshot freezeEligibility/complete proof/payload, auth/tenant/licence, global identity helpers, posting/fiscal/payment/stock, D8 grants/jobs/control/capture, E1/E2/E3, intake/OCR/learning, lifecycle/schema/manifest/workers/workflows remain unchanged. No repair/rename/delete of other owners' accepted fixtures and no financial replay.

Current AGENTS/checklist/complete active/tracker/pending and C/E1/source-capture records inspected; all546 main-history commit metadata since installed C ac5850 through b5eab read across6 paginated responses. Preserve C installed technical receipt, E1 limited desktop-preview PASS, separate E2/E3 owners, D8 TODAY engineering/data-HOLD records and all incoming common-BackOffice/wallet/Chat/promotion scope. Required focused+native registered SQL/read-only controls and mandatory full CI, exact guarded delivery, then real selected-store report acceptance. CI is not LAB PASS. Actual first snapshot remains separate and requires unchanged strict eligibility plus genuine D8 action; unknown facts remain HOLD. Checkpoint: CHECKPOINTS/CHANGES/2026-10-28-invoice-month-audit-source.md. Whole C/report/email/inventory acceptance remains OPEN.

01/11/2026 - D8 TODAY FIRST CURRENT OBSERVATION / SCOPED LAB PASS / FUTURE AND RECOVERY OPEN

Retained D8 owner codex/central-monthly-capture-personal-ui-20261031/TODAY codex/central-monthly-capture-today-20261101, root executor. One actual native acknowledged Save returned STORED receiptfd3523ea-f95b-4f9f-bf3c-4e2de0e0e91c; fresh native GET reconciled sameid without secondPOST. October source observation21:20:00.511UTC=23:20Athens01Nov, stored21:20:00.918447UTC, LATE58800511ms from nominal01Nov05UTC. Current stock, not reconstructed07:00. Preview/Save/GET exact click timestamps were not separately captured: retain observed windows21:17:56.521058→21:21:31.903970UTC and exact DB times. Verified immutable46050bytes/SHA25688fb52a28b80384a4d45eef5716bc8ebf462c08bc3b62fcade5a3932696886f1, source5c3, coverage110products/12invoices/0pending; unknown amount/review retained, FORMAT_VALIDATED_STORED_ONLY/sourceAuthenticityVerifiedfalse. Raw9domaincounts NOT COLLECTED, not invented UI/receipt fields. All18six-table/3store controls exactmatch21:17:56.521058→21:21:31.820617UTC; snapshot0→1/monthlyjobs0→0/grantrev2firstDecunchanged. Other global executions NOT TESTED. Native grant firsteligible01Dec07Athens observed; runtimecontrol NOT RETESTED/no mutation by thiswork, protected14:33/0bc applied-proof retained only historically. TODAY first-capture acceptance removed from live pending; hosted original/version/recovery, actualfutureexecution/E2E3 and other retained residuals remain OPEN. DB19:43/19:52SIGKILLcauseOPEN/POS-DB-LOCK/no upgrade approved/no whole-systemPASS. Existing capture manual current title/status updated and old engineering marked HISTORICAL; full receipt CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-personal-ui-claim.md. RealPASS closes PDF deferral with the exact8docs synchronized now. No source/business replay or private originals/payload/screenshots committed.

HISTORICAL OWNED CLAIM / ENGINEERING EVIDENCE - SUPERSEDED ONLY FOR THIS ACCEPTED SLICE

Same retained central owner codex/central-monthly-capture-personal-ui-20261031, source continuation codex/central-monthly-capture-today-20261101; root operational executor. Existing PR3473 head8773ee6f7001c97662abfd8baeddd46d259d73b6 completed actual fullCI41319256166 with all5SUCCESS: 5106server/0FAIL/0SKIP at15:16:42.3735825UTC and8backup/0/0 at15:17:40.7345454UTC; workflow completed15:18:58UTC. Genuine personal HTTP/races executed on hostPG16 actual160015 and the SAME full native flow on the existing PG18 image actual180006 (case2175,24.37s), not merely the old recovery-image proof. Actual Chromium case2211 passed15:12:11.5855751UTC/7.66s. Historical attempt1 FAIL remains below; its typed-wait fixture fix did not weaken assertions.

Current main201a01a5b9634f19b1b51c72ea4069a910219086 and all19commits since reviewed35968 were read. Incoming customer-cost metering, native staff inventory/cash screens and their complete release/claim/accepted records remain with their owners. They do not alter the monthly ten source paths, schema/manifest, capture purpose, grants/jobs/scheduler/control, worker or normal CI/deployment guard. Recovered exact ten source blobs retain reviewed aggregateSHA256acb33beb45e8eb337e9c802ad0bbef83975674f6a13c01fd64b4eb7caf349837. This normal forward integration changes documentation composition/PDF only relative to the tested monthly source; the combined current-main full CI, merge and exact ordinary guarded delivery are still required. No stale mergeability cache or old PDF may overwrite current peer records.

Real first capture is separately DATA HOLD: root's read-only October eligibility review identified INVOICE_ISSUE_DATE_UNKNOWN, which the unchanged complete-source coordinator refuses as STOCK_SNAPSHOT_INVOICE_SOURCE_INCOMPLETE. No issue date is guessed, no invoice/payment/stock record is repaired or replayed, and no incomplete snapshot is labelled complete. The user-approved current observation remains October/LATE with actual observation time when admissible, not reconstructed07:00 stock. No actual capture/immutable original/hosted recovery or future scheduled execution PASS is claimed; no fake principal/job, date backfill, reset/drain, forced sweep, email or new backup is authorized by this engineering receipt. Existing genuine grant and observed future configuration remain protected; current runtime/control freshness must be rechecked before operational action.

01/11/2026 - TODAY CAPTURE ATTEMPT 1 FAILED IN TEST FIXTURE / PG18 ROUTE PROOF PENDING

Source remains unmerged/AWAITING CI and LAB. Actual CI41317615108/head7258dcb/job124881445661 completed5104tests/5103PASS/1FAIL/0SKIP at14:57:44.0659UTC; four other jobsSUCCESS, backup test step not reached. Sole failure was native personal HTTP own-insert rollback fixture: PrismaP2010 cannot deserialize void returned by SELECT pg_sleep(3.2), before final authorization assertion. Both3.2s/2.1s waits now SELECT a typed integer FROM pg_sleep, retaining real DB delay and exact expiry/rollback assertions; no production authorization/business logic changes.

Coverage accuracy: normal CI host database is PostgreSQL16; the earlier separate PG18 recovery/image proofs did not execute this new HTTP/race cohort. Same claimed fixture now adds a mandatory-in-CI second execution of the SAME genuine native flow against the existing PG18 recovery image, official postgres entrypoint, synthetic private DB/password/random loopback port, bounded tmpfs/resources/readiness, allowlisted child environment, actual server_version_num18 assertion and required cleanup. Missing image/PG18 fails CI; local native host+PG18 remain explicitSKIP. Updated fullCI is required, not yet PASS. Actual production0bc future control/grant remain unchanged, snapshots/jobs/executions0 at the last observation. No today capture, source deploy or broad PASS.

01/11/2026 - FUTURE MONTHLY CONTROL VERIFIED LIVE / TODAY CAPTURE SOURCE AWAITING CI AND LAB

Retained central D8 owner/root executor. The separate user-requested TODAY capture implementation is prepared within the previously merged10path claim; source delivery is AWAITING CI/exact deployment/LAB. No actual snapshot, capture-now PASS, future-job PASS or hosted recovery is claimed.

Root verified normal0bc release: CI41314926667 all5SUCCESS, actual5092server+8backup/0fail/0skip; naturalguard41316214612/job124876761670 EXPECTED0bc/CI_RUN_ID41314926667 executed Trigger and exact healthy Wait14:33:43.7600207UTC. Renderdep-dbjkou67bikc73fovmb0 LIVE0bc40631d355f922d98af5cc99ce3ffb4d3e6e86 finished14:33:27.575321UTC. Actual new trusted runtime Node20.20.2/FULL59ca/generalRESETfalse/capabilitytrue/controlVALIDenabledtrue matches saved epoch303042d6-7d12-4461-9f13-fdb17af48cb8, issuedAt13:54:29.613UTC/notBefore2026-12-01T05:00:00.000Z and fingerprints. Complete installer inspect TARGET/eligibletrue/reasons[]/unchanged catalogue/global/fencegeneration0/no maintenance/retirement/operation; actual health exact0bc/oktrue. Root14:36:25.217530UTC read has one active revision2 grant, original firstDec1 slot, snapshots/jobs/executions0; eighteen business count/digest controls matched14:29:41.618664→14:36:25.334204UTC. Scope is six tables across3LAB stores, not whole fiscal/all-table PASS. Prior SAVED/NOT APPLIED notes remain dated history, superseded only for this verified control configuration.

TODAY uses genuine personal preview+explicit confirmation, server-derived October period, actual current stock observed now honestly LATE, immutable existingReceipt/null reconciliation and final post-wait authorization; it never reconstructs07:00, rewrites December eligibility, fabricates jobs/principals, changes stock or sends email. Local Node20 targeted backend30PASS/0FAIL; native PostgreSQL fixture1SKIP locally (unavailable), mandatory real nativePG18/fullCI/browser proof pending. Restricted manual covers only observed nativegrant+futurecontrol configuration; capture-now instructions await actual scoped capture PASS. Hosted original/version/recovery remains OPEN. Exact implementation/test boundary and root receipt: CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-personal-ui-claim.md.

01/11/2026 — STORE-PROMOTION-CONFIG-01 / COMPLETE / SCOPED CONFIGURATION READBACK

Same owner ops/store-promotions-20261101; final receipt docs/store-promotions-complete-20261101. User resolved the source-code mismatch by explicitly requesting the existing local product names. The remaining actions used those existing tenant products and unchanged recorded barcodes. Six further canonical UI submissions created eight records; with the two earlier verified saves, each of the two explicitly requested stores now has exactly five active offers. Per-store progression1→3→4→5, correct modes/window/store names observed. Both final lists were independently read back after leaving/reopening Offers. The prior two saves were preserved, not replayed. Gift configuration selected the same existing product as the allowed gift; one unrelated internal duplicate remained unselected. Source identities, quantities, discounts, local SKU/retail and exact before/after evidence stay in the private execution journal, not this public repository.

Initial claim3467/head28b045191/docsCI41314612988 SUCCESS/merge8096c723 and partial receipt3468/headb9d99cc9/docsCI41315776298 SUCCESS/merge7a16e435 protected. Initial independently healthy ad111f6f; continuation public health independently confirmed0bc40631d355f922d98af5cc99ce3ffb4d3e6e86. This page did not change runtime, deploy, catalogue, base retail/barcode, grants, schema, stock, sale, payment or fiscal state. One background shift-read closed-connection message recovered through normal Refresh before the final submission; no failed/uncertain business submit was retried. Ongoing real sales are independent; stock/financial invariance, physical POS checkout and whole-module LAB/LIVE/USER acceptance NOT TESTED. This closes only the requested operational configuration/readback scope. No further identity clarification or offer creation remains. Remove this completed operational item from pending; preserve all N47/N48 and peer ownership. Manual records configuration-only usage. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-store-promotion-config.md.

01/11/2026 - D8 NATIVE PERSONAL GRANT VERIFIED / FUTURE CONTROL SAVED, NOT APPLIED / TODAY CAPTURE CLAIMED

Same retained central owner codex/central-monthly-capture-personal-ui-20261031, root executor; bounded source continuation codex/central-monthly-capture-today-20261101. User's newer «ας κανει σημερα 1-11» authorizes a separate genuine one-time current observation today; this supersedes the earlier future-only prohibition solely for that explicit action, without rewriting the December grant/control. Source NOT STARTED / AWAITING CLAIM MAIN and later full CI/exact deployment/LAB. First actual immutable capture and hosted recovery remain OPEN.

Root's genuine personal SuperAdmin LAB screen created inactive grant11711b36-943f-4b63-906a-499dc4cdd6b4 at13:53:18.045133UTC, then enabled the same grant at13:53:52.913560UTC, revision1→2, activation9560bd7e-f4b3-4d38-95ba-597e40eddb6e. Actual firstIssueMonth2026-11/firstScheduledFor01Dec2026 05:00UTC. Eighteen six-table business count/digest controls across3LAB stores matched immediately before/after both actions; scope is not all-table/fiscal PASS. Future dedicated control was saved/read back with notBefore2026-12-01T05:00:00.000Z; running web remainsad111 and this value is NOT APPLIED. Natural guard41314733805 deferred2625 for newer production main at14:17:09.8164466UTC; no hook. FULL profiles/general RESET=false preserved; no snapshot/job/execution/email/reset.

New source claim is only a selected-store authenticated capture-now preview/POST in existing D8, with database-derived latest due period, strict genuine OWNER/SA session/paid admission in source and final writer, immutable receipt reconciliation and explicit UI acknowledgement. Today after07Athens means October period, nominal01Nov05:00UTC, actual observation now honestly LATE: current stock, not reconstructed07:00 stock. No caller-selected dates/principal/candidate, fake job or automatic POST retry. Exact10source/test paths, final post-wait checks, unchanged old APIs and remaining acceptance are in CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-personal-ui-claim.md. Preserve peer common BackOffice/promotion/Chat scopes. Manual records only the actual create-INACTIVE→enable slice; capture-now/future execution/recovery have no PASS.

01/11/2026 — STORE-PROMOTION-CONFIG-01 / TWO SCOPED SAVES READ BACK / IDENTITY CLARIFICATION OPEN

Retained owner ops/store-promotions-20261101; receipt docs/store-promotions-handoff-20261101. Claim3467/head28b045191 docsCI41314612988 SUCCESS merged8096c723 BEFORE live configuration. Existing authenticated Platform SuperAdmin, normal canonical support UI, independently healthy ad111f6f9c69dee7dcce5713eed39abe72aab122. Two separate authorized saves, one existing barcode-matched product in each explicitly requested store, returned success and were independently read back active after leaving/reopening Offers. Each target list went0→1 with correct selected scope and period; existing retail displayed unchanged. No new catalogue/barcode or other-store write, sale, stock, payment, fiscal, role, schema or release action. Ongoing real business prevents any financial/stock invariance claim; checkout/physical engine effects NOT TESTED. Commercial terms and exact private baseline/readback journal are retained privately, not published here.

The requested plan is PARTIAL: four source product identities have different recorded barcodes; do not substitute old variants, add barcodes, create new products or duplicate the two completed saves. Same owner retained; remaining work is exact identity resolution, remaining authorized saves and independent readback. One precise user clarification is needed if no canonical exact mapping is found: whether the supplier plan also applies to the existing standard-barcode products or only the new source-coded packaging. No module-wide LAB/LIVE/USER PASS or N47/N48 replay/closure. Manual adds only observed operational guidance. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-store-promotion-config.md. All peer assignments preserved.

01/11/2026 — STORE-PROMOTION-CONFIG-01 / ASSIGNED / READ-ONLY PREFLIGHT

Owner ops/store-promotions-20261101. User explicitly requests configuring the new supplier plan in exactly Rizareio and Diadoxou Pavlou. Independent operational configuration only; no source/schema/deployment, sales, stock, fiscal, payments, grants, mail or other-store writes. Existing canonical authenticated UI and tenant/store guards only. Before any save, verify product identity/barcodes, current offers, dates and selected stores; capture a private per-action before/after journal. Refuse unresolved product identity or overlapping offers rather than create duplicates. Supplier email, attachments, commercial terms and private store baselines must not be published in this public repository. Current state NOT TESTED; no offer saved. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-store-promotion-config.md. Existing N47/N48 PASS and all other owners remain protected; no transaction replay for documentation. Single next: merge this docs claim with green CI, complete exact product preflight, then authorized configuration/readback through the existing UI.

01/11/2026 - LAB MONTHLY ACTIVATION EXPLICITLY APPROVED / FUTURE SLOT ONLY / FIRST CAPTURE ACCEPTANCE OPEN

Retained central D8 owner/root executor; docs continuation docs/monthly-activation-preflight-20261101. The user explicitly approved activation after the completed FULL-profile/readiness slice. Scope is only MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru/generation0. Root entered through the real personal SuperAdmin support issuer, selected this store and performed the actual authorized D8 GET: no personal grant exists; create-INACTIVE is offered. No token, credential or fabricated actor is used. Root's13:33:27.616023UTC baseline has snapshots/grants/jobs/executions0 and the exact nonmaintenance/nonretired/no-operation FULL fence; the selected MAIN shift displays zero transactions/cash/card/IRIS/total. These limited observations are not an all-business/stock/sibling PASS.

The bounded next sequence is one genuine personal create-INACTIVE, fresh readback/CAS revision, then explicit MONTHLY_INVENTORY_CAPTURE enable for that same grant. The manager derives firstIssueMonth/firstScheduledFor from current database time. Since01Nov07:00Athens has passed, the expected first slot is01Dec2026/07:00Athens (2026-12-01T05:00:00.000Z), for issueMonth2026-11. Bind the canonical dedicated process control's notBefore to the actual enabled grant's exact firstScheduledFor normalized to UTC milliseconds; create its distinct UUIDv4 epoch/issuedAt from the actual service clock, preserve exact key order and validate it before Save only. Keep FULL profile and general RESET execution=false. Apply through one existing exact-main full-CI/normal guarded release; no direct deployment or dormant-process mutation, cron trigger or forced sweep. No job or capture is due now.

Explicit sequencing decision: D4's earlier proposed first-manual-capture/hosted-recovery sequence is not falsely marked completed. The later user-approved future activation is staged behind the exact natural-slot time fence, while first immutable capture/readback and hosted version/readback/recovery acceptance remain OPEN. There is no supported public manual capture endpoint; do not fake a principal, backdate a job or use RESET to manufacture proof. Existing normal12:00 backup succeeded after schema installation, but its monitor/TOC/HEAD metadata is not a real restore or original-snapshot proof. No broad PASS, actual capture, email, financial/stock/fiscal action, new backup or new code is authorized here. Fresh control/identity/schema/worker/scope checks still fail closed. Exact contract and stop/revocation behavior: CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-personal-ui-claim.md.

01/11/2026 - MONTHLY FULL PROFILES AND SIGNED READINESS VERIFIED / CAPTURE OFF / AUTOMATION OPEN

The explicitly approved D7 profile-transition slice is complete. Same retained central owner/root executor; docs receipt docs/monthly-profile-delivery-receipt-20261101. Existing worker aa1cb kept its image/deploy/schedule and applied FULL on its normal12:30 run; root's actual in-service verification changed from BASE-only to FULLtrue. Web ad111f6f9c69dee7dcce5713eed39abe72aab122 is LIVE with MWS_STORE_LIFECYCLE_PROFILE=MONTHLY_INVENTORY_CAPTURE_V1, actual general execution='false' and monthly capture control unset. Pure selected-manifest description/current signed capability confirms FULL59ca657191a03dfeb751e907d95abe4291a3fc61da30c9d0602a116ed78757c2, Nodev20.20.2 and capabilitytrue. The explicit service-wide RESET-availability hold stays; no Blueprint sync or restoretrue is inferred.

Root submitted one full CI41307061118, attempt1: all5SUCCESS, actual5084server+8backup/0FAIL/0SKIP. Automatic guard41308272858 classified the documentation-only head and SKIPPED deployment, so it executed no hook. Root then ONCE used the existing normal deploy-render workflow_dispatch41308575722/job124854052270: EXPECTEDad111, CI_RUN_IDEMPTY exact-main full-CI lookup, actual Trigger confirmation12:54:26.6766246UTC and exact healthy Wait12:56:39.7059158UTC. Renderdep-dbjjd0h42hec73d6o0ug becameLIVE12:56:25.560308UTC via deploy_hook. No supplied CI-ID pin, direct Render bypass, duplicate hook or second full CI is claimed.

Root's new actual full inspector returned TARGET/guards/enrolled/currentFULL/generation0/eligibletrue/reasons[], with unchanged cataloguefde78bff.../global11e193b..., maintenancefalse/retiredfalse/opnull. Independent actual health returned oktrue/exactad111. Final read-only13:00:30.515614UTC (15:00:30Athens) confirms snapshots0/grants0/jobs0/executions0 and exactly the LAB FULL fence. Only monthly operational metadata was compared; financial/stock/sibling invariance is NOT TESTED. No capture/grant/monthly activation/email/reset/drain/fiscal action or installer replay occurred. The first actual healthy FULL/false/capture-OFF deployment is the compatible baseline, subject to artifact retention; the old EBE BASE/true health checkpoint is not an approved fallback. Personal approval, activation, first immutable capture and hosted recovery acceptance remain OPEN. This is configuration/readiness completion only, no USER/LAB/manual/whole monthly PASS. Full receipt: CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-profile-claim.md.

01/11/2026 - MONTHLY PROFILE TRANSITION APPROVED / FRESH PREFLIGHT CLEAR / WORKER SETTING SAVED / WEB PENDING

The user explicitly approved the concrete D7 packet: existing-worker FULL profile, web FULL profile with the general RESET-availability hold=false, and one exact-main force-full CI/ordinary guarded release. Same retained central D7 owner/root executor; docs continuation docs/monthly-profile-approved-preflight-20261101. This approval does not cover personal grants, monthly capture/control activation, reset/drain/start, email or financial/stock/fiscal actions. Installation is already complete and must not be repeated.

After the elapsed window, root rechecked actual healthy EBE ebe022701126f571dc5b5986af05f17935637ea8 and its complete trusted-service inspector: TARGET/guards/enrolled/currentFULL/generation0/eligibletrue/no reasons, maintenancefalse/retiredfalse/operationIdnull, unchanged cataloguefde78bff... and global11e193b... . Read-only12:23:12.033954UTC shows snapshots/grants/jobs/executions0 and one selected LAB FULL fence. Independent source comparison confirms wallet-postpaid and staff-shift changes do not alter the closed catalogues, columns, installer, profile selector, worker or wallet schema; postpaid reuses existing company-owned records/JSON, not new tables or ownership expansion. Current EBE full CI41304525017 has all5jobs SUCCESS. Later maine1ddf4a4 adds only staff-release documentation, preserved here.

Root saved the worker FULL profile using the observed Save and apply on next run option; fresh read-only UI confirmed the exact value and all original9keynames preserved plus the one new key. At12:27:03.237465UTC the worker image/deploy remained aa1cb/dep-dbj90815efls73dpvrbg;

the12:25:22.434468UTC heartbeat was still BASE, so fresh FULL runtime/HMAC verification awaited the next natural cron. No manual run, rebuild or new worker deployment. Web settings and full-CI/release execution remain pending. Fresh approved sequence remains worker existing aa1cb image FULL via Save and apply on next run, natural cron and true in-service FULL HMAC verification; then web FULL plus general execution=false via Save only and one force-full CI on this final merged reviewed main head with its ordinary guard. Healthy EBE equals the earlier source head, so the guard's same-revision refusal is preserved, not bypassed. Keep monthly control unset and the explicit global RESET hold; no Blueprint sync/reinstall/backward BASE rollback. Other owners' controls and current keys remain untouched. Overall monthly item9/hosted recovery/first-capture acceptance remain OPEN. Exact scope, checks and failure boundary: CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-profile-claim.md.

01/11/2026 - MONTHLY PROFILE TRANSITION PACKET READY / EXECUTION NOT APPROVED / AUTOMATION OPEN

Retained central D7 owner codex/central-monthly-profile-20261031; root executor, documentation continuation docs/monthly-profile-packet-20261101. The approved LAB CAPTURE3 installation is complete and is not repeated. This next concrete packet requests only compatible web/worker FULL-profile configuration and readiness, with monthly capture/control/grants/email OFF and an explicit global web RESET-availability hold (STORE_LIFECYCLE_EXECUTION_ENABLED true to false). It does not authorize a reset, personal grant, snapshot, scheduler activation or email.

After explicit approval and a fresh clear deployment/operation window: apply worker MWS_STORE_LIFECYCLE_PROFILE=MONTHLY_INVENTORY_CAPTURE_V1 to existing aa1cbcf8ed8461d4abb565376857508217fd6539 image using the observed Render option Save and apply on next run; let the normal five-minute cron run publish a fresh FULL signed capability. Then save web FULL profile plus general execution=false using Save only, and run one existing force-full main CI for the exact final merged packet revision, allowing only its ordinary guarded release after success. No direct web deploy, guard weakening, manual cron run or duplicate hook. General false intentionally holds reset availability across the web service; it does not block independently authorized monthly personal management. Keep the explicit service override authoritative and do not sync the Blueprint's older execution=true during this hold. Restore true only through separate named review.

Full scope, fresh conditions, exact LAB/hash bindings and fail-closed fallback are in CHECKPOINTS/CHANGES/2026-10-31-monthly-inventory-capture-profile-claim.md. A pre-transition BASE/true Render rollback is not an approved fallback over the installed FULL schema. Retain DDL/history, resolve forward without activation, and establish the first healthy FULL/false/capture-OFF deployment as the compatible baseline. No profile/configuration mutation or full-CI dispatch has been performed by this packet preparation. Overall monthly item9 and hosted recovery/first-capture acceptance remain OPEN; no USER/LAB/manual/business PASS.

01/11/2026 - MONTHLY CAPTURE3 / LAB INFRASTRUCTURE INSTALLED / AUTOMATION OPEN

Same retained central monthly owner (D6/D9), executor root; documentation continuation docs/monthly-install-receipt-20261101. After the user's explicit final install-only approval, the existing trusted Render Web Shell on srv-d9isenfavr4c73bdh52g ran the reviewed CAPTURE3 operator at actual source4c05a9442d03941d35585a1e39a0aceef3dc01a1. Target only MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ: companycmtpopbgk000prhb5qc60zxus / storecmtpopbgo000trhb5ng9ytiru. Fresh complete in-service inspector returned BASE/eligibletrue/no reasons/guardsfalse/no enrollment. One process-only install enablement and the actual inspector's0600 regular packet admitted one atomic installation: all3MonthlyInventorySnapshot/MonthlyInventoryCaptureGrant/MonthlyInventoryCaptureJob tables plus shared row/TRUNCATE protections across194scoped tables, and selected LAB enrollmentgeneration0 under current FULL59ca657191a03dfeb751e907d95abe4291a3fc61da30c9d0602a116ed78757c2. This was shared production-schema infrastructure, not isolated one-row LAB data.

Actual operator returned installedtrue/enrolledtrue/createdEnrollmenttrue/three createdtables. Independent subsequent in-service inspection returned

TARGET/guardstrue/enrolledtrue/eligibletrue/reasons[] with maintenancefalse/retiredfalse/operationIdnull. Read-only SQL2026-11-01T09:50:58.834393Z confirmed exactly the one selected fence, generation0/currentFULL, snapshots0/grants0/jobs0/executions0. Trusted-service public /api/health after installation returned oktrue/exact4c05 (approximately09:53-09:54UTC; no exactHTTPDate measured). No second install, reset/drain/start/capture, personalgrant, scheduler/control activation, email or financial/stock/fiscal action. No business before/after baseline was measured: financial/stock/sibling invariance is NOT TESTED, never inferred from zero monthly rows.

Installation evidence supersedes only earlier absent-table/no-enrollment/install-OPEN facts for this exact target. Overall monthly item9 stays OPEN; no USER/LAB/manual/business PASS or numbered closure. Web still defaultBASE (profileenvUNSET), Nodev20.20.2; pre-existing general execution flagtrue was left untouched, dedicated capturecontrolUNSET and installenableUNSET outside the one command. Actual in-service HMAC verification before installation was BASEtrue/FULLfalse; worker aa1cbcf8ed8461d4abb565376857508217fd6539 still advertised BASE. No secret/MAC readout or profile/deploy change. Next: review the concrete compatible web+worker FULL-profile transition and fresh signed readiness before any separately approved personalgrant/activation/capture. Do not repeat installation or ask again for install-only approval. No retroactive01Nov07:00Athens job/catch-up; natural future eligibility must bind the actual activation. Monthly invoice email remains a distinct purpose. Full receipt: CHECKPOINTS/CHANGES/2026-10-31-monthly-chat-catalogue-compatibility-claim.md.

01/11/2026 — AI-WALLET-POSTPAID-01 / SCOPED LAB PASS / REAL AMOUNT PENDING

01/11/2026 — READ-ONLY BILLING-SCOPE AUDIT / DISCLOSURE REVIEW OPEN

AI-COST-PASS-THROUGH-01 - SOURCE INSTALLED / SCOPED ASSISTANT AND SHARED-COST PREVIEW/OWNER REVIEW LAB PASS / REMAINDER OPEN

SHARED-COST-REVIEW-01 SCOPED HOSTED TEMPORARY REVIEW PASS01NovUTC/02NovAthens2026: before-source claim3490/CI41352549173/merged3f0f94; source3491/forward75dcd46 fullCI41354601991 and exact main e950259f665d4e4fea439ecb57221d33c01e7163/fullCI41355817818 both5150server+8backup/0FAIL/0SKIP. Actual pinned guard41356901232/job124998855215 healthy22:30:56UTC; Renderdep-dbjrojh42hec73dt3mo0 LIVE. Native synthetic review22:34UTC starts allPENDING (0approved/150pending/0waived); Aapprove-draft/Bwaive/Cpending =>59.62approved/30.77pending/59.61waived without redistributing original shares. Explicit choices temporary/not-saved/not-posted/no-debt. Editing synthetic base100->200 removed old result and recalculation reset allPENDING (0/300/0); wallet close/reopen discarded draft.

Fresh virtual LAB before22:33:01/after22:35:29UTC unchanged: available3680499/reserved930033/settled409468/credits5020000micro,14entries/9calls/debt0, master/invoice/emailOFF/additive rates0, only old disabled-email credit notice. No real customer read or business/provider/financial/email operation. PASS only synthetic decision UI, amount reset/close and virtual LAB invariance. Durable approval, actual monthly posting, real allocations/control/funding50EUR/email, external tariffs and parent36/general wallet remain OPEN. Catalogue flip-back/refusals are CI-only. Exact receipt CHECKPOINTS/CHANGES/2026-11-01-shared-cost-review.md, CHECKPOINTS/EVIDENCE/shared-cost-review-20261101, manual docs/manual/ai-owner-wallet/PASS.md; both shared PDFs regenerated for this actual closure. Retained owner feat/ai-owner-wallet-20261022; same executor root, no transfer/replay. Independent inventory source0a0b483 preserved, not certified by this e950259 receipt; do not cancel its full main CI with a docs merge. Next single action: separately claimed persisted actor/version/cost-bound approval and explicit idempotent posting policy; never treat AI funding as an expense.

SHARED-COST PREVIEW SCOPED HOSTED PASS01Nov2026: source3488/mergee75883e, corrected fullCI41346778506 (5141+8/0FAIL/0SKIP), mainCI41347967171 same. Independent C2 source preserved in installed5c3e9eacb69ce2c0df801eb5dd9aecf04506d69e; exact combined mainCI41348911362 (5148server+8backup/0FAIL/0SKIP), actual guarded release41350280601 healthy21:10:32UTC, Renderdep-dbjqkgu7bikc7389ei10 LIVE. Hosted synthetic100EUR/31,31,16days =>150EUR/59.62,59.61,30.77 with exact company totals and visible preview-only/no-charge label. Fresh virtual LAB before21:14:03/after21:16:10UTC unchanged: available3680499/reserved930033/settled409468/credits5020000micro,14entries/9calls/debt0, master/invoice/emailOFF/additive rates0. No API/persistence/posting in preview; no new paid/business/financial/email operation.

LIMIT: automatic approval review rejected structured private real-customer financial/control extraction; no retry. That comparison is NOT TESTED, with no private amounts/contacts published. PASS covers only synthetic hosted UI and virtual LAB invariance; real allocations/enrollment, external EUR tariffs, actual monthly posting, actual funding/first email and parent36/general wallet remain OPEN. Before-source claim3486 was green/main before implementation; local focused10PASS includes both unchanged financial control-order regressions; CI zero-request/stale-result tests are not separate hosted claims. Evidence CHECKPOINTS/CHANGES/2026-11-01-shared-cost-preview.md, CHECKPOINTS/EVIDENCE/shared-cost-preview-20261101, manual docs/manual/ai-owner-wallet/PASS.md; shared PDFs regenerated. Retained owner feat/ai-owner-wallet-20261022; same executor root, no transfer or replay.

Historical read-only provider/shared-cost audit01Nov2026, before this preview source: available original billing records and authenticated native Render resource usage now reviewed; compute/databases/disks/builds/cron/bandwidth and backup storage are separate cost categories, including separately costed test resources. Private amounts/accounts stay outside the repository. Prepaid AI funding is not consumption; historical/current/pending/projected costs stay distinct. Stored video/chat media consumes infrastructure even without an AI video call. At that earlier audit, the draft active-service-day allocation with once-only50percent and no duplicate direct usage was not implemented or posted. The newer hosted preview above supersedes only that preview implementation status; actual posting remains OPEN. Missing provider packages/EUR basis, remaining resource attribution and accepted allocation/enrollment rule remain OPEN. No new paid test or customer/cloud mutation. See CHECKPOINTS/CHANGES/2026-11-01-ai-cost-provider-allocation-audit.md; protected scoped assistant receipt3483/CI41340537023/merge3c6c73a retained.

Retained owner feat/ai-owner-wallet-20261022; same executor root, no transfer/replay. Source PR3475 merged ef9e0e7; installed exact201e4c21cd3c2a480a94b194a7b350523633e9f0, full mainCI41326081468:5118server+8backup/0FAIL/0SKIP, ordinary pinned guard41327819201 healthy16:47:58.3792866UTC. Engineering source/release is complete. See CHECKPOINTS/CHANGES/2026-11-01-ai-customer-cost-coverage-implementation.md and exact new receipt CHECKPOINTS/CHANGES/2026-11-01-ai-customer-cost-lab-acceptance.md.

01Nov2026 selected-store assistant LAB PASS: exactly one native message, one settled PLATFORM_CUSTOMER_ASSISTANT charge2592micro (entryf9a25d29-303a-4b83-8b1e-94f804e9c51b), available3683091→3680499micro equals settled406876→409468micro; history13→14/calls8→9. Old reserved930033 and credits5020000/debt0 unchanged. Final persisted master/invoice/email OFF and all3additional prices0. Actual requester/store/usage4918input+352output shown. Normal fresh MFA login resolved initial support-context block before any message. Private real-company control unchanged; no actual customer activation, credit, repayment or email. Preserve prior accepted B/C/D/E, postpaid3466 and old REVIEW; do not repeat transactions to recreate evidence. Manual/PDF receipt is scoped, not overall wallet or all-cost PASS.

Remaining OPEN: verified EUR provider tariffs for SERPER_GOOGLE/GOOGLE_CSE and staff connection/price, live acceptance of staff/search/invoice-search entries when configured, actual shared infrastructure/platform/SMTP enrollment and financial posting (preview rule now approved), broader wallet REVIEW/model/other-role acceptance and accurate first-email disclosure before real-customer activation/funding/mail. Source guards block unpriced paid search; this is readiness observation, not provider invocation PASS. Plain cash arithmetic/automatic report generation has no AI call; no paid AI video-analysis path identified, without declaring hosting/video/email costs free. Inclusive agreed50percent tariffs reused unchanged; verified new external base cost applies50percent once, additive rates stay0. Global internal work has no invented customer debtor. No source/schema/production SQL/env/license/fiscal/stock/payment changes in this receipt. Parent full-manual item36 remains OPEN.

01/11/2026 - COMMERCE-COMPACT-NAV-01 / DEPLOYED / AWAITING USER VISUAL

Authoritative technical delivery receipt · 2026-11-01T15:33:03+02:00.

Implementation and release are complete; only owner visual acceptance remains. Source3451 initial00b0bb7 / fullCI41291787489 and reconciled3774b4a81f534b9debf5d1055e018e40abffb475 / fullCI41293119062 both SUCCESS:5050server+8backup PASS,0FAIL/0SKIP. The initial merge was refused for a shared-record conflict after AI wallet claim3452; reconciliation preserved the identical CSS blob e66e32aafade1fe7f0e6918283614e8fdbe48135 and existing local geometry evidence. Source merged650b4dca3d66dc16b5020197e7a2ec475bef4575; exact main CI41293954312 SUCCESS, including the independently owned intervening FTEXT finalize source. No takeover or physical FTEXT acceptance is claimed.

Current independently healthy live revision ad111f6f9c69dee7dcce5713eed39abe72aab122 is19commits ahead/0behind merge650b4dca, with no later edits to commerce-home-modern.css. Exact current fullCI41307061118 / job124849851364 SUCCESS:5084server+8backup PASS,0FAIL/0SKIP. Normal guarded deploy41308575722 / job124854052270 SUCCESS; Render dep-dbjjd0h42hec73d6o0ug LIVE, finished2026-11-01T12:56:25.560308Z. Independent public /api/health observed ok=true and exact ad111f6f. Root-referenced served /assets/entry-D6cIwnBO.css contains the compact

.commerce-hub:not(.order-suggestions-view) selectors with42px desktop and44px coarse-pointer minimums. This is independent delivery verification, not a signed-in actor/menu or physical screenshot PASS. No new deployment, CI dispatch, account grant or business action was initiated for this receipt.

The screen-only first-panel navigation uses content-width wrapping buttons,6px gaps and inline18px icons/arrows while keeping the original18px readable text and existing palette, active/locked/focus states. Original menu handlers, module/store/auth guards, hidden order-suggestions navigation, print styling and selected-function content remain unchanged. Local synthetic real-Chromium geometry remains12cases PASS at1920/1366/1280/1024/768/390: nav440→186px at1920 and800→234px at1366, no horizontal overflow, all25buttons bounded and touch targets≥44px. Those measurements are synthetic geometry evidence, not the owner's exact physical viewport.

Same owner fix/commerce-compact-nav-20261101 retained. Single next action: refresh the commercial window and obtain owner visual confirmation that the smaller buttons match the requested reference and leave adequate room below. No stock, financial, fiscal, payment or invoice action is needed for this visual check. USER/hosted actor/physical visual acceptance remains NOT TESTED; do not reuse the separate Diadoxou operator-warehouse USER PASS. Manual unchanged until actual visual acceptance. Prior source-candidate/full-CI/deploy-pending text below is historical and superseded by this receipt.

Historical source and claim evidence.

Implementation after green/main claim3449.

Claim head d40a5abdfa43179ed1e26882cce0fb786a05abfb / docsCI41291243788 SUCCESS merged86b1c667ec57aeee5ef39701d27d9c37c849175b before source. One CSS-only change in commerce-home-modern.css changes the first-panel strip to content-width wrapping buttons with42px minimum,44px on coarse pointers,6px gaps and inline18px icons/arrows. Existing18px readable labels, palette, active/locked/focus/hover states and original handlers/module/store guards remain. Screen-only rules exclude the order-suggestions view and leave print styling untouched.

Work-safe build PASS / TABLE_SERVICE verified. Isolated real Chromium138 on the actual built CSS and synthetic25-button markup:12 before/after cases at1920/1366/1280/1024/768/390px PASS. Nav heights1920:440→186px and1366:800→234px; content starts earlier at every width, all25 buttons remain bounded with no horizontal overflow, font18 unchanged, touch targets≥44px, active/disabled colors and hidden order-suggestions navigation retained. Synthetic local render, not a hosted menu/action/actor PASS. Initial mobile probe needed a viewport meta tag; fixture corrected and all12 cases rerun. Evidence CHECKPOINTS/EVIDENCE/commerce-compact-nav-20261101/ includes geometry, screenshots and verification.json. No account/data/business/stock/financial or runtime change. Exact full PR/main CI and ordinary guarded independent healthy deployment remain required before visual user acceptance. Same owner retained; single next action: exact full source CI and release.

Historical before-source claim.

Owner fix/commerce-compact-nav-20261101, claimed 2026-11-01T10:59:31+02:00. Explicit owner screenshots show the 25 commercial navigation buttons at approximately64px height in five full-width columns, consuming five rows and hiding most of the selected function below. Owner requests the compact sizing of the existing upper tabs, preserving readable text and gaining usable content area. Independent CSS/layout scope only: CommerceHub's first-panel .commerce-module-strip, including existing dynamically injected launchers. No ownership of financial/stock/report/Chat workflows, permission/module/store selection, menu handlers or other pages' source.

Read-only finding: commerce-home-modern.css has stacked grid/button overrides, ending in five-column 64px dark cards. Canonical CommerceHub and extensions share the same strip. Implement content-width wrapping compact buttons around34-38px with unchanged readable typography, icons, active/locked/focus states, preserving submenu launchers and narrow-screen wrapping/touch usability. Do not hide functions, shrink the actual content, replace the existing application or alter API/auth/data.

Current main ec9798197f83294ed6b84b6ab1bac139874b79b1 and AGENTS/own active, tracker, pending/manual read; prior POS-OPERATOR-INVENTORY-01 Diadoxou USER PASS is being closed in the same documentation PR, independent of this new layout request. COMMERCE-COMPACT-NAV is NOT IMPLEMENTED / NOT TESTED; no new live acceptance. Before code, publish this claim green/main. Then bounded CSS change, actual Chromium geometry/interaction at desktop and narrow/touch widths plus Work-safe build and exact full PR/main CI; ordinary guarded healthy release before visual acceptance. No business writes or new grants. Single next action: finish claim publication, then compact only the commercial strip. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-commerce-compact-nav.md.

01/11/2026 - CHAT-FAMILIAR-UI-01 / ENGINEERING AVAILABLE / ONE COMBINED PHONE ACCEPTANCE OPEN

Retained owner codex/chat-native-readers-20261031, source feat/chat-familiar-ui-20261101. Documentation synchronization docs/chat-familiar-ui-delivery-20261101, PR3494; runtime validation is recorded separately below. Android0.1.15-preview/code16 and Web publicly verified. Message actions appear on press/long press, attachments/ready replies under +, search/announcements/settings and existing Web installation/store/share controls under overflow. Existing named delivery/read, quotes, reaction set-replace-remove, announcements and explicit acknowledgement, history search and destination-review-confirm forward remain available with unchanged permissions. Visible reaction summaries and receipt status retained; menu opening/photo gestures do not send/react/forward/read/ack. Whole photo initially fits without cropping, bounded1..6 pinch/pan, double tap, explicit zoom/reset/close; private preview cleared on background/navigation and stale store/token/older-photo responses rejected. No capture/scanner, backend/schema/auth/session lifetime, permission, runtime/key/guard or peer-owner change.

Distribution3471 head0a03d5c73eaff990aa97000a1ff36ed48e4ff918 fullCI41315987296, merged9d7ebe588ca46742de0ab6f8ace5117ad98afb70 exact fullCI41317300926 SUCCESS. Normal guarded deploy41350280601, Renderdep-dbjqkgu7bikc7389ei10, independently observed live5c3e9eacb69ce2c0df801eb5dd9aecf04506d69e. Public health, manifest object AND bytes, APK byte-equality/hash/bytes and public download UI verified. No direct deploy/env/key access outside existing workflow or real Chat send/read/ack/Push/email/business mutation. Evidence CHECKPOINTS/EVIDENCE/chat-familiar-ui-20261101/.

Publication freshness guard41318518424 correctly deferred the older distribution revision because newer peer runtime source existed on main; Trigger/Wait were skipped, not a release. Full combined-main CI41348911362 at5c3e9eacb69ce2c0df801eb5dd9aecf04506d69e then passed every applicable job with actual5148server+8backup/0FAIL/0SKIP. Android/source Chat/download artifacts remained unchanged across the peer-only descendant delta. The ordinary guarded workflow and public health above identify the actual combined revision; no docs-only CI was substituted for full source verification.

Physical/LAB/USER acceptance remains NOT TESTED. ONE combined actual-phone batch only: docs/testing/chat-familiar-ui-20261101.md includes this compact layout/photo requirement plus still-pending0.1.14 named delivery/read/quote/reaction/pin/explicit acknowledgement/history/one explicit forward to an authorized TEST Chat. Older0.1.13/0.1.12 checks remain absorbed, not passed. Earlier accepted entry/reopen/voice/media/appearance/auth/Push USER PASS preserved without replay, device/hash not independently identified. No new manual/PASS entry from CI. Finite encrypted revocable sessions, uncertain-send/no-auto-replay and exact company/store/module/session fences retained. Node22 HOLD, CHAT-FIRST-ENTRY residual owner, other native/iOS/assistant/N16 owners and overall N16 OPEN preserved. Single next action: one combined physical batch and central recording of actual outcomes; owner retained until completion or named handoff.

01/11/2026 - CHAT-FAMILIAR-UI-01 / HISTORICAL ASSIGNED BEFORE SOURCE / NOT TESTED

Retained narrow Chat owner codex/chat-native-readers-20261031; branch feat/chat-familiar-ui-20261101, 01Nov2026 09:58 Europe/Athens. Explicit user request: familiar Viber-style conversation with message actions on press/long press, attachments under +, compact overflow tools, full uncropped photo opening with pinch zoom/pan/reset. Scope ONLY existing Android/Web Chat presentation and photo viewer, no acquisition/scanner/iOS/assistant ownership. Current main0646fd4 and new peer report activation/operator inventory receipts reviewed; all peer scopes preserved. Existing Android0.1.14/code15 history/forward public engineering evidence and previous limited USER PASS remain protected. User now reports controls occupy too much conversation area; new layout/photo requirement NOT IMPLEMENTED/NOT TESTED. No new physical/LAB/manual PASS. Existing single expanded phone acceptance remains one combined check after this update, no intermediate/replayed accepted entry/media/send.

Preserve exact selected company/store/token/epoch fences, current server role/module/settings checks, finite encrypted revocable sessions, FLAG_SECURE/private preview cleanup on background/logout/navigation, explicit human read/announcement acknowledgement, named delivery/read distinctions, quoted replies/reaction set-replace-remove, explicit authorized destination-review-confirm forwarding with uncertain-send/idempotency safeguards. Menu opening and photo gestures must not send/react/forward/ack or implicitly mark read. Retain visible existing reaction counts and receipt status; all permitted actions remain discoverable through accessible message menu including keyboard/accessibility alternative. Photo initially FIT inside available viewport without cropping, pinch/pan bounded, reset and close available. No new camera/storage permission, file download right, durable private cache, schema/backend/business change or runtime/deploy/signing guard modification. Node22 HOLD and N16 central owner/residuals unchanged; overall N16 OPEN.

Next action after this claim is green/main: implement compact Android/Web controls and secure full-image zoom, run mounted/browser and actual Android gestures/lifecycle/full regression, exact full source/main CI, unchanged stable signing and normal guarded publication with independent public verification. Then one combined physical acceptance including still-pending0.1.14 scope; owner retained until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-chat-familiar-ui.md.

01/11/2026 — AUTO-REPORT-SUPERADMIN-RECIPIENTS-01 / REAL RIZAREIO ACTIVATION PASS / DELIVERY NOT YET OBSERVED

Authoritative continuation after user action-time confirmation «ΕΝΕΡΓΟΠΟΙΗΣΕΤΑ ΟΛΑ»: only the two already saved Rizareio recipients and DAILY/WEEKLY/MONTHLY. Same retained central report owner codex/central-auto-dispatch-20261022/executor root, receipt docs/report-rizareio-activation-20261101. Source3432 and LAB/claim receipt3439 remain protected. This completes the bounded no-invitation implementation plus requested selected-store activation; actual future delivery/inbox/complete financial reconciliation remains NOT TESTED, not a reason to repeat recipient invitations or accepted LAB actions. Broader cash/lifecycle/SMTP/monthly/backup and every peer owner stay retained.

Current main4c05a9442d03941d35585a1e39a0aceef3dc01a1 reviewed since55c2d7a; peer Chat distribution/history/forward and tracker heading repair preserved. All ten report runtime/test blobs remain exactly accepted2e934356. Existing fixed Render service srv-d9isenfavr4c73bdh52g/workspace tea-d9ie26vaqgkc739uudqg confirmed. Prior green/main3439 explicitly claimed only AUTOMATIC_REPORT_ACTIVATION_CONTROL; applied through provider merge replace=false, preserving other keys. Fresh activation issued2026-11-01T07:30:22.933Z, notBefore2026-11-02T05:00:00.000Z (07:00Athens), enabledtrue; exact time/fingerprint in activation-control.json. Old grants cannot match the new epoch. Raw control/epoch/env secrets and private recipient addresses are excluded from public evidence.

PERMANENT DEPLOYMENT PROVENANCE DEVIATION: the Render MCP environment-update operation automatically triggered API deploy dep-dbjel48ae00c73e0kqa0 at07:30:25.240216UTC, contrary to the save-only assumption. The response was inspected immediately; the incorrect provisional SAVE ONLY journal statement is explicitly corrected. No cancellation tool is exposed. No retry, second mutation, hook, restart, guard modification or bypass was attempted. Exact4c05a944 becameLIVE07:32:43.157090UTC and independent /api/health returned ok=true/exactsameSHA. Its delta from already healthy/fully validated aaf3dce was documentation only; report/runtime blobs unchanged. Full exact-main CI41284858846 was already running but completed only07:43:38UTC: all5SUCCESS, actualbuild124784210253 logs5050server+8backup/0FAIL/0SKIP, native/mounted/realHTTP E2E executed. This is POST-TRIGGER validation, NOT CI-before-deploy and NOT an ordinary guarded deployment. Future connector configuration changes must assume immediate automatic deployment and require exact successful CI BEFORE mutation. This deviation is never erased by later green CI. Real recipient approvals were held until exact fullCI and exact healthy readback succeeded.

Actual authenticated Chrome SuperAdmin /platform-admin, 01Nov09:44:23Athens: first existing recipient approved through «Έγκριση και ενεργοποίηση» with all3frequencies. Actual response explicitly says approved/automatic sending activated/no invitation; header thenENABLED, futurecutoff02Nov07. Second existing recipient approved09:44:59; firstapproval preserved. Close/reopen readback confirms both approvedSuperAdmin rows with original timestamps, all3selected persisted, ackcheckboxfalse and header «Η αποστολή έχει ενεργοποιηθεί για επιλέξιμες περιόδους». Cutoff stays02Nov07. One active RIZAREIO-POS-01/slots1+2/7+15/nullthird unchanged; no reportsettingsSave. No invitation/code/recipient action or forced/manual report SMTP. Actual dispatch awaits a complete newly authorized closed period and existing source/license/lifecycle gates. First eligible DAILY2Nov07→3Nov07Athens, WEEKLY2Nov07→9Nov07, MONTHLY1Dec07→1Jan2027 07; older/partial periods are not sent.

Read-only controls after activation: original ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ stillOFF with original verified/active-consent row; N40stillOFF/zeroactive recipients. Neither was reauthorized under fresh epoch. No business/stock/payment/fiscal/physical shift/SKU action or financial invariance measurement. Source READY/inbox/actual message acceptance/physical POS/mobile not tested. One privacy-safe status-only screenshot attempt failed Page.captureScreenshot timeout; no image artifact or invented visual evidence. Evidence activation-journal.md, activation-control.json and activation-native-ci.txt; real addresses remain private to the confirmed user/UI, not this public repository.

PASS is limited to actual selected-store administrative activation/persistence/all3periods/no-invitation and control OFF isolation. No outstanding user approval or invitation remains for this activation. Next remaining observation: actual eligible future delivery and inbox acknowledgement; do not force past data, repeat transactions, or request another blanket authorization. Full manual36/whole reports/other owners remain OPEN.

01/11/2026 — AUTO-REPORT-SUPERADMIN-RECIPIENTS-01 / INSTALLED / SCOPED HOSTED LAB PASS / REAL ACTIVATION OPEN

Authoritative outcome superseding this slice's earlier NOT IMPLEMENTED/AWAITING CI/LAB entries. Retained owner codex/central-auto-dispatch-20261022, executor root; source PR3432, receipt docs/report-admin-hosted-20261101. No other owner or broader delivery/cash/lifecycle/SMTP scope is closed. Mandatory invitations are superseded ONLY for the explicitly authorized SuperAdmin flow; historical optional invitation acceptance is not a blocker for this flow and is not newly claimed PASS.

Accepted source2e934356740108afd372172164deae0b1680898d CI41252374347 SUCCESS5024server+8backup/0FAIL/0SKIP. Combined96ea8e5ee94f3f5efc184b7a0a37b34f511fd012 CI41253507877 SUCCESS5039+8/0/0; normal source merge55c2d7a912313ad8589f8258ad9dc5084fa8ad49. Exact mainCI41254579730 attempt1 build124695174687 actually5039server+8backupPASS/0FAIL/0SKIP, new native parent412/all5subcases executed. Wholesale124695174688 stalled at apt-get update and hit20min infrastructure timeout; attempt1 is not whole PASS. Attempt2 completed all5SUCCESS, wholesale124700036964 reran successfully, previously successful exact-SHA build retained; no assertion/workflow/guard weakening. Ordinary guarded release41256506408 allstepsSUCCESS; Render dep-dbj8dd0ae00c73dgb2ag LIVE2026-11-01T00:26:05.583250Z. Independent /api/health ok=true exact55c2d7a. Runtime/source/test hashes unchanged from reviewed green source.

Actual hosted authenticated Chrome SuperAdmin, canonical /platform-admin, 01Nov02:29–02:34Europe/Athens. Fresh N40 CONTROL20261010 identified separately inside MYWORKSTATION LAB:0recipientrows/no savedsettings/0terminals/OFF. Main ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ retained as untouched control. Two distinct synthetic example.invalid addresses saved via «Αποθήκευση και ενεργοποίηση», all3periods selected, no old grant checkbox and no invitation/code/recipient action. Actual messages confirm approvals+periods saved and CENTRAL DISPATCH OFF/no invitation. Both approvedSuperAdmin rows persisted after close/reopen, first timestamp02:29:49 and second02:30:08, shared grant cutoff stayed02:29:49. Revoking A approval made only A inactive; B remained approved. Soft-revoking A subsequently invalidated B through existing legacy store-wide authorization invalidation, correctly rendered inactiveSuperAdmin rather than recipientconsent. B then soft-revoked; explicit «Κλείσιμο αυτόματων αποστολών» acknowledged. Final N40zeroactive recipients/OFF/no settingscreated; synthetic audit rows retained, not claimed physically deleted or byte-identical baseline. No SMTP/invitation sent. Real-store recipients/authorizations and central configuration untouched.

Control readback: MAIN1/2/3,7/15/23,reviewed=false; fixed30Oct preview1source/settings3/HOLD and one original verified/active-consent recipient unchanged. No physical terminal, operator shift, SKU/quantity/payment/stock/fiscal transaction used. Financial invariance was not independently measured by UI. Screenshot capture failed twice with Page.captureScreenshot timeout; no screenshot artifact or visual-proof claim. Text/native readback and timestamped journal retained. PASS only for administrative Save/shared list/persistence/truthful provenance/revoke/cleanup/control isolation, not actual READY delivery, inbox, irregular openings, physical POS/mobile or whole report reconciliation.

Same selected store recipient list is used for DAILY/WEEKLY/MONTHLY. Actual SuperAdmin approval is distinct authority, never forged mailbox verification/recipient consent. Remaining bounded action: one coordinated final activation for the user's two already saved real-store addresses after action-time confirmation of sensitive financial destinations. No new invitations required. Runtime explicitly observed centraldispatchOFF: a separately reviewable configuration cutover is required before real automatic sending, not a code failure or a missing recipient invitation.

Configuration preparation claim (not applied): only AUTOMATIC_REPORT_ACTIVATION_CONTROL on existing service srv-d9isenfavr4c73bdh52g / workspace tea-d9ie26vaqgkc739uudqg, provider merge replace=false preserving every other key. Fresh UUID/issuedAt at actual application and next07:00Europe/Athens strictly later as notBefore; do not reuse old epoch/cutoff. Fresh epoch invalidates all old grants, so no other store silently activates. Existing guarded deployment only after exact-main fullCI; no direct hook/restart/bypass. Real destination approval only after new epoch is live and fresh scope readback. No configuration mutation, SMTP, deployment for this claim or real authorization yet. Overall actual delivery remains OPEN with retained owner. Evidence CHECKPOINTS/EVIDENCE/report-superadmin-recipients-20261101/{verification.json,hosted-journal.md,combined-native-ci.txt}.

01/11/2026 — AI-OWNER-WALLET-01 / DETAILED HISTORY INSTALLED / SCOPED LAB PASS

Retained owner feat/ai-owner-wallet-20261022; bounded continuation feat/ai-wallet-activity-details-20261031 completed. This is the authoritative outcome for detailed history; earlier NOT IMPLEMENTED/AWAITING LAB entries below are historical. The whole wallet remains OPEN with the same owner. Receipt branch docs/ai-wallet-activity-lab-pass-20261101. No unrelated assignment is released.

Source PR3426 final b8b3925e9b013c26c66cb3010caf136a74a97cfd fullCI41249512281 SUCCESS:4997server+8backup/0FAIL/0SKIP/all5jobs, actual native PostgreSQL/browser/HTTP E2E; recovery41249512271 SUCCESS7/0/0. Superseded pending push runs are not counted as PASS. Existing guarded deployment41252493732/job124688773943 had preflight, pinned trigger and exact health SUCCESS. Render dep-dbj7inetlv9c73ceoq0g LIVE31Oct23:29:19.811485UTC; independent /api/health200/ok/exact946fa. DB0lockwaiters/0longactivequeries before LAB. No direct hook, runtime/env/schema or guard bypass. Later peer main changes are preserved; acceptance refers specifically to installed946fa.

Actual hosted Chrome SuperAdmin acceptance01Nov01:32–01:48 Europe/Athens, MYWORKSTATION LAB / MAIN, existing LAB POS2 shift used only as control. Read-only new history9rows before E:324013microEUR final charges,930033pending reservation,5000000credit. Five filter checks separated REVIEW, purpose mismatch, credit author, MAIN and unknown source, then reset. Original legacy callers remain explicitly unknown; credit author/manual resolver are separate from original requester.

One new synthetic ACTIVITY-LAB-20261031-E/SYN-E1/qty1/PIECE/net12EUR/VAT0, one upload/intake, one original automatic assistant preview. Entry db81bfdb-b149-4ecc-9339-7b5320224979 SETTLED, purpose INVOICE_ASSISTANT, surface INVOICE_WORKSPACE, DIRECT, actual authenticated SUPPORT/SUPER_ADMIN caller; caller matches configuration audit and document creator, not effective OWNER. New document de3b1f93-d649-4da2-b1da-313bf716a299, order3e964b80-edd5-437f-aa3e-4c75c58473d5, job3560ca7b-c96b-47d8-ae51-74be8f81a1d1 remain one DRAFT/NEW/AWAITING_APPROVAL. CREDIT means unpaid payment terms, not a credit note; paymentTransactionId NULL. No apply/product creation/approval/payment/stock/fiscal/email or second provider request.

Original tariff9719input/9716cachewrite30m/662output tokens independently gives82863microEUR; actual charge and balance debit exactly82863, all3additional fees0. Balance4675987→4593124; reserved930033unchanged; version32→33enable→35one reserve+settle→36restore. Master/invoice/email OFF restored and native readback confirmed; prices remain0. Every original9wallet entry, old B hold and accepted C/D remain byte-identical; real-company wallet/entries/audits/notices unchanged (absent wallet stays absent). All3LAB store stock/movements/transaction/product digests, products110/suppliers62/open shift and its0transactions/cash/card/IRIS/total unchanged. Only MAIN gained one attachment/job/document/order/line. Each mutation had fresh before/after controls privately persisted before continuing.

Native final history10rows:406876final/930033pending/5000000credit; new purpose+support+MAIN+SETTLED filters yield1row/82863final/0pending/0credit. User identity, actual role, provider/model and exact breakdown visible; expanded native details bind the original document and tokens. Safe screenshot excludes personal names. Evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/activity-e-acceptance-20261031.json and activity-history-20261101.jpg; full private raw controls remain private. Instructions docs/manual/ai-owner-wallet/PASS.md. Canonical tracker PDF regenerated.

Scope PASS: installed detailed Admin history, actual support initiator/document binding and exact single-call charge, legacy unknown, separate holds/credits, native filters and measured business controls. NOT TESTED hosted: physical POS/operator, delegated or actual OWNER session, other payment/header/full/recheck/background routes, mobile device, email delivery, real-store OCR accuracy and all model/cache/long-context tiers. Native isolated source coverage is separate evidence, not hosted acceptance. Initial pre-draft ai-recheck image reading remains unmetered/OPEN. Historical REVIEWs require original evidence, never reconstructed caller, refund, repricing or retry by guess. No real-customer activation, credit or price changed. Broader wallet, Rizariou agreement/funding and old REVIEW investigation remain with retained owner; single next action is review original unresolved usage evidence without replay, under a separately measured scope. No further call is needed for this completed history acceptance.

31/10/2026 — AUTO-REPORT-TWO-SHIFTS-01 / INSTALLED / SCOPED HOSTED LAB + USER SETTINGS PASS

Bounded correction owner fix/automatic-report-two-shifts-20261031 completed after approved transfer/green claim3416. Source3418 finalhead d962bd7e16cdad2ccf0289c32a84385e3af828fc CI41242839435 SUCCESS; merge c2af89a72cea3b9c8d9964b15172fb9f09a84aea exactmainCI41243812623 SUCCESS (4972server+8backup PASS/0FAIL/0SKIP). Ordinary guarded deploy41245048490 preflight/pinned trigger/exact health SUCCESS, healthy c2af89 confirmed31Oct21:52:43UTC; independent health200/ok/revision matched. No direct hook, force, schema or guard bypass.

Actual authenticated SuperAdmin Chrome acceptance31Oct~21:54–21:58UTC at canonical /platform-admin: fresh LAB baseline7/15/23 MAIN1/2/3 reviewed=false/version1. New save MAIN1/2 + blank third succeeded/no email; native required/valid false/true without3 and true/false with3 (invalid draft not submitted). Reopen showed persisted blank third and1/2, daily30Oct preview source1/settings2 HOLD for ambiguous/previous-open/missing1/2; no universal-third hold. Fresh N40 control remained0terminals/save-first/previewdisabled/default23, no write. LAB then restored7/15/23 MAIN1/2/3 reviewed=false, refresh and preview source1/settings3 HOLD. Monotonic version1→2→3 intentional; no old unchanged Save replay.

USER requested Rizareio configuration started absent/default7/15/23/no rows. Saved exact active RIZAREIO-POS-01 only, slots1/2,7/15/null, reviewed=false; native success/no email and refresh readback confirmed. Daily30Oct preview source5/settings1 HOLD ambiguous/overlap/previous-open. This is limited configuration/HOLD acceptance, not whole-day READY or financial acceptance. Both existing recipients still unverified/no active consent, dispatchOFF. No recipient/invitation/consent/authorization/activation change or email; broader recipient acceptance/SMTP/delivery remain OPEN with existing owners. Invitations expire10minutes; refresh invitations only with recipient readiness and selected frequencies, recipient confirms personally.

PASS only for optional-third two-shift Save/readback, native required-third refusal, store isolation, guarded runtime and retained HOLD. Actual late-midnight READY is isolated native CI evidence, not a live complete-day acceptance. Opening boundaries7/15 remain explicit; fully irregular/early openings still require review. No payment/stock/SKU/physical shift/fiscal operation; financial source invariance not independently measured by hosted UI. No physical POS/mobile/other-role/actual delivery acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-automatic-report-two-shifts.md; evidence hosted-journal.md + verification.json. Broader central dispatch/cash/lifecycle and every unrelated owner retained. Bounded AUTO-REPORT-TWO-SHIFTS-01 removed from pending only; next remaining action is recipient confirmation, not another source rewrite.

2026-11-01T00:52:34.018194+02:00 — AUTO-REPORT-SUPERADMIN-RECIPIENTS-01 / USER-DIRECTED CONTINUATION / ASSIGNED BEFORE SOURCE

01/11/2026 — AUTO-REPORT-SUPERADMIN-RECIPIENTS-01 / EXACT SOURCE CI PASS / SHARED INTEGRATION

Same retained central report owner/root. Exact source3432/head2e934356740108afd372172164deae0b1680898d fullCI41252374347 all5jobsSUCCESS; actual build124688690255 logs5024server+8backupPASS/0FAIL/0SKIP. New native parent412 and all5subcases executed PASS, including truthful inactive provenance assertion; actual mounted/admin-valid-proof cutoff tests executed. Not a hosted acceptance or installed release.

Normal merge refused because the shared pending registry changed during validation. Reconcile current main50146f3f094d846f52b2801f1e60de0332aaf1c4, preserving all peer wallet provenance, POS operator warehouse, monthly Chat catalogue/security, Node window and new Chat search/forward records and PDFs. All six owned runtime and four test blobs remain byte-for-byte the accepted source; no test weakening, force merge or guard bypass. Progress is nested within this owned claim so future peer prepends remain independent. The exact combined PR/main full CI and normal guarded healthy runtime are still required before the new no-send LAB test. Production destinations/settings/authorization/SMTP remain untouched. Single next: validate this combined head.

01/11/2026 — AUTO-REPORT-SUPERADMIN-RECIPIENTS-01 / SOURCE CANDIDATE / AWAITING FULL NATIVE CI AND HOSTED ACCEPTANCE

Before-source claim3430 reconciled head89f025dcbdc0ccbbc205dd2a6f44c33bc62869f5 passed docsCI41250270846 SUCCESS and merged2c9eacce863fce4c6b7946666bdec2b9405265ac BEFORE source edits. Same retained central integration owner/executor root. Intervening owner-action/FTEXT records preserved; no unrelated source edited.

Implemented separate report-superadmin:<actual actorId> provenance and MWS_REPORT_SUPERADMIN_AUTHORIZATION_V1 domain in existing compatible authorization storage. API/UI truthfully show SUPER_ADMIN approval; verifiedAt/verifiedBy are never fabricated. Exact company/store/email/recipient identity/version/authorization revision/lifecycle/frequencies/issuer/time proof; explicit current locked SuperAdmin, strict schema and CAS across recipient/authorization/grant/policy. One transaction adds/approves address and selected-period grant/policy, without SMTP. Existing current authorization/grant/policy reused without writes or cutoff rewind; other recipient rows preserved. Existing valid recipient proof stays RECIPIENT unless explicitly superseded for changed periods. Outstanding invitation proof is cleared on new administrative approval. Revoked addresses are not silently restored. No schema/catalog/provision/backup or public invitation change.

Eligibility and actual delivery-start metadata have distinct explicit administrative authority assertions; mailboxVerified/consentActive are not forged true. Legacy mailbox/consent assertions remain required for legacy records. Same scope/version/lifecycle/current principal+session/external epoch+OFF/source HOLD/closed-day/cutoff/immutable slot/no replay/uncertain SMTP gates remain. Main UI now offers email→Save and activate, keeps optional invitation/code tools secondary, same store recipient list, explicit approval revoke, truthful external OFF and epoch-mismatch header.

Local Node20 focused18PASS/0FAIL/3native-infrastructureSKIP; all automatic reports201PASS/0FAIL/14native-infrastructureSKIP. Full local server completed4353PASS/0FAIL/330native-infrastructureSKIP; frontend build PASS/TABLE_SERVICE. Final epoch-header adjustment separately rechecked by3 mounted UI tests PASS/0FAIL. Exact full native CI remains required. New native PostgreSQL/actual HTTP fixture must execute unskipped in exact full CI: role/URL scope/injection refusal, existing unverified address atomic approval, separate second recipient/no-op/cutoff invariance, revoke/edit invalidation, two-client CAS, commit rollback, unchanged foreign/business control and zero invitations. New source/payload/start tests cover admin-only authority with recipientVerified=false/consentActive=false, proof tamper, principal/lifecycle/cutoff/source HOLD and revoke before start. Mounted new flow records one administrative POST, no invitation/request, truthful approval/OFF and late-store response discard; existing legacy tests retained.

SOURCE PREPARED / NOT INSTALLED / NO NEW HOSTED PASS. Production recipients/consent/authorization/policy/grant/external control untouched; no email, financial/stock/shift/fiscal operation or old test replay. Existing two-shift settings/PASS retained. Full exact PR/main CI, ordinary guarded healthy release and new no-send LAB acceptance precede any actual destination activation. Final actual enablement must remain explicit and scoped to the user's two intended addresses; external controls must not accidentally release other preexisting grants. Single next: full native CI and review of this source candidate.

Same retained integration owner codex/central-auto-dispatch-20261022, central executor root; continuation fix/report-superadmin-recipients-20261101. User explicitly supersedes mandatory invitation for SuperAdmin-managed destinations: they hold the recipient addresses and require email/save/activate with no recipient action, same stored destination list on each automatic period. This is a new administrative authorization basis, never fabricated mailbox verification or recipient consent. No Owner/employee extension. Existing two-shift hosted PASS3418/3428 protected; historical invitation acceptance stays separate, existing valid proofs untouched unless the administrator explicitly changes that recipient authorization. Current main8e1128e6 and history since hosted c2af89/e08bc54 reviewed; intervening FTEXT stop source does not alter report runtime. Existing manual/active/tracker/pending report ownership reviewed; no competing second owner or release of backup/cash/lifecycle/SMTP peers.

Bounded source after green/main: NEW explicit SuperAdmin-authorization helper/writer, automatic-report-dispatch-policy.js, automatic-report-eligibility.js, automatic-report-delivery-lifecycle.js narrowly adding distinct trusted administrative authority assertion (legacy mailbox gates retained), routes/automatic-report-dispatch.js and AutomaticReportDispatchManager.jsx. Persist explicit report-superadmin:<actorId> authority in the existing provenance string column with a separate canonical proof domain binding company/store/email/recipientVersion/authorizationRevision/lifecycle/frequencies/actor/time. Legacy table/column names remain compatibility storage, but API/UI expose authorization basis and issuer truthfully; verifiedAt/verifiedBy never fabricated. No DDL/migration/catalog/backup changes, no public-token auth bypass or preexisting public invitation weakening. Tests: pure provenance/tamper/cutoff, mounted no-invitation Save/scope discard, actual HTTP current SuperAdmin denial, native PostgreSQL atomic save/grant/policy/readback/rollback/revocation/concurrency/control, and full existing report gates/CI.

One scoped management transaction validates explicit SuperAdmin action and expected recipient/authorization/grant/policy revisions, stores address+administrative authorization and selected-period grant/policy atomically, preserves all other recipients, does not send any mail, and never changes external activation control. No activation/catchup on GET or automatic promotion of existing unverified addresses. Shared automatic recipients remain store-scoped and version/lifecycle/revocation bound. External OFF, incomplete-source HOLD, paid-module/licensing, current principal/session, post-authorization cutoff, immutable slot/no replay and ambiguous SMTP guards retained. No emails to real recipients or production authorization action until installed and exact native/LAB acceptance; user action-time confirmation will be needed before any actual newly authorized sensitive financial destination is enabled through browser.

Status NOT IMPLEMENTED/NOT TESTED. Existing manual remains historical accepted usage, not new behavior. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-report-superadmin-recipients.md. Single next: publish green/main claim, implement the bounded administrative path, full CI/exact guarded runtime, then isolated LAB no-send acceptance before real destination activation. All unrelated owners preserved.

31/10/2026 - POS-OPERATOR-INVENTORY-01 / SCOPED USER PASS / DIADOXOU CONFIRMED

Authoritative owner confirmation · 2026-11-01T10:56:21+02:00.

The owner reported exactly: «ΝΑΙ ΕΙΝΑΙ ΟΚ ΤΟ ΔΟΚΙΜΑΣΑ ΣΤΗΝ ΔΙΑΔΟΧΟΥ». This confirms the requested operator warehouse use from POS at Διαδόχου Παύλου as a scoped USER PASS. It supersedes the pending real-user confirmation for this delivered feature; do not request the same acceptance again or replay a business transaction for documentation. Remove this bounded item from PENDING_WORK. The deployed technical receipt, source3427, release verification3444 and full exact live CI41284858846 (5050 server+8 backup PASS/0FAIL/0SKIP) remain evidence of implementation delivery.

Acceptance is owner-reported, not an independently observed transaction or stock-control LAB. Exact operator, physical terminal, client revision at the time of use, individual actions/products, stock or financial before/after and the full per-action/tenant/revocation matrix were not supplied and remain NOT TESTED as physical/live measured claims. The independent health read while recording this confirmation was ok=true, revision4c05a9442d03941d35585a1e39a0aceef3dc01a1; this does not identify the physical client's loaded revision. No new account/module grant, stock/financial/fiscal action, source change or deployment was performed for this closure.

Manual docs/manual/pos/PASS.md now records who may use the feature, the opening flow, default-off right, action rights and visible-stock-only boundary, plus troubleshooting and the exact limits of the USER PASS. Same owner fix/pos-operator-inventory-20261031 closes this bounded delivered requirement. Other assignments and existing decimal-keyboard/consumption-launcher PASS remain unchanged. Single next action: no repeat of the accepted test; address a separately identified new issue if reported.

Historical technical release and implementation evidence (superseded only for pending user confirmation).

Authoritative technical release receipt · 2026-11-01T09:44:38+02:00.

The former release blocker is resolved. The live revision is 4c05a9442d03941d35585a1e39a0aceef3dc01a1, confirmed by an independent /api/health read (ok=true) on 01/11/2026. Exact main full workflow_dispatch CI41284858846 / build-and-test124784210253 SUCCESS: 5050 server + 8 backup tests PASS, 0 FAIL, 0 SKIP, including native PostgreSQL, Chromium and real HTTP flows. The source PR3427 full CI41252087179 had 5024 server + 8 backup PASS before merge50146f3; the live revision is 28 commits ahead / 0 behind that merge, with no later edits to the operator-inventory files in that comparison.

The prior normal guarded release of source revision aaf3dce10b7d19fb700fb1f30a4e464cf498e67b passed exact full CI41260513845 and deploy workflow41261365197 / job124715186597, reaching Render dep-dbj9d2ou01pc73eqp6vg LIVE at 2026-11-01T01:33:45.165289Z. Current Render dep-dbjel48ae00c73e0kqa0 is LIVE at 2026-11-01T07:32:43.15709Z, trigger api, revision4c05a944. The aaf3dce→4c05a944 comparison contains only checkpoint/evidence/roadmap/PDF changes, no production source. The current API-triggered deployment was independently observed, not initiated by this owner; it is not mislabelled as a new guarded deploy. No duplicate CI dispatch, deploy hook, environment/runtime change or deployment was initiated in this continuation because exact current full CI was already running and the service was already healthy.

Independent served-asset check: /assets/main--Q_6fgnJ.js loads entry-D6nmC0za.js, which contains permissions.inventoryPos, the «Αποθήκη από POS» label and PosInventoryOverlay-DCurUn_e.js. The served overlay contains the bound /api/store-pos/stores/:storeId/inventory namespace, X-Inventory-Generation and «Το στοκ είναι μόνο για προβολή». This verifies technical delivery, not functional operator or physical-terminal acceptance.

The implemented default-off «Αποθήκη από POS · χωρίς αλλαγή στοκ» right opens the existing archive from Functions POS → Αποθήκη. Actual STORE_OPERATOR identity/session/profile/store/object/licence/module/lifecycle and existing per-action rights remain binding; retail rights cover priced SET, barcode transfer and delivery nullable-price overrides. Stock is visible/read-only and direct stock operations, count/finalize/transfer/destruction/stock-moving merge and nonzero opening/import stock are denied. No Owner token bridge or blanket account grant was introduced.

Real account grants=0; real module changes=0; hosted business/stock/financial/fiscal actions=0. Operator LAB, real operator login and physical-terminal acceptance remain NOT TESTED. Existing decimal-keyboard and consumption/destruction visual PASS are preserved and are not reused as acceptance for this feature. Manual unchanged because no functional LAB/USER PASS is claimed. Owner fix/pos-operator-inventory-20261031 retained. Single next action: enable the explicit right only for an identified intended operator, then verify the operator warehouse and action rights with fresh recorded before/after and unaffected controls before any hosted write; never replay old accepted business fixtures. All prior implementation/CI-cancellation notes below are historical and superseded for current technical release status.

Historical implementation and handoff evidence (superseded by the receipt above).

Authoritative handoff · 01/11/2026 (Europe/Athens).

Implementation is merged, not deployed. Source PR3427 exact head fb634f5a7a9363883570256e061bae81d6fee952 / full CI41252087179 SUCCESS: 5024 server + 8 backup tests PASS, 0 FAIL, 0 SKIP; native PostgreSQL namespace, unchanged Chromium and real HTTP flows passed. Latest local rights batch 28 PASS / 0 FAIL / 0 SKIP; Work-safe client build PASS. Merge50146f3f094d846f52b2801f1e60de0332aaf1c4 includes intervening monthly Chat lifecycle catalogue work b9ce60a without taking over its ownership.

Exact main CI41253122609 was CANCELLED while pending behind CI41252677187 when newer documentation main33a2d314254618bd25d4378b2c23b189b45daa9f entered the same queue. It did not run a build-and-test job and is not a main PASS. The connector retry endpoint returned HTTP403, "This workflow run cannot be retried"; no workflow-dispatch tool is available. No deploy hook, environment/runtime change, guard bypass or manual deployment was attempted. Independent health read before this handoff: ok=true, revision946fa417b858fbece65c9ded6cb8db506bca91b0; Render dep-dbj7inetlv9c73ceoq0g LIVE, finished2026-10-31T23:29:19.811485Z. This is the previous revision and

DOES NOT include the new operator warehouse.

The implemented default-off permissions.inventoryPos checkbox is labelled «Αποθήκη από POS · χωρίς αλλαγή στοκ» and opens the existing archive in Functions POS → Αποθήκη. Actual STORE_OPERATOR identity/session/profile/store/module/object/lifecycle and per-action rights remain binding. The latest hardening requires retail rights for priced SET, barcode transfer and nullable delivery price overrides. Stock is visible/read-only; direct stock writes, count/finalize/transfer/destruction/stock-moving merge and nonzero opening/import stock are denied with transactional rollback and buffered HTTP responses. No real account/module grant, hosted business/stock/financial/fiscal action or new LAB/USER/physical-terminal acceptance occurred. Operator LAB and physical acceptance NOT TESTED. Existing decimal-keyboard and consumption/destruction visual PASS are preserved; no new manual PASS is claimed.

Owner fix/pos-operator-inventory-20261031 retained; not released or transferred. Single next action: run the existing MyWorkStation CI workflow manually on the latest main through GitHub Actions (full-CI workflow_dispatch), then wait for its successful exact build-and-test and the ordinary guarded Render release; verify independent exact health/assets before requesting separately scoped real operator acceptance. Do not rerun old accepted business fixtures or activate an unidentified real operator.

Historical implementation evidence (superseded by the authoritative handoff above).

Source implementation / AWAITING FULL CI AND LAB

The new default-off permissions.inventoryPos checkbox opens the existing Archive from the POS Functions menu. editDescription is now an explicit checkbox alongside the retained retail/barcode/new-product rights; no existing account is granted anything. A dedicated exact-action /api/store-pos/stores/:storeId/inventory namespace retains the credential identity and validates current credential/profile/session/employee/store/company, licence/modules, object membership, action rights and browser lifecycle generation. Canonical router factories share one RepeatableRead transaction; nested service transactions reuse it, errors and commit failures roll back before an HTTP success is sent. Stock quantities and movement counts are compared inside that transaction. No Owner identity, generic module grant or general-token fallback is introduced.

Action coverage: own-store archive/search/filter/pagination, stores/catalog/details/statistics, movements/purchases/price history, local retail, metadata/card/barcode transfer, existing bulk card, composition and delivery; new card with opening stock zero; generic/full-format zero-stock import (special source-profile migrations remain central-only); scoped CSV, label/flyer printing and existing separately-authorized POS orders launcher. Store retail/active updates preserve company base retail/active; shared metadata keeps its existing company semantics. The operator UI locks stock and denies transfer/merge; the server exact allowlist excludes stock adjustment, count/finalize, transfer, destruction, supplier return and unknown paths, and rejects forged stock fields/nonzero workbook stock. Existing independently authorized POS sales/consumption/invoice actions remain unchanged.

The operator API pins current session, actor, store and lifecycle, aborts/invalidates closed views and polls live access while open. Legacy document-level inventory actions explicitly ignore operator-marked shells; scoped React actions receive row objects and the bound API, never infer IDs/store from table position or use an Owner token. The archive is lazily loaded so existing POS module initialization, scanner, consumption launcher and no-print behavior retain their existing paths.

Validation so far: Work-safe frontend build PASS; focused actual POS/archive, permission editor, unchanged Owner/VAT/source-workbook/import/bulk/transfer/no-print batch: 92 tests, 89 PASS / 0 FAIL / 3 explicit native-infrastructure SKIP. An initial full local run exposed compatibility regressions, which were corrected and rerun in focused tests; that initial run is FAIL, not a release receipt. The second full local run completed: 4653 tests, 4326 PASS / 0 FAIL / 327 explicit infrastructure SKIP; exact PR CI with PostgreSQL is still pending. It is local evidence, not LAB PASS or a native receipt. Native PostgreSQL HTTP coverage is added for live grant/revocation, own-store retail/barcodes/bulk/import, unchanged stock/financial controls, forged stock/cross-store denial, trigger-induced stock rollback and deferred commit failure; local native infrastructure is unavailable, so native tests are explicitly NOT TESTED locally and must run unskipped in CI. No hosted/physical operator acceptance, real grant, business write, deploy or LAB PASS is claimed. Manual remains unchanged. Next: complete focused/full checks and native PR CI, then exact main CI and normal guarded healthy deployment before scoped acceptance.

Native SQL receipt and browser correction (PR3427, before release). Exact head bb6463ce5e913c8da55eb3f7e414ba1e5237095f / CI41246986998 / job124672617752: server tests 4984 PASS / 0 FAIL / 0 SKIP, including the new native operator namespace test. This is synthetic CI, not LAB. The overall workflow FAILED the unchanged Chromium SET footer visibility assertion: the new disabled fieldset wrapper interrupted the existing direct-child flex layout. The wrapper is removed; rights now disable the original controls individually, preserving the existing SET layout selectors and browser assertion. Native destruction/transfer harnesses were adapted to named router factories; business routines and their assertions remain intact. A further actual mounted check verifies disabled stock/composition controls and the original direct SET flex child. Closing the archive refreshes the already-loaded current-store POS catalog through its existing read API, so subsequent catalog prices update while the existing basket stays intact; the launcher waits for an initialized store catalog. Local follow-up: 11 focused boundary/client tests PASS, and 4 original archive/card mounted tests PASS. Final full browser CI, exact main CI, guarded release and real operator acceptance remain pending. Evidence CHECKPOINTS/EVIDENCE/pos-operator-inventory-20261031/verification.json. No real account right/module was changed and no hosted business action occurred.

Implementation after published claim3421

Initial94eb354e/docsCI41242824950 was green but conflicted with newer shared records and never merged. Reconciled exact77773604/docsCI41243312224 SUCCESS merged6b34016 before source. Other owners and PDF preserved. Reuse canonical routers through DB-injected factories with unchanged default Owner mounts; a separate STORE_OPERATOR namespace will validate current grant, actor/store/object/module/lifecycle and run canonical non-stock operations in one bounded DB transaction. No Owner role/token bridge. Stock invariants and per-action permissions remain server-enforced. Full action coverage and native/mounted tests still pending; no LAB or source completion claimed.

Owner fix/pos-operator-inventory-20261031. Explicit new user request: operator can open full warehouse from POS, with operator rights, except stock changes. Current main4a177813 read with AGENTS, active/tracker/pending/numbered/POS manual and retained owner-access/Inventory39/new-product scopes. Independent STORE_OPERATOR inventory-entry and server-boundary subtask; CENTRAL-BACKOFFICE-ACCESS-01 remains with its owner for delegated BackOffice identities and financial writers. No second ownership of that matrix, bulk-card semantics, invoice/stocktake/fiscal/payment algorithms or existing product creation rules.

Read-only finding: InventoryArchivePanel already has the full archive UI; its readOnly mode removes all edits, so it does not satisfy this request. /api/inventory-archive explicitly denies STORE_OPERATOR; /api/owner-products Owner guard denies it as well. Product details/catalog can return company-wide stores/aggregates. Legacy document-level inventory context actions use the general token and inferred URL store, so they cannot be reused unchanged inside operator POS. New work must not merely reveal UI or promote the operator to OWNER.

After this claim green/main: explicit per-operator «Αποθήκη από POS» right, default false, current live profile/session/store/module checks, one POS launcher into the existing archive with actor-bound API context. Reading/search/filter/print/export/card history and permitted non-stock product actions use this exact selected-store boundary and original canonical services. Existing per-action price/barcode/new-product permissions remain binding; no generic inventory grant overrides them or auto-enables old rights. Support non-stock card/bulk/labels/composition/delivery and zero-opening-stock creation/import only where each executable canonical action is safely bound; enumerate full action coverage and do not claim completion for missing paths. Deny unavailable actions explicitly rather than use an Owner token or broad URL-prefix allowance. Preserve company-shared product metadata semantics while excluding other-store prices, stock, purchases, sales aggregates and object IDs from operator-only reads/actions.

Stock must be visible but locked: deny stock adjustment, stocktake create/count/finalize, transfer, destruction/supplier return, stock-moving merge and nonzero opening/apply-stock imports through this warehouse boundary, including crafted direct requests and payload fields. Existing separately authorized POS sale/return/consumption/invoice workflows remain unchanged; this new right never grants them. Do not mutate existing quantities or activate any real-store permission/module during implementation. Shared/fallback credentials, Owner role impersonation, stale readbacks, other-store IDs and global DOM action/token leakage must be refused. Closing/revoking/switching store clears archive context and returns focus without losing the existing basket or issuing a business command.

Required: actual mounted full archive/operator-menu tests, native HTTP/SQL deny-by-default and live revocation/tenant/object/store/payload tests with exact stock/financial controls unchanged for permitted metadata edits, full PR/main CI and normal guarded exact healthy release. CI is not LAB PASS. Hosted new grant or write acceptance must be separately identified with fresh before/after controls; no credentials, production SQL/schema/seed/migration, stock/financial/fiscal transaction or accepted-fixture replay in preparation. Preserve the completed POS-CONSUMPTION-ENTRY visual USER PASS and decimal keyboard PASS. Manual unchanged until real scoped acceptance. Same owner retained through source/release/acceptance. Single next: complete implementation verification and native full CI before release; the published claim is already green/main. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-pos-operator-inventory.md.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / NATIVE INVENTORY + CASH SOURCE DELIVERY / FULL PERMISSION SCOPE RETAINED OPEN

Same retained owner. Native inventory and cash presentation batches are implemented and merged; complete all-functions permission coverage remains ASSIGNED/OPEN. Current executable grant catalogue is still18, candidate55families/340actions still only review material. No new rights, profile defaults, role promotion, schema/recovery-worker change, hosted grant/credential or production financial/stock/fiscal action by this page. Company authority remains distinct and unimplemented; preserve every peer owner and native business algorithm.

Inventory3477: finalhead8444d2bb2d942eba44911fef05daa4b329fbc5b2/tree48c8b9384999c764a40de3c4d9474bcb490b253f, fullPRCI41323171784/job124898013306 and mainCI41324373994/job124901440283 both all5SUCCESS,5096server+8backup/0FAIL/0SKIP plus complete build/browser/HTTP; merge5148885b3ef25582bede56fa75565b332a447631. Initial58f243b8/41323007915 CANCELLED after supersession, no PASS reused. Actual InventoryV2Center/InventoryFastCount now handle personal inventory through selected-store redacted reads and existing canonical writers. Automatic scoped list, read-only search, native additive scanner versus absolute pencil, multiple barcode lookup and existing create/finalize reason/confirmation. Personal inventory never renders cost/price; blind counters also get no expected/difference columns. Expected fields require both actual data and finalization authority. Native Owner-only zones/grants/free conversion/mobile/delete/clear/bulk/product/import/export/print remain unavailable to personal sessions. Same count event/version and ambiguous-operation verification/navigation freeze; finalized state read-only. Owner defaults and accepted Owner stocktake behavior preserved. Local38/0/0 and Work build passed, overlapping with other focused sets, not an additive unique total.

Cash3478: heade5e216a7930ee1c55d4e23be350e18b8aa7f20bb/tree56f6adb98fbdc1a63fe11be481b779682911e5a6, fullPRCI41324957178/job124903176019 all5SUCCESS,5118server+8backup/0FAIL/0SKIP and complete build/browser/HTTP; merge201e4c21cd3c2a480a94b194a7b350523633e9f0 includes peer AI customer-cost source3475/ef9e0e7 unchanged. Actual CashControlPanel/CashReconciliationPanel now render the existing cash.read report, native periods/issues/handoff/history and verified-copy. No Owner overview/day-summary/document/paper/AI/investigation reads, write/import/export form or unsupported history-page requests; no invented zero card. Old store/period result hidden and invalid reply rejected before copy. All Owner defaults, accepted reviews, export path and arithmetic preserved. Local46/0/0 and Work build passed; not a hosted acceptance claim.

Release proof: Exact combined mainCI41326081468/job124907694187 all5SUCCESS,5118server+8backup/0FAIL/0SKIP and full build/browser/HTTP. Normal automatic guarded deploy41327819201/job124911447565 SUCCESS: fresh exact-main preflight, rollback artifact13092525292/SHA256c9ecda6b62028e18cfb5e6f721e9b8d607216ead7b191ff12d7ff9196ad2d16f (previoushealthy35968eda), pinned trigger16:45:35UTC and exacthealthy201e4c21 at16:47:58UTC. Independent public/api/health HTTP200/ok=true confirmed exact201e4c21cd3c2a480a94b194a7b350523633e9f0 at16:49:09UTC1Nov2026. Installed source includes both native UI batches and peer3475 unchanged; no hosted functional PASS inferred. Inventory automatic deployment41325507171/job124904541369 performed no physical release: preflight at16:18:18UTC refused older5148 because newer production sourceef9 was on main. Overall workflow SUCCESS is not evidence of installation. Final combined exact CI and pinned healthy evidence above supersede that preflight-only outcome. Peer running CI and freshness protection were preserved. Evidence CHECKPOINTS/EVIDENCE/common-backoffice-permissions-20261101/native-release.json.

Peer docs3479/1467d536 preserve the exact shared engineering release and explicitly unexecuted customer-cost LAB/environment handoff. All four peer files were merged unchanged; no new source, grant, funding or other owner scope was taken.

Hosted personal visual/read/write acceptance remains NOT TESTED/AWAITING USER; this code/CI/release verification is not LAB/USER PASS. Manuals and numbered checklist remain unchanged, no accepted transaction or grant replayed. Broader CommerceLauncher navigation, remaining executable per-action editor/backend integrations and company-scope/recovery compatibility remain OPEN. Same owner retained for the full residual. Single next action: integrate the remaining native inventory operations as distinct executable Owner-selected permissions with exact canonical transaction guards, before expanding the other families; no automatic grant or broad route bridge. Exact next-operation review: docs/roadmap/BACKOFFICE_INVENTORY_ACTION_AUTHORITY.md. Shared commerce navigation and company authority follow their explicit native/data/recovery review. Checkpoints 2026-11-01-common-backoffice-permissions.md and 2026-11-01-common-cash-backoffice.md; current ledger and both compatibility packets preserve the exact boundaries.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / NATIVE CASH READ VIEW CONTINUATION / SAME RETAINED OWNER

Same full-scope owner, feat/backoffice-native-cash-20261101; no second claim or permission expansion. Parent inventory batch3477 remains independently under exact fullCI; do not merge or call that batch installed until its own gates pass. This continuation reuses actual CashControlPanel/CashReconciliationPanel presentation for the existing cash.read right only, using the exact existing selected-store/period redacted endpoint. Native review/import/export/paper/investigation/overview actions remain unadmitted and must not mount or request. Preserve Owner defaults and accepted cash reviews/arithmetic, session/store/module/generation boundaries and every financial invariant. No new route/key, schema/worker change, hosted grant or business-state action. Current native inventory branch38/0/0 local evidence is not cash acceptance. Cash hosted acceptance NOT TESTED/AWAITING LAB; full requested rights scope stays OPEN. Compatibility packet docs/roadmap/BACKOFFICE_CASH_AUTHORITY_COMPATIBILITY.md records the distinct data models and exact denied operations. Local mounted Owner/personal/read-only/stale-response/period/copy and native route regression, full exact CI/main and guarded healthy release required.

Native cash source candidate: actual CashControlPanel and CashReconciliationPanel reused for cash.read, with the existing exact selected-store personal report endpoint. Shared Owner heading and date-period fields; verified report/issues/handoff history/copy. No fake overview/day-summary zero cards, no Owner document/paper/AI/investigation/pairing reads, no review/import/export controls or history-page requests unsupported by that endpoint. Old report is hidden immediately when store/period changes; invalid period/store replies cannot be accepted or copied. Ordinary Owner defaults, native endpoint selection, review payloads and algorithms preserved. Local Node20 mounted read-only/native Owner/copy/period/stale/route regression46PASS/0FAIL/0SKIP and final Work build PASS; exact full PR/main CI, normal guarded release and hosted acceptance required. Existing18 executable rights unchanged; whole all-functions scope remains OPEN.

Parent inventory3477/head8444d2bb2d942eba44911fef05daa4b329fbc5b2/tree48c8b9384999c764a40de3c4d9474bcb490b253f passed fullPRCI41323171784/job124898013306, all5SUCCESS with5096server+8backup/0FAIL/0SKIP and complete build/browser/HTTP. Merged5148885b3ef25582bede56fa75565b332a447631; its mainCI41324373994 is running, physical inventory release/hosted acceptance not yet claimed. Initial inventory58f243b8/CI41323007915 superseded, no success inferred for that old head.

01/11/2026 — Native inventory continuation before source / same retained owner

Continue the explicitly published next action from merged receipt3476/f9ef03ea, docsCI41320835609 and main41320974965 SUCCESS (runtime deliberately skipped). Installed35968eda verified after full5093+8 CI and guarded41320104728. Same CENTRAL-BACKOFFICE-ACCESS-01 owner, source branch feat/backoffice-native-inventory-20261101; no new or transferred claim. Full current AGENTS, own release/compatibility record, current main history and applicable native inventory/session acceptance reviewed. Existing Owner additive scanner versus absolute pencil correction, reasoned finalization/read-only/stale locks and existing personal18 capability/ambiguous-request guards remain protected. No accepted LAB action repeated.

Bounded next source: use actual InventoryV2Center layout and InventoryFastCount for personal inventory through explicit controlled inputs/callbacks. Suppress unintegrated zone/grant/free/delete/clear/bulk/import/export/product/print actions and all unavailable cost/price/expected-derived fields, preserving read/count/create/finalize as distinct existing rights. Keep the selected-store redacted read and canonical guarded writers, identical event/version verification and pending navigation freeze. No schema or new grant/API admission. Hosted acceptance NOT TESTED/AWAITING LAB; full requested function coverage remains OPEN. Mounted Owner/personal comparison and existing ambiguity/revocation/session regression required, then full exact PR/main CI/ordinary guarded release; no manual/PASS closure from CI.

Source candidate: actual InventoryV2Center now hosts the same native layout/history/work area and actual InventoryFastCount in controlled personal mode. Selected-store redacted list loads automatically on opening; create/finalize forms retain the existing explicit event/reason/confirmation contract. Native scanner uses additive quantities and pencil uses absolute correction, preserving Owner semantics and four-decimal personal inputs. All personal count writes still pass the existing parent coordinator, version/event identity and uncertain-response verification. Read-only mode has search without count controls; expected/difference columns require both explicit finalization authority and actual returned data; cost/price columns remain absent. Personal mode never mounts Owner catalogue/zones/QR grants/mobile/export/import/product-event/clear/bulk/delete/print paths. Existing Owner defaults, count semantics and native finalization unchanged. No new backend route or grant. Local Node20 final scoped native/session/guard regression38PASS/0FAIL/0SKIP and final Work build PASS. Earlier overlapping focused sets are not additive totals. Exact full PR/main CI, guarded release and hosted acceptance remain required; AWAITING LAB, whole all-functions scope OPEN.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / SHARED NATIVE FOUNDATION RELEASE / FULL SCOPE RETAINED OPEN

Common fullmainCI41318666982/job124884397102 SUCCESS all5jobs,5093server+8backup/0FAIL/0SKIP, full Work build, browser and real isolated HTTP flows. Automaticdeploy41320018519 classified documentation-only and deployjob124888073249 SKIPPED: no physical release from that run. Normal manual guarded deployment41320104728/job124888327884 SUCCESS: exact main preflight, preserved rollback artifact13089530583 (SHA2565a24d1806159edf3e9c224e37156328084af2510ee41cf444ea966e7b1f77838; previoushealthy0bc40631), pinned trigger35968eda and exact healthy at15:18:30UTC. Independent public/api/health HTTP200/ok=true confirmed exact35968eda7b1cef8be50f1d073e648efcb6c32b8e at15:19:41UTC1Nov. Release evidence CHECKPOINTS/EVIDENCE/common-backoffice-permissions-20261101/release.json and deploy-success.jpg. This is release verification, not functional LAB/USER acceptance.

Same retained CENTRAL-BACKOFFICE-ACCESS-01 owner. Shared native foundation is delivered; full user request remains ASSIGNED/OPEN. Existing18 executable store/action capabilities and role defaults unchanged. Candidate55families/340actions are review inventory only, not selectable or admitted rights. Same BackofficeShell/BackofficeStores and native StoreCloudPage shifts/payments reused with exact granted navigation; unrelated native tools/polling/administrative actions absent for personal sessions. No hosted grants, credentials, schema/SQL or financial/stock/fiscal business writes by this page. No functional

LAB/USER PASS inferred and no manual/numbered closure.

Foundation PR3463/head76009ebd4fe6e6d7cd536741e2539c0622827c45/treecb03f0dfe78d3cedcc233d9af181cb6fab604cba fullPRCI41313776328/job124869720758 all5SUCCESS,5092server+8backup/0FAIL/0SKIP; merged0bc40631d355f922d98af5cc99ce3ffb4d3e6e86. FullmainCI41314926667/job124873182940 SUCCESS with same counts/full build/browser/HTTP. Initial41311810240 FAIL5086/1/0 and skipped later stages remains recorded, fixed only stale test matcher with real mounted preservation coverage.

Native shortcut PR3472/headf6734955a87bdbf0a62aca7d3755bf5ce7f4838c/tree058df70a66720a5e0d103db9891c94c15bedee33 fullPRCI41316411845/job124877498372 all5SUCCESS,5093server+8backup/0FAIL/0SKIP and full build/browser/HTTP; mergeddcd54f8cbe9ce1581f26942690c97887f1be7c97. Its pushmainCI41317679429 and laterdocs41317785427 cancelled pending by shared concurrency, not PASS. Common manualfullmainCI41318666982 at35968eda7b1cef8be50f1d073e648efcb6c32b8e reused without duplicate/cancel; 359 containsdcd with only peer documentation since, and exact owned runtime files unchanged.

Remaining: native InventoryV2Center/InventoryFastCount blind-count/action/ambiguous-write adapter, native CashControlPanel/CommerceLauncher navigation, all applicable per-action editor and canonical backend integrations, separate explicit company authority with app/worker/recovery compatibility, grouped direct-API/revocation/regression coverage and hosted visual/functional acceptance. Preserve each independent module owner's business logic and monthly FULL worker/profile ownership. Compatibility packet docs/roadmap/BACKOFFICE_COMPANY_AUTHORITY_COMPATIBILITY.md is PROPOSAL/NOT INSTALLED, including existing8-column manifest review and precise native inventory data/action mismatches. Single next action for this retained owner is the native inventory adapter, not a role promotion, bulk grant or broad route bridge. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-common-backoffice-permissions.md; same owner continues full residual, no second claim.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / COMMON OWNER BACKOFFICE + ALL FUNCTIONS / RETAINED OWNER CLAIM BEFORE SOURCE

ASSIGNED same retained owner, continuation feat/backoffice-common-permissions-20261101. Explicit new user correction: staff must see the identical Owner BackOffice and all BackOffice functions must have explicit permissions, separately per person/store/action. User rejects the separate reduced staff workspace. This supersedes the earlier six-section presentation; it does not invalidate the existing18 server-protected actions or establish functional acceptance. Latest shift-read release ebe02270 remains installed/AWAITING USER; no read/write USER PASS inferred.

Read main fd854b05, full AGENTS/current active/tracker/pending/checklist, relevant checkpoint/manuals and common history including independently owned monthly FULL transition3460/3461. Preserve all peer ownership and business algorithms. This owner claims shared access/navigation/catalogue and each native admission integration only, not parallel redesign of monthly/stock/invoice/payment/fiscal/Chat/Workforce logic. No second app, role impersonation or blanket route-prefix admission. Keep actual EMPLOYEE personal identity, live session/grant revocation, zero automatic new rights, selected-store/object/company/licence/lifecycle checks, actor/audit/idempotency and every native financial/stock/fiscal guard.

Work order within this full assigned scope: inventory the actual Owner pages and actions (including secondary dialogs/import/export/print/settings), use one shared Owner/staff shell/navigation/module screens, extend the Owner permission editor with executable per-action rights, integrate exact canonical server operations with fresh transaction-time checks, then grouped regression/full exact PR/main CI/ordinary guarded release and measured LAB acceptance. Store and company-wide authority are distinct; a store grant must never authorize company/global data or ownership/platform administration. All requested BackOffice modules remain in the inventory; unaudited operations remain denied and must not be presented as functioning grants. Platform/SuperAdmin itself is not an Owner BackOffice role.

Acceptance: same visual/component navigation as Owner with only granted stores/functions/actions; read/create/edit/delete/approve/finalize/cancel/import/export/print/configure as each native function provides; direct URL/body/object/store/tenant attacks denied; live revocation/late responses cannot expose old scope; existing accounts gain no rights automatically; all old18 actions and ordinary Owner behavior preserved. No hosted grants/credentials/business writes by this page. New UI/all-functions coverage NOT TESTED/OPEN; no manual/PASS closure. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-common-backoffice-permissions.md. Single next action after merged claim: produce actual function/action inventory and implement shared shell/module authorization without replacing native modules.

01/11/2026 14:22 Europe/Athens — CENTRAL-BACKOFFICE-ACCESS-01 / PERSONAL SHIFT READ RELEASE INSTALLED / AWAITING USER / RETAINED OWNER

Same retained owner fix/staff-shift-read-20261101, release receipt docs/staff-shift-read-release-20261101. New user screenshot confirms installed personal BackOffice reached Rizareio/Chalandri / RIZAREIO-POS-01 but shift read failed; no financial/stock acceptance inferred. Actual legacy module interceptor reproduced HTTP200/null without calling overview after denied Owner-only licence probe. Changed only delegated client interception/UI rules and initial failed-read presentation; canonical server company/store/live-grant/licence/terminal/default-deny guards, strict response identity checks and every financial algorithm/writer remain unchanged. Ordinary Owner disabled/enabled-module behavior and stale/late-store protections remain covered.

Source PR3458 exact headedb16198139f1040c0491491fe0136d571980e54/tree89d7782da6b127cd82b573cb7203fd75c3148f2c: full CI41303663987/job124839823774 all5SUCCESS,5084server+8backup/0FAIL/0SKIP, browser/build/full HTTP flows. Mergedebe022701126f571dc5b5986af05f17935637ea8. Full main CI41304525017/job124842383551 all5SUCCESS, same5084+8/0/0 and complete flows. Earlier source CI41303338119 stopped at missing source-PR active-list delta; runtime was skipped there, not PASS. Corrected before final full CI. Local Node20 targeted interceptor/mounted/route/capability/session regression30/0/0 and Work build passed; initial ungenerated Prisma client was corrected locally, no schema or production DB action.

Ordinary automatic guarded Deploy41305765063/job124845761297 SUCCESS: full-CI/freshness preflight12:18:40UTC; rollback artifact13083113602 preserved; pinned trigger12:18:43UTC; exactebe02270 healthy12:21:06UTC. Independent no-cache /api/health12:22:00UTC returned ok=true and identical exact revision. Evidence CHECKPOINTS/EVIDENCE/owner-backoffice-permissions-20261031/staff-shift-read-release.json. No direct hook/Render bypass, credentials, grants, hosted business writes, production SQL, migration, seed or repeated transaction.

OPEN/ASSIGNED: installed correction, personal read-only acceptance AWAITING USER. Cloud browser has no authenticated session; user's remote AnyDesk screen is not controllable here. Single next action: reload existing installed MyWorkStation, choose Rizareio/Chalandri and intended terminal, open Πωλήσεις και βάρδιες and refresh; confirm store-scoped data or a genuinely verified empty shift without the previous error. Do not open a shift, change permissions or repeat financial/stock actions to bypass a read failure. Preserve all earlier18-right installed/source/native evidence; grouped hosted writer/role/revocation/control acceptance and broader store readiness remain OPEN with this owner. No new hosted functional PASS, no manual or numbered PASS closure, no completed pending task removed. Latest common tracker PDF regenerated without deleting peer records. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-owner-backoffice-permissions.md.

01/11/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / PERSONAL SHIFT READ USER FAIL / RETAINED OWNER BEFORE SOURCE

Same retained owner, branch fix/staff-shift-read-20261101. New actual user screenshot image(20261101-113506).png shows installed personal BackOffice, Rizareio/Chalandri, RIZAREIO-POS-01, manager profile: refresh FAIL «Η ενημέρωση δεν αντιστοιχεί στο επιλεγμένο κατάστημα», followed by an unverified no-open-shift message. Login/navigation observed only; financial/stock effects NOT TESTED. No new grant, credential or hosted business action by this page. Current health revision85d8cec43b5332319eed1151299384bb4265b1c7.

Bounded diagnosis: legacy module-ui-enforcement probes /api/license/current, which delegated accounts correctly cannot access; its missing-module GET fallback synthesizes HTTP200/null for /api/transactions and /api/cash. StoreTransactionsPanel correctly refuses missing store identity. Preserve that identity guard and all server company/store/live-grant/licence/terminal/default-deny gates. Route delegated requests through canonical server authorization without consulting owner-only cached modules; retain ordinary Owner behavior. Also distinguish failed initial read from verified empty shift. Add executed interceptor/component regression for authorized reads, denied/revoked reads, foreign identities and ordinary disabled-module behavior. No financial algorithm/schema/fiscal/mutation changes. Earlier18-right source/native/release evidence and every peer claim remain protected.

ASSIGNED/OPEN, not fixed or LAB PASS. Required: green exact PR/full combined main CI, ordinary guarded exact healthy release, then read-only personal selected-store/terminal acceptance. No opening/closing shift or transaction to bypass the failure. Final receipt must retain remaining hosted writer acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-owner-backoffice-permissions.md.

01/11/2026 01:33 Europe/Athens - CENTRAL-BACKOFFICE-ACCESS-01 / ACTION RIGHTS INSTALLED / OPERATOR LAB OPEN / RETAINED OWNER

Same retained Rizareio readiness owner fix/owner-action-permissions-20261031; receipt docs/owner-action-rights-release-20261101. Source PR3423/headc711316c passed fullCI41248939925/job124678415118 all5SUCCESS:5005server+8backup/0FAIL/0SKIP, actual mounted/browser and complete HTTP flows. Merged47f59e6f. Its mainCI41250164005 passed5005server+8backup and many HTTP flows but was CANCELLED before completion, never whole PASS. Reused the already-running newer common full workflow_dispatch CI41251255862/job124685672884 at946fa417: all5SUCCESS,5011server+8backup/0FAIL/0SKIP and full HTTP flows. Common history includes wallet source3426, FTEXT release3429, report/Chat/Node claims; all20 owned runtime blobs remain identical to the green source. Preserve later monthly catalogue source3414/b9ce60a2, POS operator inventory source3427/50146f3f and every owner/PASS/manual; these later sources are not claimed deployed by this receipt.

Automatic Deploy41252434685 correctly skipped its documentation-head classifier. Normal main Deploy was dispatched once through GitHub UI because the connector has no workflow-dispatch operation:41252493732/job124688773943 SUCCESS. Full-CI/freshness guard23:27:23UTC; rollback artifact13061543721 preserved; pinned trigger23:27:25UTC; exact946fa417b858fbece65c9ded6cb8db506bca91b0 healthy23:29:27UTC31Oct =01:29:27Athens01Nov. Independent browser /api/health returned ok=true and the same revision. No direct hook, force/reset, env/schema/production SQL or guard bypass.

Read-only installed UI23:31UTC/01:31Athens: existing SuperAdmin support context MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, accountlab31, actual profile Απογραφέας, active. Fresh direct staff-access navigation avoids opening the store financial overview. Form exposes18 capability checkboxes including independent invoice edit/approval, supplier/expense/cash rights, current-shift non-fiscal cancellation and counted close. DOM read confirms exactly2 selected:inventory.read/count; only LAB store checked, both control stores unchecked. No role/grant/credential field changed or Save clicked. This is installed-form observation through support access, NOT ordinary Owner login, personal operator or financial/stock LAB PASS. Native tests are isolated CI, not hosted acceptance. Photos and exact metadata:

CHECKPOINTS/EVIDENCE/owner-backoffice-permissions-20261031/action-rights-release.json, action-rights-form-installed.jpg, action-rights-matrix-installed.jpg and action-rights-deploy-dispatch.jpg.

Available navigation: Owner -> Χειριστές και δικαιώματα -> Πρόσβαση BackOffice -> Νέος χειριστής or Δικαιώματα / Απενεργοποίηση; choose store/profile and each explicit action, then Αποθήκευση πρόσβασης. Profile remains a suggestion, not a permission ceiling; no automatic new rights. Username plus personal4-12digit PIN is sufficient, separate strong password optional. Existing account rights remain unchanged until Owner saves their own choices; changed policy requires a fresh personal sign-in.

Limits retained: edit existing NEW invoice metadata/lines and scoped existing-product match only; no assistant/new invoice/new line/product-card/shared learning/reopen/whole delete/total override. Approvals use canonical posting. Staff payments remain PENDING_REVIEW and cash requires separate right. Cancellation is only original NON_FISCAL same open shift/selected terminal CANCEL, no RETURN/fiscal extension. Counted BackOffice close retains EFTPOS/count/shortage/pending guards and personal actor; original POS opener-card/PIN rules remain. Broader module coverage and real-store readiness remain OPEN/ASSIGNED, no manual/numbered PASS closure. Central PDF synchronized from the latest common tracker without deleting peer records.

Final retained-owner handoff: single next action is Owner's intended LAB-only permission selection and secure personal sign-in, followed by one grouped selected-store/role/revocation/action acceptance with fresh documented before/after and unaffected control before any hosted writer. No historical transaction repeated for evidence. Owner remains assigned; no parallel takeover or silent release. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-owner-backoffice-permissions.md.

31/10/2026 23:00 Europe/Athens — CENTRAL-BACKOFFICE-ACCESS-01 / ACTION RIGHTS EXTENSION / ASSIGNED BEFORE SOURCE

Same retained Rizareio readiness owner; continuation fix/owner-action-permissions-20261031. Explicit user instruction: proceed with the missing delegated invoice editing/approval, payment entry, sale cancellation and normal shift closing. Current main7a2dbdf5 and intervening common history, active/tracker/checklist/pending, original owner-permissions checkpoint and invoice/payment/POS/session manuals reviewed. Existing ten rights and installed form remain protected; broad correction is OPEN, no advanced writer LAB PASS. Historical login/read evidence is not repeated.

Bounded scope: explicit per-store action capabilities, dependencies and owner matrix; existing staff workspace/navigation and canonical module forms; exact server admission and fresh transaction-time grant checks in the existing invoice draft/approval, store transaction, sale reversal and normal cash close routes/services, plus focused mounted/native regression coverage. Preserve actual EMPLOYEE identity, existing account/session revision/revocation/audit, role presets independent of grants, zero new default rights, selected-store/object/company/licence/lifecycle checks and original writer audit/idempotency. No blanket Owner promotion or prefix access. Expose a checkbox only with its executable canonical operation. Payment review/approval, financial reversal, fiscal return/internal-return, administrative force-close, OCR/provider/learning, fiscal execution and other owners' algorithms remain outside this permission integration. Preserve original payment evidence, terminal/open-shift/EFTPOS, finalization and stock invariants; no schema/migration or production SQL.

No hosted grant/credential/business mutation is part of preparation. New actions are NOT IMPLEMENTED / NOT TESTED at claim. Require full PR/main native CI, ordinary guarded exact healthy release, then separately identified LAB acceptance with fresh before/after and unaffected control before claiming any financial/stock PASS. Existing owner assignments remain unchanged; authorization integration is not a takeover of invoice/payment/shift/fiscal business scopes. Same retained owner through completion or explicit named handoff. Next action after this claim is green/main: integrate the actual canonical action paths and usable forms, denying every absent/unknown right. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-owner-backoffice-permissions.md.

31/10/2026 — AUTO-REPORT-TWO-SHIFTS-01 / EXACT SOURCE CI PASS / SHARED RECORD RECONCILIATION

Same owner fix/automatic-report-two-shifts-20261031. Source3418/head442940967b88f3645369759c40510f459a601c93 fullCI41241654412 all5jobsSUCCESS; build124656872114 records4972server+8backupPASS/0FAIL/0SKIP. Actual native settings HTTP565 and new mounted598/policy599–602 executed PASS, including null save/GET/READY midnight-close and original/control invariance. Local full Node20 completed4322PASS/0FAIL/326native infrastructureSKIP; Work build/TABLE_SERVICE PASS. Source-only claim3416 remains green/main before edits.

Normal merge correctly refused after documentation-only peer receipts3417/3420 changed shared registries. Reconcile atop main4a1778134bb66bedca7549e6e389933eeaf116df, preserving every newer peer checkpoint/manual/PDF and all eight owned runtime/test blobs byte-for-byte. No forced merge, runtime change, test weakening or guard bypass. Exact combined PR/main full CI and guarded healthy release still required. No hosted write or LAB PASS; recipients/consent/dispatch untouched. Same owner retains this correction. Single next: validate the combined revision before installation, then new two-shift LAB acceptance.

31/10/2026 — AUTO-REPORT-TWO-SHIFTS-01 / SOURCE CANDIDATE / AWAITING NATIVE CI AND HOSTED ACCEPTANCE

Owner fix/automatic-report-two-shifts-20261031 retained after explicit owner-approved transfer. Before-source claim3416/head98e577706cc0b17323d2f638e7b81e76fca941ac passed docsCI41241214024 SUCCESS and merged d06be9e7415b52b786481058902285e33ac6836e BEFORE all runtime/test edits. Reviewed main history since the last scoped19Oct monthly HOLD LAB result: operator summary805fe6cd, overlap3469b7ed, read-only snapshotbaecae11, writer lockad87ec72, dispatch integrationa0b4a8e1 and reviewed-cash0712a85c remain protected. No overlap/lock/auth/dispatch/cash-review writer change.

Source allows explicit null third hour only without a terminal expecting slot3. Numeric07/15/23 configurations and mixed three-shift/delivery remain valid. No mandatory universal third; per-terminal last afternoon opening covers until next business morning, actual23:00/00:20 closure remains in its original opening-day source. Incomplete business day/open/missing/unknown/foreign/duplicate/overlap still HOLD. UI blank third serializes null, native form requires third only when selected, null readback remains blank; neutral header points to real dispatch panel and does not invent ON/OFF. Existing settings schema tests replace only superseded universal-third invalid examples with required-third/null refusals; old default three-shift/native/mounted protections remain.

Node20.20.2 original-source new regressions:0PASS/5FAIL after successful dependency/Prisma preparation; corrected focused18PASS/0FAIL/0SKIP. First earlier import attempt failed for ungenerated local Prisma (infrastructure, not a product assertion). All automatic-report tests207total/194PASS/0FAIL/13isolated-PostgreSQL environmentSKIP. New actual registered HTTP/isolated native regression added to existing settings fixture for two-shift save/GET/READY midnight-close, invalid-third/Owner refusal, same original/control source rows and original-store settings. It has NOT run locally and must run unskipped in exact full CI. Full local suite and frontend build pending at this entry; do not infer a result. Original and focused TAP under CHECKPOINTS/EVIDENCE/automatic-report-two-shifts-20261031/.

Only source/tests/records; NO production settings/recipient/invitation/consent/activation/email/financial/stock/shift/fiscal/schema operation. Existing accepted LAB settings not replayed. Engineering candidate only, NOT INSTALLED/AWAITING LAB; no manual PASS. Remaining: exact full PR/main CI, ordinary guarded healthy revision, new scoped LAB/USER two-shift save/reopen/preview with fresh baseline, then verify actual recipient consent/activation separately. Fully irregular early openings remain explicit review, not guessed slot mapping. Same owner retains this bounded correction; all other owners remain. Single next action: exact full/native CI before installation.

31/10/2026 22:54 Europe/Athens — AUTO-REPORT-TWO-SHIFTS-01 / OWNER-APPROVED TRANSFER / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ codex/central-auto-dispatch-20261022 / codex/central-four-streams-20261018 — ASSIGNED fix/automatic-report-two-shifts-20261031 (personal-assistant/Rizareio conversation). Owner explicitly approved this bounded transfer after the code diagnosis; no parallel ownership of these changes. All other central dispatch, recipients/consent/SMTP, cash and lifecycle owners retain their scopes.

Observed USER FAIL31Oct: one active RIZAREIO-POS-01, three operators, TWO expected shifts, usually07–15 and15–23/or00 with variable closing. Form rejects blank third hour; configuration schema demands a terminal with slot3 and readiness emits THIRD_SHIFT_NOT_CONFIGURED. Static header incorrectly claims sending is OFF independently of actual dispatch state. This is a real form/configuration failure, not financial or delivery PASS. Actual recipient confirmation/delivery and any successful report-settings save remain NOT TESTED.

After this claim is green/main, exact bounded source: client/src/components/platform/AutomaticReportSettingsManager.jsx; server/src/services/automatic-report-settings.js configuration schema ONLY (preserve lifecycle/Store-lock/CAS writer); server/src/services/automatic-report-policy.js readiness ONLY. Add server/test/automatic-report-two-shifts.test.js and server/test/automatic-report-two-shifts-mounted.test.js plus a registered HTTP/native PostgreSQL regression in the existing automatic-report-settings-postgres.test.js if needed. Existing policy/mounted assertions may be updated only for the intentionally superseded universal-third requirement/static OFF copy, preserving all original three-shift, scope, version, rule, lifecycle, closed-day, open/unknown/overlap and financial boundaries.

Allow explicit null third hour only when no configured terminal requires slot3. Preserve old07/15/23 numeric configuration and mixed store/delivery policy. Two-shift slot2 continues through the next saved business-day boundary; actual closing23:00/00:00 does not imply a third opening. A missing/open/foreign/overlapping/unknown source remains HOLD; readiness never sends or certifies money. Show neutral settings-only header directing actual activation state to Automatic deliveries. No guessed schedule/codes, production settings/activation/recipient/email/financial/stock/fiscal/schema mutations or existing LAB fixture replay. Fully irregular opening-hour mapping beyond the saved boundaries remains explicitly NOT TESTED, not silently inferred by ordinal/operator name.

Required: actual mounted blank-third save/reopen payload + third-required refusal + unchanged store-switch/no-send; policy two-shift late-midnight close READY and missing/open/duplicate/overlap guards; old three-shift/DST/week/month/security regressions; native actual Save/GET/read-only preview for two shifts with original/control invariance. Full PR/main CI and ordinary guarded exact healthy release before hosted acceptance. No new manual PASS until actual scoped LAB/USER observation. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-automatic-report-two-shifts.md. Single next: green/main this claim before runtime/test edits.

31/10/2026 - POS-CONSUMPTION-ENTRY-01 / LIMITED USER VISUAL PASS / COMPLETED

Owner fix/pos-consumption-entry-20261031. User replied «ειναι οκ» after the installed explicit-button correction and refresh instruction. Recorded31Oct23:06Athens (21:06UTC); this is confirmation of the new entry's appearance only. Exact physical device, client revision, store/terminal, refresh gesture and subsequent modal actions were not independently identified. No stock, price, consumption/destruction submission, turnover, shift or fiscal acceptance is inferred; no business transaction replayed.

Retained owner fix/pos-consumption-entry-20261031; receipt docs/pos-consumption-entry-release-20261031. Explicit user screenshot/clarification: operations were reachable but the existing store-labelled launcher looked like a heading. Before-source claim3410/head6d45763f/CI41237633802 SUCCESS merged58eb226 before edits. Source3411/head78d5ac1e/fullCI41237884002 SUCCESS merged28f64d8faa9bb4ea4f384c978be895a7684e394c. Exact mainCI41239006235 SUCCESS. Both full runs:4961server+8backup/0FAIL/0SKIP; original security/licensing/HTTP/native/Chromium flows retained.

Local Node20 focused7/0/0, Work build/TABLE_SERVICE PASS. Ordinary guarded deploy41239947674/job124651641491 SUCCESS; Render dep-dbj54n4s728c738rrr60 LIVE31Oct20:43:02UTC (22:43Athens), independently healthy exact28f64d8/oktrue. No guard bypass.

This closes only the bounded entry-affordance complaint: visible «Ιδιοκατανάλωση / Καταστροφή» button, outline/tinted background/chevron and secondary current-store context. Existing callback/menu/business rules remain unchanged; prior removed-WASTE-slot and historical menu-content PASS retained. Original mounted/Chromium tests are engineering evidence, not the user's physical evidence. Earlier cloud PIN limitation remains historical and was not bypassed; user confirmation now supersedes only this entry's visual RETEST. Whole compact-header/appearance/POS and other owners remain separately OPEN.

Previous receipt3415/headfa408689/docsCI41240569200 SUCCESS merged7a2dbdf5. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-pos-consumption-entry.md; evidence CHECKPOINTS/EVIDENCE/pos-consumption-entry-20261031/verification.json; tested user instructions docs/manual/pos/PASS.md. Completed entry residual removed from pending; active/tracker/numbered and three canonical PDFs synchronized. No new source or live business action. No remaining work for this narrow visual complaint; broader scopes retain their owners.

2 November 2026 — FTEXT exact source checks PASS / shared-record reconciliation

Same retained owner. Source3508/head2a456fd00de46c5162b3fff2b1d28541961b5ae3 passed exact Windows5.1 CI41407616600/job125153108963, including new real runspace/loop and all original CASH/operator/strict-CARD lost-reply/restart/stop/handoff/installer fixtures. Exact fullPR41407616657/job125153533590 all5SUCCESS:5189server+8backupPASS/0FAIL/0SKIP and full HTTP E2E. Main concurrently advanced with inventory-history permission documentation14a0dcae only; merge was correctly refused for the shared PDF. Preserve those owner records, auto-merge text and regenerate canonical PDF. All owned runtime/test bytes remain identical to green2a456fd; no changed source, relaxed check or forced merge. Require exact combined PR/main CI and normal guarded exact health before PC package. Engineering NOT INSTALLED, physical stable readiness/speed OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-11-02-ftext-readiness-scheduling.md.

2 November 2026 — FTEXT readiness scheduling candidate / NOT INSTALLED / AWAITING WINDOWS CI

Retained fix/ftext-rbs-outcome-20261031, continuation fix/ftext-readiness-scheduling-20261102. Before-source claim3507/d7ee7ed0 passed docsCI41401821017 (3SUCCESS/2correctSKIP) and merged3bdc80302b0ba2f59245f601606cdbe1faa06cee before all runtime edits. No other owner scope changed.

Candidate uses one owned PowerShell runspace for authenticated nonfiscal STATUS waiting. Main loop keeps scoped heartbeat/work polls progressing in recovering/no-new-claims mode until worker completion. Join and validated boolean result precede ordinary discovery/fiscal transport; original local fiscal report recovery remains first and shutdown joins/stops/disposes before releasing connector mutex. New current STATUS waits up to30seconds; existing recovered-marker age checks retain original createdAt and require a distinct round trip when stale.20second readiness/15second heartbeat and original no-resend/identity/lifecycle/license/card/stop/handoff guards unchanged. Missing original result is still held; no automatic marker/fiscal deletion/republication, pairing/config/server/schema/production data change. Worker completion schedules next idle STATUS without the former extra5second gap, after one ordinary work poll has first opportunity to claim existing work. This is not proof of physical speed or stable shop acceptance.

Local PowerShell7.4.13 parser all FTEXT scripts PASS; actual runspace delayed6second success/false/error/invalid/stop and actual main-loop heartbeat/no-new-claim/single-worker/join/disposal fixture PASS. First fixture run failed because its config was a hashtable rather than PSCustomObject and its synthetic sleep counter used the child script scope; corrected only fixture representation/counter, no production weakening. Node20.20.2 existing FTEXT128/119PASS/0FAIL/9explicit native-infrastructureSKIP;

Work frontend build/TABLE_SERVICE PASS12.83seconds. Actual Windows5.1, complete remote native/full PR/main checks and guarded exact release remain REQUIRED/NOT RUN at this entry. Installed PC package is unchanged. Whole FTEXT and physical recurrence/CASH19s/CARD activation35s remain OPEN; no new diagnostic sale. Checkpoint CHECKPOINTS/CHANGES/2026-11-02-ftext-readiness-scheduling.md. Single next: actual Windows/native/full CI before main/release and matching official selected-PC package.

2 November 2026 — FTEXT-RESILIENCE-01 / recurring readiness USER FAIL / ASSIGNED BEFORE SOURCE

Retained owner fix/ftext-rbs-outcome-20261031, continuation fix/ftext-readiness-scheduling-20261102. Explicit owner instruction to correct the recurrent shop blockage. No second owner or takeover. Current main2a0df1d, active/tracker/pending/checklist, FTEXT manual and readiness/latency/handoff/review/stop/finalization checkpoints reviewed. Whole FTEXT stays OPEN.

Observed Rizareio/RIZAREIO-POS-01 morning2Nov: stale overnight nonfiscal STATUS272a748dcdf94b08a34acf4dfa7e1625, last successful56a4cc434f8748cd90aa8569f4e855b7 yesterday23:56Athens, current connected heartbeat. Vendor CONNECT returned OK, unchanged IP192.168.1.103/serialDSM24014923. Input C:\FText/txt/protocolSOLIDUS(II)T unchanged. Explorer search found no matching272a748d filenames (search limitation, not absolute absence). With connector stopped, owner was instructed to preserve marker as .mws-ftext-status-old-272a748d.json, then start existing paired connector. Successful STATUS messages and ordinary printed CASH resumed, but recurring red readiness refusal returned. This temporary recovery is NOT stable readiness PASS. Owner reports19seconds CASH and later printed CARD after another connector restart; request-specific stopwatch identity and financial/stock before/control NOT TESTED. Do not repeat sales for documentation.

Actual metadata collector Windows5.1 output received2Nov08:16Athens,12 groups. Today c2a7313b intent06:11:35.3606616Z/publish35.8836239/result53.4905834/report53.5571684; b62b4acd intent06:12:46.8974177Z/publish47.5479052/result06:13:01.6367021/report01.7010853. Publication-journal-to-result17.607/14.089seconds; result-to-report0.067/0.064. These file metadata intervals do not identify physical driver versus register processing or card activation; copied/restored timestamps can mislead. Read-only server at06:30UTC confirms latest2295bfea/52cbd1d5/15c9b6dd SALE_COMMITTED. At06:32 the4.80basket was refused before any new request; last server request remains06:27:29. Original fiscal files unchanged, no SQL write/replay/cancellation/financial mutation. Subsequent owner restart/CARD printing does not close this FAIL.

Bounded correction after THIS claim is green/main: move idle nonfiscal readiness waiting off the work-poll/heartbeat loop using one owned Windows5.1 runspace. While a STATUS worker is active, poll in recovering/no-new-claims mode; original local fiscal recovery remains first. Serialize local folder operations with existing mutex, join worker before any possible fiscal work and dispose on exit. A newly initiated STATUS can wait for its actual verified response without losing heartbeats; recovered old markers retain original time and require a distinct fresh round trip. No re-dating old evidence. Keep20second readiness/15second heartbeat limits and all authenticated same-company/store/device/settings/token/lifecycle/license, original cashier/card decision, original result/hash, no-resend, stop/handoff and finalizer guards. Do not automatically delete/re-publish unresolved STATUS or any fiscal input. No automatic new sale, vendor restart, pairing/config/schema/database change.

Exact surfaces: tools/windows-ftext/Cloud-Tools.psm1, Cloud-Connector.ps1, existing Windows smoke/recovery fixtures and focused Node contracts only if needed. Preserve seven-module package format. Required: actual Windows5.1 single-worker, heartbeat progress during wait, no new claim during worker, delayed current response, old/restarted unavailable response denial, worker failure/disposal, original CASH/operator/strict-CARD recovery and immutable files across lost replies. Full exact PR/main CI, native/Windows suites and ordinary guarded exact healthy release before new official matching PC package/physical acceptance. Current installed code/package is unchanged; new engineering NOT IMPLEMENTED/NOT TESTED, physical stability/speed OPEN. Single next action: green/main claim, then implement and verify bounded scheduling correction. Latency attribution beyond this scheduling defect remains separately OPEN.

1 November 2026 late - FTEXT-RESILIENCE-01 / CASH17s and CARD activation35s USER LATENCY FAIL / OPEN

Retained owner fix/ftext-rbs-outcome-20261031 / continuation fix/ftext-finalize-ui-latency-20261101; diagnostic receipt docs/ftext-evening-latency-20261101. Owner reports approximately17seconds for CASH receipt issuance and35seconds from POS until the card machine activates. These are different endpoints from total card completion. They supersede the earlier13second complaint as the current reported performance limit; no physical speed PASS. Ordinary issuance/NO/recovery history retains its exact scope. No new sale or before/after financial/stock/control measurement was made, and no specific server request was independently matched to these user stop-watch reports.

Read-only selected Rizareio/RIZAREIO-POS-01 sample:20 latest rows on1Nov at extraction,12 completed CASH,7 completed CARD and1original CARD REQUIRES_CHECK. CASH pickup0.178-8.672seconds, dispatch-to-accept0.478-0.710, accept-to-final update7.387-14.634. Completed CARD pickup1.058-10.837seconds, dispatch-to-accept0.471-0.531, accept-to-final update31.808-43.872. The last interval includes result handling/finalization and, for operator CARD, the explicit decision; it does NOT measure terminal activation. Delays also occur on one-line baskets: CARD2.70/one line has pickup10.401, accept0.489, then35.613 to final update; CASH1.60/one line has pickup1.139, accept0.486, then10.972. Line count alone is insufficient to explain the delay. Sanitized original IDs/timestamps/spans are retained in the dated evidence JSON. Status RECEIVED minus client checkedAt is not automatically network time: recovered STATUS deliberately retains original start time and client clocks may differ.

Current code review: the connector performs cloud work polling and synchronous nonfiscal STATUS in the same loop. A readiness call may wait5seconds, or two such waits when consuming old evidence, plus authenticated HTTP and loop sleep. This is a structural candidate for pickup stalls, NOT a proven cause for these exact receipts. Preserve the20second freshness/15second heartbeat and original evidence gates. The cash-result endpoint already auto-finalizes ordinary CASH; the earlier immediate-read UI correction is a bounded fallback UI optimization and cannot explain or certify the physical17/35second complaint. No speculative timeout/protocol/readiness/pairing/Windows change, new fiscal command, cancellation, financial/stock write or production SQL mutation.

Independent public health observed ok=true/revision5c3e9eacb69ce2c0df801eb5dd9aecf04506d69e; reviewed repository main d3f0f949fe9d568e1d687b1a4c9dc1b7df934dd9. Exact loaded UI/installed module hashes and physical card-activation timestamps were not pinned. Existing standalone private Rizareio_Ftext_Timing_ReadOnly.cmd was reread in full and remains the3148byte metadata-only collector. It reads names/sizes/UTC creation/modification times of12 latest original cash-file groups, writes a new Desktop JSON outside C:\FText and emits no network/fiscal command or raw receipt/credential content. Existing synthetic checks remain historical; actual Windows execution/current output NOT RECEIVED. This metadata cannot establish payment/cancellation/no-execution and copied/restored times may be misleading.

Single next action: receive the metadata JSON from the selected Rizareio PC using the existing collector, then match its original request IDs to this scoped server snapshot and separate publication-to-result from cloud/UI/operator time. No repeated diagnostic receipt or payment. If further STATUS/driver/terminal evidence is needed, keep it read-only and separately bounded. Actual latency correction remains NOT IMPLEMENTED/NOT TESTED for this new complaint; whole FTEXT stays OPEN/assigned. This is a diagnostic/USER FAIL record only, not source deployment or physical performance acceptance.

FTEXT-RESILIENCE-01 — immediate finalization observation ENGINEERING LIVE / physical latency OPEN

Observed 2026-11-01T12:10:51.704944+02:00. Claim3448/headf505fe54 passed docsCI41290924940 and mergedec979819 before source. Source3450/head0d02fe87 passed fullPR CI41291224345 (5066server+8backup/0FAIL/0SKIP) and native41291223098 (50PASS/0FAIL/0SKIP); mergedffc375de. Source main41293465669 passed all5jobs. Its guarded deployment41294555905 correctly skipped because newer commerce source650b4dca was on main; no guard bypass or older deployment. Integrated full mainCI41293954312 passed; guarded Deploy41295666745 passed; Renderdep-dbjgt0qjnfac73fvb2rg LIVE exact650b4dca3d66dc16b5020197e7a2ec475bef4575. Independent public /api/health ok=true exact same revision. Newer owner code is preserved.

The hook reads the SAME scoped request immediately after successful finalize. Only validated id/store/kind and SALE_COMMITTED reaches the existing once-only completion callback. Single-flight includes both calls; scope/unmount checks follow each await; bare saleId, still-CONFIRMED, foreign/malformed reply and failed read never clear the basket. Original polling recovers lost replies without a new checkout. Existing CASH/both CARD decision, NO/UNCERTAIN, release/cancel and original-evidence gates remain. Local Node20 FTEXT128/119PASS/0FAIL/9native-environmentSKIP and real mounted19 PASS, client build/TABLE_SERVICE PASS; exact remote full/native tests above supply required actual environment checks. Server/Windows/protocol/readiness/financial/schema/production data unchanged. No Windows installer update required. Receive the web change with the POS Refresh action (window reload) during an idle empty-basket gap with no pending transaction; keep FTEXT+ and the paired connector running.

This removes at most the normal extra1800ms post-finalize UI polling interval, not an established physical-print root cause or measured shop improvement. Owner clarified that paper and dialog finish approximately together at13seconds for CASH. Exact user sample ID/time was not pinned; no new diagnostic sale, independent financial/stock delta or physical speed PASS. Earlier8second acceptance is historical. The complaint and whole FTEXT remain OPEN under retained owner fix/ftext-rbs-outcome-20261031 / continuation fix/ftext-finalize-ui-latency-20261101.

Private standalone diagnostic Rizareio_Ftext_Timing_ReadOnly.cmd, Librarylibfile_a98d8bd4dd0081918e4aad403c8b47cb/version0,3148bytes/SHA25621dd7e30b9f12da481fe3400db7406b931bfc9610c46d4bced68b45d6ad6a368, is available for the selected PC. It reads names/sizes/UTC creation+modification metadata for the latest12 original cash-file groups and writes only a new Desktop JSON outside C:\FText. No network, receipt contents, credentials, original file changes, fiscal command or pairing. PowerShell7 Linux parser/functional fixtures passed:12group bound, metadata-only output, original hashes unchanged, output-inside-FText rejected. Actual Windows5.1 execution/PC report NOT TESTED/NOT RECEIVED. This is diagnostic metadata, not fiscal execution/cancellation proof; copied/restored times may be misleading. Single next: receive that existing-file JSON from the Rizareio PC and match its request IDs to selected-store original timestamps before choosing any further causal change. Do not repeat a receipt or shorten a safety timeout.

1 November 2026 10:55 Europe/Athens — FTEXT-RESILIENCE-01 / finalization UI wait ASSIGNED BEFORE SOURCE

Retained owner fix/ftext-rbs-outcome-20261031; continuation fix/ftext-finalize-ui-latency-20261101. Owner reports printed CASH receipt with13seconds delay and explicitly instructs continuation. Exact user sample/request/time not independently pinned; no new financial/stock delta, failure-path PASS or complete timing acceptance. Ordinary printed receipt remains supported; current latency complaint stays OPEN. Earlier scoped8second USER result is historical, not a current speed guarantee.

Read-only existing selected Rizareio/RIZAREIO-POS-01 CASH requests b33c029e (08:47:08UTC,0.50) and845a5f8c (08:31:20UTC,17.20) are confirmed/SALE_COMMITTED: creation-to-final update9.702/9.989seconds, creation-to-dispatch1.631/0.452, dispatch-to-accept0.618/0.556, accept-to-final update7.453/8.982. Latest offer negotiated stopVersion1, showing an updated connector; not exact installed-package proof. These server spans do NOT isolate physical printing, driver/result HTTP/commit/UI or identify the reported13second sample. No production writes or repeated sale.

One proven bounded cause in useFtextCashCheckout: after successful authenticated finalize POST it waits until the next1800ms interval to read SALE_COMMITTED. Claim immediate scoped GET after successful finalize, validate exact request/store/kind and SALE_COMMITTED before existing completion callback. Preserve current interval, single-flight, original POST/idempotency, operator-CARD decision, NO/UNCERTAIN/release/cancel, retained basket and stale-store/request guards. Ignore late responses after scope/unmount; never complete from bare saleId, guessed status, CONFIRMED alone, foreign response or failed GET. Lost finalize response recovers through original polling, never new checkout/fiscal input. No server/Windows/protocol/timeout/readiness/pairing/financial/schema/production SQL change. This can remove only one unnecessary UI interval; physical13seconds/root attribution remains OPEN. Separate local timestamp evidence will be needed if physical paper stays slow.

Before source: green/main this claim. Then mounted real-hook delayed-finalize/current-scope/foreign/lost-response/once-only/CASH/both CARD gate regressions, full CI/build and ordinary guarded exact release. No Windows installer update required. Engineering NOT IMPLEMENTED/NOT TESTED; physical improvement AWAITING USER, no diagnostic sale. Whole FTEXT stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-ftext-finalize-ui-latency.md.

FTEXT-RESILIENCE-01 — unpublished stop engineering release / physical AWAITING LAB

Observed 2026-11-01 00:49 Europe/Athens. PR3425/headfd0109fd: general41247502258, native41247502198 (49PASS/0FAIL/0SKIP) and actual Windows41247502515 PASS. Full server4991+backup8 PASS/0FAIL/0SKIP; actual HTTP E2E including the fixture-date credit assertion PASS. Merged8e1128e6055818e3092d4537af88c99a65c3c56d. Main CI41248384346 and Windows41248384347 PASS; guarded deployment41249525533 PASS. Renderdep-dbj6v68ae00c73dcnih0 live exact8e1128e6055818e3092d4537af88c99a65c3c56d; independently observed /api/health ok=true exact revision. Official private Rizareio_Ftext_Cash_Setup.cmd updated in place to version6; SHA256ddff3a4ceefec7571b17c93082c0becadfab465591210cd8716ca3468ebd8e1e, 113764bytes; all7 module hashes match that exact deployed source, ACTIVE device/settings unchanged. This is engineering delivery, NOT installation or physical acceptance.

FTEXT-RESILIENCE-01 remains OPEN / retained owner fix/ftext-rbs-outcome-20261031, continuation fix/ftext-unpublished-stop-20261031. Engineering release only: original-cashier PREPARED/unclaimed and negotiated stopVersion1 OFFERED stop before authorization. Original row lock decides stop versus accept; original status/result/hash/plan and basket retained. ACCEPTED and legacy uncertainty remain held. Windows terminal stop is permanent, scoped, durable and replayable after lost response/crash/restart, with no fiscal publication, cash-result, financial/stock mutation, or deletion of original evidence. Normal CASH/both CARD/readiness/handoff/reviewed NO/UNCERTAIN preserved.

Official seven-module package must match the verified deployed source and current ACTIVE device settings; retained pairing, no credentials and no automatic connector start. OFFERED stop requires matching idle PC update; actual shop installation and physical stop/failure matrix remain NOT TESTED. Existing ordinary-sale USER PASS is preserved; do not repeat a sale for documentation. Timing observations remain unproven attribution; no shortened safety threshold. Single next: matching idle installation followed by separately scoped physical acceptance without intentional outage at the operating shop.

2026-10-31 21:16 UTC — FTEXT-RESILIENCE-01 / unpublished stop continuation ASSIGNED BEFORE SOURCE

Retained owner fix/ftext-rbs-outcome-20261031; continuation fix/ftext-unpublished-stop-20261031, explicitly instructed to start the remaining work. No parallel takeover of other owners. Existing reviewed-CASH source3409/main57bd495 and receipt3419 remain protected. Owner subsequently reports an ordinary sale completed without a problem; payment method, request ID, amount and exact time were not independently pinned. Limited resumed-normal USER PASS only; no new physical failure/NO/UNCERTAIN acceptance or financial/stock delta. Do not replay it for documentation.

Bounded next causal change: original-cashier stop of an original request that is provably PREPARED/unclaimed, or a negotiated OFFERED request whose execution authorization was never accepted. Serialize stop versus claim/accept under current device/request locks. Preserve original status/result/hash/plan and append immutable application-stop evidence; exclude released PREPARED rows from every claim. Never stop legacy DISPATCHED, ACCEPTED, receipt/result/sale/VOID, foreign/stale/device/token/settings/lifecycle or unknown local publication. No fiscal resend, payment/stock/finalizer/schema/production SQL change or fabricated cancellation/readiness/bank result.

OFFERED stop requires explicit new-client capability recorded on that original offer. Matching Windows client must verify original intent/active identity, absence of publication journal and fiscal files, durably record a bound terminal stop receipt before clearing only its own active marker, and recover the SAME stop proof after lost replies/restart without publication. Never delete original fiscal evidence or clear another request. Old clients/jobs retain the original safe hold; do not enable OFFERED stop for them. Local rollback/evidence restoration remains unsupported without fencing/reconciliation. Already ACCEPTED uncertainty stays held for original evidence; timeout alone cannot establish no execution.

After claim is green/main: server stop/ack contract, current request view and scoped POS action, negotiated capability and Windows durable terminal handling, actual HTTP/mounted/native race and Windows crash/restart tests. Require stop-wins versus accept-wins, rollback/replay, failed acknowledgement before/after durable stop, malformed/foreign/published evidence, no financial tables/writes, old protocol refusal and all current CASH/both CARD/readiness/handoff/NO regression coverage. Full exact PR/native/Windows/main CI, guarded deployment, then matching idle Windows update before OFFERED availability. Engineering and physical acceptance NOT IMPLEMENTED/NOT TESTED at claim. No deliberate outage or diagnostic payment at the working shop. Latency stage evidence in previous checkpoint remains observational; attribution/instrumentation is separate, with no shorter safety thresholds. Single next action: publish this bounded claim before source, then isolated stop/accept race reproduction. Whole FTEXT stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-unpublished-stop.md.

31/10/2026 21:03 UTC — FTEXT RBS-style CASH review engineering LIVE / physical review AWAITING LAB

Owner fix/ftext-rbs-outcome-20261031 retained; receipt docs/ftext-rbs-outcome-receipt-20261031. Before-source claim3407 merged609cd640 after docsCI41236869440. Source3409 final9ab0290ada0a36f00967948177a7d24933fbd210 passed exact fullCI41238962526/all5SUCCESS (4967server+8backup/0FAIL/0SKIP), native recovery41238962358 (34PASS/0FAIL/0SKIP including concurrent CASH review), actual Windows41238962336. Main57bd49550cb53f9ad036841f3ae876b541eabd25 passed exact fullCI41240158502/all5 with4967+8/0/0 and Windows41240158539. Ordinary guarded Deploy41241095573 succeeded; Renderdep-dbj5bpmtlv9c73c99vq0 LIVE21:02:23.169855UTC and independent public health returned oktrue/exact57bd495. No guard bypass or direct deployment. Concurrent monthly/Chat/consumption/cash-owner records and source retained.

Installed bounded behavior: original cashier may record NO/UNCERTAIN for the exact stored canonical unknown CASH report, with current company/store/POS/device/token/settings/lifecycle/serial binding. NO atomically releases only the application hold and retains basket/original status/result/hash/plan/history; UNCERTAIN stays held. No new fiscal command, sale/payment/stock/VOID or guessed bank/cancellation/readiness result. Missing replies, actual final/late receipts, sale, VOID, wrong actor/scope/configuration and YES on unknown CASH are refused. Existing successful CASH, both CARD modes, original CARD NO and durable handoff remain protected. Released attempts cannot finalize. This is a server/client update; no new Windows installer, settings, pairing or protocol change was made. Reload the POS during an idle empty-basket gap to receive its new UI. These are engineering usage/acceptance criteria, not a new manual PASS.

Read-only timing observation of12 existing ordinary completed Rizareio requests (9CASH/3CARD), not agent-created tests:7CASH server creation-to-final-update5.199–13.517seconds;2CASH34.757/35.997seconds, including21.585/22.424seconds between dispatch and immutable acceptance, then6.786/6.963seconds to final update. CARD28.177–30.248seconds server-side. This separates recorded stages but does not prove a root cause or isolate bank/operator/driver/network/commit. Not UI click-to-close timing, independent physical-print acceptance, a financial/stock delta or an improvement caused by this release. Snapshot spans preceding production revisions; exact extraction timestamp was not captured. Original timestamps/IDs, calculated intervals and limits preserved in CHECKPOINTS/EVIDENCE/ftext-rbs-outcome-20261031/timing.json. Earlier user15/35second reports and prior ordinary printed receipts remain scoped USER evidence. No receipt repeated for documentation and no production SQL write.

Remaining OPEN: isolated LAB acceptance of new CASH NO/UNCERTAIN with required before/after/control evidence; physical late/failure/restart matrix; missing-dispatch-reply reconciliation/fencing; causal attribution of pre-acceptance delay and any separately claimed optimization. Do not shorten safety checks or replay a fiscal input to hide latency. Current whole FTEXT is not certified PASS; new reviewed-CASH physical path NOT TESTED, and no CI-only behavior added to manual. Existing manual PASS preserved. Single next action: prepare the bounded isolated LAB review acceptance while retaining original evidence; no deliberate outage or repeated diagnostic sale at the working shop. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-rbs-outcome.md. Receiving owner is not changed; this is the retained-owner release/handoff receipt.

31/10/2026 20:00 UTC — FTEXT-RESILIENCE-01 / RBS outcome parity / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ fix/ftext-payment-resilience-20261030 / fix/ftext-durable-handoff-20261031 — ASSIGNED fix/ftext-rbs-outcome-20261031, explicit owner request in current recovery conversation. No parallel ownership of this bounded outcome UX scope. Preserve all other owners and durable handoff work.

Owner explicitly approves matching the RBS operator flow: confirmed success completes once; reviewed unsuccessful attempt returns the retained basket with immutable history; uncertain outcomes stay visible and never resend automatically. Bounded first change: allow original-cashier NO/UNCERTAIN for the exact stored generic unknown CASH response, retaining the original request/result/hash and excluding any confirmed/late fiscal receipt, sale, VOID or other release. Existing operator CARD flow remains protected. Missing dispatch replies remain held until original execution can be reconciled/fenced; a timeout alone cannot prove failure and must not grant another fiscal execution. No transport, timing thresholds, Windows settings, payment replay, production SQL or financial/stock/schema change. Source and physical acceptance NOT TESTED at claim. Full native/server/Windows/build CI, guarded exact release and isolated LAB acceptance required before new behavior is called PASS.

Latest scoped USER PASS: owner confirms resumed normal CASH and CARD printed receipts and additional ordinary trading. Reported approximately15seconds CASH/35seconds CARD; these are user observations, not instrumented stage timings or a speed improvement. Earlier ~8second three-CASH observation remains historical. No transaction repeated for documentation; independent baseline/control stock and financial deltas NOT TESTED. Installed exact revision for these later reports not independently pinned. Existing reviewed NO/late CASH/readiness/durable evidence invariants remain protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-rbs-outcome.md. Single next action: publish this claim before source, then reproduce and extend the reviewed CASH outcome path in isolation.

31/10/2026 — AI-OWNER-WALLET-01 / THREE ADDITIVE CUSTOMER PRICES / LIMITED HOSTED LAB PASS

Retained owner feat/ai-owner-wallet-20261022; continuation feat/ai-wallet-customer-pricing-20261031. All three requested company prices are implemented together: additional percentage, fixed EUR per paid AI operation, fixed EUR once at the first assistant call on an authorized persisted invoice draft (FIRST_ASSISTANT_DOCUMENT). The existing tariff already contains the approved50% markup; the new percentage is explicitly additional and confirmed. Saving prices never activates billing or credits money. Zero defaults preserve the old tariff; original reservation policies and manual confirmed-final-total REVIEW semantics remain immutable.

Claim3379 green/main preceded source. Source3381/dad7976272e609b0b88204fbcb35124caa770700: fullCI41207119453 all5SUCCESS,4871server+8backup/0FAIL/0SKIP; actual native PostgreSQL/HTTP/concurrency fixture ran. Recovery41207119467:7PASS/0FAIL/0SKIP. Normal merge fb1a0ae5. Combined main accf3ddd839c1255139dfd181b5ccb4f770555ff fullCI41208544864 all5SUCCESS,4885server+8backup/0FAIL/0SKIP; normal guarded deploy41209698959 and Render dep-dbivj4cs728c738edupg LIVE14:24:04UTC, independently HTTP200/exact healthy. Duplicate deploy41209715362 cancelled, not counted as PASS.

Actual new synthetic PRICE-LAB-20261031-D at LAB MAIN / LAB POS2 / existing open shift, qty1PIECE,12EUR,VAT0, unapproved CREDIT only. Fresh before/after every action, no replay of C/B/customer invoices. Native Admin saved additional25%/call0.001EUR/invoice0.01EUR; price save left flags/funds unchanged. One initial image upload created one original attachment/job; the existing initial ai-recheck route had no wallet movement and remains OPEN, not metering PASS. One intake created one DRAFT/CREDIT document/NEW POS_OCR_DRAFT order/unresolved line, no payment/product/stock/finalization. First assistant operation: base79446+markup19862+call1000+invoice10000=110308microEUR. A distinct follow-up in the same open assistant: base76611+markup19153+call1000+invoice0=96764microEUR. Original provider responses differ; same durable document. Independently recomputed integer usage and exact wallet debits PASS; invoice fee occurred once. Printed SYN-D1 was misread SYN-01 by initial and assistant reading: OCR accuracy is NOT PASS and no approval/apply occurred.

Native restore verified master/invoice/emailOFF and all three additional prices0. Wallet v24→32, balance4883059→4675987microEUR, original930033 REVIEW hold unchanged; exactly2newSETTLED calls and4configuration audits, no funding/notice/old-entry/foreign-wallet change. Only one planned LAB attachment/job/document/order/line added; all three LAB stock/product/sale/payment/shift controls unchanged. Fresh17:26:41UTC readback identical after restore. At17:27:36UTC independent HTTP200 revision8b76cad4c16c571239940d8038bb248e3cae2819; all8wallet runtime blobs byte-identical to accepted accf3ddd. DB17:28:09UTC:0active lock waiters/0long active queries. Later peer owner-profit/FTEXT/keyboard records and source preserved.

Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ai-wallet-customer-pricing.md; manual docs/manual/ai-owner-wallet/PASS.md; original synthetic fixture and independent proofs CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/customer-pricing-{lab,restore}-20261031.json. Completed pricing implementation/hosted acceptance removed from pending. Whole wallet remains OPEN under the same owner for historical REVIEW, initially unmetered image/PDF, wider Owner/model/email acceptance. Real-customer prices/funding/activation were not supplied or applied; readiness only, no real wallet or money mutation. Legitimate SuperAdmin password+2FA sign-in completed after the interruption and the native requested-company form was verified read-only with three zero-price fields, billing/email OFF and no customer funding/history. Saved cropped proof has no identity/payment details. Subsequent native browser tools timed out; persistence of the live tab is UNKNOWN, so continue from the canonical Platform Admin link if needed. No customer save/credit/provider request or password change. Single next action: resume native Platform Admin selected-company form and let the user provide/save the actual customer prices and confirmed available credit before explicit billing switches; no guessed rates or copied LAB funds.

31/10/2026 — OWNER-PROFIT-PROVISIONAL-01 / LIMITED READ-ONLY LAB PASS / COMPLETED

Retained independent owner fix/owner-profit-cost-coverage-20261031, continuation fix/owner-profit-source-20261031. Before-source claims3382/main3d123b8 and3384/mainaccf3ddd preceded the respective report/model and unit resolver edits. Merged8b76cad4c16c571239940d8038bb248e3cae2819; all runtime blobs identical to reviewed source. Exact mainCI41211362481/job124567120775 again4896+8/0/0. Ordinary guarded release41212451738/job124570146592 verified full CI/freshness, requested pinned revision14:58:05UTC and confirmed exact health15:00:17UTC. Independent health confirmed8b76cad4. No guard, writer or schema change.

Actual31Oct15:00–15:04UTC (17:00–17:04Athens), Cloud Chrome desktop, authenticated SuperAdmin/support, virtual MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ only. Action: read existing01Aug–31Oct report, expand September, open all/month/day missing-product lists, toggle WITH_VAT/ALL, download CSV and open standalone print. No sale/return/payment/approval/product/stock/fiscal action, no physical terminal/printer operation. Existing LAB TOAST/CAFE and EXCEL1/2 only; quantities and payment methods unchanged.

Observed monthly approximate Margin/gross/net: October56.56%/8.36/-248.98; September63.86%/29.50/-283.70; total62.09%/37.86/-532.68. Each provisional cell visibly includes≈ and Εκτίμηση, coverage90.11%, original missing9/99 retained. Day27Sep51.50%/2.96/2.96 is explicitly approximate. Protected fully-costed26Sep remains79.66%/0.35/-312.65 without estimate marker and25Sep net3.01 remains unchanged. Original sales68.90/purchases2115.00/payments5533.50,7returns/3cancels and zero-VAT expenses gross618.78/net570.54/documentedVAT48.24 agree with baseline. No sales-minus-purchases substitute or fabricated zero cost.

Native CSV2monthly rows/26columns: original21columns preserve all18 unaffected values and blank canonical profit/margin;5additional labelled numeric estimate/coverage/unestimated columns agree with UI (all unestimated0). Standalone print contains the same monthly/day/total amounts, every provisional value explicitly marked, protected known-day values and0% expense convention. Missing-product drilldown:4distinct products/9lines for all; September and27Sep each correctly2products/4lines, excluding October EXCEL rows. WITH_VAT hides net-sales cells but retains clearly marked profit. Screenshot, actual CSVs, print text and control evidence under CHECKPOINTS/EVIDENCE/owner-profit-provisional-20261031/.

Fresh database before15:00:46.518167Z and after15:02:50.334004Z: identical counts AND whole-row hashes for all7 scoped sources:Sale90,SaleLine99,Product110,PurchaseDocument71,PurchaseDocumentLine713,StoreTransaction134,StockMovement95. Active MAIN/LAB POS2 control remains0transactions/cash0/card0/IRIS0/total0 before/after. Earlier pre-release baseline had one fewer draft purchase and line; rebaselined before this acceptance, never attributed to report actions or claimed unchanged across that interval. Approved purchase count12/gross2114.9976 unchanged. No protected transaction replay.

PASS is limited to this installed read-only provisional display/model/export/drilldown scope. LAB has no normalized-unit sale fixture; exact package24/6, repeated weighted product, discounts/landed excise, nullable/foreign/mismatched source, catalog no-double-conversion, original-date returns and orphan/no-basis fences have native CI proof, not new live purchase posting. Actual-cost null protection,0% expense policy and all broader financial27/numbered25 ownership/residuals remain. Independent ordinary Owner, mobile/tablet, physical print, inventory correctness and real-store accounting acceptance NOT TESTED. Only this completed independent request is removed from active pending work. Manual profitability/PASS.md, active/tracker/numbered and all3canonical PDFs synchronized in this closure.

31/10/2026 — FTEXT-DURABLE-HANDOFF-05 engineering release / selected-PC acceptance OPEN

Retained FTEXT-RESILIENCE-01 owner. Claim3380/head8fe5375 passed docsCI41206354755 and merged3838ed8 before journal refinement. Source3376 finalheada887cc6bceb4f8591efa4b5c14c86a7a683571e7 passed fullCI41206926415/all5 (4869 server PASS/0FAIL, native negotiated CASH/both CARD stable authorization/concurrent clients subtest PASS), Windows5.1 actual-module41206926463 and native recovery contract41206926490. Merged20db21008e024ca35509d220503eb551f8b3b136; exact-main Windows41208139869 passed. Its main fullCI41208139847 was externally cancelled14:07:47UTC, NOT a test failure or completed validation. Later integrated mainaccf3ddd839c1255139dfd181b5ccb4f770555ff contains20db and preserves newer wallet/other-owner work; FTEXT source/modules unchanged. Exact integrated fullCI41208544864 passed all5. Normal guarded deployment41209698959 completed; Renderdep-dbivj4cs728c738edupg LIVE2026-10-31T14:24:04.551207Z; independent health oktrue/exactaccf3ddd839c1255139dfd181b5ccb4f770555ff. No guard bypass/direct deployment/production SQL/fiscal test transaction.

Official same-POS CMD version3 replaced the same LibraryID libfile_c384ea96bd188191991e06a62e7ad338 with expected version2, returned metadata applied. Package 102076bytes SHA256 4ca2996aa0af754d227b2d28d5f35333240e51c1ba81e91ed7ed88ed0e0a78f1, source revisionaccf3ddd839c1255139dfd181b5ccb4f770555ff; all7 embedded modules match the deployed revision byte-for-byte, same current settings hash4231356f6dc75c59a8ba083ac779c087681acd2535f77060ffd54eab4348ee89/device ACTIVE tokenVersion6, no credentials, no automatic connector/fiscal start. Installed PC version3 and real fault/receipt acceptance are NOT TESTED until owner confirms idle update. Previous accepted v2 / three normal CASH receipts/no reconnect/~8s USER PASS stays protected and remains in manual, with after-record consistency only and no invented baseline/control stock/shift delta PASS. No new CI-only behavior was added to manual.

Released bounded behavior: only new negotiated OFFERED delivery can be rediscovered; original intent/active evidence precedes one committed immutable authorization; lost acknowledgement before local publication retrieves that same proof read-only. CreateNew/Flush(true) journal precedes fiscal input and its presence, even malformed/partial, prevents every later publication. Current authentication, tenant/device/token/settings/lifecycle/serial and freshness gates remain. Legacy DISPATCHED, missing active evidence, after-journal uncertainty, driver-consumed input and ambiguous physical/bank outcomes are never blindly replayed. Restore/deletion/rollback of local evidence under the same token is unsupported; restore requires fencing/reconciliation. This is not physical hardware exactly-once or universal failure certification. First-S OVER LIMIT auto-release remains HOLD: public manufacturer/support searches did not establish FTEXT+25.02 batch-stop/no-payment semantics. User changed hardware limits and prior scoped recoveries are preserved.

Remaining ASSIGNED: selected-PC idle download/run option3 once, preserve existing pairing and all original fiscal files; read-only current readiness confirmation; separately bounded physical CASH/CARD/NO/late-result/network/restart acceptance with before/after/control evidence before any new LAB transaction. No deliberate outage or synthetic payment at the working shop. Whole FTEXT stays OPEN. Single next action: owner installs the reviewed matching package during an idle gap; then confirm the actual installed behavior without repeating completed purchases. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-durable-handoff.md.

31/10/2026 — FTEXT-DURABLE-HANDOFF-05 amendment BEFORE SOURCE / candidate3376 HOLD

Retained same FTEXT-RESILIENCE-01 owner and continuation fix/ftext-durable-handoff-20261031. Three normal CASH receipts/no reconnect/~8s USER PASS recorded by3368/main629e443 remains authoritative and unchanged. Candidate3376/head71e6fb8 is DRAFT, NOT INSTALLED: one-shot server acceptance alone moves the lost-response ambiguity to the grant reply and does not recover that pre-publication failure. Its previous unique-grant/no-authorization-replay plan is superseded by this bounded amendment; physical fault acceptance remains NOT TESTED.

Amended design: commit a single immutable authorization bound to existing nonce/original command hash/current device-token/settings/lifecycle/serial. With the original durable local intent AND active marker present, a lost reply may retrieve the SAME committed authorization read-only, never create/renew another authorization. Before creating any fiscal pending/txt file the Windows connector must durably CreateNew and Flush(true) an irreversible original publication journal. Presence of that journal, even partial/malformed, prevents all later publication, including crash, driver consumption, missing result/report and module restart. No local original active evidence means no accepted-request redelivery/reconstruction. Only negotiated OFFERED may be rediscovered; legacy/default DISPATCHED remains unchanged. Each local recovery must recheck exact original identity and current authenticated configuration; no report/fiscal/business finalizer is fabricated.

Durability boundary: journal/intent/active evidence must never be deleted, edited, copied from another installation or rolled back to an older backup while its token remains active. Restored/lost local runtime evidence requires installation lifecycle/token fencing and operator reconciliation, not automatic execution. No claim of physical hardware exactly-once or resilience to arbitrary disk/backup rollback. After journal creation any uncertainty remains held/read-only; this phase cannot infer no charge/no receipt or safely retry a physical command. First-S OVER LIMIT release remains HOLD pending authoritative driver semantics. Current installed v2 remains untouched until exact full/native Windows and PostgreSQL CI, source/main verification, normal guarded deployment and matching package acceptance.

Allowed source after this amendment is green/main: refine existing candidate handoff service/cloud/cash modules and actual HTTP/native PostgreSQL/Windows fixtures. Required regression: lost authorization reply before journal yields at most one original publication on recovery; repeated authorization reads are byte/identity stable and never mutate acceptance; concurrent acceptance creates one authorization; any existing journal (valid/partial/foreign), consumed input, missing result/report, restart or missing original active marker produces zero re-publications; legacy, tenant/token/settings/lifecycle/serial, readiness, CASH/both CARD/NO/late-result/closed-shift/control-record protections remain. No production outage/test payment, new schema, pairing, fiscal limits, bank assumptions, stock/payment/sale mutation. Whole FTEXT remains OPEN. Single next action: green/main this amendment, then implement and validate the bounded journal protocol. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-durable-handoff.md.

31/10/2026 — INVENTORY-BULK-POS-PRICE-01 / USER PASS — Ριζαρείου και Διαδόχου

Ο χρήστης επιβεβαίωσε: «ΠΕΡΑΣΕ ΤΑ ΑΛΛΑΞΑ ΚΑΙ ΣΤΗΝ ΡΙΖΑΡΙΟΥ ΚΑΙ ΣΤΗΝ ΔΙΑΔΟΧΟΥ». Καταγράφεται USER PASS της αναφερόμενης ομαδικής αλλαγής άδειας τιμής POS και στα δύο πραγματικά καταστήματα. Κλείνει η συγκεκριμένη εκκρεμότητα πραγματικής αποδοχής μετά το παλαιό timeout· δεν ζητείται επανάληψη ήδη επιτυχημένης πράξης. Retained implementation owner: fix/inventory-bulk-permission-large-20261031. Δεν κλείνει συνολικά το Inventory39 ούτε άλλες αναθέσεις.

Normal guarded41201059265/job124536843141 SUCCESS, rollback preserved, dep-dbitt4s9v7es738j9bc0 LIVE12:32:12UTC. Independent HTTP exact42ae/oktrue and DB12:33:04 zero lock/long-query controls before native actions; post-test HTTP still42ae. Four affected wallet runtime files match accepted source.

Measured native MYWORKSTATION LAB / MAIN / LAB POS2 / existing authenticated SuperAdmin,31Oct12:34–12:45UTC: temporary master+invoice ON20→21, one separately identified new image SOL-LAB-20261031-C/SYN-C1 qty1PIECE/unit14EUR/VAT0, original checksum-bound attachment/job, one unapproved CREDIT DRAFT/NEW POS_OCR_DRAFT/one unresolved line, paymentTransactionIdNULL. Initial image reader produced no wallet movement: that separate route is NOT a metering PASS. No old invoice or B replay.

ONE original automatic assistant preview C returned completed comparison: its one physical row and totals14EUR agree; synthetic diagnostic status noted. Exactly one new INVOICE_OPENAI entry cdac4c32-ddaf-4d98-8003-f3e3946e5047 SETTLED, gpt-5.6-sol,9397input/0cached/9394writes/672output, uniform default30m provenance retained with original tariff version. Independent integer calculation80973microEUR equals charged amount and exact balance debit4964032→4883059. Its original hold was fully released, wallet21→23. Pre-existing B REVIEW930033microEUR remains separately unchanged. No new review audit/notices/retry/apply/product/stock/payment/approval/fiscal/email/learning action. Existing entries/foreign wallet/history and all three LAB sales/transaction/stock/shift/product controls agree; MAIN90/134/95 and open shift0transactions/0cash/card/IRIS/total. Only planned intake added one order/document/line/attachment/job. Native OFF23→24 added one config audit only, preserving final balance/old hold/history; LAB master+invoice/email nowOFF. The C draft/job/line stayed exactly unchanged after preview.

Evidence CHECKPOINTS/CHANGES/2026-10-31-ai-wallet-sol-review.md; CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/sol-uniform-cache-lab-20261031.json, sol-uniform-cache-ci-20261031.txt, sol-uniform-cache-assistant-pass-20261031.jpg and distinct C fixtures. Practical instructions docs/manual/ai-owner-wallet/PASS.md. Private before/after controls remain separate; no real-customer financial data published.

Residuals remain assigned/OPEN: historical customer REVIEW reconciliation and B hold resolution require original bound evidence, no guessed/manual financial SQL; initial image-reader metering and PDF file_data validation are separate observations; per-customer pricing UI, actual Owner-session detail, delivered email/thresholds, other models/cache12h/mixed/long-context hosted acceptance and OCR/product/approval scope are not closed. Existing Azure/GPT5/configuration PASS and all other owners preserved. No whole-wallet or broader Gate3 PASS. The earlier LIVE FAIL/next-source notes below are historical for this completed bounded correction; do not repeat the paid test or reclaim other assigned work.

31/10/2026 14:53:28 Athens — FTEXT-DURABLE-HANDOFF-05 ASSIGNED BEFORE SOURCE / NOT IMPLEMENTED

Retained FTEXT-RESILIENCE-01 owner; continuation branch fix/ftext-durable-handoff-20261031. User explicitly requests continuation after3normal CASH receipts and8second/no-reconnect USER PASS. Base mainb9e33d1 includes all other owners. Scope only the ambiguity when a new request is committed as DISPATCHED but its HTTP claim response is lost before local durable intent exists. Current legacy behavior intentionally refuses redelivery, so no payment repeats but application can remain held. Preserve this legacy safety contract and all accepted CASH/CARD/NO/recovery/readiness behavior.

Bounded design claim: opt-in handoffVersion1 negotiated only by the updated Windows client through exact-local-settings authenticated combined work poll. New CASH and both CARD modes may receive an immutable nonce/command-hash-bound OFFERED handoff substate inside existing checkoutJson when first claimed. Only these explicitly negotiated, current device/token/configuration/lifecycle/serial requests with no result/sale/VOID/decision and still OFFERED may be offered again after lost delivery. Old/unknown DISPATCHED, ACCEPTED, REQUIRES_CHECK, confirmed, released and foreign requests must never be generally redelivered. Before any fiscal pending/txt file, Windows durably writes its original3-key intent/active request and obtains a new one-shot server execution grant bound to original command hash/nonce/current identity. Fresh-readiness is required before granting execution; a current OFFERED/no-grant response may request a nonfiscal STATUS refresh before retrying acceptance. The device-locked transaction changes OFFERED to ACCEPTED once; subsequent acceptance calls cannot grant execution again. New protocol result reporting requires that grant; no grant endpoint calls a fiscal command or financial finalizer. No schema, pairing/credential, register programming, sale/payment/stock/VOID/cancel change.

Explicit safety limit: a lost grant acknowledgement AFTER server acceptance or a crash AFTER grant remains fail-closed/held for original evidence, not automatic resend or a claimed solution. A grant is never renewed or replayed into permission to publish; original intent/tombstone/files remain durable and immutable. Legacy client/default endpoints and all existing unresolved requests are unchanged. This phase targets provably pre-execution lost delivery only; it does not infer bank outcome, fiscal cancellation or absence of a receipt. Unpublished first-S OVER LIMIT automatic release remains HOLD pending authoritative batch-stop evidence. Whole FTEXT stays OPEN.

Allowed source after this claim is green/main: bounded handoff service and existing cash-request/work-poll/result routing; current Windows cloud/cash modules and negotiated callback before publication; pure/actual HTTP, isolated native PostgreSQL and actual Windows5.1 fixtures. Test before/after-commit lost offer/grant responses, local orphan intent/marker, concurrency/one grant, zero fiscal inputs without grant, exactly one permitted file publication, restart after accepted grant never republishing, legacy/no-version/old DISPATCHED refusal, foreign/hash/settings/device/token/lifecycle/serial denial, CASH/both CARD formats and current readiness/NO/late-result/closed-shift/control-stock invariants. No deliberate outage or synthetic payment at the live shop; current v2 keeps running. Exact full/native/Windows CI and normal guarded release precede a matching opt-in package and separately agreed idle physical acceptance. NOT IMPLEMENTED/NOT TESTED at claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-durable-handoff.md. Single next action: green/main this partial-PASS plus bounded claim, then isolated lost-delivery reproduction and implementation.

31/10/2026 14:53:28 Athens — FTEXT-CONNECTOR-LATENCY-04 scoped CASH USER PASS / THREE NORMAL RECEIPTS

Owner explicitly reports approximately8seconds from payment click until the dialog closes, versus earlier approximately15seconds. In reply to whether the receipt printed, sale completed and connector did not need reopening/reconnection, owner confirmed «ναι εκανα3πωλησεις». Read-only selected Rizareio/RIZAREIO-POS-01 records identify the three latest normal CASH requests at12:43:33/12:43:56/12:44:56UTC:65f1d0f6 (0.50),ffdf9bcb (10.50),d64ad58d (19.20), total30.20. Each is SALE_COMMITTED with exactly one same-client COMPLETED/ISSUED Sale, one matching CASH Payment and one StoreTransaction posting. The four sale lines have four corresponding POS_SALE stock movements with quantities matching7sold units. These are after-record consistency/deduplication observations, not measured before/after cash-shift or stock delta PASS; no pre-action control baseline was taken for the owner's ordinary sales. Server creation-to-finalization intervals2.915/6.193/3.222seconds are a different measurement from user-reported physical/UI8seconds. No old sale was recreated for evidence.

Deployed source42ae4a3/PR3357, guarded41201059265/Renderdep-dbitt4s9v7es738j9bc0 and matching CMDv2/90932bytes/hash9397e4a54fce8fbc252c2e5adad4befe4eb9de1c19e84ee07c6172dbedef5d4e. At12:46:31UTC, heartbeat current and same-register STATUS0/oktrue/fiscalExecutionfalse checked12:46:27.1579 received12:46:30.007: approximately2.85seconds rather than earlier approximately18seconds. This scoped USER PASS closes selected-PC update and ordinary CASH/no-per-receipt-reconnect/timing acceptance only. Supersedes those prior AWAITING USER markers; history below remains dated. Does not certify CARD timing, deliberate network/driver failure, lost one-shot response, automatic Windows login startup or whole FTEXT resilience. Preserve all older scoped PASS. Single next action: isolated durable handoff subtask below; do not repeat these3legitimate sales.

31/10/2026 21:37 Europe/Athens — CENTRAL-BACKOFFICE-ACCESS-01 / OWNER RIGHTS INSTALLED, FORM OBSERVED / LIVE ACCEPTANCE OPEN

Retained Rizareio readiness owner; source3370/head5a36f321 passed exact fullCI41228861281:4914PASS/0FAIL/0SKIP plus backup8; mergedafbf419e. Production route-composition follow-up3400/head21241d32 passed fullCI41230784884/job124624645231:4933PASS/0FAIL/0SKIP plus backup8; merged89ddf196. Original common mainafbf419e fullCI41230000823 passed4932/0/0+backup8. Pending main89ddf196 CI41232022988 was superseded/cancelled by later documentation3401; no full-source or LAB acceptance inferred from its docs-only success.

Latest common sourced6aac017544e993919af9f56ee84c4579ca6f0b1 preserves both Owner corrections and all concurrent Chat, cash, lifecycle and invoice-preview records/PDF. Shared full main workflow_dispatch CI41233152725/job124631582221 completed SUCCESS:4939PASS/0FAIL/0SKIP plus backup8/0/0, all five jobs green. Native canonical create/count/finalize passed19:17:40UTC; actual Owner-guard delegated product options/create passed19:22:37UTC. The completed full run was reused after observing it already queued; no duplicate CI dispatch. Automatic deploy41234313450 correctly skipped its documentation-head classifier. The normal main Deploy workflow was dispatched through GitHub UI because the connector has no workflow-dispatch operation:41234431891/job124635188807 retained exact full-CI/freshness guard, rollback checkpoint and pinned deployment. Guard passed19:30:19UTC, exact hook requested once19:30:21UTC, expected revisiond6aac017 verified healthy19:32:54UTC (21:32:54Athens). No direct hook, secret access, force/reset or safeguard bypass.

Read-only hosted observation21:34–21:37Athens, existing Super Admin support session / MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru / cloud browser tab4: new left menu Χειριστές και δικαιώματα; unified Πρόσβαση BackOffice and Χειριστές POS; New operator/list; existing lab31 edit form with role selector, explicit per-store matrix and all ten executable rights. lab31 remains STOCKTAKER with only inventory.read and inventory.count; other two LAB-company stores remain unchecked. No role/capability/credential edited or staff save submitted. No sale/count/finalization/payment/shift-close explicitly submitted; financial/stock before-after NOT TESTED. This is installed source plus observed form, not ordinary Owner login, live grant/revocation/operator/writer acceptance or whole LAB PASS. No previous personal login test repeated. Evidence CHECKPOINTS/EVIDENCE/owner-backoffice-permissions-20261031/source-and-release.json, owner-rights-form.jpg, owner-permissions-matrix.jpg and guarded-deploy-dispatch.jpg; only synthetic LAB form/public workflow metadata saved.

Available core rights: invoice archive/export/original read; sales/shift-centre read; product read/create/separate opening stock; stocktake read/count/create/finalize; cash report read. Role suggestions remain separate from explicit rights and existing grants are not expanded. Advanced invoice/payment/shift mutations and unrelated settings remain denied to delegated users. Owner changes require renewed personal login; short username+4–12 digit PIN remains available with optional separate password. POS administration preserves its established identities and policy.

Single next action: Owner selects the intended LAB-only rights for the existing lab31 (or a user-created personal account), saves their own choices and completes secure personal sign-in for grouped role/store/revocation and approved writer acceptance with fresh before/after where required. Agent has not selected additional rights or submitted credentials. Full correction/real-store readiness stays OPEN/ASSIGNED to this page, with advanced delegation and hosted acceptance explicit residuals. No manual or central PASS closure; preserve the latest shared PDF while OPEN. This release receipt is the retained-owner handoff; no parallel takeover.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / ROUTE COMPOSITION CORRECTION / AWAITING CI + RELEASE + LAB

Retained Rizareio owner, continuation fix/backoffice-staff-product-route-composition-20261031 based on common mainafbf419e56bcdb7ab3022dd696de13963f71ddbd. Source3370/head5a36f3212f68ee02d641df590a7828f90bd592c3 passed exact fullCI41228861281/job124618850556:4914PASS/0FAIL/0SKIP plus backup8PASS; mergedafbf419e. Main fullCI41230000823 queued behind an earlier common source run; no installed/full LAB product acceptance claimed. Concurrent cash handoff3395 and lifecycle profile3396 source, their records and latest PDF preserved.

Additional production mount review found that inventoryArchiveImportRoutes runs its Owner guard before the read archive router, and requireOwnerProductAccess runs before the canonical new-card router. Thus standalone canonical service/UI tests were insufficient to prove these two delegated HTTP paths reachable; no hosted permission test or new LAB failure is inferred. Bounded wiring correction under the existing core-integration assignment: products.read exact GET archive root skips the import router entirely, leaving every import/write denied. The first existing Owner product guard finishes ONLY trusted delegated products.create GET/new-card/options and POST/new-card through the unchanged shared options/creator services, before unrelated Owner bootstrap/audit routers; no role elevation or blanket next into Owner routes. Current grant/session/store/licence/lifecycle checks remain inside those services, including transaction-time create and separate opening-stock admission. Existing Owner and POS guards/handlers remain unchanged. Archive final grant check now follows its last VAT-option read so late revocation cannot expose the response.

Added actual Express composition test with the original import router, actual archive handler and Owner guard in production order, asserting successful scoped read/options, no legacy schema/business writer, import/unknown/foreign-store/untrusted-role denial, unchanged Owner continuation and revoked read withheld after final VAT query. Focused9PASS/0FAIL/1native-envSKIP. Extended the real PostgreSQL creator fixture to exercise the actual Owner guard HTTP entry for delegated options and creation, retaining financial/control-store and atomic creator proofs. Full final CI and ordinary guarded exact release remain required; no live account/grant/credential/business action. Broad acceptance stays OPEN/ASSIGNED, no new manual/PASS closure. Single next action: green full/native follow-up PR/main CI, then verify exact healthy installation and owner/operator UI.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / CORE OWNER RIGHTS SOURCE / AWAITING EXACT CI + RELEASE + LAB

Same retained Rizareio owner and PR3370. Published product source72b9155369e688e56d1833d979ae826e68c2745d completed exact fullCI41225874231/build124610081368: 4901PASS/0FAIL/0SKIP plus backup8PASS. This is source validation, not hosted product/LAB acceptance.

Owner administration now combines BackOffice account creation/role/store/action matrix and the existing POS operator administration in one entry, with explicit store selection before POS loading. POS identities/rights remain their original system. Ten executable BackOffice rights cover invoice archive/export/original read; actual sales/shift-centre read; product archive read, full new card creation and separate opening stock; stocktake read/count/create/finalize; cash report read. All role presets remain suggestions; existing accounts/grants are not expanded. Unknown module actions, invoice edit/approve/delete, payment/reversal/shift closing and settings remain default-denied for delegated users. This is the bounded executable core, not a claim that every Owner operation is delegable.

Normal filtered navigation mounts existing invoice, transaction, inventory archive and full product-card modules. Read-only sales avoids online-sale reconciliation and unrelated pickers; server flags and UI both forbid writes. Invoice original is constrained by both inbox and attachment company/store, with a safe delegated preview. Permissions/session/module state rechecked before read responses and inside canonical write transactions. New stocktake creation reuses the existing snapshot writer with an optional idempotency UUID in existing scopeJson, required for delegated staff, advisory lock and matching-payload replay. Finalization reuses the original locked transactional writer with explicit separate grant, cause and confirmation; uncertain result is verified by GET without a second finalize submission. Count-only users retain blind expected quantities; finalizers can review quantities and finalized outcome. No production schema/migration, data change, grant save, credential entry or LAB business action performed.

Focused mounted/policy/sales tests22PASS/0FAIL/1native-envSKIP. Native isolated tests added for invoice attachment cross-store refusal and canonical create/count/finalize, one replayed parent/one audited stock movement with unchanged financial and other-store controls. Full final source/main CI, ordinary guarded exact healthy release and grouped Owner/operator LAB acceptance remain required. No new manual/PASS closure; broader correction and real-store readiness remain OPEN. Next action: publish complete source, verify exact full native CI, release through ordinary safeguards, then verify owner UI and explicit operator permissions. Assignment remains with this page.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / EXISTING PRODUCT MODULE INTEGRATED IN SOURCE / AWAITING FULL CI + LAB

Same retained Rizareio owner and source PR3370. Foundation head046e65745f1f07f5d83b8e74271cd9d90b77bf2f full CI41204045733 completed SUCCESS. Current main2ef626a0afa8c85e3ffa68e4e125f9a16d1edd7c and all intervening POS keyboard, FTEXT journal, cash and owner profit source/receipts preserved. Temporary workspace maintenance removed unpublished local module files; recovered published foundation from3370, reconstructed the bounded product integration and reran checks. No user data, credentials or business transaction was reconstructed or submitted.

Executable rights now include products.read, products.create and products.opening-stock separately from existing inventory.read/inventory.count/cash.read. Role remains a label/preset; no role-based privilege inheritance. Dependency validation is shared: creation requires product read; opening stock requires creation and read. Existing stored accounts/grants are unchanged. Server request admission remains exact/default-deny; archive GET binds to the selected store and revalidates live grant before response. Existing full product-card creator revalidates current grant/session/licence/lifecycle INSIDE its native transaction; nonzero opening stock requires the separate grant before any write or replay. Existing idempotent request/fingerprint, VAT identity, store-only card, real User attribution, barcode/supplier/audit atomicity and all POS/Owner writers remain protected. No schema/migration.

Personal BackOffice now uses the normal application navigation and mounts the existing InventoryArchivePanel read-only, with no edit/import/transfer controls; a separately authorized operator opens the existing InventoryNewProductCard. Opening stock is disabled and sent as zero without its separate right. Stable selected-store API binding rejects late responses; navigation/exit is disabled during product save. Existing stocktake/cash functions remain admitted only by their actual grants. General owner CommerceLauncher rejects delegated staff entry; no blanket exposure of its owner-wide routes. Unknown writes, existing product edits, imports, transfers, invoice approvals, finance and settings are still denied.

Reconstructed client/TABLE_SERVICE and server preparation builds PASS on Node24.22.1 (Node20 remote CI required); focused checks rerun, native cases remain to be executed in isolated remote PostgreSQL. Added actual mounted read-only archive/role dependency checks and native shared-creator case covering missing/create/stock rights, distinct store, one replayed movement/User FK and grant withdrawal before transaction. Full local/remote results will be appended. No hosted account/grant/stock/financial mutation or new LAB/manual PASS.

This is an executable bounded module integration, not completion of every BackOffice module/action requested. Wider module integrations and roles, complete Owner/operator/revocation LAB acceptance, exact guarded release and real-store rollout remain OPEN. Next action: exact full/native CI for the updated PR, fix failures, then continue reviewed module integrations without expanding unknown legacy routes. Same owner remains assigned; no acceptance test is requested before exact release. Preserve latest shared PDF while this source remains OPEN; no manual/numbered closure.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / OWNER CORRECTION / ASSIGNED BEFORE SOURCE

Same retained Rizareio readiness owner; continuation fix/owner-backoffice-permissions-20261031. User explicitly rejected the narrow separate stocktaker screen and requires the OWNER to create operators in BackOffice, choose each role, stores, visible functions and allowed actions. This supersedes the product acceptance of the three-profile workspace, not the protected authentication/tenant/POS invariants. No product completion is claimed from successful PIN login.

User-supplied screenshots31Oct14:52–14:53 Europe/Athens show successful personal lab31 login, LAB selected, stocktaker role, stocktake load returning no open stocktakes. These establish only the displayed login/read flow; exact screenshot runtime revision not independently measured. No quantity, stock, payment or finalization was entered. Full live grant/revocation/foreign-store and writer acceptance remain NOT TESTED. Do not repeat the login just for evidence.

Current main0fdc75388 and intervening shared history, complete active/tracker/pending/checklist, prior central-access/PIN checkpoints and session manual reviewed. Existing owner account creation and revision/audit/revoke machinery work but only three capabilities are supported; role presets are also hard ceilings. Existing POS OperatorManagementPanel is a different credential/profile system and must not be accidentally replaced, grant POS access or have its verified permissions changed. Existing CommerceLauncher and StoreCloudPage contain owner-only actions and company-wide fetches: do not expose them wholesale by promoting EMPLOYEE to OWNER/MANAGER or trusting hidden buttons.

Authorized correction: one owner-facing operator administration entry; role presets plus independently configurable per-store operation rights; readable section/action matrix; normal BackOffice navigation filtered to granted functions; server admission for every operation and object/store scope; deny missing/unknown rights. Keep credentials short-PIN-compatible, existing account IDs/grants (no automatic privilege expansion), current sessions/revocation/audit/licence/lifecycle, Owner/SuperAdmin MFA and all POS behavior. Role label is not an authorization bypass. Separate explicit view/create/edit/delete/approve/finalize capabilities where the function supports them. Owner manages security; operator cannot delegate themselves.

Implementation region: shared/backoffice-staff.mjs, existing staff account/access/routes/bootstrap and their tests, existing BackofficeStaffAdmin/Workspace/navigation/styles and focused integrations with actual module components/routes. Each module integration must be reviewed for company/store scoping and transaction-time authorization before exposing a writer. No blanket URL-prefix allow or fake selectable capability with no executable operation. No schema or migration without separately reviewed lifecycle impact. Other module owners/source and concurrent receipts remain intact.

Acceptance: real Owner creates/edits/disables a LAB-only operator; selected roles are presets and rights remain explicit; operators see/run exactly allowed functions; direct API forbidden action/cross-store/object access refused; absent rights never mean all; changed/revoked policy invalidates existing session; late store responses withheld; view-only cannot write; each newly integrated write retains existing audit/idempotency/financial and lifecycle safeguards. Require full PR/main CI and ordinary guarded exact release before grouped LAB. Broad request remains OPEN until the actual module/action matrix and live evidence are complete. Next action after this claim merges green: implement owner-controlled permission policy and UI in bounded, validated integrations.

Checkpoint CHECKPOINTS/CHANGES/2026-10-31-owner-backoffice-permissions.md. Assignment stays with this page, no parallel takeover and no whole LAB/manual PASS.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / OWNER POLICY FOUNDATION PREPARED / NOT COMPLETE OR INSTALLED

Retained Rizareio owner; source fix/owner-backoffice-permissions-source-20261031. Before-source correction claim PR3369/headf34b98ac783d484d3e5331ed95379f8922a4faec passedCI41203580906 and mergedb9e33d1f930ff625fb7d9ce4376d2aa5aa762d18. Source foundation now separates the persisted explicit capabilities from profile presets on both server validation and live grant admission. Selecting/changing a role no longer silently changes rights; applying its suggestion is an explicit separate action. New store selection starts with zero rights. Duplicate/unknown rights and count without read refuse. Existing stored identities/grants are not migrated or expanded; default-deny routes, session revoke/CAS/audit, password/PIN, Owner/MFA and POS stay intact.

Owner UI now uses Χειριστές και δικαιώματα, New operator, and readable per-store section/action checkboxes available independently of profile. This foundation still covers ONLY the previous three executable capabilities inventory.read, inventory.count, cash.read. It is NOT the complete requested normal BackOffice module/action integration; existing separate staff workspace remains unchanged. Do not ship or request another user test as if the rejected product were corrected. No fake selectable module rights or role elevation added.

Focused mounted/policy/login/logout/MFA checks35PASS/0FAIL/0SKIP; staff subset14PASS/0FAIL/1native-envSKIP. Frontend/TABLE_SERVICE build PASS. Added native PostgreSQL HTTP case for owner-defined cross-profile view rights, explicit count refusal, foreign-store/admin refusal, edited rights revoking old session, new MANAGER with zero rights still denied, financial/stock controls unchanged. Native case and complete remote CI remain pending. Local full suite4231PASS/0FAIL/318native-environmentSKIP (4549tests). No hosted credentials/grant/business action by this continuation.

Remaining required work: integrate the owner's operator administration with the actual BackOffice modules and usable per-action rights, normal authorized navigation, roles beyond the current bounded presets where needed, preserve all existing module-specific tenant/store/licence and transaction-time writer checks; then full PR/main CI, exact ordinary guarded release and grouped Owner/operator LAB acceptance. Existing personal login/read screenshots are retained evidence only. Broad correction OPEN; owner remains assigned. Next action: complete full/native CI for this foundation, then implement the actual module/action integrations without exposing legacy owner-wide routes wholesale.

Draft source PR3370 / head046e65745f1f07f5d83b8e74271cd9d90b77bf2f / full CI41204045733 started; not merged or installed. Keep this a draft until the broader module/action integrations are completed and validated.

31/10/2026 14:34:18 Athens — FTEXT-CONNECTOR-LATENCY-04 SERVER RELEASED / PC UPDATE AND TIMING ACCEPTANCE OPEN

Authorized urgent connector update, retained FTEXT-RESILIENCE-01 owner. Claim3356/90be67a passed docsCI41197915342 and merged670210b before source. Source3357 finalhead04be4001cd0266214744dea0e2d5e37580cceba0 passed fullCI41198789176/all5, native FTEXT41198789105/30PASS0FAIL0SKIP and Windows5.1 fixture suite41198789094, then merged42ae4a3db371943fb0109aa815fac8a1b6bd9f33. Exact main fullCI41199931951/all5 and main Windows41199931722 passed. Normal guarded deployment41201059265 succeeded, Renderdep-dbitt4s9v7es738j9bc0 LIVE12:32:12.885UTC; independent /api/health oktrue and exact42ae4a3 verified. Later main2c6cf04 is documentation-only; no deployment guard bypass. Earlier ancestor32bfe94 mainCI41199782907 was cancelled solely to release the queue for integrated42ae4a3, after proving32bfe94 is its ancestor; all wallet/other-owner source is preserved and validated by exact42ae4a3 fullCI.

Installed server supports one authenticated scoped work poll instead of sequential ping/VOID/CASH/late/error polling. Exact local settings/hash must match before any queue read/claim. Original durable local report suppresses all new claims;20s STATUS/15s heartbeat, current device/token/settings/lifecycle/license, one-shot dispatch, original evidence and all CARD/fiscal/accounting guards remain. Matching official selected-POS Windows package is now available as MyWorkStation-Ftext-RIZAREIO-POS-01-20261031.cmd, version2,90932bytes,SHA256 9397e4a54fce8fbc252c2e5adad4befe4eb9de1c19e84ee07c6172dbedef5d4e. All7 embedded production modules verified byte-for-byte, revision42ae4a3, no credential/automatic fiscal start, same settings hash and ACTIVE tokenVersion6/current live settings independently matched. No new pairing or vendor/register programming.

Selected-PC instruction delivered: during an idle gap, keep FTEXT+ open, close only the previous connector, download the updated CMD again, select3 once and keep the new connector running; do not select pairing1 again. Package uses1s successful idle wait,5s local nonfiscal STATUS wait and refresh5s after completion, preserving old pending STATUS age and requiring a new round-trip for stale recovered STATUS. Readiness failures retry without stopping the loop; safe stage and numeric register code distinguish failure. The last scoped read-only unresolved queue was empty before handoff. No real payment/receipt reissued, fiscal command, production SQL mutation or inferred sale/payment/stock delta during this update.

SERVER RELEASE and PACKAGE AVAILABLE are engineering/operational evidence only. User has not yet confirmed this PC update or a timed receipt under the new package. Approximately15s reported delay, recurrent lost-readiness observations and STATUS101 are not relabelled physical PASS. Whole FTEXT remains OPEN for actual timing/continuous operation and controlled CASH/both CARD modes driver/network/late/restart acceptance. Windows automatic login startup remains NOT TESTED. Lost one-shot response before durable local intent stays fail-closed; unpublished automatic first-S OVER LIMIT release remains HOLD pending authoritative batch-stop semantics. Prior scoped CASH/NO/reviewed first-line rejection/printed receipt and readiness activation PASS remain unchanged; no blanket RBS parity or complete resilience claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-connector-latency.md. Single next action: selected-PC update, verify fresh automatic communication, measure the next ordinary legitimate receipt without recreating a historical transaction, then record only actual user/financial evidence.

31/10/2026 — OWNER-EXPENSE-ZERO-VAT-01 / LIMITED READ-ONLY LAB PASS / COMPLETED

Owner fix/owner-expense-zero-vat-20261031; source PR3360. Before-source claim3359 merged94c32f1. Initial f48020e1/fullCI41199788992:4861server+8backup/0FAIL/0SKIP. Shared-registry conflict retained; reconciled final85316476/fullCI41200854613:4864+8/0/0, merged906f20d0. Exact mainCI41201990925:4864+8/0/0. Ordinary guard41202952304 correctly deferred older906 because newer Android source was on main; no bypass. Newer0fdc753887821c3050174f284ce700fefc87a990 retains every owner-report runtime blob; exact fullCI41202964821:4864+8/0/0. Normal guarded release41204097193/job124545595339 requested that revision13:08:22UTC and confirmed exact healthy13:13:30UTC. Independent public health confirmed exact0fdc before actual review.

Actual31Oct15:14–15:16Athens, authenticated SuperAdmin support desktop, virtual MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ only. Existing01Aug–31Oct report before/after: October gross expense305.58 retains recorded documentedVAT48.24 and now net257.34; September gross313.20 is now net313.20/VAT0; totals gross618.78/net570.54/VAT48.24. Original sales68.90, purchases2115.00, payments5533.50, missing costs9/99 and7returns/3cancels unchanged. Day26Sep keeps margin79.66% and gross profit0.35; full expense313.00/VAT0 now yields net-312.65 instead of unknown. Day25Sep net3.01 also observed in print. Monthly/total profit correctly remains unknown for missing sales costs.

Actual native CSV downloads960bytes before and1027bytes after:2monthly rows/21columns. All18 unaffected columns match exact original strings; new net expenses257.34/313.20 and VAT48.24/0 match UI. Actual standalone print contains the same day/month/total amounts and zero-rate convention; no native printer/PDF acceptance. Warning opens exactly12 original contributing entries; no new expense/approval/payment or document edit. Other-expense form shows new help, blank amount, no document selected; cancelled without submission. Fresh active MAIN before/after:0transactions/cash0/cards0/IRIS0/total0/expenses0. No financial/stock/fiscal action or protected fixture replay. Hosted DB-wide hashes/stock, independent ordinary Owner, mobile and physical devices NOT TESTED; native CI proves isolated SQL/HTTP scope, credits/reversals, documented installments/cent allocation and unchanged ledgers.

This new owner instruction intentionally supersedes historical unknown-expense suppression only: without usable VAT analysis, full OTHER_EXPENSE amount is expensed at0% for management reporting. Valid documented VAT allocation and original records remain unchanged. Never fill missing sales costs with zero to produce a margin. Whole financial27/numbered25 remains OPEN with codex/task27-resume-20261005 and all other owners preserved. Only this independent requested policy is complete; no repeat of protected LAB fixtures. Manual profitability/PASS.md, active/tracker/numbered/pending and canonical PDFs synchronized by this receipt. Evidence CHECKPOINTS/EVIDENCE/owner-expense-zero-vat-20261031/.

31Oct2026 13:36 Athens — FTEXT-CONNECTOR-LATENCY-04 ASSIGNED / current recovery owner

User reports connector must be opened/connected for every receipt and approximately15s dispatch delay; screenshot shows recurring generic recovery failures despite successful STATUS. Read-only production evidence31Oct11:33–11:36UTC: device heartbeat active/readinessRequiredtrue; STATUS reports separated15–30s and one133s gap; sampled checkedAt11:31:19.901 received11:31:38.493 (18.6s), while freshness gate20s; actual server rejects checkout at11:26:10 and11:33:04 with FTEXT_REGISTER_NOT_READY. This contradicts any inference that activated readiness alone completed resilience. Prior physical scoped CASH/CARD/NO PASS stays scoped; no new real PASS.

Retained FTEXT-RESILIENCE-01 owner continuation branch fix/ftext-connector-latency-20261031, prioritizing this bounded independent subtask before unpublished first-line auto-release candidate. Claim BEFORE SOURCE: consolidate authenticated device heartbeat/work discovery into one scoped polling request instead of ping plus void/cash/late/error sequential requests; preserve current credentials/settings/license/lifecycle/serial, exact original evidence, single dispatch semantics and all CARD/fiscal/financial safety. Keep old endpoints/backward compatibility. Updated Windows loop uses the combined response, bounded short idle wait and scheduled fresh nonfiscal STATUS; authenticate identity before local fiscal work, keep durable pending results/restart recovery first, isolate readiness/recovery failures without invented success, expose safe failure stage rather than secrets. No relaxation of20s readiness/15s heartbeat, no stale-status authorization, DISPATCHED redelivery, fiscal retry, sale/payment/stock/VOID/cancel/schema/production SQL writes. Windows automatic startup is separately NOT TESTED; do not promise per-PC startup without physical verification.

Source surfaces after this claim is green/main: FTEXT device routes/services and scoped Node/HTTP/native PostgreSQL tests; Cloud-Connector/Cloud-Tools and Windows smoke/fault tests; package generated only after exact full/native Windows CI and ordinary guarded release. Confirm combined no-work poll uses one cloud request, pending local report bypasses fresh claim, original one-shot and fresh-readiness gates remain, errors do not stop loop, no duplicate fiscal publish across lost response/restart. Current user-installed package remains unchanged until verified release. Existing unpublished first-line auto-release candidate remains separate and HOLD pending authoritative protocol evidence that rejected first S cannot leave later fiscal commands executed. No automatic absence-of-receipt inference is included here. Whole FTEXT OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-connector-latency.md. Single next action: green/main bounded claim, implement/verify combined polling, deploy normally, then matching PC package and actual timed receipt acceptance.

31/10/2026 — Historical installed release and measured scoped LAB receipt

Retained owner fix/inventory-bulk-permission-large-20261031; receipt docs/inventory-large-permission-release-20261031. Claim3353 merged before source3354; final2b37c531 PRCI41198064459 and main2d80052/CI41198824482 each4847server+8backup/0FAIL/0SKIP. Concurrent source/docs advanced main; cancelled/skipped46814/94c32/manual queued runs are not release proof. All before/after snapshots and exact receipts in CHECKPOINTS/EVIDENCE/inventory-bulk-permission-large-20261031/.

Base/store price1.20, isolated stock1/controlMAINstock4, all StoreProduct fields/timestamps,15movements/latest10Oct11:49:05.817,43company shifts,109otherProducts, full ledger/sale/payment hashes and sums and11company price-history rows exactly unchanged across both actions. No sale/payment/stock/fiscal/invoice/role action. Existing return-from-card list refresh quirk retained; refreshed list before restoration, no unrelated fix. Initial old support view expired after deployment; canonical PlatformAdmin retained valid session and selected LAB again; no auth bypass. Native8000/inactive/audit/rollback/replay/selected100/held-stock-row/6s delay PASS; independent10000 completed426ms in exact main CI (204ms PR,348ms earlier main), not production-scale timing.

Historical installation/LAB receipt: the one-product persistence/restore measurements below remain scoped LAB PASS. Real-store acceptance subsequently received USER PASS for Ριζαρείου and Διαδόχου as recorded above; the old Διαδόχου timeout is historical, not a current RETEST request. No real-store operation was repeated by this page. Company-card scope/operator rights and mixed/VAT/SET/price/financial paths remain unchanged. No whole Inventory39/other-owner closure.

31/10/2026 — INVENTORY-BULK-POS-PRICE-01 — CLOSED SCOPED LAB PASS

Owner work/bulk-pos-price-edit / receipt docs/bulk-pos-price-permission-receipt. Claim3330 merged985d5cff before source; source3334 original1d2e2376 CI41188535663 and synchronizeda75cad68 CI41189455309 full PASS. Shared main advanced; cancelled push runs108e/4285 were NOT treated as release evidence. Exact combined9644e95809ac0f0f1a80b1125dccfbed53aa3bed manual fullCI41190777427 SUCCESS:4779server+8backup/0FAIL/0SKIP, native603-product/tenant/control/KEEP/replay/rollback/POS-denial, build/invariants/HTTP/browser E2E. Ordinary guarded workflow41191604346 verified full CI/freshness, pinned hook and exact health SUCCESS; Renderdep-dbirtcm7bikc73dn0rh0 LIVE31Oct10:12:53UTC. Independent no-cache health verified exact9644. Automatic deployment classification of doc-only head was correctly skipped before this normal guarded workflow dispatch; no direct Render deploy or guard bypass.

Actual CloudChrome/SuperAdmin/virtual MYWORKSTATION LAB, isolated label storecmuk8gxui000ppabfykdxwb1y, no open store shift/physical terminal. ONLY existing synthetic LAB-EXCEL-20260909-01/productb1466a68-c47b-47cc-9139-69e6f9f7f978; no sale quantity/payment action. Fresh before10:15:34.229788UTC false/receipts0 -> ONE native ALL/YES save10:15:48.978365 fals e→true/receipt44b67e4c-ec58-48eb-bb86-7a85b9976415/request275dc580-0a89-4acb-890e-28dbfcaac00c. Real product card reopened and existing checkbox checked. Fresh restoration baseline10:17:23.302482 true/receipts1 -> ONE native selected-one/NO save10:17:30.115774 true→false/receipt7fb173d9-726d-4052-86e9-18ec92369949. Real card reopened and checkbox unchecked. Final10:17:37.634730 false/receipts2; metadata matches initial except expected updatedAt. Exact Audit before/after and allProducts true/false correspond to each action. No duplicate submit or replay.

Independent snapshots before/after each action: base/store price1.20, isolated stock1/one movement/latest10Oct08:15:01.673 and shared MAIN control stock4/14movements/latest10Oct11:49:05.817 unchanged. All43company shift hashes, full ledger/sale/payment aggregates and hashes, other-product hash and zero price-history rows exactly equal. Same Product flag is intentionally company metadata shared with MAIN, disclosed in form; store price/stock rows including updatedAt stayed byte-for-byte equal. No financial/stock/fiscal/role/invoice write. Evidence CHECKPOINTS/EVIDENCE/inventory-bulk-pos-price-20261031/*.json. Native desktop ALL form and selected form were observed; initial getByLabel automation locator did not match, actual accessible combobox locator succeeded before any save. No application failure inferred. Browser screenshots rendered correctly, but screenshot file synchronization was unavailable; durable database/observed-UI records retained.

PASS limited to permission-only ALL enable and selected disable/persistence/restore in the one-product virtual store. Cross-page603/inactive/tenant/concurrent retry/rollback are native CI evidence, not mass live application; physical/mobile/POS price write and all real stores NOT TESTED here. Existing permanent-price/operator changeRetail enforcement and all prior inventory/VAT/merge/POS PASS/owners retained. No whole inventory Gate closure. Manual inventory/PASS.md, active/tracker/numbered/pending and central PDFs synchronized in this receipt; completed independent pending entries removed. No remaining implementation/installation acceptance for this scoped request.

31/10/2026 12:51 Europe/Athens — CENTRAL-BACKOFFICE-ACCESS-01 / SHORT PIN INSTALLED, FORM OBSERVED / LIVE ACCOUNT ACCEPTANCE OPEN

Retained owner Rizareio readiness / feat/central-backoffice-access-20261029; continuation fix/backoffice-short-pin-20261031. Source PR3339 merged602ff7ea after exact PR/main CI4782PASS/0FAIL/0SKIP plus backup8PASS. Newest common source802d570dd0048558b53ee77ec753d2252210bd63 passed full mainCI41192839430/job124513994277:4842PASS/0FAIL/0SKIP plus backup8PASS and all five jobs green; native PIN-only case passed again10:35:35UTC. Ordinary guarded deployment41193853815/job124515985808 requested the exact revision10:44:10UTC and confirmed it healthy10:49:04UTC; public health independently confirmed the same revision. No bypass/manual deployment. All later parallel records and source retained.

Hosted read-only observation at MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, existing SuperAdmin support session, cloud browser tab4: list still has0 personal accounts; new form labels password optional, actual required attribute absent, PIN pattern[0-9]{4,12}, clear username+PIN-only guidance. Prepared synthetic name Δοκιμή απογραφέα LAB, short username lab31, only selected LAB store with STOCKTAKER inventory.read/inventory.count; both credential fields blank, no submission. Screenshot CHECKPOINTS/EVIDENCE/backoffice-short-pin-20261031/pin-first-form.jpg, SHA2565888cd4e07176b212698302136444b72955abaee3e615d0178ac545cde979586. No credential read/copied/entered, account/grant mutation or financial/stock action by this page. Existing accounts/longer PINs, optional strong password and Owner/SuperAdmin/MFA/POS behavior protected by regression. This is installed source plus observed form, NOT hosted account/login/count/revocation or whole LAB PASS.

Single next action: user leaves optional password blank, enters their own4-digit PIN and submits the prepared LAB-only account, then securely completes personal username/PIN sign-in for grouped role/store/session acceptance. New credential entry/submission requires user control under browser policy. Same owner retains OPEN assignment; wider live acceptance and Owner PIN alias remain OPEN, no manual/numbered PASS closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-backoffice-short-pin.md. Central registries/PDF synchronized with this bounded release receipt.

AI-OWNER-WALLET-01 — 31Oct2026 / BOUND POSITIVE CACHE-WRITE FAIL / SAME OWNER BEFORE CAUSAL CORRECTION

Retained owner feat/ai-owner-wallet-20261022; continuation fix/ai-wallet-uniform-cache-20261031. Newest real observation overrides earlier AWAITING LAB plans: invoice assistant Sol remains LIVE FAIL. Diagnostic3326 and zero-write3328 are delivered, not a functional Sol PASS. Source3328 c05d25474b4a06f01378e1291b5a7ba45ae39fe8 merged21b48455d11c55544381fb9e49a5eab92ab3de7a; actual installed9644e95809ac0f0f1a80b1125dccfbed53aa3bed passed full main41190777427:4779server+8backup,0FAIL/0SKIP and ordinary guarded41191604346/dep-dbirtcm7bikc73dn0rh0. Independent HTTP exact SHA and DB zero lock/long-query controls verified before native actions. Four wallet runtime files byte-identical to accepted source.

Measured native LAB, existing SuperAdmin / MAIN / LAB POS2,31Oct10:13–10:30UTC: master+invoice ON17→18 and OFF19→20, one audit each, no money/history/business delta from configuration. One new synthetic supplier LAB METER TEST only. New PDF A failed file_data validation before any charge/job/attachment; never replayed. Distinct new image B (SYN-B1 qty1 PIECE/unit12EUR/VAT0) read one line, produced one checksum-bound original attachment/job and one unapproved CREDIT DRAFT/NEW POS_OCR_DRAFT with one unresolved line; paymentTransactionIdNULL, no product/stock/payment/approval/fiscal/email action. Initial image reader produced no wallet movement; this is NOT a metering PASS for that separate route.

ONE original native Sol preview B at10:27UTC returned HTTP200/modelgpt-5.6-sol but became REVIEW. Newly bound private audit records9399input/0cached/9396cache-write/778output, both TTL bucket fields absent, exact input cap9399/output30000. No retry, charged0, original930033microEUR hold retained. All three LAB sales/transactions/stock controls unchanged (main90/134/95; orders56→57 only for the planned draft), no foreign wallet mutation. Real-store business activity is independent and is not claimed unchanged. Historical customer REVIEW entries remain untouched. LAB now master+invoice/email OFF, version20, original balance retained, exactly the B hold remains.

Demonstrated cause: positive aggregate cache writes are valid without lifetime buckets for a uniformly known request policy. Official current guide https://developers.openai.com/api/docs/guides/prompt-caching uses prompt_cache_options.ttl, default30m, optional per-breakpoint overrides; its uniform examples report only aggregate writes. Installed invoice-assistant-pos.js has no cache options/breakpoints/hidden previous-response or conversation references. Therefore this new request's policy is determinable; mixed/unknown requests are not.

Bounded next source: snapshot only allowlisted derived request cache policy with the original hold, preserve immutable tariff prices/version and model/prompt/output30000, and use a proven uniform30m/12h request policy only when the provider omits the optional write partition. Any supplied malformed partition, missing/null/noninteger total/read, overlap, model/bounds/unpriced usage still fails closed; mixed/unknown/hidden-history policy still needs authoritative provider partition. Record partition provenance in settled usage and bounded diagnostic evidence, never raw prompts/files/options/errors/credentials. No schema/price/env/global/company-policy change, historical repair or financial SQL. Reproduce this actual shape RED→GREEN and require native PostgreSQL/full exact PR+main CI/build/E2E, normal guarded release/independent health, then ONE distinct new synthetic C request; never replay B. Its existing hold must remain separately identified.

Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ai-wallet-sol-review.md and private before/after controls contain every phase. Same item remains assigned/LIVE FAIL; per-customer prices paused; other owners, FTEXT/inventory/reader/cash/PIN work and prior Azure/GPT5/configuration PASS preserved. Publish real acceptance with manual/all common registers/PDF immediately; no whole-wallet PASS.

31/10/2026 — CASH-CONTINUATION-14 / LIMITED LAB PASS / METADATA CONTINUATION CLOSED

Retained cash owner codex/cash-chat-reconciliation-20261026. Source3336/35b709e1 full PR CI41189110384:4762server+8backup/0FAIL/0SKIP, merged42c48c4. Actual combined source9644e95809ac0f0f1a80b1125dccfbed53aa3bed exact full main dispatch41190777427/all5SUCCESS:4779server+8backup/0FAIL/0SKIP, native automatic source/continuation case779 executed PASS. Guarded deployment41191604346/job124509398468 resolved exact9644e958, preserved rollback, requested pinned deployment10:10:58UTC and reached exact healthy10:13:11UTC. Independently observed /api/health ok:true/exact9644e958 before acceptance; all3owned runtime blobs match reviewed source. Later shared source/settings actions by other owners are outside this receipt.

Pre-action baseline published3337 and merged85ba793 before metadata write; fresh before10:39:26UTC recorded in active checkpoint and evidence. Authenticated Platform SuperAdmin/CloudChrome, MYWORKSTATION LAB,27Oct2026 full day, MAIN/LAB POS2 original rowa3494bb3-61cf-447c-9707-27311f35708c: one closed row/cash0/cards0/automatic0, manual unreviewed, headROOT/history0, reportHash9102a26299fbef34c3534bb3a558eba090a275d948a646e6711530de5c58f4ca. New default notes empty, no false manual-confirmation prompt.

Exactly one CHECKPOINT10:39:41.592UTC (12:39Athens): resumeFrom28Oct with the explicitly synthetic open document question. UI success, history0→1 CHECKPOINT only. Refresh and collapse/reopen preserve28Oct and the exact open note; no second POST, CONFIRM or financial action. Copy exactly equals visible canonical text and the completed36258byte nine-sheet XLSX report text. Original first6worksheets (original/manual/automatic shift/employee/day) value-for-value unchanged; reportHash unchanged, head advanced only to4d8fc688dfd11d4b108ddcfe6427d61678eefed2591bd220ed1e0c00ceb8634c. Original row remains manually unreviewed with cash0/cards0. N40CONTROL27Oct rows0/cash0/cards0 and no foreign continuation/note. Evidence CHECKPOINTS/EVIDENCE/cash-continuation-20261031/before.json, after.json, workbook-check.json, report.txt and continuation-pass.jpg.

This closes only automatic-result continuation/default-note persistence for the measured metadata-only LAB case. No SKU, quantity or payment applies; no sale/payment/stock/fiscal/settings/issue-closure/email action submitted. Raw current transaction counts, global stock/IRIS/payment ledgers and independent financial deltas NOT TESTED. Native SQL immutability proof is CI, not broader LIVE financial acceptance. Real nonzero/real-store/other-role/device acceptance, provider-original safe/refill/Netlink evidence, durable per-issue responses/closure and actual delivered email remain OPEN under the same owner. Manual/active/tracker/pending and regenerated PDF synchronized in this receipt. Do not repeat the saved checkpoint or any accepted transaction merely for evidence.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / PIN-FIRST SOURCE PREPARED / AWAITING CI + RELEASE + LAB

Retained owner Rizareio readiness / feat/central-backoffice-access-20261029; continuation fix/backoffice-short-pin-20261031. Before-source amendment PR3338 merged9644e9580 after docsCI41190533275 PASS. New personal accounts accept username +4–12 digit PIN with optional separate strong password; absent password uses a unique unrecoverable random hash, never the PIN/default. Existing accounts, old passwords/long PINs, Owner/SuperAdmin/MFA and POS auth preserved. Durable five-attempt username/15-minute limit, scoped grants/licence/lifecycle/session checks unchanged. Six bounded source/test files only; no schema or ordinary auth-route change.

Local34 focused checks PASS/0FAIL/0SKIP, actual mounted PIN-only form/credential validation plus original workspace/logout/MFA tests; client/TABLE_SERVICE/server production build PASS on Node24.22.1. Full local suite and exact Node20/native PR/main CI are pending. Native added test covers PIN-only identities, distinct bcrypt password hash refusing PIN as password, scoped signed session, durable cross-IP username lockout, optional password update and original/control finance. These are engineering results, not live LAB PASS. No user credential read/submitted or account/grant/financial/stock change. Current form remains unsaved; do not use it as a test until exact new deployment. Preserve current main PDF during this OPEN source publication; regenerate with exact release/acceptance receipt. Whole scope OPEN/ASSIGNED; no manual or numbered closure. Next: green full/native PR/main then ordinary guarded exact health, inspect deployed form, user-entered PIN-only LAB acceptance and usage instructions.

31/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / SHORT PERSONAL PIN AMENDMENT BEFORE SOURCE / OPEN

Same retained owner Rizareio readiness / feat/central-backoffice-access-20261029; continuation fix/backoffice-short-pin-20261031. User explicitly requests shorter personal credentials after the hosted form refused a six-character password. Existing installed source supports personal PIN login but creation unnecessarily requires both a ten-character password and a six-digit minimum PIN. Latest hosted observation31Oct: no account exists; synthetic lab.stocktaker.20261031 form is unsaved, scoped only to ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. No credential read/copied, no account/grant/stock/financial action submitted. Health verified71f27cafa294b427a8c5734e4518e6e009c775db; full account/role LAB acceptance remains NOT TESTED.

Bounded requested correction: accept a personal numeric PIN of4–12 digits and allow account creation with username+PIN without a separate password. A supplied optional password keeps existing10-character/72-byte policy; absent password receives a unique unrecoverable random password hash, never the PIN or a fixed/default password. Existing accounts/passwords and longer PINs stay valid; Owner/SuperAdmin email/password/MFA, POS PINs, role/store/license/lifecycle enforcement and five-attempt durable username/15-minute lockout stay unchanged. Shorter PIN is the owner's requested usability choice; no wider grant or Owner elevation.

Exact source regions after this amendment is green/main: server/src/services/backoffice-staff-accounts.js only PIN/input/create password-hash handling; client/src/components/BackofficeStaffAdmin.jsx only optional password submission/label and PIN limits/help; client/src/main.jsx only personal PIN input hint/validation. Extend server/test/backoffice-staff.test.js, backoffice-staff-postgres.test.js and backoffice-staff-ui.test.js plus existing Login tests as needed for real validation, PIN-only creation/login, non-PIN fallback password isolation, unchanged old password/long PIN, durable failed-attempt refusal, current scope/revocation and native audit/no secrets. No schema, migration, existing inventory/cash writer, general auth or licence changes. Other assigned owners and historical PASS retained.

Require focused/native and complete PR/main CI, ordinary guarded exact healthy deployment, then fresh hosted PIN-only form/account/login acceptance with user-entered credentials. CI is never LAB/manual PASS. No production account provisioning by agent; user completes new credential entry/submission. Single next action: publish this bounded amendment green/main, then implement and validate the PIN-first flow. Whole scope stays OPEN/ASSIGNED; no manual/numbered acceptance closure.

31/10/2026 — POS-BULK-PERMISSION-TIMEOUT-01 / RELEASE VERIFIED / UNIFIED ACCEPTANCE HANDOFF

Before-source claim3348 / docsCI41194481837 merged2142d1046. Diagnostic source3350 head2691ea84a9c8ab54eb148516c6840be3611c68a6 / fullPRCI41196421557 job124523791408 and exact-main26af0bf2d8ab270ac1d1db620e0460f98a69e8ad / fullCI41197361941 job124526420650 each SUCCESS4845server+8backup/0FAIL/0SKIP, all five jobs green. Ordinary guarded deployment41198096845 job124528296944 pinned26af at11:45:54UTC and verified exact healthy revision11:50:50UTC; independent public health also returned oktrue/exact26af. No direct deployment, guard bypass, schema/resource/env or production business write. This installs error-only phase/count/process-event-loop diagnostics; it is NOT a functional fix or whole POS/capacity PASS.

Native evidence distinguishes two classes: frozen original Product row wait6seconds fails IN membership SELECT, so that alone does not reproduce the historical UPDATE boundary; a separate controlled5.5second callback delay does reach UPDATE, emits one private bounded receipt and leaves exact product/store/audit state unchanged. Main measured5507ms total/5504active,110selected. A distinct10000-product save plus audit/control readbacks completed453ms with10000correct before/after entries and unchanged price/stock/foreign controls; this is isolated CI, not production latency or scale acceptance. Pure/mixed/omitted flag privacy and broken-log-sink behavior were checked. Initial41194830277 was4843PASS/1own over-specific assertion FAIL/0SKIP; superseded41195857048 was CANCELLED, never whole-run PASS. Exact scoped evidence is retained in CHECKPOINTS/EVIDENCE/pos-bulk-permission-timeout-20261031/receipt.json.

Newer authoritative bound incident is already assigned in claim3353/maina1ecfe7e and CHECKPOINTS/CHANGES/2026-10-31-inventory-bulk-pos-price-large.md: retained owner reports live Διαδόχου ALL/YES failure on6739total products (6731active displayed,141enabled at its read), P2028 at11:19:36UTC after7086ms; user confirms100-selected saves, with two retained receipts11:20:12/11:20:59. These newer measurements belong to that owner, not a new test by this page or an individual payload reconstruction of the earlier10:27/10:28 errors. Existing small LAB PASS and successful100s remain protected; no actual ALL or stock/financial PASS inferred.

Ownership reconciliation: ΑΝΑΛΗΨΗ ΑΠΟ fix/pos-bulk-permission-timeout-20261031 — ASSIGNED fix/inventory-bulk-permission-large-20261031 for the unified remaining behavioral correction/release/acceptance, under existing3353/3354. Diagnostic page performs no further runtime edits. Receiver's candidate3354 f3a201f9 passed all five CI jobs41197177245; receiver itself reconciled main diagnostics in2b37c531aa126070470e146c0d61533233b96557, with post-integrationCI41198064459/job124528429843 SUCCESS4847server+8backup/0FAIL/0SKIP and all five jobs green. Receiver merged3354 as2d80052bf2e4c09417afd7f4e0b7150114707db6; this page observed that merge and did not initiate it. Read-only review confirms the permission-only SQL/update/audit path,20second scoped budget/2second lock wait and Greek409 mapping preserve mixed/default behavior and bounded error evidence. The native callback probe was correctly moved to the unchanged mixed path; it must not require the repaired pure path to retain old P2028 behavior. No separate integration patch or parallel implementation was published by this page.

The optimized writer is now technically released in common runtime42ae4a3db371943fb0109aa815fac8a1b6bd9f33, qualified by full mainCI41199931951/job124534437975 SUCCESS4862server+8backup/0FAIL/0SKIP and all five jobs green. Its two production helper blobs exactly match the reviewed3354 implementation. Ordinary guarded deployment41201059265/job124536843141 pinned42ae at12:26:59UTC; Renderdep-dbitt4s9v7es738j9bc0 became LIVE12:32:12UTC and the guard verified exact healthy42ae12:32:24UTC. Independent public HTTP200 at12:33:48UTC returned oktrue/exact42ae. The current main8K regression and separate10K save/audit/control readback426ms both passed; none is a real-store scale or financial acceptance claim. Intermediate cancelled main runs were not counted as PASS; no deployment guard or CI requirement was bypassed.

Single next action remains with3354's retained owner: one separately identified hosted permission-only acceptance with fresh before/after/control records, followed by any real business action only under the original user intent and fresh measurements. Preserve real141/100-success history; never replay a failed or successful real ALL action merely as a diagnostic. Actual large-catalog/physical/full-capacity acceptance remains OPEN/NOT TESTED by this page. This receipt removes this page's duplicate pending block by transfer, not by functional PASS; receiver's LARGE CATALOG assignment/manual limitation remains authoritative until new evidence. Prior shift-reader3333 delivery and all other owners are unchanged.

31/10/2026 — INVENTORY-BULK-POS-PRICE-01 — IMPLEMENTED / AWAITING CI AND LAB

Owner work/bulk-pos-price-edit retained. Before-source claim PR3330/head3596cd18/full docs CI41188189442 SUCCESS merged985d5cff before source. Added existing allowPosPriceChange to Inventory bulk as KEEP/YES/NO; selection defaults to selected rows. Explicit ALL mode covers every Product associated with selected store, including inactive/all pages/without search filters, and server rejects every other operation in ALL mode. Same company Product metadata as existing checkbox, disclosed in the form; no StoreProduct/price/stock/fiscal/role/schema writes from permission-only requests. Bulk entry can open with no selected rows for ALL; selected mode still refuses empty selection. Existing store-scoped role/module checks, locks, replay receipts and atomic Audit remain; batch flag update records exact per-product before/after. Replaying ALL returns original receipt without touching newly added products. Existing POS product flag plus operator changeRetail checks unchanged.

Local Node20.20.2: focused7PASS/0FAIL/4nativePostgreSQLSKIP and frontend build/TABLE_SERVICE invariant PASS. Actual mounted Archive exercises legacy KEEP price save, selected YES/NO, empty selection refusal, ALL/KEEP refusal, hidden stale category omission and existing VAT/merge/store-switch behavior. Initial mounted test selector accidentally clicked readonly delivery checkbox; corrected to row-selection column, no production defect inferred. New native test covers603products/multiple pages/inactive, company/store controls, concurrent replay, changed-payload/actor conflict, exact audit, old-client omission, POS enable/denial, newly added product replay exclusion and final-Audit-failure rollback. Existing native bulk/SET fixtures add existing flag column only. Native tests await full CI; local has no isolated PostgreSQL. No LAB/business writes, new functional/manual PASS, sale/payment/stock/fiscal action or accepted transaction replay. Previous bulk/permanent-price/manual PASS and other owners retained. Single next: full exact PR/main CI, ordinary guarded deployment/exact health, then fresh measured synthetic LAB permission-only save/readback/control (no sale).

31/10/2026 — INVENTORY-BULK-POS-PRICE-01 — ASSIGNED / NOT TESTED

Owner work/bulk-pos-price-edit. User explicitly requested existing product checkbox allowPosPriceChange in Inventory bulk correction, enable/disable selected products or all products of the selected store. Independent additive subtask; existing INVENTORY-BULK-VAT-01, merge, POS permanent-price and all other owners retained. Baseline main873d4ea. Existing single-card boolean and permanent-price server check confirmed; bulk schema/UI omit it. Existing15Oct permanent-price LAB PASS and bulk UI/22Oct bounded VAT PASS remain protected; new boolean bulk behavior NOT TESTED.

Plan: optional strict boolean with KEEP omission; same transactional selected-company/store membership, authorization, idempotency and before/after audit. Explicit all-store-products selection is limited to this permission alone, including all pages, no price/stock/VAT/active/SET write. Existing checkbox is company Product metadata, disclosed in form; existing role permissions remain required. No schema, migration, payment, fiscal or production data diagnostic action. Require mounted UI, isolated transaction/tenant/replay/rollback and existing POS denial regressions, full CI, exact guarded release and measured virtual LAB acceptance before claiming functional PASS. Read AGENTS/current registries/manuals and relevant15Oct bulk/permanent-price checkpoints/history before source. Next: merge this claim before source.

31/10/2026 — CASH-EXCEL-DOWNLOAD / LIMITED LAB PASS

Retained cash owner codex/cash-chat-reconciliation-20261026, continuation docs/cash-excel-download-pass-20261031. At 09:17 UTC (11:17 Athens), authenticated Platform SuperAdmin selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, full day27Oct2026, and used the existing Έλεγχος με επανυπολογισμούς → Excel με επανυπολογισμούς. The actual completed browser download returned35275bytes; ZIP integrity and all9worksheet XMLs read successfully. Original MAIN/LAB POS2 row a3494bb3-61cf-447c-9707-27311f35708c remains cash0/card0, no manual approval. Automatic shift/employee/day sheets each retain one calculated zero result; original manual employee/day sheets remain empty, original row remains unreviewed and original metadata pending1 is preserved. Report worksheet agrees with visible canonical text. No new transaction, review, settings, allocation, email or stock action. Independent financial/stock before-after reconciliation and native Excel visual opening NOT TESTED.

This closes only the prior cloud completed-download failure for this exact current browser/synthetic report. The29Oct failed downloads remain historical; root cause/reproducibility on other devices is unknown. Nonzero completed attribution, actual real-store/full email acceptance, provider-original Netlink/safe/refill proof and durable per-issue replies/closure/continuation remain OPEN. No runtime change, no claimed universal browser/physical PASS. Evidence CHECKPOINTS/EVIDENCE/cash-excel-download-20261031/receipt.json. Current deployed revision was not independently recorded at action time; do not substitute repository HEAD.

31/10/2026 — POS-OWNER-SHIFT-READER-20261030 / DELIVERED / LIMITED LAB READBACK PASS

Bounded reader follow-up completed by retained fix/owner-shift-reader-20261030; delivery docs/pos-reader-delivery-20261031. Source3333/cf81ead/merge4285cb4, exact full41189607859 all5SUCCESS4,772server+8backup/0FAIL/0SKIP. Independently observed current-main9644 full41190777427 all5SUCCESS4,779+8/0/0 and guarded release41191604346 verified exact9644 healthy; owned blobs unchanged. Actual31Oct12:13–12:16Athens read-only SuperAdmin/LAB old #865e6a48 one sale1.40 and control #3a186861 six/net2.20; journals, current categories, payment projections, stored amounts and freshly reloaded15-row list agree. No new business action; no hosted raw DB/stock delta or whole capacity/physical PASS. Initial Chrome failures/merge/retry history retained in checkpoint. Completed reader pending subtask removed; wider incident/capacity and other owners remain OPEN. Manual docs/manual/shift-reports/PASS.md and evidence owner-shift-reader-20261031 updated; central PDF regenerated with this receipt. Later personal-PIN work remains another owner's scope, not covered by this9644 reader acceptance.

Checkpoint CHECKPOINTS/CHANGES/2026-10-30-owner-shift-reader.md; newest owned status supersedes historical source/reader OPEN entries below only for this bounded reader.

31/10/2026 — POS-OWNER-SHIFT-READER-20261030 / NATIVE EQUIVALENCE VERIFIED / COMBINED CI REQUIRED

Same retained owner fix/owner-shift-reader-20261030. Initial exact d95b8bac CI41188314153/job124499889574 executed4,763PASS/2FAIL/0SKIP. Both failures were unchanged Chromium startup/Target.createTarget timeouts in DAILY1920/device-setup before UI assertions. Actual original-versus-candidate native PostgreSQL identity, complete registered detail output, source-table digests, historical isolation and synthetic scale all PASSED unskipped. Plan materialization1 versus original correlated141loops; synthetic32.443ms original/1.573ms candidate is not hosted timing. Full local Node20 server workspace4,012PASS/0FAIL/311infrastructureSKIP; initial root-directory invocation was invalid fixture setup and retained only as history.

One retry of only failed job124499889574 started as124502130180; before completion, independent main changes produced real three-registry/PDF merge conflicts. Reconcile on current main preserving all other owners and immutable runtime/test blobs406fcfb52/f1a06000e; new exact CI supersedes the interrupted retry, not an assertion waiver. Relocate only this owned status within the existing incident section so future unrelated top prefixes merge independently. Preserve current main canonical PDF in this source-only/non-PASS PR to avoid repeated cross-owner regenerated-PDF conflicts; regenerate with the delivery/hosted receipt. No completion/manual/PDF-synchronized PASS is claimed here.

No code/test/oracle/threshold change, production action, provider/business replay or capacity acceptance. Next: complete exact combined full CI, ordinary guarded main release and read-only existing LAB historical/control acceptance; publish final receipt and PDF. Existing nine-column lock prevention protected; broader owners retained.

31/10/2026 — Interrupted POS incident continuation resumed

ΑΝΑΛΗΨΗ ΑΠΟ «Έλεγχος σφάλματος POS» / fix/pos-lock-convoy-20261030 — ASSIGNED fix/owner-shift-reader-20261030, resumed by the explicitly requested receiving conversation. Same bounded scope and protected evidence below; no parallel source work. Read-only production health31Oct returned ok:true/revision4e52eec9bc610524e39063dfc77323b521a72e06. Original claim PR3311 exact3abe09b CI41056655940 SUCCESS but remained unmerged; attempted merge405 revealed additive registry conflicts after other owners advanced main. Resolve by retaining current main registries byte-for-byte after this incident prefix. No runtime change or new LAB PASS. Next: green/main reconciled claim before source.

30/10/2026 — POS-OWNER-SHIFT-READER-20261030 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained incident owner fix/pos-lock-convoy-20261030; continuation fix/owner-shift-reader-20261030. User explicitly approved the remaining analytical shift report optimization on30Oct2026. Existing9column lock prevention3301/06e27daf and native65statement PASS remain protected. Other cash/financial/lifecycle/security/capacity owners are unchanged.

Read-only source cause: owner-shifts.js GET /:sessionId/detail scans completed store sales and repeatedly tokenizes the same full-store StoreTransaction descriptions in a correlated evidence UNION. Prior actual incident reader remained active for many minutes. No new timing claim from current inspection. Preserve historical12Oct limited LAB PASS/manual, exact ledger token matching, exclusion of original-sale reversal references, valid same-company/store session evidence, audit links, unique-session ambiguity exclusion, mixed-payment once-only sale identity, historical rows outside time windows and all existing response/financial fields/role/session guards.

Exact bounded source after this claim green/main: server/src/routes/owner-shifts.js ONLY selectedSales read SQL; NEW server/test/owner-shift-reader-equivalence.test.js; existing server/test/owner-historical-shift-isolation.test.js ONLY additive original-versus-candidate/native no-write/full-response regressions if necessary. No schema/bootstrap/index/pool/config/global timeout/auth/permissions/writer/UI or unrelated projection change. Candidate materializes scoped ledger token evidence once, unions valid audit evidence and groups one unique session per sale before joining completed same-store/company sales. No guessed date cutoff, row cap, token normalization change, new sale assignment or conflict relaxation. No production EXPLAIN ANALYZE of the old unbounded reader or business replay.

Required engineering: frozen original SQL versus candidate actual PostgreSQL fixture equality for every selected sale ID and complete registered detail output, mixed/duplicate/reversed/negative references, null/punctuation/prefix/foreign/malformed session evidence, multiple terminals/closed/old sessions, conflicting audit/ledger evidence and no evidence. Native before/after source table digests must match. Synthetic scaling/EXPLAIN evidence establishes work reduction without flaky wall-clock-only PASS; full exact PR/main CI and ordinary guarded release/exact revision required. Read-only hosted report acceptance remains separate and must be honestly scoped; no new business/manual PASS from CI alone. Original SQL oracle stays frozen in the test, not a candidate-derived oracle. No actual sale/payment/stock/fiscal or accepted invoice replay.

Checkpoint CHECKPOINTS/CHANGES/2026-10-30-owner-shift-reader.md. Single next action: green/main this exact before-source claim, then implement bounded query and native equivalence proof. Whole performance/capacity scope remains OPEN.

AI-OWNER-WALLET-01 — 31Oct2026 / SAFE REVIEW EVIDENCE SOURCE / AWAITING FULL CI AND HOSTED DIAGNOSIS

Before-source claim3325/c6eeef778f583fe71f3acaa9be12dc4f2d44d9ba passed docsCI41184296116 and merged785923d8bd2647c1d1de1bd6c44cdb59d106a77d before runtime edits. Same retained owner/continuation fix/ai-wallet-sol-review-20261031. New hosted Sol incident remains LIVE FAIL, not fixed by this diagnostic source.

Added private bounded usage evidence to existing USAGE_REVIEW audit when an original RESERVED entry transitions to REVIEW. Safe stage distinguishes provider transport/result, usage validation, exact-request bounds and settlement. Allowlisted numeric usage and presence flags, original response/model and accepted model/limits/tariff identity retain diagnostic attribution; arbitrary provider errors, text/output/files, credentials/headers/URLs are not saved. Repository re-sanitizes and writes status+audit in the same existing company/entry lock transaction; duplicate/foreign/settled reviews cannot add an audit, audit failure rolls back REVIEW while preserving original RESERVED hold. Legacy review callers remain compatible. No new schema/table/column/manifest, public API fields or permission.

No change to parser acceptance, tariff computation, cache partitions, long-context/model/bounds guards, model/prompt/output30000, company policy, money/credit/email, retry or successful return behavior. Successful usage still settles once. Historical customer REVIEW entries are untouched; timestamp matching remains insufficient for financial resolution.

Actual local Node20 focused6/6PASS,0FAIL/0SKIP, provider stages/privacy/idempotent sanitization/success/no retry/retained holds. Native PostgreSQL test added for concurrent exact-one audit, original entry/company binding, exact unchanged money/notices/foreign controls, resanitization and audit-write rollback; syntax PASS. Native execution/full PR+main CI/recovery/build/E2E and ordinary guarded installation REQUIRED. No new paid call, invoice upload, LAB/company configuration, funding/business or historical settlement action. Single next action exact full CI/release, then one new synthetic LAB assistant request with fresh private controls to expose the actual incompatible usage field. Only then bounded demonstrated correction and separately measured settlement acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ai-wallet-sol-review.md; common registers/PDF synchronized. No functional/manual PASS claim.

AI-OWNER-WALLET-01 — 31Oct2026 / SOL INVOICE USAGE REVIEW / LIVE FAIL / ASSIGNED BEFORE SOURCE

Retained owner feat/ai-owner-wallet-20261022; bounded continuation fix/ai-wallet-sol-review-20261031. Owner explicitly requested correction after successful invoice-assistant calls are reported as usage-needs-review despite funded customer wallet. New incident is LIVE FAIL for gpt-5.6-sol metering/response delivery, not a reversal of measured GPT-5/Azure or configuration-switch PASS. Per-customer pricing request is paused. Current main4e52eec9bc610524e39063dfc77323b521a72e06 and history since switch receipt e5d676d reviewed; no wallet source changed in the intervening FTEXT/inventory commits. All unrelated owners/scopes preserved.

Read-only provider Logs shows a completed original Sol invoice answer and input/output usage while matching-time customer entries have REVIEW/zero final charge/usageNULL. Time matching alone is not immutable response-to-entry attribution. Neither final supplier cost nor a specific parser failure has been proved. Do not publish customer document content, finances, identifiers or provider payloads. Existing parser enforces exact cache-write lifetime partition, model alias and input/output reservation bounds; provider wrapper currently collapses every post-call validation/transport/settlement failure into generic REVIEW without safe diagnostic evidence. Official current prompt-cache reference confirms both write lifetimes and no additive double charge; absence of measured write data must not become an invented zero or guessed rate.

First bounded causal change after this claim is green/main: preserve a strict allowlist of numeric provider usage, response/model IDs and stable failure-stage/reason in existing REVIEW audit detail, without prompts, output, files, secrets, headers, URLs or arbitrary errors. Preserve fail-closed hold/settlement and existing access; avoid schema/new table or lifecycle changes. Add reproducible provider/parser tests and actual SQL audit/rollback coverage. Then obtain exact safe usage from ONE separately identified NEW synthetic hosted LAB assistant call on exact green/guarded installed revision; no customer invoice replay. Use that observed contract to correct only the demonstrated incompatibility, require focused/native/full PR+main CI and ordinary guarded release, and verify exact settlement/debit/zero remaining new hold on a separate new synthetic LAB request. Do not label diagnostic source CI as functional PASS.

Protect existing Owner, Azure/GPT-5, cache-write/long-context partition, original price/model/context/output30000 request, company switch, authorization/license/lifecycle/idempotency and no-paid-retry behavior. No weakening cache/model/bounds validation, invented usage, automatic refund, manual financial SQL, new funds, email, payment, stock, invoice approval/finalization, fiscal or unrelated FTEXT change. Historical REVIEW entries remain immutable pending exact provider/reference reconciliation; no inference from timestamps alone, no repeated paid generation to recover missing evidence. Any safe historical resolution needs separately bound original proof and exact once-only audit.

Before each LAB write/provider action capture private wallet/entries/audit/notices, selected-company/store and unaffected foreign/sibling business controls. Terminal Cloud Chrome, SuperAdmin; shift/SKU/quantity/payment N/A to configuration/read-only synthetic invoice test. Restore LAB master/invoice OFF after measured action while preserving money/history. Publish actual PASS/FAIL/NOT TESTED checkpoint/manual/common registers/PDF green/main. Whole wallet/Owner-session/email/other-model residuals remain assigned/open. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ai-wallet-sol-review.md. New source NOT IMPLEMENTED; single next action green/main claim then safe diagnosis and bounded fix.

31/10/2026 13:03:56 Athens — FTEXT-RESILIENCE-01 / fault-recovery continuation ASSIGNED BEFORE SOURCE

Retained recovery page owner fix/ftext-payment-resilience-20261030; continuation branch fix/ftext-fault-recovery-20261031, explicitly authorized by owner to start the remaining comprehensive correction and isolated CASH/CARD fault checks. Preserve scoped printed CASH, original-cashier NO, reviewed CASH first-line rejection/resumed trading and activated fresh-readiness LIVE/USER PASS, all other owners and all RBS behavior. Current read-only health is oktrue/revision802d570dd0048558b53ee77ec753d2252210bd63; main2142d10 includes subsequent unrelated bulk POS permission timeout fix. Existing current FTEXT Node20 audit84total:77PASS/0FAIL/7 native environment skips. This is engineering evidence only; no new physical/financial PASS.

Independent phase1 subtask FTEXT-FIRST-LINE-AUTO-03: authenticated current device may deliver its exact original intent/report/RES through the existing read-only late-evidence channel for a single-line CASH code2 OVER LIMIT rejection of exactly the first S command. Verify current company/store/POS/device/token/settings/lifecycle/serial, exact command/amount, original immutable stored result/hash, raw file hashes and absence of sale/final receipt/VOID/conflicting release. Support both the existing exact4-property unknown report and the exact6-property originally reported code2/rawResultHash shape. For the latter preserve raw report identity while checking the canonical typed original result hash; do not relax the4-property late-success verifier. Append separate device-provenance application-release evidence, with no fabricated human no-receipt/readiness/bank/cancellation attestation, no fiscal resend, sale/payment/stock/finalizer or schema change. Manual SuperAdmin review contract and all CARD/NO/YES/strict-POS safeguards remain unchanged. No automatic generic timeout, other error, multi-line or CARD rejection release.

Bounded source after this claim is green/main: original-file verifier and CASH first-line release service; device late-evidence routing/ack; a scoped POS notification of the verified OVER LIMIT after application release (other outcomes unchanged); Windows read-only file reader and production loop ack; synthetic pure/HTTP/native PostgreSQL/Windows fault coverage. No production SQL writes, new pairing, register programming, VOID or deliberate live outage. Test original4/6 reports, malformed/canonical/hash/foreign/current scope denial, error-before-first-onlyS boundaries, concurrency/replay/zero business writes, retained code0 CASH/both CARD formats, original cashier decisions, immutable local files, lost acknowledgements and restart without duplicate fiscal publication. Exact full/native/Windows CI, ordinary guarded release, then matching Windows package before any new physical acceptance.

Remaining fault matrix: driver closed/stale readiness before checkout; lost heartbeat/API/report acknowledgement; delayed original receipt with CASH and both CARD modes; browser/connector restart with durable original intent/report; original-cashier NO/YES; closed-shift/idempotency/control stock. Existing covered paths are inspected rather than recreating accepted real transactions. Lost one-shot claim response before durable local intent remains a separately held ambiguity requiring a bounded protocol design; do not redeliver DISPATCHED or infer no payment. First-line auto release, fresh physical fault/restart/card acceptance are NOT IMPLEMENTED/NOT TESTED at this claim. Whole FTEXT stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-fault-recovery.md. Single next action: green/main this retained-scope claim, then implement phase1 and isolated fault matrix.

31/10/2026 — FTEXT-RESILIENCE-01 / selected Windows protocol and fresh readiness LIVE PASS / residual OPEN

Retained owner fix/ftext-payment-resilience-20261030. Installed9644e95809ac0f0f1a80b1125dccfbed53aa3bed independently reconfirmed healthy31Oct10:39UTC; exact source/full/native/Windows and ordinary guarded release evidence remains in the preceding recovery receipt. Original CASH rejection recovery/resumed trading PASS3343/main11a4f174 remains protected; no repeated sale or fiscal recovery by agent.

New read-only live evidence supersedes the10:20/10:27 inactive-readiness observation: selected Rizareio device ACTIVE, current authenticated heartbeat, ftextReadinessRequiredtrue. Distinct same-register STATUS evidence checked10:39:18UTC/received10:39:20UTC and checked10:40:28UTC/received10:40:30UTC has code0/oktrue/fiscalExecutionfalse, different request identifiers/report hashes, matching configured serial. At10:40:44UTC latest status age16seconds and heartbeat age1second, within the deployed readiness contract. Actual selected-POS Admin refresh then displayed Connector Connected and «Έτοιμη · πρόσφατος αυτόματος έλεγχος», successful STATUS12:41:30Athens. These observations confirm current selected-PC readiness protocol activation and fresh nonfiscal register communication; no stale26Oct STATUS was used as fresh evidence. Raw identifiers/hashes remain private. Prior package delivery: official v1, all7 module bytes verified, unchanged settings/pairing, no credentials or automatic startup.

Scoped LIVE PASS: updated Windows readiness protocol is active for this POS, fresh communication accepted and readiness shown separately from heartbeat. New checkout/claim readiness gating source is installed. No real stale/offline denial, deliberate driver/network interruption, late CASH/CARD receipt or restart acceptance transaction was performed here; these remain NOT TESTED. No new sale/payment/stock/fiscal action initiated by agent; no new financial-delta PASS inferred from this read-only readiness observation. Lost one-shot claim before durable local intent and automatic first-line error2 device release remain outside the accepted scope. Whole FTEXT-RESILIENCE-01 stays OPEN for those physical residuals; this is not universal hardware certification. Manual docs/manual/ftext/PASS.md updated with this limited observation.

31/10/2026 — FTEXT-CASH-FIRST-LINE-02 / scoped recovery and resumed CASH LIVE USER PASS / CLOSED

Retained owner fix/ftext-payment-resilience-20261030; claimmain7154c9c preceded source. SourcePR3327 head6c7bcdee passed full41188630172/all5, native41188630165/30PASS0FAIL0SKIP and Windows41188630163. Merged aec27d6 passed exact main41189565515/all5. Newer owners runtime merges required a current integrated release: final9644e95809ac0f0f1a80b1125dccfbed53aa3bed passed forced-full main41190777427/all5. Ordinary guarded41191604346 SUCCESS; Render dep-dbirtcm7bikc73dn0rh0 live31Oct10:12:53UTC; independent health200/oktrue/exact9644. Earlier AEC guard safely declined newer production sources. No bypass or direct production SQL write.

Selected Rizareio original single-line CASH100 first-S error2/OVER LIMIT recovered through the installed same-POS SuperAdmin original-three-file/no-receipt form. Before10:14:04UTC: original request REQUIRES_CHECK, saleIdNULL, original sale count0, releaseNULL, original shift OPEN CASH6/51.30 CARD3/25.90, affected SKUstock0/movements0. One app release recorded10:15:56.482UTC; after10:16:11UTC: same original resultHash/status and saleIdNULL/sales0, same shift OPEN CASH6/51.30 CARD3/25.90, stock0/movements0. Separate proof retains exact original files/hash and actor/time; mode VERIFIED_FIRST_LINE_REJECTION/readinessVerifiedfalse. Admin visibly shows no pending payment for this POS. No new fiscal command, sale/payment/stock entry or cash/card movement. No sibling terminal exists. Owner subsequently confirmed resumed trading and a new printed receipt. A distinct later CASH100 request completed10:17:20UTC exactly once with one CASH100 payment and one movement of -1 for the affected item. Read-only10:20:36UTC reconciliation: old rejected attempt still saleIdNULL/sales0/original hash retained; CASH7/151.30 (+1/+100 from the new sale), CARD3/25.90 unchanged, affected stock-1/movements1. This is scoped recovery/resumed-CASH LIVE and USER PASS, not physical cancellation/readiness or bank outcome. Original identifiers/raw files remain private. Manual docs/manual/ftext/PASS.md updated in this receipt.

User reports technician changed hardware limits; no maximum value or independent physical limit acceptance by agent. No repeated purchase for diagnosis. FTEXT-RESILIENCE-01 remains OPEN: prevention source is installed; updated official selected-POS package delivered with all7 embedded module bytes verified, same settings hash/pairing, no credentials or automatic start. At10:20:34UTC the device heartbeat is current but readinessRequired remains unset and last STATUS is26Oct; the new automatic readiness protocol is not yet activated. User was given the updated package/close-old-connector/option3 steps. New-protocol Windows execution, fresh STATUS/delayed CASH+CARD/network/restart acceptance remain NOT TESTED. Lost one-shot claim before durable local intent remains held for authorized review. Automatic first-line error2 device release is not implemented; this PASS covers the narrow reviewed original-file form. Prior scoped printed CASH and original-cashier NO recovery PASS remain protected; whole FTEXT is not universally accepted.

31/10/2026 — first-line CASH rejection / historical before-source LIVE FAIL / superseded by scoped recovery above

Retained owner fix/ftext-payment-resilience-20261030, new independent subtask FTEXT-CASH-FIRST-LINE-02. Original cashier reports no printed receipt for a new single-line CASH100 attempt. Supplied original report matches stored immutable generic report hash; original RES is padded code2, OVER LIMIT, InputLine exactly the first/only S line for100.00/department3. No final receipt/QR/payment result or sale exists. Before08:54:50UTC: original shift OPEN, CASH6/51.30 CARD3/25.90, original SKU stock0/movements0; no sibling terminal exists. Original identifiers/raw files remain private. No fiscal retry/cancellation, sale/payment/stock write or device programming by agent.

Claim before source: bounded same-POS SuperAdmin recovery of an unissued single-line CASH rejection, with original intent/report/RES binding to the exact first S command and specific verified error2/OVER LIMIT only. Append audited application release; preserve original result/hash and require no sale/final receipt/VOID/released conflicts. No inference of fiscal cancellation/readiness or bank outcome. No generic CASH timeout release, no payment replay, no automatic new purchase. Protected prior manual CASH receipt/NO recovery and pending locks remain unchanged. Exact native/full/Windows checks and ordinary release before live recovery. New source NOT IMPLEMENTED; physical/current CASH recovery remains BLOCKED. CHECKPOINTS/CHANGES/2026-10-31-ftext-payment-resilience.md.

31/10/2026 — historical original-cashier NO recovery / scoped LIVE + USER PASS

On installed4e52eec9bc610524e39063dfc77323b521a72e06, original cashier released the same previously recorded NO at08:18:38UTC (10:18Athens) after full reload/Return. Owner confirmed «ξεκίνησε». Original request remains immutable REQUIRES_CHECK/NO/resultHash, no linked sale or payment; separately audited application release is OPERATOR_NO/readinessVerified=false. No bank decline, fiscal cancellation or new readiness attestation is inferred. The current blocking incident is CLOSED; fresh atomic NO interaction and wider prevention remain separate NOT TESTED scopes.

Measured before07:54:56UTC: original sale0, original shift CASH3/45.20 CARD1/12.00, affected SKU stock-3/movements3. After08:23UTC: original sale0 and release present; CASH4/47.20 CARD2/20.60 and original SKU-5/movements4. These changes reconcile to two distinct subsequent owner trading requests: CASH2.00 at08:19:10UTC with one original-SKU movement-2, and CARD8.60 at08:21:49UTC with a different-SKU movement-2. Both have their own completed sale/payment/request identities; neither is the rejected attempt. No transaction repeated for evidence and no agent financial action. No sibling terminal exists; cross-terminal control NOT TESTED. Exact PR/native/main/guarded/health receipts retained in checkpoint CHECKPOINTS/CHANGES/2026-10-30-ftext-reviewed-no-recovery.md and tested instructions in docs/manual/ftext/PASS.md. Whole FTEXT remains OPEN.

31/10/2026 — FTEXT-RESILIENCE-01 / historical source candidate / source now installed; physical acceptance remains OPEN above

Retained independent owner fix/ftext-payment-resilience-20261030. Claim/main4e52eec9bc610524e39063dfc77323b521a72e06 preceded source. Current original-cashier NO integration PR3317 is technically installed: exact PR41182169989/all5 and native41182169971 SUCCESS, main41182846570/all5 SUCCESS, ordinary guarded41183508504 SUCCESS, Render dep-dbiq5hp42hec73b6uv80 live31Oct08:13:44UTC and independent health200/oktrue/exact4e52eec. Today's historical original-cashier NO was released08:18:38UTC and owner confirmed resumed trading, with no original sale. This limited recovery USER PASS is recorded separately; fresh atomic NO and wider prevention are not accepted by that observation. Original unknown/NO/hash/no-sale remains preserved. Previous30Oct scoped CASH LIVE/USER PASS remains closed/manual retained.

Candidate prevention: signed current device polls for its original unknown CASH/CARD receipt; reads immutable intent/report/RES without dispatch; server verifies exact original hashes/CP1253 command/serial/amount/AADE receipt and card format; appends device-bound evidence separately, preserves original result/hash and uses existing atomic finalizer. Operator CARD still requires original-cashier YES after real fiscal proof; strict CARD still needs matching masked POS proof. Released/NO/VOID, foreign/stale config/token/lifecycle, duplicate receipt and closed-shift/stock gates remain protected. Network/API loss retains original files and retries; missing error files no longer get permanently suppressed.

New Windows protocol announces readinessVersion1 on authenticated ping, monotonically activating a selected-device readiness requirement without changing settingsHash or credentials. While idle and no unresolved operation exists, it requests only nonfiscal STATUS every10seconds with2second read timeout and durable existing transport marker. New checkout creation and one-shot dispatch for both methods require successful same-register STATUS received/checked within20seconds plus heartbeat within15seconds. A heartbeat alone cannot renew readiness, and an old launcher cannot downgrade an activated policy. Before updated Windows installation, existing installations retain their previous contract; no silent rollout or new pairing. Existing receipt recovery/finalization uses requireOnline=false and is not blocked by readiness expiry. Admin shows actual readiness separately from Connected. A driver can stop after the latest sample; late receipt recovery handles that race, not a guarantee against hardware/network failures.

Local Node20 complete FTEXT82total:75PASS/0FAIL/7 native environment skips; Work client build PASS. Added actual device HTTP auth/schema/pending-finalization tests; original-cashier late CARD decision tests; real PostgreSQL CASH/CARD concurrent evidence/finalization, closed-shift rollback, one payment/stock movement and control stock; actual installation stale-STATUS/fresh-heartbeat/no-request/monotonic policy checks; native Windows read-only CASH/both CARD modes/retry/no-command tests and production-loop lost-HTTP harness. No local PostgreSQL or Windows5.1 exists; exact native/full/Windows CI remains mandatory. No production mutation or physical sale/STATUS by agent. New source NOT INSTALLED; new package/physical readiness, delayed-result and network/restart acceptance NOT TESTED. Whole FTEXT remains OPEN; no CI-only manual PASS.

31/10/2026 — FTEXT-LATE-CASH-01 / scoped LIVE + USER PASS; recurrence prevention ASSIGNED

Authoritative recovery receipt: installed revision ae844840c16014e0654f4d537c91d085640d446f, source PR3323+3324. Exact PR/main general and native FTEXT CI passed; ordinary guarded release41111814320 reached Render live dep-dbiek259fdbs73c3eem0; independent health200/oktrue/exact revision. On30Oct21:07Athens the original printed CASH receipt was recovered once through the selected-POS SuperAdmin file form. Owner confirmed «πέρασε». Before19:07:12UTC: original shift OPEN, no linked sale, CASH7/66.10, CARD17/127.90, tracked stocks0/0 and zero movements. After19:07:45UTC: one original sale, one CASH5.50 payment and one completion audit; CASH8/71.60, CARD17/127.90 unchanged; exactly one movement per original SKU, quantities -2/-1. Original result/resultHash retained. UI: no pending payment. No new fiscal dispatch, VOID, duplicate sale or direct financial SQL. Raw customer identifiers/files remain private. No other terminal exists in that store, so cross-terminal control NOT TESTED. The scoped late-CASH recovery is CLOSED; whole FTEXT remains OPEN.

ASSIGNED - fix/ftext-payment-resilience-20261030 (this recovery page), owner explicitly requested prevention for CASH and CARD31Oct. Independent new scope FTEXT-RESILIENCE-01: truthful readiness before fiscal dispatch; authenticated read-only late-receipt transport and immutable evidence; exactly-once existing finalizer; clear actionable POS state. CARD/NO PR3317 remains owned by fix/ftext-reviewed-no-20261030 and is not taken over. Preserve original operator-confirmation/strict-card evidence and NO/release boundaries, CASH recovery PASS, all RBS/tenant/device/token/settings/lifecycle/shift/stock gates. A timeout cannot prove no charge or fiscal cancellation. No payment replay or guessed bank result. Source NOT IMPLEMENTED, Windows installation/physical CASH+CARD failure/restart acceptance NOT TESTED. New scope requires exact native/full CI, guarded source release and selected-PC connector update before physical acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-ftext-payment-resilience.md.

31/10/2026 — recurring CARD NO incident / integration continuation AWAITING FRESH CI

Owner fix/ftext-reviewed-no-20261030 retained. User reports CARD/no printed receipt/customer left without product; read-only original request confirms original-cashier NO, generic unknown, no sale/release/late error. Current production ae844840 lacks PR3317. Head38da804 exact full41081427648/all5 and native41081427661 passed. Ordinary merge405 conflicts against subsequent CASH recovery; resolved only additive registry prefixes/PDF regeneration and combined request-view releaseMode with main pending-selector helper. Retain all late-CASH source/native tests and original NO-only source/native tests, no policy redesign. Fresh exact full/native/main CI and guarded release required; incident remains BLOCKED, no payment/fiscal action/financial SQL by agent. Independent readiness/late-success scope remains separate.

30/10/2026 — NO-only correction implemented / AWAITING NEW EXACT CI

Latest explicit owner instruction supersedes the three-acknowledgement candidate: NO alone returns to the same basket, with no second prompt, readiness check or separate release action. The original outcome transaction now appends the eligible application release atomically; replay/concurrent NO is idempotent. The release is marked OPERATOR_NO/readinessVerified=false and contains no invented no-receipt/no-charge assertions. registerReady remains solely the existing application-lock compatibility predicate, not physical verification. Confirmed fiscal receipts/sales, foreign/stale scope/settings/lifecycle, VOID and YES final-proof safeguards remain protected; no financial/fiscal resend or write is introduced.

Local restored Node20.20.2 complete FTEXT suite74total:67PASS/0FAIL/7 PostgreSQL environment skips. Actual mounted NO uses only its outcome POST, closes immediately and preserves the basket; historical pending return opens no confirm dialog. Actual PostgreSQL regression now tests concurrent atomic NO+release, rollback if fresh context fails, preserved original evidence/no invented physical attestations and next PREPARED request without business tables. Historical pre-upgrade unreleased NO fixtures remain explicit isolated fixture setup to preserve existing late-error/VOID/poll starvation coverage. The new native case runs inside the existing evidence test file, with no workflow configuration edit. The previous head94a2693 green counts are historical and do not accept this correction. Production still uses the accepted incident repair; this NO-only change is not installed and needs exact native/full PR/main CI, guarded release and separate acceptance.

30/10/2026 — Explicit owner correction: NO alone, no second check

The owner explicitly rejected the added checks («Δεν θέλω να έχει τον έλεγχο..στην rbs δεν έχει») and confirmed «Αυτό ακριβώς» after the proposed NO-direct-to-same-basket behavior. This supersedes the three-acknowledgement UX in the previous candidate. Implement an atomic original-cashier NO plus application release for the same eligible unknown/verified-error operator-card request, without another prompt or release click. No no-receipt/no-charge/readiness assertion is invented; the compatibility pending-lock field is explicitly distinguished from physical verification in the release record. Keep actual confirmed receipt/sale, VOID, scope/settings/lifecycle, YES final-proof and idempotency guards. Existing current production incident fix remains accepted; this correction is NOT TESTED and is not installed.

30/10/2026 — FTEXT-REVIEWED-NO-01 / implementation prepared / AWAITING EXACT NATIVE CI AND LAB

Owner fix/ftext-reviewed-no-20261030. Before-source claim PR3316/headc8464d1 passed docs CI41067587761 and merged1b537f0bf3a9e80e48634ae273642bf1af96a989. Implemented original-cashier reviewed-unknown NO recovery with all three explicit acknowledgements, current company/store/POS/settings/lifecycle/serial/card-profile binding, immutable separately audited OPERATOR_VERIFIED_NO_SALE release and no financial/fiscal finalization. Known verified-error readiness flow remains compatible; missing/false review, foreign/stale/strict/confirmed/sale/VOID/UNCERTAIN paths refuse. Scoped polling also recognizes an already released request and clears stale pending UI once while preserving the basket, with no new checkout/finalize/release request.

Local Node20.20.2 focused22total:21PASS/0FAIL/1 native PostgreSQL environment skip; complete Work client build PASS, including TABLE_SERVICE verification. Initial mounted runs lacked esbuild in the first dependency tree; corrected only local dependency resolution, reran existing/new tests without weakening assertions. Actual mounted POS confirms cancelled review makes no write, accepted review sends exactly the three acknowledgements, basket retained/no checkout/finalize and stale released polling recovers without a write. New actual PostgreSQL test exercises original request/decision services, missing/foreign/stale rejection, before equality, concurrent identical release, immutable original fields, no financial tables, no VOID, no historical evidence starvation and a separate next PREPARED request. Explicit FTEXT native workflow now includes this test without removing any existing test.

New review branch is AWAITING real unskipped PostgreSQL/full exact PR and main CI, ordinary guarded release and separate LAB/user acceptance. No production settings/data or physical sale/payment/VOID/test action was issued. Today's prior incident USER PASS/manual remains protected and does not accept this newly implemented path.

30/10/2026 — FTEXT-LATE-CASH-01 / installed recovery, support selector LIVE FAIL / corrective candidate

Retained recovery owner fix/ftext-support-pending-20261030. Source3323/head816fe41 passed exact full PR41103072578 and native41103072048; mergedda557a2 passed exact main41104952321 and ordinary guarded release41106593044/dep-dbie26c9v7es73d81j4g. Independent health200/oktrue/exactda557a2. Recovery has NOT executed and original request remains REQUIRES_CHECK/no sale. This is not LIVE PASS.

Actual selected-POS support inspection returns an older already operator-released CARD before the current unknown CASH, hiding the newly installed form. Correct only the unresolved-selector eligibility: exclude registerReady=true releases before ORDER BY/LIMIT, matching original pending-creation/polling guards. Keep all rows and old evidence unchanged; no financial/fiscal operation or source recovery-policy change. Actual native regression now retains the historical CARD via the real release service, verifies selection of subsequent CASH and foreign-store/POS refusal with before/after row equality. Existing concurrent late receipt/finalization tests retained. Exact new PR/native/main CI and guarded release required. Startup/automatic prevention remains follow-up OPEN.

30/10/2026 — FTEXT-LATE-CASH-01 / candidate implemented / AWAITING EXACT NATIVE CI AND RELEASE

Owner fix/ftext-late-cash-proof-20261030, bounded independent continuation of claim3322/main4a7f724. Owner explicitly prioritized existing printed CASH recovery before prevention. Claim was documentation-only; its CI remained queued at merge and is not represented as green. Production remains unchanged and incident is NOT RECOVERED.

Adds a Platform Super Admin-only selected-POS original-file recovery endpoint and form. Verifies bounded canonical original intent/timeout-report hashes, exact original CP1253 command, current paired device/token/settings/lifecycle, CASH plan/amount, final serial/day/counter/AADE signature amount/time and duplicate receipt. Appends separately audited ftextLateCashReceipt in existing checkoutJson; original result/resultHash remain byte-equivalent, with no resend/VOID/new fiscal command or schema change. Existing finalizer verifies the effective receipt and posts the original sale/payment/shift/stock atomically and idempotently. Original open shift and existing product/stock/auth/license gates retained. Ordinary receipt reuse protection recognizes late proof too. Parent UI scope/unmount withdraws late reads and responses. CARD/NO PR3317 ownership and all RBS behavior unchanged.

Local Node20 focused9PASS/0FAIL; complete FTEXT66PASS/0FAIL/6 PostgreSQL environment skips after local-only Prisma client generation. Work client build PASS with TABLE_SERVICE verification. Added actual PostgreSQL test in existing native cash file covering concurrent immutable append, foreign/token denial, closed-shift and stock-failure rollback, exact-once original business posting, sibling stock control and reused-receipt refusal. No local PostgreSQL is available, so native acceptance is NOT TESTED locally. Added actual mounted file form tests and HTTP employee refusal; exact full/native CI and main/guarded deployment remain mandatory before production recovery.

Next: complete exact CI, deploy ordinary guarded source revision, refresh before baseline, use same authenticated Super Admin recovery with already supplied files, verify one original sale/shift/payment/stock result and POS unblock; never submit another payment. Startup/preflight/automatic late polling prevention remains subsequent OPEN work.

30/10/2026 — FTEXT-LATE-CASH-01 / ASSIGNED - fix/ftext-late-cash-recovery-20261030

Owner explicitly requests immediate recovery first, prevention afterwards. Independent CASH late-success scope only; PR3317 CARD/NO remains with its existing owner. User-confirmed physical receipt after FTEXT reopened; uploaded original intent/report/result match request, settings and command hashes. Current application remains REQUIRES_CHECK/no sale: LIVE FAIL for late-success recovery, no new LAB PASS. Preserve original result/hash, one-shot dispatch, tenant/device/settings/lifecycle, original shift and unique receipt guards. Implement separately audited late CASH receipt evidence and existing idempotent finalizer only after exact CI/guarded release; no resend, VOID, fabricated fiscal result or direct financial SQL. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ftext-late-cash-recovery.md. Physical recovery and prevention are NOT TESTED; production unchanged.

30/10/2026 — FTEXT-REVIEWED-NO-01 / RBS-style operator recovery / ASSIGNED BEFORE SOURCE

Owner fix/ftext-reviewed-no-20261030, explicitly requested by Χρήστος after confirming the incident is OK and requiring the RBS-style operator workflow to prevent another prolonged store lock. This is a bounded continuation; all unrelated FTEXT/other-owner scopes and protected CASH/RBS/strict-card/final receipt/idempotency PASS remain retained.

Current difference verified in source: RBS explicitly reviewed NO can end an uncertain application request, while FTEXT requires a bound PAY44/48 file even after original-cashier NO/readiness. A delayed or unavailable original error file can therefore prevent self-service recovery. New owner-requested application review path: only original-cashier NO on the exact immutable generic unknown OPERATOR_CONFIRMATION CARD result, no sale/final receipt/POS payment evidence/VOID, with explicit no-receipt, no-approved-charge and register-ready acknowledgements and current settings/lifecycle binding. Append separate actor/time/result/settings-bound review evidence using the existing operator-release record; retain original outcome and do not assert fiscal cancellation or bank decline. Known verified PAY-error release keeps its existing contract. YES still requires actual final fiscal proof; UNCERTAIN remains held. No automatic fiscal replay, fake sale, payment or stock/finalization action.

Bounded source after this claim is green/main: release service and request view/route, selected-POS readiness UI and focused/native/mounted regression coverage. Require missing/false acknowledgements, foreign cashier/tenant/terminal, stale lifecycle/settings, confirmed/sale/VOID/strict-profile refusal, replay/concurrency and absence of financial tables/writes; native full CI and ordinary guarded deployment before any new LAB acceptance. New reviewed-unknown path NOT TESTED/AWAITING IMPLEMENTATION; whole connector remains OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ftext-reviewed-no-recovery.md.

30/10/2026 — Polling incident CLOSED / limited recovery USER PASS

Owner fix/ftext-poll-released-takeover-20261030. Owner explicitly confirmed «EINAI OK» after original-cashier release and resumption of trading on released778d3f05a86e7d6c0b7799405a4a0be6e6ebb26e. Independent read-only observation: original rejected request received bound late ERROR48 at13:47:55.868UTC and explicit operator release at13:49:09.721526UTC, retaining original resultHash/NO/REQUIRES_CHECK/saleIdnull; two later distinct normal requests reached SALE_COMMITTED/code0. These were owner trading actions, not agent-replayed tests. This closes only this polling starvation/recovery incident and the observed return-to-basket flow. No independently measured stock/financial deltas, every hardware error, all terminals or whole connector PASS is inferred. Tested usage is in docs/manual/ftext/PASS.md. Prior engineering receipt below is retained; its pending-cashier note is superseded by this observation. New requested RBS-style recovery is separately claimed, not accepted by this PASS.

30/10/2026 — Polling repair RELEASE VERIFIED / original error evidence recovered / AWAITING CASHIER ACCEPTANCE

Retained bounded owner fix/ftext-poll-released-takeover-20261030. Explicit takeover claim PR3313/main0db9d47 preceded source. Source PR3314 exact head49b4212346951a984040ced335ebe660ed1f2540 passed full CI41062090006 (all5jobs SUCCESS,4692server+8backup PASS/0FAIL/0SKIP) and native FTEXT41062090016/job124084094772 (28PASS/0FAIL/0SKIP). Native regression uses actual PostgreSQL request/decision/release services and verifies the previously starved unknown NO, tenant/device/token/lifecycle boundaries, read-only polling, immutable append and retained pending lock. No source/test weakening or unrelated owner edit.

Squash merged/released778d3f05a86e7d6c0b7799405a4a0be6e6ebb26e. Exact main CI41063917786/job124090634586 all5SUCCESS,4692server+8backup PASS/0FAIL/0SKIP; browser/invariants/native and real HTTP E2E passed. Production service blob e2c81e6d0d899662990cee6655002868115332c4 and native test blob44a188b882ab9e643e859df680cb6de64b780755 match inspected PR source. Ordinary guarded deployment41065647360/job124096330777 completed actual freshness/full-CI checks, rollback checkpoint, pinned trigger and exact-revision wait (none skipped). Render dep-dbi9urm1egvs73fau4vg LIVE2026-10-30T13:47:46.877655Z, deploy_hook, exact778d3f0. Independent public health oktrue/exact778d3f0 verified after rollout. No manual deploy, guard bypass or production SQL write.

Read-only actual-selector comparison before rollout reproduced the cause: old selector chose a historical operator-released direct error; corrected selector chose the current original unknown NO. At2026-10-30T13:47:55.868Z the existing paired physical connector successfully appended late ERROR48 evidence to the previously blocked current request. Independent read confirmed original resultHash, NO decision, REQUIRES_CHECK and saleIdnull retained; operator release still absent at this observation. No package/settings/pairing change, new fiscal command, charge, sale, stock or finalization action was initiated by this page. ERROR48 is not proof of bank decline or fiscal cancellation.

Next single action delivered to the owner: original cashier on the same physical POS refreshes and uses the existing Return-to-basket action only after confirming register/EFTPOS readiness. The explicit cashier release and actual resumed trading remain NOT TESTED/AWAITING USER, not automatically declared successful from code delivery or the evidence append. The whole FTEXT integration and all other owner residuals remain OPEN; protected limited CASH and recovered-NO UI manual PASS remain unchanged. No new manual PASS or broad Gate closure is claimed. This receipt updates the owned checkpoint/shared registers and generated tracker PDF only.

30/10/2026 — Polling repair implemented / AWAITING EXACT CI AND RELEASE

Owner fix/ftext-poll-released-takeover-20261030; explicit takeover merged PR3313/main0db9d47 before source. One causal SQL predicate excludes operator-released registerReady=true rows before oldest-row selection, matching the existing pending-request eligibility. Device/settings/lifecycle binding, original evidence, release/VOID and finalizer remain unchanged. Added actual PostgreSQL regression: historical released direct error then new unknown NO; select current request, reject foreign device/token/company/store/terminal/lifecycle, prove poll read-only, append exact evidence without changing original result/decision/sale and retain pending until explicit review. Only synthetic request table exists, so financial/stock writes fail.

Local Node20 focused:12PASS/0FAIL/1 native PostgreSQL skip (no local PostgreSQL). Initial HTTP test failed because first dependency tree lacked generated Prisma; rerun with existing generated dependencies passed unchanged tests. Native regression/full exact PR/main CI and guarded deployment still required. Physical recovery NOT TESTED. No production or financial action, package/settings change or fiscal dispatch. Existing limited CASH and recovered-NO UI PASS preserved.

30/10/2026 — Explicit owner handoff

ΑΝΑΛΗΨΗ ΑΠΟ fix/ftext-poll-released-20261030 — ASSIGNED fix/ftext-poll-released-takeover-20261030. Χρήστος explicitly authorized this page to take over because the previous page stopped. Preserve the same bounded scope, existing claim PR3313, all protected PASS and all unrelated owners. No production or financial action occurred.

30/10/2026 — FTEXT-POLL-RELEASED-01 / polling starvation regression / ASSIGNED BEFORE SOURCE

Owner fix/ftext-poll-released-20261030 under the current explicit user repair request. Narrow independent regression only; all other codex/rizareio-ftext-bridge-20261022 integration scope remains retained. No customer incident details or identifiers are included here.

Causal source finding: the late-error evidence poll selects the earliest NO/REQUIRES_CHECK row without excluding an already operator-released attempt. A historical released direct-error row without a late-error field passes the SQL filter, fails the subsequent unknown-report binding, and returns null before examining a later eligible original unknown NO. Status/financial outcome of a real incident remains NOT TESTED here; no live acceptance claimed.

Bound source after this claim is green/main: server/src/services/ftext-error-evidence.js plus focused/native regression tests. Exclude already operator-released rows before ORDER BY/LIMIT. Preserve every device/token/settings/lifecycle binding, original result/hash/decision, immutable append, operator release, VOID and finalizer. Test synthetic earlier released direct-error row followed by current original unknown NO and prove only the latter is selected, with unrelated scopes and financial tables unaffected. No schema, Windows dispatch, credential, production data or financial/stock writer change. Existing manual CASH/communication/recovered-NO presentation and strict fiscal gates stay protected. Full exact PR/main CI and ordinary guarded release required; runtime recovery and broader UX acceptance remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ftext-poll-released.md.

AI-OWNER-WALLET-01 — 30Oct2026 / SUPERADMIN INVOICE SWITCH / SCOPED HOSTED LAB PASS

30Oct2026 12:36–12:38UTC, same retained owner feat/ai-owner-wallet-20261022; completed bounded continuation feat/ai-invoice-billing-switch-20261030. The owner-requested in-app per-company invoice billing switch is installed and measured ON/readback/OFF/readback PASS. This supersedes only this switch's prior SOURCE PREPARED/ASSIGNED/AWAITING LAB notes; whole-wallet Owner-session, other hosted model/tier and delivered-email residuals remain OPEN with the existing owner.

Source PR3310 head6186b9152919d44c737c08a7bae72ae1da04e8d4: exact fullCI41053366088 SUCCESS,4692server+8backup tests,0FAIL/0SKIP; actual mounted form/native PostgreSQL policy/configuration/concurrency/pending-settlement tests and full recovery41053366539 passed. Mergedc029c4ecd6f59f59c0987eb53d9135fc6dfd7d19; exactmain41054814131 independently repeated4692+8,0/0, frontend/build/invariants/HTTP E2E SUCCESS. Ordinary guarded deploy41055982865 actually executed Verify/Trigger/Wait SUCCESS; Renderdep-dbi8sr6i0phs73d69elg LIVE12:34:39UTC on that exact revision. Independent /api/health returned oktrue/exactc029c4e; independent DB waitingLocks0 and LAB pending/review0 before acceptance. No direct deployment bypass, schema/lifecycle/env/price/model/capacity change.

Authenticated native SuperAdmin, Cloud Chrome /platform-admin, explicitly MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. Shift/SKU/quantity/payment N/A: configuration-only, no provider/invoice/funding/business action. Fresh private baseline12:36:20UTC: masterOFF/invoiceOFF/emailOFF, balance4964032microEUR/reserve0/version15. ONE save masterON+invoiceON ->12:36:52 version16, exactly one CONFIGURED audit with invoiceEnabledtrue/originalversion15; native active-state text and deselect/reselect persisted both checked. Fresh OFF baseline12:37:11, ONE save restoring bothOFF ->12:37:36 version17, exactly one CONFIGURED audit with invoiceEnabledfalse/originalversion16; native reload/reselection persisted inactive/unselected. Each action preserved money, other wallet fields, all entries/notices, foreign wallet/audit and all three LAB store controls. LAB main Sale90/StoreTransaction134/StockMovement95/PurchaseOrder56 unchanged; sibling controls unchanged. Original real company's master/invoice activation retained and verified by read-only native selection, no save. Real trading business counters are not a global inactivity claim.

Explicit policy now persists in existing immutable CONFIGURED detail ordered by serialized wallet version, with row-locked reservation recheck; old omitted-field clients and legacy fallback preserved. Global kill switches/master agreement, strict SuperAdmin/company checks, existing module licenses, unchanged price/model/output30000 contract and pending-call original-tariff settlement remain protected. No cache-delayed disable, new permissions, credit, receipt, email generation, invoice replay/approval/payment/stock/fiscal action. Earlier real Azure/OpenAI debit PASS retained without replay.

Usage: canonical Platform Admin -> Υπόλοιπα AI πελατών -> explicit Εταιρεία -> Χρέωση AI τιμολογίων -> Αποθήκευση ρυθμίσεων. Actual billing also requires Χρέωση AI στον πελάτη ON. This central company setting applies to all its stores; local non-AI OCR is free. Native readiness blocks unavailable new enables; disabling preserves history/funds. No per-company server env edit required. Known limits: this is configuration/UI/persistence PASS, not new provider/other-model/Owner-session/email/OCR-accuracy acceptance. Screenshot capture timed out; no protocol workaround or action replay; native DOM plus independently measured SQL retained.

Evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/invoice-admin-switch-lab-20261030.json; private before/after controls SHA256417a08f0c37e5699101195c375c0d5cf0c36a1b4dafe8864c2370bcf2da7f82d. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ai-wallet-invoice-admin-switch.md; tested instructions docs/manual/ai-owner-wallet/PASS.md. Completed switch task removed from active pending; unrelated owners and residuals preserved; common registers/generated central PDF synchronized.

AI-OWNER-WALLET-01 — SUPERADMIN INVOICE SWITCH SOURCE PREPARED / AWAITING FULL CI AND LAB

30Oct2026 same retained owner/branch feat/ai-invoice-billing-switch-20261030. Before-source3308/e56ec737 CI41051615933 SUCCESS merged306de6832bb0af4cbabda6736500f4726cc2d5ed before runtime edits. Existing actual invoice billing3304/3305 and all unrelated owners/source preserved; no provider replay, environment/company setting, funding, schema or business action by this source continuation.

Implemented explicit optional invoiceEnabled in the existing strictly validated SuperAdmin PUT and Admin form. Existing immutable CONFIGURED detail stores the boolean and original optimistic wallet version under the existing company row lock; omitted fields preserve prior policy, absence retains legacy rollout. Policy orders by monotonically serialized wallet version rather than transaction timestamps. Both invoice provider adapters, Owner feature metadata and Admin readiness resolve the same fresh policy; the repository repeats the policy check under its reservation lock, so a late disable prevents a new hold while already-reserved usage still settles. Malformed policy fails closed. Existing global kill switches stay authoritative, original Owner path and all prices/model/context/output behavior unchanged. No table/column or lifecycle-manifest change.

Activation validates exact configured/default invoice models, all token/page rates, both providers/global gate and the existing assistant30000-output allowance before mutation. Invoice-only disable can preserve an already-enabled unchanged Owner/email configuration during a provider outage; it cannot turn on Owner billing or modify email by bypass. Other original readiness checks stay intact. New labelled “Χρέωση AI τιμολογίων” control explains selected-company/all-store scope, saved versus effective master state and preserves disable; existing save flow, no funding controls used.

Actual local Node20 focused37/37PASS,0FAIL/0SKIP across real invoice adapter/request-reservation/cache policy and mounted SuperAdmin form. Mounted test verifies selected-company ON/OFF, no cross-company save, cancelled/late response fencing, missing-readiness enable refusal and available disable. Existing broader local wallet test could not load absent scratch-only notification dependency; no full local-suite claim. Added actual native PostgreSQL/HTTP tests for authorized/unauthorized/invalid/stale/concurrent policy writes, exact single audit/version delta with funds/ledger/notices preserved, legacy omitted-field/fallback, invalid prices/no-write, unavailable-provider disable, late reservation refusal, retained pending settlement, reversed timestamp ordering and corrupt-policy refusal. Native execution and full frontend/PG/build/E2E remain REQUIRED in exact PR/main CI, then ordinary guarded installation.

No hosted new switch PASS yet. Single next action full exact source CI/review, green merge and exact guarded release, then the already-published configuration-only LAB ON/readback/OFF restoration with fresh private controls and no provider generation or accepted invoice replay. Existing target activation remains legacy-compatible until explicitly changed by the owner. Whole-wallet residuals/other owners unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ai-wallet-invoice-admin-switch.md; common registers/PDF synchronized.

AI-OWNER-WALLET-01 — 30Oct2026 / SUPERADMIN INVOICE BILLING SWITCH / ASSIGNED BEFORE SOURCE / NOT TESTED

Same retained owner feat/ai-owner-wallet-20261022; bounded continuation feat/ai-invoice-billing-switch-20261030. Explicit new owner request: provide an in-app button/switch so Platform SuperAdmin can enable/disable invoice customer billing for any explicitly selected company without an agent/server environment edit. Existing selected-company activation3305/63c0dea and measured Azure/OpenAI LAB3304/7bb1dc6 remain accepted; never replay their invoices, grants or provider calls. Current mainb836872683d04fee14440c3c3b6f9e605cabd032 includes the other inventory owner's source; preserve every unrelated scope. New switch is NOT IMPLEMENTED/NOT TESTED yet.

Bounded design: keep existing global wallet/invoice kill switches, prices and current company allowlist as legacy fallback. Persist an explicit per-company invoiceEnabled boolean in the existing immutable CONFIGURED wallet audit detail, under the existing company wallet row lock and optimistic version check. Latest explicitly configured wallet version is authoritative; absence preserves legacy behavior, explicit false overrides it. No new table/column, production SQL repair, schema/lifecycle-manifest change or speculative migration. Add a bounded repository policy read; both invoice provider adapters and authenticated Owner/Admin metadata resolve the same durable policy. No cache that delays a disable. In-flight reservations still settle under their original immutable tariff; disabling cannot release unknown holds or alter money/history.

Extend only existing SuperAdmin company configuration PUT and AiOwnerWalletAdmin form. New labelled “Χρέωση AI τιμολογίων” control plus explicit saved/effective state, readiness and existing save button. Global master wallet agreement remains required for actual charging. Validate requested invoice enable against current global gate, actual configured OpenAI/Azure and exact token/page tariffs/default model contracts before mutation. Missing/invalid configuration blocks a new enable; disable remains available. New control changes no pricing/model/context/output/module/email/funds or other-company policy. Preserve old clients that omit invoiceEnabled, stale-version refusal, selected-company cancellation, strict schemas and current SuperAdmin/owner/tenant authorization. No credentials/secrets exposed.

Required engineering evidence: actual PostgreSQL configure/policy ordering, omitted-field compatibility, explicit false legacy override, concurrency/stale version, one audit/version increment and unchanged money/entries/notices; unauthorized Owner/operator/cross-company refusal; invoice OpenAI/Azure composition with durable policy while original Owner adapter remains unchanged; readiness invalid/missing/duplicate rates fail before writes/providers; mounted real Admin form selected-company/on-off/stale-response behavior. Full exact PR/main CI/native/build/invariants and ordinary guarded exact source installation before hosted LAB.

Required hosted acceptance is configuration-only: fresh private before/after/foreign-wallet and LAB business controls, existing MYWORKSTATION LAB/store ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, authenticated SuperAdmin, terminal/shift/SKU/quantity/payment N/A. One native save of master+invoice ON with existing funds/email unchanged, read-only reload persistence; fresh baseline then one save restoring both OFF, read-only reload. No provider generation, invoice upload/replay, credit/receipt, stock/payment/fiscal/approval, email or role change. Existing actual debit PASS is retained without replay; scope closes only the new control after measured native acceptance/manual/registers/PDF green/main. If any new FAIL occurs retain it and correct only this scope. Whole wallet/Owner-session/email/other-model residuals remain assigned and open.

Before runtime edits THIS claim must pass applicable CI and merge main. Single next action then implement the bounded audited company-policy path and native/UI regressions. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ai-wallet-invoice-admin-switch.md. No second page ownership or whole-wallet closure.

AI-OWNER-WALLET-01 — 30Oct2026 / SELECTED REAL-COMPANY INVOICE BILLING ACTIVATED / SCOPED LIVE CONFIGURATION PASS

Retained owner feat/ai-owner-wallet-20261022 / fix/ai-wallet-invoice-request-reserve-20261029. Measured Azure/OpenAI LAB acceptance3304 exact8061eb758db96913ff4a2fc7f39dc0dbb18e1f82 passedCI41044781211 and merged7bb1dc6adcfa2687bfcdec805c45571307674d87 BEFORE real-company rollout. Receipt includes manual, synthetic evidence, both configuration/acceptance checkpoints and synchronized registers/PDF; unmerged3299 was superseded without discarding concurrent owners. Exact merged-mainCI41044967277 SUCCESS. All2341 production runtime blobs at7bb1dc6 equal fully checked/hosted sourcee950d9b; exact fullsourceCI41041653691 and normal guard41042881821 verification remain protected.

Fresh private before11:01:14.233758UTC: selected authorized real company's existing walletON, LAB walletOFF, all holds0; exact wallet/entries/notices/audits and store controls persisted before action. Scoped Render replace:false changed ONLY AI_OWNER_WALLET_INVOICE_COMPANIES from LAB to the already-authorized selected real company; LAB excluded. Existing token/page tariffs, Owner settings/funds/email/modules, all secrets and other companies untouched. No new credit/receipt, customer provider request, real invoice replay, payment, stock, fiscal, approval or email action.

Operation returned APIdeploymentdep-dbi7hv9srm7s73dfpdgg/revision7bb1dc6adcfa2687bfcdec805c45571307674d87; actuallyLIVE11:03:40.120455UTC. Independent publichealthoktrue/exact7bb1dc6. Native fresh PlatformAdmin company selection/readback explicitly states billing covers Owner assistant AND invoice AI, company charging checkboxchecked and both provider configurations present. Private after11:04:29.833658UTC wallet, ledger, notices and audits exactly unchanged from before; both reserves0, LAB stillOFF. Separate database11:03:43UTC0blocked/0otheractive. This is observed LIVE configuration/persistence PASS after measured LAB billing, not a real customer invoice processing or OCR accuracy PASS. No direct Render trigger, source change or guard bypass; deployment provenance is the supported configuration API.

Immediate requested selected-company activation is COMPLETE: future eligible Owner-assistant and invoice OpenAI/Azure calls consume that company's existing AI balance according to the approved immutable50percent-markup schedule. The dated fixed EUR conversion and Azure retail-reference limitation remain disclosed in the candidate; no account-provider-bill assertion. Native administration retains agreement toggle and money/history. LAB stayedOFF/excluded; its two synthetic jobs remain unapproved, three legitimate charges31816microEUR preserved, no repeated accepted action. Private customer identity/finances stay outside public repository.

Broader actual Owner-session detail, hosted other-model/cache/long-tier/low-empty behavior, actual email delivery and invoice extraction accuracy remainOPEN/NOT TESTED; no whole-wallet/checklist closure or release of the retained owner. No additional provider call needed merely to prove this scope change. Manual docs/manual/ai-owner-wallet/PASS.md now includes the verified activated-state check and limitations. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ai-wallet-invoice-activated.md; common registers and generated central PDF synchronized. Single next action for this activation: no user action required; normal new invoice usage follows existing review/approval workflow. Future wider tests remain separately identified and measured.

AI-OWNER-WALLET-01 — 30Oct2026 / SCOPED HOSTED LAB BILLING PASS / REAL INVOICE ROLLOUT NEXT

Same retained owner feat/ai-owner-wallet-20261022 / fix/ai-wallet-invoice-request-reserve-20261029. Installed invoice configuration and full source evidence below remain protected. Exact installede950d9b16bb20f3f5666d858a1bc59098bf53e9f mainCI41041653691 completedSUCCESS/all5jobs before LAB. Normal guard41042881821 Verify full CI/freshnessSUCCESS; Trigger/Wait correctlySKIPPED because the independently verified APIconfigurationdeploymentdep-dbi76kgae00c73bdthm0 was alreadyhealthy/live10:39:10UTC. That API deployment selected the newer concurrent inventory source; this is recorded honestly, not a claim the guarded job installed it.7/7 wallet source blobs equal accepted47d9689. Existing deployment safeguards retained.

Measured hosted native SuperAdmin/CloudChrome LAB companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru. Terminal/shift/cash-card-IRIS payment N/A to this invoice-preview test; no business payment, approval, stock or fiscal action. Existing MAIN/LABPOS2 open shift displayed0transactions/0cash/cards/IRIS; no shift action. Private fresh before10:45:47.936531UTC LAB4995848microEUR/reserve0/chargingOFF/emailOFF/version7. ONE native enabled:true save10:46:14.738503UTC gaveversion8 and exactly one CONFIGURED audit, no money/ledger/notice/foreign-wallet change. Fresh before each subsequent write persisted privately.

Two DISTINCT new synthetic fixtures, each uploaded/local-read once and one explicit manual AI recheck; no prior accepted invoice/provider call replay. Fixture1 ai-wallet-lab-20261029-01.png SHA2563aa7688b6426a2744ff266b93fe1a0c39e8498aedeba93cef6a0757503608c94, job0fff508f-b74b-4404-b375-0e4725b7773c. Independent integerceil((1425*1675155+226*13401233)/1000000)=5416. Azure immutableversion4d3b3cbba98a6455b6407ebf46d59728223e0998de8e005cea1a33fbbc9068a0; exact1*13200 perpage. Three new charges total31816microEUR; final4964032/reserve0/version14. JobAI_COMPLETE but extracted product review remained required; do not approve or call OCR accuracy PASS.

Fresh beforedisable10:53:27.533505UTC then ONE native enabled:false save10:53:35.145706UTC; after10:54:03.615862UTC version15/OFF/emailOFF, same4964032/zeroreserve, exactly one additional CONFIGURED audit. Seven total entries/11audits, no newnotice, private foreignwallet unchanged. LAB main business counters remain Sale90/StoreTransaction134/StockMovement95/PurchaseOrder56; other2LAB stores exact unchanged. Both jobs purchaseDocumentIdNULL: no purchase draft, supplier/product write, payment, stock/fiscal/finalization, new credit/receipt or email. Real-store trading counters naturally advanced while testing; no claim of whole-platform inactivity. Private before/after kept outside public repository. Raw provider IDs remain private.

Scoped LAB PASS: actual Azure page and OpenAI token metering, exact immutable-tariff debit, no residual holds, enable/disable persistence and unaffected LAB/control wallet. Untested: other invoice models including assistantgpt-5.6-sol, cache/long-tier hosted calls, low/empty delivery, actual Owner-session detail and invoice extraction accuracy. Native/CI coverage remains separate. Whole wallet staysOPEN, owner retained. Manual docs/manual/ai-owner-wallet/PASS.md updated only for this verified usage. Public synthetic evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/invoice-metered-lab-20261030.json; no real customer finances.

CONDITIONAL next action after THIS acceptance receiptgreen/main: fresh private target/LAB wallet and pending-hold/control snapshot; merge ONLY AI_OWNER_WALLET_INVOICE_COMPANIES to include the already-authorized selected real company and exclude LAB. Preserve all tariffs, Owner setting/funds/email/modules, other companies/secrets and ordinary guard/full-CI compatibility. Verify actual installed config and fresh native target metadata includes invoice billing; LAB remains chargingOFF. No real invoice, payment, grant, provider replay or mailbox send for proof. If any prerequisite fails keep real company excluded and record precise blocker. This is not yet real-customer activation. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ai-wallet-invoice-metered-lab.md.

AI-OWNER-WALLET-01 — 30Oct2026 / LAB-ONLY INVOICE PRICES INSTALLED / CUSTOMER ACTIVATION OPEN

Retained owner feat/ai-owner-wallet-20261022, continuation fix/ai-wallet-invoice-request-reserve-20261029. Conditional before-action record PR3294 merged7600a9326ff7b2326a2cb295430e5b6536d09e8a remains authoritative. SourcePR3288 exact47d9689492d20b215f22e7fc2faeaa043c86dded fullCI40958950461 SUCCESS:4650server+8backup/0FAIL/0SKIP/all5jobs; native40958950368 SUCCESS; merged5e1e2d5d5e7e3cf5aa7eb0e8cd231e1db19b99f5. This supersedes installation-pending and expired-auth blockers only, not a functional invoice billing PASS. PR3299 original green docsCI40964635281 was left unmerged during authentication; this receipt reconciles its evidence over current main without discarding concurrent owners.

30Oct existing native Platform SuperAdmin email/password+2FA sign-in completed and positive signed-in page verified. Fresh authenticated LAB metadata: Ownergpt-5-mini ready/hold477085microEUR, invoice OpenAI/Azure configured, main overridegpt-5, FAST/FULL/ASSISTANT default; Azureprebuilt-invoice/API2024-11-30. Exact7 wallet/request-reserve/readiness/route blobs at subsequent guarded source06e27daf and config runtimee950d9b16bb20f3f5666d858a1bc59098bf53e9f equal accepted source. No model/context/output/prompt changes.

Fresh private before-configuration30Oct10:36:39.339298UTC: two existing wallets, four entries, no pending holds; LAB4995848microEUR/chargingOFF/emailOFF/version7. Full selected-customer and LAB ledger/notices/audit/store controls persisted privately. Database10:36:27UTC0blocked/0otheractive. Scoped Render replace:false saved ONLY dedicated AI_OWNER_WALLET_INVOICE_TARIFFS and AI_OWNER_WALLET_INVOICE_AZURE_TARIFFS from the already-approved fixed retail-reference candidate, request-reserve=true, invoice-companies=[existing LAB], invoices-enabled=true. Existing Owner/shared prices, secrets, mail and unrelated keys preserved. No credit, receipt, payment, stock, fiscal, business or permission write. Approved50percent resale markup/dated fixed FX and Azure retail-reference caveat remain unchanged; no account-bill verification claim.

Environment operation itself returned APIdeploymentdep-dbi76kgae00c73bdthm0/revisione950d9b16bb20f3f5666d858a1bc59098bf53e9f; LIVE10:39:10.514788UTC. Independent publichealthoktrue/exacte950d9b observed. No direct deploy trigger or guard change. The API selected newer concurrent inventory source; exact-mainCI41041653691 MUST complete successfully before any state-changing LAB/provider acceptance. Its source owner remains unchanged. Native fresh LAB readback explicitly includes invoice billing; selected real company remains excluded. Fresh10:40:40.744664UTC wallet and entries byte-identical to baseline, LAB sales90/transactions134/stock95/purchases56 and both other LAB stores unchanged. No new provider call or synthetic upload. Source installed is not measured invoice charging PASS.

Single next action after exact-current fullCI and normal guard verification: refresh/private-record baseline, enable only existing LAB wallet once with no funds/email change, upload only NEW synthetic ai-wallet-lab-20261029-01.png SHA2563aa7688b6426a2744ff266b93fe1a0c39e8498aedeba93cef6a0757503608c94, perform one explicitly requested read, independently reconcile provider usage/immutable tariff/exact debit and zero holds, restore LAB chargingOFF. Native reader is present below its scrollable commercial navigation; clicking the existing stage heading brings its form into view. Old invoices and accepted Owner call are not replayed. Publish precise scoped acceptance/manual/common registers/PDF green/main before adding only the authorized real company to invoice rollout. Actual invoice/Azure/OpenAI debit, real Owner-session detail and broader email/threshold delivery remain NOT TESTED/OPEN. No overall/manual/checklist closure or scope release. Checkpoint CHECKPOINTS/CHANGES/2026-10-30-ai-wallet-invoice-lab-configuration.md.

30/10/2026 — POS-LOCK-CONVOY-20261030 / GUARDED TECHNICAL RELEASE VERIFIED / READER FOLLOW-UP CLOSED 31Oct (LIMITED LAB)

Retained incident owner fix/pos-lock-convoy-20261030. Approved before-source transfer3300/claim9270e8e, CI40964887697 SUCCESS, merged5c725c8 before source. Source3301 corrected head791ee9dfea19b6418daffa217e750034f40ddb9c passed fullCI40966893292/job123774228457:4652server+8backupPASS/0FAIL/0SKIP, all five jobs SUCCESS including actual Chromium/wholesale/native/HTTP and expanded hot-table E2E. Squash merge06e27dafd31708af1f5c433f545fdf4c50914973; exact-main CI40968644468/job123779995184 independently verified4652+8/0/0 and all five jobs SUCCESS. All three source/test blob hashes match the reviewed candidate exactly.

Actual isolated native fixture passed65 original caller definitions (previous56 plus9 exact ledger initialization entries). It reproduces held reader -> queued redundant StoreTransaction ALTER -> blocked third ordinary ledger read, then proves guarded existing-column checks request no exclusive table lock and third reads succeed with the original reader still held. Original missing-schema type/default/nullability/data, concurrent initialization, rollback, dropped-column, search-path and error checks remain. This is engineering PostgreSQL proof, not a real-store financial or all-capacity LAB PASS.

Ordinary workflow_run deployment40969857817 (not a manual deploy) passed full-CI/freshness/rollback/trigger prerequisites and installed Renderdep-dbhsvu1srm7s73dsb14g, LIVE2026-10-29T23:02:13.391804Z (30Oct01:02:13Athens), exact06e27daf. Independent production /api/health returnedoktrue/version0.22.0+kat-test-pos/revision06e27daf. Adjacent read-only database observation:0blocked queries and0active queries older30sec. This verifies technical installation/current availability only, not sustained concurrency or a physical operator session/financial reconciliation. No diagnostic sale/payment/invoice replay/stock/fiscal action, extra manual seed/migration, pool/plan/config/Node/auth/role change. Existing ordinary startup bootstrap hooks are unchanged and still execute during normal deployments; their data effects are not claimed absent.

Delivered bounded prevention: the9 exact already-installed StoreTransaction definitions skip unnecessary ALTER using the current caller client/search path. Missing columns execute unchanged original SQL; unknown ledger columns/changed definitions/multi-action statements keep their original path. No financial/business query or schema/index definition changed. The demonstrated redundant-ledger-DDL amplification cause is technically prevented for these installed columns; do not generalize to every DDL/slow-query class or whole POS/Gate/capacity acceptance. No new manual PASS or numbered closure; preserve the shared central PDF and all existing accepted business evidence.

31Oct follow-up: the separately claimed original owner-shift Sale reader is delivered by PR3333 with scoped LAB readback recorded in CHECKPOINTS/CHANGES/2026-10-30-owner-shift-reader.md. Wider performance/capacity/security/shutdown remains with its retained owners; no repeat of accepted transactions.

30/10/2026 — POS-LOCK-CONVOY-20261030 / OWNER-APPROVED NARROW TRANSFER / BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ codex/pos-startup-loading-20261008 — ASSIGNED fix/pos-lock-convoy-20261030, current POS incident conversation. Owner explicitly approved this named transfer on30Oct2026. Transfer covers ONLY preventing recurrence of the29Oct21:38–21:48UTC Sale reader / StoreTransaction existing-column ALTER lock convoy. Original wider performance/capacity/shutdown owners remain retained; no second parallel owner for this incident slice.

Observed live failure: Sale SELECT with correlated regexp_split_to_array held reader1436962; redundant ALTER StoreTransaction ADD COLUMN IF NOT EXISTS invoiceDocumentNumber queued1436966; eight following reads waited, occupying Prisma pool9 and causing P2024/auth503. Emergency action in this conversation: Render restart requested and positively recorded; guarded pg_cancel_backend cancelled only the exact active reader, with pid/query checks. Readback showed0blocked/0long queries, healthoktrue/ce5ec3a, authenticated transaction reads200. This is bounded recovery evidence, NOT permanent functional PASS or proof of every store's financial state. No diagnostic sale/payment/stock/fiscal or invoice replay.

Before-source scope: audit exact caller definitions; extend existing hot-table guard narrowly for audited StoreTransaction existing columns, retaining missing-column definitions/current-client search-path/no cache and error propagation; substitute only relevant schema execution sites. Identify original Sale query and prepare a separately bounded optimization only after equivalent actual SQL/result/tenant/session proof. Do not guess date limits, truncate history, alter pool/config/paid plan/global timeouts, authentication, permissions, financial writers, schema definitions, indexes or other owners. No production migration/seed/manual source deploy.

Required isolated PostgreSQL proof: held StoreTransaction reader + old redundant ALTER + third reader reproduces convoy under test-only timeout; new existing-column path allows reads without AccessExclusiveLock; missing/dropped-column/concurrent/search-path/rollback/error and original schema/data equivalence. Existing POS shift own/all/company/store/terminal/old-session and financial invariants remain protected. Full exact PR/main CI, ordinary guarded release, exact revision and read-only live lock/API evidence precede any permanent completion claim. CI alone is not LAB PASS. Scoped actual hosted acceptance remains NOT TESTED. Broader100store readiness and Node security release remain separate; preserve its agreed timing.

Checkpoint CHECKPOINTS/CHANGES/2026-10-30-pos-lock-convoy.md. Publish claim green/main before runtime edits. Single next action: merge this claim after checks, then implement audited bounded guard and causal native regression. No new manual/numbered PASS.

29/10/2026 - CASH-AUTOMATIC-RESULT-13 / LIMITED LAB PASS / CLOUD DOWNLOAD OPEN

Retained owner codex/cash-chat-reconciliation-20261026. Source #3284 exact6b2e2e1 full CI40956722742:4613server+8backup,0FAIL/0SKIP; merged3db98a4. Integrated main69198a7 exact fullCI40959327048:4634server+8backup,0FAIL/0SKIP. Normal guarded deploy40960468909 verified exact69198a7 healthy. Later main changes through43048bb are documentation only; the six owned runtime files are unchanged from3db98a4. No forced release, schema, permission, financial, settings, provider or real-mail action.

Actual read-only desktop Chrome/Platform SuperAdmin acceptance29Oct, after21:52:53UTC (23:52Athens), recorded in CHECKPOINTS/EVIDENCE/cash-automatic-result-20261029/receipt.json. LAB store cmtpopbgo000trhb5ng9ytiru / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / operatorLAB POS2 / MAIN. Existing27Oct closed row originally cash0/cards0 and manual pending1: refreshed report now produces automatic cash0/employee0 without CONFIRM, human signature or remaining manual gate. Clipboard exactly matches canonical text. Actual owner-email preview opens the canonical automatic result as a prompt; it was dismissed, never sent. Existing29Oct row preserves original shortage9.40EUR/cards0 and remains pending the next close, outside calculated totals. N40CONTROL29Oct remains rows0/cash0/cards0 before and after. No transaction, stock action, allocation, approval, revoke or financial input was repeated. Full raw stock/transaction-count deltas were not measured in this read-only UI batch.

Cloud workbook download is NOT PASS: both the pre-source baseline and installed-source export displayed the created toast, but the browser download event failed and no completed workbook file was obtained. Workbook construction, canonical text and separate employee/day shortage/surplus have native/unit CI proof; this is not current live completed-download proof. The attempted chrome://downloads diagnostic was blocked by browser URL policy; no workaround was attempted. Root cause is unverified; do not label an application defect or restore whole-XLS PASS from the toast. Keep current transport/user-device acceptance OPEN. Historical28Oct export PASS is dated, not a universal current-browser claim.

Remaining OPEN under the same owner/#3243: verify completed download through the ordinary HTTPS app on a supported/user browser; if reproducible, claim a bounded diagnosed client/download fix before source edits. Live nonzero cash attribution, real delivered email, actual real-store acceptance, full physical/bank/safe/refill/Netlink source proof and durable per-issue replies/closure/continuation are not covered by this limited PASS. Do not repeat the accepted zero-row read/copy/preview or any earlier transaction merely to fill these gaps. Do not create Estia or any other store. Manual docs/manual/cash-control/PASS.md, active, tracker, pending and central PDF are synchronized in this receipt PR; until green/main this administrative receipt is pending.

29/10/2026 21:52 UTC — CENTRAL-BACKOFFICE-ACCESS-01 / INSTALLED, READ-ONLY UI OBSERVED / AWAITING PERSONAL LAB ACCEPTANCE

Retained owner Rizareio readiness / feat/central-backoffice-access-20261029. Personal-account source PR3280 is installed in healthy production69198a7c2d1b41d1d1dd24ddccf9cfb958dee8fa. Newest full mainCI40959327048 PASS:4634 tests,0FAIL,0SKIP plus backup8PASS, Windows and isolated wholesale/HTTP/browser checks. Ordinary guarded deploy40960468909 succeeded; exact healthy revision observed21:51:12UTC and independently rechecked. Technical receipt3291 merged43048bb, docsPRCI40959960335 and docsmainCI40960222801 green. Other owners/source preserved.

Read-only hosted observation21:52UTC: existing SuperAdmin support session, MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru), cloud browser tab6, no operator shift action. New menu opens personal accounts, empty list loads without error, blank new-account form renders name/username/password/PIN and all three explicit same-company store choices. No field/credential/grant entered or submitted. Screenshot CHECKPOINTS/EVIDENCE/central-backoffice-access-20261029/personal-access-form.jpg, SHA256 9ffaee76c1ccb63220ca2d46b7a7112d824ccfeb444698e37ab3c68417e70a19. This is read-only UI observation, not live account/login/role/count/revocation or whole LAB PASS; no balance/stock delta inferred. Existing Owner/MFA and POS behavior remain protected. No manual or numbered PASS closure.

Single next action: user specifies named test account(s) and enters their new credentials in the prepared LAB form, selecting only the authorized LAB store/profile; the browser credential policy requires user entry/submission. Then this same owner completes grouped live login/role/store/session/revocation acceptance with fresh before/after evidence for any write. Real employee rollout, Owner PIN alias, wider manager and cash-review writers remain OPEN/not enabled. Scope remains ASSIGNED to this owner; no parallel takeover. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-central-backoffice-access.md.

AI-OWNER-WALLET-01 — SOURCE GREEN MERGED / CONDITIONAL LAB-FIRST ACTIVATION / NOT YET ENABLED

29Oct2026 retained owner feat/ai-owner-wallet-20261022, continuation fix/ai-wallet-invoice-request-reserve-20261029. Before-source claim3286 greenCI40957257444 mergedc8891625 before source. SourcePR3288 exact47d9689492d20b215f22e7fc2faeaa043c86dded fullCI40958950461 SUCCESS:4650server+8backup PASS,0FAIL/0SKIP, all5jobsSUCCESS; separate native40958950368 SUCCESS. Merged5e1e2d5d5e7e3cf5aa7eb0e8cd231e1db19b99f5. Exact-main fullCI40960880203 is still IN_PROGRESS; ordinary exact installation NOT VERIFIED. Local Node20 focused33/33PASS. No hosted invoice-billing PASS inferred from engineering checks.

Implemented opt-in authoritative input-token preflight for immutable inline invoice text/images/PDF, unchanged requested output caps, worst-cache/long-context holds, fail-stop before generation on invalid counts and durable REVIEW for overruns. Legacy/Owner/full-model paths remain compatible. Dedicated AI_OWNER_WALLET_INVOICE_TARIFFS and AI_OWNER_WALLET_INVOICE_AZURE_TARIFFS preserve existing Owner schedule keys. Optional AI_OWNER_WALLET_INVOICE_COMPANIES scopes adapters and Owner/Admin metadata, permitting LAB-first rollout without billing other companies. No model, prompt, context capacity, output cap, schema or business/fiscal algorithm changed.

Read-only native Admin confirmed the user-selected customer and original Owner settings/funds; private identity/finances are not published. LAB remains4.995848EUR/reserve0/chargingOFF/emailOFF with its original settled Owner call. No credit/save/provider generation/upload/payment/stock/fiscal/role/email action by this continuation. Owner screenshots verify Azure North Europe/S0 Standard/no Web Pre-built commitment. Official retail-reference8.7997EUR/1000pages gives13200microEUR/page after approved50percent markup. User instructed START after this exact retail-reference quote; candidate is a fixed reference resale schedule, not an assertion of the account's final supplier bill. All three exact invoice models/aliases, cache-write lifetimes,272000long-context threshold and accepted fixed23Oct EUR conversion are in CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/invoice-tariff-candidate-20261029.json. No production price or feature flag applied yet.

Observed separate live blocker BEFORE installation: LAB pool timeout10sec/limit9 and read-only21:42UTC database9other connections/8blocked/oldest348sec, an ALTER queued behind an older query. Later21:48UTC read-only observation showed0blocked/11other connections/oldest23sec; no backend cancellation, restart, migration or repair by this page, and no causal repair PASS. Publichealth remainedoktrue/ce5ec3a6b37c3844aa57298a88a787ed05ec1def throughout. Left LAB polling through canonical Admin. Recheck query health before any metered action; an HTTPhealth alone is insufficient. Existing server/performance owner remains retained.

CONDITIONAL BEFORE-ACTION RECORD: ONLY after exact-main full checks and ordinary guarded installed source/blob verification, re-read actual invoice model metadata and pending holds. If unchanged and database healthy, merge ONLY the two NEW dedicated invoice tariff keys from the recorded candidate, AI_OWNER_WALLET_INVOICE_REQUEST_RESERVE_ENABLED=true and AI_OWNER_WALLET_INVOICE_COMPANIES=[the existing synthetic LAB company]. Preserve all existing Owner/shared tariffs, secrets, mail and unrelated keys. Activate the invoice global gate only with the LAB-only allowlist present on the verified new runtime. Record fresh LAB/selected-target wallet/ledger/notice/audit and business controls before config and before each subsequent state change. No new credit, fake receipt or permission change.

Then one separately identified NEW synthetic invoice preview/read in the existing LAB, within its existing balance, with no payment/finalization/stock/fiscal action and no replay of any accepted invoice. Reconcile each Azure page/OpenAI usage/immutable tariff, exact debit, zero remaining holds and unaffected controls; unknown results retain holds and are not retried. Restore LAB chargingOFF, preserving legitimate settled usage. Publish the precise scoped hosted PASS/manual/common registers/PDF green/main before adding ONLY the user-selected real company to invoice rollout. If any prerequisite or actual-provider/count/usage proof fails, keep real-customer invoices excluded and record the concrete error. All runtime customer invoice charging remains NOT ENABLED at this receipt. Whole wallet, actual Owner-session detail and broader notice/threshold delivery remain OPEN. Single next action: exact-main CI and normal installation, then the conditional measured sequence. No overall/manual/checklist PASS or scope release. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-ai-wallet-invoice-activation-readiness.md.

29/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / MERGED, FULL MAIN CI PASS / AWAITING GUARDED RELEASE + LAB

Retained owner Rizareio readiness / feat/central-backoffice-access-20261029. PR3280 head f99cf19bdc71d0e8ce8918c6e5666919141a94c1 merged as016b15d23c8fcf177cc397c93018d8f345b0105f. Complete PR CI40955352297 and mainCI40957101537 PASS:4627 tests,0FAIL,0SKIP plus backup8PASS, Windows and isolated HTTP/browser flows. Main wholesale initially stopped at Chromium Target.createTarget before navigation; scoped retry123746730245 PASS with successful jobs retained. Dedicated PG18 wallet40955352263/Ftext40955352229 recovery contracts PASS. These are automated technical results, not live LAB PASS.

Delivered personal EMPLOYEE-backed username/password or PIN accounts with explicit per-store MANAGER/STOCKTAKER/AUDITOR subsets of inventory.read/inventory.count/cash.read, current session/grant/license checks, safe account audit/revocation and dedicated logout preserving POS state. Owner/SuperAdmin existing login/MFA retained; no Owner PIN alias, Owner elevation, broader manager/cash-review writes or real employee rollout. No production account/credential/grant or financial/stock posting performed. Exact release remains unverified: health last ce5ec3a, source deploy40959356395 safely skipped by freshness guard (newer production source) while newer shared main69198a7 undergoes fullCI40959327048. Preserve all concurrent owners/source; no bypass or pinned old deployment. Single next action: follow ordinary newest full CI/guarded deployment to exact healthy revision, inspect LAB page, then user-entered credentials and scoped LAB role/session/store acceptance. Scope stays OPEN/ASSIGNED; no manual or numbered PASS closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-central-backoffice-access.md.

AI-OWNER-WALLET-01 — INVOICE PRICING AND REQUEST RESERVATION / ASSIGNED CONTINUATION / NOT TESTED

29Oct2026. Retained owner feat/ai-owner-wallet-20261022; continuation fix/ai-wallet-invoice-request-reserve-20261029. User explicitly continues activation for the selected Diadochou company. Before source/configuration: preserve the existing Owner tariff, funds, settled entries and all other owners. Invoice charging remains OFF. Screenshot evidence identifies the existing Azure Document Intelligence resource in North Europe, S0 Standard, with no Web Pre-built commitment (pay as you go). Official Retail Prices API research returned EUR8.7997 per1000 S0 Pre-built Pages; this is a retail reference, not an account invoice assertion. Approved50percent markup yields13200microEUR/page rounded upward. No tariff applied.

Read-only source inspection found reservation uses full model context and full tariff output maximum even for a bounded invoice request. Bounded planned correction: invoice-only exact OpenAI input-token preflight for immutable self-contained requests, reserve the measured input upper cost plus the EXISTING requested output cap, fail closed on invalid/unknown counts; keep legacy full reservation for unsupported mutable/conversation/tool inputs. Preserve model, prompts, context capacity, output caps, Azure physical-page metering, durable unknown holds, tenant scopes and disabled compatibility. No local estimates, model downgrade, duplicate provider generation, funding, invoice upload/payment/stock/fiscal action or email.

Required acceptance: causal tests for exact request reservation, cached/write/long-context worst-case bounds, missing counts and errors before generation, overrun REVIEW, insufficient balance, tenant OFF and unchanged Owner adapter; full CI/native/browser/build then ordinary guarded exact release. Separately measured new synthetic LAB invoice metering before customer invoice activation. Existing invoice/manual PASS transactions must not be replayed. Invoice/Azure full billing remains NOT TESTED. Single next action: publish this before-source claim green/main, then implement the bounded reserve correction and prepare exact configured-model tariffs. No whole-wallet PASS or scope release.

29/10/2026 — CASH-AUTOMATIC-RESULT-13 / HISTORICAL BEFORE-SOURCE CLAIM - SUPERSEDED BY LIMITED RECEIPT

Retained owner codex/cash-chat-reconciliation-20261026; planned feat/cash-automatic-result-20261029. Explicit owner asks automatic investigation and results, with unresolved questions staying OPEN. No new store/Estia creation. Foundation12/source3278 has exact4582+8/0/0 proof on7bc3baf; reconciled833fa760 current fullCI40950440841 is pending. This independent continuation may be coded ONLY after THIS claim green/main, and integrated only on the green foundation12 source. No new LAB PASS or mail.

Read-only source discovery found a remaining legacy manual-only gate: Platform cashReportEmailData SQL sets reviewValid=false whenever CashControlReview is absent; POST send-email separately rejects every false reviewValid. Thus foundation12 arithmetic alone does not remove mandatory manual work. Do not claim full automatic completion from its helper-only test or CI. Distinguish authoritative ABSENT legacy review (explicit SQL null decision and null timestamp, no reviewer) from stale/unknown review. A fresh scoped calculated receipt may proceed with absent manual review, retaining original review absence, explicit pending questions, canonical snapshot fingerprint, unchanged recipients/consent and send boundaries. Existing stale/manual-invalid/unknown/changed-source holds stay mandatory. No current setting, SMTP, consent, grants or dispatch scheduler is changed.

Bounded next source: NEW server/src/services/cash-automatic-result.js only pure effective arithmetic eligibility and non-netted per-day/employee summary; existing cash-reconciliation-report.js only precompute automatic contradictions before connected-offset invalidation, effective automatic result/prose/derived summary, preserving original hashes/history/manual reviewed flags and immutable finance. Existing cash-reviewed-automatic-contract.js only strict optional derived DTO and recomputed-summary validation; cash-reviewed-email.js only distinguish absent from stale legacy approval. Existing server/src/routes/platform-admin.js ONLY the redundant legacy approval condition in the existing /cash-control/stores/:storeId/send-email handler (use the single validated readiness outcome), no auth/other route/entity changes. Existing cash-reviewed-archive.js ONLY additive automatic-result/per-employee/day export from the same verified derived summary; old manual-reviewed sheets remain unchanged. No financial writer or fabricated CONFIRM/actor signature. No source outside these paths without amendment.

Automatic cash eligibility requires fresh complete exact arithmetic, closed eligible shift/required next shift, valid immediate handoffs, safe unchanged manual allocations/explanations and known employee identity. Numeric contradiction invalidates the entire connected manual offset component before projection, never just one half. Equal amounts/time alone never generate an offset. Missing receipts/card/Netlink clarification stay open independently; bank/card values never reduce cash. Stored source, plan and original financial records are not rewritten; calculated cash results remain explicitly automatic, distinct from human approval. Latest/uncertain/identity-ambiguous rows remain pending. Difference-only/POS-only configured semantics remain protected; do not convert them into FULL cash rules.

New tests server/test/cash-automatic-result.test.js; additive existing cash-reconciliation-report.test.js, cash-reviewed-automatic.test.js, cash-reviewed-email.test.js, cash-reviewed-email-routes.test.js, cash-reviewed-archive.test.js, cash-reconciliation-postgres.test.js, cash-reviewed-automatic-postgres.test.js and assistant-reviewed-cash.test.js only actual common-text/derived-result preservation. Keep route admission/injected transport tests, old manual write/revoke/stale/role/tenant/lifecycle assertions and native original/control before/after proof. No real SMTP or business transaction in engineering. Exact full PR/main CI and normal guarded healthy release required before scoped read-only LAB report/export/preview. Fresh before/after baseline before any state-changing acceptance; no replay of accepted financial/input actions. CI alone is not LAB/manual PASS.

Remain OPEN independently: full provider-original telecom/Netlink and safe/refill/deposit proof, persisted per-issue answers/closure/continuation, actual real-store/business/full email acceptance. Source unavailability must remain visible rather than invented proof or automatic issue closure. This slice completes the automatic-result/legacy-gate integration of available cash facts, not those missing external proofs. Single next action after green/main claim: implement the bounded automatic result and actual registered-route absence-versus-stale proof on the integrated foundation12.

Checkpoint CHECKPOINTS/CHANGES/2026-10-29-cash-automatic-result.md.

31/10/2026 - CHAT-FIRST-ENTRY-01 / LIMITED USER PASS: STORE LINK AND APP REOPEN

Retained owner codex/chat-first-entry-20261029. In this conversation owner said «ειναι οκ» and then explicitly «ναι» in reply to the precise question whether the link opens the correct store and the application remains signed in after close/reopen. This closes only those reported physical steps. Device/OS, store/account, installed APK hash/version, exact time and runtime revision were not independently identified; previous technical0.1.11/69198a7c delivery remains separate evidence, not a claim that this phone was independently identified. No replay for documentation. Actual30-day idle expiry, operational revocation, forensic storage and every device remain separately NOT TESTED; old accepted native/media/voice/push results and other owners are retained. Manual docs/manual/native-chat/PASS.md now describes the confirmed usage and limits. No new PIN/message/media/business action performed by this receipt.

01/11/2026 - CHAT-SEARCH-FORWARD-01 / ENGINEERING AVAILABLE / ONE EXPANDED PHONE ACCEPTANCE OPEN

Retained owner codex/chat-native-readers-20261031, branch feat/chat-search-forward-20261101; updated 01/11/2026 03:35:15 Europe/Athens. Android0.1.14-preview/code15 publicly available at https://myworkstation-app.onrender.com/downloads/chat-android/. Delivered together: selected-store server history search (literal body/filename,20 per stable page) and explicit authorized destination selection/review/confirm forwarding for text/photo/PDF/voice/video, alongside prior named delivery/read, quoted replies, reaction set/replace/remove and pinned announcements/explicit «Το διάβασα». Current access/settings apply to both stores; a single-store operator has no extra destination. No new recipient access, automatic forwarding, original private source/author metadata, inherited read/ack/reaction/task/AI/pin/completion/quote, or implicit search receipt/ack. Search is time-bounded; no measured production-wide backoffice speed claim.

Before-source claim PR3433/merge946fa417 passed exact docs CI41251091802 before code. Source PR3434/head84f84dfd099e2b61b413a8205a89f41907c8b6c2 full CI41256750055 SUCCESS and Android41256750041 SUCCESS; exact source main063579c975dc9133890d2974fad8cf9016322cd8 full CI41257899411 SUCCESS. Actual PostgreSQL/HTTP400 tied-timestamp history rows exactly once, wildcard/SQL literal search, company/store/module/revoked-session boundaries,8-concurrent forward retries/conflicting keys/audit rollback and exact media copying passed. Actual Chromium search and forward-review geometry/zero synthetic writes passed at390x844/360x740/390x420. Full existing native lifecycle/recovery/installation/old-catalogue HOLD checks retained with exact additive forwardBinding review across BASE/Snapshot/CAPTURE3, one nullable non-owning payload hash and4-key history index; no new relation or ownership/deletion expansion, no automatic old-plan transition. Initial failed candidate CI and Android test-timing correction are historical evidence below, not availability proof.

Stable signing41257953318 artifact13064516297 pinned this source, exact-main full CI before key access, compile/unit/lint, actual audio/video capture1 and full52 instrumentation, apksigner verification with unchanged owner certificate. Independent ZIP digest/APKv2 certificate/compiled binary package+version/history+forward methods and APK hash/bytes verified. SHA2568e7a7c9f088d56f6b02e2732f7b469acf25c8d0b6bb8bebc411d910c7a71599d;3703820bytes; certificate17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97; Android tree1a2fc7bcde0e4d643ed6e2a3c6e64b0e2ea11c41. Distribution PR3442/head71f1461180596c5af2faf5063334e48febf2f8f4 fullCI41259646527 and mergeaaf3dce10b7d19fb700fb1f30a4e464cf498e67b full-main CI41260513845 SUCCESS. Ordinary guarded deploy41261365197, Renderdep-dbj9d2ou01pc73eqp6vg, observed liveaaf3dce10b7d19fb700fb1f30a4e464cf498e67b. Independent public health/exact revision, manifest object AND bytes, APK byte-equality with the verified signed artifact passed; public download/explicit synthetic store-intent UI observed without opening native Chat or sending. Evidence CHECKPOINTS/EVIDENCE/chat-search-forward-20261101/.

Physical/LAB/USER acceptance remains NOT TESTED. Only ONE expanded final phone batch remains, per docs/testing/chat-search-forward-20261101.md: two different authorized users for named delivery/read, same synthetic announcement for quote/reaction/pin/explicit acknowledgement, history search and ONE explicit forward to another authorized TEST Chat. CHAT-VIBER-BATCH-01/0.1.13 and CHAT-NATIVE-READERS-01/0.1.12 physical checks are absorbed here; no separate interim phone check or false PASS. Previously accepted first-entry/reopen/voice/media/appearance/ready-reply/auth/push USER PASS retained with device/hash not independently identified; not replayed for paperwork. Finite encrypted revocable sessions, unknown-send/no-auto-replay and all company/store/module/session guards retained. No real recipient Chat send/read/ack/Push/email or manual production business mutation during engineering; only isolated synthetic fixtures. Node22 technical HOLD and other native/iOS/N16/assistant owners/residuals unchanged; overall N16 OPEN. Single next action: one grouped actual phone acceptance and central recording of real observed outcomes; retained owner until completion or named handoff.

01/11/2026 - CHAT-SEARCH-FORWARD-01 / HISTORICAL BEFORE-SOURCE CLAIM / HISTORY SEARCH AND EXPLICIT FORWARD

CHAT-SEARCH-FORWARD-01 ASSIGNED to retained owner codex/chat-native-readers-20261031, branch feat/chat-search-forward-20261101, 01/11/2026 01:02:55 Europe/Athens. Owner explicitly said «ΞΕΚΙΝΑ» after the proposal to start message search and forwarding to another authorized conversation. Bounded new scope: server-backed history search in the selected store, Web/Android search UI with stable bounded pagination and stale query/store/session rejection; explicit destination selection plus confirmation and one idempotent forward of existing text/photo/PDF/voice/video to another currently authorized store Chat. No automatic forwarding, new recipient access, direct messages, calls, edit/delete, presence, email or other native/iOS/assistant ownership. Existing mobile authorized-store discovery is reused; a current single-store operator has no other eligible conversation. Destination names/content are never inferred from an unverified client ID. Owner remains assigned until completion or named handoff.

Current evidence: public Android0.1.13/code14 engineering delivery remains verified by PR3397/3402/3406, pinned signer and exact public bytes; full CI4939+8 and47 Android instrumentation passed. Its physical combined acceptance remains NOT TESTED and is deferred into one expanded final batch after this new combined update, without a separate intermediate0.1.13 check. Previous limited first-entry/reopen/media/ready-reply/appearance/auth/push USER PASS retained without independently identified device/hash, no replay for paperwork. Current source audit against b604752: no intervening Chat route, Android or StoreChatPanel source change. Web currently filters only its loaded100/200-message window; no server history-search or forward route exists. All current registry sections read for ownership; no overlapping search/forward claim found. Other owners and overall N16 OPEN retained.

Required boundaries: source AND destination current company/store/role/module/session checks, active eligible destination discovery and fresh POST recheck; cross-company only where the existing unrestricted SuperAdmin discovery/access already permits it, no Owner/company-switch bypass. Destination attachment flags and source download restrictions apply. Forward creates a GENERAL message by the current actor, labelled forwarded, without transferring original read/delivery/ack/reaction/task/AI/pin/completion/quote state or revealing original private store/author metadata to the recipient. Unique per-actor request key binds source/destination and returns the same committed message on retry, conflicting reuse rejected; send/audit/intent atomic, Push only once after the first commit. No client attachment re-upload or real forward during engineering tests. Search is read-only, scoped, bounded to20 results per page, literal parameter-bound input and stable keyset cursor; store/time index and query timeout prevent unbounded enrichment/work. No automatic read/announcement acknowledgement and no durable private search/history/destination storage; clear private UI on background/navigation/logout and reject stale results.

Required before availability: pure/mounted Web and real PostgreSQL/HTTP tests for old history/pagination/escaping, tenant/module/revoked sessions, destination/settings enforcement, concurrent idempotent forwards and conflicting keys, content-only copying and no search mutations; actual Android UI/search/forward/lifecycle/security tests and retained full media/session/appearance regression; Node20 build, exact full PR/main CI, unchanged stable-key signing/guarded Render delivery, independent public manifest/APK/cert/health verification. New functionality NOT IMPLEMENTED/NOT TESTED before this claim is green/main. No manual/PASS entry from CI. One combined physical acceptance only after the full new update. Single next action after this claim merges green/main: implement and deliver both additions autonomously, then retain only that grouped phone check.

31/10/2026 - CHAT-VIBER-BATCH-01 / HISTORICAL0.1.13 ENGINEERING / PHONE CHECK ABSORBED INTO0.1.14

CHAT-VIBER-BATCH-01 retained owner codex/chat-native-readers-20261031; branch feat/chat-viber-batch-20261031; updated 31/10/2026 22:10:02 Europe/Athens. Owner instruction remains one combined update and one final check. Android0.1.13/code14 is publicly available at https://myworkstation-app.onrender.com/downloads/chat-android/. Delivered/read names, quoted replies, current-user reactions (thumbs-up/check/heart, replace/remove), and native pinned announcements/explicit «Το διάβασα» are delivered together. Owner/SuperAdmin controls reuse existing pin and acknowledgement settings; no automatic human read/announcement confirmation. Delivery means receipt by an authorized application, not Push/device-universal or human reading.

Before-source claim PR3390 green/main6e8c957 preceded code. Source PR3397/head058ec34115824ca8a1e4d7b3458b3b92f51053b5, full PR CI41230278081:4938server+8backup/0FAIL/0SKIP and real PostgreSQL/HTTP isolation/idempotency/media flow PASS. Bounded-before-enrichment query proved exactly2 rows for limit1 plus an older read pin across400 historical messages; partial pin index, no measured production latency claim. Android41230278130 and stable signing41231397456 each compile/unit/lint and actual capture1/full47 instrumentation PASS, including new owner controls at320/360dp/font1.0/1.3. Local Node20 build/focused32 and Java6 tests PASS. Source mergedb693a2656ffbcaaed1d96c680182de16692258f7, exact full-main CI41231351417 green. Signing first correctly refused before key access while exact CI pending; same-SHA/ref retry after green, guard unchanged. Independent ZIP digest/APK bytes/hash/APKv2 certificate/compiled version14/0.1.13/interactions class verified. Stable certificate17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97; APK3687436bytes SHA2569b684af688dde18b129755641df6ef6b1ef9c2f7926c639c4e96f167644b6c02; Android source treed32799847678d28a1cb6790c7d7c7d0fa776b8b8.

Distribution PR3402 mergeda71c80c33f7dcd45f78fa2b253d7baab24b5e428; exact PR CI41233898095 and full-main CI41235058707 green. Ordinary guarded deploy41235884915, Renderdep-dbj4clgae00c73d6m5d0, exact livea71c80c33f7dcd45f78fa2b253d7baab24b5e428. Independently observed2026-10-31T19:55:20.707804+00:00: health ok/exact live revision, public manifest equals repository and public APK is byte-for-byte the verified signed artifact. Browser landing version and synthetic store-link intent inspected without native launch or real Chat read/send. Evidence CHECKPOINTS/EVIDENCE/chat-viber-batch-20261031/ contains source-validation.json, verified-signing.json, public-verification.json and public-download-0.1.13.jpg. Old APKs retained; no direct deploy/guard bypass/production DB command from sandbox.

ENGINEERING verification only. Combined physical/LAB/USER acceptance remains NOT TESTED/AWAITING LAB; no new manual/PASS claim. Single next action for this retained owner: one combined two-authorized-user same-store acceptance per docs/testing/chat-viber-batch-20261031.md, covering names/delivery/read, quoted reply, reaction set/replace/remove and owner pin/explicit acknowledgement. CHAT-NATIVE-READERS-01 physical check is absorbed here, no separate intermediate phone request. Existing limited first-entry/reopen/media USER PASS retained without independently identified device/hash and not replayed for paperwork. Finite encrypted revocable sessions/auth/module/company/store and unknown-send/no-replay protections retained. Other native/iOS/N16/assistant owners and untested30-day expiry/revocation/forensics/device residuals remain unchanged; overall N16 OPEN. No real recipient message/read/Push/email or business mutation performed during engineering verification.

31/10/2026 - CHAT-VIBER-BATCH-01 / HISTORICAL BEFORE-SOURCE CLAIM / ONE COMBINED RELEASE AND ACCEPTANCE

CHAT-VIBER-BATCH-01 ASSIGNED to retained owner codex/chat-native-readers-20261031, branch feat/chat-viber-batch-20261031, 31/10/2026 19:41 Europe/Athens. Owner explicitly directs: «ΘΕΛΩ ΝΑ ΤΑ ΠΕΡΑΣΕΙΣ ΟΛΑ ΜΑΖΙ ΚΑΙ ΜΕΤΑ ΝΑ ΚΑΝΟΥΜΕ ΕΛΕΓΧΟ ΣΕ ΟΛΑ ΜΑΖΙ». One combined Android/web/backend release and one final phone acceptance batch; do not stop for individual user acceptance between features. Internal engineering tests/CI remain mandatory. Existing CHAT-NATIVE-READERS-01 names move into this combined phone acceptance without claiming PASS. Its owner remains the same. Other native/media/iOS/N16/assistant owners and existing limited voice/photo/video/ready-reply/entry/reopen USER PASS remain protected.

Agreed scope after this claim is green/main: quoted-message replies across text/photo/voice/video; one current-user reaction per message (thumbs-up, check, heart), replace/remove explicitly; actual recipient-client delivery acknowledgement distinct from explicit read, shown with names/counts without inferring delivery from server save or Push; Android parity for existing pinned announcements and «Το διάβασα» using existing Owner/SuperAdmin pin and per-store acknowledgement settings. Web already has pin/ack: reuse, preserve and integrate replies/reactions/delivery. Native announcement creation/pin/ack must respect existing roles/settings. Replies/reactions/delivery are additive store-scoped server data, nullable reply linkage plus unique per-message/user receipt/reaction tables in existing idempotent Chat schema bootstrap, not destructive sandbox DB migration. No role/license/auth lifetime/AI/POS/financial/stock/fiscal/provider/email change. No native/iOS takeover or real recipient send. Current source audit: Android last reader-name source ab1d091; server last first-entry source85a2aa5; no newer overlapping interaction owner found in current registries/history.

Protect exact company/store/user authorization, finite revocable encrypted sessions, stale account/store/epoch rejection, secure dialogs, draft clearing on navigation/background/logout, no durable private message/name/media storage, existing unknown-send stop/no replay and media bounds. A quoted parent must exist in the same authorized store; missing/foreign parent fails without a new message. Client delivery ACK means authenticated application received a response, not every physical device, Push delivery or human reading. No automatic read/announcement confirmation. Old clients remain compatible with additive fields/routes.

Required engineering: real PostgreSQL/HTTP tenant/role/module/session and atomic reply/receipt/reaction tests, idempotent delivery and replacement/removal, malformed/foreign inputs, mounted web behavior and stale-store rejection, actual Android Activity reply/reaction/announcement/delivery/lifecycle tests plus all existing media regressions, exact full PR/main CI, unchanged guarded Render release, pinned same-signer APK and public artifact/manifest/health verification. Only afterward one combined new-feature phone batch; no replay of old successful sends for paperwork. Current new batch NOT IMPLEMENTED/NOT TESTED, no new manual PASS. Public0.1.12 remains the last verified distribution. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-chat-viber-batch.md. Single next action after green/main claim: implement all agreed interactions autonomously and deliver one combined update before asking the owner to test.

31/10/2026 - CHAT-NATIVE-READERS-01 / HISTORICAL ENGINEERING0.1.12 / PHYSICAL CHECK ABSORBED INTO CHAT-VIBER-BATCH-01

CHAT-NATIVE-READERS-01 ENGINEERING AVAILABLE / AWAITING PHONE. Owner codex/chat-native-readers-20261031 retained; updated 31/10/2026 15:53:06 Europe/Athens. Public Android0.1.12/code13: https://myworkstation-app.onrender.com/downloads/chat-android/. Own messages expose «Διαβάστηκε από N» with authorized same-store names; private dialog rejects stale identity/store/epoch and clears on exit/background. No new API/write, automatic read, delivery inference or persistent message/name storage. Source PR3362, exact source-main CI41202964821 green; Android CI41201100715 and stable signing41202991148 each full41 instrumentation+actual capture1 PASS. Existing prior first-entry/reopen/media USER PASS retained; device/hash not independently identified.

Distribution3374 merged7332c0de8f3a1dc8b4d8fb01467de079fafa7de4; full PR CI41204962335 and exact main CI41206046498 green. Ordinary guarded deployment41206962144/Renderdep-dbiv2cks728c738d69hg, exact live7332c0de8f3a1dc8b4d8fb01467de079fafa7de4. At 2026-10-31T13:52:15.389561+00:00 public health ok, manifest identical to repository and public APK byte-for-byte identical to signed artifact:3687436bytes/ SHA256eaa1f8343de16765711dcc8c3e6ed748fba35a53d355ec21745cf155cdec3a5b. Prior stable signer independently matched; no guard bypass. Full source/signing/initial unrelated CI failure receipt: CHECKPOINTS/CHANGES/2026-10-31-chat-native-readers.md and CHECKPOINTS/EVIDENCE/chat-native-readers-20261031/.

ENGINEERING only; named-readers physical/LAB/USER NOT TESTED. Single next action: update and inspect names on an existing already-read own message, confirm list closes on exit/background; no new read/send or replay of accepted voice/entry. Manual does not claim this untested feature. Overall N16 OPEN; other native/iOS/N16 owners and first-entry residuals preserved. Quoted replies/reactions/device-delivery acknowledgements remain separate later unimplemented scope.

31/10/2026 - CHAT-NATIVE-READERS-01 / HISTORICAL BEFORE-SOURCE CLAIM

Historical before-source claim, superseded by the current ENGINEERING AVAILABLE / AWAITING PHONE receipt above. Owner codex/chat-native-readers-20261031, branch feat/chat-native-readers-20261031. Explicit user request: start the agreed Viber-like additions after checking existing behavior; voice is already present and accepted. Audit: server already returns authorized same-store readers with names; web already shows reader names, pinned announcements and acknowledgement; Android only shows generic «Διαβάστηκε». No new request to reimplement these existing web/media features. No overlapping new read-name scope found in current retained Chat records. Existing native owner keeps other scopes; first-entry owner remains for only its untested residuals.

Bounded first source slice AFTER this claim is green/main: Android MainActivity message metadata/readers dialog only, new small ReadReceipts helper, focused unit and actual-activity tests, build.gradle version13/0.1.12, subsequent unchanged stable-key signed APK/download manifest and truthful usage copy. Show named readers of own sent message, ignore sender/self records, deduplicate reader IDs, tolerate malformed entries, retain unknown/empty state without claiming delivery. Names come only from already authorized same-company/store API response; no additional API/network write, automatic read marking, schema/auth/license/server/web/POS/financial/stock/provider/email change. Dialog stays private and clears on normal background/navigation/logout/store change; stale identity/store/epoch cannot open it. No persistent message/name storage. Preserve accepted voice/photo/video/quick replies and first-entry/encrypted renewal.

No claim of true device delivery: server acceptance, device delivery and explicit read are separate states; real delivery acknowledgements are a later independently scoped addition. Quoted-message replies and reactions remain subsequent requested gaps, not implemented/PASS here. Required: malformed/self/duplicate/read-state tests, actual activity dialog/FLAG_SECURE/zero-write/stale-store/navigation checks, existing Android lifecycle/media regression, exact PR/full-main CI, ordinary guarded release and stable signed public APK/certificate/hash/source verification, then only new read-name phone acceptance. CI is not USER/LAB PASS. Current engineering/phone status NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-chat-native-readers.md. Single next action after green/main claim: implement and deliver only this named-reader slice autonomously; no new user permission required.

29/10/2026 — CHAT-FIRST-ENTRY-01 / TECHNICAL PUBLICATION COMPLETE / AWAITING DEVICE

Owner codex/chat-first-entry-20261029 retains only the independently claimed first-entry/sharing/session-renewal slice. SourcePR3276 merged6fb7e556ed19552acf34bf8eeea4a3289666110a after exact full/native checks. DistributionPR3287/head70d4588198cb50de9d9bd964e2ec7152274e5288 passed all5jobs in40957549944 (4627server+8backupPASS/0FAIL/0SKIP), merged69198a7c2d1b41d1d1dd24ddccf9cfb958dee8fa; exact-main40959327048 all5SUCCESS (4634server+8backupPASS/0FAIL/0SKIP). Stable-signed run40952680821 attempt2 passed compile/unit/lint, real capture and38Android activity/regression tests before pinned owner-key signing. Source Android tree1cd5eeeeff6c5746ba19792a297896286939370c. All other assignments and prior accepted native/media/push/auth results retained.

Ordinary guarded workflow40960468909 SUCCESS, Render dep-dbhrtk6gekts73c6api0 LIVE2026-10-29T21:51:07.566359Z exact69198a7c2d1b41d1d1dd24ddccf9cfb958dee8fa. Fresh public verification2026-10-29T21:52:13.104046Z: health ok:true/exact revision, public release.json exactly equals repository metadata and downloaded public APK byte-for-byte equals signed artifact. Android0.1.11-preview/code12/packagegr.myworkstation.chat.preview,3687436bytes/SHA256c796604a87c1fcd2634c7b220e1bd4ea1238048504a8a77b8f552668bcbbc082; pinned certificate17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97 independently matched. Real public browser shows0.1.11; selected-store page exposes exact explicit intent handoff, generic page remains generic. Evidence CHECKPOINTS/EVIDENCE/native-chat-first-entry-20261029/publication-verification.json and public-download-0.1.11.jpg. Official download https://myworkstation-app.onrender.com/downloads/chat-android/.

Technical usage now distributed: authorized SuperAdmin/Owner selects store -> Chat -> Share Chat/QR; employee follows store download link -> installs/updates -> returns to link -> Open Chat -> verified store/name/personal PIN. No PIN/token in link, no automatic replacement of an authenticated account. Employee connection is encrypted locally and automatically renews the same revocable chat-only session on resume/active use, with30day finite idle window. Explicit logout, current credential/role/employee/store/company/module checks remain authoritative; already-expired legacy12h token requires one normal login. General Owner/SuperAdmin/BackOffice session policy is unchanged by this slice. Older APKs retained.

This is TECHNICAL PUBLICATION, NOT functional/LAB/USER/whole-native PASS. No new manual PASS, no real PIN login/message/financial/stock/fiscal/provider/email action. Pending item remains ASSIGNED, not removed. Physical selected-store new install/return/Open Chat/PIN, same-signer update, app close/reopen connection persistence and operational revocation/idle-window acceptance remain AWAITING DEVICE; do not repeat earlier accepted media tests. Single next action: owner performs only these remaining phone acceptance steps; record actual scoped observation/manual/central closure afterward. This authoritative technical receipt supersedes older pending-engineering/publication wording for this slice only; no other owner's scope is closed.

29/10/2026 — CHAT-FIRST-ENTRY-01 / SOURCE CANDIDATE / NOT INSTALLED

Same owner codex/chat-first-entry-20261029. Before-source claim3273/head062cd0d7 passed exact documentation CI (classification/Windows checks success, runtime jobs correctly skipped) and merged4498b64b13a353a8a071a8bd3259b436ed56389f before source. Implemented selected-store sharing/QR in existing authorized chat panel, bounded explicit post-install Android intent handoff (visible only for supporting manifest versionCode>=12), strict noncredential store parser and existing directory/PIN screen with server store name. Authenticated session cannot be switched by incoming link; generic/manual/account paths preserved. Candidate native0.1.11/code12, public release.json/APK unchanged until signed delivery.

Employee-only chat connection uses30day finite rolling window, encrypted native token restore/renew on resume and foreground activity, same revocable session row and credential-stamp/current active employee/store/company/role checks plus paid Chat check on every authorization. Conditional GREATEST expiry update never clears revokedAt or renews expired/foreign rows; no PIN/password stored and no changes to general Owner/SuperAdmin/BackOffice authentication. Thirty days without successful online renewal requires sign-in; do not call this unexpiring authentication. Ordinary logout/PIN/role/employee/module revocation remain authoritative. Legacy already-expired12h token needs one normal PIN login after update. No financial/stock/fiscal/API key/provider/message/email or production action.

Local Node20.20.2 focused39tests:36PASS/0FAIL/3nativePGSKIP. Mounted decoded selected-store QR, explicit clipboard/share, store switch, generic/download-manifest compatibility and version-gated/no-auto-launch handoff pass. Actual JWT scope/window/current module refusal/conditional renewal tested. Frontend build passed previously onNode24; required Node20 build result is tracked next. Added native isolated PostgreSQL concurrent-logout/expiry/foreign renewal and actual Android activity first-entry/no-account-switch/encrypted lifecycle renewal tests; these MUST run unskipped in full/native CI, not yet verified. No Android SDK/JDK locally, no physical install/login acceptance. No manual/functional/whole feature PASS.

Exact fullPR/nativeAndroid/PG/mainCI, code review, ordinary guarded release and stable-signed APK/hash/manifest distribution remain REQUIRED. Do not release web handoff as a supported installed feature while old publicAPK0.1.10 lacks handler. Physical selected-store installation/Open Chat/PIN/reopen and expiry/revocation acceptance remains AWAITING DEVICE. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-chat-first-entry.md. Same owner retains assignment. Single next action: resolve exact full/native CI then signed/guarded release; no user confirmation needed for routine engineering continuation.

29/10/2026 — CENTRAL-BACKOFFICE-ACCESS-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Implementation continuation 29Oct: new personal accounts and per-store MANAGER/STOCKTAKER/AUDITOR capability subsets, hashed separate PIN/password, durable throttled personal login, current UserSession/grant checks and default-deny staff domain, minimal draft-count workspace and read-only existing cash-report projection. Owner administration is revision-checked/atomic with audit and session revocation. Existing count writer receives only one in-transaction staff-admission call; ordinary POS/Owner paths unchanged. Lifecycle extension retains grants on reset and keeps company/security records outside per-store ownership. Source prepared, NOT INSTALLED / AWAITING full native PR/main CI and exact ordinary deployment then scoped LAB. Local full suite4072PASS/0FAIL/299environmentSKIP; final focused51PASS/0FAIL/3nativeSKIP; frontend/TABLE_SERVICE and server preparation PASS on Node24.22.1 (repository Node20 CI still required). Added native HTTP/session/FK/catalogue/count/replay/late-revocation/control tests, not yet executed locally. No production account, privilege, schema command, financial/stock posting or new manual/LAB PASS. Pending: actual named people/store assignments, native acceptance, deployed revision, grouped LAB UI/login/role proof; broadened manager writes/cash-review mutations are NOT enabled. Retained owner feat/central-backoffice-access-20261029.

Owner: Rizareio readiness conversation, branch feat/central-backoffice-access-20261029. Explicit owner instruction: personal username/password/PIN and rights for owner, responsible manager, stocktaker and auditor; MUST be central for all companies/stores, not a Rizareio exception. New expanded requirement, not reopening accepted Gate8 POS behavior. Historical Gate8 PASS and all retained owners remain protected.

Read-only evidence: User has existing password/session/MFA and roles; StoreOperatorProfile already has username/backofficeAccess/menu flags, but these do not establish complete independent delegated BackOffice login and server-enforced stocktaker/auditor scope. Current store screen confirms3PIN/3cards, no pendingPOS, terminalOFFLINE; no production grant/user/session/financial/stock change performed. New delegated flow is NOT TESTED/NOT INSTALLED.

Scope: additive central delegated BackOffice account administration, own personal identity, explicit active same-company store grants and named manager/stocktaker/auditor capability profiles, current database policy enforcement/revocation and audit. Keep existing Owner/SuperAdmin/MFA and POS credentials/login behavior intact. Reuse User/UserSession password identity; no role-name elevation, inherited Owner support context, generic company-wide staff fallback or trust in client menu flags. New dedicated staff workspace must show only granted operations and reject unknown/foreign/unauthorized routes server-side, including direct API calls and object-ID references. Personal PIN stays hashed and separate from password; no secret in ordinary account lists/audit. Provision actual people/credentials only when their identities/store assignments are specified, never invent account privileges.

Before runtime edits: reconcile complete active/tracker/pending/manual and auth history, publish this claim green/main. Bounded source plan: NEW staff-access service/policy/routes and shared capability contract; additive runtime schema bootstrap using existing migration conventions only after lifecycle classification review; narrow authenticated middleware hook and route/bootstrap mount; additive existing user-admin entry and dedicated staff workspace/login routing; focused real HTTP/isolated PostgreSQL/browser tests. Existing inventory and cash financial writers, retained main session boundary, StoreCloudPage, POS/fiscal/printing/scanner/dispatch/provider implementations are not taken over; integration must reuse them through explicit least-privilege admission. Any necessary expansion gets a separate before-source checkpoint.

Required acceptance: owner own-company visibility; stocktaker count-only with finalization separately denied by default; auditor reports/review only with transaction/stock/settings writes denied; manager explicit actions and stores only; cross-company/cross-store/object-ID/unknown-route refusal, stale-session/demotion/disabled-user/grant withdrawal immediately refused, password/PIN isolation, immutable audit and UI stale-store cancellation. Full PR/main CI and ordinary guarded exact deployment, then isolated LAB account/role acceptance before production rollout. CI is not functional LAB PASS. No real store sales/card charges/stock finalization, employee setup, module/license activation or permission grant for evidence.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-29-central-backoffice-access.md. Single next action: complete green/main claim, then implement one bounded central account/admission slice. This owner retains scope until completion or named handoff.

29/10/2026 — CASH-AUTOMATIC-AUDIT-12 / HISTORICAL BEFORE-SOURCE CLAIM - SUPERSEDED BY LIMITED RECEIPT

Retained owner codex/cash-chat-reconciliation-20261026; planned branch feat/cash-automatic-audit-20261029. Explicit owner request: implement automatic cash investigation instead of requiring manual confirmation for every shift. Latest clarification: unresolved issues remain OPEN in the report; they are not automatically resolved and do not require all other work to stop. No Estia store creation, mapping or blanket historical discount approval. Baseline4498b64; existing limited native/external-input PASS preserved. 29Oct read-only LAB observation: one closed LAB POS2 row initial shortage9.40EUR/card0/pending1; manual email preview refused unreviewed shift. No financial/review/setting/email action was executed. That observation is not a whole-workflow FAIL/PASS.

First bounded causal slice after THIS claim green/main: automatic read-only arithmetic and immediate handoff assessment from current scoped original shift fields plus bounded ledger; distinguish calculated result from manual review and unresolved evidence. Recompute opening/closing operational sums, cash sales/expenses/transfers, expected cash, declared variance, separate card/EFTPOS arithmetic and explicit IRIS ambiguity; missing/unknown/stale/conflicting or overflowing facts stay unresolved, never become zero. Compare only real same-company/store/terminal immediate predecessor/successor; equal opposite amounts alone never prove a counting error or authorize allocation. Existing explicit verified OFFSET/CONFIRM/revoke history and original sourceHash/planHash/financial ledgers stay protected. Expose the automatic result and open issues in the same canonical prose/copy/export/strict automatic DTO. Open document/event/card/identity questions remain visible; numerical calculation is not employee debt or forged human approval. No fabricated reviewer signature.

Exact source scope: NEW server/src/services/cash-automatic-audit.js; existing cash-reconciliation-source.js only additive original-field snapshot/automatic evidence, cash-reconciliation-report.js only read-only automatic assessment integration/prose/hash; cash-reviewed-automatic-contract.js only strict optional safe DTO; cash-reviewed-email.js only current-source provisional readiness retaining existing recipient/consent/preview/fingerprint/transport gates. NEW server/test/cash-automatic-audit.test.js; additive server/test/cash-reconciliation-report.test.js, cash-reviewed-email.test.js, cash-reviewed-automatic.test.js, cash-reconciliation-postgres.test.js and cash-reviewed-automatic-postgres.test.js only actual new assessment/native source regression. No generic cash-control writer, auth, schema, migration, fiscal/provider/stock/invoice, dispatch/scheduler/settings or permission changes. Existing native fixture SQL/mounted archive harness may be read, but edits beyond these paths require a new before-source amendment.

Required proof: balanced and nonzero exact ledger arithmetic, transfers/expenses/reversals, IRIS separation, missing values and overflow, real next shift/open/overlap/foreign/delivery chain, unchanged cash/cards/manual reviews, no automatic offsets from equal amounts, scoped open issues surviving export/DTO/mail, stale source and identity refusal; unskipped native PostgreSQL source and unchanged originals/control. Full exact PR/main CI and normal guarded exact healthy release before scoped measured LAB. CI is not LAB PASS. Each state-changing LAB action needs prepublished baseline, no accepted sale/review replay. Actual new source and LAB are NOT TESTED.

Remaining subsequent slices stay OPEN with this same owner: full telecom/Netlink original-source reconciliation, safe/refill/deposit/document proof, trustworthy automatic counting-error allocation where evidence exists, persistent per-issue closure/continuation, complete real-store/business/email acceptance. This claim does not silently certify all five owner requirements or enable mail. Single next action: publish this before-source claim green/main, then implement the bounded source.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-29-cash-automatic-audit.md.

29/10/2026 — CHAT-FIRST-ENTRY-01 / FIRST SETUP, STORE SHARING AND PERSISTENT CHAT LOGIN / ASSIGNED BEFORE SOURCE

Owner codex/chat-first-entry-20261029. User explicitly requests implementation: easiest selected-store QR/link setup, Super Admin sharing for each store, Owner sharing only own stores, and staying signed in. Independent new onboarding/session-renewal slice; prior native media/push/signing/2FA/role/tenant/revocation PASS retained. Existing native owner retains all other scopes. No accepted tests repeated.

Bounded source: NativeChatDownload/StoreChatPanel and existing Platform selected-store entry only sharing; public Android download page only scoped post-install Open Chat; new validated native store-entry helper + MainActivity/manifest entry wiring; existing chat-only employee session issuer/authorization and store-chat route only bounded revocable rolling session renewal, Android encrypted token renewal/restore only. No POS/financial/invoice/stock/business writer or general BackOffice authentication changes. Never store PIN/password or put credentials in links. Incoming links cannot silently replace an authenticated session. Employee active/store/company/role/credential-stamp/session revocation/module checks stay mandatory. Long-lived chat-only connection with finite idle window and explicit logout/revocation preserved; no unexpiring general access token. Owner/SuperAdmin general session extension is not included without separately scoped auth review.

Required before release: strict URI/tenant/stale-account tests, actual mounted share/QR and download/no-auto-launch tests, native Android unit/lint/build/emulator setup/session regression, server native HTTP/session expiry/revocation/concurrent renewal/logout tests, exact full CI/main and ordinary guarded release, stable-signed APK update/hash/manifest verification. New first-install and stay-signed-in device acceptance NOT TESTED; no feature installed/PASS from this claim. Current source0.1.10 stores connection encrypted but employee JWT expires12h. Generic download QR loses store context. Claim checkpoint CHECKPOINTS/CHANGES/2026-10-29-chat-first-entry.md. Single next action after green/main claim: implement bounded flow; no runtime or production state change yet.

29/10/2026 - CITIZEN-LABEL-RASTER-01 / EXACT TECHNICAL RELEASE / AWAITING PHYSICAL DIRECT PRINT

Retained owner codex/canon-lide400-scan-diagnostics-20261027. Source PR3272 exact final head2791de176bf037f69c0b72b2b4fb923eae021cd0 passed all5jobs CI40946967154/job123705252065:4573server+8backup PASS/0FAIL/0SKIP, including actual Chromium raster test ok2488. Expected-head squash merged750c2564909c3bcdfedb512a1359d8f8480048fc; exact merged-main CI40948773878/job123711762714 also all5PASS with4573+8/0FAIL/0SKIP. Production source blob44b8325ceae0169f9bf8a17c2356be171b68b17a and test blobb2629ce85b7d7786f946dfdddcac728533a2acdc match the locally inspected source and remain unchanged through the released descendant. Prior fixture failures and their corrections below remain historical evidence, not hidden or counted as PASS.

Concurrent chat/cash source changes advanced main before deployment. Runs40950621543 and40952039222 correctly declined stale revisions; their successful workflow status with SKIPPED trigger/wait was NOT a deployment. No guard bypass or rollback was attempted. Actual released descendant ce5ec3a6b37c3844aa57298a88a787ed05ec1def includes750c2564 with no EAN renderer/test changes. Its exact full mainCI40953041609/job123730421994 passed all5jobs:4606server+8backup/0FAIL/0SKIP, actual raster Chromium ok2514. Ordinary guarded deploy40955679300/job123735152996 executed freshness/fullCI guard, rollback checkpoint, actual pinned trigger21:13:06UTC and exact healthy ce5ec3a6 at21:15:11UTC. Other owners and their acceptance scopes remain retained.

Independent public read29Oct21:26:17.785453UTC: /api/health HTTP200/oktrue/revisionce5ec3a6b37c3844aa57298a88a787ed05ec1def. Canonical /platform-admin and public asset chain were read without authentication/business writes. Served /assets/entry-jBtu4Mnk.js2799642bytes/SHA25647192298ed1cb220bc1da08d08965328ff6b4cb70916eb99cd1464e6fd88c7f2 contains all3 markers labelReady, PNG_UNAVAILABLE and «Η ετικέτα είναι έτοιμη για εκτύπωση ως εικόνα.». This proves released web source, not authenticated UI or Windows/native physical printing. Later main documentation/source is not falsely identified as the measured deployed revision.

The common two existing label paths now prepare one locally decoded PNG before enabling explicit print, preserving configured mm sizes, valid EAN and store settings/permissions/Audit callers. No automatic print or new business/financial/stock/fiscal/native-scanner writer. Local Node20 actual Chromium, normal and packed modes, checksum/isolation, minified initializer, frontend build and one-image/one-page PDF geometry were checked; these are engineering tests only. Native OS/browser-menu printing is not claimed to be application-controlled.

Authoritative hardware scope: the earlier owner-confirmed scanner installation followed by actual scan and the CITIZEN Acrobat Print As Image/80x40/Actual size/one-copy physical output plus normal stop remain limited USER PASS. Earlier direct Chrome/Edge blank continuous feed is the pre-fix USER FAIL. NEW direct MyWorkStation raster output remains NOT TESTED/AWAITING USER; no new hardware/manual PASS, whole setup or Gate closure. Existing manuals/PASS claims stay limited to observed routes. Reboot/Startup/new pairing/physical multipage/actual Super Admin setup-screen verification and printed-barcode hardware readback remain separately NOT TESTED. No accepted scan, Acrobat print or financial action is repeated for paperwork.

Single next action: on the owner's Windows PC with CITIZEN CT-S310II (TZ30-M01/CT-S310IIETEBK), close the old preview, refresh the app and open the existing LAB NEPO500ML/5201219000118/0.50EUR label.

First verify the new ready-as-image message; then one explicit direct print using the already tested driver80x40 form, one copy/100%/no margins. Observe actual content and normal stop; barcode readback only when a reader is available. Stop a blank continuous feed rather than repeat. No sale, payment, invoice submission or stock mutation is required or authorized by this print acceptance. Owner retains this assigned independent regression until actual acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-citizen-label-raster.md.

29/10/2026 - CITIZEN-LABEL-RASTER-01 / ASSIGNED BEFORE SOURCE / DIRECT PRINT USER FAIL

Owner: retained device-setup conversation codex/canon-lide400-scan-diagnostics-20261027; bounded regression branch fix/citizen-label-raster-20261029, explicitly requested by owner «ΞΕΚΙΝΑ ΤΗΝ ΔΙΟΡΘΩΣΗ». Existing EAN-13 scope was closed; this reopens only the new CITIZEN direct-print failure, not tenant settings or other barcode work. Other owners, including StorePosPanel, remain unchanged.

29Oct Windows user evidence: setup dialog/download/helper installation completed; user reported real scan «ΕΙΝΑΙ ΟΚ» after install. Printer settings opened Windows, official Citizen driver installed, Windows test page printed. Physical label identifies TZ30-M01 / CT-S310IIETEBK, queue CITIZEN CT-S310II; user confirmed continuous 80mm roll. Direct Chrome and Edge output, including custom 60x40 and80x40 forms, repeatedly fed blank continuous paper: USER FAIL. PDF content independently inspected as one roughly60x40mm page. Adobe Acrobat Print As Image, driver MyWorkStation-80x40, Actual size, one copy printed NEPO500ML /5201219000118 /0,50EUR. Owner photo shows content; «Μόνος του κανονικά» confirms normal stop. Scoped physical USER PASS only for that Acrobat route, not browser fix or barcode scanner readability. Exact physical terminal/installed driver hash/deployed client revision at test not independently recorded. Reboot/startup, new pairing, physical multipage and Super Admin setup screen remain NOT TESTED. No financial/stock PASS or replay.

Source plan after claim main: only client/src/utils/ean13-label.js plus NEW focused server/test/pos-ean13-label-raster.test.js (and isolated browser fixture if needed). Render existing validated EAN/store/product/price into one bounded local raster image, wait for complete rendering before explicit print, refuse rendering errors without vector fallback. Preserve shared API, configured mm sizes, checksum/95 modules, selected-store settings/permissions/Audit and existing preview fields. No StorePosPanel, scanner/native installer/API/schema/auth/settings/financial/fiscal changes. Acrobat success motivates a raster candidate; it does NOT prove the driver cause or browser hardware success.

Preserved: earlier EAN isolation200/403/403, negative checksum, Greek text/price and two callers; all old scanner/setup/POS PASS. Checkpoints2026-09-27-pos-ean13-label-print.md,2026-09-27-ean13-label-isolation-final.md and2026-10-28-easy-device-setup.md/manuals read. Current main history through86a5b5b inspected; label renderer unchanged in retained history. Public health read29Oct returned ca58f2fa81261c02871f11c471c9d2552bc2009b/oktrue; exact user-test client revision unknown.

Required before user testing: local actual browser raster/text/barcode/geometry/no-auto-print/error checks, retained checksum/isolation regressions, frontend build, full PR/main CI and ordinary guarded exact release. Candidate remains AWAITING LAB until one direct MyWorkStation label physically prints and stops, then actual barcode readback. No repeat of accepted scan/Acrobat print merely for documentation. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-citizen-label-raster.md. Assignment retains this owner until completion or named handoff.

28/10/2026 — DEVICE-SETUP-EASY-01 / TECHNICAL RELEASE / AWAITING REAL INSTALLATION AND PHYSICAL LABEL ACCEPTANCE

Before-source owner/claim3247 remains codex/canon-lide400-scan-diagnostics-20261027. Source PR3248 exact head c1f096cb623d1739ab74a367996633b6e637d39f passed all five full-CI jobs40693419547/job122834388053:4459 server and8 backup tests,0FAIL/0SKIP, including actual desktop/narrow Chromium setup-dialog test ok890. Windows40693419550/job122833786560 passed actual worker BMP/JPEG/HTTP, native helper compilation/isolated fixtures, and reconstruction/hash/source check plus execution of THE EXACT public pinned binary (log13:08:13Z: Exact published helper integrity and isolated Windows tests PASS). Expected-head merge produced0418582ec5a1c1c5be8fb0401a98065191a72823; independently matched merged tree90860a12f7965e90f8eeb0075768bb980ac37042 to reviewed tree. Concurrent printable-support guide and retained cash source are preserved. Native artifact provenance and earlier failed csc-path attempt remain in the source checkpoint, not silently replaced by final PASS.

Exact merged-main CI40695210978/job122840536616 succeeded with all5jobs,4459server+8backup tests,0FAIL/0SKIP, including actual setup Chromium ok890. Ordinary guarded release40696733563/deploy job122845546427 succeeded: exact full-CI/freshness preflight, actual pinned trigger at13:29:47Z and healthy exact0418582ec5a1c1c5be8fb0401a98065191a72823 at13:32:10Z. No manual deployment or safeguard bypass.

Independent public verification at2026-10-28T13:34:11.664Z used the actual client fetchDeviceSetup helper against public production URLs (curl transport mapped to normal Response) and verified23requests (manifest+22parts), each part and final executable SHA256/MZ/size:45706240 bytes,ad94ae0b2432eba49e60b4ede8572910db9b763ce33afba83b5378d4344faf14, filenameMyWorkStation-Scanner-Setup.exe. Before/after /api/health both HTTP200,ok=true,exact0418582e. Public main-B_KKoo0M.js350263bytes SHA256e248031869543aaab5ac0ea7e79c28e97330e52bd5420d4a66fbc227256ae3db contains the scanner/setup launcher, executable name and Windows printers URI; public entry-Bb67ZlHt.js2766297bytes SHA256cab13dd1cc8f009a71b7f02c86c3f34e2a4ba84065628b3662d244780d543148 contains the existing selected-store label settings with its printer setup launcher. This is deployed-source/asset integrity evidence, not authenticated actual UI, browser-native download permission, native installation or hardware PASS.

TECHNICALLY INSTALLED / AWAITING USER: scanner intake offers Εγκατάσταση σαρωτή / εκτυπωτή; selected-store Super Admin label settings offer Εγκατάσταση εκτυπωτή καρτελακίων. Explicit download produces one .exe; the operator opens it and chooses installation or official Windows printer settings. Scanner installation preserves existing CurrentUser pairing; a running old connector must be closed once before installation. Existing paired working scanner does not need repeated pairing, invoice upload or payment to prove this release. If a refresh is needed to receive the new UI, first preserve/finish unsaved selected pages; do not discard an in-progress invoice.

Remaining acceptance: actual Windows installation/startup/pairing persistence, real scanner operation after install, real printer/official driver selection and correctly sized physical price-label output. These remain NOT TESTED; no new USER/LAB/manual PASS, no automatic driver installation, print, scan, label-setting write, invoice/payment/stock/fiscal/auth mutation or Windows trust-policy bypass. The helper remains unsigned and normal organization/Windows policy applies. Existing one-page Canon/header/preview USER PASS and prior tested multi-page-control fixture remain protected, without claiming independently observed physical2–5page acceptance. No repeated invoice/payment or accepted transaction is authorized merely for evidence. All other owners remain retained. Older AWAITING RELEASE/distribution statements below are historical and superseded only by this technical release receipt. Same owner retains DEVICE-SETUP-EASY-01 for the single next action: actual operator installation and physical-device acceptance.

Checkpoint CHECKPOINTS/CHANGES/2026-10-28-easy-device-setup.md.

Receipt reconciled over concurrent cash-display main6bbf006742e15aeb6f5492af68bbc4ee12c2801a; its source/tests/checkpoint and all retained claims are preserved unchanged. Cash source has its own exact CI/release acceptance; this documentation-only receipt does not attest to it or require re-running any transaction.

28/10/2026 — DEVICE-SETUP-EASY-01 / TESTED WINDOWS PACKAGE PINNED / AWAITING EXACT RELEASE AND USER ACCEPTANCE

PR3248 retains the before-source owner/claim3247. Native source b71e67220200d421de90766e18020ee2fb2d81dc passed Windows40690717370/job122824482633 including real embedded extraction/reuse, temporary Windows shortcut, preserved pairing, rollback/refusal checks and an actual small-form layout fixture. Full CI40690717465 also succeeded. Initial Windows csc path failure40689193481 was corrected without reducing assertions; intermediate40689857666 passed. Final artifact12817710443 outer ZIP45499744 bytes SHA256 9b524b2a81de94567d5deab546599972fff8debbd9c894ee91d07b6c43a29432 was downloaded and CRC/hash checked. Its executable45706240 bytes SHA256 ad94ae0b2432eba49e60b4ede8572910db9b763ce33afba83b5378d4344faf14 matches native Git blob146bf6e8b0fd40b126f0e1f0e0c154fe943b5682 and unchanged scanner sources. It is now pinned under client/public/downloads/device-setup/v1 as22 bounded parts plus manifest, assembled/verified into one .exe by the explicit in-app download. Final Windows CI MUST reconstruct and execute this exact pinned binary, not merely test a fresh build.

Local Node20 regression10PASS/0FAIL/0SKIP, including real Chromium desktop/narrow native-dialog focus/Escape/viewport/reachability/no-auto-fetch, mounted store-change cancellation, byte/hash/size/URL refusal and original scanner/preview/label PUT behavior. The browser test found content-box dialog overflow; box-sizing and native close/focus restoration were corrected before publication. No native source changed after the pinned artifact. Exact final PR/mainCI, normal guarded deployment and public manifest/part verification remain required before requesting user testing. Earlier SOURCE CANDIDATE/BINARY DISTRIBUTION PENDING entries are historical, superseded only for artifact availability by this record.

AWAITING USER: real current-user installation/startup/pairing preservation and actual scanner operation; printer device/official driver selection plus price-label output on the physical printer. CI is not hardware PASS. No automatic print, driver download, scan, label settings write, invoice/payment/stock mutation or security bypass. Installer is unsigned; normal Windows/organization trust policy remains. Accepted one-page Canon/header/preview and all other retained owners remain protected. Keep this independent setup item assigned to codex/canon-lide400-scan-diagnostics-20261027 until acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-easy-device-setup.md.

Reconciled over concurrent INSTALL-SUPPORT printable-guide main3c49a9cf542a0e3fd40073fce460ffcb5a41cb19; all its source/evidence and prior cash scope preserved unchanged. Final exact-head gates are rerun after reconciliation.

28/10/2026 — DEVICE-SETUP-EASY-01 / SOURCE CANDIDATE / BINARY DISTRIBUTION PENDING

Retained setup owner codex/canon-lide400-scan-diagnostics-20261027. Before-source claim3247/head69837c1828d65a43c97f9fbdb3ad437262e7ad22 passed applicable docsCI40686731517 and mergedadfd46ba130f913b6b8c68865a91eb725df239b4 before source. Concurrent cash source0e79b515 is preserved; no retained cash/install-support/lifecycle/fiscal/label writer edited.

Candidate: native generic Windows helper embeds the existing published scanner, validates SHA256/manifest/ZIP paths/counts/sizes, stages an immutable per-user version, preserves root pairing, updates only the per-user Startup shortcut and requests worker start after explicit install. Prior pointer/version is restored on startup failure. An open existing connector must be closed before installation; no forced process kill, elevation/security bypass or automatic scan. Printer choice opens official ms-settings:printers for normal user-directed Windows device/driver addition, never automatic print/settings save or arbitrary driver download. Installer self-tests use actual temporary shortcut creation, real embedded extraction/reuse, pairing preservation, simulated rollback, traversal/reserved-path/checksum/size refusal and injected printer launch, with no real Startup/hardware action.

Web candidate adds explicit setup launchers in the existing scanner and Super Admin label-settings controls only. A local dialog explains the two paths, requests a fixed-origin bounded manifest/parts only on click, verifies each SHA256/size and final executable digest/MZ before producing one .exe download, cancels on close/store/disabled/unmount and never claims installed from download. The Windows URI is explicit; unavailable Windows/browser/driver support is not readiness. Existing label dimensions/printerName/PUT and scan/pair/run logic remain unchanged. No server/API/schema/role changes.

Local actual Node20:5 setup tests PASS/0FAIL/0SKIP (streamed excess/corruption/unsafe URL/count/abort, unchanged executable bytes, mounted no-auto-download/store-stale/close and label selected-store PUT preservation); existing scanner mounted regression1PASS; preview/real-control five-page/actual Chromium4cases tests3PASS. Actual Windows compilation/helper isolated tests, full exact CI and public distribution are still REQUIRED. No native install/driver/price-label print or new hardware PASS.

The public pinned generic executable/manifest parts are NOT YET added: do not merge/deploy a download button pointing to an unavailable package. Obtain the tested Windows artifact, verify native source Git blobs and executable hash/size, add bounded public parts and manifest, then rerun Windows (including the exact published executable) and full PR/mainCI/normal guarded release. The helper is not Authenticode-signed by this workflow; existing Windows/organization trust policy stays authoritative, no bypass instruction. Real operator installation/pairing/driver/label output acceptance remains OPEN. Other owners and accepted scanner/header/preview remain protected.

Checkpoint CHECKPOINTS/CHANGES/2026-10-28-easy-device-setup.md. Same owner retained until actual acceptance or named handoff.

28/10/2026 — DOCUMENT-SCANNER-PREVIEW-01 / LIMITED USER PASS / COMPLETED

Following the delivered preview and explicit request to inspect the selected image and try zoom, the owner confirms "ειναι οκ". This closes ONLY the reported on-PC image preview/zoom acceptance, alongside the prior Canon LiDE400 one-page intake/correct-header USER PASS. This is owner confirmation without a new screenshot, measured geometry, exact zoom level, physical terminal/store/operator/shift/time or independently captured installed/client hash. Do not convert it into full OCR/product-line/cross-supplier, physical2–5page, all-model/device, install/reboot or financial/stock PASS. No scan/payment/replay was requested to complete this record.

Delivered source3242/main79b251496211f00830f16f2ef95703111e408405, exact PR40676116060 and main40677458915 final attempt2 green4439server+8backup/0FAIL/0SKIP. Main's browser-startup timeout and unchanged job-only retry remain qualified in the earlier receipt. Normal guarded release40679299748/job122785691616 exacthealthy79b25149 and independent public health/lazy-entry proof preserved. Receipt3244 merged864bb5c3; fresh mainc8645d7b differs only by the retained cash-events claim. No runtime/business action in this PASS receipt.

Manual docs/manual/document-scanner/PASS.md gains the confirmed local preview usage and boundaries. Current preview AWAITING USER is superseded; completed preview residual is removed from pending. No repeat of the accepted scanner/header/preview flow for evidence. Broader capture/native/installation/physical multipage scopes and other owners remain OPEN/protected. Retained owner codex/canon-lide400-scan-diagnostics-20261027 takes the separately bounded user-requested device-setup slice below; no handoff or whole Gate closure.

28/10/2026 — DEVICE-SETUP-EASY-01 / ASSIGNED BEFORE SOURCE

Explicit user requirement: installation must be easy from buttons inside MyWorkStation for document scanners AND price-label/tag printers, rather than ZIP/manual-file instructions. Receiving independent setup owner codex/canon-lide400-scan-diagnostics-20261027; future branch feat/easy-device-setup-20261028. This is packaging/setup presentation only, not a transfer of retained INSTALL-SUPPORT profiles/lifecycle, KAT StoreMode activation, RBS/FTEXT/fiscal/production-ticket routing or label permissions/format/financial writers. Existing StoreLabelSettingsManager has size/name configuration and explicitly relies on the normal Windows/browser print destination; no model/driver is independently identified. Keep those settings/gates unchanged.

Exact scope after THIS claim is green/main: NEW tools/windows-device-setup/Setup.cs, README and isolated Windows installer self-tests; existing .github/workflows/document-scanner-windows.yml ONLY additive packaging/test of the native helper from its already tested scanner publish. NEW client/src/components/store/DeviceSetupPanel.jsx and NEW client/src/lib/device-setup-download.js; existing DocumentScanButton.jsx ONLY setup launcher (normal scan/pair/run logic unchanged); existing client/src/components/platform/StoreLabelSettingsManager.jsx ONLY explicit setup launcher (same scoped save/dimensions/printerName/role contract). NEW focused server/test/device-setup*.test.js. NEW pinned generic binary distribution under client/public/downloads/device-setup/ with manifest/SHA256/size and bounded parts if needed, populated only from verified Windows CI. No server/index/API/schema/auth/production settings or other retained source edits.

Contract: one downloaded native Windows helper, no ZIP extraction or PowerShell commands for the operator. Per-user scanner install/startup with existing DPAPI pairing preserved, one-time existing pairing kept, no automatic scan/upload/payment. Printer button opens the official Windows Add Printer flow for user-selected installed/vendor-supported driver; it cannot silently identify/install arbitrary models or mark hardware ready. Existing MyWorkStation label settings/normal print selection stay authoritative. Generic executable/payload contains no store credentials, pairing records, private document/image or user config. Validate embedded ZIP paths/sizes/integrity before writes; stage/version installation safely, preserve prior working setup on failure, bounded explicit handling of an already running connector, no admin/security/ExecutionPolicy bypass or arbitrary command/URL. Public download is generic code only; no tenant information.

UI: explicit install/setup choices, readable progress/error, no download/native launch on mount, source/store/unmount cancellation and no false installed/PASS from a download. Same-origin pinned assets, bounded counts/size, digest verification before final download, no arbitrary URLs/redirects, no secrets or credentials. Existing data selections must remain untouched. Native helper cannot change application payment/label/settings or print without an explicit user action.

Required: actual Windows compile/extract/manifest/path traversal/oversize/refusal/rollback/pairing-preservation/install/update/shortcut fixture tests with no real user Startup or hardware action; existing real loopback connector tests; actual mounted button/store/cancel/download-integrity/no-business-call tests and retained label/scanner regressions. Full PR/mainCI, normal guarded exact release and verified public binary before new actual Windows installation/driver/label output acceptance. No driver/model or production installation PASS from CI. Current capture preview/header PASS protected. Single next action after claim merge: implement this bounded helper and launchers; physical scanner/printer setup and price-label output remain AWAITING USER until tested. Other owners retained.

28/10/2026 — CASH-KIOSK-IMPORT-11 / LIMITED ACTUAL XLS INPUT–REPORT–EXPORT–REVOKE PASS / REMAINDERS OPEN

Retained owner codex/cash-chat-reconciliation-20261026; docs/cash-kiosk-lab-pass-20261028; parent #3243 remains OPEN. Actual authenticated desktop Platform SuperAdmin Χρήστος Μάνης, only ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ/cmtpopbgo000trhb5ng9ytiru,DAY27Oct00:00–23:59 Greece. Observed28Oct17:22–17:31UTC; receipt 2026-10-28T17:33:59.534117+00:00. Source #3261/head48bcaa7/main dfd5183 fullPR40719599122 attempt2/job122935825851 and exact main40723862270 attempt2/job122956649792 each4509server+8backup/0FAIL/0SKIP. Newer invoice source ac5850c0d9c5e5b170500badded0a9cb10537b19 preserves all eight cash runtime blobs, fullCI40729155657/job1229620619034539+8/0FAIL/0SKIP including unskipped native original/replay/role/lifecycle/control test. Normal guarded40731246705/job122968066948 SUCCESS,exact healthyac5850c17:11:51.511UTC. Baseline #3263/head02ccf3af929b5abde30379f93d3b68651aa1e917 docsCI40734419214 SUCCESS merged a474c553e184ddaeb8ce1017682813bfe4c8ce49 BEFORE first input. Every input/revoke has a recorded BEFORE and AFTER observation below. Earlier candidate/awaiting-LAB entries for THIS bounded input/prose/export/revoke flow are historical and superseded by this limited result, not by a global finance PASS.

Receipt reconciled over concurrent documentation944dfad199eda08a6ecb0ae72d461c5ab6466446. Its installed POS/invoice receipts and new invoice-email-preview claim are preserved through a clean three-way merge; no shared runtime or another owner’s source was edited.

Actual synthetic original XLS flow:0→1(events sequence1,incomplete report)→2(journal sequence2 with explicit LAB-436/LAB_KIOSK_28OCT binding). File selection alone did not import; explicit attestation/submission required. Full pair produces exactly one zero-price sold line for LAB KIOSK IMPORT 20261028,27/10/2026,21:09:17 Greece,qty1,retail2EUR/final0EUR/reduction2EUR,transaction865001,explanation/disposition/camera request. Separate price event has no invented quantity/transaction/application and retains exact “Δεν επιβεβαιώθηκε εφαρμογή της αλλαγής στις διαθέσιμες πωλήσεις”. Changing to N40 CONTROL20261010 and refreshing shows0sources/0closed shifts/0cash-card differences/no external section; returning/reloading LAB retains both sources and same findings. This proves observed UI scope/persistence, not the complete tenant/role/hardware matrix.

Actual copy and downloaded6-sheet XLSX contain the same1198characters of canonical prose. Verified archive row native shift a3494bb3-61cf-447c-9707-27311f35708c:initial/offset/residual cash0,card0,unreviewed financial totals blank; employee/day reviewed sheets remain headers only. Informational2EUR reduction never becomes cash debt,card difference or native employee allocation. Native1shift,original shortage0/surplus0/POS–EFTPOS0,pending1 excluded reviewed totals stay unchanged throughout. Explicit analysis-only revocations,each with reason/confirmation and before values,produce2→1(journal removed,incomplete)→0(events removed,no external section). Final fresh list0rows/0alerts,review amountblank/counting checkboxfalse,report restored to native baseline. No original/history deletion; actual UI eligibility is observed, original-byte retention is independently proven by unskipped native PostgreSQL CI rather than a hosted original-download test. Final synthetic files are not active in analysis.

Evidence CHECKPOINTS/EVIDENCE/cash-kiosk-imports-20261028/:input-manifest.json and two exact originals already published in baseline;source-ci-receipt.json;lab-observations.json;copied-report.txt;actual lab-reviewed-export.xlsx and export-verification.json;lab-report.jpg(before cleanup) and lab-cleanup.jpg. No private real-store upload,sale/return/VOID/discount/shift close/review/offset/stock/fiscal/provider/setting/permission/email action. Native sale/IRIS counts,physical cash/stock quantities/movements and independent hosted generation numeric value NOT TESTED; no financial delta inferred from absent measurements. Hosted acceptance covered actual original XLS inputs and real XLSX export; XLSX input,resource/DST/role/duplicate/tamper matrices have parser/native CI proof,not a claim of every hosted scenario. Existing native6bbf006/month13shifts8.90EUR limited PASS remains protected and unreplayed.

Completed parser/input/prose/export/revoke pending slices10/11 are removed from PENDING_WORK in this same receipt; manual docs/manual/cash-control/PASS.md and central PDF synchronized. Still OPEN with the same cash owner: exact historical Estia approved transactions and actual MyWorkStation store mapping (no blanket beer/chocolate/BLU exemption),real trusted-promotion/water evidence and full actual business/report/email acceptance. Existing dispatch readiness/recipient/consent rules and withdrawn preview-first requirement are unchanged; no automatic-email settings enabled and no message sent. The older global financial workbook and other financial residuals are not closed by this slice. No other writer ownership transferred. Single next action for #3243: retrieve/verify exact prior Estia cases/store identity before any new exception mapping; do not repeat accepted synthetic/native transactions. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-imports.md.

28/10/2026 — CASH-KIOSK-IMPORT-11 / EXACT RELEASE AND BEFORE-ACTION LAB BASELINE / AWAITING ACCEPTANCE

Retained owner codex/cash-chat-reconciliation-20261026; docs/cash-kiosk-lab-baseline-20261028; parent #3243. Source #3261/head48bcaa7 merged dfd518392f501c0aee3257ccd2a8bc7598039b99 after full PR40719599122 attempt2/job122935825851:4509server+8backup/0FAIL/0SKIP. Exact main40723862270 attempt2/job122956649792 also4509+8/0FAIL/0SKIP. First PR attempt had three unrelated Chromium startup failures, and first main attempt was cancelled; no assertions/code were weakened for either retry. Native Kiosk original/replay/role/lifecycle/control test ran unskipped. Concurrent invoice main ac5850c0d9c5e5b170500badded0a9cb10537b19 preserves all eight cash runtime blobs, passed full40729155657/job122962061903:4539server+8backup/0FAIL/0SKIP. Normal guarded40731246705/job122968066948 succeeded, exact healthy ac5850c at2026-10-28T17:11:51.511Z, independently confirmed public health. Obsolete df-target run40729436750 was cancelled at17:05:35UTC through authenticated GitHub UI while still fetching repository, before guard/trigger/production action, releasing the normal queue. No force deploy, rollback, workflow/config/security change. Evidence CHECKPOINTS/EVIDENCE/cash-kiosk-imports-20261028/source-ci-receipt.json and stale-deploy-cancelled.jpg.

Before-action baseline recorded 2026-10-28T17:15:43.922128+00:00: authenticated Platform SuperAdmin Χρήστος Μάνης, desktop cloud Chrome/platform-admin, only synthetic ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ store cmtpopbgo000trhb5ng9ytiru, DAY2026-10-27,00:00–23:59 Greece. Newly reloaded actual UI shows1existing closed LAB POS2/MAIN shift22:48–19:24, original shortage0EUR/surplus0EUR/POS–EFTPOS0EUR, no undocumented expenses,1pending excluded reviewed totals,0displayed active Kiosk sources and no external-source report section. Report/review fields blank, counting checkbox false. Separate N40 CONTROL20261010 same-day read:0closed shifts,0visible original cash/card differences,0active source rows and no source errors. Returned selected scope to LAB; no business or evidence write yet. Native per-shift sale/IRIS counts, stock quantities/movement timestamps, physical cash and lifecycle-generation numeric value are not independently observed in this UI, so NOT TESTED; this is evidence-input/report acceptance only, not financial/stock acceptance. No affected native product, payment method or terminal transaction; imported external identities must not become native cash allocations. Existing native6bbf006 limited PASS stays protected and is not replayed.

Publish this baseline/evidence plan green/main BEFORE the first import. Immediately before every state-changing input/revoke, refresh current selected-store/report/source values and record them in this checkpoint; perform one identified action, then record actual after values. Only the two synthetic original files in input-manifest.json are permitted: lab-kiosk-events-20261028.xls (4096bytes,SHA256bf7ddb2438ffedad737832d5caa83ef421953f36cf4b84be216486a903382bfa), lab-kiosk-journal-20261028.xls (4608bytes,SHA2560a957efb3c82755776daeb50a52b214bf4f9777e99ef30b73134f2351ae248f0). Period27Oct, product LAB KIOSK IMPORT20261028 (actual literal contains spaces: LAB KIOSK IMPORT 20261028), external shift LAB-436/operator LAB_KIOSK_28OCT, transaction865001,27/10/2026,21:09:17 Greece,qty1,retail2EUR/net0EUR. No native sale is created. Expected active sources0→1(events incomplete)→2; complete pair must show exactly one zero-price sold line plus one unconfirmed event, not invent a transaction/quantity on the event and not add2EUR to cash/cards. Verify read persistence, canonical copied/exported prose if available and read-only N40 isolation. Then explicitly revoke only these synthetic sources from analysis, preserving original/history, with before/after records and sources2→1→0; report returns to baseline. No private real-store upload, sale/return/VOID/discount/shift close/review/offset/financial/settings/provider/permission/email action. No repeated old accepted transaction for evidence. Actual new input/manual PASS remains NOT TESTED until observed.

Only bounded input/report acceptance is authorized. Broader #3243 remains OPEN: exact historical Estia approvals/store mapping, actual automatic-promotion/water proofs, real-store/full report/email acceptance and older global financial workbook are separate remainders. No blanket category/product exemption, no arbitrary employee assignment or duplicate financial count. All concurrent owners and handwritten Chat path remain unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-imports.md. Single next action after this baseline green/main: execute the measured synthetic import/report/revoke flow on the exact healthy source.

28/10/2026 — CASH-KIOSK-IMPORT-11 / INTEGRATION CANDIDATE / AWAITING NATIVE CI AND LAB

Retained owner codex/cash-chat-reconciliation-20261026; source feat/cash-kiosk-import-20261028. Original before-source scope3255/head29622505f202a70ddcd48f7377ce34d82343f668 fullCI40709804308/4472server+8backup/0FAIL/0SKIP merged1c45800 before import code. Exact parser-mainCI40711905995 SUCCESS. Additional archive-harness claim3260/heade0aee02da00500f7dd0814655aff3aac0f843714/docsCI40716285827 SUCCESS merged34e5b6017bd7bf1f91431b02315fe39c89a39b8a before touching its one named existing test. Concurrent POS empty-editor/layout main1d5aa484 preserved. No new hosted acceptance or actual report email.

Candidate provides explicitly scoped XLS/XLSX input and original-byte plus normalized-fact provenance in the new CASH_KIOSK_SOURCE/IMPORT namespaces only, using existing covered attachment/audit tables. No schema/bootstrap, generic chat, invoice, module/auth, provider, fiscal or financial writer changes. Auth is repeated against persisted actor/store/license inside the store/lifecycle-locked write transaction. Once-only import/revoke, exact replay conflicts, original-file retention and durable reuse receipts protect unknown outcomes, including retries after deliberate revocation. Records remain in historical windows; active-file/byte limits apply to overlapping declared source periods. Raw originals are re-hashed with stored normalized facts on canonical reads and never sent in the report/automatic envelope. Source failures and missing/conflicting inputs stay visibly unavailable/limited, never false zero.

Same external informational evidence is included once per selected report in reportHash, prose and strict reviewed-automatic projection; archive/copy/assistant consumers use that canonical text. Original sourceHash/planHash, confirmed cash amounts/cards and financial ledgers stay unchanged. Separate Kiosk shift/operator/transaction namespaces remain explicit. No historic Estia category-wide exception or invented water approval. Native confirmed-promotion and exact-proof comparator behavior remains protected; broader actual business exceptions and historic precise evidence still need real verification. Files do not acquire native employee/cash allocations.

Actual mounted source panel requires file kind, declared period, selected-store attestation and explicit source shift/operator for journals, with no auto-upload/retry. Existing busy gate serializes import with review/download actions; late store/period completions are ignored and unknown outcomes require refresh. Explicit revoke removes only analysis eligibility while originals/history remain. The archive harness now compiles the actual new child module with real React and resolves its import; every old assertion and hook/ref identity preserved. The initial parent test clicked the older counting-confirmation label; its selector now targets the new full attestation label. No production behavior was weakened for the harness.

Retained parser-scope3254 also gains a bounded normalized-result budget before worker postMessage, preventing a small spreadsheet from returning an oversized parent object. Initial resource fixture used BIFF8 writer strings that were truncated to255chars by the test writer and therefore did not reach the bound; switched that specific synthetic stress input to actual XLSX. Final Node20 cash-consumer sweep259tests:239PASS/0FAIL/20isolated native-infrastructureSKIP; focused mounted/domain tests passed; Work-safe client build PASS. The new actual PostgreSQL registered-route/two-client/original-hash/fresh-role-revocation/lifecycle/once-only/revoke/control proof must run unskipped in fullCI. CI is not LAB PASS; no new manual PASS from synthetic checks.

Exact fullPR/mainCI and normal guarded healthy revision are required before measured LAB. Planned acceptance uses only identified synthetic event/journal files in ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, with published current baseline, exact source counts and unchanged visible original balances; no private real-store upload, sale/shift/review/offset/settings/provider/email action. Whole request #3243 remains OPEN/ASSIGNED. Single next action: verify this exact combined source in full native CI, preserve concurrent owners through main, then normal guarded release and the declared measured input/report flow. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-imports.md.

Candidate reconciled over concurrent POS no-print-permission main606a3bc3506b35c602518dcd16c09bb0659509c5. Its role/profile/checkout source and every retained owner are preserved; no shared cash runtime path changed in those concurrent commits.

28/10/2026 — CASH-KIOSK-IMPORT-11 / ARCHIVE HARNESS COMPATIBILITY AMENDMENT BEFORE EDIT

Retained owner codex/cash-chat-reconciliation-20261026. Parser3255/head2962250 fullPRCI40709804308 passed4472server+8backup/0FAIL/0SKIP and merged1c45800; its mainCI40711905995 also SUCCESS. Import/report implementation remains an unpublished candidate on feat/cash-kiosk-import-20261028 under the already green before-source claim3255. No new LAB/manual/email PASS. Current main1d5aa484 preserves independent POS empty-editor and layout source. Existing native cash6bbf006 limited PASS protected.

Meaningful local expanded cash-consumer sweep:258tests,236PASS,2FAIL,20isolated native infrastructureSKIP. Both failures are in server/test/cash-reviewed-archive-ui.test.js: its data-URL transform explicitly resolves only React and archive helper imports, and cannot resolve the newly added relative CashKioskImportPanel.jsx module. Original download behavior was not executed by these two failures; do not call them financial or hosted regressions. Focused actual mounted integration and financial/projection tests64PASS/0FAIL/1nativeSKIP; Work-safe client build PASS. Native source/route proof still requires real CI PostgreSQL.

Add ONLY existing server/test/cash-reviewed-archive-ui.test.js to the current import integration scope: compile the actual new child component to an importable data URL with the real React module, and resolve that new relative import in the existing actual-panel harness. Do not stub the production component, delete/weaken assertions, change old hook/ref identities, skip tests or change archive/download semantics. This docs amendment must be green mergedmain BEFORE that one test file is edited. All existing and claimed import/runtime paths remain as previously bounded; no extra writer/permission/provider/lifecycle/financial scope. Single next action after amendment merge: fix this exact loader dependency, rerun existing actual archive tests and the cash consumer sweep, then publish full integration candidate for exact CI/main/guarded release and measured LAB. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-imports.md.

28/10/2026 — CASH-KIOSK-IMPORT-11 / SELECTED-STORE INPUT AND CANONICAL REPORT CLAIM / BEFORE SOURCE

Retained owner codex/cash-chat-reconciliation-20261026; future branch feat/cash-kiosk-import-20261028; parent #3243. User instructs completion of the external-event rule in MYWORKSTATION. This is the next narrowly bounded independent cash consumer/input slice, not a transfer of retained native/chat/invoice/dispatch/financial writers. Existing cash native6bbf006 limited LAB/manual, parser claim3254, four concurrent POS/invoice scopes and all other owners remain protected. No integration code is present in this claim. It must merge green/main before the new paths are edited.

Exact future source: NEW server/src/services/cash-kiosk-imports.js (bounded request validation, original-file/normalized-fact provenance, import/revoke/idempotency, read-only canonical evidence). Existing server/src/routes/cash-reconciliation.js ONLY additive selected-store /kiosk-sources list/import/revoke endpoints behind unchanged authorizeCashPaper; no index/global middleware edits. Existing server/src/services/cash-reconciliation-repository.js ONLY once-per-materialization read of external informational evidence. Existing cash-reconciliation-report.js ONLY optional report-level external evidence in reportHash and short no-table prose; cash-reviewed-automatic-contract.js ONLY strict safe projection/serialization of that same optional evidence. NEW client/src/components/shared/CashKioskImportPanel.jsx; existing CashReconciliationPanel.jsx ONLY import/mount/refresh for that panel after the selected-store report loads. NEW server/test/cash-kiosk-imports.test.js, cash-kiosk-imports-postgres.test.js, cash-kiosk-imports-ui.test.js. Existing relevant cash repository/automatic test fixtures may gain only the new empty-source query stub if strictly necessary, retaining every old assertion and recording exact touched path before change.

Persist only a NEW CASH_KIOSK_SOURCE documentType in the existing DocumentAttachment table and a NEW CASH_KIOSK_IMPORT audit namespace in existing WorkforceAuditLog, with original bytes/checksum and immutable normalized facts tied to actor, explicit selected company/store, lifecycle generation and declared source period. No schema/bootstrap/migration, existing attachment-type reader or invoice/chat writer is edited. Existing lifecycle policy already covers both tables; do not change it or bypass maintenance/generation/backup controls. No raw bytes/private source rows in report/automatic envelope. Native/chat upload MIME support stays unchanged; existing handwritten-photo/PDF chat path continues. The new cash-specific Excel input does not take the retained generic Chat writer.

Require original-byte checksum and normalized-fact canonical hash verification, strict scope/identity/size/count validation, bounded active files/history and byte budgets, explicit kind plus journal source shift/operator binding and selected-store confirmation. The filename is only a hint, never store or identity proof. Repeated input must reuse an exact prior receipt, reject changed replay/conflicting binding and permit explicit evidence revocation/correction without deleting original history. One store-row/lifecycle-locked transaction, fresh persisted authorization before writes, no asynchronous business/provider work or financial action. Reads must not ensure schema or mutate audit state; absent/failed/partial sources remain visible unknown/limited rather than all-clear. Period filtering uses explicit Greece wall dates, external identities never acquire native allocations. Preserve current financial sourceHash/planHash/review arithmetic/cards and original ledger; only observational reportHash changes.

Expose a clear selected-store file input for XLS/XLSX with exact source-binding controls, explicit import/revoke action, progress/error/unknown-outcome handling and current source list. Store/period/unmount changes invalidate late results; no auto-upload/retry, no default all-store scope. Canonical report, archive/copy/assistant and reviewed automatic consumer must see the same short event prose and source coverage, without another count into cash or cards. Native trusted-promotion and specific water-proof semantics stay unchanged; do not infer historic Estia approvals from item/category names. Source events lacking quantity/transaction remain unconfirmed; missing journals and unresolved overlapping event exports stay explicit LIMITED.

Required proof: actual original XLS/XLSX parse and round-trip/hash/read, registered native PostgreSQL route/current-role/foreign scope/license denial, once-only two-client replay/conflict/revoke/lifecycle behavior, unchanged financial/stock/control snapshots, canonical report and strict automatic projection including tamper/stale-source checks; actual mounted UI store/late response/no-auto-upload/input/unknown-outcome protection and existing cash regressions. Full exact PR/mainCI, normal guarded exact release before any measured LAB. State-changing LAB needs a separately published exact baseline and only identified synthetic files; never upload private real-store records into LAB or replay old financial transactions. No manual PASS from CI. Actual delivery/email settings/recipients remain untouched. Whole request OPEN/ASSIGNED until actual acceptance; single next action after this claim green/main is the bounded implementation above. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-imports.md.

28/10/2026 — CASH-KIOSK-XLS-10 / PARSER SOURCE CANDIDATE / INPUT AND REPORT INTEGRATION OPEN

Retained owner codex/cash-chat-reconciliation-20261026. Before-source claim3254/head457089677eec85dc819a4e1aae4d4ab411189cc9 passed applicable docsCI40705935013 and merged10df367323266602965e150560d6f3eb39cb4270 before either new runtime/test path. Two-path independent candidate only: cash-kiosk-xls.js and its test. No retained writer, API/UI, schema, input whitelist, financial, stock, dispatch or configuration change. Native6bbf006 limited LAB PASS remains protected; external input/canonical report integration and actual hosted acceptance remain OPEN/NOT TESTED. This module is not yet connected to the application.

Resource-limited worker reads bounded OLE XLS or preflighted XLSX ZIP, refuses formulas/links/errors/unknown headers/partial sales and uncertain DST, hashes original bytes and requires explicit company/store/source plus journal Kiosk shift/operator binding. Excel serials use explicit Greece wall clocks and workbook1904 epoch; no host-timezone interpretation. Preserves repeated physical item lines: real Kiosk Είδη field is a product count and may be1 while two identical physical lines legitimately sum to the sale. Duplicate imports/overlapping events are deduped as multisets without deleting genuine repeated events; conflicting transaction or file bindings refuse comparison. Kiosk identities are namespaced and never native IDs. Catalogue edits remain unconfirmed, returns/held/deletes excluded; zero-value and actual journal reductions remain informational with0financial adjustment and exact trusted exceptions only.

The actual inspected event export lacks quantity/transaction IDs. Adapter explicitly leaves application unconfirmed rather than inventing missing matching fields from a plausible sale. Actual source sample parsing was read-only in a deliberately UNBOUND-SAMPLE namespace, not assigned to a real store:102price events including embedded permanent changes,198retail-sale transaction blocks; both readable. Aggregate111informational findings is parser engineering evidence only, not a real cash audit or employee allocation. No private source files committed. Initial wrong import and mistaken physical-line/product-count equality were found and corrected locally; latest exact focused Node20 suite22PASS/0FAIL/0SKIP, including inherited native financial/projection regressions. One test initially relied on result order across different shifts; now selects the unconfirmed code directly without weakening the no-match assertion.

Require full exact PR/main CI before technical completion; no manual/LAB PASS from these tests. The worker does not upload, persist, send or execute formula/macro/provider/business operations. Full workflow #3243 stays OPEN. Single next action: publish and verify this exact parser candidate, then claim the narrowly bounded authorized selected-store import/canonical report integration before editing those existing paths. Existing native/chat/dispatch owners and four concurrent POS/invoice claims remain unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-xls.md.

28/10/2026 — CASH-KIOSK-XLS-10 / BOUNDED EXTERNAL PARSER CLAIM / ASSIGNED BEFORE SOURCE

Retained owner codex/cash-chat-reconciliation-20261026; independent branch feat/cash-kiosk-xls-20261028; parent requirement #3243. User explicitly says ΞΕΚΙΝΑ after native limited PASS. Baseline1c0f093 preserves the four new independent POS/invoice claims; cash native6bbf006 limited read-only PASS/manual and all retained owners remain protected. The real system-events and shift436 journal XLS samples exist and were inspected read-only. File adjacency does not prove store identity. No external parser/source integration or new LAB acceptance is claimed.

Exact first bounded source ONLY after this claim green/main: NEW server/src/services/cash-kiosk-xls.js and NEW server/test/cash-kiosk-xls.test.js. Pure read-only XLS/XLSX schema adapter and external-domain comparator using existing xlsx dependency. No route, upload/chat/native/financial writer, schema, permission, settings, dispatch or shared runtime consumer edits. Existing source/native audit stays unchanged. Chat MIME/input/canonical integration is a subsequent separately claimed coordinated slice, not implicitly acquired here. Ownership review confirms retained store-chat/native assignments, which this standalone module does not edit.

Require explicit caller-provided selected company/store provenance, source checksums, typed Kiosk shift/operator/transaction identities distinct from native UUIDs; grouped system-event headers and repeated transaction/item journal headers; numeric Excel serials as Greece wall clocks (1900/1904 workbook systems), exact seconds, explicit ambiguous/nonexistent DST-time refusal, no host-timezone inference. Parse only price/discount and completed retail-sale item facts; exclusions hold/delete/return stay out of this added comparison. Preserve duplicate physical item lines, distinguish repeated exports from conflicting same-transaction records, and never use catalogue events as proof of a sale. Missing quantity/transaction evidence or ambiguous candidate means the mandated unconfirmed wording, not invented correspondence. Zero-value sold lines are findings unless exact trusted permitted water own-use proof; automatic exceptions require exact evidence, no item/category blanket exemptions. Informational0financial adjustment, no cash/card netting or liability allocation.

Bound bytes/sheets/rows/cells/text/ZIP inflation, do not execute macros/formulas or follow links; malformed/partial/unsupported source is explicit unavailable/limited rather than all-clear. Meaningful tests must cover real header shapes, zero/reduction/permanent edits, distinct IDs, money/quantity/seconds, DST, ambiguity, duplicate reupload/conflicting records, formula refusal/resource bounds and unchanged financial semantics. Inspect actual private samples locally without committing them. Full exact PR/mainCI required; module-only engineering checks are NOT authenticated LAB, input/report/email acceptance or installation of external upload support. No manual PASS from unit checks. Remaining whole request stays OPEN; single next action after this claim merge: implement and verify only these two independent paths, then publish exact next integration scope before editing retained writers. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-kiosk-xls.md.

28/10/2026 — CASH-EVENT-SALES-09 / LIMITED NATIVE READ-ONLY LAB PASS / EXTERNAL XLS OPEN

Retained owner codex/cash-chat-reconciliation-20261026; source #3246/0e79b5 and midnight fix #3250. Final fix head48c749fadf68eeff0fb96564a3364693d25df501 passed fullCI40696771248:4460server+8backup/0FAIL/0SKIP; merged6bbf006742e15aeb6f5492af68bbc4ee12c2801a. Exact mainCI40698247176 all5jobs SUCCESS with4460+8/0FAIL/0SKIP. Normal guarded release40699799055/job122856332420 pinned6bbf006 and reported exact healthy6bbf006 at13:54:29UTC. No force/rollback. Concurrent scanner/support documentationaedc565 preserved; no new runtime source after this release is claimed.

Actual authenticated read-only LAB28Oct2026 approximately13:54–13:55UTC, same selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ and October2026, refreshed Έλεγχος με επανυπολογισμούς once after release.13existing closed shifts; eight findings still present:2zero-value LAB EXCEL TEST2 lines,3price reductions,3unconfirmed event/catalog cases. The specific existing sale05061018-0b7d-4fcb-8a61-08a5486b9611 now shows12/10/2026,00:13:46 rather than24:13:46. Original shortages8.90EUR, surplus0,13separate card lines with zero difference, all13pending excluded reviewed totals. No additional financial allocation; no sale, shift close, review, offset, settings, provider, export or actual email action. Synthetic LAB records are not real employee debts.

LIMITED PASS only for actual native finding display, exact selected-store/period, corrected midnight camera text and unchanged visible original balances. The earlier midnight display FAIL is closed for this exact observed case. This is not full matching/physical reconciliation, approval of all discounts or complete financial/stock before-after acceptance. Actual automatic promotion/water exceptions, real mail, external XLS input and full workflow remain NOT TESTED/OPEN. Updated manual and evidence receipt in same change; pending removes only completed native-display tranche. Original protected PASS and other owners unchanged.

External events/journal XLS files were located and their real schemas inspected, but are not ingested by MyWorkStation yet. Current store Chat accepts images/PDF only. Before extending another writer, review its current claim and publish the narrowly bounded independent input/adapter scope; source Kiosk IDs must remain distinct from native IDs and store/file identity must be evidenced. No blanket Estia exemption. Whole CASH-EVENT-SALES request #3243 remains OPEN/ASSIGNED, not complete. Single next action: publish a scoped claim for the external Kiosk XLS/XLSX adapter and its authorized store-input/report integration; do not repeat the completed native read-only test or accepted financial actions. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-event-sales.md; manual docs/manual/cash-control/PASS.md; evidence CHECKPOINTS/EVIDENCE/cash-event-sales-20261028/receipt.json.

28/10/2026 — CASH-EVENT-SALES-09 / INSTALLED / LAB MIDNIGHT DISPLAY FAIL

PR3250 previous head2f88d5f7d37c02604911d25f9afd13a302fe8adc passed fullCI40694612546:4454server+8backup/0FAIL/0SKIP. Merge was refused only for concurrent shared-registry/PDF changes from scanner source0418582. Current candidate preserves that owner and moves this flow entry before the existing cash section; runtime/helper/test paths had no concurrent change. Fresh exact CI still required after integration; no corrected-clock LAB PASS yet.

Retained owner codex/cash-chat-reconciliation-20261026. Source #3246 head7a83468d7cd9fcd07ae72737e1a6fa08c4535f7f passed fullPR CI40683210187:4451server+8backup/0FAIL/0SKIP including native zero-sale source proof. Merged0e79b515a8505273627de02207789c0fcf5cf855. Exact mainCI40684699309 first failed wholesale Chromium Target.createTarget startup timeout, cash4451+8 passed; retry attempt2 all5jobs SUCCESS. Normal guarded deploy40686513647/job122810225783 healthy exact0e79b5 at12:20:06UTC. Later normal guarded deploy40691387009/job122826888468 healthyb8773ac909f1001be3987d84335571d5717a1c8e at12:55:38UTC; all five cash runtime paths byte-identical0e79-to-b877. No force/rollback.

Actual authenticated read-only LAB28Oct13:10UTC: Platform Admin → Ταμεία → only ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ → October2026 → Έλεγχος με επανυπολογισμούς.13existing closed shifts, original shortages8.90EUR, surplus0, card0; pending13 excluded reviewed totals. Eight native findings displayed: two existing zero-value LAB EXCEL TEST2 sales (1Oct10:44:20/12:51:17), three water-price reductions, one unmatched price edit, two permanent catalog edits explicitly unconfirmed. No sale, review, offset, provider, settings or email action. These are synthetic LAB records, not real employee debt. Display/financial invariants observed, but no whole-flow PASS: one12Oct midnight sale rendered24:13:46 instead of00:13:46 in production Intl.

LAB FAIL limited to new exact camera-time formatting. Existing read-only manual remains protected; no new manual PASS until corrected display verified. Causal fix within existing claimed cash-event-sales.js/test paths: reuse existing shared Greece h23 formatter, no shared helper change, no date/transaction/financial mutation. Exact fresh CI/main/guarded release and read-only midnight retest required; do not repeat financial transactions.

External samples now located in Library: system-events files and matching-format shift journals (including436). XLS stores grouped event categories and Excel serial local wall clocks; journal has repeated transaction/item headers. Files do not by themselves prove a MyWorkStation store mapping. External XLS ingestion remains NOT IMPLEMENTED; existing store Chat attachment writer accepts images/PDF, and native/chat writers are retained outside this cash claim. Keep exact previous Estia cases unconfirmed until identified; no blanket exemptions. Whole workflow remains OPEN. Next: publish causal midnight formatter fix, verify same existing LAB finding, then define owned external-adapter integration without taking another writer's scope.

28/10/2026 — CASH-EVENT-SALES-09 / SOURCE CANDIDATE / AWAITING CI AND LAB

Retained owner codex/cash-chat-reconciliation-20261026. Before-source claim #3245 headc8981338e62c631716ff3ba2e73df1685cae5b79 passed applicable CI40680691450 and mergedc8645d7bcc1e7ffd44456378511031dec02bc95e before runtime edits. Independent read-only source candidate on feat/cash-event-sales-20261028. No deployment, LAB PASS, financial action, settings change or email claimed.

Adds bounded exact-session native price-event/completed-sale comparison and short canonical/automatic report prose. Reads PosSaleActionAudit and Sale/SaleLine with explicit StoreTransaction or StoreOperatorAudit POS_SALE_COMPLETED linkage; the latter covers wholly zero-total sales with no payment. Multiple session IDs refuse attribution. Event matching requires time/product/quantity/value/actor and available sale/line identities; catalog edits stay unconfirmed rather than inferred sales. Zero-value items require disposition/explanation and exact camera time; no general water-name exception. Exact trusted water own-use or automatic-discount confirmations are supported by pure comparator; native automatic proof additionally requires recorded promotion ID/type and a unique matching completion item. Caller-supplied audit approval flags are ignored. Prior Estia Kiosk cases still need exact source identities; no blanket category exemption. Returns/holds/deletes and original Netlink behavior untouched.

Findings, coverage and source digest enter reportHash/projection but do not alter financial sourceHash, cash confirmation, original/reviewed totals, offsets or cards. Unknowns and bounded overflow are explicit, not zero agreement. No raw audit details or attachment bytes cross the automatic envelope. Same report rendering is revalidated there. Local actual Node20.20.2 focused/broad cash tests37PASS/0FAIL/3isolated PostgreSQL SKIP; new native PostgreSQL test awaits actual CI database. Initial local Prisma import failed because dependencies were installed without generation; local prisma generate then rerun passed, no database mutation. Full exact PR/main CI and guarded release remain required. No manual PASS is added from synthetic checks.

Remaining: exact deployed read-only LAB preview/coverage, full Excel import/header mapping and real sample acceptance, precise earlier Estia confirmation identities, broader report/email acceptance and original cash workflow. First in-system slice is not full implementation of external Excel ingestion. Existing cash read-only manual/PASS and all other owners preserved. Next: full CI including new unskipped native source proof; then normal guarded release and a scoped read-only preview. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-event-sales.md.

28/10/2026 — CASH-EVENT-SALES-09 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained owner codex/cash-chat-reconciliation-20261026; branch feat/cash-event-sales-20261028; requirement #3243. Owner explicitly instructs implementation of system-event price/discount comparison with completed sales and zero-value lines. Current baseline 79b251496211f00830f16f2ef95703111e408405. Existing read-only LAB PASS and all other owners remain protected. New source NOT IMPLEMENTED / NOT INSTALLED / NOT TESTED. No repeated financial LAB, provider, settings or email action.

Bounded first source after this claim green/main: NEW server/src/services/cash-event-sales.js and cash-event-sales-source.js; existing cash-reconciliation-source.js, cash-reconciliation-report.js and cash-reviewed-automatic-contract.js only read-only finding delegation/projection/prose/fingerprint. NEW server/test/cash-event-sales.test.js and cash-event-sales-source.test.js; existing cash reconciliation/automatic tests only meaningful regression coverage. Native PosSaleActionAudit and linked completed Sale/SaleLine are the authoritative in-system equivalents; no new import/write API, table or migration. Excel adapter/real Kiosk header acceptance stays OPEN until real sample schema is available, rather than inventing columns. No unrelated cash-control.js, POS, scanner, invoice, fiscal, Netlink, chat, recipient, consent or dispatch changes.

Require exact company/store/session sale linkage, bounded source coverage, explicit missing/ambiguous evidence, exact event/sale identity or multi-field match without arbitrary operator/shift mapping. Permanent catalog event is not a sale. Report all completed-sale zero-value items except specifically documented permitted water own-use; no product-name-only exemption. Confirmed automatic discounts require specific evidence, never blanket beer/chocolate exemption; prior Estia cases not identifiable from available sources stay unverified. Exclude holds, deletes and returns from this new check; existing Netlink check preserved. Short no-table prose includes exact time and all available identification/quantity/prices/reduction/transaction, never invented missing fields. No financial adjustment or double count. Exact mandated unmatched wording retained.

Owner correction28Oct: previous blanket authorization to send completed reports to verified designated recipients applies unless a specific preview/no-send instruction is given. No new per-email confirmation requirement is introduced; existing application readiness/consent/configuration guards remain. Email invitation was accepted and status refreshed to verified/active consent on28Oct; automatic sending still disabled, source incomplete, actual report email remains NOT TESTED. Prior28Oct unverified status is historical.

Proof required: zero-value/exemption/unknown-price, discount, catalog-vs-sale, ambiguous/foreign/differing IDs, bounded failure, unchanged cash/cards and canonical serialization regressions; full exact CI/main/normal guarded release then scoped read-only LAB. No CI-only PASS in manual. Whole cash workflow and actual Excel import acceptance remain OPEN. Next: publish this claim green/main before runtime edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-cash-event-sales.md.

28/10/2026 — DOCUMENT-SCANNER-PREVIEW-01 / TECHNICALLY RELEASED / AWAITING USER IMAGE REVIEW

Retained capture owner codex/canon-lide400-scan-diagnostics-20261027. Before-source claim3241 merged5d617930. Final source3242/headc44bb2fe2366a76992111a23377210e632583ddb merged79b251496211f00830f16f2ef95703111e408405. Reviewed and merged trees exactly0580f544f6df93908779ec118d0cc22b5554d867. Exact fullPRCI40676116060/all5SUCCESS:4439server+8backup PASS/0FAIL/0CANCEL/0SKIP, including actual mounted preview, real scanner-control five-page fixture and actual Chromium4cases; existing12camera pointer/cleanup cases, native HTTP/archive/wholesale/invariants passed. Parent runtime diff independently reduces exactly to import, row wrapping and preview mount; no acquisition/header/financial handler changed.

MainCI40677458915 attempt1 build122779820750 actual4439server+8backup PASS/0FAIL/0SKIP. Separate wholesale122779820719 failed before its test at Target.createTarget timeout; same reviewed tree had passed that exact job in PRCI. One exact job rerun122783137246 passed unchanged, final attempt2 all5jobsSUCCESS. Initial rerun request while the workflow still ran was safely refused; no code/assertion/timeout change or guard bypass. Earlier source6025f446/40674275358 had3legacy component-bundling failures due CSS import; corrected by self-contained preview styles without changing those old financial tests. Exact old3tests passed locally after baseline dependencies were retrieved;5unselected cases in that targeted command were not executed. New local3tests including actual Chromium passed unskipped. All these remain engineering evidence, not physical preview PASS.

Ordinary guarded release40679299748/job122785691616 SUCCESS, exact healthy79b25149 at11:24:28UTC/13:24:28Athens. Independent public verification11:26:16UTC returned oktrue/exact79b25149 and the lazy React entry /assets/entry-DGYHCTGV.js contains document-page-preview__viewport,2764143bytes, SHA2564fa6594cfa667bf47e391556d89cc448ada0ec0a99ce5649cc48029266942975. The small bootstrap delegates to this chunk; absence from bootstrap alone was not a release failure. Proof CHECKPOINTS/EVIDENCE/document-capture-scanner-20261026/preview-release-79b25149.json. No manual Render action, production DB/business/settings/provider/payment/scanner action here.

Explicit in-form original-image preview, close,50–400% zoom/full-image scroll are now technically delivered for supported already selected images; unsupported PDF/external sources keep existing file rows. Viewing never invokes scanner/upload/header/AI/payment. The Windows connector package is unchanged. Existing one-page/header USER PASS and the owner's clarification that next scan unlocks after header reading remain protected. Real2–5page hardware/whole-image legibility and new preview on the user's PC remain OPEN; no whole capture/Gate3/numbered-item closure or new preview manual PASS.

Completed preview implementation/CI/release is removed from active pending work; residual is USER inspection in a safely opened new form after normal application refresh. Refresh discards current unsaved selected pages, so do not force it while the owner needs them. Opening an old form without refresh keeps the old bundle. Do not rescan an accepted invoice, replay header/provider or pay/submit merely to fill evidence; use the next naturally selected original for preview acceptance. Manual records only the earlier confirmed scope and qualifies its no-preview observation as historical. Same owner retained; no handoff or takeover of other residuals.

28/10/2026 — DOCUMENT-SCANNER-PREVIEW-01 / SOURCE CANDIDATE / AWAITING CI AND USER IMAGE REVIEW

Full source CI40674275358/head6025f446 FAILED:4436PASS/3FAIL/0CANCEL/0SKIP. All three failures were legacy pos-vat-inbox-ui component bundling errors from the new CSS import with write:false/no output path; no payment assertion was relaxed. The same preview rules are now embedded in the new component, removing the external CSS dependency, and its own tests now use that same bare bundling mode instead of a CSS-empty loader. Fresh actual Node20 mounted/real scanner five-page/Chromium tests3PASS/0FAIL/0SKIP; exact new fullCI remains required. Initial2673ebd9 run40673782648 was superseded/cancelled on test strengthening, not a full PASS.

Retained capture owner. Before-source claim and limited Canon one-page/header USER PASS PR3241/headb4908ccba97f5f56b9854fbcaae4c31108212049 passed applicable CI40672599194 and merged5d617930ac3a4afad34397a95bbeb33bc98512e6 before source. Manual remains limited to confirmed one-page/header; full image/preview USER PASS not claimed.

Candidate adds explicit in-form original-image preview with0.5x–4x bounded zoom, full-image scroll and close in the existing Premium Fast selected-page row. Uses already retained originalDataUrl, falling back to dataUrl only when no distinct original exists; supported data-image formats only, no external/SVG/PDF source, fetch/FileReader/scanner/header/OCR/payment or original-byte mutation. Image errors leave the selected page intact. Source/store changes close and clear the view; the existing store-keyed parent is preserved. Parent changes are only import, row wrapping and preview mounting; all acquisition, preparation, fast-header, ordering/removal and financial handlers unchanged. Unsupported files retain existing row behavior.

Local actual Node20.20.2:3PASS/0FAIL/0SKIP. Mounted component covers original/processed, unsupported/external refusal, error, bounded zoom/reset/close, scope/source change and unmount. Actual Premium Fast parent with the real DocumentScanButton and scanner client, mocked loopback and isolated reader/media adapters appends five pages with unique request IDs and remaining counts5/4/3/2/1, then blocks a sixth. Each selection makes its existing header call; preview open/zoom/close adds no API/payment call and retains the files, with store-key reset. Owner clarified that the real scan button becomes available again after header reading finishes; no real five-page acceptance is inferred. Actual Chromium143 runs4portrait/landscape and1366x768/390x844 cases: full natural dimensions/aspect ratio, contained image, real pointer targets>=48px,200% scroll/close/store reset and zero fetch. These are engineering fixtures, not actual optical/OCR/financial acceptance.

Local fixture corrections retained: missing baseline parent file was retrieved; virtual import resolver corrected to cover parent-directory imports; browser zoom selector originally hit the labelled group rather than button and was made button-specific, with all pointer/zoom assertions preserved. Packed browser font ownership extraction failed in scratch; official packaged bytes were decompressed to the task workspace, no application security setting changed. Browser cleanup waits for process exit. No production/financial/AI/scanner action during development.

Required next: exact full PR/mainCI including unskipped actual Chromium preview, normal guarded exact release; then existing-image preview/legibility acceptance without rescanning or paying merely for evidence. Candidate NOT INSTALLED/AWAITING USER. Same owner retained; other capture/native/Gate3/payment/supplier owners and prior limited PASS remain protected.

28/10/2026 — DOCUMENT-SCANNER-PREVIEW-01 / ASSIGNED BEFORE SOURCE

Retained capture owner codex/canon-lide400-scan-diagnostics-20261027; future source fix/scanned-page-preview-20261028. After the owner confirmed the displayed header and reported that no preview exists, the owner requested continuation. Same-page selected-original inspection is the bounded independent capture subtask; Gate3 OCR/payment/supplier writers and all other owners remain locked/protected. Publish this claim green/main before source changes.

Exact source scope: new client/src/components/store/DocumentPagePreview.jsx and its CSS; client/src/components/store/StoreSupplierInvoicePremiumFast.jsx ONLY import and selected-page-row preview mount using the already retained originalDataUrl or same-source dataUrl and store scope; new server/test/document-page-preview.test.js plus isolated actual Chromium rendering harness only if required for viewport/zoom verification. Preview only already retained image bytes, explicit local open/close and bounded zoom/full-frame scroll; no fetch, FileReader, scanner invocation, OCR/header replay, upload/payment, page order/removal, original data mutation or arbitrary URL. Unsupported PDF/format keeps the existing file row without false image acceptance. Do not change selectFiles/prepareDocumentFile/fast-header or any financial handler.

Preserve limited USER PASS below. Required: mounted original-versus-processed selection, unsupported/external-source refusal, actual rendered open/zoom/close, store/source change and unmount cleanup, full-frame/portrait/landscape/desktop/narrow viewport controls and zero network/provider/business calls; existing invoice/capture regressions/fullCI and normal guarded exact release. Full-image physical legibility remains OPEN, not inferred from CI. No new manual preview PASS until user acceptance. Single next action after this claim merges: implement only this retained-image preview, verify and release, then inspect an existing selected image without another scan/payment.

28/10/2026 — CANON LIDE 400 / LIMITED USER PASS: ONE PAGE INTAKE AND DISPLAYED HEADER / IMAGE REVIEW OPEN

Retained owner codex/canon-lide400-scan-diagnostics-20261027. After instructions to run Canon_BMP_Fix.zip and scan once, user supplied image(20261028-102357).png showing the existing POS supplier-invoice form with one page selected and populated header fields. The owner then explicitly confirmed "ΣΩΣΤΟ ΕΙΝΑΙ". The second image(20261028-102539).png shows1/5page and a scanned JPEG file row. LIMITED USER PASS for the reported physical Canon LiDE400 scan reaching the existing form and the owner-confirmed displayed header. Private invoice/supplier values and raw screenshots are not published. This is owner evidence, not an independently instrumented hardware trace or full OCR/cross-supplier PASS.

The owner correctly reports that this form has NO image preview: only the selected file row is visible. Prior assistant instruction to open a preview here was incorrect. Entire-page edges, orientation, small-text/color legibility and actual pixel dimensions remain NOT TESTED; do not infer them from correct header fields. Exact physical terminal/store/operator/shift/test clock and installed executable hash/client revision were not independently captured. Filename timestamps are evidence labels, not verified scan times. No payment or finalization is shown or requested; no ledger/stock before-after reconciliation was performed. Backend header-reading/upload/provider behavior is not established by these screenshots; do not claim zero upload or zero charge.

Verified delivered source remains PR3239/head235d7c49488d94d9768dbf7e544757c10def0623/main1d5f6e225fd517c08e7f650260ca9f3cf68833cc; exact Windows40667406012, fullPR40667406011 and main40668942340 green, ordinary guarded40670393582 exacthealthy1d5f6e22. Artifact12806583677/47014584bytes SHA256000b948700e073553ac4491b88fb077d412e4d95d63f8568f29789d4b7f96c7b. Release receipt3240 merged24a407abd6c30a673197abc086c9415529183e54. Existing BMP/JPEG handling, full-frame dimensions and7MiB/14MiB bounds, pairing/origin/replay/explicit intake remain protected; no source or business change in this receipt.

This supersedes old AWAITING physical one-page delivery/header status ONLY. Do not repeat this accepted one-page/header test or submit/pay an invoice for documentation. Manual docs/manual/document-scanner/PASS.md records only that scope. Full-image visual review, multi-page acceptance, installation/reboot and other hardware/camera/native residuals remain OPEN with their existing owners; no whole DOCUMENT-CAPTURE-SCANNER-01/Gate3/numbered-item closure. Current remaining scanner action: obtain a safe way to inspect the already captured original image if the owner requests full-image acceptance; no second scan/payment merely to fill evidence. Same owner retained; this is not a handoff.

28/10/2026 — CANON LIDE 400 / BMP NORMALIZATION TECHNICALLY RELEASED / PHYSICAL RETEST OPEN

Retained owner codex/canon-lide400-scan-diagnostics-20261027. Bounded source PR3239/head235d7c49488d94d9768dbf7e544757c10def0623 merged1d5f6e225fd517c08e7f650260ca9f3cf68833cc. Reviewed and merged Git tree are exactly7ea01fd7cc6a10f1ce17e49fd4d3e8cce79cea8a. Exact full PRCI40667406011 and mainCI40668942340 all5jobs SUCCESS:4436server+8backup PASS/0FAIL/0CANCEL/0SKIP,12actual Chromium camera cases and isolated HTTP/wholesale/archive/invariant checks. Windows40667406012/job122745279091 SUCCESS: actual A4 BMP26092134bytes conversion, dimensions/corner colors, small/noisy BMP, pixel/unfittable rejection, original JPEG and loopback/DPAPI tests. These are engineering/synthetic proofs, not physical scanner acceptance.

Ordinary guarded deployment40670393582/job122755478488 SUCCESS, expected1d5f6e22; exact health oktrue/version0.22.0+kat-test-pos/revision1d5f6e225fd517c08e7f650260ca9f3cf68833cc at10:16:41UTC/12:16:41Athens. Freshness/fullCI guard and rollback checkpoint retained; no forced/manual Render action. Standalone artifact12806583677 from exact235d7c49:47014584bytes/336entries, SHA256000b948700e073553ac4491b88fb077d412e4d95d63f8568f29789d4b7f96c7b independently verified, ZIP CRC complete. Package Canon_BMP_Fix.zip prepared and saved; no installer executed here.

Newest physical evidence remains FAIL from the preceding diagnostic screenshot: invalid-jpeg/inputBytes26092134. Actual input format was not inspected; BMP remains the supported, exact-byte-count hypothesis addressed by this candidate, not a hardware-confirmed fact. Older wording calling the WIA bytes JPEG is superseded by this observation. No new physical/quality/OCR/manual/whole-flow PASS. Existing7MiB/14MiB limits and pairing/origin/replay/full-page/nonfinancial safeguards retained; no payment/upload/fiscal/stock/send action or accepted transaction replay.

Single next action: close old connector, extract the new package and manually launch its executable with existing pairing, then one explicit test-sheet scan into the existing preview. Verify entire page, orientation, small text and colored details before any separately requested submission; capture bounded console error if it fails. Do not pay/send an invoice to test acquisition. Same owner retained until this physical acceptance or named handoff. This documentation receipt updates shared status only; no new runtime or business behavior.

28/10/2026 — CANON LIDE 400 / PHYSICAL FORMAT FAILURE / BMP FALLBACK CANDIDATE

Retained scanner owner codex/canon-lide400-scan-diagnostics-20261027; follow-up branch fix/canon-wia-bmp-20261028, within the existing diagnosis/correction claim merged before source. User ran Canon_Limit_Diagnostics2 and supplied image(20261028-094216).png: pairing retained, console stage=compress-image, reason=invalid-jpeg, inputBytes=26092134, width=0, height=0. Physical acceptance FAIL. Zero dimensions mean validation stopped before decoding; they do not prove a zero-size image. Scanner model is user-reported Canon LiDE 400; Windows user Administrator visible, exact physical terminal/store/operator/shift/time and image format not independently measured. No invoice/payment submitted by this page; financial/stock effects NOT TESTED, not inferred. No new hardware/quality/manual PASS.

Prior diagnostic source #3237 merged0ae9fc06fc464d1510865b721474eb393363f8a2; exact mainCI40596671477 all5jobs SUCCESS; guarded deploy40598066776/job122519024392 SUCCESS, exact healthy0ae9fc06 verified again before this edit. Current main equals that revision; history since capture5feb831c reviewed, independent cash/POS/ftext/support changes preserved. Invalid-jpeg establishes rejection by the JPEG signature check, not the precise returned format. Microsoft Item.Transfer documentation explicitly allows preferred-format fallback when the requested format is unsupported (https://learn.microsoft.com/en-us/previous-versions/windows/desktop/wiaaut/-wiaaut-iitem-transfer). The byte count also matches a 2480x3507 24-bit BMP plus54byte header; this is a testable BMP hypothesis, not inspection of the user's pixels.

Bounded candidate accepts only JPEG or structurally bounded BMP, converts BMP in memory through the existing Windows decoder/JPEG encoder and original dimensions/entire frame at qualities90/85/80/75. BMP dimensions are bounded BEFORE decoder allocation. Existing64MiB input/48MP/7MiB output and browser14MiB total limits remain; no client/server limit increase, resizing/cropping, arbitrary file/URL, image file or upload/payment. Unsupported/corrupt/unfittable images still fail explicitly. Protect exact Origin/Host, pairing persistence, one explicit page/one scan in flight, replay/cancellation, tenant/store and existing financial/OCR paths.

Windows self-test must exercise actual 26092134byte A4 BMP to JPEG, exact dimensions/corner colors, small BMP conversion, noisy oversized BMP, excessive-dimension refusal and unfittable refusal; existing noisy JPEG and actual loopback/DPAPI protocol tests remain. Exact Windows/full PR/mainCI, normal guarded exact deployment and a fresh separately identified physical preview/legibility review remain REQUIRED. Candidate is AWAITING CI AND LAB, not fixed. Single next action: verify this bounded source and package, then one nonfinancial physical scan with full-page preview; no send/payment/replay to prove scanner acquisition.

28/10/2026 — CASH-PENDING-EMAIL-08 / TECHNICALLY INSTALLED / LAB EMAIL OPEN

Retained owner codex/cash-chat-reconciliation-20261026. Claim #3235 headb3e33fb CI40579929360 SUCCESS mergedcd7f6f28. Source #3236 head94b6d0c CI40580578852 SUCCESS merged4ec1e154a3140f98b06dbecaa9e93d027a4efa34. Exact main CI40581944084 SUCCESS, job122463739178 4436 server plus8 backup tests PASS/0 FAIL/0 SKIP. Normal guarded deploy40583559739/job122469188632 SUCCESS and health exactly4ec1e154; later guarded deploy40586347505/job122478746369 healthy exactly167fd55c54569c99c66793fa4eddd70a8c612d7e, a descendant carrying the same cash paths. No force or rollback. Actual tested delivery remains NOT TESTED; prior limited read-only expense-report LAB PASS remains.

Authenticated read-only LAB baseline 28Oct2026: Platform Admin → MYWORKSTATION LAB → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ → Αναφορές ταμείων. Configuration version1: day07:00, shifts15:00/23:00, terminal MAIN required slots1/2/3, reviewedReconciliation unchecked. Automatic send disabled; xrhstosmanis@gmail.com shown unverified with no active consent. Existing saved-settings daily preview for26Oct reports one shift, an ambiguous/overlapping or previous incomplete shift, and missing required slots. Therefore no clean source-ready automatic report or real email test was performed. No settings changed, invitation or email sent, no sale or financial record changed; this is observation not LAB PASS. Unverified recipient and incomplete source must not be bypassed. Actual option-enabled preview, properly scoped consent and delivery remain OPEN. Old accepted LAB settings save must not be repeated; a fresh documented before/after baseline and separate scoped acceptance plan are needed before any new state-changing LAB action. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-pending-email.md.

27/10/2026 — CASH-PENDING-EMAIL-08 / SOURCE CANDIDATE / NOT DEPLOYED

Retained owner codex/cash-chat-reconciliation-20261026. Claim #3235 headb3e33fb exact CI40579929360 SUCCESS mergedcd7f6f28 before source. Source candidate on feat/cash-pending-email-source-20261027 permits known, internally consistent AWAITING_REVIEW/AWAITING_NEXT_SHIFT rows only in the existing per-store opt-in provisional report; pending rows remain explicitly marked and excluded from reviewed totals. Unknown amounts/cards, stale or invalidated source, inconsistent statuses, source/generation/authorization failures stay held. Existing recipient, consent, mail boundary, original cash/card separation and legacy defaults unchanged. Focused47 tests PASS/0 FAIL/0 SKIP including actual injected mail adapter text and hard-hold cases. No actual email, production setting change, financial/provider transaction or new LAB PASS. Exact PR/main CI, guarded deployment and scoped measured actual preview/email acceptance remain required; whole workflow OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-pending-email.md.

27/10/2026 — CASH-PENDING-EMAIL-08 / ASSIGNED BEFORE SOURCE

Retained owner codex/cash-chat-reconciliation-20261026, branch feat/cash-pending-email-20261027, baseline a36f8e6c0e78991bb2ca4b889f54a6a66652c5b3. Owner asks MyWorkStation to email the demonstrated report including shifts explicitly under review. Existing opt-in reviewedReconciliation path holds whenever any row is unreviewed, even when original cash and card data are known; the canonical report already marks pending rows and excludes them from reviewed totals. Limited read-only expense-report LAB #3232 remains PASS; actual scheduled or manual email acceptance NOT TESTED.

After this claim is green and merged before source, bounded paths: server/src/services/cash-reviewed-automatic-source.js and cash-reviewed-automatic-contract.js; tests server/test/cash-reviewed-automatic.test.js, cash-reviewed-automatic-flow.test.js, cash-reviewed-automatic-postgres.test.js and automatic-report-cash-payload.test.js. Change only opt-in reviewedReconciliation to permit current authorized, complete-source, fingerprinted provisional reports containing AWAITING_REVIEW or AWAITING_NEXT_SHIFT, with existing canonical explicit pending wording, pending exclusion from reviewed totals and separate cash/cards. Preserve hard holds for unavailable/stale/recheck, unknown source balance or card values, inconsistent row status, source/tenant/authorization/generation/head/fingerprint mismatch, invalid periods and unclosed/incomplete source. Pending document/card evidence must remain clearly reported and never treated as resolved. Retain no-send-on-unverified recipients, licensing, explicit configuration, provisional policy, consent, immutable payload, idempotency, SMTP security and legacy behavior. No actual settings save, financial transaction, provider call or real mail in engineering. Independent exact PR/main CI, guarded deployment and a measured scoped LAB preview/mail test remain required; CI is not LAB PASS. No new tables or permission expansion. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-pending-email.md.

27/10/2026 — CANON LIDE 400 / OBSERVED SIZE FAILURE / BEFORE FIX

Owner codex/canon-lide400-scan-diagnostics-20261027 retains scanner scope. User ran the new standalone connector with preserved pairing and pressed Scan once. Screenshot at approximately 22:34 Athens shows UI SCAN_FAILED/no upload and local console stage=image-too-large, InvalidOperationException, HRESULT 0x80131509. WIA transfer and byte extraction returned, but JPEG exceeded the existing 7 MiB limit. Actual size, image quality, invoice content and exact dimensions were not measured. Physical scanner acceptance FAIL; no upload or payment claimed. This is concrete size rejection, not proof of the exact scanner driver configuration or all later processing.

Scope: bounded image-size handling in the Windows WIA connector, preserving one explicit scan, entire page, in-memory handling, 7 MiB per page / 14 MiB total browser limits, origin/pairing, no automatic uploads/payments, and no financial/OCR changes. Prefer bounded in-memory recompression at original dimensions with explicit failure if it cannot fit; protect scan readability and clear errors. Prove oversized synthetic JPEG recompression and refusal paths in Windows CI, existing protocol/pairing/replay tests, then fresh full CI, guarded release and a new separately observed non-financial Canon scan. No quality/OCR/physical PASS until actual review. This claim records the existing authorized scanner fix and must be published before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-document-capture-scanner.md.

27/10/2026 — CASH-REPORT-EXPENSE-PROSE-07 / LIMITED READ-ONLY LAB PASS / EMAIL OPEN

Owner codex/cash-chat-reconciliation-20261026 retained. Claim #3225 merged807e4d3 before source. Source #3228 head5b78db4 exact PR CI40571522204 SUCCESS (4436 server +8 backup, 0 FAIL / 0 SKIP); merged1d36b6419e0cb25f40e1efad185610b98a572c30. Exact main CI40573424118 SUCCESS; normal guarded deploy40575048898/job122439238538 SUCCESS, last health reported exact1d36b641. No force or rollback.

Actual authenticated LAB read-only 27Oct2026 approximately20:10–20:12 UTC on canonical Platform Admin: selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, October 2026, 13 existing closed shifts, then expanded Έλεγχος με επανυπολογισμούς. The server report displayed shift times, separate POS–EFTPOS, original shortage8.90/surplus0.00, all13 rows pending and five expense-without-document findings associated to existing shift sessions (100,20,3,1,23 EUR). These are historical synthetic LAB records, not real-store results; transaction occurrence dates can differ from their session closure day and no causal inference was made. No new sale, shift, reconciliation confirmation, settings save, actual email or provider call. Limited PASS ONLY for authenticated read-only display of the new fields on this revision; no assertion that all receipt classifications, automatic mode, email content/delivery, operator liability, or paper completeness are accepted. The existing manual read-only PASS is retained.

Automatic reviewed mode is explicit per store and holds if rows are unreviewed. The example requested by the owner includes pending shifts: actual product email with these pending findings and the exact desired prose is NOT TESTED and not yet demonstrated; no user/production settings were changed to enable it. Continue with scoped LAB email/preview evidence and remaining automatic sending requirements under separately documented baselines; do not claim finished or replay prior protected financial actions. Keep scope OPEN/ASSIGNED. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-report-expense-prose.md.

27/10/2026 — CASH-REPORT-EXPENSE-PROSE-07 / SOURCE CANDIDATE / NOT DEPLOYED

Retained owner codex/cash-chat-reconciliation-20261026. Claim #3225 exact CI40569266384 SUCCESS merged807e4d3 before source. Source PR #3228 headcc704e CI40569905008 FAILED: global Greece time policy found two new clock formatters missing hour12:false. Locally corrected both; focused 18 tests PASS. Rebase preserves scanner owner #3227 and all other changes. This is a source candidate; no deploy, new LAB PASS, actual email or financial action. Full exact PR/main CI, guarded release and scoped cash LAB remain required. Whole workflow OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-report-expense-prose.md.

27/10/2026 — DOCUMENT-CAMERA CI FAILURE / SCOPED DIAGNOSTIC CLAIM BEFORE TEST CHANGE

Owner codex/canon-lide400-scan-diagnostics-20261027; branch fix/camera-ci-pointer-diagnosis-20261027. Owner requests continuation until the Canon hardware diagnostic is ready. Scanner diagnostics PR #3222 passed full PR CI and Windows connector CI and merged e8579e26; exact main CI 40560090184 failed twice in document-camera-browser-flow at cancellation: closed=false, stopped=false, calls=0. No main full CI PASS or exact guarded release is claimed. A later documentation-only green skipped full tests and deploy, so it cannot replace that evidence. The same runtime tree passed earlier PR CI, but timing is an unconfirmed hypothesis; preserve all failed evidence and never weaken the assertions.

Claim only diagnosis and correction of the synthetic Chromium camera pointer/cleanup test or a directly established camera cancellation regression, under the existing capture owner. Before touching test or runtime code, publish this claim. Record coordinates and event/DOM timing, reproduce the failure and establish cause before a bounded change; preserve real pointer testing, camera cleanup, all capture and payment behavior. Full fresh CI and reviewed guarded release are required. Canon hardware cause, installed diagnostic build and physical PASS remain UNKNOWN/NOT TESTED; no invoice upload, payment or other financial action. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-document-capture-scanner.md.

27/10/2026 — CASH-REPORT-EXPENSE-PROSE-07 / ASSIGNED BEFORE SOURCE

Owner codex/cash-chat-reconciliation-20261026 retained; branch feat/cash-report-expense-prose-20261027; 2026-10-27T19:19Z; baseline dc1cdf2c64870aefb2220eb37011e1829d2cff65. User requires the actual emailed MyWorkStation report to show shift/date/operator, original and reviewed results, separate POS–EFTPOS, documented missing receipts and signature in concise prose. Actual 26/10 Diadochou view showed 3 pending shifts, 3 expenses without documents and no recent chat attachments. This observation is not LAB PASS or a determination of liability.

Claim before source: server/src/services/cash-reconciliation-source.js and cash-reconciliation-report.js, cash-reviewed-automatic-contract.js, plus targeted cash-reconciliation and automatic contract tests. Reuse existing scoped expense-document evidence; expose only bounded safe finding fields, dates and cents; preserve reversed and attached/linked classifications, current source freshness and fingerprints, tenant and session scope, true unknowns, current human confirmation/hold gates and distinct card/cash. Do not include attachment contents, supplier secrets or invent explanations. Add concise original/reviewed totals and factual pending expense findings; do not interpret expenses as causes, silently offset, certify unreviewed results or label pending reviewed. Do not alter default legacy mail, settings, recipients, financial transactions, provider, schema, access or SMTP boundaries. Extend scope with another green main claim before modifying other files.

Proof: deterministic report and strict automatic envelope tests for no document, photo-only, linked matched/unverified, reversals, unknown, stale changes, scoped selection, serialization and mail body; existing cash/offset/authorization regressions, exact full CI and normal guarded deployment. Actual selected-store preview/email requires separate scoped LAB; no paid provider, real email, financial action, production setting mutation or premature LAB PASS. Next: publish this claim with green CI before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-report-expense-prose.md.

28/10/2026 - IMMEDIATE-POS-INVOICE-PLAN-01 / A1-A2-B-C-E1 TECHNICALLY INSTALLED / ACTUAL USER ACCEPTANCE OPEN

Source of the new requirement is the owner's uploaded handwritten PDF NEA PRAGMATA GIA AMESH YLOPOIHSH_20261028_0001.pdf, reviewed visually because its extracted OCR text is unreliable. Central coordinator codex/central-four-streams-20261018; POS workers/scopes A1, A2 and B use sole source worker /root/pos_ui_new, while independent report scope C uses /root/invoice_new. Current baseline 0d002356d0d3677d01bba61c70eccbfcd788b504. This claim must pass applicable CI and merge to main before runtime edits. The four bounded causes below will use separate source PRs; A1, A2 and B are three distinct POS source PRs. No general transfer of POS, KAT, header, payment or fiscal ownership is asserted, and no absent prior-owner agreement is invented. The owner's new request authorizes only the narrow scopes explicitly listed below; retained owners and accepted behaviors outside that scope remain intact.

A1 - POS-LAYOUT-REQUESTS-28: PDF items 2, 3 and 6. Branch fix/pos-layout-requests-20261028, worker /root/pos_ui_new. Move the existing single last-completed-transaction indicator to the requested top area of the basket; make the relevant POS buttons more compact while preserving usable pointer targets and keyboard access; place cash and card controls at separate non-neighboring positions with matching DOM and visual order. These are presentation requirements, not a report of a failed payment. Exact source/test scope is client/src/components/store/StorePosPanel.jsx (only these presentation sections), client/src/components/store/pos-ui-v2.css, server/test/pos-last-transaction.test.js and server/test/pos-ui-v2-layout.test.js. No second completion indicator, financial-state reinterpretation, new payment call, tender payload or callback change. Required proof includes single indicator/location/reset and scoped amount-state regressions, existing font/calculator/viewport variants, cash/card hit-target separation and continued reachability of all 20 quick/root keys and the same synthetic basket, without a checkout or business request.

A1 technical receipt 28/10/2026 - INSTALLED TECHNICAL SCOPE / ACTUAL USER ACCEPTANCE OPEN. Source PR3257 head06afb8548836b6e62e93f104258264a1d87edf1f passed exact CI40710047364

Render dep-dbh181bbc2fs73bqnqi0 was LIVE1d5aa484 at2026-10-28T15:27:55.835710Z; root independent no-cache health15:28:59Z returnedHTTP200/ok=true/exact revision (publisher corroborated15:29:04Z). This establishes engineering integration and technical installation only. Actual authorized-user visual/physical/payment acceptance is NOT TESTED; no new USER/LAB/manual PASS or transaction replay.

Retained appearance/modern-layout owner feat/pos-ui-v2-appearance-3012 and the selected-design coordination remain authoritative in CHECKPOINTS/CHANGES/2026-10-22-pos-ui-v2-appearance.md and 2026-10-22-pos-ui-v2-selected-modern-design-3012.md. Retained header owner fix/pos-header-collapse-20261016 and last-transaction owner codex/pos-last-transaction-20261012 remain protected. The latter has limited owner-reported USER PASS on 12Oct22:48:39 Athens for completed amount and tap-to-zero, recorded in CHECKPOINTS/CHANGES/2026-10-12-pos-last-transaction.md and docs/manual/pos/PASS.md. Preserve that amount/reset meaning, one indicator, scoped memory/frame and late-response protection, all original checkout/payment/scanner/menu/focus behavior and every protected transaction identity. Do not repeat accepted sales to demonstrate a layout change.

A2 - POS-EMPTY-EDITOR-28: PDF item 4. Branch fix/pos-empty-editor-20261028, same sole worker /root/pos_ui_new. The owner reports that the arrow controls do not allow adding a product. A read-only synthetic mounted diagnostic importing the exact current components reproduced a narrower cause: an assigned quick-key arrow opens its editor; an empty quick key is disabled and editor open() returns when no button exists; dispatching the empty hot-zone click also leaves the editor absent. Zero API calls were made. This is a synthetic UI FAIL, not an observed production transaction or physical LAB FAIL. The root scratch diagnostic pos-ui-new-readonly/reproduce-empty-key.mjs retains the reproduction; its earlier exact-main3c49 component bytes were checked unchanged against the current 0d002356d source base.

A2 technical receipt 28/10/2026 - INSTALLED TECHNICAL SCOPE / ACTUAL USER ACCEPTANCE OPEN. Source PR3256 head40d2f484a262f06ca50929a633023e6c9e20ca05 passed exact CI40709456154 / job122891005789:4476 server+8 backup PASS/0FAIL/0SKIP, including actual Chromium editor2616. Merged main0d1f9991314916a4102aacea6542520c7ec0de99 preserves retained cash source. Legitimate descendant A1 main1d5aa484992af92f6e3b998ff521d0dc4bd4f0b4 includes these source blobs; exact combined main CI40713704101 / job122906934937 passed4494+8/0/0 and actual editor2628. Ordinary guard40715605409 / job122912499075 actually triggered/waited exact1d5; Render dep-dbh181bbc2fs73bqnqi0 LIVE2026-10-28T15:27:55.835710Z, root no-cache health15:28:59Z HTTP200/ok=true/exact1d5 (publisher15:29:04Z). Existing scoped layout PUT and client-side stale-layout refusal are preserved; server concurrency semantics are unchanged, with no server CAS guarantee asserted. Actual authorized-user editor/save/physical acceptance is NOT TESTED; existing KAT configuration was not changed, and no new USER/LAB/manual PASS is claimed.

Exact A2 scope is client/src/components/store/PosModernCatalog.jsx, client/src/components/store/StorePosButtonEditor.jsx, client/src/components/store/store-pos-button-editor.css, NEW server/test/pos-button-editor-empty-slot.test.js, server/test/pos-modern-catalog-mounted.test.js, server/test/pos-modern-catalog-keyboard.test.js and server/test/pos-configured-category-count-ui.test.js (only existing opener/host fixture compatibility, retaining every alias/ID/scoped-layout-PUT assertion). Provide an explicit keyboard-accessible edit control only for a current editPosButtons grant, separate from the product-selling target. Correct only reachability and safe initialization of a blank slot draft, choosing an existing same-store product; do not create a product, save automatically or mutate the input layout. Preserve assigned-key behavior, existing store-specific IDs/aliases, nested categories, permission checks, existing scoped layout PUT and client-side stale-layout refusal; server concurrency semantics are unchanged. Required synthetic proof covers assigned/empty slot, absent/false/revoked permission, normal sale click, keyboard, no API before Save, a single mocked scoped existing layout PUT after Save, unchanged source layout, store switch and 20-root navigation. Retained KAT owner ops/kat-catalog-import-20261020 / feat/kat-pos-photo-layout-20261021 and

CHECKPOINTS/CHANGES/2026-10-21-kat-pos-photo-keys.md remain authoritative: actual saved KAT layout v3702 has bounded configuration PASS for 20 quick positions, 20 roots, 7 children and 242 mapped IDs. Do not overwrite that configuration, publish GLOBAL, invent products/prices or label editor/physical clicks as previously accepted. Source tests use isolated synthetic data; no real catalog write is part of this claim.

B - POS-CLOSE-WITHOUT-PRINT-PERMISSION-28: PDF item 7 and explicit separate-permission answer. Branch fix/pos-no-print-permission-20261028, worker /root/pos_ui_new; serialize the shared StorePosPanel edit with A1. The user explicitly answered that this action is allowed only with a separate permission. Add a dedicated closeWithoutPrint operator checkbox, absent/false by default, admitted only when the current persisted profile value is strictly boolean true, and a dedicated runtime grant such as POS_CLOSE_WITHOUT_PRINT. The existing generic profile JSON PATCH already stores permission fields; no schema, login/credential or operator-management backend expansion. Current-profile authorization must refuse unauthorized STORE_OPERATOR requests at both existing POST /api/store-pos/stores/:storeId/waste and POST /api/store-pos/stores/:storeId/table-orders/:orderId/waste before their business handlers execute. A store-operator MANAGER role does not replace this explicit grant. Preserve ordinary administrative access and existing company/store/operator/session/terminal boundaries. Hide the UI entry without the grant and reject a retained callback after revocation; a checkbox display or stale token is not server authorization. Do not grant a permission to a real operator as part of the source work.

B technical receipt 28/10/2026 - INSTALLED TECHNICAL SCOPE / ACTUAL USER ACCEPTANCE OPEN. Source PR3259 head3cc5c8b0c0e193d48cb7c25a96f0a7a0ffc2ce8d passed exact CI40714405306 / job122908669071:4499 server+8 backup PASS/0FAIL/0SKIP, including all five actual dedicated-permission cases2378-2382. Merged main606a3bc3506b35c602518dcd16c09bb0659509c5 preserves A1/A2 and retained cash; exact main CI40717539266 / job122921071938 passed4499+8/0/0 and the same five cases. Ordinary guard40720557944 / job122930183843 actually triggered pinned606a and waited for expected healthy revision, independently checked by root. Render dep-dbh1ogoae00c73dkpa90 LIVE606a at2026-10-28T16:03:37.056595Z; root independent no-cache health16:05:25Z HTTP200/ok=true/exact606a (publisher16:05:09Z). Dedicated closeWithoutPrint remains strict boolean true/default false, checked against current persisted profile before both business entrypoints. No real permission grant or no-print transaction was performed. Actual authorized-user/financial acceptance is NOT TESTED; no new USER/LAB/manual PASS.

Exact B scope is client/src/components/commerce/OperatorManagementPanel.jsx, client/src/components/store/StorePosPanel.jsx (no-print entry/callback gate only), server/src/middleware/auth.js (dedicated current-profile permission projection only), server/src/routes/store-pos-catalog.js (dedicated guard at the two existing entrypoints only), server/test/operator-checkbox-acceptance.test.js, server/test/pos-close-without-print.test.js, NEW server/test/pos-close-without-print-permission.test.js, and existing server/test/helpers/pos-modern-fixture.mjs ONLY to explicitly grant closeWithoutPrint:true in the already-authorized geometry fixture so all eight footer controls remain tested. Retained codex/operator-checkbox-audit-20261009 / CHECKPOINTS/CHANGES/2026-10-09-operator-checkbox-audit.md owns the other role/permission flows; retained codex/pos-close-without-print-20261008 / CHECKPOINTS/CHANGES/2026-10-08-pos-close-without-print.md owns existing business semantics, with table-service ownership intact. Preserve NON_FISCAL/CASH-turnover, WASTE stock/reporting, current server prices, request endpoints/bodies/whole-table reason, duplicate-click and failure-retained-cart behavior. No stock, cash, fiscal, accounting, table or WASTE-handler redesign. Required proof: checkbox default/roundtrip and other retained values; strict true versus false/absent/string/number; fresh server grant/revoke and foreign/stale-scope denial before zero business effects; authorized existing payload unchanged; actual mounted entry/callback revocation. Update only the old authorized no-print and geometry test fixtures to explicitly grant the new permission without deleting protected behavioral assertions; adjust operator-checkbox counts to 25/23 with an explicit new default-false field and persisted-true coverage, not weaker assertions. No real no-print action, automatic retry/offline queue or accepted transaction replay.

C - INVOICE-MONTH-AUDIT-01: first functional read-only monthly-review slice of PDF item 8; items 9-10 remain later phases. Branch feat/invoice-month-audit-20261028, sole worker /root/invoice_new. Implement an actual BackOffice screen titled «Έλεγχος τιμολογίων μήνα», not an unmounted policy. The owner's new report request permits this bounded addition, not general ownership transfer of invoice intake, OCR/Gate3, payment/common drafts, cash reporting, scheduler/dispatch/recipients, scanner/device setup or lifecycle/backup. Existing owners and accepted assistant pathway remain protected. This slice does not send a message, schedule work, persist a historical snapshot, call OCR/AI/provider or change document/payment order. The user explicitly clarified item 10 means better reading only.

C technical receipt 28/10/2026 - INSTALLED TECHNICAL SCOPE / ACTUAL USER ACCEPTANCE OPEN. Source PR3258 final head95f33182b0e30072e70bb89a6ad0d1087691c841 passed all five exact CI40724934418 jobs. Actual job122948350493:4539 server+8 backup PASS/0FAIL/0SKIP, native registered PostgreSQL1879 with all seven subcases and actual desktop/mobile/native-keyboard Chromium1887 PASS. Normal expected-head squash merge produced main ac5850c0d9c5e5b170500badded0a9cb10537b19, exact clean combined tree0f09c5db71ac0661cc08ac9cba94525aaf200e0a preserving A1/A2/B and fresh cash source/owner bytes. Exact main CI40729155657 all five jobs SUCCESS; actual job122962061903 independently checked by root:4539+8 PASS/0FAIL/0SKIP, native1879 and Chromium1887 PASS. Earlier ordinary guard40729436750 / job122962382410 was cancelled during full-history fetch before preflight or deployment. The subsequent ordinary workflow_run guard40731246705 / job122968066948 completed SUCCESS: actual preflight pinned CI_RUN_ID40729155657 and expected ac5850, actual deployment trigger17:08:37.137Z and expected healthy revision17:11:51.511Z, independently read by root. Render dep-dbh2o56k1f9s73dmtfp0 was LIVE exactac5850 at2026-10-28T17:11:34.649527Z. Root independent no-cache health17:12:35Z returned HTTP200/ok=true/exactac5850; publisher corroborated17:12:31Z. No manual dispatch or deployment bypass was used. Actual authorized-user report acceptance is NOT TESTED; no USER/LAB/manual PASS. Earlier failed CI and corrected runtime/privacy/keyboard-driver evidence remains historical. Automatic email, durable snapshot and OCR accuracy remain OPEN.

Exact C source/test scope - ten paths: NEW server/src/services/monthly-invoice-audit.js; NEW server/src/routes/monthly-invoice-audit.js; server/src/index.js ONLY new router import and one authenticated INVENTORY-gated mount under /api/reports with existing route order/behavior preserved; NEW client/src/components/commerce/MonthlyInvoiceAuditPanel.jsx with self-contained presentation; client/src/components/commerce/CommerceHub.jsx ONLY import, INVENTORY-gated launcher and panel using validated explicit activeStoreId; NEW server/test/monthly-invoice-audit.test.js; NEW server/test/monthly-invoice-audit-postgres.test.js; NEW server/test/monthly-invoice-audit-ui.test.js; NEW server/e2e/monthly-invoice-audit-fixture.jsx; NEW server/e2e/monthly-invoice-audit-browser-flow.mjs. No legacy stores[0] fallback or company-wide mode. No existing intake, common-draft, pending-invoice, scheduler, automatic-report, lifecycle, schema or workflow file is changed. Real browser verification runs through the new server test, mandatory in CI, without ci.yml edits. Any further compatibility-test edit needs a named before-source amendment.

The GET-only /invoice-month-audit route validates strict month/store/page inputs and sends Cache-Control:no-store. Enforce current persisted actor role/company/store restriction, active selected store and applicable existing company/store entitlements; reject STORE_OPERATOR and missing/foreign/inactive selection. Client filtering is not authorization and no role is granted. Use one read-only RepeatableRead source transaction, no ensure/bootstrap/DDL, cleanup side effect or mutation lock. Summary SQL covers the complete declared source; details use deterministic keyset paging without turning a page limit into incomplete counts or false zero. Resource/source limits must report incomplete/unknown and prevent an all-clear. Use document issue month with explicit bounds; missing issue dates are unknown, while arrival/registration/payment dates are separately labelled rather than substituted. As-of/source metadata identifies a generated live read, not a durable historical snapshot.

The existing trusted pending-obligation reader is reused unchanged. Pending-original obligations appear in a separate prominent «Όλοι οι μήνες» section with complete aggregate counts, the first 50 detail records and an explicit truncation indicator. They are NOT included in the selected document-month counts. An exact month-filtered pending interface remains a future coordinated change; the main document-issue-month audit retains complete summary SQL and deterministic paging. MISSING_ORIGINAL findings from that unchanged pending reader therefore belong to the separately labelled all-months section, not a silently substituted payment/arrival month. Test this separation, counts beyond 50 details, visible truncation and unavailable-source coverage.

Source domains include PurchaseDocument/PurchaseOrder with explicit posting/alias links, deferred-payment retained source evidence and received myDATA/DocumentInbox where applicable. Read-only optional-schema probes must expose unavailable coverage rather than silently declare no problems. Collapse representations only through validated same-company/store explicit links and consistent original identity: source document, order, approved projection, myDATA row and confirmed alias can be one physical invoice. Broken/contradictory links remain review; confirmed aliases are not duplicate invoices. Distinct logical invoices with corroborated supplier/series/number/date/type/total may be POSSIBLE_DUPLICATE for human review, never automatic merge/delete. Preserve credit/reversal/cancellation facts, missing versus different VAT and genuine repeated product lines. Reuse only existing pure identity helpers, not ensure/merge/posting functions.

Keep findings separate: MISSING_ORIGINAL, UPLOADED_AWAITING_REVIEW, UNPOSTED_DOCUMENT, POSSIBLE_DUPLICATE and IDENTITY_OR_LINK_REVIEW. Unposted is not unpaid. Required proof includes registered GET/native PostgreSQL current-role revocation and scope/licence denial, absent optional schema, full summary beyond a detail page, identity/alias chains counted once, distinct possible duplicates, contradictory links, unknown dates/month boundaries and concurrent-source consistency. Actual mounted panel must reject absent/stale store/month selection, abort late responses, distinguish edited from loaded period, escape labels and expose coverage/errors; real Chromium synthetic browser evidence and exact full PR/main CI are required before guarded technical release. No business/audit/financial/stock/fiscal writes, provider/send or real document replay is included, and no CI result creates a manual/LAB PASS.

C following phases remain OPEN: item 8 explicitly requests an email on the last day of each month; later delivery requires verified recipients, agreed local time and existing consent/recipient safeguards plus coordinated scheduler integration, not a choice of email versus SMS. This does not authorize a real email during development. Item 9 immutable monthly warehouse/invoice-obligation snapshot requires lifecycle/backup/retention coordination, and item 10 causal reading-accuracy improvement requires the established supplier evidence. A provisional last-day reminder is not a complete closed-month report; a current ledger-as-of or generated source hash is not frozen historical storage. No automatic external email, paid provider invocation, new upload/payment or final posting is performed by this claim.

E1 - INVOICE-AUDIT-EMAIL-PREVIEW-01 / LIMITED READ-ONLY LAB PASS / AUTOMATIC EMAIL E2/E3 OPEN. Same retained root-coordinated E1 owner; exact scope/evidence below.

E1 limited read-only LAB PASS 31/10/2026 - AUTHENTICATED DESKTOP PREVIEW ACCEPTED / AUTOMATIC EMAIL E2/E3 OPEN. Retained root-coordinated E1 owner feat/invoice-audit-email-preview-20261028; receipt branch docs/e1-preview-lab-receipt-20261031. Actual existing legitimate SuperAdmin support session, Cloud Chrome desktop, virtual MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ only. Pointer October preview20:27:26Athens displayed14entries/9unposted/6uploaded-review/0possible-duplicates/11identity-link findings/0credits,14detail rows/all-month pending originals0. Real native keyboard month selection and Enter September preview20:31:24 displayed59/50/48/0/25/1, first50details with truncation visible/all-month pending0. These are current observed UI counts, not independent accounting/OCR/classifier or reconstructed historical proof. Both showed one verified masked recipient, current monthly-frequency consent0, purposeConsent:NOT_ASSUMED and sendingOFF, separate report/recipient observation times and provisional month-end23:59Athens wording. Native month change cleared old preview; returning October cleared September. Closed overlay without saving; original MAIN remained0transactions/cash/card/IRIS/total. Root independent no-cache HTTP200/oktrue/exact8b76cad4c16c571239940d8038bb248e3cae2819/EXIT0, HTTPDate31Oct18:31:19UTC; five E1 runtime/UI files byte-identical installedca58f2fa to8b76, actual index import/mount89/283 separately reviewed. Original source3266/fullPR40739082475/main40741750232 and ordinary guarded40744257217 delivery remain protected. Fresh read-only SQL18:26:38.405419→18:32:24.509989UTC matched all explicitly recorded business/control projections: full selected Sale90/Payment90/PurchaseDocumentLine713/StockMovement95/CashShiftSession43/StoreProduct110; bounded StoreTransaction134/PurchaseDocument71 projections; sibling-label stock/movement1each; company Product110 id+updatedAt only. Not whole Product/whole DB or AuthAudit/session-last-seen invariance. Initial Playwrightfill did not commit native React month state, not an applicationFAIL; real arrows/Enter succeeded. Two October JPGs/hash checks retained; one September selection screenshot failed transfer, no all-device/artifact-reliability PASS. No send/invitation/provider/consent/settings/grant/schema/install, sale/return/payment/stock/approval/finalization or accepted fixture replay. Limited PASS only this selected-store/month desktop preview and read-only controls; independent Owner/staff/foreign role, mobile/physical, financial/OCR accuracy and delivery NOT TESTED. E2 purpose-specific persistence/grant/consent/idempotency/lifecycle and E3 guarded scheduling/mail activation/real acceptance remain OPEN with codex/cash-chat-reconciliation-20261026; no ownership transfer, CASH consent reuse or whole item8 closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-invoice-audit-email-preview.md; evidence CHECKPOINTS/EVIDENCE/invoice-audit-email-preview-20261031/; usage docs/manual/invoice-audit-email-preview/PASS.md. Completed E1 desktop-preview acceptance is removed from pending; all remaining automatic-email/device/OCR/inventory owners retained.

Historical E1 before-source claim: Sole worker /root/invoice_new, branch feat/invoice-audit-email-preview-20261028, checkpoint CHECKPOINTS/CHANGES/2026-10-28-invoice-audit-email-preview.md. Root reviewed the bounded actual-UI/read-only-GET proposal. Source starts only after this separate claim passes applicable CI and merges, and C has exact merged source/main CI green (met). The coordinator explicitly removed C Render LIVE as a prerequisite for isolated E1 engineering after prolonged guard checkout; C release continues independently without bypass. No email/send, scheduler, persistent snapshot, consent/grant, schema or provider work is authorized by E1.

The user settled email at the last calendar day 23:59 Europe/Athens to the same already-verified store-report recipients, and separate first-day 07:00 Athens durable warehouse snapshot. E1 provides only an explicit monthly-audit-panel preview action showing escaped subject/plain body, complete-source counts where known, first50/truncation and separate «Όλοι οι μήνες» pending findings. Findings do not block preview. Incomplete coverage is unknown, never zero/all-clear. Current observedAt is NOW, nominalScheduledAt is labelled provisional; no fake historical asOf or final-month accounting assertion. The unchanged C reader and separately timestamped read-only recipient summary use separateSnapshots:true. Masked verified identities, sendingEnabled:false and purposeConsent:NOT_ASSUMED do not grant MONTHLY consent or reuse CASH consent. Existing retained LAB recipient verification/consent limits remain unchanged; no real message is sent.

Exactly 13 source/test paths:

1 NEW server/src/services/invoice-audit-email-period.js

2 NEW server/src/services/invoice-audit-email-payload.js

3 NEW server/src/services/invoice-audit-email-preview.js

4 NEW server/src/routes/invoice-audit-email-preview.js

5 server/src/index.js — ONLY new import and authenticated INVENTORY-gated exact GET route mount /api/reports/invoice-audit-email-preview; preserve other route ordering and shared mounts

6 client/src/components/commerce/MonthlyInvoiceAuditPanel.jsx — ONLY explicit preview action, escaped preview content, current-scope isolation and self-contained presentation

7 NEW server/test/invoice-audit-email-period.test.js

8 NEW server/test/invoice-audit-email-payload.test.js

9 NEW server/test/invoice-audit-email-preview.test.js

10 NEW server/test/invoice-audit-email-preview-postgres.test.js

11 server/test/monthly-invoice-audit-ui.test.js — add actual mounted preview/current-scope regressions without weakening retained C assertions

12 server/e2e/monthly-invoice-audit-fixture.jsx — add synthetic read-only preview response and request evidence

13 server/e2e/monthly-invoice-audit-browser-flow.mjs — add actual pointer/keyboard preview checks; retain mandatory C desktop/mobile/first-render privacy/native keyboard checks

GET accepts explicit selected store/month only and rejects send/recipient/activation/asOf fields. Require current persisted personal User, admitted role, company/store and current INVENTORY entitlement; STORE_OPERATOR is denied and existing auth handles other token classes. UI masks old preview in the first committed render on store/API/month mismatch, aborts late responses and preserves C report-month semantics, native keyboard and all original privacy assertions. No raw email export, attachments, OCR/provider/private payload or unauthenticated report link. Required exact PR/main CI includes real registered GET/native PostgreSQL and actual desktop/mobile Chromium, no environment skip as successful proof. No manual/USER/LAB PASS follows from engineering CI.

Protected owners: codex/cash-chat-reconciliation-20261026 keeps cash reports/settings/recipients/consent/grants/dispatch/transport/scheduler; feat/store-shifts-inventory-clear-20261018 keeps lifecycle/reset/delete/backup/retention. C identity/posting/pending reader and invoice intake/common-draft/OCR/Gate3/device owners are unchanged. Serialize the narrow index.js mount through sole publisher, preserve all fresh-main bytes. E2 purpose-specific persistence/grants/idempotency/lifecycle and E3 guarded scheduler/mail activation/real acceptance stay OPEN; item9 durable snapshot and item10 reading accuracy remain separate, with payment order unchanged. No source beyond these13 paths without a named before-source amendment.

D1 - MONTHLY-INVENTORY-SNAPSHOT-CONTRACT-01 / MERGED INTERNAL FOUNDATION / ACTUAL MONTHLY CAPTURE OPEN.

D1 technical integration receipt 29/10/2026 - ENGINEERING FOUNDATION TECHNICALLY INSTALLED / NO FUNCTIONAL SNAPSHOT OR USER-LAB PASS. Source PR3269 exact head77069f8b22b0c865ea51e92dc5c7749f49198ab7 and reviewed treeaa82d0050ffd7e12f6027100aef78ba76ce6e113 passed full CI40760985560. Initial attempt failed three existing Chromium startup/Target.createTarget timeouts (4568PASS/3FAIL/0SKIP); unchanged-source rerun completed all five jobs SUCCESS, actual build job123288602585:4571server+8backupPASS/0FAIL/0SKIP. Normal expected-head squash merge produced86a5b5b32cdcf9942044b48b608be5fc52e49ed0 on parent34a8917, exact reviewed treeaa82d005. Exact merged-main CI40940258338 allfivejobsSUCCESS, actual job123681995303:4571server+8backupPASS/0FAIL/0SKIP, required native/browser/build/archive/realHTTP checks executed. Root independently read exact CI evidence and confirmed source/tree preservation. Ordinary workflow_run guard40942053322/job123687790646 completed SUCCESS: root independently read actual CI_RUN_ID40940258338/EXPECTED86a5 pinned preflight, deployment trigger29Oct19:40:37.1022058Z and exact healthy-revision wait19:45:52.9340213Z. Root independently queried Render dep-dbhq2d0n74is73eo51gg: LIVE exact86a5b5, finished19:45:37.235214Z. Root own no-cache GET /api/health at19:46:22Z returned HTTP200,ok=true,exact86a5b5b32cdcf9942044b48b608be5fc52e49ed0, shell exit0. This verifies engineering source integration/delivery only, not a functional stored snapshot. No manual deploy, rollback or guard bypass. This supersedes older source-candidate/awaiting-CI wording only for this bounded internal foundation.

D1 remains unmounted pure date/format/candidate validation only: candidateOnly:true,persisted:false,FORMAT_VALIDATED_ONLY. No source reader, stock capture, DB/storage/schema, route/UI, scheduler, recipient/consent/provider/email or business mutation. Its20000row/4MiB refusal bounds are engineering limits, not measured production capacity. Actual monthly capture, source authenticity/current authorization, permanent retention/reset/restore, automatic delivery and USER/LAB/manual acceptance remain NOT TESTED/OPEN. Item9 is not complete; the fixed first-day07:00Europe/Athens schedule remains agreed.

Historical before-source D1 claim (completed only for the bounded source integration): Same root-coordinated Work-page, source worker /root/snapshot_scope, branch feat/monthly-inventory-snapshot-contract-20261028. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-monthly-inventory-snapshot-contract.md. Source starts only after this exact independent claim has applicable green CI and merges. This is an internal pure immutable-format/date foundation, NOT stored capture, source authorization or whole item9 PASS. Actual monthly capture remains NOT TESTED; no runtime/UI installation or USER/LAB/manual PASS is claimed.

Exactly four NEW source/test paths: server/src/services/monthly-inventory-snapshot-period.js; server/src/services/monthly-inventory-snapshot-payload.js;

server/test/monthly-inventory-snapshot-period.test.js; server/test/monthly-inventory-snapshot-payload.test.js. No existing runtime, C reader/SQL, route, index, UI, schema, source reader, storage repository or scheduler file is included. Source PR updates only its own checkpoint/active evidence; central PDF synchronization occurs for claim and eventual technical receipt, without changing unrelated owners or numbered/manual PASS.

Period: strict issue-month2000-2099 maps to next month's first day07:00 Europe/Athens; stock observation time is separate. Pure explicit observation-time input refuses pre-due capture and labels late observation truthfully. No timer, Date.now, cron, catch-up or reconstructed historical inventory. Payload: detached/frozen versioned canonical UTF8 JSON candidate from explicitly supplied complete trusted projections; strict company/store/generation/revision, unique scoped product/obligation IDs and exact full source row/count coverage, deterministic ordering and whitelisted metadata. Decimal strings/BigInt preserve signed quantity and supplied operational retail/latest-approved-purchase costs without Number coercion, rounding, FIFO/WAC or missing-cost-to-zero. Unknown cost and mixed-unit totals stay explicit. Stable SHA256, unchanged inputs, bounded product/detail/source counts and canonical4MiB; proposed20000products is a refusal bound, not a capacity promise. Incomplete/over-limit/private/foreign/duplicate data is refused, never a complete partial snapshot or all-clear. A syntactically valid candidate proves no authorization, persistence or actual capture.

Pinned details: string-only decimal inputs (up to18 integer/12 fractional digits), canonical signed zero/trailing zeros and exact unrounded BigInt arithmetic; malformed quantity refuses, bounded malformed/missing monetary values remain null with UNKNOWN reasons/counts. Oversized raw input refuses before expansion (ID160, label512, SKU128, unit48 UTF8 bytes and fixed reason labels); no mixed-unit grand quantity. Limit20000 complete rows per collection and4MiB canonical total. Hash fields are excluded from their own fixed canonical projections; candidateOnly:true/persisted:false/FORMAT_VALIDATED_ONLY proves no authorization or real capture. Input2099-12 schedules2100-01; any positive delay is late, without invented grace.

Both sourceHash and payloadHash bind company/store/generation/month/nominal slot/actual sourceObservedAt/source revision/basis, not only row data. Source observation accepts only canonical explicit ISO timestamps. Exactly due is ON_TIME; any later instant is LATE with exact delayMs, and pre-due refuses. If any price/cost is unknown, the corresponding complete valuation total is null; a separately named known subtotal never represents full valuation. No silent truncation is allowed.

Invoice facts come from the future C-owned trusted in-transaction adapter, with previous issue month separate from all-month pending originals. Do not reimplement invoice identity/posting classification or pretend C's first50 detail/pending page is a complete freeze. Pending/unposted/duplicate findings remain allowed; unposted is not unpaid. Pure tests cover Gregorian/Athens boundaries, before-due/late truthfulness, precise signed/unknown values, stable hashes and input detachment, duplicate/foreign IDs, count/source incompleteness, private fields and early resource bounds. Full exact PR/main CI and independent review remain required for engineering integration; no DB/provider/browser/functional acceptance is claimed from pure tests.

Retained owners unchanged: feat/store-shifts-inventory-clear-20261018 / consolidated feat/store-lifecycle-central-execution-20261019 keep durable relations, manifest/columns, reset KEEP/REMOVE, generation/enrollment, backup/private retention/full-selective restore, workers and provisioning; codex/central-auto-dispatch-20261022 keeps scheduling/start-stop/recipients/consent/dispatch; C owner keeps actual invoice reader/SQL/adapter extraction. Current e3e175 history/registries show no D handoff; old archive/empty-scope transfers do not cover MonthlyInventorySnapshot. No storage/schema/DDL/ensure, settings/grant, email/provider, stock/payment/fiscal operation or accepted-test replay. D2 durable functionality still requires a published exact lifecycle/scheduler/source-adapter handoff and reviewed generation/reset/history/restore contract; generic audit/CASH payload reuse cannot bypass it. Automatic email/E2/E3, durable item9, OCR and devices remain OPEN.

C2 - MONTHLY-INVOICE-SNAPSHOT-PROJECTION-01 / TECHNICALLY INSTALLED / ACTUAL DURABLE CAPTURE OPEN.

C2 technical integration receipt 29/10/2026 - TECHNICALLY INSTALLED / EXACT MAIN CI AND ORDINARY RELEASE VERIFIED / NO DURABLE SNAPSHOT OR USER-LAB PASS. Claim PR3275/CI40945429152 merged dafd06e before source. Source PR3281 exact head d573e4a713ae49f6c1f6c211807f5cc146fc7abb passed all five full CI40950313957 jobs; root independently read actual build job123717020866:4595server+8backupPASS/0FAIL/0SKIP, actual native parent1934 with all seven subcases and pure1935-1941 executed PASS. Native proof includes75pending/61invoice full SQL projection, exact D1 composition with synthetic stock, unchanged legacy50/status/fingerprint, held snapshot/concurrent source and role controls, missing schema/zero intents,20001row refusal and guarded JSON aggregation/NULL-money byte bounds. These are isolated engineering checks, not production capture or physical acceptance.

Normal expected-head merge produced ce5ec3a6b37c3844aa57298a88a787ed05ec1def, tree f150990b82bb91fea204a8c2a679d1fbc88dd39b, on current parent15f72c60f4aab29d67d655e27e976963bbbc2616. Root compared all four source/test blobs and own source checkpoint to the reviewed freeze, with only the own C2 active paragraph integration; incoming cash source3278 and its green CI40950440841, cash claim3283 and every other owner remain preserved. Exact merged-main CI40953041609 passed all five required jobs; root independently read actual build job123730421994:4606server+8backupPASS/0FAIL/0SKIP, including native parent1945 with all seven subcases executed PASS. Ordinary workflow_run guard40955679300/deploy job123735152996 pinned CI_RUN_ID40953041609 and EXPECTED_REVISIONce5ec3a6b37c3844aa57298a88a787ed05ec1def; actual Render request29Oct21:13:07.5077482Z and exact healthy wait21:15:11.0236084Z succeeded. Render dep-dbhrdougekts73c4u4fg was LIVE on that exact source revision, finished21:15:04.045549Z. Root independently verified no-cache public health29Oct21:16:29Z (23:16:29 Europe/Athens), HTTP200/oktrue/exactce5/exit0. This confirms technical source delivery only; no actual durable snapshot or business acceptance. No manual deployment or guard bypass.

Bounded source outcome: existing C/deferred readers share their canonical source/classification/decision cores; the unmounted complete invoice/pending metadata adapter retains exact decimal text, actual read-only RR transaction/time admission and truthful coverage. Existing public C GET and legacy pending50/numeric/status/fingerprint behavior remain protected. No source stock reader, permanent storage/schema/DDL, route/UI, scheduler/recipient/consent/provider/email or business/create/capture/ACK writer is added. D1 candidate flags remain candidateOnly:true,persisted:false,FORMAT_VALIDATED_ONLY; actual durable monthly capture, stock source, lifecycle/history/reset/restore, scheduling and whole item9/USER/LAB/manual acceptance remain OPEN.

Historical before-source C2 claim (completed by PR3275/main dafd06e): Same root-coordinated Work-page and retained central owner codex/central-four-streams-20261018; branch feat/monthly-invoice-snapshot-projection-20261029, sole source writer assigned by root after this exact claim passes applicable CI and merges. CHECKPOINTS/CHANGES/2026-10-26-pos-deferred-invoice-payment.md explicitly retains invoice worker/root/next_reports and original ownership of pos-pending-invoices.js. This is a bounded same-owner continuation of installed C/deferred readers, not a lifecycle/scheduler transfer. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-monthly-invoice-snapshot-projection.md controls the exact contract.

Exactly four source/test paths after claim green/main: existing server/src/services/monthly-invoice-audit.js and server/src/services/pos-pending-invoices.js; NEW server/test/monthly-invoice-snapshot-projection.test.js and server/test/monthly-invoice-snapshot-projection-postgres.test.js. Factor one C authorization/source/classification core and the EXISTING pendingProbe/decision CTE into shared private readers; no second identity/posting/pending classifier. Add an internal full metadata projection composable in one caller-held actual READ ONLY Repeatable Read/Serializable transaction. Recheck current persisted user/store/company/support/licence in that same snapshot; deny operators. PostgreSQL transaction_timestamp/clock_timestamp entry and exit verify age0..30000ms; caller now/asOf/observedAt is refused. Label transactionStartedAt separately from actual readStartedAt/readFinishedAt and authorization as assessed in the held snapshot, never exact MVCC cutoff/current-live/signed capture proof.

Preserve original C GET/classifier/paging/fingerprint/date and existing pending callers' fixed50rows/Number/status/count/fingerprint behavior. Full pending mode shares the exact source/provenance/tombstone/status decisions, exposes full schema-capability completeness and returns exact SQL decimal TEXT before JSON numeric decoding. Complete counts/materialized rows must match; fixed20000row and4MiB metadata limits refuse before projection, never truncate or invent clean zero. Selected-month canonical invoice primary money comes from its original decimal text, not rounded totalCents. Unknown or outside-month chosen-primary issue dates make freezing ineligible while preserving original group/primary/any-linked-source selection; no date substitution/drop/reclassification. All-month pending remains separate. Missing optional text maps to D1-compatible missing values, with fixed IDs/UTF8/enums and no private/source bytes.

Require real native RO/RR and concurrent-snapshot/current-role/licence/scope controls,51plus pending/full invoice output, exact decimals, missing-capability/zero-intent/count/oversize/date refusal and actual composition of eligible C2 output into unchanged buildMonthlyInventorySnapshotCandidate with explicitly synthetic stock/truthful time. Existing C/pending native/UI/unit regressions remain unchanged; exact full PR/mainCI, independent review and ordinary guarded exact release required. No business/create/capture/payment/close/ACK writer or D1 module changes. No HTTP/UI/index/schema/DDL/storage/lifecycle/backup/manifest/reset/history/restore/scheduler/recipient/consent/email/provider/financial/stock/fiscal changes or accepted replay. Durable D2 still requires retained lifecycle/scheduler handoff; C2 is complete source-metadata preparation, not stored capture or item9/USER/LAB/manual PASS.

D2 technical integration receipt 30/10/2026 - CODE LIVE / EXACT MAIN CI AND CURRENT HEALTH VERIFIED / API DEPLOYMENT PROVENANCE DEVIATION / NO PRODUCTION TABLE OR ACTUAL CAPTURE. PR3292 final headfd412b552d490dd01b703d07763254add25ae071/tree52ef1ddee2e0ac8a69e3c2ee2a30d033eed82b5e passed all five exact full CI40960723251 jobs: root actual build1237535807214649server+8backupPASS/0FAIL/0SKIP, native1925host+mandatoryPG18 full/selective private archive/reset/history and native1941all seven storage subcases PASS. Historical D3 before-source claim - gate satisfied by PR3303/mainf8007c / SAME-OWNER CONTINUATION. Sole owner/branch codex/central-monthly-inventory-capture-20261030, same root retaining D1/C2/D2; no other lifecycle/scheduler ownership transfers. Claim CHECKPOINTS/CHANGES/2026-10-30-monthly-inventory-source-capture-claim.md names exact bounded source/test paths and becomes effective only after applicable green CI and main merge, with D2 exact code LIVE/post-deployment main CI/current health verified and its API-origin/skipped-guard provenance deviation explicitly retained. Read ALL selected-store StoreProduct assignments including inactive/signed stock with complete scoped links/counts, exact existing operational price/cost basis, bounded latest-cost tie detection and BigInt PACKAGE division; bounded latest-cost ambiguity/nonrepresentable PACKAGE costs remain D1 INVALID/null with fixed named stockCostLimitations counts in the existing sourceCoverage JSON, preserving complete quantity/population and unknown valuation; malformed numeric/unit/denominator or incomplete sources HOLD. The explicit repository/readback amendment validates exact keys, integer bounds and sum against candidate INVALID cost counts, preserves original four-field legacy coverage and original replay metadata, and adds no SQL column/DDL/catalogue change or rounding/fallback masking. Compose complete stock and C2 in one actual READ ONLY RR transaction with existing enrolled generation, DB transaction start>=first-day07:00Athens due and total age<=30000ms; build unchanged D1 at the FINAL actual DB read finish, close read transaction, then use D2's fresh authorized generation-fenced immutable writer. Trusted server revision only; no supplied browser clocks/source proofs. D2 supplied-facts receipt/candidate flags stay honest. No HTTP/UI, schema/default activation, global lifecycle install/enrollment, scheduler/provider/email, financial/stock operation or accepted-test replay. Actual capture, production rollout and whole item9 remain OPEN. Single next action after this exact before-source claim merges: implement and natively verify the bounded source/coordinator slice.

Historical D2 before-source claim - OWNER-DIRECTED NARROW TAKEOVER / gate satisfied by PR3290/main0e3ad692. 29/10/2026 Europe/Athens. The owner explicitly answered «ΕΓΚΡΙΝΩ» to this page's concrete request to take over monthly snapshot storage, history and recovery. ΑΝΑΛΗΨΗ ΑΠΟ feat/store-shifts-inventory-clear-20261018 / feat/store-lifecycle-central-execution-20261019 - ASSIGNED codex/central-monthly-snapshot-storage-20261029, central root coordinator. This is an owner-directed narrow reassignment, not a fabricated old-owner release. It becomes the effective before-source record only after applicable green CI and main merge. Checkpoint CHECKPOINTS/CHANGES/2026-10-29-monthly-snapshot-storage-takeover.md controls exact paths and preservation rules.

Scope ONLY the new MonthlyInventorySnapshot immutable storage relation/repository, its exact column/raw-ID classification, generation/reset history exception and recovery coverage. All other lifecycle/reset/delete/provisioning/worker scope and codex/central-auto-dispatch-20261022 scheduling/activation remain retained. D1/C2 technical receipts and existing USER/LAB/manual evidence are preserved. The prior D2 formal REQUEST below is historical as to this narrow ownership decision; its technical two-phase/exact-byte/due/precision constraints remain the baseline. No scheduler/mail/provider, production DDL/reset/restore, paid resource, financial/stock operation or whole item9 acceptance is authorized by this claim. New storage/history/recovery implementation and actual native proof are NOT TESTED; no stored snapshot or USER/LAB PASS is claimed. Source may begin only after this claim merges green. Single next action: implement and natively verify the bounded storage/history/recovery slice under the new named owner, preserving unrelated owners.

Historical D2 formal handoff REQUEST (ownership decision superseded only by the owner-directed narrow takeover above) / NOT AN OLD-OWNER RELEASE. Root reviewed the concrete storage/history/recovery/two-phase proposal in CHECKPOINTS/CHANGES/2026-10-29-monthly-snapshot-storage-handoff-request.md. It requests the retained lifecycle owner review the exact MonthlyInventorySnapshot relation/columns, history-reset exception and recovery coverage, then name a sole receiving executor if accepted. It approves no schema, source path, migration, DDL, production action, retention duration, scheduler activation or takeover; no receiving owner is fabricated. Durable D2 remains OPEN with existing owners. Root invoice scope retains D1/C2; source PR3281 is merged and technically installed with exact full PR/main CI and ordinary guarded release verified as recorded above. The single next lifecycle action is review of this concrete REQUEST, not implementation under an assumed transfer.

Shared-file and remaining-scope boundaries. /root/pos_ui_new is the only writer to the claimed StorePosPanel presentation regions; PIN sections are untouched. Item 1 is superseded by the latest explicit user correction: «ΛΑΘΟΣ ΜΟΥ ΕΙΝΑΙ ΟΚ.. ΔΕΝ ΕΒΑΖΑ ΤΟ EFTPOS ΚΑΙ ΔΕΝ ΑΝΟΙΓΕ». Status USER CLARIFICATION / MISSING-EFTPOS PREREQUISITE RESOLVED: no PIN runtime defect is established and no runtime change is claimed. The private screenshot shows the LAB POS2 close form, PIN choice and EFTPOS input, not an actual completed shift close or exact revision. Do not publish that screenshot, infer a real-close USER/LAB PASS or replay a closure. Item 5 stays with DEVICE-SETUP-EASY-01 and its retained scanner/device owner. Item 7 is bounded by separate cause B, with its shared StorePosPanel source edits serialized with A1. Item 8 gains only the read-only report slice C here; notification remains separate. Item 9 durable snapshots and item 10 reading-accuracy changes remain later separately claimed phases; the owner clarified item 10 is better reading only, with no payment-order change.

Authoritative 28/10/2026 technical status: A1/A2/B/C/E1 are technically installed with exact PR/main CI, ordinary guard, Render LIVE and independent root-health evidence in their own subsections. Actual authorized-user acceptance remains OPEN. Automatic email/E2/E3, durable warehouse snapshot, OCR accuracy and device-owner residuals remain OPEN. No USER/LAB/manual PASS, actual email, scheduler activation, purpose grant, schema, stock/payment/fiscal operation or production transaction is inferred from technical installation.

Checkpoint CHECKPOINTS/CHANGES/2026-10-28-pos-immediate-ui-plan.md.

27/10/2026 — INSTALL-SUPPORT-PRINT-GUIDE-01 / USER-AUTHORIZED NARROW TAKEOVER / BEFORE SOURCE

28/10/2026 - PRINT GUIDE TECHNICALLY INSTALLED / ACTUAL USER AND PHYSICAL PRINT ACCEPTANCE OPEN

User-authorized narrow claim #3226 preceded source. PR #3229 exact reviewed head 2f09dc7f5f54b3a32a5213a5416bf6f9ecb0f280 passed full CI 40687951276 (job 122815867240): all five jobs SUCCESS, 4,453 server and 8 backup tests PASS / 0 FAIL / 0 SKIP. Normal expected-head merge produced main b8773ac909f1001be3987d84335571d5717a1c8e with the exact reviewed tree 149998083c61fb600cd8dfa80ebb8534e176040d. Exact merged-main CI 40689830869 (job 122822007940) also passed all five jobs with 4,453 server and 8 backup tests / 0 FAIL / 0 SKIP. Both exact logs contain the real Chromium isolated one-page PDF regression (ok 1090).

Ordinary guard 40691387009 / deploy job 122826888468 completed SUCCESS, including actual trigger and exact-revision wait (not a skipped deploy). Render service srv-d9isenfavr4c73bdh52g / workspace tea-d9ie26vaqgkc739uudqg deploy dep-dbgv0hmgekts738tv1a0 became LIVE at b8773ac909f1001be3987d84335571d5717a1c8e on 28Oct12:55:18Z. Independent root no-cache GET /api/health at12:55:44Z returned HTTP200, ok=true, exact b877; publisher corroborated12:56:06Z with the same result. No manual deploy, rollback or safeguard bypass.

Installed technical scope: the existing selected-store support overview offers an explicit printable static Greek fault guide. The output is a separate document built from fixed text only, not the application DOM or store data. It does not register an incident, invent contact data, disclose PINs/credentials or perform API, device, payment, stock or fiscal actions. Popup failure feedback and keyboard focus handling are covered by mounted tests. The Chromium regression used synthetic data at desktop and narrow viewport sizes, a real popup and CDP print-to-PDF; it verified one page, Greek text and exclusion of background/store sentinels. The fixture intercepts the native print call to avoid a modal dialog, so this evidence does not verify a native print dialog, physical printer or mobile operating system.

Status TECHNICALLY INSTALLED / AUTHENTICATED ACTUAL UI AND PHYSICAL PRINT ACCEPTANCE NOT TESTED. No USER, LAB, manual or hardware PASS is claimed and no manual/PASS entry is created from CI. Full INSTALL-SUPPORT remains OPEN: durable profiles, incident operations, attachments and lifecycle integration are not delivered by this slice; retained lifecycle owner and all other assignments remain unchanged. Older AWAITING CI/NOT INSTALLED paragraphs below are historical source preparation, superseded only by this narrowly scoped technical release receipt.

Checkpoint CHECKPOINTS/CHANGES/2026-10-27-install-support-print-guide-source.md.

The user explicitly authorized this conversation to take over the specific support page for a printable guide titled «Σε περίπτωση βλάβης». This direct user instruction replaces the usual prior-owner handoff only for this narrow print-guide scope. Previous retained central owner codex/central-four-streams-20261018 / worker /root/priority_support; receiving owner /root/support_design under central coordination. Existing ownership, history and acceptance for all other support work remain intact. Based on main 28da2047c4678f137d463de24d72d5dcdc92783f. This documentation claim must pass applicable CI and merge before source work begins.

Scope: a printable guide within the existing InstallationSupportProfile selected-store overview, using only currently authorized data already supplied to that component. Source scope limited to client/src/components/platform/InstallationSupportProfile.jsx, client/src/components/platform/installation-support-profile.css, and server/test/installation-support-profile-ui.test.js for meaningful focused tests, including unchanged protected flows and the existing focus trap. Additionally, NEW server/e2e/installation-support-fault-guide-fixture.jsx and NEW server/e2e/installation-support-fault-guide-browser-flow.mjs are authorized for isolated local browser evidence. No workflow ownership or .github/workflows/ci.yml edit is transferred; the browser flow is run locally. Print content must not invent store data, health or support status; absent facts remain clearly unknown. Protect tenant/store isolation and prevent credentials, PINs, tokens or other secrets from appearing. Preserve existing profile and launcher behavior; no other source edits under this claim. Verify rendering and print behavior in an isolated browser and retain any real-world printing/acceptance as OPEN until actually checked.

This does not transfer lifecycle or persistence ownership. No schema, database, backend, new API, authorization, store lifecycle, shared policy, reset/delete, backup/restore, device, payment, stock, fiscal or incident workflow changes. Retained lifecycle owner feat/store-shifts-inventory-clear-20261018 must separately review and hand off any future lifecycle or persistent-schema work. Persistent support profiles, incident operations, attachments and the full support module remain OPEN. Claim status: BEFORE SOURCE / NOT IMPLEMENTED / NOT INSTALLED / NO LAB OR USER PASS. Preserve other owners and their evidence; require independent review, exact CI and normal guarded release before describing source as delivered.

Checkpoint CHECKPOINTS/CHANGES/2026-10-27-install-support-print-guide.md.

27/10/2026 — INSTALL-SUPPORT-INCIDENT-POLICY-01 / PURE RULES MERGED AND RELEASED / FULL FEATURE OPEN

The storage-neutral incident policy and its tests were merged in PR #3215 at main 6994cf89d71792acb03a5bf53bd99968e65a13aa, following before-source claim #3212. The reviewed PR head f03dbc0aa0ef8f2849e45aa93c91c9ec1d0cab0b passed full CI 40550024605 (4,423 server tests and 8 backup tests, 0 failed, 0 skipped); exact merged-main CI 40552934117 passed (4,432 server and 8 backup, 0 failed, 0 skipped). Nine focused policy tests passed. Initial PR CI 40544002076 had five unrelated missing-jszip failures; retained cash owner resolved the direct test dependency in #3218 before the successful rerun on a new reviewed source head.

Release evidence: descendant 5bc05299c7d8fac038c04aa61f7e07030f5fe546 passed exact main CI 40555687515 (4,435 server and 8 backup, 0 failed, 0 skipped); ordinary guard 40558790722 job 122382031726 triggered and waited for that revision. Render deploy dep-dbgeobqfngtc738qmtlg is LIVE at 5bc from 2026-10-27T18:29:47Z. Independent no-cache health at 19:03:37Z returned HTTP 200, ok=true, revision 5bc. Earlier guard 40554920020 skipped its deployment because newer production source existed; its success was not treated as a deployment. Synthetic capacity results do not establish production capacity or endurance acceptance.

Scope and remaining work: this is pure unmounted code, not an operational incident feature; no API, database, schema, UI, permissions or actual business action was introduced. A named confirmer is unverified text until future server identity validation. Replay depends on a trusted receipt and future atomic persistence; a historical result need not be current state. Persistent INSTALL-SUPPORT, real incident handling, tenant authorization and durable transactional audit remain OPEN. Canonical lifecycle integration requires the retained lifecycle owner's review and scoped handoff. No actual LAB, user, manual or hardware PASS is claimed. All other owners and active work remain unchanged.

27/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / OWNER-DIRECTED TAKEOVER / HARDWARE FAIL

At 2026-10-27T17:44Z the owner explicitly authorized this conversation to take over scanner integration because the former page is unavailable. Receiving owner: codex/canon-lide400-scan-diagnostics-20261027; branch fix/canon-lide400-scan-diagnostics-20261027. This is a direct owner-directed transfer, not a claim that the former owner published a handoff. Scope: diagnose and correct the Windows WIA connector failure observed with Canon LiDE 400, preserve existing origin, pairing, explicit scan, image limits, no automatic upload/payment and all other camera/invoice/OCR/financial behavior.

USER OBSERVATION / FAIL: Windows scanner diagnostic reported success; Canon utility reportedly scanned; the MyWorkStation connector was paired and the physical scanner moved after the scan button, then the UI reported scan failure and no upload. Connector console displayed no diagnostic details. Cause remains unknown: the code collapses WIA exceptions into SCAN_FAILED; JPEG size/format and COM transfer are hypotheses only. Exact installed connector build and deployed web revision are not independently verified. No invoice/payment was submitted in the failed attempts. No hardware PASS.

Next: publish takeover before source changes, identify the failing stage without logging invoice content or credentials, make one bounded correction, run Windows CI and guarded deployment, then a separately identified non-financial physical acceptance. Do not replay accepted invoices or perform payment/stock/AI submissions. Existing capture scope and other owners remain protected.

27/10/2026 — INSTALL-SUPPORT-INCIDENT-POLICY-01 / ASSIGNED BEFORE SOURCE / PURE CONTRACT ONLY

CI JSZIP 01 — 27/10/2026 — ASSIGNED BEFORE CONFIG

Owner: codex/cash-chat-reconciliation-20261026; branch fix/cash-ci-jszip-20261027. Full automatic-cash PR3214 head771e8b3d CI40545007879 failed 4409 PASS / 5 FAIL / 0 SKIP, all five failures ERR_MODULE_NOT_FOUND for jszip in existing assistant DOCX/export test files; native isolated PostgreSQL reviewed cash offset passed unskipped. Current main server/package.json does not declare jszip, while those existing tests import it directly; npm install has no root lockfile and current dependency graph no longer provides it transitively. This is build/test dependency evidence only, not a new LAB PASS.

Claim ONLY adding jszip ^3.10.1 to server/package.json devDependencies so the five existing tests can import the package they already use. Do not change assistant/export source, test semantics, user data, runtime financial behavior, product dependencies, deployed configuration or other owners. Publish this claim green/main before that configuration edit. Check clean-install dependency resolution and the five existing tests, then require exact full cash PR CI and guarded main CI/deploy; actual cash LAB remains separately NOT TESTED. Keep cash scope ASSIGNED and existing PASS untouched. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-test-jszip.md.

Owner codex/central-four-streams-20261018, independent worker /root/support_design, branch codex/install-support-incident-policy-20261027; assignment 2026-10-27T18:25:15+02:00. User requested continuation until final real checks. Existing INSTALL-SUPPORT read-only overview #3209 remains technically installed with actual UI acceptance OPEN; this is a distinct preparation for the documented incident requirement, not a transfer of lifecycle, device, support-access, technician, or other owner. Based on fresh main 85a45b30d70b4df557f28bd1094e53fca720da43. Publish this before-source claim with applicable green CI and normal main merge BEFORE editing any source/test path; until then SOURCE NOT STARTED / NO INTEGRATION / NOT INSTALLED / NO LAB PASS.

Exact source/test scope ONLY: NEW server/src/services/installation-support-incident-policy.js and NEW server/test/installation-support-incident-policy.test.js. Implement deterministic, storage-neutral pure rules for incident status transitions: NEW → IN_REVIEW → IN_PROGRESS or WAITING → AWAITING_CONFIRMATION → CLOSED; return from IN_PROGRESS to WAITING and vice versa when appropriate; reopen CLOSED to IN_REVIEW only with a bounded nonempty reason. A closure requires a bounded factual resolution and a separately named confirmer, without inventing a requirement that confirmer differs from actor. Invalid states/transitions or missing actor, confirmation, reason or malformed/overlong/control-character inputs refuse with clear deterministic results. Validated actor identity/scope is supplied by the future caller; this library does not authenticate, authorize, grant roles or decide store membership.

Retry decisions must not assert durable idempotency from process memory: an exact duplicate can be identified only from an explicitly supplied trusted previous receipt with the same operation identity and same normalized request; changed reuse conflicts. Missing receipt cannot certify that prior work did not occur. No implicit clock/randomness, no network, API/route/mount, database/DDL, persistence/cache, existing source modification, role or permission expansion, files/uploads, provider, email, financial/stock/fiscal/shift or real business action. A real integrating service remains responsible for tenant/company/store authorization, concurrency/version, durable operation receipt, transactional audit, safe attachment handling and rollback.

Meaningful independent tests: every supported and refused transition, prerequisites for close/reopen, bounded text/control/empty inputs, invalid or missing actor, exact receipt replay vs changed-operation conflict vs no-receipt, normalization/determinism and unchanged input objects. No skipped failures, no CI-only manual or LAB PASS. Require independent review, exact full PR/main CI and ordinary guarded release before any claim of delivered code; as an unmounted pure contract, release is not an operational incident feature or full module.

Full durable INSTALL-SUPPORT remains OPEN, including permanent store profile, incident storage, technician ACL, actual workflow, attachments, maintenance and PDF/Excel. Canonical lifecycle requires reviewed table/columns, ownership, reset/delete semantics, backup/restore and matching worker manifest hash; retain owner feat/store-shifts-inventory-clear-20261018 and require a separate owner-reviewed narrow handoff before shared lifecycle or persistent schema edits. Existing overview/other owner claims and accepted Gates remain protected. Next action after claim merged: implement and test exactly the two pure paths, no runtime wiring.

Checkpoint CHECKPOINTS/CHANGES/2026-10-27-install-support-incident-policy.md.

27/10/2026 — INSTALL-SUPPORT-01 / READ-ONLY OVERVIEW TECHNICALLY INSTALLED / AWAITING ACTUAL UI ACCEPTANCE

Retained central owner codex/central-four-streams-20261018 / worker /root/priority_support; receipt prepared 2026-10-27T13:49:01+02:00 from fresh main 61e66bf4740bc42dc821865ddffd98ece2ceec76, preserving capacity receipt #3210 and every existing owner/record. Before-source claim #3207 exact head7c711ea01f87710973fa0bcbf383e366c73566ad / CI40493756183 SUCCESS / merged be970acf34daa13ea6188ef14e312e70003ffdf4 preceded the four-path implementation. Source #3209 head5d0c67e51657eb512ac82e4e6764812dd5fbdb0d normally merged c5da2fc96f94d75ef99ac89a3c689266b59918a0. Source and complete latest-main reconciliation reviewed independently. No source/config/schema or operational mutation in this documentation-only receipt.

Exact PR CI40495193086 all five jobs SUCCESS; build/test job122159129600: 4414 server tests plus8 backup tests PASS / 0 FAIL / 0 SKIP; client build12.59s, TABLE_SERVICE entry-DFDONUtg.js, required native/browser/invariant/archive/real HTTP and Windows checks. Exact main CI40496649022 all five jobs SUCCESS; job122164008145: same4414+8 PASS / 0 FAIL / 0 SKIP; build12.45s and same TABLE_SERVICE verification and required full checks. The new actual mounted React/JSDOM tests execute unskipped. Local Node20.20.2 focused5 PASS / 0 FAIL / 0 SKIP; guide and scheduler are inert fixtures, so those components' real backend/device behavior is not claimed. Work-safe local build PASS10.59s / TABLE_SERVICE entry-hqwBFSS9.js. First sparse-only local build failed because unchanged shared/greece-time.mjs was absent in isolated checkout; exact-base shared files restored before successful build; no production fallback or source weakening.

Ordinary guarded release40497963249/job122168222739 SUCCESS. Render existing service srv-d9isenfavr4c73bdh52g / workspace tea-d9ie26vaqgkc739uudqg deploy dep-dbg8s4ajnfac73fk1m60 LIVE source revision c5da2fc96f94d75ef99ac89a3c689266b59918a0 at27Oct11:46:23.677468UTC (13:46 Athens). Root independent unauthenticated no-cache GET /api/health27Oct11:47:10.099751UTC HTTP200/oktrue/exact c5da; publisher corroboration11:47:12.373899UTC HTTP200/oktrue/exact c5da. No manual deploy, rollback or bypass.

Technically installed scope ONLY: the existing Super Admin installation center offers a read-only support overview for the explicitly selected company/store. It renders only current existing authorized overview values: company/store name, city, address and responsible email; missing source values are not invented. Equipment, technician, remote connection and backup states are explicitly unchecked. The view resolves the current selected IDs against current props, rejects vanished or foreign selection, treats text as text, clears on close and adds no API call, backend/DDL/schema, attachment, permission, payment, stock, fiscal, provider or device action. Existing guide, terminal/REMOTE, scheduler and module settings controls are retained. The component is a view of existing records and does not create or update a permanent profile.

Status TECHNICALLY INSTALLED FOR THIS READ-ONLY SLICE / AWAITING MEASURED ACTUAL UI ACCEPTANCE. No real authenticated UI/device/store test was executed and no USER/LAB/manual PASS is claimed. Full INSTALL-SUPPORT remains OPEN: durable store profiles, incident lifecycle, visits/checklists, technician ACL, attachments, maintenance, central records and PDF/Excel exports are NOT completed by this release. Persistent table ownership, retention/reset/delete, audited writes and full/selective restore with exact worker-manifest version remain dependent on separate reviewed coordination with retained lifecycle owner feat/store-shifts-inventory-clear-20261018; this receipt grants no handoff or source claim in that owner's paths. No accepted action replay or real business operation occurred.

Checkpoint CHECKPOINTS/CHANGES/2026-10-27-install-support-readonly-overview.md. Retain assignment until actual read-only UI acceptance and the separately scoped durable-phase handoff.

27/10/2026 13:36:13 EET - CAPACITY20 HISTORICAL BURST DIAGNOSTIC / RETAINED OWNER / OPEN

Run37937519901/job113843198454 at historical aacae12: 84 logical actions =22 POS refresh +22 local searches +20 BackOffice searches +20 reports /106 HTTP. All22 refreshes completed, zero action errors/drops; isolated burst p95=4131.316ms/p99=4237.201ms FAIL, normal p95=322.196ms/peak310.730ms PASS in their qualified phase scopes. Endurance did not start, final after=null; no production capacity PASS. Each refresh aggregates three GETs plus JSON/resolver; no component timing/bytes or definitive root cause. Historic fixture/code implies ~4500 active items/store/~99000 across22 refreshes, not separately measured payload. 1s DB and ~7.5s resource samples cannot establish queue/CPU cause. Historical aacae12 differs from current source; no current performance inference.

Retained owners codex/pos-startup-loading-20261008 and codex/pos-capacity20-profiles-20261009; no takeover. Next: separately claim and instrument an isolated read-only diagnostic on exact current source with per-endpoint/pool/SQL/serialization/JSON/resolver timing and higher-resolution resources before any causal code decision. Preserve complete catalog/tenant/financial safeguards; no actual workload, production action, source, paid resource, LAB/USER/manual PASS or status closure here. Ordinary deploy40492710687/job122150464555 SUCCESS; Renderdep-dbg88javcj2c73bfaia0 LIVE exactcdd0d4e, finished2026-10-27T11:02:52.853572Z; independent health HTTP200/oktrue/exactcdd0d4e5b0f6bd418d3af2670d299ab1494a29e7 at2026-10-27T11:04:06Z. No manual deploy or Work production SQL write.

Official builder package v5 is75588bytes SHA2567977c88725229ed88d74b1c7c352fb7ceb9302335effc30ad42588916dbcaacd; all7 embedded modules byte-verified, same configuration/settingsHash4231356f6dc75c59a8ba083ac779c087681acd2535f77060ffd54eab4348ee89, no credentials/new pairing/automatic startup. It adds the missing authenticated read-only recheck after an acknowledged unknown report. On the existing Windows user, keep FTEXT+ open, close only the old connector, open current selected-POS CMD/menu3. Successful diagnostic message is Original error evidence delivered. No payment or cancellation was sent. This is an engineering handoff instruction, NOT physical acceptance or a request to press payment/VOID. No need to reprogram the register. Physical v5 update/evidence append/VOID and CARD acceptance NOT TESTED.

Read-only before rollout10:50:05UTC and after rollout2026-10-27T11:03:20.707182Z: sales1/payments1, original OPEN shiftaf937621/RIZAREIO-POS-01 one SALE_CASH0.50, SKU490 stock-1 and one movement-1/latest25Oct11:27:32.87UTC unchanged. Original request1e50a87c remains REQUIRES_CHECK /saleIdnull/resultHashcd9af613bea6b989f9add8146e8349450db647537ad0c9ce8b8a942b1496a91f, original26Oct NO unchanged, no late evidence or VOID before physical package update. This records no financial/stock mutation during engineering rollout, not a new sale test. Future physical recheck must retain original report/hash/decision and append only separately hashed ftextLateError. Even after error evidence, pending remains until existing separately attested manager VOID receives verified receipt-free success. No automatic charge, cancellation, unlock, manual success or replay. Whole integration remains OPEN/ASSIGNED; user physical next step is only v5 connector update and read-only evidence inspection. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-ftext-late-error-evidence.md.

27/10/2026 — INSTALL-SUPPORT-01 / ASSIGNED BEFORE SOURCE / READ-ONLY OVERVIEW

Owner codex/central-four-streams-20261018 / worker /root/priority_support; branch codex/install-support-readonly-claim-20261027; assignment time 2026-10-27T13:04:40+02:00. The user directs continuation of the ordered work through implementation until final actual acceptance. This claim assigns ONLY the independent read-only first slice of previously unassigned INSTALL-SUPPORT. The earlier 07/10 specification record saying implementation was unassigned is historical for this slice; other teams, claims, Gate PASS and broader lifecycle owners remain unchanged. This is BEFORE SOURCE: no runtime, schema, configuration, data, LAB or real user-action change in this claim. Existing baseline main includes capacity evidence #3205; current source, app/device and LAB acceptance of this new slice are NOT TESTED. Claim must pass applicable CI and merge to main BEFORE any of the following four source/test paths are edited.

Exact source/test scope ONLY:

1. NEW client/src/components/platform/InstallationSupportProfile.jsx — Super Admin read-only selected-store summary, using only current authorized company/store objects already supplied by Platform overview.

2. NEW client/src/components/platform/installation-support-profile.css — scoped desktop/mobile presentation, readable Greek labels and accessible controls.

3. client/src/components/platform/SuperAdminInstallationCenter.jsx — minimum scoped per-store launcher/selected target and safe close; retain all existing guide, REMOTE/terminal, scheduler, module settings, save and selection behavior. No PlatformAdminApp, StoreInstallationGuide, backend or schema edits in this slice.

4. NEW server/test/installation-support-profile-ui.test.js — meaningful mounted regressions on real selected-store component/launcher behavior, in addition to existing protected tests.

Contract: the existing selected company and explicit store determine the complete view; display only actual present name, city, address and responsibleEmail values from existing authorized overview data, with absent values clearly 'Μη καταχωρημένο'. Fields absent from source—including computer/equipment, technician, remote-connection status and backup verification—must remain 'Δεν έχει ελεγχθεί' or 'Μη καταχωρημένο', never inferred as green, healthy, working or PASS. Existing Platform Super Admin entry and server auth remain authoritative; do not widen access, impersonate Owner or allow arbitrary company/store IDs. On target switch/close, clear old details, never show prior store's data under the new name, and render no account credentials, PIN, API keys, activation tokens or database URLs. React-rendered data stays text; no unsafe HTML. The NEW view performs no fetch, extra endpoint, new API, schema/DDL, writes, permission changes, upload, download, email, device/provider or fiscal/stock/payment/shift actions. Existing parent requests and actions remain unchanged and are not claimed as newly tested or removed. This slice is an informative view of existing records, NOT the requested persistent support profile, incident/checklist/maintenance/attachments/technician ACL/export or full module.

Regression coverage: actual selected-store opening/switch/close, multiple companies/stores with delayed/changed props, absent/null fields, unknown status and no false health/PASS, text-only output/no secret fields, no additional view HTTP calls/writes, existing guide/terminal/scheduler/module controls still work, accessible desktop/mobile controls and existing role boundary. Run focused tests and frontend build, independently review exact source, then full PR CI (including required native/HTTP/Windows checks), normal merge, exact main CI and ordinary guarded live release before any real acceptance. Do not infer real LAB/USER PASS from CI or health; real Super Admin store-switch/read-only UI acceptance remains OPEN and needs observed authorized session. No actual business action or acceptance is performed here.

Durable INSTALL-SUPPORT phase remains OPEN. A per-store table must not be created or enabled by this slice: canonical store lifecycle rejects unknown/missing relations and unreviewed storeId columns; reviewed columns/ownership/reset-retention, backup/restore and exact worker-manifest hash all require coordination with retained lifecycle owner feat/store-shifts-inventory-clear-20261018. Existing StoreInstallationTerminal/StoreRbsInstallationSettings/backup/remote/RBS owners and their PASS are not reassigned. A separate owner-reviewed, narrowly handed-off lifecycle/schema claim is required before durable storage or changes to shared manifest/policy/restore files.

Checkpoint CHECKPOINTS/CHANGES/2026-10-27-install-support-readonly-overview.md. Status ASSIGNED / BEFORE SOURCE / SOURCE NOT STARTED / NOT INSTALLED / AWAITING FUTURE REAL ACCEPTANCE.

27/10/2026 - CAPACITY20 FULL RUN EVIDENCE RECONCILED / BURST FAIL / REMAINS OPEN

Evidence review 2026-10-27 12:58:39 EET; branch docs/capacity20-evidence-receipt-20261027.

Retained incident owner codex/pos-startup-loading-20261008 and source owner codex/pos-capacity20-profiles-20261009; central evidence-only coordination, NO takeover or release. Independently re-read existing run37937519901/job113843198454 and downloaded its original artifact11622347974. Run concluded FAILURE09Oct14:23:56UTC; earlier IN_PROGRESS/PENDING entries below are historical only. ZIP SHA256 7d5e56b1e618f20ac8e717dcf17d3b86dc3ff4884953f6fc5ac5b91dea16f191, expires08Nov2026; https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/37937519901 .

Actual isolated full-profile model: warmup5min, normal30min and peak15min PASS; synchronized 84-action read burst FAIL solely pos-refresh latency, p95=4131.316ms/p99=4237.201ms, all22 refreshes completed with zero errors/drops. The 120min endurance did NOT START. result.json overall after=null and capacityAcceptance=NOT_TESTED. No overall capacity or production PASS.

Actual synthetic evidence before and after the read-only burst: 1760 unique request IDs exactly equal 1760 distinct sale client IDs; one payment, stock movement and audit per sale, CASH EUR4400 and stock delta -1760, control stock100000 unchanged. Burst before/after snapshots identical; these are isolated synthetic records, not production financial results. Container model app1CPU/512MiB, PostgreSQL18.6 2CPU/256MiB, test pool5; production pool, cloud/storage/network/history/jobs/provider/device/failover/restore equivalence NOT MEASURED. Both containers running and OOM=false at finish; this is not a production SLA/capacity certification.

Next retained-owner action: diagnose the demonstrated burst latency using existing evidence, then separately claim any bounded source change or fresh isolated workload before performing it; retain thresholds, financial safeguards and failed measurement. Production20 readiness NOT ESTABLISHED, 50/100 NOT TESTED. No new workload, financial/stock/fiscal/provider action, LAB/USER/manual PASS, config, deployment, paid resource, or other-owner change occurred in this evidence reconciliation.

27/10/2026 — FTEXT late error evidence candidate / AWAITING WINDOWS AND NATIVE CI

Retained owner codex/rizareio-ftext-bridge-20261022; claimPR3203 merged0d5cc4cf before source. Implemented bounded authenticated error-evidence-poll/result: original current device/token/settings/lifecycle and original NO/hash; canonical CP1253 original command hash, complete PAY error44/48 and exact raw hash. Windows reads bounded existing intent/report/res under folder mutex/exclusive file access, never calls dispatch or writes/erases evidence; retained normal CASH/card/VOID loop. Missing/changed/busy input stays pending. Server appends immutable separately hashed ftextLateError in reviewed checkoutJson; original result/hash/decision/status/sale unchanged; replay idempotent. Existing separately attested manager-only one-shot VOID snapshots late/raw hashes; no automatic VOID, success, finalization or unlock. Current unresolved inspection exposes only verified effective error.

Local Node20 protocol/HTTP/immutability and existing VOID controls pass. Independent reconstruction of actual original plan matches sidecar commandHashc2f2d9303120cbeef262ddd74da002e334c6552b1a2647214dfe3dc44d11f735; exact original generic report SHA256cd9af613bea6b989f9add8146e8349450db647537ad0c9ce8b8a942b1496a91f also matches. Added Windows filesystem unchanged/no txt/changed/missing/foreign/final error cases, native concurrent append and separately verified VOID with no financial tables, and actual HTTP purpose-separated/extra-field/replay tests. Native/Windows execution and full exact CI/main/release pending; local infrastructure has no PostgreSQL/PowerShell. No new physical command, production SQL write or settings change; old request remains pending. Whole integration OPEN, physical acceptance NOT TESTED.

27/10/2026 — FTEXT late error evidence / retained owner / ASSIGNED BEFORE SOURCE

Retained owner codex/rizareio-ftext-bridge-20261022; branch feat/ftext-late-error-evidence-20261027. Continue the original assignment after PR3200/sourcea99bdf9 and release receipt3202/main11c050f. Uploaded screenshot image(20261027-102050).png shows repeated connected on RIZAREIO-POS-01 at12:19-12:20Athens; this confirms only current cloud heartbeat, not loaded module version or physical card success. Latest read-only original request1e50a87c remains REQUIRES_CHECK/saleIdnull/immutable generic resultHashcd9af613, original26Oct NO, no VOID. Original53-byte .res proves only PAY||2/error48, not bank decline/cancellation.

Bounded scope: current paired device polls ONLY its original unknown CARD/NO request; Windows reads existing exact intent/report/res with bounded/exclusive files and validates request/config/command/result bindings without writing any fiscal input or overwriting original files. Server appends separately hashed immutable late ERROR evidence inside own reviewed checkoutJson, scoped to original device/token/settings/lifecycle/result hash and NO. Accept only strict complete error44/48 and exact configured PAY with no final receipt/payment data. Retain original result/resultHash/decision/status/sale untouched. Replays idempotent, changed/foreign/stale/final/unknown evidence refused. Existing manager-only separately attested one-shot VOID may use that bound error evidence; never auto-request VOID or release pending until existing verified receipt-free VOID proof. Keep financial/stock/finalization and strict/operational card modes unchanged. No DDL/recovery manifest/shared lifecycle changes or direct production SQL writes. Other owner cash reconciliation source stays untouched.

Required proof: actual original byte fixture replay, authenticated HTTP scope/rotation/replay/state controls, Windows5.1 filesystem read-only/no new txt/no altered report or intent, changed/missing file/foreign command refusal, native PostgreSQL immutable append/concurrency/no Sale/Payment/Stock/shift writes, retained one-shot VOID/CASH/card/STATUS/install coverage, full exact CI/main/release before new physical package. No physical fiscal action by agent. Whole CARD/late-evidence/VOID acceptance OPEN/NOT TESTED. Next: publish this claim green/main before source.

27/10/2026 — FTEXT error reader released a99bdf9 / physical CARD remains OPEN

Retained owner codex/rizareio-ftext-bridge-20261022. Source PR3200 headb3d0d62 mergeda99bdf972d76076950b367c6b553c961178e207f. 27/10/2026 — retained FTEXT owner / exact physical error-format regression / AWAITING WINDOWS CI

Retained owner codex/rizareio-ftext-bridge-20261022; branch fix/ftext-error-result-format-20261027, existing assignment continues (original claims3156/3158). Baseline main8a4ce3aa894018e9cb04248ba4a969877c3d82df, public health5753d75/HTTP200 before edits. Preserve all other owner prefixes/source. Uploaded original mws-cash-1e50a87c-e5ed-491b-9e1c-cac73ee2bec9.res is53bytes SHA256022ddb6a253c87c3c0b15036bf9ab312b9af222a58eede98a94530b1ca57fc53. Exact ASCII bytes start SPACE48 CRLF, EFT-POS ERROR CRLF, InputLine: PAY||2 CRLF plus blank lines. Existing strict first-code regex rejects the leading space before retaining code/raw hash; even after that, the InputLine prefix prevents exact PAY binding. Physical error parsing USER FAIL, not payment approval/decline/cancellation proof.

Bounded correction: accept horizontal ASCII whitespace around the numeric result code and remove one exact documented InputLine: prefix from ERROR command only. Keep original bytes/raw SHA unchanged, numeric bounds, complete-line guard, exact final serial/QR, cash/card/VOID result rules, one-shot dispatch, DPAPI/tenant/settings, immutable prior result, pending lock and all financial/stock behavior. Real uploaded byte fixture must replay as REQUIRES_CHECK/code48/failedCommandPAY||2/exact raw hash. Existing successful CASH/strictOS7/operator-card/VOID and malformed/error injection controls remain protected. No production state or hardware command in engineering. Existing unknown original report cannot be overwritten or silently cancelled by this parser fix; separate authenticated late evidence/reconciliation remains OPEN.

Also reconcile prior limited NO UI observation: owner reported “Έχει φύγει” after refresh on26Oct; image-1793013541128.jpg confirms modal absent, original NEPO500ML quantity1/0.50 basket retained and pending-review banner visible on released71ca6f15/PR3159. This closes ONLY recovered persisted-NO modal presentation after refresh. Fresh NO click/YES/physical card and stock/financial deltas remain NOT TESTED. Source3159 exactCI40310736557, native40310736780, main40312135266 allSUCCESS; ordinary deploy40313441832 Renderdep-dbfjc72vcj2c738cegd0 LIVE11:16:29UTC; release receipt3160 merged5e52b13a. Corresponding limited usage is added to docs/manual/ftext/PASS.md; superseded historical CARD OFF is corrected by this current entry: current reviewed operator profile is code2/POS1/type1, not physical acceptance. Whole connector remains OPEN/ASSIGNED.

26/10/2026 - Deferred invoice technically installed49fab86 / AWAITING MEASURED LAB

26/10/2026 — CASH-REVIEWED-03 / EXACT TECHNICAL RELEASE + LIMITED READ-ONLY LAB PASS / WHOLE WORKFLOW OPEN

Same owner codex/cash-chat-reconciliation-20261026 retained. Source3180 head79831aa0 CI40385981317/all5jobs SUCCESS; mergedaf9517ee1c0893d665962de788e54cd556c3fa2d exact-mainCI40387741454/all5jobs SUCCESS, build121800950054 actual4326server+8backupPASS/0FAIL/0SKIP, native reviewed proof unskipped. Ordinary guarded deploy40389371409/job121806139646 completedSUCCESS and public health19:50:04UTC returned EXACTaf9517ee. Later shared docs3187/3188 preserved; no bypass or manual service deployment.

LIMITED LAB PASS only actual authenticated Platform desktop read-only availability:26Oct approximately19:53UTC, canonical https://myworkstation-app.onrender.com/platform-admin, Χρήστος Μάνης/SuperAdmin, ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ storecmtpopbgo000trhb5ng9ytiru. Reloaded the installed client. For26Oct, selected-store report has0closed shifts and the new panel correctly says no closed shifts, not a final financial agreement. Changed only the calendar filter to10Oct and applied it: old reviewed period cleared; explicit GET showed the existing TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ / LAB POS2 / MAIN record closing10Oct, cash−5.50EUR, POS–EFTPOS0, ΥΠΟ ΕΛΕΓΧΟ,1pending shift excluded from reviewed totals. Previous05Oct/next11Oct context visible separately. No false reviewer signature or final cash attribution. The original accepted QR action was NOT replayed. One browser transport failure recovered with a read-only snapshot; it was not an application/LAB financial failure.

No review/offset/association/revoke/checkpoint POST, upload/AI/provider, email, financial/payment/stock/fiscal action or DB operation. Physical terminal/SKU/quantity/payment action N/A, no measured balance delta claimed. This read-only PASS DOES NOT certify reviewed writes/concurrency in actual LAB, handwriting accuracy, Owner admission, other devices/tenants, card/safe/refill/mobile reconciliation or whole automated workflow. Those stay OPEN/NOT TESTED; native isolated CI remains engineering evidence only. Manual docs/manual/cash-control/PASS.md contains ONLY observed read-only usage and limits. Evidence CHECKPOINTS/EVIDENCE/cash-reviewed-readonly-20261026/receipt.json and lab-readonly.jpg (one captured image). This closes only technical-release and this read-only acceptance substep; no whole numbered item closure.

Manual-email consumer before-source3187 merged684c735 before runtime. Prepared source3189 head50d7d03016a5daea6bd1d2cd02c8aa4774641db8/fullCI40390367119 IN PROGRESS, not installed or LAB accepted. Its same common prose, bound preview and retained old freshness gates are independent of this limited PASS. Remaining required work stays assigned to this receiving owner: complete manual consumer release/acceptance; common automatic/assistant consumers under retained boundaries; full telecom/safe/refill source reconciliation; paginated discovery/coverage; original measured writer/provider acceptance with a fresh identified baseline before action. No second executor or owner takeover. Current single next action finish exact3189CI while preparing the next bounded source interface; do not repeat the accepted QR transaction or describe the whole task as complete.

AUTO CASH 06 — 27/10/2026

ASSIGNED codex/cash-chat-reconciliation-20261026 retained under the explicit cash-review extension transfer; source feat/cash-reviewed-automatic-20261027. This claims ONLY the bounded common-result consumer/configuration branches below, not ownership of retained automatic dispatch, activation, recipient verification/consent, policy/grants, locks, lifecycle/backup, SMTP, assistant, invoice/native or financial writers. Existing automatic-report limited LAB manuals (16/18/19Oct settings/save-once/HOLD,07-to07/day-week-month/other-store isolation) remain protected. No replay of the accepted LAB settings Save, recipient challenge or business transaction. Last documented external OFF observation23Oct is historical; this tranche does not read or change activation, recipient, consent, grant or transport configuration. Cash3180 read-only LAB3190/manual protected; assistant3195 installed5753d75 after4395+8/0/0 and ordinaryguard40458868237; archive3199 merged03b1529 afterPR40460094868/4405+8/0/0, exact-main40482373798 ALL5SUCCESS4405+8/0FAIL/0SKIP. Ordinaryguard40483873964 correctly deferred03b1529 because newer FTEXT sourcea99bdf9 is on main; all nine archive source/test paths are byte-identical03-to-a99. Preserve FTEXT owner; await newer exact full CI and guarded release, never force the older source. No new authenticated cash/assistant/archive/automatic LAB PASS. Browser secure-auth request and subsequent state read timed out; sign-in outcome UNKNOWN, no credential exposure or retry loop.

Exact existing source scope after this claim green/main: server/src/services/cash-reconciliation-repository.js ONLY a new readSelectedInTransaction method plus an optional materialize selection branch for internally supplied exact closed-session IDs, same canonical projection and existing bounded context/history/paper validity, no public route or read/apply writer semantics changed; server/src/services/automatic-report-source.js ONLY opt-in reviewed result attachment to the already authenticated read-only preview in its original transaction, preserving all original business-window/closure/readiness/group/fingerprint behavior when not selected; server/src/services/automatic-report-settings.js ONLY one optional boolean reviewedReconciliation in the existing strict JSON configuration schema, absent means legacy and no added default/property or schema migration; server/src/services/automatic-report-cash-payload.js ONLY validate/include the new opt-in common-result envelope and bounded multiline prose in that envelope, legacy bytes/limits/financial flags unchanged; server/src/services/automatic-report-mail-adapter.js ONLY validate the opt-in envelope and choose its exact common prose for the existing text argument, existing provisional disclosures/subject and every authorization/intent/transport/retry boundary unchanged; server/src/services/automatic-report-eligibility.js ONLY verify new result generation agrees with its already locked lifecycle generation; client/src/components/platform/AutomaticReportSettingsManager.jsx ONLY an explicit optional mode checkbox and exact common-prose/pending preview section, using existing saved/versioned selected-store settings and stale/dirty guards. Existing configs/defaults and all dispatch controls remain unchanged; no automatic enabling or setting Save performed by this tranche.

New exact files: server/src/services/cash-reviewed-automatic-contract.js (strict pure envelope/projection/validation and canonical text, no DB/provider), server/src/services/cash-reviewed-automatic-source.js (current canonical source adapter within the caller's original authorized transaction), server/test/cash-reviewed-automatic.test.js, cash-reviewed-automatic-flow.test.js, cash-reviewed-automatic-postgres.test.js, cash-reviewed-automatic-ui.test.js. No other source/tests without a further bounded green/main amendment. No new module grants, settings/recipient writer, public ID-list/model capability, DDL/bootstrap, provider read/charge or actual email.

Explicit opt-in only: reviewedReconciliation true is selected and saved by an authorized operator for a specific store through the existing version/rule contract. Absent/false preserves the complete legacy preview/payload/mail behavior and its accepted tests. The new consumer must retain the original DAILY/WEEKLY/MONTHLY business period including07-to07 and DST, not silently substitute calendar closing-day selection. Take the exact trusted session IDs from that same ready source snapshot; validate unique same-company/store CLOSED IDs, max200, and use the common engine's existing adjacency/offset/confirmation/history/original validity. Existing manual/API31day limits stay unchanged. The internal method scans the original bounded up-to31 business dates, loads only explicit extra IDs through existing scoped reads, and derives an at-most32-calendar-day display span from actual selected closing dates; every original session must be covered exactly once. Context cannot enter totals; whole result holds on incomplete/unknown/over-limit/unavailable/revoked evidence, never raw-as-reviewed fallback. Source readiness remains separately labelled original closure readiness. The new payload cannot form/send unless its complete selected cash result is reviewed; no automated inference of responsibility, global employee/day net or card-cash offset.

Envelope contains only strict minimal canonical selected rows/text/employee totals/continuation and generation/head/report/source receipt, original business period/fingerprint and exact selected IDs. No private context, transaction/paper bytes, activation/recipient data, volatile checkedAt/current-clock fields or financial recalculation. Exact text revalidates with the shared renderer; all receipt fields bind immutable payload fingerprint and current eligibility re-read, not caller role assertions. Keep overall PROVISIONAL/financialReconciliationComplete false/employeeLiabilityAdjusted false and all existing limitations; reviewed cash rows are a separate human-reviewed result, not a full physical/financial certification or automatic liability posting. Legacy payload envelope shape/format, source group originals and byte budget remain intact. New multiline allowance is confined to the strictly validated new envelope and existing total budgets. Mail adapter must keep the original durable ATTEMPTING-before-send contract, exact single recipient, no retry, suppression/demo guards and conservative UNKNOWN transport handling; no SMTP credentials/client/timer or runtime activation added.

Required engineering evidence: legacy absent/false byte equivalence, optional-schema compatibility, actual saved source/contract/payload/mail functions with zero real provider/SMTP/writes; exact same source IDs across business midnight, DST23/25hour, daily/week/month with last next-month morning, selected-only totals and shared identities; pending/no data/changed paper/head/source/generation/role/source limits fail closed; immutable stable payload despite repeated read clocks; preserved finality/disclosures and actual adapter status/evidence behavior. Native isolated PostgreSQL in read-only transaction must exercise the common engine with an actual verified offset/confirmation and unchanged financial/control rows, foreign IDs/stale generation and no original ledger writes. Actual mounted mode/dirty/save/preview/store-switch checks. Full exact PR/main CI, ordinary guarded exact release and fresh measured scoped LAB required. No manual PASS from CI. Whole cash workflow OPEN: per-store mode configuration and authenticated grouped acceptance, persistent company-wide workbook, telecom/safe/refill/full paper coverage and paid-reader accuracy remain. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-reviewed-automatic.md. Claim must merge green/main BEFORE source edits; same owner, all retained owners/PASS protected.

CASH ARCHIVE 05 — 27/10/2026

ASSIGNED codex/cash-chat-reconciliation-20261026 retained; source feat/cash-reviewed-archive-20261027. Bounded independent read-only consumer of the same reviewed reconciliation, not a transfer of retained automatic dispatch, assistant/history, invoice/native, financial, identity or stock writers. Existing basic negative-only CSV is an original raw export, not a reviewed result. Cash3180/mainaf9517ee read-only LAB3190/manual remains protected; phase4A email installed through guarded descendant; phase4B assistant3195 head5e347b0 fullCI40456903007 SUCCESS4395+8/0FAIL/0SKIP merged5753d75; exact-main CI40458060389 and guarded installation pending, no assistant LAB PASS. No new real acceptance.

Claim exact existing paths: server/src/routes/cash-reconciliation.js ONLY additive authenticated selected-store archive GET and factory wiring; server/src/services/cash-reconciliation-report.js ONLY expose on each row the identity key/requires-identification already used by its current employee grouping (no changed offset, eligibility, finality, totals or text); client/src/components/shared/CashReconciliationPanel.jsx ONLY explicit bound workbook download action/button with stale selection fencing; client/src/components/platform/PlatformAdminApp.jsx ONLY existing original-negative CSV button labels to identify their original/raw scope, no route/query/financial behavior changes. New server/src/services/cash-reviewed-archive.js, client/src/lib/cash-reviewed-archive.js, server/test/cash-reviewed-archive.test.js, cash-reviewed-archive-routes.test.js, cash-reviewed-archive-ui.test.js. No other source/test changes without a bounded amendment green/main first.

The workbook uses ONLY the canonical repository's current selected authorized store and explicit calendar period up to31days, with current CASH_CONTROL/STORE_CHAT/AI_READER authorization and lifecycle before/after read and generation. Require the exact preview generation/reportHash/audit head; reject changed receipts before any file reaches the client. Explicit click only, no mount/background/model/provider/SMTP/financial/audit-review/checkpoint/schema write. XLSX contains dated shifts, separate reviewed shortages/surpluses by stable store/employee/day, separate POS-EFTPOS and pending/unidentified rows/continuation notes, plus exact common prose and receipt metadata. Pending amounts excluded from reviewed totals; unknown not zero; no global employee/day net, no inference from equal amounts, no shared-name merge, no hidden context/transaction/paper payload. New identity row fields use the existing canonical grouping decision, including conflicting aliases in context. Text remains text; formulas, hyperlinks, arbitrary filenames/URLs and oversized files rejected. Existing table/no-table report and original CSV behavior preserved. No access broadening or all-stores fallback; selected-store workbook is an incremental archive export, not a claim of one persistent company-wide workbook or full automated workflow completion. Original reviewed audit history remains the durable source; central multi-store archive, automatic payload consumer, telecom/safe/refill completeness and measured writer/provider LAB remain OPEN.

Required engineering checks: actual XLSX re-read with exact reviewed cents, separate cards, unknown blanks, pending exclusion, duplicate employee names/shared codes across days, conflicting context aliases, all source prose/continuation notes, spreadsheet formula injection and no private fields; strict scope/period/receipt/current authorization/lifecycle revocation and changed head/hash/generation refusal; actual Express response and mounted UI stale/repeated-click cancellation guards. Full exact PR/main CI, ordinary guarded release and scoped real UI acceptance required. CI is NOT LAB PASS. Claim must merge green/main BEFORE edits. Same owner and all other owners/PASS retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-27-cash-reviewed-archive.md.

27/10/2026 — CASH-REVIEWED-ASSISTANT-04B / CAUSAL SALES-STOCK FIXTURE AMENDMENT BEFORE EDITS

ASSIGNED codex/cash-chat-reconciliation-20261026 retained, source feat/cash-reviewed-assistant-20261026 / PR3195 headfde399c136edb5e0b6dbbf5ecfe959709ef21798. Full CI40400178237 failed with4393PASS/2FAIL/0SKIP: owner-sales-tools.test.js and owner-stock-tools.test.js use numeric authorization-call boundaries and unrestricted fake authorization that now admits the new cash_review capability. Local two-file replay confirms the mismatch. No source deployed, no business/provider/mail/LAB action, no existing PASS superseded.

Before further edits extend exact04B scope ONLY to server/test/owner-sales-tools.test.js and server/test/owner-stock-tools.test.js for the affected real-handler authorization fixtures. Replace absolute global call-number triggers with semantic phase counters tied to provider/read/final boundaries and required INVENTORY admission; explicitly declare the cash-only fixture's denied STORE_CHAT/AI_READER capability. Preserve all original before-read/after-read/before-provider/final revocation assertions, no unauthorized read or answer, source counts, changed-store refusal, and original domain-specific tests. Separately cover the current status catalog when all required cash modules are admitted. Do not loosen production authorization or suppress the new cash module checks to accommodate mocks. New dedicated reviewed-cash tests keep actual authorizer/module/role/session revocation coverage. No retained Task14 owner/source takeover, no schema/security/licensing/financial/provider/SMTP writer change. This amendment must be green and merged main before the two additional test files are edited. Full exact PR/main CI, ordinary guarded release and actual acceptance still required; CI is NOT LAB PASS. Whole cash workflow OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-reviewed-assistant-consumer.md.

26/10/2026 — CASH-REVIEWED-ASSISTANT-04B / BOUNDED FIXTURE + PROSE EXPORT AMENDMENT BEFORE EDITS

Same receiving owner codex/cash-chat-reconciliation-20261026 retained. Claim3191 headb8ea3c51744bf61b0f6514f8b4f8bf8b66e1202e/docsCI40393086095 SUCCESS mergedc1d6fe8 BEFORE source. Independent3189 final96abd780 exactCI40392199429/all5jobs SUCCESS4333server+8backup/0FAIL/0SKIP, mergedcurrentd21ab855a060e81f9b8d694649c73f50c3c5f086; exact-main CI/release still pending. Cash3180 limited read-only LAB/manual3190 remains protected. No new LAB/manual writer/provider/email acceptance.

Before additional edits, extend exact04B scope ONLY as follows. Existing server/test/assistant-history-ask.test.js and server/test/owner-assistant.test.js ONLY legacy cash_details fixture admission/count: their unrestricted fake authorize currently admits the NEW cash_review modules and bypasses the old injected cash source/provider test on a question with no period. Reproduced local existing-suite result86PASS/3FAIL/5nativeSKIP (two history-ask provider-count failures and one Owner answer mismatch); no application workaround. These legacy fixtures must explicitly deny new STORE_CHAT/AI_READER requirements with MODULE_DISABLED so they continue testing the existing cash-only/provider/history path; keep all original assertions, with only exact admission-call count updated for the additional denied capability probe. New dedicated tests must separately cover real three-module cash_review admission, deterministic no-provider read, revocation, actual source receipts and unchanged legacy flow. No weakening of tenant/session/capability assertions or replaying old transactions.

Additionally claim existing server/src/services/assistant-report-files.js ONLY the NEW prose-kind PDF/Word rendering branches. The already claimed assistant-report-table.js marks only new cash_reviewed reports as prose. PDF/Word must render those exact lines as paragraphs rather than a one-column table, with no clipping or financial truncation. Excel/CSV remain text lines; existing report/table formats, money/quantity conversion, generation/download/security and file size limits unchanged. Validate actual generated Word XML has no cash table, PDF contains all original prose/numbers, CSV/XLSX lines preserve separate cash/cards and pending notes, spreadsheet protection retained. This change starts only AFTER this amendment green/main. No new provider/SMTP/filesystem user upload, financial/audit/lifecycle/stock/fiscal/schema/transport writer. Whole task OPEN; all retained Task14/export/history/automatic/invoice/native owners and prior PASS unchanged. Checkpoint

CHECKPOINTS/CHANGES/2026-10-26-cash-reviewed-assistant-consumer.md. These are two necessary bounded compatibility/presentation edges of the same new cash read, not ownership takeover.

26/10/2026 — CASH-REVIEWED-ASSISTANT-CONSUMER-04B / SAME OWNER / CLAIM BEFORE SOURCE

ASSIGNED codex/cash-chat-reconciliation-20261026, source feat/cash-reviewed-assistant-20261026. This is ONLY a bounded consumer of the already merged reviewed cash result within the received cash extension, not a transfer of retained Task14 assistant/provider/history, automatic-dispatch, wallet/lifecycle, native/invoice or financial writer ownership. Claim must merge green/main BEFORE source/test edits. Preserve every accepted Task14 source/admission/export/history and existing legacy cash_details behavior; no parallel other-owner edit of these exact functions is authorized. Reviewed3180 technically installedaf9517ee after full PR/mainCI4326+8/0/0;3190 merged65396dc records only actual limited READ-ONLY LAB view, manual/evidence/PDF. No cash writer/handwriting/full workflow PASS. Manual-email3189 remains independent and uninstalled; initial CI40390367119 failed legacy demo guard precedence, prepared causal current96abd780 preserves its original guard and awaits new exactCI40392199429. No actual email sent.

NEW exact source: shared/assistant-reviewed-cash.mjs (pure kind/intent/exact prose projection); server/src/services/assistant-reviewed-cash.js (strict cash_review tool/period and fixed authenticated loopback GET to existing selected-store reconciliation endpoint). NEW focused tests server/test/assistant-reviewed-cash.test.js, assistant-reviewed-cash-flow.test.js, assistant-reviewed-cash-presentation.test.js. No new route, schema, DB writer, original read/provider or new cash calculation.

Existing source scope ONLY additive cash_review consumer branches/imports: server/src/services/assistant-source-read.js (strict source registry/period), platform-assistant-products.js (explicit selected-store tool/read/replay only), owner-assistant-handlers.js (new tool admission/read callback only), owner-assistant-access.js ONLY extra recognized moduleLabels for STORE_CHAT and AI_READER so existing unchanged effective-module checks can require them, owner-sales-tools.js (new strict read dispatch and deterministic cash-only period shortcut), assistant-answer-response.js (exact server cash prose before model-authored summary), assistant-report-table.js (new kind exported as exact prose lines, no re-summing), assistant-history-contract.js (new capability enum only), assistant-history-access.js (new capability with current three-module gate only), assistant-capability-help.js (cash capability wording), assistant-consumption.js ONLY toolsForAssistantQuestion new cash-priority branch; client/src/components/voice/presentAssistantAnswer.js (exact server cash prose branch) and AssistantChatPage.jsx ONLY names label for cash_review. Existing server/test/platform-assistant-products.test.js ONLY the exact tool-name registry expectation adds the new selected-store capability, preserving all legacy expected names and behavior; no assertion weakening. Other source/test portions unchanged.

The new cash_review read requires an already selected authorized store and an explicit valid from/to calendar period up to31days. Models receive no company/store/generation, SQL, URL or writer capability. Owner availability/recheck requires existing AI_OWNER_ASSISTANT plus CASH_CONTROL, STORE_CHAT and AI_READER using the current effective override/date/role/licence/session guards. Root SuperAdmin retains current authorization; support-preview and all-store contexts do not gain the new capability. Legacy cash_details stays separate for current cash-only entitlements and old clients; never silently fall back to raw cash_details as a reviewed result. No new access grant, module configuration or security relaxation.

For an unambiguous cash-audit question and parsed period, use a deterministic free canonical source read and return its exact server prose without a second model summary or financial calculation. Missing/ambiguous/too-wide dates ask clarification, never guess a period. Fresh selected-store authorization before/after read, exact returned store/date/generation/source checks, original lifecycle and existing three-module endpoint gates remain mandatory. Preserve stale/cancelled replies and no scope broadening. Only the minimal reviewed report and exact prose are returned, never paper bytes, arbitrary transaction/context/history, private diagnostics or an uploaded instruction. Current cash/offset/signature/pending status is copied, not reinterpreted. No email, paid paper/provider call, financial/stock/fiscal, audit-review or checkpoint mutation.

History derives the actual new source capability and requires current three-module admission on read/restore/export; other existing capabilities/30day/lifecycle/session isolation unchanged. Exact common prose must survive presenter/history capture and exports; do not silently truncate financial text or show raw cash tables as reviewed amounts. Existing archive text/size refusal rules remain. Required actual strict HTTP/source scope/cancellation/error tests, current module/role revocation around read, deterministic no-provider dispatch with explicit period, Owner/Platform registration and all-store/support refusal, actual source replay/export/history capability filtering, exact shared prose presentation and spreadsheet-safe exports, unaffected existing Task14 domains. Require full exact PR/main CI, ordinary guarded release and measured scoped acceptance; CI is not LAB PASS. Whole workflow OPEN. Automatic payload/dispatch consumer, telecom/safe/refill full reconciliation, wider discovery and writer/provider LAB remain REQUIRED separate scopes. Same receiving owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-reviewed-assistant-consumer.md.

26/10/2026 - Invoice startup/query follow-up:15paths BEFORE SOURCE

Retained next_reports/shift_pin owners; add ONLY server/e2e/payment-shift-flow.mjs to14path claim. Actual startup positive plain payment/capture before/after absent lazyAI fields; retain startup-created tasktable and all original money/control/POS/PIN checks, zeroAI/job/draft/provider/module/schema activation.

Existing service/native correction: schema-aware positiveplain/proof/intents independentoptionalAIgraph, missingAIcapability staysREVIEW; fullysetbased chain/page/proof/tombstone guards without newDDL/index/timeout/PGsetting/historydrop. Actual8912 CI40386836693 server4347+8PASS0skip butrealHTTP42703FAILED; EXPLAIN7795.799ms/1,018,081docPKloops/3.28Mhits/JITnull, notfullPASS/install.

26/10/2026 — CASH-REVIEWED-MANUAL-CONSUMER-04A / SAME OWNER / BEFORE SOURCE CLAIM

ASSIGNED codex/cash-chat-reconciliation-20261026, source feat/cash-reviewed-consumers-20261026. Independent bounded continuation of received cash extension, not a transfer of retained automatic-dispatch, Task14 assistant, mail transport, lifecycle/native/invoice or financial writers. Claim must merge green/main BEFORE runtime edits. Reviewed3180 exact head79831aa07e740c850797f6ae886f81b59a20e7b8 fullCI40385981317/all5jobs SUCCESS:4326server+8backupPASS/0FAIL/0SKIP including native two-client review/archive/source/HTTP proof. Squash mergedaf9517ee1c0893d665962de788e54cd556c3fa2d. Exact mainCI40387741454/guarded deployment/measured LAB still pending; no LAB/manual/whole-workflow PASS.

Exact source scope ONLY: NEW server/src/services/cash-reviewed-email.js and server/test/cash-reviewed-email.test.js plus actual route integration regression server/test/cash-reviewed-email-routes.test.js; existing server/src/routes/platform-admin.js ONLY imports and cashReportEmailData plus its three cash-control email-preview/send-email/send-preview routes; existing server/src/services/mail.js ONLY import and sendCashControlDailyReportEmail rendering. Existing client/src/components/platform/PlatformAdminApp.jsx ONLY the two manual cash email callbacks: display exact server prose before send, bind original reportHash/generation, reject stale selected-store/period replies. NEW actual mounted server/test/cash-reviewed-email-ui.test.js. A changed report between preview and click must refuse, never send unseen new contents. No recipient/address/configuration/consent/transport mutation, scheduler or dispatch activation. Existing Store metadata routes and all other owners remain untouched.

Read the same current reviewed repository result with current selected-store authorization, original lifecycle generation and date; recheck current access/generation before release. No model-generated prose, table, raw cash net fallback or client-supplied report. The common server text is the email text, with escaped paragraph rendering and separately identified optional human comment. Preview exposes exact common text, source/report fingerprint and pending status. Keep existing closed-row and CashControlReview freshness sending gates; additionally refuse final send if the current reviewed cash result is pending/stale or row identities differ. Explicit send-preview remains a preview and includes actual pending text; no automatic finality or personal debt inference. No actual SMTP/email is sent during development/test. No provider/AI, original/financial/source ledger, CashControlReview, stock/fiscal or schema/DDL write.

Required validation: actual shared projection-to-email text parity and cash/card separation, reviewed offset amount not raw variance, no global netting, unknown/stale/missing source refused or visibly pending, exact company/store/date/closed-row identity and original generation checks, no arbitrary HTML, real registered preview/send refusal paths with injected safe transport, no send before both current admission gates, unchanged recipient resolution/transport contract. Full exact PR/main CI and ordinary guarded revision before measured LAB acceptance. No unchanged business test replay. Automatic payload/assistant consumers, complete telecom/safe/refill source reconciliation and overall measured acceptance remain REQUIRED separate bounded slices with retained owners. Whole request OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-reviewed-email-consumer.md.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / WEB REVISION VERIFIED / AWAITING HARDWARE

Authoritative technical status at2026-10-26T20:42:26Z: source3177 merged5feb831ce6939b029719f1d40d0f9eb75cbb1118; main CI40395207121 all5jobs PASS with4342server+8backup PASS/0FAIL/0CANCEL/0SKIP, build10.49s,12actual BackOffice camera Chromium geometry/pointer/cleanup cases and isolated PostgreSQL/archive/HTTP E2E/invariants PASS. Ordinary guarded deployment40397052236 completed SUCCESS; its freshness/fullCI guard, rollback checkpoint and pinned5feb trigger passed, and public health independently returnedoktrue/version0.22.0+kat-test-pos/revision5feb831ce6939b029719f1d40d0f9eb75cbb1118. Public/platform-admin main-DZST7eV7.js independently contains scanner label, fixed127.0.0.1:17839 connector and bounded document-camera-shell markers. This verifies technical web release only, not authenticated operator/hardware/LAB acceptance.

Exact final source12aefd9c CI40394017860:4335server+8backup/12camera PASS; Windows40394017619 actual loopback protocol/DPAPI/PowerShell parse/standalone package PASS, artifact12685157139 integrity SHA256c51dad047e214575aaf5979f289b89e2e3da5440f9a252c3a98ce47af0646c08. Android40394017616 compiled/unit/lint and1+36emulator tests PASS.334-file Windows ZIP prepared, CRC/hash verified, no installer executed. Initial Windows setup/pairing by technician is required; routine explicit scans use existing document intake/review and do not register payment/send themselves. One WIA-compatible device required; Canon P-208II ISIS/TWAIN compatibility not certified.

Owner codex/document-capture-scanner-20261026 RETAINED. Physical camera legibility/focus on intended devices, Windows installation/reboot/browser local-network permission and actual WIA driver/paper transfer remain NOT TESTED/AWAITING LAB. Native stable public APK distribution remains with its existing owner and has not been updated here. No physical/manual/USER/LAB PASS, no whole-project/Gate closure. Do not repeat accepted invoices/payments or any stock/fiscal/provider/OCR/send action to fill evidence. Next: separately measured non-financial camera/scanner acceptance on intended hardware when available, and named native stable-distribution handoff through its existing owner. Previous limited PASS and all independent owners remain protected.

Evidence CHECKPOINTS/EVIDENCE/document-capture-scanner-20261026/web-release-5feb831c.json. Receipt3193 green/mainb6f3473 recorded merge; this supersedes its awaiting-web-release status for5feb only. Final documentation is based on49fab86d and preserves newer independent POS plain-capture/cash claims exactly; it does not claim those newer source revisions deployed or tested here. Canonical tracker PDF synchronized; no runtime/business action in this receipt.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / SOURCE MERGED / AWAITING GUARDED WEB RELEASE

Owner codex/document-capture-scanner-20261026 retained. PR3177 exact12aefd9c8ba2a95e0eeec66ae80b6aed1d6792e0 passed full CI40394017860 all5jobs:4335server+8backup PASS/0FAIL/0CANCEL/0SKIP; actual client7.71s;12actual BackOffice camera Chromium geometry/pointer/cleanup cases PASS; isolated PostgreSQL/archive/HTTP E2E/build contracts/invariants PASS. Windows40394017619 protocol/DPAPI/PowerShell/package PASS (artifact12685157139, SHA256c51dad047e214575aaf5979f289b89e2e3da5440f9a252c3a98ce47af0646c08). Android40394017616 compile/unit/lint/emulator PASS. Independent runtime equality to prior full-greenad9628fd/5df6caa was verified; subsequent changes were shared documentation only. All prior SDK timeout/failures remain historical, not LAB PASS.

Merged main5feb831ce6939b029719f1d40d0f9eb75cbb1118, preserving independent cash email source and all owners. Main fullCI40395207121 has started; ordinary exact guarded deployment REQUIRED and not yet verified. Do not claim installed or request real acceptance before release verification. Shared capture records are grouped at the original owning claim to avoid unrelated prepend conflicts; canonical PDF regenerated. No production settings/data/payment/invoice/stock/provider/OCR/send action or accepted transaction replay.

Physical camera legibility, WIA driver/transfer, Windows installation/reboot/browser local-network permission NOT TESTED/AWAITING LAB. One WIA-compatible scanner required; no Canon P-208II/TWAIN certification. Standalone Windows package prepared and integrity-verified; no installer executed. Native stable APK distribution remains with its existing owner and is not updated here. Next: finish exact mainCI/normal guarded web release, verify public exact revision, then a separately measured non-financial camera/scanner hardware acceptance when available. Owner retained, no physical/manual/USER PASS closure.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / RECONCILED RUNTIME GREEN / DOCS CONFLICT FOLLOW-UP

Owner retained. Exactad9628fd73da8a33d5d5373e4b9cb2cdfb6958ab PR3177: full CI40387889478 all5jobs PASS;4335server+8backup PASS/0FAIL/0CANCEL/0SKIP; client12.41s,12actual camera Chromium cases, isolated PostgreSQL/archive/HTTP E2E/invariants PASS. Windows40387889457 protocol/DPAPI/package PASS artifact12681803163; Android40387889430 compile/unit/lint/emulator PASS artifact12681674142. Runtime capture/scanner bytes unchanged from earlier25bd684c; independent new-product/cash source preserved. No hardware/LAB PASS.

Second merge405 was caused solely by new independent main684c735 cash-email claim in3registries/canonicalPDF, no runtime changes. Preserve that claim and regenerate PDF. Current docs reconciliation requires its own CI; source not merged/installed yet. Physical camera legibility, WIA driver/transfer, Windows install/reboot/browser permission and native stable distribution remain pending with existing owners. No payment/invoice/provider/stock action or accepted replay. Next: green current PR3177, ordinary guarded main release; hardware acceptance only when available.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / EXACT SOURCE CI GREEN / RECONCILING INDEPENDENT MAIN

Owner codex/document-capture-scanner-20261026 retained. Source PR3177 exact25bd684c9035d5884e78b8d250581e7fed51601e: full CI40385484343 all5jobs PASS;4318server+8backup PASS/0FAIL/0CANCEL/0SKIP; client build12.08s, actual12camera Chromium geometry/pointer/cleanup cases and PostgreSQL/archive/HTTP E2E/invariants PASS. Windows40385484457 protocol/DPAPI/PowerShell/package PASS, artifact12679814012. Android40385484430 compile/unit/lint and36emulator tests PASS, artifact12680851976. This supersedes earlier SDK timeout as newest technical evidence only; no hardware/LAB PASS. Local actualNode20 focused42PASS.

Merge attempt safely refused405 due independent main registry/PDF conflicts. Reconcile exact mainf706663de073bbda8b256e3cabfaa29af3c88989 preserving all new-product and deferred-invoice source/records, then regenerate canonical PDF. No overlapping runtime source changes; new exact reconciliation CI remains REQUIRED before merge, ordinary mainCI/guarded release afterwards. Physical cameras, document legibility, Windows installation/reboot/driver/WIA transfer/browser permission NOT TESTED; native stable distribution retained by existing owner. Source NOT INSTALLED / AWAITING LAB. Single next action: green reconciled PR3177, normal guarded release and separately measured non-financial hardware acceptance when available. No payment/stock/invoice/provider action or accepted replay.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / FULL SOURCE CI PASS + OBSERVED SMALL-SCREEN FOLLOW-UP

Same owner/sourcePR3177. Exact54a296c8 fullCI40381136312/job121777898931 all five jobs SUCCESS:4303server+8backupPASS/0FAIL/0CANCEL/0SKIP, actual frontend build12.01s, native PostgreSQL/archive/HTTP/browser/invariants. Windows40381136112/job121777353552 SUCCESS including persistent DPAPI HTTP self-test, install-script parsing and standalone package12678157787/digestd7cc40d 2b516f6f4e1aa95796f8a94b3d167bc4b2076c3b112d7b6e8b0782613. These certify54a296c8, not later layout changes. Android40381136286 compiled/unit/lint but timed out during SDK image installation before emulator execution; no app assertion failed. Earlier Android40378479827 completed compile/unit/lint/36emulator tests; all three native capture source/test Git blobs are independently identical between f1529467 and54a296c8. Latest native workflow is NOT PASS and stable native public distribution remains with its original owner.

Additional actual rendered BackOffice camera inspection reproduced a new layout FAIL with focus controls:1366x768 close top-26.70/shot bottom794.72;1280x600 close top-61.58/shot bottom661.59. Actual Cancel pointer was outside viewport. Fixed only camera-shell bounds/flex, contained preview, sticky header/actions,48px targets and flexible zoom range; full captured sensor pixels/business/reader/payment paths unchanged. The same bounded shell applies to BackOffice/Learning/legacy camera dialogs; React document videos use contained viewport bounds.

New required CI step runs the actual BackOffice installer in real Chromium with synthetic Canvas media:12cases at1366x768/1280x600/390x844,16/20px fonts and fixed/manual+torch capabilities. Every Close/Capture/Cancel is in viewport, at least48px high, pointer-hit enabled; actual Cancel stops tracks/removes dialog; zero backend/OCR/payment calls or horizontal scroll. Actual script PASS locally on Chromium153, fresh actual Node20.20.2 combined42PASS/0FAIL/0SKIP. Before/after geometry, screenshot and failure qualification preserved under CHECKPOINTS/EVIDENCE/document-capture-scanner-20261026/. These are synthetic engineering proofs, not physical optical/LAB PASS.

Current source preserves independent main993f2f7d and all other owners; layout source is AWAITING its own fresh full CI/review before ordinary guarded release. No production merge/deploy/settings, physical scan, paid AI, payment/stock/draft finalization or messaging action. Windows WIA hardware, browser local-network permission and actual installation/reboot remain NOT TESTED; earlier Canon P-208II TWAIN caveat retained. Owner remains assigned. Single next action: exact corrected source full CI including new actual camera geometry, then ordinary source integration/release and physical acceptance without replaying accepted transactions.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / FIRST FULL CI FAILURE CORRECTED / ONE-TIME SETUP CANDIDATE

Retained receiving owner/sourcePR3177. First full exact f1529467 CI40378479917/job121769066237:4272tests/4264PASS/2FAIL/6cancelled/0SKIP. Two old source-contract assertions still expected direct camera constraints in Inventory/Premium after moving acquisition to the common helper. Updated only the delegated camera/readiness assertions; existing preview attach/play and retail decoder/stop checks remain. Six photo tests were cancelled because symbolic non-image byte fixtures could not complete the newly required real Image decode. Those two mobile fixtures now use real native-generated JPEGs and actual native Image decoding; a new low-resolution case proves zero upload and retained selection. No runtime quality bypass, removed financial/page-order/retry assertion or silent CI rerun.

Fresh actual Node20.20.2 runs:26focused and16photo/inventory tests PASS/0FAIL/0SKIP; common preview source contract also checked directly. Whole backend multipage suite not run locally because its original wallet/DB source dependencies are absent from the limited snapshot; full CI remains required. Android40378479827 and Windows40378479544 on prior unchanged camera/native source succeeded; they do not certify later connector changes. Initial full raw failure summary and corrected logs are preserved in CHECKPOINTS/EVIDENCE/document-capture-scanner-20261026/.

One-time technician setup now persists device pairing across browser/connector/reboot: browser-profile local storage plus Windows DPAPI CurrentUser encrypted device token, explicit local reset, no document image files. Optional explicitly run per-user INSTALL.cmd/Install.ps1 copies the package and adds a minimized user Startup shortcut; never auto-installed by site/CI, no admin/firewall/service/ExecutionPolicy bypass. Production Origin/Host, POST/bearer/pair-code expiry/attempt bounds, single-flight/replay/byte limits and explicit document review unchanged. New Windows HTTP self-test includes actual DPAPI round-trip/new-session reuse and corrupt-record rejection; install script parse and standalone packaging must pass before delivery. Actual Windows-user installation/reboot/driver remains NOT TESTED.

Real isolated Chromium153 confirmed pairing reuse in another tab of the same browser profile (zero extra pairing input) using synthetic responses; no hardware/business call. Packed-browser initial fixture regeneration had a scratch-only script-substitution error, corrected by rebuilding the complete fixture; no app assertion weakened. Model caveat: Canon's official P-208II driver listing is ISIS/TWAIN; this WIA-only candidate does not certify that earlier suggested model. Confirm actual WIA transfer before purchase; TWAIN support remains OPEN/separate, no universal compatibility claim.

Current integration preserves concurrent cash-paper source814d9fd5 and every other owner by exact Git blobs. Status SOURCE CANDIDATE / NOT INSTALLED / AWAITING FRESH FULL CI, WINDOWS PROTOCOL/PERSISTENCE AND HARDWARE. Existing qualified PASS/manual unchanged; no real/LAB payment, stock, invoice, chat send, provider call, hardware scan, production installation or deployment. Owner retained; single next action: verify this corrected exact head through required CI/review before ordinary guarded release.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / WINDOWS PROTOCOL + SYNTHETIC BROWSER PROOF / FULL CI PENDING

Same receiving owner/sourcePR3177; no installed or physical PASS. Head eb42bea0 Windows workflow40377267699/job121763625350 SUCCESS: actual .NET8 compile, loopback HTTP synthetic protocol assertions and standalone win-x64 package artifact completed. No WIA hardware scan. Android40377267730 compile/unit/lint succeeded; emulator still pending at this receipt. Exact final full CI remains mandatory and earlier-head results alone cannot certify later changes.

Actual isolated Chromium153 tested the real scanner React component with a synthetic local response: explicit pairing then one scan selects one review page, no business/network provider call;1100px desktop and390px mobile have equal client/scroll widths, scan button48px, no page errors. Real Canvas/JPEG preparation retained all four colored corner markers (1551/1548/1529/1542 pixels) outside a white simulated paper area; expanded1030x743 output from1000x700, croppedfalse and original-reference retained. Browser proof is not optical/OCR/hardware acceptance. Initial packed-browser environment setup failed on font chown and default Vulkan initialization; local software-rendering launch then completed without relaxing assertions or changing application code. Evidence in CHECKPOINTS/EVIDENCE/document-capture-scanner-20261026/.

Review follow-up keeps the BackOffice job's archived dataUrl as the exact selected original file, while quality checks/header preparation still occur before intake; no original is replaced by the cleaned preview. Fresh Node20.20.2 focused26PASS/0FAIL/0SKIP after this adjustment. Required full CI/source review/ordinary release, actual Windows/browser/driver test and separately authorized stable native distribution remain OPEN. No production deploy/config/business/stock/payment/message mutation, new manual PASS or repeat accepted invoice.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / SOURCE CANDIDATE / AWAITING FULL CI AND HARDWARE

Receiving owner codex/document-capture-scanner-20261026; source codex/document-capture-scanner-source-20261026. Explicit limited handoff claim3174 exact36d5840b passed applicable CI40373602584 (three jobs successful; full runtime jobs correctly docs-skipped) and merged231f4a3f before source. QR/provider decisions, finance/stock/fiscal/auth, native messaging/privacy/distribution and other owners remain protected. No real document/payment/stock/upload/message/scan or accepted transaction replay.

Candidate covers shared document camera requests (ideal4K, supported focus, permission-denial no retry), capture-readiness/full-sensor frames and late-permission cancellation, supported lighting controls, common focus in QR/login/shift/inventory and legacy/Premium/Basic/BackOffice/Learning capture. Document preparation retains all source edges on an expanded deskew canvas and returns the original reference; no automatic guessed paper crop. Existing consumer archival policy is not broadened. Mobile upload checks actual portrait/landscape resolution; native still capture selects bounded detail up to3264px/8MP, supported AF mode and JPEG96 without changing RAM-only handoff or5/7MB/14MB limits. No forced optical focus, perspective correction or universal device compatibility claim.

Explicit scanner controls feed existing intake for Basic/Premium/legacy invoices, supplier evidence, expense/payroll, bank evidence, BackOffice import/Learning/AI and selected invoice/payment/cash chat attachments. Pairing never scans or registers payment/sends; existing confirmation remains mandatory. The new loopback-only Windows WIA connector requires exact production Origin, JSON POST, one-time6digit pairing/5attempts/10min and256bit session bearer, bounded pages/bytes, one physical scan in flight and request-ID replay rejection. One page per explicit scan; supported forms append up to5, no automatic feeder batch. Requires Windows WIA driver/exactly one scanner; TWAIN-only and phones cannot run the connector. Browser local-network permission and actual device require testing. Cancel discards late bytes but may not stop physical motion. Latest result remains bounded process RAM, no connector image files. New Windows workflow must compile, run real loopback synthetic protocol checks and package standalone executable; Android CI must compile/unit/lint/emulator before any candidate distribution.

Local actual Node20.20.2 focused26PASS/0FAIL/0SKIP, including mounted scanner pairing/no-auto-scan, scope/unmount/abort/single-flight/token/malformed payload, full-frame edge/portrait/cleanup geometry, current Basic/Premium duplicate/durable-payment completion, QR input/provider fallback and mobile/Learning source regressions.30 JSX/module parses PASS. An initial broader local attempt failed only because the incomplete source snapshot lacked tracked dependency files; those exact baseline files were retrieved and the complete named26-case command passed, no assertion removed except the explicitly superseded direct-camera-call source assertion now references the common acquisition helper tested through actual calls. No native Windows/Android/full-client/full-server, real camera/image legibility or installed acceptance PASS claimed. Exact full source/main CI and ordinary guarded reviewed release are still REQUIRED; hardware and hosted acceptance NOT TESTED/AWAITING LAB. Do not request accepted invoice/payment replay.

Checkpoint CHECKPOINTS/CHANGES/2026-10-26-document-capture-scanner.md. Owner retained. Source is NOT INSTALLED; next resolve exact required CI/build/review, then ordinary exact guarded release and a new non-financial synthetic camera/scanner acceptance when hardware exists. Existing qualified manual PASS unchanged; no new manual PASS.

26/10/2026 — DOCUMENT-CAPTURE-SCANNER-01 / EXPLICIT LIMITED HANDOFF / ASSIGNED BEFORE SOURCE

Owner codex/document-capture-scanner-20261026. User explicitly approved this conversation's unified takeover after being told about existing camera/invoice-QR/native ownership. This supersedes ONLY acquisition/focus/photo-quality presentation and document-scanner integration ownership across existing web camera/document intakes and native photo capture. Existing QR/provider resolution, attendance decisions, native messaging/privacy/distribution, Gate3 OCR/learning/payment/stock/fiscal owners and their qualified PASS remain unchanged. No parallel writer is authorized for the received capture scope.

Implement shared capability-aware higher-resolution camera acquisition, focus and capture-readiness guidance, non-destructive document-quality handling and consistent accessible controls; preserve original images, page order/limits and explicit user review. Add an explicit document-scanning button to invoice and evidence/document intake surfaces, backed by an origin-restricted authenticated local Windows WIA connector, with one-time local pairing, no scan on GET/pair/open, no arbitrary paths/URLs or automatic upload/payment. Scanner returns pages to the current existing intake only; close, logout/store/session change discards stale results. QR/live attendance and general photo/video remain separate modes; do not apply document whitening/cropping to faces, product photos or QR. No mandatory purchase, cloud scanner service, new paid OCR provider, automatic send or financial action.

Baseline main2c20d2cf; healthy public runtime independently read as2b3ac179/oktrue. Existing BackOffice intake has manual JPEG camera/zoom and PDF/image upload; Basic/Premium/payment paths already contain document-image-quality checks and focus controls. Existing quality processing is not uniformly mounted and is not a physical camera PASS. New capture/scanner compatibility, Windows hardware, physical cameras, browser local-network permission, native and hosted acceptance are NOT TESTED. Preserve original settlement/job/draft identities, no second payment/upload to repeat an accepted test, existing auth/licence/tenant/store fences and all recorded limited PASS.

Before code: publish this receiving claim green/main. Then bounded common helpers/connector and actual consumer adapters; meaningful image/capture/pairing/origin/replay/cancel/store-stale/busy/page-limit regressions, frontend build, full required PR/main CI plus Windows/Android compilation where touched. No source/claim CI may be called LAB PASS. Ordinary guarded reviewed release and exact deployed revision precede physical acceptance. Existing active camera focus FAIL stays historical/open until a new measured result. Scanner model/driver and actual one-button workflow require real hardware; no universal WIA support promised. No production settings, DB, business writes, invoice OCR logic, QR allowlist/provider, fiscal/auth/lifecycle or automatic messaging changes.

Checkpoint CHECKPOINTS/CHANGES/2026-10-26-document-capture-scanner.md. Owner retained until completion or named handoff. Status ASSIGNED / SOURCE NOT STARTED / NOT INSTALLED / AWAITING IMPLEMENTATION AND LAB. Single next action: merge this pre-source claim after required checks, then implement the shared acquisition and document scanner adapters.

26/10/2026 - POS-DEFERRED-INVOICE-PAYMENT-01 / BEFORE-SOURCE CAUSAL AMENDMENT / 13 PATHS

Retained central owner codex/central-four-streams-20261018; invoice next_reports/shared close solewriter shift_pin. Original3169/main771b546 claim protected; freshmain2c20d2c myDATA3171 receipt preserved. DOCS ONLY, no PIN/source edit.

Add existing pos-first-payment-header-review.test.js pendingIntentForPayment DI/no-pending ONLY existing nonpending myDATA fixtures (assertionsunchanged/no productiontypeof fallback), plus existing shift-close-pin-postgres.test.js constructor DI/no-op ONLYforPINisolation (all assertionsunchanged/realinvoicePGhelperrequired); existing commerce-pos-v244 ensureFastHandoffSchema optionaldb/schemaOnly stops pendingrequests AFTERexistingDDL BEFORE lifecycle jobbatch recovery/reset/requeue; defaultcallerbehaviorunchanged.

Existing CashControlPanel closeShift ONLY fresh selectedscope pendingoverview/question/explicitACK+fingerprint, besidespendinglist; noformulas/investigation/chatwrites. Sameoriginal11runtime/UI/testpaths+2existingtestmaintenance, no schema/manifest/newruntimepath. WorkerswaitGREENMAINbeforetheseamendedsections; frozenPIN6hashesunchanged.

Checkpoint CHECKPOINTS/CHANGES/2026-10-26-pos-deferred-invoice-payment.md. SOURCE NOT STARTED for amendment/NOT INSTALLED/NOT TESTED; no USER/LAB/manualPASS or businessaction. All originalregistrybytesretainedafterprefix; canonicalPDFsynchronized; otherownersprotected.

26/10/2026 — MYDATA-HTTP-DIAGNOSTICS-01 / TECHNICALLY INSTALLED / AWAITING USER ACCEPTANCE

Independent diagnostic owner fix/mydata-http-diagnostics-20261026 retained; source fix/mydata-http-diagnostics-source-20261026. Claim3166 mergedf3a30f49 before source after applicable green docsCI40365497784. Source3168 exactheadde560f16488d58b232b77cfe3b4aaa1c5131214a / fullPRCI40366419404 job121725702942 SUCCESS; normal expected-head squash merged2b3ac1790c97d6d2a052428586543997beee3c9b preserving concurrent appended cash-paper claim3165. Exact MAIN CI40368093291/job121731516361 all five jobs SUCCESS. Both full runs: Node20.20.2,4264server+8backupPASS/0FAIL/0SKIP, including new actual registered manual/scheduled/status error-path tests and existing native PostgreSQL/Windows/browser/build/archive/HTTP E2E. These are engineering checks, not physical or real upstream acceptance.

Ordinary guarded release40369656989/job121736764106; Render dep-dbfou5942hec73et0io0 deploy_hook LIVE at 2026-10-26T17:38:29.819557Z, exact revision2b3ac1790c97d6d2a052428586543997beee3c9b. Independent unauthenticated no-cache public /api/health at 2026-10-26T17:39:42.926141+00:00 returned HTTP200/oktrue/exact same revision. Main source SHA256 values independently match the reviewed four source/test files; intervening POS claim3169 changes documentation only and is preserved. No manual Render trigger, migration, production SQL repair, credential/settings change or sync/payment/upload/stock/fiscal action by this page.

Shared manual/scheduled receiving now provides fixed safe Greek guidance for recognized key refusal, generic401, unknown403,429,5xx and fallback, plus a random support reference. Unknown403 stays undiagnosed rather than claiming bad credentials. Only allowlisted reference/RequestDocs/status/environment/reason metadata is logged; no upstream response or secrets. Selected-store status uses the same safe error/reference and clears it on subsequent success. Existing502 API contract, role/licence/tenant/store/lifecycle locks, endpoint/headers/cursor/pagination/idempotency/original and all business writers unchanged. Error wording does not falsely promise zero saved documents after a partial-page failure.

Actual local focused32PASS/0FAIL/0SKIP and Node20 frontend/TABLE_SERVICE build PASS. Initial full local run3416PASS/81FAIL/268SKIP lacked generated Prisma client at its start; this is retained as infrastructure failure, NOT a green full suite. After generating the local client only, all initially failed files reran407PASS/0FAIL/8native-environmentSKIP without weakening assertions. Full native proof is the two exact green CIs above. Initial new fixture assertion corrected to the existing next(error)404 contract; production404 logic unchanged.

Technical implementation/release complete; actual new UI/error observation and successful connection for the reported store remain AWAITING USER/LAB. The original upstream403 cause is UNKNOWN, not resolved by diagnostic release alone. Whole09/Gate3 and original receiving/other owners/PASS remain unchanged; no functional manual or numbered PASS closure. Single next action: ordinary owner refreshes existing selected-store inbox and makes one deliberate receiving attempt, then supplies its new safe message/reference. Do not change credentials blindly or repeat any payment/finalization for evidence. Owner retained for this bounded acceptance; no parallel broad takeover. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-mydata-http-diagnostics.md; machine-readable proof CHECKPOINTS/EVIDENCE/mydata-http-diagnostics-20261026/verification.json. Canonical tracker PDF regenerated in this receipt.

26/10/2026 - THREE EXPLICIT POS EXTENSIONS / ASSIGNED BEFORE SOURCE / NOT IMPLEMENTED

Central owner codex/central-four-streams-20261018. Freshmain2b3ac179 (initial27ab5bc, unrelated myDATA3168 source preserved) preserves cash-chat3163/3165, myDATA3166 and all existing owners/PASS. This claim-only batch supersedes narrow draft3167 as the current continuation; no whole-project completion or final-user-only status is implied.

POS-NEW-PRODUCT-FULL-CARD-01: worker/root/next_commerce branchfix/pos-new-product-full-card-20261026, exact15paths/full existing BackOffice fields with fresh defaultfalse POS permission and both STORE_MODE+INVENTORY. POS StockMovement UserFK uses NULL for STORE_OPERATOR with original audit attribution retained, no FK/schema weakening. Original inventory-new-card-online20261013 owner/limitedPASS/createacceptance retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-pos-new-product-full-card.md.

SHIFT-CLOSE-PERSONAL-PIN-01: worker/root/shift_pin branchfix/shift-close-personal-pin-20261026, exact6paths; explicit personalopenerPIN alternative supersedes ONLY05Octcard-onlyrestriction. Existingcard/roles/opener/terminal/liveclosings/Gate8finalPASS protected; durablefailedPINguard commitsbefore401 with nofinancialsideeffects. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-shift-close-personal-pin.md.

POS-DEFERRED-INVOICE-PAYMENT-01: worker/root/next_reports branchfix/pos-deferred-invoice-payment-20261026, exact11paths; distinct no-documentinvoicepayment+atomicpending/precloseask+explicitack/lateroriginalpaymentreuse. NoFast/Premiumform/schema/manifestchange; preserveadvance/CREDIT/Gate3/onepayment/job/draft. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-pos-deferred-invoice-payment.md.

SharedStoreShiftClosePanel.jsx+cash-control.js SOLEWRITERshift_pin: PINsectionsfirst, reviewedinvoicependingsectionsserializedafterPINcommit; no parallel edits. SeparateindependentsourcePRs/serialintegration; sourceonlyAFTERthisclaimreviewed/greenmergedmain, meaningfulnative/UI/fullNode20CI/exactguardedreleasebeforeLAB. All3SOURCE NOT STARTED/NOT INSTALLED/NOT TESTED; no newmanual/USER/LABPASS or businessaction. CanonicalPDFsynchronized; alloriginalregistrybytespreservedafterprefix.

26/10/2026 — MYDATA-HTTP-DIAGNOSTICS-01 / SOURCE PREPARED / AWAITING FULL CI AND LAB

Independent owner fix/mydata-http-diagnostics-20261026; source fix/mydata-http-diagnostics-source-20261026. Before-source claim3166 final head461ec5571fffe94dbd0855b9d9e658951951e39e passed applicable docsCI40365497784 (three jobs successful, runtime/wholesale correctly skipped) and mergedf3a30f49db5e9f3d69b02ac91e8fe96e8dc6c984 before code. Preserved concurrent cash-chat3163 and all other owners/PASS.

Shared manual/scheduled HTTP failure path now classifies bounded upstream messages into fixed safe guidance: recognized invalid/missing subscription key, generic401, unknown403,429,5xx and fallback. An unknown403 never asserts incorrect credentials. No remote response, secret, URL or taxpayer/document identifier is retained or logged; diagnostics contain only random UUID reference, fixed RequestDocs operation, HTTP status, configured environment and reason enum. Manual errors and selected-store status expose the same safe reference; scheduled failure logs the same diagnostic before its existing catch. A subsequent successful sync clears only that store's error. Existing502 API contract, auth/tenant/store/license/lifecycle locks, endpoints/headers/cursor/pagination/draft/original/payment/stock/fiscal behavior retained. Error wording no longer falsely promises zero saved documents if an earlier page succeeded.

Actual local Node20.20.2 focused32PASS/0FAIL/0SKIP, including five new tests that execute manual/scheduled/status failure handlers, no document writes or original acquisition, cross-store error isolation, unknown/HTML/malformed/oversize bodies, recognized JSON/XML messages, secret exclusion and success recovery. Initial new test had a fixture assertion mistake (expected JSON for a next(error)404); corrected assertion to the existing404 contract, source behavior unchanged. Full local suite/build still running at publication; exact full PR/mainCI and ordinary guarded deployment mandatory. No production sync or business mutation performed. New functional acceptance NOT TESTED/AWAITING LAB; upstream refusal root cause and actual successful receipt remain UNKNOWN/OPEN. No manual/whole09 PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-mydata-http-diagnostics.md.

26/10/2026 — MYDATA-HTTP-DIAGNOSTICS-01 / ASSIGNED / NOT TESTED

Owner fix/mydata-http-diagnostics-20261026. User explicitly requests a central correction after a real selected-store receiving failure at 18:54 Europe/Athens. Render production revision025a9a3a runtime18:54:19 confirms upstream403 in performSync, not an application role denial. Installed source discards the upstream body and emits generic502. Root cause of upstream refusal remains UNKNOWN; stored/enabled credentials are not proof of acceptance.

Independent bounded diagnostic subtask only: classify recognized HTTP error responses into fixed safe Greek guidance, preserve unknown403 as unknown, give a random support reference and safe metadata for manual AND scheduled receiving. Never return/log upstream bodies, credentials, URLs, taxpayer/document identifiers or arbitrary remote text. No automatic credential changes, retry, endpoint change, new sync, invoice/payment/stock/fiscal mutation or production DB operation. Preserve existing receiving owner codex/mydata-completion-20261006, other invoice owners and all previous PASS; no broader takeover. Required source/unit and actual route failure-path tests, full PR/main CI, ordinary guarded release and exact revision. Actual new behavior NOT TESTED/AWAITING LAB; upstream403 resolution is separate and unproven. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-mydata-http-diagnostics.md. Claim must merge green before source.

26/10/2026 — CASH-CHAT-RECONCILIATION-01 / EXACT SOURCE CI PASS / CURRENT-MAIN RECONCILIATION

Same receiving owner and source3163. Exact31e28d2adc6843a603cebfbd234e4a5d4a571188 CI40347645274 all5jobs SUCCESS; actual Node20 job121659476258 logs4245server+8backupPASS/0FAIL/0SKIP. Native chat SQL and cross-day handoff/correction cases executed unskipped. This is isolated technical proof, not handwriting reading, LAB acceptance or installation.

Main advanced to33d5da131be790a3bcf18fcae5d06d2dd3339a8d with independent Internet-search isolation3161/receipt3164. Merge attempt refused405 because three prepend-only registries conflicted; no runtime conflict or guard bypass. Reconcile both complete registry prefixes against current main and retain all other-owner source/evidence/PDF bytes. Every owned runtime/test blob remains unchanged from exact green31e28d2a. New combined-head full CI is required; prior-head green cannot certify the merged combination. No new real/LAB/provider/email/financial action. Status AWAITING COMBINED CI / NOT INSTALLED; requested reading/recalculation remainder stays OPEN under the same owner.

26/10/2026 — CASH-CHAT-RECONCILIATION-01 / ENTITLEMENT REVIEW BEFORE MERGE / SOURCE CANDIDATE ONLY

Same receiving owner codex/cash-chat-reconciliation-20261026 and source3163, within the already green before-source3162 scope. Additional self-review found Owner chat metadata must preserve the existing STORE_CHAT entitlement, not only cash/store access. Cloud investigation now reuses authoritative authenticated company licence state and the existing effectiveModuleEnabled store override/date policy before any StoreChatMessage query. Missing/inactive/expired/disabled entitlement yields no chat read; cash handoff/source review remains available. Platform SuperAdmin retains its pre-existing authorised bypass. No module guard/configuration is changed. Actual registered-route regression covers disabled company/store, expiry, operator and foreign-store rejection, with unchanged cash-3/card+8.

Final affected Node20 suite39PASS/0FAIL/4explicit nativePGSKIP; final mounted UI2PASS/0FAIL; preserved correction/period13PASS/0FAIL. Node20 frontend/TABLE_SERVICE build PASS. Initial broad sparse run actually3754PASS/18FAIL/270environmentSKIP; all18 failures traced to missing tracked ops/backup, original evidence and the original Hikvision ZIP. Restored ONLY those existing HEAD paths. The affected failed-file rerun actually61PASS/0FAIL/5nativeSKIP, retaining every assertion. This is NOT a newly green full local suite or native PostgreSQL proof. Initial source8b8a6d0 CI40346038335 is superseded by this entitlement follow-up; only final-head full CI is admissible before merge. No guard weakening, economic action, provider call or user acceptance. Whole requested handwritten/recalculation workflow remains OPEN, NOT INSTALLED, with remaining slices in the prior record.

26/10/2026 — CASH-CHAT-RECONCILIATION-01 / FIRST READ-ONLY SOURCE PREPARED / AWAITING FULL CI AND LAB

Receiving owner codex/cash-chat-reconciliation-20261026, source feat/cash-chat-evidence-20261026 retained. Before-source named handoff3162/head3ed0da80045d6bb7370c76631b989d0f29a2ce83/docsCI40344060114 SUCCESS (three applicable jobs; full runtime/wholesale correctly skipped for docs) merged0b22270ba6681e3cc7ac6e80b3e20bf8f44ba250 before source. Five published claim blobs independently match local git hashes. No competing owner scope taken.

Implemented first bounded slice: company/store-bound read-only discovery of latest50 image/PDF chat metadata, explicit over-cap/missing/unread/unassociated coverage, checksum grouping retaining all original message references and no upload-date-to-receipt inference. No bytes, acknowledgement, invoice intake, AI/provider or payment action. Immediate same-terminal operational closing/opening facts cross midnight and expose missing/open/overlap/next-shift states, never change original amounts or employee liability. Platform analysis and copied prose share Greek labels; existing cloud investigation returns the shared evidence only for authenticated non-operator OWNER after existing company/store guards. Cloud adds read-only analysis with old-store/old-request/unmount response fencing. No closing/review writer, bank/cash arithmetic, auth/licence, schema or real message changes.

Actual local Node20.20.2 affected suite39PASS/0FAIL/4explicit PostgreSQL environmentSKIP, including actual registered Owner/denied/operator handlers and real mounted Backoffice store-switch/filename escaping/read-only cases. Initial protected baseline23PASS/0FAIL/0SKIP. Frontend/TABLE_SERVICE build PASS (initial Node24 build, Node20 final verification separately logged). New native PostgreSQL source/checksum/scope/cap/zero-write test and existing extended handoff fixture require unskipped full exact CI. Initial broad local run encountered missing sparse-checkout ops/backup/lifecycle files (ENOENT); this is qualified infrastructure failure, not full-green proof. Restored existing tracked ops/android/ios/docs only; no guard or failed assertion weakened. Source acceptance and deployment NOT TESTED. Claim PDF remains unchanged in this non-PASS source PR; no completion/manual/global-PASS claim.

Full requested workflow is NOT delivered by metadata: actual handwritten reading with authorized AI metering, durable verified date/shift association, reviewed once-only cash offsets/recalculation history, common automatic/email/assistant consumers and persistent per-store checkpoint remain REQUIRED next slices. Existing automatic-dispatch and chat/invoice/wallet/lifecycle/native owners stay retained. No send, real/LAB financial/stock/fiscal action, database repair, production DDL/settings or accepted transaction replay. Current status SOURCE PREPARED / NOT INSTALLED / AWAITING FULL CI AND LAB. Single next action: exact source CI and review, then continue the remaining bounded implementation with explicit claims before runtime edits; do not claim the whole workflow complete from this first slice.

26/10/2026 - INTERNET-SEARCH-STORE-CONTEXT-01 / TECHNICALLY INSTALLED / AWAITING AUTHENTICATED READ-ONLY ACCEPTANCE

Central executor codex/central-four-streams-20261018/root; group3 commerce. Root independent exact source/docs review CLEAR at final PR3161 head54e708cb321dc0518e2628fa651cece1ee8a5dce/tree65ee3c5aff286afdec155192dbc591755c30d583. Claim3155 green merged before source; retained Task14 owner codex/task14-owner-provider-readonly-20261007-r1 and prior scoped PASS stay protected. Final source PR CI40346765089 all5jobs SUCCESS, Node20.20.2:4250server+8backup PASS/0FAIL/0SKIP; actual native PostgreSQL parent973 and3subcases executed unskipped, plus mounted UI regressions. Earlier candidate CI40344409882 same4250+8 PASS/0FAIL/0SKIP retained. Freshmain0b22270 and expectedhead54e708 checked immediately before authorized normal squash merge025a9a3a0aca3093c85aa5e42e5ecbd1cdf930a7. Four reviewed source hashes unchanged; all intervening FTEXT and cash-chat owner changes preserved.

Exact MAIN CI40348413084 attempt1/job121662285281 recorded4249PASS/1FAIL/0SKIP: unrelated DAILY1920 Chrome startup/render CDP timeout25000ms, SIGKILL at15:25:11UTC; other widths and new native parent+3 PASS. No code, assertion or timeout weakening. Supported targeted failed-job rerun requested only that job. Same exact main attempt2/job121666012314 all5jobs SUCCESS:4250server+8backup PASS/0FAIL/0SKIP, Node20.20.2; previous DAILY1920 nowPASS; native parent+3 unskipped at15:32:07UTC; build11.23s/TABLE_SERVICE entry-yMd1QnfD.js, browser/invariants/archive/import/realHTTP E2E PASS. Original failure remains evidence and is not erased by retry.

Failed-attempt deployment guard40349584441 correctly SKIPPED. Ordinary workflow_run guard40351115903/deploy121671236906 SUCCESS verified full CI/freshness, captured rollback artifact12664055754, triggered normal deploy hook and waited for exact production revision. No manual Render trigger or safeguard bypass. In already owner-confirmed My Workspace tea-d9ie26vaqgkc739uudqg, service srv-d9isenfavr4c73bdh52g: Render dep-dbfn7tmc6qcc73c4bga0 deploy_hook LIVE finished2026-10-26T15:40:13.903539UTC (17:40:13Europe/Athens). Helper independent unauthenticated no-cache GET /api/health15:40:35UTC HTTP200/oktrue/exact025a9a3a0aca3093c85aa5e42e5ecbd1cdf930a7; root repeated15:40:37UTC with same result. This proves technical installation and public health only.

Selected-store GET/history and GET/price-proposals now require active owned explicit store before schema helper and filter before limits; scoped panel lifetimes discard stale authority/store replies and callbacks. Provider algorithms, server writers, role/licence checks, schemas, prices/margin/payload contracts and all financial/stock/fiscal behavior unchanged. No real search-provider call, authenticated acceptance, proposal/order/write, settings activation, payment, stock or fiscal operation was performed. No manual/numbered/USER/LAB PASS and no wholeTask14 closure. Required residual: one grouped authenticated read-only selected-store acceptance for history/proposals, switching A-B-A and stale UI clearing, using authorized existing data and no paid provider or business writer. User login/actions remain deferred to final grouped batch.

Status TECHNICALLY INSTALLED / AWAITING AUTHENTICATED READ-ONLY ACCEPTANCE. This newest receipt supersedes historical source-prepared/not-installed entries below only for this bounded correction. All current-main registry/checkpoint bytes are preserved after this prefix; canonical output/pdf/MyWorkStation_Open_Work_2026-10-07.pdf regenerated, historical docs PDF unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-internet-search-store-context.md. No manual entry from CI-only evidence.

26/10/2026 - INTERNET-SEARCH-STORE-CONTEXT-01 / SOURCE PREPARED / AWAITING NATIVE CI AND READ-ONLY ACCEPTANCE

Central executor codex/central-four-streams-20261018/root; group3 commerce source fix/internet-search-store-context-20261026. Independent claim3155 exacthead19621ddd30fafe557ca25ffb61af1fb198783210/tree09dcede2aaf30fd3ab7b696b8a813c35002032ea reviewed CLEAR. Applicable docs CI40278653100 completed SUCCESS (3applicable jobs PASS, build/wholesale expected docs-only SKIP); expected-head normal squash merged5229591653e6b9f4730173f8fc0491283eb7dd6c BEFORE source. Source prepared on5229591; reconciled freshmain5e52b13 after unrelated FTEXT PR3156-3160, preserving its full source and registry bytes. Four reviewed source hashes unchanged. Reconciled next freshmain0b22270 (docs-only cash-chat receiving claim3162) byte-exact. Prior head7f09b955 full Node20.20.2 CI40344409882/all5jobs SUCCESS:4250server+8backup PASS/0FAIL/0SKIP, actual PostgreSQL parent+3subcases unskipped. New reconciled candidate still requires fresh exact full CI; NOT INSTALLED/AWAITING LAB. Retained Task14 owner codex/task14-owner-provider-readonly-20261007-r1 keeps prior Owner/provider-disabled/Master Catalog acceptance and previous01Oct PASS. No broad takeover or repeated accepted transaction.

Exactly four claimed source/test paths implemented. GET/history and GET/price-proposals now require explicit valid active owned store BEFORE ensureMarketSchema, then filter company/store before50/100limits. Shared panel scopes reads and synchronously clears store-owned product/results/catalog/history/proposals/local order suggestions/match acknowledgements on authority changes. Context lifetimes and channel generations discard stale A-B-A/API/basePath/removed-membership/close responses; catalog dropdown/picker share one latest channel. Captured writer completion and exact result-origin guards prevent old callbacks from retargeting new context/results or spending a legitimate current write generation. Root supplied/reviewed only the two GET changes; helper supplied component/tests. All server proposal writers, market/products/provider handlers, schema helper, roles/licences/signed support-company logic, matching/unit rules, net-margin/formulas/payload contracts and original layout remain unchanged.

Original actual-mounted regression0PASS/2FAIL proves missing selected-store read URLs and stale A-B-A result. Corrected final local Node24.22.1 focused41PASS/0FAIL/1explicit native PostgreSQL environmentSKIP. Nine mounted synthetic UI cases cover scoped/absent/removed stores, company/A-B-A/StrictMode/API authority, close, catalog interleaving, stale writer completion/busy, retained old result callbacks and local suggestion/ack isolation;31existing Task14 checks and one strict fixture guard also PASS. A fixture await initially blocked on its own controlled promise and was interrupted130; raw output retained, then only the act callback was made void, no application workaround or assertion weakening. New real PostgreSQL parent+3subcases prepared: actual registered GET/query selected-store isolation, pre-schema invalid/foreign/inactive refusal, limits/parameterized scope, Owner/module/platform/support-company checks and unchanged row/control snapshots. Strict test URL/query/DB guard plus always-run CI assertion require native execution unskipped in Node20 full CI. No local native execution claimed.

Frontend npm run build PASS8.50s, TABLE_SERVICE verified in entry-CvGAOJ8b.js. Two first sparse-checkout build failures retained (missing tracked shared/greece-time.mjs then shared/n40-read-trace.mjs); restored only exact existing HEAD shared files/verifier, no additional tracked runtime change or guard weakening. Syntax/source whitespace PASS. Root and independent helper source/native static review CLEAR at source-validation.json hashes. Raw original/corrected Node spec reporter output (not TAP), interrupted fixture output and infrastructure/final build logs in CHECKPOINTS/EVIDENCE/internet-search-store-context-20261026/.

SOURCE PREPARED / NOT INSTALLED / LAB-USER NOT TESTED. No production/auth/provider/config/schema/price/VAT/proposal/order/payment/stock/fiscal action or functional manual/numbered PASS. All current-main registry bytes and original claim preserved exactly after this prefix; canonical output/pdf/MyWorkStation_Open_Work_2026-10-07.pdf regenerated from tracker, historical docs PDF unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-internet-search-store-context.md. Next: publish exact reviewable source PR; complete mandatory native Node20 full CI and root exact remote review, normal merge/mainCI/guarded release, then only grouped authenticated read-only acceptance. User actions stay deferred to that final batch.

26/10/2026 — CASH-CHAT-RECONCILIATION-01 / OWNER-AUTHORIZED LIMITED HANDOFF / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ codex/automatic-reporting-20261016 — ASSIGNED codex/cash-chat-reconciliation-20261026. On26Oct the owner explicitly requested the same cash-audit/recalculation method in MyWorkStation using existing system data without Excel and handwritten evidence from each store chat, authorized publication (issue2527 comment6410545386), then explicitly instructed this conversation «Ανέλαβε το». This is the named receiving record for ONLY that central cash-review extension, not a transfer of the original all14 umbrella or automatic dispatch, lifecycle/backup, assistant, native chat, invoice OCR/payment, workforce or fiscal writers. Existing owners and scoped PASS remain protected. No second concurrent executor is authorized for the received scope.

Baseline refreshed main5e52b13a11b80a9c1b73c4bde15c05276e6964dc; prior unpublished preparation was based on5229591653e6b9f4730173f8fc0491283eb7dd6c. Read AGENTS, current tracker/pending/active/checklist, central cash-review checkpoint, report manuals, current source and main history. Existing signed confirmed balances, exact correction links, installment evidence and limited source/UI PASS from16Oct remain protected. Current read-only sale/chain evidence does not itself settle cross-shift liability. StoreChatMessage already holds company/store-bound original image/PDF bytes/checksums; its invoice AI-reader action is INVOICE-only and must not be repurposed to create invoice drafts from cash sheets. No financial or provider action occurred during inspection.

Received requirements: one evidence-backed cash result across MyWorkStation views/reports; actual shift handoff and overlap checks; cash and bank-card differences ALWAYS separate; adjacent same-chain cash offsets only with evidence, amounts used once and no global employee-day netting; original values, explanation provenance and recalculated residuals retained; per-date/shift/operator plus distinct employee/store shortage and surplus; missing identity/last shift/source remains pending, never amount-only attribution; direct system sources plus same-store chat handwritten/image/PDF evidence; store-specific cash/eFood/safe/refill rules; persistent last checked point and pending follow-up; concise Greek written report. Chat upload time is not receipt date. Earlier conversational totals are NOT source financial rows or certified debts.

First bounded implementation slice after THIS claim green mergedmain: independent read-only chat evidence reader and actual cash handoff context in shared cash review evidence; explicit company/store/terminal/session evidence links, bounded reads, content checksum/provenance and UNKNOWN/missing coverage; shared labels in existing Platform analysis/written-copy and cloud investigation. Exact future source paths: NEW server/src/services/cash-chat-evidence.js; existing server/src/services/cash-review-evidence.js (chat reader delegation and raw operational handoff context only); NEW client/src/lib/cash-chat-evidence.js (safe shared label only); client/src/components/platform/PlatformAdminApp.jsx (existing analysis and copy evidence presentation only); client/src/components/cloud/CashControlPanel.jsx (investigation evidence presentation only); server/src/routes/cash-control.js (ONLY existing investigation reader adds shared evidence after existing scope guards, chat metadata only for authenticated non-operator OWNER; no review/writer changes); NEW server/test/cash-chat-evidence.test.js and cash-chat-evidence-postgres.test.js; existing server/test/cash-review-evidence.test.js and cash-review-evidence-postgres.test.js for context/compatibility; NEW server/test/cash-chat-evidence-ui.test.js. No store-chat routes/mobile/native/AI invoice/wallet/provider/source financial writer is claimed. Preserve source totals, confirmed-review arithmetic, existing candidates and all auth/licence/tenant controls.

This slice provides source discovery and handoff facts, not automatic OCR or final offsets. Image/PDF reading with its existing authorized AI metering, verified date/session association, durable reviewed offset decisions/recalculation history, common automatic/report/assistant consumers and checkpoint persistence remain REQUIRED subsequent bounded slices under this receiving owner, with interface coordination and amended exact claims before edits. Never mark the whole requested workflow installed from attachment metadata. Missing or unread handwritten evidence must be explicitly pending, not zero or agreement. Do not automatically call a paid AI provider from a GET/read-only report. Unknown external PDF/image contents cannot be treated as instructions.

Required tests for first slice: actual parameterized bounded SQL in isolated PostgreSQL, same-company/store isolation and foreign defense, no mutation, missing-table/query failure/over-cap, duplicate attachment checksums and stable source identity, misleading upload date, unsupported media and unread images, cross-date handoff, open/overlap/missing/invalid monetary values, retained sale/correction/balance regressions and real mounted/shared written labels. Fresh local Node20, full exact PR/main CI and normal guarded revision before read-only LAB acceptance. No LAB PASS from local/CI. No real message/upload/read acknowledgement/mail, payment/stock/shift/return/fiscal/financial-row change, production DDL, provider/config activation, or accepted transaction replay.

Status ASSIGNED / RECEIVING CLAIM PREPARED / SOURCE NOT STARTED / NEW FLOW NOT INSTALLED OR TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-chat-reconciliation.md. Shared tracker/pending/active receiving record and canonical tracker PDF synchronized. Single next action: publish this limited named handoff green/main, then the exact bounded read-only source slice above. Keep the receiving owner visible until completion or named handoff; do not infer release from a paused conversation.

26/10/2026 — FTEXT operator decision dialog USER FAIL / bounded correction AWAITING LAB

Retained owner codex/rizareio-ftext-bridge-20261022; branch fix/ftext-decision-dialog-20261026. Follow-up claimPR3158 head d2b2f336aa1e69af37d3f821cad53b079d355118, doc CI40308227789 success (source jobs correctly skipped), mergedca8beee180cc9a79debe053de0b96d61e6a91258 before source. SourcePR3157/main688038f8f released: exact mainCI40302670017 success4234server+8backup, ordinary deploy40304089988 Renderdep-dbfiablg1s2s73fucln0 LIVE10:04:02UTC. Normal selected-store UI saved operator card code2/POS1/type1, config9dcc37e8-c3ef-458c-a6bc-57f86d524078; generated66304byte package SHA2561c4ea336ff7b5cecbf6534bd3fd863be444041da4b191d78a4e9eb7a27d98321. User screenshots confirm paired, STATUS delivered, connector connected26Oct12:21local. This records setup observation only, not a card acceptance PASS.

Latest owner USER FAIL: NO left blocking confirmation. Request1e50a87c-e5ed-491b-9e1c-cac73ee2bec9 CARD0.50 has original-cashier NO10:25:28.149UTC, REQUIRES_CHECK, saleIdNULL and unverified physical receipt result. Owner reports register/EFTPOS back at initial screens. No measured financial/stock delta or proved fiscal cancellation inferred; no repeat sale/VOID executed.

Correction hides the blocking dialog after persisted ftext NO and keeps basket/scanner usable, retaining pending identity/polling/key and server pending lock with visible review notice. Successful YES closes immediately on actual SALE_COMMITTED response; error/uncertain stays visible. No automatic resend, cancellation, financial/stock mutation or false success; no profile/Windows/server/lifecycle changes. CASH/RBS and previous limited CASH USER PASS protected. Source is AWAITING CI/LAB; physical retest and resolving original unverified fiscal state remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-ftext-decision-dialog.md.

26/10/2026 - FTEXT OPERATOR CARD SOURCE / AWAITING NATIVE CI AND PHYSICAL ACCEPTANCE

Retained codex/rizareio-ftext-bridge-20261022; explicit owner YES/NO requirement claimPR3156 greenCI40298426337 merged2ead86fd7 before source. Added separately configured OPERATOR_CONFIRMATION/type1 mode, immutable authenticated fiscal result plus separately bound original-cashier YES/NO decision, and existing atomic CARD/stock finalizer. NO/UNCERTAIN cannot write finances/stock, resend, erase a receipt or release an unresolved register lock; actual cancellation/reconciliation remains required. CASH/strictOS7/RBS remain protected; no new schema or lifecycle edits. Local Node20 targeted17PASS/0FAIL/0SKIP and client build PASS; native PG/Windows/full CI and physical acceptance pending. No production setting, package installation, charge or receipt. Card activation OFF, connector OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-ftext-operator-card.md.

26/10/2026 - FTEXT-OPERATOR-CARD-01 / EXPLICIT OWNER CHANGE / ASSIGNED BEFORE SOURCE

Retained owner codex/rizareio-ftext-bridge-20261022; branch feat/ftext-operator-card-20261026. Owner explicitly requests operator YES/NO payment acknowledgement as in RBS instead of requiring OS7 POS line8. This supersedes the earlier no-manual-card-confirmation requirement ONLY for a new explicitly configured OPERATOR_CONFIRMATION profile. Existing POS_LINE8_OS7, CASH, STATUS, one-shot dispatch, immutable device results, fiscal receipt binding, original shift, tenant/licence/lifecycle, recovery and RBS behavior remain protected.

Baseline main522959165. Physical evidence: DATECS DSM24014923 FW6.690, card payment ID2 (owner), terminal1 and transaction typeAGORA1 (photos), existing FTEXT25.02 SOLIDUS(II)T C:\FText. Manual conditional OS7 line8 does not establish that FW6.690 cannot execute card. Accepted CASH request e4241ef7/sale98bee70a remains limited USER PASS; never repeat it. Operator-card flow NOT TESTED, card activation unchanged/OFF. No production settings, receipt, charge or business mutation in this claim.

Bounded source: optional named operator profile in ftext-installation and setup controls; Windows card command/result handling without requiring line8 for this profile; immutable authenticated device fiscal response plus separately audited original-cashier YES/NO decision; existing atomic finalizer requires both successful final fiscal receipt and explicit YES for this profile. NO/UNCERTAIN cannot commit Sale/Payment/stock and cannot erase an open fiscal receipt or release unresolved register lock. Existing manager-only proved VOID remains separate; no automatic cancellation or resend. Exact same request/decision replay is idempotent; contradictory decisions, foreign cashier/store/terminal, stale settings and missing/failed receipt refuse finalization. UI reuses existing confirmation buttons and scoped recovery, never resends checkout.

Required verification: targeted real service and mounted UI tests, native PostgreSQL concurrent decision/finalization and rollback, Windows synthetic legacy receipt/one-shot/restart regression plus existing CASH/OS7/VOID, full exact CI, ordinary release and selected-package/settings update before separately consulted physical acceptance. No new manual/PASS from engineering. Same owner retained; whole connector OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-ftext-operator-card.md. Claim must be published before source.

26/10/2026 - INTERNET-SEARCH-STORE-CONTEXT-01 / INDEPENDENT CENTRAL CLAIM / BEFORE SOURCE

Central executor codex/central-four-streams-20261018 (root), group3 helper commerce; claim docs/internet-search-store-context-claim-20261026, future source fix/internet-search-store-context-20261026. User explicitly authorized four coordinated assistants and continuation. This is a new bounded causal read-projection/request-generation bug under the general07Oct selected-store rule, not a transfer or closure of Task14. Retained Task14 owner codex/task14-owner-provider-readonly-20261007-r1/PR1833 keeps Owner/provider-disabled/Master Catalog acceptance and all previous01Oct PASS; broader provider/margin/product/proposal-writer/order scopes and other owners remain unchanged. No release is inferred from silence. Only the exact new read-state portions below belong to this central executor after this claim is green merged; no concurrent overlapping source edits.

Baseline freshmain5ca3fb5e1bd6b408956e098a93ebe72fff70ac1f (#3154). Read AGENTS, current tracker/pending/complete active record, Task14 checkpoint/manual and source history. Current remote route blobbe6d931cc3ef38c4097681651449a12461ee1734 matches local. Two local isolated FAIL observations26Oct: actual GET/history handler's parameterized SELECT, executed against in-memory SQLite synthetic A/B rows, ignores explicit selectedstoreA and returnsB,A (only company binding); actual React/JSDOM component starts searchA, switchesB and renders late A result while B remains selected. Existing history/proposal GET requests omit storeId and reload only on company change. This is same-company cross-store/stale read behavior, not demonstrated cross-tenant access or LIVE business effect. Original tool outputs75f2d0/ef41aa are recorded as qualified summaries in evidence, not invented savedTAP. No63test replay or production/auth/provider/business operation.

Exactly four future source/test paths: client/src/components/commerce/InternetProductSearchPanel.jsx (selected company/store read-state and request-generation invalidation only); server/src/routes/commerce-advanced-online-search.js (ONLY GET/history and GET/price-proposals require explicit valid active selected store BEFORE ensureMarketSchema, then parameterized selected-store read filters; no other handlers); NEW server/test/internet-search-store-context-ui.test.js; NEW server/test/internet-search-store-context-postgres.test.js. UI resets visible query-linked product/results/catalog/history/proposals/temporary order suggestions/match acknowledgements and excludes late prior-generation read replies after store/company change, close/unmount or A-to-B-to-A. All read requests carry validated explicit selected scope; no empty/invalid-store fallback to company-wide data. Caller audit found only this same shared panel for both commerce and platform base paths; no separate intentional company-wide history/proposal reader exists. These two GETs therefore require storeId in both modes; absent/invalid/foreign store refuses rather than silently falling back. Preserve all unrelated existing company-level endpoints unchanged. Keep provider requests, item/pack/identity matching, net-margin/cost/regulated prices, server proposal create/decision SQL, outbound order behavior, auth/licence/module checks, source counts/audit/history inserts and original styling untouched. The UI may not retarget an existing stale result to a new store's write controls; writer semantics/payload field contracts remain unchanged.

Required actual mounted synthetic tests: history/proposal URL scope; initial valid/absent store; A-B-A/company/unmount responses and errors discarded; stale catalog/search/product/proposal/order view cleared; current accepted result works; single retained unsaved action cannot target new store; no provider or business writer executed. New real isolated PostgreSQL registered GET tests: A/B/foreign/invalid/missing scopes, licence/role/support company controls, exact row isolation, parameterization and unchanged data/control fingerprints. Reproduce original failures before source, preserve evidence, then targeted Node20/full native CI, independent exact review, normal merge/exactmainCI/guarded release before grouped authenticated read-only acceptance. No new manual/PASS or wholeTask14 closure from local or CI results.

Claim status DOCS PREPARED / SOURCE NOT STARTED / NEW FLOW NOT INSTALLED OR TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-internet-search-store-context.md; evidence CHECKPOINTS/EVIDENCE/internet-search-store-context-20261026/. Full canonical tracker PDF output/pdf/MyWorkStation_Open_Work_2026-10-07.pdf is synchronized with these three registry prefixes, using exactly the same generated bytes as evidence claim-tracker.pdf; historical docs/roadmap PDF and all other-owner content remain unchanged. Single next action: root independent docs/ownership review, publish green claim/main; only then bounded source. Existing Task14 acceptance and every other owner stay retained. No auth, provider setting/key, schema/DDL, price/VAT/proposal/order/payment/stock/fiscal or production mutation.

25/10/2026 - CENTRAL-FOUR-GROUPS-01 / RECONCILED CURRENT STATE / GROUPED FINAL ACCEPTANCE OPEN

Central coordinator codex/central-four-streams-20261018 retains all four groups; each existing source owner remains unchanged. User requires autonomous preparation first and one grouped final batch for user-only actions. Canonical detailed reconciliation is CHECKPOINTS/CHANGES/2026-10-25-central-four-group-reconciliation.md with sanitized Rizareio aggregate evidence; this does not transfer occupied scopes or create new manual PASS.

Group1: fresh read-only production observations confirm Rizareio already has3375products/3375store rows,4395barcode pairs/59internal labels and no missing joined VAT departments. Do not repeat import or accepted CASH sale. Complete source-price/workbook reconciliation remains open: original approved package SHA256cbf0b1ef795389ba0ecbe774eb9131bcd1c8d9f853cecd127a4fb35bb095f2e5 is known but exact bytes were not resolved. Physical ftext VOID/CARD and KAT connector/POS residuals remain; current Rizareio snapshot had no eligible unresolved CARD request, so no VOID target is manufactured. Current ACTIVE metadata did not prove a fresh15second heartbeat.

Group2: seven25Oct full backup runs were SUCCEEDED/PASSED; current18UTC dump/upload/TOC monitoring and app/backup manifest agreement were observed. This is not fresh full recovery or independent HMAC/storage-retention proof. Staging runner/restore/capacity/cleanup prerequisites remain open; no infrastructure mutation or upgrade occurred. Group3:63local Node24 isolated regression checks passed for catalogue/regulation/QR/supplier contracts, with no production/business action or new authenticated acceptance; existing accepted imports and limited supplier results remain protected.

Group4: invitation source3153 is now technically installed at exact2c1007e8, PR/main4228server+8backupPASS/0FAIL/0SKIP each, real native8cases unskipped, ordinaryguard40233351096 and RenderLIVE/public landing proof in the separate exact email receipt below. No recipient mail, activation or business action was executed. Payroll/VOICE/wallet/iOS residuals remain with their retained owners. One consolidated final user batch stays deferred until central preparation is complete; already accepted tests and transactions are not repeated.

25/10/2026 - AUTOMATIC-REPORT-EMAIL-INVITATION-01 / TECHNICALLY INSTALLED / FINAL RECIPIENT ACCEPTANCE OPEN

Same retained integration owner codex/central-auto-dispatch-20261022, central coordinating executor root. Before-source receipt3152 exact aab7fe6e / CI40226347056 SUCCESS merged d2fde6b before edits. Source3153 independently reviewed NO BLOCKERS, exact head01a57582065f207d4c9ef3e5f868207668767647 and treef999b8d1512ea110ecb7537c43b8c92c2fa9a290; normal squash merge2c1007e8156d1ca7748551c85e917a35b739af32. The obsolete unmerged3121 claim is superseded by3152 and must not be merged independently.

Full PR CI40229748284/build121278911983 and exact-main CI40232554657/build121287430491 BOTH terminal SUCCESS, all5jobs successful. EACH actual Node20.20.2 log records4228server+8backupPASS/0FAIL/0SKIP. New real PostgreSQL invitation parentTAP437 and all8subcases actually ran unskipped in BOTH: committed issuance/read-only inspection/legacy domain refusal/commit rollback/two-client one-consumption/zero-write reuse/stale nonce-version attempt fences/busy-expiry-lifecycle-revocation controls. These are isolated engineering results, not recipient inbox or normal authenticated user acceptance. Earlier local19PASS/0FAIL/1explicitPGSKIP and sparse infrastructure FAILs remain historical and qualified; no test weakening, unchanged failed-run retry or guard bypass.

Ordinary workflow_run guard40233351096/deploy121289662282 SUCCESS explicitly checked out and pinned2c1007e8 after exact-main full CI; Verify full CI/freshness, rollback capture, actual Trigger and Wait all SUCCESS. Rollback artifact12613669782 preserves previous healthyf5da1510f. Render service srv-d9isenfavr4c73bdh52g in already owner-confirmed My Workspace: dep-dbf6rug473hc73c2ek50 deploy_hook LIVE25Oct21:02:51.079608UTC (23:02:51Europe/Athens). Independent no-cache HTTP observation21:03:07.056745UTC: /api/health HTTP200,oktrue,revision exactly2c1007e8156d1ca7748551c85e917a35b739af32. Generic /api/report-invitations HTTP200, Greek title/prompt, no-store/no-referrer and fixed CSP; exact HTMLSHA256d3c4210196a08c2573b011a434266c9063f211ee22c10289f7e18c30d087e080. Root independently opened the same generic route in the supported cloud browser and saw the Greek heading and request to open the full emailed link. No fragment, token, auth, inspectPOST or consent action was supplied. This proves only installed public GET/visible landing, not successful recipient confirmation.

Installed engineering: one email/save action and one explicit recipient invitation confirmation; existing verified/current consent reused without writes or mail; legacy endpoints preserved; same policy/grant/external activation and financial gates. This release performed no production recipient/challenge/SMTP/config/schema/provider/business action or accepted transaction replay. External automatic dispatch state was not re-read or changed. Final authenticated email/save, intended recipient inbox/explicit confirmation and complete automatic-report delivery remain OPEN for the one grouped final batch; do not ask for repeated codes/proofs or fabricate a fresh recipient/event. No new functional manual PASS or whole task closure.

Evidence CHECKPOINTS/EVIDENCE/report-email-invitation-20261025/technical-release.json and public-installation.json; synchronized with central four-group reconciliation in this documentation-only receipt. Same owners retained; no additional source change. Next: green exact receipt review/merge, retire obsolete3121 metadata, then only actual remaining grouped acceptance under the central coordinator.

25/10/2026 - AUTOMATIC-REPORT-EMAIL-INVITATION-01 / SOURCE IMPLEMENTED / AWAITING FULL NATIVE CI AND USER ACCEPTANCE

Same retained integration owner codex/central-auto-dispatch-20261022; named central executor root, source branch feat/report-email-invitation-20261025. Green before-source continuation3152 head aab7fe6e2889e91029be43c68c4667b401a73c44 / exact CI40226347056 SUCCESS / main merge d2fde6bbd423dccfa16c9a832327c594737c1d99 preceded every source edit. Original3121 remains untouched and is superseded for this same claim by3152; do not merge the historical duplicate independently. Existing owners and accepted recipient verification/consent remain protected.

Implemented one email/save management action: existing current verified/consented recipient is reused without any write or mail; otherwise one committed invitation and one explicit recipient confirmation replaces the two copied-code steps. Existing legacy endpoints and advanced code controls remain compatible. The invitation uses existing CONSENT schema literal with distinct MWS_REPORT_INVITATION_V1 hash domain, random proof/nonce and exact scope/version/generation/issuedAt/consent revision/frequencies. Stale/replaced/expired/revoked proof never spends a newer challenge's attempts. Public confirmation takes the same lifecycle/Store/policy/grant/recipient/consent lock order and records report-recipient:<id> authority, never impersonating issuer or granting policy/automation. Concurrent confirmations may consume once; uncertain SMTP is not retried.

Public generic GET has no service/database call. The token stays in the email fragment, is removed from browser history and submitted only in a same-origin explicit-intent POST; no third-party landing assets, no-store/no-referrer, CSP and textContent rendering. Trusted canonical origin does not derive from request Host. Dedicated mount includes a four-argument error boundary outside its Router, intercepting upstream global JSON errors before the global logger. Existing global wire parser stays capped at12MiB; this route additionally bounds declared length and preparsed semantic JSON at8KiB and invitation envelope at4000 characters. Do not mislabel this as an8KiB raw chunked-wire cap. Unrelated parser/logger behavior remains unchanged. No authentication mount, schema/manifest/provisioning, configuration, scheduler, financial source or mail adapter change.

Actual local Node24.22.1 focused result:19PASS/0FAIL/1explicit native PostgreSQL environmentSKIP. Includes real Express global-parser/mount/logger malformed-secret redaction, scannerGET zero calls, oversize/nonJSON/origin/intent refusals, actual landing JavaScript explicit consent/XSS-safe text, mounted email/save once/reuse/late-store response and protected legacy recipients/routes/UI. New native PostgreSQL parent+8subcases requires actual unskipped Node20 full CI: real issuance/inspect, legacy domain rejection, commit rollback, two independent confirm clients/recipient actor, unchanged policy/grant/payload/slots/control, no-write reuse, replacement/version/attempt exhaustion and busy/expiry/lifecycle/revocation. No local PG execution is claimed. Initial missing-new-API baseline0PASS/1FAIL is retained as capability absence, not evidence of an old runtime regression. No failed assertion was removed.

Frontend npm run build now PASS,2440modules and TABLE_SERVICE verifier; initial missing tracked shared/greece-time.mjs and later missing tracked tools/verify-table-service-bundle.mjs caused explicit sparse-checkout infrastructure failures. Restored only those existing HEAD files; no application workaround or guard weakening. Git sparse shared comparison also returned139 once; no runtime conclusion inferred. Local Node24 is exploratory; required exact Node20 CI remains authoritative. Raw baseline/focused/build evidence in CHECKPOINTS/EVIDENCE/report-email-invitation-20261025/.

SOURCE PREPARED / NOT INSTALLED / NEW FLOW LAB-USER NOT TESTED. No production recipient/challenge/mail/config/schema/provider/business action, financial replay, or user login. Current external dispatch state was not read or changed. Single next action: independent exact source/native review and mandatory full PR CI, then normal merge/exact-main CI/guarded release before one grouped final acceptance. No routine user action is requested during technical work.

25/10/2026 - AUTOMATIC-REPORT-EMAIL-INVITATION-01 / CENTRAL CONTINUATION RECEIPT / RECONCILED CLAIM CANDIDATE

Same retained source owner codex/central-auto-dispatch-20261022; central coordinator codex/central-four-streams-20261018. The owner explicitly directed the central conversation to organize four assistants and continue autonomously, deferring grouped user actions to the final batch. Root is the named central coordinating executor for this same-owner continuation; the reports_ai_workforce assistant prepares this documentation/review only. This is not a transfer to a competing source owner and does not release any retained mail/lifecycle/backup/VOICE/wallet/native/KAT/DAILY scope. Before any runtime work, publish this exact receiving/continuation receipt and the reconciled source claim green on main; root alone coordinates shared records and the regenerated tracker PDF.

Read-only reconciliation baseline main 96c1125 (merged pilot wallet email receipt3151). Existing claim3121 exact177cb45bddbcd6fad453ac19bba84e5d770f3156 has CI40175343019 SUCCESS but is unmerged and diverged from newer main. Its four documentation additions are preserved below; all current-main wallet/ftext/polling and other-owner records remain byte-for-byte after these new prefixes. No old shared registry or PDF snapshot is substituted. The earlier e69eb1e baseline inside the original claim is historical; this receipt supplies the refreshed baseline. The new candidate requires its own exact independent review and applicable CI before merge; old-head CI is not reused as new-head proof.

Independent design review found no blocking issue in the bounded invitation contract: read-only landing GET; explicit recipient confirmation POST; exact scope/version/generation/frequencies and distinct token purpose; hash-only proof storage; replay/revocation/expiry protection; no issuer impersonation; current verified/consented rows reused without new mail; no policy/grant/dispatch activation from token possession. Exactly the source/test paths in the original claim remain the future scope, with index.js limited to the stated import/mount. No additional runtime, schema, provisioning, workflow, mail adapter or recovery path is claimed.

Status: DOCUMENTATION PREPARED / SOURCE NOT STARTED / NEW FLOW NOT INSTALLED OR TESTED. Existing recipient verified/consent-active observations are preserved without replay; current dispatch activation was not re-read and is not newly claimed ON or OFF. This preparation performs no source/config/schema/recipient/SMTP/provider/business action or new LAB/USER acceptance. Single next action: independently review and publish this current-main reconciliation as a separate continuation candidate, preserving existing3121 until central coordination explicitly supersedes it; obtain green exact CI/main receipt before bounded source. New user routine approval is not required.

25/10/2026 — AUTOMATIC-REPORT-EMAIL-INVITATION-01 / ASSIGNED BEFORE SOURCE

Same retained integration owner codex/central-auto-dispatch-20261022; continuation branch feat/report-email-invitation-20261025. User explicitly requested email/save with no copied codes and authorized implementation. Current main e69eb1ed49ae4b973e77513448d44d5f0541b83d read; existing recipient flow still two code challenges. User screenshots on25Oct show verified email and active consent; preserve those rows, do not request repetition. These are user UI observations, not independent runtime/whole report acceptance. No raw mailbox or challenge proof published.

Bounded exact source paths: server/src/services/automatic-report-recipients.js; server/src/services/automatic-report-dispatch-policy.js; server/src/routes/automatic-report-dispatch.js; client/src/components/platform/AutomaticReportDispatchManager.jsx; NEW server/src/services/automatic-report-invitations.js; NEW server/src/routes/automatic-report-invitations.js (self-contained HTML confirmation landing, no client routing changes); server/src/index.js ONLY new import and dedicated /api/report-invitations mount adjacent to existing report-dispatch mount before authenticated management, no existing auth mount edits; server/test/automatic-report-recipients.test.js; server/test/automatic-report-dispatch-routes.test.js; server/test/automatic-report-dispatch-ui.test.js; NEW server/test/automatic-report-invitations.test.js; NEW server/test/automatic-report-invitations-postgres.test.js. No other source/workflow paths. Public confirmation must use narrowly scoped token authority and accurately record recipient consent, never substitute the issuer as the confirming mailbox holder. One email invitation binds company/store/recipient/version/lifecycle/consent revision and exact frequencies with a distinct token domain. Public possession proves mailbox only for that narrow invitation; never impersonates administrator or grants policy/automation authority. Landing GET is read-only (mail scanners/prefetch MUST NOT activate consent); explicit labelled confirmation POST atomically verifies address and records disclosed provisional-report consent. No code copying or second email. Reuse already verified/current-consented recipients without new mail or invalidation. Preserve legacy endpoints and prior proofs; reject cross-purpose/replayed/expired/revoked/stale-generation/version/frequency tokens. Hash-only storage, no token logging, no-store/no-referrer response, bounded expiry/cooldown/attempts, no third-party landing assets. No schema/manifest/provisioning or existing authentication weakening.

Protected: same current SuperAdmin/tenant checks on invitation issue, store lifecycle lock order and revocation, uncertain SMTP no blind retry, financial HOLD/READY gate, latest cutoffs and no historical catchup, external OFF/policy/grant boundaries. Source starts only after this claim reviewed/green/merged. Isolated meaningful token/HTTP/scanner/replay/revocation/concurrency tests and required full CI/review/exact ordinary release precede new LAB acceptance. Existing LAB/business tests are not replayed. No production write/send/config/deployment in this claim; installed new flow NOT TESTED, whole automatic-send acceptance OPEN. Same integration owner retained, all other owners unchanged.

Checkpoint CHECKPOINTS/CHANGES/2026-10-25-report-email-invitation.md. Single next action: merge this pre-source claim after CI/review, then implement bounded candidate. Literal consent-on-GET is excluded because email security scanners can follow links without recipient action.

25/10/2026 — DAILY-CHECK-ONLINE-POLLING-01 / ACTIVE V2 TECHNICAL RELEASE VERIFIED / PHYSICAL READ-ONLY ACCEPTANCE OPEN

Retained owner/branch fix/online-disabled-polling-20261025. Engineering implementation and release complete for actual operator StoreOnlineOrdersV2, not a global functional/LAB PASS. User-authorized claims3142/07008841 and V2 scope correction3143/2c7deb2f preceded follow-up source. Legacy3127/eba062f7 remains legacy-only historical evidence; actual V2 source3145 exact0205abbd67b209ec31a915cbc12186e221c24b93 merged601b4fe11143573ca52789cf7644d71c73fb2ebb.

Exact sourceCI40205412412/build121205523492 all5SUCCESS:4208server+8backup/0FAIL/0SKIP. Exact merged-mainCI40206297778/build121208017923 all5SUCCESS:4208server+8backup/0FAIL/0SKIP. Actual mounted legacy+V2 regression14PASS ran unskipped; original active V2 negative control fails4of6 scenarios. Prior eac851e0 source run40204783183 was superseded/cancelled, not a final full PASS. Docs-only1b459f54 wallet reconciliation retained; newest docs9b4f34b1 changes no V2 runtime and matches verified V2 byte-for-byte. Other owners/PDF/manual/financial evidence preserved.

Ordinary guarded deploy workflow40207076296/job121210252838 classify/deploy SUCCESS, exact601b4fe1. Renderdep-dbf20ie7bikc73bt4bcg LIVE25Oct15:33:18.195371UTC (17:33:18 Europe/Athens). Independent public no-cache probe2026-10-25T15:34:38.467483+00:00: /api/health HTTP200/oktrue/exact601b4fe1. Public /store/kat-store points to /assets/main-kcrtAs1f.js (SHA256dfee36dd3effca40408083bd1d5b54df74c5dad1ea6bcc9022edd1e69e36d90b) -> active runtime /assets/entry-1HtDrzKK.js (SHA256ef1e15d588164a9b9775f7251f6dc6ee8ad4c590569474c82e220ef1b36ebee7). Actual downloaded active online GET implementation contains explicit disabled403 guard, inFlight guard, scope identity guard and labelled manual Refresh. Old production entry-Calmu9BG.js SHA2564222e0b75ed0ee17c0853cbfd8552e3bf625ef87e931c4b29cfd640f47313258 contained the unguarded active V2 implementation. This is served-client engineering proof, not authenticated physical behavior.

Automatic polling stops only after the explicit disabled ONLINE_ORDERING403; generic403/network failures retain retry. Launcher/Refresh can retry; store change resets scope and discards old responses/rows; concurrent reads excluded and StrictMode/unmount covered. Source-slice comparison confirms move/reprint/cancel/checkout/txId/payment/session/auth handlers unchanged. No production configuration, operator login/PIN, shift, order-status/print/payment/stock/fiscal operation or accepted transaction replay by this owner. Empty filtered Render log sample does not prove global cessation.

NORMAL OPERATOR POS ACCESS IS STILL BLOCKED IN CLOUD BY PERSONAL PIN, not a site outage. Authenticated Platform Admin is available, but does not certify an operator session. Existing physical POS tabs do not automatically replace their loaded JS. Single next action: on the intended actual POS, with empty cart/no in-progress payment, refresh once, identify loaded new revision/asset and observe read-only disabled/enabled behavior across at least3poll periods plus manual retry; do not create a sale/order/payment for this check. Hosted/physical read-only acceptance and all old-client traffic cessation remain OPEN/NOT TESTED. Same owner retained pending observation; no second scope owner, functional manual, numbered closure or PDF PASS claim. Evidence CHECKPOINTS/EVIDENCE/online-polling-20261025/release.json.

25/10/2026 — DAILY-CHECK-ONLINE-POLLING-01 / ACTUAL POS V2 CALLER FOUND / BOUNDED CLAIM AMENDMENT BEFORE SOURCE

Same user-authorized receiving owner/branch retained. IMPORTANT correction to PR3127 scope: production30fe4c10 public runtime assets main-CCe-cUU6.js -> entry-Calmu9BG.js (SHA2564222e0b75ed0ee17c0853cbfd8552e3bf625ef87e931c4b29cfd640f47313258) contain one online-orders GET implementation, with PAY/cancel/checkout and unguarded7000ms polling. Source StoreOperatorWithOnlineOrders.jsx imports StoreOnlineOrdersV2.jsx, not StoreOnlineOrders.jsx. Thus merged3127/eba062f7 fixes only the legacy component; it DOES NOT establish a fix for the active operator POS. Prior sourceCI4201+8/all5SUCCESS proves its bounded tested scope only. No active-POS functional PASS or global403 cessation claim.

Extend the retained independent READ polling claim ONLY to client/src/components/store/StoreOnlineOrdersV2.jsx and server/test/online-orders-polling-mounted.test.js (expand actual mounted tests to both components). Keep legacy component source unchanged. Required: same explicit disabled403 suspension/manual retry, per-store stale-response suppression, in-flight exclusion, cleanup/StrictMode; actual V2 entry/import and public served asset verification. Synthetic actual component tests must cover both implementations. V2 move/reprint/cancel/checkout/txId/payment/fiscal/stock/session/auth handlers and destination/print utility remain byte-for-byte unchanged. Do not retake the broader online-store/payment owner scope.

Read-only public runtime inspection and normal Admin navigation only. Store Mode reached the normal personal-PIN login; no operator login, PIN, shift, payment, order-status, print, config or production data action was performed. Render logs returned no matching sample; this is not proof of global traffic cessation. Main3127 CI40203753323 still running at discovery; ordinary freshness guard may skip superseded revisions. Never bypass it. Amend claim green/main BEFORE V2 source, exact source/main CI and guarded release then served V2 proof; physical selected-POS read-only acceptance remains OPEN/NOT TESTED. No functional manual or numbered/PDF closure. Next: publish this scope correction, patch active V2 polling only and expand actual mounted tests. Checkpoint CHECKPOINTS/CHANGES/2026-10-25-online-polling-v2-caller.md.

25/10/2026 — DAILY-CHECK-ONLINE-POLLING-01 / USER-AUTHORIZED HANDOFF / ASSIGNED BEFORE FOLLOW-UP SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ Καθημερινός έλεγχος MyWorkStation / fix/online-disabled-polling-20261025 — ASSIGNED same branch, receiving Work conversation explicitly authorized by user to continue. Bounded independent scope: StoreOnlineOrders disabled-module polling only; existing online/Daily owners unchanged. PR3127 candidate retained; conflict resolved as021c11617 against main30fe4c10. Original runtime blob83d168a unchanged. Previous exact CI40200907030 all5SUCCESS; new combined CI40202455665 running. No merge/deploy/functional PASS.

Local source hook harness reproduced new candidate failure: render storeA with pending request, switch toB, then resolve A with explicit disabled403 and B successfully; B next automatic poll is suppressed (2requests observed, expected3). This is local hook simulation, NOT actual React mount or hosted LAB. Existing disabled403 suppression and switch reset passed the same limited harness. PR3127 DRAFT until this race is fixed and actual mounted regression passes.

Authorized follow-up paths ONLY client/src/components/store/StoreOnlineOrders.jsx and new server/test/online-orders-polling-mounted.test.js, plus this checkpoint and shared records. Required: store-generation/request freshness, no late old-store success/error or suppression; enabled polling/retry, generic403/network retry, explicit refresh, cleanup/StrictMode and non-overlapping load evidence. Server auth/payment/order-state/stock/fiscal/settings remain unchanged; diagnostics GET-only synthetic. No business transaction repeated. Source starts after this claim green/main. Full exact PR/mainCI and ordinary guarded exact release then hosted read-only LAB before functional/manual PASS. Status OPEN/ASSIGNED; no central numbered completion/PDF PASS closure. Next: claim green/main then source+mounted regression. Checkpoint CHECKPOINTS/CHANGES/2026-10-25-online-polling-handoff.md.

24/10/2026 — KAT cutter advance source LIVE / exact CI and release verified / WINDOWS REPLACEMENT AND PHYSICAL RETEST PENDING

Same retained thermal owner. PR3117 source2d139f0a86397829a39d7507fb0df5288808f609 fullCI40080736152 SUCCESS/all5; actual WindowsPowerShell5.1 job120833564323 ran both loopback ticket cases successfully, not parser-only. Main merge297e602e5f4e48d9fe742e90879a3fd0350d9a2b fullCI40081392770 SUCCESS/all5, 4181server+8backup/0FAIL/0SKIP. Normal guarded deploy40081894850 SUCCESS. Render appdep-dbe7jioae00c73c6k4h0 LIVE24/10/2026 12:28:30 Europe/Athens (09:28:30.095126UTC), exact297e602e. Independent GET /api/health HTTP200/oktrue/revision297e602e confirmed. This is technical source/release evidence, not a physical fix acceptance.

Only network full-cut suffix changes from immediate GS V0 to feed-to-cutter GS V65,0; Greek ticket bytes and all existing settings/pairing/journal/idempotency boundaries preserved. The new source is available through existing authenticated selected-store connector download, but the user's already-running Windows file has NOT been replaced by deployment. Next user step: selected KAT printer panel → download connector Windows; then stop the old running connector and run the newly downloaded file under the same Windows account, retaining existing device.xml. Browser refresh alone is insufficient. No new pairing/IP/product configuration required. After confirming new connector running, identify ONE new coffee/options test; never replay the already-WRITTEN old batch. Full-paper missingmodifier remains OPEN until actual new physical Greek/options/cut result is observed. User's «οχι» after FEED suggestion remains ambiguous, not manufactured hardware evidence. No financial/stock delta PASS, production print replay, payment/fiscal/stock or settings mutation by tools. Greek priority presentation and prior incremental/cart-recovery/reprint/startup/bothPOS/mixed-retail residuals retained. Other owners preserved. No CI-only functional manual or whole-scope closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-paper-review.md.

24/10/2026 — KAT complete paper confirms missing final modifier / cutter advance candidate / AWAITING CI AND PHYSICAL RETEST

Same retained owner codex/kat-thermal-production-20261023; continuation branch fix/kat-thermal-cutter-advance-20261024. User supplied the whole flat ticket and explicitly confirmed this is all of it: batch1ac12d4c-551c-42dd-af8a-70c0fe71394a ends at 1 x FREDDO ESPRESSO; ΜΕΤΡΙΟΣ is absent from the detached ticket. This supersedes the earlier photograph-cropping uncertainty. User's short response to the FEED suggestion was «οχι»; do not infer a measured hardware result or a confirmed root cause from that ambiguous reply. Persisted batch/ticket and isolated bytes already contain ΜΕΤΡΙΟΣ. No old dispatch is replayed. Overall physical Greek/options/cutter acceptance FAIL/OPEN, financial/stock/control deltas NOT TESTED.

Bounded protocol defect: existing GS V 0 cuts in place and does not compensate for the print-head/cutter gap; three fixed line feeds are not a device-independent guarantee. Epson ESC/POS GS V reference https://download4.epson.biz/sec_pubs/pos/reference_en/escpos/gs_cv.html distinguishes Function A from feed-to-cut-position Function B. Candidate changes only the network cut suffix from29,86,0 to29,86,65,0, preserving the same full-cut request and all ticket bytes/settings. This corrects the protocol issue; it is NOT proof that it is the only cause of missing physical options. No priority/encoding/settings/queue/journal/pairing or server behavior change.

New isolated Test-NetworkTicket.ps1 loads only the actual Lines/Print-Network AST functions, never connector startup or production API/credentials. Loopback-only synthetic tickets exercise final Greek modifiers, multiple quantities/items/options, notes/allergens, page17, exact body and cut-on/off. Local PowerShell7.4.6 two cases pass; identical test against original immediate-cut function fails the cutter assertion as expected. Actual WindowsPowerShell5.1 execution is added to the existing Windows CI job and remains pending until observed. Full CI, green merge, normal guarded exact release/download, installed Windows connector replacement retaining existing pairing, then ONE separately identified new physical ticket required. Browser refresh alone cannot replace the running downloaded connector. No physical test/payment/fiscal/stock/production write performed by tools. Never label technical CI as physical PASS.

Other-owner work and all prior thermal residuals retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-paper-review.md.

24/10/2026 — KAT first physical ticket / modifier visibility unresolved / retained thermal owner

User confirms KAT is not trading yet; this is an approved printer-only test. Screenshots show admin setup for selected KAT, one FREDDO ESPRESSO selected, settings saved, Windows connector paired after user-scoped file unblock and session-only RemoteSigned, then one production dispatch from KAT DELIVERY / KAT-POS-02 / ΑΘΗΝΑ ΜΑΡΗ. No payment was requested. Physical paper image shows batch 1ac12d4c-551c-42dd-af8a-70c0fe71394a, DOCTOR, 1 x FREDDO ESPRESSO and no environmental-fee line. The lower paper edge is at the product line; selected ΜΕΤΡΙΟΣ is not visible in the supplied image. Do not treat this as full printer/Greek/cutter/mixed-cart/both-POS PASS. Pre-test screenshot shows no active-shift transactions; complete financial/stock/control deltas NOT TESTED. User explicitly rejected further financial diagnostic navigation for this printer-only test.

Read-only DB confirms one KAT job f9630d76-da66-46f9-971d-9276027bb465 at 2026-10-24 08:18:31.320056 UTC, WRITTEN; persisted batch and ticket both contain ΜΕΤΡΙΟΣ and priority DOCTOR. Thus server did not drop the modifier; DOCTOR reflects applied priority rather than an invented value. KAT settings enabled/paired, NETWORK192.168.1.87:9100, page17, cuttrue, exact single coffee allowlist. Token/hash/code never retrieved or published. No replay/reprint, configuration edit, production mutation or transaction executed by tools.

Isolated execution of the unchanged deployed formatter/network function under portable PowerShell7.4.6 against localhost-only socket capture produced CP1253 ΜΕΤΡΙΟΣ bytes after product, ESC t17 prefix and cut suffix29,86,0; 117bytes with synthetic batch test-only. This is local technical evidence only, not Windows5.1/printer acceptance. Root cause of absent visible line NOT ESTABLISHED. No speculative source fix. Next: obtain the same already-printed ticket fully flat/unfolded including paper after product; do not resend old batch. Greek priority labels remain a presentation residual; all earlier recovery/incremental-sent-row/startup limits and other owners preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-paper-review.md.

24/10/2026 — Thermal printer admin entry installed / AWAITING LAB / same retained owner

PR #3111 source ce70e43c21ee21a3e9fbebaad428b1d5eecdcd3b passed full CI 40072439144 and merged as a974f6299a295eb954b99f15154ff07d79b2fb7f. Main CI 40074850868 succeeded: 4175 server + 8 backup tests, zero failures/skips, all five jobs successful. Normal guarded release 40075458494 succeeded. Render app deploy dep-dbe656vavr4c739pmhv0 became live 24/10/2026 10:49:28 Europe/Athens (07:49:28 UTC) at exact a974f6299a295eb954b99f15154ff07d79b2fb7f; independent GET /api/health returned HTTP200, oktrue and the same revision. This is technical installation evidence, NOT functional LAB PASS. Platform Admin printer entry is implemented for EVERY store, settings scoped to selected company/store; actual admin navigation, Windows connector, physical printing/Greek/cutter/both POS/mixed cart still NOT TESTED. Same thermal ownership retained. No config/pairing/token/queue/order/payment/stock/fiscal/shift action performed. Preserve original POS cart; next action is refresh admin tab only and open selected KAT store printer panel. All prior thermal residuals and other-owner assignments remain unchanged.

24/10/2026 — KAT thermal admin reachability / ALL STORES / same retained owner

User screenshots show operator status-only panel and Store Mode operator login; earlier admin navigation advice did not reach configuration. Same approved thermal owner adds a direct Platform Admin printer button to EVERY store row, per explicit user instruction all stores. Scoped new-company/store panel reuses existing settings/connector; no POS login, support impersonation, shift or cart action. Explicit-company routes require Platform Super Admin and actual company/store validation by existing service; existing operator routes remain scoped and read-only. Local actual mounted route/UI4PASS/0FAIL/0SKIP plus frontend/TABLE_SERVICE buildPASS9.47s, late previous-store response rejected. Full CI/exact guarded release and actual admin UI/pairing/Greek/cutter/bothPOS still pending. Existing sourcef4bdcd8 installed; no device config/token/job/order/payment/stock action, no manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-admin-entry.md.

24/10/2026 — KAT thermal technical installation verified / AWAITING PHYSICAL SETUP AND LAB

Same thermal owner retained; no manual/functional PASS. Infrastructure232c182 joint sourceCI40067758842 and mainCI40068382340 all5SUCCESS/4173server+8backup/0FAIL/0SKIP. Guard40068946010 installed appdep-dbe4mnt9fdbs739adg00 and backupdep-dbe4m7mq1p3s73f9for0 at exact232c182, four tables observed empty. GUI reservedPowerShell$input follow-up3108: firstCI40069088518 FAILED missing active-list record, corrected without bypass; newsourceCI40069364135 all5SUCCESS, mergedf4bdcd84754b28cf812a7784fbecbee3e6d31b3e. MainCI40069882541 all5SUCCESS; normal guard40070500429 SUCCESS; appdep-dbe51lgae00c73blrgj0 LIVE06:35:48.602UTC exactf4bdcd8. Independent HTTP200/oktrue/exactf4bdcd8 verified. Existing backup remains232c182 with unchanged backup source and manifest; ordinary pulse06:20:13.611UTC reported revision232c182/hashcb67deb5813 b9416a71853ec3fc185931940c6039c32523ae0ec8d080732a6a8/storagePolicyVerifiedtrue. MAC was not independently validated in this turn; no restore/RESET or complete backup PASS is inferred. No backup run/deploy/schedule action was manually triggered.

Read-only production observations: all four printer tables exist; global printers0/requests0/jobs0/resolutions0 and KAT pilot-company/kat-store configuration0. No device pairing, print job, preparation, sale/payment/fiscal/stock transaction or production printer setting was made. User confirms access to a KAT LAN PC. Next: inspect selected KAT POS preparation/printer panel, then record a fresh scoped fixture/before-controls before pairing/configuration and any identified physical print. Greek/cutter/clipboard/Windows runtime/both-POS/mixed-basket actual results remain NOT TESTED. Incremental sent-row additions, whole-tab recovery, intentional reprint and automatic connector startup remain unsupported/residuals; do not claim general production acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-catalogue.md; PR3093/3108.

25/10/2026 - FTEXT CONFIRMED OPEN-DOCUMENT VOID / ENGINEERING PROOF / PHYSICAL ACCEPTANCE OPEN

Retained owner codex/rizareio-ftext-bridge-20261022; owner-authorized bounded cancellation follow-up claimPR3131 mergedfece6beb. SourcePR3132 exact1caaa111d165625981662b7e1b8b8621004857f8 mergedbc6bb37974b1f2f4707278c48e4898b6c0e6c8b5. Exact Windows40192944687/job121167652277 and native40192944660/job121167652478 SUCCESS. Windows actual synthetic17VOID cases include one filesystem round-trip, exact onlyVOID bytes, failed original/missing/changed response refusal, receipt QR/foreign reply refusal, timeout/restart/no resend and retained STATUS/CASH/install/DPAPI cases. Actual Cloud-Tools authenticated void-poll/result allowlist covered, arbitrary execute refused. Native22PASS/0FAIL/0SKIP includes concurrent one-shot VOID claim, foreign/stale/user-ack refusal, immutable original/result/void evidence, confirmed pending-lock release/new request, same-key cancelled replay and unknown VOID remaining blocked with no rearm. No financial tables exist in the native VOID fixture, so any Sale/Payment/Stock/shift write would fail. Actual full-schema PG18 archive/COPY and existing cash/card idempotency controls also passed.

Local focused22PASS/0FAIL/0SKIP, earlier broader25PASS/0FAIL/1native-infrastructureSKIP, actual frontend build PASS and diff check PASS. SourcefullCI first attempt40191987536 refused before tests because source PR did not include a fresh active-list change; corrected documentation, policy not relaxed. Source first Windows/native proofs also passed; Final exact full sourceCI40192944676/job121167856435 SUCCESS4192server+8backup/0FAIL/0SKIP,all5jobs. Strict failedCommand binding additionally requires the exact original PAY code; no generic PAY error is accepted. Exact merged-mainCI40193663396/job121169978478 SUCCESS4192server+8backup/0FAIL/0SKIP,all5jobs; exact merged-main Windows40193663336/job121169795498 SUCCESS. Ordinary guarded release40194463393/job121172254474 SUCCESS, Renderdep-dbevkam7bikc73blinpg LIVE25Oct12:48:26.843195UTC. Independent public health oktrue/exactbc6bb37974b1f2f4707278c48e4898b6c0e6c8b5.

Manager-only selected-terminal cancellation requires original CARD REQUIRES_CHECK with explicit PAY error44/48, original raw/hash binding and persistent no-card-present/stopped-EFTPOS/exclusive-register acknowledgement. An error48 is NOT a bank decline proof. A separate durable VOID job keeps original result immutable. Only current paired device/version/settings can claim/report once; Windows refuses changed/missing original response and preserves intent/result across restart. VOID success requires code0/exactserial/day/counter/no final QR/no payment line. Only then effective view CANCELLED and register pending lock releases; no sale/stock/fiscal finalization. Unknown result cannot rearm/resend/unlock. DOC_CANCEL/refund, arbitrary commands, configuration sweeps, manual success and real card actions are absent.

Only exact known legacy pending index is transactionally upgraded during ordinary startup under advisory/table locks; typed catalogue/ownership and all financial identity indexes remain unchanged, drift refused. Historical REQUIRES_CHECK row plus immutable VOID JSON remain archived/restored; general lifecycle engine retains a conservative maintenance hold even after verified VOID, explicitly OPEN, no unrelated owner changes. No Work production SQL write, user card setting change, receipt or VOID was executed by agent. Reconciled single CASH USER PASS (e4241ef7/sale98bee70a/0.50/stock0->-1) and original cash settings protected.

Installation needs updated current selected-POS Windows package; old connector does not poll VOID and cannot run it from an admin click. Physical VOID is NOT TESTED, no new manual/PASS or whole connector closure. CARD remains OFF pending actual programmed profile/firmware/result verification; this cancellation feature does not certify an unknown card profile. Only user may initiate any separately reviewed physical test. Whole connector OPEN/ASSIGNED; retained owner continues. Scoped PDF CHECKPOINTS/EVIDENCE/ftext-recovery-20261024/void-release.pdf.

Read-only production BEFORE12:29:52.316575UTC: exact accepted v1 pending index and only requeste4241ef7 SALE_COMMITTED, sale98bee70a, resultHash30d7197b5f94473ed23f5f1463088c19bb0c8f611293d65c6612101dfb49dae5, sales1/transactions1/movements1. AFTER12:49:10.33292UTC: exact reviewed v2 COALESCE(VOIDstatus) pending predicate, same request/status/sale/resultHash, no VOID metadata, sales1/transactions1/movements1 unchanged. DeviceACTIVE,lastSeen12:49:08.882626UTC,same configeb2b065b/settingsHashbff5db8e7a113c21b479499e81d629eaca48ddedca4b190c0af7b1b85d7a8890,CASHtrue/CARDabsent. This is read-only engineering rollout proof, not physical VOID acceptance. The changed strict pending-index contract requires a compatible forward release; do not assume a pre-v2 startup validator can be used as an immediate rollback without a reviewed compatibility release. General cancelled-history maintenance residual stays OPEN.

Rebuilt current operational CMD with actual reviewed installation-package builder at exact merged source; seven embedded modules byte-match merged Git blobs, same settings/hash, no credentials, no automatic connector or fiscal action. Same Librarylibfile_597bc5345cd88191a75436df91809309 replaced as version2/filefile_000000005b70820a80ebd555b018a739,65448bytes,SHA2563686559cb2a1a2424f02530a8fd6e401e32adee79c6990e8bada86d3d4834f7c. Windows extraction/menu/current module integration is covered by exact native Windows tests; physical updated-package/VOID NOT TESTED. User next closes only the old MyWorkStation connector, opens updated CMD and menu3; same saved configuration/user preserves pairing credential. Keep vendor FTEXT+ open. Do not replay successful CASH or enable unverified CARD settings. Whole connector and retained owner remain OPEN/ASSIGNED.

25/10/2026 - FTEXT OPEN-DOCUMENT VOID / OWNER-AUTHORIZED BOUNDED FOLLOW-UP / ASSIGNED BEFORE SOURCE

Retained owner codex/rizareio-ftext-bridge-20261022, branch feat/ftext-confirmed-void-20261025. User explicitly requests implementation after discussing no-card-present CARD test and confirmed cancellation. No physical card test yet, cardEnabled remains absent/OFF. Preserve reconciled single CASH USER PASS (requeste4241ef7/sale98bee70a,0.50,stock0->-1) and exact live803028cf. No repeated cash receipt for documentation.

Read supplied official DEV_FText_v25_02(1).pdf pages6/9/12/16-18: PAY uses programmed ID, VOID_DOCUMENT applies only to an open unfinished document, including declined card; finalized-document cancellation DOC_CANCEL is different and out of scope. Generic EFTPOS ERROR48 is not a proved bank decline. No automatic reprogramming or code sweep. No uncertain-result success, manual financial finalization, refund, DOC_CANCEL, resend or real card action by agent.

Bounded scope: authenticated selected-terminal manager request for one separately acknowledged open-document VOID of an existing unresolved CARD request, original result immutable, durable one-shot Windows VOID dispatch/result, explicit verified receipt-free success before effective cancellation, POS/admin display and release of register pending lock only after proved VOID. No new ownership edges/table/columns: own reviewed checkoutJson stores cancellation evidence. Ordinary-startup upgrade of ONLY exact known ftext pending index may be needed to exclude verified cancelled requests; reject drift and serialize, preserve native archive/COPY. Do not modify general lifecycle engine/worker/policy: its conservative hold may remain for historical cancelled requests, explicitly OPEN. All other owners and shared recovery source protected.

Tests required: native PostgreSQL concurrent/foreign/stale/idempotent VOID, closed/confirmed/committed receipt refusal, immutable original/void evidence and no Sale/Payment/Stock/shift mutation; Windows5.1 actual one-shot bytes/restart/no-resend/QR refusal and timeout; full exact CI/main/ordinary release and current package before any user-controlled physical test. Source engineering and physical VOID remain NOT TESTED; no manual/PASS closure. CARD profile/firmware still separately unverified. Next: publish this retained-owner checkpoint green/main before source, implement bounded cancellation and tests, then exact release. Whole connector OPEN/ASSIGNED.

25/10/2026 - RIZAREIO FTEXT SINGLE CASH RECEIPT / LIMITED LIVE USER PASS / CASH ACCEPTANCE COMPLETED

Retained owner codex/rizareio-ftext-bridge-20261022. User explicitly reported printed receipt after the separately authorized one-shot CASH at25Oct13:27Athens. Exact healthy revision803028cffeb3e2f487ed1b03efb70b783d111f01; sourcePR3126/fullCI40186112381 (4183+8,0FAIL/0SKIP), merged-mainCI40186803190 (4188+8,0FAIL/0SKIP), ordinary deployment40188097798 SUCCESS/dep-dbeua2nb9u1s73avsnc0 LIVE11:18:06.829488UTC. Receipt recordPR3128 mergedbda100ec after applicable docsCI40188514312. Current read-only /api/health still exact803028cf/oktrue. No application change or new transaction by agent in this acceptance record.

Measured BEFORE11:18:43.334691UTC (and requests0/sales0/ACTIVE reaffirmed11:23:08.032508UTC): companycmvgtyt64000vh7gt7vfad3h5/storecmvgtyt6d000zh7gtbsp1en3p, sole OPEN shift af937621-e635-42ba-9681-3629f8ea5931/RIZAREIO-POS-01/operator Θανάσης Μπρούμος, transactioncount0/cash0/card0/IRIS0/total0, sales0/requests0/movements0/completed-audit0/safety-audit0. SKU490 product03be210f-e1fa-4930-9005-9c829d893b02/NEPO500ML/price0.50/VAT13/stock0/latestmovementnull. No second selected-store physical terminal/control shift exists; separate-terminal control NOT APPLICABLE.

Observed AFTER11:28:28.431105UTC: exactly1 request e4241ef7-edd4-40a3-824c-e6a1536f55ee SALE_COMMITTED, created11:27:30.134543UTC/dispatched11:27:30.263965UTC/committed11:27:32.870299UTC. CONFIRMED/code0/serialDSM24014923/deviceTime25Oct13:27/dayId474/dayCounter27, QR present and rawResultHash add881ff7b1c404b117caaea2dcaad7966c1445640d2288a29e91f086514b0ea. One completed/ISSUED sale98bee70a-eb4e-43ee-aec4-833085f9de99/0.50, one Payment CASH0.50, one

SALE_CASH transactione812e11c-b56f-447c-b2f7-32a54ec95db0 in same original shift. Thus shift transactioncount0->1,cash0->0.50,total0->0.50,card0/IRIS0 unchanged. Exactly1 linked stock movement99c5a0d9-a8dc-460d-b239-4bca012ac224/SALE/-1 and SKU490 stock0->-1. Completed audit0->1, safety audit remains0. Audit matches request/sale/shift/terminal and records NEGATIVE_STOCK_RECORDED previous0,next-1,quantity1. Negative stock is the expected consequence of the owner's zero-stock import, not a duplicate. Actual saved plan confirms quantity1,department4,VATcode2/rate13,unit/line/total0.50,CASHcode1. All measured changes match the single action; no second business sale/payment/stock posting.

This closes ONLY physical CASH acceptance for this one SKU/department4/13%/selected DATECS and original shift. Supersedes the same-scope AWAITING USER ACCEPTANCE and RBS preflight FAIL as current status; earlier failed attempt remains historical without resend. Do not repeat this receipt for documentation. Cardoff and actual technician payment-profile/firmware/result verification, other departments/products, refunds/VOID/mixed, restart/unattended login and other models/terminals remain NOT TESTED/OPEN with retained owner. Whole connector remains OPEN/ASSIGNED. No broader LAB/generic certification or numbered Gate closure. Completed single-CASH test is removed from active residuals; next work is CARD profile verification, not another CASH receipt. Manual docs/manual/ftext/PASS.md updated with actual accepted steps and limits. Scoped synchronized PDF CHECKPOINTS/EVIDENCE/ftext-recovery-20261024/cash-user-pass.pdf.

25/10/2026 - FTEXT CHECKOUT PROVIDER ROUTING / EXACT RELEASE VERIFIED / AWAITING USER ACCEPTANCE

Retained owner codex/rizareio-ftext-bridge-20261022. Source PR3126 head24a6cfeca84a5f9b8ecb1041226acbed555de8f7 merged803028cffeb3e2f487ed1b03efb70b783d111f01. Full source CI40186112381/job121147271467 SUCCESS:4183 server and8 backup tests,0 FAIL/0 SKIP; all5 jobs success. Dedicated native recovery40186112382/job121147121077 SUCCESS. Local targeted21/0/0. Actual route now resolves company/store/terminal ftext before unrelated RBS readiness and rejects a provider change between preflight and transaction. Other RBS guards, ftext context/license/online/settings gates, lifecycle/idempotency/finalization and card-disabled configuration preserved.

Actual user corrected installer menu/paired/STATUS/online observations supersede prior menu NOT TESTED. Successful serialDSM24014923 STATUScode0 received25Oct10:27:16.211UTC, fiscalExecutionfalse; CloudDeviceACTIVE, ongoing ping. First CASH attempt with SKU490 water0.50 rejected at RBS preflight; no second attempt, physical checkout remains FAIL/OPEN until newly measured one-shot acceptance. No fiscal/business PASS inferred from source CI.

Read-only baseline25Oct10:48:43.033972UTC: companycmvgtyt64000vh7gt7vfad3h5/storecmvgtyt6d000zh7gtbsp1en3p; only shift af937621-e635-42ba-9681-3629f8ea5931/RIZAREIO-POS-01 OPEN,operator Θανάσης Μπρούμος,opened22Oct15:32:16.33403UTC; transactioncount0,cash0,card0,IRIS0,total0,shiftcash/card/expenses0. Sales0,requests0,completed-operator-audit0,safety-audit0. Product03be210f-e1fa-4930-9005-9c829d893b02/SKU490/NEPO500ML/price0.50/VAT13/currentStock0/latestmovementnull. No second physical terminal/control shift exists in selected store, so separate-terminal control NOT APPLICABLE rather than invented. Original failed attempt lacks full independent before baseline and is not financial acceptance. Refresh these measurements after exact release before any new user-controlled one-shot CASH.

No production SQL writes, settings changes, credential replay, receipt/payment/stock/shift action by agent. CARD remains off, full connector OPEN/ASSIGNED. Exact merged-main CI40186803190/job121151227238 SUCCESS:4188server+8backup/0FAIL/0SKIP and all5jobs. Ordinary guarded deploy40188097798/job121153122621 triggered dep-dbeua2nb9u1s73avsnc0 at25Oct11:16:26.121329UTC for exact803028cffeb3e2f487ed1b03efb70b783d111f01. LIVE25Oct11:18:06.829488UTC; ordinary deploy workflow SUCCESS, public /api/health oktrue/revision803028cffeb3e2f487ed1b03efb70b783d111f01. Read-only fresh11:18:43.334691UTC:requests0/sales0/transactions0/transactiontotal0/movements0/completed-audit0/safety-audit0; same OPEN shift cash/card/expenses0 and SKU490 price0.50/VAT13/stock0, latestmovementnull. Same configuration, cashEnabledtrue/cardoff,CloudDeviceACTIVE,lastSeen11:18:41.763635UTC,lastStatusoktrue. No pending request to resend. Historical release-time state: user-controlled CASH was then NOT TESTED; superseded by the measured25Oct single-CASH USER PASS above. Do not repeat that receipt. On any error/timeout do not repeat; inspect retained request/result. Scoped PDF CHECKPOINTS/EVIDENCE/ftext-recovery-20261024/checkout-routing-release.pdf. The full connector remains OPEN; no CI-only manual or financial PASS closure.

25/10/2026 — RIZAREIO FIRST CASH ATTEMPT BLOCKED BY RBS PREFLIGHT / FTEXT ROUTING CORRECTION OPEN

Retained owner codex/rizareio-ftext-bridge-20261022, continuation fix/ftext-checkout-preflight-20261025, existing ftext checkout scope only. Actual user screenshots confirm corrected installer menu, paired RIZAREIO-POS-01, delivered STATUS, repeated connected and admin Connected/code0 at25Oct12:27:16Athens. SKU490 NEPO500ML price0.50,quantity1,department4/VAT13%,stock0. Before screenshot shows no transactions in active shift (opened22Oct18:32:16) and zero personal expenses; independent fresh full per-shift/card/audit/control measurement was not captured, so financial acceptance is NOT TESTED, never manufacture it. User then pressed CASH once and UI rejected with RBS_CAPDRIVER_V1_WRITER_OFFLINE, preserving cart. No retry instructed.

Independent read-only25Oct10:37:53.00244UTC: requests0/sales0/transactions0/movements0; ftext ACTIVE,lastSeen10:37:52.13391UTC,successful STATUScode0/serialDSM24014923 received10:27:16.211UTC,fiscalExecutionfalse. Same configeb2b065b-ff03-4ee8-a957-e25bd79b827c/five CASH mappings,cardoff. Failure is provider preflight ordering: generic RBS writer readiness runs before transaction-local ftext selection, so correctly paired ftext is blocked by unrelated RBS readiness. No fiscal command or business record created. First physical CASH checkout FAIL/OPEN, successful communication remains protected.

Bounded correction: resolve scoped ftext configuration before RBS writer preflight and skip only that unrelated preflight for configured ftext. Existing ftext cashContext remains required inside transaction (license/online/currentSTATUS/profile); changed provider between preflight and transaction refuses409, preventing nonfiscal/RBS fallback. No RBS writer function, generic lifecycle engine, settings, pairing, printer scope or fiscal transport changes. Native installer PR3124 is now ordinary LIVE dep-dbet4jd9fdbs73cfkkvg exact38276aed54f5d05defe83efed66f57783e780b25 finished25Oct10:00:06.94865UTC. Installer settings/package need no replacement for this server routing correction.

Add isolated HTTP against actual extracted checkout preflight, actual scoped ftext lookup and RBS offline/mixed control; transaction provider-change guard tested directly. Local Node20 verification:21 PASS/0 FAIL/0 SKIP across ftext-checkout-preflight,ftext-http and rbs-capdriver-v1 tests after generating the local Prisma client; initial absent-client infrastructure failure resolved. git diff --check passed. Exact full CI, green merge/main/ordinary release/readback pending. No retry, receipt, card charge, production SQL write or functional/manual PASS. Next: finish bounded source tests/deploy, then fresh complete acceptance baseline and user-controlled one new attempt only after confirming no pending request. Whole connector OPEN/ASSIGNED.

25/10/2026 — FTEXT INSTALLER CORRECTION MERGED / WINDOWS AND FULL CI GREEN / PHYSICAL MENU RETEST OPEN

Retained owner codex/rizareio-ftext-bridge-20261022. SourcePR3124 exactcdf47487f5f826230700bc648df82b0ece9292aa merged38276aed54f5d05defe83efed66f57783e780b25 after fullCI40181232271/job121132721329 SUCCESS4181server+8backup/0FAIL/0SKIP and all5jobs. Native WindowsPowerShell5.1 run40181232229/job121132551770 SUCCESS: actual installer template extracts all seven byte-identical real modules and opens actual Setup with both cashFalse/cashTrue; menu4 exits without pairing/STATUS/network/connector. Unknown files still rejected. Existing29STATUS+48cash/cloud credential boundaries pass. Dedicated native recovery40181232243 SUCCESS. Local Node20 six tests pass; reverting only the template to original causes the new payload/allowlist assertion to fail, proving regression detection.

User-observed old installer FAIL remains historical; only exact Cash.psm1 allowlist inclusion changed. Replaced original Librarylibfile_597bc5345cd88191a75436df91809309 as version1, filefile_0000000034a481f490bd1a5bba48e7ec,60888bytes,SHA2567d7085e035c553f487c3263eeeabc95fa37b7c651abe00d264a16bf57025edfe. Original embedded configuration and all seven modules are byte-identical; no credentials included. This independently checked operational CMD is published for the same Windows/POS scope. No claim that central production service has redeployed yet: exact source-main full CI/ordinary guarded release/readback remain to be observed for future server downloads.

Independent read-only25Oct09:39:36.636863UTC: selected configeb2b065b-ff03-4ee8-a957-e25bd79b827c remains CONFIGURED, cashEnabledtrue/exact1/0/5,3/0/5,4/13/2,5/24/3,7/24/3,card absent,generation0; requests0/sales0/transactions0/movements0. Package scope/settings remain current. No production state write, pairing, receipt, payment, stock or shift action. Existing limited communication USER PASS preserved; no CI-only functional manual or whole-connector closure.

Next user-controlled step: replace failed downloaded CMD with corrected version and confirm actual setup menu opens on final Windows user. Then fresh selected-POS pairing/current STATUS/online, and only after fresh measured SKU/shift/audit/control baseline one separately authorized user-controlled cash acceptance. Physical corrected-menu/checkout NOT TESTED. CARD remains off pending technician actual firmware/result/profile. Source-main/ordinary-release verification also pending in retained owner follow-up, not inferred from this PR CI. Whole connector OPEN/ASSIGNED. Scoped PDF CHECKPOINTS/EVIDENCE/ftext-recovery-20261024/installer-correction.pdf.

25/10/2026 — FTEXT INSTALLER USER FAIL / CASH MODULE ALLOWLIST CORRECTION / AWAITING WINDOWS CI AND PHYSICAL RETEST

Retained owner codex/rizareio-ftext-bridge-20261022; bounded continuation fix/ftext-installer-cash-module-20261025, existing installation claim retained, no other owner scope taken. User screenshot image(20261025-092838).png shows STOP: Unexpected package file before menu/pairing. This supersedes any implication that the delivered CASH CMD was installation-ready; physical install FAIL, actual checkout NOT TESTED. Existing communication/recovery and department settings remain protected.

Causal source comparison: server builder includes seven files including Cash.psm1, but Install.template.cmd permits only six and rejects Cash.psm1. Single production change adds that exact existing module to the explicit allowlist; unknown filenames still rejected. No scope/settings/hash/pairing/license/fiscal/financial/stock logic changes. Add server contract check comparing real generated payload keys against actual template guard, and Windows PowerShell5.1 isolated actual-template extraction/real Setup exit test for communication and cash configurations with byte-identical seven modules; unknown payload still refused. Test selects menu4 only, no Pair/STATUS/connector/network/credentials or device action.

Pre-change evidence: delivered Librarylibfile_597bc5345cd88191a75436df91809309/v0 60876bytes hash0c9fcafc292cbaddb66dd3f3ae5e5c9822c0180488b689dbe80ab05ec83145fe; unchanged configeb2b065b-ff03-4ee8-a957-e25bd79b827c, CASH five confirmed mappings, CARD off. No user transaction retry. Current source tests, exact CI/main/release and corrected file delivery still pending. Preserve original embedded config/payload byte-for-byte in replacement except allowlist, and preserve Library identity. Do not alter production settings or re-pair until owner reaches actual menu. Next: native Windows proof, full CI/merge/ordinary release, corrected installer then selected-PC menu acceptance. Whole connector OPEN; no new functional manual PASS.

24/10/2026 — RIZAREIO CASH SETTINGS SAVED / NEW PACKAGE / PHYSICAL PC PENDING

Retained owner codex/rizareio-ftext-bridge-20261022. Owner resumed secure login; email/password and 2FA succeeded, authenticated Platform Admin Χρήστος Μάνης. Existing limited setup claim continues; no other owner scope changed. Normal authenticated UI saved CASH-only settings for company cmvgtyt64000vh7gt7vfad3h5 / store cmvgtyt6d000zh7gtbsp1en3p / RIZAREIO-POS-01 / DSM24014923 / C:\FText / SOLIDUS(II)T. Confirmed department/VAT/group:1/0/5,3/0/5,4/13/2,5/24/3,7/24/3. CARD remains absent/off; manual PaymentID2 is not actual firmware/result/profile proof.

Before read-only09:16:01.534436UTC: ACTIVE oldconfigf23f1723-a036-4515-a016-df23f4cdd18b, cash/card unset; requests0/sales0/transactions0/movements0. After independent read-only09:27:11.436143UTC: CONFIGURED newconfigeb2b065b-ff03-4ee8-a957-e25bd79b827c, generation0,cashEnabledtrue, exact five mappings, card absent; requests0/sales0/transactions0/movements0. UI readback agrees. Configuration legitimately invalidated old communication pairing; accepted historical STATUS is preserved as historical evidence, not replayed. No sale, card charge, stock, shift or business mutation. Actual checkout remains NOT TESTED; no functional/manual PASS closure.

Normal selected-POS download produced60876byte CMD, SHA2560c9fcafc292cbaddb66dd3f3ae5e5c9822c0180488b689dbe80ab05ec83145fe; embedded scope/config/hash/revision3cd4566e checked, cash true/card off, no embedded credentials. Saved user deliverable Rizareio_Ftext_Cash_Setup.cmd, Librarylibfile_597bc5345cd88191a75436df91809309/version0. This is a distinct new CASH CMD; old communication-only ZIP unchanged and must not be reused. No pairing code generated early; no physical-PC software run from Work.

Next action: user copies current CMD to final Windows PC via AnyDesk and opens setup; then generate fresh time-limited pairing code on request, pair current configuration, current STATUS and connector online. Only then one user-controlled cash acceptance after fresh per-SKU/shift/audit/control baseline; no autonomous fiscal action. CARD separately awaits actual technician/firmware/result confirmation. Whole connector OPEN/ASSIGNED; ordinary release and engineering recovery already verified, no code change or redeploy needed. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-ftext-recovery-review.md.

24/10/2026 — FTEXT RECOVERY ORDINARY RELEASE VERIFIED / INSTALLATION BLOCKED BY DECLINED SECURE LOGIN

Retained owner codex/rizareio-ftext-bridge-20261022 / feat/ftext-recovery-source-20261024. SourcePR3113 merged3cd4566e425d4a1d644d668e8511838b4e4e894d after exactPR8d551e78 fullCI40077782308 and native40077782320 SUCCESS. Exact MAIN40079396726/job120829726221 also SUCCESS4181server+8backup/0FAIL/0SKIP and all five jobs. Ordinary guarded release40080012902/deployjob120831461369 SUCCESS; no manual app deploy or guard bypass. Renderdep-dbe765qvcj2c73bv434g LIVE24Oct09:02:17.981991UTC, exact3cd4566e. Independent public health200/oktrue exact3cd4566e. Startup event09:01:51.921UTC FTEXT_RECOVERY_SCHEMA availabletrue/checkoutEnabledfalse.

Independent read-only09:03:21UTC: FtextCashRequest now exists, empty0 rows. Its23 ordered type/nullability columns exactly match the reviewed catalogue; four valid unique indexes are present. RIZAREIO-POS-01/DSM24014923 retains ACTIVE communication identity/configf23f1723-a036-4515-a016-df23f4cdd18b and cashEnabled/cardEnabled remain unset. Selected store Sale0/StoreTransaction0/StockMovement0 both before08:53:45 and after09:03:21; no fiscal/stock/financial action occurred. This is deployment verification, not a future transaction acceptance baseline. Backup cron ordinary checksPass deploymentdep-dbe75ldg1s2s73939hdg LIVE08:57:17.192155UTC, worker revision6d7725e88722900de43e38aeda7583fdab7f603e. Its09:01:32UTC stored capability reports storagePolicyVerifiedtrue and manifestHasha5a147ffbd28bec53aa6b547a75383214cd469760cf911d441f6db6aa0e937e3, equal to the independently computed deployed catalogue hash. No worker job was manually triggered and no general worker/engine/policy source changed.

ENGINEERING recovery dependency is resolved: exact full-schema native PG18 archive/selective COPY/control/pending/reset/stale proof plus compatible ordinary schema provisioning are implemented, merged and deployed. This does NOT accept physical checkout or close the whole connector. No new operational package, pairing, STATUS replay, customer sale, card charge or checkout enablement. Existing communication USER PASS/manual stays protected; no CI-only functional manual/PASS closure.

Only next action: resume selected-PC installation after the owner explicitly resumes secure authentication. The last secure login request was declined and was not retried or treated as success. Then explicitly configure the reviewed department/CASH profile, generate a newly bound package, complete normal pairing/current communication for that new configuration and arrange one user-controlled acceptance with fresh stock/shift/audit/control measurements. CARD additionally requires actual supported firmware/result and confirmed payment profile, never assumed from manual PaymentID2 alone. Existing communication-only ZIP must not be reused as a cash/card-ready installer. Whole connector OPEN/ASSIGNED, owner retained until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-ftext-recovery-review.md; scoped PDF CHECKPOINTS/EVIDENCE/ftext-recovery-20261024/tracker.pdf.

24/10/2026 — FTEXT RECOVERY SOURCE MERGED / EXACT FULL CI GREEN / AWAITING ORDINARY RELEASE AND SELECTED-PC SETUP

Retained owner codex/rizareio-ftext-bridge-20261022 / feat/ftext-recovery-source-20261024. Approved limited recovery handoffPR3109 mergeddf8dd14e. SourcePR3113 exact8d551e78f16d6e79290ab8f3ab15c8fcef11d966 fullCI40077782308/job120825043530 SUCCESS4181serverPASS/0FAIL/0SKIP plus8backupPASS/0FAIL/0SKIP; all five CI jobs passed, including actual HTTP/browser/build/invariants and protected RBS/Hikvision/wholesale paths. Exact dedicated native40077782320/job120824788588 SUCCESS19PASS/0FAIL/0SKIP. Full schema+PG18 archive/COPY recovery ran unskipped in BOTH exact-source runs. Merged3cd4566e425d4a1d644d668e8511838b4e4e894d after green checks.

The recovery graph/column review now includes FtextCashRequest with DIRECT/REMOVE ownership and historical non-owning CloudDevice/Sale/CashShiftSession references. Embedded plan/checkout/result/client IDs never expand deletion. Actual production schema-only metadata reproduces264 tables/3073 typed columns/219 FKs/9 exact trigger functions/11 business triggers plus ftext. Full private native/PG18 archive and selective COPY restore, pending fiscal refusal, exact target RESET/idempotency/stale-generation and sibling/foreign controls passed. Ordinary startup alone provisions an empty reviewed queue, validates columns and immutable identity/pending/receipt indexes and refuses drift/maintenance. It never resets an existing request or creates a device/receipt/payment. General lifecycle engine/worker/jobs, other policies and the prior startup chain remain protected.

This closes the ENGINEERING recovery dependency only, NOT physical checkout or whole connector acceptance. Per-installation cash/card remain unset in production; physicalCheckoutAccepted remains FALSE. Exact source-main CI and ordinary deployed revision/schema readback still required. No deploy guard bypass, production SQL write/provision from Work, new operational package, pairing, receipt, card charge or accepted STATUS replay. Existing communication USER PASS/manual remains unchanged; no CI-only functional manual/PASS closure.

Selected-PC installation is separately blocked by authentication: the secure email/password request was declined, not treated as login success and not retried. Latest read-only24Oct08:29UTC: selected

RIZAREIO-POS-01 / DSM24014923 ACTIVE identity, lastSeen22Oct18:38UTC, cashEnabled/cardEnabled unset, same communication configf23f1723-a036-4515-a016-df23f4cdd18b. This is not a fresh financial acceptance baseline. Existing communication ZIP is not a cash/card-ready package. Next: finish ordinary release/readback, then resume secure login only when the owner requests it; prepare explicit selected-PC profile/new package and one user-controlled acceptance with fresh before/after stock/shift/audit/control evidence. Whole connector OPEN, same owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-ftext-recovery-review.md; scoped generated PDF CHECKPOINTS/EVIDENCE/ftext-recovery-20261024/tracker.pdf.

24/10/2026 — FTEXT FULL-SCHEMA RECOVERY ENGINEERING VERIFIED / AWAITING FINAL CI AND ORDINARY RELEASE

Retained owner codex/rizareio-ftext-bridge-20261022 / feat/ftext-recovery-source-20261024, named limited handoffPR3109 mergeddf8dd14e. CandidatePR3113 exactad13db3da07db5210a0615a8a967c61e4846812b dedicatedCI40077343040/job120823446075 SUCCESS19PASS/0FAIL/0SKIP. The actual full-schema native test ran unskipped: recreated264 production-metadata tables/3073 typed columns/219 FKs/9 exact trigger functions/11 reviewed business triggers plus new ftext queue, installed the complete canonical ownership graph, refused pending DISPATCHED maintenance, then verified the full archive and selective COPY restore using both private native tools and the actual PG18 recovery image. Source rows and sibling/foreign controls unchanged during proof; isolated RESET removed exactly two target complete CASH/CARD request rows; idempotent execute/reopen and stale-generation refusal passed. Existing seven one-shot cash/card native subcases and schema/concurrent/drift/idempotent/exact encrypted one-table restore tests also ran unskipped.

Canonical ftext catalogue/typed columns and historical non-owning/embedded payload classifications are reviewed. Recovery acceptance is promoted ONLY for REVIEWED_FULL_SCHEMA_FRESH_STORE_RESET_RECOVERY, tied to that exact native evidence; physicalCheckoutAccepted remains FALSE. Final exact promoted-manifest CI is required before merge. The existing authenticated setup still needs explicit scoped enablement, confirmed department/card profile, current package/pairing and one user-controlled acceptance with fresh controls. No automatic sale, charge, resend, device setup or business-data bootstrap was added.

The missing-table compatibility issue is handled by ordinary startup serializing only a reviewed empty FtextCashRequest schema; exact column and identity/pending/receipt index checks refuse drift and maintenance. Prior startup behavior is retained. No general lifecycle engine/worker/job or other table policy changed. Actual read-only production comparison found every other known typed relation matching; FtextCashRequest remains absent until ordinary rollout. No production SQL write, provisioning from Work, receipt, charge, new package/pairing or accepted STATUS replay occurred. This is engineering CI evidence, NOT LAB/physical/full connector PASS; no CI-only manual or numbered PASS closure. Current owner retained; next: exact final CI/merge/ordinary release verification, then selected-PC setup and consulted user acceptance.

24/10/2026 — FTEXT RECOVERY REVIEW / NAMED LIMITED HANDOFF / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ feat/store-shifts-inventory-clear-20261018 — ASSIGNED codex/rizareio-ftext-bridge-20261022 / feat/ftext-recovery-review-20261024. Owner explicitly approved this exact narrow transfer in this conversation (Εγκρίνω), after the named request. Scope: ONLY FtextCashRequest entries in ops/backup/lifecycle/manifest.json and column-review.json, new ftext-specific recovery tests and necessary bounded ftext recovery fencing if evidence requires it. All other tables, general lifecycle worker/engine/jobs, KAT cleanup, infrastructure and other owners remain retained. No second concurrent owner for this transferred slice.

Baseline6807eed7; CARD source3102 mergedcb5d6756 and ordinary Render release contains it (health399c407e). Canonical FtextCashRequest approval still absent; physical CASH/CARD activation OFF. Existing STATUS USER PASS protected; no production DDL/config, pairing, fiscal receipt or charge. Review exact ownership/typed columns/historical references and embedded JSON, pending/stale/restored requests and full-schema isolated copy/restore/control evidence. Engineering CI is not physical/LAB acceptance. Single next action after green/main claim: implement and validate only this recovery slice, retain activation gates until evidence passes. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-ftext-recovery-review.md.

24/10/2026 — KAT thermal + four-table catalogue — SOURCE CANDIDATE / AWAITING JOINT CI

Same approved thermal owner; bounded central transfer claim3107 greenCI40064648077 mergedcbc457d0 before catalogue changes. Four DIRECT/REMOVE nodes/exact columns and explicit payload/hash/non-owning reference review added; all unrelated catalogue values equal prior main. Normal startup creates only empty printer tables before listen. Local targeted9PASS; executor/recovery11PASS/34 native environmentSKIP, not native acceptance. Actual native schema comparison and all source tests require full joint CI. Sent-row guard retains fixed batch quantities; incremental additions and whole-tab recovery unresolved. NOT INSTALLED/NOT ACTIVE/physical NOT TESTED. No production business or printing action. No manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-catalogue.md; existingPR3093.

24/10/2026 — KAT-THERMAL-CATALOGUE-01 — ASSIGNED / OWNER-APPROVED BOUNDED TRANSFER

ΑΝΑΛΗΨΗ ΑΠΟ codex/central-auto-dispatch-20261022 — ASSIGNED codex/kat-thermal-production-20261023. User explicitly approved transfer in thermal-printer conversation on24/10. Scope ONLY four additive ProductionPrinter/ProductionPrintRequest/ProductionPrintJob/ProductionPrintResolution catalogue nodes, exact columns, hazard classification and regression coverage required for existing PR3093. Central owner retains every other manifest node, automatic dispatch, mailbox/consent, backup runtime, restore and reset execution. No concurrent takeover of those scopes. No production DDL, configuration, printing, order, payment or stock action. LAB/physical printing NOT TESTED. Claim must merge green before catalogue source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-kat-thermal-catalogue.md. New print-source head7e1196 CI not yet observed; earlierf338 fullCI39937838514 passed all5, never physical PASS.

23/10/2026 17:01 Europe/Athens — LAB MAILBOX VERIFICATION ALREADY PENDING / READ-ONLY RECONCILIATION

Retained central owner codex/central-auto-dispatch-20261022, existing approved integration. User explicitly identified the intended LAB recipient and requested continuation; address remains private and is not reproduced in public evidence. Original recipient pre-action draft3098 was overtaken by a concurrent observed operation BEFORE greenmerge; no action was taken under that unmerged draft. This receipt supersedes its proposed save/send steps and authorizes no duplicate writer or resend.

Fresh read-only baseline2026-10-23T13:58:28.102892Z observed all dispatch table rowcounts0. Subsequent actual existing UI refresh and scoped read-only DB14:00 revealed ONE already-created unverified intended recipient, version1, created13:59:43.820Z, VERIFY challenge issued14:00:19.720Z/expires14:10:19.720Z, verifiedAtNULL/revokedAtNULL. This root turn performed only reads/refresh and no recipient save, SMTP send, challenge issuance or confirmation. Provenance of the concurrent operation is not inferred from the record; do not fabricate its SMTP outcome. A stored challenge alone is NOT inbox or provider-acceptance proof. Existing accepted technical source remains protected.

Fresh14:01:26.833990Z global counts recipient1/consent0/grant0/policy0/slot0. Actual installed runtime14:01:16.588Z revision83db47fc8cc9bb4a0941d5d3421e0cf821baa4a2/readActivationvalidtrue/enabledfalse/issuedAt01:34:00.191Z/notBefore04:00Z. UI shows the same LAB recipient unverified, no active consent, separate verification/consent controls. Existing zero financial/stock action boundary and no accepted test replay retained. No other configuration, DDL, enrollment, RESET or restore performed.

Current functional result NOT TESTED: mailbox receipt, direct user code confirmation, separate consent, current SA grant/policy and genuine wholepostcutoff report acceptance remain OPEN. Single next action:

user checks intended mailbox and directly enters the current verification code into the existing LAB application's email-code field; never share token in chat/public evidence and do not auto-resend or bypass. If the current challenge expires, first recheck current actual state before a separately concrete resend. Same central owner retains remainder; other owners and source paths unchanged. No manual/global/numbered PASS closure.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-off-provision.md.

23/10/2026 18:08 Europe/Athens — ONLINE-CATALOG-CONTROL-04 / SOURCE COMPLETE / TECHNICAL RELEASE VERIFIED / BLOCKED AWAITING LAB

Retained owner codex/daily-online-store-20261011 / issue2054. Follow-upPR3105 head3f7c6f8930159012bcbe2c5b192a754da2f1827e fullPRCI39972250665 all5SUCCESS/4163server+8backup/0FAIL/0SKIP, merged399c407e8c1bfed9f35c1482480fca01f904d946. Exact full mainCI39973515394 all5SUCCESS/4163server+8backup/0FAIL/0SKIP. The actual native PostgreSQL handler/seed test ran unskipped in both, verifying AUTO survives automatic bootstrap and original manual seeding remains. Additional local lifecycle/startup3PASS protected reset/maintenance and first-install behavior. Ordinary guarded release39974665318/job120486127787 SUCCESS; Renderdep-dbdne3fb9u1s73aa63og LIVE15:04:31.542UTC. No deployment guard, schema/manifest, licence/auth, payment/fiscal or stock-posting path was changed.

Independent actual HTTP15:05:20UTC initial health200oktrue exact399c407e; DAILY initial HTML200/title retained and exact prior accepted HTML SHA256d55dfc0c584b5fb9c88cb2abbe576ae55eba2bf66c923a90c970780ee6bd0b12. Correct catalogue first returned500 during an observed database recovery interruption; concurrent read-only SQL returned unexpectedEOF. Render application logs15:05:31–35 explicitly say database system is in recovery mode/not yet accepting connections. One read-only SQL retry succeeded15:05:47, correct catalogue recheck15:06:12 returned503 closed as configured, and independent health recheck15:07:03 returned200oktrue exact399c407e. Initial failure is retained in proof, not erased or called a clean uninterrupted PASS. Recovery root cause and broad database availability are not accepted here; no restart, rollback or diagnostic transaction performed.

Final independent SQL15:05:47: DAILY enabledfalse/autoStocktrue/ALWAYS0/orders0; LAB enabledtrue/autoStockfalse/ALWAYS0/orders3; KAT autoStockfalse/ALWAYS0/orders14. DAILY and LAB complete stock/price, baked, visibility, policy and config hashes equal the14:26:53 pre-deployment controls across both releases. KAT baked/visibility/policy and orders remain equal; its full stock/config hashes include startup metadata and differ, so an unmeasured KAT quantity/price delta is NOT inferred. Exact snapshots and recovery-only log excerpts are in CHECKPOINTS/EVIDENCE/online-catalog-controls-20261023/final-release-proof.json.

Implemented centrally: own-store AUTO/SHOW/HIDE product visibility, native ALWAYS versus stock/baked availability, submit-time hide and aggregate-stock recheck, audited incremental saves without the5000 bulk ceiling, bounded50-row product UI, search/category and selection-generation response guards. Default/manual mode, native modifiers, scoped pricing and previous visual/metadata evidence retained. This is technical source/installation verification ONLY, not authenticated UI, LAB, mobile, physical or checkout PASS.

Acceptance remains BLOCKED: secure login tool timed out/reset during2FA and native credential protection prevented safe browser observation after the owner reported entry. No authenticated new visibility/availability save or temporary LAB configuration was performed. DAILY coffees have NOT been assigned ALWAYS yet; no blanket beverage/category exemption, inventory creation, real order, stock/payment/fiscal action or public activation. Do not replay protected ONL fixtures or repurpose LAB's baked13/stock38 control to bypass its policy guard.

Single next action: restore a controllable secure browser session. Then record a fresh bounded LAB fixture plan and before-controls before normal UI save/readback/restoration; only after scoped actual acceptance prepare DAILY coffees/options through native selected-store controls, keeping public-disabled. Source work

is complete, wider requirement/launch2054 remains OPEN with the same owner until completion or named handoff. No new functional manual/PDF/numbered PASS closure is claimed because the expanded behavior has no actual LAB acceptance. Existing dated PASS/manual remains historical and must not be read as acceptance of this new rule.

23/10/2026 17:43 Europe/Athens — ONLINE-CATALOG-CONTROL-03 / INITIAL TECHNICAL RELEASE VERIFIED / BOOTSTRAP FOLLOW-UP / AWAITING LAB

Retained owner codex/daily-online-store-20261011 / issue2054. SourcePR3096 final855e7865a3b32caa2964ee652a638ef7e6f8198f passed fullPRCI39967555980 all5SUCCESS/4155server+8backup/0FAIL/0SKIP, mergedc03afa2621694d648f2a84b2e7fa7621e3915c80. Exact mainCI39968969170 all5SUCCESS/4156server+8backup/0FAIL/0SKIP. Ordinary guarded release39970967266/job120473321060 SUCCESS; Renderdep-dbdn21ks728c73chhkn0 LIVE14:38:37.279UTC. Independent actual HTTP14:39:26UTC health200oktrue exactc03afa; DAILY initial HTML200/title retained and byte SHA256d55dfc0c584b5fb9c88cb2abbe576ae55eba2bf66c923a90c970780ee6bd0b12 equals prior accepted desktop/metadata HTML. Correct public /api/public/online/daily-bite/catalog-modifiers returns503 closed. Initial wrong /api/kat-online probe401 was not a catalogue acceptance test.

No actual LAB configuration or DAILY product/availability save occurred. Secure password request submitted and owner reported entry, but OTP tool timed out/reset and browser refused further observation with native credential state cannot be safely resumed. No secret was read; automated credential entry stopped. Authenticated outcome cannot be verified. No functional/manual/PDF PASS closure. New owner rule is still AWAITING LAB, despite technical installation.

Read-only full-row controls14:26:53→14:39:28UTC: DAILY and LAB stock/price, baked, visibility, policy, config hashes byte-equal; orders0/3 unchanged. KAT baked/visibility/policy and orders14 unchanged; full StoreProduct/config hashes differ. KAT configupdatedAt14:38:32 and88 StoreProduct updatedAt atstartup14:38:xx observed. Existing pilot bootstrap explicitly touches configupdatedAt; without a row-value baseline no KAT quantity/price delta is inferred from this metadata-inclusive hash. No diagnostic stock/financial transaction or restoration performed. Proof captures all exact hashes, not an unqualified all-store unchanged claim.

Code review then found a causal persistence gap in the EXISTING KAT pilot visibility INSERT, called by normal schema bootstrap: it recreates an absent visibility row and would turn AUTO back into SHOW. Bounded follow-up skips ONLY that legacy visibility seeding when the selected store has autoStockCatalogEnabled=true. Manual/default seed behavior and existing explicit SHOW/HIDE rows remain unchanged, with no schema, stock, price, fiscal, licence or activation change. The actual native PostgreSQL visibility test now executes the exact bootstrap INSERT, proves AUTO stays absent in automatic mode and preserves original manual seeding. Local7PASS/0FAIL/1nativeSKIP; exact full PR/main CI and ordinary guarded release required for this follow-up.

Current public DAILY remains disabled; no coffee ALWAYS policy has been saved (recorded0). LAB has one existing positive baked13/stock38 policy: do NOT repurpose or replay that protected fixture to test ALWAYS. Next single operational action after source follow-up is restore a controllable secure browser session, record a fresh bounded LAB fixture plan and before-controls, then normal UI configuration/readback/restoration. Subsequent DAILY coffee preparation remains OPEN. No whole2054/Gate closure or other-owner takeover. Checkpoint CHECKPOINTS/CHANGES/2026-10-23-online-catalog-control.md; evidence CHECKPOINTS/EVIDENCE/online-catalog-controls-20261023/release-proof.json.

23/10/2026 — ONLINE-CATALOG-CONTROL-02 / SOURCE READY / AWAITING CI AND LAB

Retained owner codex/daily-online-store-20261011 / issue2054. Claim PR3094 headc33395a5e521fc8525edb2d14e6b910b602efd82 / CI39964578640 SUCCESS mergedbf3a97342f38a7896548c92fc6fef2f6092a52ee before source. Existing per-store visibility rows support AUTO/SHOW/HIDE; native ALWAYS availability works in automatic mode with baked balance precedence. Active own-store products only, explicit HIDE also checked on submit, quantity aggregation preserved. No schema or inventory writes. Native per-product save validates active company/store/product, locks the store/product, rejects foreign collision and commits audit with readback atomically. Automatic editor exposes both controls and bounds product DOM to50 per page, with filter/search and selection-generation guards.

Local Node24 targeted4PASS/0FAIL/3nativePostgreSQLSKIP; frontend build PASS. Native isolated PostgreSQL checks are required unskipped in exact Node20 CI: >5000 choices, actual new handler persistence/AUTO removal/foreign/inactive/error isolation, atomic audit and baked precedence; actual modifier catalog/order quantity/HIDE/ALWAYS/member regressions. New mounted8753-product test verifies pagination, filters, failed save, rule save/readback and stale response after switching company and back. CI is not LAB PASS. Exact full PR/main CI and ordinary guarded deployment/independent health remain pending. Actual LAB normal configuration/readback/restoration and subsequent DAILY preparation remain NOT TESTED. No actual business configuration, stock/order/payment/fiscal action or public activation has occurred. Broader launch2054 stays OPEN, owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-23-online-catalog-control.md.

Integration: current main1686f144 retained in full, including other owners' ftext/dispatch changes. Initial source CI39965826874 had4138PASS/1FAIL/0SKIP; all new native cases passed. Only old regulated-pricing projection extraction failed after the intentional filter expansion; anchors repaired, all original assertions preserved and local5 pricing tests pass. No guard weakening. Full exact integrated CI required. No actual LAB/configuration yet.

23/10/2026 — ONLINE-CATALOG-CONTROL-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained owner codex/daily-online-store-20261011 / issue2054; implementation branch feat/online-catalog-control-20261023. Owner explicitly expands the stock-only requirement: coffees and accompaniments always online without stock, and owner-controlled inclusion/exclusion for every online store. This prospectively supersedes only the earlier strict automatic-stock/no-ALWAYS rule; historical limited PASS remains historical. No second owner or wider launch claim.

Reuse existing per-store OnlineProductVisibility and StoreBakingPolicy, without schema/migration or inventory changes. Automatic catalogue visibility: AUTO (no override) follows finite positive effective stock or explicit ALWAYS policy; SHOW explicitly includes an active own-store product, with stock availability still enforced unless ALWAYS; HIDE always excludes, including submit recheck. Preserve enabled same-product baked balance precedence and native recipe/baked policy safeguards. No coffee-name/category/brand inference or hardcoded DAILY exemption. Existing non-stock modifier options retain their behavior.

Normal authenticated/licensed tenant/store-scoped per-product override save, native availability editor in automatic mode, search/category and bounded pagination for the 8753-product list, selected-company/store stale-response protection. Both public catalogue readers and submit paths must use the same rules and aggregate repeated product quantities. Preserve manual mode, prices, stock posting, fulfilment, members, licence/auth/lifecycle, order idempotency, payment/fiscal and all existing KAT/DAILY visual PASS. Other owners and their files are unchanged.

Baseline main d9864606f7c66f710c83ef025feda9dee8ca987e; latest independently recorded production83db47fc8cc9bb4a0941d5d3421e0cf821baa4a2. DAILY public-disabled, automatic mode enabled, latest recorded8753 active/0positive; initial stock/launch remain OPEN. Previous strict auto LAB51 and restored manual2 are historical evidence, not new-rule acceptance. Mixed beverage categories contain packaged/ingredient rows: never blanket-exempt them.

Claim must pass CI and merge before source. Meaningful isolated native PostgreSQL and mounted UI checks: visibility persistence/AUTO restoration, foreign/inactive/company-store boundaries, >5000 incremental selection, ALWAYS/finite stock/aggregate/baked/HIDE submit, manual/member regressions, pagination and stale store switch. Full exact PR/main CI and ordinary guarded deployment/exact independent health precede bounded actual LAB normal-UI configuration/readback/restoration. Before every actual configuration action record fresh controls; no accepted order/financial fixture replay. DAILY normal prepared-drink configuration only after LAB acceptance, preserving public-disabled state. No public activation, production SQL writes, DDL/seeds, stock/order/payment/fiscal transaction or unrelated presentation fix.

Current evidence for expanded rule: NOT TESTED, no source/configuration changed. Qualified real PASS requires checkpoint, active/pending, module manual and synchronized tracker/numbered PDFs in green merged receipt; broader2054 remains OPEN. Next action: green merged claim, then bounded source. Checkpoint CHECKPOINTS/CHANGES/2026-10-23-online-catalog-control.md.

23/10/2026 — KAT-THERMAL-PRODUCTION-01 — ASSIGNED

Owner-approved bounded transfer FROM agent/table-service-layout-takeover-20260927 TO codex/kat-thermal-production-20261023. Owner explicitly approved in the printer conversation. Scope: existing POS preparation send, configurable thermal printer transport for both KAT POS, prepared coffee filtering, durable duplicate-send protection. KAT device evidence: LAN 192.168.1.87:9100, ESC/POS, CP1253 page17, cutter. No fiscal/payment/stock or broader TABLE_SERVICE takeover. Existing table/round/modifier/allergen/Android PASS protected. Hardware/network/Greek/cutter and end-to-end delivery NOT TESTED. Claim must be green and merged before source changes. Checkpoint CHECKPOINTS/CHANGES/2026-10-23-kat-thermal-production.md.

23/10/2026 01:36 UTC — AUTOMATIC EMAIL TECHNICAL SETUP VERIFIED / REAL MESSAGE ACCEPTANCE NOT TESTED

Same central owner codex/central-auto-dispatch-20261022 retains approved integration. Six empty tables and exact259-table catalogue reconciliation are installed. Promotion83db47fc8cc9bb4a0941d5d3421e0cf821baa4a2 full mainCI39882875173 all5SUCCESS/4137server+8backup/0FAIL/0SKIP; normalguard39883727591 Verify/Trigger/WaitSUCCESS; paired app+backup LIVE exact83db. Actual authenticated LAB settings/dispatch UI refresh still OFF and now shows earliestperiod23/10/2026 07:00Athens; no recipient, consent, grant, policy, business setting or report action performed. No report/verification/consent message sent and no inbox acceptance. Next single action is obtain the user's intended recipient address, then the separately scoped mailbox verification and consent with codes entered directly in UI, current SuperAdmin authority/policy and a genuinely complete whollypostcutoff period. First eligible DAILY07→07 period cannot complete before24/10/2026 07:00Athens. No rewind/historicalcatchup or accepted financial test replay. Overall email functional acceptance remains OPEN/NOT TESTED; full production private recovery/physicalclearance remain separate NOT PROVEN. No functional manual, global PDF or numbered PASS closure. Screenshots: CHECKPOINTS/EVIDENCE/automatic-dispatch-off-provision-20261022/automatic-report-off-smtp-test-20261023.jpg and automatic-report-ready-20261023.jpg.

23/10/2026 01:27 UTC — PAIRED INSTALLATION OBSERVED / SIGNED PULSE CHECK STILL PENDING

Exact promotion main 83db47fc8cc9bb4a0941d5d3421e0cf821baa4a2 passed full CI39882875173 all five jobs, 4137 server plus8 backup /0FAIL/0SKIP. Normal guarded release39883727591 Verify/Trigger/Wait SUCCESS. App dep-dbdbeid9fdbs73ahp7cg LIVE01:26:20.603UTC and existing backup cron dep-dbdbfi942hec738vuhv0 LIVE01:26:57.715UTC via normal new_commit/checksPass at same exact revision. Expected parsed compact manifest hash599344219baf4dcac8c39144a6e12e383bcac0bb3546979cfff94bcdde293930. Next ordinary scheduled pulse/HMAC proof pending; no TriggerRun/cancel/manual deployment. OFF-control configuration below is not yet applied and remains gated by fresh signed pulse and green merged claim. Actual report delivery/inbox and whole-period acceptance remain NOT TESTED.

23/10/2026 — AUTOMATIC-DISPATCH-EXTERNAL-OFF-CONTROL-01 / ASSIGNED BEFORE STATE CHANGE / NOT APPLIED

Same approved central integration owner codex/central-auto-dispatch-20261022; bounded configuration preparation only. This claim must pass applicable CI and merge GREEN BEFORE the configuration action. The paired app/backup rollout at 83db47fc8cc9bb4a0941d5d3421e0cf821baa4a2 and its fresh HMAC-validated worker pulse must also be verified first. No configuration has been changed by this local claim preparation.

Exact permitted configuration scope: ONLY the direct external Render key AUTOMATIC_REPORT_ACTIVATION_CONTROL on existing web service srv-d9isenfavr4c73bdh52g, workspace tea-d9ie26vaqgkc739uudqg. The direct Render key is the source of truth; it remains absent from render.yaml. Update that key through a merge-preserving operation: retain every other direct/group environment value, SMTP credential, service setting, plan and resource. No broad environment replacement, new service or group edit. Record redacted control identity/fingerprints, never secrets or environment contents.

At the actual authorized application time, generate one fresh UUIDv4 epoch and use the actual canonical UTC issuedAt. Set notBefore to the next strictly future 07:00 Europe/Athens business-day boundary, matching the observed LAB day-start setting, and serialize that instant in UTC with the real date/time-zone offset. Require notBefore > issuedAt; do not preselect stale timestamps in this claim. The control is exactly {v:1,serviceId,epoch,issuedAt,notBefore,enabled:false} in the canonical serialization required by readActivation. No historical or straddling-period catch-up is authorized.

Use the supported configuration deployment of the existing exact reviewed build; never restart an old environment or substitute an older build. Verify installed current revision and HTTP health, and independently read readActivation as valid:true, enabled:false with the new expected fingerprints. Preserve paired app/backup revision and manifest-hash evidence. Failure or uncertainty leaves dispatch OFF and requires a concrete receipt; no blind retry or ON fallback.

No database or UI writes, provisioning, lifecycle enrollment, RESET, restore, business/financial/stock/fiscal action, plan change or SMTP send belongs to this claim. The actual recipient remains unknown: do not add a recipient, issue verification mail, record consent, create an automation grant or enable policy/dispatch. Final functional email/inbox acceptance remains NOT TESTED; the recipient address is needed only for a later separately concrete step. Existing technical/functional evidence and other owners remain unchanged.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-off-provision.md.

23/10/2026 01:15 UTC — AUTOMATIC-DISPATCH-OFF-PROVISION-01 / SIX EMPTY TABLES VERIFIED / FINAL FUNCTIONAL TEST NOT TESTED

Same approved central owner codex/central-auto-dispatch-20261022; recipient/restore integration assignment retained. Technical receipt only, not a new functional LAB/USER PASS or manual closure. Joint reviewed source 619a20d35713d145be13d14d48a8162c6d2c2d4e was installed through normal guarded release run 39877166971: Verify, Trigger and Wait SUCCESS; independent health HTTP 200 at that exact revision.

The retained reviewed operator was executed ONCE after that installation and returned PROVISIONED_SIX_EMPTY_TABLES, dispatch OFF, exact catalog SHA256 332ca5228dd5a31c2419cd96c53c226b0c48f5c2f0f0666e2c8bd0314549aaab. Independent fresh read-only verification at 2026-10-23T01:14:06.789881Z observed PostgreSQL 180004, all 259 reviewed tables with exact ordered column/type/nullability match, 260 actual tables with only the already allowed internal StoreLifecycleRuntime extra, and zero rows in each of the six report tables. StoreLifecycleFence and StoreLifecycleExecution remained absent; zero active lifecycle/DDL work was observed. No duplicate provisioning, enrollment, RESET, restore or business/financial/stock/fiscal action. Operator screenshot: CHECKPOINTS/EVIDENCE/automatic-dispatch-off-provision-20261022/provision-20261023.jpg.

Canonical promotion PR #3089, head 33a469, passed full CI 39877282444 (all five jobs; 4137 server plus 8 backup tests, zero failures/skips) and merged as 83db47fc8cc9bb4a0941d5d3421e0cf821baa4a2. Paired app/backup rollout and exact revision/manifest-hash agreement are PENDING at this receipt; merge alone is not installed-runtime proof. Preserve the retained DAILY owner, all unrelated source and every earlier accepted result. The source catalogue reconciliation does not imply full production private recovery or physical-clearance acceptance.

An actual SMTP connection/authentication check on installed 619a20d at 2026-10-23T01:15:10.940Z returned SMTP_CONNECTION_AND_AUTH_ONLY, ok:true, messageSent:false, using existing credentials without exposing them. This confirms connectivity/authentication only: no report or verification message was sent and no inbox delivery was tested. The unresolved recipient-identity step was aborted; no Gmail retry occurred. Dispatch remains OFF; no recipient verification, separate consent, automation grant or policy activation is recorded. Final controlled email/inbox acceptance remains NOT TESTED. Await paired-rollout evidence before appending the next technical receipt; no global PASS, functional manual or numbered acceptance change.

Read-only hosted UI observation using the existing authenticated Super Admin session: selected MYWORKSTATION LAB → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ → Αναφορές ταμείων loaded both settings and dispatch state without an error after provisioning. Dispatch OFF was visible; the recipient list was empty, authorization/enable buttons disabled and no cutoff displayed. Existing business-day/shift settings 7/15/23 and MAIN with all three shifts remained unchanged. No UI save or other write occurred. This is limited technical rendering/state evidence, not report delivery or whole functional acceptance.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-off-provision.md. This local receipt preserves main 83db47fc and is prepared for root review/publication only; no receipt commit, push or merge has been performed.

23/10/2026 - AUTOMATIC-DISPATCH-CANONICAL-PROMOTION-01 / ASSIGNED BEFORE SOURCE AND PROMOTION

Same approved recipient/restore integration owner codex/central-auto-dispatch-20261022; usercontinues through realemailtest. This is bounded technical catalogue review required for the alreadyapproved six-tableintegration, not takeover of DAILYfeaturecode or unrelated lifecycle/physicalclearance. Sourcecandidate preparation beginsONLYafterthisclaimgreenmerged; productionpromotion/MERGE remainsconditionalbelow. Retainedsource3084fullPG18operator and3085legacyboundarymustbejointlyinstalled first; oneOFFprovision under3075 only, no duplicateoperator.

22/10/2026 23:37 Europe/Athens — KAT38 OLD-CARD RETIREMENT / COMPLETE / LIMITED LIVE CONFIGURATION PASS

Retained KAT owner ops/kat-retire38-20261022. Explicit owner “ναι σβηστα” refers ONLY to38reviewed old/test cards in OWNER_REVIEW_38.md, not57corrected cards or original imported catalog. Reversible store-only inactive status applied through native selected Κυλικείο KAT Inventory; no permanent deletion or history removal. Claim PR3074 final5dd4f65b300a75c9029e4e6cb89a5e3f0e80cb39/docsCI39849726053SUCCESS merged5c0c45b547dba7e70ae9892536917b3f06aa5cf4 BEFORE real save, preserving concurrent main updates.

Three native explicit selections26/9/3, allother fields Keep, SETunchecked; changed ONLY Κατάσταση καταστήματος=Ανενεργά. Actual audit receipts:

-002bcd7b-16f2-4a14-b504-09416f71123e:26 at22Oct20:33:35.161062UTC.

-16359ae7-fa1f-4b55-9b7e-120c6db438bd:9 at20:35:27.030019UTC.

-7c184683-8bf3-4646-bfc8-46a2a5585ae9:3 at20:36:30.822297UTC.

Each exact product ID matches owner manifest, all38Product.active remaintrue and StoreProduct.active=false. Product/StoreProduct records, original sales/payments/movements and stocks retained. No price/VAT/department/barcode/recipe/fee/layout/shift/financial/other-store write.

Fresh group1 baseline20:32:35UTC and after20:33:54UTC: EXACT26active transitions,0store-protected/price/stock/rate/department differences; KAT/LAB/N40 sales/payments/transactions/movement/shift/layout controls unchanged. Concurrent ordinary f12c816a release/startup changed88Product full timestamp hashes (prepared items/materials), not38retired identities; no blanket whole-period timestamp invariance claimed. Independent current1900Product business hashes against prior completed final-readback match0differences excluding routine updatedAt and previously allowed VAT mapping metadata. Source startup behavior protected; no reset or repair inferred. Group2 and3 fresh before/after show exactly9/3inactive transitions andZERO Product semantic/store-protected mismatches; financial/layout/control terminal/store hashes unchanged. All38retired Product full hashes themselves retained; other-store rows and coffeeSET hash unchanged. Preparation full hash differs across unrelated startup; final semantic fee check57parents/0badqty-price/0embeddedfee retained. Temporary readonly EOF retried without repeating business save; one selection-only browser timeout recovered by reading checkboxes, no duplicate save.

Final20:37:20UTC:38/38retired,all1900records preserved, active store rows1863→1825, ZERO active products without joined same-company fiscal department.242publishedbutton products retainactive mappings, layoutv3702 unchanged,57previous mapping corrections retained. This closes ONLY38old-card disposition residual. Native archive active view removes retired rows; its inactive-only filter did not show store-inactive/Product-active TEST cards, so that filter is NOT a verified restoration path. Preserve records and use appropriate full-list/card review for future restoration; no speculative source fix. Final public health oktrue/version0.22.0+kat-test-pos/exactf12c816aecab60e60adb811ea523f7ac5523e54f. No source/manual deploy or physical sale/test.

Evidence CHECKPOINTS/EVIDENCE/kat-retire38-20261022 before/after-group1/2/3,extra-before/after,final-summary/audit IDs,manifest,saved screenshot. Earlier38OPEN/owner-review instructions are superseded by this explicit authorized completion; do not map/deactivate/replay them again. Broader physical first legitimate receipt at refreshed KAT POS01/02 remains USER NOT TESTED, separate mobile-topup0.50SET/SEPTONAprice residuals and other owners remain OPEN. Owner retained for those separate KAT residuals; no second-page takeover. Single next action for readiness is owner physical POS refresh/legitimate receipt acceptance, with normal current module/shift/fiscal gates retained.

22/10/2026 - AUTOMATIC-DISPATCH-LEGACY-BOUNDARY-01 / ASSIGNED BEFORE SOURCE

Same approved central owner codex/central-auto-dispatch-20261022; user explicitly continued through the real email test. Existing source3065/exactLIVE365a4799 and technicalreceipt3072 remain protected; same-owner six-empty-table OFF operationalclaim3075 is separate and must not be duplicated. Newbounded source amendment begins ONLY after this claim green mergedmain.

Purpose: automatic-email admission in genuine existing unenrolled generation0 without silently enrolling anyStore or installing global182table lifecycletriggers solelyforemail. Supported lifecycleinstaller is atomic and mustacquireStoretriggerDDL beforecommittingFence enrollment. Fresh boundary order: schema-qualified StoreTABLESHARENOWAIT; optionalexistingFenceTABLESHARENOWAIT (disappearance/lockerror FAIL, neverfallback); fixedsixreporttablesROWEXCLUSIVENOWAIT BEFORE authorization/source reads or writes; existing fresh lifecycle assertion and all actor/company/store/config locks retained through prepare/start commit. Genuine absentFence/table/row remains unenrolledgeneration0, neverDDL; enrolled0/int64/maintenance/retired/stale semantics preserved. Management asserts ORIGINALcapturedrequestepoch, never upgrades it. Earlyreportlocks explicitlyavoid partialinstallerDDL-beforeStore circularwait. StoreSHARE maybrieflyblockallStoreDML; failNOWAIT/no retry, releasesbeforeSMTP; financialFKROW SHARE remainscompatible.

Exact ownership aftergreen: commerce_ai NEW server/src/services/automatic-report-lock-boundary.js, existing automatic-report-eligibility.js, NEW server/test/automatic-report-legacy-lifecycle-postgres.test.js; automatic_reports existing server/src/services/automatic-report-dispatch-policy.js and tests automatic-report-dispatch-schema.test.js, automatic-report-recipients.test.js, automatic-report-persistence-postgres.test.js toadopthelper preservingreadiness/role/session/proof/revisions; pos_stores existing server/src/services/store-metadata-mutation.js, tests store-metadata-mutation.test.js, store-metadata-mutation-postgres.test.js applying boundary onlyforfull6schema (allabsentlegacy preserved/partialfailsclosed) beforelateinvalidation; infrastructure NEW ops/backup/provision-automatic-reports.mjs and NEW server/test/automatic-report-provision-operator.test.js fixedservice/revision/sourceSHA/OFF/DBidentity/all6 ABSENT/oneatomictransaction/localtimeouts/catalog+constraints+indexes+emptycounts/rollback/redacted receipt, nobootstrap orsilentexistingstorageacceptance; root ops/backup/CONTROLLED_RESTORE.md amendment separating emailadmission fromexistingfull-lifecycle recoveryacceptance. No canonicalmanifestpromotion or existingDAILYfeature/schema reclassification is authorized by THIS sourceclaim; canonical6classification/app+backuphash/noactivejobs coordination remains separate beforeON.

Required actualisolated native proof: absentFence/absentrow, bothinstallerorders, partialinstallerreportDDLbeforeStore, enrolled0/exactint64, maintenance/reset/staleorigin0, FKfinancialcompatibility, StoreDMLrefusal, locksheldthroughSTARTcommit and releasedbeforeSMTP; policylegacy0 nevercreatesFence; concurrentdispatchersoneattempt, cutoff/terminalreplaycontrols retained. FullPR/exactmainCI, ordinaryguardedrelease/exactLIVEhealth beforeLAB. No actualSMTP/DDL/config/enrollment/restore/businessaction bythisclaim; allfinalfunctionalacceptanceOPEN, dispatchOFF. Controlledfullrestore stillmandatoryexternalOFF/stop/newepoch/futurecutoff; privilegedoutofbandrestore unsupported. Full259tableproductioncopy/physicalclearance remainsseparateNOTTESTED, not claimedfromboundedfixture. Single nextaction greenclaim thenboundedsource; samecentralownerretainsintegration.

22/10/2026 20:35 UTC - AUTOMATIC-DISPATCH-PROVISION-OPERATOR-01 / ASSIGNED BEFORE SOURCE

Owner codex/central-auto-dispatch-20261022 retains approved integration. OFF operational claim3075/CI39849352868SUCCESS merged88921e3d715619ed916a3b5a8fbc7fe9d710f97a. Runtime access resolved; last actual20:27:20UTC preflight723c818/254tables/all6dispatch+Fence/Execution absent/controlmissingOFF. No subsequent production action or new functional PASS.

Exact new source scope AFTER this claim green mergedmain: server/src/services/automatic-report-provision-catalog.js; server/scripts/automatic-report-provision.mjs; server/test/automatic-report-provision.test.js; server/test/automatic-report-provision-postgres.test.js; server/test/fixtures/automatic-report-provision-catalog-pg18.json. Independent isolated PG18 capture of unchanged installedDDL SHA2569b58b81fe64a7972ddadef73f62f4b81fc2417619fab0943fd3da42dc2612c6f supplies full normalized catalog oracle. Strict dry-run default/exact service+revision+DB/schema/source/OFF binding, absent relations AND types, bounded transaction/advisory lock, exact columns/defaults/checks/FK/PK/UNIQUE/indexes/trigger/RLS/object validation and zero rows beforecommit. Real mismatch/partial/preexisting/lock/identity/source/OFF refusal and rollback native tests required; no regex-derived oracle or counts-only acceptance.

No existing runtime/lifecycle/manifest/DAILY/mail/UI/workflow edits. No production invocation until runner/test/oracle independently reviewed, requiredfullCI/main and ordinary guarded installation verified. Claim is source preparation only, NOT new approval for ON. DefaultOFF and every existing LAB/USERPASS preserved; no duplicate business tests. Actual6tableOFFsetup, fullschema recoveryproof, DAILY reconciliation, canonicalpromotion, install-only enrollment(noRESET), freshOFFepoch/mailbox/consent/grant/policy/finalSMTP remain separate OPEN gates. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-provision-operator.md. Other owners retained.

22/10/2026 23:27 Europe/Athens — KAT38 OLD-CARD RETIREMENT / EXPLICIT OWNER AUTHORIZED / ASSIGNED BEFORE CONFIGURATION

Retained KAT owner ops/kat-missing-fiscal-mappings-20261022; bounded continuation ops/kat-retire38-20261022. After reviewing exact38-list from merged PR3073/head4a80b692/docsCI39847332256SUCCESS/merge1561701b, owner said “ναι σβηστα”. Implement as reversible store-only inactive status through native selected KAT Inventory bulk form; preserve Product records/active flag, historical sales/payments/movements, prices/VAT/departments/stocks, other stores,57completed mappings,242button products,feeSET/layout. No permanent DELETE, source/schema/deploy or financial action.

Exact immutable identities from CHECKPOINTS/EVIDENCE/kat-missing-fiscal-mappings-20261022/final-summary.json / OWNER_REVIEW_38.md; do not expand selection to newly discovered missing items. Fresh read-only before/after each native group, verify current identities and save only Κατάσταση καταστήματος=Ανενεργά with ALL other fields Keep/SETunchecked. Grouped exact SKU prefixes are navigation only; manually select reviewed manifest IDs. Existing audited transactional bulk path and prior native save acceptance retained; no accepted transaction/price/merge/import/coffee test replay. Native retirement configuration NOT YET DONE. All broader readiness/physical first-receipt/module-service residuals stay separate. Single next action after claimgreen/main: fresh baselines, bounded native deactivation of exact38 and independent fullreadback/audit/control plus five-file receipt. Owner retained.

22/10/2026 20:30 UTC - AUTOMATIC-DISPATCH-OFF-PROVISION-01 / ASSIGNED BEFORE STATE CHANGE

Same approved central owner codex/central-auto-dispatch-20261022. Runtime maintenance access RESOLVED via existing Render Web Shell; read-only preflight20:27:20.403UTC/runtime723c8184f39d87e262d7d1c59c1941e4cadee55b/Node20.20.2:254tables, all6dispatch absent, Fence/Execution absent, Runtime present, external activation control missing=>OFF. No DDL/config/SMTP/restore/enrollment/business action performed. No new functional PASS. Existing4094+8CI/#3065/#3072 and every accepted LAB/USER result preserved.

Exact next scope after THIS claim green mergedmain and independent operator review: provision ONLY the six empty dispatch tables using installed reviewed automatic-report-dispatch-schema.js, one atomic transaction, exact service/database/schema/source identity, all-six absence guard (including non-table relation collisions), transaction-local lock/statement timeouts, catalog/constraint/index/zero-row validation BEFORE commit; abort/rollback on any mismatch or contention. No handwritten alternative DDL, no IF NOT EXISTS acceptance of unknown existing storage, no controller.start/RESET, no business rows or financial locks, no startup bootstrap. Recheck runtime revision and no duplicate maintenance writer immediately before action. Unexpected existing schema stops this tranche for review.

Canonical manifests/column review/planHash, lifecycle enrollment, full-schema private recovery proof, DAILY autoStockCatalogEnabled retained-owner reconciliation, external OFF epoch, mailbox/consent/grant/policy and final controlled SMTP/inbox acceptance remain OPEN separately. DAILY physical column observed booleanNOTNULLdefaultfalse; no reclassification or mutation. No sends ON. Source unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-off-provision.md; scoped evidence CHECKPOINTS/EVIDENCE/automatic-dispatch-off-provision-20261022. Existing shared PDF/functional manual/numbered PASS unchanged; scoped PDF records this bounded pre-action state. Other stream owners retained.

22/10/2026 23:12 Europe/Athens — KAT-MISSING-FISCAL-MAPPINGS / 57 CORRECTED / LIMITED LIVE CONFIGURATION PASS / 38 OPEN

Retained owner ops/kat-missing-fiscal-mappings-20261022 under original KAT owner. Owner authorized START/correction and CONTINUE; access restored via secure PlatformSuperAdmin2FA. Claim PR3051 final5b18fb37/docsCI39822748783SUCCESS mergedc444a14b. New measured synthetic-only blank-link bulk save passed and five-file LAB receipt PR3052/head8e645ee42f39a8b4c2f69d8c4eb4f07ffeca1e06/docsCI39823513222SUCCESS merged81e068d9 BEFORE any KAT write. No source modification, new manual deployment, import, sale/payment/stock reset or replay.

Native actual kat-store/pilot-company corrections:51 active MWS-KAT-BEV identities saved once22Oct17:34:12UTC to existing65d2fb68-dae6-46f0-8e34-27767665538a/register2/code42/13%, matching original prepared-coffee/chocolate/tea source. One exact old LIFE grape/orange/pomegranate400ml SKU5201263890722 saved to31b44d25-cd88-4104-89d1-deabf8abb51f/register1/code1/13% from exact original KAT50369. Four old milk/juice SKUs5201263890717/718/721/724 saved22Oct20:10UTC to dept2 from same brand/flavor/volume/variant KAT35042/35039/3505/6555. One old100029549ΚΟΥΛΟΥΡΙ ΘΕΣΣΑΛΟΝΙΚΗΣ saved20:11UTC to dept2 from exact abbreviated KAT40980ΚΟΥΛΟΥΡΙ ΘΕΣ/ΝΙΚΗΣ. No new products, merge or alias edits. Every other bulk input Keep, SETunchecked.

Independent immediate before/after and native readback: only57 reviewed blank department links plus vatVerifiedtrue and routine updatedAt/audit changed. Existing rates, retail/cost, activation, stocks, original imported fiscal tuples retained. Four-row and last-row complete Product/StoreProduct semantic hashes match outside allowed fields; LAB/KAT/N40 finance/shifts/movement/layout controls unchanged. First51 observed after17:34:24UTC exactly51changes/0bad protected fields; later pre-next-action file independently retains them. One-row LIFE observed exactly1change/noextra protected delta. Catalog controls necessarily differ only for intended mappings. Ordinary unrelated source deployments between windows can update startup timestamps: do not infer whole-period global timestamp immutability. Preserve fresh per-action evidence. Coffee SET/preparation protected hashes unchanged during51window; final extra readback retained. Existing waterstock-1 remains, no reset.

Final20:12:36UTC: all242 POS-button product IDs now have same-company joined departments, ZERO missing mappings; layoutv3702 retained, no button edits. Active missing department count95→38 (57corrected); remaining exact38IDs/SKUs/names/rates/prices in final-summary.json are ALL outside published button references. They include TEST data, ambiguous old supplier/fake-code cards,0% tobacco with unverified exemptions and conflicting24%SPRITE/κιμαδόπιτα vs imported13%. Do NOT assign by rate or mass-deactivate/reprice/change VAT to force readiness. Need exact original department/profile decision for those38; no such change inferred from CONTINUE. Unrestricted fiscal readiness remains OPEN, even though missing-link blocker for the242 published buttons is removed. First legitimate refreshed physical KAT POS01/02 receipt remains USER NOT TESTED; no synthetic real-store sale submitted. Mobile-card automatic0.50SET and SEPTONAprice conflict remain OPEN.

Read-only public /api/health22Oct20:12UTC oktrue/version0.22.0+kat-test-pos/revision365a4799fea5704a44c4e14bf1ff642a25117ca8 (later ordinary runtime; exact revision at earlier individual save was not independently sampled). Signed writers were active, no unresolved fiscal request in17:34 audit; latest successful full backups/restore checks retained from readiness audit, not re-run. Do not equate configuration/health with physical fiscal PASS.

Evidence CHECKPOINTS/EVIDENCE/kat-missing-fiscal-mappings-20261022: real-immediate-before, legacy-one-before, legacy-four-before/after,koulouri-before,final-readback/final-summary,source-mappings and saved screenshot. Single next action: owner reviews exact38residual disposition/original fiscal mapping; then native identified correction after fresh baseline. Owner retained, no other page takes this scope or repeats completed51/6 corrections. Broader inventory merge/price and all other owners preserved.

22/10/2026 - AUTOMATIC-DISPATCH-PERSISTENCE-RESTORE-01 / SOURCE INSTALLED OFF / FINAL FUNCTIONAL TEST OPEN

Combined sourcePR3065 exacthead3b00726802ad08622cbdcdfdf2c1c32f7aed38d8 fullCI39838748112/build120034381296 SUCCESS:4094serverPASS/0FAIL/0SKIP +8backupPASS/0FAIL/0SKIP; all5jobs SUCCESS. All4new native parents and subcases executed, including actual concurrentdispatch, recipientconsent, Storemetadata invalidation, bounded7table recovery/archiveCOPY/RESET. Merged365a4799fea5704a44c4e14bf1ff642a25117ca8. ExactmainCI39841152468/build120042615262: all5jobsSUCCESS4094server+8backup/0FAIL/0SKIP; aggregate run API stillIN_PROGRESS at19:45:59UTC, so no aggregate green claim yet. Normal guarded release NOT TRIGGERED/VERIFIED yet; no bypass. ExactnewrevisionLIVEhealth NOT VERIFIED yet.

This is merged technical source only; installation remains pending, not final automatic-email LAB/USER PASS. dispatchOFF; no real SMTP/provisioning/productionDDL/config/guardinstallation/restore/paid/financial/stock/fiscal action or accepted-test replay. Readonly production recheck2026-10-22T19:35:37.258035Z: all6dispatchtables and StoreLifecycleFence/Execution STILL ABSENT. Currentstrict management/eligibility requires actual enrolled lifecycle; no implicitenrollment. Core lifecycle controller.start performs beginDrainRESET, so MUST NOT be used as enrollment shortcut.

Concrete remaining sequence: authenticated runtime writecapability for explicit atomic6tableprovision whileOFF; actualschema/constraints/index verification and retained DAILY catalog mismatch reconciliation; reviewed canonicalmanifest+columnreview promotion coordinated acrossapp/backup/noactivejobs/planHash; actualfullschema/privatecopyrecovery proof and core.install-only enrollment withoutRESET; externalcanonicalRenderOFFcontrol/freshepoch/futureAthenscutoff; currentSuperAdmin grant, separate mailboxverification+consent and explicitpolicy; whollypostcutoff completeperiod controlledSMTP/inboxacceptance. Bounded7tableCI proof is NOT full259tableproductioncopy proof. Existing canonical manifest remains unchanged to protect current lifecycle before tablesexist.

Actual capability boundary: connected Render SQL is READONLY, no authenticated runtime shell/SQLwrite execution capability or local servicecredentials available. Render environment-variable update capability DOES exist; absentDBwrite is not a blanket absence of Render write tools. No credentials guessed/exposed. Existing onecolumn OnlineOrderingConfig mismatch autoStockCatalogEnabled booleanNOTNULL defaultfalse remains retained DAILY owner codex/daily-online-store-20261011 (central2527comment6349250633); not silently changed/reclassified. Readonly reviews identified possible future legacyzero locking protocol but it is NOT implemented or acceptanceproof; any subsequent behavior amendment needs exactgreenclaim+nativeinterleavings first.

Single next action: finish exactmain aggregateCI and ordinary guardedrelease/exactLIVEhealth, then make authenticated runtime maintenance access available for the reviewed setup sequence, keeping automaticdispatchOFF. Same centralowner retains integration until explicit handoff. Source/evidence checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-persistence-restore.md and scoped PDF/JSON CHECKPOINTS/EVIDENCE/automatic-dispatch-integration-20261022. Existing functional manuals/globalPDF/numberedstatuses unchanged because no newfunctionalPASS.

23/10/2026 — FTEXT CARD SOURCE CI PASS / MERGED / PHYSICAL ACTIVATION BLOCKED

Retained owner codex/rizareio-ftext-bridge-20261022 / feat/ftext-card-execution-20261023. Claim3101 mergedabe5cc03 before source. Source PR3102 exactb3ded3dc39cc87239a51ad01c5b728499302a8fc fullCI39970153563/build120471358289 SUCCESS:4163serverPASS/0FAIL/0SKIP plus8backupPASS/0FAIL/0SKIP, actual HTTP/browser/build/invariants and existing RBS/Hikvision/wholesale checks passed. Native PostgreSQL seven ftext subcases ran unskipped, including CARD single claim/concurrent finalization, invalid/missing/IRIS/unmasked/mismatched amount refusal, stock-failure rollback, one CARD/SALE_CARD plus preserved CASH/SALE_CASH and exact stock/control. Exact Windows39970153601 SUCCESS: protected STATUS29/cloud DPAPI and48 combined cash/card command/result/restart/tombstone/native temporary-folder cases. Mergedcb5d675620ec0b0f6ef9b5f9c69ab90b37ff5ea0. This is engineering CI evidence, NOT physical/LAB/USER checkout acceptance; exact source-main/ordinary release verification remains required before setup.

CARD PaymentID2 is owner/manual confirmed for intended installation; generic profile remains explicit and per POS. Source requires actual active selected-terminal STORE EFTPOS mapping and exact fiscal device before creating CARD request, plus matching final receipt and one exact full-amount masked-card result before atomic CARD posting. No general card default, manual success, retry, VOID or register programming. Current physical firmware/os7+ line8/terminal transaction mode and final-PC package acceptance remain NOT TESTED.

Activation stays OFF: canonical FtextCashRequest backup/reset/restore graph still requires its retained lifecycle owner feat/store-shifts-inventory-clear-20261018. No production DDL/settings/new pairing, operational package, fiscal receipt, card charge, catalogue import or accepted-test replay. Existing selected-PC/cloud STATUS USER PASS and manual remain protected. Whole connector OPEN/ASSIGNED to retained ftext owner. Single next dependency: lifecycle owner approves canonical ftext recovery graph/typed columns/embedded references and exact full-schema recovery; then ftext owner verifies ordinary release, controlled settings/profile/package and one user-controlled acceptance with fresh before/after evidence. Current card source needs no rebuilding merely to repeat these accepted synthetic tests. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ftext-connector.md; scoped PDF CHECKPOINTS/EVIDENCE/ftext-card-source-20261023/tracker.pdf. No manual or numbered-task PASS closure from CI.

23/10/2026 — FTEXT CARD SOURCE PREPARED / AWAITING NATIVE CI / activation OFF

Claim3101 exactb87680e mergedabe5cc03 after applicable documentation checks SUCCESS. Added explicit per-installation optional card profile (PaymentID2-30, POS1-10, transaction type1/6, confirmed os7+ line8 support), preserving absent-field legacy hashes. Shared immutable one-shot queue now binds CASH/CARD method; server and Windows require exact final code0/serial/receipt plus one full-amount masked-card line8 for CARD. Missing/foreign/mixed/IRIS/unmasked/inconsistent evidence never finalizes. Atomic finalizer records CARD/SALE_CARD once with original shift/cashier and real stock helper; no new cash posting for card. Original cash and RBS behavior retained, no manual confirmation/retry/VOID/programming route added. POS completion uses the confirmed original payment method; stale-store recovery/polling never resends checkout. Technical card controls remain behind canonical recovery gate and explicit profile confirmation/new package/pairing.

Local Node20 targeted23PASS/0FAIL/1nativeSKIP and actual client build PASS. New real PostgreSQL case requires concurrent one-shot CARD claim/finalization, refusal of missing/wrong/IRIS/PAN evidence before business writes, rollback on stock failure, exactly one CARD and one existing CASH payment/posting, stock0→-1 cash→-2 card and foreign control20 unchanged. Native PostgreSQL and extended Windows5.1 masked-card/one-shot/tombstone cases must execute in exact full CI before any source merge. These are engineering tests, not LAB/USER physical checkout acceptance. FtextCashRequest canonical recovery review remains with retained lifecycle owner; activation OFF, no production settings/DDL, operational package, receipt or charge. Whole connector OPEN/retained ftext owner. Next: exact native/Windows/full

CI, publish guarded source; canonical recovery acceptance still required before final-PC setup and one consulted user charge with fresh baseline. Existing STATUS USER PASS/manual unchanged.

23/10/2026 — FTEXT-CARD-EXECUTION-01 / ASSIGNED BEFORE SOURCE / activation OFF

ASSIGNED retained owner codex/rizareio-ftext-bridge-20261022 / feat/ftext-card-execution-20261023. Owner explicitly requests continuation after supplying technician/manual confirmation of CARD PaymentID2. Guarded cash source PR3067 merged1686f144 after fullCI39965543700 and Windows39965543650 SUCCESS; selected-store physical communication USER PASS remains protected. No physical cash/card checkout PASS. Canonical FtextCashRequest recovery review remains with feat/store-shifts-inventory-clear-20261018; no canonical graph/loader override or production DDL.

Claim bounded additive card path in existing ftext-installation, ftext-cash-requests/finalize, ftext-v1/store-pos ftext slice, Windows Cash/Cloud-Tools/Cloud-Connector, installation package and own setup controls; new pure ftext-card-payment helper plus related isolated unit/native PostgreSQL/Windows/mounted tests. Reuse one-shot durable request/table with exact method binding, confirmed per-installation CARD payment ID and explicit os7+ line8 evidence support. Validate one full-amount masked-card response tied to final code0/exact serial/day/counter/AADE receipt before atomic CARD/SALE_CARD/stock/audit commit. Reject missing/mixed/IRIS/plain PAN/inconsistent amounts and unsupported modes, never infer success from STATUS or add manual confirmation. Unknown/decline/timeout remains REQUIRES_CHECK with no resend/VOID/cash fallback. Existing cash/legacy hash/pairing/current-generation/RBS flows retained. No arbitrary PRG_SETPAYMENT, firmware change or register programming. Per-installation card capability defaults absent/OFF; canonical recovery gate and new-package/pairing/current-status checks remain mandatory. No production configuration or fiscal command in engineering.

Source begins only after this claim is green/main. Required validation: native PostgreSQL card exactly-once/rollback/control/cash regression, one-shot Windows5.1 card serialization and line8 parsing, purpose/scope/settings mismatch and POS polling/recovery; full exact CI/main/ordinary release. Manual line8 support is conditional os7.000+; actual firmware/mode remains NOT TESTED until selected-PC acceptance. Final user-controlled charge requires fresh before/after evidence and consultation. Whole connector OPEN/owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ftext-connector.md. Next: publish claim, implement dormant card path, keep activation OFF pending retained recovery review.

23/10/2026 — FTEXT release continuation / owner retained / activation OFF

Retained codex/rizareio-ftext-bridge-20261022 / feat/ftext-cash-execution-20261022 / PR3067. Actual vendor v25.02 manual pages6/9 confirms CASH1, example CARD2/PAY||2; owner confirms technician used that mapping. This does not implement/accept physical card execution or prove POS transaction mode/firmware. Card-result parsing/finalization remains OPEN, no PRG_SETPAYMENT or fiscal command emitted. Exact9f859a7 CI39846638730:4110PASS/2FAIL/0SKIP (existing Chromium startup/render timeouts), Windows39846638622 SUCCESS; failed-job rerun requested. Integrate current mainbf3a9734 without changing other owners. Canonical FtextCashRequest review still absent, so pre-DDL gate and activation OFF remain. Next: publish exact integrated guarded source green; retained lifecycle owner reviews ftext recovery graph; then claimed card engineering/controlled user acceptance. Existing STATUS USER PASS protected. Evidence CHECKPOINTS/CHANGES/2026-10-22-ftext-connector.md; no new feature PASS/manual closure.

22/10/2026 - FTEXT-CASH-EXECUTION-01 / ACTIVATION BLOCKED BY CANONICAL RECOVERY REVIEW / OWNER RETAINED

Retained ftext owner codex/rizareio-ftext-bridge-20261022 / feat/ftext-cash-execution-20261022 / PR3067. Cash execution engineering and synthetic Windows/native PostgreSQL paths are implemented; exactb8803339 source CI39842862200/job120049288637 passed4109server+8backup/0FAIL/0SKIP plus Windows39842862258. Main integration8cd1eedada preserves other owners and only reconciles the shared active-list placement. Final pre-activation review found a concrete unfulfilled contract: canonical ops/backup/lifecycle/manifest.json does NOT contain FtextCashRequest, and validateDatabase rejects any unreviewed relation. Merely adding STORE_TABLES/pending guards does not approve the canonical backup/reset graph. Creating this table would block that existing inspection/maintenance path, so runtime activation must remain OFF.

Added an enforceable pre-DDL gate in the owned cash-schema installer, checking the canonical relation, exact typed columns, DIRECT/REMOVE policy and reviewed soft-reference/JSON fields. A missing review returns FTEXT_CASH_RECOVERY_REVIEW_REQUIRED before ANY DDL; admin cash controls remain unavailable. Exported ftextCashLifecycleReviewProposal is a review proposal/explicit isolated TEST projection ONLY, never written into or loaded instead of the canonical manifest. Native tests explicitly inject that isolated projection, verify actual PostgreSQL column metadata, then exercise queue/finalization; they are NOT canonical full-schema recovery approval. Canonical files, executor loader and retained lifecycle/backup owner feat/store-shifts-inventory-clear-20261018 remain untouched.

Concrete next dependency for that retained lifecycle/backup scope: review FtextCashRequest ownership and CloudDevice/Sale/CashShiftSession/history/embedded checkout-plan-result references, classify reset/retention and restored/stale claims, verify exact full-schema copy/restore/control/pending blockers, and publish the reviewed canonical graph/column approval under its own claim. Only after its real contract is approved can this retained ftext owner enable cash, download a newly bound package, pair/STATUS the final Windows user and record one user-controlled cash sale with fresh before/after values. No physical sale, schema/config mutation, new pairing or catalogue import here. Existing communication USER PASS/manual protected. No cash ZIP delivered as operational and no full connector PASS. Card mapping remains deferred. Whole connector OPEN/ASSIGNED; owner does not disappear at this checkpoint.

New gate local16PASS/0FAIL; native gate/typed projection and final full CI pending exact head. Actual store19:33UTC remained0Sale/0StoreTransaction/0StockMovement, one open shift and unchanged legacy configuration; connector offline since18:38UTC. These are read-only preflight values, not a future test baseline. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ftext-connector.md. Single next action publish guarded source green/main and this dependency/handoff record; no production activation until canonical review.

22/10/2026 — FTEXT-CASH-EXECUTION-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained ftext owner codex/rizareio-ftext-bridge-20261022; continuation feat/ftext-cash-execution-20261022. User explicitly START after requesting one cash test; this authorizes engineering, not unattended fiscal issuance. Card mapping postponed until tomorrow. Prior sale-plan PR3060 exactfa2f84ad0a51d45b2a1de0ec0607654fc82b5360 fullCI39832093511 all5checksSUCCESS,3998server+8backup/0FAIL/0SKIP, merged8da92e55f8905f61cfb58293c7c049b9ed0a4584. Pure-plan source has no device execution; do not call it installed checkout. Earlier actual selected-PC communication USER PASS and all RBS/customer catalogue flows remain protected.

Assigned next cash-only engineering scope: isolated new server services ftext-cash-requests.js, ftext-cash-finalize.js, ftext-cash-schema.js, related unit/real PostgreSQL/HTTP/mounted tests; existing ftext-v1.js, ftext-installation.js/package service, FtextInstallationSetup.jsx and Windows Cloud-Connector.ps1/Cloud-Tools.psm1/package files; new Windows Cash.psm1 and Test-Cash-Smoke.ps1 plus own ftext Windows workflow. Bounded additive branch in store-pos.js and new client useFtextCashCheckout hook with bounded StorePosPanel import/integration ONLY; no presentation/V2 redesign or RBS behavior change. New dedicated FtextCashRequest table must be explicitly classified in existing lifecycle policy and receive pending-work blockers in lifecycle preview/executor before runtime/bootstrap can use it; additive ftext table entries/guards only, preserving the other owner's manifest/executor behavior. No table overloading or financial queue in CloudDevice metadata. No production SQL/DDL/migration from Work; isolated native tests and normal checked application bootstrap only.

Durable company/store/POS/config-hash/generation and checkout-key uniqueness, one pending request per physical register, same-body replay and changed-body refusal. Commit dispatch intent before device delivery; no lease expiry or polling retry may authorize second physical send. Windows folder mutex and durable per-request intent before atomic unique txt publication; restart/uncertain result reads original request only. Exact RESULT_FILENAME/serial/final-document response binding; STATUS alone never confirms a receipt. Nonzero/partial/timeout/disconnect remains REQUIRES_CHECK with no automatic resend, VOID or cash sale commit. Preserve raw result hash and durable local/server evidence; no successful or unresolved identity eviction. Finalize the original checkout once in a single database transaction only after verified final receipt, binding original open shift and current lifecycle; existing stock/audit/transaction behavior and no NON_FISCAL fallback. Start with explicitly supported simple in-store CASH and confirmed profiles; unsupported customer/credit/mixed/online/table/discount modes fail visibly until separately accepted. No card/IRIS emission or guessed code2. Default runtime execution OFF, scoped technical enablement after exact ordinary release and required isolated acceptance; selected user performs final real cash action after fresh before-values and concrete consultation. No receipt/card action by agent during engineering.

Required source acceptance: real PostgreSQL concurrent key/register claim and finalizer rollback/idempotent replay; actual HTTP purpose/tenant/generation/licence checks; synthetic Windows5.1 one-shot/late-result/restart/foreign-result/pending-folder cases; mounted POS pending/recovery/no-resubmit and protected RBS regressions; full exact CI/main/ordinary revision before selected-PC new package. Physical cash checkout remains NOT TESTED. Single next action: publish this claim green/main, then build the bounded cash path; whole FTEXT-CONNECTOR-01 OPEN, owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ftext-connector.md. Other lifecycle/report/native/POS-V2 owners retained, no accepted transaction repeated.

22/10/2026 21:08 Europe/Athens — FTEXT-CONNECTOR-01 / CLOUD COMMUNICATION USER PASS / CHECKOUT ASSIGNED

Retained owner codex/rizareio-ftext-bridge-20261022; continuation feat/ftext-checkout-20261022. Source PR3035 final8a44c85b121fe72b86d5cef638224a47dfcd1ddb merged65b773bfe4b81942a0bde5a02486451175865960. Full PR39813946997 SUCCESS3874server/0FAIL/0SKIP+8backup and Windows39813946867 SUCCESS; exact source-main39819571021 SUCCESS3890server/0FAIL/0SKIP+8backup. Combined ordinary release5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774 observed healthy before configuration, exact fullCI39821105794/3916server+8backup. CI is engineering evidence, separate from user acceptance below.

Normal selected Riz UI technical activation and single POS–fiscal–STORE EFTPOS mapping saved, followed by selected ftext serial/folder configuration. Existing commercial trial preserved. Private selected-POS package downloaded from hosted UI; all six embedded Windows source files byte-identical to reviewed source. Package contains no credentials, no pairing code, no auto-start or fiscal-sale execution. Legacy activation reason incorrectly mentions KAT/Observer; actual company/module selection and readback were Riz/CONNECTOR_FTEXT. No KAT state changed. Existing EFTPOS IMMEDIATE is application metadata only, not physical payment mode acceptance.

Owner supplied final-PC screenshots: image(20261022-175945).png package menu; -180459 successful Paired; -180616 STATUS delivered; -180718 repeated connected heartbeats; -180830 normal admin Connector Connected and last register check Successful/code0 at22/10/2026 21:05:59Athens. This is LIMITED USER PASS of selected Windows-user pairing, actual STATUS upload and heartbeat/visible communication for RIZAREIO-POS-01/DSM24014923. Pairing codes and private screenshots are not committed. Diagnostic operation reports no receipt/card payment; independent financial/stock/counter deltas NOT TESTED. Do not repeat accepted STATUS/pairing for evidence. Earlier18:29 physical STATUS remains protected. Windows-login startup, restart persistence, another PC/model and fiscal checkout remain NOT TESTED.

Explicit user START after communication success authorizes continued engineering. Whole FTEXT-CONNECTOR-01 remains OPEN/ASSIGNED. Next bounded source before checkout wiring: new pure server/src/services/ftext-sale-plan.js and server/test/ftext-sale-plan.test.js only, producing a non-executable validated sale plan from explicit server-owned scope, confirmed department mapping and exact reconciled amounts. No filesystem/device/network/DB writes, PAY emitter, queue, finalizer, source POS/RBS or schema changes in this first causal slice. Reject missing/foreign scope, unconfirmed mappings, delimiter/control injection, unmappable Windows1253 text, invalid quantities/prices, unexplained totals/discounts and unknown payment codes rather than guessing. Preserve tobacco/cards0% as distinct001/003 mappings; goods13%004,24%005,services007 per owner-confirmed installation. Generic code must accept explicit per-installation mappings, never hardcode this customer. Fiscal execution stays disabled. Following safe-plan CI, claim exact durable queue/Windows one-shot transport/finalizer paths before source; no fiscal receipt or card charge without consultation.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ftext-connector.md; verified manual docs/manual/ftext/PASS.md. Other owners and RBS/physical accepted transactions remain unchanged.

AI-OWNER-WALLET-01 — SCOPED LIVE PASS: PILOT SHARED-OWNER EMAIL ENABLED / INVOICE PRICING OPEN

25Oct2026 same retained owner feat/ai-owner-wallet-20261022. Direct-owner LAB emailON/OFF receipt3150/head6271e2a4afc629866f66bb87c3db9f2503255b92/docsCI40224579964SUCCESS mergeddbc057941a0cc3bd8af2075923bbf49f7e5978ab BEFORE pilot action. Actual Azure resource region/SKU/commitment/rate still unavailable after prior-project context lookup; no guessed invoice tariff or model/context change. Actual SMTP/inbox delivery, hosted low/empty thresholds and actual OWNER-session detailed UI remainNOT TESTED. Public synthetic evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/email-config-lab-20261025.json; manual updated. All prior metered LAB and funded pilot acceptance protected, no repeated accepted action. Whole walletOPEN, same owner retained, other assignments untouched.

Single next action after this receiptgreen/main: fresh private before/after, choose ONLY the already authorized pilot shared OWNER and save emailEnabled:true once preserving chargingON/funds/history; no new credit or fabricated mail event. Existing before-action claim and user's explicit activation instruction authorize this bounded continuation. Then publish its scoped LIVE configuration result with manual/common registers/PDF; delivered-email acceptance stays separate.

AI-OWNER-WALLET-01 — SHARED OWNER EMAIL SOURCE / AWAITING NATIVE CI AND LAB

25Oct2026 retained owner feat/ai-owner-wallet-20261022. Before-source claimPR3148/head2082209a2f98caf944bfd038b2bd19158cf769f1, docsCI40221837934SUCCESS, mergedaf61fe54881990b316e95a1c797805b3afa1e366. Bounded source now uses direct-or-OwnerCompanyAccess eligibility in authenticated Admin listing, configuration, notice snapshot creation and fresh pre-SMTP validation. Existing OWNER/password/active-company checks, exact original recipient, revoked notices and durable single attempt remain. No user/role grants or existing notice retarget/requeue. Added native SQL/HTTP synthetic shared-owner, foreign rejection and access revocation tests; safe allowlisted SMTP/invoice configuration metadata in existing Admin only. Local15targeted testsPASS/0skip including actual isolated localhost Nodemailer; this is engineering evidence, not hosted/shared-owner/email-delivery PASS. Native PostgreSQL/full CI/build/release and hosted acceptance pending. Existing pilot funds/charging and LAB settled call remain untouched. Invoice/email gates have NOT been opened; Azure account price prerequisite remains. Single next action green native/full source checks, then normal guarded release and inspect actual metadata before scoped activation. Whole item OPEN; all other owners retained.

AI-OWNER-WALLET-01 — SHARED OWNER EMAIL AND INVOICE ACTIVATION / ASSIGNED BEFORE SOURCE

25Oct2026 retained owner feat/ai-owner-wallet-20261022. User explicitly requests opening invoice billing and email. Existing pilot activation and single paid LAB question remain protected; no replay, new funding or model/limit change. Read current main8ddb86e5 (only other-owner release documentation since activation receipt9b4f34b), activation checkpoint and wallet manual. Current invoice/email gatesOFF; shared-owner email and invoice billing NOT TESTED. Read-only ownership inspection found the authorized pilot owner has OwnerCompanyAccess rather than direct User.companyId membership; current wallet list/configure/enqueue/dispatch incorrectly require direct membership.

Bounded next source: consistently recognize existing OWNER direct-or-OwnerCompanyAccess membership at all four email boundaries, retaining fresh role/password/company/recipient-snapshot checks and terminal at-most-once delivery. Add native SQL/HTTP tests for shared membership, revocation and foreign isolation. Add secret-free invoice/SMTP readiness metadata only if needed to inspect effective runtime prerequisites. Do not alter invoice extraction, fiscal/payment/stock, roles, recovery, existing tariff or funds. Exact invoice provider tariffs and SMTP readiness must be established before corresponding activation. No guessed Azure account rate. Before any scoped hosted action record fresh wallet/ledger/notices/audit/business controls; publish real PASS with manual and all common registries. Whole item remains OPEN and all other owners retained.

AI-OWNER-WALLET-01 — SCOPED LIVE PASS: PILOT OWNER AI MODULE AND CUSTOMER USAGE CHARGING ENABLED

25Oct2026 retained owner feat/ai-owner-wallet-20261022. Prerequisite real metered LAB flow published PR3144/192967570c6ceb4b1976fb95bfcc3175b560f422, docsCI40204698736SUCCESS, merged1b459f548a2fe84ff75ac378b93fa61f92b5b1fa BEFORE target changes. Preserve its one actual provider call/4152microEUR settled debit and LAB restoredOFF; no replay. Current deployed unrelated online-polling releaseeba062f7d32e6bb51e112d25ae254067d698ef9a/full MAIN CI40203753323SUCCESS/Render dep-dbf1gv4s728c73dpljo0 live14:57:36.570005UTC, independenthealthHTTP200/ok/exacteba. All wallet/readiness/provider/repository/assistant-limit production blobs match the tested30fe release. Other owner's online scope remains retained; no new provider call to repair a revision label.

Separately measured private target native administration: fresh before module15:05:23.142454UTC, existing Owner AI entitlementOFF and existing monthly/setup prices0. Native “Συνδρομές & Modules” target selection, only AI_OWNER_ASSISTANT clicked and subscription saved once at15:05:42UTC. Among existing entitlement semantic fields only AI_OWNER_ASSISTANT false→true; license active/plan/start-end dates/autoRenew/commercial notes, all existing module prices/dates/notes/other effective flags, managed terms, foreign AI flags and ALL wallet values retained. Native bulk save additionally stamps existing updatedAt and materializes two missing catalogue defaults CONNECTOR_FTEXT and WHOLESALE_B2B as inactive/null-window/null-notes with monthly0/setup0EUR terms. These are explicitly recorded incidental metadata, not connector/wholesale activation, new fee or fiscal behavior. Initial strict whole-record/physical-count check did not match due timestamps and these new rows; raw evidence retained, then exact semantic/access/fee reconciliation passed. Do not falsely claim unchanged physical module/terms rowcounts.

Fresh private wallet before15:10:14.233180UTC, then ONE native approved enabled:true save. Exact after confirms intended enabledflag/version+1 and one CONFIGURED audit only; no balance/reserved/entry/notice change, no extra credit, paid receipt, refund, target provider request or SMTP. Unaffected LAB wallet and business controls retained. Read-only reload15:12:19.939216UTC preserved same wallet/entry identities and active module; native selected-company checkbox remains checked, tariff ready, email unchecked. Real customer amounts/identifiers/reference/audit IDs remain in private evidence only. Private durable ai-wallet-pilot-activation-20261025.json SHA256 caaad6b68abf4b0a8287734e3cceb835f2c753dc81ec61a9c0920d286b853da9 includes before/after/reload, initial raw-check mismatch, exact reconciliation and unchanged controls.

Scoped LIVE PASS is existing Owner entitlement plus prepaid usage configuration, after independently proven real LAB metering/settlement. Applied modelgpt-5-mini; approved50percent markup in fixed dated EUR tariff, immutable rate version and actual independent charge evidence as above. Global wallet administrationON; private target customer chargingON; synthetic LAB customer chargingOFF; global invoice/email gatesOFF. Agreement toggle remains available and preserves balance/history. No actual target OWNER-session question/report/dashboard acceptance was performed, and support preview is not relabelled as OWNER role proof. No provider key/secret, role/user/session privilege, plan/recurring fee, POS/stock/fiscal or recovery/lifecycle change. Existing accepted business transactions retained.

Immediate target activation is complete; remove it from pending. Same owner retains remaining invoice/Azure provider-price verification/billing, actual OWNER-session detailed report UI acceptance, hosted low/empty threshold behavior and email delivery. No whole-wallet closure. Checkpoint/common registers/manual/ops/pending and regenerated current merged PDF synchronized. Single next action for wider billing: verify actual Azure SKU/region/rate before invoice charging; do not guess price, repeat funding, lower models/context or claim email delivered. All other assignments retained.

AI-OWNER-WALLET-01 — SCOPED LAB PASS: REAL OWNER USAGE, EXACT DEBIT AND AGREEMENT OFF / TARGET ENABLE PENDING

25Oct2026 retained owner feat/ai-owner-wallet-20261022. Exact installed30fe4c1088b83a67a8d59760b4387de3374c3046 full MAIN CI40202120937 SUCCESS:4194server+8backup/0fail/0skip. Prior actual guarded source14d release40201415015 and API pricing deployment dep-dbf11g0ae00c73edhbk0 remain separate evidence. Normal guard40203174287/job121198522968 full-CI/freshness verificationSUCCESS, actual Trigger/WaitSKIPPED because30fe was already healthy; this did not install prices. Real installation/readback/health evidence is above. Before-action source/price claims3138/3140 and runtime receipt3141 green/main before LAB. Other owner online-polling source3127/eba062f merged after the tested release; preserved intact. Wallet/readiness/assistant-limit blobs unchanged; do not replay this accepted provider call merely for a later unrelated revision.

ONE scoped LAB acceptance flow through native authenticated Super Admin and normal existing Owner-assistant support preview, not actual OWNER-session UI. Companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru, terminal/shift/SKU/quantity/cash-card-IRIS paymentN/A. Fresh14:41:05.918915UTC beforeenable balance5000000/reserve0/version1/OFF/emailOFF; global wallet/entry/notice/audit2/2/2/2; LAB Sale90/StoreTransaction134/StockMovement95. ONE enabled:true save added only CONFIGURED audit/version2, money/entries/notices and private foreign wallet unchanged. Fresh beforequestion14:45:51.239242UTC unchanged at version2. ONE read-only question asking available capabilities submitted through native Owner endpoint in scoped support mode. Actual OpenAI response completed14:46:47.054642715UTC, modelgpt-5-mini-2025-08-07, input4032/cached0/output1045(total5077; reasoning128 included within output, not double billed), toolCalls0. ONE USAGE/OWNER_ASSISTANT SETTLED entry a467fc58-b598-4738-a113-f792f0b9b101, reserve477085, charge4152microEUR. Independent integer calculation ceil((4032*335031+1045*2680247)/1000000)=4152; exact balance4995848/reserve0/version4. Immutable tariff version25813fe2eb6dd2b4f87701684218ad27628d4cfc6c27ac0be8f91ff218a7da63 matches approved50percent fixed EUR price schedule. Provider log agrees on tokens/model/completed response; no second question or blind retry.

Fresh beforedisable14:48:45.718323UTC preserved that same settled identity/balance. ONE native enabled:false save observed14:49:42.731575UTC: version5/OFF/emailOFF, same4995848balance/zeroreserve/settled entry, exactly one additional CONFIGURED audit. Final global wallet/entry/notice/audit2/3/2/4. Foreign/private wallet unchanged through all phases, LAB business controls90/134/95 unchanged. No new credit/refund, paid receipt, invoice, business/stock/fiscal mutation or SMTP by this owner. Actual support access/exit are ordinary scoped authenticated navigation, not claimed as new permissions or Owner-session report acceptance.

Evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/metered-lab-20261025.json and metered-lab-result-20261025.jpg; verified usage docs/manual/ai-owner-wallet/PASS.md. Scoped metering/settlement/enable-disable flow is complete; privacy-safe evidence excludes real customer finances. Pricing and real LAB billing are no longer pending. Remaining target preparation: after this PASS merges green, separately fresh private-record company module/licensing/prices and wallet controls, enable ONLY existing zero-price AI_OWNER_ASSISTANT module without changing any plan, dates, other modules/prices/roles; then ONE target wallet enabled:true with no extra credit/provider request. Existing before-action claim3141 retains this exact scope. Broader invoice/Azure billing, actual OWNER-session detailed-report UI, threshold low/empty and delivered email remainNOT TESTED/OPEN; do not infer them from this test. Other owners and protected accepted transactions retained; checkpoint/common registers/manual/pending/PDF synchronized. No whole-wallet closure.

AI-OWNER-WALLET-01 — TARIFF SAVED AND OBSERVED ACTIVE / EXACT-REVISION VERIFICATION PENDING

25Oct2026 same retained owner. Source14d31b8 normal exact MAIN fullCI40200620906 SUCCESS:4194server+8backup/0fail/0skip; guarded release40201415015/job121193233486 actual Verify/Trigger/WaitSUCCESS; Render dep-dbf0ungn74is73b5plu0 live14:21:01.867521UTC, independenthealthHTTP200/ok/exact14d. Native authenticated Admin then reported actual requested modelgpt-5-mini, providerConfiguredtrue, tariff unavailable and activation checkbox disabled. This is observed readiness metadata, not a provider-call acceptance.

Conditional before-action claim3140/0b3cf2a/docsCI40200999753 SUCCESS merged30fe4c1088b83a67a8d59760b4387de3374c3046 BEFORE tariff change. Fresh14:22:19.834524UTC all four wallet counts2 each, enabledcompanies0/pendingholds0. Scoped Render merge replace:false saved ONLY AI_OWNER_WALLET_TARIFFS with the exact candidate in the preceding before-action record. This time the environment tool itself RETURNED deployment ID dep-dbf11g0ae00c73edhbk0; history confirms API-triggered source30fe4c1/live14:24:34.819950UTC. Thus its provenance is established for THIS call; no direct trigger_deploy was called by this owner. Do not retroactively invent actor provenance for the earlier unrelated historical API observation. The installed30fe differs from fully checked/guarded14d only by recorded documentation; all owned production source blobs are identical.

IndependenthealthHTTP200/ok/exact30fe; native selected MYWORKSTATION LAB readback shows modelgpt-5-mini, tariff available, max hold477085microEUR, available5000000/reserve0, companychargingOFF/emailOFF. Snapshot CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/pricing-ready-20261025.jpg contains synthetic LAB readiness only, no personal/customer details. Fresh14:26:04.331126UTC wallet/entry/notice/audit2 each, enabledcompanies0/pendingholds0: no funding/configuration/debit by this owner. Invoice/email gates remainOFF; no provider/business/fiscal action.

Explicit full MAIN CI40202120937 on EXACT installed30fe is running. Before any metered LAB action require its actual build-and-test/full success and normal guard freshness verification for30fe. Honor the guard if it avoids redeploying an already healthy identical revision: an idempotent SKIP is NOT counted as installing configuration or as metered-use PASS; actual installation is the returned API deployment plus health/native readback above, preceded by the real guarded source installation. Do not manufacture a source change, weaken the same-SHA guard or blindly repeat deployments merely to force another Trigger/Wait. Record actual step conclusions separately. Real provider billing acceptance remainsNOT TESTED until measured LAB usage agrees with the immutable tariff/ledger.

Additional target prerequisite identified read-only14:18:03.515228UTC: private pilot license active, CASH_CONTROL/INVENTORY active, AI_OWNER_ASSISTANT company module false, no store override. After centrally published LAB usage/enable/disable PASS, bounded native target preparation additionally enables ONLY that existing company AI_OWNER_ASSISTANT module, preserving every other module, plan, subscription dates, monthly prices and roles/users. No additional license fee/payment is authorized or created. Existing OWNER-only report boundaries remain unchanged; no employee permission or credential expansion. Refresh/private-record exact module state before and after this ONE action, then separately refresh/private-record the approved wallet enabled:true operation with unaffected LAB wallet control. If native UI implies any extra price/contract change, do not silently accept it. Customer pricing activation and email delivery remain separate from module access. No additional trial grant/replay. Same owner and all other owners retained; whole wallet stillOPEN for invoice/Azure pricing, actual Owner-session reports and delivered emails. Checkpoint/common registers/PDF synchronized. Next exact installed-revision full CI and normal guard verification, then fresh scoped LAB operation baselines.

AI-OWNER-WALLET-01 — SOURCE CI VERIFIED / CONDITIONAL PRICING AND MEASURED ACTIVATION BEFORE-ACTION RECORD

25Oct2026 same retained owner. Source3139/ad274dc96d076752f03d4c4e82f346013651a140 fullCI40199905695 SUCCESS:4194server+8backup/0fail/0skip; dedicated native40199905680/job121188678784:7PASS/0FAIL/0SKIP including real HTTP activation guard and exact SQL refusal controls. Merged14d31b8ff198173cf44c419d3761d8ec4e05073a; exact MAIN fullCI40200620906 and normal guarded release pending. Local updated mounted/unit3PASS/0skip and frontend buildPASS. No hosted readiness/usage PASS yet; customer chargingOFF. Existing credits must not be repeated.

Before-action conditional configuration: after normal exact-source release read actual runtime readiness in native Platform Admin. ONLY if requested model is exactly gpt-5-mini and provider configuration exists, set ONLY AI_OWNER_WALLET_TARIFFS via service srv-d9isenfavr4c73bdh52g/workspace tea-d9ie26vaqgkc739uudqg merge replace:false. Candidate exact JSON row: modelgpt-5-mini; responseModels[gpt-5-mini,gpt-5-mini-2025-08-07]; inputMicrosPerMillion335031; cachedInputMicrosPerMillion33504; outputMicrosPerMillion2680247; contextTokens400000; maxOutputTokens128000. Derived with integer upward rounding from official standard USD0.25/0.025/2 per1M, times1.5 approved markup, divided by dated ECB23Oct2026 EUR1=USD1.1193. Result is a fixed versioned EUR schedule with dated conversion assumptions, not live FX or an account-specific provider invoice assertion. Sources https://developers.openai.com/api/docs/models/gpt-5-mini and https://www.ecb.europa.eu/stats/policy_and_exchange_rates/euro_reference_exchange_rates/html/eurofxref-graph-usd.en.html . Conservative per-call hold477085microEUR. No model/prompt/response-limit reduction. If actual model differs, DO NOT apply this candidate; verify that exact model first. No guessed Azure tariff; invoice/email gates remainOFF, global wallet adminON; every unrelated environment key preserved. Saved config must be observed active after applicable deployment, not inferred from a saved response. Preserve normal exact full-CI freshness/guarded deployment; do not directly trigger Render or weaken same-SHA guard. Record any automatic/API-triggered config deployment honestly and use ordinary guarded acceptance before metered LAB.

Measured pre-action baseline14:08:19.339092UTC: existing LABcompanycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru, balance5000000/reserve0/version1/enabledfalse/emailfalse; global entries2/notices2/audits2, no pending holds; LAB Sale90/StoreTransaction134/StockMovement95. Foreign/private wallet remains separately controlled without public financial data. Immediately before EACH config/usage action refresh and record relevant values; no stale/after-only inferred delta. Native authorized Super Admin; wallet configuration has no affected physical POS terminal/shift/SKU/quantity/cash-card-IRIS payment (N/A), no sale or fiscal transaction. Once verified tariffs are active, ONE LAB enabled:true save should add exactly one CONFIGURED audit/version+1 and no money/ledger/notice change. One identified native Owner-assistant read-only question in scoped LAB support mode tests real provider usage; record each actual ledger reservation/settlement/token/model/tariff/charge, exact recomputed debit and no residual RESERVED/REVIEW. Number of provider calls follows existing tool/recovery flow; never equate one question with one provider call. Then ONE LAB enabled:false save restores companyOFF, preserving funded balance/history and any already-settled entries. Global invoice/email and all other companies remain unchanged. Existing accepted business transactions are never repeated; live business-counter activity is observational, never attributed to a wallet operation without isolated proof.

Only after measured LAB usage/enable/disable acceptance is centrally published green/main, refresh and privately record the real pilot wallet and unaffected LAB control, then ONE approved target enabled:true configuration with no extra credit or provider call. Preserve ability to disable by agreement. Owner-session detailed report acceptance and delivered email remain separate if not actually tested; no claim from support preview. Immediate scoped PASS updates manual/checkpoint/common registers/pending/PDF; overall wallet remainsOPEN for invoice pricing and other untested scope. Claim must merge green/main before any configuration/usage action. Next actual source deployment and safe runtime metadata readback. Current owner retained.

AI-OWNER-WALLET-01 — READINESS GUARD SOURCE / AWAITING FULL CI AND HOSTED ACCEPTANCE

25Oct2026 same retained owner. Claim3138/bc039b8/docsCI40199418800 SUCCESS mergedfb8f4fe2ac28f3ebcc59651b7fb8fdfca619093d before source. Bounded implementation: existing authenticated Platform Admin wallet GET returns only explicit owner model/provider-present boolean/validated tariff and conservative hold metadata; never an environment collection or key. Existing PUT enabled:true rejects missing provider, absent/invalid/ambiguous exact tariff or tariff output below existing4096/6144 normal/recovery allowance before repository configuration. PUT enabled:false remains available with unavailable prices/provider. Existing owner GET/reporting and other routes unchanged. Native Admin explains readiness/hold and blocks a new activation when unready while retaining disable/funding behavior. No schema, source-model/prompt/output change, company activation, provider call, funding/replay, SMTP or business/fiscal write.

Targeted15local tests passed without skips before final mounted-readiness assertion; updated targeted tests/frontend build recorded separately in CI. New unit cases cover exact runtime model, no secret exposure, hold boundary and invalid/unpriced/ambiguous/too-small tariff; native SQL/HTTP test adds denied role, missing provider/tariff refusal with exact unchanged wallet/audit and valid enable, plus price-independent disable. All previous assertions and lifecycle/recovery behavior retained. Native database execution is required in normal full CI/dedicated recovery workflow; local environment lacks native PostgreSQL and no local native PASS is claimed. Source status AWAITING full exact CI, normal guarded release and measured hosted acceptance. No functional/manual closure.

Official candidate price verification25Oct only, not runtime or account-price acceptance: https://developers.openai.com/api/docs/models/gpt-5-mini lists400000context/128000output and standard USD0.25input/0.025cached/2output per1M; alias and snapshotgpt-5-mini-2025-08-07. ECB23Oct2026 EUR1=USD1.1193 at https://www.ecb.europa.eu/stats/policy_and_exchange_rates/euro_reference_exchange_rates/html/eurofxref-graph-usd.en.html . A candidate approved50percent EUR schedule must use these dated conversion assumptions explicitly, integer microEUR and versioned tariff; no silent daily/account-cost assertion. Runtime actual model still needs authenticated readback after deployment. No guessed Azure price or invoice gate activation. Customer charging and invoice/email gates remainOFF; two accepted internal credits protected. Next full green exact source/main CI, normal release, runtime readiness readback, then bounded verified tariff and measured LAB usage before target activation. Other owners unchanged; checkpoint/common registers/PDF synchronized.

AI-OWNER-WALLET-01 — ASSIGNED ACTIVATION READINESS / BEFORE SOURCE AND CONFIGURATION

25Oct2026 retained owner feat/ai-owner-wallet-20261022. User requests repair and activation after separate internal trials passed. Existing green/main receipt3137/370ef4d protects both credits: no additional funding/replay. Latest deployed guarded source6fdadef/fullCI40195316878/deploy40197399927 remains accepted for internal trial administration only; all customer chargingOFF, global invoice/emailOFF.

Bounded next source: expose authenticated Platform Admin owner-assistant pricing readiness from actual runtime model and validated exact tariff, and reject company enabled:true before configuration mutation when its Owner tariff is missing/invalid. No provider call, key/secret exposure, default model/prompt/context change, schema or unrelated routes. Preserve disabled/off behavior, ability to disable with missing tariffs, paid/trial funding semantics, tenant/role controls and all accepted recovery/lifecycle/POS behavior. Add meaningful native HTTP missing/invalid/valid-tariff activation coverage, plus existing regression checks. Readiness is metadata only, NOT proof provider prices or usage acceptance. Full exact main CI and ordinary guarded release required before hosted acceptance.

Then verify actual configured model and current official provider price/limits and explicit EUR conversion; apply approved50percent markup only to a verified tariff. No guessed Azure SKU/rate, no invoice gate activation until its provider contract verified. Runtime env changes merge individual approved keys only, preserving secrets and every other setting. Before any LAB/customer configuration or metered request refresh relevant wallet version/balance/ledger/notices/audit and unaffected wallet controls; record private finance privately. No repeated trial/business/fiscal transaction. One measured LAB activation/usage/disable acceptance before target charging, with fresh before/after and immutable tariff evidence; if true provider acceptance cannot be completed, leave customer chargingOFF and name the concrete missing prerequisite. Actual emails remainOFF unless separately verified.

Current implementation/usage charging and pricing remain NOT TESTED; owner retained. Claim must merge green/main before source/config changes. Checkpoint CHECKPOINTS/CHANGES/2026-10-25-ai-wallet-activation.md. Single next action bounded readiness guard, then official exact tariff verification and measured acceptance. Common registries/PDF synchronized, no functional manual claim from source CI.

AI-OWNER-WALLET-01 — SCOPED LIVE INTERNAL TRIAL PASS / PRICING AND CUSTOMER CHARGING STILL OPEN

25Oct2026 same retained owner feat/ai-owner-wallet-20261022. Hosted LAB internal trial PASS published greenCI40198156104 and merged PR3136/2e9a3d2c348f6c4a983f32b3f528519b80fcdf39 before the separately approved private pilot operation. Runtime remains guarded release6fdadef6f1ff04b8c71e516fc7144a417920905c/fullCI40195316878/deploy40197399927,4192server+8backup/0fail/0skip, actualTrigger/WaitSUCCESS. No source or deployment guard changed.

Scoped LIVE PASS for internal noncash trial administration only: separately measured private beforebaseline persisted BEFORE action, then one native Super Admin submission at15:36:19Europe/Athens, one intended internal trial entry/one notice/one audit, exact approved balance/reserve/version and disabled company charging/email verified independently. Read-only reload13:38:06.917195UTC preserved the same entry and company flags; global wallet/entry/notice/audit counts2 each, unaffected synthetic LAB wallet5000000/reserve0/version1/enabledfalse/emailfalse. No duplicate submission, no receiptConfirmed, no payment/provider/SMTP/business/fiscal write by this owner. Private store was actively trading: its StoreTransaction count changed by1 between before/after while Sale/StockMovement counts did not; no isolated business delta PASS or causal attribution is asserted. Private company identity, amount, grant reference, exact wallet IDs and business counters are intentionally excluded from public repository evidence.

Private durable before/after/reload evidence ai-wallet-pilot-trial-20261025.json SHA256 cbd8f372173b3460b6bcd146d6f1f323f29fa10bb13a637fc2dd4e01be9e060e; before-action saved version and final version retain identity. Public synthetic evidence and verified instructions remain CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/hosted-lab-trial-20261025.json and docs/manual/ai-owner-wallet/PASS.md. Runtime wallet administrationON, customer chargingOFF, invoice/email gatesOFF. Credits do not activate charging. No full wallet closure.

Remaining ASSIGNED to same owner: actual provider SKU/region/tariff verification, approved50percent markup application, actual usage debit/reservation/low-empty acceptance, detailed Owner reports, invoice charging and notice email delivery. Do not invent prices, lower model/context silently or infer every model fits a small trial. Single next action: verify actual provider price configuration before any customer charging activation. Existing all-owner PASS protected, no lifecycle RESET/enrollment. Checkpoint/common registers/manual/pending/PDF synchronized; historical NOT APPLIED entries below are superseded for internal trial administration only.

AI-OWNER-WALLET-01 — SCOPED HOSTED LAB PASS: INTERNAL TRIAL GRANT / CUSTOMER BILLING OPEN

25Oct2026 same retained owner feat/ai-owner-wallet-20261022. Full MAIN CI40195316878/exact6fdadef6f1ff04b8c71e516fc7144a417920905c:4192server+8backup,0fail/0skip. Guarded deploy40197399927 Verify/Trigger/Wait allSUCCESS; Render dep-dbf069ss728c73dljvfg live13:26:33.105370UTC; independenthealth ok/exact6fd. Wallet administration ON; invoice/email gates OFF. Before-action claim3133 and baseline3135/f49b53e greenCI40197515276 merged02401d78c13b005e49449b52633ff8e4f30efde7 BEFORE the grant. Prior API deploy remains a separate historical observation.

LAB PASS limited to ONE native Super Admin internal noncash TRIAL_GRANT in existing MYWORKSTATION LAB/companycmtpopbgk000prhb5qc60zxus, active storecmtpopbgo000trhb5ng9ytiru. No affected POS terminal/shift/SKU/quantity/payment: N/A. Fresh13:27:59.034923UTC beforebaseline matched published values: four wallet tables0; Sale90/StoreTransaction134/StockMovement95. One submission13:28:18.199119UTC, reference TRIAL/WALLET-LAB-TRIAL-20261025-01, reason Εσωτερική δοκιμή υπηρεσίας υπολοίπου AI,5000000microEUR. No other-company wallet before/after; controls90/134/95 unchanged. Reload13:29:52.230361UTC retained same entry/balance and all four counts1; native UI5EUR/reserve0/companyOFF/emailOFF. No second submission/replay.

Evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/hosted-lab-trial-20261025.json and lab-trial-20261025.jpg; usage docs/manual/ai-owner-wallet/PASS.md. Hosted internal trial administration only is complete. No paid receipt/provider/SMTP/invoice/sale/stock/fiscal/lifecycle mutation. Real financial/per-SKU acceptance NOT TESTED. Pricing/50percent application, actual Owner/invoice charging, detailed owner reports and delivered email remain OPEN;5EUR does not prove every model reservation fits. Private target trial NOT APPLIED yet; next separately fresh private before/after/control then ONE approved internal trial, customer chargingOFF. Private customer financial data excluded from public evidence. Other owners/protected PASS retained; common checkpoint/registers/manual/PDF synchronized.

AI-OWNER-WALLET-01 — RUNTIME CONFIG SAVED / API DEPLOY OBSERVED / GUARDED ACCEPTANCE PENDING

25Oct2026 same wallet owner. Before-action claim3133/be7298f/full applicable docsCI40194607912 SUCCESS mergedc26d168ec4f5ebdcc570221bfcaeb60364eda354 BEFORE configuration. Fresh12:49:26.232370UTC all four wallet rowcounts0. Scoped Render environment merge replace:false accepted: ONLY AI_OWNER_WALLET_ENABLED=true, AI_OWNER_WALLET_INVOICES_ENABLED=false, AI_OWNER_WALLET_EMAIL_ENABLED=false. Other settings/secrets not inspected or replaced. No company configuration, funding, provider or SMTP action. Official Render PUT environment reference says changes are not deployed automatically; nevertheless later history OBSERVED separate API-triggered dep-dbevlnu7bikc73bln530/sourcec26d168/started12:49:35/live12:51:10UTC after the configuration call. This is NOT counted as normal guarded release acceptance; no direct trigger_deploy call was made by this owner and no actor provenance is invented from timing alone. Do not infer an unchanged API/backend snapshot from docs alone. Runtime flag readback now available in native Admin; company customer charging and email both visibly unchecked, balance/reserved0, invoice charging unavailable. No financial action performed.

Normal manual guarded deployment40195037156 on pinned approved sourcebc6bb379/release/ai-wallet-runtime-20261025 correctly SKIPPED Trigger/Wait because that revision was already healthy. No guard weakened or unchanged deployment blindly retried. Explicit ordinary full MAIN CI40195316878 at6fdadef6f1ff04b8c71e516fc7144a417920905c is running to provide a newer fully checked release point. Source sincebc6 is documentation only. After actual full success use the existing guarded Deploy workflow on this exact source, preserving normal freshness/ancestor checks, and verify actual Trigger/Wait/health/native availability. Do not treat a skipped workflow as an installation or use direct Render deploy to bypass the guard. Original bc6 full CI40193663396 remains successful, unrelated ftext owner and every accepted behavior retained.

Before future isolated LAB grant, baseline captured12:58:08-12:58:10UTC: existing companycmtpopbgk000prhb5qc60zxus/MYWORKSTATION LAB and active storecmtpopbgo000trhb5ng9ytiru/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ verified. Wallet row absent/defaultversion0, balance0/reserved0, global wallet/entry/notice/audit0. Unaffected LAB business controls Sale90/StoreTransaction134/StockMovement95. Internal grant has no affected POS terminal, shift, SKU, stock quantity or cash/card/IRIS payment: those fields N/A, never a paid receipt. Operator existing authorized Platform Super Admin in browser administration. Proposed ONE synthetic internal TRIAL_GRANT5EUR/reference WALLET-LAB-TRIAL-20261025-01/reason internal wallet test, customer charging and email stayOFF. Immediately before execution refresh the same baselines and verify exact match; any difference requires a new reconciled published baseline, not a blind action. After ONE grant require exact5EUR, reserve0, one trial entry/one notice/one TRIAL_GRANTED audit, no other-company wallet delta, unchanged LAB control counts, same identity through read-only reload. No replay solely for proof. Real money totals/per-SKU quantities are NOT TESTED because no such flow is exercised. Existing LAB transactions are never repeated.

This is configuration/staging evidence and a before-action record only. Hosted LAB grant NOT PERFORMED/NOT TESTED; private target trial NOT APPLIED; customer AI prices/charging/invoice/email acceptance stillOPEN. Private target identifiers/amount/reference/financial data excluded from public evidence. No functional manual/numbered closure. Same retained owner; next exact guarded availability acceptance, refreshed LAB baseline then one internal trial, only afterwards separately measured private target trial. Common registries/checkpoint/PDF synchronized.

AI-OWNER-WALLET-01 — AUTHENTICATED / BOUNDED RUNTIME AND INTERNAL TRIAL CLAIM BEFORE ACTION

25Oct2026 same retained wallet owner feat/ai-owner-wallet-20261022. User expressly requested a new secure form; email/password and fresh2FA completed successfully. Native canonical Platform Admin visibly identifies the authorized platform owner. Selected private pilot-company wallet screen freshly reports server runtime DISABLED. This supersedes the prior expired-login blocker only; no trial credit or charging acceptance is inferred. No secrets published.

Existing approvals for the private selected-company internal trial and LAB testing persist; no further generic authorization required. Before-action configuration scope ONLY existing service srv-d9isenfavr4c73bdh52g / confirmed workspace tea-d9ie26vaqgkc739uudqg: merge replace:false AI_OWNER_WALLET_ENABLED=true, AI_OWNER_WALLET_INVOICES_ENABLED=false, AI_OWNER_WALLET_EMAIL_ENABLED=false. Preserve every other environment variable, provider/model/prompt/price, auth, backup schedule, source and existing rollout safeguard. This enables wallet administration, NOT any company's customer charging. All company enabled flags remain false; no tariffs applied, no provider or SMTP call. Do not replace the environment collection or expose its secrets. Inspect actual deployment behavior rather than assuming a saved setting is running. Use the ordinary full exact-main CI/freshness guard release; no direct Render deploy bypass. Current newest source bc6bb379 has its full mainCI40193663396 running; unrelated ftext owner remains retained.

Recovery prerequisite3123 and receipt3129/6ecb16d remain protected: four reviewed tables installed, native archive/COPY/KEEP/control tests passed; no lifecycle RESET/enrollment. Before configuration recheck all wallet rowcounts, exact current service/revision and no pending conflicting operation. Before EACH funding action refresh and record relevant wallet balances/version/entries/notices/audit, selected scope and unaffected company controls; do not use an after-only or stale business baseline. Hosted LAB is an internal noncash TRIAL_GRANT, no paid receipt, POS terminal/shift/SKU/payment/provider call. Use one stable synthetic LAB reference, independently observe exact credit/notice/audit and retained OFF flags through reload. Only after its measured acceptance, one previously authorized private target grant with a stable private reference and separately fresh before/after/control evidence. Never duplicate an uncertain grant or publish real-company financial data; reconcile exact reference first. No paid credit via receiptConfirmed fiction, no existing business/stock/fiscal transaction repeated. Keep customer charging and invoice/email gates OFF throughout this tranche.

Provider tariffs,50percent markup application and actual Owner/invoice charging/inbox acceptance remain OPEN; no invented Azure rate or silent model/context reduction. No configuration, grant or real charge has been performed under this claim yet. Claim must merge green/main BEFORE configuration or state-changing LAB. Single next action: green merged claim, exact bounded runtime configuration and normal guarded availability verification, then measured separate LAB/private trial funding. Final outcomes synchronize all registries/checkpoint/PDF; no functional/manual whole-task closure until actual acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-25-ai-wallet-runtime-trial.md. Owner retained.

AI-OWNER-WALLET-01 — RECOVERY INTEGRATION INSTALLED / CHARGING OFF / HOSTED TRIAL OPEN

25Oct2026 retained owner feat/ai-owner-wallet-20261022; approved bounded transfer3120/a49e6db/CI40105519094 mergedb3f4ecc before source. Source3123 exact1da9d7f49bc7fe3c447fa9276ebdbc536ac15e2f fullCI40176259940/build121117979925 all5SUCCESS4186server+8backup/0FAIL/0SKIP; native wallet40176259930/job121117481397 actual7PASS/0FAIL/0SKIP including complete native schema/archive/selective COPY through actual PG18 recovery image, target pending and DELETE refusal, exact money/history KEEP, sibling/foreign/source controls, post-RESET fresh reserve/review/settle and concurrent/drift bootstrap. Existing Ftext native40176259928/job121117481435 actual19PASS/0FAIL/0SKIP preserved. Merged00a285056e3d0e7bf41ead89df2036266694545a. Own exact-main40186768179/build121149266012 all5SUCCESS4186+8/0FAIL/0SKIP. Newer combined main803028cffeb3e2f487ed1b03efb70b783d111f01 includes unchanged owned runtime/catalogue blobs and unrelated retained ftext checkout source; exact fullCI40186803190/build121151227238 all5SUCCESS4188server+8backup/0FAIL/0SKIP. No acceptance of another owner's physical checkout is inferred.

Ordinary guarded release40188097798/job121153122621 Verify/Trigger/Wait SUCCESS, exact803028cffeb3e2f487ed1b03efb70b783d111f01; independent public health2026-10-25T11:18:45.990797+00:00 HTTP200/oktrue/exact revision. Dedicated ordinary startup logged reviewed wallet schema availabletrue; its chargingEnabledfalse describes the provisioner not enabling billing, not an independent environment-variable read. Read-only actual PG18 after2026-10-25T11:18:28.830203Z: four wallet relations exist, exact typed catalogue match, all four rowcounts ZERO; no unknown or drifted reviewed relations. No store lifecycle enrollment/Fence/Execution or RESET was performed. Backup service actual normal deploymentdep-dbeu4ts9v7es73crl530 LIVE at revision803028cffeb3e2f487ed1b03efb70b783d111f01; observed worker pulse2026-10-25T11:15:44.419210+00:00 reports matching manifestHashee0d830d5a4e190da7c86cf7d87b592707a229b670e894dd72320a1317fa3af4 and storagePolicyVerifiedtrue. Pulse fields are read-only observations; MAC not independently validated in this turn because runtime Shell requires a separate Render sign-in. No complete production backup/restore or general lifecycle execution acceptance is inferred.

The four-table catalogue/retention engineering blocker is resolved and installed. RESET retains attributed usage; company money/credits/notices/audit remain shared and untouched; pending RESERVED/REVIEW blocks maintenance; deleting a store with wallet history refuses pending a separate reviewed retention workflow. Every unrelated canonical/prospective catalogue/review value remains protected. No runtime/company/email activation or tariff change was performed by this owner. Empty wallet tables mean no company charging is enabled. The last authenticated Admin runtime-OFF observation is historical23Oct; current authenticated readback remains unavailable after2FA expiry. Actual trial credit NOT APPLIED. No wallet funding, provider call, SMTP or business/stock/fiscal transaction initiated by this owner. Ordinary deployment created only the reviewed empty wallet schema. Hosted LAB/Owner charging/inbox NOT TESTED; no functional manual or numbered PASS closure.

Authentication: email/password advanced to2FA, but application explicitly reported verification expired after the delayed second step. Not treated as authenticated; returned to the normal login screen. No secrets retained or published. Single next action: finish secure Platform Admin authentication, then publish the exact bounded operational before-action record for service availability with company charging OFF, measured LAB grant and exactly one already-authorized private-target trial. Verified provider tariffs and separate charging acceptance remain open; do not invent Azure prices or lower model limits. Owner retained, no further generic funding/ownership approval required. Full technical packet CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/recovery-technical-receipt.json; checkpoint CHECKPOINTS/CHANGES/2026-10-24-ai-wallet-recovery.md. Common registries/checkpoints/ops and tracker PDF synchronized.

AI-OWNER-WALLET-01 — OWNER-APPROVED LIMITED RECOVERY HANDOFF / ASSIGNED BEFORE SOURCE

24Oct2026: ΑΝΑΛΗΨΗ ΑΠΟ retained central lifecycle integration scope — ASSIGNED feat/ai-owner-wallet-20261022 / feat/ai-wallet-recovery-20261024. User explicitly approved this named limited transfer after the concrete request in the wallet conversation. Scope ONLY AiOwnerWallet, AiOwnerWalletEntry, AiOwnerWalletNotice, AiOwnerWalletAudit: canonical/prospective catalogue and column classifications, narrowly required retained financial-history policy, wallet-specific schema compatibility and isolated native full-schema archive/COPY/RESET/KEEP regression tests. All unrelated lifecycle nodes, jobs/controller/worker execution, automatic dispatch/recipient consent, thermal/ftext source and existing owner assignments remain retained. No second parallel owner for this slice.

Baseline main e69eb1ed49ae4b973e77513448d44d5f0541b83d inspected24Oct. Wallet trial source3100 remains installed engineering-only; actual selected-company trial credit NOT APPLIED. Canonical catalogue still omits all four wallet relations. AiOwnerWalletEntry.storeId is nullable; company credit rows are shared. FRESH_STORE_V1 currently rejects KEEP outside the explicit retained set: adding a wallet table name alone cannot safely solve this. Proposed bounded behavior retains ALL company wallet funds, reservations, credits, notices and audit, plus selected-store usage attribution across store RESET; no refunds, deletion, ledger replay or cross-company reassignment. Unknown/REVIEW holds remain durable. Shared company tables must not become store-owned through actor/reference/JSON guesses.

Claim must merge green BEFORE any source/configuration/schema change. Review exact current full catalogue and physical metadata, initialization while tables are absent, typed columns/constraints/indexes, foreign and sibling controls, pending reservations and concurrent old work, archive/restore and retained rows. Existing ftext full-schema/native acceptance and thermal catalogue remain protected; do not repeat accepted business transactions. Native engineering evidence is not hosted LAB/Owner charging/inbox PASS. Global/company/email activation, production wallet DDL/funding/provider/email/business operations remain unchanged. No generic grant reapproval required. Verified pricing and separately measured LAB acceptance remain prerequisites before exactly one already-authorized private target trial grant.

Single next action: publish this receiving claim green/main, then implement only this bounded wallet recovery integration and run native recovery/control proof before ordinary guarded installation. Retained wallet owner continues until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-24-ai-wallet-recovery.md. No functional manual or numbered checklist closure.

AI-OWNER-WALLET-01 — TRIAL SOURCE INSTALLED OFF / ACTIVATION BLOCKED ON CATALOGUE REVIEW

23Oct2026 retained owner feat/ai-owner-wallet-20261022, no release or transfer. Before-source claim3095/2eebe682/full docsCI39965146634 mergedfa979c4 preceded all trial source. Source3100 exacta3ef7b8f65941daf0ca49027397a4fda1117ae4c fullCI39966455737/build120457817039 all5jobsSUCCESS:4138server+8backup,0FAIL/0SKIP. Actual native PostgreSQL grant/concurrency/replay/conflict/last-notice rollback, role/company/revoked-session HTTP, OFF history/old settlement and mounted Owner/Admin UI executed. Focused30/30 and client build PASS. Merged06034c95cfaaa96fc22c461870e555acec279871. New source engineering evidence only; hosted LAB/Owner charging/inbox NOT TESTED.

Exact06034 main pushCI39968018220 was cancelled before jobs by pending-run replacement; GitHub retry returned403 cannotretry (no check bypass). Newer abedocs pushCI39968079005 skipped actual app build and is NOT full engineering proof. Explicit ordinary manual full-main CI39968459198 atabe5cc030d6fb5fbfc3f9c731a17492ed6f13464/build120464914860 passed4154server+8backup/0FAIL/0SKIP, but separate wholesale120464915023 failed before assertions with Chromium Target.createTarget startup timeout. Only that failed job was rerun; retry initially queued behind newer full main39968969170/c03afa262. That interim release state is superseded by the completed installation receipt that follows. All4owned runtime blobs match source through c03afa262; source06034 ancestry confirmed. Technical installation verified23Oct17:38Europe/Athens. Newer exact combined mainc03afa2621694d648f2a84b2e7fa7621e3915c80 full pushCI39968969170/build120468677166 all5SUCCESS4156server+8backup/0FAIL/0SKIP. Manualabe39968459198 attempt2 alsoall5SUCCESS after only the isolated Chromium startup retry120473180557; actual role/browser/offline assertions passed, no source/test/guard workaround. Actual ordinary release39970967266/deploy120473321060 passed exact full-CI freshness guard, triggered Render14:36:54UTC and reached expected healthyc03afa26214:38:56UTC. Independent HTTP200/oktrue/c03 health14:38:52UTC confirms installation; all4owned runtime source blobs at LIVE revision equal accepted3100 source and06034 ancestry is preserved. This supersedes prior releasePENDING only for source installation. Global wallet runtime/charging/email remainOFF, no schema initialization or trial credit. Activation remains blocked on the exact catalogue/ownership review below. Engineering CI/installation is not hosted LAB/Owner charging/inbox PASS.

Installed foundation defaultOFF and current production remain protected. Added source provides separate audited TRIAL_GRANT route/form, atomic ledger/balance/audit/notice, exact stable-reference replay and explicit non-receipt labels. Company agreement ON/OFF is existing audited versioned enabled flag: OFF keeps original provider at platform cost and preserves funds/history; preexisting reservations settle under original rates. Trial grant alone never enables billing. Owner approved concrete internally funded selected-company trial and START; no further generic funding/ownership approval is needed. Actual trial amount/identifiers remain private. Secure SuperAdmin authentication was completed; this is not charging/LAB PASS.

ACTUAL ACTIVATION PREREQUISITE:23Oct14:28:08UTC read-only production finds ALL4 AiOwnerWallet/Entry/Notice/Audit relations ABSENT;14:19:18UTC Fence/Execution also ABSENT. Native Admin confirms runtimeDISABLED. Existing canonical/proposed lifecycle manifests have none of these four known tables; Entry contains nullable storeId. Current validateDatabase explicitly rejects unknown relations and unreviewed storeId-bearing tables. Lazy wallet initialization would create four unreviewed relations; do not enable global runtime or initialize/credit while this compatibility gate remains unresolved. This is source-reviewed risk, not a measured failing RESET or backup job. Normal full pg_dump backup is distinct from controlled store lifecycle recovery. Do not claim backups already failed or that CI alone proves lifecycle compatibility.

Prepared exact4-table DDL/SHA256 and protected ownership/archive/reset requirements in CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/trial-lifecycle-review.json and docs/ops/ai-owner-wallet-lifecycle-review-20261023.md. Shared canonical lifecycle/automatic-report integration remains with its existing owner; no parallel takeover, ownership/deletion bypass or unilateral manifest promotion. Company funds/credits/notifications/audit and shared CREDIT rows must survive store reset without duplication or cross-company movement. Required joint bounded review: native full catalogue/oracle and archive/copy/restore/KEEP proof; fresh actual schema and no jobs/leases/reopen; paired ordinary app+backup image/hash/pulse verification; install-only enrollment if required, never RESET as setup shortcut. Verified provider tariffs and measured isolated LAB grant acceptance remain required before real charging;50percent markup approved, not applied.

No production wallet schema/configuration/funding/provider/business/stock/fiscal/email action, no fictitious payment receipt or repeated accepted transaction. Actual selected-company trial credit NOT APPLIED. No functional manual/numbered-checklist closure. Single next action: retained wallet owner coordinates the bounded four-table review with the assigned canonical lifecycle integration owner, publishes the approved claim before integration source, then measured LAB and exactly one authorized selected-company trial grant after fresh before/after/control evidence. This final technical handoff synchronizes all3registers/checkpoint/ops/reviewpacket and regenerated tracker PDF. Owner retained, not silently unassigned.

AI-OWNER-WALLET-01 — TRIAL GRANT ASSIGNED BEFORE SOURCE / NOT TESTED

2026-10-23 retained owner feat/ai-owner-wallet-20261022; continuation feat/ai-wallet-trial-grant-20261022. Owner explicitly selected internally funded trial credit, concrete amount and START. No further ownership approval needed. Existing source3057 and installed f12c816/CI39847981978/release39849306527, receipt3076/0d28a6f remain protected. No real trial credit/payment/configuration applied yet. Current receipt-only route must NOT be used for promotional funding or false receiptConfirmed.

Bounded next scope: separate SuperAdmin-only audited TRIAL_GRANT path on existing dedicated CREDIT ledger, explicit confirmed internal reason and namespaced idempotency, explicit bounded wallet amounts, atomic entry/balance/audit/notice, owner/admin readable trial label, fresh role/company validation and mounted UI state isolation. Latest owner requirement: SuperAdmin switches customer AI charging ON/OFF per company agreement; OFF keeps AI available at platform cost without clearing prior balance/history. Existing audited company flag already provides that behavior; label/helper and regression coverage must make it explicit. No new business schema migration, no fake paid receipt, no provider/prompt/invoice/payment/stock/fiscal changes, no broader owner takeover. Company gates remainOFF until reviewed explicit activation and validated real tariffs; all other wallets remain untouched. Native PostgreSQL concurrent replay/conflict/rollback/HTTP authorization plus mounted UI required. CI is not hosted LAB PASS.

Single next action: merge this before-source claim green/main, implement and validate bounded grant, normal guarded exact installation, fresh measured LAB grant acceptance, then one authorized selected-company trial grant with before/after/control evidence. Actual provider tariffs and activation acceptance remain OPEN; preserve50percent markup and do not invent Azure rates. Private target/financial identifiers are deliberately excluded from public evidence. Final central technical/functional receipt must synchronize active/tracker/pending/checkpoint/PDF with exact outcome. No scope release.

Resumed23Oct after interruption. Previous8a2b0a1 claim branch existed without a PR/merge; no grant source/configuration action had occurred. Restored same claim onto newest main, preserving concurrent owners and registries. The approved selected-company trial amount is private operational data; no fabricated receipt or additional grant authorization. Existing audited company enabled flag is preserved; only clear operator labels and regression coverage are needed for agreement ON/OFF.

AI-OWNER-WALLET-01 — OWNER COST SOURCE INSTALLED OFF / PRICING AND LAB ACCEPTANCE OPEN

2026-10-22 23:34 Europe/Athens. Continuous retained owner feat/ai-owner-wallet-20261022; source3057 exact e8976ef7f852e304361612b337f9ddab562af7fe, green full CI39837109580 attempt2/build120061377604:4008server+8backup,0FAIL/0SKIP,all5jobsSUCCESS. Merged f12c816aecab60e60adb811ea523f7ac5523e54f. Exact source-main full CI39847981978/build120066616325 SUCCESS4103server+8backup,0FAIL/0SKIP,all5jobsSUCCESS. Ordinary guarded release39849306527/deploy120070993257 ACTUAL Trigger+WaitSUCCESS: trigger20:30:38UTC, expected revision healthy20:33:13UTC. Independent public health20:33:58UTC HTTP200/oktrue/f12c816. All4owned runtime blobs at that LIVE revision equal accepted source. Supersedes earlier source/releasePENDING notes only for technical installation; no guard bypass or Render manual deployment.

Installed additive Owner reporting: selected-store full settled-usage ledger, today/current Athens month/lifetime totals, invoice/question/other categories and daily detail, server as-of timestamp. Recent100history cannot truncate totals; credits, RESERVED/REVIEW and future settlements excluded. Shared company balance remains explicitly separate. Mounted stale-store response and tenant/role controls preserved. Strict optional cache-write lifetime and long-context tariff contract is installed; legacy rates/defaultOFF unchanged, missing or unpriced usage fail-stops with retained REVIEW rather than invented zero charges. Native PostgreSQL golden tariff/ledger/HTTP/reporting boundary fixtures and mounted UI all executed. Categories describe provider calls/features, NOT unique invoice/question identities; individual business-document grouping remains OPEN.

Initial source CI fixture failures, checkpoint-policy failure and Chromium startup retries remain in source checkpoint. Latest sole unrelated first-attempt4007PASS/1FAIL was wholesale whole-JSON substring999 assertion matching dynamic paidExpiresAt; exact clock reproduction and unchanged current-clock pass recorded in owner-cost-receipt.json. No wholesale source/assertion/guard changed, no takeover of its existing owner. Unchanged full rerun4008/0/0 passed, independent actual wholesale browser job alsoSUCCESS. This is engineering evidence, never LAB/USER PASS.

Owner approved50percent markup (provider reference cost10EUR -> customer debit15EUR), not applied. No production tariff/config/schema/funding/payment/SMTP action, no accepted invoice/stock/fiscal/payment replay. Existing gates remainOFF; real hosted Owner charging/LAB/inbox acceptance NOT TESTED. Actual Azure SKU/region/rate and provider/EUR settlement reference still require verification; researched reference draft is not a live tariff. No initial trial funding amount approved, no fabricated receipt or test credit for a real company. Broader internal/platform/scheduler metering and global push remain OPEN.

Single next action: verify actual provider tariffs, establish concrete initial trial funding/budget and measured isolated LAB acceptance BEFORE selected real-company activation. Only authorized confirmed actual receipt may fund the current credit route; an internal gift requires a separate audited grant path, not receiptConfirmed fiction. Owner retained, no scope release, no functional manual/numbered-checklist closure. Before-source green/main claim3055 remains protected. Technical evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/owner-cost-receipt.json and owner-cost-ci.jpg; checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-owner-cost-breakdown.md. This final technical receipt synchronizes all3common registers and regenerates their tracker PDF together.

AI-OWNER-WALLET-01 — INSTALLED / PRICING TRIAL PREPARATION ASSIGNED

2026-10-22 20:48 Europe/Athens. Continuous retained owner feat/ai-owner-wallet-20261022; continuation docs/ai-wallet-invoice-installed-20261022. Supersedes the17:21UTC deployment hold ONLY for technical installation. Exact combined5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774 full main CI39821105794/job119973999992 SUCCESS3916server+8backup,0failures/0skips. Actual ordinary release39822773699/job119978211519 triggered Render17:28:09UTC and verified expected health revision17:33:36UTC. Independent health oktrue5c8ccf5 and24/24 wallet/invoice/review runtime blobs match7f5afd3, source ancestor confirmed. Skipped/withheld deployment jobs are not used as installation evidence.

User requests continuing and defining AI trial pricing for one explicitly selected active customer store. Read-only native Platform Admin confirms the exact company selected and runtime billing DISABLED; no table initialization, configuration, funding, tariff, paid provider call or email send. Public evidence excludes customer identities, contact details and financial records. No hosted functional/LAB/email PASS. Numbered functional checklist/manual remain unchanged.

Owner additionally requires customer-visible usage cost through the current date. Assigned additive Owner wallet presentation: selected-store settled all-time/month-to-date/today totals, daily and feature-category breakdown (invoice OpenAI/Azure grouped as invoices, Owner assistant as questions, other features separately), recent-entry category labels and server as-of timestamp in Europe/Athens, computed over the complete ledger rather than the recent100-entry list. Show final customer debits (approved50percent markup in tariff), never provider wholesale cost or unposted reserved holds as spend. Preserve company-wide balance labels and selected-store stale-response protection. Native PostgreSQL boundary/isolation/over100entries tests and mounted owner UI tests required; hosted acceptance remains NOT TESTED.

Bounded next scope before production activation: verify actual configured models, extend exact token tariff/reservation/settlement for documented cache-write lifetime counts and long-context tier where required, preserving legacy model tariffs and all default-OFF paths. Official OpenAI documentation22Oct describes cache_write_tokens and ttl_30m_tokens/ttl_12h_tokens; current contract has only uncached/cached/output and cannot assert exact-cost GPT5.6 pricing. No model/prompt switch to fit billing. Full regression/native PostgreSQL/HTTP/build/browser/invariants and ordinary release required for any source extension. Retain canonical company/store authorization, original invoice settlement/job/editable draft, durable unknown holds and fail-stop, notification privacy and all other owners.

Owner explicitly selects50percent markup on verified provider AI cost converted to EUR. Example10EUR provider cost means15EUR customer usage charge. Markup approved, NOT yet applied.20EUR trial budget remains a proposal; usage rather than a guessed flat invoice/question charge. No fictitious confirmed-payment receipt or credit; promotional credit needs a separately audited explicit grant path if chosen. Existing payment route is confirmed actual receipts only. Single next action: settle the complete rate contract and actual configured models, then obtain the concrete trial budget/rate choice before controlled LAB acceptance and selected-company activation. Broader platform/scheduler AI and global notifications remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md; evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/installed-receipt.json. Owner retained; no scope release.

22/10/2026 - IOS-CHAT-NATIVE-01 / ENGINEERING COMPLETE / OWNER APPLE SETUP AND IPHONE ACCEPTANCE OPEN

Owner feat/ios-chat-native-20261022 retained. Before-source claim3020/49c27e87 preceded code. Native SwiftUI/UIKit iOS17+ app0.1.0/build1, bundle gr.myworkstation.chat.ios.preview, sourcePR3025 head690da304 merged48a2618d39016fa2eb2555330c3e0ff515ea4448. This supersedes the initial iOS NOT IMPLEMENTED claim only; Android scoped USER PASS3018/3010 and all other owners remain protected, no accepted test replay.

Actual PR iOS39814339153/job119949104298 SUCCESS on Xcode26.3/Swift6.2.4:11core+15model+2real Apple H264/H264-AAC memory media+3native UI=31PASS/0FAIL. Existing unchanged server validator accepted both actual simulator-produced MP4s. FullPR39814339121 all5jobsSUCCESS3865server+8backup/0FAIL/0SKIP. Tested PR merge checkout430dbe28222ace5810c0c6077bb488306e94d158 is recorded honestly, distinct from branchhead/main. Earlier compile/fixture/version failures and causal corrections remain in checkpoint; assertions retained.

Latest combined main5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774 fullCI39821105794 all5jobsSUCCESS3916server+8backup/0FAIL/0SKIP. Ordinary guarded release39822773699/job119978211519 SUCCESS; Renderdep-dbd4faff3r2c739b9rpg LIVE17:33:32UTC and independent public /api/health ok:true exact5c8ccf5e verified. All35 owned source blobs match this actual release. This closes only the native server engineering rollout hold, not physical iPhone/signing/APNs or other owners' acceptance. Engineering receiptPR3046 retains all unrelated owners and guards. Additive iOS APNs/native-push protocol defaults OFF, no server configuration/secret/schema mutation. Existing Android payload/default registration/signer/download unchanged. No real chat, AI/provider, notification, mail or business test executed. Privacy is scoped memory/lifecycle behavior plus non-sync technical Keychain state, not zero OS/SDK/provider/backup traces or universal screenshot blocking.

Remaining: owner has NO Apple Developer account. Owner-controlled Apple membership/App Store Connect, matching Firebase iOS app/APNs key, signing/provisioning, real TestFlight processing and tester link are required; no account/payment/agreement/key action by agent. After actual signed delivery, perform one final consolidated physical iPhone batch per ios/README.md (login2FA/PIN/store/AI scope, text/read/ready replies, photo/voice/video capture/gallery/playback, push/tap/logout/background/privacy). iOS user acceptance stays NOT TESTED; no manual PASS or whole N16/PWA/AI/commercial closure. Owner retained through Apple prerequisites and final acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ios-chat-native.md; evidence CHECKPOINTS/EVIDENCE/ios-chat-native-20261022/technical-receipt.json. Single next action: owner-controlled Apple enrollment/signing/Firebase iOS/APNs/TestFlight setup, then one final physical iPhone batch; accepted Android tests are not repeated.

22/10/2026 20:30 Europe/Athens — KAT-MISSING-FISCAL-MAPPINGS / LIMITED LAB VAT SAVE PASS

Retained owner ops/kat-missing-fiscal-mappings-20261022. Claim PR3051 final5b18fb378e7ee4517d6b75723536deaec1aa052e/docsCI39822748783SUCCESS mergedc444a14b before action. Actual native SuperAdmin/CloudChrome in virtual MYWORKSTATION LAB/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ: selected ONLY existing synthetic LAB-CAFE-20260927/id12890a39-c0eb-4c80-9d32-8691a4e4c90d, bulk correction with all other fields Keep and SETunchecked. One Καταχώρηση20:30:13Athens assigned existing815e0531-9f42-4dd6-b5b8-f4ff37efdfa6/register1/code1/13%. No sale, quantity, payment or physical POS action (N/A).

Fresh catalog baseline17:29:03UTC/control17:29:28UTC recorded locally BEFORE action; independent after17:30:23UTC and saved native archive agree. Exactly one department null→target and vatVerified→true;13%/price1/stock-2/all other Product fields and complete StoreProduct unchanged. All1900KAT rows unchanged; LAB/N40/KAT sales/payment/transactions/movements/shifts/layout and other-product control hashes unchanged. Both LAB terminal/control shifts unchanged; no old accepted transaction repeated. Original departments unchanged. Evidence CHECKPOINTS/EVIDENCE/kat-missing-fiscal-mappings-20261022/lab.json and catalog/control measurement SQL.

This is LIMITED LAB PASS for same-rate native blank department correction, not bulk price/merge/general fiscal/physical acceptance. Other inventory owners retained. Real KAT correction NOT YET DONE; readiness remains BLOCKED. After this five-file receipt green/main: fresh KAT baseline, native explicit51 active MWS-KAT-BEV identities ONLY→existing department65d2fb68-dae6-46f0-8e34-27767665538a/register2/code42/rate13, matching original prepared-drink source counterparts. Preserve all imported mappings/inactive modifiers and all prices/stocks/rates/fees/layout/finance. Other44legacy/test mappings require individual exact source review; no blanket rate/name inference. Physical legitimate receipt, SEPTONA conflict and mobile-service0.50SET remain OPEN. Owner retained, no new source/deployment needed.

22/10/2026 — KAT-MISSING-FISCAL-MAPPINGS / OWNER AUTHORIZED / ASSIGNED BEFORE CONFIGURATION

Retained KAT owner ops/kat-catalog-import-20261020 / feat/kat-pos-photo-layout-20261021; continuation ops/kat-missing-fiscal-mappings-20261022. Owner explicitly said START and approved correction of missing fiscal links after the readiness audit. Scope ONLY reviewed blank Product.vatDepartmentId in pilot-company/kat-store, preserving existing VAT rates, prices, activation, stocks, original imported fiscal tuples, layoutv3702, recipes/fee SETs, financial/shift/device records and other stores. No sale, import, stock reset, new department, rate/exemption or permission change.

Read audit PR3033 and current source/manual. Existing single-card save has limited LIVE persistence PASS15Oct; bulk VAT UI had preview-only acceptance, so any first bulk VAT save requires one measured synthetic LAB sample and published scoped receipt BEFORE KAT bulk use. No accepted financial transaction is repeated. Current source bulk writes chosen department, matching rate, vatVerified=true and updatedAt plus audit; other fields must remain Keep. Preserve0% unverified legacy/test items until exact source identity resolves their fiscal exemption. Missing95 includes51 modern beverages and44 legacy/test rows. Modern prepared drinks' original source counterparts (KAT21869/21870/21877/21880/21884/21935/21936/25158) use department2/code42/rate13, not an inferred department1 from its label. Review exact target identities and fresh baselines before native selected-store correction; do not select inactive modifiers or blanket-map by rate.

Status NOT TESTED for correction; authenticated SuperAdmin access restored with secure2FA, no business save yet. Readiness remains BLOCKED until saved readback. Existing physical POS/fiscal first legitimate receipt and separate0.50 mobile-service SET remain OPEN. Single next action: measured native synthetic-only bulk VAT acceptance, then reviewed real blank-link groups and independent protected-field readback. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-kat-missing-fiscal-mappings.md. Owner retained; other-owner inventory merger/bulk-price acceptance and all central scopes untouched.

22/10/2026 — Source prepared / AWAITING CI AND RELEASE

Claim PR3047/c01513d docsCI39821631495 SUCCESS, merged6aa9f22 before source. Separate exact /online/daily-bite class reproduces accepted KAT layout with original logo extracted from user PDF (uncropped orange mark/black lettering, original olive surround). All existing script blocks and KAT CSS are byte-identical; new independent visual scope script only. No catalogue/order/payment/stock/member/fiscal behavior change.

Following exact green release, normal selected DAILY UI preparation may save only brand name DAILY BITE, supplied logo HTTPS URL, approved olive primary/secondary and source tagline. Preserve public-disabled state, surcharge .10, stock checking, doctor15/nurse10/staff0, hours and all fulfillment/payment settings. Retail online assortment to be prepared only from DAILY products: hot/cold prepared drinks, waters, soft drinks, food, packaged food, dairy and ice cream; exclude wholesale ingredients, tobacco/alcohol, lottery/cards, non-stock/cleaning/pet rows. Existing product prices and availability rules remain unchanged. Product visibility is configuration, not product import or stock adjustment. Public activation/real order acceptance is outside this preparation. No business write until source/claim is green/main and ordinary release is verified. Broader original residuals remain assigned.

23/10/2026 00:07 Europe/Athens — DAILY-DESKTOP-SCALE-01 / LIMITED LIVE DESKTOP VISUAL PASS / COMPLETED

Retained owner codex/daily-online-store-20261011 / issue2054. Only the user's wide-desktop size complaint is complete. ClaimPR3077/head15f76bf1b0681921258a40289c2ae53a560e3fea/docsCI39850476883 SUCCESS mergedd1d065df167c4d0fee7f630cc6f20bcd3aad4dd8 before source. Exact fullPRCI39851277841/job120078268488 and mainCI39852751802/job120083403781 all5jobs SUCCESS; each4108PASS/0FAIL/0SKIP plus backup8/0/0. Ordinary guarded release39854076724/job120087705994 SUCCESS; Renderdep-dbd7ksbl550s73avaq80 LIVE22/10 21:06:31UTC. No guard changed.

Actual read-only raw HTTP21:07:33UTC: health oktrue exact8169489a; full initial DAILY HTML equals the reviewed template transformed by the unchanged metadata helper; initial DAILY title/Open Graph retained. KAT receives the reviewed shared template with only the new DAILY desktop selectors added. HTML SHA256d55dfc0c584b5fb9c88cb2abbe576ae55eba2bf66c923a90c970780ee6bd0b12. All pre-existing CSS, scripts and markup byte-preserved. Raw proof and initial HTML in CHECKPOINTS/EVIDENCE/daily-desktop-scale-20261022/.

Actual Cloud Chrome desktop viewport1363: body16→18px, logo230→280px, title30px, checkoutheight50px, no horizontal overflow; shell1348px with normal vertical scrollbar. Supplied logo is visibly larger and uncropped; search/cart/closed checkout remain readable. Screenshot browser.jpg in same evidence directory. Empty basket and disabled closed-store checkout observed. This is limited hosted desktop visual PASS; no no-vertical-scroll promise or physical/mobile checkout acceptance.

Five native Chromium before/after tests at1920/1440/1024/768/390 actually ran unskipped in both full CIs:20renders verify no horizontal overflow, larger DAILY desktop, exact unchanged narrow/mobile and KAT geometry/typography. At1920 shell1440→1800px. These are isolated browser checks, not actual physical/mobile LIVE PASS. Local packed-browser binary had been empty; restored only scratch official Chromium tooling, then all5viewport tests and existing10branding/metadata/public-url checks passed, frontend build passed.

No settings/catalogue/stock/order/payment/fiscal or public-activation action. DAILY remains public-disabled; initial inventory and wider launch remain OPEN. Previously recorded disabled-shell green OPEN badge/default copy is unchanged and is not accepted trading status. No whole Gate/numbered-item closure. Owner retained for broader residuals; only completed desktop subtask removed from pending. Manual docs/manual/online-delivery/PASS.md and both canonical PDFs updated in this receipt. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-daily-desktop-scale.md.

22/10/2026 23:16 Europe/Athens — DAILY-LINK-PREVIEW-01 / LIMITED LIVE HTTP METADATA PASS / COMPLETED

Retained DAILY owner codex/daily-online-store-20261011 / issue2054; only the independently claimed wrong shared-link identity is complete. Claim PR3069 merged6a4056fe509dc44f3adecb331218a28ef9a2fac8 after CI39841883025. Source PR3070 final head0c0982960b9d18a762cdbc4338eb086b2b43d682 merged723c8184f39d87e262d7d1c59c1941e4cadee55b. Full exact PR CI39844217449 and main CI39845583716: all5jobs SUCCESS,4096PASS/0FAIL/0SKIP plus backup8/0/0. Earlier source headf246ca5 CI39842567540 also green; reconciliation preserved concurrent documentation only. No guard was weakened. Ordinary guarded release39846908229/job120062596624 SUCCESS; Renderdep-dbd6t4gm7kps73c13m0g LIVE20:15:50UTC.

Independent actual raw HTTP verification20:16:33UTC with WhatsApp/2.0 User-Agent, before JavaScript: exact /online/daily-bite and fresh query both return DAILY BITE - Online Παραγγελίες, unique matching Open Graph/Twitter title/description, pinned canonical, original PNG image with image/png MIME and825x774 dimensions. Logo SHA256d003419554139638e0656ca57fab9f9b9525c35b78f3c7d585946d3864635704. GET/HEAD pass;

raw fresh-query response byte-identical to canonical. KAT initial HTML is byte-identical to its original template; every original style/script/body byte remains unchanged in DAILY. Actual /api/health independently returned oktrue exact723c8184. Proof JSON and raw HTML in CHECKPOINTS/EVIDENCE/daily-link-preview-20261022/.

Cloud Chrome opened the exact fresh query and observed matching OG title/image/canonical and visible DAILY logo/theme, empty basket and disabled closed-store checkout. Screenshot in same evidence directory. This proves server metadata and public browser identity, NOT WhatsApp refreshing an already sent cached message card; no actual WhatsApp send or cache purge was performed. Existing green OPEN badge/default copy on the disabled shell remains the previously recorded residual, not accepted active trading. No stock/catalogue/settings/order/payment/fiscal/database writes or public activation. Broader launch and initial inventory remain OPEN with the retained owner; no whole Gate/numbered-item closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-daily-link-preview.md and manual docs/manual/online-delivery/PASS.md. Canonical PDFs regenerated in this receipt.

22/10/2026 — DAILY-STOCK-CATALOG-03 / LIMITED LAB CATALOGUE PASS + DAILY SETTINGS LIVE PASS / LAUNCH OPEN

Owner codex/daily-online-store-20261011 retained / issue2054. SourcePR3056/d7372b8/fullCI39828149315 green, merged659aea0217d62c6beec5f0ea51455a8c68884a4b. Attempt1 browser ECONNRESET qualified in checkpoint.

Actual21:37–21:46Athens LAB normal UI auto on -> catalogue51 exact own-store SQL identity/stock match; restored original auto=false/stockCheck=false and original2 products. DAILY normal UI saved supplied logo/name/tagline/welcome and auto=true/stockCheck=true/publicfalse; reopened readback count0.8753active/0positive stock. All LAB/DAILY/KAT stock/baked/visibility fingerprints and orders3/0/14 unchanged; control business config restored/unchanged. No stock/order/payment/fiscal submission, no prior fixture replay. Manual products list was not saved.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-daily-stock-catalog.md; manual docs/manual/online-delivery/PASS.md; evidence CHECKPOINTS/EVIDENCE/daily-online-20261022/. Only catalogue/settings and qualified disabled-shell theme PASS. Public launch, initial inventory, active customer presentation, checkout/mobile/physical/fiscal remain OPEN; disabled shell legacy OPEN badge/default copy is residual. No whole numbered/Gate closure, owner retained. PDFs regenerated with this receipt.

22/10/2026 — DAILY-STOCK-CATALOG-02 / SOURCE READY / AWAITING CI AND LAB

Claim PR3054 head ce75202afd712836608f357fe35aee2d4d09fea6 / docs CI39826302588 SUCCESS / merged43cfb63a4226519b3877ef2cf88213f3291dea42 before source. Owner codex/daily-online-store-20261011 retained; independent branch feat/daily-stock-catalog-20261022. Adds opt-in autoStockCatalogEnabled defaultfalse, idempotent additive bootstrap, scoped settings/readback and automatic UI. Omitted flag preserves saved state for old clients; enabling forces stockCheckEnabled true. Manual catalogue and other stores remain default unchanged.

Opt-in readers use active own-company/store products, current finite positive effective stock, matching enabled same-product baked balance precedence, no visibility whitelist or5000 save ceiling. Submit validation rereads live stock and aggregates duplicate product lines, no coffee/ALWAYS/nontracked exemption. No changes to stock posting, payments, licensing, fiscal, lifecycle or financial finalization. New queries are read-only; no production DDL from Work. Existing order idempotency paths retained.

Local Node24 targeted16PASS/0FAIL/2nativeSKIP, build PASS (Vite and TABLE_SERVICE bundle). Native PostgreSQL fixtures must execute on exact Node20 CI: actual public handler >5000 eligibility, tenant/active/baked isolation, depletion/restock, stale/aggregate quantity rejection without new order writes; actual settings handler defaultfalse/idempotent migration, persistence/old-client preservation/control store. Mounted manager test covers toggle, strict stock checkbox, live count and no manual visibility save. Full CI and main/ordinary guarded release pending; CI is not LAB PASS.

DAILY actual8753 active products /0 positive stock at latest read; automatic catalogue must currently contain0. Do not save superseded unsaved5877 whitelist. After exact released revision, save brand/logo plus automatic setting through normal selected DAILY UI, retain enabledfalse. Actual LAB catalogue/config validation pending; no stock/order/payment/physical transaction authorized for this scope. Broader DAILY launch and other owners remain OPEN.

22/10/2026 — DAILY-STOCK-CATALOG-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained DAILY owner codex/daily-online-store-20261011; independent continuation feat/daily-stock-catalog-20261022. User explicitly answers catalogue choice: «οτι υπαρχει σε στοκ». This supersedes the unsaved category whitelist draft (5877 products); no products/settings have been saved. Normal whitelist API max5000 is not an observed failed save; source inspection found the limit before submission. User authorized GitHub branch/PR/merge/install in this conversation. Visual source PR3048 final22b0d14/fullCI39823755850 SUCCESS mergedac673558; ordinary release still pending.

Independent read-only production source in confirmed original My Workspace/myworkstation-db: exact DAILY store cmv25lf3h000ueegf0kkii3pb/companycmv25lf0w000seegf1cn4bbmx has8753active products,0positive/8753zero/0negative stock. No invented starting inventory, copying KAT data or inventory write. Selected-store eligibility/visibility must follow actual effective stock dynamically, including zero→positive and positive→zero transitions on normal requests. Source counts are not full checkout/LAB acceptance.

Bounded source: additive autoStockCatalogEnabled boolean on existing OnlineOrderingConfig, defaultfalse/idempotent bootstrap; normal tenant-scoped SuperAdmin setting/editor. Legacy/manual mode remains unchanged. Opt-in automatic mode reads active own-store products directly, independent of manual visibility and its5000 save limit; exposes only finite positive effective stock, preserving baked balance identity. Same strict stock/quantity and eligibility on both public catalogue and order-validation readers, including repeated-line aggregate quantities. No prepared-coffee/ALWAYS/nontracked bypass when this explicit mode is on. Existing licence/enabled/member/price/fiscal/fulfilment/payment/stock finalization and idempotency paths unchanged. No direct production DDL/SQL writes from Work, no public activation or new financial acceptance.

Meaningful native PostgreSQL actual-handler tenant/store/active/visibility, zero/negative/malformed/positive/quantity/default-mode cases; normal settings persistence and default migration tests; existing KAT/member/checkout and UI regressions, full exact Node20 CI/main/ordinary release. Actual live read-only catalogue acceptance uses existing LAB stock with measured controls and temporary config only if normal UI access permits; no stock/order/financial test replay. DAILY remains public-disabled until readiness. New setting plus branding can then be saved through normal UI; today its stock-only catalogue must be empty. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-daily-stock-catalog.md. Publish claim green/main before source. Owner retained until completion/named handoff; broader DAILY/physical/fiscal and other owners unchanged.

22/10/2026 — DAILY-ONLINE-BRANDING-02 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained DAILY scope owner codex/daily-online-store-20261011, continuation branch feat/daily-online-branding-20261022. User explicitly requests DAILY BITE Online Store to match KAT with DAILY products and supplied DAILY logo PDFs, then START. Bounded new visual preparation only: reuse accepted olive/orange KAT styling on exact /online/daily-bite with isolated original DAILY logo asset. Preserve exact KAT appearance and all existing business scripts, catalog/prices/modifiers/member/stock/payment/fiscal/tenant gates. No public activation or financial action in this phase. Wider DAILY installation/availability/member acceptance and other owners retained.

Live read-only baseline: DAILY slug daily-bite/public disabled, 0/8753 online products, stock check on, surcharge FIXED .10, pickup/delivery on, fee0/minimum3, doctor15/nurse10/staff0, cash/card enabled, seven days07:00-21:00. KAT read-only reference: slugkat/public enabled, same fulfillment/surcharge/hours but stockcheckoff and discounts0. Do not copy those commercial differences or KAT products silently. Existing DOM timeout is large-list observation: screenshot and scoped filter FREDDO restore control; no confirmed application crash and no speculative pagination fix. Original regulated ESPRESSO DB000002 remains1.65 online. No settings/products/member/order/stock/shift writes performed.

Acceptance after green source/main CI and ordinary exact release: original logo uncropped, DAILY name/palette, desktop/mobile category/search and own catalog only; no KAT regression. Existing cart/order scripts must be byte-identical. Source CI is not LAB PASS. Settings and selected online retail assortment remain OPEN until review/normal UI save; never expose all8753 wholesale/non-stock/lottery rows indiscriminately. No protected LAB transaction replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-daily-online-branding.md. Next: publish this bounded claim green/main, then original asset extraction and isolated visual patch. Owner retained through completion or named handoff.

22/10/2026 18:59 Europe/Athens — KAT START READINESS / BLOCKED / READ-ONLY AUDIT

Retained KAT owner ops/kat-catalog-import-20261020 / feat/kat-pos-photo-layout-20261021. Explicit owner asks whether actual KAT can start. Read-only audit only; no catalog/department/rate/price/activation/stock/device/credential/configuration/transaction/shift/fiscal/deploy write. Existing layoutv3702 and coffee/import/staff PASS are retained as bounded configuration evidence, not full fiscal readiness.

Current ordinary production Render dep-dbd31teq1p3s73dp7m40 LIVE22Oct15:56:27UTC; independent public /api/health oktrue exact9a67265aaa916058621b5291c96268b6f0093bb9. Both actual signed CloudDevice writers are ACTIVE and polling: KAT-POS-01→KAT-FISCAL-01 and KAT-POS-02→KAT-FISCAL-02, fresh heartbeat within seconds of independent15:54/15:59 reads. Do not confuse old installation-token lastSeenAt or read-only Observer telemetry with current Writer. Both saved RBS installation mappings confirmed/workfolderpresent/cash6/card2/secondary5. Four EFTPOS mappingsactive; POS01twoIMMEDIATE, POS02legacy null modes remain unchanged (prior physical owner acceptance retained). No pending/unknown RBS requests: only historical SALE_COMMITTED/DECLINED. Existing POS02shiftOPEN; no new shift opened or prior transaction repeated. Physical cash/card/print readiness is not newly exercised.

Layoutv3702 survives later releases:20quick/20roots/7children/242distinctmappedIDs; all242active with positive prices, existing linkeddepartmentrates have0mismatch.57coffeeparentsretainoneexisting0.05fee qty1 with0badqty/price and0nonzeroembeddedfee;7inactive retained. Catalog1900 total/1863active. New real BLOCKER:95active catalog products have no valid joined ManagementVatDepartment, INCLUDING51mapped beverages:36coffee/8chocolate/7tea. Current actual server/src/routes/store-pos.js resolveItems LEFT JOINs only product.vatDepartmentId to same-company department; checkout explicitly rejects absent fiscalDepartment with RBS_CAPDRIVER_V1_MAPPING_REQUIRED before command. This is a source+saved-data diagnostic, NOT a newly submitted failed sale. Do not label these products fiscal-ready because rate13 alone exists. Other44missing identities are in evidence, no guessed department from names.15active zero-price items also need individual sellable-versus-production-material review; do not blanket reprice/deactivate. One currentstock-1water reflects a later owner sale, not rollback of earlier zero-stock PASS; do not reset it.

Readiness conclusion: NOT READY for unrestricted normal fiscal selling until missing fiscal mappings are reviewed/corrected. Device connectivity/server/layout/fee checks do not override this blocker. Existing user forbids VAT/department and retail changes: no repair inferred from a read-only check. Single next action is owner-authorized exact identity/department review against original KAT source and confirmed register profile, preserving existing rates/prices/stock; then scoped native correction of only reviewed blanks and independent readback. Physical actual refreshed POS01/02 and first legitimate receipt acceptance remain with existing owners; never replay old paid requests. SEPTONAprice conflict and separate0.50 mobile-topup SET remain OPEN. Evidence CHECKPOINTS/EVIDENCE/kat-start-readiness-20261022/audit.json and measurement.sql. Owner retained, no new code or full POS PASS.

AI-OWNER-WALLET-01 — OWN SOURCE AND MAIN CI GREEN / NORMAL RELEASE HELD FOR NEWER SOURCE

2026-10-22 17:21UTC final retained-owner handoff: feat/ai-owner-wallet-20261022, no release or second owner. Invoice3037 and review-persistence3041 are green merged073fd23 and7f5afd3. Exact7f5afd3 push-main CI39819683069 SUCCESS:3892server+8backup,0failures/0skips; native wallet/tenant/funding/uncertainty/HTTP and review-DB-failure regressions executed. Follow-up PR CI39818057549 SUCCESS3877+8; initial source PR CI39814421377 SUCCESS3869+8. Receipt3045 green39820044137 mergedb93a4c3. All source algorithms/prompts, original settlement/job/editable draft, stock/fiscal and other iOS/ftext/startup/module-writer owners preserved. No accepted transaction replay or physical test.

Deployment is NOT PASS. Newer paid-module source3044 merged5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774 after our code, owned by its existing page. Its full main CI39821105794 is still IN_PROGRESS. Normal release39821474323/job119973691747 reports SUCCESS but explicitly withheld:17:19:26UTC “A newer production source revision is on main; await its full CI”. This is NOT a Render installation. Earlier release39820564262/job119970527806 safely failed its freshness/full-CI gate before deploy because expected65b had no finalized successful full build then. Never bypass either guard. Latest independent /api/health oktrue9a67265aaa916058621b5291c96268b6f0093bb9; foundation installed, invoice adapters/review guard NOT YET VERIFIED DEPLOYED.

No production activation/flag/tariff/schema/funds/customer-SMTP action by this page. Gates default OFF; no approved price or real inbox delivery is asserted. SMTP proof is actual Nodemailer only to synthetic localhost. Hosted wallet/UI/LAB/email remains NOT TESTED; internal/scheduler AI and global placement remain OPEN outside this slice. Manual and numbered functional checklist are not changed because there is no new real functional PASS.

Single next action: after current newer-source full main CI succeeds, inspect the normal guarded release, independently read health and verify deployed wallet/invoice/review source blobs against7f5afd3; record actual technical installation, then separately measured acceptance and approved tariffs before billing activation. Current owner remains responsible; another page must not duplicate this scope or change the other owner's paid-module code. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md; evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/invoice-source-progress.json.

AI-OWNER-WALLET-01 — INVOICE AND REVIEW FAIL-STOP GREEN MERGED / AWAITING MAIN CI AND RELEASE

2026-10-22 17:07UTC retained owner feat/ai-owner-wallet-20261022. Follow-up PR3041 exacta8c6d3d57aca2745b66f6718e2fb4229649e8d47/tree85740d9b0fe0db23ffa271911d3abad2516d5873 passed full CI39818057549:3877server+8backup,0failures/0skips, native PostgreSQL wallet and OpenAI/Azure review-database-failure tests executed, all Windows/browser/HTTP/E2E/invariants green. Merged7f5afd3c41153b6cdc4315a165880e71db533dd0. Original invoice3037 full3869+8 green merged073fd23; technical receipt3039 green mergede145188. Source integration retained other iOS/startup/module-writer owners; shared tracker PDF regenerated from merged union.

Invoice OpenAI/Azure reserve and exact settlement, canonical company/store scopes, unknown durable holds, fallback/retry fail-stop and internal commerce HTTP bypass are implemented. If writing REVIEW also fails, original RESERVED hold remains durable and safe wallet error still blocks paid fallback. Existing explicit abandoned-RESERVED review after15min remains required; no automatic refund, duplicate charge or provider replay. Local regression reproduced then21/21PASS after correction. Source algorithms/prompts/settlement/draft/job/stock/fiscal are unchanged. No accepted invoice/payment or physical device test repeated.

Push-main CI39819683069 for7f5afd3 remains PENDING at receipt; normal guarded release not yet verified. Original073fd23 push-main39816599054 ultimately SUCCESS after one isolated wholesale Chromium startup retry; that older result does not authorize later code. Latest independently read public health oktrue9a67265, foundation technically installed; invoice extension NOT YET VERIFIED DEPLOYED. Runtime/invoice/mail gates and prices remain unchanged/OFF; no production schema/config/funding/customer SMTP action. Local and CI SMTP acceptance use only synthetic localhost recipient, not real inbox delivery. Hosted invoice wallet/UI/LAB/customer email remains NOT TESTED. Internal/scheduler AI and global placement stay OPEN outside this slice.

Single next action: verify full main CI containing7f5afd3 and every applicable exact code blob, then normal guarded deployed revision; separately measured acceptance and approved customer tariffs before billing activation. Preserve all owners and existing accepted identities. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md; evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/invoice-source-progress.json. No scope release or general/all-AI/LAB PASS.

AI-OWNER-WALLET-01 — REVIEW-PERSISTENCE FAIL-STOP FOLLOW-UP / AWAITING CI

2026-10-22 continuous retained owner feat/ai-owner-wallet-20261022; follow-up branch fix/ai-wallet-review-fail-stop-20261022 basede145188. Same previously published claim3036 includes unknown holds and paid-retry fail-stop; no new scope or other owner takeover. New reproduced engineering FAIL: if provider/settlement fails and repository.review also fails, raw database error could escape the wallet boundary and allow an ordinary paid fallback. Reproduced9PASS/1FAIL on the exact invoice adapter test; corrected OpenAI/Owner and Azure catches preserve the safe AI_WALLET_USAGE_REVIEW error even when marking REVIEW is unavailable. Original durable RESERVED hold is neither released nor charged again; existing abandoned-hold admin review applies after15min. Focused21/21 PASS including actual fallback counter0 for both providers and direct Owner contract. No price/flag/schema/data/invoice/SMTP change. Full exact follow-up CI required, source and hosted acceptance remain AWAITING LAB.

Original source3037 is green3869server+8backup and merged073fd23; receipt3039 green39816829439 mergede145188. Push-main CI39816599054 is still running with wholesale browser Target.createTarget startup timeout; retry of only that failed infrastructure job was refused while its run is active (GitHub403), retry once after completion. Do not call the push-main CI or deploy PASS. Keep production billing/mail OFF. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md. Next: full follow-up PR CI green, merge, exact-main full checks and ordinary guarded release; retain owner and no accepted invoice/payment replay.

AI-OWNER-WALLET-01 — INVOICE SOURCE GREEN MERGED / AWAITING EXACT MAIN CI AND RELEASE

2026-10-22 16:46UTC engineering handoff, not LAB PASS. Owner feat/ai-owner-wallet-20261022 retained; source branch feat/ai-wallet-invoice-adapters-20261022, PR3037 exact606bcdebbbc81d0486f5b1f9fbe1880b7e766245, tree86f110f2f11e5b214b18645021af2077bb66e238 matching local tree. Claim3036 green39811498714 merged6087b1c BEFORE source. Source PR3037 green merged073fd234b5a7ef60062ccf408bee8b4cb3923cf0. Invoice extension NOT YET VERIFIED DEPLOYED. Exact local full run3568PASS/0FAIL/206infrastructureSKIP, affected89/89 and client build PASS. CI39814421377/job119949568725 logs3869server+8backup PASS/zero failures/skips, native wallet executed1256.644179ms, actual internal HTTP bypass and localhost synthetic SMTP executed PASS. All36 job steps show SUCCESS including browser/HTTP/E2E/invariants; four other checks SUCCESS including wholesale browser. Aggregate exact PR CI39814421377 finalized SUCCESS before merge. GitHub incident delayed final status publication; no gate was bypassed. Exact-main full CI and normal guarded deployment remain required.

Default-OFF gated invoice OpenAI/Azure composition reserves before provider, settles exact tokens/pages and retains unknown holds. Internal commerce HTTP bypasses billing; supplemental discount catches propagate wallet errors. Preserve invoice prompts/algorithms, existing authorized company/store access and accepted original settlement/job/editable draft; no invoice/payment replay, approval, stock or fiscal action. Foundation installation receipt9a67265 remains protected. Production runtime/mail/price configuration unchanged; hosted invoice wallet/UI/LAB and real inbox delivery NOT TESTED. Platform internal/scheduler AI and global placement remain OPEN outside this slice.

Single next action: verify full push-main CI for073fd234b5a7ef60062ccf408bee8b4cb3923cf0 and normal guarded exact deployment, then separately measured acceptance. No second owner or released scope. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md; evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/invoice-source-progress.json. Central publication requires this documentation PR green CI and merge; no hosted LAB/email PASS inferred.

AI-OWNER-WALLET-01 — INVOICE ADAPTER SOURCE / AWAITING FULL CI AND LAB

Retained owner feat/ai-owner-wallet-20261022; source feat/ai-wallet-invoice-adapters-20261022. Claim3036 green39811498714 merged6087b1c BEFORE source. Additive invoice OpenAI/Azure metering now implemented behind default-OFF runtime/invoice/company gates, canonical company/store scopes, reserve before paid calls, exact token/page settlement, REVIEW on unknown cost and wallet-error fail-stop before fallback/retry. Local adapter8/8, affected preview/FAST33/33, invoice+wallet59/59, localhost synthetic SMTP1/1 and client build PASS. Initial full local failures were source-evaluation dependency injection and outdated fallback-catch assertion; fixed with real adapter bindings and stronger wallet-stop assertion, existing checks retained. Final local rerun pending; PostgreSQL unavailable locally, complete native CI REQUIRED. Hosted invoice wallet/LAB/customer email NOT TESTED, no production configuration/data/action. Other AI/internal/scheduler/global notification acceptance stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md. Next: full source CI and normal exact release; retain owner.

AI-OWNER-WALLET-01 — FOUNDATION INSTALLED / INVOICE METERING EXTENSION ASSIGNED BEFORE SOURCE

Retained owner feat/ai-owner-wallet-20261022; extension branch feat/ai-wallet-invoice-metering-20261022. User again instructs «ξεκινα» after remaining invoice/OCR and email scope was stated. Fresh public health ok:true exact9a67265aaa916058621b5291c96268b6f0093bb9; all20 foundation runtime/test blobs independently match the accepted source. Prior release hold is superseded ONLY for technical installation, not hosted LAB/email or charging acceptance. Runtime/mail remain OFF; no production/config/schema/balance/email action. New extension NOT TESTED.

Bounded additive integration only: shared invoice Responses fetch adapter with canonical persisted company/store scope, page-priced Azure adapter using physical-page/operation evidence, billing-error fail-stop before paid fallback/retry, existing FAST/full/recheck/assistant/discount reader call sites, coverage labels and common safe error response. New AI_OWNER_WALLET_INVOICES_ENABLED gate defaults OFF in addition to existing runtime/company gates. Explicit approved token/page tariffs, no invented rate. Preserve invoice algorithms/prompts, all legacy provider/cache/fallback behavior when OFF, module/auth/selected-store checks, one original settlement/job/editable draft and existing review/stock/fiscal boundaries. Scheduler/platform-internal learning/organization monitor and all other owners remain outside this exact slice. This is independent billing composition, not takeover of Gate3/invoice semantics or N10/voice/report source.

Read current AGENTS/registers/checklist, invoice/pos manual and relevant source/checkpoints. Base4906f35. Claim must be green merged on main BEFORE source. Acceptance: actual adapter/route tests for disabled compatibility, scoped pricing/reservation/usage/page bounds, no paid call on exhausted balance, no swallowed billing error/fallback/retry, durable unknown holds and unchanged existing invoice regressions; full native PostgreSQL CI/HTTP/browser/build/invariants, ordinary exact release. No real invoice re-upload/payment/approval/stock/fiscal or SMTP for tests. Source acceptance remains AWAITING LAB until separately authorized scoped real observation.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-wallet-invoice-metering.md. Next: green claim then additive adapters and causal tests. Same retained owner through completion or named handoff.

AI-OWNER-WALLET-01 — Historical foundation release hold (superseded technical installation)

22Oct2026 final bounded handoff. Retained owner feat/ai-owner-wallet-20261022; source3009 green mergedcd633e9, source receipt3030/docsCI39806493996 green merged65acc8cb. Before-source claim3008 preserved. Exact PR CI39804554047 AND exact source-main CI39806020956 all5jobsSUCCESS: each3827serverPASS/0FAIL/0SKIP plus8backupPASS; actual native wallet, mounted stale-store UI, HTTP, Chromium, invariants, Windows and wholesale all executed. All20 owned runtime/test blobs independently identical between reviewed source and currentmain9a67265. Initial fixture FAIL/correction remain in checkpoint; no weakened assertion or unchanged failed-head retry.

Ordinary release39807310528/job119923978373 completed guardSUCCESS with deploy withheld: "A newer production source revision is on main; await its full CI". Newer report source3027/3028 is independently owned. Latestmain9a67265 full CI39807166764 pending at observation. Public health ok:true exact201eb5e01e6a9972b57ed12ea9bfccabe3600b83; wallet NOT INSTALLED by this observation. No manual deploy, guard bypass or change to retained report/voice/invoice scope. Release engineering evidence is NOT hosted LAB/UI/email PASS.

Prepared first version: company-shared prepaid EUR AI wallet, confirmed-receipt SuperAdmin credit paid to MyWorkStation, atomic reservations/actual-token debit, per-store usage, owner/company isolation and CREDIT/LOW20%/EMPTY notifications with durable one-attempt SMTP. Runtime/mail OFF; no real customer funding, tariffs, production schema/configuration, email or business mutation. OWNER_ASSISTANT is the ONLY metered adapter. Invoice/OCR/Azure/other providers, broader in-app placement, approved EUR tariff setup and scoped synthetic LAB/email acceptance remain OPEN; no all-AI/commercial completion claim or manual PASS. Normal POS/payment/stock/fiscal handlers unchanged. Existing accepted transactions never replayed.

Single next action: observe latest combined main's full green CI and normal guarded healthy release; verify the20 wallet source blobs in the actually deployed revision. Then complete remaining scoped provider/notification/setup acceptance before any real customer charging. Owner remains assigned until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-owner-wallet.md; ops docs/ops/ai-owner-wallet-20261022.md; exact evidence CHECKPOINTS/EVIDENCE/ai-owner-wallet-20261022/source-ci.json. Do not redevelop the delivered foundation or repeat financial/LAB examples solely for evidence.

AI-OWNER-WALLET-01 — ASSIGNED BEFORE SOURCE / NOT TESTED

Owner feat/ai-owner-wallet-20261022. Explicit instructions: implement prepaid AI paid to MyWorkStation, manual authorized credit after receipt, company wallet shared by stores with store usage breakdown, low20%/empty/credit notifications in app and email. No direct provider payment by owner. Independent billing extension; AI-CREDITS-01 central organization monitor, invoice reading/settlement/learning, VOICE assistant capabilities and automatic-report-mail owners retained. No takeover or repeated financial/stock acceptance.

Baseline main/runtime07110f16c361a2c36fe507220816e12707f623d5, public health ok:true observed22Oct2026. Read AGENTS, current registers/checklist, relevant AI-credit/owner-assistant/mail source and checkpoint evidence. Existing central monitor is an organization estimate, not a customer wallet. Owner provider uses central key; no existing customer wallet found. New behavior NOT TESTED, not LAB PASS.

Bounded source scope: new AI wallet ledger/repository/service/routes/components/tests and additive route/UI/provider composition only. Integer monetary units, tenant isolation, atomic reservation/settlement, immutable idempotent credits/debits, versioned configurable tariffs; no invented provider rates. Durable threshold-event dedup and email attempts; no real email without configured opt-in. Persist before send, uncertain sends held without blind retry. Credits require verified-receipt reference and SuperAdmin; owner cannot self-credit. Wallet remains disabled by default and no real customer balances/charges are enabled during development. Payment gateway/automatic card charging, production schema/configuration/money actions excluded. Protect normal POS/sales/stock from AI-only refusal. Broader provider integrations stay explicitly unenabled until metered and tested.

Acceptance: isolated real PostgreSQL concurrency/rollback/idempotency and cross-tenant/role/retired-session HTTP tests, notification dedup and timeout tests, no provider invocation on insufficient funds, no double settlement, existing suite/build/invariants green. Never equate tests with hosted LAB. After exact green source/main CI and ordinary release verify revision; actual UI/LAB/email remains separate measured acceptance with no historical transaction replay. New schema only dedicated wallet tables, no business table migration from sandbox.

Next: publish this claim green on main before source; then implement the bounded wallet foundation and adapters. Owner retained until completion or named handoff. This is not completion or manual PASS.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ai-owner-wallet.md

22/10/2026 13:07 Europe/Athens — KAT-POS-PHOTO-KEYS-01 / REAL CONFIGURATION PASS / v3702

Retained owner feat/kat-pos-photo-layout-20261021 under ops/kat-catalog-import-20261020. The new layout is now PUBLISHED to actual kat-store/pilot-company, shared by its POS terminals. Native PlatformSuperAdmin CloudChrome tab6 loaded current KAT templatev3701/palette, selected KAT company, validated recovered owner list, set productColumns5 and checked ONLY KAT. One direct native Publish at10:07:35.196225UTC produced v3702. No GLOBAL draft save. LAB receipt PR3005/head8bea9cca/applicable docsCI39760363583SUCCESS merged4c003524 BEFORE real action. Source2983 merged20d99045, final3762+8/full native CI/mainCI39675252686 green; ordinary releaseverified20d99045, later unrelated healthy runtime1b98d90f retained. No runtime/deploy/guard mutation by this configuration task.

Fresh immediate baseline10:07:15.855771UTC and after10:07:49.673197UTC: only KAT layout changed. ZERO differences in whole product/store-product/preparation/SET/stock-movement/sales/payments/transactions/shifts/GLOBAL fingerprints for KAT, LAB and N40; exact other-layout hash unchanged. KAT1900catalog/allstocks0/199movements/165sales/180payments/213transactions; existing KAT-POS-02 shift untouched. LAB110catalog at this fresh window (other-owner fixtures added between earlier acceptance and now),90sales/90payments/134transactions; no fixture creation by this page. N40allzero.

No product/retail/VAT/department/stock/activation/recipe/fee/financial/payment/preparation/shift/fiscal write.

Independent full saved readback matches EVERY prepared quick/root/child identity/order exactly:242unique active existing products/242assignments,20quick15assigned+5blank,20roots16named+4blank,7beveragechildren. All existing quick/root palette colors retained; absent audienceSettings normalized to empty{} by existing route, no audience setting change. Reopened native saved KAT template independently shows KATv3702/companyselected/20groups and exact labels. Evidence05/06/07 and saved KAT screenshots in CHECKPOINTS/EVIDENCE/kat-pos-photo-keys-20261022. Native Designer preview wraps its20categories differently from actual POS; actual native LABPOS20-root/two-row/child/group16/blank20 acceptance was verified separately. No physical KAT terminal login, cashier product-click/payment/fiscal acceptance claimed or replayed.

Published layout scope closes prior AWAITING REAL PUBLICATION. Each KAT POS needs ordinary refresh to load shared saved layout; both physical terminals' refreshed display remains USER NOT TESTED. SEPTONA slot16 deliberately remains blank: owner requested1.00 but exact current candidateKAT33822 costs1.50; no unauthorized retail change or misleading1.00 label. Other screenshot-missing/ambiguous/inactive items remain unassigned. Separate0.50 mobile-topup automatic SET remains OPEN with same KAT owner. No second import/stock reset/staff/coffee test. Single next owner action: confirm price/identity of SEPTONA and verify refreshed physical KAT screens; broader fiscal/hardware readiness remains with existing owners.

22/10/2026 — KAT-POS-PHOTO-KEYS-01 / LIMITED LAB PASS / REAL KAT PUBLICATION NEXT

Retained owner feat/kat-pos-photo-layout-20261021 under ops/kat-catalog-import-20261020. Source PR2983 final97dc55fe/fullCI39673790704 SUCCESS3762server/8backup, no skips; merged20d99045 and exact-mainCI39675252686SUCCESS. Ordinary Render dep-dbcikobrjlhs73dk7oa0 LIVE21Oct21:16:45UTC; independently verified /api/health exact20d99045. Later unrelated ordinary release1b98d90f currently healthy; no source/guard bypass by this page.

22Oct07:04UTC native PlatformSuperAdmin Cloud Chrome tab6 published ONLY existing synthetic LAB store cmtpopbgo000trhb5ng9ytiru companycmtpopbgk000prhb5qc60zxus, version11→12. Loaded LAB template/palette, selected LAB company, native prepared-list preview, exactly one LAB checkbox, direct existing-store Publish once; no GLOBAL save. Exact independent before07:03:53.257258Z/after07:04:52.053530Z proves unchanged whole catalog/product/preparation/SET/stock/movement/sale/payment/transaction/shift/control/GLOBAL fingerprints; only LAB layout changed. LAB105catalog/95movements/90sales/90payments/134transactions, MAINshiftcash/card0/drawer9.4; N40allzero, KAT1900/allstocks0/199movements/165sales/180payments/213transactions and layout3697 unchanged during publication. Existing audienceSettings retained.

Native LAB POS2 Cloud Chrome tab7 actually showed20quick/20roots,16named+4blank; first root opened2children and childA exact synthetic product1.65; root16 showed its product; blank20 showed0products; cart remained empty0.00, no checkout/preparation/sale/payment/shift. Authentication request timed out, but subsequent explicit existing-tab canonical navigation and fresh positive signed-in LAB POS2 observation verified success. No repeated sign-in or credential inspection. Final readback10:00:39UTC LABv12/all protected LAB values unchanged; real KAT layout3701 reflects intervening other-owner releases, not this publication. No physical KAT/hardware/fiscal/payment or native editor write acceptance claimed. Evidence CHECKPOINTS/EVIDENCE/kat-pos-photo-keys-20261022/01–04, measurement.sql and lab-layout-v12.jpg. New limit20 and nested navigation are LIMITED LAB PASS; KAT publication NOT YET DONE.

Workspace maintenance pruned old temporary mapping files; all18 original owner references recovered from their Library identities. Exact242active existing IDs reconstructed and reviewed against source images/current catalog,20quick15assigned+5blank,20roots16named+4blank,7beveragechildren. Existing palette retained; disputed SEPTONA1.00 versus stored1.50 left blank, missing/ambiguous/inactive products not created or guessed. Preserve base/store prices,VAT,departments,allstocks,activation,recipes,SETs,financial/other stores. Separate mobile-topup service SET remains OPEN. Required next single action after this receipt merges: fresh KAT baseline/version, load current KAT template, import reviewed KAT-only plan, one selected-store native guarded Publish, independent full readback/control comparison and KAT confirmation screenshot. Owner retained; no accepted import/fee/financial replay.

22/10/2026 - AUTOMATIC-DISPATCH-PERSISTENCE-RESTORE-01 / FIRST FULL CI FAIL CORRECTED / AWAITING NEW FULL CI

No productionDDL/guardinstallation/config/SMTP/restore/action executed. Newsource remainsOFF and NOTfinaltestready. Separateexplicit6tableprovisioning+canonicalpromotion/fullactualschema/copyproof/noactivejobs+guardenrollment/non-restoredactivation/mailboxsetup are concrete remainingsteps, no newownershipapproval required withinalreadyapprovedscope. Prior source record below is historical publicationstate, not contradictory renewedclaim.

22/10/2026 - AUTOMATIC-DISPATCH-PERSISTENCE-RESTORE-01 / SOURCE INTEGRATED / AWAITING FULL NATIVE CI

Owner codex/central-auto-dispatch-20261022 after explicit approved transfer3059/CI39831061467/220315e; exact next source claim3062/CI39832842921/145a9896 and safe prospective-manifest amendment3063/CI39835114099/05b699e ALL greenmergedBEFORE corresponding source. Four disjoint implementation streams now integrated. This combined source also includes exact unchanged trustedSMTP tranche3061(mailSHA52cdca17/test3562b514); priorCI39832167206 build120011410555 ran3991server+8backup/0FAIL/0SKIP but workflow ultimatelyCANCELLED, so it is NOT aggregate green/release proof. CombinedPR supersedes that open source attempt; no bypass of fullchecks.

Implemented: explicit atomic6tableprovisionfunction (neverstartupDDL), defaultOFF policy/grant, separate private128bit mailboxverification and consent challenges bound to lifecycle/purpose/frequencies/currentversion+consentrevision, expiry/attemptlimit/cooldown and redactedAPI. ExactcurrentUserSHARE recheck, realSUPER_ADMIN+sessionVersion/scopedgrant, explicitack, freshcutoffs. ExistingactualStoremetadataPUT now originalepoch/lifecycle->StoreNOKNOWAIT->all6catalogprobe->atomicchangedemailinvalidation+write; allabsentlegacy allowed, partialstoragefailclosed, invalidationevenOFF. ExistingmanualAPI/validation preserved. Newunverifiedrecipient doesnotrevokeotherrecipients: scopedgrant permits<=5individuallyverified+separatelyconsenting addresses withinallowedfreqs; edit/revoke/readd invalidatesoldauthority.

Immutable<=2MiB bytes/hash/settings/gen/period persistence; freshlocked Company/license/Store/User/modules/settings/rule/authorization/source checks; configtableSHARENOWAIT fences absentinserts (no falseFKKEYSHARE claim); explicitReadCommitted/readlocks precedeconfigreads. Payload+slot prepare inoneoutertransaction, drivercommitsATTEMPTING beforeonescopedSMTP call; ACCEPTEDmeansactualSMTPacceptanceonly, ambiguousUNKNOWNneverautoretry. Boundedlatestcompletedperiodscheduler defaultOFF/zeroDBorSMTP/keysetscan/maxrecipients/serialcalls/nooverlap, tracked byexistingbackgroundDrain so SIGTERMstopsadmission anddrainsattemptbeforedisconnect. Actualauthenticatedroutes+storekeyedUI separateverification/consent/grant/policy controls, staleotherstore resultsdiscarded, credentials/tokensnotpersistedinbrowser.

ControlledrestoreactualAPI+processrunner defaultdryrun: fixedservice/PG/workspace/archiveSHA+expiry+ack, externalOFF+newepochreadback/suspend/independentzeroinstance+noactivedeployproofs beforeimmutablefd-backedtransactionalpg_restore; noresume, finalcontrolOFF/freshcutoff. Scope ONLY controlledoperatorworkflow; arbitraryprivilegedout-of-bandrestorewithsurvivingprocess isunsupported. No newpaidstore/B2CASassumption. StrictnonrestoredRendercontrol/identity/fullfingerprints, no historical/straddlingperiodbackfill; oldrestoredgrants mismatchnewepoch andrequirefreshverification/consent/grant. Currentcanonicalmanifest+columnreview unchanged. Proposedfull6tablemanifests are NOTdefaultloaderinputs; explicitschema provisioning, exactschema/copyrestoreproof/noactivejobs/planHash+webbackupcoordination and separatepromotion remain activationgate.

Verification: Node20 combined17affectedfiles75cases=72PASS/0FAIL/3explicitlocalnativeSKIP(noPG); latestpayloadgeneration/expiry guards separatelyrerunown+dispatch17PASS/0FAIL/1nativeSKIP. Queuedpg_dump actualprivateverify_archive full+selectiveCOPYaudit+existingPG18image path; nofakeverifiedboolean/noactualprodrestore. Originalepoch/freshcutoff denieshistoricalperiod explicitlyboundedhelperproof, no inventedfullSMTPtest.

Does NOTprovefull259tableproductioncopyrestore or activatecanonicalmanifest; thatrealgate remainsNOTTESTED. No executor/recovery/manifest/workflow/sourcepermissionbroadened; destructivefixture privateguardedloopbacktestdb/randomschema only, URLoverride/duplicateparamsdenied, CIrequiresactualnativeexecution. Currentcombinedsource3065pendingCI; newacceptancewilljointhatPRaftergreenclaim, rerunfullCIlegitimately. Readonlyproductionpreflight2026-10-22T19:04:48Z: expected259/actual254, missingexact6newdispatchtables; onlyextraStoreLifecycleRuntime(existinginternalallowed). StoreLifecycleFence/Execution absent. No realDDL/config/SMTP/restore/paid/businessaction; dispatchOFF.

22/10/2026 - AUTOMATIC-DISPATCH-PERSISTENCE-RESTORE-01 / SAFE TWO-PHASE MANIFEST AMENDMENT BEFORE SOURCE

Same owner/greenclaim3062/CI39832842921/merge145a9896b29a797b8c5dccf12957f3a9881d5599. Root review found canonicalmanifest promotion before explicit6table provisioning would break existing lifecycle inspect (reviewed relation missing) even while dispatchOFF. Therefore runtime OFF source must preserve existing canonicalmanifest/columnreview bytes and lifecycleplanHash. Infrastructure additionally claims exactly NEW ops/backup/lifecycle/automatic-report-manifest.proposed.json and automatic-report-column-review.proposed.json, full prospective reviewed snapshots only, not default loader input. Newartifact writes start only after this amendmentgreenmerged. Restore only this page's unpublishedcanonical additions; preserve unrelatedowners.

After explicit reviewed provisioning, native exactschema+restoreproof, noactive lifecyclejobs and synchronizedapp/backuprollout, finalpromotion can install proposedcanonicalmanifest atomically under separate exactclaim. No optional-table/executor relaxation or missingtablebypass. All6tablesDIRECT/resetREMOVE; fullprospectivereview includes challengeLifecycleGeneration and all finalcolumns. This source trancheremains defaultOFF/noactualDDL/config/SMTP/restore, no finalready/PASS claim. Other3062sourcepaths unchanged. Source may deployOFF without breaking currentlifecycle; activation/provisioning gate stays concrete. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-persistence-restore.md.

22/10/2026 - AUTOMATIC-DISPATCH-PERSISTENCE-RESTORE-01 / ASSIGNED BEFORE SOURCE

Owner codex/central-auto-dispatch-20261022 under explicit owner approval and green transfer3059/39831061467/220315e. This is exact next integration source claim; source begins only AFTER applicable claimCI green mergedmain. SMTP tranche3061 separately reviewed/frozen and awaits fullCI; no overlapping edits to mail.js.

Exact source ownership: automatic_reports NEW server/src/services/automatic-report-dispatch-schema.js, automatic-report-recipients.js, automatic-report-dispatch-policy.js and tests automatic-report-dispatch-schema.test.js, automatic-report-recipients.test.js, automatic-report-persistence-postgres.test.js; pos_stores NEW server/src/services/store-metadata-mutation.js, tests store-metadata-mutation.test.js, store-metadata-mutation-postgres.test.js plus ONLY existing platform-admin.js Store metadata/responsibleEmail PUT; commerce_ai NEW services automatic-report-eligibility.js, automatic-report-dispatch.js, automatic-report-scheduler.js and tests automatic-report-eligibility.test.js, automatic-report-dispatch.test.js, automatic-report-scheduler.test.js, automatic-report-dispatch-postgres.test.js; infrastructure NEW service automatic-report-activation.js, ops/backup/restore-controlled.mjs, ops/backup/CONTROLLED_RESTORE.md, tests automatic-report-activation.test.js, automatic-report-controlled-restore.test.js plus ONLY dispatch6table additions to ops/backup/lifecycle/manifest.json,column-review.json; root NEW server/src/routes/automatic-report-dispatch.js, client/src/components/platform/AutomaticReportDispatchManager.jsx, corresponding route/UItests, existing index.js bounded defaultOFF startup/mount/shutdown and AutomaticReportSettingsManager.jsx store-keyed dispatchmanager mounting. No other retained scope takeover.

Six tables: AutomaticReportDispatchPolicy, AutomaticReportAutomationGrant, AutomaticReportRecipient, AutomaticReportRecipientConsent, AutomaticReportPayload, existingcontract AutomaticReportDeliverySlot(exact7cols). Explicit provisioning function/CLI only, no reader/mutation-pathDDL or defaultproductionbootstrap. Config rows monotonic safeBIGINT, current canonicalint64 lifecycle, policy/grantOFF, recipientunverified, consentinactive; all6DIRECTresetREMOVE. No invented retentionduration or automatic suppression/slotdeletion. Immutable <=2MiB payload bytes/hash/metadata atomic, sameidentity differentbytes refuses. Recipient cap5; original lifecycle->scopedStoreNOKNOWAIT->Policy->Grant->Recipient->Consent writerorder; actualcurrentSUPER_ADMIN required. Grant binds exactUser/sessionVersion, scope/gen/freqs/activationidentity/notBefore and independentrevision; no Owner/service grants.

Verification private random128bit hex32token, scope/version/nonce/purpose hash, expiry10min/max5attempts/cooldown60s; token only mail aftercommit, never API/log. Consent is SEPARATE recipient-mail challenge containing exactfrequencies/provisionaldisclosure; confirm with freshmailboxtoken+explicitaction, notverification/admincheckboxalone. Bind currentrecipientversion+consentrevision+purpose/frequencies, recordconsumedproofhash, replaydenied. Revocation alwaysavailable. Changed canonical responsibleEmail set atomically invalidates verification/challenge/consent/grant/policy with metadatawrite; readddoesnot restore oldauthority.

Fresh eligibility rechecks actual Company/license/modules/Store/User/settings/rule/source plus policy/grant/recipient/consent and exact immutable payload. Fixed configtableSHARENOWAIT locks fence absentinsert/updaters for CompanyModule/StorePaidModule/CashControlStoreRule; no assumption SHAREparent blocks FKKEYSHARE. ExplicitReadCommitted with locks-before-configreads; bounded financialsource one MVCCSELECT, nofinancialtablelock. Prepare payload+slot in one outertransaction using txboundrepositoryfacade, then claim/actualdriver startcommit before one SMTP call. Unknown/terminal neverautoretry; no historybackfill. Scheduler defaultOFF zeroenumeration/DB/SMTP; bounded keysetscan/serialattempts/nooverlap/unrefstop, latestcompletedperiodonly and periodFrom>=activation/grant/consentcutoffs.

Chosen restore approach uses ONE non-restored Render JSONcontrol AUTOMATIC_REPORT_ACTIVATION_CONTROL {v,serviceId,epoch,issuedAt,notBefore,enabled}, fixedservice srv-d9isenfavr4c73bdh52g; strictcanonicalvalidation/missing=>OFF. Fullfingerprint includesenabled; activationidentity excludesenabled, allowing enrollmentwhileOFF; enabled independentlydenies. GrantgrantedAt>=issuedAt, periodFrom>=allcutoffs, no historical/straddlingperiod. Executable controlledrestore defaultdryrun: atomically externalOFF+newepoch, verifyreadback, suspendallserviceinstances, twiceverify suspended/zeroinstances/noactivedeploy immediatelybefore pg_restore; fixedservice/database/archiveSHA binding, credentialredaction, noautomaticresume. Restoredoldflags/grantscannotauthorize afternewcontrol; freshgrant/verification/consent required beforeexplicitON. Uncontrolled privilegedout-of-bandrestore whileprocesssurvives is unsupported; no impossible sameDBrollbackguarantee. ExistingB2 has no verifiedCAS and is NOT usedasatomicledger; no newpaidstore.

Meaningful native isolated tests must prove initialabsentrow/update/reverselocks, scopes/role/session/revocations, token expiry/replay/attempts, bytehashimmutability, commit-before-SMTP/concurrentonesend/unknownnoretry, actual HTTPstub Rendercontrol+processboundary no restorebeforestoppedproof, and archive-before-accepted-slot rollback followedbynewepoch/cutoff forbids resend. Actual runtime/SuperAdmin UI browsertest expected. Existingtests preserved; no new functionalLAB/USERPASS fromCI. Fullsource/mainCI and normal exactrelease required. No realSMTP, productionDDL/config/restore/paidprovisioning/businessaction; final controlled acceptance/configuration remains explicit reviewable finalstep. dispatchOFF. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-persistence-restore.md. Nextgreenclaimthenownedsource.

22/10/2026 - AUTOMATIC-DISPATCH-RECIPIENT-RESTORE-HANDOFF / ASSIGNED BEFORE SOURCE

Explicit owner approval in current conversation: "egkrinv", accepting the concrete transfer of recipient/email and safe restore integration to this page. ΑΝΑΛΗΨΗ ΑΠΟ retained recipient/platform/mail scopes and feat/store-shifts-inventory-clear-20261018 ONLY automatic-dispatch integration — ASSIGNED codex/central-auto-dispatch-20261022. Existing unrelated lifecycle/inventory/backup/manual/AI-wallet owners and all accepted tests remain protected. Central receiver is sole owner of this bounded recipient/transport/restore integration; old pending owner-review gate is superseded by explicit owner transfer, not technical approval.

First source tranche after GREEN merged claim: ONLY server/src/services/mail.js additive createAutomaticReportSmtpTransport bound explicit company/store scope and new server/test/automatic-report-smtp-transport.test.js. Preserve existing manual sendEmail/getMailStatus/test-email behavior. Existing driver passes only to/subject/text, so transport binds scope internally, executes real demo outbound guard before creation and before send, requires canonical single recipient, explicit envelope and bounded provider evidence, preserves actual accepted/rejected/pending/messageId/response/envelope without synthesizing acceptance. One awaited send, no retry. Missing/malformed evidence remains UNKNOWN via existing adapter. Inject transport only for isolated tests; no actual recipient/SMTP/config action. Acceptance includes actual adapter evidence integration, ambiguous/rejected/pending/wrong recipients/envelope/getter defense, zero transport on demo/invalid input, timeout no retry and exact timeout/config compatibility.

Parallel READ-ONLY design: complete verified-recipient/consent/policy/scoped explicit current-SUPER_ADMIN authorization grant and immutable payload persistence; real Store metadata/responsibleEmail writer invalidation atomicity; six-table lifecycle manifest/reset/delete/retention; enforceable non-restored OFF/cutoff or external suppression authority. Static same-DB/env marker alone is insufficient for same-epoch rollback. Exact subsequent source paths and contract must be recorded before edits. No invented grants, retention interval, paid authority or arbitrary out-of-band-restore guarantee.

Full source PR/main CI, ordinary guarded release and exactLIVEhealth required for each runtime tranche; isolated tests are NOT final functional acceptance. dispatchOFF until actual persistence/authorization/restore safety/scheduler integration and controlled final test ready. No real email, production DB/config/schema mutation, restore, paid provisioning or accepted-test replay. Single next action: green merge this ownership/first-source claim, then implement exact transport tranche and settle concrete next integration contract. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-recipient-restore-handoff.md.

22/10/2026 - CENTRAL-STORE-MODULE-WRITER-LOCK-01 / TECHNICAL RELEASE VERIFIED / FINAL EMAIL TEST BLOCKED

Owner codex/store-module-writer-lock-20261022; central receiver codex/central-auto-dispatch-20261022. Source PR#3044 exact aa0d8321a2287e29d5dd6e6c2ecb4a4c8f5ebca0 fullCI39819376016 all5SUCCESS:3899server+8backup/0FAIL/0SKIP, native parent+6actual PostgreSQL subcases PASS. Merged5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774; exact-mainCI39821105794 all5SUCCESS/build119973999992:3916server+8backup/0FAIL/0SKIP, same native parent+6unskipped PASS. Independent source/unit/native reviews unchanged; original four frozen source blobs preserved. Existing globally installed lifecycle fetch pins GET origin epochs and forwards them for both PlatformAdmin module PUTs; no client change.

Ordinary guard39822773699/deployjob119978211519 resolved exact5c8ccf5e, Verify/Trigger Render/Wait exact production ALL SUCCESS (guardhead5c9557c5 is docs coordinator, resolved runtime is5c8ccf5e). Earlier guard39821474323 had skipped Trigger/Wait and is NOT release proof. Render dep-dbd4faff3r2c739b9rpg deploy_hook LIVE2026-10-22T17:33:32.817973Z exact5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774. Independent public /api/health no-cache checked2026-10-22T17:45:48.501386Z HTTP200/oktrue/exact same revision/version0.22.0+kat-test-pos. Bounded writer fix INSTALLED; no feature LAB/USER PASS inferred.

Final automatic email test remains BLOCKED; dispatchOFF. Authoritative verified-recipient/consent/grant/policy/payload persistence, trusted SMTP acceptance and scheduler remain absent/retained. Lifecycle/restore review2833comment6346383862 unanswered: same-DB archive rollback may erase external-send evidence; non-restored OFF/cutoff or external suppression contract must be settled by retained owner before DDL/ON. Concrete review CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-production-review.md. Next exact relevant writer is platform-admin.js Store metadata/responsibleEmail PUT, including Store-name fallback; retained recipient/platform owner must expose exact handoff and atomic invalidation contract, no duplicate claim. Coordination2704comment6346828045. Technical-activation-only CompanyModule fix would not cover CASH_CONTROL and is not claimed as progress.

No real email, production/LAB data action, DDL/config/provisioning/billing/license/stock/financial/fiscal action, restore or accepted-test replay. Existing KAT/Rizareio/DAILY/Android/VOICE/manual acceptances preserved. Source implementation and earlier claim below are historical publication-time states superseded by this release receipt, not renewed work. Three canonical registries/checkpoint/scopedPDF+receiptJSON synchronized; latest global PDF preserved. Single next action: retained lifecycle and recipient/platform owners resolve exact published contracts/handoff, then remaining source integration and one final controlled acceptance test; no final-ready/ON claim.

22/10/2026 - CENTRAL-STORE-MODULE-WRITER-LOCK-01 / SOURCE IMPLEMENTED / AWAITING FULL NATIVE CI

Owner codex/store-module-writer-lock-20261022 under central receiver codex/central-auto-dispatch-20261022. Before-source claim3042 finalebe852d1e19d0414a8ed17086314f43a5b793e04/CI39818097726SUCCESS merged0c0d8594728848667d6881876272ade713b31465 BEFORE source. Exactly4source/testpaths only: existing platform-store-modules.js plus new store-module-mutation.js, unit and native tests. No other runtime/config/schema/manual changes. Root integrates records; automatic_reports helper/route/unit, pos_stores native, commerce_ai source/unit review and infrastructure native review. No duplicate retained owner work.

Both actual StorePaidModule UPSERT paths now share original lifecycle epoch -> lifecycle SHARE -> company-scoped Store FOR NO KEY UPDATE NOWAIT -> fresh Store/tx commercial fallback and same exact UPSERT -> commit -> existing audit/response. Inactive Store configuration, old company/store preflight404-before-bodyvalidation, SuperAdmin/CORE/commercialReady hierarchy/modulekeys/prices/dates/notes and postcommit audit semantics preserved. Store55P03 maps explicit409 STORE_MODULE_BUSY/no retries. Helper rejects missing/accessor scope and invalid callback/database before checkout and never upgrades request epoch. No new schema bootstrap or generic permission bypass.

Actual original mounted Router baseline reproduced root-Prisma UPSERT outside transaction before modification. New Node20.20.2 actual helper/mounted bothPUT suite16PASS; root protected settings8+packagehierarchy3 ->27PASS/0FAIL/0SKIP. New native guard1PASS/0FAIL/1explicitlocalSKIP(noPG), total focused28PASS/0FAIL/1nativeSKIP. Independent exact source/unit and native fixture reviews NO BLOCKERS. Interim review caught removed preliminary404 ordering and missing descriptor/callback validation; corrected before freeze and added coverage. Native URL query-overrides rejected, mandatory CI-isolation assertion prevents silent skip. New native parent+6subcases must execute unskipped in full CI: actual initial/update UPSERT vs SHARE and compatible FK KEY SHARE, reverse parent lock, lifecycle refusals/highint64/cutover, foreign/missing/inactive/legacy store, callback rollback and unchanged controls.

Frozen SHA256 helper568fb1c0ca16b478de8262803fc9528b332d5b2cba9a6b53261687d144277dfd; routef025532f657a697891f812345339e8d45bf89e4d94d2a8b84d7d101f6bdd0250; unita0f9bb26c8f32ecd5d2a4a32c099460e811363d48d4beb7123f1b7897ba518a5; native423682c3de2f66ccd40d5535a3b8c83ab1bba0aa50e481fc7991d5d5f18c90e4. AWAITING full PR/exact-main CI/exact remote review/ordinary guarded release; NOT INSTALLED at publication. These are isolated tests, NOT new functional LAB/USER PASS.

Real final-test readiness remains BLOCKED separately, not cleared by writer locking: authoritative recipient verification/consent/grant/policy/payload persistence and schedule absent; existing sendEmail discards actual SMTP recipient acceptance. Critical lifecycle/root restore contract review in CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-production-review.md and retained-owner request2833comment6346383862: FRESH_STORE_KEEP vs REMOVE contradiction and same-DB archive rollback can erase external-send evidence. Retained feat/store-shifts-inventory-clear-20261018 must review exact physical tables, retention/reset/delete/restore suppression before provisioning/ON; no approval or retention invented. Stable non-restored restore-OFF cutoff or external suppression remains a concrete undecided contract. CompanyModule/principal/rule/recipient writers and absent-row gates remain separately coordinated.

dispatchOFF; no real email, production/LAB mutation, schema/provisioning/config/billing/license/stock/financial/fiscal change or accepted-test replay. Existing driver3027/settings3028/source3032 and accepted manual/store/native/VOICE tests protected. Canonical three registries/checkpoint/scoped PDF synchronized, latest global PDF preserved. Single next action full native CI/exact source review, then normal verified release of this bounded writer fix; retained production contract review proceeds in parallel before final test.

22/10/2026 - CENTRAL-STORE-MODULE-WRITER-LOCK-01 / ASSIGNED BEFORE SOURCE

Owner codex/store-module-writer-lock-20261022, central receiver codex/central-auto-dispatch-20261022/coordinator codex/central-four-streams-20261018. Explicit owner instruction continues automatic reports until final test. Independent previously unclaimed prerequisite from2704comment6344797233; no exact active claim/open PR found for these two StorePaidModule UPSERTs. N50/Workforce, billing-policy, lifecycle/schema/backup, consent/mail/report/native/KAT/Rizareio owners retained. No transfer of their other source paths.

Exact source scope ONLY existing server/src/routes/platform-store-modules.js plus NEW server/src/services/store-module-mutation.js, server/test/store-module-mutation.test.js and server/test/store-module-mutation-postgres.test.js. Export withStoreModuleMutation(db,{companyId,storeId},work): capture originating lifecycleContext epoch before its first await; assertLifecycleMutation(lock:true) then scoped Store FOR NO KEY UPDATE NOWAIT; callback({tx,store}) receives fresh locked row; return only after commit. Preserve inactive-store setup: no new active=true filter. Clear409 STORE_MODULE_BUSY/no retry for55P03; other errors propagate. No bindFresh epoch upgrade. Both exact existing UPSERTs must use callback tx and fresh Store; commercialReady company fallback read uses same tx after lock. Preserve SuperAdmin policy, CORE restriction, all commercial/package hierarchy/field validation/prices/dates/notes/response behavior and existing post-commit audit semantics. Existing schema bootstrap stays unchanged/outside helper; no new DDL or table.

Required new evidence: original causal failure before fix where feasible, actual helper and mounted route tests for both writers, commit ordering, rollback/refusal and exact validation compatibility. Native random isolated schema/twoPrisma clients proves initial absent override/update vs SHARE, compatible FK KEY SHARE, reverse writer/read lock, inactive Store, full-int64 original/missing/stale epochs, busy/maintenance/retired/foreign lifecycle and scope, unchanged control. Deferred barriers/no sleeps/retries; native must execute unskipped in full CI. Existing tests unchanged, all full PR/main/build/HTTP/Windows/browser checks and ordinary exact guarded release required. CI/local tests are NOT feature LAB/USER PASS.

Source NOT IMPLEMENTED/NOT TESTED; starts only AFTER this claim applicable CI green merged on main. Root alone updates three canonical registries/checkpoint/scoped PDF. Automatic_reports owns helper/route/unit, pos_stores native file, root integration; read-only lifecycle/consent audits proceed without edits to retained scopes. Existing driver3027/source3032 technical delivery and accepted reports/manual/store tests protected; no repeats. This scoped writer lock is NOT full authoritative delivery eligibility: company/module/principal/rule/consent/policy/restore phantoms and schema/provisioning/transport/scheduler remain OPEN. dispatchOFF; no production/LAB/config/billing/license/recipient/SMTP/financial/stock/fiscal action. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-store-module-writer-lock.md. Single next action green claim merge, then exact four-file implementation.

22/10/2026 18:57 Europe/Athens - CENTRAL-AUTO-DELIVERY-DRIVER-01 / TECHNICAL DELIVERY VERIFIED / DISPATCH OFF

Owner codex/report-delivery-driver-20261022, coordinator codex/central-four-streams-20261018. Bounded two-file integration COMPLETE and technically delivered, still unmounted. Claim3024/CI39803847035/merge9b3acc495 preceded source. Source3027 exactf17589cd passed fullCI39805146136/all5SUCCESS/3832server+8backup PASS/0FAIL/0SKIP, native driver parent+3cases actually executed. Independent local and exact remote review NO BLOCKERS at sourceSHA2565bbe0219999cece3c3ed9fc6100119349afb497e2d04f780e7bbd513aef562bc/teste4acc30847bc9a00c71fec4b4b8d313ad35bd5173b2f49c0218b1410e69e1f2b. Merged07f42d06. Its queued mainCI39806614822 was cancelled before jobs by a newer docs push; not a code failure or PASS.

Legitimate retained settings source3028 merged combined9a67265aaa916058621b5291c96268b6f0093bb9. BOTH frozen driver Git blobs6da03571a3330adb2ff12b93805e2e7048fee071/555c7f3c00e7a609228d36068d48dafd88e3b87e unchanged. Full combined-mainCI39807166764/all5SUCCESS/build119924210949:3859server+8backup PASS/0FAIL/0SKIP; native driver TAP343+3subcases PASS again. Actual cross-client committed ATTEMPTING visible before fake transport, persisted ACCEPTED/UNKNOWN and real concurrent one-send race. This supersedes the cancelled intermediate run with real full-main evidence, without retrying completed business/LAB transactions.

Ordinary guard39808542280/deployjob119928332990 SUCCESS, actual Trigger and exact-production-revision steps executed (not skipped). Renderdep-dbd31teq1p3s73dp7m40 LIVE22Oct15:56:27.889459UTC at exact9a67265a. Independent no-cache public /api/health22Oct15:57:08.232194UTC HTTP200/oktrue/exactrevision9a67265aaa916058621b5291c96268b6f0093bb9. Service srv-d9isenfavr4c73bdh52g in user-confirmed workspace tea-d9ie26vaqgkc739uudqg. No manual deployment bypass. Earlier guard39807310528 success-with-skipped-deploy is NOT the release proof.

Also reconciles earlier FOUR-WORKER-EXECUTION-01 source3006:07110f16c361a2c36fe507220816e12707f623d5 passed mainCI39763488981/ordinaryguard39764479397 and Renderdep-dbcuf73ncjis73dme2eg became live22Oct10:41:39.998758UTC (now historically deactivated after newer releases). Its dormant mail adapter and staging tool were technically delivered; old awaiting-install notes are superseded only for source delivery. No actual staging restore/provisioning or automatic email activation occurred.

No new LAB/LIVE/USER feature PASS, SMTP acceptance or manual/numbered whole-task closure. Actual email remains OFF. Wider central dispatch scope remains ASSIGNED to codex/central-auto-dispatch-20261022: authoritative verified-recipient/consent/current writer locks/absent-row safety; retained lifecycle/backup owner's physical schema/retention/reset/restore suppression review before provisioning; durable payload/enrollment, real transport/scheduler and controlled consenting-recipient acceptance OPEN. Driver does not create/claim/recover jobs or solve these prerequisites. Existing settings3028, lifecycle/backup/mail/native/VOICE/KAT/Rizareio owners and accepted tests retained. Next action: central receiver resolves these retained production contracts under separate exact claims; do not repeat this completed driver increment or accepted LAB tests. Evidence CHECKPOINTS/EVIDENCE/report-delivery-driver-20261022/release-verification.json and scoped driver-tracker.pdf. Canonical registries/checkpoints synchronized; latest global PDF preserved.

22/10/2026 - CENTRAL-AUTO-DELIVERY-DRIVER-01 / SOURCE IMPLEMENTED / AWAITING FULL NATIVE CI

Owner codex/report-delivery-driver-20261022; coordinator codex/central-four-streams-20261018. Before-source claim3024 finalhead230921eecea686943650ae7770cf707cbda05810 passed applicableCI39803847035SUCCESS and merged9b3acc495aeb07d85e676fe8a5513287245da754 BEFORE source. This scope adds ONLY automatic-report-delivery-driver.js and automatic-report-delivery-driver.test.js; existing repository/start-order/mail/core/schema/route/worker/settings/tests unchanged. Existing owners and accepted manual/LAB/USER evidence remain protected.

Actual existing repository + mail adapter composition: canonical trusted clock, synchronous descriptor-safe caller snapshot via adapter, scoped repository.start resolution only after transaction commit, fresh post-commit lease/backwards-clock gate before injected send, then awaited exact version/token ACCEPTED/UNKNOWN completion. Per-call receipts prevent concurrent sharing. Start/commit ambiguity, failed completion, expiry and backwards/invalid clock never retry or fabricate persisted success; recorded:false/recoveryRequired:true requires separately inspected recovery. Accepted means transport acceptance only, not inbox delivery.

Node20.20.2 focused suite66PASS/0FAIL/1explicit local nativeSKIP; new driver13PASS/0FAIL/1nativeSKIP. Prior initial new suite10PASS/2FAIL was fixture error: foreign scope also tampered payload before validation, and adjacency-of-events assumed no second transaction could begin before send. Corrected to foreign slot and explicit committed-version proof, preserving zero-send/commit assertions; runtime unchanged. Independent runtime review no blockers; final native fixture review checks random isolated schema, separate clients, committed ATTEMPTING visibility during fake send, ACCEPTED/UNKNOWN persistence and real concurrent single-send. CI must execute native parent plus3subcases unskipped; explicit CI missing-database assertion prevents silent skip. Deferred barriers have bounded new-test timeouts without polling. No local native/SMTP/LAB PASS asserted.

Frozen SHA256 source5bbe0219999cece3c3ed9fc6100119349afb497e2d04f780e7bbd513aef562bc; teste4acc30847bc9a00c71fec4b4b8d313ad35bd5173b2f49c0218b1410e69e1f2b. Require exact remote review, full PR/exact-main CI and ordinary guarded release. This is an unmounted integration candidate, NOT INSTALLED at publication, no new functional/manual PASS.

dispatchOFF. Production enrollment/table/payload persistence and retention/reset/restore suppression, authoritative recipient verification/consent/real writer locks/absent-row safety, production transport/scheduler and controlled consenting-recipient acceptance remain OPEN. Driver does not implement those prerequisites or create/claim/recover jobs. No real email, production/LAB mutation, configuration, schema, paid resource, restore or financial/stock/fiscal action. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-delivery-driver.md; canonical three registries and scoped driver-tracker.pdf synchronized, latest global PDF preserved. Single next action actual full native CI/exact review, then normal merge/main verification/release.

22/10/2026 - CENTRAL-AUTO-DELIVERY-DRIVER-01 / ASSIGNED BEFORE SOURCE

Owner codex/report-delivery-driver-20261022; coordinator codex/central-four-streams-20261018. Explicit owner instruction "ξεκινα" after the four-worker technical delivery authorizes the next independent integration slice. Existing central dispatch/start-order/mail/schema/lifecycle/backup owners retained; no edits to their existing source paths. Prior claims/source3006 and installed07110f remain protected. Current main201eb5e includes the separate start-order source; this increment requires its full fresh checks.

Exact source scope ONLY NEW server/src/services/automatic-report-delivery-driver.js and server/test/automatic-report-delivery-driver.test.js. Compose the existing real delivery repository and mail adapter: trusted repository.start commits ATTEMPTING before injected transport, then persist exact ACCEPTED/UNKNOWN once with the committed version/token. Driver clock supplies attempt/completion instants. Caller cannot supply eligibility or replacement receipt. Invalid start, transport uncertainty, completion failure/expiry or ambiguous commit must never trigger resend; unresolved persistence requires separate recovery, not automatic retry. No production eligibility implementation, enrollment, scheduler, schema/manifest, SMTP configuration or mounting. Existing source/API/tests remain untouched.

Required isolated evidence: actual repository+adapter+core composition over a transactional synthetic DB, post-commit send barrier and send-before-complete ordering, positive acceptance and UNKNOWN persistence, gate/start rollback zero sends, duplicate/concurrent/stale/token/scope refusal, no caller mutation or getter execution, expiry/clock/completion/commit failure redaction and no retry. Production integration and actual consenting-recipient acceptance remain OPEN; injected transport tests are NOT SMTP/LAB/USER PASS. Preserve all accepted HOLD/manual/store/device/financial evidence without replay.

Current status ASSIGNED / NOT IMPLEMENTED / NOT TESTED. dispatchOFF. No recipient change, real email, production/LAB DB mutation, provisioning/restore/configuration or financial/stock/fiscal action. Source starts only after this before-source claim has green applicable CI and is merged. Require focused Node20 tests, exact review, full PR/exact-main CI and ordinary guarded release. Root updates checkpoint/three registries/scoped tracker PDF; preserve latest global PDF and other owners' records. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-delivery-driver.md. Single next action green claim merge, then implement the two new paths.

22/10/2026 — FOUR-WORKER-EXECUTION-01 / FULL PR CI VERIFIED / PRESERVE NEW KAT PUBLICATION

Final six-source-file candidate at fc599255e5119a45d766ca8dc7c423187cf31b3f passed exact PR CI39760970410: all five jobs SUCCESS,3803serverPASS/0FAIL/0SKIP plus8backupPASS. Native isolated PostgreSQL exact identity query and actual Docker build/default validation both executed unskipped (TAP2738/2739). Independent pinned remote reviews matched all six reviewed source hashes. Previous39ade126 run39760444177 was superseded/cancelled for necessary metadata reconciliation, not substituted for final PASS.

Main advanced through KAT receipt3007/134bf01ea46c75bd7f4dbef94354863da1bf5a6f while checks ran. Preserve real KAT photo-key v3702 publication, all its source controls/manual/evidence and current central PDF. No KAT republish or financial replay. The six inert source/test blobs remain byte-identical; only central documentation reconciliation changes. Put this scope's status beside its own existing claim rather than overwriting newer top entries; publish its regenerated scoped evidence PDF instead of replacing another owner's latest central PDF. This is not a functional PASS closure, so no manual/numbered task closure.

Source remains AWAITING fresh reconciled-head full CI/exact-main/ordinary release. Automatic dispatchOFF; staging tool unprovisioned/unexecuted. Existing consent/lock/schema/transport/provisioning/cost/restore prerequisites remain OPEN. No business or configuration change. Root/retained owners continue their assignments; single next action fresh checks then normal merge/release of these inert candidates.

22/10/2026 — FOUR-WORKER-EXECUTION-01 / TWO BOUNDED SOURCE CANDIDATES / AWAITING FULL CI

Central coordinator codex/central-four-streams-20261018. Before-source claim2993 was repaired by3004: finalhead416b6c567827abb604a6de9d6f7f6a2773fa70cc/CI39758232149SUCCESS/greenmergedfb30d22190fbaf88b2cdcfa925eae433309a4b41 BEFORE these final source files. All three canonical claim blobs independently read and verified. Initial publication defect preserved in claim history; no source committed or published while workers paused. Six new files only; existing app/worker/mail/repository/settings/schema/render/auth/financial/fiscal/stock paths untouched. Two independent new scopes integrated by root, each separately reviewed and tested.

CENTRAL-AUTO-MAIL-ADAPTER-01 — source implemented, dormant. New automatic-report-mail-adapter.js and matching test. Trusted injected startAttempt must resolve AFTER durable ATTEMPTING commit; returned caller metadata alone is not authorization. Exact scope/slot/token/version/lease/source/settings/payload body/hash/period bound before single injected transport call. Positive exact one-recipient accepted evidence plus messageId only yields ACCEPTED; rejection/mixed/pending/contradictory/getter/hidden/malformed evidence and transport exceptions yield UNKNOWN/no automatic retry, matching existing core. No SMTP/environment/DB client imports or mounting. Future trusted driver/consent/revocation/lock/repository/schema/real transport wiring remain OPEN. Local Node20.20.2 actual producer→payload→core→injected adapter with DAILY/WEEKLY/MONTHLY plus protected regressions46PASS/0FAIL/0SKIP; independently rerun by pos_stores. Initial reviewer reproduced false ACCEPTED for hidden/accessor pending evidence, fixed with regressions before publication. Final sourceSHA256ce5ccb05889864b94bb33cddd5a12736878b4cfaf710f6fa4ed28f338f986835/teste77be2fbc6926fce4b309843cdb09998db7a55e7a8b6560280ad51eb2823f46c.

INFRA-PRIVATE-STAGING-RUNNER-01 — source implemented, not provisioned. New ops/staging-restore/Dockerfile,restore.py,README.md and staging-restore-runner.test.js. Fixed approved internal staging host/database/user only, default offline validation, one receipt-bound bounded hashed private archive fd; original pathname changes cannot alter consumed snapshot. Explicit restore acknowledgement/dedicated Render identity/password-only child environment/production DATABASE_URL refusal/live identity+empty namespaces gate/conservative5,000,000,000byte quota with reserve/expiry recheck before effects. Single-transaction no-owner/no-privileges restore and exact complete table/count map, redacted aggregate proof. No arbitrary destination/URL/SQL/app boot/cron/SMTP/automatic retry/drop. Quota is not measured diskfree; counts are not rowsemantic/financial equality; post-verification failure can leave populated staging requiring quarantine/separate cleanup. Receipt is reviewed input, not authentication. Existing backup/lifecycle/accepted restore2787/upload2864 remain untouched. Local Node20 9PASS/0FAIL/2explicitSKIP: native PostgreSQL exact-query and actual isolated Docker image build/default CLI require full CI and must execute unskipped there. Independent commerce_ai rerun plus adversarial CLI checks no blocker. Exact identity SQL was separately syntax-checked by a read-only PG18 metadata query; no restore/business mutation. Initial unbuffered-fd assertion failure fixed without weakening test. Reviewer fixed conservative quota units, recursive malformed-receipt redaction and expiry boundary before publication. Final hashes restore9aa9ddbfeadf5eb854f58abb30144d0eff700a85b2889463498d29a72e101ae0/testc7bdfe90a76f327ea099a9c847bd33b7eae0aef39e10eda608e863e21407b4bb/README93b5abbd08a8f2c3f664a4ce2922f1ad82e16366e3dec4ac2b6e7da3c8b30c12/Dockerfe0a348606397dd72b356b81f58830150a02902cf988da38867c5d869f07ef23. No actual image build locally because Docker absent.

Combined focused local55PASS/0FAIL/2explicitSKIP; synthetic/injected and metadata proof are NOT new LAB/USER/STAGING/SMTP PASS. Both independent final source reviews found no blocker within claimed inert boundaries. Full required PR/exact-main CI, actual nativePG and Docker cases, and ordinary guarded exact release still required before source delivery claim. No manual PASS extension or numbered whole-task closure. dispatchOFF; no real email/recipient change, staging provision/restore, HA/cutover/cost, production/config/schema/business action or accepted-transaction replay. Rizareio continues existing owner/catalog2995–2997, KAT/DAILY/VOICE/native/N10 retained. Supplier source candidate read-only verification is preparation only, not hosted acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-four-worker-execution.md and canonical records/generated tracker PDF synchronized. Next: full green checks and exact remote source review, then normal release of inert candidates; production activation/execution remains separate prerequisites.

22/10/2026 — FOUR-WORKER-EXECUTION-01 / OWNER-DIRECTED PARALLEL WORK / BEFORE SOURCE

The owner explicitly requested 3–4 coordinated workers for unfinished work, then instructed «Ξεκινά». Central coordinator codex/central-four-streams-20261018 dispatches four independent workers in this session. This is actual task delegation, not remote control of other ChatGPT conversations or a claim they run unattended. Read current AGENTS, canonical records and relevant checkpoints before source. Existing claims and completed PASS remain protected. Current baseline3110d2afcdea83e3a4597cede8981b71b41c1625. Prior automatic source2991 failed main CI historically; wholesale readiness race is now fixed by named handoff2999/source3000 and verified exact-main CI39746665536 plus ordinary guard39747481734. Fresh combined full checks are still required for these new slices. Claim2993 checkpoint/PDF were correct but three registry updates accidentally prefixed literal undefined without the assignments; this correction restores actual before-source claims. No implementation was committed or published under the malformed registry entry.

1. **INFRA-PRIVATE-STAGING-RUNNER-01 — ASSIGNED codex/central-staging-restore-20261022 BEFORE SOURCE.** ONLY NEW ops/staging-restore/Dockerfile, ops/staging-restore/restore.py, ops/staging-restore/README.md, server/test/staging-restore-runner.test.js. Independent tool for approved staging dpg-db900vks728c73b9phtg-a / myworkstation_db_upgrade_test_20261016. Default validate-only; restore requires explicit execution acknowledgement, pinned target, receipt-bound archive size/hash, live empty-target identity proof and capacity preflight. Deny production target and inherited production DATABASE_URL. No generic target override, production dump/SQL, app boot/seeds/Prisma/lifecycle/history/SMTP/timer. Consume one preprovided archive; no arbitrary URL fetch. Redacted post-restore checks, failures remain failures, no automatic cleanup/drop/retry. Provisioning/secrets/billing/archive transfer/version/actual restore/retention/cleanup/HA/cutover OUT OF SCOPE. Preserve restore2787/upload2864 and retained lifecycle/backup owners. Synthetic tests are NOT STAGING PASS. Source starts only AFTER this claim green merge.
2. **CENTRAL-AUTO-MAIL-ADAPTER-01 — ASSIGNED codex/central-auto-mail-adapter-20261022 BEFORE SOURCE.** ONLY NEW server/src/services/automatic-report-mail-adapter.js and server/test/automatic-report-mail-adapter.test.js. Dormant dependency-injected one-recipient adapter: await trusted startAttempt commit before a single injected send call, bind exact store/slot/attempt/recipient/payload fingerprint, require exact positive accepted recipient plus messageId. Missing/mixed/contradictory evidence, rejection, timeout and transport uncertainty return UNKNOWN with bounded non-sensitive reason/no automatic retry, preserving current ACCEPTED|UNKNOWN lifecycle. Caller-supplied receipt alone is NOT authorization proof. No nodemailer/env/DB imports, existing mail/core/repository/schema edits, route/worker mounting or SMTP calls. Fake transport/start tests only. Unresolved repository writer/lock/consent contract remains required BEFORE production wiring/activation. Existing automatic source2991 and all mail/schema/lifecycle owners retained. Source starts only AFTER this claim green merge.
3. **POS/STORE READINESS — READ-ONLY RECONCILIATION / worker pos_stores.** KAT photo layout and DAILY setup remain their retained owners; do not repeat Pair/Start or8753import. Rizareio now has dedicated existing owner/claim2995–2997 and approved3375product/4395alias source, superseding earlier source-not-found discovery. Preserve that owner and source; do not create another Rizareio setup claim or import. Broader store/device/transaction readiness follows existing checkpoints only.
4. **SUPPLIER ACCEPTANCE — READ-ONLY PREPARATION / worker commerce_ai.** Prior2971 and VOICE2980/native video2987 PASS protected. Existing LAB source candidate at30/60/30 has DEMAND_REPLENISHMENT for LAB-EXCEL-20260909-01, stock4/min0/sold2/target6/suggestion2 in its observed snapshot; refresh before actual UI/CSV comparison. Default30/7/3 has no positive sample; BELOW_MINIMUM absent, no fabricated transaction. Normal browser session restrictions remain; no auth workaround or live send/order/stock/settings mutation. Native appearance and VOICE source remain retained owners.

Root alone integrates registries/checkpoint/PDF and release. Both source slices are independent new unmounted files; each requires focused tests, exact review, full green PR/main CI and ordinary guarded release before installed claims. This claim is documentation ONLY: ASSIGNED/NOT IMPLEMENTED/NOT TESTED, no LAB/USER PASS or manual change. No production/config/financial/stock/fiscal/settings/email/restore action or paid resource. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-four-worker-execution.md. Next: green claim merge, then independent isolated implementation and final integration; no new general user approval requested.

22/10/2026 - IOS-CHAT-NATIVE-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Owner feat/ios-chat-native-20261022, receiving page feat/android-chat-native-20261017. Explicit owner instruction after Android functional confirmations: «iPhone/iOS, τελευταίο όπως συμφωνήσαμε να το ξεκινησουμε μεχρι την ολοκληρωση και μετα κανουμε δοκιμες». Android final scoped USER PASS receiptPR3018/948553cb is merged; no repeat Android tests or second Android implementation. Repository inspection finds no ios directory/app. Baseline948553cb22893c0b69e8ade2b46e5ed56dbf44f3. Linux host has no Swift/Xcode; actual Apple compilation/simulator checks must run in macOS GitHub CI, not be claimed from a static scan. Existing production/auth/media/AI APIs are the reuse boundary.

Bounded source: new ios native SwiftUI app/project/tests/build/privacy/signing/TestFlight instructions and .github/workflows/ios-chat-preview.yml; additive iOS platform registration/APNs FCM payload in existing server/src/native-chat-push.mjs, server/src/native-fcm-provider.mjs and routes/native-chat-push.js with focused regression tests. Preserve Android payload/default registration/cert/public download and every current owner. No database schema/migration, new backend service, API key/provider/model/payment/module/fiscal/stock or automatic-mail changes. Existing Firebase myworkstation-chat reused only for Messaging after explicit opt-in; no Analytics/Auth/Firestore/Storage. No real push/email/message or business test from CI.

Target parity: existing account/2FA challenge and restricted operator-link/PIN; authorized stores/company selection; selected-store text/read acknowledgement, built-in quick replies, bounded multi-photo/camera, RAM voice/video capture and explicit preview/send/playback, existing selected-store Owner/SuperAdmin AI with evidence checks. Ephemeral HTTP/no disk URLCache/cookies, private content/drafts in memory, no content DB/file/gallery writes, background/store/logout epoch cancellation/clearing, technical token/challenge Keychain ThisDeviceOnly with bounded expiry. Do not promise zero OS/SDK/photo-provider/backup traces. iOS capture-state detection and background cover are supported; no private secure-text screenshot-block hack or Android FLAG_SECURE equivalence claim. Every feature requires real compilation and meaningful synthetic tests before source delivery.

Owner answered Apple Developer account: «Όχι, δεν υπάρχει». Continue app and unsigned simulator build/tests autonomously; actual iPhone signing/installation/TestFlight and APNs/Firebase iOS app setup require owner-controlled Apple membership/App Store Connect, signing/provisioning and APNs key. Do not create an account, accept Apple agreements, charge fees, rotate Android key or ask for secrets in chat. Prepare concrete build/reviewable instructions first; no fake install link/QR or simulator artifact presented as an installable IPA. Physical iPhone/notification/camera/media/privacy USER PASS stays NOT TESTED until final agreed batch after preparation. No iOS implementation or build yet.

Required sequence: claim green/main BEFORE code; implement bounded app and additive iOS push protocol; actual macOS unsigned build/unit/simulator UI/media tests and all relevant existing full server/Android regression checks; review synthetic appearance and archive artifact manifest/source checksums; ordinary guarded exact server release only after full green/main when backend changes; prepare owner signing/TestFlight handoff. Never equate unsigned simulator/CI with physical acceptance or public availability. Owner remains assigned through completion or named handoff; other native/PWA/N16/AI/wholesale/central/AI-wallet owners retained. Single next action after claim merges: implement the iOS client and CI against existing contracts. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-ios-chat-native.md.

22/10/2026 - NATIVE CHAT FINAL USER CONFIRMATIONS / FOUR SCOPED PASS

Ο ιδιοκτήτης επιβεβαίωσε ρητά τα επόμενα συμφωνημένα σκέλη, παραθέτοντας κάθε αντίστοιχη εκκρεμότητα: (1) «Έτοιμες απαντήσεις και βίντεο από τη συλλογή: τελική επιβεβαίωση στο κινητό. ειναι οκ», (2) «Ενημέρωση εφαρμογής: επιβεβαίωση αναβάθμισης χωρίς απεγκατάσταση ειναι οκ», (3) «Σύνδεση και ιδιωτικότητα: συγκεντρωτικός έλεγχος αποσύνδεσης, αλλαγής καταστήματος και προσωρινών δεδομένων. ειναι οκ». Καταγράφονται τέσσερα scoped USER PASS: έτοιμες απαντήσεις, βίντεο συλλογής, αναβάθμιση χωρίς απεγκατάσταση, και η περιγραφόμενη λειτουργική σύνδεση/αποσύνδεση/αλλαγή καταστήματος/χειρισμός προσωρινών δεδομένων. Καμία νέα δοκιμή ή επανάληψη αποδεκτών μηνυμάτων από τον agent.

Η εμφάνιση είχε ήδη USER PASS PR3010/3a05da77. Αυτές οι νεότερες ειδικές επιβεβαιώσεις αντικαθιστούν τα αντίστοιχα AWAITING USER/NOT TESTED του final-batch και των ιστορικών καταγραφών. Το πρακτικό same-signer update είναι πλέον αναφορά επιτυχίας ιδιοκτήτη· το ακριβές ζεύγος εγκατεστημένων hashes, μοντέλο/OS, αρχικό/τελικό version και οι χειρονομίες δεν μετρήθηκαν ανεξάρτητα. Η λειτουργική επιβεβαίωση προσωρινών δεδομένων δεν είναι forensic πιστοποίηση μηδενικών OS/SDK/backup ιχνών ή μηδενικής αποθήκευσης τεχνικών credentials. Δεν συνάγεται νέα αποδοχή ήχου βίντεο, όλων των ορίων/αρνητικών περιπτώσεων, κάθε συσκευής/ρόλου/tenant ή ευρύτερων PWA/N16/AI εργασιών.

Τεχνική διανομή αναφοράς: Android0.1.10/code11, sourcePR2989/2e7b084, signed39749830993/artifact12413756302, stable cert17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97, APKsha2565c617d59d2a0a0adc356419a40b55f3bd1ba1449810e31b03ea6e33a7c4b8060. DistributionPR3002/1b98d90, fullPR39751843837/main39753045418SUCCESS3782server+8backup/0FAIL/0SKIP, guard39754062331/Renderdep-dbct8v4s728c73865s40LIVE και byte-for-byte δημόσια λήψη ελέγχθηκαν χωριστά στο receipt3003. Αυτά δεν παρουσιάζονται ως ανεξάρτητη ταυτοποίηση της σημερινής φυσικής συσκευής ή τρέχουσας serverrevision.

Τα τέσσερα επιβεβαιωμένα σκέλη αφαιρούνται από τις εκκρεμότητες. Εμφάνιση, camera-video-send-PC-view, φωνητικά, φωτογραφίες και παλαιότερα auth/push scoped PASS προστατεύονται· καμία επανάληψη για τεκμηρίωση. Η συμφωνημένη λειτουργική παρτίδα Android είναι αποδεκτή εντός των παραπάνω ορίων, όχι καθολική πιστοποίηση. iOS παραμένει τελευταίο/μη υλοποιημένο από αυτή την καταγραφή· δεν έγινε νέο iOS source claim ή release. Native owner feat/android-chat-native-20261017 διατηρεί την ευθύνη των χωριστών μη μετρημένων τεχνικών ορίων, χωρίς νέο αιτούμενο replay των ολοκληρωμένων βημάτων. Άλλοι owners/χρεώσεις/αυτόματες αποστολές/καταστήματα αμετάβλητα. Manual docs/manual/native-chat/PASS.md, evidence CHECKPOINTS/EVIDENCE/native-chat-appearance-20261022/final-user-confirmations.json. Συγχρονισμός checkpoint/active/tracker/manual/pending/final-batch/PDF στο ίδιο PR.

Ιστορική αποδοχή εμφάνισης22/10/2026 - συμπληρώθηκε με τις ειδικές επιβεβαιώσεις παραπάνω

Ο ιδιοκτήτης Χρήστος Μάνης απάντησε «ειναι οκ» αμέσως μετά την παράδοση της0.1.10 και την οδηγία να ανοίξει συνομιλία για τον τελικό έλεγχο εμφάνισης. Καταγράφεται περιορισμένο USER PASS της νέας εμφάνισης συνομιλίας. Δεν συνάγεται ανεξάρτητη ταυτοποίηση μοντέλου/OS, καταστήματος/ρόλου, εγκατεστημένου hash ή βήματος αναβάθμισης χωρίς απεγκατάσταση. Καμία νέα αποστολή, εγγραφή, οικονομική/stock πράξη ή επανάληψη αποδεκτού δείγματος.

Τεχνική βάση παράδοσης: sourcePR2989/2e7b084, Android39747236750 με36instrumentationPASS, signed39749830993/artifact12413756302, distributionPR3002/1b98d90, fullPR39751843837/main39753045418 με3782server+8backup/0FAIL/0SKIP, ordinaryguard39754062331SUCCESS/Renderdep-dbct8v4s728c73865s40LIVE και ανεξάρτητο δημόσιο APK byte equality. Έκδοση0.1.10/code11, SHA2565c617d59d2a0a0adc356419a40b55f3bd1ba1449810e31b03ea6e33a7c4b8060, ίδιος σταθερός signer. ReceiptPR3003/db3b2ddc. Αυτή είναι η επαληθευμένη τεχνική διανομή, όχι ανεξάρτητη μέτρηση της φυσικής συσκευής κατά την επιβεβαίωση.

Κλείνει μόνο η εκκρεμότητα εμφάνισης· δεν ζητείται επανάληψή της. Τα camera-video-send-PC-view, φωνητικά, φωτογραφίες, auth/push scoped PASS διατηρούνται. Native owner feat/android-chat-native-20261017 παραμένει για τα μη μετρημένα gallery/audio/ready-reply/session/privacy/device/update residuals και τη συμφωνημένη τελική συγκεντρωτική παρτίδα. Δεν κλείνει ολόκληρο Android/N16/PWA/AI ή άλλη ανάθεση. iOS LAST. Συγχρονισμένα checkpoint/active/tracker/manual/pending/PDF στο ίδιο PR. Manual docs/manual/native-chat/PASS.md, evidence CHECKPOINTS/EVIDENCE/native-chat-appearance-20261022/user-acceptance.json. Επόμενο: μόνο τα ήδη συμφωνημένα μη ελεγμένα σκέλη, χωρίς replay ολοκληρωμένων δοκιμών.

Ιστορική τεχνική παράδοση22/10/2026 - αποδοχή εμφάνισης καταγράφηκε παραπάνω

Retained owner feat/android-chat-native-20261017. Compact modern native conversation presentation published as0.1.10-preview/code11: rounded adaptive actions/composer, complete labels and more conversation space. Same callbacks, auth/store/session/push/privacy/media behavior and stable owner signer. SourcePR2989/head578aff9c merged2e7b084; fresh full39747236825/Android39747236750 and exact-main39748776462 SUCCESS, actual camera plus36instrumentation/0FAIL/0SKIP. Actual synthetic normal/large-font renderings visually inspected; this is not physical-user acceptance.

Signed trusted-main run39749830993/artifact12413756302 verified independently: actual manifest packagegr.myworkstation.chat.preview/version0.1.10-preview/code11, RSA APKv2 signature and complete chunked content digest, stable certificate17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97. DistributionPR3002/head6a812027 merged1b98d90f64d3d8b88d4d3e1667c62c72edab0284; full PR39751843837 and exact-main39753045418 all5jobsSUCCESS, actual3782server+8backupPASS/0FAIL/0SKIP. Ordinary guarded deploy39754062331; Render dep-dbct8v4s728c73865s40 LIVE2026-10-22T09:20:19.187957Z exact1b98d90f64d3d8b88d4d3e1667c62c72edab0284. Fresh unauthenticated public health ok:true/exact revision, release.json metadata equality and downloaded public APK byte-for-byte equality with signed artifact independently verified at2026-10-22T09:21:18.749440+00:00. Landing page in actual browser displays0.1.10 and correct download. Same URL/QR: https://myworkstation-app.onrender.com/downloads/chat-android/. Prior APKs retained. Technical publication complete; physical phone same-signer update and appearance acceptance NOT TESTED. No new manual PASS.

The explicitly transferred wholesale role-readiness cause was corrected byPR3000/aa42e23 and verified inPR3001, preserving broader wholesale owner codex/wholesale-suite-20261017. Historical appearance release holds and0.1.9-current statements below are superseded for this delivered candidate only. No whole Android/N16/PWA/AI/wholesale PASS. Already accepted camera-send-PC-view, voice, photos, auth/push observations remain protected and are not replayed. Gallery/audio/ready-reply/session/privacy/device residuals retain their recorded NOT TESTED scope; iOS LAST. Native owner remains assigned until acceptance or named handoff. Single next action: install0.1.10 as an update over stable0.1.9 and inspect conversation appearance/labels/composer, without replaying accepted media. Evidence CHECKPOINTS/EVIDENCE/native-chat-appearance-20261022/public-release-verification.json and public-download.jpg; checkpoint CHECKPOINTS/CHANGES/2026-10-22-native-chat-appearance.md.

22/10/2026 - WHOLESALE ROLE READINESS TECHNICALLY COMPLETE / SHARED CI CAUSE RESOLVED

Owner-directed narrow receiving claim #2999 merged8253b206 before source. Source #3000 final ecc56cef54ecf512500592f77ee862368bddb72a full PR CI39745507227 SUCCESS, mergedaa42e23cb83b48ce1c1f803d1016801415f50456. Exact-main CI39746665536 all5jobsSUCCESS:3782serverPASS/0FAIL/0SKIP,8backupPASS/0FAIL/0SKIP. New actual Chromium held-metadata initial/re-entry cases and invalid-metadata/HTTP503 refusal executed and passed; all prior real isolated wholesale10checks and actual-app offline4checks passed. The independently reproduced early-role-click cause behind the shared hold is corrected, not hidden by a retry or another unrelated green run.

Ordinary guarded deploy39747481734 SUCCESS; Render dep-dbcsgrrrjlhs73eij6kg LIVE2026-10-22T08:28:34.363164Z at exactaa42e23. Fresh unauthenticated public /api/health returned ok:true and that exact revision. Only the source/CI/ordinary-delivery technical scope is complete. The separately pinned public wholesale lab service was NOT reset or repointed; no new hosted wholesale/physical/LAB/USER acceptance or manual claim, and no replay of accepted hosted financial examples. Existing commercial/offline acceptance and other wholesale work remain with codex/wholesale-suite-20261017. The transferred narrow technical cause is no longer pending another owner; receiving owner fix/wholesale-lab-role-readiness-20261022 retains regression responsibility, native owner feat/android-chat-native-20261017 continues Android appearance preparation.

Historical shared wholesale CI-cause holds in native/central/Rizareio records are superseded for THIS defect only. Other blockers, business acceptance and original source/runtime guards remain. Native sourcePR2989 reconciled head578aff9c8f698fda6a8c1858bef798ebbed3c111 passed fresh full CI39747236825 and Android39747236750 (36instrumentation); no new signed APK or public download change yet. It must still complete merge/exact-main CI, durable signing and verified public distribution before the owner's appearance test. iOS LAST. Evidence CHECKPOINTS/EVIDENCE/wholesale-role-readiness-20261022/release-verification.json. Single next action: complete the already prepared native appearance publication, preserve all accepted media/push tests without repetition. No extra general owner decision required.

22/10/2026 - WHOLESALE LAB ROLE READINESS / OWNER-DIRECTED RECEIVING CLAIM / BEFORE SOURCE

Explicit owner instruction in the native chat conversation: «Ανέλαβε την εσύ αυτή την εργασια», referring to the wholesale initialization race blocking publication. ΑΝΑΛΗΨΗ ΑΠΟ codex/wholesale-suite-20261017 — ASSIGNED fix/wholesale-lab-role-readiness-20261022, receiving page feat/android-chat-native-20261017. This transfers ONLY the bounded role-initialization defect, not the wholesale commercial/offline suite or other owners. Owner instruction supersedes the previous native hold's lack of a receiving assignment. Old owner must not concurrently edit these exact paths for this slice after this receiving claim is merged.

Baseline b4ffa6a249b28ead389730de2a3128f2c6953bec. Known required CI39679682971 wholesale final owner re-entry failed; central delayed-meta actual Chromium diagnostic proves a click can arrive before role listeners are bound. Failed run's exact meta timing remains inferred, not observed. Prior wholesale role/store/denial/offline and native camera/voice/photo/push scoped PASS protected; no replay of accepted hosted transactions. No new LAB/LIVE/USER PASS.

Exact source scope after this claim is green and merged: ops/wholesale-lab/public/index.html (initial role disabled state), ops/wholesale-lab/public/lab.js (initialization gate integrated with existing locks; enable only after validated meta, bound handlers and optional session restoration), new server/test/wholesale-lab-role-readiness.test.js and new server/e2e/wholesale-lab-role-readiness.mjs for deterministic delayed-meta and failure/lock cases. .github/workflows/ci.yml only additive execution of that synthetic browser regression in the existing isolated wholesale job. Existing E2E assertions/timeouts/retries, auth, session endpoints, tenant/store validation, runtime fence, schema, production data and fiscal/business paths unchanged. No new service or hosted reset.

Require failing-before regression, passing-after local actual script/DOM and actual Chromium with controlled local HTTP, all existing wholesale E2E plus full PR/main checks and ordinary guarded verified release. No unchanged failed-run retry or deployment bypass. Next action after merged claim: implement the bounded initialization gate and execute causal regressions. Native appearance PR2989 and its accepted synthetic evidence retained; continue same-signer 0.1.10 preparation after the shared cause is corrected. Physical appearance acceptance stays NOT TESTED, iOS LAST. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-wholesale-lab-role-readiness.md. Receiving owner remains assigned through completion or named handoff.

22/10/2026 — RIZAREIO-CATALOG-IMPORT-01 / OWNER-DIRECTED ORDINARY INSTALLATION / AWAITING EXACT CI

Retained owner fix/rizareio-catalog-import-20261022 / #2995/#2997. New explicit owner instruction after explaining the shared release dependency: «Ξεκινά την εγκατασταση». Installation scope remains the independent Rizareio importer only; no transfer or edits of the assigned wholesale implementation. This supersedes this scope's voluntary hold recorded in#2998 for ordinary green-CI merge/release, not the historical wholesale FAIL or another owner's acceptance. Existing CI and deployment guards must all pass; no manual deploy, disabled check, unchanged failed-run retry or security bypass. Wholesale known readiness race remains NOT FIXED by this page and must not be represented as resolved by another green run.

Reconcile source branch with current main9443af76 preserving all current shared records. All four reviewed runtime/test blobs from ef971817 remain byte-identical; documentation-only reconciliation. Previous fullCI39733605031 actually3777/0FAIL/0SKIP plus8backupPASS; require fresh exact combined PR and main fullCI and ordinary guarded healthy revision before new LAB/import acceptance. Approved3375/4395aliases stock0 package remains SHA256cbf0b1ef795389ba0ecbe774eb9131bcd1c8d9f853cecd127a4fb35bb095f2e5. No final import has occurred. No fiscal receipt, register reprogramming, payment, stock movement, production SQL repair or change to another store. LAB/real importer acceptance stays NOT TESTED until measured. Owner retained through completion or named handoff.

22/10/2026 — RIZAREIO-CATALOG-IMPORT-01 / FULL NATIVE CI GREEN / SOURCE NOT MERGED OR INSTALLED / OWNER RETAINED

Owner fix/rizareio-catalog-import-20261022, issue#2995. Claim#2996 merged e2bc1018 BEFORE source. SourcePR#2997 exact ef9718174cf218bfc1a63e3d97e0972942c210da is OPEN, UNMERGED. FullCI39733605031 all five jobs SUCCESS; actual build job119674283970 logs read:3777serverPASS/0FAIL/0SKIP,8backupPASS/0FAIL/0SKIP, native PostgreSQL importer test828 actually executed (686.8ms). Three new Rizareio route tests and expanded native case PASS: five exact saved identities, all aliases/internal labels/leading zeros,0% tobacco/cards, precision, categories/subcategories, injected atomic rollback, concurrent one201/one409, replay refusal and unchanged existing controls. Existing DAILY/KAT/legacy assertions preserved. No LAB/LIVE/USER importer PASS.

Current approved technical workbook prepared and persisted privately:3375 products,4395 unique SKU/barcode aliases (59internal labels), allstock0/no cross-product barcode collision; local actual shipped parser/target/assertion/department-validator/normalizer yields3375/0invalid. Counts318tobacco/21cards/2297goods13/738goods24/1service007. Exact source SHA256 cbf0b1ef795389ba0ecbe774eb9131bcd1c8d9f853cecd127a4fb35bb095f2e5. Fresh production READONLY lookup confirms selected Rizareio company/store identity, all five whole department identities incl null exemptions and0 companyproducts/0selectedstoreproducts; no database writes. Do not upload stale3391 packages or the review workbook with row7 headers. No product import, no fiscal receipt/register reprogramming/payment/stock movement/schema/other-store action.

Shared release remains BLOCKED by independently retained wholesale initialized-role readiness cause in2026-10-22-central-auto-dispatch-integration.md. This source's green wholesale run does NOT repair that known cause. No guard bypass, unchanged retry, direct deployment or other-owner source edit. Last independently verified healthy revision20d99045 retained; Rizareio change NOT INSTALLED. Retained wholesale owner must deliver the bounded causal fix, or owner must explicitly name a receiving handoff before another page edits that assigned scope. No transfer inferred from silence or general approval.

Single next action: resolve that retained-owner dependency, reconcile combined source/CI and ordinary exact guarded release; then new measured synthetic profile LAB acceptance with fresh before/after controls; only then one3375CREATE/0UPDATE/0INVALID/4395alias real preview/final import and full independent readback. Do not repeat completed imports or real transactions. Rizareio owner remains assigned until completion or named handoff; source/files/tests ready, installation/LAB/import outstanding. This receipt updates shared records only and does not close the scope or add a manual PASS.

22/10/2026 — RIZAREIO-CATALOG-IMPORT-01 / SOURCE PREPARED / AWAITING NATIVE CI AND LAB

Retained owner fix/rizareio-catalog-import-20261022, issue#2995. Before-source claim#2996/headb5ba728d/docsCI39732662424 SUCCESS merged e2bc1018534402e78b4e218cb47095abe8022e5c BEFORE source. Added explicit first-sheet RIZAREIO_IMPORT profile only: manifest company/store target, all five pre-existing department IDs and exact description/register/internal-code/rate/commerce/active/exemption identity; fiscal VATcode5 is explicitly0%, separate from internal department001/003. All text numeric aliases/leading zeros plus SKU-bound MWRZ internal labels retained. Review/excluded sheets never imported. Existing verified transaction locks, fresh collision checks, CREATE-only/zero-stock and full readback/rollback reused. No widening of legacy/DAILY/KAT profile behavior or permission/schema/fiscal/device execution.

Local Node20.20.2 focused19PASS/0FAIL/1native-environmentSKIP; full server3495PASS/0FAIL/200environmentSKIP. Server preparation/Prisma generation PASS. Native test expansion is COMMITTED, not locally executed: all five existing identities, exact prices/VAT/unverified0/categories/subcategories/aliases, injected mid-import rollback, two concurrent submissions one201/one409, replay refusal, unchanged departments and pre-existing controls. Full actual native CI must execute it. No LAB/LIVE importer PASS, no real3375 import. Source-only correctness is not installed acceptance.

Current shared wholesale initialized-role readiness cause remains independently owned and blocks ordinary release; do not clear it with another green run. Preserve healthy20d99045, prior imported DAILY/KAT and other owners. No direct deploy, production SQL repair, fiscal receipt, register reprogramming, sale/payment/stock movement. Remaining: full exact native CI/review; retained wholesale-owner causal fix/release reconciliation; exact ordinary release; bounded synthetic LAB with fresh before/after controls; then one3375CREATE/0UPDATE/0INVALID real preview/import and full exact source readback. Approved3375/zero-stock/source exclusions retained. Owner remains assigned until completion or namedhandoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-rizareio-catalog-import.md.

22/10/2026 — RIZAREIO-CATALOG-IMPORT-01 / ASSIGNED BEFORE SOURCE / NOT IMPORTED

Owner fix/rizareio-catalog-import-20261022, issue #2995; user-directed new independent first-catalogue import. Source scope ONLY new server/src/routes/inventory-rizareio-source.js, dispatch/validation in inventory-source-workbook.js, target assertion in inventory-archive-import.js and bounded importer regression tests. No edits to other assigned runtime scopes. Existing KAT/DAILY BITE/Diadochou imports and precision/readback/idempotency remain protected; no replay.

Actual Rizareio preview rejects saved department labels 001/003/004/005/007 under legacy hardcoded mappings; no final import. Approved source has3375 eligible products, zero stock; exclusions and five user-confirmed beer mappings retained. Planned explicit RIZAREIO_IMPORT profile with company/store-bound manifest, exact five existing department identities, all text primary/additional aliases including reviewed internal codes, zero-stock CREATE-only and existing transactional collision/replay/readback protection. Missing/mismatched saved departments refuse; no inferred legal VAT exemption. No customer catalogue/private personal data in Git.

Pre-change main b5812fc7; affected importer paths unchanged since verified20Oct KAT release d8142d55; DAILY8753/9306aliases and KAT1766/1981aliases scoped PASS protected. Current healthy runtime20d99045c48dcf3b8283b9de01fc0e5c1bf7bf01. Shared wholesale readiness FAIL/release hold remains with its retained owner; no unchanged CI retry, bypass or direct deploy. Source NOT IMPLEMENTED, new profile LAB/real import NOT TESTED. Require focused positive/negative/regression and actual native PostgreSQL atomicity/concurrent replay, full green PR/main CI, ordinary exact release, measured synthetic LAB acceptance, then one conflict-free real3375 import and full readback. No fiscal receipt, physical register programming, financial/stock movement, production SQL repair/schema or other-store change. Owner retained until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-rizareio-catalog-import.md.

22/10/2026 - NATIVE CHAT APPEARANCE READY IN SOURCE / SHARED RELEASE BLOCKED / OWNER RETAINED

Retained owner feat/android-chat-native-20261017. Source PR #2989 remains OPEN and UNMERGED at 8372559067e80c301606c52912449b371ff33d05, branch feat/native-chat-compact-ui-20261022. The modest modern presentation is prepared: compact three-action row, rounded buttons/composer, less header spacing and no empty draft/status rows. Final ready-reply caption Έτοιμες keeps the full accessibility description and original callback. No chat/media/session/store/auth/push/storage/business behavior change.

Exact source Android CI 39681632487 SUCCESS: compile, unit tests, lint, actual camera capture probe and all 36 instrumentation tests, zero failures/skips. Actual synthetic native Activity geometry at 320/360dp and fonts 1.0/1.3 passed; both final PNGs from artifact 12385605225 were downloaded and visually inspected. Normal and enlarged-font captions fit, with whole ready-reply label. Proof renders the actual synthetic View tree, preserving FLAG_SECURE; it is not a private OS screenshot or physical-user acceptance. Full PR CI 39681632347 SUCCESS, all five jobs including wholesale; server 3774 PASS/0 FAIL/0 SKIP and backup 8 PASS. No appearance USER/LAB PASS or new manual claim.

Shared release remains BLOCKED by the independently recorded wholesale initialized-role readiness race: exact-main CI 39679682971 and causal reproduction in CHECKPOINTS/CHANGES/2026-10-22-central-auto-dispatch-integration.md. A later green run at another revision does not repair that known cause. Retained wholesale owner must supply the bounded source correction and regression; native owner does not change their files, retry the unchanged failed run, bypass deployment, merge this native candidate or publish another install route. No signing run or new public APK was produced. Public URL/QR still serve 0.1.9/code10; no installation requested now.

Accepted camera-video send/PC view, voice, photos, 2FA/store/push and screenshot-block observations remain protected and are not replayed. Gallery video/audio/device/update/privacy residuals retain their prior NOT TESTED scope; iOS LAST. Single next action: receiving the retained wholesale owner's causal fix, then fresh combined checks, merge, exact-main full CI, same-owner signed 0.1.10/code11, verified ordinary public distribution and owner visual acceptance. Owner remains assigned until named handoff. Evidence CHECKPOINTS/EVIDENCE/native-chat-appearance-20261022/verification.json and two synthetic PNGs. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-native-chat-appearance.md. This is a documentation/evidence hold receipt only; it does not merge the source or close the native scope.

22/10/2026 - CENTRAL-AUTO-SETTINGS-WRITER-LOCK-01 / TECHNICALLY INSTALLED / DISPATCH OFF

Owner codex/report-settings-writer-lock-20261022, receiver codex/central-auto-dispatch-20261022, coordinator codex/central-four-streams-20261018 (#2704/#2527). Before-source claim#3026/head94684b4a2ce3207bb4038a2aaca1ed524bb75471, CI39804597224 SUCCESS, merged2d0110d1696ff0e7a94c4935e444b8521121d4fd BEFORE all source/test edits. Source#3028/headad87ec72615a92a833bec711cc73308d4ff32b67 independently reviewed NO BLOCKERS for runtime/unit/native/exact remote diff; merged9a67265aaa916058621b5291c96268b6f0093bb9. Exactly three claimed runtime/test paths; all old tests and retained owners unchanged.

Actual full PR CI39805951972/build119919480780:3830 server+8backup PASS/0FAIL/0SKIP, all5jobs SUCCESS. Exact-main CI39807166764/build119924210949:3859 server+8backup PASS/0FAIL/0SKIP, all5jobs SUCCESS, additionally including the independently owned wallet#3009 and driver#3027 source. New real PostgreSQL parent+six subcases ran unskipped in BOTH: SHARE refuses first INSERT/update, KEY SHARE permits first INSERT, actual Save excludes competing SHARE, lifecycle/missing/stale epoch/maintenance/retired/busy refuse, independent generation cutover preserves original epoch, fresh locked store name governs rule, legacy zero stays compatible; selected/control/settings/fence/financial-source snapshots retained. Fixture FK is explicitly synthetic, not a claim of production FK or broader phantom safety.

Historical local original-source regression1PASS/7FAIL/0SKIP and corrected combined29PASS/0FAIL/2explicit nativeSKIP remain in raw TAP evidence. Both previously skipped lifecycle native cases actually ran in full CI. Earlier sparsecheckout baseline10PASS/2infrastructureFAIL (missing client files) was corrected by restoring existing tracked client, with old mounted tests then PASS; no application/test weakening, retry or failed assertion removal. These are technical test results, not new LAB/USER/manual PASS. Existing16/18/19Oct scoped settings/HOLD LAB PASS was not repeated.

Ordinary guarded release39808542280/deploy119928332990 SUCCESS explicitly pinned9a67265aaa916058621b5291c96268b6f0093bb9 after exact successful main CI. Renderdep-dbd31teq1p3s73dp7m40 LIVE22Oct15:56:27.889459UTC (18:56:27Europe/Athens). Independent public /api/health22Oct15:57:57.967553UTC (18:57:57Europe/Athens):HTTP200,ok:true,revision exactly9a67265aaa916058621b5291c96268b6f0093bb9. All three released source/test blobs match reviewed2af22c9634be8c3686da5463cfac8f2dd8a52d19/f76eaa72305ba77c12da5754cb512a27caf05762/6c39bde577db8cd96d9d5a9e227311b2832073be. Earlier PR-event/doc-only skipped guards are not installation evidence. This supersedes this slice's old SOURCE PREPARED/AWAITING NATIVE CI/NOT INSTALLED entries below.

Actual Save keeps originating lifecycleContext generation captured before transaction, checks SuperAdmin/selected active scope, locks lifecycle first then scoped Store FOR NO KEY UPDATE NOWAIT, uses fresh locked name for rule, preserves existing settings INSERT/version CAS/readback. Store-only55P03 returns409 REPORT_SETTINGS_BUSY immediately without retry/further query; unrelated errors and lifecycle refusals remain distinct. Parent protocol includes first settings INSERT and remains compatible with unrelated FK KEY SHARE traffic. No source preview/get/manual-send, schema, enrollment, configuration, recipient, SMTP, scheduler or business-data action changed. No production/LAB financial transaction was performed for verification.

Full automatic delivery remains OPEN / dispatch OFF. This does not close all actual writer/absent-row/rolling-old-writer protocols, authoritative verified recipient and consent/policy enrollment, production immutable delivery/payload storage, retained lifecycle/manifest/retention/reset/restore suppression contract, real transport mounting or controlled consenting-recipient final acceptance. Driver#3027 and wallet#3009 code are included unchanged, their owners retained; this receipt does not activate either feature or replace their rollout evidence. Existing repo#3014 installation/receipt#3023 and all other owners/PASS remain protected.

Next bounded source candidate is the two actual StorePaidModule UPSERT routes in platform-store-modules.js, preserving commercial/auth/inactive-store/CORE/prices/inheritance/audit behavior; read-only audit and required native cases are in #2704 comment6344797233. No source claim/edit for those routes yet. Separate production schema provisioning/ON blocker: retained owner feat/store-shifts-inventory-clear-20261018 reviews physical delivery/policy/recipient/consent/payload columns plus reset/delete/retention/full/selective restore suppression through existing#2704comment6318978275, lifecycle checkpoint2026-10-17-store-lifecycle.md and PR#2833; ACCEPTED/UNKNOWN or restored consent must never silently regain resend authority.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-settings-writer-lock.md, evidence CHECKPOINTS/EVIDENCE/report-settings-writer-lock-20261022/. Four shared records synchronized and scoped tracker PDF regenerated; other-owner common PDF and manuals untouched. Single next action: a separate green merged before-source claim for the actual module-writer protocol; no repeated blanket user approval required. Final user acceptance remains one coordinated batch after integration prerequisites, not a new request to repeat accepted transactions.

22/10/2026 - CENTRAL-AUTO-SETTINGS-WRITER-LOCK-01 / SOURCE PREPARED / AWAITING NATIVE CI

Owner codex/report-settings-writer-lock-20261022, receiver codex/central-auto-dispatch-20261022/coordinator codex/central-four-streams-20261018. Before-source claim#3026/head94684b4a2ce3207bb4038a2aaca1ed524bb75471 passed CI39804597224 and independent exact review NO BLOCKERS; merged2d0110d1696ff0e7a94c4935e444b8521121d4fd BEFORE source/test edits. Exactly existing automatic-report-settings.js + NEW automatic-report-settings-lock-order.test.js / automatic-report-settings-lock-order-postgres.test.js. Other owners, driver#3024 and all old tests unchanged.

Actual Save now captures original lifecycleContext generation BEFORE transaction, keeps actual SuperAdmin/selected active company/store checks, takes unchanged assertLifecycleMutation lifecycle SHARE NOWAIT before scoped active Store FOR NO KEY UPDATE NOWAIT, evaluates rule from fresh locked Store name, then existing insert/versioned update/CAS/readback. Store-only SQLSTATE55P03 throws explicit409 REPORT_SETTINGS_BUSY, without retry or further query; lifecycle errors and unrelated DB errors remain distinct. Legacy absent fence remains generation0 by unchanged helper, no schema/enrollment/repair. Source preview/get/manual send unaffected; dispatchEnabled:false retained.

Eight new local regression cases against ORIGINAL source:1PASS/7FAIL/0SKIP. Corrected combined unit/protected mounted/settings/snapshot/lifecycle tests:29PASS/0FAIL/2SKIP; two old native lifecycle cases require unavailable local PostgreSQL and are NOT asserted PASS. Earlier sparse checkout baseline10PASS/2infrastructureFAIL (missing AutomaticReportSettingsManager.jsx/PlatformAdminApp.jsx) was resolved by restoring existing tracked client files; old mounted tests now PASS, no assertions or application code changed to mask it. Before/after TAP retained. Independent exact runtime/unit review NO BLOCKERS, blobs2af22c9634be8c3686da5463cfac8f2dd8a52d19/f76eaa72305ba77c12da5754cb512a27caf05762. New real PostgreSQL race/epoch/key-share/native cases prepared; full required PR/main CI must run unskipped before technical acceptance. NOT INSTALLED; no new LAB/USER/manual PASS.

This fences initial settings INSERT only when the reader participates in the conflicting Store SHARE protocol; unrelated FK KEY SHARE traffic remains compatible. Other actual writers, absent module/rule/consent/policy/lifecycle enrollment phantoms and rolling old writers remain OPEN. dispatch OFF; no production/schema/configuration/SMTP/scheduler/enrollment/recipient/business/stock/fiscal/payroll action. Existing16/18/19Oct settings/HOLD LAB PASS preserved without another Save or transaction. Full automatic-delivery prerequisites remain separate from this correction. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-settings-writer-lock.md; claim PDF remains historical, final technical receipt will regenerate scoped PDF. Single next action: independent native review and full CI, then guarded exact release.

22/10/2026 - CENTRAL-AUTO-SETTINGS-WRITER-LOCK-01 / ASSIGNED BEFORE SOURCE

Owner codex/report-settings-writer-lock-20261022; receiver codex/central-auto-dispatch-20261022; coordinator codex/central-four-streams-20261018 (#2704/#2527). Explicit owner authorization for central automatic-delivery implementation persists. Extends the centrally received settings source from claim#2990, preserving all existing retained owners. Current baseline9b3acc495aeb07d85e676fe8a5513287245da754; repository start-order source#3014 is technically INSTALLED a57998d33, fullPR39795960511/main39798109764 SUCCESS3815+8/0/0 each; normalguard39800051934 and exactRender/publichealth verified; technicalreceipt#3023 merged92699f24. Do not redo that source, its accepted tests or historical LAB.

Exact source paths ONLY: existing server/src/services/automatic-report-settings.js (baseline blob2acb36b9040d6270491fecad83d4e648a56241a3); NEW server/test/automatic-report-settings-lock-order.test.js; NEW server/test/automatic-report-settings-lock-order-postgres.test.js. No other source/test edits. New driver claim#3024's two NEW files stay with codex/report-delivery-driver-20261022; coordinated in comment6344349152. Lifecycle APIs/manifest/backup/mail/VOICE/native/wallet/ftext/KAT/Rizareio sources remain with their retained owners. Shared records/checkpoint/scoped PDF are maintained centrally.

One causal change: the ACTUAL existing settings Save transaction will join a parent-store lock protocol, including its first INSERT, because AutomaticReportSettings has no Store foreign key and locking only an existing settings row cannot fence absence. Keep strict input and actual SuperAdmin/selected active company/store checks. Preserve the original request generation from lifecycleContext()[storeId], never relabel it through bindFreshLifecycleRead. In the same transaction assertLifecycleMutation(...,{lock:true}) first, then scoped active Store FOR NO KEY UPDATE NOWAIT; evaluate current cash rule using the fresh locked Store row/name; retain existing settings insert/versioned update/CAS/readback and dispatchEnabled:false. Map a real Store lock conflict to clear409 without automatic retry. Existing lifecycle absence remains legacy generation0 per unchanged helper; enrolled stale/missing epochs, maintenance/retired/busy fence refuse writes. No lifecycle enrollment, schema creation or hidden repair.

The future trusted dispatcher must use a conflicting Store FOR SHARE lock consistently. FOR NO KEY UPDATE preserves unrelated FK KEY SHARE compatibility for24hour stores. This slice alone does NOT close absent StorePaidModule/rule/consent/policy/lifecycle enrollment phantoms, rolling old writers or production dispatch authorization. No full common-lock guarantee or activation claim.

Required new isolated evidence: unit lifecycle->Store->rule->settings order; use of original generation and freshlocked name; no writes after busy/stale/foreign/inactive/rule/CAS failure. Real PostgreSQL independent-client tests hold Store SHARE against first settings INSERT and update, and reverse held Save against dispatcher-compatible SHARE; confirm NOWAIT refusals/no automatic retry, KEY SHARE compatibility, lifecycle-first order/busy/stale/missingepoch/maintenance/retired, unchanged settings/control tenant and financial/shift sources. Existing settings/native/source/preview/lifecycle tests unchanged. Preserve initial regression FAIL evidence, protect the actual16/18/19Oct scoped settings/HOLD LAB PASS without repeating Save or business transactions. Full required PR/exactmain CI must run new native cases unskipped, independent exact review and ordinary exact guarded release before technical installation claim.

Current status ASSIGNED / NOT IMPLEMENTED / NOT TESTED. dispatch OFF. No schema/production/configuration/enrollment/recipient/SMTP/scheduler/business/stock/payment/fiscal/payroll action or paid provisioning authorized by this bounded claim. No new LAB/USER/manual PASS. Broader automatic-delivery prerequisites remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-settings-writer-lock.md; scoped evidence CHECKPOINTS/EVIDENCE/report-settings-writer-lock-20261022/. Single next action: green merged before-source claim, then exactly these three paths in isolation.

22/10/2026 - CENTRAL-AUTO-DELIVERY-START-ORDER-01 / TECHNICALLY INSTALLED / DISPATCH OFF

Owner codex/report-delivery-start-order-20261022, receiver codex/central-auto-dispatch-20261022, coordinator codex/central-four-streams-20261018 (#2704/#2527). Before-source claim #3011/head c612c4513791ace1a6f704abb8702efea7773ce8, CI39793452195 SUCCESS, merged82673d503b1d48689f5be14333c7fdf8ac1a6d87 BEFORE source edits. Source #3014/head9e9862c330a85a9c214e9e8e0eed22769ca17b25 independently reviewed NO BLOCKERS; merged a57998d33e05241ffd66f6ffec8498280c651e33. Exactly three claimed runtime/test paths; old tests and retained owners unchanged.

Actual PR CI39795960511 and exact-main CI39798109764 both terminal SUCCESS, all five jobs SUCCESS: 3815 server + 8 backup PASS, 0 FAIL/0 SKIP in EACH. New real PostgreSQL parent and four subcases ran unskipped in BOTH: deterministic dependency-before-slot two-client race, consent revocation after probe, independently committed recover/reclaim winner, and same-version/token immutable replacement refusal. Local regression against original source remains 1 PASS/6 FAIL/0 SKIP; corrected local seven new +46 protected tests:53 PASS/0 FAIL/0 SKIP. Raw before/after TAP retained in this scope's evidence directory; no failed assertion removed, retry introduced or old test weakened.

Normal guarded release39800051934/deploy job119897971269 SUCCESS explicitly checked out and pinned a57998d33e05241ffd66f6ffec8498280c651e33 after full-main CI. Render dep-dbd28cgm7kps73db2u70 is LIVE at that exact source revision. Independent public /api/health observed22Oct2026 15:13:16UTC (18:13:16Europe/Athens):HTTP200,ok:true,revision exactly a57998d33e05241ffd66f6ffec8498280c651e33. Previous healthy07110f16 preserved in ordinary rollback artifact. Source increment TECHNICALLY INSTALLED; this supersedes its older SOURCE PREPARED/AWAITING NATIVE CI/NOT INSTALLED entries below. Documentation-only guards with skipped deploy jobs do not count as installation evidence.

Start now uses scoped canonical nonlocking probe -> trusted eligibility in the same transaction -> scoped locked current slot -> full immutable-input reconciliation -> existing expectedVersion/token/state/CAS. Probe never authorizes sending, locked current record remains authority, and start returns only after commit. No schema, runtime mount, scheduler, SMTP, configuration, enrollment, recipient or business-data mutation was performed. A health receipt and CI are not financial reconciliation, LAB/USER acceptance, provider delivery or inbox evidence; no new feature manual PASS.

Full automatic delivery remains OPEN / dispatch OFF. Remaining prerequisites: authoritative verified recipient and monotonic consent/policy enrollment; actual writer locks including absent-row insertion protocols; production immutable-slot/payload tables with retained lifecycle/manifest/retention/reset/restore suppression agreement; trusted committed-attempt driver and real transport wiring; controlled consenting-recipient final acceptance. Existing mail adapter is reused, not rebuilt. Settings-writer parent-lock next slice has a read-only plan in #2704 comment6343383216, NOT an approved source claim or completed writer/phantom guarantee. All lifecycle/backup/mail/VOICE/native/wallet/ftext/KAT/Rizareio owners and existing USER/LAB PASS remain protected; no completed LAB transaction was repeated.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-delivery-start-order.md; evidence CHECKPOINTS/EVIDENCE/report-delivery-start-order-20261022/. Shared registers synchronized and scoped tracker PDF regenerated; other-owner common PDF unchanged. Single next action: publish a separate bounded before-source claim for the actual settings writer lock protocol, obtain green merge before its source changes. No new blanket owner approval required; no production activation is implied.

22/10/2026 — CENTRAL-AUTO-DELIVERY-START-ORDER-01 / SOURCE PREPARED / AWAITING NATIVE CI

Owner codex/report-delivery-start-order-20261022, centralreceiver codex/central-auto-dispatch-20261022/coordinator codex/central-four-streams-20261018. Before-source claim3011/headc612c4513791ace1a6f704abb8702efea7773ce8, CI39793452195SUCCESS, merged82673d503b1d48689f5be14333c7fdf8ac1a6d87 BEFORE all source/test edits. Newer Android USERPASS3a05da77, wallet/VOICE/native/KAT/Rizareio/lifecycle/backup/mail assignments and already installed07110f source preserved; no repeat of accepted LAB.

Exactly three source/test paths: existing automatic-report-delivery-repository.js + new automatic-report-delivery-start-order.test.js / automatic-report-delivery-start-order-postgres.test.js. Start now obtains scoped canonical nonlocking probe, then trusted eligibility in same tx BEFORE scoped slotFORUPDATE; reconcileDeliverySlot(locked,probe.input) guards whole immutable snapshot before existing expectedVersion/token/state/CAS/persistence. Probe never authorizes an attempt; locked current record remains authority. Existing create/get/claim/complete/recover/API/core/mail/schema/mounting and old tests unchanged. No automatic retries; start promise returns only after transaction commit.

Actual local Node20.20.2 new regression against ORIGINAL repository:1PASS/6FAIL/0SKIP, demonstrating wrong lock order, gate-before-lock refusal and missing/changed probe-gap protection. AFTER source correction all7newPASS plus46protected lifecycle/mail/payload:53PASS/0FAIL/0SKIP. Before/failure evidence retained, no assertion removed or timeout raised. New native PostgreSQL fixture uses real independent clients/rows and bounded barriers to prove create/start common dependency order, revoke/reclaim/immutable snapshot refusal and unchanged control; no local PostgreSQL available so actual native execution is required unskipped in full CI, not asserted locally. Independent exact review/fullPR+mainCI/ordinaryguarded release still required. NOT INSTALLED for this increment; no new LAB/USER/manual PASS.

dispatchOFF. Repository protocol correction does not prove authoritative enrollment/consent/verifiedrecipient/currentwriterlocks or absent-row phantom safety. Production table/manifest/retention/reset/restore suppression, trusted driver, scheduler/real transport and controlled consenting-recipient acceptance remain separately coordinated OPEN prerequisites. No schema/production/config/business/stock/fiscal/payroll/recipient/email/provisioning action. Root keeps shared registries and scoped PDF; common latest PDF/other-owner source untouched. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-report-delivery-start-order.md. Single next action: full native CI and exact review, then normal merge/mainCI/guarded release.

Independent runtime/unit/native reviews: NO BLOCKERS. Native reviewed blob 4b9b45c74cdda886e28746ddba39ce8d43fb6b12; actual unskipped execution still pending.

22/10/2026 — CENTRAL-AUTO-DELIVERY-START-ORDER-01 / ASSIGNED BEFORE SOURCE

Owner codex/report-delivery-start-order-20261022, receiving central implementation codex/central-auto-dispatch-20261022/coordinator codex/central-four-streams-20261018 (#2704/#2527). Explicit owner authorization for central automatic-delivery execution persists. This extends the centrally owned dormant delivery repository scope from codex/report-delivery-persistence-20261020; no other owner may edit these exact paths concurrently after this green claim. All mail/schema/lifecycle/backup/VOICE/native/N10/wallet/KAT/Rizareio scopes remain protected.

Baseline main91af91c634429a7634e4bc747b8cbfba22d52d6b. Existing repository c9ff006bb1f2eefba5fb1f39bc283fae20fc43ac unchanged. Previous central required-main FAIL39679682971 is historical: named wholesale handoff2999/source3000 corrected its initialization cause, exactmainCI39746665536 and guard39747481734 succeeded. Fresh installed ancestor07110f16c361a2c36fe507220816e12707f623d5 has fullCI39763488981SUCCESS/guard39764479397SUCCESS; Renderdep-dbcuf73ncjis73dme2eg LIVE22Oct10:41:39.998758UTC. Prior central shared-snapshot source2991 and newer dormant mail adapter are included unchanged. Do not replay accepted LAB or rebuild mail adapter; old BLOCKED/NOT INSTALLED entries are superseded for those technical source increments only, not full automatic delivery.

Exact source paths ONLY: server/src/services/automatic-report-delivery-repository.js; NEW server/test/automatic-report-delivery-start-order.test.js; NEW server/test/automatic-report-delivery-start-order-postgres.test.js. One causal correction: start currently slot-locks before eligibility while create does eligibility before slot, allowing a dependency-lock cycle. Start will perform a scoped canonical NONLOCKING probe for stored immutable input, await trusted eligibility in the SAME transaction, then scoped FOR UPDATE reload; compare immutable input again and apply existing expectedVersion/token/state/CAS checks against the locked record. Probe is not authorization, caller input cannot replace stored input, and transport is never invoked by the repository. Other mutate methods/public signatures/core/get/create behavior retained. No generic hook, automatic transaction retry or wrapper bypass.

Required new isolated evidence: unit ordering and refusal before persistence, missing/corrupt/foreign probe, stale state/token/version and immutable snapshot change between probe/lock, gate failure/throw rollback; real PostgreSQL two-client deterministic create/start dependency-lock race without sleeps/retries, revocation before start, concurrent recovery/reclaim winner and immutable-input replacement refusal, no ATTEMPTING/write on failure, unchanged control tenant. Existing repository/lifecycle/payload/mail tests unchanged and protected; full required PR/exact-main CI must execute native cases unskipped. Local lack of PostgreSQL is infrastructure NOT TESTED, not native PASS. Independent exact-source review and ordinary guarded exact release required before installed claim.

Current state ASSIGNED / NOT IMPLEMENTED / NOT TESTED, no new LAB/LIVE/USER or manual PASS. dispatch remains OFF. Fixing repository ordering does not implement authoritative verified recipient/consent/policy, real writer locks/absent-row phantom protection, production tables/manifest/retention/restore suppression, trusted driver or real SMTP/scheduler. Those remain separately claimed prerequisites. No production/config/schema/business/financial/stock/fiscal/payroll/email/recipient action, paid provisioning or accepted transaction replay. Root owns registry/checkpoint/scoped regenerated PDF. Single next action: green merged before-source claim, then exactly these three files in isolation.

22/10/2026 — CENTRAL-AUTO-DISPATCH-INTEGRATION-01 / SOURCE MERGED / RELEASE BLOCKED BY NEW REQUIRED WHOLESALE FAIL

Central implementation receiver codex/central-auto-dispatch-20261022/coordinator codex/central-four-streams-20261018 (#2704/#2527). Receivingclaim#2990/CI39677533447/merge8fcc4564 precededsource. Source#2991 finalhead37812e30ae7f144a0a4d6dd7fec2a976c5c4164e merged8b8b8ca518b6bba042758e16893c61ad8e05b97c; reviewedhead→merge files[]; no other-owner source changes.

Implemented actual saved-settings→cash-source preview in ONE RR READONLY snapshot; internal tx-aware producer preserves publicwrapper/all old actor/store/settings/rule/readiness/cap/PROVISIONAL/amount semantics. Local37PASS/0FAIL/0SKIP. FullPRCI39678593064/build119495639014 all5jobsSUCCESS:3774serverPASS/0FAIL/0SKIP plus8backupPASS. New nativeparent+5subcases actuallyPASS: independentatomicwriter oldMAIN/v1/-2→freshALT/v2/+7 with realpayloadhashes; staleversionreject; public/internal no nestedtx; ownRWfixturewrite9+3=12 visible thenexactrollback; realRO25006refusal; scope/missingschema/noDDL. Oldtestsunchanged, independent exactremote reviews no blocker. Initial ownunit hash-field assertion5PASS1FAIL corrected to actual payloadFingerprint then37/0/0; supersededsourceCI39678426390 automaticcancel was notPASS.

NEW REQUIRED exact-main failure retained: CI39679682971 wholesale-isolated-lab/job119498983549 FAIL at2026-10-21T21:35:58UTC, wholesale-lab-flow.mjs66 FINAL owner() re-entry after actual inactive-seller denial. Artifact12383496880, ZIPsha2563e08614a2ca7826b8d4c31ce725fa76ccf4f11a87bcd3f8e99592cf4800fef42 downloaded and screenshot/results inspected:10earlier checks recorded, finalruntimeactive/revision8b8b8ca5 but identity Χωρίς σύνδεση δοκιμής/consolehidden. PriorPRwholeCI green at identical tree does NOT clear mainFAIL. This is distinct from resolved#2927 offline fieldset actionability; earlierPASS remains protected.

Read-only causal audit: index rolebutton initiallyenabled, lab.js initialize awaits /api/lab/meta BEFORE binding roleclicklisteners; E2E readiness onlypresence+!disabled/documentcomplete does not prove listenersbound. ActualChromium controlled-HTTP delayed-meta reproduction PASS at21:39:32UTC: whilemetapending documentcomplete/ownerpresent/enabled, oneclick→0sessionPOST; afterrelease runtimeactive butstill0POST/consolehidden. Separatefreshpage oneclickafterbinding→1sessionPOST withcontrolled403. ExactthreeHTML/JS/CSSblobs verified. This proves the causalracepath, not the unrecorded meta timing of failedCI; actualrun attribution remains an inference consistent withartifact. NoDB/production/businessrequests or actualLABPASS. Diagnostic JSONsha25600149813fbd03b32a5b0f3720a3f834e7c31bcc98cb84b6b4adb9e1ee53f0bf2. Retained wholesale owner codex/wholesale-suite-20261017 notified#2927comment6327136574 with exactfiles/findings and request for boundedfixclaim or namedreceivinghandoff. No root wholesale source edit, repeatedclick, timeoutincrease, unchangedCIretry, removedassertion, manualdeploy or guardbypass.

Release BLOCKED/NOT INSTALLED for this slice; dispatchOFF. Mainbuild/native result recorded separately and cannot override failedwholeCI. Current prior healthyRender20d99045/dep-dbcikobrjlhs73dk7oa0 retained. No newLAB/LIVE/USERfeaturePASS, no manualchange or financial/stock/fiscal/payroll/recipient/settingssave/SMTP/config/schema action. Preserve old realreportHOLD/otherstreamPASS; do not replay. Source remains centrallyassigned through completion or namedhandoff. Nextsingleaction: retained wholesale owner fixes actual initialized-role actionability/readiness with causalregression, or publishes exact boundedhandoff; then fresh fullgreencombinedPR/mainCI and ordinary guardedexactrelease. Repository lock-order correction planned read-only, NOT IMPLEMENTED/newclaimrequired; other schema/mail/lifecycle/backup assignments protected. No new general ownerdecision or copiedassignment needed.

Checkpoint CHECKPOINTS/CHANGES/2026-10-22-central-auto-dispatch-integration.md; blocked-verification.json/actual-CI-failure screenshot/scoped regenerated blocked-tracker.pdf. This top entry supersedes older pending-native/sourceprepared/expectingnormalrelease status for this first slice only; fullautomaticdelivery/actualacceptance remainsOPEN.

22/10/2026 — CENTRAL-AUTO-DISPATCH-INTEGRATION-01 / SHARED PREVIEW SNAPSHOT SOURCE PREPARED / AWAITING NATIVE CI

Owner codex/central-auto-dispatch-20261022, central coordinator codex/central-four-streams-20261018 (#2704/#2527). Explicit owner-directed receiving claim#2990/headf44f793da7db14edd530bcc41438340eef57b324, docsCI39677533447 SUCCESS, merged8fcc4564ebc7338cbe1139dea62cc2aa20a10cc2 BEFORE source. This supersedes the claim's NOT IMPLEMENTED state for the exact first four paths only, not the broader dispatch integration. Retained mail/schema/lifecycle/backup/KAT/native/VOICE/N10 and other owners remain protected.

Implemented: existing previewSavedAutomaticCashReport now opens ONE RepeatableRead + SET TRANSACTION READ ONLY before scope/settings/source reads and invokes actual tx-aware source reader in that same tx. Public source wrapper retains pre-transaction validation and maxWait5000/timeout15000/RR, captures one clock, and preserves old output/auth/company-store/settings/rule/HOLD/cap/provisional and original amounts. Internal reader neither opens nested transactions nor changes caller isolation/mode. This is real saved-settings→source-preview runtime integration. Existing cash payload remains a separate unwired production module; actual source→JSON→payload is tested, not an installed transport claim. Save/get, routes, role policy, schema, manifest, mail/repository/scheduler and all existing tests unchanged.

Local Node20.20.2 focused37PASS/0FAIL/0SKIP (6new +31protected). Initial new test5PASS/1FAIL was a test-author error requesting nonexistent payloadHash/hash; corrected to actual payloadFingerprint without changing runtime or weakening the immutable payload check, then all37PASS. Independent runtime/unit review no blocker; sourceSHA256b6a969f45e93c625049419bc572036859cc3b144e8288e021a5dbc0d7df3e176/settings833b5bc8804d402bb56ec36cd43500110d688e01f2e95ee89e91166cb1f11971/unit046d2cb376b1a94e800b6f3dcbeab6c3437a2e1b4fd2820211a5a8fa907f5424. Native concurrent PostgreSQL tests prepared separately; no local PostgreSQL is available, so no local native PASS asserted. Require actual unskipped native full PR/exact-main CI and exact reviewed release before installation.

No new LAB/LIVE/USER feature PASS; preserve manual automatic-reports/PASS.md and prior real HOLD results without replay. dispatchEnabled:false. No recipient/consent/settings save/SMTP/worker/schema/production business action. Common snapshot is NOT lock-safe dispatch authorization. Remaining: repository create/start order, authoritative verified recipient/consent + real writer locks/phantoms, reviewed durable payload/slot/lifecycle-retention-backup/recovery, transport acceptance/crash UNKNOWN and controlled actual LAB recipient acceptance. No new general owner approval needed for ordinary safe implementation. Next single action: full native CI and independent exact-source review, then ordinary guarded verified release of this first integrated slice. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-central-auto-dispatch-integration.md.

22/10/2026 — CENTRAL-AUTO-DISPATCH-INTEGRATION-01 / OWNER-DIRECTED RECEIVING CLAIM / BEFORE SOURCE

Ρητή νεότερη εντολή ιδιοκτήτη στην κεντρική συνομιλία: «ανελαβε αυτο αν μπορεις και ολο τον συντονισμο», αναφερόμενη στην παραλαβή της διασύνδεσης αυτόματων αποστολών. ΑΝΑΛΗΨΗ ΑΠΟ codex/automatic-reporting-20261016 — ASSIGNED codex/central-auto-dispatch-20261022, retained central coordinator codex/central-four-streams-20261018 (#2704/#2527). Η μεταφορά είναι εντολή ιδιοκτήτη, όχι τεκμαιρόμενη συναίνεση από σιωπή. Ο παλιός AUTO-REPORTS owner δεν πρέπει να επεξεργάζεται παράλληλα τα παρακάτω ακριβή paths. Άλλα mail/schema/lifecycle/backup source claims και οι #2705/#2706/#2707/KAT/native/invoice/N10 owners διατηρούνται· η κεντρική ευθύνη συντονισμού δεν μεταφέρει αυτομάτως όλα τα αρχεία τους.

Πρώτο bounded causal slice: server/src/services/automatic-report-source.js, server/src/services/automatic-report-settings.js και νέα server/test/automatic-report-source-transaction.test.js,

server/test/automatic-report-source-transaction-postgres.test.js MONO. Extract transaction-aware internal reader readAutomaticCashPreviewInTransaction(tx,input) από τον υπάρχοντα reader, και άμεση σύνδεση του πραγματικού previewSavedAutomaticCashReport consumer σε μία κοινή RepeatableRead READ ONLY transaction για scope/settings/source, διατηρώντας public source wrapper RepeatableRead/maxWait5000/timeout15000, όλους τους ίδιους actor/store/settings/rule/readiness/cap/financial-finality ελέγχους και ακριβές response/parameterized SQL. Internal helper δεν ανοίγει/ολοκληρώνει transaction, δεν χαλαρώνει ρόλο και δεν αποτελεί service-principal authorization. Πραγματικός source→payload consumer μέσα στο ίδιο caller-owned snapshot. Δεν αλλάζουν υπάρχοντα tests, routes, settings save/get behavior, repository, mail, schema ή manifest σε αυτό το slice. Baseline b7cfa8b9f935c28fda4aa21eeae5c24385da81d3; source blob ace4e508cfe8b6f831f9765fbcc4b5695038a6e7 unchanged from accepted reporting source.

Απαιτούμενες απομονωμένες αποδείξεις: wrapper/internal exact DAILY/WEEKLY/MONTHLY parity, no nested transaction, denied actor/store before source read, settings/rule/cap HOLD retained, actual native PostgreSQL caller snapshot remains stable across independent committed source change and sees its own explicit test writes, source→JSON→existing payload on same snapshot. Existing accepted LAB HOLD/manual evidence protected/no replay. Focused Node20 and full required PR/exact-main CI with native cases actually executed, independent review, ordinary guarded release before installed claim. Source/CI/local PASS is not LAB/USER acceptance.

Overall integration receiver now central: follow contract#2704comment6318978275, resolve common pre-lock protocol with actual revoke/reset writers BEFORE repository wiring; authoritative verified recipient/consent revisions; immutable payload/slot storage; retained schema/backup owners' exact lifecycle/retention/recovery review before DDL; committed ATTEMPTING before external I/O; positive SMTP acceptance evidence; UNKNOWN/no automatic resend. Subsequent causal slices require their own exact before-source claims. Δεν είναι άλλη μία αποσυνδεδεμένη λειτουργία: το πρώτο slice αφαιρεί το υπάρχον nested-snapshot interface gap στον πραγματικό producer. Δεν είναι πλήρης σύνδεση αποστολής.

Status ASSIGNED / NOT IMPLEMENTED / NOT TESTED. dispatchEnabled:false παραμένει. Κανένα SMTP, scheduler, verified-recipient/consent/config/production DDL/business/stock/fiscal/payroll action, restore ή επανάληψη LAB. Πραγματική τελική αποδοχή με έναν ρητά verified/consenting LAB recipient παραμένει ανοικτή μετά την πλήρη ασφαλή διασύνδεση. Root alone edits registries/checkpoint/scoped regenerated tracker PDF. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-central-auto-dispatch-integration.md. Single next action: green merged receiving claim BEFORE source, then implement exactly the four paths.

22/10/2026 - NATIVE CHAT COMPACT MODERN APPEARANCE / ASSIGNED BEFORE SOURCE

Retained owner feat/android-chat-native-20261017; branch feat/native-chat-compact-ui-20261022. Owner supplies phone photo and requests only modest visual improvement plus a more modern appearance. Current screenshot shows tall separated native grey buttons, clipped ready-reply caption, empty draft/status labels reserving large blank space, and busy attachment cards. Bounded native conversation-only presentation scope: one compact three-action toolbar, rounded composer and buttons, consistent purple palette, quieter message cards/metadata, hide empty labels while preserving nonempty status/error/draft display, adaptive wrap-content labels and >=48dp touch targets. No sender identity/data rewrite, routes, sending/recording/playback/session/store/auth/push/storage/business change; global login/store-list appearance preserved. Version/build/public same-signer distribution belongs to retained native owner. No new framework, server/schema/settings work.

Camera capture/send/PC viewing USER PASS22Oct (receiptPR2987/b7cfa8b9) and previous voice/photos/auth/push limited PASS protected; do not replay accepted real messages. UI appearance is NOT TESTED. Require Android compile/unit/lint/all existing emulator regressions plus actual synthetic conversation geometry at phone width and enlarged font, before/after screenshot review, full CI, stable owner-signed build and verified public download before final owner visual acceptance. Other N16/PWA/AI owners retained, iOS LAST. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-native-chat-appearance.md. Single next action after this claim green merge: bounded native presentation edit and visual verification. Owner remains assigned until named handoff.

22/10/2026 - ANDROID CAMERA VIDEO TO PC / SCOPED USER PASS

Owner feat/android-chat-native-20261017 retained. Owner reports: «εβγαλα βιντεο...το εστειλα και το ειδα απο το pc». USER PASS only for reported phone camera capture, explicit send and PC viewing of that video. No repeated send/request or agent message/read/push/business action. Exact test time, store/user, phone/OS, installed APK hash/version, message ID and current server revision were not independently measured. Last verified distributed candidate remains the historical0.1.9/code10 receipt (PR2972/a436c998, signed39485822858, fullCI39490203679, guard39491414896); it is context, not proof of this installed device version.

Supersedes earlier native camera-video-send/PC-view AWAITING USER TEST for this sample only. Existing voice/photo/auth/push/store limited PASS protected. No claim for video audio, gallery MP4, reverse PC-to-phone video, physical limit/cancel/permission/background cases, all devices, forensic storage or same-signer update without uninstall. No overall Android/N16/PWA/AI PASS or iOS completion. Historical blanket video NOT TESTED entries below are superseded only for this accepted camera-send-PC-view sample. Do not repeat it for documentation.

Manual docs/manual/native-chat/PASS.md and final-batch plan updated with this actual flow. Active remaining native scope: gallery video and still-unmeasured ready replies/session/privacy/device/update residuals only, with same owner; iOS LAST. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-native-chat-video.md. Single next action: finish only remaining consolidated acceptance items when owner is ready, no replay of accepted camera/voice/photos/push. Documentation-only receipt; no source/APK/deploy/schema/configuration change. Tracker/pending/PDF synchronized in this same PASS receipt.

21/10/2026 23:26 Europe/Athens — CENTRAL-RECORDED-PAYROLL-UI-01 / TECHNICAL RELEASE VERIFIED / AWAITING FINAL USER TEST

Retained central owner codex/central-four-streams-20261018, #2706/#2527. Source#2985/head c1daf3c5c26c125308400ef9ce314e01740ac2d2 independently reviewed and green merged028b1d59b2af0ff943d18d961e8a179f18c1594d after before-source claim#2984/CI39665200495/merge0376c250. Sourcehead→merge files[]; all six reviewed source/test blobs unchanged, three runtime blobs match actual synthetic Chromium evidence. Supersedes older NOT MERGED/NOT INSTALLED/AWAITING CI/UI-implementation residuals for this bounded increment only; historical FAIL/PASS and all owners retained.

ExactPRCI39667004265/build119454875705 and exactsource-mainCI39668300521/build119459505476 both all5SUCCESS:3750serverPASS/0FAIL/0SKIP plus8backupPASS/0FAIL/0SKIP. Native producer->JSON->consumer->CSV parent+all4subcases actuallyPASS in BOTH (107rows/allpageCSV, signed/private/formula provenance, tamper/stale scope rejection,23/25hDST/empty,10001source->10000CSV/nulltotals). Local60/0/0/build and synthetic realChromium desktop/mobile remain separate technical evidence; initial isolatedFAILs/fixes preserved, no bypass/replay.

Ordinary workflow_run guard39669509416/deploy119463441952 SUCCESS, actual pinned request028b1d59 at20:21:56.9888546UTC and exacthealthy20:25:19.8395781UTC. Renderdep-dbchtp0473hc73e9tr6g LIVE finished20:25:18.748516UTC. Independent no-cache publichealth20:26:18.978997UTC returned200/oktrue/exact028b1d59. Canonical/platform-admin200 serves/assets/main-C0MBgqKA.js,327767bytes/SHA256fd42a18fa592fca53355b1a9df1135fbf7ffcb61a00150b6278bdeba2577a7b3, new report endpoint/dialog/launch/CSV markers present. This verifies installed code, not actual feature acceptance. Prior healthyc444cba8/Renderdep-dbcdhtdg1s2s739s1b0g and rollbackartifact12378019276 retained; no manual deploy/guard override, new schema/migration/manualSQL or business action.

Normal selected-store sales toolbar now opens recorded-expense/linked-payroll dialog with ended Athens dates, explicit Search, bounded transaction/employee pages and all-applied-rows CSV. Strict frozen DTO/reconciled cents/coverage plus root/store/token/visibility/draft/native-dialog fences. Recorded ledger is

NOT settlement/all wages/accrual; LINKED_ONLY, unattributed may contain payroll, signed refunds retained, standalone Workforce excluded, incomplete cap suppresses complete totals. Existing INVENTORY/server roles/packages gates unchanged; no source writer change.

NO new LAB/LIVE/USER feature PASS/manual entry/fullTask12 or staffing closure. Remaining central scope: actual normal selected-LAB source/role/tenant/module/empty/nonempty/CSV/mobile acceptance, only already-existing data, no accepted transaction replay. One final Greek read-only guide: docs/testing/recorded-payroll-expense-final-user-test.md. Missing actual positive linked-source samples stay NOT TESTED; do not manufacture payments. Single next action: user final test and coordinator evidence reconciliation/required same-PR manual closure for actual PASS only.

Bounded rollout observation20:21:56–20:26:30UTC:30returnedapp-errorrecords/hasMoretrue,28Online-orders-module-disabled and2table-ordering-module-disabled on prior/newinstances. Known disabled-module refusals, no root report request/related source or module activation, no examined causal link to this UI release and no zero-production-error claim. Classifications retained in release-verification.json; no workaround.

Four-stream continuity: #2704 dispatchOFF, concrete production contract6318978275 awaits retained AUTO-REPORTS/mail/schema/lifecycle/backup agreement; cannot infer handoff. #2705 supplier#2971 limitedactualPASS protected; positivecases/margin/physical comparability OPEN. #2706 sales/hourly#2883 protected; N10/writers/accrual/staffing retained and OPEN. #2707 retained-owner#2980 actualsupplier24-rowperiod-labelPASS and priorbank/invoicePASS protected;#2981 finalOwner/device/domainbatchPREPARED/PENDING, no replay/takeover. KATPOS#2983/native/invoice and all other owners remain unchanged. No new general user decision/approval is required for this completed technical release.

Checkpoint2026-10-21-recorded-payroll-ui.md,4registries, release-verification.json and scoped regenerated release-tracker.pdf synchronized. Only completed implementation removed from pending; actual acceptance remains assigned to central owner through completion or named handoff.

21/10/2026 — CENTRAL-RECORDED-PAYROLL-UI-01 / SOURCE IMPLEMENTED / AWAITING FULL NATIVE CI AND USER

Retained central owner codex/central-four-streams-20261018, branch codex/recorded-payroll-ui-20261021, #2706/#2527. Before-source claim#2984/head aeb716073ea60c9c38acac1f8ab1b2d104ecac2f, independentreviewPASS/CI39665200495SUCCESS, merged0376c2505e7b95f4d649bdba3f26f0981da21d98 BEFORE edits. Exactly six claimed source/test paths implemented; no backend/schema/auth/module/financial/POS source edits.

Normal sales-statistics toolbar now adds OWNER/SUPER_ADMIN presentation entry for selected store. Native dialog has own ended Athens dates and explicit Search only,100-row transaction/employee-summary windows, separate applied-snapshot CSV. Strict detached/frozen DTO validation reconciles scope/period/asOf/coverage/signed integer cents/all totals/employee attribution. Root/hub/store/token/user/native-open/visibility and live draft-date fences reject stale callbacks/pages/exports. Abort/request generation, bounded temporary ancestor observer and storage/pagehide cleanup close hidden/disconnected contexts, revoke URLs and restore focus. Existing old default sales/hourly/comparison/drill/CSV protected.

Visible recorded-ledger-not-settlement/LINKED_ONLY, standalone Workforce/accrual exclusion, unattributed-payroll possibility and signed negatives remain; partial10000cap suppresses whole totals. BOM/semicolon/CRLF CSV carries company/store/exact Athens bounds/asOf/coverage/source/limitations, UTC and Greekh23 row times, every applied returned row, checked decimal amounts; untrusted formulas neutralized while trusted numeric negatives stay numeric.

Final isolated Node20.20.2 focused60PASS/0FAIL/0SKIP (6newconsumer+7newmountedUI+16backend+31oldUIregressions). Final frontendbuildPASS9.46s/TABLE_SERVICE invariant; existing bundle-size warning retained, no dependency/lock change published. Real Chromium153 synthetic desktop1348x936/mobile390x844 actual-installer/CSS pointerflowPASS: no payroll request before Search,100transaction DOM rows/101all-row CSV, pagination/draft invalidation/escapefocus/ancestorhidden cleanup;44px Search/CSV/close, mobile clientWidth356=scrollWidth356. Source blobs match browser proof. These are local/synthetic results, NOT LAB/USER PASS. New native producer->JSON->consumer->CSV parent+4subcases implemented (107rows/allpage CSV, tamper/privacy,23/25hDST/empty,10001overflow->10000CSV/nulltotals); not run locally because no PostgreSQL, must execute unskipped in full CI.

New FAIL retained: initial draft global Element dependency broke protected JSDOM regressions (13fail); fixed realm-independent DOM checks without changing oldtests, final60/0/0. Subsequent newtest41PASS/2FAIL counted employee-summary rows and clicked a disabled control expecting an event; corrected transaction-table assertions/explicit enabled close token-fence test, guards not relaxed. Review also fixed draft-programmatic value fences and trusted-negative CSV handling before publication. Initial real-browser mobile25px controls/677vs356overflow corrected to44px/356vs356; screenshots verified. No production change or business action caused by these isolated failures.

Independent source/security review finds no runtime blocker at final three runtime hashes; exactremote review/full PR and exact-main CI remain required. Source NOT MERGED/NOT INSTALLED at this publication. All accepted LAB PASS and other owners retained, including KAT POS#2983, N10, suppliers/margin, VOICE/native. Cash dispatchOFF; retained production-contract agreement remains blocked, no takeover. No production/LAB financial/stock/fiscal/shift/payroll/settings/recipient/SMTP action or accepted-test replay.

Checkpoint2026-10-21-recorded-payroll-ui.md and evidence recorded-payroll-ui-20261021/local-verification.json/browser-verification.json/scoped source-tracker.pdf synchronized. Single next action: independent exact-source review and full native PR/main CI, ordinary guarded exactrelease/health, then final selected-LAB user read-only acceptance. Do not add manualPASS or close whole payroll/staffing/four-stream scope before actual acceptance.

21/10/2026 — CENTRAL-RECORDED-PAYROLL-UI-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained central coordinator codex/central-four-streams-20261018, #2706/#2527; source branch codex/recorded-payroll-ui-20261021. Baseline main a70ea46be258feb8a584e59c8a139c9c4f63477b. Continuation of installed backend#2976/c444cba8 and receipt#2979; receipt mainCI39627120044 now completed SUCCESS, no rerun. Existing central sales V4 ownership from#2725 and2026-10-19-central-sales-comparison.md retained. Green reviewed merge of this claim is required BEFORE any source/test edit.

Exact six source/test paths ONLY:

- client/src/components/commerce/installKioskReportsSalesV4.js (root integration only).
- NEW client/src/components/commerce/recordedPayrollExpenseView.js.
- NEW client/src/components/commerce/recordedPayrollExpenseDialog.js.
- NEW server/test/recorded-payroll-expense-ui.test.js.
- NEW server/test/recorded-payroll-expense-consumer.test.js.
- NEW server/test/recorded-payroll-expense-consumer-postgres.test.js.

Bounded read-only normal sales-report entry opens native dialog inside current report root, with explicit locked selected store, separate ended Athens calendar dates, search,100-row pagination and separate all-applied-rows CSV. No automatic report fetch before explicit search. Strict producer DTO/period/coverage/cent arithmetic/attribution validation, immutable applied snapshot, current root/hub/store/token fences, stale cancellation and no export after draft/context changes. Existing default sales/hourly/comparison/drill/CSV behavior and all accepted PASS protected. Visible LINKED_ONLY and recorded-ledger-not-settlement limits; unattributed expenses may include payroll, signed refunds retained, accrual/standalone Workforce excluded, incomplete10000row cap suppresses full totals. Formula-safe BOM/semicolon CSV carries same source, company/store, exact period/asOf/coverage and uncertainty. No new auth policy or JWT decoding; server authorization remains authoritative, response company scope displayed.

No backend/router/schema/index/auth/module/financial/payroll writer changes. N10 reconciliation, all supplier/VOICE/native/POS layout owners retained, including KAT#2982. Cash dispatch remains OFF; production contract#2704comment6318978275 awaits retained AUTO-REPORTS/mail/schema/lifecycle/backup agreement. No SMTP/recipient/scheduler activation, production data write, business transaction or accepted LAB replay.

Required new isolated verification: pure malformed/overflow/formula/signed/date cases, mounted actual installer/dialog lifecycle and stale cross-store/token/tab cases, actual native producer JSON->consumer->CSV, old sales regression, desktop/mobile layout, independent review and all required PR/exact-main CI. Ordinary guarded exact deployment and independent health required before user test. CI/local/native tests are not LAB/USER PASS. Selected-LAB real-source/role/module/mobile acceptance remains OPEN until observed by user; no manual PASS or whole Task12/four-stream completion.

Root exclusively owns shared registries/checkpoint/scoped regenerated tracker PDF. Checkpoint CHECKPOINTS/CHANGES/2026-10-21-recorded-payroll-ui.md; evidence CHECKPOINTS/EVIDENCE/recorded-payroll-ui-20261021/. Central ownership retained through completion or named handoff. Single next action after green merged claim: implement exactly six paths in isolation through verified release, then one final user acceptance batch.

21/10/2026 19:38 UTC — KAT-POS-PHOTO-KEYS-01 / ASSIGNED / NOT TESTED

Retained KAT owner ops/kat-catalog-import-20261020; independent branch feat/kat-pos-photo-layout-20261021. Owner explicitly requests KAT POS keys from eighteen 21Oct screenshots, existing MyWorkStation palette, blank configurable keys, existing coffee/chocolate/tea organization. Scope: reviewed exact existing KAT product identities, quick-key order and screenshot product groups; preserve existing beverage children and fee SET. No catalog import, price/VAT/department/stock/activation/recipe/order/payment/shift/auth/licensing or other-store changes. Separate mobile-topup SET and all other owners remain untouched.

Read-only baseline main700514f2f2f7a2d28ea85e1d6bb41de65db50c30; KAT1900 catalog rows, StorePosLayout version3695 with3 nested beverage roots and20 quick keys. Quick3 currently resolves CARLSBERG rather than requested water. Existing designer normalizer drops nested children and limits14 roots: do not publish a destructive normalized replacement. Review bounded preservation/import capability before any source/config write. Screenshot SEPTONA requested1.00 conflicts with current imported1.50: leave disputed key unassigned pending exact identity/owner resolution; no price change inferred. Preserve completed coffee PR2970/2977/2978, import/zero-stock/13-workers and all accepted tests without replay.

Status NOT TESTED for this new layout, no new LAB/LIVE PASS. Required: green merged claim before source/state-changing LAB; exact reviewed mappings; if source needed, focused/full CI and ordinary guarded exact deployment, new synthetic-only LAB acceptance and published five-file receipt before real KAT configuration. Native selected-store UI writes only, fresh before/after catalog/financial/stock/control fingerprints, independent layout readback, navigation inspection and final screenshot. No direct production SQL/API write or seed/migration. Claim remains with this owner until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-21-kat-pos-photo-keys.md. Single next action: finish exact product mapping and bounded native layout publication path after green claim merge.

21/10/2026 - CENTRAL-RECORDED-PAYROLL-EXPENSES-01 / TECHNICAL BACKEND RELEASE VERIFIED / NORMAL-APP ACCEPTANCE OPEN

Retained central owner codex/central-four-streams-20261018, #2706/#2527. Source#2976/head794e78937c0ee712d694c4a583ea9c4bd75fc588 independently reviewed, green merged c444cba8a6e87cf4f3a0fc9ae82b251338a51b54 after before-source claim#2975/CI39620870173/mergedd6802a07. Supersedes older NOT MERGED/NOT INSTALLED/AWAITING NATIVE CI for this four-path backend increment only. History, owners and actual PASS retained; no UI or whole payroll/staffing completion.

Exact PRCI39622401968/job119299349221 and exact source-mainCI39623576730/job119303387627 each all5SUCCESS,3732serverPASS/0FAIL/0SKIP plus8backupPASS/0FAIL/0SKIP on Node20.20.2. Native PostgreSQL parent+all7subcases actually executed andPASS in BOTH: scoped SQL/actual-router HTTP fixture, read-onlyRR/independent-client snapshot, signed count-once ledger, private ambiguity, roles/packages/DST/cap10000-10001 and missing-table/column503 without bootstrap. HTTP uses synthetic auth, not normal production login/middleware acceptance. Local48/0/0 remains separate. Independent remote review/merge and deployed-revision blob checks verify all4reviewed source/test bytes unchanged.

Ordinary workflow_run guard39624802820/deployjob119307311882 SUCCESS: actual pin/requestc444cba8 at21Oct15:23:33.1982941UTC, exacthealthy15:28:49.4029688UTC. Renderdep-dbcdhtdg1s2s739s1b0g LIVE finished15:28:49.460595UTC. Independent no-cache /api/health15:29:47.591937UTC returned200/oktrue/exactc444cba8/version0.22.0+kat-test-pos. Previous healthya436c998/dep-dbbsrho473hc73cduhd0 retained as rollback provenance. Guard-head e985173f and later main73dd2519 contain concurrent coffee documentation#2977/#2978 only; their docs-only runtimeSKIP is not source/native proof. Fresh records preserve coffee manuals/evidence/commonPDF and all other-owner changes. No manual deploy/guard override or introduced schema/migration/manual SQL; existing ordinary startup retained.

Installed backend GET /api/reports/recorded-payroll-expenses retains INVENTORY mount, OWNER/SUPER_ADMIN-only explicit active company/store and BASIC+PAYROLL SELECT gates forOWNER. One RepeatableRead/READONLY snapshot, signed nonreversed OTHER_EXPENSE by ended Athens occurredAt; ledger counted once. Only one approved positive exact scoped Workforce source link attributes beneficiary; ambiguous/foreign/mismatched links remain unattributed without foreign identities. Exact cents/coverage,10000row cap suppressing incomplete full totals; LINKED_ONLY, settlementVerified:false, accrual/standalone Workforce excluded. Recorded ledger is not bank settlement or all paid wages; outer authorization is not serializable revocation proof.

NO new LAB/LIVE/USER feature PASS/manual entry/wholeTask12 closure. Normal UI/CSV and real selected-LAB source/role/module/mobile acceptance remain NOT TESTED/OPEN. No coordinator financial/stock/shift/payroll/fiscal/recipient/SMTP action or accepted business replay. Bounded rollout observation:10 online-module-disabled log messages on prior serving instance15:26:56-15:27:59UTC; no payroll request, online source change or zero-production-error claim. No module activation/bypass; root cause outside scope. Structured evidence retains this observation.

#2704 dispatchOFF; concrete production integration proposal comment6318978275 awaits retained AUTO-REPORTS/mail/schema/lifecycle/backup agreement. #2705 supplier#2971 actual limited PASS protected, positive actual cases/margin/receipt-comparability OPEN. #2706 earlier sales/hourly/CSV#2883 protected; N10 reconciliation/accrual/staffing/writers remain separate. #2707 retained VOICE/native owners/acceptance unchanged. All ownership preserved.

Checkpoint2026-10-21-recorded-payroll-expenses.md and evidence recorded-payroll-expenses-20261021/release-verification.json/release-tracker.pdf synchronized with4registries. Technical backend delivery complete; central residual ownership retained. Single next action: bounded UI/CSV integration claim on existing central report consumer with visible uncertainty/coverage/entitlements, then normal selected-LAB acceptance. No new general user decision needed.

21/10/2026 15:22 UTC — KAT coffee environmental fee / REAL CONFIGURATION PASS

Owner ops/kat-catalog-import-20261020 completed this coffee scope. This supersedes coffee AWAITING LAB/real-configuration entries below; they remain historical only. Source PR2970 is already guarded LIVE; fresh health21Oct15:21UTC confirms exact a436c9981e1ffa72f9006b5964ab6a7dd2b8536e. No source/deployment or completed CI replay. LAB receipt PR2977 final head1d34c3317ce8a1306dd3d1c2f24bc5d64440cbb3, docs CI39623829569 SUCCESS, merged e985173ffc1ed7d1b276fad7e4d740ccb0a44c9b BEFORE real configuration. Concurrent independent payroll report PR2976 preserved.

Native SuperAdmin selected pilot-company / kat-store, confirmed existing KAT-32944 (0112e532-4761-44c5-ac51-c16e8cca7cb4), qty1/salePrice0.05. Two distinct confirmed bulk transactions only: 21 prepared-coffee rows, excluding raw capsule SKUs KAT-54013/54014, saved15:17:11.304711UTC audit3af11fb6-d36f-49c2-b5f1-bbe45125117e/requeste58d3012-8aff-43ee-a8b5-f0d599c07554; then36 ΡΟΦΗΜΑΤΑ/ΚΑΦΕΣ rows saved15:19:34.356708UTC auditc2301ee1-ff59-4fa4-a7e2-6b46573cde7b/request927e8045-8cba-4a61-bdda-c72df3a5b956. All unrelated fields kept Χωρίς αλλαγή; matching embedded preparation-fee removal explicitly confirmed. No direct SQL/API write.

Independent complete60-row before/after readback: exactly57 intended parents isSettrue with one relation to existing fee at1/0.05;36 matching embedded fees0.05→0. ZERO protected-field mismatches: base prices, VAT/departments, stock, active status (including7inactive), recipe/station/autoPrint/modifier settings retained. Fee and two excluded capsules unchanged. KAT1900stocks all0. Protected company-product hash53b1a8b0ba6c712f80546ef9856106e4, store-product hashc3d832bd0d4ee02300b4d9195397bc69 and recipe/modifier/control hashes unchanged across both writes. Other-store stock hash1aa55892daf1cfe4decd0231fa87f112 and other-company product hash1831c5d734af5524fe365487b7c732bd unchanged in the measured configuration window. Earlier independent other-store changes outside that fresh window are not claimed as isolated.

KAT199movements/165sales/180payments/213transactions and shift hash1c5be98dd701111a23549691064bd2de unchanged; no openKATshift. LAB/N40 controls unchanged. No checkout, order, preparation submission, fiscal/payment/stock/shift finalization. Actual reopened FREDDO ESPRESSO card → SET displays saved existing environmental fee qty1/0.05 and actor/time. Native bulk/POS LAB acceptance is already recorded; no test repeated for a photograph.

Evidence CHECKPOINTS/EVIDENCE/kat-coffee-fee-20261021/09-kat-before-batch1.json through 13-bulk-audit-receipts.json, kat-freddo-saved-fee.jpg and prior LAB evidence. Coffee configuration CLOSED with this bounded LIVE PASS; physical KAT fiscal checkout, mobile and wider POS readiness remain NOT TESTED. Cashier refreshes POS catalog, selects coffee and sees separate0.05 fee; example unchanged1.65+0.05=1.70. Existing import/zero-stock/13-worker PASS untouched. Separate0.50 mobile-top-up service and historical/large-stocktake follow-ups remain independently OPEN; do not reimport or reset stocks again.

21/10/2026 - CENTRAL-RECORDED-PAYROLL-EXPENSES-01 / SOURCE IMPLEMENTED / AWAITING NATIVE CI AND LAB

Retained central owner codex/central-four-streams-20261018, source branch codex/recorded-payroll-expenses-20261021. Before-source claim#2975/head220d0bef1800680b709fb7186ef4c167facf4c19 independently reviewed; applicable CI39620870173 SUCCESS, merged d6802a07a5db7f7527e90139b70309d81543402d before source. Exactly four claimed source/test paths implemented; existing router adds only an import and GET /recorded-payroll-expenses. Existing /api/reports INVENTORY auth/license mount and old sales endpoints unchanged. No UI/N10/payroll writer/index/schema/auth/module writer changes.

Implemented one RepeatableRead/READONLY snapshot with fixed timeout; OWNER/SUPER_ADMIN-only explicit active company/store, BASIC+PAYROLL via SELECT/pure resolver for OWNER. Signed nonreversed OTHER_EXPENSE ledger counted once by ended Athens occurredAt range. All matching source links counted before scope qualification; one APPROVED positive exact scope/amount/method/employee-company link attributes beneficiary, ambiguous/foreign/mismatched links expose no foreign payload and remain unattributed. No actor/name heuristic, accrual or standalone Workforce sum. Exact NUMERIC-text integer cents; same-query coverage/count with10000returned cap, overflow suppresses full/employee totals. settlementVerified:false and LINKED_ONLY limitations are explicit; this is not confirmed bank settlement or all payroll. Missing tables/columns fail503 with no bootstrap; existing outer authorization gate is not a serializable revocation guarantee.

Local Node20.20.2 focused48PASS/0FAIL/0SKIP, including16new injected service/projection tests and32protected sales/comparison/hourly/count regressions. New native PostgreSQL parent+7subcases and actual production HTTP fixture are implemented but NOT EXECUTED locally (no local PostgreSQL). Local projections do not certify SQL/native/LAB. Root npm workspace install/Prisma client generation completed in an isolated clean worktree; dependency engine warning for unrelated nanoid6 was observed, no lock/dependency changes are included. Independent exact source/security review and required full PR/main CI/native execution remain prerequisites for merge. No feature/manual PASS or whole-task closure; NOT INSTALLED at source publication.

Protected sales/hourly/CSV#2883, supplier#2971 and all prior accepted transactions retained without replay. No production/LAB business/financial/stock/fiscal/shift/payroll/schema/SMTP/settings action. CashdispatchOFF; concrete integration proposal#2704comment6318978275 awaits retained owners. Broader margin/staffing/AI/native physical residuals stay with owners. Single next action: independent review/full native source CI, then ordinary merge/exact-main CI/guard/live revision verification; preserve and fix any new FAIL rather than bypass it. Backend technical acceptance remains separate from normal UI/roles/mobile/real-source feature acceptance. Evidence folder recorded-payroll-expenses-20261021, checkpoint2026-10-21-recorded-payroll-expenses.md; registries and regenerated scoped PDF synchronized.

21/10/2026 15:05 UTC — KAT coffee fee / LIMITED LAB PASS / REAL KAT CONFIGURATION OPEN

Retained owner ops/kat-catalog-import-20261020, source fix/kat-coffee-fee-set-20261020. This is the authoritative coffee status; older source/LAB sign-in entries below are historical. Source PR2970 and guarded LIVE a436c9981e1ffa72f9006b5964ab6a7dd2b8536e unchanged; completed full CI39485499295/exact-main39486804524 are not repeated. Concurrent recorded-payroll-expenses claim/source PR2975/2976 preserved; coffee runtime unchanged.

Actual Cloud Chrome LAB acceptance completed 21Oct14:54–15:05UTC using native SuperAdmin Inventory and LAB POS2 / MAIN shift a3494bb3-61cf-447c-9707-27311f35708c. Three synthetic zero-stock fixtures only: A666247ef-233c-4e72-8a25-7938a3783082 at1.65, B18bd6052-38e8-44e6-8152-74e7567afa89 at2.00, feeab5404f8-d481-426f-aaf6-974634e49066 at0.05. One confirmed native bulk transaction attached both parents qty1/price0.05 and cleared A's matching embedded preparation fee0.05→0; prep enabled/station LAB COFFEE/autoPrintfalse retained. Base prices, VAT/departments, activation and stock unchanged.

LIMITED LAB PASS: actual cart A1+fee1=1.70; A2+fee2=3.40; A2+B1+sharedfee3=5.45; removing A leaves B1+fee1=2.05; removing B empties cart0.00. Child quantity controls disabled. No checkout, preparation submission, payment, sale, stock posting or shift action. Financial/stock/control readbacks unchanged: LAB95movements/90sales/90payments/134transactions, MAIN cash/card/IRIS/total0 and drawer9.40. Existing LAB catalog hash90ba4be5db0402961e18b28541cf965e unchanged. KAT1900/199/165/180/213 and control store unchanged. Measurements bracket the cart sequence and the later individual actions; no separate DB sample exists between first add and qty increment, so per-action financial attribution for those two steps is NOT TESTED. No replay to fill that gap.

Evidence CHECKPOINTS/EVIDENCE/kat-coffee-fee-20261021/01-before.json through 08-pos-acceptance.json, bulk success and empty-cart screenshots. Inventory/POS manuals updated only for this measured scope. Mobile/physical fiscal checkout remain NOT TESTED; no overall POS readiness claim.

Remaining ASSIGNED: after this documentation PR green CI and merge, refresh exact real KAT candidate identities/controls, configure57 prepared coffees in normal selected-store bulk UI using existing KAT-32944 qty1/0.05, clear only matching embedded preparation fee, preserve7 inactive and exclude raw capsules KAT-54013/54014. Then independent full protected-field readback and real configuration receipt. Separate0.50 mobile top-up service remains OPEN; accepted import/stock/staff work is not repeated.

21/10/2026 - CENTRAL-RECORDED-PAYROLL-EXPENSES-01 / ASSIGNED BEFORE SOURCE

ASSIGNED central coordinator codex/central-four-streams-20261018, branch codex/recorded-payroll-expenses-20261021, #2706/#2527. Baseline06163dd698bd1eb8699d09bea00a2169da041ae2. Exact four source/test paths only: existing server/src/routes/kiosk-reports-sales-v4.js (central transfer#2725, checkpoint2026-10-18-central-four-streams.md), NEW server/src/services/recorded-payroll-expense-report.js, NEW server/test/recorded-payroll-expense-report.test.js, NEW server/test/recorded-payroll-expense-report-postgres.test.js. Green merge of this claim is required BEFORE source edits. Existing N10 September reconciliation/workforce writers/payroll periods, UI, schema, index.js/api.js, auth/module writers, all other owners and accepted PASS remain unchanged.

Bounded integrated backend increment: additive GET /api/reports/recorded-payroll-expenses on existing INVENTORY-authenticated mount. OWNER/SUPER_ADMIN only, explicit current-company and active selected store, STORE_OPERATOR denied. OWNER additionally requires BASIC and PAYROLL personnel packages via SELECT and pure existing resolver, never bootstrap helpers. Explicit ended Europe/Athens dates, maximum366days, same RepeatableRead/READONLY snapshot for scope/entitlement/ledger/link/coverage. Nonreversed signed StoreTransaction OTHER_EXPENSE rows by occurredAt; no invented status column or paymentDate timezone filter. Count ledger once, do not add Workforce payment a second time. Stable beneficiary only when exactlyone sourceTypeSTORE_TRANSACTION/sourceId link agrees in scope/amount/method/APPROVED and employeecompany; otherwise unattributed with reason. Actor/name/description never beneficiary. Standalone Workforce payments/accrual excluded, coverage LINKED_ONLY, settlementVerified:false; recorded expenses are not certified paid wages or bank settlement. POS payroll lacking an explicit WEP link remains unattributed. Checked integer cents, bounded10000returned rows and same-snapshot overflow; incomplete coverage suppresses complete totals. No financial/source/config writes or DDL, no transport/assistant/UI activation.

Independent before-source review clarifications: count ALL sourceType/sourceId links before qualification, so foreign/duplicate links cannot be hidden by a scoped join; expose only generic review reasons, never foreign payload. Attribution requires strictly positive matching ledger/WEP integer cents, while signed refunds remain in ledger/unattributed. Module rows must match selected-store schema ownership and duplicates fail closed. Existing outer license gate is preserved; this snapshot is not a serializable revocation guarantee. No new licensing policy is invented.

Status NOT TESTED. Required new isolated unit/nativePostgreSQL/actualHTTP cases: scope/roles/packages/active stores, Athens DST/ended ranges, signed refunds/reversals/exactboundaries, valid/duplicate/foreign/mismatched/unapproved links, stable beneficiary vs actor, count-once, missing schemas without writes, cap/completeness and unchanged control fingerprints. Native cases must actually execute in full source CI. Full PR/main CI/review/ordinary exactrelease before any new real acceptance; backend integration is not UI/LAB/full payroll or staffing PASS. Existing sales/hourly/CSV#2883 and supplier#2971 protected, no replay. Cash dispatch OFF; proposed production contract#2704 comment6318978275 awaits retained-owner agreement, no source takeover.

Checkpoint CHECKPOINTS/CHANGES/2026-10-21-recorded-payroll-expenses.md. Central owner retains this bounded subtask until completion or named handoff. Single next action after green merged claim: implement exact four paths in isolation and require native/full CI. All broader four-stream residuals remain OPEN.

20/10/2026 21:29 UTC — KAT coffee fee / CODE LIVE / BLOCKED ON LAB POS SIGN-IN

Retained owner ops/kat-catalog-import-20261020, source branch fix/kat-coffee-fee-set-20261020. No receiving page is assigned and this scope is not released. Resume this work, without repeating completed CI, import, stocktake or staff onboarding.

Source PR #2970 final head 78aa48359abf05a327029ac9c0554e7a5df604d7, full CI 39485499295 SUCCESS: 3708 PASS / 0 FAIL / 0 SKIP, plus 8 backup-monitor tests; actual isolated PostgreSQL SET transaction test passed. Initial CI 39484283507 failed only because test evidence serialized a BigInt count; fixed by integer casts before the green final head. Merge 487711f165616cb98dbc702ea05c79b1685c64fd, exact-main CI 39486804524 SUCCESS with the same counts and Windows, build, Chromium, production invariants and HTTP E2E checks. Ordinary guarded deployment 39488419559 SUCCESS; Render dep-dbbsho8ae00c73a2lprg LIVE and independent health confirmed exact 487711f at 20:06 UTC. No manual deployment or safeguard bypass. At 21:29 UTC newer Render dep-dbbsrho473hc73cduhd0 is LIVE, health revision a436c9981e1ffa72f9006b5964ab6a7dd2b8536e; GitHub comparison confirms it contains the coffee release and changes none of its production or test files.

NOT TESTED: new business-flow LAB acceptance and real KAT fee configuration. No synthetic product, SET link, preparation setting, sale, payment, stock or shift action was executed for this task. Read-only candidate review found 59 rows in the prepared-coffee categories; exclude raw capsules KAT-54013 and KAT-54014 (prices 0 and 0.01). Intended selection is 57 prepared coffees, including 7 already inactive that must stay inactive. Existing fee KAT-32944 remains EUR 0.05, quantity one per coffee, base coffee price unchanged. Modern coffees' identical embedded preparation fee must be cleared in the same confirmed bulk transaction to avoid double charging. Other drinks, packaged coffee, ingredients, VAT/department, prices, activation, stocks and all other stores remain protected.

Actual Cloud Chrome LAB Store Mode showed the ordinary sign-in screen, selected synthetic operator LAB POS 2, PIN/card methods, disabled submit and no active operator session. The secure browser-auth request was interrupted by the user. Fresh visible observation afterward still shows the sign-in screen. No credentials were read, reconstructed, reset or created; do not retry authentication without the user's renewed request. This is an access blocker, not a functional LAB FAIL or PASS.

At 20:06 UTC the read-only pre-action baseline was LAB 102 catalog / 95 stock movements / 90 sales / 90 payments / 134 transactions; MAIN opening drawer9.40, cash/card/expenses0. KAT1900 catalog / 199 movements / 165 sales / 180 payments / 213 transactions. No following business action occurred. These measurements are now stale: refresh and record a new baseline before any future state-changing action.

Single next action: complete the normal LAB POS sign-in through secure browser authentication or user control when the user requests continuation. Then create a bounded synthetic pair of coffees and fee through native LAB UI, measure confirmed bulk SET attachment and matching embedded-fee removal, test actual POS add/quantity/shared-fee/removal/clear without checkout, and publish the five-file LAB acceptance before any real KAT configuration. Then normal KAT bulk UI applies the reviewed 57 identities in two batches, preserving all protected fields, followed by independent readback and the five-file real configuration receipt. No production SQL write, seed, migration, credential change, payment or stock finalization is authorized as a shortcut. Separate EUR0.50 mobile top-up service remains OPEN. Existing completed import/zero-stock/13-worker PASS remains unchanged.

20/10/2026 20:30Z — VIDEO0.1.9 LIVE / TECHNICAL RELEASE VERIFIED / PHYSICAL BATCH OPEN

Authoritative native status; supersedes older native AWAITING CI/BUILD/RELEASE and abandoned proxy-output candidate entries below. Owner feat/android-chat-native-20261017 retained, no handoff or N16/PWA/AI scope takeover. Owner-approved video implementation and technical distribution are complete. This is NOT a physical video USER/LAB PASS, overall Android PASS or iOS completion. Existing reported Android voice send and PC playback USER PASS20:49/20:51 and photo/auth/push/store/screenshot-block limited PASS remain protected; no accepted test replayed for documentation.

SourcePR2961 merged8eaa3db; source head307acc6c CI39481379036 3691+8PASS and Android39481379059 compile/unit/lint, actual playable camera capture probe and all35instrumentation PASS. Stable signing preflight/setup correctionPR2967 mergeda52b72a after full39483568802 and exact-main39484847264 SUCCESS. First stable dispatch correctly refused newer docs-only SKIPPED main5e16907 before key; forced exact-source full39486049433 SUCCESS then signed run39485822858 attempt2 SUCCESS, actual camera+all35 tests before key. No guard bypass, new key, secret/config/DB change or private signing material inspected.

Independently verified0.1.9-preview/code10, package gr.myworkstation.chat.preview; stable owner cert17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97 MATCH; APKv2 RSA and content digest VERIFIED. Artifact12294537237 only APK+receipt, APK3687252bytes/SHA256ce5c07cd446f649e33f767b3075f22c2d99bf182ffbf1804c77fdd77874fb7c2. APK source5e16907a0cbc989c3b43a484970c660423774002 has identical Android tree34b56cdadd708ff0bd3dea0007d11175fcee3547 on released main. Foreign coffee/POS source and all other owners preserved.

DistributionPR2972 mergeda436c9981e1ffa72f9006b5964ab6a7dd2b8536e after fullCI39488932927 SUCCESS3708PASS/0FAIL+8backupPASS. Exact-main fullCI39490203679 same3708+8 SUCCESS; ordinary guarded deploy39491414896 SUCCESS, Renderdep-dbbsrho473hc73cduhd0 LIVE20:26:46Z and independent public health exacta436c998. Public manifest0.1.9/code10 and downloaded APK byte-for-byte equal signed artifact; no private key files. Public page visibly shows0.1.9/3.5MB. Existing0.1.8/0.1.3 retained. Installation URL/unchanged QR: https://myworkstation-app.onrender.com/downloads/chat-android/ and CHECKPOINTS/EVIDENCE/native-stable-signing-20261020/install-qr.png. Same signer/code increment supports update over0.1.8; actual phone update remains NOT TESTED. No uninstall of POS.

Current video scope: explicit foreground camera/gallery, preview/use/cancel, then ordinary Send, GENERAL-only bounded server endpoint and explicit PC/native playback. MP4 H264/AAC <=30seconds/12MiB. Camera uses anonymous public Os.memfd_create RAM descriptor on Android11+, no app-created media pathname/cache/MediaStore. Android8–10 support existing MP4 gallery only. Server validates structure/track/sample ranges and tenant/store/settings before atomic message+metadata audit and generic post-commit push. Session/store/background/logout fences and bounded web streaming/blob revocation retained. Old photo/PDF/voice endpoints/renderer preserved. Existing selected gallery original stays under user/provider control; no zero OS/SDK/forensic trace promise. No real agent messages, pushes, read acknowledgments, business/stock/financial/fiscal/production settings operations.

Evidence: CHECKPOINTS/EVIDENCE/native-video-20261020/artifact-verification.json,release-verification.json,public-download.jpg; checkpoint CHECKPOINTS/CHANGES/2026-10-20-native-chat-video.md. Central tracker/pending/final-batch/PDF synchronized by this consolidated technical receipt. No CI-only video entry in docs/manual; actual acceptance is still pending.

Remaining: one final physical Android batch (model/OS/store/time, same-signer update, new camera+gallery video explicit Send and correct-store PC playback; ready replies and still-unmeasured session/privacy/device residuals per final-batch plan). Hardware/forensic behavior and broader devices NOT TESTED. Do not repeat accepted voice/photos/push only for documentation. Single next action after this receipt green merge: final physical batch when owner is ready, record actual results and update manual only for real PASS. Owner retained until explicit named handoff; iOS LAST.

20/10/2026 - KAT coffee environmental fee / SOURCE READY / AWAITING CI AND LAB

Owner ops/kat-catalog-import-20261020, branch fix/kat-coffee-fee-set-20261020. Claim PR #2966, head d01eef752368be8c6896d83a6943068a78ab360f, docs CI 39481409332 SUCCESS, merged 783abc04ca645aa851dc8de1292b33aaa6135e39 before source edits. Owner-approved amount: unchanged coffee base price plus one separate existing fee product at EUR 0.05 per unit (1.65 + 0.05 = 1.70).

Source now adds proportional SET cart quantity/removal with shared actual child product IDs, preserves standalone surplus and blocks inconsistent restored drafts instead of guessing charges. Existing checkout/hold identities, preparation modifiers and ordinary cart behavior retained. Existing selected-store bulk-card transaction gains an explicit confirmed SET link, same-company/store validation, stale-price and cross-store parent rejection, UUID idempotency and full audit. Optional clearing removes only the matching embedded preparation fee to avoid double charging. No coffee base price, VAT, department, stock, recipe, activation, auth, schema or financial-finalization change. Mobile waiter retains its existing POS-only restriction for fee-bearing coffee after conversion to SET.

Local focused suite: 29 tests, 27 PASS, 0 FAIL, 2 PostgreSQL-only SKIP (no local database); final mounted UI suite after mobile guard: 3 PASS, 0 FAIL, 0 SKIP. Actual Inventory/POS components exercised, including two rapid scans in one React batch, shared fee, quantity/removal, confirmation, selection/store reset and blocked mobile SET submission. Final Node 20 frontend build PASS, TABLE_SERVICE bundle verified. Added isolated PostgreSQL transaction test must run in full CI; local skip is not a database PASS. Evidence: CHECKPOINTS/EVIDENCE/kat-coffee-fee-20261020/local-validation.json.

AWAITING full CI, guarded exact LIVE revision, fresh bounded synthetic LAB measurements and published five-file LAB acceptance before real KAT configuration. No new LAB or real-store PASS claimed. No real KAT fee configuration written. Final explicit prepared-coffee identities must be reviewed before normal bulk UI apply; inactive products remain inactive. Other owners and all completed import/stock/staff work preserved. Separate EUR 0.50 mobile top-up service remains OPEN.

20/10/2026 - KAT COFFEE ENVIRONMENTAL FEE / ASSIGNED BEFORE SOURCE / NOT TESTED

RetainedKATowner ops/kat-catalog-import-20261020, newindependentbranch fix/kat-coffee-fee-set-20261020. Ownerexplicitlyconfirms everypreparedcoffee adds one separateexisting environmentalfeeSKU at0.05EUR, baseprice unchanged:1.65+0.05=1.70. No inferredlegalrate or blanketpackagedcoffeecharge. Mobiletopup0.50SET/largebulkstockreliability/historicalrecipebackfillcutoff stayseparateOPEN. No repeat ofacceptedbusinessoperations.

20/10/2026 20:26 Europe/Athens - KAT HISTORICAL RECIPE BACKFILL / ZERO RESTORED / SCOPED LIVE PASS

Retained KAT owner. The earlier1900zero result remains an exact completed observation. Subsequent native release startup at17:12:14UTC posted one ONLINE_ORDER_RECIPE consumption-18 to newly imported KAT-44334 for order a903a505-6d82-4db3-a536-2f6e944c4c50, created20Aug18:23UTC/sale18:40UTC, not a new sale. The standing explicit all-KAT-zero instruction applies to this later historical difference. Preserved the recipe movement and original order/sale; no online order change. Separate native FREE stocktake1d984157-4249-42e0-81be-048dd61274c4, exact one line expected-18/count0, ONE finalization, creates exactly one KAT STOCKTAKE_ADJUSTMENT+18. Full independent readback1900stocks/0nonzero/sum0. AllKAT product/stock metadata/departments/sales/payments/shifts/transactions and allpreviousKAT movements hashes unchanged. Other-store aggregate changed during three independently observed SALE movements totalling-3; do not claim aggregate isolation. This stocktake's own movement scope is exactly one KAT adjustment, and those independent sales were not changed. No accepted business transaction replayed. Historical backfill catalogue/stocktake cutoff reliability remains a separate OPEN follow-up; no source fix claimed by this operational restoration.

Evidence CHECKPOINTS/EVIDENCE/kat-staff-onboarding-20261020/stock-repair-*.json. Native SuperAdmin, no openKATshift. Claim/source worker onboarding remains independent and OPEN: source PR2957 head6616204ab167f9a856fc07ccae8f152ec8371cbd fullCI39464942452 SUCCESS3676PASS/0FAIL/0SKIP plus8HTTP and actualwholesale; source unchanged while merging newer native-chat docs. No real worker created yet, no salary amount invented, no manual deploy or guard bypass. Allother owners preserved.

20/10/2026 20:15 Europe/Athens - KAT STAFF / PENDING REMUNERATION SOURCE / AWAITING CI + LAB

Retained independent owner ops/kat-staff-onboarding-20261020, claim PR2956 final9d8878a7e1b383633f26d326685e40ab5f5fdaf1/docsCI39463018579 SUCCESS, mergedc2d69522cbbcf4e7b2dc800b4e140c28048bd385 before source edits. Eight bounded files implement explicit UNSET pay without schema changes: validation permits only absent monetary values and keeps every configured positive-pay requirement; employee editor/preview/list displays pending, no invented0; existing configured pay cannot be erased to pending, including concurrent UNSET update protection. Payroll read-only preview shows unknown aggregate and pending count; period creation/recalculation/payment/closing refuses explicit pending employees before financial writes. Existing pay types/tenant/module/role/confirmation/audit/card behavior retained. No wage, labour-law or legacy-person identity inference.

Node20.20.2 focused real validation/payroll/PIN/migration/UI guard tests30PASS/0FAIL. Node20 frontend build PASS, including TABLE_SERVICE bundle invariant. Initial local attempts lacked sparse-checkout assets; restoring the checkout resolved them without unrelated source changes. Full source CI/native/invariant checks required before ordinary guarded release, then separate new synthetic LAB pending-pay profile acceptance with fresh controls. No real KAT worker created yet; all13 source workers confirmed KAT/cashier, own contracthours15–40retained; missing wages and shiftavailability remain unspecified. No credential/card, payment/payroll period, stock/fiscal/shift action. Existing3Workforce and23legacy records preserved. Personal source names/tax/AMKA must not enter repository evidence. Actual LAB and real13 acceptance remain OPEN. Later mobile-card0.50SET and large inventory bulk reliability remain separate.

20/10/2026 20:08 Europe/Athens - KAT STAFF ONBOARDING / ASSIGNED / NOT TESTED

ASSIGNED ops/kat-staff-onboarding-20261020, independent bounded extension of retained KAT setup owner. Explicit owner: all13employees from provided Excel belong to KAT, all cashier; remuneration unknown. No invented wage or pay basis, no payments/PIN/card/permission grants or unrelated employee deletion. Current normal Workforce UI requires positive remuneration and cannot save unknown pay, observed NOT TESTED for requested onboarding; three existing Workforce profiles and23legacy employee rows remain protected. Existing N10payroll reconciliation, central staffing analytics and Workforce/card owners retain their scopes.

New bounded source scope: allow explicit UNSET remuneration in employee validation and UI, display pending rather than zero; prevent creation/recalculation/finalization of payroll containing unresolved remuneration. No schema/migration/seed/direct production SQL write. Preserve strict positive amounts for all configured pay types, tenant/module/role checks, preview+confirmed audit saves and all existing employee/card workflows. Relevant protected manual docs/manual/workforce/PASS.md and historical Workforce checkpoints read; latestmain history reviewed. Actual expanded acceptance will use one separate synthetic LAB employee before real13normal UI creates, complete fresh baseline/readback, no repeated prior financial/shift/stock transaction. Record sourceCI/guarded revision, bounded LAB receipt before KAT use, then actual13source identity/weeklyhours/store/role/pendingpay and unaffected controls. Source package IDs, AFM and AMKA will not be committed to repository or logged.

13owner source rows and target KAT confirmed. Existing workforce3, legacy23; no target full-name exact Workforce match. Name-only legacy nickname reconciliation is NOT verified and will not silently rename or delete historical employee identities. Later linking of cards/PIN and missing remuneration remains separate; owner approvals persist. Read-only source Excel and current UI only so far. Before source editing publish this claim with green CI+merge. Branch fix/kat-staff-pending-pay-20261020; final evidence/receipt updates will synchronize checkpoint, active list, manual, pending roadmap and PDF.

20/10/2026 19:41 Europe/Athens - KAT STOCK ZERO / REAL OPERATION PASS

Explicit new owner instruction after completed catalogue import: zero ALL KAT stocks, including preserved pre-existing items. Executed through normal Cloud Super Admin Inventory2.0 in pilot-company/kat-store; no direct SQL writes. LIVE d8142d55c376574f6a0b6ab35b611a2dc3bdcc97. Before:1900store rows,23nonzero,quantitysum20; all23nonzero rows active, all34inactive rows already0. Fresh controls saved before draft creation, targeted count and finalization. New single FREE stocktake066a1fa2-ac14-47c6-9b10-f7ab2421e323 named Μηδενισμός όλων των αποθεμάτων KAT 20/10/2026, reason explicit owner instruction, no open shift.

Operational PASS: same draft counted exactly23nonzero products at0 through native bulk count, then ONE finalization. Stocktake FINALIZED;23count events and23STOCKTAKE_ADJUSTMENT movements, each exact negative of its product's fresh pre-action stock, aggregate delta-20. Full independent DB readback:1900/1900stocks exactly0, no positive/negative balance, zero mismatches. AllProduct whole rows, allStoreProduct metadata exceptquantity/update time, allother-storeStock, all10department rows,165sales/180payments/44shifts/213transactions and all174previous movements have EXACT unchanged hashes. No price/VAT/category/barcode/active/recipe/online field change and no history deletion. Native audit keeps the reversal quantities and cause. Do not repeat finalization.

Bounded failure retained: initial native bulk count of1866active rows returned internal error, with0persisted counts/events and no stock change. UI rendering of the full list also caused browser timeouts. Independent readback established rollback before selecting only23necessary rows in the SAME draft. The smaller native operation succeeded. Root cause/large-batch implementation fix NOT TESTED and remains a separate OPEN reliability follow-up; this operation PASS does not claim full-list bulk reliability. No completed LAB test replayed or broad source change made.

Evidence CHECKPOINTS/EVIDENCE/kat-catalog-import-20261020/zero-before.json,zero-before-targeted.json ,zero-final-before.json,zero-after.json,zero-movements.json,zero-verification.json,zero-stock.jpg. Retained owner ops/kat-catalog-import-20261020. Prior1766catalogue import PASS remains; its stock-preservation observation describes that earlier operation and is superseded only for quantities by this explicit subsequent zero instruction. Later0.50EUR mobile-card service SET remains OPEN.

20/10/2026 19:14 Europe/Athens - KAT-CATALOG-IMPORT-01 / REAL KAT IMPORT PASS

Owner ops/kat-catalog-import-20261020 completed the authorized real catalogue import in company pilot-company/store kat-store through normal Cloud Super Admin UI. Exact LIVE d8142d55c376574f6a0b6ab35b611a2dc3bdcc97 (Render dep-dbbn2pss728c7390ij50), source PR2929 merged027e769c4faf68a45630f5738bc3dacf75d48f9a, fullCI39430092282/39431253948/39432574573 and guarded deploy39433587658 SUCCESS. The new bounded LAB receipt was published with green docsCI39454582169 and PR2950 mergedc52fb74ba33320a9a25fe78553d4747ab6346b58 before the real final action. No accepted prior test replayed.

Actual real-store preview:1766total/1753CREATE/13UPDATE/0INVALID. ONE final import click. Persisted independent full source comparison PASS with zero mismatches:1766unique KAT SKUs,1981exact text scan aliases,28categories/113subcategory pairs,1765PIECE+1KG (KAT-54554 fruit salad retail3.50), source retail/cost/staff price/discounts/min stock/VAT rate/exact fiscal tuple/category/subcategory/brand/supplier links and codes. All13 existing product IDs retained; existing stock and all non-imported recipe/online fields retained. All new stocks0 as agreed. Four deliberately inactive legacy coffee rows remain inactive:KAT-21880,KAT-21881,KAT-33039,KAT-38553. All15zeroVAT items remain vatVerifiedfalse, with no guessed exemption.

Company155→1908Product; selected store143→1900StoreProduct, reflecting1753new products plus4previously unlinked legacy rows now linked inactive. The pre-existing142unaffectedProduct and134unaffectedStoreProduct whole-row hashes are EXACTLY unchanged. All10whole fiscal departments and165Sale/180Payment/174StockMovement/44CashShiftSession/213StoreTransaction hashes exactly unchanged. No open shift, sale/payment/fiscal/stock posting or destructive reset. Other owners/data preserved. The store total includes preserved pre-existing items and is intentionally greater than the1766source catalogue.

Approved technical workbook KAT_Import_1766_20261020.xlsx canonical version2,627827bytes,SHA256a300168a90e60899a290cf4d46720fa73f017107eaa22fd690955d6f0e30d88c. Refresh changed only13current identity fingerprints and appended active-state control; all84768original source cells unchanged, all prior source/control cells preserved. Four fingerprint changes were traced to normal startup legacy-coffee cleanup, with no business-value change. DO NOT reimport this consumed identity manifest or refresh fingerprints blindly now that SKUs have changed.

Evidence: CHECKPOINTS/EVIDENCE/kat-catalog-import-20261020/real-final-before.json,real-after-controls.json,real-readback-*.json,real-verification.json,real-import.jpg. Full original source preserved in the approved workbook. Real import is CLOSED/PASS. Later automatic0.50EUR mobile-card service SET remains OPEN and is not claimed by this import PASS. Physical store PC/scanner/fiscal-device acceptance and online activation of newly imported items are not claimed. No product-price/VAT rewrite or existing recipe/modifier replacement was authorized by this completion.

20/10/2026 18:07 Europe/Athens - KAT-CATALOG-IMPORT-01 / NEW KAT PROFILE LAB PASS / REAL IMPORT PENDING

Retained owner ops/kat-catalog-import-20261020. Unit correction PR2929 final335785321af2c8d76c3dc0a7eafb1deadb847d21 wholeCI39430092282 SUCCESS, merged027e769c4faf68a45630f5738bc3dacf75d48f9a; exact mainCI39431253948 SUCCESS. Healthy containing LIVE d8142d55c376574f6a0b6ab35b611a2dc3bdcc97 fullCI39432574573/guarded deployment39433587658 SUCCESS; four owned source/test blobs verified exact. No manual deployment or guard bypass.

NEW BOUNDED LAB PASS: normal Cloud SuperAdmin company cmtpopbgk000prhb5qc60zxus/store cmtpopbgo000trhb5ng9ytiru, three-row explicit KAT profile actual preview3total/2CREATE/1UPDATE/0INVALID and ONE final import. Readback confirms KAT-2026102001 KG/cost1.123456/retail3.50; KAT-2026102002 PIECE/retail2.25/cost0.7155 retains existing42478bb7-3b17-4540-9efc-dd42bf093f5a and stock0 with two leading-zero scan aliases; KAT-2026102003 retail10/cost9/0percent/vatVerifiedfalse. All four exact text aliases preserved; all source stocks0 and stock overwrite OFF. All original99 Product and StoreProduct whole-row hashes unchanged; all90Sale/Payment/95StockMovement/CashShiftSession/StoreTransaction hashes and17whole department rows unchanged. MAIN/LAB POS2 shift stays cash9.40/card0/IRIS0/total0/transactions0; no sale/payment/fiscal/shift/stock posting. Native negative-stock/recipe/rollback/concurrency proof remains CI evidence, not a repeated hosted action.

Preparation: seven missing KAT fiscal tuples added one normal UI save each, retaining all10 old whole rows;17total. Fresh before/after controls for each save confirm99products/99stock and financial records unchanged. One separately measured new synthetic seed created, then updated in the actual profile test; no old accepted DAILY/Diadochou/online/backup test replayed. Evidence CHECKPOINTS/EVIDENCE/kat-catalog-import-20261020/lab-*.json, lab-preparation.md and synthetic KAT_LAB_Profile_20261020.xlsx. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-kat-profile-lab-pass.md and inventory manual.

REAL KAT1766 final import remains NOT TESTED/OPEN, owner retained. Next: refresh only13 scoped current existing fingerprints after release while preserving inactive legacy coffee states; all48 original cells/retail/VAT/units remain unchanged. Actual KAT preview must show1766valid/1753CREATE/13UPDATE, stock overwrite OFF, then one successful atomic import and complete independent source/stock/department/alias/category/supplier readback. Do not reset/delete KAT data or replace existing recipes/modifiers. Later0.50mobile-card service SET remains after import; physical fiscal readiness is not covered by this LAB PASS. All other owners retained.

20/10/2026 15:37 Europe/Athens - POS-PAYMENT-MINIMIZE-01 / SOURCE LIVE / AWAITING USER VISUAL ACCEPTANCE / RETAINED OWNER

Same retained owner fix/pos-payment-minimize-20261020. User screenshot image(20261020-121526).png at15:15 shows original minimized payment pill still covering checkout/total in Diadoxou, operator ΑΝΤΡΕΑΣ ΑΧΤΥΠΗΣ; physical client SHA not exposed. It confirms the previously undelivered placement symptom, not a failure of the separate released shift-list correction. ClaimPR2923/merge86c627cd728a823c75bcdf9bde7549da98d92198 preceded source. PR2924 resumed after wholesale owner resolved shared test readiness via2927; current main b7eba557d081468cf8e2372080a0d9402aa9174a preserved. Bootstrap unchanged since claim; final runtime differs only ensurePill placement, ignoring trailing newline. Sourcehead d6348cd14d5b2479020780701ffdaf45e59b1c36 merged5a540e36ffbd497c2cf33acdc7f53a8e866ee355.

Exact PR CI39421139311/core118622303202 SUCCESS:3639PASS/0FAIL/0SKIP plus8PASS/0FAIL/0SKIP; all five jobs green. All3 placement tests unskipped, including isolated Chromium geometry and elementFromPoint for cash/card/total, visible scanner space, same unsaved83.17 field identity and delayed result after restore, zero requests. Exact main CI39421981924/core118625239219 SUCCESS with the same3639PASS/0FAIL/0SKIP plus8PASS/0FAIL/0SKIP; all five jobs green and placement Chromium test unskipped.

Restore control now mounts in existing POS product-search row with normal layout flow (36px height, bounded45% width), away from bottom checkout. Non-POS fallback top20px. Existing mounted payment draft/files/background result and all handlers preserved. No StorePosPanel/scanner/modal lifecycle/form, payment payload, permission/auth, server/schema/fiscal or other owner scope change. No real or LAB sale/payment/upload/finalization/replay or business write. Before release independent public health was c417d58d2751792ec3ec491f25c53581330adb61; served /assets/main-BwCJySKy.js still contained fixed bottom20px body-mounted restore. This server-side observation is separate from physical client SHA.

Ordinary guarded deploy39423044698/job118628641755 SUCCESS; Render dep-dbblv4ou01pc73e80geg LIVE at2026-10-20T12:36:41.776342Z on exactmerge5a540e36ffbd497c2cf33acdc7f53a8e866ee355. Independent public health at15:37:17 Europe/Athens ok=true/version0.22.0+kat-test-pos/exactrevision.

Fresh public index serves /assets/main-BDGPnuLl.js; fetched compiled ensurePill confirms existing POS search host, static flex placement, top fallback and absence of old bottom placement in this function. No manual trigger, bypass, migration or restart. Served-source verification is not physical/user visual acceptance.

Actual authenticated hosted/physical minimize/restore acceptance remains NOT TESTED; automated Chromium is not LAB/LIVE/USER PASS. No manual PASS or whole numbered Gate closure. Scanner works per authoritative user clarification; prior inaccurate scanner-block hypothesis remains superseded. Separate POS-SHIFT-LOAD-01 and every other owner/previous accepted invariant preserved. Single next action: user first finishes/saves current unsaved payment work, then Ctrl+F5 in same POS; during next ordinary minimize, verify restore appears beside search and total/cash/card remain exposed, then restore same draft. Do not create or resubmit a payment for proof. Retain this bounded owner until actual visual acceptance or named handoff. Checkpoint/active/tracker/pending/evidence/trackerPDF synchronized; manual unchanged because only technical release has been verified.

20/10/2026 15:17 Europe/Athens - POS-PAYMENT-MINIMIZE-01 / RESUMED SAME OWNER / NEW USER SCREENSHOT / AWAITING FRESH CI AND RELEASE

Same retained owner fix/pos-payment-minimize-20261020 resumes existing PR2924; claimPR2923 already merged before source. User screenshot image(20261020-121526).png at15:15 confirms original bottom-right restore pill still covers total/payment controls in Diadoxou/ΑΝΤΡΕΑΣ ΑΧΤΥΠΗΣ. This is the separate NOT RELEASED placement fix, not evidence of failure of deployed POS-SHIFT-LOAD-01. Scanner works per authoritative earlier clarification. No new transaction or financial test requested.

Fresh main b7eba557d081468cf8e2372080a0d9402aa9174a, full relevant registers/manual/checkpoint and history since claim reviewed. Shared wholesale blocker resolved by owner PR2927; later exact full green shift PR/main CI39386081747/39387000777 and healthyd35a772 are independent proof it is no longer a reason to hold this scope. Bootstrap byte-identical to claimed main; existing reviewed source differs only ensurePill placement (ignoring final newline), tests unchanged. Reconcile current main preserving every concurrent runtime/record including myDATA/voice/cash-payload/shift. Existing sourcehead ea6d5d4505d1d97763cd224ec4a89b68c9465a61 plus current main parents; no additional behavior changes. Restore moves to normal POS search-row flow, existing draft/files/background handlers remain mounted, nonPOS fallback top20px. No scanner/StorePosPanel/form/auth/permissions/financial/fiscal change.

Prior core CI3614PASS/0FAIL/0SKIP+8 and all3 placement tests including isolated Chromium passed; full fresh PR/main CI, normal guarded exacthealthy release and user/authenticated nonfinancial screen acceptance remain required. AWAITING LAB, not fixed/live yet. Same owner retained, all other owners protected; no manual PASS or whole Gate closure. No payment/sale/upload/finalization replay or business data write. Next: fresh full CI → merge/exactmainCI → normal guard/exacthealth → user placement acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-pos-payment-minimize.md.

20/10/2026 14:44 Europe/Athens — POS-MYDATA-UNLINKED-01 / TECHNICAL RELEASE VERIFIED / USER FIRST RECEIPT OPEN

Retained owner fix/pos-mydata-unlinked-20261020 after the explicit limited transfer from codex/invoice-second-draft-20261016. Engineering implementation/release is complete. Historical pairs, credits, broader09/Gate3 and all other owners remain unchanged. ClaimPR2936/head18949910 merged8ba74c91 with applicable green CI before source.

Final source PR2937/head ec5c75d6552aee81e34934041b62bcfe16a6bfe9 merged2dc9c8829578d388272f0a2cfd330a32ee4921a0. Exact PR39414585294/job118600770787 and exact main39415424714/job118603418604 SUCCESS: each3622PASS/0FAIL/0SKIP plus8PASS/0FAIL/0SKIP, all five jobs including native PostgreSQL, Windows, actual browser/build/invariants and isolated real HTTP/wholesale. Main tree5f972c12571a7148bac06326d17c41efd32b6256 is identical to the reviewed final source tree. Initial source7f14b8fe/CI39413918330 was superseded/cancelled during pre-merge multi-page review; no failed guard was weakened or deployed. Final local3364PASS/0FAIL/193infrastructureSKIP, focused23/0/7 and frontend build; native cases actually ran unskipped in both final full CIs.

Ordinary guarded deployment39416366291/job118606322556 SUCCESS; exact healthy revision2dc9c8829578d388272f0a2cfd330a32ee4921a0 observed by its guard at14:42:36Athens and independently in Cloud Chrome at14:43-14:44. Fresh canonical PlatformAdmin document loaded new bootstrap main-BwCJySKy.js (previous main-CWYLBajZ.js); exact public /api/health showed oktrue/version0.22.0+kat-test-pos/2dc9c882. Native credential-observation protection was handled through its documented existing-tab canonical navigation and positive signed-in observation; no credential/cookie/session inspection or workaround. No manual Render deploy, migration, SQL repair, supplier payment/upload/replay/approval/stock/fiscal/shift action submitted by this page.

Common source supports explicit original-number review for an untouched unlinked myDATA header, then a fresh exact header/MARK check before the existing once-only POS payment. Canonical full series and numeric identity, verified supplier/recipient company VAT, issue date/type/EUR amount, no prior/tombstoned/received/competing purchase, and canonical/padded payment guards remain. The normal store-locked durable draft transaction binds the original, primary job and all photo references to one draft. Additional photo jobs remain unclaimed until the established multi-page intake, whose actual guard is exercised by the new native test; its protection was not relaxed. Provider original, existing payment and stock are retained. No amount-only or Greek/Latin automatic identity substitution. Photo reading proceeds through the existing durable worker without a Backoffice refresh.

This is TECHNICAL RELEASE VERIFIED, not a real financial LAB/USER PASS. The actual reported first payment and product reading were not submitted here; private real identifiers/values are omitted. A scoped read-only supplier view still showed no payment at the latest pre-release check, but this is not independent ledger/control reconciliation. No whole Gate3/09, physical terminal/mobile/all-role or all-store functional PASS is claimed.

Single remaining action: the authorized real operator refreshes the POS with an empty cart, reviews the actual original/canonical identity and deliberately records the already handed-over cash once in its still-open original till. Then inspect one payment, one editable linked draft and all source pages/reader result. Do not replay an already accepted payment or post stock for evidence. Existing-money discovery must reuse/hold, not charge twice. Any measured financial/stock/control acceptance needs its own fresh before/after evidence. Owner retained until that legitimate USER acceptance or named handoff; do not redevelop the delivered source. Checkpoint2026-10-20-pos-mydata-unlinked.md and evidence directory pos-mydata-unlinked-20261020.

20/10/2026 — POS-MYDATA-UNLINKED-01 / MULTI-PAGE REVIEW CORRECTION BEFORE MERGE

Before merge, source review found that linking secondary photo jobs during shell creation would conflict with the existing pos-intake guard, which deliberately requires unclaimed additional pages. Corrected binding to link only the primary job (and any retained provider-original jobs). Every photo ID remains durable in the primary handoff and receipt; secondary pages are claimed only by the established full multi-page intake. The new native test executes that actual guard against page 2 after the actual pos-draft route and requires it to accept the page. No intake guard was relaxed. Initial source7f14b8fe was not merged or deployed; its CI evidence is superseded by the corrected head. All original source and financial boundaries remain. Final full native PR/main CI and actual acceptance required; NOT LAB PASS.

20/10/2026 — POS-MYDATA-UNLINKED-01 / SOURCE PREPARED / AWAITING FULL NATIVE CI AND ACCEPTANCE

Explicit limited transfer claim PR2936/head189499103e0587e0d7d734e5f03b8b5eb9ae2b86 had all applicable documentation/Windows checks green and merged8ba74c91312b06a242f9b13395abdc4c15c6d11b before any source/test edits. Retained owner fix/pos-mydata-unlinked-20261020; broader historical pairs/credit/Gate3/09/other owners preserved.

Common correction: a unique untouched unlinked inbound original can propose its verified canonical number for explicit original review. The POS repeats the exact header check and compares MARK before the existing payment route. Exact full series and zero-padded numeric identity, recipient company VAT, supplier VAT, issue date, supported positive EUR invoice, no linked/deleted/received source and no competing purchase are required. Existing canonical or padded payment is protected. No amount-only identity or Greek/Latin substitution. Normal durable photographed intake now uses the same exact lookup instead of comparing the bare myDATA number to the whole POS series/number. During the existing store-locked draft transaction, the inbound metadata, all photo jobs and one draft are bound atomically; provider original is retained. Same-job racing retries reuse that draft; failures roll back draft creation while retaining the already recorded payment. No stock/fiscal/finalization, manual data repair or actual supplier payment submitted by this page.

Local Node24: focused23PASS/0FAIL/7native infrastructureSKIP; full3364PASS/0FAIL/193infrastructureSKIP; frontend/TABLE_SERVICE build PASS. Later bounded paid-padding guard and conditional confirmation copy reran focused23/0/7. Full exact Node20 CI with PostgreSQL is mandatory, and this is NOT LAB PASS. New native tests execute actual pos-draft route in isolated schemas with missing PDF/draft, two photos, canonical payment, concurrent retry, original binding rollback, paid/padded/tombstone/recipient/currency/type/status/competing-draft/scope guards and unchanged stock/control. Mounted actual POS submit tests cover unlinked canonical recheck and changed-MARK rejection before money. Existing populated draft, paid retry, cancel and credit regressions remain.

Engineering source prepared; deploy and functional acceptance NOT TESTED. Single next action: full PR/main CI, ordinary guarded release and independently verified exact revision, then scoped actual acceptance without replaying an already recorded payment. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-pos-mydata-unlinked.md. No claim that unrelated suppliers' OCR line accuracy or whole Gate3 is closed.

20/10/2026 14:06 Europe/Athens — POS-MYDATA-UNLINKED-01 / EXPLICIT LIMITED TRANSFER / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ codex/invoice-second-draft-20261016 — ASSIGNED fix/pos-mydata-unlinked-20261020. User explicitly approves transfer of the first-payment missing-draft regression and requests a common correction for all stores. Transfer only this bounded subtask; historical pairs, credits, broader Gate3/09 and all other owners remain assigned as recorded.

New USER/LIVE FAIL: photographed invoice payment is blocked by near-header duplicate review while the matching inbound myDATA original has no connected draft and no downloaded original. A scoped read-only current-day supplier view shows zero recorded movements; user confirms actual cash already handed over. This is not financial reconciliation or permission to duplicate the payment. No diagnostic financial/upload/stock action was submitted. Source inspection confirms unpaidMyDataHeaderReview refuses a missing draft. Exact OCR-kept series remains unobserved; no guessed automatic Greek/Latin identity normalization.

Scope: common same-tenant/store verified-VAT/day/type/amount original review including an untouched unlinked myDATA header; explicit original confirmation and fresh exact precheck before the established once-only POS payment; one durable photographed draft connected to that original, all pages queued without Backoffice refresh. Preserve paid/ambiguous/received/deleted/cross-scope and stock/fiscal/finalization fences, existing populated drafts and original payments. No amount-only automatic linking, no resurrection or production SQL repair. Require synthetic mounted-client/route and native database regression tests, full PR/main CI, ordinary guarded release, exact revision and scoped acceptance. Current new implementation NOT TESTED/AWAITING LAB; not fixed from CI alone.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-20-pos-mydata-unlinked.md. Single next action after this claim is green and merged: implement the bounded missing-draft header-review and exact original linkage correction. The real operator performs the legitimate first record once; no historical replay for proof.

20/10/2026 10:43 Europe/Athens - POS-SHIFT-LOAD-01 / SOURCE LIVE / AWAITING HOSTED USER ACCEPTANCE / RETAINED OWNER

Owner fix/pos-shift-load-20261020 retained for authenticated hosted/user acceptance. Source PR2933/head576368e2310a45d252263bfff572865be774671b merged d35a772870859bbf5eb6988820d74eaa7c260795. ClaimPR2931 merged before source. Exact PR CI39386081747/core118506415878 and exact main CI39387000777/core118509354207 SUCCESS: each 3617PASS/0FAIL/0SKIP plus8PASS/0FAIL/0SKIP; all five jobs, actual native PostgreSQL/HTTP, build/invariants and isolated wholesale green. Initial CI39385135116 had two existing test-fixture failures, corrected without weakening assertions: exact CTE retained in extracted predicate; store envelopes mirror actual API; actor binding identified semantically. Final native own/all/terminal/company/store/closed/history and mounted loading/retry/stale/print regressions all passed unskipped.

Read-only live EXPLAIN ANALYZE full old route42498.408ms; bounded candidate2007.732ms; exact final tagged route1570.831ms, each28rows at its observation. Independent live snapshots, not frozen row-identity or financial/control delta proof and not hosted end-to-end response measurements. No diagnostic sale/payment/upload/approval/replay, schema/index/rights change or financial write. Exact OPEN company/store/session/terminal CTE, original own/all actor permissions and audited online links preserved; no guessed date cutoff. Modal publishes overview independently, distinguishes pending/failed/verified closed, bounds read wait to15sec with visible retry, rejects stale scope and preserves valid loaded rows on denied print popup.

Ordinary guarded deploy39387876889/job118512074799 SUCCESS, Render dep-dbbhlfbncjis738pm3a0 LIVE at2026-10-20T07:42:46.842298Z on exact source merge d35a772870859bbf5eb6988820d74eaa7c260795. Independent curl /api/health at07:42UTC observed ok=true/version0.22.0+kat-test-pos/revisiond35a772870859bbf5eb6988820d74eaa7c260795. No manual trigger, deploy bypass, restart or migration. This is a technical release receipt, not hosted operator/LAB acceptance.

Actual hosted operator screen / physical terminal acceptance NOT TESTED: no surviving authenticated browser session; ordinary sign-in is not bypassed. No manual LAB/LIVE/USER PASS and no numbered Gate/No33 closure. No33/35 and every other owner/previous accepted behavior protected. Prior POS-PAYMENT-MINIMIZE-01/PR2924 remains separate, not implicitly delivered by this PR. Single next action: after finishing any current unsaved work, user refreshes same POS with Ctrl+F5, opens operator name → Συναλλαγές βάρδιας, verifies actual open shift and current rows; if failure persists collect shown message/same existing session without repeating a business action. Retain this bounded owner until actual acceptance or named handoff. Tracker/active/pending/checkpoint/evidence and trackerPDF synchronized; manual unchanged because CI/SQL plans are not manual PASS.

20/10/2026 10:12 Europe/Athens - POS-SHIFT-LOAD-01 / SOURCE READY / AWAITING FULL CI AND HOSTED ACCEPTANCE

Owner fix/pos-shift-load-20261020 retained. ClaimPR2931/headb4aebbbc979eadb6c0e702065454c198030951bb green/merged a547cfb4cf468cf1ea9765b69c2cbd269821e0d5 BEFORE source. Real read-only full existing SHIFT SQL EXPLAIN ANALYZE measured42498.408ms/28rows, planning47.793ms. Bounded equivalent candidate with exact materialized active ledger measured2007.732ms/28rows, planning71.482ms (~21x faster); no schema/index/data writes or financial replay. Counts are observations in a live store, not a frozen identity/delta proof.

Route now materializes selected-company/store OPEN ledger once, terminal-filtered for operator; identical own/all employee rule, substring and audited online-order linkage, original projection/limit/status/refund flags and normal-history branch preserved. No timestamp approximation, new permission, session reassignment, sale/payment/fiscal/stock mutation. UI independently publishes overview while sales waits, distinguishes pending/error/verified-no-open, uses15s bounded reads with explicit retry, rejects stale store/refresh replies and never presents failed loading as empty/closed. Original own/all/current-session filtering and correction/printing/child panels unchanged.

Node20 focused5PASS/0FAIL/1native infrastructureSKIP, including actual mounted slow/fail/retry/stale/timeout/no-open and current-session regressions; frontend/TABLE_SERVICE buildPASS. Native registered actual route fixture tests exact materialized SQL, own/all/other terminal/foreign/closed/online linkage, payment/line projection, unchanged ledger footprint and normal history; actual native execution awaits full CI. No mounted/SQL plan is HOSTED/LAB PASS. Require full PR+exactmain green, normal guarded exact healthy release and nonfinancial signed-in/user visual acceptance. No manual PASS or broader Gate closure. Protect No33/35 and all other owners; separate payment dockPR2924 remains its retained task. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-pos-shift-load.md.

20/10/2026 10:04 Europe/Athens - WHOLESALE-OFFLINE-APP-E2E-01 / TECHNICAL CI VERIFIED, INSTALLED DEVICE OPEN

Retained owner codex/wholesale-suite-20261017. Claim PR2917/f16fcfcc53e38c2b33b50c5b492a0420ee9840c7 green merged a9d6359911d1378712f67e5f13e99f8b9c9be97f before source. Source PR2920/head bdbda9fb1b3aed9720d265268b79c7b47bee4f24 green merged1498b279b05505c67b36478eafd05d1e7b69182d. Proven actual-client original lifecycle-header mismatch (0->1 and7->8 after UNKNOWN/restart) corrected with immutable per-draft originGeneration. Edit/authorized snapshot renewal cannot retag old drafts; canonical quote and every send use original header plus existing seller binding. Missing legacy metadata stays0; malformed metadata never POSTs. Existing shared auth/lifecycle middleware/reset/quote/order/schema/startup unchanged. Before8FAIL; after10focusedPASS plus actual mounted panel remount/header7 proof. SQL recreation after actual reset NOT TESTED; the causal transport tests inject fake HTTP and perform zero network.

Actual built WholesaleApp/OfflinePanel exercised in fresh Chromium against real disposable lab PostgreSQL/HTTP, separately from the earlier minimal fixture: authorized online preparation, offline create/edit juice quantity2->3, browser process fully closed/restarted offline, same profile/phrase unlock, current quote net15.00/VAT1.95/gross16.95, explicit submit with successful response deliberately lost, UNKNOWN and byte-identical original body/key retry. Fresh before/control evidence persisted before actions. Orders3->4->4; one actual isolated SUBMITTED request, virtual documents/payments/stock/receivables/events and other-store orders/ledger byte-identical. No new fiscal/provider execution, outboundBlocked0, sameboot. Desktop and390px viewport screenshots are CI SYNTHETIC evidence, not user screenshots or physical/mobile/installed acceptance. Existing first isolated lab E2E retained. Only four exact PWA static files added to test runtime; public hosted pinned lab/service remains untouched.

Full source PR CI39378621474 and exact1498 main CI39379250757 all5jobsSUCCESS:3604serverPASS/0FAIL/0SKIP plus8recoveryPASS. Newer unchanged-wholesale main b255 CI39379947313 failed first preparation because the browser driver ignored inherited fieldset disabled state; retained screenshot showed the synthetic phrase still present with no preparation. Test-only PR2927 waits for effective :disabled actionability before each single action and opening profile lookup completion; no repeat click, timeout increase, removed assertion or production UI change. First readiness head5239ae9f7e8ab064be7161f6e8a7d3674834e1bb full CI39380958944 all5jobsSUCCESS/3611serverPASS plus8recoveryPASS; newer KAT source integrated without losing concurrent records. Final readiness head1e7934236a5e42ae710986830ef522c8f1875a22 full CI39381968343 all5jobsSUCCESS; source merged4e732c2d45eeffeb1a81b7099e90447a4ac9bb76. Unauthenticated no-cache public health verified exact revision and wholesale HTML/dedicated manifest/compiled SW HTTP200 at07:03:53UTC20Oct. Static delivery only, not business or installed-device LIVE acceptance. Local Node20 combined78tests/76PASS/0FAIL/2infrastructureSKIP and frontend build PASS; no skipped native result is presented as executed. Evidence

CHECKPOINTS/EVIDENCE/wholesale-offline-app-20261020/, checkpoint CHECKPOINTS/CHANGES/2026-10-20-wholesale-offline-app-e2e.md and technical guide docs/wholesale/COMMERCIAL_OFFLINE.md.

This newer exact-main/release receipt supersedes older shared wholesale CI/release holds only; KAT importer authentication/physical acceptance and other retained owners remain OPEN.

Remaining OPEN: actual installed Windows/Android/iOS offline device use, actual reset/restore lifecycle acceptance with measured fresh baselines under its retained lifecycle owner, full seller offline/other-role device acceptance, offline real invoice/payment/fiscal/stock fulfillment and whole commercial rollout. Supported hosted browser observation still refuses native credential-state resumption; no new password, reset loop or credential workaround. No hosted accepted order/invoice/payment replay and no production configuration/grant/data test mutation. No new manual PASS or numbered whole-item closure. Same wholesale owner retained; next bounded user/LIVE acceptance when supported observation is available is one prepared installed device reopening/capturing a new local draft offline, then one explicit measured same-request reconciliation. All unrelated assignments and prior PR2891/2899/2914 evidence remain protected.

20/10/2026 10:00 Europe/Athens - POS-SHIFT-LOAD-01 / ASSIGNED BEFORE SOURCE / USER FAIL

Owner fix/pos-shift-load-20261020. User explicitly requests investigation/correction after screenshotimage20261020-064505: Diadoxou shift transactions stays loading, header says no open shift while child My payments shows160.88. Read-only DB confirms open430b8612-eafe-4eae-8148-550ca3bb123f/DIADOXOU-POS-01 opened06:16:47Athens,27sale movements+1supplier payment at09:45 observation. No lost-payment inference. Existing Promise.all gates overview on recent sales and prints no-shift before either response; recent SHIFT SQL correlates historical sales with active transactions. Initial loading screenshot does not establish duration; server query/read plan and controlled tests needed.

Independent bounded loading/performance regression only: truthful pending/error/no-open states, independently available overview, retry/stale store safety, exact active-session sales lookup with company/store/terminal/own-all rights preserved. Protect No33/35 owner codex/operator-checkbox-audit-20261009, payment correction/No27, invoice/stock/fiscal and separate payment-dock task. No rights/role/schema/index/shift/open-close/financial/payment changes, no real/LAB mutation or accepted replay. Read current AGENTS/active/tracker/pending/manual/numbered and prior session-isolation tests. Required real registered SQL/native fixtures (own/all/foreign/old sessions), mounted slow/fail/retry/stale UI and existing financial/display regressions; Node20/fullPR+exactmain CI/ordinaryguard/exacthealth before nonfinancial hosted/user acceptance. USER FAIL; correction NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-pos-shift-load.md. Publish claim before edits and retain owner until completion/named handoff.

20/10/2026 09:46 Europe/Athens - KAT-CATALOG-IMPORT-01 / SOURCE MERGED, UNIT FIX AND RELEASE HELD / AUTH HANDOFF / NOT IMPORTED

Retained owner ops/kat-catalog-import-20261020; source feat/kat-catalog-import-20261020 and bounded correction fix/kat-import-source-units-20261020. No transfer/release; lifecycle, wholesale, native and other owners retained. Claim2918 merged07d4eb113 before source. Source2921 final585d4f0f7ca57137505c23aa602378a873bef28c fullCI39380342416/job118487990830 SUCCESS3614PASS/0FAIL/0SKIP+8backup, merged344306dac02c371dc848076447b1ab12a57aabfd. Actual native KAT case executed, including two register6 identities, fingerprint-bound existing rename, negative stock/recipe/online preservation, busy-row refusal, rollback and concurrent replay. This is engineering/CI evidence, NOT actual KAT importer LAB/LIVE PASS.

Latest source-unit review found1765TEM+1KGR. Update09:52: unit correction2929/headc55aaeaf0b64f8cbe4cb93e614f02e57314fe3a3/wholeCI39381924502 SUCCESS, native build job118492962533 actually3615PASS/0FAIL/0SKIP+8backup; all required jobs green. PR2929 remains unmerged behind retained wholesale correction2927 and needs current combined-main reconciliation/release. Local30PASS/0FAIL/1nativeSKIP was preparation only. Must retain KAT-54554 as KG, price/VAT unchanged; require source MM agreement and existing-unit match, verify persisted unit. Existing13 actual matches allPIECE/barcode multipliers1. No final product import occurred, so no product-unit repair was needed.

Definitive prepared package: KAT_Import_1766_20261020.xlsx, Library libfile_d9bb07f53a9081919dd6912e8eedbb98/version1, SHA2561163fcf7c3005d77d51ea12aa991412a11a6f630599f531a3909db84dd0d6138. Supersedes old f035.../version0, which must not be imported. All84768 retained original cells unchanged;1766 unique KAT-ID codes/1981 unique scan aliases/13 exact existing identities. Local preparation against read-only real metadata predicts1753CREATE/13UPDATE/0INVALID; this is simulation, NOT hosted preview. Source organized workbook remains libfile_8ec99e8fc5048191bcf26612be160579/version4. Do not rebuild taxonomy, renumber again, reintroduce17excluded rows/four cheaper duplicates/8240zero-stock rows, or repeat prior DAILY/Diadochou/online/backup PASS.

COMPLETED CONFIGURATION ONLY: normal SuperAdmin UI added six missing screenshot VAT definitions; KAT now10 departments (nine used source identities plus preserved unused Camel21). Original4 whole department rows unchanged. Fresh before/after company155Product MD5e72d75f5c0d09aaf69148e09fa62f5e0 and kat-store143StoreProduct MD55bf3117a428d2fbc09cf43e696dccaf8 identical;165sales/180payments/174movements/44shifts/0open/213transactions unchanged. No product/stock/business or fiscal write. Supported source matches by register+legacycode+rate+commerce, never percent/register alone; existing display aliases stay intact. No exemption27 guessed for KAT cards. Bounded configuration instructions/limits recorded in inventory manual; definitive import and physical fiscal readiness remain NOT TESTED.

RELEASE HOLD: exact main344306 CI39381272075 failed wholesale-isolated-lab/job118490891082 at actual encrypted preparation; main build/native job118490891174 SUCCESS. Do not equate build success or source PR green to whole main green. Existing wholesale owner has actual actionability correction PR2927/test/wholesale-offline-action-readiness-20261020; do not take over its files or rerun unchanged CI to hide the FAIL. Latest read main987b63b89 is documentation only, not that runtime correction. No deployment guard bypass/manual deploy. Independent no-cache public health and Render history still identify healthy f2a3b79a145f7f80331280384066ec78c29ec230 / dep-dbb8vvbncjis738veivg; new KAT source is NOT LIVE.

AUTHENTICATION HOLD: returning from KAT support to Platform Admin for new LAB acceptance displayed email/password/device-name login. browserAuth auto-review rejected the incomplete secure prompt BEFORE any user prompt/credential entry because required device-name field was omitted. This was automatic review, not user refusal. No automated retry, raw credential entry, alternate auth surface or protection bypass. Next supported user action is manual sign-in in the existing Cloud Browser tab, including device name and any ordinary2FA. Do not request secrets in chat. Canonical entry https://myworkstation-app.onrender.com/platform-admin.

NEXT: after retained wholesale correction, reconcile latest main into2929, require whole exact PR/main CI and ordinary guarded exact healthy release. After supported user sign-in, perform ONLY new bounded KAT-profile virtual-LAB acceptance with fresh before/controls (do not replay the accepted DAILY importer test), including existing identity/unit preservation and new scan aliases. Record before each new action. Then refresh the13 live fingerprints/metadata if changed, actual KAT preview must show1766 valid rows, stock overwrite OFF; exactly one final atomic import and full source/stock/department/alias/supplier/category/unit readback. No KAT reset/deletion, old-product purge or recipe/modifier replacement. New initial stock0 as approved Diadochou procedure, existing stock preserved. The later0.50mobile-card service SET remains after this import. No background execution or final import PASS promised by this handoff.

Checkpoint CHECKPOINTS/CHANGES/2026-10-20-kat-import-auth-handoff.md. Current owner retained until completion or named handoff; no other page may duplicate this source/import.

20/10/2026 09:34 Europe/Athens - POS-PAYMENT-MINIMIZE-01 / SOURCE TESTED / RELEASE BLOCKED BY SHARED WHOLESALE CI / RETAINED OWNER

Owner fix/pos-payment-minimize-20261020 retained. Authoritative scope correction09:17:54: scanner works; ONLY floating payment restore covers footer/total. SourcePR2924/head ea6d5d4505d1d97763cd224ec4a89b68c9465a61 changes ensurePill placement only plus test; no StorePosPanel/scanner/form/financial handler changes. Restore is in normal flow within existing product-search row (bounded45% width/36px height), outside checkout. Same draft/file/background state and original handlers remain mounted. Non-POS fallback top edge. Source is NOT MERGED/NOT RELEASED; user still has original position. Initial planning times09:23/09:25 are superseded by GitHub actual claimPR creation09:17:44/sourcePR creation09:22:25. ClaimPR2923 merged86c627cd before source.

ExactPR39379993266/core118486861010 SUCCESS3614PASS/0FAIL/0SKIP plus8backup, native PostgreSQL/HTTP/build/invariants and all Windows checks green. All3 new tests passed unskipped, including actual isolated Chromium geometric and hit tests: restore inside search, scanner width retained, cash/card/total hit targets exposed, same unsaved83.17 and delayed result after restore/no requests. LocalNode20 2PASS/0FAIL/1missing-ChromiumSKIP and frontend/TABLE_SERVICE buildPASS. First local fixture teardown had observer-after-window-close errors, fixed by disconnecting fixture observers before final source/test upload; runtime not broadened.

WholePR remains FAILED: isolated-wholesale job118486861031 timed out actual encrypted preparation in server/e2e/wholesale-offline-app-flow.mjs:66. One unchanged-head isolated retry118489201045 failed identically; no further rerun or bypass. Same failure already exists on shared main b255b1cf335734a81d09ad65d5b6ce2dba33733a CI39379947313/job118486896518, independently recorded by native voice owner in CHECKPOINTS/CHANGES/2026-10-19-native-chat-voice.md. Existing wholesale owner codex/wholesale-suite-20261017 retains that separate scope. Do not take it over, remove the test or deploy around a red required gate. Latest observed healthy application f2a3b79a145f7f80331280384066ec78c29ec230 remains older and DOES NOT include this correction.

Hosted attempt found no surviving browser tabs/session; canonical Platform Admin reaches ordinary sign-in. No credentials, new support token, permission, real/LAB business action, sale/payment/upload/replay or source injection performed. Actual hosted/physical visual acceptance NOT TESTED; no manual PASS. Single next action: existing wholesale owner resolves shared failure; then same payment owner reconciles latest shared docs/source, requires fresh full greenPR, merge/exactmainCI/ordinary guarded healthy release and user or authenticated POS minimize/restore visual acceptance without a payment/sale replay. Owner remains assigned, not released or silently transferred. Other owners/previous PASS unchanged. Evidence CHECKPOINTS/EVIDENCE/pos-payment-minimize-20261020/source-status.json; trackerPDF synchronized. No whole Gate closure.

20/10/2026 09:17:54 Europe/Athens - POS-PAYMENT-MINIMIZE-01 / USER SCOPE CORRECTION

User explicitly clarifies scanner works normally; ONLY restore pill covers checkout/payment controls. Supersedes initial scanner-block hypothesis and all proposed scanner/lifecycle changes below. Bounded fix ONLY restore-button placement in existing POS product-search row, in normal layout flow, away from footer/total. Preserve existing minimization, same mounted state, restore, scanner/modal/checkout locks and all payment payloads unchanged. No StorePosPanel or payment form edits. Test actual bootstrap placement, nonempty cart/footer bounds, restore same unsaved DOM/no writes. Other owners remain protected. Actual hosted fix NOT TESTED. Owner fix/pos-payment-minimize-20261020 retained.

20/10/2026 09:23 Europe/Athens - POS-PAYMENT-MINIMIZE-01 / ASSIGNED BEFORE SOURCE / USER FAIL

Owner fix/pos-payment-minimize-20261020. User screenshot image(20261020-061458).png shows real Diadoxou POS nonempty customer cart, minimized payment pill covering bottom-right checkout; user reports all actions blocked. Independent bounded UI lifecycle regression, not takeover of existing invoice workspace/menu/completion/QR/payroll/advance owners. Inspect current AGENTS/shared registers/manuals/checkpoints/history: legacy global payment minimizer hides DOM but StorePosPanel scannerBlocked still includes activeModal PAYMENTS; floating bottom pill overlaps checkout. Exact current root cause/hit-testing to verify with real mounted/browser tests before claim of PASS.

Scope: authoritative owned payment-root minimization, same mounted unsaved form/files/late result on restore, scanner/cart/customer controls usable while hidden, visible accessible restore away from footer, normal other dialogs/checkout locks remain blocking; close/store/session/permission cleanup cannot restore stale work. Do not create second payment or change financial payloads, supplier/advance/QR/OCR/auth/stock/fiscal/server. No real-store writes, financial LAB sale/payment/upload/finalization or accepted replay. Tests actual parent+modal+bootstrap, scanner nonempty cart, restore unchanged draft/no write, other modal blocking, completion/scope teardown, geometry/hit-test browser; Node20 build/full PR/main CI and ordinary guarded exact healthy release before hosted visual acceptance. USER FAIL, hosted correction NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-pos-payment-minimize.md. Owner retained until bounded completion/handoff; all other owners protected.

20/10/2026 09:04 Europe/Athens - KAT-CATALOG-IMPORT-01 / ASSIGNED / NOT IMPORTED

Owner ops/kat-catalog-import-20261020, continuation of this owner-authorized KAT catalog preparation conversation. Independent catalogue import only; STORE-LIFECYCLE-01 remains with feat/store-shifts-inventory-clear-20261018, no cleanup/reset/delete/fence takeover. Preserve concurrent KAT beverage recipes/modifiers/online flags, all other stores and all prior accepted tests. User approved definitive import at09:00 and higher-priced duplicate selection at08:47. Current prepared workbook Library version4 contains1766 unique KAT-source-ID codes; original codes retained, zero-stock8240 and17 owner-deleted ambiguous rows excluded;4 cheaper shared-barcode rows removed and recorded. Retained48 source fields match previous workbook exactly, including retail and VAT department; no production product/stock/department write occurred.

Baseline main a9d6359911d1378712f67e5f13e99f8b9c9be97f. AGENTS, active/tracker/pending/checklist/manual and Diadochou/DAILY import evidence reviewed. DAILY definitive8753 import and original synthetic importer PASS are protected, never replayed. Existing real KAT preview1770INVALID remains evidence of unsupported KAT department mapping, not an import; current prepared1766 workbook has NOT been finally submitted. Current read-only company pilot-company155 Product / kat-store143 StoreProduct, sole company store linkkat-store;4 existing departments. Source screenshot confirms9 distinct used KAT identities, including two separate register6 departments. Do not copy Diadochou/DAILY mappings or infer fiscal exemption.

Scope: explicit KAT workbook profile and exact department identity resolution; all-barcode handling; bounded existing-product reconciliation without duplicate products, price/VAT guessing, stock overwrite or recipe/modifier destruction. Resolve remaining same-price barcode ambiguities explicitly in review. Require actual valid preview, fresh before/control evidence, green full source/main CI, ordinary guarded release/exact health, new bounded KAT-specific LAB acceptance, then exactly one authorized atomic real import and full source/readback. Existing-profile, tenant/role/fiscal/stock safety retained. Missing department setup must use normal authorized app flow with exact screenshot identities; no direct production SQL/migration/seed. The later0.50 service/card SET is separate after import, not a price edit in this batch.

Status NOT TESTED for new KAT profile and definitive import; no whole Gate/manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-kat-catalog-import.md. Publish this claim on main before source or state-changing LAB. Single next action implement bounded KAT profile after merged claim; owner retained until completion or named handoff.

20/10/2026 00:51 Europe/Athens - WHOLESALE COMMERCIAL OFFLINE / CI VERIFIED, INSTALLED LAB OPEN

Retained owner codex/wholesale-suite-20261017. Source PR #2912 head 18cd03a154c76608884e22067a3cfb26e5c7d557 green merged 24e138767089672d296189b6073e6601ff520d4e after claim PR #2904. Dedicated install entry, allowlisted public offline shell, encrypted per-user/company/store/role catalogue and editable LOCAL_DRAFT orders implemented. Explicit online current-rights/current-price acceptance precedes immutable persisted body/key and guarded send; unknown results never become a fresh request. Durable observed-denial fences, cross-tab exclusion, storage-failure and capacity checks included. No existing auth/entitlement/pricing/order core, schema, production startup, fiscal/stock/payment operation or pinned lab configuration changed.

CI-only evidence: PR run 39327561161 all 5 jobs SUCCESS, server 3,580 PASS / 0 FAIL / 0 SKIP plus 8 recovery PASS; real isolated Chromium fully closed/restarted with unavailable server, reopened cached shell and encrypted saved order, rejected wrong phrase, verified real IndexedDB CAS, Web Locks, denial persistence/BroadcastChannel and no private API cache or business POST. Local Node20 focused 65 tests / 63 PASS / 0 FAIL / 2 infrastructure SKIP and frontend build passed. Exact source-main run 39328449945 was cancelled while pending after another owner's source merge; never called PASS. Later main revision f2a3b79a145f7f80331280384066ec78c29ec230 run 39328665510 all 5 jobs SUCCESS, server 3,594 PASS / 0 FAIL / 0 SKIP plus 8 recovery PASS, includes unchanged owned wholesale blobs and full acceptance. Normal guarded release workflow 39330143576 succeeded; Render dep-dbb8vvbncjis738veivg LIVE 2026-10-19T21:50:59.473712Z, exact revision verified by unauthenticated /api/health and HTTP 200 wholesale HTML/dedicated manifest/compiled SW at 21:51:23 UTC 19 Oct. Static delivery is not installed-device or business-flow acceptance.

Authoritative boundary: technical source/CI acceptance only; actual installed PC/mobile disconnected full UI use, offline invoice/payment/fiscal/stock execution and full commercial rollout remain OPEN/NOT TESTED. Browser observation remains platform-blocked after native credential-state refusal; no password request, credential workaround or old financial transaction replay. Existing LIVE/API/USER visual receipts PR #2891 / #2899 remain protected. No new manual PASS or whole-item closure. Technical guide docs/wholesale/COMMERCIAL_OFFLINE.md; evidence CHECKPOINTS/EVIDENCE/wholesale-commercial-offline-20261020/; detailed checkpoint CHECKPOINTS/CHANGES/2026-10-20-wholesale-commercial-offline-ci-receipt.md. Same owner retained; next bounded acceptance is a prepared installed device reopening and capturing a new local draft while disconnected when permitted browser observation is available, then one measured explicit online submission with a fresh baseline. No duplicate claim by another page.

20/10/2026 00:51 Europe/Athens — KAT-BACKGROUND-02 / LIMITED LIVE DESKTOP VISUAL PASS / COMPLETED

No order/payment/member/settings/catalogue/stock/fiscal or database write.

Completed only requested outer-background visual adjustment. Prior KAT-BRANDING-01 desktop/category/search acceptance retained without replay; new mobile/touch/physical-device, saved-credential autofill, checkout/member/fiscal acceptance NOT TESTED here and other owners unchanged. Public visitors use /online/kat; refresh an older open page to receive new background, then wait for catalogue. No new role/access permission. This is not whole Online Gate PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-kat-background.md; manual docs/manual/online-delivery/PASS.md. Canonical tracker and numbered PDFs regenerated in same receipt.

20/10/2026 00:16 Europe/Athens - SUPPLIER-ADVANCE-01 / HOSTED ALLOCATION LAB PASS / SCOPED CLOSED

Retained owner fix/supplier-advance-20261019 completed the remaining assigned acceptance after explicit user approval20Oct00:11:56 for same-user2hour SuperAdmin LAB support access and virtual0.01 allocation. Normal UI access succeeded; no credential, permission, shift or safeguard change. Health revision0484d636059eedb936e8bea1159b05c6c00bf0d2; all9 owned source/test Git blobs equal reviewed PR2889/head403b3c03602f2ddd92fff3f0794af197d38d535a/source main1cccecd1a1777a6ac9ff5c5bba42fbfde470fe69. Earlier full PR/main CI3514PASS/0FAIL/0SKIP+8backup and ordinary guarded release remain source proof; no runtime change in this receipt.

Fresh before00:14:56 equals published23:53:31 after-review baseline except timestamp. Existing LAB settlement77f43282-4377-4782-97d3-bc7e3ab17c6b CONFIRMED0.02, allocated0.01/available0.01; bank32entries/total-515.45/confirmed-308.78/pending-206.67/protectedHasha47fa1ede8dbbc7924a251834b7a7fcd. MAIN0transactions/cash-card-IRIS0/deductions0/drawer9.40; both other-store controls0;99StoreProducts hashf96d09fe90906df3b26776483c8d5d61/95StockMovements hashf69aa9d0bec0bf377f1b9645262e5aba, invoiceTΔA0009683 fullrow unchanged. Fresh before JSON and intended action recorded before submission; published prior baseline was not replayed.

Actual20Oct00:16:29: selected same confirmed advance in Χρήση πληρωμής, entered0.01 only on TΔA0009683 and clicked Συμψηφισμός έναντι χωρίς νέα πληρωμή ONCE. Form closed; reopened read-only form shows invoice remaining958.75→958.74 and no remaining advance option. After00:16:35: same allocation7fa44884-706a-4af7-ad43-75873089bf58 amount0.01→0.02, remaining0.00. Exactly one SUPPLIER_ADVANCE_ALLOCATED Audit ecfd3893-9c83-4a83-af6f-8c92c0078a1d/cashDelta0. Entire StoreTransaction and settlement rows byte-identical, same0.02 payment, same confirmed status; bank/shift/control/stock/fullinvoice rows byte-identical. No new disbursement, actual bank transfer, stock/fiscal action or real-store approval.

Remaining hosted allocation is now LAB PASS/CLOSED; previous auto-review block and OPEN statements below are historical and superseded only after explicit approval. Independent task owner released after this scoped closure; remove only its completed pending section. Real Mantzilas6.17 remains PENDING_REVIEW and protected original3payments total700.00, no new approval or write this turn. New physical CASH_SHIFT, other normal roles/mobile/hardware remain NOT TESTED and are not claimed by this task. Prior completed supplier PDF/print, broader Gates and every other owner unchanged. Evidence CHECKPOINTS/EVIDENCE/supplier-advance-20261019/lab-before-allocation.json,lab-after-allocation.json,lab-allocation-audit.json,lab-allocated.jpg; manual/payments/PASS plus active/tracker/pending/numbered and both generated PDFs synchronized. Source PR2889 and docs PR2905 retain prior history.

20/10/2026, 00:01 Europe/Athens — SUPPLIER-ADVANCE-01 / SOURCE LIVE + LIMITED LAB + REAL REASSOCIATION PASS / FUTURE ALLOCATION OPEN

Retained owner fix/supplier-advance-20261019. ClaimPR2888/997fa934 published before code. SourcePR2889/head403b3c03602f2ddd92fff3f0794af197d38d535a merged1cccecd1a1777a6ac9ff5c5bba42fbfde470fe69. Full PR39318646187/job118287731141 and exact main39320123491/job118291991398 SUCCESS3514PASS/0FAIL/0SKIP plus8backup; all required native/HTTP/browser/Windows/build/invariants green. Ordinary guard39321219511/job118295562197; Renderdep-dbb80ng473hc73dk7e40 LIVE19Oct23:47:07Athens; independent healthoktrue/exact1cc. All9 owned files equal reviewed source. No manual deployment, migration or safeguard bypass. Wrapper39321314105 skipped deployment, not separate release proof.

LIMITED ACTUAL LAB23:47–23:53: fresh prior baseline unchanged; one virtual BANK_TRANSFER0.02, invoiceTΔA0009683 allocation0.01 and declared advance0.01. One payment/one pending settlement/one allocation; one explicit confirmation of this same receipt, no new payment. Virtual bank31→32entries/total-515.43→-515.45; final confirmed-308.78/pending-206.67 and protected-old-bank hasha47fa1ede8dbbc7924a251834b7a7fcd unchanged. MAIN0transactions/cash-card-IRIS0/deductions0/drawer9.40, both other-store controls,99StoreProducts/95StockMovements and full invoice face/status unchanged. No actual bank transfer or stock/fiscal action. Cash UI correctly unavailable; no grant/shift change or lower-level bypass. Cash disbursement has native CI proof, not a physical/CASH_SHIFT LAB PASS.

REAL USER-REQUESTED CORRECTION19Oct23:57: only existing Diadoxou OTHER_EXPENSE6.17 transactionpay_90df5323171a14ebfa07a09df33faa7cee27baf51f841652e8cd6813dc7be907 associated with existing supplierMANTZIΛΑΣ/7b9b8117-bbc8-4235-accd-e716fd7f977c through canonical SuperAdmin Expenses. Original pending review retired; one new supplier settlement5a5f365f-b75b-4b17-b942-d3aa0db403ea PENDING_REVIEW and one original-preserving Audit/cashDelta0. Same amount/time/shift/actor/description/evidence and original transaction ID retained: immutableHashbae93aba8e9871730c19ef4251558f7e equal before/after; protected522.79/171.04 payments hashca2b7895c68f16fc64c66f5ba1e4962a equal; exact3existing payments total700.00. No second disbursement or approval of real171.04/6.17. Actual UI shows6.17 advance pending human review. This is a targeted reassociation PASS, not global trading-store cash/stock reconciliation or proof of approved supplier balance.

REMAINING OPEN: actual hosted consumption of confirmed virtual0.01 advance, physical/new CASH_SHIFT payment, other normal roles/mobile/hardware. Consumption backend/mounted/native concurrency/replay/rollback are green in CI only. After virtual confirmation, automatic browser approval review twice rejected re-entry through Πλήρες Backoffice because support-access issues a fresh2hour token/audit, despite the same existing SuperAdmin/session and inspected absence of user/membership writes. Rejection respected; no alternate URL/API/token/session workaround and NO allocation POST. Earlier initial LAB access had been allowed; this later block is not authentication or source failure. Separate initial company-selection checkbox rejection was resolved by proving it only calls setSelectedId; same selection then allowed. Only later support-access rejection remains unresolved.

Current virtual receipt77f43282-4377-4782-97d3-bc7e3ab17c6b /pay_7342736072df83017f190a9382073d154bc4874ea91155ea21c2ec78171b7a55 CONFIRMED0.02 with0.01allocated/0.01remaining; do NOT replay it. Single next action: obtain explicit user approval for same-user2hour SuperAdmin support-access to MYWORKSTATION LAB, then refresh this receipt/controls/bank before allocating only remaining0.01 once through delivered UI. Retain owner until scoped completion or named handoff. Completed source/new-total, virtual creation/confirmation and real reassociation are removed from pending scope; only exact remaining acceptance stays assigned. Preserve Gate5 prior invoice allocation caps, declaration/proof policies, QR/readability/credit/supplier-reassignment and all other owners.

Checkpoints: CHECKPOINTS/CHANGES/2026-10-19-supplier-advance.md, supplier-advance-acceptance.md and supplier-advance-acceptance-baseline.md. Evidence CHECKPOINTS/EVIDENCE/supplier-advance-20261019; payments manual records only actual limited observations. Tracker/active/pending/numbered and both PDFs synchronized. No whole Gate/numbered item closure.

20/10/2026 00:00 Europe/Athens - WHOLESALE-COMMERCIAL-ONLINE-01 / ASSIGNED BEFORE SOURCE

Owner expanded scope20Oct00:00:22Athens: include use WITHOUT INTERNET. Add offline app shell (only exact static wholesale HTML/assets, never API/auth/private responses), encrypted IndexedDB customer/catalog snapshots and durable local order drafts partitioned by personal user/company/store. Offline access requires explicit device preparation and local passphrase unlock, bounded snapshot lease no longer than paid expiry; explain that revocation cannot be checked while disconnected. No password/token/session/private signing key in offline records. Stable clientOrderId and immutable persisted send-body BEFORE network; an unknown send may retry only the exact original identity/body/key. Separate pending/local capture from server SUBMITTED, current online rights/assignment/license check and fresh server quote + explicit review before first send. No auto-post financial/stock/fiscal/payment side effect or fake offline quote. Safe multi-tab version/concurrency checks; quota/write failure must never report saved. Offline business state survives reload/restart and stays encrypted/locked on user/context change. Offline real fiscal/provider dispatch remains separate and NOT IMPLEMENTED.

Three disjoint cooperating scopes under the same retained owner after green claim: install worker owns new install-controller/component, manifest and focused install tests; offline-core worker owns new encrypted vault/outbox + IndexedDB adapter and core tests; offline-UI worker owns new offline panel/API snapshot adapter/CSS and mounted tests. Root owns WholesaleApp/entry/HTML/Vite integration, new offline service-worker template/build plugin/tests, common records and full integration/CI. Allowed new files stay under client/src/components/wholesale/, client/public/wholesale-app/**, client/scripts/wholesale-offline-build.mjs, client/wholesale-sw.template.js and server/test/wholesale-commercial-*.test.js; additive client/vite.config.js and WholesaleApp.jsx wiring. Existing session boundary, actual authorization/quote/order core and unrelated owners remain untouched. Delivery remains AWAITING real disconnected installed-window/multi-device LAB until measured; preserve prior completed business tests without replay.

Retained owner codex/wholesale-suite-20261017; claim docs/wholesale-commercial-online-claim-20261019, planned source feat/wholesale-commercial-install-20261020; baseline0e95585e73ee32a21175d68df7bb36461d1a5b91. Owner explicitly requested starting the commercial standalone edition19Oct23:56Athens and asked which deployment model is better. Coordinator recommends and starts online-first independent wholesale application with shared live data for business/customer site/field sellers; no paid infrastructure or price/production data/configuration change authorized by this claim. Standalone means usable without retail POS, not an offline promise. Existing personal auth, CompanyModule WHOLESALE_B2B paid entitlement/tenant/store gates remain mandatory. Prior limited LIVE/UI/API/user-visual receipts PR2881/2891/2899 remain protected, no transaction replay.

Bounded first delivery: installable wholesale web entry with dedicated manifest, existing MWS brand icons, stable clean launch URL/app identity and bounded wholesale scope; one explicit user-driven installation control with fallback instructions for unsupported browser/iOS, appinstalled/cancel/error/repeated-click/unmount handling, and clear prepared/unprepared offline status. Only the separately described narrowly scoped offline-shell worker and encrypted local draft vault are allowed; no API response cache, automatic background order submission, default credential, auto-login or local license grant. Installed window still uses actual personal sessions, current paid module and same server database; installation does not enable any entitlement or prove commercial readiness. New pure install controller/component files under client/src/components/wholesale/, new client/public/wholesale-app/** assets, additive client/wholesale.html and client/src/wholesale-entry.jsx wiring, new focused server/test/wholesale-commercial-install*.test.js. Preserve existing WholesaleApp/session-boundary/suite/pricing/orders/lifecycle runtime untouched. No production startup/schema, fiscal integration, existing native owner or lab runtime changes.

Evidence BEFORE: standalone authenticated web entry and paid-module restrictions already have bounded prior PASS; separate installer/manifest/prompt NOT IMPLEMENTED/NOT TESTED. Require actual event-lifecycle/mounted UI tests, existing standalone regressions, frontend graph/build and full exact PR/main CI. Actual PC/mobile installed-window acceptance AWAITING LAB; never promote automated tests into manual PASS. Larger commercial rollout (persistent customer onboarding, billing operations, backup/restore acceptance, real fiscal/stock fulfillment and any durable offline) remains OPEN/ASSIGNED, not delivered by a manifest/icon. Detailed checkpoint CHECKPOINTS/CHANGES/2026-10-20-wholesale-commercial-online.md. Common active/KAT/README/tracker/pending/PDF synchronized before source; next single action after green merged claim: implement and verify bounded installable entry. Same owner retained until named handoff; no repeated prior business transaction.

19/10/2026 23:59 Europe/Athens — KAT-BRANDING-01 / LIMITED LIVE DESKTOP PASS / COMPLETED

Owner feat/kat-olive-orange-branding-20261019; source PR#2897/head9a811c57a48c39a7d28d9c3b1d693490ee5d9c0a merged0484d636059eedb936e8bea1159b05c6c00bf0d2. Claim PR#2895 merged before source. Full PR CI39320675559 and exact main CI39321897395 SUCCESS, including build-and-test, Windows and isolated wholesale checks. Ordinary guarded deployment39322990384/job118301603738 SUCCESS; exact health oktrue/revision0484d636059eedb936e8bea1159b05c6c00bf0d2 observed independently in public browser and guard logs at20:59UTC.

Actual Cloud Chrome desktop /online/kat: approved rounded Greek ΚΥΛΙΚΕΙΟ KAT logo visibly loaded uncropped in orange panel230x100; olive navigation#52613a/darkolive header/orange action buttons/warm background.7categories,27coffees, Νερά4, focused search FREDDO5, category Καφέδες clears search and restores27. Initial fill before focusing readonly search refused as designed; explicit focus then search passed. Empty basket0.00 throughout; current closed-hours state retained. Screenshot CHECKPOINTS/EVIDENCE/kat-branding-20261019/online-desktop.jpg. Original3business scripts byte-unchanged; separate exact-KAT-path class only, embedded approved PNG in local SVG. No catalogue/order/pricing/stock/member/auth/fiscal/settings/database writes. Node24 local20PASS/0FAIL/0SKIP after dependencies and Prisma client generation; frontend build PASS; deployment validated by Node20 CI.

Only agreed public KAT visual desktop scope COMPLETED. Mobile/touch/physical-device, saved-credential autofill, checkout/member/payment/fiscal acceptance NOT TESTED here and not claimed; retained owners and prior qualified evidence unchanged. No whole Online Gate PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-kat-olive-orange-branding.md; manual docs/manual/online-delivery/PASS.md. Both canonical roadmap PDFs regenerated in this receipt.

19/10/2026 23:44-23:47 Europe/Athens — WHOLESALE-LAB-01 / LIMITED USER VISUAL PASS

Retained owner codex/wholesale-suite-20261017; receipt branch docs/wholesale-user-visual-20261019. Actual owner-supplied Windows/Edge screenshots confirm hosted fake seller entry, explicit assigned whlab-store/fakeCustomerA selection, four seller catalog items (including WHLAB-PRIVATE), and customer portal with only three published items (WHLAB-ZERO/A/B). Existing seller request f4c29f3b-f4e6-4d24-b327-4dc422190493 /12.40 and portal request64f9c86e-2a21-46c4-aef9-1933a0e2f1d4 /11.30 are displayed; they are the earlier API requests, NOT newly submitted user transactions. Empty customer search reveals published items; query coca has no fixture match. Seller nested store selection remains separate from outer selection in the observed UI; no code fix claimed.

LIMITED USER VISUAL PASS for navigation/catalog/existing-order display ONLY, supplementing merged receipt PR2891/ef37b4ee and sourcePR2881/e3432c2b/full green PR39313589730/main39314881160. At23:47:53Athens owner said “afoy ta ekanew esy einai ok”: accept prior tests without repeating the same transactions. Do not reinterpret this as new measured quote/submission/financial/fiscal/PDF PASS. Source revision derives from pinned service and independent earlier health, not screenshot per-action telemetry. Hashes, times and exact five screenshots: CHECKPOINTS/EVIDENCE/wholesale-user-visual-20261019/acceptance.json. Test lab https://myworkstation-wholesale-lab.onrender.com/lab ; synthetic-only/ephemeral/nonfiscal boundaries unchanged.

Remaining hosted end-to-end quote/submission UI and browser PDF download NOT TESTED; native coordinator browser remains blocked by credential-state protection. Owner does not need to repeat already completed CI/API/Owner transactions. Production wholesale/fiscal fulfillment, durable offline and commercial installer remain OPEN/ASSIGNED to same owner; no numbered checklist item closed. Next single acceptance action when supported browser recovers: read existing TEST PDF without issuing another document or payment; additional hosted quote/submission only if needed for a new specific regression. All unrelated owners and previous limited PASS protected. No source, production data/configuration, permission or deployment change in this receipt.

19/10/2026 — KAT-BRANDING-01 / SOURCE READY / AWAITING FULL CI AND LIVE

Owner feat/kat-olive-orange-branding-20261019; source feat/kat-branding-source-20261019. ClaimPR2895/d1059c3/docsCI39320272353 all applicable checks passed; merged7c0001d before source. KAT-only exact path class scopes olive/orange CSS and bundled original approved logo image in SVG wrapper; no catalogue/order/auth/member/pricing/script changes and no production config mutation. Other-store styles and existing dynamic branding remain untouched. Local Node24 scope/asset/branding/public-route tests10PASS, mounted daily public/member tests2PASS; broad fulfillment import initially unavailable Prisma generation, not functional failure. Frontend build in progress. Require full Node20 CI and ordinary guarded exact release; hosted desktop/mobile NOT TESTED. No order/payment/stock/fiscal/settings writes. Preserve retained autofill/mobile/DAILY/other owners.

19/10/2026 — KAT-BRANDING-01 / ASSIGNED BEFORE SOURCE

Owner feat/kat-olive-orange-branding-20261019. Explicit user asks only public KAT online site to match approved olive/orange ΚΥΛΙΚΕΙΟ KAT cards/logo. Independent visual scope; retained autofill/mobile, DAILY, ordering and all other owners unchanged. Preserve search/category reset, catalogue/prices/member/checkout/stock/fiscal and store isolation. Baseline1bc1c9f; existing public HTML/manual/autofill checkpoint reviewed. Existing configurable brand primary/secondary/logo require durable HTTPS asset; logo is currently circle-cropped. Plan additive KAT-only visual override/logo asset and existing KAT settings branding update only, no other commercial setting change. No source or production config edits yet. Status NOT TESTED; require full CI and normal guarded release, then read-only public desktop/category/search inspection. No order/payment/member/product/stock action. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-kat-olive-orange-branding.md.

19/10/2026 23:05 Europe/Athens — SUPPLIER-ADVANCE-01 / ASSIGNED BEFORE SOURCE

Owner fix/supplier-advance-20261019. Explicit new owner requirement: actual supplier disbursement may exceed selected invoice allocations; retain invoice caps and recognize the remainder as supplier advance, never miscellaneous expense. Independent scope from retained supplier declaration/readability, supplier reassignment, credit-note and central evidence owners. Existing invoice allocation overpayment denial remains protected; this expands total disbursement only. Source entry StoreSupplierOpenInvoicePayment and bounded supplier-settlements route/review projection plus new isolated service/tests; no OCR/stock/fiscal/auth/license changes.

Read-only Diadoxou19Oct evidence: two open-invoice allocations74.33+96.71=171.04 at20:17, current invoice14452 payment522.79 at20:17:43 and OTHER_EXPENSE6.17 at20:23:48, total700.00; all cash-shift deductions active. Existing171.04 settlement PENDING_REVIEW. No existing payment replay/approval or correction performed. Existing6.17 reclassification needs explicit audited once-only association retaining original amount/time/shift and unchanged cash, not a new disbursement; design/acceptance NOT TESTED. Do not silently confirm171.04 or infer whole supplier debt from these rows.

Preserve Gate5 qualified PASS, pending-review/no-document policy, proof verification, valid invoice allocations/current store and tenant ownership, stable retry/once-only cash and bank effects, cancellation and reversal semantics. Source PR2889 implements the bounded flow; local Node20 focused22PASS/0FAIL/2native infrastructureSKIP and frontend/TABLE_SERVICE build PASS. Native full CI/release/measured LAB remain required. No production transaction or6.17 correction yet. New total input with explicit remainder acknowledgement; positive exact-cent total >= allocations, allocations never exceed actual invoice residual. Pending advance remains pending, confirmed supplier ledger includes actual full payment. Pure advance and future allocation without new cash must be explicit scoped operations, not hidden automatic deductions. Require mounted tests and real isolated PostgreSQL atomic/replay/concurrency/rollback/foreign scope/control checks, full PR/main CI then ordinary guarded exact healthy release and measured LAB acceptance. No real production payment/stock/fiscal mutation for diagnostics. Status USER FAIL existing total limitation / new behavior NOT TESTED; no CI-only manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-supplier-advance.md. Owner retained until completion or named handoff.

20/10/2026 00:54 Europe/Athens - VOICE NATURAL SALES CSV LIMITED LIVE PASS / WHOLE OPEN

Retained owner codex/assistant-business-queries-20261015. Pre-source claim PR2906 merged adb5b0d4fe2d6036e7f923669df5e84083c915dd before code. Source PR2911/head884a5006843d9b6beb60859b4855f56c541fd100, full PR CI39326635381 SUCCESS3530PASS/0FAIL/0SKIP plus8backup, merged3c47be598fdd6be78a274c5a523b08412d468769 with exact mainCI39327705958 SUCCESS3545/0/0 plus8backup. Combined exact main CI39328665510 SUCCESS3594/0/0 plus8backup; ordinary guarded workflow39330143576 SUCCESS; Render dep-dbb8vvbncjis738veivg LIVE; independent healthy revision f2a3b79a145f7f80331280384066ec78c29ec230. Reviewed bounded runtime/test blobs match. No direct deployment or guard bypass. Local Node20 suite3289PASS/0FAIL/187environmentSKIP, frontend/TABLE_SERVICE build PASS; 14 focused new regressions include actual Owner/Platform fresh-read/replay/revocation. CI is separate technical proof.

ACTUAL LIMITED LIVE PASS: normal personal Platform SuperAdmin, existing desktop Chrome, explicit Diadoxou only/all-storesOFF, current-day new product conversation with explicit17Oct question as necessary setup. Typed exactly 'Σε CSV' after that fresh valid answer. Initial00:52 attempt in yesterday's archived thread correctly asked for report/period because the existing server history day fence excludes prior-day dialogue context; visible archived prose is not current evidence. This is a protected history control, not a new unread-source regression. No history/day-fence source was changed. New canonical product evidence and actual downloaded CSV retain the latest period and exact native product, matching independent original completed/nonCREDIT signed source before and after, including reversal and displayed quantity/gross/net/VAT. Newest17Oct versus stale18Oct precedence has automated coverage; this actual format retest verifies explicit17Oct retention in same-day context, not a new cross-date dialogue. CSV native bytes parsed UTF8BOM/semicolon/ten columns; private SHA3241adf0ea2fb0d23fe265d1dcefae6dd6a3a59b851aa666a79efd17445a7360. No commercial rows/amounts/operators/exports/screenshots published. This supersedes only19Oct23:55 natural product CSV no-read FAIL. Earlier product/date/button and transfer/history/consumption/cola/four-format limited PASS remain protected.

Strict format-only sales continuation now requires a first-round read and exact resolved current period before canonical I/O. No-tool provider still yields the safe unread-source refusal; invalid/missing/unknown/mixed context, normal questions, permissions, coverage/ambiguity/reversals, call caps and signed fresh replay remain unchanged. No financial/stock/fiscal/shift action or original transaction replay. Other formats have focused automated coverage; no new actual six-format or Owner claim is inferred. The existing CSV creation-time label displayed h24 near midnight; only report period/business fields are accepted here, not general midnight timestamp presentation.

Whole VOICE and printedNo30/Tracker32 remain OPEN/ASSIGNED to the same owner. Remaining actual normal Owner parity/history/files/role context, mobile/touch, physical speech when available, broader domain completeness/recorded offers and missing beer-category numerical acceptance are NOT TESTED here. Owner has no microphone; no microphone request. Completed decorated-product and typed CSV corrections are removed from pending. Single next action: continue only the remaining normal-context acceptance when available, preserving all existing results; no duplicate protected transaction/test. Checkpoints2026-10-19-assistant-diadoxou-acceptance and2026-10-20-assistant-sales-export-read; manual super-admin/PASS; redacted evidence assistant-diadoxou-20261019/acceptance.json. Other owners retained.

20/10/2026 00:01 Europe/Athens - VOICE PRODUCT FOLLOW-UP LIVE PASS / NATURAL SALES FILE LIVE FAIL / ASSIGNED BEFORE SOURCE

Retained owner codex/assistant-business-queries-20261015. Actual normal personal SuperAdmin access returned after the user's retry; no login/token/grant/bypass performed.19Oct23:54-23:56, Diadoxou only/all-storesOFF, retained original failed product thread: exact same short17Oct question now returns checked native name+SKU, quantity/gross/net/VAT and recorded reversal, matching independent original completed/nonCREDIT/signed source before and after. Visible search still contains NAME (SKU CODE), exercising the repaired path. Actual CSV button on that successful answer reauthorizes/replays and produces parsed UTF8BOM/semicolon/ten-column original-source-matching bytes; private SHAefe493122c47a9742190bbcc7c28c0a55d9f350c4fb26cd9bc195d7bc65bab0a. This closes only PR2887's demonstrated decorated-product failure. Brief support-session denial was real and subsequently cleared through normal access; its cause remains unknown, not an app-code regression claim.

Health before was1cccecd1a1777a6ac9ff5c5bba42fbfde470fe69, after0484d636059eedb936e8bea1159b05c6c00bf0d2 due independent KAT release. All five reviewed assistant runtime/test blobs are unchanged in both. Do not assign one SHA retrospectively to the entire interval. Own PR/main3489/0/0+8, combined1cccecd/main39320123491 3514/0/0+8 and ordinary guarded39321219511/LIVEdep-dbb80ng473hc73dk7e40 remain release proof. Private CSV shared-file copy did not synchronize; actual downloaded bytes were read and parsed in their native browser runtime, not transferred by alternate means. First natural CSV download observer timed out; no file-success inference.

NEW ACTUAL LIVE FAIL19Oct23:55: after the correct product/date answer, typed 'Σε CSV' returned the safe unconnected/unread-source refusal, no file. This differs from the successful CSV button and earlier transfer-format PASS. Local read-only diagnosis: generic refusal is the requireEvidence branch in assistant-answer-response.js when a completed provider answer contains no tool read. Shared runOwnerAssistant currently uses tool_choice:auto even for a strict format-only sales continuation, allowing that terminal no-read response. No provider failure, dirty data, permission or server-log cause inferred; unrelated module-denial logs are not attributed to this request. Existing safety refusal remains protected, never replaced with cached/prose amounts.

ASSIGNED BEFORE SOURCE fix/assistant-sales-export-read-20261020, same retained owner. Bounded causal scope ONLY new pure server/src/services/assistant-sales-export-read.js; import and shared runOwnerAssistant first-round tool-choice + pre-read exact-period gate regions in server/src/services/owner-sales-tools.js; new focused pure/actual dispatcher/Owner/Platform reader tests. No provider/model/key, route/schema/auth/module/tenant/catalog/history/export ticket/file renderer/stock/business source or other-owner edits. For strict current format-only request with recognized sales-only inherited topic and valid resolved period, require a permitted sales tool on first provider round, then enforce that period before actual canonical read. Leave missing/invalid/mixed/unknown-context and ordinary requests on existing clarification/refusal path. No extra arbitrary tool, invented date/product identity, all-store expansion or trust in historical amounts. Reauthorization, matching/coverage/caps/finite values/reversals/fresh signed export replay and existing max rounds/read limits remain.

Publish this claim green to main BEFORE source. Reproduce actual no-read first response in real shared/Owner and Platform execution; prove strict-only activation, exact current period, no wrong-domain/period read, missing/invalid/unsupported refusal, provider-disobeys-required safe failure, fresh evidence/export and pre/post authorization. Full exact PR/main/native/browser CI, ordinary guarded exact healthy release, then only the demonstrated natural sales-format follow-up and actual file/source comparison. Do not repeat protected product/transfer/history/consumption/cola/PDF/DOCX/XLSX/financial transactions. Whole VOICE OPEN/ASSIGNED; actual normal Owner/mobile/physical/wider residual retained. User has no microphone, no request. All real amounts/rows/operators/exports/screenshots private. Product receipt CHECKPOINTS/CHANGES/2026-10-19-assistant-diadoxou-acceptance.md; NEW causal checkpoint CHECKPOINTS/CHANGES/2026-10-20-assistant-sales-export-read.md. Single next action after green claim: failing actual no-read fixture, then bounded source correction. Other owners preserved.

19/10/2026 23:54-23:56 Europe/Athens - VOICE DIADOXOU READ-ONLY BATCH / PRODUCT FOLLOW-UP LIMITED LIVE PASS / WHOLE OPEN

Retained owner codex/assistant-business-queries-20261015. SourcePR2887 final5db929d133baf960b3d7cff7bb9a934293c627c3/fullCI39316947048 SUCCESS3489PASS/0FAIL/0SKIP plus8backup, mergedc17b6605e970dc47478c7314a6ccff3b20d9f562. Exact mainCI39320123491 SUCCESS3514/0/0 plus8backup; ordinary guarded workflow39321219511 SUCCESS, exact healthy revision1cccecd1a1777a6ac9ff5c5bba42fbfde470fe69. Reviewed runtime/test blobs independently checked. No direct deploy or guard bypass. First PR run39316288566 was superseded/cancelled after registry-only reconciliation; not claimed green.

ACTUAL LIMITED LIVE PASS at23:54-23:56: existing personal SuperAdmin desktop Chrome, explicit Diadoxou/all-storesOFF, real reload and same retained product conversation. The short17Oct follow-up now returns the existing exact product and correct ended-day quantity/gross/net/VAT against independent original completed/nonCREDIT/signed sales. A fresh product CSV also matches the checked current period/identity/source. This supersedes22:53 decorated-label false no_match and this slice's AWAITING CI/release/retest wording only. Actual Owner execution is not inferred from shared code or CI. No sale/payment/stock/fiscal/shift action or original business replay.

ADDITIONAL LIMITED LIVE at23:06-23:14: exact health was not sampled at each additional answer; preceding verified revision was a6902d149624d0f687dbe2e906f852eb501c7ee7, later health before final release reports e3432c2b3f6c8a890bbe52b61a0270ee06bc9899. Do not assign an exact intervening revision retrospectively. Current recorded-stock answer matches the before-query source and distinguishes it from physical count. Later source differs during active real trading; no frozen after-state or causal/global stock delta is claimed. Original13Oct daily consumption request now returns native POS event item lines, recorded operators/Athens timestamps/quantities/reference values matching independent original events; actual UTF8BOM/semicolon eight-column CSV parsed and source-matched (private digest69a5094ef7edb6d3401383cce735ed79de55132a2cc05a64aa990fb211c4af55). Natural Greek Coca-Cola family11Oct returns each real variant separately, all displayed values/quantities and total matching independent sales. Beer12Oct has no matching native product/category label in this company catalog; actual response lists recorded categories and explicitly refuses zero-sales inference. This is a catalog-limit observation, NOT numerical beer acceptance or permission to remap all alcohol. No catalog changes.

Protected actual22:41-22:53 PASS remains: transfer original rows/direction/date/source, personal history reload/fixed expiry/empty-selection withdrawal, latest-filter CSV/XLSX/PDF/DOCX bytes and rendered Greek documents, cancellation without late UI answer at measured point, natural yesterday total and all displayed product-group reconciliation, precise product name. Earlier source/preparation records below are historical. Real rows, commercial amounts, operators, exports and screenshots remain private; only redacted results enter repository.

Whole VOICE OPEN/ASSIGNED. Remaining grouped normal Owner parity/history/file/role acceptance, mobile/touch/physical microphone and broader domain completeness/recorded offers remain NOT TESTED here; missing catalog category remains an explicit limitation. No new microphone request: owner has no microphone. Do not repeat protected successful transactions/tests for paperwork. Next action: the newly assigned natural sales-file no-read correction in the latest claim; keep same owner until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-diadoxou-acceptance.md;

manual docs/manual/super-admin/PASS.md; redacted CHECKPOINTS/EVIDENCE/assistant-diadoxou-20261019/acceptance.json. No full-module/numbered closure.

19/10/2026 22:58 Europe/Athens - VOICE DIADOXOU LIMITED LIVE PASS / PRODUCT FOLLOW-UP LIVE FAIL / BOUNDED CLAIM

Retained owner codex/assistant-business-queries-20261015. User19Oct22:39:46 explicitly requested real-store Diadoxou read-only acceptance instead of LAB and confirmed because it has real data. Existing same personal SuperAdmin session became visible through ordinary canonical navigation; no credential entry, alternate auth workaround, token read or grant. Actual cloud Chrome/tab1, exact Diadoxou/all-stores-OFF, public independent health a6902d149624d0f687dbe2e906f852eb501c7ee7. Financial/stock/fiscal/payment/shift actions were not performed; only authorized assistant questions/personal history and file downloads. Active trading means no unrelated financial before/after invariance is claimed.

LIMITED LIVE PASS22:41–22:53: ended01–18Oct OUT-transfer report matches independent original source row dates/direction/amount/description/operator and aggregate; after real reload, same personal historical prose/dated labels/fixed18Nov expiry restored without old evidence/files. Short FROM-owner follow-up retains period and correctly reports no matching source rows. Explicit11Oct OUT replaces date/direction, then short CSV and natural PDF preserve latest filters. Actual CSV parsed with BOM/semicolon/nine columns; XLSX native numeric cell, DOCX native text and rendered page, and separately generated PDF text/render match the checked source. Empty store withdraws all history/report/files and disables composer; same-store selection restores only its prose. Explicit cancellation shows cancelled notice, no late answer before next question and no archived new thread at the measured post-cancel metadata observation; this does not assert no server/provider work. Natural yesterday total sales and precise product-name sales match independently queried signed/completed/nonCREDIT source. All rendered product groups match at displayed cents/quantity/name after whitespace normalization; original raw name digest differs only because display whitespace collapses. No unsupported all-domain/security/physical/Owner acceptance inferred.

ACTUAL LIVE FAIL22:53: date-only follow-up to a successful real product query changes requested day correctly but extracts a display-decorated name plus parenthesized SKU, so literal report search returns no_match despite independently verified source sales for that exact item/day. Private failed DOM/screenshot and actual reports retained outside public repository. Public fixture/evidence is redacted; commercial amounts, operators, rows and exported files are not published. This overrides general product follow-up acceptance only; protected transfer/history/export/specific-name/total-sales PASS remains.

ASSIGNED BEFORE SOURCE: fix/assistant-sales-decorated-query-20261019, same owner. Bounded causal scope ONLY new pure helper server/src/services/assistant-sales-product-query.js; literal query construction/shared productSalesEvidence matching regions in owner-sales-tools.js; sales_by_product query argument/import in platform-assistant-products.js; new focused pure/actual-reader regressions. No dispatcher/period interpretation, other product matching modes, stock, all-store, source SQL/business rows, provider/model/key, role/module/tenant/auth or lifecycle/native/central assignment takeover. Publish this claim green to main before source.

Proposed exact behavior requires reproduction: only strict trailing NAME (SKU CODE) decoration can use NAME as canonical read filter, then accept an exact native name+SKU pair. Preserve exact literal full-name matches first, ordinary SKU/name searches, ambiguity, missing/foreign/incomplete/malformed source refusal and reauthorization. Never strip arbitrary parentheses/qualifiers, trust assistant prose as identity, broaden to all products or accept name-only/SKU-only mismatch. Export replay uses identical checked adapter. Cover both actual Owner and Platform readers, current source metadata/period, both pair mismatches, duplicate ambiguity, literal decorated catalog names, coverage and transport/revocation controls. New full exact PR/main CI and ordinary guarded release precede actual same-context17Oct retest; no repeated sale or protected financial fixture.

Whole VOICE OPEN/ASSIGNED. Remaining actual Owner parity/role tests, mobile/touch/physical microphone and wider domain residual retained; user lacks microphone, no permission requested. Single next action after this green claim: reproduce strict decorated-pair FAIL locally, implement bounded helper/adapters, require focused/native/full CI and actual same-store/day source comparison. No final whole PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-diadoxou-acceptance.md; redacted evidence CHECKPOINTS/EVIDENCE/assistant-diadoxou-20261019/acceptance.json. All other owners and concurrent records preserved.

20/10/2026 - CENTRAL-SUPPLIER-SHORTFALL-01 / LIMITED LAB UI-CSV PASS / POSITIVE CASES OPEN

Central owner codex/central-four-streams-20261018 remains. New actual read-only acceptance20Oct22:32-22:36Athens (snapshot2026-10-20T19:32:08.012Z), authenticated Platform SuperAdmin, MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / storecmtpopbgo000trhb5ng9ytiru, cloud desktop tab4. Canonical normal navigation positively verified the existing signed-in session; no new credentials were requested. This supersedes earlier unknown-login/AWAITING LAB only for the tested cases below, not the entire feature.

LIMITED LAB PASS: new REVIEW_REQUIRED filter shows11negative-recorded-stock rows and actual CSV11unique products across all filtered pages,38columns,10118bytes/SHA256a3d6fd22ba619928a3baf4e07e896300785c04b6ab97ce27b98cd46330c7d991. All11 have null/empty recorded gap, NEGATIVE_RECORDED_STOCK and physicalVerificationNO. WaterSKU2269 stock-71/min0,sales22/returns4/net18/daily0.6/proposal77 displays the new review/negative-stock label; original product fields match between exports. The19Octproposal82 is protected dated evidence under a different rolling window, not repeated or expected to equal77.

ALL with only-neededOFF shows101rows; actual CSV101unique products,75646bytes/SHA2564f0e59d405dec10a39a26a423e50f6dc3966227230eb33ad88ad9e3b863f2b71, same store/snapshot,90NO_SHORTAGE+11REVIEW_REQUIRED, physicalVerificationNO throughout. Product columns15-31 of all11review rows equal their ALL-export counterparts. Actual SKU00580/7UP1.5L stock0/min0/proposal0 shows Χωρίς καταγεγραμμένο έλλειμμα; this certifies the recorded-minimum comparison only, not available physical stock. BELOW_MINIMUM and DEMAND_REPLENISHMENT filters each showed0rows and disabled CSV: EMPTY-CASE PASS ONLY, no positive case inferred.

Adjacent independent health at19:32UTC wasoktrue/f813ea5edf6621cd0ad0cdd6cb50d2719b03dd24; all3runtime supplier blobs exactly match reviewed source#2946. Its verified technical release/full native CI remains as recorded in#2969. No transactional sale/return/payment/order/stock/settings/email action or accepted LAB replay was performed. No claim of independently measured full database/financial deltas. No new FAIL observed. Browser snapshot/JPG and redacted structured evidence: CHECKPOINTS/EVIDENCE/supplier-stock-shortfall-20261020/lab-acceptance.json, lab-verified.jpg; manual docs/manual/commerce/PASS.md; checkpoint CHECKPOINTS/CHANGES/2026-10-20-supplier-stock-shortfall.md. Scoped PDF lab-tracker.pdf regenerated; concurrent common PDF retained.

Remaining OPEN with central owner: real positive below-minimum and demand-replenishment cases (absent from this LAB snapshot), other roles/stores/mobile, physical inventory/source correctness, genuine deliveries/comparable cost/margin, weekly stock history and any actual order/report delivery. Do not replay the accepted negative/no-recorded-gap/CSV/empty-filter cases merely for paperwork. Next single action: coordinate an independently identified available positive read-only acceptance case; do not mutate shared LAB quantities to manufacture it. Automatic report dispatch staysOFF pending retained-owner production contracts.

20/10/2026 - CENTRAL-SUPPLIER-SHORTFALL-01 / TECHNICAL RELEASE VERIFIED / AWAITING LAB

Retained central owner codex/central-four-streams-20261018, source branch codex/supplier-stock-shortfall-20261020, #2705/#2527. Claim #2945 was reviewed and green merged before source. Source #2946 exact head0808c71d0d3da04a68cc5e9ceec9973e9f6d580b reviewed, green and merged asd8142d55c376574f6a0b6ab35b611a2dc3bdcc97. This receipt supersedes older NOT MERGED, NOT INSTALLED and AWAITING CI descriptions below for this bounded slice only; historical evidence remains preserved.

Technical PASS: PR CI39431207932/build118656937874 all5jobsSUCCESS,3668serverPASS/0FAIL/0SKIP+8backupPASS. Exact combined main CI39432574573/build118661509900 all5jobsSUCCESS,3669serverPASS/0FAIL/0SKIP+8backupPASS. Real isolated native PostgreSQL supplier HTTP/SQL parent and all5subcases executed, including producer/JSON classification, original flat quantities/source-table fingerprints, tenant/license/role denials and overflow; all11new producer->group->JSON->UI/filter/CSV contract cases executed unskipped. Mounted UI/CSV and ordinary/offline wholesale checks passed. Local30PASS/0FAIL/1native-infrastructureSKIP remains separate historical local evidence, not native/LAB acceptance. Initial setup/fixture failures and pre-merge CSS review correction are retained; historical first-head CI39430718110 was cancelled after head replacement, not a product FAIL.

Actual ordinary release verified20Oct13:52UTC: workflow_run guard39433587658/deploy118664772862SUCCESS, pinned trigger13:49:27.6081997Z and exact healthy revision13:52:42.7190523Z. Renderdeploydep-dbbn2pss728c7390ij50LIVE, finished13:52:34.431512Z, commitd8142d55c376574f6a0b6ab35b611a2dc3bdcc97; independent no-cache /api/health returnedoktrue exactsameSHA. Previous healthy rollbackac39d0fb/dep-dbbmn5rncjis7398fgv0. No manual deployment or guard bypass. This is a dated installation observation, not a claim that production cannot advance subsequently.

Installed behavior: recorded minimum-stock gap versus demand replenishment or review, supplier-only filters, separate metadata inside original stock cell, original5tablecolumns and first32CSVcolumns retained with6appended metadata columns. Original proposals, supplier proxy/ties/cap and flat endpoint unchanged. No base producer/routeSQL/auth/licensing/schema/margin/supplier assignment/stock/financial/order/transport changes. Existing19Oct11row actual UI/CSV PASS, including recordedstock-71/proposal82, remains protected and was not repeated. New classification does not certify physical stock or historical weekly shortage.

Actual new UI/filter/CSV acceptance remains AWAITING LAB. Native secure sign-in request was interrupted; no successful login or new LAB observation is inferred. No new manual/numbered-list closure. Owner remains central. Next single action: establish a verified normal authenticated session and perform only the added read-only LAB classification/filter/CSV acceptance, without replaying accepted financial/stock actions. Automatic report dispatch remains OFF pending retained-owner production consent/lifecycle/schema/transport contracts. Scoped tracker PDF: CHECKPOINTS/EVIDENCE/supplier-stock-shortfall-20261020/release-tracker.pdf; common PDF retained under the recorded concurrent-publication rule. Checkpoint: CHECKPOINTS/CHANGES/2026-10-20-supplier-stock-shortfall.md.

20/10/2026 - CENTRAL-SUPPLIER-SHORTFALL-01 / SOURCE IMPLEMENTED / AWAITING CI AND LAB

Owner codex/central-four-streams-20261018, branch codex/supplier-stock-shortfall-20261020, #2705/#2527. Before-source claim #2945 head d2130c9a, independent review PASS and CI39429002928 all5 SUCCESS (3652 server/0FAIL/0SKIP +8 backup), merged21b265ae30518b64bd3239c98379b2684e3a8b9b before edits. Checkpoint: CHECKPOINTS/CHANGES/2026-10-20-supplier-stock-shortfall.md.

Exactly8 central-delegated paths: server/src/lib/supplier-order-groups.js, server/test/supplier-order-groups.test.js, server/test/supplier-order-groups-postgres.test.js, client/src/components/commerce/OrderSuggestionsPanel.jsx, client/src/components/commerce/supplier-order-proposal-export.js, server/test/supplier-order-groups-ui.test.js, server/test/supplier-order-proposal-export.test.js, server/test/supplier-stock-shortfall-contract.test.js. Adds recorded minimum-stock gap classification independently of demand replenishment; supplier-only filter and visible labels, six appended CSV columns after the original32, same applied snapshot/all filtered pages. Missing/invalid/negative stock remains REVIEW_REQUIRED; tiny positive gaps are not displayed as zero. Original quantities, default rows, supplier proxy/cap/ties, flat endpoint and existing columns remain protected. No base producer/route/SQL/CSS/auth/licensing/schema/margin/supplier assignment/stock/financial/order/transport changes; retained owners unchanged.

Technical local evidence Node20.20.2: integrated30PASS/0FAIL/1native PostgreSQL SKIP because no local PostgreSQL; the native case is NOT RUN locally and must execute unskipped in full CI. Actual producer -> grouping -> JSON -> shared UI/filter/CSV and mounted download/reset/stale-response tests are covered. Initial partial-checkout missing CSS/zod/Express and one contradictory test fixture are retained in evidence with corrections; they are not product/LAB FAIL. Existing19/10 actual11row UI/CSV PASS, including stock-71/proposal82, is protected and not repeated.

Status: source implemented locally, not yet merged/installed; full required CI/review/normal guarded release pending. New UI/filter/CSV scope AWAITING LAB; no new real PASS, no manual/numbered closure. Dispatch OFF. Next action: review exact source, require full CI including native PostgreSQL without skip, merge and verify exact ordinary release; then new read-only acceptance only. Scoped regenerated tracker PDF: CHECKPOINTS/EVIDENCE/supplier-stock-shortfall-20261020/source-tracker.pdf; common PDF retained under existing concurrent-publication rule.

20/10/2026 - CENTRAL-REPORT-CASH-PAYLOAD-01 / TECHNICAL RELEASE VERIFIED / DELIVERY ACTIVATION OPEN

Retained owner codex/report-cash-payload-20261020 and central coordinator codex/central-four-streams-20261018 (#2704/#2527). Source PR#2922 final integrated head134a2a530b134169ac19d4a0d1238b9b7a6893b3 green/reviewed, merged c417d58d2751792ec3ec491f25c53581330adb61. Original before-source claim#2919/CI39378635258/mergedd1f2f3b2 preceded both new files. This receipt supersedes historical SOURCE BLOCKED, AWAITING FULL CI, NOT MERGED and NOT INSTALLED entries below for this bounded source increment only. Earlier failures and actual PASS remain preserved.

Technical PASS: exact integrated PR CI39417260089/job118609437298 and exact main CI39418394373/job118613240288 each all5jobsSUCCESS,3636serverPASS/0FAIL/0SKIP plus8backupPASS. All14 new payload tests actually executed without skip, including actual DAILY/WEEKLY/MONTHLY producer->JSON->payload,6 Athens DST cases, scope/settings/period/day/session/cents/monthly identity fences, deterministic UTF8/SHA256 and bounded/private metadata refusal. Existing native PostgreSQL delivery persistence parent and all11subtests PASS unskipped on main. Local Node20.20.2 34/0/0 remains separate evidence, not native/LAB/inbox acceptance. Independent exact remote review verified the two unchanged source/test blobs and no occupied source takeover.

Actual normal release verified: guarded workflow39419369668/deployjob118616263103 SUCCESS, pinned c417d58d2751792ec3ec491f25c53581330adb61, actual hook trigger and exact healthy result at2026-10-20T12:07:45.1489067Z. Renderdep-dbblheon74is73d3h4dg LIVE finished2026-10-20T12:07:41.22209Z. Independent no-cache public /api/health request in12:07UTC returned ok:true/version0.22.0+kat-test-pos and the same exact revision. Prior healthy2dc9c8829578d388272f0a2cfd330a32ee4921a0 / dep-dbbl5non74is73d2fm3g remains rollback evidence. No manual deploy, startup override, schema push, secret change or guard bypass.

Exact module SHA256ab1c3fc128f2f182bcc1bd0eef6b1f019baa5de0452d9426e9f105ab81a7ee7e/blobfaa574c1566cbe3f0e493d6bead2a5017f8df2c6; test SHA256016cd65ad9dcba4cf2a9cfbbb1bf8038cf167f4f938103f9e3cdb9165700b855/blob0d7493b771caf2caab9393cb1d5d87224d9c22db. Only these two new runtime/test paths were introduced. Other-owner KAT import/unit/auth, POS loading/payment/myDATA, Android voice, wholesale and current accepted records preserved. Source evidence and scoped PDFs remain auditable.

The old whole-CI FAIL39379328574/job118484757813/artifact12244299880 is not erased or relabelled PASS. Retained wholesale owner fixed effective disabled-fieldset actionability in#2927; receipt#2932 and our fresh PR/main actual-app E2E now independently pass all stages. No repeated click, timeout increase, removed assertion or production UI change by this coordinator. Root did not edit wholesale ownership paths. The separate aggregate-input memory review finding was fixed before original source publication with4MiB UTF8 key/value budget,256byte keys, early1000collection and2MiBbody bounds; no new unresolved payload FAIL.

Installed source remains UNWIRED: canonical provisional body/hash only. It preserves original day/POS/STORE-versus-DELIVERY amounts and recorded-opening-user/unattributed identities with explicit Greek limitations; it does not prove current source authenticity, authorization/consent or financial reconciliation. No production table provisioned by this increment, recipient Save/verification/activation, email/SMTP send, scheduler, financial/stock/fiscal/shift/payroll mutation or accepted LAB transaction/test replay occurred. No LAB/LIVE/USER feature PASS, manual addition or whole cash-report/task closure is asserted. Dispatch stays OFF.

Four-stream status: #2705 limited supplier UI/CSV and scoped advance allocation#2910 remain protected; broader margin/comparable units/physical receipt/invoice residuals remain with owners. #2706 comparison/hourly/CSV remains protected; paid-vs-accrual, stable identity/dedup/date/source completeness and actual staffing sources remain OPEN. #2707 has no new AI acceptance since the already recorded limited product/date/typedCSV#2894; retained Owner/mobile/physical/domain residuals remain OPEN. Separate Android voice technical release does not become AI/microphone/device/signing acceptance. No takeover or repeated accepted business test.

Next single action: resolve the already published retained-owner production integration contracts in#2704 (authoritative verified recipient/consent/dispatch versions and revocation, reviewed schema/lifecycle/retention/backup, consistent lock ordering, payload retention/reissue and positive one-recipient transport acceptance) through an explicit bounded claim before any activation. Those are genuine remaining integration requirements, not supplied by pure payload consistency or READY previews. This bounded payload implementation/release is complete; central and residual ownership remains assigned until completion or named handoff. No new user decision is needed for this verified technical release.

Checkpoint CHECKPOINTS/CHANGES/2026-10-20-report-cash-payload.md; machine evidence CHECKPOINTS/EVIDENCE/report-cash-payload-20261020/release-verification.json and regenerated release-tracker.pdf. Four canonical registries are synchronized; scoped tracker follows established concurrent-publication convention and preserves other owners' common PDF/manual/actual PASS records.

20/10/2026 - CENTRAL-REPORT-CASH-PAYLOAD-01 / INTEGRATION RESUMED AFTER OWNED CI FIX

Retained owner codex/report-cash-payload-20261020 and central coordinator codex/central-four-streams-20261018 (#2704/#2527). Resume source PR#2922 after reading current main2dc9c8829578d388272f0a2cfd330a32ee4921a0, complete canonical registries, AGENTS, relevant checkpoints/manuals and intervening history. Original before-source claim#2919/greenCI39378635258/mergedd1f2f3b2 remains valid. No new source behavior or owner takeover.

The former required-CI blocker is positively superseded, not erased: retained wholesale owner corrected effective inherited-fieldset :disabled actionability in test-only#2927, preserving all assertions/no timeout increase/no production UI change. Finalhead1e7934236a5e42ae710986830ef522c8f1875a22 fullCI39381968343 SUCCESS; merge4e732c2d45eeffeb1a81b7099e90447a4ac9bb76 exactmainCI39382797465 all5jobsSUCCESS3614serverPASS/0FAIL/0SKIP+8backup, actual offline-app E2E executed. Guard39383434126 and Renderdep-dbbh223rjlhs73e8f6hg verified that source. Receipt#2932/checkpoint2026-10-20-wholesale-offline-app-e2e.md records exact evidence. Earlier failed run39379328574/job118484757813/artifact12244299880 and bounded diagnosis remain protected history in the handoff below.

Normal merge of current main into the existing source branch preserves ALL concurrent KAT importer/unit/auth, POS loading/payment/myDATA, Android voice and other-owner source/records. Reuses unchanged reviewed payload module blobfaa574c1566cbe3f0e493d6bead2a5017f8df2c6 and testblob0d7493b771caf2caab9393cb1d5d87224d9c22db. Independent current-main review confirms producer/policy/core/settings/schema/mail/lifecycle/backup contract unchanged since the original source. Preserve original source evidence files and add this scoped current tracker snapshot; no common PDF/manual replacement.

Existing technical evidence remains localNode20 34/0/0 and original PRbuild3618/0/0+8backup,14newpayloadtests executed. These results do NOT certify this new integrated head. Fresh full required PR/main CI, independent exact diff review and ordinary guarded exact deployment are required before installation can be reported. No accepted LAB test, business transaction, recipient Save or mail send is repeated. No new feature/manual PASS.

Payload remains unwired: deterministic canonical UTF8 provisional body/hash and scope/period/settings/session/cent/monthly-summary checks only. It cannot authenticate supplied source or prove fresh authorization/consent, financial reconciliation or permission to send. Production recipient/consent/verification/version/revocation, schema/lifecycle/retention/backup, consistent lock ordering, payload retention/reissue and SMTP acceptance contracts remain OPEN with retained owners. Dispatch stays OFF.

Next single action: run the corrected full integrated PR CI, review the exact tree, then normal merge and exact full main CI/guard/live-health verification. If any new FAIL occurs, preserve and diagnose it within ownership; do not bypass checks. Four canonical registries/checkpoint updated; scoped integration-tracker.pdf generated from fresh tracker under the documented concurrent-publication convention. This supersedes earlier SOURCE BLOCKED status only for the now-proven fixed wholesale dependency; payload is still NOT MERGED/NOT INSTALLED pending new evidence.

20/10/2026 09:23 Europe/Athens - CENTRAL-REPORT-CASH-PAYLOAD-01 / SOURCE REVIEWED / CI BLOCKED HANDOFF

Retained owner codex/report-cash-payload-20261020 and central coordinator codex/central-four-streams-20261018 (#2704/#2527). Claim#2919/head64be66d2e6f0d44f8dec197718134a92f7bc8b58, CI39378635258 SUCCESS, merged d1f2f3b2dac33f76b039e5fba17b06887955f4c4 BEFORE either new file. Source#2922/head204aad0bf3b33b4b5f2581469779cff8763dfb20 is implemented and independently reviewed but NOT MERGED/NOT INSTALLED. Exact new source paths ONLY server/src/services/automatic-report-cash-payload.js and server/test/automatic-report-cash-payload.test.js. No receiving owner transfer/release is implied.

PASS evidence: final Node20.20.2 local34/0/0 (14new actual producer->JSON->payload plus20protected source/policy/weekly/monthly). PRCI39379328574 build-and-test/job118484757823 SUCCESS3618server PASS/0FAIL/0SKIP plus8backup PASS; all14 new payload tests actually executed unskipped, full build/native/HTTP/browser/security tests in that job green. Windows/preflight/classification green. Whole required workflow is FAIL because wholesale-isolated-lab/job118484757813 FAILED; never equate the green build job to green whole CI.

NEW FAIL preserved: actual-app wholesale offline E2E at server/e2e/wholesale-offline-app-flow.mjs:66 timed out at encrypted preparation,06:18:16UTC. Actual checkout a0ae3f3 merges payload204aad0b into current wholesale1498b279 (#2920), so stale checkout was ruled out. Preceding ordinary isolated wholesale browser flow passed10 checks; new offline flow recorded zero completed checks and failed BEFORE local draft/order steps. Artifact12244299880, ZIP SHA2561815ae0faa586c3f9e295a295693f856e8719cb13db4a424c70d5a3bf00d86c5, contains results and FAIL screenshot. Independent artifact review: password still filled/no alert or busy; prepare() clears it on entry. Likely test actionability race: asynchronous profile loading disables parent fieldset while helper checks only button.disabled, not effective :disabled. This is a bounded diagnosis, NOT a proven fix or production failure. Logs/triage published to retained wholesale owner on#2920/#2922/#2527. Root did not edit owned wholesale/CI paths, rerun to hide failure, weaken checks or merge/deploy the blocked source.

Payload contract: deterministic canonical UTF8 JSON/body SHA256, exact selected scope/settings/day/period/session/count/cent and monthly-opening-user fences; original day/POS/STORE-versus-DELIVERY differences remain PROVISIONAL with fixed Greek no-reconciliation/no-liability disclosures. Actual producer Date and JSON forms agree; private extras omitted. Deep detached/frozen. Review-found aggregate-input memory gap fixed BEFORE publication by4MiB UTF8 keys/values,256byte keys, early1000collection limits and2MiB body; regressiongetterCalls0. Module SHA256ab1c3fc128f2f182bcc1bd0eef6b1f019baa5de0452d9426e9f105ab81a7ee7e/blobfaa574c1566cbe3f0e493d6bead2a5017f8df2c6; test SHA256016cd65ad9dcba4cf2a9cfbbb1bf8038cf167f4f938103f9e3cdb9165700b855/blob0d7493b771caf2caab9393cb1d5d87224d9c22db. No DB/transport/recipient/scheduler/repository creation or runtime wiring. Source authenticity/current authorization/fresh consent and financial reconciliation are not proven by payload consistency.

Production remains last independently healthy f2a3b79a145f7f80331280384066ec78c29ec230 / Renderdep-dbb8vvbncjis738veivg at this page's20Oct09:10 read. No new source installation claimed. DispatchOFF and all previous actual PASS protected; no LAB/payment/stock/fiscal/shift replay. #2705 scoped supplier allocation#2910 retained; margin/comparable delivery identity remains OPEN with owners. #2706 prior sales/hourly/CSV retained; paid/accrual/identity/dedup/staffing sources remain OPEN. #2707 stale issueheader corrected to ALREADY RECORDED limited product/date/CSV LIVEPASS#2894; wider Owner/mobile/physical/domain acceptance remains retained-owner OPEN. Redundant receipt#2913 closed in favor of published#2916, evidence preserved.

Single next action: retained wholesale owner confirms/fixes actionability race in its claimed E2E; then reconcile latest main into#2922 preserving all owners and these exact reviewed payload blobs, require full green PR/main CI and normal guarded exact release. Until then HOLD. Separate production eligibility/consent/verification/version/revocation, schema/lifecycle/retention/backup, lock-order and transport acceptance contracts remain blocked/requested in#2704 before any delivery activation. No additional owner decision requested and no background execution promised after this handoff.

Checkpoint CHECKPOINTS/CHANGES/2026-10-20-report-cash-payload.md; evidence CHECKPOINTS/EVIDENCE/report-cash-payload-20261020/ci-blocked-handoff.json and handoff-tracker.pdf. Four canonical records synchronized with a regenerated scoped PDF under established concurrent-publication convention, preserving current common PDF/manual/other-owner records. No new feature/manual PASS or whole-task closure.

20/10/2026 09:06 Europe/Athens - CENTRAL-REPORT-CASH-PAYLOAD-01 / ASSIGNED BEFORE SOURCE

ASSIGNED codex/report-cash-payload-20261020, retained central coordinator codex/central-four-streams-20261018 (#2704/#2527). Independent new files ONLY server/src/services/automatic-report-cash-payload.js and server/test/automatic-report-cash-payload.test.js. Baseline a9d6359911d1378712f67e5f13e99f8b9c9be97f. Existing AUTO-REPORTS runtime/settings/source/mail, schema, lifecycle/backup, supplier, Workforce and VOICE owners remain unchanged. Publish this claim green on main BEFORE creating either new source/test file.

Bounded implementation: pure deterministic payload builder consuming the actual existing readAutomaticCashPreview response, explicit company/store/settings version, exact period/frequency/source fingerprint and ready/complete fences. Retain original day/POS/STORE-versus-DELIVERY rows/amounts and monthly recorded-opening-operator limitations; strict canonicalization, checked cents, immutable detached output and UTF-8 payload SHA256. Reject HOLD/incomplete/foreign/stale/malformed input, inconsistent rows/totals/monthly summaries and financial-finality escalation. Fixed explicit Greek PROVISIONAL disclosure; READY is source readiness, never employee liability or financial reconciliation certification. Pure existing policy/date exports may be reused. No DB/schema/clock/transport/recipient/scheduler/repository creation or runtime wiring.

Meaningful tests: actual source producer -> JSON wire response -> new builder for DAILY/WEEKLY/MONTHLY and Athens DST; deterministic identical bytes/hash, original evidence/unknown identity preservation, tenant/store/version/period/source consistency, malformed or unsafe input and HOLD/finality refusal. Existing policy/source tests remain unchanged. Native PostgreSQL coverage is not claimed by this pure slice; require focused Node20, independent review, exact full PR/main CI and ordinary guarded release before any installation claim. No financial/stock/fiscal/shift/email action or replay of prior LAB. New payload is NOT IMPLEMENTED/NOT TESTED and no feature/manual PASS.

Production integration dependency blocker positively identified, not bypassed: AutomaticReportSettings supplies configuration/version and dispatchEnabled:false; responsibleEmail/cashCloseEmailEnabled do not provide authoritative verified recipient/consent revision. AutomaticReportDeliverySlot lacks reviewed production schema/lifecycle/backup enrollment. safe-prisma-push skips production DDL. Current mail helper omits accepted/rejected recipient evidence. Coordinate authoritative consent/verification/dispatch records and revocation, schema/ownership/retention/recovery, consistent lifecycle/auth/settings/recipient/slot lock order, payload retention and one-recipient transport classification with retained owners before activation. readEligibility must derive trusted facts inside its transaction, never echo input assertions.

Preserve #2883 limited daily/weekly/monthly HOLD/control/supplier/sales CSV PASS, #2909/#2916 technical repository release with11native PASS, #2910 scoped supplier allocation and newest VOICE LIVE observations. Fresh read-only four-stream audits found no new financial FAIL or released margin/payroll/VOICE scope. #2707 old AWAITING product/CSV status is superseded by retained-owner recorded scoped actual PASS (#2894); whole module remains OPEN.

Next single action after green claim: implement ONLY the two new files, review and execute tests; dispatch remains OFF and production integration remains blocked on the named owner contracts. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-report-cash-payload.md. Root alone updates canonical registries/checkpoint and regenerated scoped claim PDF under CHECKPOINTS/EVIDENCE/report-cash-payload-20261020/, following the concurrent-publication convention; do not replace another owner's common PDF or manual.

20/10/2026 01:06 Europe/Athens - CENTRAL-REPORT-DELIVERY-PERSISTENCE-01 / TECHNICAL RELEASE VERIFIED / DELIVERY STILL OPEN

Retained owner codex/report-delivery-persistence-20261020; coordinator codex/central-four-streams-20261018 (#2704/#2527). Source PR #2909 merged c5b751db49858e9cf3437e844cce6c5344473056 after green before-source claim #2903 (merge19e7644f046a03dd8e149095e008712982594bad). This receipt supersedes the historical SOURCE PREPARED / AWAITING NATIVE FULL CI and pending-installation statuses below for this bounded increment only.

Technical PASS: PR CI39325922089 and exact source main CI39327214192 each 3531 server PASS/0 FAIL/0 SKIP plus8 backup PASS. Integrated3c47be598fdd6be78a274c5a523b08412d468769 CI39327705958:3545/0/0 plus8 backup. Actual deployed f2a3b79a145f7f80331280384066ec78c29ec230 CI39328665510:3594/0/0 plus8 backup, all5 jobs SUCCESS. All11 native PostgreSQL repository subtests actually executed and PASS without skips, including independent-client create/CAS races, tenant/store isolation, literal parameter binding, eligibility rollback, post-SQL pre-commit failures, reconnect/UNKNOWN fences, terminal acknowledgement, corruption refusal and unchanged control tenant. Local25 PASS/1 infrastructure SKIP is historical local evidence, not the native proof. Reconnect is a database CLIENT reconnect test, not a PostgreSQL-server restart or SMTP crash/inbox test.

Installation verified: normal guarded deploy39330143576/job118326018997 SUCCESS; exact target f2a3b79a145f7f80331280384066ec78c29ec230, Render dep-dbb8vvbncjis738veivg LIVE finished2026-10-19T21:50:59.473712Z. Guard observed exact healthy revision2026-10-19T21:51:06.3278155Z; independent /api/health request at22:05 UTC returned ok:true and the same revision. Previous healthy0484d636059eedb936e8bea1159b05c6c00bf0d2 remains rollback evidence. Earlier freshness guards39328246953/39329319340 correctly skipped older targets; those skips are not installation. Later documentation main3b727d1f51716f18ae68b1376f214b9087d0a1bd is not substituted for the observed deployed source.

Repository Gitblob c9ff006bb1f2eefba5fb1f39bc283fae20fc43ac; native test7ef8f7d4e49a59ea4f63aae299a33ae9cd135395. Independent review confirmed exact repository, lifecycle core and both tests unchanged on deployed f2a3b79a. No transport or runtime wiring was added.

Boundaries: dormant injectable metadata persistence is installed as source only. This increment did not provision a production table, change schema/bootstrap, activate SMTP/scheduler/recipients, write financial records or replay LAB transactions. Production table/schema authority, lifecycle/retention/backup/privacy, real authorization/consent/revocation and consistent lock ordering, report payload persistence, scheduler/overlap/reissue, financial reconciliation and controlled delivery/inbox acceptance remain OPEN with retained AUTO-REPORTS/mail/lifecycle/backup owners. No LAB/LIVE/USER feature PASS or whole Task14 closure is asserted; manuals and accepted PASS remain unchanged.

Four-stream reconciliation: #2705 retained owner has published scoped hosted supplier-advance allocation LAB PASS (#2910), cashDelta0, without repeat disbursement; do not replay it. Broader margin/comparable units/physical receipt remain OPEN. #2706 preserves accepted comparison/hourly/CSV; paid-payroll vs accrual, identity/dedup/date boundaries and staffing-source acceptance remain OPEN. #2707 includes deployed #2911 sales-file follow-up source; actual retained-owner acceptance remains required. No takeover of these scopes.

Next single action: coordinate a separate bounded production-integration claim with retained runtime/schema/lifecycle/backup owners before any activation; keep dispatch OFF. This bounded source claim is complete; central coordination and residual owners remain assigned. The temporary source-merge coordination window from issue#2527 comment6277844311 is CLOSED after healthy release; normal independent owner work may continue.

Evidence: CHECKPOINTS/CHANGES/2026-10-20-report-delivery-persistence.md; CHECKPOINTS/EVIDENCE/report-delivery-persistence-20261020/release-verification.json and release-tracker.pdf. Scoped PDF follows the documented concurrent-publication convention: regenerated from this exact fresh tracker, while preserving other owners' common PDF and actual PASS publications.

20/10/2026 - CENTRAL-REPORT-DELIVERY-PERSISTENCE-01 / SOURCE PREPARED / AWAITING NATIVE FULL CI

Retained owner codex/report-delivery-persistence-20261020 under central coordinator codex/central-four-streams-20261018 (#2704/#2527). Before-source claim#2903 finalheadf0c0cf702a2b4136ec5fa67e4c871821ee1325f3, docsCI39324706458 SUCCESS, merged19e7644f046a03dd8e149095e008712982594bad before either new file was edited. New dormant repository and native fixture/test only; existing lifecycle core and all runtime/schema/bootstrap/mail/settings/source/backup/lifecycle owners untouched.

Implementation: dependency-injected interactive Prisma transactions, parameterized selected-company/store/slot SQL, PK conflict reconciliation of immutable snapshots, canonical JSON and SQL projection validation including lossless bigint version, row locks plus exact version/status/token/prior-JSON CAS, named existing-core transitions, fresh trusted injected eligibility inside create/start, and mutation receipts only after outer transaction resolves. No schema creation/import/global Prisma/env/clock/transport/activation/retries or generic record replacement API. Production table is NOT provisioned.

Exact Node20.20.2 local run25PASS/0FAIL/1 infrastructure SKIP (22 protected core +3 new boundary/constructor tests); all11 native subtests remain NOT TESTED locally. Portable PostgreSQL18.4 binaries were found but this sandbox exposes only mapped UID0; ordinary runuser/setuid nonroot startup was unavailable. No bypass/shim, server or DB access occurred. Full CI isolated PostgreSQL16 must execute native fixture unskipped before merge. Dedicated cryptorandom schema, independent clients and own-schema cleanup isolate native concurrency/create/CAS/scope/hostile binding, stale-token/recovery, gate refusal/throw, write-before-commit rollback, client reconnect persistence/ATTEMPTING expiry UNKNOWN, exact terminal acknowledgment and SQL/JSON corruption checks. Client reconnect is not an actual database-server restart or SMTP crash/inbox proof.

Module SHA256fb303807ee833e6ab38368b94de0108070f358c88a163eddcd4bac0675cf6c8b (blobc9ff006bb1f2eefba5fb1f39bc283fae20fc43ac); test SHA256d069e35ed7a4425cf5c34804390e47918c68af93776550e566ec05f3b9c9cb88 (blob7ef8f7d4e49a59ea4f63aae299a33ae9cd135395). Independent review found no source blocker; actual native/full PR/main CI and ordinary guarded exact release still required.

Automatic delivery remains OFF/OPEN. Real consent/authorization/lifecycle lock integration, production migration/manifest/backup/retention, scheduler/overlap/reissue, SMTP and financial reconciliation/actual delivery remain separately owned OPEN. Existing limited LAB/CSV PASS and newer supplier/KAT/VOICE receipts preserved, no repeated business tests or new LAB/LIVE/USER/manual PASS. To avoid overwriting concurrent real PASS PDF receipts, retain current shared PDF and publish regenerated source tracker snapshot under this scope's evidence per existing concurrent-publication rule. Root only updates unique persistence claim location and checkpoint/evidence. Next: execute full native CI; fix actual failures within these two paths, then verify exact integration/release without activating dispatch. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-report-delivery-persistence.md.

20/10/2026 - CENTRAL-REPORT-DELIVERY-PERSISTENCE-01 / ASSIGNED BEFORE SOURCE

ASSIGNED - codex/report-delivery-persistence-20261020, retained central coordinator codex/central-four-streams-20261018 under #2704/#2527. Independent new dormant persistence subtask follows released pure lifecycle core #2885/receipt#2898. Exact new files ONLY server/src/services/automatic-report-delivery-repository.js and server/test/automatic-report-delivery-repository-postgres.test.js. Existing AUTO-REPORTS runtime owner codex/automatic-reporting-20261016, settings/source/mail/lifecycle/backup/schema owners and all other assignments retained; no existing source/core/manifest/schema.prisma/bootstrap/workflow edits. This claim must be green merged on main BEFORE either new file is edited.

Bounded contract: dependency-injected Prisma transaction repository, explicit company/store/slot predicates, unique stable slot INSERT and immutable-snapshot reconciliation, named lifecycle transitions delegated to existing pure core, bigint-safe version/token/status/previous-record CAS, canonical stored-record validation, fresh injected eligibility reader within create/start transaction, commit-before-return start receipt and no automatic transaction retries. No generic save/replacement API or transport callback. No module/global Prisma/env/clock/DDL/SMTP/route/scheduler imports or activation. Required table contract is created ONLY by isolated test fixture; production migration/lifecycle manifest/retention integration remains separately owned and OPEN. Injected eligibility is not proof of actual authorization or lock-safe revocation.

Required isolated native PostgreSQL tests: independent concurrent clients unique create/CAS winner, duplicate snapshot conflicts, stale version/token/reused token, company/store controls and hostile parameter binding, gate refusal/throw, transaction failure after write before commit rollback, persisted CLAIMED/reconnect recovery, persisted ATTEMPTING/reconnect expiry UNKNOWN/no auto resend, ACCEPTED reopen/idempotent exact acknowledgment and conflicting terminal refusal, corrupted SQL/JSON fences and no import/constructor DDL. Local missing native DB is infrastructure SKIP, never PASS; full native CI must execute all native cases unskipped. Restart/crash-window simulation is not SMTP crash or inbox-delivery acceptance.

Protected evidence: core22 focused PASS, integrated full mainCI39320123491 3514+8 PASS, guarded healthy1cccecd1 release, previous limited monthly/HOLD/control/supplier/sales UI/CSV PASS. Do not repeat accepted LAB/business actions. Current persistence NOT IMPLEMENTED/NOT TESTED; automatic delivery remains OFF/OPEN. No production DB/table/migration, financial/stock/fiscal/shift/payroll/recipient/email write or manual deploy. Checkpoint CHECKPOINTS/CHANGES/2026-10-20-report-delivery-persistence.md. Next after green claim: implement ONLY the two new files, independently review and require exact full PR/main CI and ordinary guarded release; no new manual/LAB PASS from technical tests.

19/10/2026 23:48 Europe/Athens - CENTRAL-REPORT-DELIVERY-CORE-01 / TECHNICAL RELEASE VERIFIED / AUTOMATIC DELIVERY OPEN

Retained central coordinator codex/central-four-streams-20261018 and bounded core owner codex/report-delivery-core-20261019. Source PR#2885 is technically integrated in exact main revision 1cccecd1a1777a6ac9ff5c5bba42fbfde470fe69. Full main CI39320123491 SUCCESS: 3514 server PASS/0FAIL/0SKIP +8 backup PASS, all5jobs green, including native PostgreSQL, browser/HTTP/invariants and Windows. Independent release review confirms unchanged reviewed module/test blobs463f541d930bbab12c2c027d4f7158256d800c7a/eb08aa8442db2e0c7f7181e6c97274af0caedb37. Focused core22 tests and final PR CI39317383179 remain valid technical evidence.

Ordinary guarded deployment39321219511 SUCCESS. Render deploy dep-dbb80ng473hc73dk7e40 became live at2026-10-19T20:47:07.182627Z (23:47 Athens). Independent public /api/health returned ok=true, revision1cccecd1a1777a6ac9ff5c5bba42fbfde470fe69, version0.22.0+kat-test-pos. Guard logs verify pinned trigger and exact healthy revision. Previous healthy e3432c2b remains rollback provenance. The earlier jobless cancellation/403/workflow_dispatch release blocker is SUPERSEDED by this later full-source main CI and ordinary deployment; no manual workflow, login, guard bypass, dummy source edit or manual deploy was needed. Current receipt baseline0484d636 contains newer KAT branding source; that later source has its own CI/release and is not certified by the1cccecd1 receipt.

This is technical release verification only, NO new LAB/LIVE/USER feature PASS. Pure lifecycle core remains unwired: no durable SQL outbox/CAS, transport/SMTP, scheduler, recipient consent or activation was added. Actual automatic sending remains OFF/NOT TESTED. ACCEPTED means transport acceptance only; UNKNOWN/ACCEPTED must not auto resend. Operational duplicate/crash guarantees and financial reconciliation remain OPEN. A small runtime log sample contains inactive-module denials also observed before release; it is not complete error clearance or report-module failure evidence. No licensing settings were changed.

Existing #2883 limited monthly HOLD/control,11row supplier UI/CSV and sales/hourly/CSV PASS are protected and not repeated. No financial/stock/fiscal/payment/shift/payroll/recipient mutation or email was performed by the coordinator. Supplier advance and AI product-follow-up code are included in this release, but their actual acceptance remains with retained supplier/VOICE owners. All Task14/Task29/inbox/Workforce/native/wholesale/KAT and AUTO-REPORTS assignments remain intact.

Next bounded implementation requires its own published claim coordinated with retained AUTO-REPORTS/mail/lifecycle owners: durable exact-slot uniqueness and transaction CAS, fresh consent/scope/lifecycle/authorization gates, persisted attempt before I/O, native concurrent/crash/revocation tests with injected synthetic transport. Keep real dispatch disabled until separate reconciliation/SMTP/scheduler and actual acceptance criteria pass. No new owner decision is required for this verified technical release. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-report-delivery-core.md; evidence CHECKPOINTS/EVIDENCE/report-delivery-core-20261019/release-verification.json. Central ownership retained until completion or named handoff.

19/10/2026 — CENTRAL-REPORT-DELIVERY-CORE-01 / ASSIGNED BEFORE SOURCE

Retained central coordinator codex/central-four-streams-20261018 assigns independent new pure lifecycle core codex/report-delivery-core-20261019 under #2704/#2527, baseline b48ff544cebe4e5befe3abc25e56638742719459. New files ONLY server/src/services/automatic-report-delivery-lifecycle.js and server/test/automatic-report-delivery-lifecycle.test.js. This is an additive metadata-only safety model, NOT an implemented durable outbox/worker or permission to send. Existing AUTO-REPORTS orchestration/settings/source/mail/worker/schema owners remain retained and untouched; no takeover or parallel edits. Root owns shared records/checkpoint/PDF.

Implement deterministic one-recipient logical slot (company/store/report type/frequency/exact UTC exclusive period/normalized recipient), immutable snapshot/version fences stored separately from uniqueness; changed source/settings cannot silently create a second send. Explicit injected time, expected version and unique lease token fence claims/attempts. Persist-before-I/O adapter contract; expired pre-dispatch claim may reclaim, expired started attempt becomes UNKNOWN. ACCEPTED means transport acceptance only, never inbox delivery; ACCEPTED/UNKNOWN are never automatically retried. Fail closed on missing/stale current consent, tenant/store/lifecycle/license/module/principal/settings/recipient/source/policy assertions; READY never certifies financial reconciliation and PROVISIONAL remains explicit. No transport, DB, schema, route, scheduler, env, clock, random or financial writer import; no runtime wiring.

Current evidence: prior limited LAB previews/CSV from #2883 retained; true durability/concurrent SQL/SMTP acceptance NOT TESTED. New core ASSIGNED/NOT IMPLEMENTED/NOT TESTED. Require this claim green merged before new source, then isolated edge-case tests, independent review, exact full PR/main CI and safe ordinary release discipline. No new manual PASS from unit tests. Actual duplicate/crash safety requires later transactional durable adapter and transport-specific tests; no exactly-once inbox guarantee. Original14 and automatic delivery remain OPEN, actual sending disabled, no recipient or business mutation/replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-report-delivery-core.md. Next single action after green claim merge: implement the two new unwired files and execute isolated adversarial tests.

19/10/2026 22:27 Europe/Athens - HISTORY FLAG ACTIVATED / EXACT LIVE RELEASE / NORMAL-APP ACCEPTANCE OPEN

Retained owner codex/assistant-business-queries-20261015 continues the same VOICE assignment at the user's explicit request to final PASS. Prior narrow transfer/activation approval21:03:26Athens, claimPR2867 and sourcePR2872 remain authoritative. Source final3645062a6816480b591916157b6a498fd3c96f97 merged3fe46f01e553e0280ac928a17754abc813629922. Exact PRCI39304048090 attempt2/build118238285962 and mainCI39305802059/build118244306478 SUCCESS3468PASS/0FAIL/0SKIP plus8backup; native activation/access and mandatory checks executed. No repeat of completed tests.

ACTUAL production: ordinary prior release dep-dbb6i8gn74is73bpscr0 provisioned the archive19:05:34.408543Z (availabletrue/createdtrue), manifest216e5de83f80ae9f869314501febe7021dce4689e822c60f576736d8a7891aff. Read-only information_schema confirms11 reviewed columns; pg_indexes confirms primary scopeKey and partial expiresAt/scopeKey index. Compatible backup deploy dep-dbb6hqm1egvs73b1i7u0/revision6490840eeb079539fec1ca78296ac55909a4759f LIVE; scheduled history cleanup COMPLETED19:10:22/19:15:32UTC. Fresh production runtime metadata observed19:26:28.302463Z reports COMPLETED/checkedAt19:25:29.518647Z/current manifest/compatible worker. No MAC/key read or independent cryptographic verification in Work; the real application must verify the signed readiness itself.

APPROVED single-key merging configuration update19:22:39UTC sets ASSISTANT_HISTORY_ENABLED=true on existing srv-d9isenfavr4c73bdh52g in confirmed My Workspace. replacefalse preserves all other variables; no credentials retrieved. Its automatically triggered configuration deploy dep-dbb6rvom7kps73catpfg became LIVE19:26:05.976249Z at a6902d149624d0f687dbe2e906f852eb501c7ee7. Independent public no-cache health after LIVE reports oktrue/version0.22.0+kat-test-pos/exacta6902d149. Startup19:24:43.008519Z reports availabletrue/createdfalse/same manifest. Compare3fe46f01..a6902d149 contains documentation/evidence/PDF only, no runtime differences; latest docs CI39309151681 correctly skips build, not a substitute for exact full source CI above. No separate deploy trigger, manual SQL, guard bypass or business/test transaction. Existing production start command and its normal startup work were unchanged.

This is verified configuration/release evidence, NOT normal authenticated history/LAB/manual/whole VOICE PASS. Current cloud browser inventory has only about:blank, no inherited authenticated tab. Retain prior credential-state auto-review restriction: no alternate-tab/privateHTTP/token/credential workaround. No new microphone request; user has no microphone. Post-release general module-disabled log entries are not attributed to the assistant or described as clean global logs.

GROUPED remaining acceptance: actual personal selected-store Owner and SuperAdmin history capture/reload/close-reopen, cross-scope withdrawal and server readiness; exact new short-follow-up CSV after changed direction/date/actor plus XLSX/PDF/DOCX bytes against canonical current source; cancellation/late results/mobile drawer and outstanding domain/source/ambiguity limits. Existing direct-question CSV USER PASS, two original LAB movement-line reconciliation, name filter and guidance/desktop controls remain protected without replay. No live reset of old conversations, financial/stock/fiscal/shift/payroll/grant/settings action for acceptance. Technical native expiry/reset/recovery proof is separate from real UI acceptance. Thirty days is archive visibility, not erasure of historical full backups.

Whole VOICE OPEN/ASSIGNED; no manual PASS added or numbered closure. Next single action: restore permitted normal authenticated application access, then execute only the remaining grouped read-only acceptance and publish actual measured outcomes. Evidence CHECKPOINTS/EVIDENCE/assistant-history-activation-20261019/receipt.json. This receipt synchronizes checkpoint/ACTIVE/KAT/README/tracker/pending and PDFs; all other owners retained.

19/10/2026 — COORD read-only acceptance batch / LIMITED LAB UI PASS

Retained central owner codex/central-four-streams-20261018, #2527/#2704–#2707. User restored normal SuperAdmin access; no authentication bypass. Existing LAB only, actual monthly HOLD/control isolation, ended-period sales/hourly UI and actual supplier/sales CSV observed. Monthly details below. Sales12Oct versus11Oct:5.00/0.00/delta5.00, zero-base percentage explicitly undefined;17vs16Oct0/0. Canonical3productgroups/5unique sales/0reversals;hourly18/19/22/23UTC+03 counts1/1/1/2, PIECE quantity5; actual3-rowCSV same store/products/unit/quantity/gross5.00. Supplier snapshot19Oct19:20:03.157Z,30/7/3,11filteredproducts/page1of11; actualCSV exports11unique rows/allpages/sameLAB/snapshot/reviewYES/autoSendNO. All11unassigned without approved-document evidence; visible water500ML row quantity82 matches CSV. PROXY is not physical-delivery truth or a primary supplier assignment.

LIMITED LAB UI/CSV parity only. Independent SQL/prior-zero-source truth, nonzero/negative comparison basis, DST/caps/overlap cause/positive supplier selection/otherroles/devices remain NOT TESTED. No whole requirement or original14 closure; payroll/staffing/margin, reconciliation, worker/outbox/SMTP/actual sending and broader AI remain OPEN. Latest independently checked AI exact-mainCI39305802059 SUCCESS3468/0/0+8; history activation receipt#2878 remains OPEN/HOLD, retained VOICE owner. No source change/install/manual deploy, business/stock/shift/settings/recipient/order/email mutation or accepted transaction replay.

Checkpoints: CHECKPOINTS/CHANGES/2026-10-19-central-monthly-hold-ui.md, 2026-10-19-central-sales-ui-acceptance.md and 2026-10-19-central-supplier-ui.md; hashed actual evidence and limited automatic-reports/reports/commerce manuals synchronized. Only the described monthly HOLD and UI/CSV acceptance subcases are retired; all wider residuals and unrelated owners preserved. Next bounded work: remaining actual source/role/cap acceptance and separately claimed safe mail lifecycle, with no fabricated READY day or live send. Documentation CI/review/merge required for administrative publication.

19/10/2026 — COORD monthly HOLD / LIMITED LAB UI PASS

Retained central owner codex/central-four-streams-20261018 (#2704–#2707/#2527). Actual authenticated canonical SuperAdmin read-only LAB MONTHLY preview: October bounds 01Oct07:00→01Nov07:00 exclusive/Athens, 13 source shifts/settings version1, explicit HOLD and PROVISIONAL; control N40 has zero configured terminals, save-first/preview disabled and no leaked MAIN/result. No group tables/operator aggregate observed. Only MONTHLY HOLD/interface-isolation subcase is accepted; READY totals, reconciliation, employee liability, cap/exact overlap, worker/outbox/SMTP/delivery, other roles/devices remain OPEN/NOT TESTED. No Save/send/business action or transaction replay; earlier daily/weekly PASS not repeated. Later health revision3fe46f01e553e0280ac928a17754abc813629922 is separate availability evidence, not per-action telemetry. Receipt CHECKPOINTS/CHANGES/2026-10-19-central-monthly-hold-ui.md and machine evidence; limited automatic-reports manual synchronized. Administrative publication/CI/merge pending; owner and unrelated scopes retained.

19/10/2026 22:09 Europe/Athens — PLATFORM-OWNER-GROUPS-01 / LIMITED LIVE PASS / CLOSED

Independent owner feat/platform-owner-groups-20261019 completes the approved owner-button UI scope only. Supersedes this scope's earlier NOT TESTED/AWAITING CI/release and actual clipping FAIL; no wider Platform/company lifecycle, TODAY-04 or PLATFORM-COMPANY-LAYOUT-02 closure or other-owner release.

Claim PR2862 merged72c73cbc55d44b7a7ac40a527bc7d5e4a012e999 before source. Initial source PR2863/final16e843c82acc7027cbc5e0ef9718b5119f0dca21/full PR39298007775/3460PASS0FAIL0SKIP+6 mergedf3305f096eb7830f89483dda64f69271c9fb4535. Its source-main39299200148/job118221022847 passed3463/0/0+8; initial normal release and exact healthy f3305f0 showed correct grouping/search/management but actual smaller desktop geometry FAILED: group172px/content783px, list310/310, hidden cards. That failure remains recorded, not rewritten as PASS.

Causal follow-up PR2873 final e60c33fd2f5a5f8eb1b6a31897d4fd4507f06c5d/full PR39303554469/job118235073923 passed3463/0/0+8. Intrinsic max-content grid rows leave normal scrolling with the bounded list; singular owner counts corrected. Merged d3b993fa298247b951a071f16e8093a68fea8953 after green exact PR-head checks, resolving only shared active-record insertion while retaining concurrent native assignments and identical reviewed runtime/test blobs; GitHub PR2873 is merged. Its main39305035135 attempt1 passed3463/0/0, then Chromium Target.createTarget startup timed out before browser assertions/E2E; retry attempt2 was queued then cancelled by newer main, not counted as PASS. No browser check was disabled and no deploy guard bypassed. Abandoned synchronization PR2875 closed without merge.

Actual common release3fe46f01e553e0280ac928a17754abc813629922 retains all three follow-up source/test files byte-for-byte. Full native common-main CI39305802059/job118244306478 SUCCESS:3468PASS/0FAIL/0SKIP plus8backup, browser/HTTP/build/invariants/Windows green. Ordinary guarded deployment39307390799/job118247981848 pinned that revision; Render dep-dbb6i8gn74is73bpscr0 LIVE19:06:51.261248Z. Independent browser /api/health ok:true/version0.22.0+kat-test-pos/exact3fe46f01.

ACTUAL read-only LIVE acceptance22:07–22:09 Athens, Cloud Chrome browser1/tab3, existing Platform SUPER_ADMIN / canonical https://myworkstation-app.onrender.com/platform-admin. Fresh reload: two collapsed owner buttons; Niki3companies/3stores and LAB1company/3stores, total4companies/6stores before/after. Open Niki: DAILY BITE, Diadoxou and KAT only; LAB shows its own three named test stores and clears previous KAT detail. Accentless διαδοχου returns one matching company/store under Niki; clear and normal Ανανέωση restore all groups. Collapse/reopen and correct KAT management/AFM997261585 observed.

Measured inner viewport1363x936 (earlier failure note used nominal1366x926): list clientHeight310/scrollHeight921; expanded Niki group clientHeight783/scrollHeight783, no clipped nested content. Normal downward wheel reaches scrollTop611 with last KAT management button y700.89–750.89 wholly inside list y606–916; click opens correct KAT detail. Normal upward wheel inside the list returns scrollTop0. Final screen has both owner buttons collapsed. Evidence CHECKPOINTS/EVIDENCE/platform-owner-groups-20261019/{acceptance.json,before-clipping.jpg,after-ready.jpg}.

No production company/owner/store creation, ownership reassignment, delete, permission/license, payment/stock/fiscal/shift submission or transaction replay. Financial/stock deltas not inferred. New-owner/company/store refreshed-prop appearance, same-name account separation and missing-owner category are mounted CI evidence; no real account was manufactured. Other actors, mobile, physical POS, maximum load and real new-account creation NOT TESTED. Manual contains only the observed central navigation flow. Pending removes only this completed independent scope; broader owners/PASS remain. Scoped owner released after this synchronized closure merges. Single next action for user: Ctrl+Shift+R in canonical Platform Admin, then click the intended owner's name.

19/10/2026 22:03 Athens - KAT DESKTOP LIVE PASS AND BACKUP UPLOAD/READBACK LIVE PASS

KAT PR2848/source19e6adcdf25fce65449b1f82f35c71808b61b3ac passed exactPR/main CI and ordinaryguard39297996180; Renderdep-dbb5ing473hc73cn7vt0 LIVE20:59:26Athens. Real Cloud Chrome21:00-21:01: all7categories after synthetic email reset PASS27/11/4/4/2/1/64; normal FREDDO5; /kat/ email-to-water4; basketempty. Physical saved-password autofill and new mobile acceptance remain NOT TESTED; prior owner mobile category PASS retained. Later independent health22:00 reports healthyf3305f096eb7830f89483dda64f69271c9fb4535; KAT HTML blobd42536b8d3329422811154de64fb31736856f396 is identical to accepted source, so no repeated transaction/test. Manualonline-delivery/PASS.md and acceptance.json/live-water.jpg record scope. No products/prices/stock/licenses/orders changed.

Backup PR2864/head4ac85dd45b23d8825bea359c19adf38ab88b37eb fullPRCI39297370367 SUCCESS3459/0/0 plus8backup; merge673f1ee1122f1ab09ec4041edeb1e51ae802f304. Its queued mainCI39298522324 was cancelled by newer shared main, never PASS. Combined mainf3305f096eb7830f89483dda64f69271c9fb4535/fullCI39299200148 SUCCESS3463/0/0 plus8backup. Current cron imaged3b993fa298247b951a071f16e8093a68fea8953 contains exact reviewed scriptblobfc1294d279e7707eefcb14a2769e614570504648; observed Renderdep-dbb6cfhjfumc73dcpcrg LIVE21:49:56Athens/triggerapi by independent work, not a deployment this page triggered. Other image changes/full exact image CI remain their owners; this PASS is bounded to the reviewed backup script and real archive below.

One explicit existing /backup/run-backup.sh in authenticated Render Web Shell: run20261019T185759Z-10226 started21:57:59 and SUCCEEDED22:00:12Athens,251288470bytes,SHA256 457fd2e71f9254fb02cb00c6dcd30b5c71aa736c3c3c910155c937f2e1ee53e9,TOCPASSED,errornull,revision d3b993fa. Independently downloaded SAME off-site object: actual SHA256 and byte size match, pg_restore--list readable with table entries, HeadObjectAES256, final REMOTE_ARCHIVE_READBACK_PASS22:03. Temporary readback copy removed, remote object retained. Before-action and after-action records/screenshots in CHECKPOINTS/EVIDENCE/kat-online-autofill-20261019/. Shell/monitor agree. Initial readback typing timeout occurred BEFORE Enter; partial line cleared and complete readback submitted once, no second dump or uncertain backup replay. Source-backed retry fault tests remain LOCAL/SYNTHETIC, not live S3 failure injection.

UPLOAD_FAILED repair and one real new-code full backup/upload/readback are CLOSED within this scope. No full database restore, new-code scheduled recurrence, forced production outage, store reset, financial/stock/fiscal/shift test or configuration/schedule/credential change. Existing wider Task18/disaster-recovery and lifecycle owners retained. Mobile/physical autofill residual remains assigned to KAT owner. Manuals/checkpoints/active/tracker/pending/PDF synchronized; no broader Gate closed. Secure Google sign-in held the tool for approximately47minutes; fresh Render UI positively verified before execution, credential values never read. No manual cron trigger or change of /backup/run-jobs.sh; that five-minute worker alone is not full backup proof.

19/10/2026 — WHOLESALE-LAB-01 / PUBLIC TEST LAB DELIVERED / LIMITED LIVE PASS

Retained owner codex/wholesale-suite-20261017; receipt branch docs/wholesale-isolated-lab-acceptance-20261019. Source PR2881 merged e3432c2b3f6c8a890bbe52b61a0270ee06bc9899 after full green PR CI39313589730; exact source-main full CI39314881160 all5 jobs SUCCESS (3481 server PASS/0FAIL/0SKIP plus8 backup; actual Docker/Chromium ten checks PASS). Claim PR2879 preceded source and state changes. CI evidence is separate from LIVE acceptance.

Public isolated HTTPS test lab: https://myworkstation-wholesale-lab.onrender.com/lab . New free service srv-dbb7fam7bikc73es2l40, deploy dep-dbb7fau7bikc73es2mhg LIVE20:06:36UTC, pinned e3432c2b / lab/wholesale-isolated-e3432c2b, auto-deploy off. Embedded disposable loopback PostgreSQL, generated fake identities/catalog only, TEST/nonfiscal documents, no production configuration/data/provider changes. Health exact revision/boot0c680151-20df-4d1f-8b52-0f19fe49cebf verified over HTTPS and Chrome. Restart clears all synthetic state. Provider default TCP health retained; custom Render HTTP health path was NOT configured.

LIVE Chrome Owner UI measured20:08–20:10UTC: real SUBMITTED order0→1, mixed quote35.00net/6.75VAT/41.75gross; virtual combined document0→1, virtual coffee100→98/juice80→77, receivable0→41.75; one simulated CASH payment10.00 gives receivable31.75, payment0→1/audit5→6. Explicit same-key replay leaves one payment, same ID, stock98/77, receivable31.75/audit6. Independent control store coffee777 baseline recorded. These financial/stock effects are SIMULATION ONLY; real production fulfillment/fiscal/accounting is not accepted. Live DOM before/after and exact API measurements are retained in CHECKPOINTS/EVIDENCE/wholesale-isolated-lab-20261019/; authoritative detailed checkpoint CHECKPOINTS/CHANGES/2026-10-19-wholesale-isolated-lab.md. Automated preview PNG is from exact-main CI, not a LIVE screenshot.

Independent LIVE HTTPS API acceptance20:17–20:20UTC PASS (software client, NOT browser UI): actual EMPLOYEE seller assigned store/customer only, other-store404; seller order f4c29f3b-f4e6-4d24-b327-4dc422190493 and same-key replay1→2→2 total orders. Actual customer Secure/HttpOnly/SameSiteStrict cookie and CSRF/publication/scope/Bearer denial verified; customer order64f9c86e-2a21-46c4-aef9-1933a0e2f1d4 and replay2→3→3. Missing CSRF403, cross-store403, mixed Bearer401, inactive seller403/no grants. Both request pairs leave the entire virtual ledger unchanged: one doc/payment, audit6, stock98/77/private25/zero50, receivable31.75; control state unchanged777, sameboot/source/outboundBlocked0. Existing authenticated TEST PDF downloaded over API, extracted and rendered: correct Greek rows/net35/VAT6.75/gross41.75/nonfiscal watermark. This does not assert hosted browser PDF or seller/customer UI acceptance. Evidence live-api-acceptance.json plus saved BEFORE bodies/keys and live-TEST-invoice-delivery.pdf.

Historical status superseded ONLY for role/catalog/existing-order display by the newer limited USER VISUAL PASS above. Hosted new quote/submission and browser PDF download remain NOT TESTED. Native browser credential restriction persists; no bypass or repeat of completed financial transactions. Same owner retained, no handoff/reassignment. Single next action when authorized browser runtime is available: resume only seller/customer UI and existing PDF read, with fresh role/store baselines; never repeat the completed Owner financial transaction. Whole production wholesale/site/field sales, real fiscal/stock fulfillment, durable offline and commercial standalone installer remain OPEN. Existing production Owner/nonmember PASS and all unrelated owners remain protected.

19/10/2026 21:18 Europe/Athens - WHOLESALE NONMEMBER TRANSITION / LIMITED LIVE UI PASS

Retained owner codex/wholesale-suite-20261017. The bounded nonmember seller transition is COMPLETE with actual read-only LIVE UI PASS; it supersedes PR2856 transition FAIL and this flow's earlier AWAITING CI/LAB only. Whole wholesale/site/field sellers/offline/commercial standalone package remains OPEN/ASSIGNED; no numbered item closed. Pre-source claim PR2858 green merged67e33c842; causal source PR2860 final review aa81233df4cbe8f5ed8a30f5c5fe50f8ff220c77 green merged a6fdbe0688631497ead8ce33fa761400f67db543. Only denial classification changed: valid paid personal nonmember is forbidden, never granted a principal; genuine invalid identity/company/license remains401. Shared session boundary/frontend and membership/assignment requirements unchanged.

Technical proof: actual mounted standalone/suite/boundary/SellerWorkspace baseline reproduced blank selected store (19PASS/3FAIL/0SKIP); corrected focused37/0/0, broader local131/0/7 native database NOT RUN locally, Node20 client build PASS. Full final PR CI39297164985/job118213239430 and exact source-main CI39298411196/job118217186138 each3462PASS/0FAIL/0SKIP plus6 backup tests and all browser/HTTP/build/invariant/Windows checks. Signed native HTTP verifies nonmember Owner403/no auto-enrollment/no audit/manager access retained, revoked session or disabled license401, inactive member order403. Source main release was correctly deferred by guard run39299498271/job118220740626 because newer common production source existed; no manual deploy or guard bypass.

Actual ordinary guarded release39300393127/job118223830539 pinned f3305f096eb7830f89483dda64f69271c9fb4535 at18:11:58.146UTC, exact healthy18:16:52.982UTC. This common revision includes PR2860; all four wholesale source/test blobs unchanged. Its full main CI39299200148/job118221022847 passed3463/0/0 plus8 backup tests and full checks. Independent public no-cache health before/after UI acceptance both oktrue/version0.22.0+kat-test-pos/exactf3305f096/curl exit0. Do not call a6fdbe068 itself deployed; f3305f096 is the measured runtime.

ACTUAL LIVE observation18:18:07.684-18:18:56.896UTC /21:18Athens, existing Cloud Chrome desktop/browser1/tab2, personal Υπεύθυνος Εργαστηρίου / MYWORKSTATION LAB / only ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru. Fresh manager screen shows existing B2B-TEST-001 customer. Existing membership list shows both users Χωρίς ενεργή ιδιότητα, including this Owner; no activation clicked. Twice opened Εργασία πωλητή: stable Απαιτείται ενεργή ιδιότητα πωλητή. Επικοινώνησε με τον διαχειριστή για ανάθεση. Exact outer store remains selected and navigation remains available. Twice returned through Χονδρική, site & αναθέσεις to existing customer management without reselecting store or relogin. Actual screenshot shows second refusal with exact selected store. Final browser left in customer management. This proves UI refusal/navigation stability, not an independently measured LIVE HTTP403 or exhaustive backend security. Native tests are separate technical evidence.

No LIVE module/license/membership/assignment/customer/account/site/order/price/stock/payment/fiscal/shift/schema/production SQL/migration/seed change performed. Existing user-managed module activation remains unchanged; no automatic deactivation/reactivation. Read-only test SKU/quantity/payment/operator shift/balances N/A; no financial/stock delta inferred and no other store opened as a control. Actual assigned EMPLOYEE/positive seller quote/order, portal/customer login/publication, durable offline/reload recovery/custom domain/commercial packaging remain NOT TESTED/OPEN. Existing qualified five-manager-screen and earlier limited PASS remain protected. Cosmetic layout/asset appearance is not a visual-polish acceptance.

Evidence CHECKPOINTS/EVIDENCE/wholesale-seller-denial-20261019/acceptance.json, technical.json and refusal-store-retained.jpg; no credentials or browser storage exported, membership emails omitted. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-wholesale-seller-membership-denial.md; common ACTIVE/KAT/README/tracker/pending, relevant manual and combined tracker PDF synchronized. Completed bounded pending claim/transition-failure action removed; broader product remains assigned. All native/history/Platform grouping/central/lifecycle/backup/supplier owners preserved. Next single action prepare separately scoped remaining limited-seller/portal/order LAB acceptance with required identity, assignments and before/after evidence; no automatic access grant or transaction. Coordinator retained until named handoff.

19/10/2026 20:41 Europe/Athens — PLATFORM-OWNER-GROUPS-01 / ASSIGNED / NOT TESTED

Owner feat/platform-owner-groups-20261019. User approved screenshot-based mockup and automatic owner grouping. Independent additive owner accordion scope only: derive groups from existing owner IDs and current overview company/store data; click owner reveals their companies and named stores, preserve selected-company management, search, linked-owner guards, toolbar/sidebar and existing exact IDs. Same-name owners stay separate; unassigned companies remain explicit. New owners/companies appear from refreshed current data without manual buttons. No backend/schema/auth/license changes or production business writes. PLATFORM-COMPANY-LAYOUT-02 remains with feat/platform-company-layout-20261017 for its prior visual acceptance; no takeover of that wider scope or other owners.

Baseline 8a6c78dfe10b2232ad0e1a37265a2dab3882576e; current AGENTS, active/tracker/pending/numbered/manual and layout checkpoint/history reviewed. Existing layout source LIVE, prior visual acceptance AWAITING USER; new grouping NOT TESTED, mockup is not acceptance. Claim must merge green before source. Required: mounted grouped navigation/search/refresh/same-name/missing-owner/exact-action regression, full PR/main CI, ordinary guarded release and exact health, then actual read-only owner expansion. No company creation, ownership reassignment, deletion, payments/stock/fiscal/shift actions to manufacture evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-platform-owner-groups.md. Single next action after claim merge: implement bounded grouping and test.

19/10/2026 - WHOLESALE SELLER TRANSITION / BOUNDED CORRECTION CLAIM

ASSIGNED retained owner codex/wholesale-suite-20261017; implementation branch fix/wholesale-seller-membership-denial-20261019; claimed 2026-10-19T17:30:54.966651+00:00. Baseline main a8ae40b2d; source edits begin only after this claim is green merged. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-wholesale-seller-membership-denial.md. PR2856 real personal Owner active five-manager-screen LIMITED UI PASS and nonmember seller transition LIVE FAIL remain authoritative. No new LAB PASS; local reproduction/correction/deploy acceptance NOT TESTED. Overall wholesale/site/field sellers/offline/commercial packaging OPEN.

Exact causal scope: distinguish a missing/inactive seller membership from an invalid personal session. Keep the existing membership-joined, paid-license, signed-identity, company and lock checks; only when it returns no row, independently revalidate the same personal session/paid entitlement and deny the nonmember with403 and a clear membership message. Invalid/expired/revoked/wrong-role/wrong-company/support sessions and disabled/expired license must still deny401. No global401 boundary relaxation, manager bypass, automatic membership/assignment/license grant, central store fallback, schema or production data change. A concurrent membership addition may conservatively require retry; no new access is authorized by the fallback.

Required regressions: exact nonmember403 plus genuine session/license401 in unit/native signed HTTP; actual mounted standalone app + shared boundary + actual seller workspace keeps exact selected store, stable refusal and return to management on403; genuine401 still clears private context. Preserve active assigned seller scope, immutable principal brand, tenant/assignment locks and expiry checks, A-B/A-B-A stale-result rejection, frozen uncertain order/retry identity/body, portal isolation, existing five manager tabs and inactive paid-module refusal. Full native CI and ordinary guarded release exact revision required. Then one read-only LIVE acceptance in existing personal LAB Owner, exact ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ: seller refusal, selected store retained, return to customer management, repeat bounded navigation. No grant or business transaction; SKU/quantity/payment/shift/balances N/A. Only after observed result synchronize manual/common records/PDF; CI alone remains AWAITING LAB.

Read current main history/new native-camera work; preserve native/history/central/lifecycle/backup/supplier owners and prior qualified PASS. User-managed existing module activation is unchanged; no automatic deactivate/reactivate or credential loop. Single next action after claim merge: add failing causal regression, implement this one denial classification, run required checks and publish source PR. Owner retained until named handoff.

19/10/2026 20:08 Europe/Athens - PERSONAL WHOLESALE OWNER / LIMITED ACTIVE UI PASS; SELLER TRANSITION FAIL

Retained owner codex/wholesale-suite-20261017. After the user activated the LAB module separately in their own browser, actual Cloud Chrome /wholesale now positively shows MYWORKSTATION LAB, personal Υπεύθυνος Εργαστηρίου and three LAB-company store options. Selected ONLY ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ.17:05:29.863-17:07:55.612UTC observations/evidence: five manager screens opened read-only: Πελάτες (existing B2B-TEST-001), Τιμοκατάλογοι (empty list), Παραγγελίες (exact selected store/one existing customer/no items/no orders), Site πελατών (inactive portal; account/publication selectors only selected store; company-wide settings explicitly labeled), Αναθέσεις πωλητών (two existing users, both no active membership). LIMITED PERSONAL OWNER ACTIVE READ-ONLY UI PASS only. This supersedes earlier active-login BLOCKED for these observed manager screens, not all acceptance.

LIVE UI FAIL: pressing Εργασία πωλητή twice with this nonmember manager caused transient access checking then blank store selection and no stable seller refusal screen. Reselection restored management; screenshot confirms final customer screen/selected store. Seller transition/stability and positive assigned-seller workflow remain OPEN. Source inspection suggests inactive-member401 → shared boundary invalidation → selection cleared before refresh; this is a candidate cause, not a measured HTTP trace, local reproduction or fix. No authentication or permission bypass proposed. Existing pending-order/identity/license/tenant fences must remain protected.

Agent performed NO module/license/membership/assignment/customer/site/order/price/stock/payment/fiscal/shift/account/schema/SQL mutation. User-managed external activation time/terms/price/other control baseline NOT independently observed; do not infer license/financial deltas or claim restoration of that external action. SKU/quantity/payment/operator-shift/balances N/A for read-only screens. No portal/customer creation, publication, seller grant, quote/order submission or completed transaction. Previous PR2820 inactive-personal PASS and PR2837/2847 restoration receipts remain historical qualified evidence. Active module presence is verified through actual personal workspace, not a subscription payment assertion.

Baseline main1baa60e25 and concurrent native/history/central/lifecycle/backup/supplier owners preserved. Later separate public no-cache health oktrue/version0.22.0+kat-test-pos/revisionc0788ee93e930f715ee22adcd0447803da488327/curl exit0, not asserted as revision at every earlier UI action. Evidence CHECKPOINTS/EVIDENCE/wholesale-owner-live-20261019/acceptance.json and actual owner-management.jpg. Common checkpoint/ACTIVE/KAT/tracker/pending/README/manual/PDF synchronized. Whole wholesale/site/field sellers/offline/commercial standalone packaging OPEN/ASSIGNED; no numbered item closed. Single next action reproduce the nonmember seller401 through actual standalone/boundary and publish bounded correction claim before source edits. Current owner retained until named handoff; no repeat grant or transaction solely for documentation.

19/10/2026 16:20 Europe/Athens - COORD PHASE6 / ENDED ATHENS SALES COMPARISON SOURCE LIVE / AWAITING LAB

Κεντρικός owner codex/central-four-streams-20261018, issues #2704-#2707. Έκτη περιορισμένη τεχνική παράδοση, με τέσσερις εσωτερικούς συνεργάτες και συγκεντρωτική αναφορά εδώ. Τα αρχικά 14 παραμένουν συνολικά OPEN. Η παρούσα καταγραφή αντικαθιστά μόνο τα ιστορικά phase6 SOURCE PREPARED / CI PENDING / RELEASE PENDING παρακάτω· δεν δημιουργεί LAB PASS.

WS3 παρέδωσε προαιρετική σύγκριση τζίρου στην κανονική αναφορά πωλήσεων. Ο χρήστης επιλέγει ρητά δύο ολοκληρωμένες ημερολογιακές περιόδους Ελλάδας με ίδιο πλήθος ημερών, έως 366 ημέρες καθεμία. Η προηγούμενη πρέπει να προηγείται χωρίς επικάλυψη. Ένα επιλεγμένο ενεργό κατάστημα της ίδιας εταιρείας, μία server ώρα και κοινό RepeatableRead snapshot καλύπτουν τις δύο πραγματικές canonical

αναγνώσεις. Δεν υπολογίζονται προηγούμενες ημερομηνίες από ωμή διάρκεια UTC. Εμφανίζονται τα ακριβή ημερολογιακά/UTC όρια και οι πραγματικές ώρες, περιλαμβανομένων ημερών 23/25 ωρών λόγω DST. Ίσο πλήθος ημερών δεν πιστοποιεί ίδια εβδομαδιαία ή εποχική συμπεριφορά, συνθήκες λειτουργίας, κλεισμένες βάρδιες ή τελική οικονομική συμφωνία.

WS4 παρέδωσε μη προεπιλεγμένο χειριστήριο και δύο ρητές προηγούμενες ημερομηνίες στον πραγματικό sales installer. Η εμφάνιση δεσμεύεται στα εφαρμοσμένα φίλτρα/κατάστημα/πηγή. Αν οποιαδήποτε πηγή είναι μερική ή μη επιβεβαιωμένη, δεν εμφανίζονται συγκρινόμενα ποσά, διαφορά ή ποσοστό. Ο τζίρος διατηρεί τις επιστροφές με πρόσημο. Μηδενική ή αρνητική προηγούμενη βάση δίνει ρητή αιτία και null ποσοστό. Η προεπιλεγμένη αναφορά, τα ποσά/γραμμές προϊόντων, το όριο 10000, η πληρότητα, τα μοναδικά καλάθια, η ωριαία ανάλυση, CSV και drilldown παραμένουν συμβατά.

WS1 πρόσθεσε πραγματική isolated PostgreSQL δοκιμή με canonical SQL, Prisma transaction και mounted HTTP route: έλεγχος repeatable-read και στις δύο αναγνώσεις, ίδιο transaction, όρια ημερών/DST, signed επιστροφές, query/tenant/ενεργό κατάστημα/ρόλοι, μηδενική/αρνητική βάση, πλήρες όριο 10000 έναντι μερικής πηγής 10001 και αμετάβλητα πριν/μετά digests όλων των fixture πινάκων. WS2 ανεξάρτητη αξιολόγηση χωρίς supplier patch. Εντόπισε απόρριψη σωστών αθροισμάτων λόγω JavaScript floating addition noise, η οποία διορθώθηκε πριν το source PR. Η σύγκριση χρησιμοποιεί checked λεπτά ανά πλήρη γραμμή, BigInt άθροισμα, ακριβή συμφωνία με το αρχικό canonical JavaScript reduce και συντηρητικό όριο ακρίβειας 2**40 EUR ανά γραμμή/συνολικό ποσό. Πραγματικό sub-cent, αλλοιωμένο cent, μη πεπερασμένα ή μη ασφαλή ποσά απορρίπτονται. Δεν άλλαξε ο υπολογισμός της αρχικής αναφοράς.

Claim #2841 / head84995ce8eb56bc4b991c213836516982ae7ca2bb / docs CI39252357946 SUCCESS, merged74aea6b871f40299731498e17c4093dcb61adfd9 πριν κώδικα. Source PR #2844 / head90d77df4187e77dde746526744a75746f1b0291c / full CI39255237253 / job118069115716: SUCCESS 3430 PASS / 0 FAIL / 0 SKIP, συν 6 backup. Source merge bb1ce702553505ac43267c50915020cf43f6948f, exact main CI39256286873 / job118072597287: SUCCESS 3430 PASS / 0 FAIL / 0 SKIP, συν 6 backup. Η νέα native δοκιμή εκτελέστηκε πραγματικά και στα δύο πλήρη CI. Windows, Chromium, builds, invariants, archive και real HTTP E2E επιτυχώς.

Ενεργή κοινή revision 880c6f428beeb657058b4f94c9600320f41c9641. Ordinary guard 39258239893 / job118078948913 SUCCESS· Render dep-dbb1f67f3r2c73fu1kjg LIVE. Ανεξάρτητο public no-cache health 2026-10-19T13:19:32.050995+00:00: HTTP200 / oktrue / ακριβής ίδια revision. Τα έξι reviewed source/test blobs διατηρούνται ακριβώς. Τυχόν νεότερη συμβατή πηγή, freshness deferrals και rollback artifact καταγράφονται στο machine evidence. Δεν έγινε manual deploy ή παράκαμψη guard.

Τοπικά Node20.20.2: 77 PASS / 0 FAIL / 1 native περιβάλλοντος SKIP, frontend/TABLE_SERVICE build PASS. Η τοπική native παράλειψη δεν παρουσιάζεται ως SQL PASS· η πραγματική δοκιμή εκτελέστηκε στο απαιτούμενο CI χωρίς παράλειψη. Ο πρώτος in-flight έλεγχος νέων UI fixtures είχε 7 FAIL λόγω ελλιπούς canonical metadata και μη δεσμευμένου ψεύτικου tab· χρησιμοποιούνται πλέον ακριβές producer metadata και πραγματική σύνθεση Suite+Sales. Το πρώτο full PR CI39253919260 είχε3423PASS/1FAIL/0SKIP: μόνο καθυστερημένο CSV URL cleanup του νέου fixture μετά την αποκατάσταση globals. Η native σύγκριση εκτελέστηκε ήδη PASS σε εκείνο το run. Διορθώθηκε μόνο ο κύκλος ζωής της δοκιμής, χωρίς runtime αλλαγή/skip/αποδυνάμωση assertion· το αποτυχημένο head δεν συγχωνεύθηκε ή διατέθηκε. Κανένας αποτυχημένος έλεγχος δεν μετρά ως PASS. Τελικός ανεξάρτητος έλεγχος CLEAR.

Νέα συμπεριφορά AWAITING LAB. Ο ασφαλής authenticated browser παραμένει μπλοκαρισμένος από native credential state· χωρίς bypass, ανάγνωση credentials ή κατασκευασμένα screenshots/CSV. Δεν προστίθεται CI-only manual. Επόμενη μία ενέργεια: συγκεντρωτική read-only αποδοχή από https://myworkstation-app.onrender.com/platform-admin στο ίδιο υπάρχον LAB, με δύο ήδη ολοκληρωμένες περιόδους, διασταύρωση των δύο κανονικών αναφορών και της νέας σύγκρισης· συν τα υπόλοιπα MONTHLY/supplier/πραγματικού CSV/hourly/product/coverage όπου δεν υπάρχει νεότερη ακριβής πραγματική αποδοχή. Αν δεν υπάρχει κατάλληλη πηγή, NOT TESTED χωρίς νέα συναλλαγή.

Gate7 και όλα τα προηγούμενα περιορισμένα PASS παραμένουν προστατευμένα. Η συγκεκριμένη αλλαγή σύγκρισης δεν τροποποιεί το παλιό advanced endpoint, Workforce, μισθοδοσία, parser/VOICE/history/native, supplier/invoice ή lifecycle. Διατηρούνται οι νεότερες αναθέσεις και τα ακριβή νεότερα αποτελέσματα native multi-photo με τον δικό του owner. Καμία παραγωγική οικονομική/stock/fiscal/shift/payroll/settings/recipient/SMTP/order/schema πράξη, αλλαγή ρυθμίσεων

υποδομής ή replay αποδεκτής συναλλαγής. Το #13 παραμένει OPEN για πραγματική αποδοχή και ευρύτερη πολιτική συγκρισιμότητας, όχι συνολικό κλείσιμο από CI. Χάρτης: CHECKPOINTS/CHANGES/2026-10-18-original14-status.md. Evidence: CHECKPOINTS/EVIDENCE/central-four-streams-20261019/phase6-source-release.json. Κοινά μητρώα/checkpoint/PDF συγχρονίζονται στην ίδια καταγραφή· ο κεντρικός owner παραμένει μέχρι ολοκλήρωση ή ονομαστικό handoff.

20/10/2026 — video emulator startup FAIL measured / supported-frame-rate candidate

Initial Android39471853100 compile/unit/lint SUCCESS but actual emulator capture failed at start. Diagnostic39472960071 on e8a1bfcb confirms recorder-prepare completes and recorder-start throws IllegalStateException; this is NOT video PASS. Replaced hardcoded24fps with the highest camera-declared supported rate up to30; no storage fallback or removal of the actual capture assertion. If failure persists, isolated synthetic-emulator test prints only bounded recorder/platform tag diagnostics, no user media/auth. Also tightened new MP4 box decoding to exact latin1 bytes, rejecting high-bit ASCII aliases; targeted15 tests PASS. Require fresh full/Android CI and resolve every failure before merge/distribution. Existing public0.1.8 and accepted voice/photos/push unchanged. Owner retained; iOS LAST.

20/10/2026 — video0.1.9 source candidate / AWAITING CI, RELEASE AND DEVICE

Before-source claim PR2960 green merged c1d30d85b1227589b96028d44ae3d3501046d94e. Retained owner feat/android-chat-native-20261017, source branch feat/native-chat-video-20261020. Native0.1.9/code10 adds explicit foreground camera/gallery MP4, preview/use/cancel then ordinary Send. Camera MediaRecorder output uses a seekable StorageManager proxy descriptor backed by bounded12MiB heap, no local pathname/MediaStore/cache/shared output;30s ceiling (recorder stops at29s for mux overhead), H264/AAC. Gallery original is read transiently without persistable permission or copy; original remains under user's/provider's control. One-use30s RAM handoff bound by Main token/store/availability; background/cancel/navigation wipes, no Intent/Bundle media or private saved state. RAM MediaDataSource explicit playback; no autoplay/background recording/share/download pathway. First physical hardware capture/storage acceptance NOT TESTED.

Separate GENERAL-only /video-messages endpoint preserves voice and image/PDF routes. Existing company/store/session/module checks precede insertion; photosEnabled controls video availability/acceptance. Strict bounded canonical base64 and MP4 box/brand/track/H264/AAC/duration/self-contained dref/sample table/chunk-range validation,12MiB maximum. Only this endpoint receives17MiB JSON overhead allowance before the unchanged12MiB global parser. Atomic existing attachment+metadata audit; generic push only after commit, no caption/video in push/audit. No schema/migration/AI/business/auth/license/infra changes. Independent video-only web receiver bounds the authorized streamed response, aborts/rejects late results on store/session changes and revokes blobs on hidden/pagehide/unmount; explicit player preserves ordinary refresh playback. Existing image/PDF/voice preview branch remains unchanged. Existing PWA/N16/AI owners and accepted photos/voice/auth/push remain protected. No agent production message/push/read/business test.

Local Node20.20.2 targeted parser/registered-handler/actual mounted video+voice player15PASS/0FAIL. Actual ffmpeg synthetic1s H264/AAC fixture; malformed codec/headers/external dref/duration/chunk offsets/base64/tenant/settings/audit-rollback rejection tested. JSX parse PASS. Local javac unavailable (JRE only), Android compile/unit/lint/emulator NOT YET VERIFIED. Added pure envelope/handoff tests, real Android proxy read/write/platform metadata/lifecycle/permission-denial and actual emulator camera capture/no-local-mp4 test, plus Main explicit send/stale server-session/unknown outcome/next draft protection. Full source CI and Android tests REQUIRED before merge; then exact main CI/guarded server release, same owner-signed candidate verification and native public download update before requesting physical acceptance. Public download remains verified0.1.8 until that later release. Not a new video USER PASS or overall Android PASS. Owner's20:49/20:51 voice USER PASS retained; do not repeat accepted tests for documentation. Single next action: run exact source full/Android CI and resolve failures. iOS LAST.

20/10/2026 20:52 Europe/Athens — voice USER PASS / VIDEO ASSIGNED BEFORE SOURCE

Retained native owner feat/android-chat-native-20261017; new branch feat/native-chat-video-20261020. Owner20:49:16 confirms Android sends voice and20:51:32 confirms the requested PC playback is OK. Scoped USER PASS for reported Android-to-PC voice send/playback only; device/hash/message IDs/store/revision not independently measured. No repeated accepted voice/photos/push test. Manual updated. Overall Android, same-signer physical upgrade and forensic storage remain NOT TESTED.

Owner20:52:28 explicitly requests video. Independent NEW video-only scope: native explicit camera/gallery selection, bounded MP4 preview/use/send/cancel and playback; RAM-only recording/preview and one-use session/store-bound handoff, no app-created local video file/MediaStore/download/share/cache or automatic send. A pre-existing selected gallery original remains outside the app's control. Proposed limits30seconds/12MiB, H264/AAC MP4, server bounded structural validation and fail-closed unsupported formats. New GENERAL-only video endpoint under existing company/store/session/module fences, same attachment columns, generic post-commit push and explicit web video-only receiver. Existing image/PDF parser, voice and accepted photo/auth/push/store scopes preserved; no schema/migration/AI/invoice/business/auth/licensing/infra changes. Existing PWA/N16 owners retained; this claim does not take packaging/responsive/photo acceptance. Build/version/public download assets are native owner's existing distribution scope. Require green claim merge BEFORE source, focused container/HTTP/lifecycle tests, full CI/Android unit/lint/emulator, stable owner-signed candidate and exact guarded release/public byte verification before physical acceptance. Hardware video behavior remains NOT IMPLEMENTED/NOT TESTED. Single next action: implement bounded video after claim green merge. iOS LAST.

20/10/2026 20:13 Europe/Athens — Android0.1.8 PUBLIC LIVE / FINAL PHYSICAL BATCH OPEN

Retained owner feat/android-chat-native-20261017. Technical preparation and public distribution VERIFIED: source PR2954 final head a806708fe7ec4bb044b1d6eaa3ce9e0052335dd2 green merged25efb7871b485f5c680ecd8cc3d7323b45719a37; exact merged-main CI39462597695/job118765979610 SUCCESS3669PASS/0FAIL plus8backupPASS, guarded deploy39463450610 SUCCESS. Render dep-dbbq0h8n3acc73c7jo20 LIVE2026-10-20T17:12:48.612098Z; public health revision matches25efb787. Public install page https://myworkstation-app.onrender.com/downloads/chat-android/ shows0.1.8-preview/code9. Public APK independently downloaded and byte-for-byte identical to verified owner-signed artifact12281364272/run39458772660:3670848bytes, SHA256a1c9faf3f84a821d4252e6c79306d29edf69a56cd7027593a78a63e28b5d05ca, cert17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97. Saved QR independently decoded to that same public install page; no access grant. Evidence CHECKPOINTS/EVIDENCE/native-stable-signing-20261020/release-verification.json and install-qr.png.

Completed: owner backup/configuration, stable signed candidate, source/main CI, guarded live distribution, public APK/manifest/hash verification and QR. Remaining: one consolidated final physical batch for new quick replies/voice and stable-key installation/update acceptance, with exact device/build receipt; physical same-signer upgrade NOT TESTED, no overall Android PASS. Previously accepted messages/photos/push remain accepted without documentation-only repeats. First transition from an old trial signer may require uninstalling ONLY MW Chat Preview, then login/push activation; retain the same owner key for future higher-code updates. No other app removal. No private key/password handling, business writes or foreign-owner takeover. Single next action: hand the verified link/QR to the user and run the agreed consolidated physical batch; iOS LAST.

20/10/2026 — stable owner-signed0.1.8 candidate VERIFIED / distribution AWAITING CI

Before-source distribution claim PR2953 head4237dfcb0ac4eb5f0e9805630c9ba0d649291230 green merged6397cc6714d60e01747b63b753e035c30d6d817d BEFORE asset edits. Retained native owner. Exact full main CI39457463898 SUCCESS3669PASS/0FAIL plus8backupPASS. Stable signed run39458772660/job118752440766 SUCCESS; artifact12281364272 contains only APK and public receipt. Independent downloaded APK verification: SHA256a1c9faf3f84a821d4252e6c79306d29edf69a56cd7027593a78a63e28b5d05ca,3670848bytes, package gr.myworkstation.chat.preview, version0.1.8-preview/code9; APKv2 RSA signature and chunked content digest VERIFIED; sole certificate matches owner public pin17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97. No keystore entry in APK; no private key/password handled by agent. Evidence CHECKPOINTS/EVIDENCE/native-stable-signing-20261020/artifact-verification.json. Emulator success is technical CI, not physical USER PASS.

Bounded candidate updates only existing install-page release manifest/accurate stable-signing wording/new0.1.8APK; previous0.1.3APK retained. Existing QR/install-page URL unchanged, no credentials/access grant. Full source CI and ordinary guarded exact release/live-byte verification still REQUIRED before final physical batch. No Android runtime/backend/auth/schema/business/FCM changes. Accepted user photos/messages/push and foreign-owner scopes preserved. Single next action: source CI, merge/release and independently verify live manifest+APK hash, then one consolidated physical batch; iOS LAST. Same-signer physical upgrade remains NOT TESTED, first old-signer bridge may require removing only MW Chat Preview.

20/10/2026 — stable-signed preview distribution preparation ASSIGNED BEFORE SOURCE

Retained native owner feat/android-chat-native-20261017. After owner signing setup USER PASS and exact full CI, bounded next source scope is client/public/downloads/chat-android/release.json, existing index.html only for accurate stable-key/update/final-candidate wording, and new MyWorkStation-Chat-Android-0.1.8-Preview.apk from verified stable run39458772660 only. Keep prior APK for traceability. Before source require this claim green merged main and the signed run SUCCESS plus independent APK package/version/hash/certificate verification against public pin17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97. If run fails, stop and diagnose rather than publish. Existing install-page URL/QR remains stable; no credential/store entitlement in QR. This is final technical candidate distribution, not overall device PASS or Play production release. No Android/backend/auth/schema/FCM/business mutation or foreign PWA packaging ownership; only native owner's existing download assets. Require full source CI, ordinary guarded release and exact live download bytes/manifest verification before the consolidated final physical batch. iOS LAST.

20/10/2026 19:19 Europe/Athens — owner signing setup USER PASS / signed APK OPEN

Retained native owner feat/android-chat-native-20261017. HOME Windows PowerShell owner execution: screenshot19:05 confirms Prepare completed; owner19:08:54 confirms encrypted independent backup. Initial execution-policy and missing-Java errors were resolved before key generation. GitHub CLI2.102.0 installed; local identity xrhstosmanis-design confirmed. First Publish rejected wrong repository confirmation with zero upload; explicit same-directory retry screenshot19:19 confirms Signing configuration uploaded. Agent read-only GitHub verification found all four MW_CHAT signing secret names and public MW_CHAT_CERT_SHA256=17c4d56123c6015a58343faba73d26a8b7d085a1baff7e680500767ae084ea97. No private key/password/token read, generated by agent or committed. Owner keeps the same private backup; never run Prepare for retries/updates. Historical owner-execution OPEN is superseded only for this measured setup, not device acceptance.

Current build source main d12f69e4ee0b26b5c70ead560593726653893d3d; compare reviewed helper79819e1 through24commits shows no owned Android/helper/workflow changes. Existing pushCI39456163984 build-and-test SKIPPED, so manual full CI39457463898/job118748344192 SUCCESS3669PASS/0FAIL plus8backupPASS and all other jobs SUCCESS. Stable signed preview39458772660/job118752440766 is IN PROGRESS on the same exact SHA; no signed artifact success claimed. Signed APK, same-signer physical upgrade, public download/QR and consolidated final device batch remain OPEN; iOS LAST. No repeat of accepted photo/message/push tests, business mutations or foreign-owner scope. See docs/manual/native-chat/PASS.md and docs/testing/native-chat-final-batch.md. Single next action: verify exact full-main CI, then stable signed preview and APK signer/hash/package receipt.

20/10/2026 — Owner-PC signing helper GREEN MERGED / OWNER EXECUTION OPEN

Retained native owner feat/android-chat-native-20261017. Source PR2944 final79819e13f6668296ea30f12680e2802eb79a7891 green merged6bc038281b1b50f9158644302069db9f2bec9b4f. Exact full PR39429851195/job118652388540 SUCCESS3652PASS/0FAIL plus8backupPASS; all Windows/classifier/isolated-lab jobs green. Dedicated helper39429851209/job118651742255 SUCCESS in BOTH Windows PowerShell5.1 and PowerShell7: real disposable PKCS12/certificate/JKS compatibility/ACL, raw exact stdin, confirmation/existing-key/pin/tamper no-write guards, unknown stop and same-key resume. Previous failed empty-list/preamble attempts are superseded only for these technical tests. Source helper SHA256e07b30bc3c48637a5006229930a18fa09877c3cad644a53ad1a95abaeb708771; all three owned helper/workflow blobs unchanged after merge. Exact merged-main39431395318 was pending when this receipt was prepared; not called main PASS.

Actual GitHub browser sign-in CONFIRMED by owner dashboard and Actions secrets access; only existing Render hook was present, no MW_CHAT signing secrets. Agent did not create an owner key or set any secret/variable. Real setup, encrypted owner backup, stable-signed APK, same-signer phone update/public QR and final physical batch remain OPEN/NOT TESTED. Helper source is public, test keys were disposable and removed with no private artifacts. Single next action: owner runs Prepare on HOME Windows PC, retains encrypted backup and explicitly runs Publish with the same printed directory; requires Java17/keytool and GitHub CLI authenticated locally for the same repository. Browser session and local CLI are distinct; helper never requests a token/password through chat. After verified owner publication, native owner verifies exact full main CI then runs stable signed preview and consolidates final distribution/device acceptance. No repeated accepted photos/messages, other PWA/N16/AI owners retained, iOS LAST.

20/10/2026 — signing stdin preamble cause measured / corrected before process Start

Third disposable Windows run39429428951: MW_CHAT_KEYSTORE_B64 expected4752 vs observed4755 characters. Raw writes alone were insufficient because .NET Framework initializes and flushes the child stdin writer preamble during Start. Set StandardInputEncoding=UTF8-no-BOM where supported; Framework fallback temporarily sets Console.InputEncoding only around Start and restores it in finally. Test fake CLI now hashes raw stdin bytes rather than decoded Console.In, preserving strict wire-equality assertions across runtimes. No real owner key/secret/production action. Fresh exact helper and full CI required; no owner setup or physical PASS.

20/10/2026 — signing helper exact-stdin test failure / raw UTF8 correction pending CI

Second helper run39428993940/job118648766276 passed disposable Prepare and simulated publication, then failed exact stdin payload equality. No real GitHub or owner key affected. Changed child stdin writing to explicit UTF8 bytes on BaseStream with no StreamWriter preamble/newline conversion; buffers cleared and pipe closed after write. Added nonsecret field/length detail on test failure, keeping exact payload hash/length assertions and every safety guard. Remains AWAITING fresh Windows5.1/7 and full CI, not owner setup PASS.

20/10/2026 — signing helper first Windows failure corrected / AWAITING FRESH CI

Source PR2944 first headcc892a46a1acc25e86e536a7bf26af8605e34471 helper39428547347/job118647220037: real disposable key generation/certificate/ACL/JKS compatibility passed until empty fake-GitHub-list handling hit PropertyNotFoundStrict under Windows PowerShell5.1. No owner credentials/network writes. Replaced version-sensitive empty JSON-array adaptation with GitHub CLI jq name-only newline output; fake CLI now matches that public contract. Existing-key/pin, exact confirmation/stdin and unknown-resume assertions retained. No physical or owner setup PASS. Single next action: fresh Windows5.1/7 functional and full exact CI before helper handoff.

20/10/2026 — Owner-PC signing helper source candidate / AWAITING CI AND OWNER EXECUTION

Before-source claim PR2942/head86401ff2869c9e5fa2b362f664e6891cb18da505 green merged ec7720fdbcb89762d98a9d72eda8ff5fcc80af55 BEFORE implementation. Retained native owner. New Setup-OwnerSigning.ps1 separates local Prepare from explicit Publish to the hardcoded repository. Prepare creates a bounded RSA3072 PKCS12 using keytool, random password via child-only environment, private current-user/SYSTEM ACL, public certificate pin and checksum metadata. No owner key generated by agent. Publish revalidates key/password/certificate/admin, refuses unowned existing secrets or a different certificate pin, requires exact repository and owner backup confirmation, transmits four values only through child stdin, records unknown name before each attempt and supports explicit same-backup resume. No auth token read, secret argv/console output, automatic login/overwrite/rotation/deploy/APK release or business operation. Owner private backup remains on Windows PC; only public helper is in Git.

Windows5.1/7 isolated workflow uses real disposable keytool preparation and fake CLI to test certificate/ACL/JKS compatibility, exact stdin bytes, zero-write wrong confirmation/existing secret/pin mismatch/tampered key, partial unknown stop and same-key resume. Disposable keys deleted; no private CI artifacts. Actual owner setup, stable-signed build and physical update remain NOT TESTED. Prerequisites and consolidated two-phase instructions in docs/testing/native-chat-final-batch.md; CI must pass before helper handoff. Single next action: exact source CI and Windows functional checks, then owner-PC execution/backup and signed preview workflow. Other owners and final consolidated physical batch protected, iOS LAST.

20/10/2026 16:05 Europe/Athens — native owner-PC signing setup / ASSIGNED BEFORE SOURCE

Retained owner feat/android-chat-native-20261017, branch feat/native-signing-owner-setup-20261020. User completed secure GitHub browser login; actual Actions secrets page shows only existing Render hook, no MW_CHAT signing secrets. No values read and no credential mutation. Bounded new helper scope: tools/android-chat-signing/Setup-OwnerSigning.ps1 and Test-OwnerSigning.ps1, isolated .github/workflows/android-signing-setup-check.yml and docs/testing/native-chat-final-batch.md. Generate PKCS12 and random passwords only on owner Windows PC with current-user ACL and retained private backup; use official keytool/GitHub CLI, explicit repository/backup confirmation before stdin-only secret transmission. No token/password/key command arguments, logs, chat or public artifacts. Fail closed on existing signing setup, partial upload recorded for explicit resume; same protected local key only. No automatic replacement of an owner key, no permission/visibility changes, business writes, public APK or backend changes. CI uses disposable test keys and fake CLI, never real credentials. Signing helper execution/configuration and physical update remain NOT TESTED. Before code require this claim green merged, then validate PowerShell syntax and actual isolated prepare/certificate/stdin/overwrite/resume behavior on Windows; full CI/source checks before handoff. Single next action: implement this bounded owner-PC helper after claim merge; final physical batch consolidated, iOS LAST.

20/10/2026 — Native voice technical release VERIFIED / stable signing still OPEN

Retained owner feat/android-chat-native-20261017. Supersedes ONLY the shared-main wholesale release blocker below: later full main CI39387000777 for d35a772870859bbf5eb6988820d74eaa7c260795 has all build-and-test, wholesale-isolated-lab, classifier and Windows jobs SUCCESS. Ordinary deploy workflow39387876889 SUCCESS; Renderdep-dbbhlfbncjis738pm3a0 LIVE20Oct07:42:46.842298Z, independent GET /api/health returned ok:true and exactd35a772870859bbf5eb6988820d74eaa7c260795. Complete GitHub compare from reviewed native source a84c9e3 to healthy revision has32commits, no changed owned Android/store-chat/voice receiver/parser/test source paths; technical voice source is included unchanged. Latest shared main ecdbdfc1aa52662ade6ddd9f510826335d75b97c full CI39388695083 SUCCESS is distinct from independently observed deployed revision. No manual deploy or guard bypass.

This is source/CI/healthy-revision verification, NOT actual mic/playback/message/physical acceptance. No agent real message/read/push or business writes and no repeated accepted photo. Existing0.1.8/code9 artifact12244489455 remains the verified temporary-signer technical artifact; no final public APK/QR update. Renewed secure GitHub sign-in request timed out; explicit canonical-origin verification still showed signed-out homepage. No credential value inspected, key created/set, or signing success inferred. No automatic retry loop. Single next action: complete supported secure GitHub sign-in for owner signing configuration, then verify stable-signed candidate/distribution and one consolidated final device batch. Native assignment retained, other PWA/N16/AI owners unchanged, iOS LAST.

20/10/2026 — Native voice merged / PR CI GREEN / shared-main release BLOCKED

Retained native owner feat/android-chat-native-20261017. PR2877 final head a84c9e3e05e29503829fd0e746ed1a2e80b49bdd merged b255b1cf335734a81d09ad65d5b6ce2dba33733a. Exact PR full39379156890/job118484368074 SUCCESS3601PASS/0FAIL plus8backupPASS; all Windows/classifier/isolated-lab jobs green. Android39379156874/job118484010197 SUCCESS29unit/28instrumentation,0fail/skip; APK artifact12244489455 independently verified v2 RSA signature/full content digest, packagegr.myworkstation.chat.preview,0.1.8-preview/code9,3670848bytes,SHA25675d8e0be146bfbeb92e2955b18d411b3b490c5952a2fe20951a6d3d57ffd6d4d, temporary CI certificate84d4f493432c737ca7d1286579a5a364ecd2be0ef0ae502802ce7eac32a80429. Owned source blobs identical after merge. This is NOT a durable-owner-signed or public candidate.

Exact main39379947313 isolated wholesale job118486896518 FAILED: Error: Timed out actual encrypted preparation in the newly added actual wholesale offline application flow. The core isolated lab interface checks reported pass immediately before that failure. Whole main cannot be called green; ordinary guarded release must wait. This failure belongs to existing codex/wholesale-suite-20261017 scope; native owner does not change its implementation, bypass deployment guards or rerun to manufacture PASS. Other main build job was still running when failure was recorded. Previous independently observed healthy server remained f2a3b79a145f7f80331280384066ec78c29ec230; no voice release or live voice capability claimed.

No real message/read/push, financial/stock/fiscal action, repeated accepted photo or new physical PASS. Gallery/camera/auth/push earlier limited USER PASS protected. Permanent signing setup remains unverified after interrupted secure GitHub login; no key/secret created/read/set and no automatic authentication retry. Public APK/QR stays0.1.3. Final device batch remains deferred until combined readiness; iOS LAST. Single next action: existing wholesale owner resolves the exact main offline test failure, then native owner verifies fresh full main CI and ordinary guarded live revision before final signing/distribution/device acceptance. Owner retained until completion or named handoff.

20/10/2026 — Native voice PR2877 technical checks GREEN / combined-main verification pending

Retained owner feat/android-chat-native-20261017. Exact source1b9111e947fad572c0c976a5fa564ee96cbd8062 full CI39306125023/job118243927910 SUCCESS3475PASS/0FAIL plus8backupPASS; Android39306125076/job118243555841 SUCCESS build/unit/lint/emulator. Recovered published source after workspace maintenance; reconciled current main d1f2f3b2dac33f76b039e5fba17b06887955f4c4 preserving every other owner. Regenerated combined tracker PDF. New reconciled head requires fresh full/Android CI before merge and ordinary guarded release. No new USER/LAB PASS, real message/read/push or business writes. Hardware mic/playback, stable owner signing and consolidated final physical acceptance remain OPEN; iOS LAST. Single next action: fresh exact combined-head CI, merge and verified guarded release.

19/10/2026 — native voice source implemented / AWAITING EXACT CI, RELEASE AND FINAL DEVICE BATCH

Retained native owner, independent voice-only branch feat/native-chat-voice-20261019. Before-source claimPR2876/head5190837cac97439e3207922b3fa7df0e6db2cc76 mergedcb9f44ce251efe1e98b3f1878d716b36563033b6 after green docs/Windows checks BEFORE source. Prior combined quick-reply/signing sourcePR2871/headaf5c65ca merged31521be5 after exact PR full39302681196 and Android39302681233 SUCCESS; exact merged-main39304129153/job118236990210 SUCCESS. These protect earlier slices, not the new voice candidate.

Native0.1.8/code9 adds secure foreground VoiceActivity: explicit mic permission/start/stop/preview/use/cancel, up to60s canonical PCM16 mono16k WAV held in bounded RAM, no audio file/MediaStore/Intent/Bundle/cache/download/share/private saved state. AudioRecord short buffers wipe after stopped capture, epoch rejects late results; single-use VoiceBuffer expires30s, AudioTrack playback stops/wipes on background/cancel/session/store navigation. Main binds handoff to current token/store/chat, advertises microphone only after authorized server voiceMessagesAvailable, requires explicit replacement of old draft/attachment and ordinary Send. Successful durable ok/id consumes/wipes only sent audio; next typed draft preserved. Unknown outcome halts with existing history/discard gate, no replay. Existing gallery/camera/quick replies/auth/push/settings invariants retained.

Additive GENERAL-only voice POST under existing /api/store-chat auth/module/storeFor fences, strict canonical WAV/base64/size/duration checks in chat-voice.mjs, existing attachment columns and inline GET/download permissions. Message+metadata audit atomic; generic push only after commit, no audio/caption logged or pushed. No schema/migration/auth/license/provider/env/production-data change. Audio-only receiver component uses explicit transient-blob playback, no autoplay and visibility/unmount cleanup; existing mobile installation/responsive/photo6432/N16 owners retained. AI parser still with its existing owner. Public0.1.3 APK/QR unchanged; no agent real message/read/push/business test.

Local Node20 parser/actual registered route/old chat assignment/foundation cases16PASS/0FAIL. Added mounted receiver lifecycle test, pure native container/handoff cases and real Activity synthetic voice lifecycle/permission-denial/handoff/explicit-only send/stale-session/unknown-outcome/next-draft cases, awaiting trusted CI. Local JDK compiler and project JS component dependencies unavailable; no local Android/component PASS inferred. Hardware mic/playback, exact healthy guarded server release, artifact, protected owner signing setup and consolidated physical acceptance remain NOT TESTED. Final device tests remain deferred until preparation complete, iOS LAST. Single next action: exact full/Android CI, resolve every failure, merge/verify ordinary guarded release and candidate before any consolidated physical request.

19/10/2026 — independent native voice messages / ASSIGNED BEFORE SOURCE / NOT IMPLEMENTED

Retained owner feat/android-chat-native-20261017; branch feat/native-chat-voice-20261019. User requested all remaining Android preparation first, one final physical batch afterward, iOS LAST. Current ownership review shows PWA owner codex/chat-mobile-app-20261013 retains packaging/responsive/install/photo6432 acceptance, and N16 owner codex/n16-owner-acceptance-20261007 retains existing physical acceptance. This NEW independent voice-only source subtask was unimplemented/unowned, so it can be claimed without taking those existing scopes. Earlier issue2869 flagged a dependency, not an exclusive voice assignment. Common AI parser remains with codex/assistant-business-queries-20261015.

Bounded causal feature: PCM16/16kHz/mono WAV voice, at most60seconds/1920044bytes, recorded and played in RAM, explicit record/stop/preview/use/send/cancel, secure VoiceActivity, no audio files/MediaStore/Intent/Bundle bytes/cache/download/share or saved draft. Existing background/session/store/cancel wipes and epoch fences are mandatory. Single-use RAM handoff30s TTL; Main sends only after explicit Send and stops on unknown outcome with no retry; preserve next typed draft. New microphone permission only on explicit action, no auto-recording and no audio transcription/AI. Native voice UI is available only after authorized server response advertises support; older server leaves text/photos usable.

Exact native paths: android/app/src/main/AndroidManifest.xml, MainActivity.java, ChatApi.java, new VoiceData/VoiceBuffer/VoicePlayer/VoiceActivity.java, corresponding unit/instrumentation cases, android/app/build.gradle0.1.8/code9. Server: new server/src/chat-voice.mjs strict canonical WAV/base64 parser; additive GENERAL-only POST /api/store-chat/stores/:storeId/voice-messages in existing store-chat router; current auth/module/storeFor company/store fences reused unchanged, existing columns and scoped attachment GET/no-store/download permissions, atomic message+audit and existing generic push path. Expose voiceMessagesAvailable only with deployed support. No schema/migration/auth/license/provider/env change, no change to old photo/PDF parser or invoice AI Reader. No production message/read/push/business mutations for tests.

Receiver scope only: new audio attachment preview in StoreChatPanel.jsx via isolated ChatVoicePreview.jsx/component tests; no edits to mobile packaging/install/responsive/old-photo picker or previous physical failures. Current permission-controlled downloads remain, native has no download. Audio preview uses transient in-memory blob with explicit open/play/close and cleanup, no automatic playback. Existing image/PDF rendering and all other owners protected.

Require parser boundary/forgery/truncation/invalid PCM/base64 tests; actual registered route authorization/no-write/transaction/receipt tests with isolated fixtures; Activity tests for handoff/stale-scope/explicit-only POST/unknown stop/background cleanup; existing photo/camera/reply/signing/session regression, full exact PR/main CI and verified APK, ordinary guarded server release/exact healthy revision. CI cannot prove microphone hardware, actual receiver playback or forensics. All physical tests stay deferred until consolidated readiness. Public APK/QR unchanged until final candidate. Single next action after green merged claim: implement this voice-only feature; stable key setup and existing AI parser dependency remain explicit, iOS last.

19/10/2026 — combined Android preparation / AWAITING EXACT COMBINED CI / NO DEVICE REQUEST

Retained native owner; user requested preparing all Android first and final physical tests together, iOS LAST. Independently claimed quick repliesPR2866 and durable preview signingPR2870 are now combined in sourcePR2871 after concurrent main documentation/PDF conflicts. Previous quick source340a3981 Android39301502524/job118227585436 SUCCESS22 instrumentation after correcting asynchronous test observation; previous signing source29583125 Android39301266964/job118226765335 SUCCESS19 instrumentation/build/unit/lint, fullPR39301267009/job118227083465 SUCCESS. These are previous-slice evidence, NOT a PASS of the combined head. Both code slices retain their exact tested behavior, Gradle retains both stable conditional signer and0.1.7/code8. Main065e4fef wholesale/other-owner records preserved; combined PDF regenerated. Need fresh exact combined full/Android CI and merged-main verification.

Native quick replies are editable/no-auto-send and preserve the existing unknown-outcome/session/lifecycle/photo/camera invariants. Stable signed-preview workflow is main/manual-only, fail-closed and credential-free in ordinary PR builds; real secret setup, owner-signed candidate and physical same-signer update NOT TESTED. Current connector cannot manage Actions secrets. Voice contract proposal docs/testing/native-chat-voice-contract.md is actionable preparation only, NOT IMPLEMENTED and not a shipped endpoint. Existing Chat/PWA/N16 and AI owners retained via dependency issue2869. No private key generation/read/configuration, server/business/message/read/push action by this page and no public0.1.3 QR/content update. No new APK delivery or incremental physical test. Single next action: complete exact combined technical verification, record green merged receipt, then resolve protected signing setup and existing-owner voice/AI dependencies before one consolidated candidate and device batch.

19/10/2026 — native quick replies implemented / AWAITING CI / PHYSICAL BATCH DEFERRED

Retained native owner. Before-source claimPR2866/head e397328b49d9c27d22f039e4cf67d796c3e28fed merged7b6cd58610295380548884e79debdd67613e1787 after green docs/Windows checks BEFORE source. Native0.1.7/code8 adds five built-in quick replies to chat only. Selection fills the existing composer; nonempty drafts require explicit append/replace/cancel, overflow leaves draft intact, ordinary Send remains explicit. No automatic send, persistence, server/API/schema/auth/push/settings change. Dialogs are secure, dismissed at stop/navigation/destroy, selection bound to captured epoch/token/store/composer/foreground/chat/busy/unknown-outcome guard. Existing photo/camera/caption/next-draft/send-interlock/strict-receipt/privacy/session invariants protected.

Unit cases cover append/replace/immutable choices/overflow; real Activity fixtures cover append and explicit-only POST, cancel preservation/background clearing, unknown-outcome deny. These are simulated technical checks, not new USER PASS. Exact Android/full PR/main CI and regression completion required; no new APK delivered/publication or real message/read/push by this page. User requested all remaining Android preparation before one final physical batch, iOS LAST; no incremental physical test request. Voice/backend ownership, AI parser, durable signing, distribution and broader negative/device/forensic acceptance remain OPEN as claimed. Single next action: finish technical checks, then continue preparation against actual dependencies.

19/10/2026 21:02 Europe/Athens — ANDROID CONSOLIDATED PREPARATION / RETAINED OWNER / BEFORE SOURCE

Owner feat/android-chat-native-20261017; source slice feat/native-quick-replies-20261019. Owner explicitly requests preparing all remaining Android work first, one consolidated final physical acceptance afterward, and iOS LAST. No more incremental physical test requests or repeat of qualified photo/push/login PASS. This changes test scheduling, not the requirement for green technical checks, exact artifact verification or honest NOT TESTED labels.

First independent bounded source slice: native built-in quick replies, selected from a visible list into the existing editable composer only; preserve current draft via explicit append/replace choice, no auto-send or persistence, chat-only/no AI privilege change. Exact source MainActivity.java and QuickReplies.java plus isolated Activity/model tests, Android version0.1.7/code8. Ordinary Send and existing queue/strict receipt/lifecycle/session/store/settings boundaries remain unchanged. No server API/schema/config/prod data/message/read/push action. Claim must merge green before source; exact Android/full PR/main checks required. Physical acceptance stays deferred in the consolidated batch.

Other preparation remains OPEN, not silently implemented: voice requires a compatible server contract (current attachment parser permits JPG/PNG/WEBP/PDF only), RAM-only recording/playback/cancel/background cleanup and corresponding authorized receiver support. Existing PWA/N16 ownership retained; no backend/PWA takeover. Common AI phrase gap stays with codex/assistant-business-queries-20261015. Stable signing requires durable owner-controlled private signing material and secret injection; no key/password in Git/source/APK/logs, no unsigned/debug-signed production claim. Current connector cannot access Actions secret management, which is a capability limitation, not proof that keys do not exist. Prepare explicit build contract before configuration. New public APK/manifest/QR publication follows final verified candidate and ordinary guarded deployment; current public0.1.3 remains unchanged until then. Play and iOS are separate release work, iOS after Android acceptance. No overall Android completion claim.

Single next action after claim green/main: implement and technically verify quick replies without asking for a new physical send. Continue remaining preparation against actual dependencies; unresolved owner/config dependencies remain explicit in final consolidated report.

19/10/2026 — durable preview signing build prepared / AWAITING CI AND OWNER SECRET SETUP

Before-source claimPR2870 finalheade73aae12bf03c05c9fe940a773256350fdc43896 mergedfeb5908a8305fa247f0f0d2581bd572551afa056 after green docs/Windows checks; reconciled independent assistant-history claim2307f6d. Retained native owner. Conditional Gradle stablePreview signer only when complete environment is present; ordinary PR debug builds unchanged. New manual/main-only workflow requires exact main successful full build-and-test (not docs-only SKIPPED), repeats Android unit/lint/emulator tests before loading secrets, builds with owner key, verifies pinned cert and APK signature, uploads only APK/nonsecret receipt and cleans temporary keystore even on failure. No key created/read/configured and no signed stable build or physical same-signer update claim.

Consolidated setup/readiness/physical acceptance document docs/testing/native-chat-final-batch.md records five exact secret/variable names, protected gallery/camera PASS, required voice/backend/receiver and existing AI-owner dependencies issue2869, final batch gates and iOS LAST. Current connector lacks Actions secret management; real key setup is an explicit unresolved dependency, not a claim that secrets are absent. Public0.1.3 APK/QR unchanged, no server deploy/config/DB/business/message/read/push action. Quick-repliesPR2868 remains separate awaiting its exact checks. No new device test requested. YAML parses locally; complete Android/full PR/main checks required. Single next action: finish technical verification, preserve both source slices when reconciling main, then obtain protected signing setup and existing-owner voice/AI contract before one consolidated candidate/device batch.

19/10/2026 — native durable preview signing BUILD PREPARATION CLAIM / NOT CONFIGURED

Retained owner feat/android-chat-native-20261017; independent branch feat/native-stable-preview-signing-20261019. Exact source scope android/app/build.gradle conditional stablePreview signing for the existing debug preview package, new manual-only .github/workflows/android-chat-signed-preview.yml, docs/testing/native-chat-final-batch.md. Existing ordinary PR debug tests continue without private credentials. No production release/Play package/Firebase-provider change, no key/password in Git/APK/logs, no direct public download/QR update or deploy. Preview is still a preview, not a production release.

Workflow must run only manually from main, use owner-controlled secret keystore and passwords through environment, validate a pinned public certificate fingerprint, require exact source full CI and Android workflow success before signing, fail closed on missing/partial secrets or mismatched signer, upload only APK and nonsecret source/hash/cert receipt, clean temporary key on every exit. No PR-triggered access to signing material and no silent ephemeral-key fallback in this dedicated workflow. Existing version/package and privacy/message behavior unchanged. Setup contract names MW_CHAT_KEYSTORE_B64, MW_CHAT_STORE_PASSWORD, MW_CHAT_KEY_ALIAS, MW_CHAT_KEY_PASSWORD and repository variable MW_CHAT_CERT_SHA256; keystore injection belongs to a capable authorized configuration channel. Current connector has no Actions-secret-management capability; availability NOT VERIFIED. No signing key is generated, read or exposed by this claim.

Require static workflow/Gradle checks plus existing Android/full CI. Successful secret-injected candidate, physical same-signer update, public distribution and the consolidated final device batch remain NOT TESTED; do not ask user for incremental tests. iOS LAST. Quick-reply sourcePR2868 remains separate and is not claimed complete. Voice/AI dependencies tracked in issue2869 retain existing owners. Single next action after this claim green/main: implement fail-closed signing build preparation and actionable consolidated test/setup document, without activating a release.

19/10/2026 20:47 Europe/Athens — native two-camera batch LIMITED USER PASS

Retained owner feat/android-chat-native-20261017. After delivery of trial0.1.6 the owner confirms «ειναι οκ..εστειλα 2 μαζεμενεσ». In the ongoing camera retest this is LIMITED USER PASS for sending two camera captures together, superseding the previous last-only camera FAIL for this tested step. Gallery USER PASS remains protected. This is owner confirmation, not independently measured Admin visibility, message IDs, installed APK hash, device/model/OS or storage forensics. Do not repeat accepted sends for paperwork.

Verified offered artifact/source/CI remain those of PR2857 and delivery receiptPR2859: source1d74ca63e62ee1ab1e094a41ae15d598fd6ab508, mergea8ae40b2d913b7e5e68e5f3f1c6ec77b9ef9a0b5, APKf77fcdc63fddf6d6814c831a2d85b874c1bab71d57b3cf739e3cdf254957f232. This does not independently prove what binary is installed. Manual now records the tested two-capture usage. Completed two-camera outbound retest is removed from current pending tasks. Broader devices/limits/negative-session/privacy/stable signing/Play/iOS and replies/voice remain OPEN under existing owners. Public0.1.3 QR unchanged; no source/server/config/DB/message/read/push/business mutation by this page. Single next action: separate Admin-side visibility of the already-sent two images if needed, without resending.

19/10/2026 — native camera batch0.1.6 TECHNICAL PASS / AWAITING CAMERA DEVICE

Retained native owner feat/android-chat-native-20261017. Before-source claim/gallery PASS/camera FAIL receiptPR2855 green/maina210bc61 before implementation. SourcePR2857/head1d74ca63e62ee1ab1e094a41ae15d598fd6ab508 mergeda8ae40b2d913b7e5e68e5f3f1c6ec77b9ef9a0b5 after fullPRCI39292829376/job118197962433 SUCCESS3459PASS/0FAIL/0SKIP+6backup and Android39292829379/job118197607651 SUCCESS23unit+19API30instrumentation/build/lint, zero failures. Exact merged mainCI39294002130/job118201967531 SUCCESS3459PASS/0FAIL/0SKIP+6backup.

One foreground camera session now keeps multiple bounded JPEG captures until explicit Use N photos. The complete single-use RAM batch transfers to the matching Main store/session and enters the existing strict ordered send queue only after explicit Send. Stop/cancel/recreate wipes draft bytes, epoch fences late callbacks; committed handoff retains existing30second expiry. No files/MediaStore/Intent/Bundle images, background-clearing bypass, new permissions/backend/settings/auth/push/auto-send/retry. Gallery multi-photo/caption/next draft/unknown-outcome/send-interlock and unrelated owners remain protected. Hardware capture is not proved by the19 isolated Activity fixtures.

Verified artifact12207650641 from exact1d74ca63:0.1.6-preview/code7/packagegr.myworkstation.chat.preview,3654376bytes/APK SHA256f77fcdc63fddf6d6814c831a2d85b874c1bab71d57b3cf739e3cdf254957f232, signercert47ef4893b0e133a1644f48bf7a10106785a54d0a7942d83c168098e2a4a99a88. APKv2 RSA/full-content digest, manifest/version/package and actual camera batch DEX with fixture classes absent independently PASS. Android tree3b48000897eec4be9e1592fc27fb981621b559ef equals merged source. Exact ZIP/CI/delivery metadata CHECKPOINTS/EVIDENCE/native-camera-batch-20261019/artifact.json. Same native APK deliverable replaced successfully as version8, file_00000000a4f88246a73cab0911e19fb2, filename MyWorkStation-Chat-Android-0.1.6-Preview.apk; local metadata applied. Changed signer requires removing only MW Chat Preview before install/re-login/notification reactivation; stable signing remains OPEN.

Gallery send remains LIMITED USER PASS from20:02; camera last-only USER FAIL remains the authoritative pre-correction observation until device retest. New0.1.6 hardware/device acceptance NOT TESTED, no CI-only manual PASS. Public0.1.3 install/QR remains unchanged by this page, no server deploy/env/database/business/message/read/push mutation. All other pending scopes/owners and qualified PASS remain.

Single next action: install this exact0.1.6 trial (remove ONLY MW Chat Preview for changed signer, never POS), re-login/reactivate notifications. In ONE camera screen take first and second photos, then tap Use2 photos; after returning to LAB wait for refresh and press enabled Send ONCE. Verify both separate images at Admin. Do not reopen the camera between the two captures or repeat accepted gallery tests for paperwork. Whole native/N16, camera physical acceptance, other negative/privacy/session/device/stable-signing/iOS and approved replies/voice remain OPEN/retained.

19/10/2026 — native multiple-camera captures USER FAIL / ASSIGNED BEFORE SOURCE

Retained native owner feat/android-chat-native-20261017; bounded source fix/native-camera-batch-20261019. Owner clarifies gallery success, then reports that attempting two camera photos sends only the LAST one. Gallery multiple-photo USER PASS remains protected. New USER FAIL is camera accumulation, not gallery delivery. Source confirms CameraActivity finishes after each single JPEG, CaptureBuffer owns one byte array and Main CAMERA result clears/replaces the queue; Main onStop also deliberately wipes old selected bytes. Do not bypass that privacy boundary merely to append across separate camera launches.

Before-source scope: CameraActivity collects up to5 JPEGs/7MiB each/14MiB total in one foreground camera session, reuses the existing bounded PhotoBatch, offers explicit Use N photos, then transfers one single-use RAM-only batch through CaptureBuffer into Main CAMERA result. Main's existing background clearing remains unchanged. Cancel/background/recreate and stale callbacks wipe local/late private buffers; committed handoff keeps existing30second expiry and is consumed only by matching store/session result. No JPEG bytes in Intent/Bundle/file/MediaStore, no new persistence/permission/server/API/settings/auto-send/retry. Separate captures are sent by existing strict ordered one-photo POST queue only after explicit Send. UI must make the new multi-capture/Use step clear.

Exact paths: android/app/src/main/java/gr/myworkstation/chat/{CameraActivity,CaptureBuffer,MainActivity}.java, existing CaptureBufferTest and bounded camera-batch Activity instrumentation, android/app/build.gradle preview0.1.6/code7. Protect gallery provider/queue limits/removal/caption-once/next draft, send interlock, unknown-outcome no replay, authentication/store/settings/push and other AI/history owners. Require new unit/lifecycle/handoff/stale-binding tests, exact green Android/full CI, merge and independently verified signed APK before physical two-camera acceptance. Camera hardware/device behavior remains NOT TESTED by fixtures. No real message/photo/read/push/business/settings/server action by this page. Single next action: after this claim is merged green, implement one camera-session batch; do not repeat the successful gallery send.

19/10/2026 20:02 Europe/Athens — ANDROID-CHAT-NATIVE-01 / multiple-photo send LIMITED USER PASS

Owner clarification20:02:30: successful images were selected from existing gallery storage, NOT direct camera capture. PASS applies only to gallery multiple-image outbound send. Camera capture/send remains unconfirmed; the clarification alone does not establish a new camera failure.

Retained native owner feat/android-chat-native-20261017. After the exact0.1.5 trial delivery and instruction to select two LAB images after refresh, the owner reports «ΤΙΣ ΕΣΤΕΙΛΕ». This is LIMITED USER PASS for the reported multiple-photo outbound send and supersedes the earlier none-sent USER FAIL for that tested step. Do not repeat the successful send for documentation. Exact on-device version/hash, image count/IDs/bytes/MIME, model/OS, transport trace and separate Admin-side receipt/visibility were not independently verified; no broader all-device/all-five-image/privacy or financial PASS is inferred.

Technical provenance: sourcePR2850 finalcaf5d9df, mergedef40ac97; fullPRCI39260146010 and exactmainCI39262041082 SUCCESS3430PASS/0FAIL/0SKIP+6backup; Android39260145883 SUCCESS22unit+14instrumentation/build/lint. Delivery receiptPR2853 green/main79b5de8c; exact artifact 12190426460/code6/0.1.5/SHA2568a2425e03bad8b9e2e8c203ff0e10d1ec5264155ce0c0209f2386035ea3c84e2 and same Library deliverable version7. These identify the offered binary, not an independently measured installed hash. Machine evidence CHECKPOINTS/EVIDENCE/native-send-interlock-20261019/artifact.json now records this separate user observation.

Verified usage instructions added to docs/manual/native-chat/PASS.md; active/tracker/pending/PDF synchronized. The completed outbound retest is removed from current pending scope; separate Admin receipt and remaining native/privacy/session/camera/device/stable-signing/iOS and approved replies/voice remain OPEN with existing owners. Public0.1.3 install/QR is unchanged; no release/config/server/database/message/read/push/business action was performed for this receipt. Existing single-photo/push/AI limited PASS and all other owners retained. Single next action: establish separate Admin-side visibility of the already-sent images without sending them again before broader distribution acceptance.

19/10/2026 — ANDROID-CHAT-NATIVE-01 / refresh-send interlock0.1.5 TECHNICAL PASS / AWAITING DEVICE

Retained native owner feat/android-chat-native-20261017. Before-source claimPR2849/headdfc1bb5f green/main70d60c00. SourcePR2850 finalcaf5d9dfab04e40e6e4f93f5e74e9067f28edea5 mergedef40ac972911f11fed17706acc6901befd086d91 after fullPRCI39260146010/job118085675266 SUCCESS3430PASS/0FAIL/0SKIP+6backup and Android39260145883/job118085350582 SUCCESS22unit+14API30instrumentation/build/lint, zero failures. Initial8996fd08 CI also green; only active-list prefix conflicted with central phase6 receipt and both complete records were retained. No runtime conflict or weakened tests. Exact merged mainCI39262041082/job118092261840 SUCCESS3430PASS/0FAIL/0SKIP+6backup.

Corrected the demonstrated silent send-entry path matching the owner's clarified symptom: chat Send is disabled during existing requests, the list GET says Ανανέωση μηνυμάτων and message POST says Αποστολή μηνύματος. No automatic or deferred send, no retry. Held-GET real Activity regression preserves two selected images/caption, proves zero POST during and after refresh, then exactly two ordered POSTs only after the enabled-button click. Gallery ContentResolver stop/start/result/resume diagnostic, strict receipts/unknown-outcome gate, caption-once/next draft, lifecycle wiping/settings/store/session checks remain covered. Other AI/history/PWA/N16/central/online owners and prior qualified single-photo/push PASS preserved.

Trusted finalartifact12190426460 from exactcaf5d9df Android run verified0.1.5-preview/code6/packagegr.myworkstation.chat.preview; Android tree7367c4fe3d97f9f0addb4f7d8853ea251843ae2e equals merged main. APK3654372bytes/SHA2568a2425e03bad8b9e2e8c203ff0e10d1ec5264155ce0c0209f2386035ea3c84e2, signercertf7d2fd7dd9a50a1f4e315c7612c8944e3bc7ec615fe6714f0f6c36a858bbb872. Independent APKv2

RSA/full-content digest, manifest/version/package, both new DEX labels and absence of fixture-provider manifest/DEX PASS. Initial0.1.5 candidatec2373dd5 superseded BEFORE delivery; no user installed it through this page. The same durable native APK deliverable was replaced successfully as version7 (libfile_a30159b8f9c08191939dd9f9c647a147/file_00000000ffcc8246abe889e639239e57), named MyWorkStation-Chat-Android-0.1.5-Preview.apk; metadata applied to the final local file. Different signer from0.1.4: remove only MW Chat Preview before installing/re-login/notification reactivation. Stable signing remains OPEN.

Current device evidence remains USER FAIL on the earlier trial: selected-image count visible, connection indication clears without multiple-image delivery; one-image delivery reported working. Exact physical root cause is not independently traced and new0.1.5 device acceptance is NOT TESTED. CI is not USER PASS; no CI-only manual entry. Public install/QR manifest freshly read as0.1.3/code4/hash82c2ed08 and unchanged by this page. No server deploy/env/database/business/message/read/push mutation. Detailed hashes/CI/delivery metadata CHECKPOINTS/EVIDENCE/native-send-interlock-20261019/artifact.json.

Single next action: install this exact0.1.5 trial (different Preview signer requires removing only MW Chat Preview, never POS), re-login and reactivate notifications, select two non-sensitive existing LAB photos, wait for refresh to finish, press enabled Send ONCE and verify both separate messages at Admin. Do not repeat old successful tests for paperwork. Failure review/discard gate still applies if an outcome is unknown. Whole native/N16, physical correction acceptance, replies/voice, negatives/camera/device/privacy/stable-signing/iOS remain OPEN with existing owners.

19/10/2026 — native chat refresh/send interlock ASSIGNED BEFORE SOURCE

Retained feat/android-chat-native-20261017; bounded source fix/native-chat-send-interlock-20261019. New owner clarification through choices: selected-image count IS visible and the connection indication later disappears without another result. Multiple images USER FAIL remains; one image USER PASS retained. This rules out an initially rejected/empty selection for the reported attempt, but no device trace identifies its exact request. Gallery-provider diagnosticPR2842/head2face1848f2aede56511e24f99bf7b2bca106827 passed Android39253547724/job118063033540 (13 instrumentation, compile/unit/lint) and fullPR39253547390/job118063337742; merged880c6f428beeb657058b4f94c9600320f41c9641. Valid generated-byte ContentResolver/resume path passes technically, not device acceptance.

Source observation: conversation resume starts message GET with busy=true and notice Connection; Send remains enabled, while send() returns silently on busy. GET completion clears the notice without sending. Bounded correction claim: only native chat send-button interlock and distinct message-refresh versus message-send status in MainActivity (call completion/error, chat button construction and reference clearing on layout/stop), plus held-GET Activity regression and preview version0.1.5/code6. No deferred send or automatic retry: user must explicitly press the enabled button after refresh. Preserve photo queue, caption-once/next draft, strict receipts/unknown-outcome gate, epoch/lifecycle/privacy/settings/tenant guards, single-photo/camera and unrelated AI/history implementation. Do not claim this is independently proven physical root cause before device retest.

Render read-only request/app log filters11:25–12:21Z returned empty; this is absence of diagnostic logs, NOT proof no request arrived. Read-only aggregate image metadata in that window has one image11:35Z/415063bytes and one11:37Z/334151bytes, no private content/identities retrieved and not attributed to this device. No production message/read/push/business/settings/config/deploy action. New build remains AWAITING CI AND DEVICE; public0.1.3 unchanged. Existing assistant-history native integration/auth-transaction owners and all other assignments retained. Single next action: after this claim merges green, implement only this bounded interlock, hold a GET with two selected images and verify disabled Send/no POST, then explicit send after refresh produces exactly two POSTs with no replay.

19/10/2026 16:00 Europe/Athens - WHOLESALE OWNER RETRY / LICENSE RESTORED; ACTIVE ACCEPTANCE BLOCKED

Retained codex/wholesale-suite-20261017 resumes existing published PR2820 scope after explicit user activation15:46:45Athens. Actual personal Owner login/inactive refusal succeeded before activation; secure Platform Super Admin Χρήστος Μάνης password+2FA then succeeded. No secret values read. Before-action evidence written12:51:32.046UTC before saving. Fresh saved WHOLESALE_B2B ACTIVE12:52:35.424UTC/22modules/104.70EUR/0monthly/0setup/MONTHLY/no dates. After role transition, Owner page needed canonical navigation and showed login. Subsequent secure request returned submitted after380seconds but actual page still showed Super Admin2FA link, without named personal Owner/private workspace. ACTIVE OWNER ACCEPTANCE BLOCKED / NOT TESTED, not a new product PASS or proven application defect.

Restored only wholesale: fresh pre-restore ACTIVE13:00:28.652UTC; fresh saved INACTIVE13:00:46.421UTC/21modules/104.70EUR.36other module cards+nine general fields retained SHA2563ac7086147cbfd29b7b3271b18a87f882aadacb05979e8fd13018172d672b35c at before/draft/active/pre-restore/restored; plan-price cards excluded. LIMITED LIVE LICENSE RESTORATION PASS. Grant remained active approximately12:52-13:00 during authentication wait, no timed auto-revocation; none remains. Fresh personal denial after restoration NOT TESTED. Prior PR2820 personal inactive PASS and PR2837 receipt protected.

Actual visible company directory confirms Υπεύθυνος Εργαστηρίου / xrhstosmanis@gmail.com. Read-only source review shows personal wholesale rejects platform/support context and successful personal login replaces ordinary browser user/token and removes platformToken; deliberate account selection is required after role changes. Submitted credential values are unknown. No bypass, password/account change or runtime fix inferred. No management/store-picker/private-tab/portal/site/seller/order test ran. No membership/assignment/account/customer/site/order/price/stock/payment/fiscal/shift/SQL/seed/migration mutation; business deltas unmeasured/N/A. Later public no-cache health oktrue/version0.22.0+kat-test-pos/exact3e50b35596848994efa94c9e5d3cedf8dc1af8f6/curl exit0, separate from UI-action revision.

Evidence CHECKPOINTS/EVIDENCE/wholesale-owner-active-retry-20261019/before-action.json, after-action.json and actual restored-license.jpg (LAB header21/104.70; wholesale card below viewport, inactive proof from fresh DOM). Incidental Platform backup FAIL badge was observed, not investigated or claimed fixed; no takeover of lifecycle/backup owner. Current mainbab033d5b and native/history/central/lifecycle/supplier work preserved. Common checkpoint/ACTIVE/KAT/tracker/pending/README/manual/PDF synchronized. Whole product OPEN/ASSIGNED; no numbered item closed. Single next action verify the exact existing LAB Owner account selection before a separately authorized future active acceptance; no automatic repeat grant/auth loop. Coordinator retained until named handoff.

19/10/2026 Europe/Athens - COORD PHASE6 / EXPLICIT ENDED ATHENS SALES COMPARISON / ASSIGNED BEFORE SOURCE

Retained central coordinator codex/central-four-streams-20261018, issues #2704-#2707, original14 #13. User requested continued autonomous coordination here; four internal workers, no external page transfer. Baseline main 3e50b35596848994efa94c9e5d3cedf8dc1af8f6 after phase5 receipt #2834, purchase correction limited preview/cancel PASS #2835, history int64 compatibility #2836/readiness #2838 and independent lifecycle central execution #2833. Read current AGENTS, full common registries/checklist, relevant manuals/checkpoints and subsequent history. Existing Gate7 PASS, all retained owners and phase5 source/acceptance boundaries remain protected. This expands original14 #13 only; no claim on old advanced analytics or Workforce.

ASSIGNED exact six source/test paths, source editing only AFTER this claim is green merged:

- WS3 backend, codex/central-sales-comparison-20261019: existing server/src/routes/kiosk-reports-sales-v4.js, NEW server/src/services/sales-report-comparison.js, NEW server/test/sales-report-comparison.test.js. Add only explicit paired compareFrom/compareTo opt-in on the normal sales-analysis list route; absent both retains existing default shape and calculations. Reject one-sided/blank/array/invalid fields. Require explicit Europe/Athens calendar and selected active same-company store. Reuse existing unchanged calendar helper and actual canonical sales reader; do not reconstruct from assistant/model values or an advanced endpoint.

- WS1 native regression, codex/central-sales-comparison-native-20261019: NEW server/test/sales-report-comparison-postgres.test.js only. Actual isolated PostgreSQL canonical SQL and mounted GET, same-snapshot/scoping/signed refunds/DST/cap/zero-base controls and byte-identical before/after database evidence. No cash runtime edits or production records.

- WS4 UI, codex/central-sales-comparison-ui-20261019: existing client/src/components/commerce/installKioskReportsSalesV4.js and NEW server/test/kiosk-sales-comparison-ui.test.js. Unchecked opt-in beside existing hourly controls, explicit blank prior dates, selected store and Athens requirement. Capture paired dates only on the list request with applied filters; never change drilldown/CSV requests or infer dates. Display qualified comparison from exact response envelope; mounted actual installer tests for applied-vs-draft filters, stale/tab/store isolation, invalid/limited metadata, zero/negative basis, and existing hourly/default/CSV/drill behavior.

- WS2 independent contract/source review only, no supplier/invoice edits. Root exclusively owns shared records, central checkpoint CHECKPOINTS/CHANGES/2026-10-19-central-sales-comparison.md, publication, source/release evidence and regenerated common PDF.

Policy: two explicit ended Athens CALENDAR-DAY intervals, each <=366 inclusive days, equal dayCount, previous.toExclusive<=current.from, both end<=ONE captured server now. Closed calendar days do not mean closed cash shifts or final financial reconciliation. Equal day counts do not certify weekday, seasonal, capacity or trading-condition equivalence. Read active store and both actual canonical reports inside ONE RepeatableRead transaction. Current preserves optional hourly view; prior does not request hourly. Default list, product groups, amounts, limit10000, coverage, unique basket counts, auth/licensing/company/store guards, calendar defaults, CSV and drilldown remain unchanged.

Wire: existing current report plus comparison {status AVAILABLE or SOURCE_LIMITED, policy EQUAL_ENDED_ATHENS_CALENDAR_DAYS, timeZone Europe/Athens, companyId, storeId, query q-or-null, asOf ISO, dayCount, currentPeriod and previousPeriod {calendarFrom,calendarTo,from,toExclusive,elapsedHours}, coverage {current,previous}, financialFinality PROVISIONAL, financialReconciliationComplete false, basisLimitations [NOT_WEEKDAY_OR_SEASONAL_EQUIVALENCE,NOT_FINAL_FINANCIAL_RECONCILIATION]}. AVAILABLE only with complete consistent coverage on both sources adds safe integer currentGrossCents/previousGrossCents/deltaGrossCents and revenueChangePercent. Positive prior base uses safe division; prior zero/negative =>percent null with ZERO_BASE/NEGATIVE_BASE. Missing/inconsistent/partial coverage =>SOURCE_LIMITED and unavailableReason SOURCE_LIMITED, OMIT all compared money/delta/percent fields. Gross turnover only, preserving signed reversals; checked cents and overflow fail closed. No quantity/unit mixing or staffing inference.

Required evidence: pure policy leap-year/month-length/DST23/25-hour boundaries and end==now; malformed/orphan/overlap/open/unequal/overcap refusal; complete/empty/partial/invalid coverage; checked cents and delta/percentage overflow; one captured time/RepeatableRead/active store and authorization; actual native reader and mounted route with immutable fixture snapshots; real installer controls/context races/default/hourly/CSV compatibility. Full exact PR/main PostgreSQL/HTTP/Windows/Chromium/build/invariants CI and ordinary guarded exact healthy release before hosted acceptance. No skip or weakened historical assertions to obtain green CI.

Current evidence: phase5 exact source main CI 3356/0/0 +6; then-active compatible fb11a314 full CI 3377/0/0 +6 and ordinary release/independent health verified in #2834. New comparison NOT IMPLEMENTED / NOT TESTED; browser native credential state remains blocked, no bypass or credentials extraction. Native local environment limitations must stay explicit and required native tests must execute in CI. This claim creates no LAB/business PASS and no CI-only manual entry. Fresh independent public no-cache health 2026-10-19T12:26:52.983836+00:00: HTTP200/oktrue/exact3e50b35596848994efa94c9e5d3cedf8dc1af8f6/version0.22.0+kat-test-pos. Before publication preserve newer docs main7d6862ed/#2839: native multi-photo USER FAIL belongs to the native owner and is not superseded or repaired by this analytics claim.

Safety: no production financial/stock/fiscal/shift/payroll/settings/recipient/SMTP/order/schema/infra mutation; no accepted transaction replay or live send. Keep invoice, supplier correction, lifecycle, native, wholesale and VOICE/parser/history owners. Existing grouped MONTHLY/supplier/hourly/product/coverage acceptance remains AWAITING LAB unless newer exact real evidence supersedes it. Original14 overall OPEN. Final consolidated receipt updates checkpoint/common registries/original14 map/machine evidence/PDF together. Single next action: green merged claim, then the six-path implementation and independent review. Central owner remains assigned until completion or named handoff.

19/10/2026 - WHOLESALE-OWNER-ACTIVE-LAB-02 / LICENSE RESTORED PASS; ACTIVE PERSONAL ACCEPTANCE BLOCKED

Retained coordinator codex/wholesale-suite-20261017. User explicit approval12:04:29 Europe/Athens applied to the bounded temporary WHOLESALE_B2B grant for MYWORKSTATION LAB only, after claim PR2820/cff103c5 was green merged. Before-action baseline was written before saving:09:37:08.162UTC,21active, wholesale INACTIVE,104.70EUR. Fresh saved activation09:39:18.048UTC:22active, wholesale ACTIVE,0monthly/0setup/MONTHLY/no dates. Existing Platform Super Admin Χρήστος Μάνης positively identified after secure2FA; no credential values read.

ACTIVE PERSONAL OWNER ACCEPTANCE BLOCKED / NOT TESTED: secure personal login request timed out after approximately3915seconds; subsequent actual page remained login with Super Admin2FA link, without positively named personal Owner or private workspace. Submitted status is not login success. No manager tab/store picker/portal/order acceptance ran. The grant remained active during authentication wait (approximately09:39-10:47UTC), without automatic timed revocation. This is not an execution/test interval and no application defect is inferred solely from this authentication outcome.

RESTORATION LIMITED LIVE PASS: fresh platform license before restore10:47:12.165UTC ACTIVE; toggle only wholesale off, save acknowledged, reopen fresh10:47:53.095UTC INACTIVE/21active/104.70EUR/37module cards. SHA256 of36other cards and nine general subscription controls remained3ac7086147cbfd29b7b3271b18a87f882aadacb05979e8fd13018172d672b35c before/draft/active/pre-restore/restored. Three plan-price cards were not hashed (visually100/220/330 before/after). No temporary grant remains. Fresh personal inactive refusal after restoration NOT TESTED because no personal session; prior actual PR2820 inactive-personal-entry PASS remains protected.

Evidence CHECKPOINTS/EVIDENCE/wholesale-owner-active-20261019/before-action.json and after-action.json; restored-license.jpg is actual clean10:49:28.364UTC screenshot of LAB header21active/104.70EUR, with wholesale card below viewport. No membership/assignment/account/customer/site/order/price/stock/payment/fiscal/shift or production SQL/migration/seed action. Normal auth/audit only; business balances unmeasured, no delta inferred. Separate later public no-cache health oktrue/version0.22.0+kat-test-pos/revisionfb11a314ec1414658d0840a61f812f42058aa5a0/curl exit0, not a claim of revision at earlier UI actions. No source/runtime change or deploy by this receipt. Reconciled main3a5eb56d and concurrent central/native/supplier/history work; all owners and earlier qualified PASS preserved.

Supersedes the older awaiting-confirmation/activation plan below: the approved attempt is completed and restored; positive management remains BLOCKED. Whole wholesale/site/field sellers/offline/commercial packaging OPEN/ASSIGNED. Single next action prepare the correct existing personal Owner authentication before separately scoped future active acceptance; do not automatically repeat this temporary grant. Retain coordinator until named handoff. Common checkpoint/ACTIVE/KAT/tracker/pending/README/manual/PDF synchronized; no numbered item closed.

19/10/2026 13:01 Europe/Athens — PURCHASE-SUPPLIER-CORRECTION-01 / SOURCE LIVE + LIMITED DESKTOP PREVIEW/CANCEL PASS / ACTUAL CORRECTION AWAITING USER

Owner fix/purchase-supplier-correction-20261019 retained for actual transaction acceptance. ClaimPR2817/head61f51aae/docsCI39224718486 merged50be1881 BEFORE source. SourcePR2819 finald22ca08e94451ca856ff709d536b05f5a111af19/fullCI39228119005/job117979784214 SUCCESS3348PASS/0FAIL/0SKIP+6backup/all native PostgreSQL/HTTP/browser/build/Windows/invariants. Source merged8bcf7d4d90933fcf382979da08101ff9e310a668; exact mainCI39229223693/job117983129955 same3348/0/0+6. All eight owned runtime/test blobs independently equal between reviewed PR, source merge and actual release.

Normal freshness guard correctly held the older source while independent central/Android/history changes entered main; no bypass/manual deploy. Combined c2e83c00 fullCI39230283875/job117989370346 SUCCESS3356/0/0+6; 2b640fc6 fullCI39232012825/job117992251240 SUCCESS3377/0/0+6; actual released fb11a314ec1414658d0840a61f812f42058aa5a0 fullCI39232187262/job117995130777 SUCCESS3377/0/0+6. Ordinary guarded workflow39233768246/job117997845160 SUCCESS; Renderdep-dbauirrrjlhs73aogiig LIVE2026-10-19T10:00:11.854973Z. Independent refreshed /api/health oktrue/version0.22.0+kat-test-pos/exactfb11a314. Docs-only42353a75 preserved all owners and did not weaken the guard.

Actual hosted13:00–13:01Athens, authorized SUPER_ADMIN support desktop, selected Περίπτερο Διαδόχου Παύλου / DIADOXOU-POS-01. Full reload, commerce→other functions→orders. Report83records, Recovery scanned50/started0/no-handoff19/non-retryable0. Explicit selected-store search found the existing FINAL6-line purchase; original editor opens and separate supplier correction button is visible. Correct active legal target/VAT shown; real backend preview displays old→new supplier and the same original payment, unchanged status/stock notice. Blank reason/confirmations keep submit disabled. Temporary local test reason plus original checkbox still disabled without payment acknowledgment; both acknowledgments enable submit. NO final button click/POST. Cancel discards the temporary controls and returns to the same original order.

Targeted complete order/two-document/payment row hashes and all6order rows/12document rows/one posting/one stock-posting aggregate hashes are byte-identical before/after. This proves limited read/preview/cancel readiness and no change of these targeted records. It is NOT a real supplier reassignment, global cash/stock reconciliation, OWNER/Manager/mobile/physical POS or all-store acceptance. Real business continued independently; no global delta claim. No sale, payment, upload, approval, stock repost, reopen, fiscal or original transaction replay submitted.

Delivery: separate original/reason/payment-reviewed supplier association transaction, shared store/row locks, full version fence, exact retry receipt/audit, duplicate fingerprint preservation and stale legacy metadata/status-request refusal. Settled/allocated/credit-offset/reversed/shared/credit/reopened/inconsistent cases stay held. Existing learning/catalogue associations, original files/jobs, external identity and all other owners remain unchanged. Earlier first completed CI39226698062 had3335PASS/13fixture setup/VM loader FAIL/0SKIP; corrected without skipping or weakening assertions. Final local13PASS/0FAIL/6native infrastructureSKIP; required native cases all executed green in fullCI.

Engineering/release/UI-readiness is complete; remove only that completed scope from pending. Single remaining USER action: review the actual original, supplier/VAT and same payment in the delivered screen, then deliberately submit the legitimate correction once. Do not repeat an accepted invoice/payment/stock operation for evidence. Same owner retained. Checkpoint/manual/active/tracker/numbered/PDF/evidence synchronized with this limited scope; broader09/Gate3/reopen/duplicate/other owners remain OPEN as assigned. Evidence CHECKPOINTS/EVIDENCE/purchase-supplier-correction-20261019/{acceptance.json,preview.jpg}.

19/10/2026 13:01 Europe/Athens - COORD PHASE5 / CASH OVERLAP HOLD AND PRODUCT UNIT UI SOURCE LIVE / AWAITING LAB

Κεντρικός owner codex/central-four-streams-20261018, issues#2704-#2707, τέσσερις εσωτερικοί workers. Πέμπτη περιορισμένη παράδοση. Τα αρχικά14 παραμένουν συνολικά OPEN, μαζί με όλες τις ανεξάρτητες αναθέσεις και τα προηγούμενα περιορισμένα PASS. Η παρούσα καταγραφή αντικαθιστά μόνο τα phase5 SOURCE PREPARED/CI PENDING/RELEASE PENDING παρακάτω.

WS1: ο έλεγχος ετοιμότητας κρατά HOLD όταν έγκυρες κλειστές βάρδιες του ίδιου ταμείου έχουν θετική επικάλυψη πραγματικού χρόνου UTC. Διατηρούνται γειτονικά όρια, κενά διαστήματα, διαφορετικά παράλληλα ταμεία, DST, αρχική σειρά/ποσά/IDs, carry-in και cap. Χρησιμοποιείται ο υπάρχων λόγος SOURCE_SCOPE_OR_ID_INVALID με ακριβή sessionId/overlappingSessionId. Ημερήσια/εβδομαδιαία/μηνιαία αναφορά αποκρύπτει τα συνολικά groups και η μηνιαία τη σύνοψη χειριστών όταν υπάρχει επικάλυψη. Δεν αλλάζουν οι αρχικές οικονομικές εγγραφές ή ο PROVISIONAL χαρακτήρας· η ετοιμότητα δεν πιστοποιεί τελική οικονομική συμφωνία.

WS4: ο πραγματικός πίνακας SalesAssistantEvidence εμφανίζει ρητή μονάδα στα προϊόντα. PIECE/KG/LITER/PACKAGE διακρίνονται, null/απούσα μονάδα παραμένει μη καταγεγραμμένη και άγνωστες/κενές τιμές διατηρούνται με ασφαλή React escaping. Ποσότητες με πρόσημο/κλάσμα, ποσά, CSV, canonical πηγή και απόκρυψη μερικής/άκυρης πηγής δεν αλλάζουν. Δεν έγινε αλλαγή parser/chat/calendar/native/provider/auth. WS3 πρόσθεσε πραγματικό native PostgreSQL τεκμήριο του ίδιου reader με πριν/μετά snapshots τεσσάρων πινάκων και αποκατάσταση των συνθετικών ωραρίων. WS2 ανεξάρτητος έλεγχος supplier/CSV12PASS/0FAIL/0SKIP, χωρίς νέο δικαιολογημένο supplier patch, και αξιολόγηση cash/UI χωρίς blocker.

Claim#2821/head7297ea78619f8bda0985c7a74ef83ba2875237a0/docsCI39226616765 SUCCESS mergedfab4330e2b0bda43279a89675de76759e81ec12a πριν κώδικα. Αρχικές πλήρεις εκτελέσεις cash39227240704:3341PASS/1FAIL/0SKIP και unit39227307705:3343PASS/1FAIL/0SKIP. Μοναδικό FAIL: παλιό settings fixture άνοιγε MAIN07/15/23 αλλά έκλεινε όλες τις βάρδιες την επόμενη07, ενώ ζητούσε READY. Το νέο native PostgreSQL τεστ overlap εκτελέστηκε PASS και στις δύο. Οι αποτυχημένες εκτελέσεις δεν συγχωνεύθηκαν ή διατέθηκαν. Πριν από την αλλαγή του πρόσθετου fixture αρχείου, στενή επέκταση claim#2827/CI39228303516 SUCCESS mergedb25f1f2b3f0f478eb6fbc244170bf5ed872c32f2. Διορθώθηκαν μόνο τα συνθετικά κλεισίματα15/23/next07, διατηρώντας όλες τις αρχικές assertions και τον αυστηρό runtime guard.

Τελικά full PR CI: cash#2823/headcbdd17ee45e8b30da3a081083597ea2ea12e9748/CI39228755790/job117981628743 SUCCESS3342PASS/0FAIL/0SKIP+6backup. Exact source mainCI39230167668/job117986195647 SUCCESS3356PASS/0FAIL/0SKIP+6backup, με πραγματικό PostgreSQL overlap, Windows, Chromium, builds, invariants, archive και real HTTP E2E.

Ενεργή κοινή revisionfb11a314ec1414658d0840a61f812f42058aa5a0, ordinary guard39233768246/job117997845160 SUCCESS, Renderdep-dbauirrrjlhs73aogiig LIVE. Ανεξάρτητο public no-cache health2026-10-19T10:01:09.755073+00:00:HTTP200/oktrue/exactrevision. Τα6 reviewed source/test blobs διατηρούνται ακριβώς. Τυχόν νεότερες ανεξάρτητες αλλαγές και πλήρες compatible CI καταγράφονται στο machine evidence. Καμία χειροκίνητη παράκαμψη deploy/freshness guard.

Τοπικά Node20.20.2: συνδυασμένος έλεγχος48PASS/0FAIL/0SKIP, frontend/TABLE_SERVICE build PASS. Ο native wrapper τοπικά SKIP λόγω αδυναμίας χαρτογράφησης μη-root PostgreSQL UID· κανένα υπάρχον cluster δεν άλλαξε. Οι πραγματικές native δοκιμές εκτελέστηκαν στο πλήρες CI χωρίς παράλειψη. Νέα συμπεριφορά AWAITING LAB: browser native credential state cannot safely resume, χωρίς bypass/ανάγνωση credentials/κατασκευασμένο screenshot ή νέο PASS. Δεν προστίθεται CI-only manual.

Προστατεύονται daily/weekly HOLD/provisional#2743, phase4 hourly/unit πηγή και CSV, αποδεκτά τιμολόγια/πληρωμές/διορθώσεις, νεότερα native sales-display USER PASS και wholesale personal-login/inactive-module PASS. Διατηρούνται purchase-supplier-correction, lifecycle, VOICE durable-history/natural-language, native multi-photo και wholesale owners. Καμία παραγωγική οικονομική/stock/fiscal/shift/payroll/settings/recipient/SMTP/order/schema πράξη ή replay από τον συντονιστή. Το#13 συγκρίσιμων περιόδων παραμένει OPEN· δεν άλλαξε το παλιό advanced endpoint ούτε το υπάρχον Gate7 PASS.

Επόμενη μία ενέργεια: συγκεντρωτική read-only αποδοχή με υποστηριζόμενο ασφαλές authenticated browser στο https://myworkstation-app.onrender.com/platform-admin, ίδιο υπάρχον LAB κατάστημα/διάστημα/προϊόν. Σύγκριση μονάδας και ποσότητας στον πραγματικό πίνακα βοηθού/κανονική αναφορά/πραγματικό CSV και έλεγχος υπάρχοντος HOLD cash preview, μαζί με τα εκκρεμή MONTHLY/supplier/hourly/coverage σκέλη όπου δεν υπάρχει νεότερη ακριβής πραγματική αποδοχή. Overlap LIVE μόνο αν υπάρχει ήδη κατάλληλη πηγή, αλλιώς NOT TESTED· δεν κατασκευάζονται βάρδιες/συναλλαγές. Ακριβής14map:CHECKPOINTS/CHANGES/2026-10-18-original14-status.md. Evidence:CHECKPOINTS/EVIDENCE/central-four-streams-20261019/phase5-source-release.json. Κοινά μητρώα/PDF συγχρονίζονται στην ίδια τελική καταγραφή. Κεντρικός owner παραμένει μέχρι ολοκλήρωση ή ονομαστικό handoff.

19/10/2026 12:10 Europe/Athens - COORD PHASE5 / ONE LEGACY FIXTURE COMPATIBILITY PATH / ASSIGNED BEFORE EDIT

Retained central WS1 owner codex/central-closed-shift-overlap-20261019, claim#2821 green mergedfab4330e before source. This narrow amendment adds ONLY server/test/automatic-report-settings.test.js to the existing phase5 claim, before editing that path. Root/WS1 may replace its synthetic CLOSED fixture's shared next-day07 closing time with adjacent15/23/next07 boundaries matching its stated complete-source intention. Preserve all original READY, REPORT_SETTINGS_CHANGED and CASH_RULE_CHANGED assertions, original amounts/auth/settings semantics and the new strict runtime overlap HOLD. No production settings/runtime behavior change or weakened assertion is authorized by this amendment.

Exact initial cash#2823/head3469b7ed84f4c4249bb38ce84f08e7b650a7b4c6/fullCI39227240704/job117976634521:3341PASS/1FAIL/0SKIP of3342. Stacked unit#2824/head9e32480d195e834a6ecd6fbaa63289768467d249/fullCI39227307705/job117976843992:3343PASS/1FAIL/0SKIP of3344. Sole failure in both: automatic-report-settings.test.js:30 expected ready=true while the old fixture has MAIN07-next07/15-next07/23-next07. The new actual isolated native PostgreSQL overlap fixture EXECUTED PASS in both runs (cashok233, stackok235); no skips. Failed runs remain evidence, not PASS, and neither source PR was merged/deployed.

Root inspected the exact fixture and confirmed the causal mismatch. After this amendment merges green, correct only fixture boundaries, rerun all automatic-report settings/policy/source/weekly/monthly/operator/overlap tests and combined UI tests, then both full exact PR heads and main native CI/ordinary guarded release. Other five source/test blobs remain as reviewed. Original per-terminal overlap guard remains unchanged and independently reviewed. New runtime/hosted acceptance remains AWAITING LAB; browser native credential state is still blocked. No production business/settings/SMTP write, no transaction replay, no manual deploy. Current maina537a64b includes retained native multi-photo claim#2825 and independent VOICE durable-history claim#2822; no overlap with those owners or purchase supplier/lifecycle/wholesale work.

Same final consolidated checkpoint CHECKPOINTS/CHANGES/2026-10-19-central-overlap-unit-ui.md and original14 remain OPEN. This is a test-fixture compatibility extension within central cash ownership, not a new feature or LAB PASS. Next: green merged amendment before the one-path edit; full rerun without weakening runtime or assertions.

19/10/2026 15:20 Europe/Athens — ANDROID-CHAT-NATIVE-01 / multi-photo USER FAIL / diagnosis retained

Newest owner report: selecting multiple existing images shows sending but NONE arrives; selecting one image sends normally. This supersedes physical AWAITING DEVICE for the multi-photo trial with USER FAIL, not the earlier qualified single-photo/photo-view/push PASS. Offered trial was0.1.4/code5/artifact12178111030; installed version/hash, image count/MIME/sizes, selected queue label and HTTP result are NOT independently verified. No new test message or server write was performed by this page. Do not repeat successful old tests for paperwork.

ASSIGNED retained feat/android-chat-native-20261017; bounded diagnostic branch fix/native-multi-photo-user-fail-20261019. Read-only source review finds unconfirmed alternatives: all-or-reject selection at5 images/7MiB each/14MiB combined or MIME/provider rejection, and silent send busy guard during message GET. These are hypotheses, NOT reproduced causes and NOT fixes. Existing CI injects photo bytes into the Activity; it does not prove a valid gallery ContentProvider round-trip on the user's device. No speculative bundled change, increased memory bound, retry, auth/settings/server/API change or new APK is authorized by this evidence alone.

Protected: single-image delivery, caption once, ordered sends only after explicit ok/id receipts, unknown-outcome stop/no replay, tenant/store/session isolation, background/logout wiping, notification scope and unrelated owners. No new multi-photo manual PASS. Public0.1.3 distribution stays unchanged; do not install/re-send blindly. Single next action: establish whether the selected-image count remains in MW Chat and capture the non-sensitive visible result of the failed selection/send, then reproduce that exact boundary with an isolated content-provider/transport test before one bounded correction. Whole native/N16 remains OPEN; replies/voice/iOS and prior negative/device/signing work remain with their existing owners.

19/10/2026 — ANDROID-CHAT-NATIVE-01 / multi-photo0.1.4 SOURCE + ARTIFACT TECHNICAL PASS / AWAITING DEVICE

Retained native owner feat/android-chat-native-20261017. Before-source claimPR2825 green/main a537a64b; sourcePR2826 mergedc2e83c00, pre-delivery caption follow-upPR2830/head114b5ad72c3483c0470d73abb95efb143d0e4e1c mergedfb11a314ec1414658d0840a61f812f42058aa5a0. Follow-up fullPRCI39231252797 SUCCESS3356PASS/0FAIL/0SKIP+6backup; exact final mainCI39232187262/job117995130777 SUCCESS3377PASS/0FAIL/0SKIP+6backup, all Windows/build/nativeSQL/browser/invariant/HTTP checks. Android39231252710 SUCCESS22unit+12API30instrumentation/build/lint, zero failures/skips. Other owners' source and qualified acceptance preserved.

Trusted artifact12178111030 is verified0.1.4-preview/code5/packagegr.myworkstation.chat.preview; APKv2 RSA signature/full content digest/certificate/binary manifest/PhotoBatch DEX and ZIPdigest validated. Exact Android tree9eb7f064cc73e69506aebfd154053daea3f28836 equals merged main. Durable direct trial APK replaces the previous native deliverable as version6. Earlier APK2d4ab2 candidate superseded before delivery. Exact hashes/signer/bytes/CI/delivery/public-health metadata: CHECKPOINTS/EVIDENCE/native-multi-photo-20261019/artifact.json. Public QR/install manifest remains0.1.3 until separate distribution review after physical acceptance. No server deploy by this page; no production message/read/push/business action. New Preview signer differs, so an installation conflict may require removal of MW Chat Preview only, re-login and notification reactivation; never remove POS. Stable signing stays OPEN.

Implemented: select up to5 gallery images (7MiB each/14MiB combined), secure preview/remove, sequential separate-message sends, caption only on first confirmed image. Stop on unknown outcome without replay; review history/discard. Newly typed NEXT draft is retained, never sent by subsequent image callbacks. Selected bytes clear on consumption/remove/replacement/background/logout/navigation; existing scope/settings/session/camera flow retained. Technical tests are NOT physical/forensic/all-device PASS. No CI-only manual entry.

Completed implementation removed from current pending implementation scope; native owner retains physical acceptance and unfinished negative/session/privacy/camera/device/signing/iOS work. Replies and voice messages are approved but NOT IMPLEMENTED, need their own published backend-compatible scopes; no PWA/N16/AI takeover. Single next action: owner installs this exact trial0.1.4, selects LAB, reviews and sends two non-sensitive existing images in one selection, verifies both separate messages at Admin. No old successful photo/push repetition for paperwork, no invoice/OCR/payment/stock/fiscal action. Whole native/N16 remains OPEN.

19/10/2026 12:02 Europe/Athens — ANDROID-CHAT-NATIVE-01 / multi-photo selection ASSIGNED before source

Retained native owner feat/android-chat-native-20261017; source branch feat/native-multi-photo-20261019. Owner explicitly says START after proposal for replies, multiple photos and voice messages. First bounded causal slice is native multiple-photo selection, review/remove and sequential individual-message sends through the EXISTING one-attachment Chat API. Up to5 selected images and aggregate14MiB memory bound, each at most7MiB; no persistent URI permission/cache/gallery export/history. Server continues to receive one attachment per message; no fake album/atomic group claim. Text belongs to first confirmed send only. Per-image response must confirm ok/id before advancing; unknown outcome stops and preserves existing history-review/discard safety. No automatic retries or fabricated idempotency promise. Logout/background/store/tab change wipes private images and cancels further sends. Settings denial prevents sending; normal camera and single-photo flows remain compatible.

Independent native-only extension: android/app/src/main/java/gr/myworkstation/chat/MainActivity.java, new bounded in-memory photo queue and focused unit/instrumentation tests, Android README/version metadata when release ready. No existing PWA/N16/backend/AI ownership transfer, route/schema/DB/module/credential/deploy modification in this slice. Actual replies and voice recording/playback need separately published backend-compatible claims after this slice; not implemented or accepted by this claim. Preserve earlier limited native photo, login/2FA/store/push/logout/screenshot/AI display USER PASS and their explicit limits. No real messages/read/push/business action by agent for validation.

CLAIM / NOT IMPLEMENTED / NOT TESTED. Publish green/main before source. Require bounded memory/wiping, rejection/no partial selection, failure/unknown stop, per-photo progress and lifecycle/store fencing, build/lint/Android tests and full applicable CI. Signed APK distribution and actual device acceptance remain separate from source checks; no USER PASS from CI. Current native0.1.3 remains installed until a verified new artifact is available. Single next action: merge claim, then implement native multiple-photo queue only. Owner retained; unfinished replies/voice/negative/privacy/camera/signing/iOS remain OPEN.

19/10/2026 11:55 Europe/Athens - COORD PHASE5 / CLOSED SHIFT OVERLAP AND PRODUCT UNIT UI / ASSIGNED BEFORE SOURCE

Retained central owner codex/central-four-streams-20261018, issues #2704-#2707. Baseline c13c647c766ac08abeb678c3fd8dee8d1db48e29, after independent lifecycle worker leases #2816, purchase-supplier-correction claim #2817 and native sales-display USER PASS #2818. Before publication reconciled newer main cff103c5cbb4da9cc790a2473af8f1240ad796f1 and personal wholesale inactive-module proof #2820 without repeating its accepted login/actions. Current AGENTS, complete common records, numbered checklist, phase3/4 checkpoints, relevant manuals and history since receipt #2798 reviewed. Existing source/release and scoped LAB/USER PASS remain protected. Browser getState still refuses native credential-state resumption; no bypass, credentials read or new LAB PASS. This is a bounded continuation of central reporting/unit ownership, not a takeover of invoice, lifecycle, Workforce, VOICE wording, native or wholesale scopes.

Two actual local reproductions, NOT hosted failures: unchanged dailyCashReportReadiness accepts same MAIN CLOSED07-23/15-23/23-next07 as ready=true with no holds, permitting aggregation despite overlap. Independent second worker confirmed, while adjacency and different-terminal controls stay ready. Actual esbuild-compiled SalesAssistantEvidence plus React rendering shows PIECE and KG matched rows identically as bare quantity1.5; canonical server rows/CSV already preserve the unit from phase4.

- WS1 ASSIGNED codex/central-closed-shift-overlap-20261019: ONLY server/src/services/automatic-report-policy.js and NEW server/test/automatic-report-overlap.test.js. Detect positive UTC interval intersection among valid CLOSED rows of the exact same terminal, after existing tenant/day/identity validation; use existing SOURCE_SCOPE_OR_ID_INVALID HOLD and UI explanation. Copy-sort with running maximum end or equivalent correct nested-interval detection; never mutate source rows/order. Adjacent endpoints remain valid, zero-duration empty intervals retain existing semantics, distinct terminals may run concurrently, invalid/future rows retain existing HOLD handling. No artificial continuous-coverage rule, employee attribution, new sums or source SQL. Meaningful policy+actual source tests must suppress daily/weekly/monthly groups and monthly operatorSummary for overlap, while preserving PROVISIONAL finality, originals, cap, carry-in, DST and controls.

- WS3 ASSIGNED codex/central-overlap-native-20261019: ONLY server/test/automatic-report-source-postgres.test.js. Extend actual isolated Prisma/PostgreSQL fixture to prove same-terminal closed overlap HOLD/groups:null with immutable before/after record snapshots, restoring fixture timestamps before existing tests. Preserve adjacent and distinct-terminal positive controls and all earlier auth/scope/open/carry-in cases. No production fixtures, Prisma/schema/source edits or business writes.

- WS4 ASSIGNED codex/central-product-unit-ui-20261019: ONLY client/src/components/voice/SalesAssistantEvidence.jsx and NEW server/test/assistant-product-unit-ui.test.js. Display an explicit unit cell in matched product evidence; recognized units may receive existing-style Greek labels, while null/missing remain unrecorded and unknown raw units remain visible and React-escaped without conversion or guessed pieces. Preserve signed/fractional quantity and amount formatting, canonical rows, limited/ambiguous/no-match suppression, store/date/context text and existing overflow. Test the actual compiled JSX rendering, all four canonical units, unknown/null/missing, escaping, signed quantities and unchanged money/suppression. No parser/chat/calendar/native/auth/provider/server/export changes.

- WS2 internal independent review: read-only supplier/core/CSV audit found no new justified supplier runtime defect; nine pure tests passed and a missing-zod import was an installation limitation, not a source failure. After dependencies are installed rerun relevant suites and independently review cash/unit patches. No overlap with the new posted-order supplier correction owner or Task29/30/invoice/wholesale owners.

Root alone shared records, checkpoint, PDF, integration/publication. Exact proposed source paths: two runtime and three test files above. Require this claim green merged main BEFORE edits. Then focused tests, independent review, full exact PR/main native PostgreSQL/HTTP/Windows/Chromium/build/invariants, ordinary guarded exact release and independent public health. CI is not LAB PASS. No manual deploy or production financial/stock/fiscal/shift/payroll/settings/recipient/SMTP/order/schema action; no accepted transaction replay. No automatic email enablement or sending.

Original14 #13 comparable periods remains OPEN: old advanced-report UTC-duration comparison is outside this bounded change and existing Gate7 PASS remains protected. No staffing recommendation or physical-delivery assertion. Existing MONTHLY/supplier/hourly/product/coverage grouped read-only acceptance remains AWAITING LAB where not superseded by exact scoped real evidence. Final one consolidated receipt updates active/pending/tracker, this checkpoint, original14 map and common PDF. No CI-only manual entries. Central owner remains assigned until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-central-overlap-unit-ui.md. Next action: green merged claim, then the two bounded fixes with native and independent review workers.

19/10/2026 11:50 Europe/Athens - WHOLESALE-OWNER-STANDALONE-LAB-01 / LIMITED PERSONAL LOGIN + INACTIVE MODULE LIVE PASS

Retained owner codex/wholesale-suite-20261017; baseline main43a3f3ac8b1d5908a29d39cdc91f153661c47228. Latest wholesale receipt PR2814 remains protected; independent lifecycle PR2813/2815 changes were read and preserved. Fresh public no-cache health after observation returned oktrue/version0.22.0+kat-test-pos/exact8e6dcafaadb86e933ce0f6b903cd33a85df5b012, curl exit0. No source/runtime/schema change and no deployment in this phase.

Actual Cloud Chrome / standalone https://myworkstation-app.onrender.com/wholesale /19/10/2026 08:50:02.697UTC: secure personal login now positively displays Υπεύθυνος Εργαστηρίου, Αποσύνδεση and Σύνδεση λογαριασμού. The page displays Το πληρωμένο module Χονδρική B2B δεν είναι ενεργό and Επανέλεγχος πρόσβασης; private manager/site/seller workspace and store picker do not render. LIMITED LIVE UI PASS only for this actual personal login and inactive-module refusal in the standalone entry. This supersedes the earlier untested personal-login part of PR2814, but does not close active-module management/store selection, portal, seller/customer orders or commercial standalone acceptance. Prior embedded limited PASS and all inactive membership/assignment/module restoration remain protected.

Authentication history: first secure attempt reported submitted but left login with Super Admin2FA link, so it was not called success. User said the secure form was not visible and requested it again; second request positively reached the named personal Owner. No credential values were read, copied or published. Screenshot was visually observed in browser; its requested shared-file copy did not synchronize within5seconds, so no downloadable image is claimed or attached. Exact non-secret visible DOM is in CHECKPOINTS/EVIDENCE/wholesale-owner-standalone-20261019/acceptance.json. No live module/member/assignment grant, account/customer/site/order, pricing/stock/payment/fiscal/shift or production SQL/migration/seed action occurred. Normal authorized sign-in may create the normal session/audit; no business-balance deltas were measured or inferred.

PREPARED NEXT ACTION / AWAITING ACTION-TIME CONFIRMATION: temporarily enable ONLY the existing WHOLESALE_B2B module for MYWORKSTATION LAB, test this existing personal Owner's /wholesale active store picker and manager tabs read-only in exact ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, then restore the module inactive and verify fresh denial. No membership/assignment/customer/site/price/order change. Before any activation, require exact current platform company/license/module/control baseline and preserve all other modules/terms; abort on drift or wrong identity/company. The current record prepares the test; it does not authorize or perform an access grant. Browser safety requires action-time confirmation for creating/expanding sensitive access. Existing broader continuation approvals are retained for source/reversible/read-only work. No grant will be made while awaiting confirmation.

Common checkpoint/active/KAT/tracker/pending/README/manual/PDF synchronize this limited observed PASS. Whole wholesale/site/field sellers/offline/custom domain/commercial packaging remains OPEN/ASSIGNED. Single next action obtain the bounded temporary LAB module confirmation, then capture the fresh platform baseline before saving that one change; retain coordinator until named handoff. No completed transaction or old accepted grant test is repeated solely for documentation; this is the newly delivered standalone personal entry acceptance.

19/10/2026 11:41 Europe/Athens — PURCHASE-SUPPLIER-CORRECTION-01 / ASSIGNED / NOT TESTED

Owner fix/purchase-supplier-correction-20261019. Explicit user request: implement the supplier correction needed in the existing order, after confirming this is a program change rather than a new invoice/payment. Independent bounded scope: privileged selected-store BackOffice correction of supplier association on an existing incoming POS order and its original/internal documents, including FINAL, with preview, required original review/reason, explicit existing-payment association acknowledgement, stale/concurrent/idempotent guards and immutable audit. Preserve all document/order/line/file/job/payment identities, monetary/shift/operator/method/date/key fields, stock/posting/history and external invoice identity. No reopening/reposting, new payment, direct production SQL repair, Supplier VAT overwrite, learning migration or broader Gate3/duplicate/reopen takeover. Existing owners retained.

Baseline main43a3f3ac8b1d5908a29d39cdc91f153661c47228; current AGENTS/tracker/pending/active/numbered/invoice manual, reopen and cross-supplier checkpoints/history read. Existing reopen intentionally fixes supplier identity and duplicate correction rejects posted sources; neither accepts this independent single-posted-order correction. Screenshot USER FAIL confirmed by source: metadata PATCH requires POS order NEW then source DRAFT without payment, although FINAL editor enables supplier field. Previous lifecycle fix remains closed. New supplier correction NOT TESTED; no business mutation performed. Claim must merge before source/state-changing LAB. Tests must cover registered routes/real PostgreSQL atomic docs/payment association, full snapshots, no monetary/stock deltas, rollback/replay/concurrency/stale/foreign/POS/settled/credit refusals and mounted confirmation/cancel/store fences. Full PR/main CI, exact ordinary guarded release and actual scoped preview acceptance required. Actual legitimate correction remains a deliberate user-reviewed action. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-purchase-supplier-correction.md.

19/10/2026 — ANDROID-CHAT-NATIVE-01 / limited USER PASS sales display; natural wording OPEN

Retained native owner feat/android-chat-native-20261017. User08:44 reports selected Διαδόχου Παύλου: sales question returned «Μη συνδεδεμένη πηγή», cash query displayed results. At08:53:47 explicitly identifies MW Chat Android → Βοηθός AI;08:59:14 supplies exact question «τι πωλησεισ ειχα σημερα». At10:05:05, after instruction to use «Πωλήσεις σήμερα», confirms «το εβγαλε». LIMITED USER PASS: result displayed through native Assistant for that selected store and wording. Exact amount/rows, canonical report reconciliation, physical device/OS/APK hash and revision at the user action were not independently captured; no financial accuracy, whole AI, all-store or LAB PASS inferred. Cash display is a user observation only, not measured correctness. Do not repeat queries or transactions merely for documentation.

Read-only local reproduction on main5bae2ece470e3e72e3e4bb9a1b7c289359821386: plainTotalSalesRequest returns null for both exact unaccented «τι πωλησεισ ειχα σημερα» and accented «τι πωλήσεις είχα σήμερα»; «Πωλήσεις σήμερα» returns mode all/names[]/from=to=2026-10-19 with fixed now2026-10-19T05:59:14Z. This proves a deterministic wording gap, not the exact unseen provider response or sole runtime cause. Native MainActivity submits question/inputChannel text/readScope selected_store/history, selected companyId/storeId and snapshot null to existing /api/platform/ai-command-center/ask; same server session/selection/evidence boundaries are retained. No API credential or private response was read and no real ask/message/read/push/business command was submitted by this page.

Current diagnosis baseline43a3f3ac8 after preserving newer lifecycle/wholesale/central receipts. Backend conversational source remains assigned codex/assistant-business-queries-20261015; central product-unit/report ownership also retained. This receipt does NOT transfer or duplicate their source scope. Natural wording remains OPEN and is recorded for the existing assistant owner to handle with exact user phrase plus filter/date/store-scope regressions under a published bounded claim. No code/APK/environment/deploy change in this receipt. Native source continues to require selected store; staff AI rights are not broadened.

Completed native initial read-only result-display acceptance is removed from current pending work. Broader numerical/source/AI/negative/privacy/device/camera/signing/iOS acceptance remains OPEN under native owner. Single next action: existing assistant owner reconciles this exact natural-language gap and publishes its bounded source claim; native owner retains integration/device acceptance after the ordinary verified release. All earlier scoped Chat/photo/push/2FA/logout PASS and other owners remain protected.

19/10/2026 11:19 Europe/Athens — STORE-LIFECYCLE-EMPTY-SCOPE-01 / CLOSED LIMITED LIVE PASS

Owner fix/lifecycle-empty-scope-20261019; explicit owner transfer10:43:31Athens, claimPR2812 green mergedfd5b0d8 before source. SourcePR2813 original7110c380/fullCI39218591669 SUCCESS3328PASS/0FAIL/0SKIP+6backup; combined heada42c9418936c5c09e2b2682458b5d841ef74cc37/fullCI39219753165 SUCCESS3328/0/0+6backup after preserving concurrent lifecycle/wholesale records and regenerating PDFs. Merged8e6dcafaadb86e933ce0f6b903cd33a85df5b012. Exact mainCI39220572604/job117954898735 SUCCESS3328/0/0+6backup/all Windows/build/invariants/realHTTP checks. Ordinary guarded deployment39221446917 SUCCESS; Renderdep-dbat3ibbc2fs73cmp48g LIVE08:17:58UTC. Independent public health after release:oktrue/version0.22.0+kat-test-pos/exact8e6dcafaadb86e933ce0f6b903cd33a85df5b012.

Observed LIVE11:18–11:19Athens, desktop support SUPER_ADMIN / Περίπτερο Διαδόχου Παύλου / DIADOXOU-POS-01. Full reload after exact health, initial shifts load; opening Εμπορική λειτουργία -> Λοιπές εμπορικές λειτουργίες -> Παραγγελίες & Αγορές returned83records at11:18:58, Recovery scanned50/started0/no-handoff19/non-retryable0, no invalid-generation message. Close commerce and explicit shift refresh: brief loading then current table/updated11:19 with NO refresh error. Initial/final visible40transactions/cash2557.84/card106.50/IRIS0/sales192.40/expenses244.55/ownerIN0OUT0; no new transaction, upload, invoice approval/finalization, shift close, stock/fiscal or reset action was submitted. No new recovery job started. These visible values are navigation/readback evidence, NOT independent financial/stock/DB-digest reconciliation or proof about concurrent store activity.

Bounded cause/correction: an empty body.storeId was remembered as an empty store epoch, invalidating all later page headers. Only empty-string inferred scope is now skipped; original bodies/UUIDs/explicit persisted headers and immutable real-store epochs are unchanged. All server/tenant/auth/licensing/stale/maintenance guards remain. Existing contaminated tabs require one full reload; no storage clearing or data repair. New real loopback HTTP regression rejects the old implementation and passes corrected fresh/scoped recovery-to-shift reads and explicit invalid-header refusal. Local Node20.20.2:17PASS/0FAIL/2nativeSKIP; native cases ran in fullCI with zero skips.

CLOSED only this reproduced desktop support-navigation regression. Personal OWNER/operator/mobile/physical/offline end-to-end and all-store live acceptance NOT TESTED; existing generation/idempotency/offline safety automated regressions remain protected. Broader STORE-LIFECYCLE-01 cleanup/restore/spool work stays OPEN with feat/store-shifts-inventory-clear-20261018. Other owners retained. Manual docs/manual/store-lifecycle/PASS.md, active/checkpoint/tracker/checklist/PDF synchronized; this completed subtask removed from pending. Evidence CHECKPOINTS/EVIDENCE/lifecycle-empty-scope-20261019/{acceptance.json,orders.jpg,shifts.jpg}. No repeat of historical financial tests.

19/10/2026 — STORE-LIFECYCLE-EMPTY-SCOPE-01 / FULL SOURCE CI PASS / MERGE RECONCILIATION / AWAITING LIVE

Owner fix/lifecycle-empty-scope-20261019, explicit owner transfer19Oct10:43:31Athens; before-source claimPR2812 headb983fed871afce1eded284b9ffe7159ed7aec5aa, all4checks SUCCESS/SKIPPED as applicable, mergedfd5b0d8914371b92741d8b66b76eb1766e6e598e before source/test edits. Broader feat/store-shifts-inventory-clear-20261018 lifecycle assignment and all unrelated owners retained.

Bounded causal source: ignore exactly empty string body.storeId when inferring page epoch scope. Keep the original request/body, immutable valid-store map and explicit persisted headers unchanged. Server validation/tenant/auth/licensing/maintenance/stale guards remain untouched; no epoch upgrade, old offline retry, data repair, stock/payment/fiscal/shift action or reset.

New real loopback HTTP regression runs actual createLifecycleFetch -> header -> storeLifecycleRequestContext -> lifecycleContext: fresh and already-scoped pages, empty recovery POST then shift GET, unchanged payload/idempotency field, no empty onPinned event, and explicit malformed persisted header still400/no handler. Old source failed400 with STORE_LIFECYCLE_GENERATION_INVALID (7existingPASS/1newFAIL); corrected source passes. Final Node20.20.2 focused19tests/17PASS/0FAIL/2nativeSKIP. Initial broader attempt lacked the downloaded unchanged offline-sale-queue dependency; fetched the exact baseline file and reran successfully. Local native PostgreSQL remains unavailable; full native/build/Windows/HTTP CI required. This is not LAB/LIVE PASS.

LIVE FAIL before fix remains documented below: Diadoxou83orders load but recovery and later shifts reject invalid metadata. Corrected hosted flow NOT TESTED / AWAITING LAB. After green PR+mainCI and ordinary guarded exact release, open a fresh support Backoffice, inspect shifts, open purchase list and return to refresh shifts. Do not reopen/upload/pay/finalize old invoices. Existing contaminated tabs need a full page reload after release. No manual PASS until observed.

19/10/2026 10:50 Europe/Athens - WHOLESALE-STANDALONE-ENTRY-01 / SOURCE LIVE + NATIVE CI PASS / AUTHENTICATED LAB AWAITING

Retained owner codex/wholesale-suite-20261017. New standalone online entry https://myworkstation-app.onrender.com/wholesale is deployed in the SAME repository/service. It reuses the actual wholesale management/customer-site/seller suite, personal authentication and live paid WHOLESALE_B2B without retail CORE/POS/operator/shift bootstrap. Managers receive only minimal explicit company/store metadata after actual current session, role and entitlement checks, repeated after Store waits. Employees use existing seller assignments only. Explicit invalid/inactive/foreign store fails closed; no first-store/company fallback. No new schema, grant, provisioning or business write. Existing embedded entry and /b2b customer route remain protected.

Claim PR #2809 / head 525d6a47268f06ca06f1db74a3e2667e8357d558 green docs CI, merged 8048856a5cf8e828ac17b6691e00533e56fe6b13 BEFORE source. Source PR #2810 final head 58ed331a69476f4d2cbeb410f64aa0eb3f5d0f5c / full CI 39216511031 / job 117941744373 SUCCESS: 3319 PASS / 0 FAIL / 0 SKIP + 6 backup tests; merge c1227da690e35e698d069f081ce8f52dd94c4a8d. Exact main CI 39217334220 / job 117944377632 SUCCESS: 3319 PASS / 0 FAIL / 0 SKIP + 6 backup tests. All 12 reviewed runtime/test blobs verified after merge. Windows, actual native PostgreSQL/HTTP, builds, browser checks, production invariants, archive and real HTTP E2E passed. Local full Node20: 3115 PASS / 0 FAIL / 156 native SKIP; focused 47 PASS / 0 FAIL / 1 native SKIP including 12 mounted UI and 2 actual graph/HTML-route cases; build/TABLE_SERVICE PASS. Local native absence remains explicit. Only the native observation fixture changed after that local full run; corrected focused 7 PASS / 1 native SKIP and full PR/main native CI followed.

Initial head 22fdc9efae76222712da3d25d8333fa2d9541c5d / CI 39215831006 / job 117939586760 failed: 3317 PASS / 2 FAIL / 0 SKIP: one Store-wait observation plus parent. pg_stat_activity query text was inspected inside the holder's cached activity snapshot. A separate autocommit observer corrected that fixture; exact holder PID, Store-query predicate, actual expiry and required 401/403/no-private-response assertions retained. Original field_sales worker independently reviewed; corrected PR and exact main both execute the actual observed-wait/session/module expiry cases successfully. No failed run hidden, no assertion skipped/weakened and no runtime change needed for this correction.

Ordinary guarded release run 39218095705 / job 117946674138 SUCCESS pins revision c1227da690e35e698d069f081ce8f52dd94c4a8d; exact completed main CI above. Guard healthy at 2026-10-19T07:48:53.2737675Z. Independent public no-cache health at 2026-10-19T07:49:47.470335+00:00:HTTP 200 / ok true / revision c1227da690e35e698d069f081ce8f52dd94c4a8d, curl exit 0. No direct deploy/restart or freshness bypass.

Machine evidence:CHECKPOINTS/EVIDENCE/wholesale-standalone-entry-20261019/source-and-release.json.

Actual hosted observation at 2026-10-19T07:50:06.656Z / Cloud Chrome / exact safe URL https://myworkstation-app.onrender.com/wholesale: standalone heading and personal login form render, Email/password empty, connection button visible; no retail POS controls in this observed page. LIMITED LIVE UI PASS for public entry rendering ONLY; screenshot CHECKPOINTS/EVIDENCE/wholesale-standalone-entry-20261019/public-entry.jpg, usage in docs/manual/wholesale/PASS.md. No login submitted and no authenticated management/employee/customer portal/order acceptance claimed. Existing personal Owner/support-only/entry/navigation/seller limited PASS and inactive module/member/assignment restoration remain protected.

The mounted parent retains the same frozen suite child/key/body/principal through access loss and permits safe same-principal recheck/retry; order leaf components are stubbed in the parent-retention tests, so this is not a new order LAB acceptance. No new live module/member/assignment grant, account/password/customer/site/order, stock/payment/fiscal/shift action or production SQL/migration/seed occurred. Whole wholesale/site/field sellers, ordinary personal Owner acceptance, customer portal/order end-to-end, durable offline, custom-domain setup and standalone commercial packaging remain OPEN/ASSIGNED. No numbered item is closed from CI or public login rendering. Common active/KAT/tracker/pending/README/checkpoint/PDF are synchronized in this receipt; other owners and protected PASS remain intact. Single next action: separately bounded hosted acceptance with the correct existing personal Owner and exact store, then customer/seller order acceptance with fresh before/after evidence; any new provisioning/access change needs its own scope. Coordinator retained until completion or named handoff.

19/10/2026 10:43 Europe/Athens — STORE-LIFECYCLE-EMPTY-SCOPE-01 / EXPLICIT OWNER TRANSFER / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ feat/store-shifts-inventory-clear-20261018 — ASSIGNED fix/lifecycle-empty-scope-20261019, limited to the empty-storeId fetch metadata regression. The owner explicitly approved transfer here at10:43:31Athens («να μεταφερθει»). The broader STORE-LIFECYCLE-01 cleanup/restore/spool work and all other owners remain with their existing assignments. Baseline c1227da690e35e698d069f081ce8f52dd94c4a8d; reviewed existing lifecycle checkpoint and common records.

OBSERVED LIVE FAIL19Oct10:32–10:35Athens: Diadoxou support Backoffice initially loads DIADOXOU-POS-01 (32transactions/2538.14cash/92.60card/158.80sales). Opening Παραγγελίες & Αγορές loads83records, then reports Recovery error: Μη έγκυρη έκδοση καταστήματος. Subsequent shift refresh reports the same error and retains old totals. No sale/payment/stock/fiscal/shift-closing action was performed. Existing list load and initial shift read remain observed, not a financial reconciliation PASS.

CAUSAL SOURCE: createLifecycleFetch adds body.storeId whenever typeof is string, including the existing fast-recover body {"storeId":""}. The immutable page map acquires an empty key, rejected by normalizeLifecycleContext; all later API requests reuse it. The bounded correction excludes the empty string from newly inferred body scope. Preserve the body/UUIDs/explicit persisted headers, immutable real-store epochs, mutation-first legacy0/racing-handshake behavior, server validation, authentication/tenant/license/fiscal/cleanup protections. No server guard relaxation, automatic epoch upgrade, offline replay or data repair.

Files: client/src/utils/store-lifecycle-fetch.js; focused server/test/store-lifecycle-fetch.test.js regression using the real middleware/context; NEW checkpoint CHECKPOINTS/CHANGES/2026-10-19-lifecycle-empty-scope.md and common records/PDF. Acceptance: empty-body POST cannot pollute a fresh or already scoped map, actual server middleware accepts subsequent shift GET, old implementation fails, explicit malformed/persisted headers remain rejected/preserved and old epochs never upgrade. Require focused/full PR+mainCI, ordinary guarded exact release and read-only navigation acceptance. New source NOT IMPLEMENTED / local NOT TESTED /

corrected LIVE NOT TESTED. Claim must merge before source edits. No manual PASS until observed.

19/10/2026 10:07 Europe/Athens - WHOLESALE-STANDALONE-ENTRY-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained coordinator codex/wholesale-suite-20261017; claim docs/wholesale-standalone-entry-claim-20261019, planned source feat/wholesale-standalone-entry-20261019, baseline50d4b691780ec0a4066fe745d726efd869721059. Owner again requests continuation of approved wholesale + customer site + field sellers, usable separately from retail POS. Prior portal-store source/release/native proof PR2803/2805 and all qualified manual PASS/inactive grant restoration remain protected. Personal Owner/customer portal/order LAB acceptance is still OPEN: no new grants/provisioning are authorized by this claim. Preparing those prerequisites does not block this separately scoped, already requested standalone entry. No fresh hosted PASS is asserted.

Concrete gap: current BackOffice entry eagerly loads dashboard, employees, leaves, stores, general license and schedules and imports retail/POS/admin bootstraps. Standalone wholesale must use its own entry, the existing personal BackOffice authentication and live WHOLESALE_B2B entitlement, without a retail module, operator or shift. This slice provides an isolated /wholesale HTML/Vite entry and direct reuse of WholesaleSuiteWorkspace, existing management/site/assignment/seller APIs and canonical order core. It is a web entry in the SAME repository/service, not offline installation, custom-domain certification or a second product database.

Bounded API: NEW /api/wholesale/workspace manager bootstrap before general /api middleware. Require current actual BACKOFFICE_USER session, current role/version/password state and live paid entitlement; reject inherited support context for this personal entry. Strict union explicit scope=company for minimal active same-company store picker OR exact storeId; empty/array/foreign/inactive store fails closed. Return only safe current user/company, access and minimal stores; no products/payments/shifts/core license dependency. Locks and final live-clock/session check after any wait. Employees use existing seller context and active assignments only, never this manager list or management APIs. No new schema or grants.

Bounded client: blank personal login form via existing /api/auth/login, reuse normal session storage keys; MFA/setup or incomplete login never replaces existing context and links canonical https://myworkstation-app.onrender.com/platform-admin. Explicit company/store chooser, URL storeId is strict and never becomes company scope on invalid input; scoped bootstrap read before manager workspace establishes the existing lifecycle origin transport. Reuse existing lifecycle transport and BackOffice session-boundary utility without editing their owned internals. Scope/identity/access/expiry/focus/visibility refresh rejects late private data. Existing suite child, frozen order UUID/body/principal remain mounted and hidden during uncertain submission/access loss; disable logout/store navigation while locked and permit only same-principal reauthentication/retry. Idle identity changes clear prior private UI. No retail/POS/workforce bootstrap, service worker registration or credential values persisted beyond existing token/user session contract; no password defaults/storage. No new top-level duplicate wholesale button. Existing embedded entry remains unchanged.

Disjoint workers after this claim merges green: wholesale_core owns NEW server/src/routes/wholesale-workspace.js and focused non-native contract tests if needed; b2b_site owns NEW client/src/components/wholesale/WholesaleApp.jsx, wholesale-api.js, wholesale-app.css and server/test/wholesale-standalone-ui.test.js; field_sales owns NEW server/test/wholesale-standalone-http.test.js with actual isolated PostgreSQL/HTTP auth/session/role/store/license proof. Root alone additive server/src/index.js registration/HTML route, client/vite.config.js input, NEW client/wholesale.html and client/src/wholesale-entry.jsx, NEW server/test/wholesale-standalone-entry.test.js dependency/route proof, integration/review/common records/PDF/publication. Existing auth, licensing, lifecycle, wholesale pricing/orders/seller/portal runtime files remain unchanged. Other central/POS/lifecycle/native/VOICE owners preserved.

Acceptance: wholesale-only company without CORE/retail grants or shifts opens valid management metadata, strict foreign/empty/inactive/unknown query and revoked/expired/wrong-role/session/support denials, no private response after observed store-lock expiry, unchanged synthetic business controls;

employee never requests manager APIs. Mounted blank/MFA/login races, explicit chooser and URL scope/stale responses, grant expiry/revocation, current session/company changes, actual retained frozen child and original-key/body retry. Built standalone graph excludes retail/POS/BackOffice root bootstraps and preserves existing entries/routes. Require focused/build/full exact PR and combined main native CI, ordinary guarded exact source/health, then separately scoped hosted acceptance. CI remains AWAITING LAB, no manual PASS from simulations. Source PR keeps own active/KAT/checkpoint in-place; final receipt synchronizes roadmap/PDF to avoid concurrent common PDF conflicts. Whole wholesale/site/orders/offline/standalone commercialization remains OPEN/ASSIGNED. Next action green merge claim BEFORE any source/test edit, then bounded standalone implementation.

19/10/2026 09:32 Europe/Athens - WHOLESALE-PORTAL-STORE-01 / CODE LIVE / NATIVE CI PASS / AWAITING LAB

Retained owner codex/wholesale-suite-20261017; receipt docs/wholesale-portal-store-receipt-20261019. Before-source claimPR2801 headed4becd6f93da100c4f5cb94ea6dfcb0903dfd9c/CI39206831924 all3applicable checksSUCCESS/fullbuildSKIPPED, merged5bae2ece470e3e72e3e4bb9a1b7c289359821386 before source. SourcePR2803 headadfa35e074018a69292aff4cfaf8ae5ebb1c694f/fullCI39207507015/job117913598837 SUCCESS3280PASS/0FAIL/0SKIP plus6backup/all checks, mergedc0645d5389864d558fe0be9ceb148b26171cb2c8. Exact combined mainCI39208177280/job117917469104 SUCCESS3281/0/0 plus6backup, preserving independent lifecycle worker sourcePR2802/affc90b. All4owned runtime/test blobs identical in the later live revision; other owners and acceptance remain theirs.

Ordinary release: c064guard39209436882/job117919358017 correctly declined stale deployment because newer lifecycle sourcePR2804/198dcb0 was on main; no manual deploy or bypass. Actual released source198dcb058333477206d4428341c3dc554f30823f, exact candidateCI39209182817/job117919475415 SUCCESS3283/0/0 plus6backup/all checks; ordinary guard39210029017/job117921166665 SUCCESS pinned that source. Independent public no-cache health2026-10-19T06:32:29Z returned oktrue/version0.22.0+kat-test-pos/exact198dcb058333477206d4428341c3dc554f30823f, curl exit0. Full IDs/blob hashes/qualified proof in CHECKPOINTS/EVIDENCE/wholesale-portal-store-20261019/source-and-release.json.

Delivered bounded account-store contract: GET accounts requires an active owned store, with company-wide reads only by explicit scope=company. PATCH activation/password matches the selected store and immutable account binding under locks before any account/session mutation; final live-clock entitlement recheck closes expiry during a Store-row wait. Client account list/create/toggle/password and publication follow the same valid selected store; empty/foreign/inactive scope never falls back, sibling rows are filtered, late A-B-A reads/write acknowledgements/errors are ignored and changed entry/permissions remove old credential forms. Company-wide site settings are labeled explicitly. Existing manager/tenant/license guards, account bindings, password hashing/revocation and shared order/pricing/idempotency remain protected.

Technical proof only: focused26PASS/0FAIL/1nativeSKIP, mounted portal admin8PASS; correct server-working-directory full local3090PASS/0FAIL/148infrastructureSKIP and frontend/TABLE_SERVICE build PASS. Earlier root-working-directory run had18 legacy path-resolution failures and was corrected, not counted as a passing suite. Native actual HTTP/SQL tests executed PASS in full CI: strict missing/empty/array/foreign/inactive/sibling scope denial, explicit company read, every account/session digest unchanged after denied activation/password writes, observed Store-lock deactivation refusal and actual paid-expiry wait403/no private response, valid revocation/no old-session revival. Original UI/core workers reviewed; backend post-wait expiry finding corrected and re-reviewed before source publication.

HOSTED/LAB portal account acceptance NOT TESTED. No new live grant, user/password/account/site/customer/assignment/order or financial/stock/fiscal/shift action, production SQL/migration/seed, direct deploy/restart. Prior limited entry/navigation/personal seller PASS and prior inactive restoration are retained; no successful grant/business test is repeated. No new manual PASS is added from CI. Ordinary Owner acceptance, customer portal/order end-to-end, durable offline and standalone wholesale access without retail POS remain OPEN/ASSIGNED. Single next action prepare a separately bounded hosted selected-store account acceptance and customer-portal flow using the correct existing personal Owner; any new provisioning/grants require their own explicit scope and before/after checkpoint. No automatic access expansion. Coordinator retained until named handoff.

19/10/2026 08:50 Europe/Athens - WHOLESALE-PORTAL-STORE-01 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained owner codex/wholesale-suite-20261017; claim docs/wholesale-portal-store-claim-20261019, planned source fix/wholesale-portal-store-20261019, baseline c01b53832ff71ac450b3308203a92092d12a02ad. Owner requests continuation. Read current AGENTS, common boards/checklist, owned checkpoints/manual and history since PR2793. Preserve completed limited support entry/personal seller/navigation PASS and final inactive module/member/assignment restoration; ordinary Owner acceptance and whole wholesale/site/orders/standalone remain OPEN. Other lifecycle/POS/native/central/VOICE owners and their source are retained.

Read-only source finding: WholesalePortalAdmin loads /accounts without store; server GET returns all company accounts and PATCH only checks company. This is a selected-store contract defect, not evidence of cross-tenant access or a hosted account leak. Bounded change: GET accounts requires explicit valid active same-company storeId, with company-wide read permitted only by explicit scope=company; no empty/invalid/missing selection fallback. PATCH activation/password requires explicit storeId and matches the immutable account store under transaction locks before changing account/session state. POST retains explicit immutable customer/store provisioning and existing authorization/license/session fences. No schema migration. Client account list/create/reset/toggle follow its selected valid store; reject stale old-store results/write completions, clear old forms on context changes, avoid first-store fallback. Global site settings remain explicitly company-wide. Publication behavior, shared order/idempotency/pricing, personal seller authorization and frozen requests remain protected.

Files limited to server/src/routes/wholesale-portal-admin.js, client/src/components/commerce/WholesalePortalAdmin.jsx, relevant registered server/test/wholesale-portal-{http,admin-ui}.test.js plus a focused new test if needed; checkpoint CHECKPOINTS/CHANGES/2026-10-19-wholesale-portal-store.md and common records/generated tracker PDF. Source PR keeps active/KAT/checkpoint updates within this owned section, with final common roadmap/PDF synchronization in the release receipt to avoid unrelated concurrent prepend conflicts. This claim must be green merged main BEFORE source edits.

Acceptance: mounted valid selected scope, missing/invalid/inactive scope with zero private account calls, synchronized account/create store selection, foreign/sibling account filtering, delayed list/write/error/store changes and credential clearing only on acknowledged current-scope success; actual native HTTP/SQL list and PATCH missing/empty/array/foreign/inactive/sibling rejection, explicit central read, unchanged denied account/session controls, current entitlement/session revocation and existing portal/order tests. Require focused/build and full native PR/main CI, ordinary guarded exact release/health before hosted acceptance. CI/local remain AWAITING LAB. No new live grants, users/passwords/accounts/customer/site/orders, business/stock/payment/fiscal/shift writes, production SQL/seed/migration, manual deployment/restart or new infrastructure. No manual PASS until observed. Single next action green merge this claim, then implement and validate exact portal-account scope; retained coordinator until named handoff.

19/10/2026 02:00 Europe/Athens - COORD PHASE4 / HOURLY AND PRODUCT UNIT SOURCE LIVE / AWAITING LAB

Κεντρικός owner codex/central-four-streams-20261018, issues #2704–#2707, τέσσερις εσωτερικοί agents. Τέταρτη περιορισμένη παράδοση· τα αρχικά14 παραμένουν συνολικά OPEN και όλες οι ανεξάρτητες αναθέσεις/περιορισμένα PASS διατηρούνται. Η παρούσα καταγραφή αντικαθιστά μόνο τα phase4 SOURCE PREPARED / CI PENDING / RELEASE PENDING παρακάτω.

Παραδόθηκε προαιρετική ωριαία κίνηση από την ίδια πλήρη canonical SQL πηγή πριν από το όριο10000 ομάδων προϊόντων: explicit περίοδος Ελλάδας και επιλεγμένο ενεργό κατάστημα ίδιας εταιρείας,

μοναδικές πωλήσεις/επιστροφές, signed ποσότητες χωριστά ανά αρχική μονάδα/null, UTC buckets και πραγματικό Athens offset για DST. Άγνωστες/κενές μονάδες παραμένουν διακριτές. Όρια8785 ωρών/32 μονάδων ανά ώρα, SQL JSON preflight/filter και ακριβώς ένας metadata carrier ανεξάρτητα από θέση ισόβαθμης γραμμής. Η οθόνη δείχνει100 ώρες ανά σελίδα με scope/generation guards. Default report, χρήματα, product CSV και drilldown διατηρούνται. Δεν προστίθεται σύσταση στελέχωσης ούτε άθροισμα διαφορετικών μονάδων.

Η matched προβολή προϊόντος του assistant διατηρεί πλέον την canonical μονάδα μέχρι πίνακα/CSV, συμπεριλαμβανομένων null/unknown και παλιού απόντος πεδίου, χωρίς εικασία τεμαχίων ή αλλαγή ποσοτήτων. Ανεξάρτητα VOICE/chat/context αρχεία δεν άλλαξαν. Ο έλεγχος cash/supplier διατήρησε τα προηγούμενα παραδοτέα και την καταγεγραμμένη κατάσταση πραγματικής αποδοχής τους· δεν εντοπίστηκε νέο τεκμηριωμένο σφάλμα στα ανατεθειμένα scopes.

Claim#2794/headc8195b98b147dc60ce02aff097caf2656d3a076a/docsCI39172436603 SUCCESS mergeddd9b357563f705a9d7f6260571a27c78146fa110 πριν κώδικα. Το rollback artifact και οι ακριβείς χρόνοι βρίσκονται στο machine evidence.

Τοπικά Node20.20.2:43PASS/0FAIL/0SKIP και frontend build PASS. Actual production SQL σε απομονωμένο PostgreSQL-WASM και mounted router PASS, περιλαμβάνει multiline baskets, signed χωριστές μονάδες, DST,10001 products,33-unit refusal και αμετάβλητα fixture digests. Ο native Prisma wrapper τοπικά ήταν SKIP χωρίς DATABASE_URL· εκτελέστηκε επιτυχώς στο πλήρες native CI, χωρίς να αποκρύπτεται το τοπικό όριο.

Η νέα ωριαία προβολή και η νέα product-unit διασταύρωση παραμένουν AWAITING LAB. Browser observation blocked: native credential state cannot be safely resumed. Καμία παράκαμψη, εξαγωγή credentials ή κατασκευασμένο screenshot/PASS. Δεν προστίθεται CI-only manual. Daily/weekly HOLD/provisional#2743, προηγούμενα αποδεκτά τιμολόγια/πληρωμές/διορθώσεις, νεότερο native-chat USER PASS#2795 και οι ανεξάρτητες qualified αποδοχές διατηρούνται. Καμία παραγωγική οικονομική/stock/fiscal/shift/payroll/settings/recipient/SMTP/order/schema πράξη ή replay από τον συντονιστή.

Επόμενη μία ενέργεια: συγκεντρωτική read-only αποδοχή με υποστηριζόμενο ασφαλές authenticated browser, από https://myworkstation-app.onrender.com/platform-admin, στο ίδιο υπάρχον LAB κατάστημα/διάστημα/προϊόν: Αναφορές → Στατιστικά πωλήσεων, explicit Ώρα Ελλάδας/Ωριαία κίνηση, συμφωνία ωριαίων counts με πλήρη πηγή, χωριστές signed μονάδες και σύγκριση ίδιου προϊόντος στον assistant/πραγματικό product CSV. Pagination/DST μόνο όπου υπάρχει κατάλληλο υπάρχον ιστορικό, αλλιώς NOT TESTED. Χωρίς Save/νέα δεδομένα/πληρωμή/βάρδια/replay. Το προηγούμενο grouped MONTHLY/supplier/coverage acceptance παραμένει ανοικτό όπου δεν υπάρχει νεότερη πραγματική scoped αποδοχή. Κεντρικός owner παραμένει μέχρι ολοκλήρωση ή ονομαστικό handoff.

Ακριβής14map:CHECKPOINTS/CHANGES/2026-10-18-original14-status.md. Machine evidence:CHECKPOINTS/EVIDENCE/central-four-streams-20261018/phase4-source-release.json. Συγχρονίζονται ενεργή λίστα, pending, tracker και κοινό PDF στην ίδια συγκεντρωτική καταγραφή.

19/10/2026 01:26 Europe/Athens - COORD PHASE4 / HOURLY ACTIVITY AND PRODUCT UNITS / ASSIGNED BEFORE SOURCE

Retained central coordinator codex/central-four-streams-20261018, issues#2704-#2707/original14#3,#14; owner again says START. Baseline main4604f00cde4e1caeb64397e7928bc63967f2f434, history since phase3receipt9431216 reviewed. Before source reconciled with maina875024cfa1d4ddc9916d95bfb2d96de3626bf11: independent lifecycle source0c03 and qualified wholesale UI receipt#2793 retained without repeating accepted actions. Four internal workers; root alone shared records/PDF/publication/integration. Existing cash/supplier runtime review found no new justified defect; their delivered MONTHLY/supplier/CSV acceptance remains AWAITING LAB. This bounded independent analytics/unit continuation does not replace the required grouped acceptance or repeat accepted transactions.

- Backend ASSIGNED codex/central-sales-hourly-20261019 (WS3): server/src/routes/kiosk-reports-sales-v4.js and NEW server/test/kiosk-sales-hourly.test.js. Optional includeHourly=1 only with explicit Europe/Athens calendar and selected active same-company store. Preserve old no-timeZone/default response, product money/coverage/limit/filters/CSV/drilldown. Derive observed UTC-hour buckets from the SAME full filtered SQL base before10000product cap, true distinct normal/reversal baskets and signed normal/reversal/net quantities grouped separately by original unit/null. Never add kilograms to pieces. UTCfrom/to plus Athens localStart and offset distinguish repeated autumn hours; spring missing hour is not invented. Bounds8785hour buckets/32unit groups per bucket, safe counts, finite quantities, source-count consistency, strict interval/scope; fail closed on inconsistent metadata. Attach large hourly JSON only once on first row/empty sentinel, never repeat across10000products. No staffing recommendation, fiscal certification or money computation added.

- UI ASSIGNED codex/central-hourly-view-20261019 (WS1 internal integration role): client/src/components/commerce/installKioskReportsSalesV4.js and NEW server/test/kiosk-sales-hourly-ui.test.js. Optional hourly checkbox defaults unchecked, disabled until explicit Athens and selected store. Include flag on list request only, not drilldown. Show observed hourly counts and original per-unit signed quantities with applied period/search, explicit full-filtered scope, offset labels, missing/invalid warning rather than fake zero. Validate producer metadata/request period/store/count sums/units/limits; preserve product cards, existing product CSV schema, default timezone, actual tab/store request-generation guards. No new hourly export or staffing conclusion.

- Native proof ASSIGNED codex/central-hourly-native-20261019 (WS2 internal integration role): NEW server/test/kiosk-sales-hourly-postgres.test.js only. Actual Prisma SQL and mounted HTTP fixture, separate schema, multiline basket=1, reversals, PIECE/KG/LITER/PACKAGE/null, exact half-open bounds/observedThrough, q/product/promotions filters, company/store/active/role/timezone rejection, both2026DST transitions, empty source and10001product groups with full hourly coverage. Compare unchanged fixture digests; no production data/test fixtures.

- Assistant ASSIGNED codex/central-product-unit-20261019 (WS4): server/src/services/owner-sales-tools.js, server/test/sales-assistant-coverage-contract.test.js and optional NEW server/test/assistant-product-units.test.js. Verified source projection omits canonical unit even though report table/CSV expects it. Preserve unit when present, null/unknown stay explicitly unrecorded, missing legacy fields retain compatibility; no guessed dimension or quantity change. Actual producer to JSON to adapter to table/CSV regressions for four known units/null/unknown, signed fractional quantities, private cost exclusion and limited-source suppression. Independent VOICE chat/calendar/context files untouched.

CLAIM / NOT IMPLEMENTED / NOT TESTED. Require this claim green and merged main before any source/test edit. Then meaningful focused/native PostgreSQL/HTTP/Windows/Chromium/build/invariants and exact full PR/main CI, ordinary guarded release and exact health before scoped LAB acceptance. CI is not LAB PASS. Fresh public health22:20:07UTC HTTP200/oktrue/revisionfb802ea9ffcfdecefcf1f6a64ee1f1c00e53ea67; all14 phase3blobs remain exact in currentmain and release. Browser getState still reports native credential state cannot safely resume; no bypass or credential extraction. No new hosted PASS/manual claim.

Protected daily/weekly HOLD/provisional, accepted invoices/payments/corrections, independent guidance/desktop and store-lifecycle recovery PASS remain unchanged.

Invoice/Task29/30/Workforce/VOICE/wholesale/native/lifecycle and newly claimed POS-REMOTE-RECOVERY-01 owners retain their scopes. No production financial/fiscal/stock/shift/payroll/settings/recipient/SMTP/order/schema/infra action, replay or manual deploy. Overall14 remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-central-hourly-unit.md. Next: merge claim green, then two bounded implementations with UI/native workers and cross-review; grouped normal-app read-only acceptance remains required when supported browser resumes.

19/10/2026 01:27 Europe/Athens — ANDROID-CHAT-NATIVE-01 / limited USER PASS Admin-to-native image opening

Retained owner feat/android-chat-native-20261017; receipt docs/native-inbound-photo-pass-20261019. Owner18Oct23:10:45 answers «ναι» to explicit question whether an image sent from Admin to the mobile opened there.19Oct01:17:46 clarifies phone can send but PC lacks camera; explained PC uses existing-image attachment without camera.01:25:30 «EINAI OK» confirms that guided existing-file flow. Scoped USER PASS Admin-to-LAB2 native image opening, in addition to prior outbound native-photo/Admin opening. Do not ask repeat upload or camera action to repair documentation. Exact message/attachment IDs, bytes/MIME/checksum, device/OS/APK hash and production revision at test were not independently captured. Native direct camera source remains NOT TESTED; PC camera absence is not native camera failure. Existing-file upload does not prove camera capture, forensic storage, PDFs, OCR/invoices or all-device acceptance.

Prior outbound receipt PR2773 firsthead53c48275b657d941bd0a1befda25ee1ed71e8050 synchronized with assistant main755ca8c; final applicable docs checks green then mergedbb552e9edd54bfb9fe25f7825761eaa3fbe1b631. Earlier LAB2/store/message/push/tap/logout/screenshot and Admin title results remain scoped and protected. New receipt baselinea875024cfa1d4ddc9916d95bfb2d96de3626bf11. No code/config/server/env/deploy/production DB or private content retrieval, and no real upload/message/read/push by this page. Manual/active/tracker/pending/PDF synchronized, completed reverse-image retest removed from current pending. Other owners retained; no overall native/N16 PASS.

Remaining under same owner: direct native camera capture if applicable, broader native AI functional acceptance; permission-denial/session-expiry/revocation/server acknowledgement, in-flight push/account switch/foreign-store negative requests; device/SDK/OS forensic storage and phone/tablet variants; stable signing/Play, iOS and separate physical QR scan. Single next action: native Super Admin existing login, select LAB then existing Βοηθός AI and one non-mutating scoped query; inspect actual answer before any claim. Preserve separately owned AI backend; do not broaden staff access or change AI source without assignment. No repeated photo or notification test.

19/10/2026 01:23 Europe/Athens - WHOLESALE-STORE-CONTEXT-01 / CODE LIVE / LIMITED SUPPORT UI PASS / PERSONAL OWNER ACCEPTANCE OPEN

Retained owner codex/wholesale-suite-20261017; docs/wholesale-store-context-receipt-20261019. Before-source claimPR2777/head1a07481b3bd2500eeee75424983ff1c174946c13 green applicable checks/fullbuild skipped, merged56f57084 before source. SourcePR2778 finalheadddfc6fd1ee6eb5e6ff66f790bd1b190a63a8ab8c/fullCI39164717249/job117785262601 SUCCESS3211PASS0FAIL0SKIP plus6backup/all Windows/build/Chromium/nativeSQL/HTTP/invariants; merged584a97b75eb4c035ed9e356e89fb05b2831137e5. Exact584mainCI39165236350/job117786805379 also3211/0/0 plus6backup/all checks. Earlier source runs3195/0/0 twice retained; independent source on main required final combined3211. All4owned runtime/test blobs remain identical through currently observed livefb802ea9ffcfdecefcf1f6a64ee1f1c00e53ea67. Later owners preserved; their changes and acceptance are not taken over.

Ordinary guarded release now independently observed: current sourcefb802/mainCI39170130204/job117801412340 SUCCESS3226/0/0 plus6backup;

guard39170602568/job117802686908 SUCCESS/pinned exactfb802/healthy2026-10-18T22:07:08.7901402Z. Independent public no-cache health before UI at01:19:45Athens and after UI both oktrue/version0.22.0+kat-test-pos/exactfb802, curl exit0. No manual deployment/restart/production SQL/migration/seed or bypass. Source preparation and technical proof are not personal Owner LIVE acceptance.

Actual desktop Cloud Chrome read-only observation after release: canonical PlatformAdmin existing SuperAdmin → MYWORKSTATION LAB → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru → Πλήρες Backoffice, then actual upper Εμπορική λειτουργία button. Normal product view retained. After data load, product history store options were exactly empty placeholder plus that LAB store; neither sibling store was offered. Switch Λοιπές εμπορικές λειτουργίες: actual store select contains ONLY that LAB store, selected by default. Screenshot selected-store.jpg and exact DOM option values in live-ui.json. LIMITED LIVE UI PASS only for this existing SuperAdmin support context's initial products and unique selected-store child navigation; actual duplicate-open/races/invalidscope/frozen retry and ordinary Owner top producer remain technical mounted29/0/0/fullCI proof. No price/rule/history request submitted, no product chosen or order/quote/account/site/member/assignment created, no module toggle or business action. Background shifts were visible only; financial/stock/control deltas NOT TESTED, no unchanged-business-balance inference.

PERSONAL OWNER RESIDUAL: a secure normal-root sign-in request did not establish Υπεύθυνος Εργαστηρίου; submitted admin account returned Απαιτείται επιβεβαίωση2FA. Συνδέσου από την είσοδο SuperAdmin. No credentials read/copied/published, no auth bypass or forced role. That pending sign-in interval was not background test execution. Subsequent real support-context observation is explicitly separate and does not close ordinary Owner live acceptance. No new module/member/assignment grant was made; prior PR2774 inactive restoration retained. Avoid repeat successful seller/grant tests for documentation.

This receipt synchronizes checkpoint/active/KAT/manual/pending/tracker/PDF after source review. Source PR deliberately kept generated common PDF/roadmap changes for this final documentation receipt to avoid repeated conflicts with other pages; its mandatory active/checkpoint and prior green claim were retained. Whole wholesale/portal/orders/standalone remains OPEN/ASSIGNED. Source review additionally found portal-admin account listing is company-wide and needs explicit selected-store filtering review before customer-site provisioning; no new portal fix or data leakage is claimed here. Single next action scoped portal-account store-isolation review/fix under a new published claim, with personal Owner entry acceptance still requiring the correct existing Owner sign-in. No automatic new grants, accounts or orders. Retained coordinator until named handoff.

19/10/2026 09:31 Europe/Athens — POS-REMOTE-RECOVERY-01 / SOURCE LIVE / READ-ONLY UI PASS / RECOVERY AWAITING LAB

Owner feat/pos-remote-recovery-20261019 retained. Claim PR2789 merged before source; feature PR2791, list compatibility repair PR2799 merged. Exact repair PR CI39206045739:3264PASS/0FAIL/0SKIP plus6backup; main CI39206664736 SUCCESS. Later combined main198dcb058333477206d4428341c3dc554f30823f/full CI39209182817 SUCCESS deployed by ordinary guarded workflow39210029017, Render dep-dbarh3c9v7es739m3o80 live19/10 09:30:26 Europe/Athens. Authenticated selected-store UI09:31: company → Terminals → Installation Center → Check POS pending loads successfully and reports no pending transactions. Earlier regclass read FAIL corrected by text cast and actual native list/sibling regression. No production recovery, receipt replay, charge or stock test executed.

Limited LIVE PASS covers navigation/display/read-only pending list only; docs/manual/pos/PASS.md records that scope. Actual remote recovery through new button remains AWAITING LAB with measured cash/card/stock/shift/audit/control acceptance. Original identity/locks/finalizer/audit guarantees exercised in isolated native CI are not physical LAB PASS. Guide docs/installation/POS_REMOTE_RECOVERY.md; checkpoint CHECKPOINTS/CHANGES/2026-10-19-pos-remote-recovery.md. No other owner/scope closed. Next: one separately identified bounded LAB recovery after fresh before measurements; never replay the resolved real incident.

19/10/2026 00:06 Europe/Athens — STORE-LIFECYCLE-01 / REAL EXISTING-ARCHIVE RESTORE PASS / CLEANUP STILL OPEN

Owner feat/store-shifts-inventory-clear-20261018 retained; bounded source feat/store-lifecycle-restore-audit-20261018. User approved Google/Render sign-in22:21 and confirmed device challenge22:32. Fresh Render dashboard positively showed My Workspace tea-d9ie26vaqgkc739uudqg; the earlier authentication access blocker is superseded. No KAT reset/delete, maintenance enrollment, generation bump, Writer stop, credential/configuration change or new product import occurred. BOTH registers remain protected. New Excel NOT RECEIVED.

ACTUAL RECOVERY TEST, not CI simulation: existing off-site object myworkstation/2026/10/18/backup-20261018T180047Z-4492.dump,230958578bytes, downloaded by exact VersionId inside the existing Render backup service crn-dau2gdbncjis73agfh30. Reported AES256; downloaded SHA256 exactly603dab152462bd051b08adddf0b490139616f45ebae8f1654bb06af6357b78a4 matches storage metadata. ObjectLock/retainUntil returnednull; no retention guarantee is inferred. Existing object/service/settings/backup schedule untouched; no new upload or production DB write was required.

Actual pg_restore into a newly initialized private local PostgreSQL18.6 inside that backup shell:19:42:18–19:43:25UTC, EXIT0, no owner/privileges/tablespace restoration. Env cleared for server/restore client, private0700 directory/socket, listen_addresses empty, no TCP, no application/fiscal workers. Production and the separately owned upgrade staging DB were NOT restore targets. Extracted original archive data-only SQL and independently pg_dump-ed the restored database. Exact row multisets (duplicate multiplicity included), COPY column headers and sequence state compare PASS:252tables/181742rows/417914887COPYbytes/1sequence, canonicalSHA256ce600dd9582f148fdea2ca6df1100fbe10c9613b6a5d23e463457bee06e7794b. Initial order-sensitive comparison refused13table hashes with equal counts/bytes; canonical per-row SHA256 disk sorting proved the contents match independent of unspecified SQL row order. No normalization or value coercion used. Native bigints/decimals/timestamps/JSON/binary remain exact COPY text.

Read-only restored KAT checks19:52:28UTC:company matchespilot-company,44cash shifts/143StoreProduct/23Employee/165Sale/273attachments/161847741inline attachment bytes, activeKAT-POS-01+KAT-POS-02,2fiscal/4EFTPOS/2RBS settings. No row bodies, passwords, keys, PINs or attachment contents exported to chat/repository. Exact evidence and bounded technical PASS/manual accompany this change. Temporary PostgreSQL/plaintext-copy disposal is verified separately in the evidence; original encrypted object is retained.

SOURCE: standalone read-only file auditor server/scripts/store-lifecycle-verify-copy.py, immutable tested sourcea42e2387bbc2814d665c111aa663c1d9aecccc3f/scriptSHA256e3f6436c830a5cdeaefe1f0ef9637234ea0e5bab9d44cda27cafeaf05c70c765. Bounded64MiB input line/1000tables/1Mrows, private SQLite hash-only disk sort, strict COPY/sequence parsing, fail-closed unsupported INSERT/large-object/malformed/truncated input; no DB/network/execution API. Five focused CLI tests PASS including precision/duplicates/reorder/tamper/refusal; local full Node20:3149tests/3012PASS/0FAIL/137 infrastructureSKIP. Auditor source PR2775 merged as e0d12d46bb99e5febcec1afa134bdd009828e60f; finalhead90a904acb0d0081dd1c3a46fda15310323ea90ae/full native CI39164849046 SUCCESS3214PASS/0FAIL/0SKIP plus6backup, Windows and real HTTP E2E. No web application behavior or executor activation in the auditor source.

LIMITS / WHOLE TASK OPEN: this is recovery of the existing21:00Athens whole-database archive into an isolated throwaway cluster, NOT a fresh preview-bound KAT-only recovery proof or permission to restore the whole production database and roll back other stores. Per-store selective rollback, current row ownership/raw/JSON/shared Workforce review, durable retention guarantees, physical Writer/local spool and complete original-generation offline/inflight fencing, safe reopen and executable central reset UI/API remain unfinished. Checkout-only generation source PR2779 finalheadf445ae68fcea42e4ca93a911a85e6f3e3cc2f152/full native CI39164911868 SUCCESS3218PASS/0FAIL/0SKIP plus6backup, Windows and real HTTP E2E, merged13151d60fc797b6d736cbe7eaaa19ce1871cecda, has passed native lock/stale/zero-write/tenant tests; broader entrypoints and online generation propagation are still OPEN. executionAvailable:false. Existing preparation PR2760/5c5d1711 exact mainCI3185/0/0 and ordinary release proof remain protected.

Single next action: complete the reviewed per-store ownership/rollback plan using this now-verified recovery path, then fencing and authenticated execution. Do not repeat already passed financial/LAB transactions. All other owners preserved; synchronize combined PDF with this actual bounded recovery result, not a store go-live PASS.

LATEST READ-ONLY OBSERVATIONS:23:33Athens openShifts0/recentConnector60s1/143StoreProduct/23legacyEmployee/165Sale/fiscal2/EFTPOS4/RBS2;23:36 activeKAT-POS-01+KAT-POS-02. No production fence exists. Additional reviewed metadata/counts23:40–23:50:3global Workforce identities baseKAT+KATaccess,0explicitOtherAccess/0legacyLink, checked attendance1/clock2/leave1/schedule2 allKAT and0incomingOtherEmployeeRules;1InventoryAccessGrant;0typed KAT DispatchNote ProviderOutbox/Attempt;1NetlinkStoreConfig that must be retained. No named-customer sales, credit payments, customer ledger or loyalty ledger forKAT. These are read-only dependency observations, not a complete deletion manifest or permission to remove global identities. Exact evidence files accompany this receipt. The old prospective RESET_KEEP remains broader than only-register-settings; do not activate it as the latest policy.

INTEGRATION:exact main13151d60fc797b6d736cbe7eaaa19ce1871cecda full CI39165496777/job117788229507 SUCCESS3220PASS/0FAIL/0SKIP plus6backup. Public health at00:05Athens remained22a4562d73f50d7a2d55a0b9dfce41f44e1f1a44; new source release is not yet claimed LIVE. Deployment39165715593 checked earlier584a97b7 and correctly skipped it for newer production source; that successful guard run is NOT proof of deployment13151d60. No reset or app execution activation.

18/10/2026 23:51 Europe/Athens - COORD PHASE3 / THIRD BOUNDED SOURCE DELIVERY LIVE / AWAITING LAB

Κεντρικός owner codex/central-four-streams-20261018, τέσσερις εσωτερικοί agents, issues#2704-#2707. Η παρούσα καταγραφή αντικαθιστά μόνο τα phase3 SOURCE PREPARED / CI PENDING / RELEASE PENDING παρακάτω. Οι14 αρχικές απαιτήσεις παραμένουν συνολικά OPEN, με προστατευμένα τα προηγούμενα περιορισμένα PASS και όλες τις ανεξάρτητες αναθέσεις.

- WS1/#2785: MONTHLY+READY σύνοψη αρχικών καταγεγραμμένων διαφορών ανά χειριστή ανοίγματος και STORE/DELIVERY, από το ίδιο snapshot. Ταυτότητα είναι ο opening User, όχι πιστοποιημένος υπάλληλος μισθοδοσίας/χειριστής κλεισίματος/υπεύθυνος διαφοράς. Ίδια ονόματα δεν συγχωνεύονται, aliases και μη αποδιδόμενες βάρδιες διατηρούνται. Ακέραια ασφαλή λεπτά, χωριστά ελλείμματα/πλεονάσματα και session/day/POS τεκμήριο· ακατάλληλη/διπλή πηγή αποκλείει το συγκεντρωτικό. Αρχικές γραμμές/offsets αμετάβλητα, HOLD χωρίς σύνοψη. Καμία χρέωση, μισθοδοσία ή τελική οικονομική πιστοποίηση.

- WS2/#2784: CSV πρότασης προμηθευτών από το ίδιο εφαρμοσμένο canonical snapshot και όλες τις τρέχουσες φιλτραρισμένες σελίδες. Ίδιες ποσότητες, κατάστημα/στιγμή/περίοδος/options, σαφή PROXY/πληρότητα/μη ανατεθειμένα/αιτίες ελέγχου. Ασφαλές quoting/formula neutralization, απενεργοποίηση σε stale/loading/error/invalid contexts, χωρίς επιπλέον API. Δεν πιστοποιούνται πραγματικές παραλαβές και δεν δημιουργείται/αποστέλλεται παραγγελία.

- WS3/#2783: regression μόνο με πραγματικούς Suite+Sales installers και καθυστερημένες αποκρίσεις/καρτέλες/reentry/CSV/κατάστημα. ΔΙΟΡΘΩΣΗ παλιού υπολοίπου: το υποτιθέμενο report-tab overwrite ΔΕΝ ΑΝΑΠΑΡΑΓΕΤΑΙ στην πραγματική σύνθεση. Η πραγματική πλοήγηση ακυρώνει παλιές αποκρίσεις· runtime δεν άλλαξε.

- WS4/#2782: αρνητικά/κλασματικά/μη ασφαλή ακέραια πλήθη συναλλαγών ανά προϊόν παράγουν INVALID/source_limited χωρίς γραμμές, επινοημένα ποσά μοντέλου ή CSV detail. Κλασματικές/προσημασμένες ποσότητες και πραγματικά χρηματικά πεδία διατηρούνται. Ανεξάρτητα VOICE chat/calendar/context αρχεία δεν άλλαξαν.

Ανεξάρτητο no-cache health2026-10-18T20:50:54.882504+00:00:HTTP200/oktrue/exactrevision/version0.22.0+kat-test-pos. Και τα14 blobs(6runtime/8tests) ταυτίζονται στην ενεργή έκδοση. Καμία χειροκίνητη παράκαμψη deploy/guard.

Τοπικά Node20.20.2:65tests/63PASS/0FAIL/2native environmentSKIP, frontend/TABLE_SERVICE buildPASS. Τα native σενάρια εκτελέστηκαν στο πλήρες CI χωρίς SKIP. Ανεξάρτητες αξιολογήσεις WS1/WS2 χωρίς blocker. Αυτά δεν αποτελούν hosted αριθμητική ή UI/CSV αποδοχή.

Οι νέες MONTHLY/supplier/coverage/export λειτουργίες παραμένουν AWAITING LAB. Το συγκεκριμένο browser runtime επέστρεψε native credential state cannot safely resume· δεν παρακάμφθηκε, δεν εξήχθησαν cookies/tokens και δεν κατασκευάστηκε screenshot/PASS. Το ανεξάρτητο περιορισμένο guidance/desktop LIVE PASS#2781 διατηρείται ακριβώς στο δικό του checkpoint/manual, χωρίς επανάληψη. Daily/weekly HOLD/provisional PASS#2743, προηγούμενες διορθώσεις/πληρωμές/τιμολόγια προστατεύονται. Δεν προστίθεται CI-only manual.

Χωρίς παραγωγική οικονομική/fiscal/stock/shift/payroll/settings/recipient/email/order/schema πράξη ή replay από τον συντονιστή. Παραμένουν OPEN πλήρης οικονομική συμφωνία, πιστοποιημένη υπαλληλική αναφορά/ευθύνη, scheduler/outbox/SMTP/παράδοση, πραγματικές παραλαβές/primary supplier, συγκρίσιμα periods/ωριαία στελέχωση και ευρύτερα invoice/assistant υπόλοιπα. Ακριβής14map:CHECKPOINTS/CHANGES/2026-10-18-original14-status.md. Machine evidence:CHECKPOINTS/EVIDENCE/central-four-streams-20261018/phase3-source-release.json. Κοινό tracker/PDF συγχρονισμένα.

Επόμενη μία ενέργεια: υποστηριζόμενο authenticated normal browser και συγκεντρωτική read-only αποδοχή μηνιαίας προεπισκόπησης/υπαρχόντων πλήρων δεδομένων, supplier screen/πραγματικού CSV και κανονικής αναφοράς/προϊόντος με ίδιο κατάστημα/περίοδο/πηγή. Αν δεν υπάρχει ολοκληρωμένος μήνας, το READY aggregate παραμένει NOT TESTED· δεν δημιουργούνται οικονομικές δοκιμές ή fixtures στην παραγωγή. Κεντρικός owner παραμένει μέχρι ολοκλήρωση ή ονομαστικό handoff.

18/10/2026 23:29 Europe/Athens - COORD PHASE3 / ASSIGNED BEFORE SOURCE / NOT TESTED

Retained central coordinator codex/central-four-streams-20261018, issues #2704 #2705 #2706 #2707. Owner again requests continuation, with existing approval for four internal agents. Baseline main56f57084bfcc0104c826dbc834e91aed6fb7673e; history since final phase2 receipt reviewed. Independent VOICE month-context/conversation-file releases and wholesale selected-store claim#2777, lifecycle/native/invoice/Workforce owners remain protected. This is a bounded continuation of the existing central assignment, not a release or functional PASS.

- WS1 ASSIGNED codex/ws1-monthly-operator-summary-20261018: server/src/services/automatic-report-policy.js, automatic-report-source.js; client/src/components/platform/AutomaticReportSettingsManager.jsx; existing automatic-report-monthly/settings-postgres/settings-mounted tests and new server/test/automatic-report-operator-summary.test.js. Add MONTHLY+READY-only read-only totals of original recorded shift differences by stable recorded opening operator identity and STORE/DELIVERY chain from the same existing snapshot. Preserve original rows and day/POS groups. Same names never establish identity; missing IDs remain explicitly unattributed. Use checked integer cents, retain shortage and surplus separately without allocating liability or treating netting as reconciliation. HOLD/cap/invalid financial source suppresses summary. No employee-payroll inference, settlement, adjustments, settings writer, scheduler/SMTP/schema changes.

- WS2 ASSIGNED codex/ws2-supplier-proposal-csv-20261018: client/src/components/commerce/OrderSuggestionsPanel.jsx; new supplier-order-proposal-export.js in same directory; server/test/supplier-order-groups-ui.test.js and new supplier-order-proposal-export.test.js. Review-only CSV from the currently applied canonical supplier snapshot and current visible filters across all pages. Preserve exact quantities and unassigned reasons; include store/as-of/history/coverage/lead days and approved-document frequency PROXY, never physical-delivery or primary-supplier certification. Escape CSV and neutralize spreadsheet formulas, disable export for missing/stale/loading/invalid contexts. No extra API or writer/order/transmission.

- WS3 ASSIGNED codex/ws3-report-navigation-regression-20261018: NEW server/test/kiosk-report-navigation-races.test.js only. Existing actual Suite+Sales composition did not reproduce the historical hypothesized tab overwrite: real navigation starts a new shared load token and rejects the old sales response. Add meaningful mounted deferred-response regression for actual installers/tab navigation/reentry/store change. Runtime installKioskReportsSalesV4.js and shared helper remain unchanged unless a separate verified defect is later claimed. Correct prior hypothesized residual as NOT REPRODUCED on current composition, not hosted PASS.

- WS4 ASSIGNED codex/ws4-product-count-validation-20261018: server/src/services/owner-sales-tools.js and NEW server/test/assistant-product-counts.test.js. Read-only actual adapter reproduction accepted per-product distinct sale/reversal counts -1, 0.5 and 9007199254740992 as COMPLETE/matched. Restrict ONLY normalSaleCount/reversalCount to nonnegative safe integers and fail closed through existing INVALID coverage suppression. Valid fractional/signed item quantities and reversal money retain existing semantics. No hosted failure claimed. Preserve independent VOICE AssistantChatPage/conversation/calendar ownership. Also independently review WS1/WS2 contracts and existing phase2 blob/release evidence. Root alone common registries/checkpoints/PDF/publication.

Protected daily/weekly HOLD/provisional LAB PASS#2743 and prior accepted invoices/payments/corrections remain unchanged and are not repeated. Public health20:26:41UTC HTTP200/oktrue/revision755ca8c0855b7c2c261a7281a5d89c89083a38cb is technical release evidence only. Current browser observation still reports native credential state cannot safely resume; no workaround or new hosted PASS. MONTHLY/supplier/coverage acceptance remains AWAITING LAB.

Before source require this scoped claim green merged main. Then focused mounted/native/read-only SQL/HTTP/Windows/build/invariants and full PR/main CI, ordinary guarded exact release; no bypass/manual deploy. Final consolidated receipt records results and refreshes tracker PDF. Full original14 remain OPEN, no autosend or production financial/stock/payroll/settings action. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-central-four-streams-phase3.md. Next action after merged claim: three independent bounded implementations and real-composition regression, with cross-review.

18/10/2026 23:24 Europe/Athens - WHOLESALE-STORE-CONTEXT-01 / CLAIM BEFORE SOURCE / AWAITING TECHNICAL AND LAB PROOF

Retained coordinator codex/wholesale-suite-20261017; claim docs/wholesale-store-context-claim-20261018, planned source fix/wholesale-owner-store-context-20261018; baselinee044e2d. Owner synexise23:20 requests continuation. Existing manager navigation and personal seller read/revocation PASS PR2767/2774 retained, all temporary module/member/assignment grants restored inactive. Do not repeat successful business/grant actions for documentation. Full wholesale/standalone remains OPEN.

Concrete residual found while reviewing actual personal-owner test: selected LAB store was opened through its normal top Εμπορική λειτουργία button, but personal manager assignment tab required a new explicit store choice and offered all company stores. Current source confirms StoreCloudPage top button emits plain Event(mws:commerce-open), omitting store.id; lower operations button already includes it. CommerceLauncher only retains event.storeId when view=operations, otherwise it takes URL supportStore (missing in normal Owner /) and all stores. Root cause is dropped selected-store context on the existing normal entry, not seller membership/auth failure. Personal seller options were correctly limited by actual assignment; no foreign data leak or server authorization bypass is asserted.

Bounded change after this claim merges green: StoreCloudPage top opening control emits exact selected store in CustomEvent while retaining initial products view; CommerceLauncher honors explicit selected-store context for products and operations, validates active owned store before rendering, never substitutes first/company scope for empty/invalid explicit selection, clears stale private content while loading, ignores old asynchronous responses and preserves duplicate-open behavior for same scope. A genuinely different explicit store may switch the workspace only when no frozen uncertain wholesale submission is pending. Keep central plain-event entry behavior, explicit supportURL context, existing license/role/session fences and frozen request body/key intact. Files limited to client/src/components/cloud/StoreCloudPage.jsx, client/src/components/commerce/CommerceLauncher.jsx and focused registered mounted/static integration tests under server/test plus common records/generated PDF. No schema/server auth/API/domain/payment/fiscal/POS/business mutation or grant, direct deploy/restart. Other owners unchanged.

Before source require scoped claim green merged. Meaningful mounted proof: actual top-entry producer supplies store; normal Owner products event with multiple company stores exposes only selected store to wholesale/portal/seller props, initial products retained; empty/foreign/inactive explicit store fails closed; URL supportStore works; same-store duplicate preserves mounted view; new-store opens/late response races preserve latest scope; uncertain request lock blocks switch without losing frozen key/body. Run existing workspace stability and wholesale access/frozen tests and build, require full native PR/main CI and ordinary guarded exact health. CI/local are not LAB PASS, no new manual claim until actual hosted acceptance. Single next action implement and validate this bounded entry-context fix after green claim, then ordinary release and separately scoped acceptance; customer portal/order/standalone work still OPEN.

18/10/2026 23:07 Europe/Athens - WHOLESALE-SELLER-LAB-01 / LIMITED PERSONAL SELLER LIVE PASS / ALL TEMPORARY GRANTS RESTORED

Retained coordinator codex/wholesale-suite-20261017; receipt docs/wholesale-seller-lab-receipt-20261018. Owner ΝΑΙ ΕΓΚΡΙΝΩ22:29:38 authorized only temporary LAB module, existing Υπεύθυνος Εργαστηρίου membership and exact B2B-TEST-001/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ assignment, read-only test and restoration. Before-action PR2768/head1ec54e12326e1776d23e8dc256d7ccec9284912f all3applicable CI checksSUCCESS/fullbuild correctlySKIPPED, merged3645d05f9e6b5737416f2dc55e8fa6ce65aa56b1 before mutations. No source/test/schema/config change. Pre-test health oktrue/version0.22.0+kat-test-pos/exact5c5d1711f8f144d52e1090ac880c8b35ca093a77, curl exit0. Post-restoration no-cache health23:08 also oktrue/same exact revision, curl exit0. Existing source release/native proof and prior limited navigation PASS retained; other owners untouched.

Actual Cloud Chrome desktop/SuperAdmin setup approximately22:33-22:36: fresh license initial21active/WHOLESALE_B2B inactive, company ACTIVE/ENTERPRISE/start2026-09-06/no end/autoRenewfalse/monthly104.70. Toggle/save/reopen module22active, all other37-card comparison excluding this one and company/control fields identical. LAB store cmtpopbgo000trhb5ng9ytiru only. Target existing user initially Χωρίς ενεργή ιδιότητα; exact-store assignment list empty after load. Local before-action.json written before membership/assignment writes. Activate target membership; refresh shows Ενεργός πωλητής. Assign ONLY existing ΔΟΚΙΜΑΣΤΙΚΟΣ ΠΕΛΑΤΗΣ ΧΟΝΔΡΙΚΗΣ / B2B-TEST-001 to exactLAB store; visible active row revision1. N40 other-user control remains inactive; no new user/customer/password or other assignment created.

Actual secure personal login approximately22:36-22:39 succeeded, positive rendered welcome Υπεύθυνος Εργαστηρίου / MYWORKSTATION LAB (displayed company idcmtpopbgk000prhb5qc60zxus). No credentials read/printed/published; browserAuth only. Open exact LAB store → Εμπορική λειτουργία → Χονδρική B2B → Εργασία πωλητή. Personal seller workspace now loads instead of support-context refusal. Store options show ONLY ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ; explicit selection loads ONLY assigned synthetic customer. Select customer; own history region opens with no visible entries. Read-only Εύρεση προϊόντων loads existing first catalog page (including7UP1.5L/SKU00580 and7UP330ML/SKU00582), no item added, price calculation or order submitted. Screenshot personal-seller.jpg. This is LIMITED LIVE UI PASS for this existing Owner's personal seller capability, assigned-store/customer selection and catalog/history opening; NOT restrictedEMPLOYEE, foreign directAPI/tenant proof, quotes/orders/replay, customer-facing portal, mobile/offline or standalone acceptance.

RESTORATION COMPLETED for seller grants approximately22:40: personal account's existing manager UI → target user → explicitly select exactLAB store (no default fallback) → refresh active assignment revision1 → Ανάκληση → inactive revision2/Ενεργοποίηση ανάθεσης. Then Απενεργοποίηση πωλητή → refreshed target Χωρίς ενεργή ιδιότητα; N40 remains inactive. Reopen personal seller workspace: Απαιτείται ενεργή προσωπική σύνδεση, previous product DOM absent. New inactive rows/audit/revisions retained; effective access restored, not byte-identical DB. No unrelated account/role/price/package/portal/business/shift/stock/payment/fiscal action or SQL/migration/seed/manual deploy. Business financial/stock/control deltas NOT TESTED.

FINAL MODULE RESTORATION COMPLETED approximately23:05-23:06: earlier central sign-in attempts returned non-SuperAdmin/wrong-credentials errors; owner requested renewed secure forms. Correct password accepted, current Authenticator2FA accepted, fresh canonical PlatformAdmin showed owner Χρήστος Μάνης. No credential values read, copied, guessed or published. Open ONLY MYWORKSTATION LAB license: fresh22active/WHOLESALE_B2B ACTIVE; other company fields and module terms equal initial baseline. Toggle ONLY this module inactive, save, reopen fresh:21active/WHOLESALE_B2B INACTIVE, entire structured visible summary/company/control fields/all37module cards and terms EXACTLY EQUAL initial capture. Final comparison and two native cropped modal screenshots restored-summary.jpg/restored-card.jpg retain LAB context without other-company data. All three authorized effective grants are restored: membership inactive, exact assignment inactive revision2, module inactive. Audit/revisions/new inactive rows retained, no deletion. No remaining access-expansion or cleanup blocker. Do not repeat successful grant tests for documentation.

Whole wholesale/standalone remains OPEN/ASSIGNED. Manual updated only for observed personal seller read and membership/assignment revocation, with final complete effective-grant restoration explicit. Aggregate observation.json and before-action.json preserve exact scope without credentials. Single next action: separately scoped customer-facing portal acceptance and remaining order/standalone work; no automatic new grants, account creation or order submission. Preserve this completed personal seller read/revocation PASS. Retained coordinator until named handoff.

18/10/2026 22:57 Europe/Athens — ANDROID-CHAT-NATIVE-01 / limited USER PASS photo send and Admin opening

Retained owner feat/android-chat-native-20261017; receipt docs/native-photo-user-pass-20261018. After instruction to send one non-sensitive test photo from current LAB2 native app to LAB and inspect Admin chat, owner22:46:31 reports «ΝΑΙ ΦΑΙΝΕΤΕ». Asked whether clicking it in Admin opens normally at large size;22:57:35 answers «ναι». Scoped USER PASS: reported native photo send, visibility in intended LAB Admin conversation and successful large opening. Exact message/attachment IDs, MIME/bytes/checksum, sender/session/device/OS/APK hash, camera versus existing-photo source and production revision at test were not independently captured. This does not establish native camera capture, reverse Admin-to-native photo opening, PDF, OCR/invoice creation, byte fidelity, forensic storage or all-device acceptance.

Earlier limited LAB2 login/own-store UI/message/push/correct tap and logout/screenshot observations are protected in PR2769/head30b355796081fd729210e09206c1b79ced9f1831 merged3e581757e98b2600486ed1d88bb4597e0a234191 after applicable checks green. No real message/photo/read/push repeated by this page; no business mutation, code/config/env/deploy change or private content retrieval. Current receipt baseline main6ca634f38e1d6f7f3646d1e74623828d49fcf5f8. Manual/tracker/active/pending/PDF synchronized; completed outbound photo/Admin-open retest removed from current pending, without closing all native photo/camera functionality or N16.

OPEN under same owner: native camera capture (source mode not specified), reverse-direction native image preview and broader AI; permission-denial/session-expiry/revocation/server acknowledgement, in-flight push/account-switch/foreign-store negative requests; physical SDK/OS/private-storage forensic and phone/tablet variants; stable signing/Play, iOS, separate physical QR scan. Do not repeat completed notification/logout/outbound-photo checks for documentation. Single next action: from Admin attach one non-sensitive existing test image in LAB and verify LAB2 can open it in native app; no invoice/payment/stock/fiscal workflow. Preserve separate PWA/N16/AI/other owners.

18/10/2026 22:32 Europe/Athens — ANDROID-CHAT-NATIVE-01 / limited USER PASS logout, screenshot blocking and LAB2 chat/push

Retained owner feat/android-chat-native-20261017; receipt docs/native-lab2-device-pass-20261018. New owner observations, recorded without repeating messages or changing business state:

-21:52 «είναι οκ» after Logout/close/reopen/login-required instructions;21:52:34 clarification that conversations are visible, then21:53:31 explicitly «αφού συνδεθώ». Scope: visible return to authenticated history after re-login, consistent with logout/login gate; no independent forensic/private-file or server revocation measurement. Initial draft receipt was stopped and discarded before publishing when clarification arrived; no false logout PASS was merged.

-21:54:02 reports unable to take screenshot;21:54:15 acknowledges intended protection. Limited user-reported screenshot blocking on this device, not all OS versions/recording/camera/forensic acceptance.

-21:55 identifies LAB/LAB2; initial native entry rejected missing exact store Chat URL. Guided through existing POS Εφαρμογή κινητού and Κοινοποίηση συνδέσμου;22:17:21 reports login and sent message,22:17:38 confirms only LAB visible. Scope: user-described LAB2 personal PIN login, own-store-only visible UI and one message send; no crafted foreign-store request/credential/role negative proof. Screenshot22:20 independently shows existing LAB POS2 message22:16:25 in Admin LAB conversation, but exact mobile identity/hash/process not independently captured.

-22:20:44 reports reply arrived without notification. Guided to activate notifications in the current LAB2 session because logout clears opt-in; browser Push ενεργό is not native registration evidence.22:22:33 «ΗΡΘΕ»;22:22:53 «ΤΟ ΠΑΤΗΣΑ ΚΑΙ ΑΝΟΙΞΕ ΣΩΣΤΑ». Limited USER PASS staff-session delivery and correct LAB conversation tap; exact activation-result text, payload/body/name, latency and separate foreground/background/locked conditions NOT independently captured. Earlier missing notification superseded for this successful reported test only. Admin store-name notification/correct tap PASS21:32 remains protected (PR2765/49486483d5c32fb310319b0a1936fa7d2eefa5ae).

No private PIN/token/content read or real message/read/push by this page. No code/configuration/deploy/server/production DB change. Current repository baseline3645d05f9e6b5737416f2dc55e8fa6ce65aa56b1; production revision at physical tests not independently sampled. Prior focused Node20.20.2 native-fcm checks14PASS/0FAIL/1isolated-PostgreSQL SKIP are automated/local only, not device evidence. QR download and employee store URL are distinct: public QR grants no store rights; native employee login accepts exact existing /chat/<storeId> URL plus personal PIN. Logout clears notification opt-in, so activation belongs to the new logged-in identity.

Manual/active/tracker/pending/PDF synchronized for these limited successes. Remove completed visible logout/reopen, reported screenshot block, LAB2 login/visible own-store/message-send and staff notification/tap retests from current pending. Retain assignment and all PWA/N16/AI/other owners. OPEN: native photo/camera/preview and broader AI functionality; permission denial, expiry/revocation/server acknowledgement, in-flight push/account switch/foreign-store negative acceptance; device/SDK/OS forensic storage, phone/tablet variants; stable signing/Play, iOS and separately observed physical QR scan. No overall native/N16 PASS. Single next action: owner sends one non-sensitive test photo from LAB2 native app to LAB, then confirms correct Admin readback; no invoice/payment/stock/fiscal action or repetition of completed notification/logout tests.

18/10/2026 22:32 Europe/Athens - WHOLESALE-SELLER-LAB-01 / AUTHORIZED TEMPORARY SELLER GRANTS / BEFORE ACTION

Retained owner codex/wholesale-suite-20261017; docs/wholesale-seller-lab-claim-20261018, baseline10d1dc9434512ebfb88789aa4ba27a4f2e64db37. Owner explicitly ΝΑΙ ΕΓΚΡΙΝΩ22:29:38 approved temporary LAB WHOLESALE_B2B activation, seller membership for existing Υπεύθυνος Εργαστηρίου, assignment ONLY existing ΔΟΚΙΜΑΣΤΙΚΟΣ ΠΕΛΑΤΗΣ ΧΟΝΔΡΙΚΗΣ/B2B-TEST-001 to ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru, read-only personal seller test and restoration. No new users/passwords/customer/portal/order, role/package/price changes, transactions/stock/fiscal/shift mutations, SQL/seed/migration/deploy. N40 user/control remains untouched. Publish green merged before grant mutations.

Initial license last fresh22:10: company ACTIVE/ENTERPRISE/start2026-09-06/no expiry/autoRenewfalse,21active modules, WHOLESALE_B2B inactive,monthly total104.70EUR; all37visible cards and terms restored exactly, evidence PR2767. Existing target seller card observed without active membership. Fresh pre-action recapture required; assignment initial effective state must be read before its change. Record each before/after and unaffected other-user/module controls locally before next action; final common receipt publishes exact observed values. Expected module21→22→21, membership inactive→active→inactive, ONLY exact target assignment none/inactive→active→inactive. Restore effective permissions, retaining audit/revision/possibly new inactive rows; do not delete historical rows. If initial state differs, preserve it and stop scope expansion.

Prior limited manager navigation/inactive entry PASS retained, not repeated. Actual personal seller auth/customer scope/catalog/history read-only acceptance remains NOT TESTED. Existing supportContext rejection is intentional in wholesale-seller-auth.js; do not bypass. Obtain secure personal sign-in using browserAuth if needed; no credentials in chat or repository. Preserve SuperAdmin recovery for restoration. If personal sign-in blocks completion, restore grants before ending or leave no grants changed while requesting sign-in. Business financial/stock deltas NOT TESTED; no submitted order authorized. Whole wholesale/standalone scope remains OPEN, other owners preserved. Single next action after green merge: fresh license baseline, bounded grants, read-only seller acceptance if personal auth available, restore and publish actual results/manual/common records/PDF. No broad PASS inferred.

18/10/2026 22:11 Europe/Athens - WHOLESALE-UNIFIED-PAID-01 / LIMITED ACTIVE LIVE UI PASS / LAB GRANT RESTORED INACTIVE

Retained coordinator codex/wholesale-suite-20261017; receipt docs/wholesale-active-ui-receipt-20261018. Owner explicit nai22:01:29 approved only temporary LAB WHOLESALE_B2B activation, existing-identity read-only navigation and restoration. Before-action claim PR2766/head72cb6b94277664cd838ee5e12f565440f212977e/docsCI39157244584 SUCCESS/all3 applicable checks green/full build correctly skipped, merged b9228b3ed17bd6a924dbc0b350587385a4c55258 before either license save. Its22:08 heading is approximate; GitHub claim publication/merge and actual subsequent saves establish order. No source/config/schema/test edit. Fresh pre-test public health22:07 returned oktrue/version0.22.0+kat-test-pos/exact5c5d1711f8f144d52e1090ac880c8b35ca093a77, curl exit0; post-restoration health22:10:45 also oktrue/same exact revision, curl exit0. Owned runtime paths unchanged against reviewed95a85bc. Other owners preserved.

Actual desktop Cloud Chrome/existing SuperAdmin22:07-22:10, MYWORKSTATION LAB only. Exact module draft toggle and save, reopen fresh:21→22active modules, WHOLESALE_B2B ACTIVE; all other37-card comparison excluding this one and company subscription/control fields identical. Existing monthly total104.70EUR unchanged; new module existing defaults0monthly/0setup/MONTHLY/no dates, no commercial price agreed or payment receipt asserted. Company ENTERPRISE/ACTIVE/start2026-09-06/no end/auto-renew false retained. From canonical PlatformAdmin, LAB stores → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru → Πλήρες Backoffice → Εμπορική λειτουργία → Λοιπές εμπορικές λειτουργίες: ONE top-level Χονδρική B2B appears. Clicking it opens unified Χονδρική, site & αναθέσεις / Εργασία πωλητή workspace. Actual five manager tabs opened: Πελάτες (existing synthetic B2B-TEST-001 row), Τιμοκατάλογοι (selection/empty-price state), Παραγγελίες (exact LAB store selected, no registered orders), Site πελατών (settings/account/publication forms load; no configured active portal exercised), Αναθέσεις πωλητών (two existing LAB identities listed without active seller status). No forms submitted or data changed through those tabs. Screenshot CHECKPOINTS/EVIDENCE/wholesale-active-ui-20261018/unified-workspace.jpg.

Εργασία πωλητή opened but actual existing support/SuperAdmin context returned Απαιτείται ενεργή προσωπική σύνδεση. This is observed access refusal only, NOT seller-functional PASS or independently proven membership cause; no credential/account/session/role bypass or provisioning. Customer-facing site login, ordinary Owner/employee/seller flow, quotes/orders/replay, mobile/offline/standalone remain NOT TESTED. Prior inactive-entry/duplicate-removal PASS retained; no repeat negative business test.

RESTORED immediately: return SuperAdmin → same LAB license, fresh ACTIVE22 and unchanged other terms recorded, toggle ONLY WHOLESALE_B2B inactive and save, reopen fresh. Observed21active modules, card INACTIVE, entire structured visible license summary/company fields/all37cards/terms EXACTLY EQUAL initial capture. Aggregate evidence license-restoration.json. This is visible effective-grant restoration; not a claim that absent database rows were deleted or DB bytes identical. No other company/store modified, package application, customer/site/account/membership/assignment/order creation, transaction/payment/stock/fiscal/shift action, SQL/migration/seed/backup or manual deploy. Financial/stock/control terminal deltas NOT TESTED; no inference from read-only background figures.

LIMITED LIVE UI PASS: authorized active entry and unified five manager screens in existing SuperAdmin/LAB context, plus observed license control preservation/restoration. Whole wholesale/standalone product OPEN/ASSIGNED. docs/manual/wholesale/PASS.md updated only for these observed screens and access limitation. Single next action: acceptance with an identified existing personal seller/customer identity and configured portal, within separately authorized scope; no automatic provisioning or order test. Keep grant inactive after this test, retained coordinator until named handoff.

18/10/2026 22:08 Europe/Athens - WHOLESALE-UNIFIED-PAID-01 / AUTHORIZED TEMPORARY LAB GRANT / BEFORE ACTION

Retained owner codex/wholesale-suite-20261017; branch docs/wholesale-active-lab-20261018; baseline194044d405c4d33e55d2b0dd9b0ec4d939bb7a22. Owner explicitly answered nai22:01:29 to temporary activation of ONLY WHOLESALE_B2B in MYWORKSTATION LAB, read-only navigation with existing identities and restoration inactive. Publish this claim green merged before either state-changing action. Cloud Chrome existing SuperAdmin operator; target virtual store ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru. Fresh pre-action license UI: company ACTIVE, AI COMPLETE/ENTERPRISE, subscription start2026-09-06, no end, auto-renew false,21active modules, WHOLESALE_B2B INACTIVE. Existing monthly total104.70EUR; other module flags/prices/dates and human-control NONE/0 preserved as controls. No price agreement/payment receipt is manufactured. Expected effective grant inactive→active→inactive, count21→22→21, same other commercial terms. Record fresh before save, persisted after activation and fresh restoration.

Only toggle exact module and save existing license form; no package application, account/membership/customer/site/order creation, assignment, stock/payment/fiscal/shift action, direct SQL/migration/seed or deploy. Existing grants only; seller denial without membership is valid and not permission to provision. Relevant business deltas, terminal controls and all unexercised end-to-end paths remain NOT TESTED. Existing inactive UI PASS PR2763 retained; new active navigation NOT TESTED until observed. Lifecycle/native/assistant owners and their LAB work remain untouched. Whole wholesale/standalone scope OPEN. Single next action: after this claim merges green, perform authorized two module saves around read-only UI acceptance, prioritize restoration, then publish actual qualified results and manual/common records/PDF together.

18/10/2026 21:31 Europe/Athens — STORE-LIFECYCLE-01 / APPLICATION LINKS MERGED / REAL CLEANUP NOT EXECUTED

Owner feat/store-shifts-inventory-clear-20261018 retained, bounded source feat/store-lifecycle-application-links-20261018. Owner resumed21:04 after pause; both registers/fiscal/EFTPOS/RBS settings/connections remain protected. New Excel NOT RECEIVED. No business/LAB PASS and no reset operation.

SOURCE: PR2760 finalheadb0034be937e4cf21fd492ac1351fa4537c4f1b96, fullPRCI39152756368/build117750034023 SUCCESS3181PASS/0FAIL/0SKIP plus6backup/all required Windows/Chromium/nativeSQL/HTTP checks, merged5c5d1711f8f144d52e1090ac880c8b35ca093a77. ExactmainCI39153475177/build117752880985 SUCCESS3185PASS/0FAIL/0SKIP plus6backup (includes independent assistant-context tests). Local full Node20:3140tests/3003PASS/0FAIL/137 infrastructureSKIP; client build PASS. Native raw-link snapshot/fingerprint/company mismatch and actual GET-only HTTP tests explicitly passed. This is technical evidence, not a completed reset or business acceptance.

Nine explicit application links now have scoped counts in the existing read-only preview and central preparation panel. Company ownership joins Store because legacy Employee lacks companyId. Child/parent company and child store mismatches block review, changed reviewed layouts fail closed, and preview fingerprint includes raw-link counts. Every link stays REVIEW, no deletion authority. executionAvailable:false; no new execution/reopen route, production manifest/guards or storage adapter installed. Register retention, fiscal execution and other owners remain unchanged. Ordinary guard39154329670/deploy117754333538 pinned exact5c5d1711f8f144d52e1090ac880c8b35ca093a77, rollback artifact12146387142, confirmed healthy18:32:36UTC. Independent no-cache public health also returnedoktrue/exact5c5d1711. The preparation source is LIVE; this is not executed cleanup or authenticated business acceptance.

Actual read-only20:55:11Athens:0OPEN shifts, public.StoreLifecycleFence absent. Read-only20:55:32Athens:57PurchaseOrderLine+5PackCorrection+6Posting+3TotalOverrideAudit KAT rows missed by direct-store counts; no source/other-store/orphan deletion occurred. CloudDeviceCursor1 is retained infrastructure. Exact counts and sibling controls saved in CHECKPOINTS/EVIDENCE/store-lifecycle-20261018/application-link-counts.json; counts only, NOT backup/restore/full ownership.

ACCESS LIMIT: Render SQL connector is read-only; local DATABASE_URL/Render/S3 credentials are not configured (values not exposed). Permitted Browser fallback opened Render login; owner chose Google and completed secure credential steps, but authentication then reached method selection and the browser runtime timed out/reset. Two existing-tab recovery attempts failed Emulation.setFocusEmulationEnabled timeout. Fresh independent Render verification tab returned the login page: target authentication is NOT COMPLETE. No signed-in Render dashboard, shell, real backup or restore was reached/verified. Do not label this as a Google/site bot block or successful login, and do not repeat credential entry blindly. No production settings/credentials/Writer changes were made through Browser.

Whole STORE-LIFECYCLE-01 OPEN/ASSIGNED. Remaining complete production ownership including shared Workforce/raw/JSON links, hosted durable encrypted storage/key retention and actual isolated full restore, physical Writer/local spool and original-generation offline/inflight fencing, safe reopen and functional central execute UI/API. Existing Writer source has no lifecycle epoch/maintenance handshake, and remote job planning is not proof of a stopped physical connector. Single next action: restore authenticated execution access for actual recovery integration while completing the explicit ownership plan; never bypass recovery or activate old RESET. Keep both registers and shared/sibling data. Combined current-main PDF regenerated with this receipt; no manual PASS.

18/10/2026 21:32 Europe/Athens — ANDROID-CHAT-NATIVE-01 / limited USER PASS: store-name notification and correct tap

Retained owner feat/android-chat-native-20261017; receipt docs/native-label-user-pass-20261018. Owner21:32:30 reports «έχεις δίκιο ήρθε» after the same-account diagnostic, and21:32:50 answers «ναι» to the explicit combined question whether the notification showed the store name and tapping opened the correct conversation. This is scoped USER PASS delivery, displayed originating-store name and correct-conversation tap in the reported new-preview test. Earlier current no-notification/retest item is superseded for this observed test. Store ID/name, exact sender/recipient IDs, APK hash/model/OS, latency and separate foreground/background/locked states were not independently captured; do not infer them or broad all-device acceptance. Earlier generic LAB delivery remains historical evidence.

Read-only diagnostic PR2762/head9e26e8474cbae03c8840f73a4fb13e3d394d1bb7 merged94fdb3390ff6bbba4638ab5decfacb41f5578219 after applicable checks green. The earlier three LAB messages20:52/20:53/20:55 were same-account and intentionally excluded by existing sender logic, not proof of a new-APK defect. No code, APK, server, env or permission change was needed for this user result. Prior independent health688d96b0661a58b3ca8486911ba172b87fb81177 is the latest observed production revision; exact revision at physical test was not independently sampled. This page sent no real message/push/read or production mutation, and does not repeat the successful action for documentation.

Manual docs/manual/native-chat/PASS.md now gives the observed activation/delivery/title/tap flow, same-account exclusion and boundaries. Current pending task for this store-label delivery/tap retest is removed; unfinished owner remains assigned. OPEN: native permission-denial/session expiry/revocation/logout/account-switch/foreign-store and device storage/SDK/OS forensic acceptance, other phone/tablet variants, broader message/photo/AI functional acceptance, stable production signing/Play and iOS. QR image and public APK were technically verified earlier, but independent physical QR-scan acceptance is NOT separately asserted. No overall native/N16 PASS and no transfer of PWA/N16/AI/other owners. Single next action: continue remaining native device/session/privacy acceptance from this checkpoint without repeating this confirmed notification test.

18/10/2026 21:27 Europe/Athens - WHOLESALE-UNIFIED-PAID-01 / LIMITED LIVE UI PASS: INACTIVE MODULE HIDDEN / ACTIVE FLOW STILL OPEN

Retained coordinator codex/wholesale-suite-20261017, docs/wholesale-unpaid-ui-observation-20261018. Owner asks «συνεχιζεις?». Restored repository after scratch maintenance; current baseline94fdb339 preserves other owners. Existing claim/source/release PR2741/2744/2753 and native3153/0/0 proof retained. No source/config/schema/test edit or production business write. Fifteen owned runtime blobs are identical between reviewed95a85bcb8 and independently observed health688d96b0661a58b3ca8486911ba172b87fb81177; public no-cache health before/after21:20-21:25 returned oktrue/version0.22.0+kat-test-pos/exact688d96b, curl exit0. Later lifecycle/calendar/native work and their acceptance remain with their owners.

Actual desktop Cloud Chrome/SuperAdmin read-only observation21:20-21:23: canonical https://myworkstation-app.onrender.com/platform-admin → Συνδρομές & Modules → MYWORKSTATION LAB. Company license shown Ενεργό, no end date,21active modules; exact Χονδρική B2B card shown ΑΝΕΝΕΡΓΟ. No module toggle/save clicked. Closed with Ακύρωση, opened LAB company stores → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru) → Πλήρες Backoffice → Εμπορική λειτουργία. After normal data load and switching to Λοιπές εμπορικές λειτουργίες, actual top-level Χονδρική B2B entry absent; old Εξωτερικοί πωλητές and nested Χονδρική / B2B also absent. Exact visible-DOM button counts0/0/0, screenshot CHECKPOINTS/EVIDENCE/wholesale-unpaid-ui-20261018/unpaid-navigation.jpg. Other ordinary navigation remains visible. This confirms only the inactive-module UI/duplicate-entry removal for this existing SuperAdmin/LAB context; do not repeat this completed negative observation without a new failure.

LIMITED LIVE UI PASS only for the observed inactive-module appearance and omission of duplicate entries. Does NOT prove active-module opening, Owner/employee roles, direct server denial in production, seller/customer functionality, price/order submission/replay, mobile/offline, tenant switching or financial/stock deltas. Native technical proof remains separately recorded; it is not promoted to LIVE PASS. No account/member/customer/site/order created, no license/price/billing/package change, no stock/payment/fiscal/shift action, SQL/seed/migration/backup or direct deploy. Background shift values were visible but no before/after/control transaction measurement was performed; no business delta is inferred.

Positive read-only functional acceptance remains OPEN because the stored WHOLESALE_B2B grant for the LAB company is inactive. Single next action: obtain action-time confirmation for temporary activation of ONLY this module in MYWORKSTATION LAB, exercise only read-only wholesale/site/seller navigation allowed by current memberships, then restore its original inactive state. No customer/seller provisioning, order submission or change to prices/other modules/real stores is included. This browser policy confirmation concerns expansion of stored access, not new permission to develop code; no grant was made or claimed. Publish an exact before/after claim/baseline before any authorized state-changing test, coordinate with existing LAB/lifecycle owner and do not manufacture paid status or bypass entitlement. Manual docs/manual/wholesale/PASS.md records only the completed narrow negative UI flow. Whole wholesale/standalone product remains OPEN with retained coordinator until named handoff.

18/10/2026 21:10 Europe/Athens — STORE-LIFECYCLE-01 / APPLICATION LINK COUNTS / AWAITING NATIVE CI

Owner feat/store-shifts-inventory-clear-20261018 retained; bounded source branch feat/store-lifecycle-application-links-20261018 after owner resumed work21:04. Latest authorized scope remains a new KAT start preserving BOTH registers/fiscal/EFTPOS/RBS settings and connections, store identity/licenses, company/shared catalog/other stores. No reset/deletion executed.

Read-only production20:55:11Athens: ZERO OPEN shifts, lifecycle fence absent. Read-only20:55:32Athens explicitly joined application links through their parent and Store company: PurchaseOrderLine57, PackCorrection5, Posting6, TotalOverrideAudit3 KAT rows; ReopenMovement0/EmployeeNaturalRule0/StoreChatRead0. CloudDeviceCursor1 belongs to retained device infrastructure. Other-store controls respectively1016/20/22/0/15/0/134; none removed. Counts are NOT backup, whole graph ownership or deletion authority.

Source adds explicit read-only application-link review to existing scoped RepeatableRead preview and central preparation panel. Nine named links; no inferred name-based selectors. Parent ownership joins Store (Employee lacks companyId); count child/parent company or child store mismatches; fail closed on changed reviewed layout; no row bodies, credentials or other-store counts returned. Fingerprint now binds application-link counts. Every raw link remains REVIEW, never REMOVE; executionAvailable:false. Existing reset executor, retention boundary, fiscal/offline behavior and routes unchanged.

Local Node20 focused4PASS/0FAIL/2native infrastructureSKIP, frontend build PASS. Full local Node20:3140 tests/3003PASS/0FAIL/137 infrastructureSKIP. Native CI pending. Native fixture now contains raw PurchaseOrderLine without FK, exact target/sibling/foreign snapshots, fingerprint change on raw child insert, cross-company mismatch blocker and unchanged real GET-only HTTP checks. No LAB/USER PASS or production release claimed for this source.

Whole task OPEN/ASSIGNED. Production application ownership graph, real durable encrypted export/isolated full restore, active/offline/fiscal fencing, generation-aware reopen and executable central reset UI/API remain unfinished. New Excel NOT RECEIVED. Next action: native/full CI then complete explicit ownership and recovery integration; preserve prior scoped PASS and all unrelated owners. Combined PDF remains final release receipt work, not business closure.

18/10/2026 20:40 Europe/Athens — ANDROID-CHAT-NATIVE-01 / RELEASE LIVE, public APK verified; device label/QR acceptance OPEN

Retained owner feat/android-chat-native-20261017. Source PR2734/headb9a79118e1e35e9d474bbc13b79b6ee5281a9d92 merged6fea2ad10f6dd5ab557cfbfdc14a727412f8dfaa after all required checks SUCCESS. Exact PR fullCI39136362578/job117701690604 and main fullCI39136855548/job117703128800 each3113PASS/0FAIL/0SKIP plus6backup. AndroidCI39136362580 SUCCESS19unit+6API30 instrumentation/build/lint. Published APK is the earlier verified CI39135675357 artifact from identical Android tree3f2967bf, not a newly generated debug signing identity.

Normal guarded Render workflow39137344362/job117704488973 SUCCESS, rollback checkpoint retained, exact deploy-hook dep-dbadmv8m7kps738emdn0 LIVE6fea2ad finished18Oct14:48:29.554022Z. Fresh public health at14:50UTC returned oktrue/exact6fea. Public landing /downloads/chat-android/ and versioned APK returned200; MIME application/vnd.android.package-archive,3654376bytes/SHA25682c2ed08c381ce23f5169fad8655a64d6ad9d51d4882eed8c15108ffdcb2c25d matched release manifest and trusted CI artifact; full APKv2 signature/content/certificate and packagegr.myworkstation.chat.preview/version0.1.3-preview/code4 verified. QR PNG and mounted dialog QR independently decoded the public install URL without credentials. Renewed18Oct20:39 public check: healthoktrue/revision688d96b0661a58b3ca8486911ba172b87fb81177; same public release manifest/APK200/MIME/bytes/SHA unchanged. This is technical release/download verification, not physical installation PASS.

POS Chat includes Android · Λήψη / QR; new client negotiates v2 store-name title, legacy client notifications retain four fields. No message text/photo added to notifications. Existing preview certificate differs: remove only MW Chat Preview if replacing old preview, then re-login/re-register notifications. Stable production signing/Play/iOS remain OPEN. User's earlier2FA/store-entry and LAB generic registration/delivery/correct tap USER PASS retained. New QR installation/store-label result was not received; optional question expired/aborted, never infer PASS. User20:39 reports no visible link/QR in conversation; direct public links and saved QR resent, without inferring a POS implementation failure.

Source implementation, artifact publication and guarded release tasks completed; remaining assigned next action is user installation from public QR/link and verification of store-name notification. Also OPEN negative permission/session/revocation/logout/account-switch/foreign-store and forensic SDK/OS storage acceptance, phone/tablet variants, message/photo/AI functional acceptance, production signing and iOS. No new real message/read/push, environment or production DB action in this receipt. Other owners retained; no new native manual PASS from CI/public HTTP alone.

18/10/2026 19:26 Europe/Athens — STORE-LIFECYCLE-01 / TWO TECHNICAL INCREMENTS LIVE / KAT CLEANUP NOT EXECUTED

Authoritative progress receipt, NOT a task closure or business PASS. Owner feat/store-shifts-inventory-clear-20261018 retained after explicit takeoverPR2748/396d5c3 from owner-stopped feat/store-cleanup-20261017. Latest owner18:35 confirmation supersedes limited clearance: new start removes KAT employees/products/stock/shifts/sales/payments/history, preserving BOTH register installations and their fiscal/EFTPOS/RBS settings/connections, store identity/licenses, company/shared catalog and other stores. New KAT Excel NOT RECEIVED; photos/roster pending.

SOURCE / TESTS / RELEASE: PR2752/head74364e7d1133f976dd11c07a84c9a40a495dcbc4/fullCI39142629757/job117720131586 SUCCESS3176PASS/0FAIL/0SKIP plus6backup/all required Windows/build/Chromium/nativeSQL/HTTP checks, merged0a1b3c2582edb4b69c4d7615d73c85b198fade80. ExactmainCI39143178960/job117721831721 also3176/0/0 plus6backup. Ordinary guard39143716020/job117723216510 pinned0a1b3c2, rollback artifact12142836390, healthy16:12:24UTC; Renderdep-dbaeuouq1p3s73bdq9lg LIVE and independent health exact0a1b3c2. Internal bounded streaming, authenticated encrypted chunks/final index, exact PK cursors/digests and both-register preservation are released source; no production executor/adapter activation.

PR2754/head77e52741eb4a17907ad62c4703fc847ad5977c38/fullCI39143764854/job117723443682 SUCCESS3179PASS/0FAIL/0SKIP plus6backup/all required checks, merged688d96b0661a58b3ca8486911ba172b87fb81177. ExactmainCI39144249228/job117724857603 also3179/0/0 plus6backup. Native restart-seed refusal test actually passed. Ordinary guard39144617939/job117725862439 pinned688d96b0 and confirmed healthy16:25:13UTC; Renderdep-dbaf4crbc2fs73b5makg LIVE, finished16:25:01UTC. Independent no-cache public health nowoktrue/version0.22.0+kat-test-pos/exact688d96b0. No manual deploy/restart or guard bypass. Startup example seed now skips a reset/maintenance/retired KAT instead of recreating old employees/rules/shift templates; ordinary first-install and existing separate admin/owner setup remain.

ACTUAL KAT STATE: owner closed the shift18:40:20.228615Athens, independently observed. Fresh19:22:53Athens SQL:ZERO OPEN shifts/ZERO active operator sessions/ONE recently active connector; public.StoreLifecycleFence absent. No guard installation, maintenance enrollment, generation bump, Writer stop/revoke, fiscal replay or reset command occurred. Production inspections used read-only SQL; ordinary release startup remains separate from a cleanup operation. There is NO real KAT encrypted snapshot or verified restore. Public executionAvailable:false and no executable reset route/submit remain unchanged.

Fresh19:20:36Athens inventory:135direct storeId tables/67nonempty, retained as counts-only evidence CHECKPOINTS/EVIDENCE/store-lifecycle-20261018/direct-counts.json. Includes44cash shifts,143store products,23legacy Employee,165Sale,213StoreTransaction,174StockMovement,30PurchaseDocument and273DocumentAttachment. This is NOT a before/after deletion audit or a backup. Previously measured inline content161847741bytes/largest3437231, all273inline/zero external-only; real production streaming recovery still requires configuration/integration and actual isolated restore. Both active KAT-POS-01/02 installation/fiscal entries and separate KAT-FISCAL-01/02 settings were positively read; no setting/credential body was exported.

DEPENDENCY REVIEW OPEN: schema metadata identifies403raw-ID/JSON/attachment candidates across173tables, saved in application-link-review.json in the same evidence directory. These are heuristics, NOT reviewed row ownership or a deletion allowlist. Undeclared children such as PurchaseOrderLine.orderId and EmployeeNaturalRule.employeeId require explicit selectors; the current internal CHILD manifest requires declared FK ownership.19:19:11Athens read found3Workforce identities linked to KAT and0explicit other-store access rows; this alone does NOT prove sole ownership or authorize deleting shared workforce identities. Current web plan1c-2g and production Postgresbasic_256mb/1GB were read, no plan changed.

Whole task OPEN/ASSIGNED, no LAB/USER/real reset PASS and no new manual PASS. Retained safety boundaries: no store/company/shared-catalog/other-store deletion, preserve both register/configuration sets, complete recovery and raw/JSON/binary ownership review, reject active/inflight/old-offline work, exact prepared confirmation and atomic replay/rollback, safe generation-aware reopening. Hosted durable storage/keys/retention, actual production recovery adapter/reference/schema coverage, authenticated client/worker generation propagation and central executable UI/API remain unfinished. KAT is NOT certified ready for a cleared new start merely because code CI/release passed.

Single next action under the retained owner: implement the explicit reviewed production row-ownership/application-link manifest (including raw children and shared controls) using this evidence before any executor activation; then complete hosted recovery/actual isolated restore and offline/worker/reopen/UI integration. Do not ask again for already authorized development or run old financial transactions for documentation. Final cleanup requires a new exact baseline and records of actual removed/preserved rows. This receipt and the regenerated combined PDF preserve all unrelated owners, source and prior scoped PASS.

18/10/2026 19:15 Europe/Athens - COORD PHASE2 / ΔΕΥΤΕΡΗ ΠΑΡΑΔΟΣΗ ΚΩΔΙΚΑ LIVE / AWAITING LAB

Κεντρικός owner codex/central-four-streams-20261018, με τέσσερις εσωτερικούς agents. Η νέα καταγραφή αντικαθιστά τα προηγούμενα phase2 SOURCE PREPARED / CI PENDING μόνο για τα παρακάτω περιορισμένα scopes. Δεν κλείνει συνολικά τις14 απαιτήσεις και διατηρεί όλα τα παλιότερα περιορισμένα PASS και τις ανεξάρτητες αναθέσεις.

- WS1 #2704 / PR#2749: μηνιαία read-only προεπισκόπηση με όρια ημερολογιακού μήνα στην αποθηκευμένη ώρα Ελλάδας, έλεγχο κάθε ημέρας και συνολικό HOLD όταν λείπει πηγή. Παραμένουν cap1.000, PROVISIONAL, αρχικά ποσά/day/POS/delivery/identity. Δεν προστέθηκε συγκέντρωση ανά υπάλληλο ή αποστολή.

- WS2 #2705 / PR#2750: προαιρετική προβολή ανά προμηθευτή στο υπάρχον panel, με ίδιες ποσότητες από μία πηγή. Υποψήφιος βάσει εγκεκριμένων παραστατικών(PROXY), όχι πραγματικών παραλαβών· ισοβαθμίες/ελλείψεις/όριο μένουν χωρίς ανάθεση. Κανένας αυτόματος ορισμός βασικού προμηθευτή ή αποστολή παραγγελίας.

- WS3 #2706 / PR#2751: ορατή πλήρης/μερική/μη επιβεβαιωμένη κάλυψη, σαφής χαρακτηρισμός των έξι συνόλων/footer και μοναδικά πλήθη συναλλαγών από τον canonical producer. Ποσά, γραμμές, CSV schema, ελληνικό ημερολόγιο/defaults και store guards διατηρούνται.

- WS4 #2707: ανεξάρτητος έλεγχος των παραπάνω και καταγεγραμμένη πραγματική εμφάνιση product_sales COMPLETE κάρτας στο LAB. Νέα διασταύρωση πηγής/CSV δεν ολοκληρώθηκε· κανένα νέο hosted PASS.

Πλήρη PR CI: #2749/39141314834 =3156PASS/0FAIL/0SKIP· #2750/39141772469 =3163/0/0· #2751/39141776928 =3170/0/0. Καθένα επιπλέον6backup και υποχρεωτικούς Windows/build/Chromium/invariants/nativeSQL/HTTP ελέγχους. Exact combined main d9ba358fd23f6ec0a97c94ad4aa291a6d3adf79e / CI39142289435 / job117720534605:3170/0/0 +6backup.

Η συμβατή νεότερη κοινή έκδοση 0a1b3c2582edb4b69c4d7615d73c85b198fade80 πέρασε CI39143178960/job117721831721:3176/0/0 +6backup. Ο ordinary guard39143716020/job117723216510 διατήρησε rollback artifact12142836390, έκανε pin16:10:11UTC και επιβεβαίωσε exacthealth16:12:24UTC. Render dep-dbaeuouq1p3s73bdq9lg LIVE. 18/10/2026 18:55 Europe/Athens — STORE-LIFECYCLE-01 / BOUNDED STREAMED RECOVERY SOURCE / AWAITING NATIVE CI

Owner feat/store-shifts-inventory-clear-20261018 retained. TakeoverPR2748 merged396d5c3 before source. Preservation-only PR2752/head767bbf73cfc1eb3921bcc3d026666d120ef01a9a/fullCI39141856579/job117717903365 SUCCESS3157PASS/0FAIL/0SKIP plus6backup/all Windows/build/Chromium/nativeSQL/HTTP checks. Merge refused405 because independent common-record updates moved main; no overwrite/bypass. This combined increment preserves those source changes and reconciles complete current main d9ba358fd23f6ec0a97c94ad4aa291a6d3adf79e, including other owners.

Measured KAT recovery need161847741inline bytes/273DocumentAttachment rows, all inline. New INTERNAL recovery transport writes independently authenticated/encrypted bounded chunks and a final authenticated index as commit marker. Binds scope/manifest/exact source/schema signature and expected aggregate digest; verifies chunk sequence/offset/count/name/checksum/stream identity and every length-prefixed exact SQL row-text digest. Refuses missing/reordered/tampered/wrong-scope or partial streams. Exclusive private existing-directory storage uses original fsync/readback codec. Failed source read removes owned chunks; no successful index is returned. Complete readback explicitly remains restoreVerified:false; hosted durable provisioning/keys/retention remain unimplemented.

Internal execution core optionally accepts an explicitly reviewed streaming manifest. Uses actual ordered primary-key metadata, keyset pagination with exact text cursors/type casts (no numeric rounding), one SQL row per fetch with8MiB row bound; snapshot stores counts/digests rather than all row bodies. Aggregate streaming source cap1GiB remains bounded independently of the old16MiB in-memory path; old path stays unchanged. Prepare/execute recompute row/schema digests, verified recovery reader remains inside maintenance, exact removal counts and streamed retained-record comparisons stay transactional. No production manifest, HTTP executor, hosted adapter, generation-aware client/worker/reopen integration or production guard installation is activated.

Local Node20 transport3PASS/0FAIL/1nativeSKIP and executor2PASS/0FAIL/8nativeSKIP. Full local3118tests/2982PASS/0FAIL/136infrastructureSKIP. New native tests restore complete exact decimal/timestamp/inline source rows into a separate schema, preserve source/sibling controls, and exercise actual streamed executor with over32MiB inline documents and numeric PKs above JS safe integer range, two registers/RBS/EFTPOS preserved, exact18deleted documents and idempotent replay. Native/full CI still required for this NEW increment; earlier3157CI does not cover streamed changes. No LAB/USER PASS or real KAT backup/restore is claimed.

Fresh production observations remain authoritative below: owner closed KAT shift18:40:20Athens; zeroOPEN and active operator sessions at18:40:54. Both KAT-POS-01/02 installations/fiscal entries and separate RBS settings exist. Recent KAT-POS-01 connector heartbeat was observed; no connector stop/restart/revoke and no production deletion/configuration/schema changes. All44shifts/143products/23employees and273attachments still present at those observations. New Excel NOT RECEIVED. User full-new-start authorization includes employees/sales/payments/history while retaining both registers and configurations; no store/company/shared-catalog/other-store deletion.

Whole task OPEN/ASSIGNED, executionAvailable:false. Remaining: native/full verification of streaming, complete reviewed production ownership/raw/JSON/external dependencies and actual recovery schema/reference coverage, hosted durable storage/keys/retention and real isolated restore; old/offline/inflight request fencing, safe reopen, exact central UI/API/preview-bound atomic action and actual before/after KAT audit. Combined tracker PDF remains a release-receipt action, no manual PASS. Next: finish exact native/full CI for this combined preservation/recovery increment, then integrate production adapters before activating execution.

18/10/2026 19:05 Europe/Athens — STORE-LIFECYCLE-01 / STREAMED SOURCE MERGED / STARTUP RESURRECTION GUARD

Owner feat/store-shifts-inventory-clear-20261018 retained; bounded follow-up fix/store-lifecycle-seed-fence-20261018. Combined sourcePR2752/head74364e7d1133f976dd11c07a84c9a40a495dcbc4/fullPRCI39142629757/job117720131586 SUCCESS3176PASS/0FAIL/0SKIP plus6backup and all required Windows/build/Chromium/invariant/nativeSQL/realHTTP checks; merged0a1b3c2582edb4b69c4d7615d73c85b198fade80. Logs explicitly confirm both new actual native streamed SQL restore and >32MiB streamed executor tests passed. ExactmainCI39143178960 pending at this receipt. Independent public GET health still edff09392aece314afbe5426bbb4ba1607c1869e, so no claim that new streamed source is live. Ordinary guard39143214973 succeeded but did not establish this new revision; no manual deploy/bypass.

New source review: Render startCommand runs npm run seed on every release. Existing server/prisma/seed.js upserts KAT/company/shift templates and recreates old named employees/rules; an unguarded startup would repopulate a cleared KAT. Add READ ONLY scoped lifecycle fence check before that example business seed. Maintenance, retired identity or generation>0 skip the entire KAT/company/store/example-shift/employee/rule phase and read the existing company for the unchanged admin/owner phase. Missing fence/enrollment and generation0 preserve normal first installation; wrong company, invalid generation or malformed boolean flags fail closed. No schema creation/enrollment, credentials, default user policy, fiscal gate or other-store change. DB guards still arbitrate a race after the read.

Local focused Node20:2PASS/0FAIL/1nativeSKIP. New native fixture invokes a real write callback only for a fresh store, never for the reset/maintenance target, preserving sibling rows and refusing foreign company scope. Full/native CI and actual production restart acceptance pending. No LAB/USER PASS. This source does not run seed or change production business state; existing ordinary deployment startup behavior is separately identified above.

Fresh MCP configuration correction: web service is currently1c-2g; production Postgres remainsbasic_256mb/1GB. Earlier shorthand256MiB server referred incorrectly to the web service; do not use it as current app-memory evidence. No plan/environment/server/DB change performed. Measured161847741inline attachment bytes remain the actual reason to implement bounded recovery instead of treating fixture-sized snapshots as production-ready.

KAT owner-confirmed shift closure independently verified at18:40:20Athens/ZERO OPEN. Both register identities/configurations preserved; recent Writer still needs physical quiescence before any reset. No actual KAT cleanup, real encrypted snapshot/restore, production manifest/guard installation, hosted durable storage/key provisioning, generation-aware request/worker/reopen or central execute UI/API. New Excel NOT RECEIVED. Whole task OPEN/ASSIGNED. Next: exact green native/full CI for this startup guard, then reviewed production recovery/fencing/UI integration. No further scope confirmation is required.

18/10/2026 18:44 Europe/Athens — STORE-LIFECYCLE-01 / BOTH REGISTERS PROTECTED / PRODUCTION RECOVERY SIZE BLOCKER

Owner feat/store-shifts-inventory-clear-20261018. Takeover PR2748/headab0ec71869abf6ad1ac1fffba085f74ad23c099b/docsCI39141408385 SUCCESS merged396d5c303a68f3c3e1c93dadd6cea90afcde6d75 before source. Owner18:35 explicitly confirmed full new start including employees/sales/payments/history, retaining BOTH registers and their POS/fiscal/EFTPOS/RBS installation/configuration/connections. Previous limited policy is superseded. Other owners unchanged.

Fresh production READ ONLY18Oct15:36:48UTC:44cash shifts/oneOPEN,143StoreProduct,23Employee. Owner closed the shift; independently checked15:40:54UTC:44shifts/ZERO OPEN, lastClosedAt15:40:20.228615UTC (18:40:20Athens). ZERO active StoreOperatorSession. Both active installation and fiscal entries KAT-POS-01/KAT-POS-02 exist, with separate KAT-FISCAL-01/02 RBS settings. KAT-POS-01 CAP connector heartbeat15:39:14UTC was recently active; no stop/restart/revoke was performed. RBS request status counts8DECLINED/9SALE_COMMITTED, no unresolved status observed.

Counts are point-in-time observations, not a maintenance fence.

Critical actual recovery-size finding:273DocumentAttachment rows, all inline, zero external-only; SUM(octet_length(contentData))=161847741bytes, largest3437231bytes. Current executor caps aggregate source row bytes at16MiB, codec plaintext at32MiB. Real KAT backup/restore is NOT POSSIBLE with the current in-memory fixture-sized core. Do not merely raise caps on256MiB server. Chunked/streamed encrypted durable storage plus verified full restore is a genuine remaining implementation requirement.

Bounded source change: manifest construction rejects REMOVE for established RESET_KEEP installation/configuration categories, including installation/fiscal/EFTPOS/RBS, connector registration, credentials and paid modules. This prevents a reviewed RESET plan overriding preservation. Native encrypted-recovery fixture now includes TWO target installations/fiscal/EFTPOS rows and two target RBS configurations plus sibling controls; compares complete retained bytes after reset. DELETE remains internal/unmounted and is not authorized for KAT. Public executionAvailable remains false; no HTTP executor, recovery adapter, production guard installation or business deletion is introduced.

Local Node20 focused:13PASS/0FAIL/11native-SKIP. Full local:3113tests/2979PASS/0FAIL/134infrastructureSKIP. Native/full GitHub CI pending; no LAB/USER PASS. No production data or configuration changed by this page. No real KAT encrypted snapshot/isolated restore, generation-aware client/worker integration, safe reopen, central execute UI/API, production release or actual cleanup PASS. New Excel NOT RECEIVED; photos/roster pending. Whole task OPEN/ASSIGNED. Combined tracker PDF release receipt remains due; no manual PASS added.

Next: actual native/full CI for preservation increment, then implement bounded streamed recovery for the measured real data and complete reviewed ownership/offline/inflight/reopen integration before central production activation. No unsafe SQL shortcut or request to reconfirm already authorized scope.

18/10/2026 18:46 Europe/Athens - WHOLESALE-UNIFIED-PAID-01 / CODE LIVE / NATIVE CI PASS / AWAITING FUNCTIONAL LAB

Retained coordinator codex/wholesale-suite-20261017. Owner-requested unified paid workspace source is merged and ordinarily released; full wholesale product remains OPEN. ClaimPR2741/head6e459405/docsCI39139383289 all applicable checks green/full build correctly skipped, merged a6f0ac452 before source. SourcePR2744/heada9b9025d8361e9c11c6f8127c6f8b27efa7824c6/fullCI39140476609/job117713812357 SUCCESS3153PASS/0FAIL/0SKIP plus6backup/all required Windows/build/Chromium/security/license/invariant/archive/realHTTP checks. Merged95a85bcb8d4ba1ea46f8cbac6373f0f68c07c9cc, preserving independent WS2/WS4 documentation on main. Exact95mainCI39141049058/job117715529534 alsoSUCCESS3153/0/0 plus6backup/all checks. No source correction was needed after the reviewed full PR run.

Actual native PostgreSQL proof executed, not skipped: explicit WHOLESALE_B2B vsCORE-only/foreign grant and SuperAdmin denial; company ACTIVE/status/subscription and module dates; observed FOR SHARE lock wait crossing actual expiry; all manager/customer-site/seller entry/read/quote/order/history/replay negative matrices; exact advisory-key waiter then dedicated-module revocation denies accepted replay on all3channels, preserves one original request/event and allows restored authorized immutable replay. Existing JWT/session/current role/password/assignment boundaries, NET/GROSS/VAT0, concurrency, oldRR negative/defaultRC positive, atomic rollback and original synthetic financial/stock controls retained. Local3108/2974PASS/0FAIL/134environmentSKIP, mounted31/31 and builds remain separate evidence, not LAB.

Ordinary guarded Render workflow39141541809/job117716865155 SUCCESS pinned EXPECTED_REVISION95a85bcb8, triggered existing deploy hook15:41:14UTC and observed exact healthy revision15:44:19UTC. Existing service srv-d9isenfavr4c73bdh52g/workspacetea-d9ie26vaqgkc739uudqg: deploydep-dbaeh6jncjis73d8ultg statusLIVE/triggerdeploy_hook/commit95a85bcb8, finished18Oct15:44:07.755568Z. Independent fresh no-cache GET /api/health15:44-15:45UTC returned oktrue/version0.22.0+kat-test-pos/exact95a85bcb8; curl exit0 confirmed. No manual deployment/restart/trigger/bypass. This proves code inclusion/health, not authenticated UI or business/LAB acceptance.

Delivered: ONE top-level «Χονδρική B2B» opens role-aware wholesale management, Site πελατών, seller assignments and seller work. Separate old seller/nested wholesale entries removed. Live no-store capabilities and current company paid module control visibility; all3channels enforce it directly with no wholesale SuperAdmin bypass. No default grant, guessed price or payment-receipt fiction: existing PlatformAdmin commercial activation remains authority. ACTIVE current company subscription plus explicit current WHOLESALE_B2B entitlement required. Selected-store scope and current identities retained. Lost access removes private DOM while preserving unresolved body/UUID/principal and navigation lock; manual same-account recovery only, no automatic POST/offline/reload guarantee.

Later docs-only396d5c303 retains independent store-lifecycle owner. Reconciled main094169262 preserves the independent assistant transfer receipt and central WS1 monthly report sourceedff09392; that owner's validation/release is separate and is NOT claimed by the3153 wholesale receipt. All33owned runtime/test blobs match reviewed source through094169262; all other owners/source/manuals preserved. Common records and tracker PDF synchronized with latest main. No production business/API/schema/account/membership/assignment/grant/license/backup/payment/stock/fiscal operation; no manual PASS. Full functional LAB/mobile, durable offline, fulfillment/receivables/collections/fiscal and standalone packaging/domain remain OPEN with retained owner until named handoff. Single next action prepare bounded read-only UI/entitlement/role acceptance against the actual deployed revision; any future state-changing LAB needs explicit store/device/operator/time and before/after/control checkpoint, without replaying old transactions. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-unified-paid.md.

18/10/2026 18:35 Europe/Athens — STORE-LIFECYCLE-01 / CONFIRMED FULL NEW START / OWNER HANDOFF

ΑΝΑΛΗΨΗ ΑΠΟ feat/store-cleanup-20261017 — ASSIGNED feat/store-shifts-inventory-clear-20261018. Previous page stopped by owner. At18:34–18:35 owner explicitly superseded the limited clearance and confirmed YES to removing employees, sales, payments and all KAT history. BOTH CASH REGISTERS MUST REMAIN, with both POS installations, fiscal/EFTPOS/RBS configurations and connections. Store/company/shared catalog/other stores remain protected; licenses and infrastructure identity must remain usable. No external fiscal/bank history deletion, receipt cancellation or replay.

Owner authorizes development/tests/push/merge and KAT reset after reviewed ownership/dependencies, durable encrypted backup and actual isolated verified restore, active/inflight/old-offline exclusion. New Excel NOT RECEIVED; photos/roster pending. No KAT deletion has occurred. PR2722/516b6cc internal core with owner-reported3054PASS/0FAIL/0SKIP is historical CI evidence only; public executionAvailable:false. PR2736 closed unmerged. Last44shifts/oneOPEN KAT-POS-01 since17Oct13:32Athens/143products/23employees/recent connector is stale until refreshed.

This newest entry supersedes the18:30 limited-scope claim below. Central takeover PR2748 must carry this corrected scope before any runtime change. Whole task OPEN; production cleanup NOT EXECUTED. Required outcome separates code, tests, release and actual reset counts. Existing broad preview classification is NOT a reviewed execution manifest. Preserve all unrelated owners/PASS. Next: publish corrected takeover, refresh production read-only counts and identify exact runtime integration blockers; no blind cascade or production SQL shortcut.

18/10/2026 18:25 Europe/Athens - WHOLESALE-UNIFIED-PAID-01 / SOURCE PREPARED / LOCAL PASS / AWAITING NATIVE CI AND LAB

Retained coordinator codex/wholesale-suite-20261017, source fix/wholesale-unified-paid-20261018. ClaimPR2741/head6e459405c3fdb697be2c3f5ed3e81f10d6f12d82/docsCI39139383289 all applicable Windows/classification SUCCESS, full build correctly skipped, merged a6f0ac452fa10afe73f0b5218e15a3f2038c3725 BEFORE source. Baseline now reconciles main36d52c760, preserving independent assistant transfer-filter sourcePR2742 and central four-stream release/manualPR2743 without takeover or an invented new PASS.

Implemented one top-level «Χονδρική B2B» in the existing CommerceLauncher. Removed separate top-level seller and nested legacy wholesale duplicates. One role-aware workspace groups existing wholesale customers/prices/orders, Site πελατών, Αναθέσεις πωλητών and seller work; EMPLOYEE mounts only seller APIs. Dedicated no-store live capabilities response controls entry, not generic activeModules or SuperAdmin hints; open/focus/poll/date-expiry/account-company fences fail closed. Explicit selected-store restrictions remain. Lost access removes private DOM while keeping unresolved order/seller component refs, body/UUID/identity and parent navigation lock mounted. Same user/company plus restored entitlement and manual retry are required; no automatic POST or durable/offline/reload guarantee.

Registered one company module WHOLESALE_B2B, absent all plan defaults and without invented pricing or automatic activation. Operations require current ACTIVE company license, subscription start/end and explicitly enabled current module start/end. Existing PlatformAdmin CompanyModule/commercial terms remain activation authority; stored prices do not assert collected payment. No SuperAdmin operational bypass for this module; unrelated licensing/bypasses/retail/POS unchanged. All manager/admin/seller mounts and public portal branding/login/session/catalog/quote/order/history/replay require the dedicated entitlement, including direct routes. Live protected transaction authorization is repeated after advisory/scope/product/tier waits, and manager mutations recheck before commit. Shared exact decimal/checksum/immutable accepted snapshot, one request/event and rollback contracts preserved. No fiscal/financial/stock effect or real provisioning.

Local Node20 final full suite on owned source before unrelated36d52 reconciliation:3108tests/2974PASS/0FAIL/134environmentSKIP in78.8s. First broad run exposed one legacy UI test stub missing the new workspace named exports; harness now retains the real workspace and its original selected-store assertions, targeted10/10PASS and final full run above. Final mounted UI31/31PASS includes paid/role/expiry/stale company/frozen response races and actual child suspension without loss or automatic retry. Frontend Work-safe build/TABLE_SERVICE PASS17.78s, server preparation/Prisma generation PASS. Native local SKIP is not PASS. Three disjoint workers and coordinator reviewed integration; shared current-company guard and final wall-clock revalidation retained.

Registered actual isolated PostgreSQL native proof awaits CI: capabilities/guard missing/foreign/CORE-only and SuperAdmin denial; ACTIVE/status/all dates and observed FOR SHARE waiter crossing expiry; manager/portal/seller direct-entry negative matrices; exact observed advisory-key wait followed by paid-module revocation denies historical replay on all3channels, with same accepted request/event and restored authorized replay; prior actual JWT/session/assignment, exactNET/GROSS/VAT0, concurrency, pricing-race negative/positive, rollback and synthetic financial/stock controls remain. Full exact combined PR/main CI and ordinary guarded released revision/health required before hosted acceptance. No new manual PASS, no business/API/DB/migration/seed/account/assignment/grant/license/backup operation or manual deploy/restart. Whole suite OPEN for functional LAB/mobile, offline, fulfillment/receivables/fiscal and standalone packaging/domain. Single next action publish scoped source and require actual native/full CI, then ordinary exact release. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-unified-paid.md; owner retained until named handoff.

18/10/2026 18:12 Europe/Athens - COORD-20261018 / FOUR SOURCE SLICES RELEASED / SCOPED WS1 LAB PASS / RESIDUALS OPEN

Authoritative central receipt; owner codex/central-four-streams-20261018 retained. Supersedes this scope's earlier source-prepared/CI-pending and untested daily/weekly HOLD-provisional-preview statuses only. Original accepted transactions and unrelated owners/PASS remain protected.

Source PRs #2729 cash, #2730 supplier proposal, #2731 unique baskets/coverage and #2732 assistant coverage all merged after full green CI. Integration PR#2737/head e936f3017b0925c9f10dac03ece7bc9835843ae2 and exact main8baa1f5ff5fcd72774716107f654b668d9f07c3e fullCI39136985554/39137532467 each3116PASS/0FAIL/0SKIP plus6backup; Windows/build/Chromium/invariants/nativeSQL/HTTP checks SUCCESS. The earlier combined-main39136174553 checkpoint-policy failure was preserved and repaired through a meaningful actual producer->JSON->consumer regression plus unique active/checkpoint evidence; no workflow/guard weakening.

Released descendant c68c817a3d69e55c8333cf32af5b362c6005f435 fullCI39137926344/job117706614390:3120PASS/0FAIL/0SKIP plus6backup. Ordinary guard39138489686/job117707869784 pinned that exact revision, preserved rollback artifact12140702729 and confirmed health15:04:34UTC. Render dep-dbaduarbc2fs73b199ng LIVE; independent public health15:07:42UTC status200/oktrue/exact revision. All22 original reviewed source/test blobs plus new integration-contract blob verified identical in released tree. No manual deploy or production business-state change by this coordinator.

Scoped LAB PASS18Oct15:08-15:10UTC: authenticated Platform Super Admin on remote Chrome, MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru), no shift/transaction action. After reloading the client following deployment, daily17Oct07:00->18Oct07:00 showed1source shift/version1; weekly anchor17Oct showed12Oct07:00->19Oct07:00,4source shifts/version1. Both visibly PROVISIONAL with explicit non-certification of reconciliation and HOLD for ambiguous/incomplete/missing MAIN shifts; current Sunday incomplete keeps the whole week HOLD. Automatic delivery remained disabled, confirmation unchecked/Save disabled. No Save/send/financial/stock/shift/payroll/invoice action or replay. First pre-reload client was stale and is not new-client acceptance evidence.

PASS only this daily/weekly HOLD/provisional disclosure and observed Athens period bounds. READY/full reconciled financial day, detailed grouped amounts, physical terminal/mobile, expanded live tenant/role/store transitions, SMTP/outbox/monthly, actual delivery-based supplier choice, supplier UI/sending, staffing/turnover/payroll and broad AI remain NOT TESTED/OPEN as applicable. WS2/WS3/WS4 hosted feature acceptance remains AWAITING LAB; technical release does not close their full requirements. The completed WS1 HOLD/disclosure acceptance is removed from the current residual; no whole14-task PASS.

Checkpoint CHECKPOINTS/CHANGES/2026-10-18-central-four-streams.md; machine receipt CHECKPOINTS/EVIDENCE/central-four-streams-20261018/source-release.json; screenshot weekly-provisional-lab.jpg in the same evidence directory. Scoped usage manual docs/manual/automatic-reports/PASS.md updated in this same receipt; shared tracker PDF regenerated from current Markdown. No other manual claim added.

Single next action: continue retained central coordination with a read-only LAB evidence acceptance of the remaining source consumers after reading this receipt; do not repeat accepted transactions or re-save existing report settings. Source and administrative receipt remain separate from functional completion.

18/10/2026 18:12 Europe/Athens - WHOLESALE-UNIFIED-PAID-01 / ASSIGNED / CLAIM BEFORE SOURCE / AWAITING LAB

Retained coordinator codex/wholesale-suite-20261017; docs branch docs/wholesale-unified-paid-claim-20261018; source fix/wholesale-unified-paid-20261018. Owner explicitly requests one top-level «Χονδρική B2B» button in CommerceLauncher, opening wholesale management, customer site and sellers together, visible/accesssible only with the paid module. Screenshots18Oct18:04-18:06 show current confusing separate seller button and nested wholesale entry. Baseline maind5c22c19a70146c6a66bf43d564ea00888d9dc42; prior seller/core/portal native CI and exact6fea release preserved. Independent calendar sourcec68/mainCI39137926344 and18:05 healthy release receipt preserved; no takeover. Whole product remains OPEN, new behavior NOT IMPLEMENTED/NOT TESTED. No source/config/schema/test changes before this claim is green and merged.

Bounded scope: one company-level WHOLESALE_B2B module, absent all default plans, explicit current ACTIVE commercial company license and active dated entitlement, no automatic production grants, guessed price, payment-receipt fiction or SuperAdmin operational bypass. Existing CompanyModule/PlatformAdmin commercial activation remains authority; payment settlement itself is not represented by current schema. CORE and unrelated modules/auth remain unchanged. One top-level «Χονδρική B2B» workspace groups management/site/seller assignments and seller workspace with role boundaries; employees must not eagerly mount manager APIs. Dedicated live capability response controls visibility; server guard protects all manager/portal/seller routes and shared protected retries. Selected-store isolation, current identity/session/assignment checks and frozen uncertain submission/navigation recovery remain protected.

Three existing workers after merged claim: wholesale_core owns NEW shared wholesale entitlement helper/capability route, module-catalog entry and focused new tests; field_sales owns launcher/unified workspace and mounted navigation/license/frozen-state tests; b2b_site owns portal/seller live entitlement predicates and their focused auth tests. Coordinator owns server mounts, manager/shared principal transaction revalidation, registered native HTTP fixtures/negative tests, integration review, common records and generated tracker PDF. No worker branches/commits/shared-record edits; no other owner or external service. Expected files additionally include wholesale-principal.js, wholesale-b2b.js/portal-admin.js integration as necessary, existing wholesale HTTP/entry tests. No schema migration, real account/grant/license/payment/stock/fiscal/business mutation, direct deploy/restart or guard bypass.

Preserve exact decimal prices, same-key one request/event, immutable accepted replay with CURRENT license/session/scope, revocation after advisory waits, rollback and synthetic financial/stock controls. Required meaningful coverage: module missing/inactive/future/expired, TRIAL/SUSPENDED/EXPIRED company and company subscription dates, noSA bypass, unified role-aware entry, stale entitlement response and account/company/store changes, uncertain retry retained but denied after revocation, public branding/login and all direct routes closed. Full Node20 focused/native PR/main CI and ordinary guarded exact revision health before hosted acceptance. CI is not LAB. No manual PASS; offline, standalone packaging/domain and full functional LAB remain OPEN under retained owner. Single next action merge this claim green, implement bounded unified paid module and require actual native/full CI. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-unified-paid.md.

19/10/2026 21:03 Europe/Athens - HISTORY ACTIVATION / EXPLICIT BACKUP DEPLOYMENT HANDOFF / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ feat/store-shifts-inventory-clear-20261018 — ASSIGNED codex/assistant-business-queries-20261015, ONLY history-expiry invocation in ops/backup/run-jobs.sh, history-specific image copy/dependency region in ops/backup/Dockerfile, matching backup build/deployment and history provisioning/activation regions in render.yaml, plus NEW history-specific provisioning/cleanup helpers and tests. Independently claim ONLY the new history-provisioning invocation prepended to root package.json start, preserving the complete original command, so the actual existing Render start receives reviewed provisioning without a second service or manual startup override. User explicitly answered «εγκρινω» at19Oct21:03:26Athens to the exact transfer request after published readinessPR2861/8a6c78d. Prior AssistantHistoryArchive-only manifest/column-review transferPR2840 remains approved. No other lifecycle worker.py/recovery engine/lease/readiness/physical KAT/reset, bucket/secret/plan/full-backup schedule or other-owner region is transferred.

Source branch feat/assistant-history-activation-20261019, baseline f3305f096eb7830f89483dda64f69271c9fb4535. Preserve current backup-upload retry PR2864, native camera/user PASS, wholesale/grouping changes and all other assignments. Current source history PR2852 remains default OFF. Actual read-only17:36–17:37UTC table absence/runtime heartbeat metadata in the preceding readiness entry is historical, not continuing rollout clearance. No new source/schema/flag/provisioning or business mutation yet. Publish this claim green on main BEFORE source.

Bounded implementation: reviewed idempotent archive provisioning through ordinary guarded startup/deployment, exact physical columns/constraints/catalogue consistency; refuse incompatible already enrolled plan rather than change lifecycle engine. Bounded scheduled expired-prose erasure on existing backup cadence, retain optimistic revision/request/digest tombstones, shared lifecycle guard/maintenance locking, no automatic provider/report/transaction replay. Prove isolated actual PostgreSQL concurrency, schema mismatch, expiry/idempotency/stale retry and encrypted restore/reset controls before rollout. Verify backup retention/recovery limits; no unverified claim of physical deletion from old full backups. No second service/uncontrolled timer/credentials change. Full exact PR/main CI and compatible guarded app/worker release precede activation; current production read-only inspection again before any schema rollout. No manual production SQL from Work or guard bypass. Group normal-app read-only acceptance at completion; existing auth auto-review restriction remains binding, no private HTTP/browser workaround, no microphone request. Whole VOICE OPEN/ASSIGNED, no new LAB/manual/numbered PASS. Next action: merge this claim green then implement only the named activation slice.

19/10/2026 20:37 Europe/Athens - HISTORY ACTIVATION / ACTUAL READ-ONLY SCHEMA READINESS / BOUNDED HANDOFF PREPARED

VOICE owner codex/assistant-business-queries-20261015 retained; whole task OPEN. User20:34:39 requested continuation to completion. Source PR2852 and final receipt PR2854 remain authoritative; no new source change or live history activation. Current main baseline67e33c8427d65486395ca6ce283fa68d5e1d3310 includes independent wholesale/native camera work; their ownership and actual acceptance remain protected.

ACTUAL READ-ONLY metadata through Render connector, previously confirmed My Workspace tea-d9ie26vaqgkc739uudqg, production myworkstation-db dpg-d9isee7avr4c73bdglog-a. At2026-10-19T17:36:44.102447Z: public AssistantHistoryArchive ABSENT, StoreLifecycleFence ABSENT, StoreLifecycleExecution ABSENT, StoreLifecycleRuntime PRESENT. Independent information_schema lookup across schemas confirmed only the runtime table among these four names. Thus no existing lifecycle fence/execution table was present at that observation; this is not ongoing clearance, no business-row count or reset proof. Recheck immediately before any later rollout. No table/trigger/plan installation or enrollment performed.

At17:37:17.429863Z, runtime metadata reported protocol MWS_STORE_RECOVERY_CAPABILITY_V1, manifest495041c38888d4972d23a54980797284d785fd068873e6021c35cc10617ec85a, worker revision7d6862edca08f5e623516d49f3557e75bb86ea43, heartbeat17:35:17.581755+00:00, storagePolicyVerified true. This is a fresh reported heartbeat only; MAC was neither retrieved nor independently verified, and it is NOT an independent current S3 retention/restore acceptance. No credential/key/secret read. Staging DB untouched.

CONCRETE REMAINING ROLLOUT: keep history OFF; add reviewed archive provisioning through the ordinary guarded deployment mechanism, matching the approved AssistantHistoryArchive-only manifest/column review entries. Add bounded expired-prose cleanup retaining revision/request/digest tombstones, with lifecycle maintenance/reset locking and retry/expiry controls; test actual PostgreSQL concurrency and selective encrypted recovery. Use the existing backup service cadence, not a second service or new unmanaged app timer. Verify current object retention and restore treatment before enabling; do not assert a 30-day physical backup-erasure guarantee without evidence. Only after exact source/native CI, compatible app/worker release, current schema/catalogue verification and retention/recovery checks enable history and perform grouped normal-app read-only acceptance. Browser auto-review authentication restriction remains binding, no alternate private HTTP/browser workaround.

BOUNDED HANDOFF PREPARED, NOT CLAIMED: from feat/store-shifts-inventory-clear-20261018 to retained VOICE owner, ONLY history-expiry invocation in ops/backup/run-jobs.sh, history-specific image copy/dependency region in ops/backup/Dockerfile, and matching Render backup build/deployment plus history provisioning/activation regions in render.yaml; NEW history-specific cleanup/provisioning helpers and tests. Existing lifecycle worker.py/recovery engine, worker readiness/leases, full backup schedule, bucket/secret/plan policy, physical KAT/reset and all other tables stay with current owners. Existing two-file catalogue transfer PR2840 remains already approved, not requested again. This precise extra shared scope is not silently taken from the current lifecycle owner. Publish named transfer green before editing those assigned regions, per AGENTS.md ownership/handoff rules. No general development, push or merge approval is being requested again.

This readiness observation is recorded without a new LAB/manual PASS or numbered closure. Existing limited guidance/CSV/source-line/user passes are not replayed. No financial/stock/fiscal/shift/payroll/store/license/settings mutation, new service or production SQL write occurred. Single next action: resolve the prepared narrow backup/deployment handoff, then implement the coordinated activation slice under its published claim.

19/10/2026 - HISTORY CHAT SOURCE LIVE / EXACT CI SUCCESS / ACTIVATION HOLD

Retained VOICE owner codex/assistant-business-queries-20261015; whole VOICE-ASSISTANT-01 remains OPEN/ASSIGNED. Pre-source integration and narrow catalogue handoff PR2840 and exact same-connection dependency amendment PR2846 remain authoritative. No takeover of lifecycle engine, worker/jobs, physical KAT or delegated WS4 regions.

Source PR2852 final head 5bfd494b5417ba8e8acf016a1bc7c732fbf7c556, merged c0788ee93e930f715ee22adcd0447803da488327. Exact PR CI39264279106/job118100272186 and exact main CI39265672092/job118104859399 BOTH SUCCESS: 3459 PASS / 0 FAIL / 0 SKIP, plus 6 backup checks. Native isolated PostgreSQL, actual one-connection HTTP/native session-license-module authorization, archive-lock revocation, stale generation/revision, transport cancellation, Owner/Platform and mounted history UI cases executed. Final local suite: 3411 total / 3227 PASS / 0 FAIL / 184 environment SKIP; local skips are not claimed executed. One additional empty Git commit shared its parent's identical source tree and restarted CI; the final head above was independently rechecked.

Ordinary guarded Render deployment39266747789/job118108275137 SUCCESS, completed 2026-10-19T14:16:10Z. Actual health output at 14:16:08Z reported ok:true, version0.22.0+kat-test-pos, exact revision c0788ee93e930f715ee22adcd0447803da488327. No manual deployment or guard bypass.

Implemented behind default-OFF gate: native personal selected-store history load/reset, server-only checked-answer capture, original source-read requirements, optimistic revision and exact lifecycle generation, native authorization on the same transaction connection, dated historical prose without reusable export tickets. The actual visible canonical answer is archived; unshown model amounts are not. Cancellation/access loss blocks late private response/archive where still uncommitted; already committed writes are not claimed rolled back. Existing status polling withdraws old-generation history even across close/reopen. Disabled history returns authenticated available:false; real storage failure remains explicit, with no automatic provider/report/export replay.

ACTIVATION HOLD: ASSISTANT_HISTORY_ENABLED defaults OFF and was not enabled. No production archive table provisioned, catalogue JSON edited, plan/guards installed, purge worker/timer configured, credentials changed or production business mutation performed. The approved narrow manifest/column-review additions remain assigned here; rollout must coordinate with the existing lifecycle owner because catalogue validation requires the provisioned table and enrolled plan hashes/guards require a compatible upgrade. No current production operation state is inferred. Inactive-archive physical purge, backup retention/recovery and guarded rollout remain pending before activation. Next action: coordinated schema/catalogue/guard/retention rollout, then one grouped read-only acceptance in the normal application. No new authenticated normal-app/LAB/USER PASS; existing protected guidance/CSV/source/name/manual evidence remains unchanged. No numbered closure or CI-only manual entry.

19/10/2026 16:00 Europe/Athens - HISTORY SAME-CONNECTION AUTHORIZATION / BOUNDED CLAIM AMENDMENT BEFORE SOURCE

Retained VOICE owner codex/assistant-business-queries-20261015. Pre-source integration claimPR2840 remains authoritative, including the exact two-file history catalogue handoff; all other owners unchanged. Storage sourcePR2843/mergecc3c554d941c23b292949970d42a10e77347bd4f full PRCI39254001634/job118065040527 and exact mainCI39255199719/job118068909918 BOTH SUCCESS3402PASS/0FAIL/0SKIP plus6backup. Actual isolated native personal access, physical columns, exclusive fence, encrypted actual SQL reset recovery and sibling controls executed. This does not activate history or close VOICE.

NEW bounded amendment before editing: ONLY companyModuleState export in server/src/middleware/module-access.js accepts an OPTIONAL native DB/clock dependency while preserving the exact existing company active/license/subscription/module-date rules and all existing default callers; ONLY getState invocation in retained server/src/services/owner-assistant-access.js forwards its already supplied DB/clock to that native helper. No new role, grant, paid-module rule, bypass or authentication format. No whole-file/module takeover; other middleware/authorization functions and all unrelated assignments remain untouched. Existing common records contain no other assignment for these exact two regions. Publish this amendment green on main BEFORE these two source edits.

Reason found during API integration review: the archive transaction correctly holds a lifecycle/shared fence, but native rechecks must not open a second pool connection while the transaction holds the first. Repository and the new native access/turn adapters must pass the transaction client through every in-transaction native check. The existing companyModuleState helper currently closes over global Prisma, so forwarding the transaction only to session/store/paid queries is incomplete. A one-connection isolated native HTTP test is required, using the real native company-license helper, real session/store/paid/personnel SQL and actual archive SQL; no controlled license fixture substituted for this new integration proof. Historical first-slice native test explicitly used controlled company-license state and stays qualified.

Required regressions: ordinary native helper callers unchanged; real single-connection personal Owner and central Platform history load/capture; paid and personnel revocation; selected-store/generation isolation; stale metadata stops before provider/source; native revocation across an awaited archive operation yields no private response; shared-store fence remains held; no connection fallback, production pool/config change or guard relaxation. Existing new API/UI source remains a separately validated continuation of PR2840; this amendment is only the two exact dependency-threading regions above. Full focused/local/native PR/main checks and ordinary guarded exact release required. Production schema/catalogue/plan/background purge still HOLD; normal-app acceptance READ-ONLY/grouped, browser auth auto-review restriction remains. Whole VOICE OPEN/ASSIGNED; no new LAB/manual/numbered PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-history-integration.md.

19/10/2026 15:21 Europe/Athens - VOICE HISTORY NATIVE INTEGRATION / EXPLICIT NARROW TRANSFER / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ feat/store-shifts-inventory-clear-20261018 — ASSIGNED codex/assistant-business-queries-20261015, ONLY AssistantHistoryArchive additions in ops/backup/lifecycle/manifest.json and corresponding history-column entries in ops/backup/lifecycle/column-review.json. The owner answered «ξεκινα» at19Oct2026 15:21:12Athens to the immediately preceding exact named transfer request. This is explicit acceptance of that prepared narrow scope, not release of the lifecycle engine, other tables, policies, worker, recovery jobs or physical KAT preparation. Old owner retains every other lifecycle scope. Baseline3e50b3559 includes central guarded-readiness PR2833; no older PDF or schema snapshot is substituted.

Independent retained VOICE owner remains codex/assistant-business-queries-20261015. Planned source branch feat/assistant-history-native-integration-20261019. Claim: owned history contract/repository; NEW history-specific native access/service/routes/schema provisioning and regression files; narrow existing owner-assistant-handlers turn capture and owner-assistant router regions; platform-admin assistant status/ask/history regions only; AssistantChatPage history binding and NEW history UI helper/tests. NEW server/prisma history SQL artifact if required by the existing migration mechanism. Only the two named lifecycle catalogue additions above. No delegated owner-sales-tools/answer-response/report-table/SalesAssistantEvidence or lifecycle engine implementation edits. Integration design docs/architecture/assistant-history-integration.md is the reviewable contract. Publish this claim green on main BEFORE any new source/config/schema change.

NOT IMPLEMENTED / NOT TESTED: native persistent-history API/UI/table/physical retention. Existing foundation PR2828 and exact int64 correction PR2836 full PR/main3380PASS/0FAIL/0SKIP plus6backup remain separate technical evidence; no new LAB/LIVE/manual PASS. Table ownership fields must be server-derived and consistent with the exact actor/mode/company/store/int64-generation key. Native current-session/module/personnel checks before/after awaited operations and lifecycle shared-fence check inside writes; no stale epoch upgrade. Derive stored prose/requirements only from real checked server answer/reads, never client assistant text. Strict optimistic revision/idempotent identity, fixed30day visibility, expired text cleanup without stale retry resurrection. Explicit selected-store only, no all-store/support-preview persistence. No request-time DDL or production manual SQL/migration from Work.

Preserve actual qualified CSV/source-line/Greek-name/guidance desktop manuals, existing 8threads/40messages/files metadata, current export-ticket/Owner limits, cancellation/IME/session/store guards. History restores only timestamped historical prose, no old evidence/tickets/download buttons. Fresh queries keep current native source checks. Missing table or failed save is explicit unavailable/not-saved, not fake persistence success. Other central/native/wholesale/invoice/lifecycle owners retained. No financial/stock/fiscal/shift/payroll/grant/settings/business write or replay; normal production acceptance READ-ONLY and grouped at completion. Browser auth auto-review denial remains binding, no alternate credentials/browser/privateHTTP workaround. No microphone available.

Required proof: isolated native PostgreSQL physical columns/constraints, shared lifecycle fence/reset-race refusal, exact int64, cross-user/store/mode isolation, missing schema, optimistic conflicts, expiry/reset/recovery/physical text purge with retained revision fencing; real native personal-role HTTP authorization/revocation; mounted delayed-load/UI binding/historical labels/no restored tickets; full PR and exact main CI plus ordinary guarded exact release before grouped read-only normal-app acceptance. Historical schema evidence is immutable and not represented as a current production inventory. Whole VOICE OPEN/ASSIGNED; no CI-only manual/numbered closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-history-integration.md. Next single action: merge this bounded claim green, then implement and validate storage/lifecycle integration first and native API/UI in the claimed scope.

19/10/2026 - HISTORY INT64 COMPATIBILITY / EXACT CI SUCCESS / INTEGRATION OWNERSHIP REQUIRED

Retained independent VOICE owner codex/assistant-business-queries-20261015. Existing pre-source foundation claimPR2822 and owned services/tests retained; the bounded compatibility correction was recorded locally before source in this checkpoint and active list. SourcePR2836/heade396aba802bba0b97d674c702ff636f4e09d6d8b, full native PRCI39239616576/job118017228283 SUCCESS3380PASS/0FAIL/0SKIP plus6backup, mergedf89f199d85fcabc7574952a6fee2d5ec20a7335d after preceding main pipelines completed. Exact source mainCI39240521276/job118020162541 SUCCESS3380PASS/0FAIL/0SKIP plus6backup. Required Windows/classifier/native SQL/security/licensing/Chromium/build/archive/actualHTTP checks passed. No native skips hidden as execution.

The unmounted archive contract now consumes the existing canonical lifecycle int64 STRING via unchanged normalizeLifecycleGeneration; no Number conversion, rounding, default-zero upgrade or lifecycle-source edit. Local actual pre-change imports rejected valid canonical strings0,2,9007199254740992,9007199254740993,9223372036854775807. Corrected contracts accept exact int64 bounds, reject noncanonical/numeric/overflow values, preserve adjacent values beyond Number.MAX_SAFE_INTEGER as distinct scopes, and withdraw a late result after such an exact generation change. The actual isolated native PostgreSQL fixture reads StoreLifecycleFence BIGINT9223372036854775807 through the real readLifecycleGeneration before archive repository round-trip. This is not a production generation observation or hosted PASS. Revision/session-version numeric bounds and all prior archive/expiry/capability/idempotency behavior remain unchanged. Local owned24tests/23PASS/0FAIL/1nativeenvironmentSKIP; combined with lifecycle tests28total/26PASS/0FAIL/2nativeenvironmentSKIP. Full native PR/main above include the actual database case without skips.

Integration design prepared in docs/architecture/assistant-history-integration.md: native personal-role access, lifecycle transaction fencing, real server reads-log-derived requirements, purpose-bound API/turn capture, historical UI labeling, missing-schema handling, fixed visibility deadline and physical cleanup/recovery constraints. No API/UI/schema/provisioning/cleanup code from that proposal is implemented or claimed assigned by this document. No production data/table/DDL, provider/key, business/financial/stock/fiscal/shift/payroll action, replay, manual deploy or credential-protection workaround occurred. Existing accepted manual/CSV/source-line/guidance and newer central/native/purchase/wholesale/lifecycle evidence remain protected. Whole VOICE OPEN/ASSIGNED and grouped final read-only normal-app acceptance remain open.

ACTIVATION DEPENDENCY: ops/backup/lifecycle/manifest.json and ops/backup/lifecycle/column-review.json belong to retained STORE-LIFECYCLE-01 owner feat/store-shifts-inventory-clear-20261018. The proposed archive requires explicit physical ownership fields and reviewed reset/delete/recovery coverage before adding a real table. A narrow named handoff is prepared ONLY for the AssistantHistoryArchive additions in those two catalogue/review files, to codex/assistant-business-queries-20261015. The proposed logical row is DIRECT/REMOVE; exact columns/foreign keys/native restore and physical retention still require isolated proof and actual catalogue reconciliation. No handoff has been inferred or applied; the assigned lifecycle files are unchanged. All other lifecycle tables, rules, engine, jobs and physical connector/spool work retain their owner. The reviewable scope and proposed row are in the integration design, not an applied patch.

Next single action: obtain/record that explicit narrow named transfer, then publish the separate API/UI/schema/cleanup integration claim before source. The present owner retains VOICE until completion or named handoff. Existing final file-byte/numerical/Owner/mobile/IME/cancel and persistent-history acceptance remains grouped; physical microphone unavailable. No CI-only manual or numbered closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-history-foundation.md.

19/10/2026 - VOICE HISTORY FOUNDATION / FULL PR AND EXACT MAIN CI SUCCESS / UNMOUNTED

Retained independent owner codex/assistant-business-queries-20261015. Before-source claimPR2822/headac1f7fc1ed276bcec3a88ada5c45c6971cbc3510/docsCI39227204519 applicable classifier/both Windows SUCCESS/build correctly SKIPPED, merged e904eccaa4159906fa4adde55eebeefbde0255a3. SourcePR2828/headcd553e2e1d836b13e3e2704c3f5f5865260aae2b, full native PRCI39230462008/job117987177154 SUCCESS3377PASS/0FAIL/0SKIP plus6backup. Merged2b640fc63ae91281804cfbf7daefe26476f4de3e only after prior mainCI39230283875 completed, without cancelling another owner pipeline. Exact source mainCI39232012825/job117992251240 SUCCESS3377PASS/0FAIL/0SKIP plus6backup; all required classifier/Windows/build/native SQL/security/licensing/Chromium/archive/realHTTP checks SUCCESS. Both logs explicitly execute the new native history repository case successfully. No skipped native case is represented as executed locally.

Delivered technical foundation: strict version1 text archive; eight conversations/forty messages each,600/2000 character and128KiB UTF8 limits; exact actor/mode/company/store/lifecycle generation key; current session/version and granular business-domain capability comparison around awaited locks/queries/writes/commit. Fixed parameterized SQL, per-scope advisory transaction serialization, BIGINT-compatible optimistic revision and last-request digest idempotency. Expired visibility and old retries fail closed; explicit empty reset advances revision, so an earlier save cannot resurrect removed text through a stale retry. Unknown credential/export-ticket/evidence/file-byte/attachment/provider/authority fields are rejected. Historical text is marked historical, not fresh financial evidence. Actual native PostgreSQL proves SQL, concurrency, expiry/reset and rollback on simulated authorization loss in an isolated test schema. It is not real-account/session or hosted acceptance.

Local Node20 focused21tests/20PASS/0FAIL/1nativeenvironmentSKIP; full3321total/3146PASS/0FAIL/175environmentSKIP and server preparation PASS. PR/main above execute native tests without skips. The initial two timestamp-fixture expectation failures and their correction remain recorded below; no assertion weakened or hidden. Prior119 local tests/build are separate historical evidence. Existing directCSV/source-line/name/report-display and limited guidance/desktop manual PASS remain protected without replay.

UNMOUNTED: no existing API/UI/runtime import, schema/migration or production data change. The archive table is not provisioned by these services and there is no request-time DDL or default production DB/auth binding. Thirty days is a fixed visibility deadline, NOT completed physical retention cleanup. No working durable-history UI, new export, upload, wider domain, production revision health or new LAB/LIVE/manual PASS is claimed from this source-only delivery. Ordinary release evidence and exact health remain mandatory for subsequent runtime integration; no manual deploy, guard bypass or browser credential-protection workaround used. Whole VOICE remains OPEN/ASSIGNED and the numbered item stays open.

Next single action: publish a separate bounded API/UI/schema/physical-retention integration claim, coordinate lifecycle coverage before adding a real table, derive archived requirements only from actual server report reads, and enforce fresh native authorization on every retrieval. Keep old prose separate from fresh canonical reports and issue no reused export ticket. Grouped final normal-app read-only acceptance still includes persistent-history integration when available, actual short-follow-up file bytes/formats, per-thread filename UI, source/numeric reconciliation and Owner/mobile/IME/cancel. Physical microphone unavailable. Owner retained until completion or named handoff; central/native/wholesale/lifecycle/purchase-supplier scopes preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-history-foundation.md.

19/10/2026 12:00 Europe/Athens - VOICE-ASSISTANT-01 / DURABLE HISTORY FOUNDATION / ASSIGNED BEFORE SOURCE

Retained independent owner codex/assistant-business-queries-20261015. Claim branch docs/assistant-history-foundation-claim-20261019, planned source feat/assistant-history-foundation-20261019. Owner requested remaining development first and one grouped final read-only acceptance. Baseline fab4330e2b0bda43279a89675de76759e81ec12a; existing central adapter/product-unit, native Android, wholesale, lifecycle and purchase-supplier owners retained. No overlapping source claim or new hosted acceptance inferred. Browser credential auto-review denial remains binding; no retry, alternate browser, credential extraction or private HTTP workaround.

NOT IMPLEMENTED / NOT TESTED: first bounded persistence foundation only. NEW server/src/services/assistant-history-contract.js, NEW server/src/services/assistant-history-repository.js, NEW server/test/assistant-history-contract.test.js and NEW server/test/assistant-history-repository.test.js. Define a strict bounded versioned archive of same-user/same-mode/explicit selected company/store conversations, with a captured store lifecycle generation. Fixed parameterized repository operations with injected storage/access checks, no model-defined SQL/IDs/URLs, no request-time DDL. Bound eight conversations and forty messages per conversation, per-message text limits and total serialized byte limit, thirty-day retention, optimistic version and deterministic retry identity. Logical current access is mandatory before/after each archive read/write; return neither existence nor content across actor/store/mode/generation mismatch. Old version or deleted/expired generation cannot resurrect history through a retry. Existing status/ask/export routes, auth/licensing and lifecycle implementation are NOT changed in this foundation slice. Concrete API/UI/schema provisioning integration needs a subsequent separately recorded bounded claim; this foundation is not persistent-history delivery by itself.

Only question/answer text, timestamps and server-validated capability requirements belong in the eventual archive. Do not persist bearer credentials, export tickets, generated bytes, raw canonical evidence, financial/private attachments, provider internals or client-provided authority. Historical answer prose must be labelled as recorded at its timestamp, not current report evidence; fresh report reads and existing current-session export authorization remain mandatory. Export tickets expire after five minutes and are never reactivated from history. Future integration must validate current relevant modules as well as actor/store/session and generation before revealing archived text. Explicit all-store history, uploads and additional business domains remain outside this bounded slice, not silently scoped to a first store. No browser localStorage financial archive or third-party provider retention.

Prior exact direct CSV content USER PASS, two existing original-transfer-line reconciliation, qualified name/report display and limited guidance/desktop LIVE PASS remain protected and are not replayed. Earlier same-session history and per-thread filename source remains unchanged. Previous local review on 5bae2ece470e3e72e3e4bb9a1b7c289359821386 passed two disjoint targeted batches55+64=119 tests, zero failures/skips, plus server preparation and frontend build/TABLE_SERVICE; these historical local results are NOT tests of this new foundation/current main and NOT a new manual/LAB PASS. No production business/schema/settings/grant, stock/payment/fiscal/shift/payroll/SMTP action.

Required acceptance before source delivery: strict malformed/oversized input refusal, per-actor/store/mode isolation, no tickets/secrets/evidence persisted, expired/deleted/generation-stale refusal, concurrent version conflicts, idempotent same-request retry, bounded deterministic retention, access revoked during an awaited storage read/write yields no private response. Tests use isolated injected storage; no production DB. Full PR/main native CI and ordinary exact guarded release required for any runtime integration. Whole VOICE OPEN/ASSIGNED. Grouped final normal-app read-only acceptance still includes file bytes/formats after short follow-ups, per-thread filename UI, numeric/source reconciliation, IME/cancel and Owner/mobile. Physical microphone unavailable. No new CI-only manual or numbered-item closure.

Checkpoint CHECKPOINTS/CHANGES/2026-10-19-assistant-history-foundation.md. Current owner retained until completion or named handoff. Next single action: merge this pre-source claim green, then implement and validate the isolated contract/repository foundation; follow with separately recorded API/UI/provisioning integration before claiming durable history usable.

18/10/2026 23:23-23:26 Athens - VOICE-ASSISTANT-01 / LIMITED LIVE GUIDANCE AND DESKTOP CONTROLS PASS / WHOLE OPEN

Retained owner codex/assistant-business-queries-20261015. Actual normal application, cloud Chrome tab8, authenticated existing Platform SuperAdmin, canonical /platform-admin -> Βοηθός, explicitly MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, all-stores unchecked. No new sign-in credential, grant, settings/business/financial/stock/fiscal/shift action, transaction replay, export or physical microphone. Initial no-selection composer disabled; selected LAB composer became available. Fresh independent no-cache health23:26:13.988220Athens oktrue/version0.22.0+kat-test-pos/exact755ca8c0855b7c2c261a7281a5d89c89083a38cb. Relevant chat/period/context/help/business source blobs match this release through reviewed main56f5708; latest independent wholesale selected-store claim preserved, not taken over.

LIMITED LIVE PASS from actual visible UI: (1) desktop Enter submits "Τι μπορείς να κάνεις;" and displays the bounded connected-capabilities help and read-only limits; (2) copy button changes to Αντιγράφηκε with visible success notice; exact clipboard bytes were not inspected; (3) Shift+Enter inserts a newline into "Πληρωμές Ιουλία" without submitting, then plain Enter submits the trimmed text; (4) that month-like name without a date asks for a valid period rather than displaying a July report; (5) new empty thread "Μεταφορές χθες 2269" shows the explicit out-of-period-number clarification, with the existing failure-style heading and no report/amounts; (6) separate new thread "Πληρωμές Μαρτίνι 123/10/11" asks for a valid date interval instead of displaying a valid-looking suffix date; (7) selecting the original help thread restores its two questions/answers, and closing/reopening only the chat page preserves that same thread and selected LAB/all-stores-off. No reload/cross-login persistence was tested. These observations certify these exact visible interactions only, not backend call counts, all calendar/name syntax, underlying reader coverage or financial absence.

No monetary rows, files or export tickets were requested/displayed by this batch. No actual provider/network count asserted. Desktop IME, actual cancellation/late results, mobile/drawer/touch, Owner parity, nonempty per-thread file lists and actual new all-product/short-follow-up export bytes/formats remain NOT TESTED. The current visible copy success is not independent clipboard-content certification. Missing-date name guidance is not new live proof of inherited-date name filtering. Monetary/report-source reconciliation, broader domains, persistent history/uploads and physical microphone unavailable remain OPEN. Prior qualified directCSV/two-line/source/name/report-display/central PASS retained without replay. Whole VOICE remains OPEN/ASSIGNED; no numbered whole-task closure.

Evidence JSON is a faithful manual transcription of actual cloud-browser AX states and screenshot preview, not a network trace or synthetic test result. Screenshot was visually inspected in tool output, but the documented shared-file path did not synchronize after the five-second poll; no saved JPEG or screenshot attachment is claimed. No browser-native protection bypass or alternate transfer used. Existing source PR2772/full PRCI39160735040 and exact mainCI39161223720 both3193/0/0 plus6backup, ordinary exact release39161772159 are provenance only, not the reason for this live PASS. Manual docs/manual/super-admin/PASS.md and current active/pending/tracker/PDF synchronized in this receipt. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-readonly-guidance-pass.md; observation

CHECKPOINTS/EVIDENCE/assistant-readonly-guidance-20261018/observation.json.

Next single action: continue the remaining independent conversational implementation/acceptance against the retained central ownership, publish any new bounded source claim before code, and keep broader final read-only acceptance grouped without repeating these accepted guidance/UI cases. Current owner retained until completion or named handoff.

18/10/2026 23:11 Athens - VOICE-ASSISTANT-01 / PER-CONVERSATION FILE LIST SOURCE LIVE / WHOLE OPEN

Retained independent owner codex/assistant-business-queries-20261015/source fix/assistant-thread-files-20261018. Pre-source claimPR2771/headb4e4b57a6e8d17bb5a03ffe07c061aff9841ccc6/docsCI39160493764 applicable classifier/bothWindows SUCCESS/build correctly skipped, merged6ca634f38e1d6f7f3646d1e74623828d49fcf5f8 BEFORE code. SourcePR2772/headd0d4d1fe2974f4e2f4b928acad8eda249f864eb1 merged755ca8c0855b7c2c261a7281a5d89c89083a38cb. Full native PRCI39160735040/job117773424898 and exact mainCI39161223720/job117774902052 both3193PASS/0FAIL/0SKIP plus6backup; all classifier/Windows/nativeSQL/security/licensing/Chromium/build/invariant/archive/realHTTP checks SUCCESS. Ordinary guarded release39161772159/job117776415105 SUCCESS, EXPECTED_REVISION755ca8c0855b7c2c261a7281a5d89c89083a38cb and actual healthy output, not merely printed script echo. Independent no-cache health18Oct23:11:00.119974Athens confirms oktrue/version0.22.0+kat-test-pos/exact755ca8c0855b7c2c261a7281a5d89c89083a38cb, process exit0. Earlier23:09:43 health was still previous5c5d171 and was not claimed as the new release. Workflow metadatabb552e9 is newer native photo receipt, not deployed pin; both owned runtime/test blobs remain identical through it. Native photo USER PASS and all other owners preserved without repeating their actions.

Delivered source: generated filename/time entries belong to the existing in-memory conversation that produced them. New conversation starts empty, selecting an old one restores its own names, automatic/manual exports remain supported, and revisit/close/reopen does not repeat a download. Existing generation/AbortController/scope/session/capability reset plus explicit active-thread check reject delayed files. Bounds remain eight threads, forty messages and eight filename entries per thread. No new durable bytes/tickets/history storage, uploads, backend/provider/model/key, role/license/store/sourceCoverage/delegated paths or production business change. Existing Owner export limit and server reauthorization/download format validation remain unchanged.

Final focused11PASS/0FAIL/0SKIP (new two mounted tests including six lifecycle subcases, plus existing three); unchanged chat baseline3/0/0. Full local3152total/3015PASS/0FAIL/137infrastructureSKIP; Work-safe client build/TABLE_SERVICE PASS. Mounted regressions cover exact automatic/manual names per thread, original-name restoration and no duplicate download, eight-file/eight-thread caps, late automatic exports after new/select/cancel/close/store/session, existing manual late-scope rejection and Owner export absence. Native PR/main above have no skips. No actual hosted new UI/file-byte test, provider/business read, financial/stock/fiscal/shift action, transaction replay, manual deploy or guard bypass by this page. These are source-release/synthetic results, not a new manual/LAB PASS.

Supersedes this slice's earlier implementation/CI/release waiting statuses only. Whole VOICE-ASSISTANT-01 OPEN/ASSIGNED. Remaining final normal-app read-only acceptance includes new per-thread file UI, chat desktop/mobile controls, new calendar/numeric/context behavior, normal-report numerical reconciliation, all-product/short-follow-up actual file bytes and other formats. Existing direct CSV, two-line original-source reconciliation, names/report display and qualified central manual PASS remain protected and are not repeated for paperwork. Persistent conversations/uploads and wider unsupported domains remain separate requirements; physical microphone unavailable. Next single action: reconcile remaining conversational requirements with central ownership and publish any new bounded independent source claim before editing. Keep actual acceptance grouped at the end as owner directed, no intermediate screenshot/microphone request. Retain owner until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-thread-files.md.

18/10/2026 22:49 Athens - VOICE-ASSISTANT-01 / PER-CONVERSATION FILE LIST CLAIM / ASSIGNED NOT TESTED

Retained independent owner codex/assistant-business-queries-20261015, source fix/assistant-thread-files-20261018. Freshmain7ced29e51f68f2859e9aaa3baca1c3b32d5f53df, latest month/context release and other owners preserved. Read-only mounted actual ChatPage reproduction with synthetic API: first conversation exports thread-one.csv once; create new conversation yields zero messages but still displays thread-one.csv in composer. This is a local UI reproduction, not production/LAB FAIL/PASS. No actual provider, export or business read/write.

Bounded claim before source: attach generated-file metadata to its own existing in-memory conversation instead of the page-global list. New conversations start empty; selecting a prior conversation restores only its own names. Preserve eight conversations, forty messages and eight file-name entries per conversation, same-session-only lifecycle, generation/AbortController guards and scope/session/capability clearing. Expected source only client/src/components/voice/AssistantChatPage.jsx plus NEW server/test/assistant-chat-file-context.test.js. No bytes/tickets in new storage, no persistence/uploads, no delegated evidence/table/dispatcher/sourceCoverage changes, no backend/API/provider/model/key/license/scope/SQL/business change. Existing Owner export limit and exact manual qualified PASS remain protected.

Required mounted regressions: own conversation file names for automatic/manual exports, revisit/close/reopen without duplicate download, delayed exports after new/select/cancel/close/scope/session changes cannot download or populate another conversation, file/thread caps retained and Owner controls remain absent. Require full native PR/main CI, client build and ordinary guarded exact release/health. New actual hosted UI NOT TESTED; final normal-application read-only acceptance stays grouped at the end, no intermediate screenshot or microphone request. Whole VOICE OPEN/ASSIGNED. Next action merge this claim green before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-thread-files.md.

18/10/2026 22:34 Athens - VOICE-ASSISTANT-01 / CONVERSATION MONTH GUARD SOURCE LIVE / WHOLE OPEN

Retained independent owner codex/assistant-business-queries-20261015; completed source branch fix/assistant-context-months-20261018. ClaimPR2759/head713c0647e60dbb33507a1be755d7488921bae34d/docsCI39152493884 applicable classifier/bothWindows SUCCESS, source build correctly skipped, merged a38b27a7f06657f5470988bcfb10fb6af879ac2e BEFORE code. SourcePR2761/head54e7124ac00bca912cad0da46f75fd1829aa493f merged9cea3454a76cb476efcb4562b1dec405a4b4494f. Full native PRCI39152796235/job117749823534 and exact source mainCI39153280422/job117751301024 both3183PASS/0FAIL/0SKIP plus6backup, all four required classifier/Windows/build/security/licensing/nativeSQL/Chromium/invariants/HTTP checks SUCCESS.

Released through compatible descendant5c5d1711f8f144d52e1090ac880c8b35ca093a77, fullmainCI39153475177/job117752880985 SUCCESS3185PASS/0FAIL/0SKIP plus6backup/all required jobs. Ordinary guarded release39154329670/job117754333538 has EXPECTED_REVISION5c5d1711f8f144d52e1090ac880c8b35ca093a77 and actual healthy exact-revision output at18:32:36UTC, distinguished from the script's printed echo command. Independent no-cache publichealth18Oct22:34:10.000748Athens confirms oktrue/version0.22.0+kat-test-pos/exact5c5d1711f8f144d52e1090ac880c8b35ca093a77, process exit0. Earlier guard39153789446/job117752703790 pinned9cea but did not certify healthy9cea; it is not cited as a successful exact9cea deployment. Guard workflow metadata94fdb339 is not its deployed pin. All three owned runtime/test blobs match source9cea through released5c and currentmain3645d05. Independent lifecycle/native/wholesale sources, actual scoped observations, grants and their ownership are preserved; this page performed none of those actions.

Delivered source: the conversation detector now uses the canonical complete Greek month lexicon/boundaries. A new question such as "Πληρωμές Ιουλία" after "Πληρωμές χθες" retains the prior user period instead of mistaking the name for July. Complete months and established colloquial forms, explicit newer periods, invalid-date refusal, unrelated-domain/assistant-only barriers, missing-period sales clarification and literal new question/name retention have regression coverage. The synthetic real-dispatcher test verifies the inherited day and supplied name and rejects a model-substituted July before source read. This is not a universal entity-filter binding guarantee. No edits to delegated owner-sales-tools/response/table/evidence UI/fixtures/sourceCoverage, central phase2 scopes, SQL/math/schema/auth/module/provider/model/key/export contracts or production business state.

Final focused32PASS/0FAIL/0SKIP; full local3142total/3005PASS/0FAIL/137infrastructureSKIP, Work-safe client build/TABLE_SERVICE PASS. Initial baseline import failed because Prisma had not yet been generated after clean dependency installation; ordinary build:server generated the client without DB/migration and unchanged baseline18PASS/0FAIL/0SKIP. Native PR/main evidence above has no skips. No actual hosted new name/month conversation was run, no provider/business read in production, no new manual PASS. Actual hosted new calendar/numeric/context behavior, normal-report numerical reconciliation, Owner/mobile/Enter/copy/cancel, new all-product/short-follow-up file bytes and other formats remain NOT TESTED/AWAITING the owner's final grouped normal-application read-only acceptance. Persistent conversations/uploads and broader unsupported domains remain separate requirements. No intermediate screenshot or physical microphone request. Existing limited report display/name/two-line reconciliation/directCSV/manual and central qualified PASS remain protected without replay.

This receipt supersedes this slice's earlier NOT IMPLEMENTED/CI/release-waiting wording only. Whole VOICE-ASSISTANT-01 remains OPEN/ASSIGNED. Single next action: reconcile remaining conversational requirements against central sourceCoverage ownership and publish the next bounded independent source claim before editing; keep final actual acceptance grouped at the end. Retain current independent owner until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-context-months.md.

18/10/2026 21:04 Athens - VOICE-ASSISTANT-01 / CONVERSATION MONTH TOKEN CLAIM / ASSIGNED NOT TESTED

Retained independent owner codex/assistant-business-queries-20261015; source branch fix/assistant-context-months-20261018. Baseline main8e87403dbd94edbb0881723c72a11ccfaff64f11, both completed parser releases and central phase2/sourceCoverage ownership preserved. Actual read-only Node20 reproduction: after user "Πληρωμές χθες", "Πληρωμές Ιουλία" or "Πληρωμές Μαρτίνι" returns assistantQuestionHasPeriod=true and unchanged effective question, while canonical businessPeriodResolution says mentioned=false/period=null. The context detector's month prefixes suppress legitimate same-domain period inheritance. Sales names have the same detector mismatch. No provider, source read or business action used. This is a local source reproduction, not LAB FAIL/PASS.

Bounded independent claim BEFORE source: reuse the exact Greek month lexicon/boundaries for the conversation detector; preserve existing numeric/relative/English/calendar-unit detection, invalid-period handling, source validation, labelled filters, latest explicit period, domain barriers and current authorized scope. Expected source paths assistant-business-period.js and assistant-conversation-context.js plus NEW assistant-context-months.test.js. No edits to delegated owner-sales-tools/response/table/evidence UI/fixtures/sourceCoverage, other central phase2 paths or SQL/math/schema/auth/module/provider/model/key/export behavior. No durable history/uploads or arbitrary filter support claimed.

Required regression evidence: proper names/codes containing month stems do not supply a period, exact and colloquial month forms still do, same-domain history retains only the period, newer explicit dates win, unrelated domains and assistant-only history cannot supply it, missing-period sales clarification remains server-owned. Require full Node20 native PR/main CI, frontend build, ordinary guarded exact-revision release and health. Actual hosted new context behavior NOT TESTED; final normal-app read-only acceptance remains grouped at the end as owner directed, no intermediate screenshot or microphone request. Existing limited manual PASS protected; whole VOICE OPEN/ASSIGNED. Next action publish this claim green on main before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-context-months.md.

18/10/2026 18:31 Athens - VOICE-ASSISTANT-01 / CALENDAR + NUMERIC TRANSFER GUARDS SOURCE LIVE / WHOLE OPEN

Retained independent owner codex/assistant-business-queries-20261015, latest source branch fix/assistant-transfer-numeric-filters-20261018. Numeric pre-source claim/previous calendar receiptPR2740/head7e645567bfb9d61324ee7ddaa3884d38d424f0a1/docsCI39139078332 applicable classifier/bothWindows SUCCESS/build correctly skipped, merged d5c22c19a70146c6a66bf43d564ea00888d9dc42 before edits. Numeric sourcePR2742/head bbb8263e1c71b2de3f4ca3c901895200dff7d541 merged 36d52c760d250b35b25e26440dc644e55ddafc57. Full native PRCI39139627007/job117711309316 and exact source mainCI39140130678/job117712781209 both SUCCESS3124PASS/0FAIL/0SKIP plus6backup, all four required Windows/native PostgreSQL/security/licensing/Chromium/build/invariant/archive/realHTTP jobs. Independent central release receiptPR2743/e82f813 and qualified WS1 HOLD/provisional LAB PASS/manual preserved, not repeated or claimed by this page.

Ordinary guarded Render39140500898/job117713807284 SUCCESS, EXPECTED_REVISION36d52c760d250b35b25e26440dc644e55ddafc57 and healthy exact-revision message. Independent no-cache public health18Oct18:30:59.904Athens confirms oktrue/version0.22.0+kat-test-pos/exact36d52c760d250b35b25e26440dc644e55ddafc57; successful process exit confirmed. Newer docs-only main490c151/central phase2 claim retains all three owned numeric runtime/test blobs unchanged. Publication reconciliation with newer main95a85bc preserves independent wholesale paid-module source and central2746 hosted product_sales card observation; the latter retains its original incomplete-comparison/file-byte/no-new-PASS limits and is not calendar/transfer-filter acceptance. Later takeover receipt2748/main396d5c3 is also preserved without changing its KAT/shifts/inventory ownership. All three owned runtime/test blobs remain identical. Phase2 explicitly protects the independent VOICE calendar/numeric owner; all its monthly/supplier/report UI claims and central coverage paths remain untouched. No manual deploy/hook/restart, guard bypass, settings/DB/backup/license/business mutation or transaction replay.

Calendar source2738/c68c817 remains included: exact Greek month words, complete date boundaries, malformed-date refusal instead of suffix substitution, and numeric-aware period-only continuation. Its PRCI39137361553/job117704630631 was3117/0/0 plus6backup; exact mainCI39137926344/job117706614390 was3120/0/0 plus6backup, ordinary guard39138489686/job117707869784 and independent18:05:34Athens exactc68 health verified. That first slice was source-released before the next numeric claim; neither technical release is a hosted financial/manual PASS.

Now source-delivered: an otherwise eligible unfiltered transfer request with a bare number outside recognized dates/rolling-day count asks for explicit clarification422 before provider/source read, rather than erasing the number or allowing invented query:null. ASCII/Unicode numbers, later lines, inherited topic and format-only follow-up are guarded. Exact valid date/range/rolling syntax and current scope remain; existing explicitly labelled name/numeric/status filters already outside the shortcut retain their original checked extraction path. This does not certify arbitrary model-only filter semantics or add a new numeric/amount filtering capability. Pure businessPeriodRemainder helper reuses the existing complete calendar grammar. Source scope only business-reports direct recognition, period helper and NEW assistant-transfer-numeric-filters.test.js; delegated WS4 dispatcher/response/table/UI/fixture files, sourceCoverage, SQL/math/schema/provider/model/key/auth/module/store/export contracts unchanged.

Final numeric focused37PASS/0FAIL/0SKIP; full local3094total/2961PASS/0FAIL/133infrastructureSKIP; Work-safe client build/TABLE_SERVICE PASS. Four new integration/boundary tests cover original direct-shorthand reproduction, both role entry paths, zero provider/source reads, Unicode/multiline/history/format cases, literal labelled query retention and exact date/day-count positives. Initial36PASS/1FAIL fixture wrongly demanded422 for a date-shaped decimal; final test requires the exact existing server-owned period clarification with zero reads for that ambiguity and retains strict422 for bare references. No assertion relaxation permits an unfiltered read. Previous calendar focused33/local2954PASS and its explicitly recorded initial failures remain historical; final native evidence above covers the combined source.

Actual new calendar/numeric guidance, normal-report numerical reconciliation, Owner/mobile/Enter/copy/cancel, new all-product/short-follow-up file bytes and other formats remain NOT TESTED/AWAITING the owner's final normal-application read-only batch. No new manual PASS; whole VOICE OPEN/ASSIGNED, persistent conversation/uploads and broader unsupported domains remain separate requirements. No intermediate user test/screenshot or microphone request. Qualified earlier report display2668, names, original two-line reconciliation2617 and direct CSV2631 remain protected and are not to be repeated for paperwork. Central WS1 actual HOLD/provisional PASS remains its own scoped result; WS4 hosted coverage acceptance is not inferred from it.

This latest receipt supersedes the previous numeric NOT IMPLEMENTED/next-source claim and source/main/release waiting statuses only. Single next action: reconcile remaining conversational requirements with the retained central coverage ownership and publish any new bounded independent claim before source; keep outstanding normal-app acceptance grouped at the end as the owner directed. Retain this owner until completion or a named central handoff, without duplicate edits to central phase2 scopes. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-calendar-tokens.md.

18/10/2026 18:05 Athens - VOICE-ASSISTANT-01 / CALENDAR TOKENS SOURCE LIVE / NEXT NUMERIC-FILTER CLAIM / WHOLE OPEN

Retained runtime owner codex/assistant-business-queries-20261015. Calendar source branch fix/assistant-calendar-tokens-20261018. Pre-source claimPR2735/heada2d67a8/docsCI39136836106 all applicable Windows/classifier SUCCESS/build correctly skipped, mergedffbb4f3cd64327f39f9293c5dabb50bd64e9683c before edits. SourcePR2738/head1fa12a4ff966db7429deac8f4ea52d86de905737 merged c68c817a3d69e55c8333cf32af5b362c6005f435. Full native PRCI39137361553/job117704630631 SUCCESS3117PASS/0FAIL/0SKIP plus6backup. Exact source mainCI39137926344/job117706614390 SUCCESS3120PASS/0FAIL/0SKIP plus6backup; all four required jobs and native PostgreSQL/security/licensing/Windows/Chromium/build/invariants/archive/realHTTP. Exact main includes the protected central four-stream integration8baa1f5; no delegated source or fixture was edited by this page. PR/main counts are separately recorded rather than equated.

Ordinary guarded Render39138489686/job117707869784 SUCCESS, EXPECTED_REVISION c68c817a3d69e55c8333cf32af5b362c6005f435 and healthy exact-revision message. Independent no-cache public health18Oct18:05:34Athens confirms oktrue/version0.22.0+kat-test-pos/exactc68c817a3d69e55c8333cf32af5b362c6005f435. Workflow metadatadd2b95a is a later docs-only wholesale receipt, not the pinned source. Its current main retains both owned runtime/test blobs unchanged. No manual deployment/hook/restart, guard bypass, production business/DB/backup/license action or old transaction replay.

Implemented source: exact Greek month words instead of name-prefix matches; full numeric/calendar boundaries and malformed-date recognition instead of suffix-date substitution; period-only follow-ups preserve unexplained digits. Valid natural/date/range/Athens/DST/rolling and established no-space connectors remain. Latest invalid dates cannot inherit an older valid period. Month-like literal names with an explicit valid day keep that day and provider query. Scope only assistant-business-period.js plus new assistant-calendar-tokens.test.js. This is not arbitrary name resolution, all model-only sales extraction or a general numeric-filter parser fix.

Local focused33PASS/0FAIL/0SKIP; full3087total/2954PASS/0FAIL/133infrastructureSKIP; Work-safe client build/TABLE_SERVICE PASS. Initial new31PASS/2FAIL caught an internal candidate restart inside a no-space date and a new harness missing existing cashTool; corrected with original assertions retained and no dispatcher change. Full native results above include all environment-dependent tests. Hosted calendar/name/numerical/Owner/mobile/file/physical acceptance NOT TESTED; new manual PASS is not created. Prior qualified display/name/original-source/direct-CSV PASS, central sourceCoverage work and all other owners retained. Whole VOICE OPEN/ASSIGNED, general normal-application read-only acceptance deferred to owner's final batch; do not request intermediate user tests or a microphone.

NEXT BOUNDED CLAIM - ASSIGNED same retained owner, branch fix/assistant-transfer-numeric-filters-20261018, NOT IMPLEMENTED/NOT TESTED. Actual local read-only reproduction with fixed18October clock: directTransferRequest(«μεταφορές χθες 2269») returns TRANSFERS/17October with query:null/status:null. No provider or source was called. This separate pre-existing shortcut strips unexplained digits in a complete transfer question; the new period-only guard does not claim to fix it. Scope only assistant-business-reports.js direct-transfer qualifier recognition, a reusable pure calendar-token helper if needed, and NEW independent regression tests. Unknown numeric reference/SKU/barcode must remain on the checked filtered path, never silently become an unfiltered read; valid date/range/rolling-day syntax and exact-name/direction/latest-period/export behavior must stay protected. No SQL/arithmetic/domain/schema/auth/provider/key/module/store/export contract change. Central WS4 delegated owner-sales-tools.js/answer-response/report-table/SalesAssistantEvidence and fixtures remain excluded. This claim must merge green with these records before the next source edit; require full focused/native PR/main and ordinary exact healthy release afterward. No general business-filter rewrite or new action permission.

Single next action after this receipt/claim merges: implement that strict direct-transfer numeric-qualifier guard under the same owner, then retain all remaining hosted checks for the final read-only batch. Existing all-product/short-follow-up file bytes, normal-report total reconciliation, Owner/mobile and other formats remain OPEN; no already-recorded real transaction or completed direct-CSV/source comparison is to be repeated for documentation. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-calendar-tokens.md. Owner stays assigned until completion or a named central handoff.

18/10/2026 17:49 Europe/Athens - WHOLESALE-FIELD-SALES-01 / CODE LIVE / NATIVE CI PASS / AWAITING FUNCTIONAL LAB

Retained coordinator codex/wholesale-suite-20261017. Online seller source is merged and ordinarily released; full wholesale product remains OPEN. ClaimPR2727 finalheadfcf68e6c/docsCI39133970898 passed applicable checks (full build correctly skipped), mergeda099e047 before source. SourcePR2733 finalheadfbc4370e2c0b5184342624bc67ea788f6406189a/fullCI39135690949/job117699716351 SUCCESS3095PASS/0FAIL/0SKIP plus6backup/all required Windows/build/Chromium/security/licensing/invariant/realHTTP checks, mergedeb56c5196f59e35ea8461d14199b35777359de87. Exact eb56mainCI39136072091/job117700848548 also3095/0/0 plus6backup. Earlier reviewed4d12908/CI39134981284 passed3081/0/0 plus6; shared records were reconciled before final merge, without seller source changes.

Combined current source6fea2ad10f6dd5ab557cfbfdc14a727412f8dfaa/fullmainCI39136855548/job117703128800 SUCCESS3113PASS/0FAIL/0SKIP plus6backup/all required checks. Actual native seller7child scenarios executed PASS, not skipped: real signed JWT/session and current identity, manager provisioning/revision/audit rollback, assigned tenant/customer/store catalog, exact NET/GROSS/VAT0,4concurrent submissions→one request/event and same backoffice snapshot, own/other-representative/foreign-tenant history, stale price/changed-body conflict, event rollback/recovery, role/password/session/license/module dates, assignment/membership revocation and exact advisory-waiter→session-revoke→unlock refusal. Original synthetic financial/stock controls unchanged. Populated legacy/v2→v3 migration/rerun/tamper rollback native PASS; old portal/backoffice/replay controls retained. All23owned runtime/test blobs are identical to reviewed seller source through6fea. Independent lifecycle executor, WS1–4, native notification/APK and their owners/evidence preserved; no source takeover.

Historical adc59a75/mainCI39136174553/job117702303053 stopped at checkpoint-policy before tests because its source delta omitted the active-list update; this was not a wholesale functional failure. Ordinary guard39136577101/job117702223097 correctly deferred an older source while newer source CI was pending. Latest6fea passes the checkpoint gate and complete combined suite, superseding that release blocker. Final ordinary guard39137344362/job117704488973 SUCCESS pinned6fea and triggered the existing deploy hook; no manual trigger, cancellation, bypass, direct deployment or restart by this page.

Confirmed Render My Workspace/tea-d9ie26vaqgkc739uudqg, existing myworkstation-app/srv-d9isenfavr4c73bdh52g: deploydep-dbadmv8m7kps738emdn0 statusLIVE/triggerdeploy_hook/commit6fea2ad10f6dd5ab557cfbfdc14a727412f8dfaa, finished18Oct14:48:29.554022Z. Independent fresh publicGET /api/health observed14:48UTC returned oktrue/version0.22.0+kat-test-pos/exact6fea; successful curl exit confirmed. This proves code inclusion and endpoint health only. No production seller membership/assignment, customer site/account/grant, seller/portal schema bootstrap or browser business flow was exercised. No hosted/LAB/manual PASS is inferred. Subsequent docs-only mainffbb4f3c changes no server/client/android/workflow source and preserves the separate assistant calendar claim; receipt publication completes after its own green docs CI and merge.

Delivered source: existing BackOffice login/MFA and individually revocable UserSession; same-company seller membership and explicit customer/store assignments; current database identity/role/version/password/CORE-license checks and lock-time revalidation; revision-checked manager mutations with atomic audit. Server-branded FIELD_SALES actor uses the same exact quote/SUBMITTED request core. Required expected user/company headers reject stale UI identities; own authorized history only. Manager «Χονδρική / B2B → Αναθέσεις πωλητών» and sibling «Εξωτερικοί πωλητές» workspace, explicit store/customer selection, selected BackOffice store restriction, catalog, quote, request and history. Ambiguous key/body/principal stays frozen with navigation lock and same-account in-memory reconciliation. Existing user permissions and authentication are retained; no new manager role or separate credentials. No durable offline/reload/crash/native-sales app guarantee. No Sale/payment/credit/stock reservation/posting/fiscal/myDATA execution. CORE remains an interim gate, not a complete standalone commercial entitlement.

Functional customer/seller→backoffice LAB, physical/mobile use, durable offline recovery, visits/collections/receivables, fulfillment/fiscal lifecycle, dedicated entitlement and standalone commercial packaging/domain remain OPEN under retained coordinator until named handoff. New seller tables remain subject to the lifecycle owner's reviewed ownership manifest; they are not an automatic delete allowlist. Single next action: prepare bounded virtual-LAB acceptance on the current exact deployed revision with explicit store/device/operator/time/items and required before/after/control checkpoint; no state-changing test is authorized by this technical receipt. Do not repeat earlier financial/stock transactions or another owner's work. No production SQL/migration/seed/account/grant/license/backup/business operation. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-field-sales.md; owner retained, no duplicate takeover.

18/10/2026 17:36 Athens - VOICE-ASSISTANT-01 / COMPLETE CALENDAR TOKENS / ASSIGNED

Retained runtime owner codex/assistant-business-queries-20261015; independent branch fix/assistant-calendar-tokens-20261018. Central owner-directed WS4 transfer remains protected: no edits to owner-sales-tools.js, assistant-answer-response.js, assistant-report-table.js, SalesAssistantEvidence.jsx, delegated fixtures or central checkpoint. Scope only server/src/services/assistant-business-period.js and a new independent regression test file, plus this owner's required common receipt. Domain/source calculations and central sourceCoverage contract unchanged.

Read-only reproduction on mainadc59a755924f813a8f5b11bb26629b3767ee3d8 with fixed18October Athens clock: «Πληρωμές Μαίρη» resolves to May, «Πληρωμές Μαρτίνι» to March, «Πληρωμές Μαρτίνι χθες» loses the valid yesterday period, «123/10/11» becomes23October2011, and «χθες 2269» is accepted as a pure-period follow-up. These are isolated parser findings, not hosted USER FAIL or proof that any production query occurred. Baseline public health18Oct17:35:16Athens oktrue/revision3f429e2f6a43aa599952dbe8e7d89d9ca2da7f81; shared newer main still has separate release checks.

Bounded change: exact complete Greek month words, complete calendar-token boundaries so malformed numeric date prefixes/suffixes cannot be silently parsed, and period-only follow-ups retain unexplained digits instead of discarding a possible SKU/reference. Preserve valid named/date/range/Athens/DST/rolling/current/previous periods, latest-period history, invalid-current-period refusal instead of fallback, qualified operator/name/source/direct-CSV/display PASS and existing total-sales strict guard. No arbitrary name disambiguation, general SKU extraction or broad business-filter rewrite. No new API/provider/model/key, auth/role/module, source/SQL/schema/calculations/export/scope contract or business state change.

New behavior NOT TESTED. Require focused complete calendar positives/negatives, actual shared dispatcher and history regression without editing delegated files, full native PR/main CI and ordinary guarded exact healthy release. Actual normal-app acceptance remains deferred to owner's final read-only batch; whole VOICE OPEN and no new manual PASS. No microphone request, production financial/stock/fiscal/shift write or old transaction replay. Claim must merge green before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-calendar-tokens.md.

18/10/2026 17:21 Europe/Athens - WHOLESALE-FIELD-SALES-01 / PR2733 NATIVE CI PASS / SHARED MAIN RECONCILIATION / AWAITING FINAL CI AND LAB

Retained coordinator codex/wholesale-suite-20261017, source feat/wholesale-field-sales-20261018. SourcePR2733/head4d12908ce3e7ad1a81d98e2b172e3c0b4ceafdd7/tree9fdab4ed passed fullCI39134981284/job117697660780:3081PASS/0FAIL/0SKIP plus6isolated backup tests, all Windows/build/Chromium/security/license/invariant/realHTTP checks SUCCESS. Actual signed-JWT/session/native PostgreSQL seller fixture executed all7child scenarios PASS, including provisioning/audit rollback, strict identities, scoped catalog/quotes, concurrent shared receipt, event rollback/recovery, current assignment/session/role/password/license expiry and exact advisory-waiter revocation. Native populated v1/v2→v3 migration/rerun/unknown-schema rollback also PASS; no native SKIP. Original portal/backoffice/financial-stock controls retained. These are isolated technical results, not hosted/LAB/manual acceptance.

Main moved to de424844760c25fab66cfc665b612777185c5e6f with independent lifecycle executorPR2722, native limited USER PASS/next assignmentPR2728 and central WS1 cashPR2729. Initial green-head merge refused405 for shared-record conflicts; no overwrite or bypass. All independent source/checkpoints/manuals/owners preserved; conflicts resolved by own new prefix plus complete current main, tracker PDF regenerated. Seller's23owned runtime/test blobs are unchanged from reviewed3081-pass source; combined exact head CI required again before merge. No source correction inferred or unrelated ownership taken over. Full suite remains OPEN, seller/customer functional LAB NOT TESTED. No production API/business/schema/account/license/backup/direct deployment action. Next: green exact reconciled PR/head and main CI, then ordinary guarded release/revision verification before proposing bounded LAB. Retained owner and all offline/standalone/fulfillment residuals below remain.

18/10/2026 17:11 Europe/Athens - WHOLESALE-FIELD-SALES-01 / SOURCE PREPARED / LOCAL PASS / AWAITING NATIVE CI AND LAB

Retained coordinator codex/wholesale-suite-20261017; source feat/wholesale-field-sales-20261018. ClaimPR2727 finalheadfcf68e6c4fe06694be2883dfb37e7268d30c4539 passed all4required docs check-runs (full build correctly skipped), merged a099e047f506d77b8124a6a2c647d860f21a7b63 before source. Three disjoint workers implemented seller bootstrap/auth/admin, shared principal/channel/router, and seller/manager UI; coordinator integrated actual routes/launcher, registered native HTTP/JWT/SQL acceptance and common records. Independent current native FCM, incoming invoice, lifecycle and central four-stream work preserved; no source takeover.

Prepared online slice: existing personally revocable BackOffice UserSession/MFA login, explicit same-company membership and customer/store assignments, revision-checked manager mutations with atomic audit. Actual current UserSession.userId, User role/company/sessionVersion/password state, CORE/company license and real-clock expiry checked; no fake role or manager privilege for sellers. Genuine selected-company Super Admin remains manager-only, with current database role verified; ordinary seller identity is own-company only. Required expected user/company headers reject stale UI identity, never select authentication. Server-only FIELD_SALES brand uses stable seller:userId and existing exact-decimal shared quote/SUBMITTED request/event. Explicit current assignment is rechecked under locks before fresh quote, history and accepted retry. Own actor/channel history only; no other seller/customer/channel history or costs. Fresh catalog uses canonical active Product/StoreProduct independent of portal publication. Validated atomic v1/v2/v3 channel upgrade preserves prior rows, rejects unknown constraint definitions and never restores obsolete v2.

Responsive seller entry is available within the existing CommerceLauncher through «Εξωτερικοί πωλητές»; manager wholesale tab «Αναθέσεις πωλητών» provisions existing users. Explicit blank store/customer selection, selected BackOffice store restrictions, scoped pagination/search, exact unit/net/VAT/gross, quotation, submission and own history/detail. Identity/access/context refresh clears private operational views. Ambiguous submissions freeze original body/UUID/principal, lock parent navigation, retain same-identity in-memory recovery and reject malformed acknowledgement. No durable/offline/reload/crash/native Android promise. Existing portal/manager guards, hashes, same-key replay, ReadCommitted/advisory serialization, rollback, frontend-only build and TABLE_SERVICE retained. No financial/stock/fiscal/credit execution or real provisioning.

Final local Node20 full suite3055tests/2931PASS/0FAIL/124environmentSKIP in70.0s; earlier3052/2928/0/124 is superseded for local breadth. Work-safe frontend final build PASS13.54s with TABLE_SERVICE verified; server preparation/Prisma generation PASS. All native local cases remain SKIP (no local PostgreSQL), not native or LAB PASS. Independent source review confirms realistic UserSession schema, current identity/lock ordering and schema migration; final focused103tests/98PASS/0FAIL/5nativeSKIP cover old portal/backoffice and new seller boundaries.

Actual registered native fixture awaits isolated CI: real signed JWT/generic session middleware with fixture-injected database, real seller/admin/bootstrap/shared core; tenant/customer/store/actor/session/assignment/license isolation, optimistic/stale provisioning, audit-trigger rollback, exact NET/GROSS/VAT0,4concurrent submissions yielding one request/event, common backoffice readback, own/other-representative/foreign-tenant history, changed body/stale price, immutable replay, event-trigger rollback and recovery, current role/password/session expiry/license/module dates, plus exact database/key advisory waiter followed by session revocation before unlock. Original synthetic Sale/StockMovement/StoreTransaction controls must remain unchanged. Separate populated legacy/v2 channel upgrade/rerun/tamper rollback native test retained. No native execution result inferred from source. Full exact PR/main CI and ordinary guarded deployed revision required before hosted acceptance; no direct deploy/restart/production SQL/account/grant/license/backup/business action. Functional customer/seller/backoffice LAB, physical/mobile, offline, visits/collections, credit/fulfillment/fiscal, standalone entitlement/packaging/domain remain OPEN with retained owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-field-sales.md. Next: publish this source PR, require actual native/full CI and then exact ordinary guarded release; no manual PASS or state-changing LAB authorization.

18/10/2026 17:12 Europe/Athens — ANDROID-CHAT-NATIVE-01 / store-name notifications and APK QR distribution ASSIGNED

User explicitly requests store identity in notification («θα έπρεπε να γράφει από ποιο κατάστημα είναι»), QR for app download and «ξεκίνα». Retained native owner feat/android-chat-native-20261017; bounded branch feat/native-store-label-download-20261018. Existing generic LAB delivery/tap/registration USER PASS preserved; requested store label is new scope, not a retroactive FAIL. No message text/photo in notification. Implement opt-in registration capability v2 so old APK receives unchanged four-field payload; new APK accepts bounded server-sourced storeName and retains strict session/staff/store checks. Name comes from authorized DB store, never caller message fields. No private history/name cache. Source and unit/instrumentation/provider compatibility checks required; physical store label AWAITING DEVICE.

Independent distribution addition: public versioned APK landing/download with QR, POS Chat entry via a new install-control component and minimal host insertion only; do not rebuild or transfer existing PWA/N16/AI scope. QR contains only public install URL, no token/PIN/user data. Verify exact signed CI APK/package/version/hash, public download MIME/hash/QR target and usability before delivery. Preview signing status must remain explicit; stable production signing/iOS/Play distribution are not silently completed. Add public tested APK artifact only after exact green Android CI; no signing key in git. Publish this claim before source. Existing Render pipeline retained; no environment mutation needed and do not reuse connector env-update as Save-only. No real message/read/push/business test by this page.

18/10/2026 17:03 Europe/Athens — NATIVE-CHAT-FCM-01 / LAB delivery, correct tap and generic preview limited USER PASS

Owner reports an already-performed test in «LAB», then explicitly confirms notification arrived while phone was locked or app backgrounded, tapping it opened LAB, and notification showed only «νέο μήνυμα». Scoped USER PASS for this reported background-or-lock delivery, correct LAB tap and generic visible preview, plus the earlier successful device registration. Do not infer separately measured lock AND background cases, app force-stop acceptance, exact sender/recipient/store IDs, model/OS/hash, delivery latency or technical before/after counts: these were not independently observed. No message/read/push was repeated to fill the evidence gap.

Retained owner feat/android-chat-native-20261017. Source PR2724/fullCI39132953314 and merged-main71cb3d0/fullCI39133510868 each3048PASS/0FAIL/0SKIP+6backup. Activation flag true and actual API-triggered deploy dep-dbacvke7bikc73e5aud0/live3f429e2/exact health retained; connector trigger exception below remains explicit. Installed0.1.2 unchanged. Native manual now records registration → owner-observed generic notification → exact LAB tap; no broader native/iOS PASS.

Completed registration/basic delivery/generic preview/correct LAB tap retests removed from pending work. Remaining same-owner acceptance: permission denial, expired/revoked session/PIN/role/module, logout/account switch, foreign-store negative paths, separate phone/tablet/Android variants and forensic SDK/OS storage review. Message/photo/AI functional acceptance, stable release signing, POS APK distribution/QR and iOS remain OPEN. Single next action: controlled negative/session/privacy acceptance, preserving the measured user successes. No automatic production test push or business mutation authorized by this receipt.

18/10/2026 17:01 Europe/Athens follow-up: exact merged source main71cb3d0/fullCI39133510868/job117693433572 now SUCCESS,3048PASS/0FAIL/0SKIP plus6backup. This later result does not rewrite the documented API deployment trigger sequence.

18/10/2026 17:00 Europe/Athens — NATIVE-CHAT-FCM-01 / device registration limited USER PASS

After exact live release3f429e2 and flag true, owner selected explicit activation in installed MW Chat Preview and reports final result «Η συσκευή καταχωρίστηκε». Scoped USER PASS for native device registration only; no independently observed device model/OS, token, store ID or installed hash. Registration result is not proof of FCM delivery, permission state on every Android version, background/locked receipt, tap, logout/account-switch or forensic privacy acceptance. No message/read/push was repeated for documentation. Existing store-entry/2FA USER PASS protected. Native manual updated for this exact verified step.

Retained owner feat/android-chat-native-20261017. Completed registration retry removed from pending work. Single remaining next action: controlled owner-device notification delivery acceptance with identified authorized sender/recipient/store and before/after evidence; no synthetic real-recipient push by this page. Native photo/message/AI/tablet/privacy acceptance, production signing, POS distribution and iOS remain OPEN. Source2724/fullCI39132953314 (3048+6/0fail/0skip), activation claim2726, actual API-triggered Render deploy dep-dbacvke7bikc73e5aud0/live3f429e2 and independent exact health retained; API trigger exception remains documented below.

18/10/2026 16:58 Europe/Athens — NATIVE-CHAT-FCM-01 / flag saved true, exact release LIVE; DEVICE NOT TESTED

Retained owner feat/android-chat-native-20261017. Bounded activation claim PR #2726 merged3f429e2f6a43aa599952dbe8e7d89d9ca2da7f81 after docs CI green. Owner confirms previous Save only and flag false; completion authorization retained. Connector merge-only update (replace:false) of existing NATIVE_CHAT_FCM_ENABLED=true succeeded18Oct13:55UTC on confirmed My Workspace/tea-d9ie26vaqgkc739uudqg, existing myworkstation-app/srv-d9isenfavr4c73bdh52g. Other keys/service-account secret were not requested or printed.

IMPORTANT ACTUAL DEPLOY PATH: despite the intended Save-only plan, render_update_environment_variables immediately initiated API-triggered deploy dep-dbacvke7bikc73e5aud0. This was NOT a deploy-hook/guarded-workflow trigger and must not be described as such. At trigger time source PR2724 exactf67f4943/fullCI39132953314 had3048PASS/0FAIL/0SKIP+6backup, merged71cb3d0; ordinary main fullCI39133510868 was still running. No manual extra deploy/rollback/bypass was issued afterward. Record this connector behavior for future operators: do not use it as a save-only operation; wait for full main CI before future configuration changes.

Render deploy exact3f429e2 statusLIVE finished18Oct13:57:14.495189Z. Independent fresh public GET /api/health returned oktrue/version0.22.0+kat-test-pos/exact3f429e2 at13:58UTC. This proves release identity and endpoint health only. The flag was saved true and incorporated in the resulting deploy; actual provider configured/credential validity, registration, delivery, lock/background/tap/logout/account-switch and local storage acceptance remain NOT TESTED. No real push/message/read/business action or database command was executed. Existing app0.1.2 is unchanged; no new APK required. Existing scoped 2FA/store-entry USER PASS retained.

Remaining assigned next action: in installed MW Chat Preview choose Enable notifications, grant OS permission if requested, record the final registration result. Registration alone is not delivery PASS. Controlled device delivery/negative acceptance, photo/message/AI/tablet/privacy acceptance, stable signing, POS distribution and iOS remain OPEN; N16/PWA and other owners untouched. Keep ownership until a named handoff. No new native manual PASS from this technical release.

18/10/2026 16:57 Europe/Athens - WHOLESALE-FIELD-SALES-01 / ASSIGNED / CLAIM BEFORE SOURCE / LAB NOT TESTED

Retained coordinator codex/wholesale-suite-20261017; docs branch docs/wholesale-field-sales-claim-20261018, source feat/wholesale-field-sales-20261018. Owner asks to continue the previously approved three-worker wholesale suite. Baseline main71cb3d0b840bf28948c934ee6f2d55d16a2cde47; customer portal receiptPR2708/main25ce0fc2 and its technical source/native CI/release proof preserved. Customer/backoffice functional LAB remains NOT TESTED. New bounded online seller vertical slice proceeds independently; no acceptance is silently closed. No code/config/schema/test edit before this claim is green and merged main.

Reuse existing individually revocable BACKOFFICE_USER login/MFA/UserSession and same-company User identity; no new UserRole, POS-token reuse, manager elevation or general auth rewrite. Explicit active seller membership and customer/store assignments, manager-only provisioning and immutable mutation audit. A server-branded FIELD_SALES principal derives stable actor seller:<userId>. Every context/list/catalog/quote/order/history/read/replay checks actual session.userId, current User/company/role/sessionVersion/password state, expiry/revocation, active company CORE license, membership and exact current assignment/customer/store; protected transactional operations lock checked rows and recheck real-clock expiry after waiting. Company-switch/support identity cannot act as another company's seller. No silent first-store/company-wide fallback.

Seller catalog reuses active canonical Product/StoreProduct, independent of portal publication. Strict existing decimal-string quote/order commands; body cannot override identity/channel/prices. Shared exact NET/GROSS/VAT0 calculation, ReadCommitted/advisory-key-before-lookup, immutable same-key accepted replay, changed-body conflict and atomic SUBMITTED request/event remain authoritative. Current authorization precedes historical replay; fresh quotes reprice, accepted replay retains the saved snapshot.

History limited to own FIELD_SALES actor and currently assigned customer/store; sanitized fields exclude costs and internal/staff metadata. Channel bootstrap requires guarded validated v1/v2/v3 upgrade preserving old rows and unknown-schema failure; never recreate obsolete v2 on the next run.

Three workers after merged claim: wholesale_core owns NEW server/src/wholesale-seller-bootstrap.js, lib/wholesale-seller-auth.js, routes/wholesale-seller-admin.js and auth/admin tests; field_sales owns lib/wholesale-principal.js, wholesale-b2b-bootstrap.js, NEW routes/wholesale-sellers.js and principal/router tests; b2b_site owns NEW field-sales components/API/CSS, manager assignment component/CSS and mounted/fetch tests. Coordinator owns route/launcher/parent integration, actual registered native PostgreSQL HTTP acceptance, review, common boards/PDF and publication. Existing portal/manager tests and all unrelated native FCM, invoice-reopening, lifecycle, central four-stream, Gate6/8, retail/POS, fiscal and infrastructure owners retained. No worker branch switching/shared-board edits.

Responsive online workspace uses existing authenticated user session, explicit store/customer, scoped catalog, shared quote/order and own history. Manager assignment screen is lazy within wholesale administration; ordinary sellers must not mount the manager-only panel. Stale response/account/company fences and session/assignment revocation clear private views; uncertain submission freezes UUID/body/principal and blocks own navigation until same-account reconciliation. No local durable/offline/reload/crash recovery or native Android claim. Existing frontend-only build/TABLE_SERVICE and portal cookie/CSRF isolation retained.

Required evidence: focused/full Node20 tests/builds; native actual bootstrap/admin/seller/core routes with real isolated PostgreSQL proving tenant/user/session/assignment/current-license denial, foreign/spoofed input, direct order/history isolation, revocation during retry, exact prices, concurrent one-order/event, lost acknowledgment recovery, stale price/conflicting body, atomic rollback, backoffice readback, populated legacy channel upgrades/idempotence/unknown-schema refusal and unchanged synthetic financial/stock controls; mounted selected-scope/stale-response/frozen retry cases. Local native SKIP is not PASS. Full exact PR/main CI and ordinary guarded release required; no direct deploy/restart/production SQL/migrations/seeds/accounts/grants/license/backup/business operation. No Sale/payment/stock reservation/movement/credit/fiscal/myDATA action. CORE remains interim gate, not complete standalone licensing. Offline, visits/receivables/collections, fulfillment/fiscal, commercial standalone packaging/domain and full functional LAB remain OPEN with retained owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-field-sales.md. Next: green merge claim, then implement this bounded slice; no state-changing LAB authorized.

18/10/2026 16:53 Europe/Athens — NATIVE-CHAT-FCM-01 / source CI PASS; bounded activation assigned

Retained owner feat/android-chat-native-20261017; activation receipt docs/native-fcm-activation-20261018. Source PR #2724 exact f67f4943e684d00355ac9429a3c65c78631d6b44 passed full CI39132953314/job117691782067:3048PASS/0FAIL/0SKIP plus6backup, build/HTTP/browser/invariants/Windows SUCCESS; isolated PostgreSQL native ownership and both platform regressions executed PASS. Merged71cb3d0b840bf28948c934ee6f2d55d16a2cde47. No APK change; preserve installed0.1.2 and scoped store-entry/2FA USER PASS.

Owner16:51 confirms Render setup used Save only; answers explicitly NATIVE_CHAT_FCM_ENABLED=false. Under existing authorization to complete native notifications, planned sole configuration change is this known existing non-secret flag false→true on confirmed My Workspace/tea-d9ie26vaqgkc739uudqg, existing myworkstation-app/srv-d9isenfavr4c73bdh52g. Use connector merge (replace:false), preserve all other keys and the privately owner-saved service-account JSON; never retrieve/log that secret. Publish this retained activation scope before mutation. API save does not deploy; normal exact-main full-CI/freshness/rollback/Render-hook/health pipeline applies. No manual deploy or bypass. Baseline live dep-dbac3oe1egvs73a5b3i0/revisionc2f82e18, public health oktrue independently observed.

Actual flag save, exact guarded release, backend configured status, device registration/delivery/tap/logout/locked-screen/privacy remain NOT TESTED until observed. Enabling is not a notification PASS; no synthetic/real-recipient message, read acknowledgement, push test or business/DB command will be sent for diagnosis. Registration/schema remain lazy in normal authorized app usage. Single next action after this claim merges: merge-only flag save and verify the ordinary guarded release, then user checks registration in the existing APK. Provider credential validity is not independently inspected. Native/iOS/production signing/POS distribution and other owners remain OPEN.

18/10/2026 16:40 Europe/Athens — NATIVE-CHAT-FCM-01 / retained assignment, bounded role compatibility fix

Retained owner feat/android-chat-native-20261017; bounded source branch fix/native-fcm-platform-role-20261018. User requests continuation through completion. Read-only source confirms native FCM registry stores role:OWNER without platformRole for actual Super Admin, while send policy compares it with current DB role:SUPER_ADMIN; delivery therefore fails closed. Existing web mobile push stores platformRole||role. Next bounded change: preserve effective platform role at registration, compare with current DB role and reconstruct current platform identity only after session/version/password/company checks. Preserve support-company fence, Owner scope, staff authorization, provider default-off and revocation. Add compatibility/admin/support/demotion tests; no real push/message/read or production environment/DB action. Physical notification acceptance remains NOT TESTED. Existing 2FA/store-entry USER PASS protected. Claim must merge before source.

18/10/2026 15:42 Europe/Athens — ANDROID-CHAT-NATIVE-01 / store entry USER PASS

Ο ιδιοκτήτης επιβεβαιώνει «Ανοίγουν ολα» μετά την παράδοση preview 0.1.2/code3. USER PASS μόνο για το άνοιγμα όλων των καταστημάτων που εμφανίζονται στον λογαριασμό του. Αντικαθιστά το προηγούμενο other-store USER FAIL/AWAITING RETEST. Διατηρείται το περιορισμένο 2FA USER PASS. Δεν διασταυρώθηκαν ανεξάρτητα IDs καταστημάτων, μοντέλο/OS ή hash εγκατεστημένου APK. Καμία επανάληψη εισόδου/μηνύματος/ανάγνωσης για τεκμηρίωση.

Source PR #2714 merged 7851c90a5f784b98b174597a2606fba4784e6446, exact head 4e92eee07b67e9060196a693c6b94f68ff24cfa4. Android CI 39127168195 SUCCESS (build/lint, 18 unit + 6 API30 instrumentation), full CI 39127168270 SUCCESS. Παραδοθέν APK SHA256 63380888814b141c281c9488d4db8c102e031e247c5579cd8b51456b755e8114. CI δεν ισοδυναμεί με φυσικό PASS.

Retained owner feat/android-chat-native-20261017. Η εκκρεμότητα store-entry retest κλείνει. OPEN παραμένουν μηνύματα/send/read/composer, φωτογραφίες, AI, tablet/keyboard, απομόνωση και έλεγχος τοπικών αρχείων, πραγματική εγγραφή/παράδοση ειδοποιήσεων, POS download/QR, production signing και iOS. Καμία μεταβολή FCM flag/credentials/παραγωγικών δεδομένων. N16/PWA και λοιπές αναθέσεις διατηρούνται.

18/10/2026 16:03:10 Europe/Athens — PURCHASE-ORDER-REOPEN-01 / SOURCE LIVE, LIMITED DESKTOP UI READINESS PASS, ACTUAL REVERSAL AWAITING USER

Owner feat/purchase-order-reopen-20261018 retained for transaction acceptance. SourcePR2709/merge3e600853 introduced controlled same-order reopening, exact recorded stock compensation, immutable audit, original payment/source retention and same-document re-finalization. Test-only follow-ups PR2719 and PR2720 preserve the runtime and verify stale pack callbacks, all existing management roles, and delayed-preview store/closed-order fences. Final PR2720/head386c8426edd6caba4332e8fd860132b28081b35f/fullCI39128297982/job117678095951:3046PASS/0FAIL/0SKIP plus6backup; exact mainc2f82e18f68fc3d1b24591986645d0f7a297dfd7/fullCI39128841443/job117679731789 same3046/0/0+6, build/Windows/browser/HTTP/invariants SUCCESS. Ordinary guarded Render39129301170/job117681015178 SUCCESS; independent fresh public health oktrue/exactc2f82e18/version0.22.0+kat-test-pos. No manual deploy or CI/deploy bypass.

Actual authorized Super Admin selected-store BackOffice: locked invoiced order opens, reopen button is visible, preview renders signed before/inverse/after stock, required reason and conditional negative-stock acknowledgment. Reason remained empty, confirmations unchecked; Cancel closed the preview and the original order remained INVOICED. LIMITED LIVE PASS covers opening/preview/conditional controls/cancel only. No production reopen POST, stock reversal, payment replay, approval or re-finalization was submitted; live global cash/stock deltas were not claimed during active business. Actual transaction, corrected re-finalization, separate Owner/Manager sessions, physical POS and mobile acceptance remain NOT TESTED/AWAITING USER. Native preservation/concurrency/rollback/ledger/registered HTTP proofs are CI evidence only.

Same order/source/files and existing payments remain the intended flow; supplier/invoice identity stays fixed while lines are corrected. Catalogue prices are retained during reopening because pre-original-post prices were never captured. Do not recreate or re-pay the source. Broader invoice09/Gate3/inventory/credit-payment scopes and every other owner remain unchanged. Manual/checkpoint/active/tracker/numbered/PDF synchronized by this bounded release receipt; this is not broader invoice PASS or actual reversal acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-purchase-order-reopen.md.

18/10/2026 15:05 Europe/Athens — ANDROID-CHAT-NATIVE-01 / 2FA limited USER PASS; store entry USER FAIL

18/10/2026 15:05 Europe/Athens update: user now reports KAT opens in the installed preview. Scoped USER PASS for that reported store entry only, superseding the earlier all-stores-fail wording for KAT. Store ID, exact installed hash/device and message/composer/read/Push effects were not independently observed. Other-store entry remains AWAITING RETEST; the verified compatibility-Owner cross-company routing defect remains a bounded fix. No KAT reopening/message/read was repeated for documentation.

Retained owner feat/android-chat-native-20261017; bounded branch fix/android-platform-store-entry-20261018, based main307c1b52. At14:56 user reports entering the app; at14:57 explicitly confirms the authenticator round-trip no longer asks again for email/password after preview0.1.1 delivery. Scoped USER PASS: native Super Admin 2FA app switch only. Device model/OS and installed hash were not independently observed. SourcePR2710/a28601f, AndroidCI39124379475 (15 unit +4 API30 instrumentation, build/lint) and fullCI39124379473 SUCCESS; merged37dda660. APK0.1.1/code2 SHA256142a851af9a8cc1e4854a118298c535ecab81a638efc57835116c242ad1d9329, replacementv3. Manual docs/manual/native-chat/PASS.md records only this verified login flow. Older 2FA USER FAIL/retest notes are superseded for that limited round-trip; expiry/negative/device/storage acceptance remain separate NOT TESTED. No login/message was repeated for documentation.

At14:57–14:59 user reports every store fails to open with the native generic403 text. Source causal mismatch verified: issueSession signs Super Admin as role:OWNER, platformRole:SUPER_ADMIN, isSuperAdmin:true, while native platform/owner-switch checked role only. The authorised mobile list correctly includes foreign-company stores; native then incorrectly POSTs owner-companies/select, which correctly rejects Super Admin403. Fix only native routing via the same three platform claims as backend isPlatformSuperAdmin; genuine Owner still uses authorised company selection, support/staff do not gain it. No server auth/module/license/tenant scope relaxed. Correct platform detection also selects the existing platform-scoped assistant contract. Preview0.1.2/code3.

Add three role-routing unit tests and two actual store-row instrumentation tests with an in-memory ChatApi fixture: compatibility Super Admin opens company-B messages without Owner-select; ordinary Owner still selects company B first. All API results/accounts are synthetic; no production network, message/read/Push or financial action. Existing 2FA tests retained. Native build/lint/unit/emulator and full CI pending; physical store entry remains USER FAIL/AWAITING RETEST until user confirms. Other owners/PWA/N16/AI contracts retained. User also clicked notification enable and quoted the permanent explanatory paragraph; this is not a registration/delivery receipt. No FCM config/credential/enable flag changed; controlled activation and delivery remain OPEN. POS APK download/QR, iOS and production signing remain OPEN. Single next action: verified replacement APK then user retests store opening.

18/10/2026 15:03 Europe/Athens - COORD-20261018 / ISOLATED DIAGNOSTICS / IMPLEMENTATION STILL OPEN

User could not confirm whether previous owner pages are still working. Retained runtime owners remain protected; no source transfer inferred. Central receiver codex/central-four-streams-20261018 executed four parallel read-only diagnostics against pinned main25ce0fc2f60502b123f25324fef4205463596174.

- WS1 cash policy/weekly:10 local tests passed,0failed,0skipped, mocked database.

- WS2 supplier/order:3 local diagnostics passed; document-based comparable costs confirmed; actual order reader query/DTO has no supplier grouping. Distinct documents do not establish distinct physical deliveries.

- WS3 sales report:4 controlled observations executed against unmodified exported function with mocked grouped rows. One basket/two products reports count2; one reversal/two products reports2; two baskets/one product reports2 control;10000grouped rows expose no completeness flag. These are per-product appearance aggregates, unsuitable for unique-basket workload; SQL was not executed.

- WS4 assistant help:5 local diagnostics passed including all64exposed-source subsets; no unknown adapter advertising. Outer strict schema static only; full parsers/auth not executed.

18 local tests passed plus4 separately labelled diagnostic observations, NOT22functional PASS. Node24.19.0, not release Node20/native/fullCI/hosted/LAB. No application/production/settings/business/mail changes or accepted fixture replay. Evidence and reproducible snapshots under CHECKPOINTS/EVIDENCE/central-four-streams-20261018/. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-central-four-streams.md. Next bounded implementation: unique-sale reader with explicit completeness after named ownership handoff; other owners and all broader requirements remain OPEN.

18/10/2026 14:52 Europe/Athens — WHOLESALE-CUSTOMER-PORTAL-01 / CODE LIVE / NATIVE CI PASS / AWAITING FUNCTIONAL LAB

Retained coordinator codex/wholesale-suite-20261017. Customer portal vertical source is merged and ordinarily released; full wholesale product remains OPEN. ClaimPR2699/docsCI39122312438 merged e4f7390f before code. SourcePR2701 finalhead060aaed876c3fe56356a6187885ff26f508c9c6a/fullCI39123514926/job117663913182 SUCCESS3026PASS/0FAIL/0SKIP plus6isolated backup tests/all required jobs, merged cd8b29608aff7e3b9a71df67835f059fb670c190. Exact combined mainCI39123962369/job117666132928 SUCCESS3029PASS/0FAIL/0SKIP plus6backup/all Windows/build/Chromium/security/licensing/invariant/realHTTP checks. New portal native7child scenarios and populated legacy CHECK migration actually executed PASS in both runs, not skipped. Previous shared backoffice/advisory snapshot controls retained. These are isolated technical results, not a functional hosted/LAB PASS.

Ordinary earlier guard39124283780/job117666062410 correctly deferred a previous-source release while the newer exact main CI was pending. Final ordinary guard39124683454/job117667242675 SUCCESS; no bypass/manual trigger. User-confirmed Render My Workspace/tea-d9ie26vaqgkc739uudqg, existing myworkstation-app/srv-d9isenfavr4c73bdh52g. Exact deploydep-dbab47k9v7es73fro4l0 statusLIVE, commitcd8b29608aff7e3b9a71df67835f059fb670c190, finished18Oct11:50:31.688728Z. Independent fresh publicGET /api/health observed11:50UTC returned oktrue/version0.22.0+kat-test-pos/fullrevisioncd8b29608aff7e3b9a71df67835f059fb670c190; successful curl exit confirmed. This verifies code inclusion and endpoint health only. No production customer site/account/grant, portal schema/bootstrap or browser business flow was exercised, and no manual PASS is created.

Independent lifecyclePR2702/f138dddd was preserved in combined mainCI3029; all26owned runtime/test blobs match the reviewed source. Later main37dda660/Android2FA PR2710 changes only Android/workflow/documentation; complete server/client trees are identical to the verified livecd8b2960.

Preserve its source/tests/checkpoint/owner and regenerate the combined PDF. No claim that Android device acceptance or the whole current main pipeline was completed by this wholesale page. ReceiptPR2708 completes common publication only after its own green docs CI and merge.

Delivered code: separate customer /b2b/:slug entry without management bootstraps or browser credential persistence; manager Site πελατών tab for closed-by-default site, dedicated password accounts and explicit per-store publication; immutable customer/store grants, opaque hash-only eight-hour revocable sessions, origin/CSRF/account-binding/private-cache guards and current company CORE entitlement. Trusted B2B_SITE principal uses the same exact quote/SUBMITTED request/event core; own customer-only safe history, same-account UUID replay, rollback and unchanged synthetic financial/stock controls proven. Existing BACKOFFICE guard/hash and current-scope replay protected. The UI clears expired/stale private views and retains ambiguous requests in memory; no durable offline/reload/crash recovery. No sale/payment/stock reservation/posting, credit approval, invoice/fiscal/myDATA execution.

Functional customer/backoffice LAB, physical/mobile/browser use and business before/after controls remain NOT TESTED. Seller application/assignments, durable offline recovery, dedicated entitlements/standalone commercial packaging, branding/domain provisioning, advanced pack/ship-to, credit/receivables and fulfillment/fiscal lifecycle remain OPEN under retained coordinator until a named handoff. Current CORE gate is not a claim of a complete independently saleable package. Single next action prepare bounded virtual-LAB customer→backoffice acceptance with current deployed revision, explicit store/operator/time and required before/after/control checkpoint; do not repeat historical financial/stock transactions or another owner's work. No state-changing LAB authorized by this receipt; no direct deployment/restart/production SQL/license/server/backup/business operation. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-customer-portal.md.

18/10/2026 14:39 Europe/Athens — WHOLESALE-CUSTOMER-PORTAL-01 / SOURCE MERGED / NATIVE CI PASS / AWAITING EXACT MAIN RELEASE AND LAB

Retained coordinator codex/wholesale-suite-20261017. ClaimPR2699/docsCI39122312438 merged e4f7390f before source. SourcePR2701 finalhead060aaed876c3fe56356a6187885ff26f508c9c6a/fullCI39123514926/job117663913182 SUCCESS3026tests/3026PASS/0FAIL/0SKIP plus6backup/all Windows/build/Chromium/security/licensing/invariant/realHTTP checks. Actual native PostgreSQL public/admin portal/bootstrap/shared-service suite executed all7child scenarios PASS (not skipped): manager provisioning and immutable grants, cookie/hash/origin/CSRF/audience, explicit store and tenant/customer/publication isolation, exact NET/GROSS/VAT0,4concurrent submissions→1request/event, stale/changed-payload409, withdrawn-publication immutable replay, rollback/same-key recovery, exact common backoffice snapshot, new-session replay, password reset/expiry/rate limit/current license/module/site/account/customer/store denials and unchanged synthetic financial/stock controls. Separate populated legacy channel CHECK upgrade/idempotence/unknown-channel/rollback proof PASS; previous backoffice replay negative/positive controls retained. Isolated technical proof only, no hosted/LAB/manual PASS.

Source merged cd8b29608aff7e3b9a71df67835f059fb670c190. Independent store-lifecycle dependency reviewPR2702/mainf138dddd merged immediately before it; all4source/test files and owner records preserved. All26owned portal/runtime/test blobs are identical to the reviewed/tested source; this is not a claim that the entire combined server tree is unchanged. Combined exact mainCI39123962369 is queued behind prior mainCI39123871616, and ordinary guarded release/public health still pending. No manual trigger, cancellation or bypass. Do not merge a docs-only main update while the required exact source-main CI remains pending. No direct deploy/restart/production SQL/credentials/account/site/license/backup or financial/stock/fiscal action.

Prepared customer entry, management tab, isolated opaque session/CSRF/account binding, explicit per-store publication and shared B2B_SITE SUBMITTED requests are source-delivered; current CORE license gate remains the protected interim gate. No claim of independently saleable packaging, domain provisioning or complete enterprise lifecycle. Seller app/assignments, durable offline/reload recovery, dedicated entitlement/standalone packaging, credit/receivables, reservation/picking/dispatch/fiscal and functional LAB acceptance remain OPEN under retained owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-customer-portal.md. Next action verify exact combined main CI and ordinary guarded revision/health, then prepare the bounded virtual-LAB acceptance with required before/after/control checkpoint; no transaction is authorized by this receipt.

18/10/2026 14:49 Europe/Athens - COORD-20261018 / CENTRAL EXECUTION RECEIVER / CLAIM BEFORE SOURCE

Owner direction: central coordination and execution of #2704, #2705, #2706, #2707, with four internal parallel workers and consolidated reporting. Receiver: codex/central-four-streams-20261018 (this conversation). This is the receiving coordination record; historic domain owners and PASS evidence below remain preserved. No competing source work is authorized by this record.

- #2704 / WS1: ASSIGNED central read-only checkpoint/source/weekly LAB acceptance coordination. AUTO-REPORTS runtime owner codex/automatic-reporting-20261016 retained. Weekly hosted acceptance NOT TESTED after normal 2FA expiry; scheduler/outbox/automatic SMTP remain disabled/unimplemented.

- #2705 / WS2: ASSIGNED central supplier integration contract and source-gap audit. Task29/Task30 and INBOX-CONSISTENCY-01 / INVOICE-NEW-ITEM-PREPARE-01 runtime owners retained. No supplier/invoice source takeover.

- #2706 / WS3: ASSIGNED central bounded proposal for an independent sale-level analytics reader, items13/14. Current AUTO-REPORTS and workforce source owners retained until the specific implementation handoff is accepted and published. No source edit under this coordination-only claim.

- #2707 / WS4: ASSIGNED central assistant adapter contract and final acceptance coordination. VOICE-ASSISTANT-01 runtime owner codex/assistant-business-queries-20261015 retained.

No source/config/schema/business changes, deployment, new test or new PASS. Source changes remain gated by a named bounded implementation handoff, green CI and applicable LAB acceptance. Central scope is now explicit so the user need not copy assignments to other pages. Checkpoint: CHECKPOINTS/CHANGES/2026-10-18-central-four-streams.md. Existing domain owners must continue using their existing branches and must not overlap another bounded claim.

18/10/2026 14:29 Europe/Athens — WHOLESALE-CUSTOMER-PORTAL-01 / SOURCE PR2701 / ACCOUNT-BINDING REVIEW / AWAITING NATIVE CI

Retained coordinator codex/wholesale-suite-20261017. SourcePR2701 initial e4a5e6dc requires documentation/PDF reconciliation with main77d55e4b/independent Android receiptPR2700; those receipts and all source preserved. Added optional expected-account header from isolated in-memory login/me context; server mismatch401 precedes CSRF/business, while /me can discover a changed cookie identity. The header only rejects mismatch and cannot authenticate or select customer identity. This prevents cross-tab cookie changes from displaying another customer's operational results in an old view. Added fetch and real HTTP guard tests, plus guarded native assertions. No management auth or production action changed.

Final focused Node20:77tests/73PASS/0FAIL/4nativeSKIP, including15UI/fetch and10auth tests. Prior full local3005/2889PASS/0FAIL/116environmentSKIP and builds are scoped to the preceding source; final exact full CI/native proof is required for current source before merge. No hosted/LAB/manual PASS. Existing scalar CORE license gate and SUBMITTED/no-financial-effect limits retained; seller/standalone/offline/fulfillment remain OPEN. Combined PDF regenerated. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-customer-portal.md. Next action publish reconciled head and require full CI, then verify ordinary guarded release and exact revision.

18/10/2026 14:23 Europe/Athens — WHOLESALE-CUSTOMER-PORTAL-01 / SOURCE PREPARED / LOCAL PASS / AWAITING NATIVE CI AND LAB

Retained coordinator codex/wholesale-suite-20261017, source feat/wholesale-customer-portal-20261018. ClaimPR2699 finalhead270e8e2f/docsCI39122312438 all required jobs green merged e4f7390fe69c1cf37220603a05e8cead94186b91 before source. Three workers completed disjoint session/router, trusted-core and UI scopes; coordinator integrated isolated Vite entry/admin tab/routes and native acceptance. Independent FCM/invoice owners and current core replay correction preserved.

Prepared vertical slice: manager-configured closed-by-default slug site, separately hashed customer credentials, immutable customer/single-store account, explicit per-store product publication, opaque hash-only revocable eight-hour sessions with Secure/HttpOnly/SameSiteStrict cookie, origin/CSRF guards, bounded process-local login protection. Every portal operation checks current company CORE license, site/account/session/customer/store; no SuperAdmin bypass or shared management JWT. Branded server-only principal calls the same decimal quote/order core, stable b2b account actor and B2B_SITE channel. Channel CHECK upgrade is validated, atomic and idempotent for existing rows; default backoffice hash/role/idempotency rules preserved. Public DTOs exclude staff/actor/list/tier metadata, history is own-customer B2B_SITE only, explicit store is mandatory. New quotes require publication; accepted authorized replay retains original snapshot after withdrawal/price changes. Backoffice reads the same canonical request/event. No sale/payment/stock/fiscal/credit execution.

Customer /b2b/:slug uses a separate built entry without POS/admin bootstraps or browser credential persistence. Own catalog, exact unit/VAT/totals, quote, submitted request and paginated history; stale scopes discarded, private data cleared on logout/expiry/focus revalidation. Ambiguous UUID/body frozen for same-account retry; no reload/crash/offline recovery. Admin Site πελατών tab provisions access and per-store publication; no real site/account was created by development. Existing CORE gate is retained, not a completed standalone licensing product. Slug immutable; dedicated entitlement, seller app, custom domain, pack/ship-to, credit/fulfillment/fiscal and full product acceptance remain OPEN.

Local Node20 final bounded full server suite:3005tests/2889PASS/0FAIL/116environmentSKIP in71.5s. Focused75tests/71PASS/0FAIL/4nativeSKIP; 14new mounted/fetch UI cases,9auth cases,6principal unit cases and separate entry dependency test included. First default-concurrency broad process ended without a final TAP summary; no full-suite result inferred from it. Initial focused integration caught2 old harness CSS import failures; moved the new CSS into the existing wholesale stylesheet entry, preserved old assertions, then reran complete focused/full suites green. Work-safe frontend build and server preparation/Prisma generation PASS; final built b2b.html exists and TABLE_SERVICE protected bundle verified. No local PostgreSQL, native tests remain SKIP locally.

Registered native actual public/admin HTTP/bootstrap/shared services in isolated random myworkstation_test schema await CI: tenant/customer/store/publication separation, cookie/hash/CSRF/credential audience, expired/revoked/module/license denials, exact NET/GROSS/VAT0, concurrent one-order/event, changed payload/stale price safe409, withdrawn-price immutable replay, same-account re-login, event rollback/recovery, shared backoffice readback and unchanged synthetic money/stock controls. Separate native populated legacy CHECK upgrade twice and unknown-channel rejection. No hosted/LAB/manual PASS. Full GitHub CI required before merge and exact ordinary guarded release before proposed LAB. No direct deploy/restart/production DB/config/backup/license/business action. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-customer-portal.md. Next action publish source PR and require actual native/full CI, then guarded revision verification; suite remains OPEN with retained owner.

18/10/2026 14:09 Europe/Athens — WHOLESALE-CUSTOMER-PORTAL-01 / ASSIGNED / SOURCE NOT STARTED / LAB NOT TESTED

Retained coordinator codex/wholesale-suite-20261017; docs claim docs/wholesale-customer-portal-claim-20261018, source feat/wholesale-customer-portal-20261018. Owner again says «ΞΕΚΙΝΑ». Baseline main190dd550; source50a07878 retains the completed exact-decimal/shared SUBMITTED core and replay correction (2974/0/0 native CI, ordinary guarded release and exact health receipt in prior checkpoint), not a hosted wholesale LAB PASS. This new coherent vertical slice adds approved customer access to the same order core. No source/test/config change before this claim is green and merged.

Three authorized workers: wholesale_core owns NEW dedicated portal bootstrap/auth/session and public/admin routers plus auth unit tests; field_sales owns shared trusted-principal adapter, pricing/order service integration, additive channel constraint extension and core tests; b2b_site owns isolated customer entry/components/API/CSS, portal administration component and mounted UI tests. Coordinator owns additive route/build/parent integration, native registered HTTP/PostgreSQL acceptance, review and common records/PDF/publication. No other Gate8/general auth, DAILY/retail/online, fiscal/payment/stock, Android/FCM or infrastructure owner is taken over; no second project/repository/service.

Contract: one company-scoped configured site with slug/name and explicit enablement, initially closed; manager-provisioned dedicated login/password accounts, immutable same-company WholesaleCustomer and single-store grant, explicit site/store/product publication. Canonical Product/StoreProduct and wholesale customer/list/tier references reused. No self-registration, automatic retail identity mapping, emails or real accounts created by this work. Opaque random sessions stored only hashed, separate HttpOnly/Secure/SameSite cookie, bounded attempts, expiry/revocation, CSRF/same-origin checks and private no-store responses; never mint a management-secret JWT or trust client actor/company/customer/channel/price. Portal auth uses no SuperAdmin license bypass; current active company CORE license plus live site/account/customer/store/session checks required. Dedicated commercial entitlements remain future work, not implied by CORE.

Customer entry /b2b/:slug uses isolated Vite page without administrative bootstraps, local credential storage or worker registration. Public branding/login only before authentication; own published catalog requires explicit granted store; quote and SUBMITTED order use authoritative shared decimal pricing and trusted principal B2B_SITE. Strict bodies derive customer on server. Own-customer history/detail returns safe saved snapshots, no costs/internal identifiers or staff notes. Stable namespaced account actor preserves same-account idempotency after re-login. Existing accepted own requests may replay/read original snapshots after price/list/publication changes, but current account/session/site/license/customer/store access is always rechecked; new quotes/submissions recheck publication and pricing. Frozen ambiguous UUID/body retained in memory, including session-expiry recovery by the same principal; changed-key body conflicts. No durable offline/reload/crash guarantee.

Protected regressions: strict BACKOFFICE manager API and quote hashes; explicit selected store/no company fallback; exact NET/GROSS/VAT0/decimals, legacy NULL basis refusal, SHARE locks, order ReadCommitted/advisory serialization/fresh lookup, immutable replay and atomic request/event/rollback; existing retail/POS/auth/license safeguards. Additive runtime portal tables and validated channel CHECK extension only, no sandbox production SQL/migration/seeds, direct deployment/restart/server/backup/license/account/business action. SUBMITTED still only «Προς έγκριση», creditChecked=false; no stock reservation/movement, sale/payment/collection/invoice/fiscal/myDATA effects.

Required evidence before source merge: focused and full Node20 tests/builds; native actual registered public/admin routes, opaque cookie/CSRF/login/logout/revocation/expiry/rate limits, tenant/customer/store/publication/license isolation, rejected body overrides and management credential crossover, shared quote/order/concurrent idempotency and rollback, populated legacy channel bootstrap twice, same backoffice readback, unchanged synthetic financial/stock controls; mounted UI expiry/store/stale-response/frozen retry tests. Full GitHub CI remains mandatory. Existing local environment has no PostgreSQL, so local native SKIP is not PASS. Exact guarded deployed revision before proposing LAB; no state-changing LAB authorized by this claim. No manual PASS until real observation. Remaining seller app/assignments, offline recovery, credit/fulfillment/fiscal integration, dedicated entitlement/standalone packaging/domain and complete acceptance remain OPEN with this coordinator. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-customer-portal.md. Next action green merge claim, then implement this vertical slice; historical next-action functional LAB is deferred to separately prepared acceptance, not silently marked complete.

18/10/2026 14:07 Europe/Athens — PURCHASE-ORDER-REOPEN-01 / ASSIGNED / NOT TESTED

Owner feat/purchase-order-reopen-20261018. Explicit owner18Oct request: an accidentally invoiced incoming supplier order must be reopened for correction by authorized Super Admin/Owner/responsible Manager. Independent bounded scope: INVOICED normal purchase invoice back to NEW on same order/source identities, preview plus explicit reason/confirmation, atomic inverse of recorded signed purchase/pack stock movements, approved internal document back to draft, preserve original payments/shift/attachments/aliases and immutable audit. Re-finalization must reuse the same internal document, apply corrected quantities once, and reject stale pre-reopen posting requests through a revision fence. Retain catalog prices at reopen rather than invent uncaptured old prices; disclose in preview. Credit-note/payment-offset reversal and externally issued/fiscal cancellation are outside this incoming-INVOICE delivery and must refuse safely. No user permission or authentication expansion. Existing full-BackOffice roles and selected company/store boundaries retained; ordinary POS operator tokens denied. No live correction for diagnostics; final legitimate action requires actual preview and deliberate authorized user confirmation.

Baseline main190dd5502be80890e98bbffbccc4e91a37c6883a; AGENTS/current tracker/pending/active/manual/numbered/history and posting/pack/common-source paths reviewed. No competing reopening claim found. Screenshot shows INVOICED incoming order; live browser is at canonical Platform Admin sign-in. Actual posting/payment identities, before/after/control balances and actual reversal remain NOT TESTED. No supplier/document personal identifiers published. Existing stock posting occurs at FINAL; merely changing the status would leave stale stock/expense and permit duplicate posting. Preserve one payment, one source, common duplicate/stock fences, pack conversion, approved supplier/stock controls, earlier Gate3 acceptance and all assigned invoice/myDATA/credit/assistant/inventory owners. Claim merges green before source or state-changing LAB. Native tests must prove two cycles, replay/concurrency/rollback, exact inverse pack quantity, stale POST refusal, tenant/store/role refusal and unchanged payments/control, plus mounted confirmation and full PR/mainCI/ordinary guarded release. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-purchase-order-reopen.md. Next: implement bounded reopen and same-document re-finalization after claim merge.

18/10/2026 14:00 Europe/Athens — WHOLESALE-ORDER-LOCK-SNAPSHOT-01 / CODE LIVE / ISOLATED CI PASS / AWAITING FUNCTIONAL LAB

Retained coordinator codex/wholesale-suite-20261017. Bounded replay-race source correction is merged and released; no hosted wholesale functional/LAB/manual PASS is inferred. ClaimPR2694/docsCI39119710037 merged61764168 before code; sourcePR2696/head477502b2/fullCI39120041916/job117653705714 SUCCESS2974PASS/0FAIL/0SKIP plus6backup/all required jobs, merged e71b97cc577f086a605871219d45de5e4dab4236. Exact e71mainCI39120503242/job117655056445 also2974/0/0 plus6backup/allchecks. Combined source50a078780114add0fac98eac3741be548852aa27 (independent AndroidPR2687 retained) mainCI39120839888/job117656173315 likewise2974/0/0 plus6backup/allchecks. The deterministic native oldRR negative/defaultRC positive controls executed in all3full runs, not skipped. This is technical isolated acceptance only.

Ordinary e71guard39120888759/job117656114508 properly deferred to newer50a; no bypass/manual trigger. Final ordinary guard39121197961/job117657014289 SUCCESS. User-confirmed RenderMy Workspace/tea-d9ie26vaqgkc739uudqg, existing service myworkstation-app/srv-d9isenfavr4c73bdh52g.

Exact deploydep-dbaac0bbc2fs73alkaig statusLIVE, commit50a07878, finished18Oct10:58:49.24091Z. Fresh independent publicGET /api/health observed10:59UTC:oktrue/version0.22.0+kat-test-pos/fullrevision 50a078780114add0fac98eac3741be548852aa27, successful curl exit. All server/client blobs, including the3owned correction/test files, are identical between tested e71 and live50a. Independent Android code/checkpoint/owner preserved and combined trackerPDF regenerated. Deployment/code inclusion and endpoint health verified; browser business flow, physical use and measured LAB effects NOT TESTED.

Effective tested correction: orderReadCommitted, advisory key before current authorization/lookup, immutable accepted replay before repricing; all required checked-row SHARE locks retain coherent financial metadata through final batched tier read. Native actualHTTP/PostgreSQL INSERTbarrier→higher-tiercommit→exactwaiter/blockingPID→release proves oldRR201+409PRICE_CHANGED versus defaultRC201+200sameoriginalsnapshot/oneorder+event; current newer quote differs, original snapshot and synthetic Sale/StockMovement/StoreTransaction controls remain unchanged. Exact numeric-string casts, tenant/store/product/role gates, rollback and bounded retry/timeouts preserved. Quote endpoint remainsRR. No schema/publicauth/entitlement/stock/payment/fiscal behavior expansion. No direct deploy/restart/productionSQL/backup/license/business action.

Prior outage and pending-source/release entries below are historical and superseded only for this bounded technical correction. Full WHOLESALE-SUITE-01 remains OPEN and owned: B2B customer site/identity, seller application/assignments, durable offline recovery, credit/receivables, reservation/picking/dispatch/fiscal integration, dedicated entitlement and standalone commercial packaging. No new manual PASS or claim that the product is ready to sell. Single next action prepare bounded functional acceptance in the explicit virtual LAB with the required current scope/before-after/control checkpoint; do not repeat financial/stock/fiscal transactions or another owner's work. Current owner retained until named handoff; another page must read this receipt and obtain recorded handoff before taking the scope. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Source work and evidence persist remotely; receiptPR2697 completes publication only after its own green CI and merge.

18/10/2026 13:46 Europe/Athens — WHOLESALE-ORDER-LOCK-SNAPSHOT-01 / SOURCE MERGED / NATIVE CI PASS / AWAITING MAIN RELEASE AND LAB

Retained owner codex/wholesale-suite-20261017. ClaimPR2694/head8a38a340/docsCI39119710037 merged61764168 before source. SourcePR2696 finalhead477502b290256a9a5d1aa2c7d840cdb0be164968/fullCI39120041916/job117653705714 SUCCESS2974tests/2974PASS/0FAIL/0SKIP plus6backup/all required Windows/build/Chromium/security/licensing/invariant/realHTTP jobs. Native deterministic advisory-waiter regression actually executed PASS (not skipped): real router/service/SQL/PostgreSQL, original-tiers SHARE locks held before INSERT, committed higher eligible tier, exact hashed-key waiter + blocking T1 PID observed before release. Restoring only oldRR isolation reproduced201+409PRICE_CHANGED even though original order committed; defaultRC produced201+200replayed/same original snapshot with one request/event. Newer quote remains different; quote endpoint retainsRR. Synthetic Sale/StockMovement/StoreTransaction controls unchanged. This closes the scoped isolated replay-race proof, not hosted/LAB acceptance or the full product.

Source merged e71b97cc577f086a605871219d45de5e4dab4236 after all checks green; exact runtime/test blobs match the reviewed/tested source. Exact mainCI39120503242/job117655056445 SUCCESS2974PASS/0FAIL/0SKIP plus6backup/all required jobs, including the deterministic native controls. Ordinary guarded release39120888759/job117656114508 correctly deferred at preflight because newer independent Android source50a07878 is on main; this is not a deployed-version PASS or a failure. All server/client blobs, including the3owned correction/test files, match unchanged between e71b97cc and50a07878. Independent Android source/checkpoint/owner preserved, combined mainCI39120839888 in progress; exact guarded release/public health still pending. No bypass or manual trigger. No manual/direct deploy, restart, productionDB/license/backup or financial/stock/fiscal operation. No new manual PASS. Local

Node20 results2962/2849PASS/0FAIL/113environmentSKIP and focused20PASS/1nativeSKIP remain separate evidence; actual native proof is the green CI above.

Effective contract: orderReadCommitted + advisory-key serialization + current active scope + mandatory checked-row SHARE locks + fresh post-lock lookup; coherent prices at final batched tier read. Exact decimal numericcasts, immutable accepted replay/scope/state guards, atomic request/event and bounded retries/timeouts protected. No schema or endpoint expansion. Full WHOLESALE-SUITE-01 remains OPEN: B2B customer site/identity, seller application/assignments, durable offline recovery, credit/receivables, reservation/picking/dispatch/fiscal integration, dedicated entitlement and standalone commercial packaging. Current owner retained until named handoff; no duplicate claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Next action verify exactmainCI/ordinary released revision and health, then prepare bounded functional acceptance. No state-changing LAB is authorized by this receipt.

18/10/2026 13:37 Europe/Athens — WHOLESALE-ORDER-LOCK-SNAPSHOT-01 / SOURCE REVIEW / LOCAL PASS / AWAITING NATIVE CI AND LAB

Retained coordinator codex/wholesale-suite-20261017, source fix/wholesale-order-lock-snapshot-20261018. RecoveredclaimPR2694 finalhead8a38a340/docsCI39119710037 all required jobs green merged61764168 before code. Outage blocker resolved; restored source baseline and regenerated PDF confirmed. Full suite remains OPEN, no new hosted/LAB/manual PASS.

Bounded causal change only: order-request transaction ReadCommitted instead of RepeatableRead. The advisory key lock still precedes current active company/store/customer checks and accepted-request lookup; that lookup now has a fresh statement snapshot including a predecessor committed while waiting. Mandatory checked-row SHARE locks retain authoritative company/store/customer/list association/list/product/StoreProduct/selected tier; final batched tier SQL defines coherent price valuation. Quote endpoint and operational read isolation stay RepeatableRead. Exact-decimal snapshots/numeric casts, fingerprint/scope/state guards, same-key replay, atomic request/event, retry bounds/timeouts and no ledger/stock/fiscal effects retained. No new schema, endpoint, public identity, entitlement or standalone change.

New unit coverage waits on the actual service advisory call, proves no lookup/authorization/pricing before lock release, then checks authorized immutable replay without repricing despite newer prices. Existing monetary insert assertion requires exact strings plus explicit numeric casts. Deterministic native registered HTTP regression uses actual bootstrap/router/service/PostgreSQL; a transaction proxy pauses T1 after original tier selection/SHARE locks and before real INSERT, inserts a higher eligible tier through another connection, starts T2 and observes its exact hashed company/actor/key lock plus blocking T1 backend via pg_locks/pg_stat_activity before release. An adapter restoring only the original RR isolation is the negative control (expected201+409PRICE_CHANGED); unchanged service/defaultRC must201+200replayed/same original snapshot/one request+event. Both controls retain current quoteRR, exact original snapshot, current newer-tier quote and unchanged synthetic Sale/StockMovement/StoreTransaction checks. Negative control is causal old-isolation reproduction, not an actual LAB result. Native execution still awaits CI and cannot be inferred from test source.

Node20 local full server suite2962tests/2849PASS/0FAIL/113environmentSKIP in55.2s; focused21tests/20PASS/0FAIL/1nativeSKIP, including11order+8pricing tests. Work-safe frontend build PASS, server preparation/Prisma generation PASS; no local PostgreSQL available. Native barrier10s > waiter4.5s within existing15stx; overall45ssubtest and finally release/settle/close/delete only fixture-owned tier bound liveness. Independent pricing-worker review confirms exact key wait proof and lock consistency; field worker and native worker edited disjoint files, coordinator reviewed. Text whitespace check PASS. Full GitHub CI/native old-control/new-positive proof required before merge; exact deployed revision before proposed functional acceptance. No manual/direct deploy, production SQL/server/backup/license or business operation. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Next action publish scoped sourcePR and require exact green full CI. B2B site/seller app/durable offline/credit/fulfillment/fiscal/standalone product remain future work under retained owner.

18/10/2026 13:32 Europe/Athens — WHOLESALE-ORDER-LOCK-SNAPSHOT-01 / EXECUTOR RECOVERED / ASSIGNED / NATIVE NOT TESTED

User says «ΞΕΚΙΝΑ» again. Retained owner codex/wholesale-suite-20261017, follow-up source fix/wholesale-order-lock-snapshot-20261018. Executor recovered to an older local snapshot; gitstatus showed only generated untracked package-lock.json. Restored exact remote receiptPR2694/head6f3ffb09 and reconciled current maina4d4efef; prior failed local update did not survive. No follow-up source/test edit yet. Shared record/PDF regeneration is now possible and clears the technical outage blocker after green claim merge; no user reapproval required. Independent source-level RR/advisory/higher-tier race analysis and exact old CI/release evidence below remain unchanged. Full product OPEN; hosted/LAB NOT TESTED.

Three workers: field_sales owns only order lib/unit tests after claim merge; b2b_site owns only deterministic registered native HTTP regression; wholesale_core reviews lock/snapshot invariants read-only. Coordinator owns common records, isolated runtime setup, old-failing/new-passing native receipts, review and publication. Bounded order ReadCommitted + existing checked-row SHARE locks, no quote-endpoint isolation change and no financial/stock/fiscal/publicauth/offline/standalone/production DB/server/backup action. Existing5-concurrent submissions, exactNET/GROSS, tenant/store/product/role checks, immutable replay/current scope, changed-payload conflict and atomic rollback controls protected. Next action green merge recovered claimPR2694 with regenerated trackerPDF, then add native regression proving originalRR fails, implement RC and require corrected full CI. Prior blocked status is historical, not a release of ownership.

18/10/2026 13:19 Europe/Athens — WHOLESALE-ORDER-LOCK-SNAPSHOT-01 / PENDING CLAIM / EXECUTOR BLOCKED / DO NOT MERGE BEFORE PDF REGENERATION

Retained owner codex/wholesale-suite-20261017. SourcePR2692/maina4d4efef passed PRCI39117550996 and exactmainCI39118006237/job117647740030 with2972PASS/0FAIL/0SKIP plus6backup/all required jobs. Ordinary release39118364642 succeeded; Render deploydep-dba9nleq1p3s73as1r3g is live at exacta4d4efef, finished10:15:26Z. Separate hosted functional/LAB acceptance remains NOT TESTED. Prior scoped native proofs remain valid; full product is OPEN.

Final source review independently confirmed by coordinator, pricing and order workers: RepeatableRead starts the advisory-lock waiter's snapshot before the predecessor commits. T1 holds originaltierP1 SHARE locks; a higher eligible tierP2 INSERT can commit independently. T2 starts afterP2 but beforeT1commit and waitskey. Its subsequent stale snapshot can miss the accepted order yet seeP2, returning PRICE_CHANGED before uniqueness retry; the UI would incorrectly unlock as if nonaccepted. This is concrete causal source evidence, not a reproduced native FAIL yet. Do not call the correction implemented or source acceptance complete.

Pending bounded follow-up branchfix/wholesale-order-lock-snapshot-20261018: change only order transaction to ReadCommitted, keeping advisory key serialization, current authorization, mandatory SHARE locks on company/store/customer/association/list/product/store-membership/chosen tier, exact decimal amounts, atomic request/event and bounded retries. The lookup after lock then sees committed predecessor; locked master data plus final batched tier query define coherent pricing. Quote endpoint remains RepeatableRead; later tier insertions are not serializably prevented. Order worker owns lib/unit tests; coordinator owns deterministic registered native HTTP test/docs/review; pricing worker reviews read-only. No other owner is taken over.

Required native regression: gate T1 after old-tier pricing and before actual request INSERT via transaction proxy (real PostgreSQL, no pricing stub); insert higher eligible tier through another connection; start same-key T2, verify its advisory wait via pg_locks, releaseT1, require201+200sameorder/originalsnapshot and one event. Prove oldRR fails and correctedRC passes, retaining existing scope/rollback/ledger controls and fullCI before merge. No financial/stock/fiscal/publicauth/offline/standalone/module/productionDB/backup/restart change.

BLOCKER: exec-server transport disconnected during the attempted local claim update. Root recovery and independent worker pwd/gitstatus probes cannot produce output. Local command completion/file state unknown; no follow-up source/test edit has been made or authorized by a merged claim. This text is saved directly on receiptPR2694 to preserve findings. Existing tracker PDF still represents the prior CI receipt and could not be regenerated during the outage; this PR MUST remain unmerged until executor recovery, gitstatus inspection, reconciliation with latest main, complete record/PDF regeneration and green claim CI. After claim merge implement only the scoped fix and deterministic regression, require fullCI and exact release before functional acceptance. Owner retained, no handoff or duplicate claim. SourcePR2692 is saved; receiptPR2694 is OPEN/BLOCKED. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md.

18/10/2026 13:08 Europe/Athens — WHOLESALE-ORDERS-01 / SOURCE MERGED / FULL PR CI PASS / AWAITING LAB

Coordinator codex/wholesale-suite-20261017 retained. SourcePR2692 finalheadc735afe8d4ed22b172b08aba631e9a0b70e445e9/fullCI39117550996/job117646433489 SUCCESS:2972tests/2972PASS/0FAIL/0SKIP plus6backup tests and all required Windows/build/Chromium/security/licensing/invariant/realHTTP flows. Actual guarded native PostgreSQL registered wholesale router/bootstrap/pricing/order scenario PASS, including5concurrentidentical submissions→1request+1event, immutable accepted replay after price change, changed-key409, stale-price409 with fresh quote, company/store/customer revocation, event failure atomic rollback and same-key recovery, unchanged synthetic Sale/StockMovement/StoreTransaction controls. This is isolated CI proof only, not hosted/LAB/business acceptance. Initial failed run39117252067 remains recorded; explicit NUMERIC casts resolved its typed-TEXT insertion error and the unchanged native tests passed.

Merged a4d4efef4cff20e89702051c27e5259ddd90474f after all checks green. Independent concurrent FCM claimPR2693/mainf9912764 changed documentation only and is preserved; all source/client blobs match the tested source tree. Exact mainCI39118006237 is in progress. Ordinary guarded release/exact public health proof still pending; no direct deploy/restart/production SQL, license or backup change. No manual PASS. Full suite remains OPEN: B2B customer site/identity, seller application/assignments, durable offline recovery, credit/receivables, reservation/picking/dispatch/fiscal integration, dedicated entitlement and standalone packaging remain future work. Existing ownership retained; no handoff or duplicate claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Next action observe exact source-main CI and guarded deployment, then prepare bounded functional acceptance; no state-changing LAB authorized by this receipt.

18/10/2026 13:00 Europe/Athens — WHOLESALE-ORDERS-01 / NATIVE CI FAIL RECORDED / FIX AWAITING RETEST

SourcePR2692 headba481290/fullCI39117252067/job117645531974:2972tests/2969PASS/3FAIL/0SKIP. Both Windows jobs PASS. Native tier audit/classification and exact scoped quote subtests PASS. Actual order INSERT failed PostgreSQL42804 because Prisma bound exact decimal-string totals as TEXT into NUMERIC columns; concurrent-submission and rollback-recovery subtests plus containing native test failed from that one cause. No merge, release or production operation occurred. This is isolated test evidence, not a LAB observation.

Causal correction in wholesale-orders.js: explicit ::numeric casts for net/vat/gross bindings, preserving exact decimal strings with no IEEE754 conversion. Existing real native scenario remains unchanged and must prove the correction; focused Node20 pricing/order18/18PASS. Previous full local and UI/build results retained, full corrected GitHub CI still required before merge. Shared owner remains codex/wholesale-suite-20261017; full suite OPEN/AWAITING LAB. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Next action run exact corrected full CI/native scenario, no bypass.

18/10/2026 12:53 Europe/Athens — WHOLESALE-ORDERS-01 / SOURCE REVIEW / AWAITING FULL CI AND LAB

Coordinator codex/wholesale-suite-20261017 retained; source feat/wholesale-orders-core-20261018. ClaimPR2691 finalhead70f4cd3a/docsCI39116588681 SUCCESS merged3a2835bd before any source edit. Three authorized workers implemented separate pricing, persistence and mounted UI scopes; coordinator integrated bootstrap/routes/launcher/native HTTP tests and reviewed the shared contract. All other owners and prior PASS remain untouched.

New bounded scope: exact BigInt NET/GROSS cent pricing from highest eligible active same-company quantity tier, explicit selected store and active StoreProduct membership, VAT0 and fractional units; legacy unclassified prices fail closed rather than acquiring an inferred basis. Additive tier priceBasis/version and transactional price audit, version-checked classification; legacy tier changes without basis reset it to NULL. New operational APIs accept BACKOFFICE_USER managers only and no client identity/price/channel overrides. Existing master/retail routes and CORE gate retained.

SUBMITTED request/event snapshots commit atomically; company/actor/clientOrderId + normalized fingerprint provide same-key replay and changed-payload409; current company/store/customer rechecked even on replay, stale quote409 before write, RepeatableRead and bounded full-transaction retry. No sale, payment, stock reservation/posting, invoice/myDATA/fiscal or credit approval is enabled. UI shows «Προς έγκριση» and no credit check, freezes ambiguous UUID/body, validates acknowledgement scope, blocks own tab/mode/close/minimize/open-event departure, warns on unload and preserves mounted request through temporary authentication loss. Re-login recovery concerns the same account within the still-open page; no persistence/offline/reload/crash recovery guarantee.

Focused local Node20 registeredHTTP/pricing/orders/mountedUI/launcher+existing BackOffice regression:52tests/50PASS/0FAIL/2nativeSKIP. The environment has no local PostgreSQL. New guarded native PostgreSQL test executes the complete real router/bootstrap/pricing/order services in a random myworkstation_test schema: store/product/tenant filters, audited basis/version CAS, NET/GROSS/VAT0/quantity tiers, five concurrent identical HTTP submissions yielding one order/event, replay after price change, changed key conflict, stale quote, company/store/customer revocation, event-trigger rollback/same-key recovery, unchanged synthetic Sale/StockMovement/StoreTransaction controls. This native scenario still requires actual green CI; its source is not acceptance proof.

Final local Node20 full server suite:2961tests/2848PASS/0FAIL/113environmentSKIP in53.7s; Work-safe frontend build PASS. Focused52/50PASS/0FAIL/2nativeSKIP; mounted wholesale UI15/15, existing BackOffice regression10/10 and new launcher lock1/1. Initial broad run exposed one old source-shape assertion requiring the exact close handler without a guard; assertion updated to require the new synchronous lock guard while retaining its visibleRef reset, then complete suite rerun green. No runtime failure was hidden. Text whitespace check and regenerated PDF first-page render/text check PASS. Full GitHub CI/native PostgreSQL/hosted acceptance remain pending. No new manual PASS. Full WHOLESALE-SUITE-01 remains OPEN: B2B customer identity/site, seller assignment/application, durable offline recovery, approval/credit/receivables, reservation/picking/dispatch/fiscal integration, dedicated entitlement and standalone commercial packaging remain unimplemented. Production/LAB functional acceptance NOT TESTED. No manual deploy, restart, production SQL, license or backup operation. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Next action required green full CI/native proof before source merge, then exact guarded release verification before any proposed LAB acceptance.

18/10/2026 12:35 Athens - WHOLESALE-ORDERS-01 / ASSIGNED / NOT TESTED

Owner/coordinator codex/wholesale-suite-20261017 retained; claim docs/wholesale-orders-claim-20261018, source feat/wholesale-orders-core-20261018. Owner says «ΞΕΚΙΝΑ» for next agreed shared pricing/order phase. Prior explicit public repository authorization remains valid. Previous sourcePR2685/main11235c4c and evidencePR2686 retained; baseline main d8ff16ef. No prior wholesale LAB PASS is invented. New scope is additive wholesale quote and SUBMITTED order requests, not fiscal/financial completion.

Three independent workers after green merged claim: wholesale_core owns new exact-decimal pricing lib and pricing tests; field_sales owns new atomic order-request lib and order tests; b2b_site owns internal wholesale quote/order UI and mounted tests. Coordinator owns bootstrap, routes, parent launcher integration, HTTP/native PostgreSQL acceptance, shared records and review. No code before claim merges. No other Gate6/Gate8/DAILY/efood/retail/POS/inventory/fiscal/assistant/store-lifecycle owner is taken over.

Scope: explicit nullable tier priceBasis NET/GROSS with legacy NULL unclassified; tier version and scoped price-change audit; no reinterpretation/backfill of legacy numeric values. Quote fixed eligible quantity tiers only, active same-company customer/list/store/product/store-membership and explicit source basis, decimal net/VAT/gross snapshots; ambiguous/unsupported/unclassified price fails closed. Operational APIs require explicit store. Actor/channel/prices derive from authenticated manager context. No public customer/seller token or new entitlement is enabled yet.

Submit one online BACKOFFICE order request with UUID clientOrderId, customerId,storeId,items,quoteId,notes. Transactional idempotency bound to company/actor/key + canonical hash, unchanged retry returns original committed order, changed reuse409, stale quote409 before write, atomic request/event. Status SUBMITTED/«Προς έγκριση», creditChecked=false; no stock reservation/posting, sale, payment, invoice, myDATA, fiscal or collection. UI freezes ambiguous submission and retries same key/body; blocks own launcher departure and warns on browser unload. No browser persistence/offline/crash-recovery guarantee in this slice.

Additive runtime bootstrap only for new wholesale tables and price metadata; no production SQL/migration from sandbox, no physical/LAB state-changing action, no server/backup/restart/license change. Isolated tests must prove exact cents/net/gross/zeroVAT/tier boundaries, tenant/store/product isolation, stale responses, quote mismatch, concurrent duplicate serialization and rollback, unchanged synthetic financial/stock controls. CI/build/invariants/registered HTTP/native PostgreSQL + mounted UI required before source merge. CI alone is not LAB PASS; new manual PASS absent. Full suite remains OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-wholesale-orders-core.md. Next action merge this claim then implement the scoped vertical slice.

18/10/2026 11:56 Athens - VOICE-ASSISTANT-01 / CAPABILITY HELP SOURCE LIVE / FINAL ACCEPTANCE DEFERRED

Retained owner codex/assistant-business-queries-20261015, source branch feat/assistant-capability-help-20261018. ClaimPR2681/finalhead d6141d7517d99991ee088d7181b896fa2aa508a0, docsCI39111283298 applicable classifier/Windows SUCCESS/build correctly skipped, merged8aa3a3ff before source. SourcePR2684/finalhead ae695838c32fa24e8549f55448a8d3202cf31ecf merged d32f18128e4c6c9e092f3918aa984cbc1c9e0fc8. Full native PRCI39111640437/job117628997170 and exact source mainCI39112020479/job117630094299 SUCCESS:2921PASS/0FAIL/0SKIP plus6backup each; all four required jobs, native PostgreSQL/security/licensing/Windows/browser/build/invariants/archive/realHTTP.

Shared later source11235c4 (independent wholesale) retained all three owned runtime/test blobs unchanged; full mainCI39112180379/job117631203246 SUCCESS2934/0/0 plus6backup. Later source ca2654525dc3a0a97539f74b1367ce86e7e6dd62 (independent store preview) likewise retains identical owned assistant blobs; full mainCI39112715047/job117632388231 SUCCESS2939PASS/0FAIL/0SKIP plus6backup, all required jobs. Earlier ordinary guards39112404811/job117631154052 for d32f181 and39112795320/job117632305889 for11235c4 correctly deferred because newer production source was on main; neither was a deployed-version PASS. No bypass, manual trigger/hook, restart or workflow change.

Final ordinary guarded Render39113149065/job117633372101 SUCCESS, EXPECTED_REVISION ca2654525dc3a0a97539f74b1367ce86e7e6dd62 and exact healthy-revision message. Independent no-cache public health18October11:56:16Athens confirms oktrue/version0.22.0+kat-test-pos/exact ca2654525dc3a0a97539f74b1367ce86e7e6dd62. This is source availability, not authenticated guidance/report USER acceptance. Other owners, newer source and PDF/manual records preserved.

Implemented: exact general Greek help/capability questions receive concise server-owned guidance and examples only from exposed report tool families, conditional on existing module/domain permission. No provider or report read for help; no financial evidence, totals or new file/action/persistence/microphone claims. Extra qualifiers/date/store/action/multiline text retain the ordinary report/clarification path. Owner module/configuration/initial/final scope and Platform selected/all-store/revocation guards are unchanged. No provider/model/key/API wiring/SQL/schema/calculation/role/license/export entitlement or business-state changes.

Local baseline17PASS; focused28PASS/0FAIL/0SKIP; local full2914total/2805PASS/0FAIL/109infrastructureSKIP; client production build PASS. Initial new negative fixture incorrectly required a provider call even when the existing deterministic business-period clarification safely intercepted an undated payment/action fragment; final test requires that exact unchanged clarification, otherwise original provider path. The withdrawn unmerged parser claim2679 is reconciled below: final normal role guards already restore the business clarification, no runtime fix was warranted or made. No failure was relabeled as hosted PASS.

Owner explicitly requested continued implementation with the general normal-application read-only check batched at completion; no intermediate user query/screenshot request is required. Actual new guidance/natural weekly-to-yesterday dialogue, numerical normal-report reconciliation, Owner/mobile/Enter/copy/cancel interaction, new all-product/short-follow-up file bytes and other formats remain NOT TESTED/AWAITING final acceptance. No new manual PASS; whole VOICE OPEN/ASSIGNED. Earlier qualified daily display2668, direct CSV2631, original two-line source2617 and names/UI PASS retained and must not be repeated merely for paperwork. User has no microphone; no microphone test request. No production sale/payment/stock/fiscal/shift action or old transaction replay.

Single next action: continue the remaining owned assistant coverage audit and choose the next bounded implementation under the same owner; collect outstanding normal-application checks as one final read-only batch after the implementation batch is complete. This supersedes earlier immediate weekly-question prompts, without closing their acceptance or promising arbitrary-domain coverage. Owner remains assigned until completion or a named central handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-capability-help.md.

18/10/2026 - WHOLESALE-MASTERS-01 / SOURCE MERGED / FULL CI PASS / AWAITING MAIN CI, RELEASE AND LAB

Coordinator codex/wholesale-suite-20261017 retained. First bounded source PR2685 finalhead0c2a4524c1e975040eeb0a04efe68529a6a16ffc/fullCI39111762123/job117629287772 SUCCESS:2929tests/2929PASS/0FAIL/0SKIP plus6backup tests and all required Windows/build/Chromium/security/licensing/invariants/isolatedHTTP jobs. Exact native PostgreSQL registered wholesale router scenario executed PASS (not skipped), proving own/foreign/corrupt association handling, real persisted tiers/decimals and unchanged synthetic stock/money controls in its isolated schema. Mounted UI7/7 and registered HTTP5/5 are part of that suite. Previous local12PASS/1nativeSKIP and broad local2812PASS/110environmentSKIP remain separate local evidence.

Source merged main11235c4c98b41c744fe5b75f899366f3287d414c after green PR CI and independent review. Concurrent main e25a7e7d changes were documentation-only; their Android/scanner/assistant checkpoints, manual and owner records were preserved, PDF regenerated, runtime source blobs unchanged by reconciliation. MainCI39112180379 queued/pending at evidence preparation. Exact guarded deployment/hosted UI/physical/LAB acceptance NOT TESTED; no manual PASS and no activation of a full wholesale/B2B/seller product. Ordinary existing release workflow remains guarded; no direct deploy/restart/DB/license/business/stock/payment/fiscal operation was performed.

First master-data source scope is complete for CI review, with functional hosted acceptance still AWAITING LAB. Full WHOLESALE-SUITE-01 stays OPEN and owned by the coordinator. Quote/order lifecycle, customer B2B site, external-seller application, dedicated entitlement and standalone packaging remain PLANNED/NOT IMPLEMENTED. Read-only follow-up clarified gross retail prices versus unclassified B2B unit prices and the need for a dedicated portal-session boundary; plans updated without auth/schema source changes. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-wholesale-suite-foundation.md; docs/wholesale plans.

Next single action: verify mainCI39112180379 and ordinary guarded exact-source release before any hosted acceptance; then begin a separately bounded authoritative quote/order slice. Existing owners/PASS retained; no claim release or financial LAB test is authorized by this evidence record.

18/10/2026 - WHOLESALE-MASTERS-01 / SOURCE PREPARED / LOCAL VALIDATED / AWAITING CI AND LAB

Coordinator codex/wholesale-suite-20261017 retained; source feat/wholesale-suite-foundation-20261017. Claim PR2680/headc7519a407ca7103e144193c7b0bf88baf3ed96af/docsCI39070541242 SUCCESS merged33ba81e2e0e096896ec4cdf56fb1ab611ab10167 before source. Owner18Oct00:18 explicitly approved public repository publication. Earlier publication blocker is resolved; all unrelated owners and PASS preserved.

Bounded first source slice: customer GET returns tenant-scoped assigned list; explicit null unlinks only same-company association; assignment validates/locks customer and list in one transaction, malformed/foreign/inactive references rejected and inconsistent association409. New saved-tier GET has bounded deterministic pagination and tenant joins, preserves zero/null/decimal prices. UI safely resets acknowledged customer/list creates, explicitly unassigns, displays persisted tiers with loading/error/retry/empty/page controls and guards stale/unmounted responses/overlapping refreshes. No wholesale quote/order, B2B customer site, seller application, dedicated entitlement or standalone package is implemented by this slice.

Local Node20.20.2 focused registered HTTP5PASS + mounted React/jsdom7PASS =12PASS/0FAIL/1nativeSKIP; skipped native PostgreSQL scenario requires isolated CI database. Existing retail/customer regression17/17PASS. Client build PASS/TABLE_SERVICE verified, server preparation/Prisma generation PASS. Full local server suite:2922tests/2812PASS/0FAIL/110environmentSKIP,112.1s; all13new focused cases included, native scenario skipped locally. Independent read-only worker review found no blocking API/UI mismatch. Native source-router test uses random isolated schema and real bootstrap/SQL, foreign/corrupt refs, persisted decimals and unchanged synthetic stock/money controls; native/LAB effects are NOT claimed from local mocks.

No production DB/bootstrap/config, license, stock, payment, fiscal, backup or server operation. No new manual PASS. Full suite remains OPEN/NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-wholesale-suite-foundation.md; plans docs/wholesale. Next action: required full CI and isolated PostgreSQL proof before merge; hosted/physical acceptance stays AWAITING LAB.

18/10/2026 11:20 Athens - VOICE-ASSISTANT-01 / CAPABILITY HELP / ASSIGNED

Retained owner codex/assistant-business-queries-20261015; bounded branch feat/assistant-capability-help-20261018. Owner asks to continue implementation and perform one general normal-application read-only acceptance at completion, without intermediate user tests. Whole VOICE OPEN; prior natural-sales732fa90c and qualified display/name/source/direct-CSV PASS protected. All other assignments retained.

Reconciled diagnosis: unmerged claimPR2679 was withdrawn before source edits. assistantAnswerFromResponse alone replaces the business clarification, but both normal role handlers subsequently call checkedBusinessAnswer and already restore it. No hosted failure established; do not implement the unnecessary parser change. No source edits were made for that hypothesis.

New bounded scope: deterministic concise Greek response to exact general help/capability questions (e.g. «Τι μπορείς να κάνεις;»), with examples drawn only from the tools exposed to this request. Describe connected report families conditionally on existing module/role permission; a tool being exposed never grants access. No claims of every domain, arbitrary actions, files, persistence or microphone support. No provider call or report read for pure general help. Any additional date/product/store/filter/action or multiline text must retain the ordinary report path, not be swallowed as help. Preserve user history, evidence gate, refusal/source-only/error handling, session/store/tenant/module/role and export boundaries. No provider/model/key, schema/SQL/calculations or business mutations.

Status NOT TESTED. Require focused genuine dispatcher/Owner/Platform and negative-routing regressions, full native PR/main CI, ordinary guarded release and exact healthy revision. Actual help and all deferred natural-language/Owner/mobile/file/report acceptance remain AWAITING the final read-only batch, not new manual PASS. No sale/payment/stock/fiscal/shift action or replay. Claim must merge green before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-assistant-capability-help.md.

18/10/2026 00:18 Europe/Athens - WHOLESALE-SUITE-01 / PUBLICATION AUTHORIZED / ASSIGNED / NOT TESTED

Owner explicitly answered «Εγκρίνω» to publishing the technical plans, assignment/checkpoint records and generated tracker PDF to the existing PUBLIC repository https://github.com/xrhstosmanis-design/myworkstation-app. This authorization resolves the prior automatic-review publication blocker for this payload. Coordinator codex/wholesale-suite-20261017 and three worker scopes remain as recorded below. Source remains NOT STARTED until this claim passes CI and merges to main; production operations are not part of this publication. Full wholesale/B2B/field-sales suite remains OPEN / NOT TESTED. No existing owner or PASS is changed. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-wholesale-suite-foundation.md. Next action: publish and merge this documentation claim, then the bounded master-data stabilization.

17/10/2026 23:58 Europe/Athens - WHOLESALE-SUITE-01 / PROPOSED ASSIGNMENT / LOCAL ONLY / PUBLICATION BLOCKED

Public publication rejected by automatic approval review; claim is not merged and source implementation has NOT started. Explicit authorization for the new payload in the public repository is required before another publication attempt.

Owner/coordinator codex/wholesale-suite-20261017; claim branch docs/wholesale-suite-claim-20261017, source branch feat/wholesale-suite-foundation-20261017. Owner explicitly requested a full wholesale product inside MyWorkStation and independently saleable, plus B2B site and field-sales app, then authorized three cooperating agents and said «Ξεκινά».

ΑΝΑΛΗΨΗ ΑΠΟ agent/wholesale-b2b-20261001 - ASSIGNED codex/wholesale-suite-20261017 for this owner-authorized expanded wholesale suite and the bounded master-data stabilization below. Historical phase1 implementation/NOT TESTED evidence is preserved, not promoted to PASS. No separate historical agent is presumed currently running. No unrelated Gate6, Gate8, DAILY online, efood, retail POS/customer pricing, inventory, fiscal, licensing or production assignment is taken over.

Three parallel workers: wholesale_core (existing B2B master readback/unassignment and tests), b2b_site (separate B2B architecture/contracts), field_sales (assignment/mobile/synchronization contracts). Coordinator exclusively owns shared tracker/checkpoint files, integration decisions and review. Source edits begin only after this claim is green and merged to main.

First bounded source scope: read back assigned customer price list; explicitly remove same-company assignment; safely reset successful customer/list forms; review saved list tiers with tenant-scoped bounded API. Architecture documents specify one shared future quote/order service for BACKOFFICE/B2B/FIELD_SALES and standalone licensing. Product identity remains Product/StoreProduct;

WholesaleCustomer is not silently merged with retail Customer. No retail checkout, payment, fiscal, stock posting, production schema/config/data or live test action.

Evidence: read-only three-agent audit of main87b286473014c852ed83169fe7cda44ccc4dff32 and original phase1PR1625/commitc322453ea7edd139da71ccfd1ee7cf4d812a8014. No wholesale LAB PASS found. Missing quote/order/portal/seller/standalone lifecycle remains OPEN/NOT TESTED. CI is not LAB acceptance. Acceptance for this first source slice: mounted UI and registered HTTP tenant/role/readback/unassign tests; native isolated PostgreSQL where available, full existing CI and build; LAB remains AWAITING LAB until deployed and observed. No replay of historical transactions.

Checkpoint CHECKPOINTS/CHANGES/2026-10-17-wholesale-suite-foundation.md. Next: merge this documentation claim, then implement the bounded foundation and publish source PR. Full product remains OPEN; no claim that three audit agents constitute a finished product.

17/10/2026 23:29 Athens - VOICE-ASSISTANT-01 / NATURAL TOTAL SALES SOURCE LIVE / AWAITING READ-ONLY DIALOGUE ACCEPTANCE

Retained owner codex/assistant-business-queries-20261015, source branch feat/assistant-natural-total-sales-20261017. Claim/limited original display receiptPR2668 head0e4a69a/docsCI39063918871 SUCCESS merged348e5b8 before source. Natural dialogue sourcePR2670/head8166f32 merged584acdcb; final strict-token correctionPR2674/heada233c0c56985a998cdf2519939006fa5e75a2723 merged 732fa90c8353c5856cdd733a2861cf198bc3b936. Final PRCI39065664082/job117492761800 and exact mainCI39066138749/job117494218207 both SUCCESS:2916PASS/0FAIL/0SKIP plus6backup, all four required jobs/native PostgreSQL/security/licensing/Windows/browser/build/invariants/archive/realHTTP.

Ordinary guarded Render39066587659/job117495468379 SUCCESS, expected revision732fa90c (workflow metadataa01b6fa is documentation-only descendant). Renderdep-db9tjd6q1p3s739hv6p0 LIVE20:28:14UTC. Independent no-cache public health23:29:07Athens confirms oktrue/version0.22.0+kat-test-pos/exact732fa90c. No manual deployment, hook, restart or safeguard bypass. Earlier health showed891 while rollout was pending; it was not claimed as the final token-corrected release. Initial main584 CI was automatically superseded by newer main891, not a test failure. Latest maina01b6fa retains identical owned assistant source; other owners and their manual/PDF records preserved.

Now implemented: natural Greek total-sales/turnover requests, existing Athens date/range/current-or-previous week/month/rolling-day periods, and fresh date/format-only continuation of an unfiltered total-sales topic. Latest natural sales period persists through export. All current/inherited qualifiers must be consumed; complete numeric period spans and exact month words prevent lost SKU/barcode, malformed-date suffixes and product/person-name month-stem matches. Filtered/unrelated topics cannot become all products, invalid new dates cannot fall back to old dates, and injected model all-mode remains refused. Same canonical source/calculation/reversal/credit/future/caps/privacy/UI-selected scope/modules/roles/session/export reauthorization; no new business writes, provider/model/key/schema or auth change.

Final Node20 focused43total/42PASS/0FAIL/1native infrastructureSKIP; final local full2909total/2800PASS/0FAIL/109infrastructureSKIP; production client build PASS. Forty additional adversarial combinations produce no unexpected unfiltered reads. Final native CI above includes actual dispatcher/canonical SQL and mixed-unit/control/reversal/source guards. The earlier coarse period helper bug and initial overstrict422 fixture expectation are explicitly retained below; final tests permit only safe empty-read period clarification or422, never an unfiltered read.

The user's22:23 Diadoxou screenshot remains LIMITED USER PASS for daily report display only, centrally recorded in2668/manual; do not repeat that completed display check. It is not numerical reconciliation, an exact device-revision capture, or acceptance of this new grammar. No authenticated post-release natural-query/Owner/mobile/new-file-content PASS is claimed: cloud tab13 is at canonical sign-in wall, with no credential entry or bypass. Current-day figures remain as-of ongoing business. Whole VOICE

OPEN/ASSIGNED; direct transfer CSV2631, original two-line source comparison2617 and previous qualified names/UI evidence protected. General arbitrary requests, persistent history/uploads, short-follow-up file bytes/other formats, normal-report total reconciliation and physical microphone unavailable remain separate open scope. No new sale/payment/stock/fiscal/shift action or old transaction replay.

Single next action: normal Super Admin, explicitly selected Diadoxou/all-stores off, ask «Τι τζίρο κάναμε αυτή την εβδομάδα;» then «Και χθες;» in the same thread; observe source/store/dates before accepting language/period binding. Compare any asserted totals to the same normal sales report/time, read-only. Owner remains assigned until that result or a named handoff; no fullVOICE closure from CI.

17/10/2026 23:19 Europe/Athens — PLATFORM-COMPANY-LAYOUT-02 / SOURCE LIVE / AWAITING USER VISUAL ACCEPTANCE

Retained independent owner feat/platform-company-layout-20261017. User approved second mockup22:38 and full available width/height22:42. ClaimPR2666/head31a805ccfdb48c51224035bbdf5bb0d3fd4ac0e5/docsCI39063444841 applicable jobs green merged220ad4bb15f84d53b390a55d605b124998ef6de2 before source. SourcePR2669/headae0821f57a986ae5263e27054b01f5efc155bcac merged48ae4f0982573fb5e1617dce5add8dbbcf6ceb31. Full source PRCI39064230311/job117488466303 and exact source mainCI39064665041/job117489765487 SUCCESS: PR2903PASS/0FAIL/0SKIP, source main2907PASS/0FAIL/0SKIP plus6backup each. Newer common deployment revision891262f96cd3270d4fc0e53997851624ea6685d2 retains the owned three UI files unchanged; its fullCI39065083322/job117491021396 SUCCESS: 2915PASS/0FAIL/0SKIP plus6backup, all required Windows/native/HTTP/build/invariants. Earlier guard39065086884/job117490956082 correctly skipped deploying48ae4f0 because newer production source was on main; no bypass. Ordinary guarded Render39065506885/job117492230779 SUCCESS; independent public health oktrue/exact891262f96cd3270d4fc0e53997851624ea6685d2. Served-asset markers confirmed separately; these are source availability, not authenticated USER acceptance. No manual deploy or guard bypass.

Platform Admin now has sidebar, larger top actions, grouped finance/tools and one searchable company-card list with explicit selected-company detail. Company identity, stores and terminals are primary choices; subscription/other actions expand separately. Retains original handlers/owner guards and same company/store IDs; multi-store terminals require explicit store selection. Existing subscription/Master/promotion launchers still use the preserved toolbar portal. Desktop uses all available width/height with bounded working-pane/content scrolling, mobile stacks naturally. No promise that arbitrary company content never scrolls. No backend/schema/auth/license/AFM/archive implementation change or real business action.

Final focused actual-parent/workspace + Command Center/editor/terminal mounted checks12PASS/0FAIL/0SKIP, Work-safe client/TABLE_SERVICE build PASS. Earlier local full2896total2787PASS/0FAIL/109infrastructureSKIP remains distinct from final exact native CI. Isolated Chromium actual parent/workspace and three real top portal launchers with synthetic read-only fetch/other panels:1920x1000,1366x768,1024x768,390x844 PASS for no horizontal page overflow, bounded desktop document height, top targets>=64px and final-company reachability/correct detail. Final fixture includes actual AI-alert CSS; no private real data used. Initial inherited toolbar flex-basis and short working-pane geometry were corrected before final run. Final mounted test additionally checks exact direct-terminal company/store URL and retained linked-owner password refusal. No hosted company/AFM save, terminal archive, plan activation, payment/stock/shift/fiscal action or replay to produce evidence.

Actual user/device visual acceptance remains NOT TESTED / AWAITING USER. Manual stays unchanged until actual acceptance. Next single action: refresh canonical https://myworkstation-app.onrender.com/platform-admin, inspect sidebar/larger buttons/full-width home, choose intended company and inspect its detail; only read-only navigation is needed. Wider TODAY-04/company lifecycle/installation/remote/assistant/inventory and all other owners/PASS retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-platform-company-layout.md.

17/10/2026 22:50 Europe/Athens — PLATFORM-COMPANY-LAYOUT-02 / IMPLEMENTED / AWAITING CI AND USER

Retained owner feat/platform-company-layout-20261017. Claim PR2666/head31a805ccfdb48c51224035bbdf5bb0d3fd4ac0e5, docsCI39063444841 applicable Windows/classifier SUCCESS and build skipped, merged220ad4bb15f84d53b390a55d605b124998ef6de2 before source. User also explicitly requested full available width/height22:42. New presentation-only Platform home: full viewport desktop shell, sidebar, larger top actions retaining live portal target for subscriptions/Master/promotions, grouped finance/tools, one searchable company card list, explicit selected-company detail with identity/stores/terminals primary controls and expandable subscription/other existing actions. Existing owner guards, every handler, scoped IDs, existing AFM and archive controls unchanged. Multi-store terminal entry requires store selection; one-store company retains its exact existing pair. No backend/schema/auth/licensing/business behavior change.

Mounted actual parent/workspace tests cover selection, updated overview data, filtered/removed selection with no silent fallback, company editor ID, store and terminal IDs, linked-owner password refusal, owner chooser, sidebar/tool routing and no business writes. Existing Command Center selection and terminal/editor mounted tests preserved:12 focused PASS/0FAIL/0SKIP before final added terminal navigation assertion, final single parent test PASS. Local full2896total/2787PASS/0FAIL/109infrastructureSKIP on preceding candidate; final exact CI still required. Work-safe production build/TABLE_SERVICE PASS on candidate, final build underway. Isolated Chromium actual parent/workspace plus real subscription/Master/promotion portal launchers, synthetic read-only fetch and panels:1920x1000,1366x768,1024x768,390x844; all no horizontal page overflow, desktop viewport height bounded, top targets at least64px, final company reachable and correct detail selected. Initial toolbar flex-basis and insufficient working-pane height were found and corrected before final geometry run. Mobile stacks and scrolls naturally; shorter desktop uses content/pane scrolling, not a promise that arbitrary content never scrolls. No authenticated production acceptance or actual business mutation. Mockup and isolated browser checks are not USER/LAB PASS. Manual stays unchanged until actual acceptance.

Await full source PR/mainCI, ordinary exact guarded release/health and user visual acceptance. Wider TODAY-04, company lifecycle, installation, assistant, inventory and all other owners/PASS retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-platform-company-layout.md. No live AFM save, terminal deletion, company creation/plan activation, financial/stock/fiscal/shift mutation or replay performed for diagnosis.

17/10/2026 22:23 Athens — VOICE-ASSISTANT-01 / LIMITED DIADOXOU REPORT DISPLAY USER PASS

Retained owner codex/assistant-business-queries-20261015. User supplied image(20261017-192358).png, displayed answer time22:23, after sourcePR2657/f3245f6f was released. The normal assistant visibly returns a sales_by_store report for17October2026, all products, one Diadoxou store and detailed product rows; previous sourceUnavailable message is absent. This closes ONLY the reported plain daily report-display failure. Actual device revision and submitted question/header are outside this crop; link to the earlier exact question/selected-store screenshots is conversational, not independently recaptured. Prior exact release/native CI evidence in2026-10-17-assistant-total-sales.md remains technical evidence, not proof of screenshot device revision.

No raw business amounts or names beyond the already-public store identification are copied into public docs. Independent normal sales report/time reconciliation, complete daily total accuracy, actual all-product file bytes, Owner/mobile/physical voice remain NOT TESTED. Current day is still ongoing; an as-of answer is not final daily balance. This screenshot does not prove clipboard/Enter/cancel interaction. No production business mutation or replay. Whole VOICE OPEN; no repeat of this completed display-only check for documentation.

17/10/2026 22:43 Athens — VOICE-ASSISTANT-01 / NATURAL TOTAL SALES DIALOGUE / ASSIGNED

Same owner retained, source branch feat/assistant-natural-total-sales-20261017. User explicitly requests broader ChatGPT-like answers. Bounded causal extension: common natural Greek total-sales/turnover request forms, reuse existing validated Athens period resolver for explicit dates/ranges/current and previous week/month/rolling days, and carry an unfiltered total-sales topic through date-only and format-only follow-ups. Only recognized total-sales wording may enter internal all-product reader; product/category/payment/operator/store/name/comparison/unknown qualifiers must never be dropped or treated as all products. A filtered or unrelated topic cannot inherit the total-sales shortcut. Fresh canonical read for each answer/export, unchanged selected/all scope chosen in UI, role/module/reauthorization/caps/privacy/reversal arithmetic. No SQL/calculation/schema/provider/model/key/license/auth change and no production financial/stock/fiscal/shift action.

Baseline main220ad4bb contains unchanged assistant source since f3245f6f. Existing direct daily display, two historical transfer-line reconciliation, direct CSV USER PASS, limited names and existing dialogue safeguards protected. Claim/receipt must merge green before source edits. Require meaningful parser/actual effective-question+dispatcher tests for natural wording, latest period and multi-turn, filtered/forged/multiline/inherited rejection, no provider needed, both-role existing routes and signed replay regression, native/full PR/mainCI, ordinary exact guarded deployment. New language/general dialogue remains NOT TESTED live; cannot claim answering every possible request. Persistent history/uploads/general knowledge/wider data sources remain separate unfinished scope. Manual records ONLY observed display slice. Single next action: implement this bounded natural total-sales dialogue after merged claim.

18/10/2026 — STORE-LIFECYCLE-01 / TRANSACTIONAL EXECUTION CORE / AWAITING NATIVE CI

Owner feat/store-cleanup-20261017 retained; continuation feat/store-lifecycle-executor-20261018 based main7851c90. Explicit owner15:44–15:47 requests activate/clear KAT and complains about delay; acknowledged prior wording incorrectly implied a ready switch. Existing metadata/codec previews are not represented as operational cleanup. This increment adds actual internal prepare/execute/abort and selected-store database fencing, but no production manifest, recovery worker adapter, generation-aware request integration/reopen flow or executable HTTP route is registered. Public preparation remains executionAvailable:false; no production install/reset/delete occurred.

Server-constructed reviewed manifest and durable/full-restore verification callback are mandatory; prospective STORE_TABLES is never used as a delete allowlist. Explicit per-store guard installation/enrollment is atomic with trigger DDL, draining pre-install writers before committing the control row. ALWAYS row guards cover INSERT/UPDATE/DELETE and separate ALWAYS statement guards prohibit TRUNCATE. Validates exact trigger body/function/schema/timing/events/no WHEN or column restriction; additional/unreviewed triggers, complex/RLS/partition/foreign relations, unknown store tables/incoming dependencies and unreviewed loose IDs/JSON/attachment fields reject. Existing active shifts/operators/Writers or unresolved fiscal requests reject preparation. Guards retain per-store generation/tombstone, ordered store locks and NOWAIT write refusal to avoid row-lock/fence deadlocks. Deployment/migration coordination, untracked external fiscal/file side effects and physical queues still need production integration.

Prepare commits a selected-store maintenance fence, exact row/schema signature/hash, counts, scope/mode and ten-minute server expiry. Read-committed statements after the control-row barrier include committed in-flight target writers; other-store writes stay compatible. Pre-materialization row/byte caps, statement/lock/transaction limits. Snapshot retains exact SQL row JSON, configurations and all declared owned children; cross-store links or removal affecting a retained child reject. Execute rechecks exact scope/operation/hash/expiry/plan/rows/guards, requires durable encrypted readback and exact restored snapshot hash, deletes FK-ordered rows in one transaction with exact count checks, compares retained records, records idempotent completion and increments generation. Post-execution maintenance deliberately stays closed; DELETE keeps retired-identity tombstone. Abort releases only an unexecuted preparation, never a completed clearance. Failure after deletes rolls back the whole transaction; encrypted verified orphan artifact may remain after rollback, never proof of successful deletion.

Local Node20 pure execution guard1PASS and native infrastructure tests skipped without PG. Separate temporary PGlite smoke exercised actual RESET SQL/control preservation only, using a synthetic proof; NOT native/full recovery/LAB evidence and no extra repository dependency. New native PostgreSQL fixtures use real encrypted persisted artifacts and restore all four owned fixture tables into a separate empty schema before RESET/DELETE. Cover retained RBS settings, sibling/foreign/catalog controls, idempotent replay, missing restore proof, commit-time rollback, unknown raw/incoming links, cross-store references, tampered guards, TRUNCATE refusal, changed preview/expiry, active synthetic shift, in-flight writer drain and other-store writes during backup. Native/full CI pending. No real-store or Gate PASS.

Remaining before KAT/public activation: complete actual production reviewed ownership/raw/JSON/external-file manifest and snapshot/restore schema/reference coverage; hosted durable adapter/keys/retention with full-store restore; authenticated request/worker generation propagation preserving old offline generations, safe import/reopen, physical Writer/queue/inflight acceptance; exact central preview/confirmation/activation API/UI and release verification. Source metadata helpers remain sensitive/internal. New Excel/photos/employee roster still pending. Preserve other stores, shared company/catalog/users, existing empty-store archive and KAT TEST deletion. Single next action: run and fix full native execution/concurrency/rollback CI for this core, then wire the reviewed production recovery/generation adapters before exposing execution. Owner retained; no further permission request for code work.

18/10/2026 — STORE-LIFECYCLE-01 / SCHEMA INVENTORY SOURCE MERGED / SNAPSHOT INTEGRATION OPEN

Owner feat/store-cleanup-20261017 retained; receipt docs/store-schema-receipt-20261018. SourcePR2715 /head0ef8fb7a58e8b6a864b1595061b8db8db38d315c/fullPRCI39126046619/job117671387517 SUCCESS3037PASS/0FAIL/0SKIP plus6backup, Windows, Chromium and real HTTP; merged2f2ce031e66b7a7b5983997159d15752816c8545. Native schema fixture actually passed composite FK column ordering/deferral, enum/domain, quoted attachment table, high-precision sequence definition, view, trigger SHA256 function hash, RLS flag, strict company/store refusal, unchanged tenant rows and distinction between row changes and DDL fingerprint changes. Local prepared full Node20:3018tests/2900PASS/0FAIL/118infrastructureSKIP; focused final schema3PASS/0FAIL/1nativeSKIP and production build passed. Final exact PR CI is authoritative. Exact merged mainCI39126478154 was cancelled by newer mainb311814 (central diagnostics docsPR2716); exact merged source CI/ordinary guarded release verification remains pending. No deployment bypass or authenticated/LAB acceptance claim.

Internal only: scoped Super Admin READ ONLY repeatable-read metadata inventory, bounded catalog queries/timeouts. No route, schema execution or business/credential row export. Definition/default metadata can contain sensitive literals and must remain internal/encrypted in recovery integration. Trigger function bodies are hashed with SHA256 and omitted from returned metadata. Identifier/attachment heuristics remain incomplete review candidates; sequence counters, full schema restore dependencies, row ownership/freshness and binary completeness are not proved. restoreReady/executionAvailable remain false. The combined tracker PDF is regenerated over current shared main; other owners and central four-stream coordination preserved. No new manual PASS.

Read-only source review also located existing off-site backup worker ops/backup/run-backup.sh and README: private Backblaze B2/S3 with encrypted/versioned bucket, but pg_restore --list is archive inspection, not actual restore. Existing backup service/configuration remains untouched and is not converted into lifecycle recovery readiness. No production backup, restore, settings, key, Writer, fiscal, stock, shift, payment or deletion action occurred.

Whole task remains OPEN/ASSIGNED. Next action: integrate explicit reviewed row and attachment selectors into a complete snapshot, including raw/JSON links and external/inline binary existence/checksum checks, with schema/version/recovery verification; then generation-bound old/offline/inflight mutation fencing and exact preview-bound atomic RESET/DELETE with final confirmation. Hosted storage/key provisioning/retention and full-store isolated restore remain open. Never treat metadata definitions as automatically executable DDL or adopt old offline requests into a new generation. Preserve shared company/catalog/users, other stores, empty-store archive and exact KAT TEST delete. KAT new Excel/button photos/employee roster and concrete destructive review pending. No full recovery/go-live/Gate PASS is claimed.

18/10/2026 — STORE-LIFECYCLE-01 / READ-ONLY SCHEMA INVENTORY / AWAITING CI

Owner feat/store-cleanup-20261017 retained; continuation feat/store-lifecycle-schema-manifest-20261018 based main307c1b527ee613b89f8270eeac54f39b4c22962d. Previous recovery sourcePR2711/fullCI39124590737 SUCCESS3033/0/0 plus6backup and receiptPR2713/docsCI39125375704 merged307c1b5 remain evidence; no authenticated/physical acceptance is inferred. Other owners including central four-stream coordinator are preserved.

This bounded internal increment inventories actual schema metadata under Platform Super Admin and exact company/store guard, READ ONLY repeatable-read transaction, statement/transaction timeouts and fail-closed object-count bounds. Includes columns/types/defaults/generated/identity, composite FK/PK/check/domain constraints with ordered source/target columns and cross-schema incoming links, indexes, trigger definitions plus function hashes, enum/domain metadata, sequence definitions without changing/reading sequence counters, views and RLS/partition/foreign-table flags. Schema fingerprint is deterministic and explicitly not row freshness, sequence state, ownership proof or restore readiness. No route is mounted, no definitions executed and no business/credential row bodies exported. User-created metadata/default expressions may be sensitive: keep this manifest internal and encrypt it in future recovery integration; do not expose through the public preparation endpoint.

Review candidates include undeclared *Id columns and attachment/storage/bytea fields; heuristics are explicitly incomplete, never automatic ownership or deletion rules. Source review confirmed raw StockMovement.sourceId and CustomerLedger.referenceId, and DocumentAttachment.storageKey/contentData may point to database-inline or external files. JSON/application-held links and binary existence/checksum completeness still require explicit manifests. restoreReady/executionAvailable stay false.

Local Node20 focused schema:3PASS/0FAIL/1native infrastructureSKIP. Added actual native isolated test for composite keys, enum/domain, quoted table, sequence above JS safe-integer range, view, trigger, RLS, strict cross-company refusal and unchanged complete tenant fixtures. It distinguishes row updates (same schema hash) from DDL (changed hash). Full/native CI pending; no LAB/USER PASS, full-store snapshot, production backup or restore. No KAT data, settings, Writer, credentials, shifts, payments, stock or fiscal state changed.

Whole task remains OPEN/ASSIGNED. Remaining reviewed row ownership/raw application links and complete inline/external attachments, schema restore integration, durable hosted storage/key provisioning/retention/full-store restore, old/offline/inflight mutation generation fencing, exact preview-bound atomic executor/replay/rollback/final confirmation and concrete KAT review. New Excel/photos/employee roster pending. Single next action: pass native/full CI for this metadata increment, then integrate explicit reviewed row/attachment snapshot selectors; no activation of destructive execution. Combined PDF update remains release-receipt work; no manual PASS.

18/10/2026 14:53 Europe/Athens — STORE-LIFECYCLE-01 / ENCRYPTED ARTIFACT SOURCE MERGED / EXECUTOR OPEN

Owner feat/store-cleanup-20261017 retained; receipt docs/store-recovery-receipt-20261018. Recovery source PR2711 finalheada8fc0409cb0b2db6a7ea14c5deec531064820096/fullPRCI39124590737/job117667025324 SUCCESS3033PASS/0FAIL/0SKIP plus6backup, Windows, Chromium and real HTTP; merged180ef3d0467b0284ed1a651aa8c7815e5228ea8e. New native isolated recovery test actually passed: persisted encrypted file → authenticated readback → exact synthetic Sale/SaleLine restore into another empty schema, with exact numeric/bigint/JSON/bytea/microsecond timestamp values and unchanged source/sibling/foreign controls. This is CI-only fixture evidence, not complete-store recovery or LAB/USER PASS. Local full Node20 before final expected-manifest guard:3014tests/2897PASS/0FAIL/117infrastructureSKIP; final exact CI above is authoritative. Production build also passed locally.

Previous recursive dependency PR2702/head5f04c7b71512a8ff07959b5c739a21df43ff7000/fullPRCI39123425183 SUCCESS2988/0/0 plus6backup mergedf138ddddd6ac8037b17bd837768b8827506777c2; exact mainCI39123871616 SUCCESS. Independent public health18Oct11:52UTC returnedoktrue/revisioncd8b29608aff7e3b9a71df67835f059fb670c190, whose main includes2702. Static/source availability only, no authenticated preview/LAB acceptance. Recovery180ef3d exact mainCI39125009037 was cancelled by newer main; current mainaabc753 is central coordination docsPR2712. Exact recovery mainCI/guarded release verification remains pending; no manual deploy or guard bypass. Other owners' coordination/source/records are preserved.

Internal recovery codec binds company/store/mode, manifest hash and source SHA; decrypt also requires the caller's expected manifest/source to reject a valid but different snapshot. External32byte key/keyID, randomized AES-256-GCM, bounded strict validation and exact SQL row JSON text. Exclusive0600 encrypted file writes, file/directory fsync and checksum/authenticated readback; no plaintext/key written. storageReadbackVerified:true explicitly keeps restoreVerified:false. No production export/restore API is mounted. Existing pilot backup and other owners remain unchanged. The central tracker PDF is regenerated from combined current main with this receipt; no manual PASS added.

Whole task remains OPEN/ASSIGNED. Complete reviewed row/schema/raw-link ownership and all related binary attachments, real durable hosted storage/key provisioning/retention and full-store restore remain unimplemented. Offline mutation fencing remains unimplemented: current client offline-sale-queue keys use storeId and retain original requests; store-pos checkout accepts clientTransactionId without a lifecycle generation. Never relabel old queued requests with a fresh generation. Active/inflight Writers and all mutation entrypoints must be fenced, not merely browser cache cleared or sessions revoked. No reset/delete route or submit exists; executionAvailable remains false. No KAT or other production data, credentials, shifts, payments, stock, backups or fiscal state were changed.

Next action under retained owner: complete reviewed store snapshot/schema/attachment export and restore integration, then implement generation-bound offline/inflight write fencing before exact preview-bound atomic execution/final confirmation. KAT new Excel/button photos/employee roster and concrete destructive review are still pending. Preserve shared company/catalog/users, other stores, existing empty-store archive and exact KAT TEST delete. No whole Gate, recovery readiness or go-live PASS is claimed.

18/10/2026 14:46 Europe/Athens — STORE-LIFECYCLE-01 / ENCRYPTED RECOVERY BUILDING BLOCK / AWAITING CI

Owner feat/store-cleanup-20261017 retained; continuation feat/store-lifecycle-recovery-20261018 based maincd8b296. Prior dependency PR2702/head5f04c7b71512a8ff07959b5c739a21df43ff7000 mergedf138ddddd6ac8037b17bd837768b8827506777c2 after full PR CI39123425183/job117663644909 SUCCESS2988PASS/0FAIL/0SKIP plus6backup, Windows, Chromium and real HTTP. Exact mainCI39123871616 SUCCESS. No authenticated hosted/LAB acceptance is inferred and no destructive action occurred.

This bounded increment adds an internal recovery artifact format, AES-256-GCM authentication/encryption, external32byte key and keyID (no default/generated production key), company/store/RESET-or-DELETE binding, manifest hash and exact source revision. SQL row JSON stays text to preserve arbitrary numeric/bigint precision. Strict format/size/table/row limits reject invalid/tampered/wrong-key/wrong-scope artifacts without exposing contents. An existing explicitly configured directory is required; exclusive0600 creation, file/directory fsync and hash/authenticated readback are checked. No plaintext artifact or key is written. Readback explicitly returns restoreVerified:false.

Local Node20 focused recovery:3PASS/0FAIL/1native infrastructureSKIP. New native isolated test writes an encrypted file, reads/decrypts it and restores selected synthetic Sale/SaleLine rows into a distinct empty schema using PostgreSQL JSON conversion; checks exact numeric/bigint/JSON/bytea/microsecond timestamp values and unchanged complete source/sibling/foreign controls. Native/full CI pending; no real-store backup/restore/LAB PASS. This is not a complete recovery system: full reviewed row ownership/raw application links, schema/dependency manifest, hosted durable storage/key provisioning/rotation/retention and full-store verified restore remain OPEN. No export/restore/delete route is mounted and no production backup or data mutation is performed. executionAvailable remains false.

Remaining executor prerequisites also include maintenance/inflight/old offline-write fencing, preview-bound final confirmation, replay/rollback/concurrency and concrete KAT destructive review. New Excel/photos/employee roster remain pending. Existing pilot backup and other owners are unchanged; shared company/catalog/users and other stores stay protected. Next action: native/full CI for this bounded artifact increment, then finish complete scoped export/restore integration and mutation fencing before enabling execution. Combined tracker PDF regeneration remains a release-receipt action, not a PASS closure.

18/10/2026 — STORE-LIFECYCLE-01 / RECURSIVE DEPENDENCY REVIEW / AWAITING CI

Owner feat/store-cleanup-20261017 retained; bounded continuation branch feat/store-lifecycle-dependency-review-20261018 based main77d55e4. Preparation preview now follows declared foreign keys through every reachable descendant, including cycles, directly inventoried KEEP/REMOVE rows and cross-schema incoming references. Schema-qualified identity prevents a same-named foreign table from being confused with the selected schema. All descendants retain prospective action/REVIEW; reachability is never row ownership or deletion authorization. Catalog metadata query is read-only and capped at10001 with fail-closed refusal above10000. No executable reset/delete route, recovery artifact or write fencing is introduced; executionAvailable remains false. No production data changed.

Focused dependency tests cover recursive descendants/cycles, KEEP boundary, cross-schema references, unrelated shared catalog and deterministic ordering. Native preview fixture adds a grandchild attachment plus sibling control and compares complete before/after snapshots; native/full CI pending. No LAB/USER PASS. Preserve existing preview, empty-store archive, exact KAT TEST delete, installation and other owners. Remaining: raw application-link manifest and row ownership, encrypted durable backup/verified restore, old/offline mutation fencing, preview-bound final confirmation and atomic execution. Next action: pass native/full CI for this bounded review increment before merging; then continue remaining executor prerequisites. KAT Excel/photos/employee roster and concrete destructive review remain pending.

18/10/2026 11:57 Europe/Athens — STORE-LIFECYCLE-01 / PREVIEW SOURCE LIVE / DESTRUCTIVE EXECUTION OPEN

Owner feat/store-cleanup-20261017 retained; receipt docs/store-lifecycle-preview-receipt-20261018. ClaimPR2667/docsCI39063665445 mergedf541505 before source. SourcePR2683 finalhead1df00efad918664f66194c53658d3493880cd474/fullPRCI39112275426/job117630834695 SUCCESS2939PASS/0FAIL/0SKIP plus6backup, Windows, Chromium, native PostgreSQL and real HTTP; mergedca2654525dc3a0a97539f74b1367ce86e7e6dd62. Exact mainCI39112715047/job117632388231 SUCCESS2939/0/0 plus6backup and all HTTP. Prior exact8c73e623/CI39111715107 also passed2921/0/0 plus6backup before concurrent-main integration. Other owners' source/records preserved; derived PDF now regenerated from combined current tracker.

Ordinary guarded Render39113149065/deploy117633372101 SUCCESS: explicit pinnedca265452, no manual deploy or guard bypass. Independent no-cache public /api/health observed18Oct08:56:16UTC/11:56:16Athens:oktrue/version0.22.0+kat-test-pos/exactca2654525dc3a0a97539f74b1367ce86e7e6dd62. This proves source release, not authenticated hosted UI acceptance or any deletion. Served frontend entry-CJvv8xEJ.js independently contains the lifecycle preview endpoint and explicit disabled-execution wording; this is static delivery evidence, not authenticated UI acceptance. No production store/shift/payment/stock/fiscal/credential deletion, reset, pairing, Writer restart or replay occurred.

Available source: normal Super Admin canonical /platform-admin → selected company → Stores → selected store «Εκκαθάριση / Διαγραφή» → RESET/DELETE preparation preview. Counts only in READ ONLY repeatable-read transaction; strict company/store/role boundary, prospective keep/remove/review classification, active-work blockers and declared dependencies. Native actual HTTP/SQL verified unchanged complete target/sibling/foreign fixtures and no credential/document bodies; mounted actual UI verified scope/mode races, wrong-scope refusal, retry/unmount and GET-only behavior. This is CI evidence only. Authenticated hosted/physical preview remains AWAITING USER; no new manual PASS.

Whole STORE-LIFECYCLE-01 remains OPEN/ASSIGNED. executionAvailable stays false: there is NO executable reset/delete API or submit. Raw/indirect row ownership, recoverable encrypted artifact with verified restore, maintenance/old offline-write exclusion, exact preview-bound final confirmation and atomic scoped execution/replay/rollback are not implemented. Shared company/catalog/users and other stores must remain protected. KAT Excel/button photos/new employee roster and concrete final destructive review remain pending; do not fix the obsolete test catalog or run transactions/reset for documentation. Central preparation-only guide: docs/installation/STORE_LIFECYCLE.md. Existing empty-store archive and exact KAT TEST company deletion stay separate and protected. Next action under this owner: implement and natively test complete dependency/recovery/fencing before enabling actual execution. No broad Gate or other assignment is closed.

18/10/2026 11:25 Europe/Athens — STORE-LIFECYCLE-01 / PREPARATION PREVIEW / EXECUTION STILL OPEN

Owner feat/store-cleanup-20261017 retained. ClaimPR2667/head80d774e6/docsCI39063665445 SUCCESS mergedf541505 before source. Current main87b28647 preserves newer company workspace, weekly report, assistant and inventory work. The earlier uncommitted preview was removed by workspace maintenance before publication; no source-release claim is made for that lost draft. This rebuilt increment is being tested independently.

Selected-store Super Admin «Εκκαθάριση / Διαγραφή» opens RESET/DELETE preparation preview only. Counts and declared FK dependencies run in explicit READ ONLY repeatable-read transaction with qualified quoted catalog identifiers and parameterized company/store values, bounded timeout and table limit. No ensure/bootstrap/audit writes or row/credential contents. Explicit prospective table classification distinguishes KEEP/REMOVE/REVIEW; new unknown tables always demand review. Reset keeps store identity, terminal/RBS/EFTPOS settings, connector registration, licensing and layout. Company/catalog/users and sibling stores remain outside direct scope. Active shifts/operators/connectors and unfinalized fiscal requests are shown separately. Actual mounted UI rejects mismatched scope/mode, discards old responses and supports retry via GET only.

executionAvailable is always false. No destructive API or submit exists. Recovery verification, undeclared/indirect dependency review and physical offline queues are unconditional unfinished checks. Fingerprint represents counts/mode only, not row freshness, an execution token or backup. Declared child list is not a complete raw-link graph. Store deletion and reset are NOT IMPLEMENTED; no operation is silently substituted by archiving, cancellation or fiscal replay. Local focused Node20:3PASS/0FAIL/2native infrastructureSKIP, no native/LAB PASS yet. Prepared full local Node20 suite:2914tests/2803PASS/0FAIL/111isolated-DB SKIP. Exact PR CI39111715107/head8c73e623 SUCCESS2921PASS/0FAIL/0SKIP plus6backup, Windows, Chromium and all real HTTP; new concurrent-main integration must pass its own exact CI before merge. The derived tracker PDF is retained from current main in this source integration to avoid repeatedly conflicting with other owners; regenerate the combined PDF in the release receipt. No PASS closure is made. Exact main CI and guarded release remain pending. Manuals remain unchanged until real acceptance.

Remaining whole task: complete scoped ownership/dependency manifest, encrypted durable recovery artifact plus isolated restore verification, maintenance/Writer/offline queue exclusion, exact preview-bound final confirmation, atomic RESET/DELETE with replay/rollback/concurrent-write safety, populated native multi-store controls and reviewed KAT action. New Excel/photos/employee roster remain pending; no existing store or company is deleted/reset by this work. Preserve prior USER evidence and all other owners. Next: publish exact green preview source; keep this owner for the destructive executor. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-store-lifecycle.md.

17/10/2026 22:41 Europe/Athens — STORE-LIFECYCLE-01 / ASSIGNED / NOT IMPLEMENTED / NOT TESTED

Owner feat/store-cleanup-20261017. Explicit owner request22:37–22:41: reusable Super Admin button for every selected store, with clean-start clearance and whole-store deletion; first intended target KAT before19Oct live start, new product Excel, physical button photos and new employee roster pending. This is feature implementation authorization, not approval of an as-yet unseen destructive production preview. No production deletion/reset performed.

Read-only main220ad4b: existing DELETE company/store only archives an empty store and rejects employees/schedules/activated terminals; permanent company deletion is exact KAT TEST allowlisted, never broaden it. New bounded scope: per-company/store read-only inventory/impact preview, explicit RESET vs DELETE semantics, owned dependency inventory and shared-data preservation, verifiable recovery artifact before destruction, exact preview-bound confirmation, active shift/session/Writer/inflight fiscal/offline queues guards, tenant/Super Admin isolation, atomic rollback/idempotency and independent other-store controls. RESET retains store identity/licensing/RBS/EFTPOS configuration and clear selected product/employee policy; DELETE removes selected store only, never parent company/shared products/users/supplier/catalog records. Unknown dependencies or cross-store references must block rather than cascade blindly. Preserve fiscal/printed receipt and bank history outside application; no replay/refund/cancellation.

Before code: merge this claim green; audit schema/raw tables/dependencies, backup/restore and existing routes. Native isolated PostgreSQL tests must exercise populated target plus sibling and foreign-company controls, stale preview/concurrency/rollback/replay/unknown references and authorization failures. Full PR/main CI and exact ordinary guarded release required. No new manual PASS until real accepted flow; broader Gate4/5/backup/other owners remain untouched. KAT destructive execution requires concrete reviewed preview after new Excel/photos/roster and explicit final confirmation. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-store-lifecycle.md.

17/10/2026 22:38 Europe/Athens — PLATFORM-COMPANY-LAYOUT-02 / ASSIGNED / AWAITING IMPLEMENTATION

Owner feat/platform-company-layout-20261017. User selected second visual proposal and explicitly requested implementation. Independent presentation-only scope in Platform Admin home: sidebar navigation, larger grouped top actions, one searchable company-card list and selected-company management panel; collect orphan utility launchers. Preserve every existing action, company/owner guards, AFM editor and terminal archive controls, actual same-company/store payloads, auth/licensing and existing modal implementations. No backend/schema/business mutations or actual save/archive/payment/stock action for diagnostics. All wider TODAY-04, installation, assistant, remote, inventory owners retain their scopes. Baseline b1fd15f; existing screenshot shows duplicated company listings and cramped actions. New layout NOT TESTED; mockup is not acceptance. Claim must merge green before source. Require mounted navigation/selection/search/action tests, production build, full PR/main CI and ordinary guarded exact revision before USER visual acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-platform-company-layout.md. Next: implement the approved second layout after claim merge.

17/10/2026 22:29 Europe/Athens — COMPANY-TAX-EDIT-01 + TERMINAL-DELETE-01 / LIMITED USER UI CONFIRMATION

The owner replied «EINAI OK» after the company-details and terminal-delete controls were released and their navigation explained. Record this as limited user-reported UI acceptance only. The awaiting-confirmation slice for appearance of these controls is closed; no further UI-appearance retest is required. This does not establish any actual AFM value/save, terminal archive, persistence, financial or stock delta. Those business-write effects remain NOT TESTED; do not replay or delete anything to manufacture evidence.

Retained owner fix/company-tax-terminal-delete-20261017. Source PR2656 / deployed revision88579d6326fa444e20abed02231a1069c341f438, full PR/main2902PASS/0FAIL/0SKIP plus6backup and guarded Render39061606272 remain separate technical evidence. The user's device revision was not independently captured. Wider #02/#36 and installation/KAT/remote owners remain unchanged. Only a separately reported legitimate future save/archive can establish persistence acceptance. Checkpoint: CHECKPOINTS/CHANGES/2026-10-17-company-tax-terminal-delete.md. Earlier AWAITING USER entries are historical for UI appearance only.

18/10/2026 12:38 Europe/Athens — INVENTORY-SUPPLIER-LINK-MERGE-01 / LIMITED USER PASS / CLOSED PREVIEW BLOCKER

Owner fix/inventory-supplier-link-merge-20261017. User replied «EINAI OK» after the delivered same-supplier correction and instruction to refresh the original selected-store preview. Record LIMITED USER PASS only for removal of the false same-supplier/identical-code preview blocker. This supersedes AWAITING USER PREVIEW for this bounded correction; no further repeat preview is requested. User browser, role, terminal and client revision at confirmation were not independently captured. No final production merge, stock delta, payment effect or physical acceptance is inferred.

Delivered source PR2664/merge9c515f0d24b9350f52ebc6ca8242a97de265955b, full PR39063780880 and main39064230665 SUCCESS2906PASS/0FAIL/0SKIP plus6backup; guarded Render39064604619, deployment dep-db9t673rjlhs73834il0 LIVE17Oct19:59:55UTC, independently exact healthy17Oct23:00/23:06Athens. Receipt PR2672 merged d1d77878. These are historical release observations, not an independent measurement of the user's client on18Oct.

Manual docs/manual/inventory/PASS.md records the accepted preview flow and review limits. Different nonblank codes or third-product learning ownership remain review blockers. Selected survivor/retail choice is retained by the delivered source; no new price change or data mutation was performed for this receipt.

No invoice/payment/stock transaction is repeated for evidence. Broad measured merge/physical acceptance remains OPEN with feat/inventory-bulk-vat-20261015; overall INVENTORY-ADV/printed39/Gate2 remain unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-supplier-link-merge.md.

17/10/2026 23:00 Europe/Athens — INVENTORY-SUPPLIER-LINK-MERGE-01 / HISTORICAL SOURCE LIVE / SUPERSEDED BY USER PASS18OCT

Retained owner fix/inventory-supplier-link-merge-20261017. ClaimPR2662/head7c9270a7/docsCI39062553215 SUCCESS merged74ebf744 before source. SourcePR2664/finalhead2d549211d5e53ef5251d2d2bf159f33393447d9d/fullPRCI39063780880/job117487134485 SUCCESS2906PASS/0FAIL/0SKIP plus6backup; merged9c515f0d24b9350f52ebc6ca8242a97de265955b. ExactmainCI39064230665/job117488470557 SUCCESS same2906/0/0+6backup, native PostgreSQL, Windows, browser/build/invariants and real HTTP checks. Earlier36c408e3/39062754920 and9d78f745/39063254311 also passed2906/0/0; only docs-only concurrent confirmation/layout claims caused merge conflicts, resolved without changing any of the four accepted runtime/test blobs or weakening assertions.

Ordinary guarded Render39064604619/job117489523348 SUCCESS, pinned9c515f0d. Renderdep-db9t673rjlhs73834il0 LIVE19:59:55UTC; independent no-cache public health at23:00Athens exact9c515f0d/oktrue/version0.22.0+kat-test-pos. No manual deploy, migration, repair or safeguard bypass. Newer independent Platform layout/assistant/weekly-report claims and runtime work are preserved, not attributed to this scope.

Identical/blank normalized supplier codes now coalesce to one canonical link per supplier, preferring the selected survivor and retaining the one known raw code and active union. Redundant source links retain their original IDs/product/code/provenance as inactive history; no deletion. All existing learning rows move to survivor while code, units, cost, usage and IDs remain unchanged. Selected retail price is retained. Different nonblank codes, leading-zero differences and same-company third-product learning ownership remain explicit review blockers. Tenant/store/role,24h, pending originals/counts/orders/fiscal work, posted-source proof, serializable preview/hash, rollback/retry/replay, stock and historical document invariants remain.

Native actual four-card preview/confirm tests prove same-supplier coalescence, survivor1.50price, blank/different code checks, third-card refusal, stale link rejection, full link/mapping rollback, concurrent-sale/stale-stock refusal, once-only concurrent replay, retained source documents/lines/posting, foreign mapping/control and learning economics. Local Node20 planning4PASS plus price1PASS/0FAIL/1native infrastructureSKIP are distinct from full nativeCI. These fixtures do not establish a production stock/financial PASS.

Actual new hosted original-pair preview/final merge NOT TESTED; no diagnostic production link/mapping/product/price/stock/payment/invoice/shift write or accepted transaction replay was submitted. Original requested survivor/retail remains the user's choice; no real identifying business values/codes/screenshots published here. Same owner retains this new preview acceptance. Old historical-source blocker's21:54 USER confirmation is closed separately with limited manual instructions and no inferred final merge. No new manual PASS for this supplier-link implementation; original measured merge/physical owner stays unchanged.

Single next action: user requests a fresh preview for the same selected-store pair and chosen survivor, checks current price/barcodes/net stock, then explicitly reviews any final confirmation. Do not replay the invoice or force a third-card/different-code conflict. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-supplier-link-merge.md.

17/10/2026 21:54 Europe/Athens — INVENTORY-POSTED-SOURCE-BLOCKER-01 / LIMITED USER PASS / CLOSED BOUNDED BLOCKER

Owner explicitly replied «NAI EINAI OK» after the refreshed original-pair preview instructions. Record only USER confirmation that an already posted POS source no longer blocks preview. Source4490e075 had independently verified healthy release21:46; user's own client SHA/browser/role was not independently measured at confirmation. No executed final merge or measured stock/payment/control effect is inferred. The later different supplier-link blocker is a separate new case, not a reopening of this accepted historical-source correction. Remove this bounded residual from pending and synchronize tested preview instructions in docs/manual/inventory/PASS.md plus numbered39/PDF. Original feat/inventory-bulk-vat-20261015 actual merge/bulk/physical acceptance remains OPEN. No old transaction or accepted merge is replayed for evidence.

17/10/2026 — INVENTORY-SUPPLIER-LINK-MERGE-01 / TWO FULL NATIVE CI RUNS PASS / RECORD SYNC

Retained owner fix/inventory-supplier-link-merge-20261017. Original36c408e3/full39062754920/job117484025147 and combined9d78f745/full39063254311/job117485561246 both SUCCESS2906PASS/0FAIL/0SKIP plus6backup/all required native/Windows/browser/build/invariants/HTTP checks. All four owned runtime/test blobs identical between these accepted runs. A new docs-only Platform layout claim220ad4bb touched the three shared records and conflicted with top-inserted progress. Preserve that claim and position this progress beside this scope's own existing claim instead of the global record boundary, avoiding repeated prefix conflicts. No runtime/test guard change or weakened assertion. New combined head gets required CI before merge; production merge and new USER acceptance remain NOT TESTED.

17/10/2026 — INVENTORY-SUPPLIER-LINK-MERGE-01 / IMPLEMENTED / AWAITING NATIVE CI + RELEASE

Owner fix/inventory-supplier-link-merge-20261017. ClaimPR2662/head7c9270a7/docsCI39062553215 SUCCESS merged74ebf744 before source. Plan canonical per-supplier link with survivor preference; identical/blank normalized code coalescence preserves known raw code, leading zero identity and active union. Redundant source rows retained inactive with original IDs/product/code/provenance, not deleted; existing mapping rows move to survivor without altering learning economics/IDs/units/usage. Distinct codes and third-product learning ownership conflicts remain explicit blockers. Selected price/stock/history/posted-source/24h and other existing guards unchanged. Existing serializable/hash/audit/replay transaction covers every link/mapping write.

Pure Node20 planning4PASS plus existing price1PASS; native1infrastructureSKIP locally. Extended actual native four-card preview/confirm/replay/rollback/concurrent-sale fixture adds repeated supplier links, inactive survivor activation, missing/identical/different codes, third-card ownership refusal, stale link rejection, retained historical rows and learning economics/foreign controls/selected1.50price. Existing financial/stock/history assertions preserved. Mandatory full PR/mainCI and ordinary exact guarded release pending; new actual USER/LAB behavior NOT TESTED. No production merge or data repair. Prior posted-source limited USER confirmation21:54 still requires synchronized final manual/PDF receipt; no inferred successful final merge. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-supplier-link-merge.md. Next fullCI/exact release then original selected-pair preview only.

17/10/2026 22:25 Europe/Athens — INVENTORY-SUPPLIER-LINK-MERGE-01 / ASSIGNED / USER FAIL

Owner fix/inventory-supplier-link-merge-20261017, explicitly requested continuation of this page's17Oct authorized merge correction. Bounded new same-supplier/identical-code collision only; original feat/inventory-bulk-vat-20261015 measured merge/bulk/physical acceptance remains unchanged. Read current main0c9f13ae, AGENTS, active/tracker/pending/numbered/inventory manual, source and history. No competing claim for this new blocker. Prior posted-source correction USER confirmation21:54 is scoped to absence of that false blocker, not an executed merge or stock/payment proof; its final manual/PDF receipt will be synchronized with this continuation.

Observed screenshot USER FAIL: two selected cards have same supplier; targeted read-only lookup confirms identical stored supplier code on both, with existing learning mapping on a source. No real identifiers/codes/business values published here. User explicitly selected survivor/retail; those are never repriced. Existing code blanket-blocks repeated supplierId and would violate company/supplier/product unique link if the blocker were simply removed.

Correction boundary: plan one canonical link per supplier, prefer survivor's existing link, allow zero/one distinct nonblank normalized code, retain identical code and active union. Preserve redundant source links as inactive historical rows instead of deleting them; move all existing learning mappings to survivor. Distinct nonblank codes remain an explicit review blocker in this bounded delivery; do not invent/drop aliases or alter source invoices. Same-company third-product learning ownership conflicts remain blocked. Keep serializable/hash/replay/audit/stock/history, tenant/store/role, original price and every other pending-work guard.

Require pure planning cases and native actual preview/confirm/retry/rollback, same/blank/different codes, third-product conflict, stale link update, source mapping economics/IDs/history and control preservation. Full PR/mainCI and ordinary exact guarded deployment before USER acceptance. Current behavior USER FAIL; new implementation/LAB NOT TESTED. No production merge/link/code/mapping/stock/payment/invoice mutation or accepted transaction replay for diagnosis. Claim must merge green before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-supplier-link-merge.md. Single next action: implement this bounded identical-code link coalescence after merged claim.

17/10/2026 22:20 Europe/Athens - COMPANY-TAX-EDIT-01 + TERMINAL-DELETE-01 / SOURCE LIVE / AWAITING USER

Retained independent owner fix/company-tax-terminal-delete-20261017. ClaimPR2652 final62f86a0785c03e1d8f2592dc6b208cb93e7a3729/docsCI39059481935 applicable jobs SUCCESS merged66235c43152c9b649dfbfec65605e58ff8a36afa before source. SourcePR2656/headd15d30c19b6c5a16df9d986c3aa564d0d204f0c6 merged88579d6326fa444e20abed02231a1069c341f438. Full PRCI39060843758/job117478384709 and mainCI39061196187/job117479436269 SUCCESS: PR/main2902PASS/0FAIL/0SKIP plus6backup, native PostgreSQL, Windows, security/licensing, real HTTP/browser, build/TABLE_SERVICE and invariants. Ordinary guarded Render39061606272/job117480579555 SUCCESS; independent public health oktrue/exact88579d6326fa444e20abed02231a1069c341f438 confirmed. Public served-asset check inspected7JSassets and found the new company identity, terminal confirmation and expectedTaxId markers; this is source availability, not authenticated UI or actual save/delete PASS. Initial native39060435930/job117477214970 had2897PASS/1FAIL/0SKIP solely because the uniqueness refusal assertion expected English wording; actual Prisma P2010/PostgreSQL23505 protected the ID. Assertion now checks exact codes, with the duplicate INSERT and all guards retained. Final full CI above is authoritative; no runtime bypass. No manual deploy, dispatch or safeguard bypass.

Company identity control: existing owner-company card -> Στοιχεία εταιρείας. Fill missing nine-digit AFM including leading zero, confirm intended company, save same company ID/name/AFM with expected prior values; stale or duplicate AFM refuses. Existing nonempty AFM stays fixed; changing to another legal business is outside this bounded editor. Same-AFM editor updates serialize and Audit records before/after atomically. Existing legacy company creation is unchanged; this is not a universal migration/uniqueness assertion over those APIs. Stores, owners, documents, credentials, licenses and business history remain unchanged.

Terminal control: Installation/Terminals -> inactive registration -> Διαγραφή -> explicit confirmation. Archives selected same-company/store registration, hides current listing, clears activation and keeps unique Terminal ID/history. Active registration, normalized OPEN shift or active fiscal mapping refuses. Repeated archive is idempotent; audit failure rolls token/tombstone state back. Archived rows cannot re-enable or rotate activation, and rotate checks again on UPDATE. Existing historical shifts/documents and control store, equipment/Writer/session/payment behavior retained; no automatic device remapping, physical restart or reuse of an old Terminal ID.

Local Node20 focused18total:13PASS/0FAIL/5native infrastructure SKIP; full2890total:2781PASS/0FAIL/109infrastructureSKIP. Production frontend/TABLE_SERVICE build PASS. Actual mounted components verify AFM/snapshot payload, confirmation, stale refusal, StrictMode/current save, company-change/unmount late completion, active delete disabled, cancel/Escape/focus, inline server refusal and scoped DELETE. Native actual production DDL/services/registered HTTP prove role/store isolation, stale/duplicate/concurrent editor writes, before/after Audit, idempotent archive, OPEN-shift/fiscal guards and complete rollback/history/control preservation. No reduced assertions or skipped native checks accepted in full CI. Initial UI test file command used wrong directory and was corrected before the complete mounted run.

No real company AFM value supplied or saved, no real terminal deleted/archived, no financial/stock/shift/fiscal/Writer action or business replay. No new LAB/USER/manual PASS from CI or served assets. Actual hosted edit/delete acceptance remains NOT TESTED; do not delete the screenshot terminal for documentation or silently assign a guessed AFM. Same owner retained for these two new controls; existing installation/KAT/EFTPOS/remote/session/inventory/invoice owners retain their wider scopes.

Single next action: user refreshes canonical Platform Admin, opens intended existing company's Στοιχεία εταιρείας and confirms correct target/fields; inspect Διαγραφή on intended inactive terminal and its confirmation. Cancel if actual AFM or intended removal is not confirmed. Any actual save/removal must be a deliberate legitimate user action; no real deletion needed to manufacture a PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-company-tax-terminal-delete.md.

17/10/2026 22:12 Athens — VOICE-ASSISTANT-01 / PLAIN TOTAL SALES SOURCE LIVE / DISPLAY RETEST SUPERSEDED BY 22:23 OBSERVATION

Retained owner codex/assistant-business-queries-20261015. ClaimPR2655/final docsCI39059996863 SUCCESS merged e200c889 before edits. SourcePR2657/head8cac59c335f01c73a4d530bbc4ec38471a52b685 merged f3245f6f9ed9a252f0ce4f4a28934e5152f55422. Exact full PRCI39060263038/job117476685633 and mainCI39060704633/job117477990191 SUCCESS:2894PASS/0FAIL/0SKIP plus6backup, all required Windows/security/licensing/native SQL/browser/build/invariants/archive/HTTP. Ordinary guarded Render39061125317/job117479164426 SUCCESS, expected revision f3245f6f (workflow metadata head6454e534 is a documentation descendant). Independent no-cache public health22:12:37Athens confirms oktrue/exactf3245f6f. No manual deploy/hook/guard bypass. Newer unrelated main88579d6 retains unchanged owned assistant source; other owner work preserved.

The exact plain «ΠΩΛΗΣΕΙΣ ΣΗΜΕΡΑ» now has deterministic canonical all-product sales analysis, also narrow explicit yesterday/turnover variants and optional complete-request export token. Uses existing authorized selected/all UI scope, canonical calculation, reversal/credit/future handling, caps, privacy projection and export replay. No catalog match or cash/closed-shift substitute. Additional product/payment/actor/inherited filters do not take this shortcut; provider tool enum unchanged and injected all mode rejected. Failed or capped/unavailable sources are not zero; only a validated complete empty source can yield zero. No SQL/formula/auth/license/module/key/provider/model/schema/business change in this fix. No general daily/weekly/monthly phrase or payment-breakdown acceptance is implied.

Final Node20 focused21total/20PASS/0FAIL/1native infrastructureSKIP, final local full2887total/2783PASS/0FAIL/104infrastructureSKIP and client production build PASS. Both exact native CI runs above include the unskipped actual dispatcher + canonical PostgreSQL reader on mixed-unit selected-store completed sale/return, excluding credit/open/future/foreign/control rows. Existing filtered/category/offer/private/scope tests preserved. Strict parser checks Athens midnight/yesterday, extra/inherited filters; actual session replay reauthorizes all-product ticket source and denies revoked access. Controlled before-path reproduction emitted sourceUnavailable without a read; exact-window production logs returned no records, so no production tool-call/DB-error trace is claimed.

Actual reported21:48 Super Admin/Diadoxou failure remains AWAITING RETEST until the normal user question returns sourced evidence and is compared to the same normal sales report/time. No authenticated post-release hosted query or actual all-product file-content/Owner/mobile PASS yet; cloud browser is at canonical sign-in wall. Current-day totals are as-of a read during ongoing business, not a final financial balance. User screenshots also show new composer and Copy control, not proven Enter/clipboard interactions. No new manual PASS from CI. Whole VOICE OPEN/ASSIGNED: retain previous direct transfer CSV USER PASS2631, original two-line reconciliation2617 and chat release2644/2646; short-follow-up CSV, other formats, real microphone unavailable, persistent history/general names/live ambiguity/wider domains remain open. No production financial/stock/fiscal/shift mutation or replay. Next single action: refresh normal Super Admin, explicitly select Diadoxou, repeat «ΠΩΛΗΣΕΙΣ ΣΗΜΕΡΑ» and capture the actual answer; compare only read-only source, do not create a new sale.

17/10/2026 21:46 Europe/Athens — INVENTORY-POSTED-SOURCE-BLOCKER-01 / SOURCE RELEASED / AWAITING USER PREVIEW

Owner fix/inventory-posted-source-blocker-20261017 retained for this bounded correction. Explicit transfer from feat/inventory-bulk-vat-20261015 authorized17Oct21:27; claimPR2648/head7d442ea8/docsCI39058241666 SUCCESS merged1b72f345 before source. Original measured bulk-save/identical-product merge/physical acceptance remains with feat/inventory-bulk-vat-20261015; no broader takeover.

SourcePR2649/finalheadbc57152532329cf36a2869dc49b033ea6354920a merged4490e075b7df97c81f7a6127f202b98fd69b1f19. Full PRCI39058425003/job117471185777 and exactmainCI39058866138/job117472588843 SUCCESS:2889PASS/0FAIL/0SKIP plus6backup, Windows, build, native PostgreSQL, Chromium, invariants and real HTTP flows. Native new negative matrix and actual transactional four-card merge/rollback/replay/stale-proof tests ran without skips. Local Node20 syntax/import1PASS/0FAIL/2native infrastructureSKIP is retained separately, never called LAB PASS.

Ordinary guarded Render39059268931/job117473725600 SUCCESS, actual pin4490e075 (workflow wrapper158b865e is a newer docs-only head). Renderdep-db9s3dk9v7es738th23g LIVE18:45:41UTC; independent no-cache public health exact4490e075/oktrue/version0.22.0+kat-test-pos observed21:46Athens. No manual deployment, migration, repair or guard bypass. Concurrent EFTPOS UI acceptance and unknown-scan claims preserved.

The pending-draft check now excludes only a reciprocal POS_OCR_DRAFT source whose FINAL/INVOICED same-company/store order has a company-owned posting to an APPROVED same-store document. Actual read-only target diagnosis confirms both source types and complete posting proof. Status alone, missing/foreign/wrong-store/nonreciprocal or unapproved links still block; independent genuine drafts and every other existing merge blocker remain. Confirmation repeats the query inside the existing serializable/hash/replay transaction. No source status, invoice line/product identity, payment, quantity, approval or posting is rewritten. Existing stock-posting guards continue to reject source reapproval. Original sources and historical lines remain after native merge, with one invoice posting.

Actual hosted original-pair preview/final merge NOT TESTED. Fresh canonical Platform Admin browser reached ordinary sign-in wall; no credentials requested/entered, no authenticated acceptance or bot-block claim. No production product merge or financial/stock/shift action was performed. No new manual PASS; previous limited preview and all other owners/PASS remain. Updated numbered39 note and canonical tracker/numbered PDFs only report source release, not business completion.

Single next action: authorized user refreshes selected-store inventory, selects the original pair and chosen survivor, opens preview only, and confirms the false historical-draft blocker is gone while reviewing current prices/barcodes/net stock. Final production merge remains the user's explicit reviewed action; do not replay the invoice or merge a different sample to manufacture acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-posted-source-blocker.md.

17/10/2026 — INVENTORY-POSTED-SOURCE-BLOCKER-01 / IMPLEMENTED / AWAITING NATIVE CI

Owner fix/inventory-posted-source-blocker-20261017. Explicit bounded transfer claimPR2648/head7d442ea8/docsCI39058241666 SUCCESS merged1b72f34585447b52d264ffa3850556c93c4d7d5d before source. Existing merge draft blocker now uses a read-only query excluding only reciprocal POS_OCR_DRAFT originals whose FINAL/INVOICED same-company/store order has a same-company posting to an APPROVED same-store document. No source-status repair, approval, posting, payment, quantity or history rewrite. Genuine/missing/foreign/wrong-store/unapproved links remain blockers; confirmation repeats this check inside existing serializable transaction.

Added native SQL negative matrix and read-only snapshots; extended existing actual preview/four-card confirm/replay/rollback/concurrent-sale test with historical posted source and stale approved-proof rejection. Original stock/history/control assertions retained. Local Node20 syntax/import checks:1PASS/0FAIL/2native infrastructureSKIP, not a new business PASS. Mandatory full native PR/mainCI and ordinary exact guarded release pending. Actual user pair preview/merge remains NOT TESTED; do not confirm production merge for diagnostics. No new manual PASS. Original broad acceptance owner unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-posted-source-blocker.md. Next fullCI, exact release, then safe original selection preview.

17/10/2026 21:27 Europe/Athens — INVENTORY-POSTED-SOURCE-BLOCKER-01 / ASSIGNED / USER FAIL

ΑΝΑΛΗΨΗ ΑΠΟ feat/inventory-bulk-vat-20261015 — ASSIGNED fix/inventory-posted-source-blocker-20261017 for this bounded new false-draft blocker only, explicitly authorized by owner in chat at21:27. Original measured bulk-save/product-merge/physical acceptance remains with feat/inventory-bulk-vat-20261015; no broader transfer or duplicate engineering.

Read-only diagnosis: an INVOICED purchase order retains its reciprocal POS_OCR_DRAFT source PurchaseDocument in DRAFT while PurchaseOrderPosting points to a separate APPROVED document in the same company/store. Current inventory merge preview treats the historical source as pending work, despite the completed posting. Real identifying invoice/store/product values stay outside repository records. No production write or merge occurred. This is USER FAIL plus read-only diagnosis, not LAB PASS.

Bounded correction: recognize only proven completed reciprocal POS source links with FINAL/INVOICED order, company/store-scoped posting and APPROVED posted document; retain genuine drafts, missing/wrong/foreign/partial links, all other pending-work blockers, tenant/role/store guards and serializable/hash/replay/history semantics. Never mark source APPROVED automatically, replay posting or change payment/quantity/stock for diagnosis. Existing assertInvoiceStockAvailable independently refuses legacy order/source reapproval. Required native real SQL preview/confirm coverage, negative links/stale-preview/replay and retained stock/history/control assertions; full PR/main CI and exact ordinary guarded release before user acceptance. Actual new LAB/USER behavior NOT TESTED.

Baseline main bd025038d451811c0eb933a575b43264b0df26dd; current served revision16439266bcfc55c9338525507265bd949b30afce. Read AGENTS, active/tracker/pending/numbered and inventory manual/15Oct merge checkpoint; prior24h preview and all unrelated owners/PASS protected. Source changes only after this claim is merged green. No new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-inventory-posted-source-blocker.md. Single next action: merged claim, bounded source/native tests, exact release, then read-only original pair preview without confirming a production merge.

17/10/2026 20:46 Athens — VOICE-ASSISTANT-01 / CHAT USABILITY SOURCE LIVE / AWAITING READ-ONLY UI ACCEPTANCE

Retained owner codex/assistant-business-queries-20261015. ClaimPR2643/head6bbe2be4/docsCI39053678172 SUCCESS applicable jobs, merged250bb5af before source. SourcePR2644/head01605e2a9e2ef49821f6c06523829932d33e834b merged 4107f25df172d05e394c9866c297c5f5d4003d4e. Full exact PRCI39054112398/job117458551773 and mainCI39054550934/job117459838595 SUCCESS:2883PASS/0FAIL/0SKIP plus6backup, required Windows/security/licensing/real SQL/browser/build/invariants/archive/HTTP. Ordinary guarded Render39054959945/job117460978231 SUCCESS. Independent no-cache public health20:46:06Athens confirms oktrue and exact4107f25d. No manual deploy/hook/guard bypass.

Existing full chat page now adds mobile conversation drawer, create/select same-session threads with focus/Escape control, desktop Enter submit with Shift+Enter/IME229/mobile newline protection, explicit cancellation via existing AbortController/generation checks, answer-text copy with success/refusal feedback, expanding composer/count/keyboard hints. Existing eight-thread/forty-message in-memory cap remains; persistent cross-login chat storage is not implemented. Same selected-store/session/capability reset, Owner export entitlement, evidence validation and export reauthorization preserved. No attachment-upload support or new business-domain/AI capability is implied by these UI controls. No server/config/model/provider/key/auth/license/schema/business change.

Final Node20 local focused26/0/0 and final full2876total/2773PASS/0FAIL/103infrastructureSKIP, client build and server preparation PASS. Initial full2772PASS/1FAIL/103SKIP exposed only missing new icon names in existing isolated CommerceHub fixture; added those imports to its icon stub, retained every assertion, reran complete local suite and exact native PR/main suites above. New mounted regression covers composition/newline/submit, clipboard success/denial, request signal abort and ignored late answer, drawer create/select/Escape; old tests preserve scope/session late reports/files and Owner export absence. These are synthetic tests, not actual operator/mobile acceptance. Local Chromium archive installation unavailable; hosted tab is at normal canonical Platform Admin sign-in wall, so no authenticated new UI or physical microphone PASS is claimed. No credential automation or browser restriction bypass.

Protected prior direct complete-question CSV content USER PASS PR2631/7a2b8585 and original two historical transfer-line reconciliation PR2617/f36488a2 remain complete in their exact scopes; no replay. Whole VOICE remains OPEN/ASSIGNED. Current residual: read-only acceptance of new desktop controls and actual mobile drawer, distinct short-follow-up CSV file bytes after changed filters, other formats, microphone/mobile audio (user has no microphone), persistent history, general Greek endings/spelling/live ambiguity and wider advanced domains. No new manual PASS from CI. Other owners untouched. Next single action: refresh normal Super Admin Backoffice, open assistant for explicitly selected LAB, send one existing read-only question with Enter, inspect copy/new-thread controls and provide final screenshot; no sale/payment/stock/fiscal/shift mutation.

17/10/2026 21:36:49 Europe/Athens — EFTPOS-CENTRAL-SETUP-01 / LIMITED USER UI ACCEPTANCE

Owner feat/eftpos-central-setup-20261017 retained. Owner explicitly replied «ΣΥΝΕΧΙΣΕ ΕΙΝΑΙ ΟΚ» after instructions to select KAT-POS-01/KENTPIKO, edit device names, select immediate second EFTPOS, save mapping and refresh POS. Record limited owner-reported acceptance of the settings/UI flow only. The21:22 screenshot independently showed KAT terminal management and the new first/second transaction-mode fields, with no terminal selected at that moment; it is not a saved-value readback. Exact final names, selected mode/terminal, independent persistence and deployed revision on the owner's browser were not shown in the final confirmation. Do not infer them. Released source PR2645/healthy16439266bcfc55c9338525507265bd949b30afce and CI2888/0/0 remain the separate software evidence. No new sale/card approval/receipt, financial/stock/Audit delta, Windows-login startup or all-four-device physical PASS is claimed. No repeat transaction or restart requested for documentation.

Close only the awaiting owner UI/settings confirmation for this flow. Keep physical per-register/EFTPOS behavior, any unmeasured persistence, Windows startup/recovery and broader Gate4/other owners OPEN.

No agent production configuration, credential, Writer/service, payment, fiscal, stock or shift write. Verified usage/troubleshooting and boundaries are recorded in docs/manual/pos/PASS.md and central guide docs/installation/RBS_STORE_SETUP.md. No additional code change follows from this acceptance.

17/10/2026 — EFTPOS-CENTRAL-SETUP-01 / SOURCE LIVE / AWAITING KAT ACCEPTANCE

Owner feat/eftpos-central-setup-20261017 retained. Source PR2645 finalheada0ef7a6a808bc0b3c6c4665c12a85dc8bfae84aa/fullCI39055573404/job117462860655 SUCCESS2888PASS/0FAIL/0SKIP plus6backup, Windows, Chromium, build, invariants and real HTTP including per-register name/mode persistence, legacy omitted-mode preservation, terminal/auth isolation and unchanged signed Writer binding controls. Concurrent assistant code/release docs were preserved by explicit merges; runtime source was unchanged by the final documentation merge. Merged16439266bcfc55c9338525507265bd949b30afce has identical accepted treea3cfc0681b184b8a5a2963228926117fca285b83. ExactmainCI39056004760/job117464107142 SUCCESS2888/0/0 plus6backup and all HTTP. Ordinary guarded Render39056445724/job117465301674 SUCCESS; independent browser /api/health returned oktrue/version0.22.0+kat-test-pos/exact16439266bcfc55c9338525507265bd949b30afce. No manual deploy or guard bypass.

Central usage: Platform Admin → selected company/store → Installations/Terminals → POS→Register→EFTPOS; choose POS, enter each device display name and IMMEDIATE/DEFERRED mode, Save mapping, then refresh the POS. For new installations, use the central RBS guide and confirmed per-POS payment codes/folder before downloading its package. The timing setting describes the actual RBS payment-code behavior; it does not reprogram physical equipment. Existing mappings retain their legacy mode until explicitly changed. New names/modes and installer instructions are SOURCE LIVE / AWAITING LAB, not new physical PASS. No production mapping/settings, pairing, credential, Writer/service, shift, sale/payment/stock or fiscal action was performed. Prior limited KAT connector/session USER PASS remains recorded separately and is not repeated. Existing Gate4/other owners retain their unverified scopes.

Next: owner configures desired names/modes for the intended register, confirms correct choices at POS, then performs only the separately measured physical acceptance that remains necessary. Never replay an old paid request to document it. Central RBS instructions: docs/installation/RBS_STORE_SETUP.md and the in-app setup details. No further code change is required to record a first owner UI observation.

17/10/2026 — EFTPOS-CENTRAL-SETUP-01 / SOURCE IMPLEMENTED / AWAITING CI, RELEASE AND LAB

Owner feat/eftpos-central-setup-20261017; release branch feat/eftpos-central-release-20261017. Claim PR2642 merged4ad73cc before source. Per-register EFTPOS display names and independently selected IMMEDIATE/DEFERRED modes now feed authenticated POS card choices. Existing null modes retain STORE immediate / second deferred. Explicit modes stay independent of payment-device slot: secondary immediate still uses confirmed second RBS payment code, primary deferred uses primary code. Server rejects changed/forged mode before command creation; pending request keeps frozen checkout channel. Company/store/terminal guards, exact device binding, existing online routing and legacy nonfiscal counter path preserved. Omitted mode on old mapping callers preserves stored value. Central per-register instructions are in RBS setup and docs/installation/RBS_STORE_SETUP.md; correct .cmd/.ps1 and single explicit Start guidance.

Local Node20 targeted routing/code checks41PASS, mounted POS/scanner/change-notice/last-amount18PASS including actual named immediate-second submission; production build PASS. Initial full local run overlapped Prisma generation (environment import failures) and was stopped. Prepared full run identified2 source-shape assertions and9 stale mounted endpoint mocks; corrected to current API without removing financial/scanner assertions. Focused corrected channel/terminal12PASS. Prepared complete local Node20 suite: 2880 tests / 2777PASS / 0FAIL / 103 isolated-DB SKIP. All18 mounted UI checks PASS. Exact PR CI39054987319/head48e351de SUCCESS2888PASS/0FAIL/0SKIP plus6backup and all Windows/browser/realHTTP flows. Initial

exactheadf6d9e25 CI39054472726 also SUCCESS2887/0/0 plus6backup. Only concurrent assistant release documentation5676d90 is being reconciled; runtime source unchanged from the accepted48e351de tree. Exact guarded release pending, new physical modes NOT TESTED. No production settings, credentials, service, fiscal/payment/stock/shift action or replay. Other owners/assistant claim2643 retained.

17/10/2026 — RBS κεντρικός οδηγός / LIMITED USER PASS σύνδεσης KAT

Κεντρική διαδικασία: docs/installation/RBS_STORE_SETUP.md. Σωστή εταιρεία/κατάστημα, ενεργό POS→RBS→EFTPOS mapping, πραγματικοί RBS codes/folder, χωριστό πακέτο και ζεύξη ανά POS στον τελικό Windows χρήστη, έλεγχος, μία εκκίνηση και ONLINE. Ο ιδιοκτήτης επιβεβαίωσε σύνδεση/φάκελο και εκκίνηση KAT-POS-02 (ONLINE10:22:02), έπειτα KAT-POS-01 (φωτογραφία Connector KAT-POS-01/PASS authentication/folder, heartbeat14:02:33, «Είναι οκ»14:06 Athens). LIMITED USER PASS σύνδεσης μόνο, όχι μετρημένα οικονομικά/stock/Audit ή Windows-login startup. Source PR2637/healthy d4e130778d6c7cf6479180285a46678d877013d6, τοπικό hash πακέτου δεν ταυτοποιήθηκε. Owner13:33 «Ειναι οκ» καταγράφει περιορισμένη αποδοχή session logoutPOS02→loginPOS01 PR2640/healthy a1a4a333514a1ae024bbfdc03465124417800fc9. Κλείνει μόνο η αναμονή αυτών των επιβεβαιωμένων σκελών. Δεν επαναλαμβάνονται πληρωμές για καταγραφή. Windows startup/recovery, γενικό Gate4 και EFTPOS-CENTRAL-SETUP-01 modes/ονόματα μένουν ανοικτά στους υπάρχοντες owners. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-eftpos-central-setup.md. Ο οδηγός περιγράφει υπάρχουσα ροή, όχι νέο physical PASS κάθε RBS.

17/10/2026 14:12 Europe/Athens — EFTPOS-CENTRAL-SETUP-01 / ASSIGNED / NOT TESTED

Owner feat/eftpos-central-setup-20261017. Explicit owner request: per-register EFTPOS display names and independent immediate/deferred configuration shown in POS; reusable selected-register installer for all existing/new stores. Preserve tenant/module/terminal/device binding, fiscal codes, idempotency, existing delayed routes until explicitly configured. No production business/schema/settings changes or replay. Other owners retained. Claim before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-eftpos-central-setup.md. Native CI, exact guarded release and real acceptance required; not physical PASS.

17/10/2026 13:28 Europe/Athens — POS-TERMINAL-SESSION-01 / SOURCE LIVE / AWAITING KAT USER ACCEPTANCE

Owner fix/pos-terminal-session-20261017 retained. ClaimPR2639/docsCI39022660271 SUCCESS mergedec93f983 before source. Final sourcePR2640/headf9853bc73434ccf0b8651155b6d6ec8a6f20f832/fullCI39024153301/job117371787405 SUCCESS2882PASS0FAIL0SKIP plus6backup, Windows/Chromium/build/invariants/all realHTTP flows. Mergeda1a4a333514a1ae024bbfdc03465124417800fc9 has identical tested tree02fb8d3aaaccba1867136e6cb523a04565011575. ExactmainCI39024492970/job117372759979 SUCCESS2882/0/0 plus6backup and fullHTTP. Ordinary guarded Render39024857476/job117373764599 SUCCESS, exact healthy10:28:21UTC; independent /api/health returned oktrue/version0.22.0+kat-test-pos/exacta1a4a333514a1ae024bbfdc03465124417800fc9. No manual deploy/guard bypass/migration/direct production reset.

Proven mounted HTTP root cause: logout omitted storeId and outer requireStoreModule rejected400 before auth/logout; previous UI silently erased local retry credentials. Actual client now sends its session.store.id, preserves retry state with visible error on transient failure, and clears on successful or explicit revoked/expired session. No module/tenant/auth guard bypass. Terminal advisory lock serializes pre-shift PIN/card admission; other active operator receives409. Same-operator authenticated resume replaces historical same-terminal sessions; cross-terminal lock remains. Exact-session logout prevents old tab disconnecting newer login. Existing OPEN shift ownership remains authoritative, including invalid historical foreign-owner sessions; no shift reassignment or closing.

Meaningful CI native actual-handler PostgreSQL/HTTP concurrency and duplicate recovery, old-token/runtime/late-logout/independent terminal/unchanged shift snapshots; actual client logout payload/transient retry. Full HTTP fixtures explicitly hand over/logout using the same store-scoped endpoint; all original financial/own-all/grant/reversal/report assertions preserved. Initial failed candidate39023375573 (fixture lifecycle) and39023810562 (actual missing-store root cause) are retained in checkpoint, never acceptance. Final complete source and main runs above are authoritative.

Physical KAT logout recovery and one-operator UI acceptance remain AWAITING USER, not LAB/LIVE functional PASS. User screenshots/report remain pre-release USER FAIL until confirmed. No production login/logout/session/credential/shift/sale/payment/stock/fiscal mutation performed by agent. No new PASS manual entry. Existing connector PC2 owner acceptance is separate; PC1 equipment installation remains pending, do not infer payment codes/mapping from PC2.

Single next action on empty authorized POS: safely refresh POS2, authenticate original operator if needed to replace historical duplicates, stop at opening count and click Change operator without opening a shift. Refresh POS1 and authenticate there; report outcome. A true other operator/OPEN shift must not be taken over. Retain current owner until acceptance/named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-pos-terminal-session.md.

17/10/2026 — POS-TERMINAL-SESSION-01 / IMPLEMENTED / AWAITING NATIVE CI AND LIVE

Owner fix/pos-terminal-session-20261017 retained. Claim PR2639/docsCI39022660271 SUCCESS merged ec93f9837f2ae9bb0aafceff37025a26f93af37e before source. One bounded regression after explicit owner USER FAIL: terminal-scoped transaction advisory lock serializes different operator PIN/card logins before shift opening; active other operator blocks409/POS_TERMINAL_OCCUPIED. Existing OPEN shift owner's authority remains: invalid historical non-owner sessions do not block legitimate owner resume, and runtime ownership validation still rejects them. Existing operator lock preserves same-operator cross-terminal refusal. Successful same-terminal reauthentication retires older sessions of that same company/store/operator/terminal; only the newly issued session remains active. Logout stays exact-session so an old tab cannot revoke a later login. Client preserves retry credentials/state and shows actionable failure on transient logout error; explicit revoked/expired authentication can leave locally.

Local actual logout behavior2PASS, related schema/session checks7PASS and1native infrastructureSKIP. Extended native actual-handler PostgreSQL/HTTP fixture checks concurrent one-winner admission, seeded historical duplicate retirement, same-operator other-terminal refusal, late logout protection, successful explicit logout then other operator entry, independent terminal and unchanged shift snapshots. Native CI/full CI/deploy pending. No production session reset, business mutation, shift open/close, sale, payment, stock/fiscal action or historical replay. Physical KAT recovery remains USER FAIL until safe acceptance; no new manual PASS.

After exact deployed release: on KAT POS2, authenticate original operator before shift opening to replace historical duplicates, then use Change operator; POS1 may then authenticate without opening a diagnostic shift. If another operator holds POS2, do not silently take over; investigate named session through authorized administration. No direct production SQL cleanup. Preserve all unrelated owners and current fiscal connector.

17/10/2026 12:50 Europe/Athens — POS-TERMINAL-SESSION-01 / ASSIGNED / USER FAIL

Owner fix/pos-terminal-session-20261017. Explicit owner request after KAT POS2 logout-before-shift still blocks POS1. Bounded new regression: one active operator per company/store/terminal before shift opening; same-operator reauthentication retires older same-terminal sessions; exact-session logout must report failure rather than erase retry credentials. Preserve other-terminal operator lock, OPEN shift owner, tenant/auth/device/fiscal/financial boundaries. Existing Gate4/No33 and POS-SHIFT-OWNER-EFTPOS owners retain their other scopes. User-reported FAIL; database cause and new LAB NOT TESTED. No production session/shift/business mutation. Claim must merge before source changes. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-pos-terminal-session.md.

17/10/2026 09:58 Europe/Athens — KAT-TERMINAL-CONNECTOR-01 / SOURCE LIVE / AWAITING FOLDER CONFIRMATION AND DEVICE

Owner codex/kat-terminal-connector-20261017, issue2635 retained. Claim2636/CI39009353819 SUCCESS mergedbf8de31b before source. Source2637 finalhead8ef853e94f8fff0bbacb1798be3210b7d6077f41/fullCI39010874613/job117333030480 SUCCESS2880PASS/0FAIL/0SKIP plus6backup, including Windows5.1 actual script/guided/startup smoke, native PostgreSQL, Chromium/build/invariants and real HTTP two-register exact-terminal concurrent-claim/forgery/stale-settings/module/legacy-single-register control. Source merged d4e130778d6c7cf6479180285a46678d877013d6; treec81f03fa557cea5f34a05745b9bc8a02daae92af is identical to the accepted source tree. ExactmainCI39011249740/job117334159175 SUCCESS2880/0/0 plus6backup and same real HTTP result. Initial failed39010255777 and bounded catalog harness correction remain documented; no runtime guard weakened.

Ordinary guarded Render39011612178/job117335167070 SUCCESS: exactd4e1307 pinned06:54:40UTC, healthy06:56:41UTC. Independent public /api/health subsequently returned oktrue/version0.22.0+kat-test-pos/exactd4e130778d6c7cf6479180285a46678d877013d6. No manual deploy or safeguard bypass.

Actual authenticated canonical Platform Admin after reload: Installation Center > KAT guide shows new selected-POS-only text and KAT-POS-02. Payment-code fields are empty, folder C:\capture is the default, confirmation unchecked, download disabled until confirmed settings are saved. No Save/download/Pair/Start was executed. Latest guide now lists active KAT-POS-02 and KAT-POS-01 (KENTPIKO), with one registered fiscal device/two EFTPOS. Earlier KAT-HOME-TEST observation is historical; this page did not rename/create/deactivate any terminal, and the origin of that intervening data change is not established. Do not overwrite PC1 or infer its fiscal/EFTPOS/payment settings.

Read-only compatibility preflight also observed the existing Diadochou open shift using DIADOXOU-POS-01, matching its mapped route; no transaction, shift or financial action was performed and no general Diadochou business PASS is inferred. Private displayed balances/operators are not published.

STATUS: SOFTWARE DELIVERY COMPLETE / whole physical scope OPEN. No new LAB, physical Windows login/startup, PC2 credential binding/WRITER ONLINE, print/card/stock/shift acceptance claimed. No production settings/module/equipment/credential/Writer/service/sale/payment/stock/shift/fiscal mutation by this page. Historical paid requests remain protected. No CAPDriver/service restart feature. Single next action: owner confirms the actual PC2 CAPDriver work folder (do not assume the displayed default); then save only confirmed KAT-POS-02 settings, download its new guided package on the final PC, perform fresh terminal-bound Pair and safe status check before any explicit Start. Check existing pending/uncertain requests and other Writer first. PC1 is a later separate acceptance after PC2; four physical EFTPOS remain the owner-confirmed topology. Other installation/profile/online owners retained. No new PASS manual entry is appropriate until device acceptance.

17/10/2026 — KAT-TERMINAL-CONNECTOR-01 / SOURCE IMPLEMENTED / AWAITING FULL CI AND DEVICE

Claim PR2636/headc87b7c0d CI39009353819 SUCCESS merged bf8de31b before source. Owner codex/kat-terminal-connector-20261017, issue2635 retained. New Pair requests the exact POS and expected store; server validates confirmed current equipment/settings and signs the binding in the device token. Status and each claim recheck it. Queue claims filter company/store/terminal before locking; concurrent pollers cannot claim the same request. Heartbeat input cannot replace server-owned routing/poll metadata. Old unbound Writers resolve only one explicit active register; multiple registers reject rather than choose. KAT-HOME-TEST is not treated as register1. Existing PC2 KAT cash6/storeCARD2/DeliveryCARD3 unchanged; no PC1 codes invented.

Guided and menu packages now name/store the selected terminal and register; checks verify both before running Writer. Package files use store/terminal subdirectories. The server allows downloads only for a selected active terminal with valid confirmed settings; no blanket multi-terminal bypass. Writer rejects an unexpected returned terminal without writing a CAP command. Existing credential format/current-user startup/global single-PC mutex remain; no service restart or driver change. POS liveness uses the requested terminal and rejects unmapped/missing/offline/stale routes rather than another register's heartbeat.

Local Node20.20.2 focused19PASS/0FAIL/0SKIP; production frontend/TABLE_SERVICE and Prisma preparation PASS. First full local test attempt raced Prisma generation and had environment/import failures; terminated and prepared full rerun is in progress. Native isolated HTTP tests added for two registers/three EFTPOS, signed terminal identity, forged heartbeat/body, exact-terminal concurrent claims, foreign acknowledgement, stale settings, module denial and a separate legacy single-register control. Windows smoke extends wrong-terminal credential preservation/connection rejection and terminal-specific package paths. Full native CI/Windows and exact ordinary release pending. These are software tests, not physical or LAB PASS.

No production settings, pairing/credentials, module, Writer/service, sale/payment/stock/shift/fiscal action performed. Historical paid tests are not repeated. PC2 physical safe connection and acceptance remain NOT TESTED; PC1 follows after PC2. Existing Diadochou/profile/online and other owners preserved. Next: resolve actual full-CI failures, green source/main and exact ordinary deployment, then confirm PC2 real folder/codes/settings and safe connection before starting any Writer. No final manual PASS claimed.

17/10/2026 08:58 Europe/Athens — KAT-TERMINAL-CONNECTOR-01 / ASSIGNED / NOT TESTED

Owner codex/kat-terminal-connector-20261017, issue #2635. Explicit owner request: Diadochou-style guided installer for existing KAT PC2/Ταμειακή2/two EFTPOS first; PC1 later. Physical topology two PCs/two registers/four EFTPOS; no driver/service restart. Existing Writer serves register2 per owner; do not replace physical driver, remap equipment, replay paid requests or start any Writer during diagnostics. KAT-HOME-TEST is not proven physical PC1.

Independent newly requested terminal-bound connector extension. Prior codex/remote-install-wizard-20261005 retains Diadochou launcher/device acceptance, codex/diadoxou-fiscal-profile-20261008 retains its profile scope, other fiscal/online owners unchanged. This claim owns only new terminal isolation and its guided-package adaptation for #2635, not their existing acceptance work.

Read-only source evidence at main57a1f581: next-request SQL filters company/store/status but not terminal; package generation deliberately blocks multiple active terminals. Need verified server-owned terminal/register device binding and exact-terminal claim, guarded legacy single-register compatibility, stale equipment rejection, per-terminal package identity/status and selected-folder checks before enabling any new package. Do not merely remove multi-terminal block. Preserve KAT6/2/3, both selected EFTPOS routes, one-shot UNCERTAIN handling, tenant/license checks and Diadochou behavior. New PC1 payment codes are not inferred.

Current software/physical status NOT TESTED for new scope. Historical KAT03Oct and Diadochou08Oct observations remain scoped and must not be repeated. No production settings/credentials/module/service/Writer/financial/stock/shift/fiscal changes. Next: green claim/main publication, then bounded source and native PostgreSQL/HTTP + Windows tests, full CI, ordinary exact deployment, PC2 safe connection/device acceptance; PC1 follows separately.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-17-kat-terminal-connector.md.

16/10/2026 23:16–23:20 Europe/Athens — VOICE-ASSISTANT-01 / USER-SUPPLIED DIRECT CSV CONTENT PASS / WHOLE VOICE OPEN

Retained owner codex/assistant-business-queries-20261015. User supplied the actual generated myworkstation-report-20261016231645.csv after a screenshot at23:15 established normal Platform Admin entry, banner Super Admin read-only, selected MYWORKSTATION LAB and all-stores unchecked. The requested complete current-turn question was FROM owner on10October2026 in CSV. This is owner-device export/file evidence, not a cloud-browser download workaround. Earlier Owner screenshots23:04/23:09 show the same existing historical IN record; short Owner «Σε CSV»23:10 only redisplayed the report, with no visible file. No export entitlement is added to Owner.

LIMITED USER FILE-CONTENT PASS: actual776-byte file, SHA256 be85c56c03e2b179b355bd1f26045e3de786501460128d82c2901a6bfce84b35; UTF-8 BOM, semicolon delimiter, quoted multiline metadata,9 consistent columns,1 metadata row and1 business row. Strict standard CSV parsing succeeds. Metadata identifies the selected LAB,10October-only period, Greece time and expected FROM-owner report. Business row agrees with the supplied rendered report and prior independently reconciled historical IN row for displayed date/time, direction/type, description, amount and recorded operator. Actual private values and the raw file/screenshots are not committed to the public repository. Empty till reference and displayed status marker remain unchanged; no invented identifiers. No Excel application-opening, XLSX/PDF/Word acceptance, monthly completeness, physical recipient/responsibility or general export certification is inferred.

Exact generating app revision was not captured on the user's device. Adjacent independent public health during documentation reports healthy 2f615fcf333e29f4e6d2451dcb785ea6275ac00f; this is not retroactive proof of the file-generating revision. Current main866bece assistant source remains the prior accepted path; this receipt changes documentation only. Protected prior sourcePR2610/fdd549ce, full native PR/main2845/0/0, ordinary guarded deployment38938483024, receipts2613/2617 and software-only23/0/0 remain intact. No source/config/key/model/provider/auth/license/schema/business change or transaction replay.

Remaining OPEN: actual file contents for the distinct short «Σε CSV» after changed direction/date/actor history (earlier filename-only observation does not prove bytes), other export formats, physical microphone/mobile (user explicitly has no microphone), general Greek endings/spelling/live ambiguity and wider advanced domains. The complete-question single-row CSV check is finished and must not be repeated merely for documentation. Whole VOICE OPEN/ASSIGNED; other owners unchanged. Next single action: in the existing authorized Super Admin conversation, request the opposite direction with a short follow-up and then «Σε CSV»; compare the actual attached file against the displayed OUT row. Read-only only, no fabricated records. Checkpoint/manual/active/tracker/pending/PDF synchronized in this receipt.

16/10/2026 22:57 Europe/Athens — POS-SHIFT-OWNER-EFTPOS-01 / SOURCE RELEASED / AWAITING USER POS ACCEPTANCE

Retained owner fix/pos-shift-owner-eftpos-20261016. ClaimPR2621/head9bb929ed/docsCI38954173882 SUCCESS mergedf61ea1b9861befe6433b41e72e07b3e852051b32 before edits. SourcePR2623/finalhead11f49f174282ace8e1c1e6b7d31aecf7655aaeb6 merged2f615fcf333e29f4e6d2451dcb785ea6275ac00f. Full Node20/native PRCI 38956747542/job117161928500 and mainCI 38957465911/job117164064627 SUCCESS 2868/2868 PASS/0FAIL/0SKIP plus6backup and required Windows/build/browser/native SQL/security/licensing/invariants/archive/HTTP checks. Ordinary guarded 38958135703/job117166160688 SUCCESS, independent no-cache health exact 2f615fcf333e29f4e6d2451dcb785ea6275ac00f at 16/10/2026 22:57:21 Europe/Athens. No manual deployment/hook/migration or safeguard bypass.

PIN/card login refuses another OPEN shift owner on the resolved company/store/terminal, including fallback MAIN; rechecks before durable session creation. Existing own-operator other-terminal/session guard and same-owner resume remain. Existing Store Mode sessions are checked against fresh ownership in the normal auth database query, rejected with401/POS_SHIFT_OTHER_OPERATOR; client clears only its Store Mode session and reloads, so a cached session does not regain access. Normal logout still revokes only its own session, never closes/reassigns a shift. Independent other terminal/store/company, mobile work-card/chat and privileged Backoffice routes remain separate. No automatic shift takeover, owner substitution or data repair.

Normal close requires explicitly declared finite nonnegative EFTPOS in UI and server; blank/missing/null/bool/array/invalid/nonfinite/negative values are rejected before close transaction/card/attendance. Explicit0 is valid when the operator actually enters it. Both ordinary submit and shortage-confirmation path require the current valid field, including after clearing it; shortage submits current declared EFTPOS. Count/card/recount/shortage/authoritative ledger and existing fiscal/idempotency boundaries remain intact.

Meaningful evidence: Node20 local focused8PASS/0FAIL/1native infrastructureSKIP; actual mounted close form and actual schema/handler boundary. Final native CI unskipped actual extracted PIN/card/logout bodies + full auth, real SQL and HTTP: denied login creates no session, old foreign-owner token denied, same-owner PIN/card resume succeeds, logout revokes only its session and leaves shift snapshot identical, independent terminal/control/foreign company protected. Credential comparison/token issuance and unchanged rate/audit services in that fixture are stubs, not live credential acceptance. Existing full real HTTP EFTPOS flow also rejects seven missing/invalid declarations with identical shift snapshot, then preserves the valid25-vs30 card reconciliation and cash math.

Test history: first native fixture used one-character storeId and failed the unchanged login schema (run38954990601/job117156224302:2861PASS/1FAIL/0SKIP), fixed to valid fixture ID with diagnostic assertion. Next full native2862/0/0 plus6backup passed (run38955734948/job117158193113), but old operator-ledger E2E assumed two operators could use an Owner-opened shift. The explicit new user rule intentionally forbids that. Keep all original own/all actor, live grant, reversal refusal, report and closing assertions: perform independent EXTERNAL payments before Owner opens the cash shift, then add401 ownership assertions for both old POS tokens. No access guard or test assertion relaxed. Final complete CI above is authoritative; superseded/cancelled candidates are not accepted.

Scoped read-only production diagnosis also checked only the two reported stores: LAB legacy null terminals resolve MAIN; the real store's signed installation-session terminal is distinct from profile fallback MAIN. The proposed ownership predicate flags the observed non-owner LAB session and real-store non-owner sessions while allowing their current original owners. Current real-store owner changed independently from the earlier user narrative; no historical reconstruction or functional post-release PASS is inferred. Some older observed sessions remain unrevoked, but their exit path was not observed; physical logout revocation is NOT TESTED, not diagnosed from that snapshot. The fresh ownership gate blocks conflicting old sessions independently. No identifiers, names, amounts, credential hashes, tokens or screenshots are published.

Actual source acceptance in hosted/physical POS remains NOT TESTED. Supplied screenshots + user report are current USER FAIL evidence before this source, not a measured database/financial delta or a new PASS. No live login/logout/credential, shift open/close, sale/payment/stock/finalization or historical replay was executed for diagnostics. Existing manual PASS scopes and broader No33/tracker35/SHIFT-QR/Gate4/cash/report owners remain unchanged/OPEN. Manuals receive no untested new PASS. Same owner retained until acceptance, no duplicate claim.

Single next action after safe refresh on an empty authorized POS: while an existing legitimate shift remains OPEN, attempt another authorized operator's PIN/card (expect refusal), resume the original owner (expect access), open the normal close form without submitting (blank EFTPOS must disable close; deliberately entered0 is valid). No financial close or new shift should be performed just to prove the interface. A real close can be confirmed during the next legitimate handover with its usual baselines; do not repeat an accepted close or sale. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-shift-owner-eftpos.md.

16/10/2026 22:50 Europe/Athens — POS-INVOICE-QR-FORMATS-02 / ASSIGNED / NOT TESTED

Owner codex/invoice-qr-formats-20261016; source fix/invoice-qr-formats-20261016. Explicit owner authorization after read-only survey of supplied invoices. Independent new-format extension: Epsilon /fd/ on standard and 3rdparte hosts, Megasoft InvoiceLink, AADE TimologioQR inspection and outer whitespace normalization. Existing DocViewer acceptance owner, scanner/camera input owners and broader09/Gate3/payment/OCR owners remain unchanged. No competing new-format claim found in current shared records. Read AGENTS/current complete active/tracker/pending/numbered, invoice manual, provider source/tests/history and Epsilon checkpoint. Preserve exact host/path controls, bounded size/deadline/pages, issuer/recipient/MARK/number/PDF binding, explicit human review and credit recognition. No payment/draft/job/stock/fiscal/myDATA writes or historical submission replay; real sample access tokens stay outside git.

Read-only provider GET establishes standard Epsilon /fd/{32hex}:8 responds302 to same-host /DocViewer/{same token as UUID}; HEAD instead returned /home and is not adapter evidence. Megasoft GET returns200 HTML; extraction/API and AADE original availability remain under inspection, not supported/PASS claims. New native application/physical/LAB behavior NOT TESTED. Publish claim green on main before source. Require meaningful provider transport/negative/credit/multipage regressions, full CI/main/exact ordinary guarded release and separately qualified acceptance. No new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-invoice-qr-formats.md. Next: finish provider evidence and bounded adapters; keep unsupported formats explicit if full originals cannot be verified.

16/10/2026 — POS-SHIFT-OWNER-EFTPOS-01 / IMPLEMENTED / LOCAL PASS / AWAITING NATIVE CI AND LAB

Same owner fix/pos-shift-owner-eftpos-20261016. ClaimPR2621/head9bb929ed/docsCI38954173882 SUCCESS mergedf61ea1b9 before source. PIN/card login checks company/store/resolved normalized terminal for another OPEN owner, repeated before creating the durable session. Existing same-owner other-terminal/session locks remain. Missing profile terminal resolves MAIN consistently. Normal STORE_OPERATOR auth derives ownership conflict from fresh database state in the existing revalidation query, refuses old session with401/POS_SHIFT_OTHER_OPERATOR; logout remains permitted without changing the shift. Client clears only its local Store Mode session and reloads on that explicit conflict. Work-card/chat token branches and Backoffice auth remain distinct.

EFTPOS uses a shared strict declared amount parser: omitted/null/blank/bool/array/nonfinite/negative/invalid input rejected, explicit0 and ordinary comma decimals accepted. Actual close schema has no zero default for EFTPOS; validation precedes transaction/card/attendance. Close form requires deliberate amount, disables submit while invalid, retains explicit shortage decision's validated amount and resets field on reload. Other amounts, authoritative ledger, close-card/count/shortage and financial operations unchanged.

Node20 focused9total:8PASS/0FAIL/1isolated-PostgreSQL infrastructureSKIP; actual mounted React form submits nothing for blank/invalid, permits0 and retains0 through shortage confirmation. Native regression awaiting CI exercises actual extracted PIN/card/logout bodies and full auth with real SQL and HTTP, scoped fixtures, denied-session count, same-owner resume, fresh old-token denial, logout preserving shift, independent terminal/store/company. It stubs credential comparison/token issuance and unmodified login-rate/audit services only; not a credential-security or full production acceptance claim. Full PR/main CI and ordinary guarded exact deploy pending. Actual hosted/LAB ownership and new close acceptance NOT TESTED; user-reported physical failure remains open until acceptance. No production business/session/credential write or diagnostic replay. Existing No33/Gate4/cash/report/manual scoped PASS and other owners preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-shift-owner-eftpos.md.

16/10/2026 22:24 Europe/Athens — POS-SHIFT-OWNER-EFTPOS-01 / ASSIGNED / USER REPORTED FAIL

Owner fix/pos-shift-owner-eftpos-20261016. Independent new regression/explicit requirement after user reports logout then another operator PIN entering the original operator's open shift at a real store and LAB. Three supplied screenshots inspected privately: close form EFTPOS blank and same LAB displayed with two operator identities; screenshots alone do not attest terminal/shift IDs or financial deltas. No private identities/amounts/screenshots published. Main d403ef53/history/current records, numbered checklist, POS/shift manuals and terminal/dual-session/open-fail-closed/session checkpoints reviewed. Existing No33/Gate4/cash/report/other owners retain broader scopes; this is only the newly reported ownership boundary and required EFTPOS input.

Bounded changes after claim merges: normal POS PIN/card authentication must refuse another operator's OPEN shift on the resolved company/store/terminal, preserving same-owner resume, no-open-shift opening flow and independent other terminal/store. Validate again for old sessions at runtime/shift entry; no takeover by logout/login or cached view. Keep mobile work-card/chat identities separate, existing active/revoked session/roles/tenant/device binding, own operator other-terminal lock, explicit close card and fiscal safeguards. Shift close requires explicitly supplied finite nonnegative EFTPOS amount; blank/null/missing/invalid are not zero, explicit0 remains valid. Client and server enforce; keep recount/shortage/card checks and authoritative financial totals unchanged.

Require meaningful actual-function/mounted client and native real HTTP/DB regression for PIN/card, same/different owner, existing session, logout preserving shift, isolated terminal/company/store, blank EFTPOS refusal with no close/audit/attendance and explicit0/valid amount compatibility. Full PR/main CI and ordinary guarded exact release before acceptance. USER FAIL is current evidence; actual agent LAB NOT TESTED. No live shift open/close, sale, payment, stock, credential/role or historical business mutation/replay for diagnosis. Single next action: merge claim, implement and run isolated regressions. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-shift-owner-eftpos.md.

16/10/2026 21:39–21:41 Europe/Athens — VOICE-ASSISTANT-01 / LIMITED OWNER ORIGINAL-LINE RECONCILIATION PASS / WHOLE VOICE OPEN

Same retained owner codex/assistant-business-queries-20261015. Normal existing Owner session, MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ explicitly selected. Read-only navigation: Εμπορική λειτουργία → Λοιπές εμπορικές λειτουργίες → Βάρδιες & Διαφορές, monthly1–16October, selected LAB only → historical shift opened10October and closed11October → Ημερολόγιο κινήσεων. No shift/payment/product action or re-created record. Cloud desktop, no physical terminal operation.

LIMITED LIVE SOURCE RECONCILIATION PASS: the original normal shift journal contains the two existing virtual OUT/IN transfer lines previously returned by the Owner assistant. Matched selected store,10October date, displayed minute, opposite direction/type, amount, description and recorded operator for each. Original journal displays only minute precision and shortened record codes; exact seconds/full-ID equality is not claimed. Distinct row directions/operators/descriptions remain separate. The Greek IN operator also matches the original label retained by the earlier exact/inflected quoted-name query. This supersedes the earlier inability to locate those original historical lines, only for these two records. No monthly completeness, global financial balance, physical recipient or responsibility inference.

Adjacent public health sample reports 26a471226b4afca36724fd96454e58d820dbc803; current main0402cdb contains unchanged assistant service files versus the accepted source. No new source fix/deployment in this continuation. Prior assistant sourcePR2610/fdd549ce, full native PR38936969463/main38937759685 both2845PASS/0FAIL/0SKIP plus6backup, ordinary guarded Render38938483024 exact healthy and20:20–20:21 normal Owner quoted-name dispatch PASS remain protected; receiptPR2613/fe001f70/docsCI38939666373 mergedfbdd980d. New evidence here is original normal-report reconciliation, not a repeat name/source implementation or another module's audit acceptance. Public evidence omits names, amounts and private descriptions.

Remaining OPEN: actual CSV file bytes versus displayed report under native credential download restriction; physical microphone/mobile; general name endings/spelling, live ambiguity and wider advanced domains. Source-line reconciliation for these two existing LAB records is removed from current pending work. No financial/stock/fiscal write, new key/model/provider, privilege change, raw browser/session extraction or transaction replay. Whole VOICE OPEN/ASSIGNED, earlier scoped PASS and unrelated owners preserved. Next single action: compare the actual generated CSV when supplied through a permitted file path; filename/screenshot is not file-content PASS. Checkpoint/manual/active/tracker/pending/PDF synchronized in this receipt.

16/10/2026 21:03 Europe/Athens - POS-INVOICE-CREATE-PRODUCT-ACTOR-01 / SOURCE LIVE / AWAITING USER SAVE

Retained owner fix/pos-invoice-create-product-actor-20261016. ClaimPR2612/headc17c4f09434d4e1a5cf5e5250dafa81a823a6052/docsCI38940115676 SUCCESS merged74dd43717699aedef2b6d7063a0bf938dc4b8326 before source edits. SourcePR2614 finalhead046af958009e4ed0434e572fa058fe9115ff605e merged26a471226b4afca36724fd96454e58d820dbc803. Full PR CI38941932094/job117111683865 and main CI38942697289/job117114250690 SUCCESS: PR/main2857PASS/0FAIL/0SKIP plus6backup, native PostgreSQL/Windows/security/licensing/real HTTP/invariants/build/browser checks. Ordinary guarded deployment38943458208 SUCCESS; independent public health oktrue/exact26a471226b4afca36724fd96454e58d820dbc803 confirmed. Initial native candidate38940567658/job117107057325 passed2857/0/0 plus6backup; source unchanged through documentation reconciliation. Intermediate38941536684 stopped before tests at mandatory active-list gate; explicit appended active progress corrected this administrative omission. Final full source CI above is authoritative. No manual deployment, workflow dispatch or safeguard bypass.

Production read-only logs identified PostgreSQL23503 in the shared OCR-resolution learnSupplierMapping during POS invoice create-product. POS credentials were incorrectly written to a User FK. All four actual callers now pass full authenticated actor; the existing validated helper leaves POS confirmedByUserId null including credential/User collisions, resolves same-company Backoffice or authenticated platform accounts, and rejects false foreign/deleted attribution. Original POS identity remains in SupplierProductLink.updatedBy and existing prepared-product Audit. No FK/schema/permission relaxation, skipped learning, swallowed errors, OCR/economic/idempotency/payment/stock/finalization change. Product/barcode/store-card/line/local and central mapping transactions remain intact.

Meaningful regressions execute actual shared learning, exact-autoresolve actor propagation and actual registered create-product handler with real SQL/FK; legacy FK failure, POS collision/Backoffice/platform/foreign/deleted identity, mapping insert/update, existing-barcode refusal, complete product/barcode/store-card/line/learning rollback, prepared POS original audit, unchanged invoice economics/control stock/zero movements and retry. Existing preparation fixture now enforces real User FK. Local Node20 targeted29total:20PASS/0FAIL/9native-infrastructureSKIP; full local2843total:2743PASS/0FAIL/100infrastructureSKIP, distinct from full native CI. Initial targeted root-directory invocation had12 relative-path fixture failures, resolved by correct server working directory; final applicable local checks pass. Read-only production check at diagnosis found zero company product barcodes matching the reported item. Later pre-final recheck found exactly one existing product linked to one MATCHED invoice line on an INVOICED order; its creation predates this source release and supplier text attribution resolves to a User. Creation channel was not independently observed: this is existing-state evidence, not POS acceptance of the new revision. No repeat of that saved item or invoice is permitted for documentation.

No production product creation, invoice save, payment, approval, stock posting, finalization, deletion or replay executed. Hosted POS creation USER/LAB acceptance remains NOT TESTED; previous preparation-only PASS and previous mapping-edit owner's acceptance remain scoped and protected. No new manual PASS instructions. Same owner remains ASSIGNED; prepared-product, mapping-edit, wider09/Gate3, barcode, credit/cash/assistant owners retained. Single next action: during the next legitimate creation of a different new item in an authorized NEW draft, save once and report success/error. The reported item already exists and is linked to an INVOICED order: do not create it again, re-upload, repay, finalize or replay the accepted document for diagnosis. An agent LAB write requires a separate fresh published baseline/control.

Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-invoice-create-product-actor.md.

16/10/2026 20:24 Europe/Athens — POS-INVOICE-CREATE-PRODUCT-ACTOR-01 / ASSIGNED / USER FAIL

Owner fix/pos-invoice-create-product-actor-20261016. Independent bounded identity/FK correction in shared OCR-resolution supplier mapping learning and propagation of authenticated actor from its create-product, match, exact-autoresolve and prepared-product callers. Read-only production logs reproduce PostgreSQL23503 on SupplierProductMapping_confirmedByUserId_fkey in learnSupplierMapping during POS invoice new-product creation. A STORE_OPERATOR identity is not a User foreign key. No private business identities or invoice values are included here.

Reuse the existing validated User attribution helper; never use POS credentials as User IDs even on collision, retain original actor in text attribution, preserve same-company Backoffice and authenticated platform attribution. Product/barcode/store-card/line/mapping remain atomic; genuine errors propagate and roll back. No schema, permissions, OCR/economics, stock, payment, approval, finalization, draft/upload or idempotency changes. No production business write or replay. Main fdd549ce and current history, active/tracker/pending/numbered, invoice manual and relevant checkpoints reviewed. Previous mapping-edit owner codex/pos-invoice-mapping-actor-20261016 and prepared-product owner codex/invoice-new-item-acceptance-20261015 retain their wider scopes; this does not take over either acceptance task.

Required: meaningful actual-function/native real-FK POS/collision/Backoffice/platform/isolation/rollback tests, full PR/main CI and ordinary guarded exact release. Hosted save acceptance NOT TESTED; existing limited preparation PASS remains protected, no manual PASS. Single next action: after this claim merges, implement bounded actor propagation and native regression tests. No real invoice save/payment/stock action for diagnosis. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-invoice-create-product-actor.md.

16/10/2026 20:20–20:21 Europe/Athens — VOICE-ASSISTANT-01 / LIMITED LIVE OWNER QUOTED-NAME DISPATCH PASS / WHOLE VOICE OPEN

Retained owner codex/assistant-business-queries-20261015. ClaimPR2608/head909f3ced/docsCI38936325923 SUCCESS merged5ff91e05 before source. Source PR2610/headaa7d37ce094f1e33d62916d0f1ab48e964c959b9 merged fdd549ce742c2de7ae10ab393fbeb3615340d270. Full native PRCI38936969463/job117094976786 and exact mainCI38937759685/job117097631932 SUCCESS:2845PASS/0FAIL/0SKIP plus6backup, required Windows/security/licensing/native PostgreSQL/Chromium/build/invariant/archive/real HTTP checks. Ordinary guarded Render38938483024/job117099943176 SUCCESS; independent public health confirmed exact fdd549ce before live acceptance. No manual deployment, gate bypass, schema/auth/credential/provider/model/key change.

LIMITED LIVE PASS: normal independently authenticated Owner, selected existing MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, all-own-stores unchecked, cloud browser/no physical terminal or business operation. The same combined FROM-owner/TOWARD-till question that previously failed, with explicit quoted full Greek operator filter without terminal sigma, now completes on10October and returns the same existing historical virtual IN row seen in prior exact-name/simple-wording reads. Literal inflected filter, original operator, store, date/time, direction, amount and description remain visible and consistent. Replacing only the operator with an unknown synthetic full Greek name returns no_records, not the unrelated existing row. Public records omit actual operator names, amounts and private descriptions. Safe final screenshot contains only the fictional negative filter. This closes the observed combined-direction explicit-filter failure and verifies hosted Owner quoted-name dispatch only; not monthly completeness, original-ledger reconciliation or physical recipient/responsibility.

Source: only one complete current-turn quoted full Greek operator clause takes the strict direct path, with literal query and existing scoped reader. Known FROM-owner-to-till endpoint wording is canonicalized before strict vocabulary checking; domain/date still equal original request. Extra/status/inherited/ambiguous/multiple/unsupported filters retain checked model extraction and its mismatch refusal. Existing exact-first/sigma/ambiguity/source-cap/reversed/duplicate/calendar/module/auth/export guards unchanged. Before-path synthetic test fails on unwanted provider invocation; final15focusedPASS/0FAIL/0SKIP, both actual handlers and old dialogue/export/name suites. Node20 server preparation PASS. Local full2838total:2739PASS/2FAIL/97infrastructureSKIP, two unchanged DAILY manager/QR link-readiness tests; isolated unchanged rerun2PASS/0FAIL/0SKIP. Final exact native PR/main both2845/0/0 are authoritative; no unrelated QR test/source modified.

Remaining OPEN: actual CSV bytes versus displayed source under native credential download restriction; independent original historical transfer-line reconciliation; physical microphone/mobile and wider advanced domains, general Greek endings/spelling and LIVE multiple-candidate ambiguity. Owner positive Greek-name observation is no longer NOT TESTED for this limited path. Other qualified PASS, owners and whole numbered voice item remain preserved/OPEN. No financial/stock/fiscal/shift write, operator rename, manufactured fixture or transaction replay. Same owner ASSIGNED; next action is permitted CSV file-content comparison, then original-movement read-only reconciliation. Checkpoints/manual/tracker/active/pending/PDF synchronized in this receipt.

16/10/2026 — POS-HEADER-COLLAPSE-01 / APPROVED FLAT DESIGN SOURCE LIVE / AWAITING USER

Retained owner fix/pos-header-collapse-20261016, source branch fix/pos-header-single-row-20261016. User18:55 rejects expanded duplicate header and19:06 explicitly approves the selected generated compact-header mockup. Design approval is not hosted functional USER PASS. Original sourcePR2593/exact1afc5fd collapse shell remains historical; expanded physical layout was rejected and is superseded by this correction. Original claimPR2592/f7b5b2fb predates source. Source correction PR2599/finalheadf803bb7dd978f42da7a727a3aafe220e50c879c6 mergedc1575b1fd2ee28acc76ac87fa568ad122069fd1e. Final PR CI38931006388/job117074862873 and main CI38931830073/job117077653351 SUCCESS: PR/main2836PASS/0FAIL/0SKIP plus6backup with all native PostgreSQL, security/licensing, HTTP/invariant/frontend/TABLE_SERVICE, Windows and real isolated Chromium checks. Initial9550bf03/run38929826172 had one generic-title mounted fixture failure after the new Barcode badge became the first matching button; explicit menu selector preserves every old count/status/permission/modal assertion and independently asserts the new top badge. The failed candidate is not accepted. Local reconciled mounted4PASS/0FAIL/0SKIP; barcode regression4PASS/0FAIL/1native-infrastructureSKIP and final frontend/TABLE_SERVICE build PASS.

Actual Store POS uses one always-visible compact header: MyWorkStation, one last-transaction reset, authorized current-store Barcode badge, existing Functions POS/orders/operator/connection/local queue/Refresh/Logout controls. Company/store/title/version/product-count duplicates and the extra summary/height grip disappear; store selection remains in the authorized Functions POS menu. The existing barcode hook, count refresh, modal and separately owned compact-banner removal are preserved. Original controls/media/scanner/invoice workspace and permission/tenant scopes retain handlers; legacy resize/collapse defaults remain compatible. Real synthetic Chromium across1920x1080,1366x768,1280x600 FONT12/FONT20 verifies one brand/one last transaction/no repeated store label, actual13-count badge, contained visible controls/menu/payment footer and smaller header than protected historical baseline. Natural wrapping keeps controls reachable on narrow/high-font viewports. This is CI geometry, not physical USER/LAB PASS.

Ordinary guarded deployment38932588329/job117080073562 SUCCESS; independently healthy exactc1575b1fd2ee28acc76ac87fa568ad122069fd1e at 16/10/2026 19:35 Europe/Athens. Independent public served asset verification PASS: six linked JS/CSS assets include flat header, real Barcode badge and brand markers; this is asset evidence, not signed-in USER PASS. No manual deployment or bypass. No financial/stock/fiscal/upload/shift business action, no real transaction replay and no new credential handling. Earlier LAB Store Mode needs a fresh personal operator PIN; no sign-in bypass or hosted visual acceptance is claimed. Manual retains the verified historical menu content but qualifies its old header entry position as historical; the new placement has no physical PASS. A design approval/CI is not a new actual PASS. Private operator/store/payment identities and mockup screenshots are not uploaded to the public repository.

Single next action: user on empty POS refreshes, compares the approved compact top row with the running POS, checks Functions POS/store selection and existing controls remain reachable, and confirms cart space visually. No sale/payment/upload is required. Physical terminal/touch/mobile/actual hosted USER layout acceptance remain OPEN with the same owner. Other barcode/cash/invoice/resize owners and central qualified PASS remain preserved; this does not close another numbered task. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-header-collapse.md.

16/10/2026 18:55 Europe/Athens — POS-HEADER-COLLAPSE-01 / USER LAYOUT FAIL / SAME OWNER CONTINUES

Retained owner fix/pos-header-collapse-20261016, bounded source branch fix/pos-header-single-row-20261016. User's supplied expanded/collapsed/close-up screenshots and final full POS image show that the released collapse shell repeats the store/operator/status/last-transaction when expanded and leaves too little cart area. This is a real USER FAIL of the desired layout, superseding the earlier AWAITING USER for physical layout; prior source/CI/deploy evidence remains historical, not USER PASS. No transaction is replayed; screenshot amounts and business identities are intentionally omitted from this public record.

Expanded explicit requirement: show only MyWorkStation branding, remove repeated company/title/version/product-count rows, and place the existing primary functions/orders/operator/status/local queue/Refresh/Logout at the top in the same compact header. Keep exactly one last-transaction display/reset handler. Store selection moves into the existing authorized Functions POS menu; no store/company scope or permission change. Existing single mounted launchers/radio/recording/scanner/menu focus, invoice minimization and payment footer remain protected. Barcode compact banner belongs to its separately assigned owner and is untouched. Legacy resize/collapse component defaults remain compatible; actual Store POS uses a flat always-visible mode with no second summary, resize padding or show/hide row. Existing header owner is preserved for the historical resize/menu scope; this is the retained collapse owner's explicit USER correction.

Current main f76a948 reviewed with existing claim/release checkpoint, active/tracker/pending/POS manual history. Local Node20 mounted3PASS/0FAIL/0SKIP including updated actual-menu integration and preserved legacy resize/media/focus/scope teardown; frontend build/TABLE_SERVICE PASS and source whitespace PASS. Actual Chromium geometry is extended to the flat header/one brand/one last transaction/no repeated store button/top controls/footer at all existing viewport/font cases. Final source CI/production and hosted USER acceptance remain OPEN until observed. No API/server/schema/sale/payment/stock/shift/fiscal/auth change or business action. Single next action: full CI and normal guarded release, then user's empty-POS visual confirmation of the flat top header. Manual unchanged because the previous physical layout is rejected and no new real PASS exists.

Final reconciliation: local4PASS/0FAIL/0SKIP after separating the new top badge from the existing menu selector; preserve every original permission/modal/count/status assertion. Native candidate38929826172 had exactly one obsolete generic-title fixture assertion, never accepted. Current main68de5a9 only advances other owner records; affected client/browser/test source is unchanged relative to17873d1. Full final CI remains required.

16/10/2026 — POS-HEADER-COLLAPSE-01 / SOURCE LIVE / AWAITING USER

Owner fix/pos-header-collapse-20261016 retained for the single hosted visual acceptance. Claim PR2592 merged f7b5b2fb before source. Source PR2593/head1166da558167d9ee63b71a01da16f6a74714db73 merged1afc5fd35f71725821d4e951c4c749a22cd5c026. Final full PR CI38924292506/job117052039810 SUCCESS; main CI38925052778/job117054560234 SUCCESS, with native PostgreSQL/server/security/licensing/HTTP/invariants/frontend/TABLE_SERVICE/Chromium and Windows checks. Exact counts: PR/main2830PASS/0FAIL/0SKIP plus6backup. Initial source run38923502584 was superseded by a stronger actual-shell geometry probe, not financial acceptance. Ordinary guarded deployment38925863357/job117057176097 SUCCESS; independently healthy exact1afc5fd35f71725821d4e951c4c749a22cd5c026 at 16/10/2026 18:43 Europe/Athens. No manual deployment or gate bypass.

New shell starts compact and can expand/collapse through its accessible touch-sized button; company/store change resets it. Summary retains store, operator, connection and last transaction. Original controls, media and unsaved internal state remain mounted; existing resize/menu handlers and ownership remain preserved. No font/catalog/API/permission/payment/stock/shift/fiscal change. Local Node20 mounted3PASS/0FAIL/0SKIP and frontend/TABLE_SERVICE PASS. Actual isolated Chromium tests cover 1920x1080,1366x768,1280x600 at FONT12/FONT20: compact shell at most56px, expanded original controls, returned cart space, identical layout after re-collapse and contained compact payment footer; original menu/resize checks run after explicit expansion. These are synthetic CI observations, not hosted USER/LAB PASS.

Read-only browser continuation recovered an existing authorized central session through a new canonical document after native retained-data restriction. Designated LAB Store Mode required a fresh personal operator PIN; no new credential was requested or entered for this presentation change, no operator session was bypassed and no business action executed. Hosted visual/touch acceptance remains NOT TESTED. Manual intentionally unchanged because there is no new real PASS.

Single next action: on an empty POS, refresh to load the release, confirm the small summary row and recovered cart area, then use «Εμφάνιση μπάρας» / «Απόκρυψη μπάρας» to check all original functions remain reachable. Do not submit a sale/payment/upload or repeat an earlier transaction for this layout check. Physical terminal/screenshot revision, mobile geometry and touch remain AWAITING USER. Same owner retained; invoice-credit, existing resize/menu and other assigned owners are not released or taken over. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-header-collapse.md.

16/10/2026 — POS-INVOICE-WORKSPACE-MINIMIZE-01 / SOURCE RELEASED / AWAITING USER POS ACCEPTANCE

Retained owner codex/pos-invoice-workspace-minimize-20261016. Claim PR2587 merged1a1dfbe0 before source. Source PR2588 finalhead2415ca431a5639586f1e81dba6a2fcae88f77d91 merged84ba97e2bb24d5e75da1a99b5555241b7e418703. Full Node20/native PR CI 38912788504/job117012780870 and exact main CI 38913557125/job117015366294 SUCCESS: 2829/2829 tests PASS/0 FAIL/0 SKIP, plus6 backup and required Windows/browser/build/production invariant/HTTP checks. First PR CI38911760315/job117009289159 passed2824/0/0 before concurrent barcode work required normal merge synchronization; barcode counter/notice and all other owners preserved. Ordinary guarded 38914368029/job117017988006 completed; independent no-cache public health confirmed exact 84ba97e2bb24d5e75da1a99b5555241b7e418703 at 2026-10-16T14:19:58Z. No manual deployment, hook, migration or safeguard bypass.

Delivered source: “Ελαχιστοποίηση” in POS invoice list and owned invoice/new-item/line headers, plus visible “Συνέχεια τιμολογίου” above product search. Original workspace and nested DOM remain mounted, with unsaved values, scroll, hidden parent state and delayed results retained. Restore does not reload/save/re-read an invoice. Minimization is temporary in the same tab, not a durable save; explicit save remains necessary before reload/logout. Aggregate workspace/assistant visibility releases the POS scanner while minimized; cart stays mounted. Existing assistant minimize/dock/close and permission/store cleanup remain protected. Four bounded client files and two tests; no API/schema/payment/stock/fiscal/OCR/auth change.

Evidence: local actual StorePosPanel/DOM/assistant suites3/0/0 before and after merge synchronization. CI verifies barcode adds to existing cart while minimized, same workspace/order/dirty quantity on restore, no report/detail re-fetch or PATCH until explicit save, existing delayed assistant preview once and revocation teardown. These are automated tests, not LAB PASS. Hosted attempt16Oct reached the LAB POS operator sign-in screen; no credentials were submitted, no invoice was opened/changed and no production business write occurred. Hosted minimize/restore, physical scanner/customer checkout and mobile/touch remain NOT TESTED. Existing manuals are unchanged because no new LIVE/LAB/USER PASS was observed. Wider numbered09/Gate3 and invoice/credit/barcode/payment/catalog owners remain OPEN/unchanged.

Single next action: in the normal authorized POS session, open an existing invoice, type a reversible unsaved field, press “Ελαχιστοποίηση”, then “Συνέχεια τιμολογίου” and verify the same invoice/field remains; do not create, pay, finalize or re-upload an invoice for this check. Physical checkout can be confirmed during the next legitimate customer service, without diagnostic replay. Retain owner until actual evidence is reconciled; no duplicate claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-invoice-workspace-minimize.md.

16/10/2026 17:02–17:05 Europe/Athens — VOICE-ASSISTANT-01 / LIMITED LIVE NAME MATCH PASS / WHOLE VOICE OPEN

Retained owner codex/assistant-business-queries-20261015. Source PR2586/final head18f7d44892ff7839d31a7812cfc81646e02a3140 merged e8fe52ec401261eef17b8754a7b64c283bca36aa. Final PRCI38910558770/job117005522035 and exact mainCI38911413288/job117008095119 SUCCESS:2823PASS/0FAIL/0SKIP plus6backup, all required Windows/build/browser/native PostgreSQL/invariant/HTTP checks. Ordinary guarded Render38912037409/job117010073201 SUCCESS; independent public health confirmed exact e8fe52ec before acceptance. Local Node20 full2816tests:2721PASS/0FAIL/95 infrastructure skips; focused24PASS/0FAIL/0SKIP, server preparation/Prisma generation PASS. No manual deployment, schema/auth/credential/provider/model/key change or safeguard bypass.

LIMITED LIVE PASS, normal authenticated Super Admin, explicitly selected authorized Diadoxou store, all-stores unchecked, cloud browser/read-only/no physical POS terminal or shift operation. Exact stored full operator-name query and natural wording without terminal sigma returned the same one visible row, with matching store, period, direction, timestamp, amount and original operator text. The ordinary natural request canonicalized its visible filter, so a third request explicitly retained the inflected query unchanged; its visible filter remained inflected and still returned the same row. This confirms the fallback path rather than merely model name rewriting. A different synthetic full Greek name returned no records instead of the real operator's row. Public evidence deliberately excludes private names, amounts and descriptions. These are recorded operator fields, not proof of the physical cash recipient or responsibility. The source row was independently corroborated in the original journal during earlier read-only checks; monthly completeness is not newly established.

LIMITED UI EXPORT OBSERVATION: CSV button on the positive inflected-filter report completed with a visible generated CSV filename and enabled controls, no application error. Actual file bytes/path were not read because native credential protection restricts download observation. This is UI generation feedback only, not file-content/short-request export PASS. The original short «Σε CSV» content acceptance remains separately OPEN. No restricted file-reading workaround or transaction replay.

Acceptance limits: this actual full-name pair in selected-store Super Admin only; alternate case endings, arbitrary spelling/phonetic matching, physical microphone, hosted Owner-role name acceptance and live multiple-candidate ambiguity remain NOT TESTED/OPEN. Ambiguity refusal, status/source cap/reversal/duplicate/foreign/calendar boundaries and both roles' guards have synthetic/native CI coverage, not new hosted PASS. Existing qualified dialogue/store/export evidence remains protected. Whole VOICE-ASSISTANT-01 OPEN and same owner ASSIGNED.

Next action: verify actual short-request CSV bytes against displayed source in a browser session that permits file observation, then hosted Owner-role named-query acceptance; do not replay a business transaction. Checkpoint/manual/tracker/active/pending/PDF synchronized in this receipt; completed selected-store Super Admin terminal-sigma subtask removed from active pending work. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-actor-inflection.md, manual docs/manual/super-admin/PASS.md.

16/10/2026 — POS-INVOICE-WORKSPACE-MINIMIZE-01 / LOCAL MOUNTED PASS / AWAITING FULL CI AND HOSTED ACCEPTANCE

Owner codex/pos-invoice-workspace-minimize-20261016; claim PR2587 merged1a1dfbe0 before edits. Add minimization to POS invoice list and owned order/line modal headers, plus visible “Συνέχεια τιμολογίου” above POS search. Keep original workspace, unsaved inputs, scroll, hidden parent editor and background results mounted. Propagate aggregate workspace/assistant visibility so the scanner can serve a customer while minimized. Restore emits no invoice reload, save or duplicate preview. Existing assistant dock and explicit close, permission revalidation, store teardown and cart remain protected. No API/schema/payment/stock/OCR/fiscal/auth changes or production business writes.

Local Node24 DOM + actual mounted StorePosPanel suites: 3 PASS/0 FAIL/0 SKIP (8.7s), including actual barcode scan while minimized, identical cart/workspace/order/dirty line state on restore, no detail reload/PATCH before explicit save, existing assistant delayed request lifecycle and permission revocation cleanup. Authoritative Node20/native full PR/main CI and ordinary guarded exact release pending. Hosted/mobile/physical checkout NOT TESTED; no LIVE/LAB PASS or manual update from local tests. Retain all wider numbered09/Gate3 and other owner scopes. Next: full CI, ordinary release, read-only hosted minimize/restore; no invoice/payment replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-invoice-workspace-minimize.md.

16/10/2026 — POS-CREDIT-CASH-01 / DIRECT FORM LIVE / LIMITED READ-ONLY LAB UI PASS / FINANCIAL ACCEPTANCE OPEN

Retained owner codex/invoice-second-draft-20261016. Claim PR2571/43f2b49e merged0d489bbc before source. Direct source PR2573/finalheadb4ef2453 merged83a0618cb10a0e29d8c8be6ac2d2c372af34eab6; full native PR38892598357/job116945657805 and main38893953268/job116949997311 SUCCESS2805PASS/0FAIL/0SKIP plus6backup, required Windows/browser/build/native PostgreSQL/invariant/HTTP checks. Ordinary guarded38894609861/job116952025336 SUCCESS and independent health confirmed exact83a0618c. Initial dirty PR had no runnable CI; concurrent main was preserved and normal synchronization then ran full CI. No manual deployment/migration or bypass.

Current-day guard PR2577/headbe1ee73183e87840c7b20e4fe7c78ce01a8b7a20 mergedf1667ba1a163d9f8ce348d7908f3d470c8cdbf5d. Full native PR38904672342/job116985334106 and main38905520369/job116988174314 SUCCESS2806PASS/0FAIL/0SKIP plus6backup/all required checks. Ordinary guarded f1667ba1 release38906121310 correctly skipped because newer production source was on main. Effective descendant CI38905734251/job116990268995 SUCCESS2811PASS/0FAIL/0SKIP plus6backup includes the unchanged credit guard; ordinary guarded release38906905459/job116992702206 SUCCESS and independent healthy exact6ddad9c82fb5984296dd9ff369144707c8828124 at 16Oct2026 16:22 Europe/Athens. Both context and a new signed apply require an OPEN matching terminal shift opened on today's Europe/Athens calendar day; an identical completed historical retry remains read-only. Native stale reject preserves financial/stock snapshots and historical replay never inserts another movement. Local Node20 guard full2706PASS/0FAIL/93infrastructureSKIP, focused5PASS/0FAIL/9nativeSKIP; direct source full2706PASS/0FAIL/92infrastructureSKIP, final focused8/0/0 and frontend/TABLE_SERVICE build PASS. CI is not financial LAB PASS.

LIMITED READ-ONLY LAB UI PASS,16Oct2026 15:52–16:00 Europe/Athens, authenticated authorized LAB operator, designated LAB Store Mode, cloud desktop, exact83a0618c after refresh. Earlier pre-release open page still held old bundle; full refresh loaded the new original form. Payments > Supplier payment > New invoice > Credit/return displays a synthetic signed negative value in the initial form. Selecting actual cash return exposes its distinct checked-cash declaration/reason; selecting offset exposes original current-shift payment and a different declaration; balance-only changes the action label and hides cash inputs. All confirmations remained empty and submit disabled with no original/supplier. Close returned to the empty POS without upload, payment, cash drawer, shift closure or stock action. No financial/stock before/after claim. Stale existing LAB shift warning was visible; it was not closed or modified for this task and prompted the matching server guard. Final 16Oct2026 16:22–16:23 Europe/Athens, refreshed exact6ddad9c8: selecting a LAB supplier and cash-return mode shows the backend message that no current-day till exists. Confirmation stayed unchecked, submit disabled and close returned to empty POS; only read context was requested, no financial POST or shift/stock mutation.

Secure Platform Admin email/password +2FA and separate LAB operator PIN completed through native secure forms; no credential values were read or logged. A retained-browser-data restriction after native delivery was recovered through explicit canonical navigation before fresh observation. The wait for credential delivery is not an application error. New credit processing: original form shows negative value before explicit OFFSET or actual CASH_RETURN confirmation, then reuses its durable original and existing audited signed helper. Lost response preserves identical body/key and same handoff. Exact saved POS-confirmed header proof may settle before line OCR; changed settled headers stop and existing PAID/link is preserved while rows complete. Download/scan alone stays noncash; balance-only remains supported. Cash does not change stock; reviewed final posting subtracts mapped products once. Existing real signed credit was never replayed, altered or approved by this page.

Remaining OPEN: one separately identified synthetic original upload and measured signed transaction in a valid current-day isolated LAB till, with cash/card/IRIS/total/stock/audit baseline and unchanged control; verify one negative, same draft, immutable positive, net expected cash and zero stock effect. Actual stock approval, mobile/physical hardware, whole Gate3/09 and original first-payment acceptance remain untested in this continuation. Do not replay real historical payments/credits to fill missing evidence. Single next action is that isolated measured acceptance with the existing owner, or named handoff before another owner changes scope. Active/tracker/pending/manual and both central PDFs synchronized; other report/cash-audit/assistant/invoice owners and previous qualified PASS preserved.

16/10/2026 16:49 Europe/Athens - POS-INVOICE-WORKSPACE-MINIMIZE-01 / ASSIGNED / USER UI GAP

Owner codex/pos-invoice-workspace-minimize-20261016. Independent expansion for invoice workspace/list/order/line-editor minimization; preserve feat/invoice-assistant-minimize's existing assistant lifecycle and all invoice/credit/barcode/catalog/payment owners. User screenshots show the POS entry, invoice list and open order with no minimize control; closing/reopening is needed to serve a customer. Existing assistant-only minimize code/test is protected, not reimplemented or claimed as hosted PASS. Main ebd932b0/current records/manual/history inspected.

Bounded client lifecycle scope: minimize the still-mounted authorized invoice workspace plus its owned nested modals, expose original POS and a reachable restore control; restore identical unsaved field values, opened invoice, scroll and in-flight result without reload/re-reading/save/payment. Add control to list and nested POS order/line headers, preserve explicit close behavior. Existing scannerBlocked includes purchaseOrdersOpen even when assistant hides it: propagate aggregate visibility to unblock normal POS scanner while minimized and block it while restored. Preserve cart, source requests, existing assistant dock, access revalidation/store/permission/logout teardown; hidden stale work must not survive invalid scope or regain access after revocation. No OCR/provider/financial/stock/fiscal/API/schema/auth change. No production sale/save/upload or replay for diagnostics.

Require actual mounted workspace and StorePosPanel integration tests: list/order/dirty line/add form, scanner/cart while hidden, pending result/no duplicate request or write on restore, close/scope/revocation cleanup, existing assistant minimize suite. Full PR/main CI/ordinary guarded exact release and read-only hosted minimize/restore acceptance before LIVE PASS. Physical sale/mobile/touch remain separate. Source edits only after claim merges. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-invoice-workspace-minimize.md.

16/10/2026 16:30 Europe/Athens — VOICE-ASSISTANT-01 / SAME OWNER RESUME / INDEPENDENT NAME FIX AUTHORIZED

Owner codex/assistant-business-queries-20261015 retained; user explicitly requested restart with standing authorization for assistant corrections. Read latest main through34037f25d and latest dialogue/name checkpoints; no competing voice owner or assistant-source change since export PR2569. Public health on resume reports exact6ddad9c82fb5984296dd9ff369144707c8828124, a main descendant containing the unchanged assistant source. New secure Super Admin sign-in/2FA completed through native protected fields; no credentials were read, stored or published. Normal selected-store read-only FROM11 -> short TO -> short12 again displayed expected direction/date/source. Private business details omitted.

Actual CSV file acceptance is still UNKNOWN/OPEN: native credential protection refused download observation. Supported canonical new-document recovery succeeded for normal UI, but download observation was again restricted. No further browser recovery loop, credential bypass, guessed file path or business transaction. This is a browser capability blocker, not a new application failure or a file PASS. Previous limited dialogue PASS remains protected.

Ordering clarification before source edits: the earlier page-authored requirement to finish CSV acceptance before the independent name correction is superseded here. CSV download verification and full-name matching have no causal dependency; a browser file-observation failure must not stall an already authorized independent source fix. Root AGENTS claim/CI/exact-release/LIVE-evidence gates remain unchanged. The conservative name scope was already claimed and merged in PR2570/ff615a3b. Branch fix/assistant-actor-inflection-20261016 will implement only that scope after this resume record merges: transfer-only exact-first, full Greek operator name tokens, optional terminal sigma, one distinct eligible stored name, ambiguity clarification; no broad stemming or label/supplier/product matching. Preserve all source/auth/store/status/calendar/cap/reversal/duplicate/arithmetic/export guards and existing provider/model/key.

Require focused negative/positive regression coverage and full native PR/main CI before ordinary guarded release. Named-query hosted acceptance remains AWAITING LIVE until actually observed; CSV file acceptance stays separately OPEN. Physical microphone, hosted Owner and advanced business domains remain unfinished. Whole VOICE-ASSISTANT-01 OPEN. No financial/stock/fiscal/schema/auth mutation or transaction replay. Checkpoints: CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md, CHECKPOINTS/CHANGES/2026-10-16-assistant-actor-inflection.md.

16/10/2026 16:23 Europe/Athens - POS-INVOICE-MAPPING-ACTOR-01 / SOURCE RELEASED / AWAITING USER POS SAVE

Retained owner codex/pos-invoice-mapping-actor-20261016. SourcePR2579 final5fe030740b130b5f0fc167eef957023fb47320e5 merged6ddad9c82fb5984296dd9ff369144707c8828124. Full PRCI38905055868/job116986606903 SUCCESS2810PASS/0FAIL/0SKIP plus6backup; exact mainCI38905734251/job116990268995 SUCCESS2811PASS/0FAIL/0SKIP plus6backup, all required native PostgreSQL/Windows/browser/build/invariant/realHTTP checks completed. FirstCI38904488092 had2809PASS/1 old source-call expectation FAIL; new native tests passed. Updated that expectation to validated actor context, retained all learning/economics assertions. Earlier ordinaryguard38906121310 correctly deferred pending newer sourceCI. Exact ordinaryguard38906905459/job116992702206 SUCCESS; Renderdep-db928qnf3r2c73frk180 LIVE exact6ddad9c at13:21:24UTC, independent no-cache public health oktrue/exact6ddad9c confirmed. No manual deploy, schema/FK/permission change or production business mutation.

Confirmed cause: POS STORE_OPERATOR ID was passed directly to SupplierProductMapping.confirmedByUserId, which references User, producing PostgreSQL23503 inside learnConfirmedLineCorrection. Backoffice success is USER-reported existing behavior, not acceptance of new POS source. New helper excludes POS credentials even if IDs collide; resolves existing same-company ordinary User or explicit authenticated platform SuperAdmin account; missing/deleted/foreign ordinary accounts are not falsely attributed. Original operator/actor stays in unchanged INVOICE_LINE_CORRECTED Audit. Actual mapping insert/update, prices/discounts/pack learning, line update and Audit remain atomic; genuine downstream errors propagate and rollback. SuperAdmin-only central profile and all tenant/store/module/order guards preserved.

New native actual learning function tests reproduce legacy real-FK failure, validate POS insert/update and Backoffice/platform attribution, foreign/deleted/collision cases and rollback of line/mapping/Audit. Local3PASS/2nativeSKIP kept distinct from full nativeCI. Existing reported draft/line identified read-only; user subsequently saved in Backoffice. No repeated upload/payment/approval/stock/finalization or replay performed by this page. No new hosted POS save, no new LAB/manual PASS. Single next action: during the next legitimate review of a NEW draft in authorized POS, save one edited mapped line and confirm no internal error and the same line plus named operator Audit remain. Do not resubmit the already processed invoice just for testing. A state-changing agent LAB test requires a new published baseline/control first. Other credit/second-draft/OCR/retail/catalog/cash/assistant and broader09/Gate3 owners remain assigned unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-invoice-mapping-actor.md.

16/10/2026 19:12 Europe/Athens — POS-BARCODE-PENDING-01 / COMPACT SOURCE LIVE / AWAITING USER / HANDOFF

Retained owner codex/pos-barcode-pending-20261016. User rejection of yellow main-POS row is authoritative USER LAYOUT FAIL; no prior overall visual PASS is implied. Correction source PR2597 finalhead5a10e5608d78c3ebc2879c65e645663ebfd81d6b/fullPRCI38927383946/job117062481991 SUCCESS2830PASS/0FAIL/0SKIP plus6backup/all required checks. Merge17873d177a170d386ee0feb0da11a6a14e08fdc7, exactmainCI38928119129/job117067606632 SUCCESS2836PASS/0FAIL/0SKIP plus6backup/all Windows/build/native PostgreSQL/browser/invariants/HTTP checks; concurrent cash-evidence tests preserved. Ordinary guarded Render38929664084/job117070174842 SUCCESS; health log16:12:03UTC confirms oktrue/version0.22.0+kat-test-pos/exact17873d177a170d386ee0feb0da11a6a14e08fdc7. Earlier guard38928884067 correctly skipped stale deployment, not release proof. No manual deployment, data/schema/auth/fiscal change.

Removed the standalone yellow notice and its extra row/button. Existing Barcode action now shows only Barcode · count with accessible full missing-barcode description/status. Existing selected-store counter, polling/focus/reopen/save refresh, missing-only modal/filter/pagination and all-product search remain. Main POS no longer renders pos-barcode-notice. Existing mounted operator regression requires absence of the row and count5 on the original action, while retaining cart/live permission/price/cancel/payment/scanner checks. Separate collapsed-header/resize and invoice-workspace owners preserved. ClaimPR2596/docsCI38926852490 mergedf76a948b before source. Initial sourceCI38927042076 failed administrative active-list gate before runtime tests; corrected by including active checkpoint, with no concealed runtime test result. Local runtime unavailable: local tests and hosted/physical UI NOT TESTED, no synthetic result called USER PASS.

Actual compact indication readability and recovered selling space remain AWAITING USER. Additional latest screenshot details cannot be inspected because supplied local paths are unavailable; ask for a short text description rather than invent which other controls to shrink. No takeover of separate header work or speculative global layout change. Roshen separate-card data review remains unresolved; no barcode transfer/product merge/price/stock/business write or transaction replay. Existing manuals remain unchanged because no new actual PASS; preserve canonical PDFs until real scoped closure.

Single next action: with no checkout in flight or unsaved work, owner safely Ctrl+F5 and confirms that yellow row is absent, existing Barcode count opens the same pending list and POS selling area is usable; describe the extra screenshot targets in text. No new diagnostic sale/save/payment required. Keep assignment with retained owner until acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-barcode-pending.md.

16/10/2026 18:47 Europe/Athens — POS-BARCODE-PENDING-01 / USER LAYOUT FAIL / CORRECTION ASSIGNED

Retained owner codex/pos-barcode-pending-20261016; correction branch fix/pos-barcode-compact-20261016. User rejects the full-width yellow POS notice because it reduces selling space. Remove only that extra row; keep the read-only selected-store count as a compact number on the existing Barcode action, with accessible missing-barcode description and unchanged modal/filter/refresh behavior. No payment/cart/scanner/data/API change. Existing POS-HEADER-COLLAPSE-01 and header resize owners retain their separate layout work; additional screenshot details cannot be inspected in the unavailable local environment and are not guessed. This is USER FAIL for banner layout, not barcode data evidence. Preserve previous modal/transfer/manual PASS and concurrent invoice/header changes. Required mounted regression/full CI/normal guarded release and actual visual acceptance remain pending. Same checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-barcode-pending.md; no new PASS or manual closure. Claim publishes before source.

16/10/2026 17:08 Europe/Athens — POS-BARCODE-PENDING-01 / SOURCE LIVE / AWAITING USER / HANDOFF

Same retained owner codex/pos-barcode-pending-20261016; sourcePR2584 finalhead0d1deb0cde3e868488cabd990e44908c404adae9/fullCI38911503674/job117008405642 SUCCESS2828PASS/0FAIL/0SKIP plus6backup and required Windows/build/native PostgreSQL/browser/invariants/HTTP checks. Merged0357bb05bebdb532408b78bd25a18850d2206621; exact mainCI38912315431/job117011180620 same2828/0/0 plus6backup/all required checks SUCCESS. All6 owned runtime blobs on the merge match tested source. Ordinary guarded Render38912963505/job117013205319 SUCCESS; exact healthy0357bb05 observed in guard14:07:52UTC and independent public read14:08UTC, version0.22.0+kat-test-pos. Served /assets/entry-DCG9CL1j.js SHA256e50b170d189c1f5013310c4e8d312eed5da9e4638ce84ed52bd793507d09c30d contains pos-barcode-notice, missingOnly and Greek pending message. This is SOURCE LIVE/asset evidence, not authenticated POS UI or a business PASS. No manual deployment, schema/production-data repair or fiscal change.

Delivered: main POS notice «Υπάρχουν Χ είδη χωρίς barcode» with «Προβολή ειδών»; Barcode action/modal complete current-store count, missing-only filter and250-row pagination. Direct nonblank variants and explicitly linked master aliases honor existing same-company ownership exclusions. Same names never suppress another Product ID. Own successful save removes resolved items from pending mode; all-product search remains for extra codes. Refresh on reopen, focus/visibility,60-second visible polling and save/conflict. Read errors remain unknown, never false zero. Old store/query/page replies and post-unmount save callbacks are discarded; save and its editable controls lock while in flight. Existing POST/price approval/Audit/shared stock/printing/fiscal/tenant/module permissions retained.

Focused final mounted/route/operator checks5PASS/0FAIL/1nativeSKIP locally; final CI supplies native proof, including303pending across pages, direct/master/claimed/blank codes, inactive/disabled/foreign/control exclusion, zero-write reads and fixture resolution. Earlier local full2711/1FAIL/96SKIP (old literal Barcode launcher assertion) is historical and corrected by preserving the label-prefix check plus mounted actual notice proof. Subsequent local full2719/1FAIL/96SKIP failed an unrelated five-photo timing assertion; unchanged isolated rerun9/9PASS. These are not rewritten as local full PASS; exact final PR/mainCI is authoritative2828/0/0.

Hosted acceptance BLOCKED/NOT TESTED: normal authenticated SuperAdmin support LAB Backoffice was readable; Store Mode required LAB POS2 login. First secure credential request was interrupted by the configured short runtime timeout; subsequent native credential state could not safely resume. Retained-tab canonical navigation recovery was also refused. Submission/login result unknown; no credential value read, inferred login, auth bypass or business action. Actual hosted notice/filter/pagination/auto-refresh, physical scanner/touch/mobile and real barcode save/readback remain

AWAITING USER. No new manual/PASS closure or old sale/payment/stock/barcode transfer replay. Actual Roshen card identities were not independently read or merged; a genuinely separate no-barcode card must remain pending even if another card has the same name. All prior owners/PASS, including completed No13 transfer/readability/scanner scopes, remain unchanged.

Single next action: owner, with no checkout or fiscal action in flight and an empty cart, refresh normal POS (Ctrl+F5), inspect notice → Προβολή ειδών → missing-only list/count and send one screenshot for initial visual acceptance. No diagnostic product/save/payment/shift closure is required. Owner remains assigned until observed acceptance or a named handoff; no second page should retake the implemented source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-barcode-pending.md.

16/10/2026 16:12 Europe/Athens — POS-BARCODE-PENDING-01 / ASSIGNED / NOT TESTED

Independent owner codex/pos-barcode-pending-20261016, source branch fix/pos-barcode-pending-20261016. Explicit user request: live selected-store missing-barcode list, remove resolved products, show full missing count and open missing items. Read AGENTS, current central assignment records and relevant POS/barcode transfer manuals/checkpoints; source baseline6ddad9c. Existing modal readability USER PASS and barcode-transfer/ownership/scanner/label/price permissions remain protected. No takeover of inventory merges, scanner/catalog, invoice or other assigned work.

Source evidence: registration GET returns first250 active selected-store products ordered by missing barcode, no global missing count or missing-only filter. Modal reloads after its own successful save but not focus/visibility changes or a rejected duplicate conflict; selected detail can remain stale. Screenshot conflict text is emitted only when the entered code belongs to another Product ID; same display name is not proof of same identity. Do not hide or merge distinct no-barcode products by name, transfer barcode, change prices or run real-store diagnostic writes. Roshen duplicate identities/data resolution remain NOT TESTED and require explicit card review separately.

Bounded scope: read-only full active-store missing count, explicit missing-only results with paged continuation, automatic refresh on reopen/focus/visible polling and after save/conflict, stale store/request protection, visible count/empty/error state and existing all-product search for additional barcodes. Count all nonblank stored barcode variants without EAN13-only validation; label EAN validation unchanged. Preserve company/store/permission guards and existing POST semantics, Audit, fiscal/stock/payment. Native route and mounted UI race/count/refresh regressions, frontend build/fullCI/mainCI/ordinary guarded exact release and actual hosted acceptance required. Current new behavior NOT TESTED, no manual PASS or financial/stock mutation. Claim must merge before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-barcode-pending.md.

17/10/2026 23:13 Europe/Athens — AUTO-REPORTS-20261016 / WEEKLY PREVIEW SOURCE LIVE / AWAITING READ-ONLY LAB / HANDOFF

Retained owner codex/automatic-reporting-20261016; source feat/weekly-cash-final-20261017; issue2527. Explicit publication approval22:24Athens. ClaimPR2661/docsCI39062429511 SUCCESS merged d60a41f5 before source. Initial sourcePR2663 is superseded/closed: nativeCI39062697079 on5fbd486e had2904PASS/1FAIL/0SKIP, solely omitted explicit24-hour display. Fixed runtime hour12:false without weakening any assertion. Final sourcePR2671/head340e0dfe76a482a03c32680ec48bea87ee12ebc3/fullPR CI39064694086/job117489856112 SUCCESS2910PASS/0FAIL/0SKIP plus6backup and all required Windows/build/Chromium/invariants/realHTTP. Merged891262f96cd3270d4fc0e53997851624ea6685d2; exactmainCI39065083322/job117491021396 SUCCESS2915/0/0 plus6backup/all required checks. Native fetched git diff on all8runtime/test paths proves source and merge identical. Subsequent inventory release record d1d77878 is documentation-only and retained.

Ordinary guarded Render39065506885/job117492230779 SUCCESS: deployment pinned891262f requested20:10:02UTC17Oct; actual exact healthy20:13:16UTC, oktrue/version0.22.0+kat-test-pos/revision891262f96cd3270d4fc0e53997851624ea6685d2. Earlier guard39065086884 correctly skipped an older source while waiting for new CI; its SUCCESS was never treated as release proof. No manual deploy, infrastructure/schema change or production business mutation. Durable scoped evidence CHECKPOINTS/EVIDENCE/automatic-report-settings-20261016/weekly-source-release-20261017.json.

Implemented source/UI: optional saved-settings WEEKLY preview, Monday first morning through Sunday night assigned to that week, next Monday06:00/07:00 per-store boundary and actual closure readiness. All7days/configured terminals/required slots are checked in one repeatable-read snapshot, including carry-in ambiguity. Missing/open/late/unknown/duplicate/foreign/capped or changed-rule/settings data holds whole-week totals. Day/POS/delivery/operator original amounts remain separate and employeeLiabilityAdjustedfalse; default DAILY request compatible. UI shows Greek24-hour period and day-specific holds; readiness is source completeness, not exhaustive financial audit or final employee liability. Existing manual mail/recipient/role/licensing/fiscal and protected expense results unchanged. No automatic dispatch/outbox/SMTP activation or accepted transaction replay.

Actual browser: canonical Platform Admin sign-in; secure first step advanced to2FA, but second step visibly returned 'Η επιβεβαίωση έληξε. Συνδέσου ξανά.' No weekly authenticated UI/physical/operator/financial/SMTP PASS. No credential values or sign-in screenshots stored. Read-only LAB acceptance is NOT TESTED; manual takeover is needed to complete sign-in. Prior real settings/save/reopen/HOLD and expense evidence PASS protected, no repeated Save/payment/shift close. No new manual PASS entry.

Single next action: complete normal SuperAdmin sign-in in the existing browser, open selected LAB → Αναφορές ταμείων → Εβδομαδιαία, inspect correct Monday–Sunday bounds and day-specific whole-week HOLD, then another selected store without Save/send. Publish only actual scoped observations afterward. Broader central evidence/finality/channel disclosure, scheduler/outbox/fresh role/store/license/recipient checks/deduplication/SMTP uncertainty, monthly cash by employee, expenses/payroll, shortages/unposted invoices/margin/supplier/order/turnover/workload and original14 requirements remain OPEN. Original invoice/assistant/supplier owners retained; full requirements in CHECKPOINTS/CHANGES/2026-10-16-automatic-reporting.md. Ownership remains here until completion or named handoff.

17/10/2026 — AUTO-REPORTS-20261016 / WEEKLY PREVIEW SOURCE READY / AWAITING NATIVE CI AND LAB

Retained owner codex/automatic-reporting-20261016, source feat/weekly-cash-source-20261017. Explicit publication approval22:24Athens. ClaimPR2661/head02387f65/docsCI39062429511 SUCCESS merged d60a41f5daa14cfeb78a9d90f401f8ae1a7efc10 before source. Implemented optional DAILY/WEEKLY saved-settings preview; default old DAILY request unchanged. A selected week resolves Monday first morning through next Monday boundary in Europe/Athens, using saved per-store day start. Every day receives its own configured terminal/slot/carry-in readiness checks from one repeatable-read source snapshot. Any incomplete/open/unknown/duplicate/foreign/late/future/capped source or changed rule/settings holds all totals. Original daily/POS/delivery/operator groups and no liability adjustment preserved. Weekly UI explicitly states seven-day closure requirement, actual Greek period bounds and day-specific holds. No schema, writer, fiscal, licensing/auth, recipient, manual-send policy, actual mail or automatic delivery activation.

Local Node20 focused22PASS/0FAIL/0SKIP before final mounted/native additions; new native real HTTP test extends existing isolated PostgreSQL fixture with21week shifts, Monday–Sunday bounds, owner/unknown-frequency denial, Sunday-open whole-week hold, restore and unchanged source/control snapshots. Final additional Node20 mounted2PASS/0FAIL/2native-infrastructureSKIP; production client build2384modules/TABLE_SERVICE PASS. Mandatory full PR/mainCI/exact ordinary release remain pending. Native infrastructure/hosted/physical/SMTP acceptance is not inferred from local tests. No manual PASS entry. Broader central finality/disclosure, automatic dispatch/outbox and original14 requests remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-weekly-cash-preview.md. Single next action: full native CI, exact ordinary guarded release and read-only selected-LAB weekly preview; never repeat protected accepted expenses or change shift state to manufacture acceptance.

17/10/2026 21:50 Europe/Athens — AUTO-REPORTS-20261016 / WEEKLY BUSINESS-SHIFT PREVIEW / ASSIGNED

Retained owner codex/automatic-reporting-20261016; source feat/weekly-cash-preview-20261017; issue2527. Owner explicitly confirmed day starts06:00 or07:00 per store, ends after third shift next morning, and week Monday first morning through Sunday third closure Monday morning. Continue authorized source/CI/merge; no new delivery activation or actual email. Baseline66235c4; reviewed intervening assistant/EFTPOS/inventory/scan/company claims and preserved all respective owners. The unpublished earlier disclosure proposal is deferred, not implemented or claimed on main.

Bounded next change: extend existing selected-store read-only saved-settings preview to an explicit DAILY/WEEKLY frequency using the existing Greek business calendar; evaluate every day and all configured terminals/slots, hold whole week for any missing/open/ambiguous source, cap or changed rule/settings. One repeatable-read source snapshot, original amounts and day/POS/STORE-versus-DELIVERY isolation preserved. Default DAILY remains backwards compatible. Weekly UI identifies Monday–Sunday and next-morning exclusive boundary; ready means source readiness only, not full financial certification. No schema/writer/recipient/license/auth/fiscal/manual-email policy change. No scheduler/outbox/SMTP activation or transaction replay.

Existing Node20 policy7PASS remains local code verification, not hosted/LAB PASS. Latest limited live installment evidence and automatic settings/save/reopen/HOLD preview PASS protected; protected LAB-EXP transactions never replayed. Weekly source/HTTP/UI/native integration, exact full CI/main/deploy and read-only LAB acceptance NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-weekly-cash-preview.md. Single next action: publish claim green on main, implement bounded weekly source/preview with meaningful regression tests, then exact ordinary release/read-only acceptance. Automatic dispatch and other original requirements remain OPEN with retained owner.

16/10/2026 23:50 Europe/Athens — AUTO-REPORTS-20261016 / INSTALLMENT EVIDENCE SOURCE LIVE / LIMITED UI AND SOURCE EVIDENCE / HANDOFF

Retained owner codex/automatic-reporting-20261016, source branch fix/cash-expense-evidence-20261016, issue2527. Claim2630/head3c30df41420845983e0622289f48d5f1334c764d/docsCI38960829699 SUCCESS merged866bece before source. Ordinary Render guard38964369849/job117187118066 SUCCESS: pinned6b498d2 at20:45:20UTC, exacthealthy6b498d2 at20:47:22UTC16Oct/version0.22.0+kat-test-pos. All11 source/test blobs match final accepted head. Concurrent invoice QR/assistant CSV records preserved. No manual deployment/migration or safeguard bypass. Initial eb039552/run38961530417 cancelled; ec966ec6/run38961899855 had2877PASS/3old route-text assertionFAIL/0SKIP, native new aggregate PASS; final tests preserve requirements through shared-service delegation and real handler cases. No runtime guard relaxed.

Released shared read-only company/store/document-bound expense settlement evidence in Platform investigation, cloud investigation and cloud daily report. Distinct active payments aggregate across dates/sessions, CASH_SHIFT and EXTERNAL remain separate; legitimate equal/cent installments retained. Approved positive exact-cent agreement permits MATCHED, partial is PARTIALLY_PAID, overpayment AMOUNT_MISMATCH, image-only/missing/unapproved/malformed/unavailable sources unverified. Original selected-period totals/variance/review balance unchanged, no second deduction or EXTERNAL cash assignment. Labels disclose lifetime totals/source split. Protected document/payment/VAT/stock/fiscal/closing/auth/license/settings/email writers unchanged. Local focused43PASS/0FAIL/1native infrastructureSKIP, build PASS; final native CI unskipped above.

Actual normal hosted SuperAdmin desktop read-only UI after exact release: canonical Platform Admin -> Ταμεία -> ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ -> Εβδομάδα16Oct/12–18Oct -> Εμφάνιση -> Αναλύσεις. Selected LAB only,3closed shifts/cash shortage0/surplus0/net0/POS-EFTPOS0,2missing-document expenses. The LAB-POS-02865e6a48 shows original23EUR at11Oct11:52 and1EUR at14:06 Athens as no-document findings. No false document amount agreement, no change to original0 or review0. Prior MAIN corrected pair still explicitly net0/already in cash/no second subtraction; previous-5.50 context retained. The third current weekly rowc726d8de closed16Oct19:48UTC, before this slice/claim/release; its appearance versus old22:19 UI's2rows is independently stored pre-existing closure, not an agent close or measured economic delta. Open next MAIN remains unknown. Existing carryover123 and unassigned event groups23/21/14 remain unresolved, not validated causes or invoice findings. Whole result remains PROVISIONAL. One permitted canonical navigation recovered a reload credential-observation restriction, with fresh positive signed-in evidence; no credential values inspected/entered, new tabs or auth bypass. No Save/review, send, export/print, sale/payment/return/open/close or replay.

Independent read-only original Render DB at20:50UTC matches current week3closed/0variance and document data. Exact released aggregate confirms APPROVED124:3payments31+31+62, EXTERNAL124/CASH0; APPROVED1.24:3payments.03+.03+1.18, EXTERNAL1.24/CASH0; both invalidPaymentCount0. Three persisted active cash expenses23+1+3 total27 have no image/document, two selected-week expenses total24. Exact released helper evaluated locally on these actual persisted rows yields6MATCHED EXTERNAL installments and3NO_DOCUMENT cash rows. That local evaluation is NOT a hosted HTTP invocation, cash-installment UI PASS, new payment/VAT/stock effect or original physical-document validation. Protected LAB-EXP-PARTIAL/CENT and original owner's acceptance remain; never replay. Actual linked CASH_SHIFT installment/partial/overpayment/image-only/unapproved/foreign/unavailable UI acceptance remains NOT TESTED; native regressions do not replace it.

Evidence CHECKPOINTS/EVIDENCE/cash-central-review-20261016/expense-evidence-live.jpg (same emitted unmodified screenshot), modal-only expense-evidence-live.txt, expense-evidence-reader-select.json (exact aggregate, raw connector results, separate scope SELECT and explicitly local evaluation). Relevant manual docs/manual/reports/PASS.md updated only for the limited observed hosted usage/source boundaries. No real-store financial/contact data from initial all-store loading retained in evidence.

Whole central audit/all14 remain OPEN/ASSIGNED. Full physical/source truth, all payment/document UI cases, broader cross-shift corrections, nonzero/stale actual review, named owner receiver with existing POS owner retained, common policies/readers/export/print and automatic lifecycle/outbox/scheduling/SMTP/activation/delivery remain. Single next action: read-only map remaining cash report/export/email consumers against shared evidence and provisional/finality policy, then publish a bounded claim before any source; preserve other owners and do not replay accepted business movements. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / INSTALLMENT EVIDENCE SOURCE READY / AWAITING CI AND LAB

Retained owner codex/automatic-reporting-20261016, branch fix/cash-expense-evidence-20261016, issue2527. ClaimPR2630/head3c30df41420845983e0622289f48d5f1334c764d/docsCI38960829699 SUCCESS merged866bece960f0d59d4f3b15de194f61c3ae8f519b before source. Shared read-only cash expense evidence now resolves PurchaseDocument by company/store/id, totals distinct active owned payments across all dates/sessions and separates CASH_SHIFT/EXTERNAL amounts. Approved positive exact-cent total permits MATCHED; partial payments are PARTIALLY_PAID, overpayment AMOUNT_MISMATCH, image-only/missing/unapproved/invalid/unavailable sources explicit unverified. Reversed payments excluded. No comparison of each installment to full gross, no merging equal installments, no EXTERNAL assignment to a cash shift, no second deduction. Platform investigation, cloud investigation and cloud daily report use the same reader. Labels disclose lifetime totals/source split and no automatic cash adjustment. Selected-period totals, original variance/review balance, tenant/role guards and expense/VAT/stock/fiscal/payment writers unchanged.

Local Node20 expanded focused43PASS/0FAIL/1native infrastructureSKIP; initial focused25PASS/0FAIL/1native infrastructureSKIP; actual extracted Platform/cloud/daily handlers preserve original-5 variance and selected-period31 expense while lifetime document settlement124 includes31cash+93external. Equal31/31/62 and cent.03/.03/1.18, partial/overpayment, image-only/unavailable/unapproved/malformed/reversed sources, bounded reader, immutability and actual copied label tested. New isolated PostgreSQL fixture executes real aggregate with cross-date, foreign-store/company, reversed/unrelated type exclusion and before/after zero-write/control assertions; awaits native CI, not claimed local PASS. Frontend/TABLE_SERVICE build PASS. Integration preserves current invoice QR and assistant CSV acceptance records from main7a2b858; no runtime change from initial sourcehead eb039552. Full exact PR/main CI and ordinary guarded exact release required before hosted acceptance. Initial full native PRCI38961899855/job117179451779:2877PASS/3FAIL/0SKIP; the real new PostgreSQL aggregate/zero-write fixture PASSED. The three failures were old route-text token assertions after moving expense checks into the shared service. Preserve their original missing-document/amount/audit requirements by checking the shared functions and actual route delegation; extend actual Platform/cloud handlers through MATCHED, NO_DOCUMENT, PARTIALLY_PAID, AMOUNT_MISMATCH and DOCUMENT_UNRESOLVED with unchanged original-5 and no automatic cash deduction. No runtime guard or expectation relaxed; rerun complete CI. Initial eb039552/run38961530417 cancelled by integration update; not accepted. Protected actual partial/VAT fixtures are not replayed; no new manual PASS. Whole central audit/all14 OPEN; broader source/physical validation, cross-shift corrections, owner receiver, full readers/export/automatic email lifecycle remain. Single next action: full exact CI/release then scoped read-only existing LAB expense evidence acceptance, without creating/reversing/paying a document. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 23:10 Europe/Athens — AUTO-REPORTS-20261016 / INSTALLMENT-AWARE EXPENSE EVIDENCE / ASSIGNED

Retained owner codex/automatic-reporting-20261016, branch fix/cash-expense-evidence-20261016, issue2527. Main78e1875 includes read-only source classification and repaired exact active history. Protected existing LAB partial31+31+62=124 and cent.03+.03+1.18=1.24 are EXTERNAL, not cash; no payment replay. Prior exact correction links, periods/isolation, signed review balance and other owners/manual PASS retained. Source gap is code inspection, not an asserted hosted cash installment FAIL. New behavior NOT TESTED.

Bounded claim: shared read-only owned PurchaseDocument resolution and active-payment aggregation for Platform/cloud cash expense evidence. Match exact company/store/document, aggregate distinct valid active supplier/expense payments across dates/sessions, separate CASH_SHIFT and EXTERNAL amounts, compare paid total to approved positive document gross in cents. Genuine equal installments remain distinct. Partial payment is partial, not a per-row full-invoice mismatch; missing/foreign/unapproved/invalid/unavailable sources and attachment-only evidence never certify

MATCHED. Overpayment stays reviewable. Selected-period cash totals and original ledger/review balances remain unchanged; no cash assignment of EXTERNAL, second deduction, VAT allocation/writer/schema/auth/license/stock/fiscal/settings/email changes. Broader invoice/profitability/POS owners retained.

Required regression: protected equal/cent installments, cross-period mixed sources, reversed/foreign rows, missing references, image-only, partial/overpayment, invalid/unapproved document, zero-write invariants and real isolated PostgreSQL reader. Full exact PR/main CI and ordinary guarded exact release precede hosted read-only acceptance. No manual PASS from CI. Whole central audit/all14 OPEN. Single next action: after this claim is green/merged, implement the shared evidence reader and integrate the existing cash readers only. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 23:00 Europe/Athens continuation — AUTO-REPORTS-20261016 / READ-ONLY EXPENSE SOURCE SCOPE / OPEN

Retained owner codex/automatic-reporting-20261016, issue2527. Current main03fa3d6 and latest central checkpoint/manual/PASS read; prior correction-link LIVE PASS2626/7ab8844 and all other owners protected. Read-only Render queries in already confirmed My Workspace/original myworkstation-db, exact LAB companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru. No runtime/source/writer/settings/review/financial/stock/fiscal/email/infra action or transaction replay.

Independent persisted-source confirmation: active October SUPPLIER_PAYMENT/OTHER_EXPENSE rows divide into10 EXTERNAL/subtractFromShiftfalse/no-session movements totaling278.58 and3 subtractFromShifttrue/session-linked movements totaling27.00. Session absence is expected for EXTERNAL; these rows must not be assigned to a POS shift or deducted from its cash. Exact active cash expenses are23+1 in LAB-POS-02865e6a48 and3 in88e654a5, without images/doc references. This confirms source classification, not a new cash delta or full expense/payment UI PASS.

Existing APPROVED LAB invoiceexpense_2ad4fc2f (gross124) has3active payments31+31+62=124; expense_70b2dde6 (gross1.24) has3payments.03+.03+1.18=1.24. These are the already accepted EXTERNAL LAB-EXP-PARTIAL-20261005-A and LAB-EXP-CENT-20261005-A, protected in profitability manual and05Oct checkpoints. Equal installments are distinct valid movements, not duplicates; full invoice value is not the expected value of each installment. Approval/payment/VAT before/after PASS is inherited only from its original owner, not claimed from today's after-only SELECT. Existing invoices2/one payment and124/one payment also agree. No new invoice/payment was submitted, reopened for mutation or replayed.

Read-only code inspection identifies a bounded residual: cash expense checks compare each linked payment amount with full document gross, mark generic evidence as MATCHED without proving invoice resolution, and PurchaseDocument joins use ID without explicit joined company/store. Actual sampled installment rows are EXTERNAL and outside session-only cash checks, so no hosted cash-installment FAIL or foreign-document exposure is asserted. A next source slice must preserve payment-source separation, distinct equal installments, existing partial/VAT allocation/PASS and tenant/store ownership, without taking over expense writers/profitability owners. Missing reference/image-only evidence is not proof of amount reconciliation. Evidence CHECKPOINTS/EVIDENCE/cash-central-review-20261016/expense-payment-scope.json; no binary attachments or private foreign document data read.

Administrative repair in this same record: active list7ab8844 lacked exactly the first393216bytes of the retained local full file. Byte comparison proves local[393216:]==published7ab8844 and current main retains that exact suffix after the newer POS22:57 release header. Restore only the missing original prefix, retain every current later header, then insert this owner status. Other manual/DOM/screenshot/SQL evidence bytes match current main. Verify every uploaded blob SHA against local git hash-object before commit. No runtime repair or new product PASS is implied.

Whole central audit/all14 remain OPEN/ASSIGNED. Source/physical truth, full payment/document reconciliation, broader cross-shift corrections, nonzero/stale review cases, named receiver with other POS owner retained, common policies/readers, export/print and automatic lifecycle/outbox/scheduling/SMTP/activation/delivery remain. Single next action: publish a bounded claim for shared read-only expense-document ownership/resolution and installment-aware evidence validation before source; validate against protected existing fixtures through isolated/native tests, never replay their payments. This record is source classification evidence, not a claim that the residual is implemented. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / EXACT CORRECTION LINKS SOURCE LIVE / LIMITED LIVE LAB PASS / HANDOFF

Retained owner codex/automatic-reporting-20261016, branch fix/cash-correction-links-20261016, issue2527. ClaimPR2622/finalc25cb27f/docsCI38954514157 SUCCESS merged31e072fd before source. SourcePR2624 finalfac8f4bb22bcaf5dedc39098b4e6960b8bac8351. Final full PRCI38955558430/job117157897864 SUCCESS2863PASS/0FAIL/0SKIP plus6backup and all mandatory Windows/native PostgreSQL/Chromium/build/invariants/realHTTP checks. Merged8114fe682029129a899e35c84b9a603609cc866d. Exact mainCI38956256151/job117159977410 SUCCESS2863PASS/0FAIL/0SKIP plus6backup/all required checks. Ordinary Render38956975500/job117162245891 pinned8114fe68 at19:43:51UTC and verified exacthealthy8114fe68 at19:45:54UTC16Oct/version0.22.0+kat-test-pos. No manual deploy. Five local owned source/test blob hashes equal merged revision.

Implemented bounded read-only evidence grouping: exact owned company/store/session and anchored correction/original sale IDs, completed POS_REVERSAL, negative ledger amounts and matching full payment method/total validate existing corrective movements. Reversed/foreign/wrong-session evidence cannot cover candidates. Orphan, inconsistent, repeated, over-corrected or ambiguously reused correction identities remain recheck; unavailable/over-cap sources remain unknown. Explicit same-session post-close corrections retained. Original candidate/confirmation, variance, review totals and selected-period sums unchanged. Each candidate original shows correction IDs/time/amount/ledger IDs plus full/partial/no correction and recorded net; pair net is informational. Same label in Platform Analyses/clipboard/written paragraph says already in cash/no second subtraction; absent receiptNumber is a sale identity, not a fictional fiscal number. No financial/review/closing/stock/fiscal/auth/license/schema/settings/email/infra write, no replay, no manual deployment. Broader policies/cross-shift/all-reader/full reconciliation remain OPEN; other owners protected.

Local Node20 focused24PASS/0FAIL; final ambiguous-reuse follow-up6PASS; initial10PASS/1nativeSKIP, frontend/TABLE_SERVICE build PASS. Actual earlier captured LAB source pair regression yields zero recorded net without changing original-5.50. New pure/real-reader/copied actual UI+written paragraph tests cover complete/partial/none/invalid/over/source failure/limits, split methods, exact IDs, foreign/session/reversed exclusion and immutability. Isolated real PostgreSQL fixture executes actual regex/joins/payments, full and post-close correction, zero-write before/after counts/sums, reversed/wrong-session exclusion and orphan unknown. Superseded fa8fac7e/38955384938 cancelled; final exact CI above is authoritative.

Additional actual read-only SQL proof before release: the exact new reader SELECT, with concrete known LAB scope, ran through Render read-only transaction and returned exactly two owned correction rows aa7ebb62/-1 and ff12195f/-1 with existing ledger IDs/source/status/payments matching receipt2620. No business write or source mutation; this verifies SQL against stored rows, not the hosted new grouping. Earlier limited UI/source match/manual receipts2618/93391fb and2620/d403ef5 protected.

LIMITED actual LIVE LAB PASS after exact release: canonical authenticated SuperAdmin, LAB/week12–18Oct00:00–23:59,2closed shifts/original deficit0/surplus0/net0 unchanged. Analyses MAIN3a186861 displays first sale005c2651→cancellationff12195f/-1/ledgerb4e13a9e and second54cfc0ab→returnaa7ebb62/-1/ledger269a7048, full amount already corrected, each recorded net0, pair recorded net0/no second subtraction; identity/time/product/amount match stored source. Missing fiscal number explicitly labelled sale identity. Previous MAIN-5.50 remains in context, open next unknown and global report remains provisional. No Save/send or financial replay. Initial display click timed out but fresh AX proved applied requested week, no duplicate click/action. Actual modal DOM and original screenshot captured in correction-links-live.txt/.jpg; underlying unrelated company/contact DOM omitted. Reports manual updated only for this observed scope. Partial/inconsistent/cross-shift corrections and nonzero review cases remain CI-only or future hosted acceptance; clipboard/exports/print/Owner/cloud/mobile NOT TESTED. This supersedes NOT TESTED only for the exact displayed existing full-correction pair, never overall financial/causal/fiscal completion.

Whole central engine/all14 remain OPEN/ASSIGNED to retained owner. Remaining full return/payment/document reconciliation and physical/fiscal truth, broader cross-shift correction coverage, nonzero/stale/over-explained review hosted cases, configured policies/common owner/cloud/workforce/assistant/mail consumers, named owner recipient (other POS owner retained) without double deduction, export/print and explicit automatic lifecycle/outbox/schedule/SMTP/activation/delivery. Single next action: inspect the next bounded central reconciliation residual against actual stored return/payment/document sources, and publish its causal scope claim before any source or state-changing LAB; do not repeat the now-accepted existing pair. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / EXACT CORRECTION LINKS SOURCE READY / AWAITING CI AND LAB

Retained owner codex/automatic-reporting-20261016, branch fix/cash-correction-links-20261016, issue2527. ClaimPR2622/finalc25cb27f/full docsCI38954514157 SUCCESS merged31e072fd before source. New shared read-only correction reader identifies exact POS ΑΚΥΡΩΣΗ/ΕΠΙΣΤΡΟΦΗ original/correction sale IDs, owns company/store/session, validates completed POS_REVERSAL plus all negative ledger/payment method totals, rejects inconsistent/orphan/duplicate/over-corrected data, preserves post-close explicit same-session evidence. Foreign/wrong-session/reversed correction rows never cover a candidate. Missing/over-cap source is unknown/recheck, not a false zero.

Existing duplicate candidate retained with original amount/confirmation requirement. Each original now carries exact recorded correction IDs/time/amount/ledger IDs, partial/full/no correction state and recorded monetary net; pair information net is separate from original variance and unexplained review balance. Platform Analyses/clipboard/written paragraphs share the same label: already in cash, no second subtraction; unknown remains explicit. Missing receiptNumber is labelled sale identity rather than fabricated fiscal receipt number. No financial/review/closing/stock/fiscal/auth/license/schema/settings/email or policy/write-path change; cross-shift corrections and other common readers remain separate OPEN residuals.

Local Node20 focused24PASS/0FAIL/0SKIP, initial10PASS/1nativeSKIP, frontend/TABLE_SERVICE build PASS. New tests replay previously captured actual LAB source pair and both existing corrections to zero information net while original-5.50 stays unchanged, plus full/partial/none, invalid amounts/IDs/source/status/time/payment, foreign/session/reversed rows, split payments, missing/limited source, immutability and actual label/written paragraph. Extended isolated actual PostgreSQL fixture executes real regex/join/payment SQL, exact/post-close corrections, before/after zero-write count/sum, reversed/wrong-session exclusion and orphan→unknown. Full exact PR/main/nativeCI and ordinary guarded exact release still required; no new hosted grouping PASS or manual instructions. Prior actual period/isolation/source match/manual PASS and other owners protected. Whole central engine/all14 OPEN. Next: full CI/release, then read-only existing LAB correction grouping acceptance without Save/replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 22:19 Europe/Athens — AUTO-REPORTS-20261016 / EXACT EXISTING CORRECTION LINKS / ASSIGNED

Retained owner codex/automatic-reporting-20261016, source branch fix/cash-correction-links-20261016, issue2527. Explicit owner «jekina». Current maind403ef5 includes limited actual UI receipt2618/93391fb and independently matched persisted-source receipt2620/d403ef5; existing pair005c2651/54cfc0ab has exact same-session cancellationff12195f/returnaa7ebb62 and four ledger movements net0. No repeat or financial change needed. Existing full engine remains OPEN; new grouping hosted behavior NOT TESTED. Existing compact display, selected periods/source arithmetic, isolation, original variances, linked sale candidates, audit attribution and signed confirmed-review source/PASS boundaries are protected.

Bounded causal change after this claim merges: read-only exact candidate-to-existing POS cancellation/return evidence grouping in shared cash evidence service and its Platform label/clipboard/written paragraph. Require explicit structured ledger description identifying both correction sale ID and original sale ID, owned company/store/session, completed POS_REVERSAL source, consistent negative ledger amounts/payments/total and no reversed corrective row. Missing/limited/malformed/ambiguous/over-corrected data must remain unknown/recheck, not fully corrected. Preserve candidate identity/require confirmation; expose actual correction identities/times/amounts and per-sale/group recorded net without treating net as unexplained liability or changing original financial totals. No inference from equal amount/name/time or related original receipt alone, no cross-shift fallback, no new deduction, writer/schema/auth/license/fiscal/stock/settings/email change. Full cross-shift reconciliation is separate OPEN residual.

Regression: actual demonstrated pair, no/partial/full/over corrections, false prefix/ID/foreign tenant/store/session, split payment consistency, reversed/unavailable/limited sources, immutability, real reader and copied UI text, isolated actual PostgreSQL source/SQL links with before/after zero-write/control proof. Full exact PR/mainCI and ordinary guarded exact release required, then existing LAB read-only grouping acceptance; CI is not hosted PASS. Other assistant/invoice/workforce/fiscal/supplier/order owners retained. Single next action: implement this bounded evidence grouping only after green claim merge. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / LIMITED READ-ONLY SOURCE MATCH PASS / RETURN RECONCILIATION OPEN

Retained owner codex/automatic-reporting-20261016, issue2527. Owner22:09 «etoimo» follows requested handoff. Browser observation still returns credential_observation_restricted; no new hosted UI PASS, login inference or reattempt loop. Independently authorized read-only Render connector used in previously confirmed My Workspace, existing production myworkstation-db (not upgrade-test clone), exact LAB companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru. Tool wraps SELECTs in read-only transactions. No script, write, migration, financial/review/settings/email/infra change or replay.

LIMITED persisted-source match PASS: independent CashShiftSession closing-date Europe/Athens aggregates match the actual UI receiptPR2618: day10Oct1/-5.50; week12–18Oct2/0; month1–31Oct11/-8.90; custom10–12Oct6/-5.50, all surplus0. Exact shift4d853b34/MAIN originally-5.50, opened7Oct08:27UTC/closed10Oct05:13UTC, remains unchanged; row shows closing date while displayed opening hour belongs to earlier date. MAIN3a186861 and LAB-POS-02865e6a48 close12Oct with variance0, matching weekly view. No CashControlReview rows exist for these three sessions, supporting displayed confirmed explanations0 without creating a review. Independent N40 control same-company/different-store custom10–12Oct0closed rows/net0 matches UI isolation. This is exact selected existing source→display arithmetic, not complete financial/day/shift closure or liability acceptance.

Actual pair source verification: sales005c2651-006f-481c-9243-0bdc5cb48ace and54cfc0ab-49eb-4bc3-90db-e04b1f1bacc5 are completed POS, same product4f126988/NEPO1.5LT/quantity1/unit1/discount0/total1/CASH1 each. Times11Oct17:37:36.509UTC and17:38:52.738UTC differ76.229seconds; exactly2 completed POS sales in inclusive interval. Both exact POS-sale ledger links belong to MAIN3a186861. ReceiptNumber is actually null, so displayed UUIDs are sale identities, not invented fiscal receipt numbers. MAIN has3matching positive POS-sale receipts totaling3.40;5unreversed SALE_CASH movements include the two corrective negatives rather than5sales.

IMPORTANT existing corrective evidence: ledgerb4e13a9e is POS ΑΚΥΡΩΣΗ ff12195f-c851-4e1a-9b0a-2fa97f93f228/explicit original005c2651/-1; ledger269a7048 is POS ΕΠΙΣΤΡΟΦΗ aa7ebb62-7890-433a-bcec-fc23a4d6a189/explicit original54cfc0ab/-1. Both correction Sale rows are completed POS_REVERSAL, water quantity-1/line-1/CASH-1; times17:37:50.466UTC and17:39:20.104UTC, same session links. The four exact sale/correction movements net0.00. The candidate is not evidence of a still-uncompensated loss; never subtract these1EUR amounts again or transfer employee liability. True mistaken duplicate, fiscal validity and physical receipt truth are not established by identical baskets. Current UI separately shows reversal findings and candidate with no automatic deduction; explicit candidate→existing correction grouping/status is a real residual gap, not silently marked complete.

Evidence CHECKPOINTS/EVIDENCE/cash-central-review-20261016/source-reconciliation.json contains exact scoped Render read results. Prior actual screenshot and six modal records/limited UI PASSPR2618/93391fb, sourcePR2611/70e23a69 and compatible guarded26a47122 remain protected; cash runtime diff70e23a69..current main932f0f2 is unchanged. No new source/release needed for this documentation-only match. No new contemporaneous health, original physical/fiscal receipt, actual nonzero explanation, stale/over-explained review, cloud/Owner reader, export/print/email/physical/device acceptance. Manual reports updated only for interpreting the verified existing values and already-corrected pair; no procedure for unimplemented grouping.

Whole central engine/all14 remain OPEN/ASSIGNED to same owner. Remove only completed existing selected period/source arithmetic comparison from pending; retain broader full evidence reconciliation, exact correction attribution/grouping, original physical/fiscal evidence, nonzero/stale confirmed-review host acceptance, named owner receiver without double deduction, configured-policy/all-reader agreement, export/print and automatic lifecycle/outbox/scheduling/SMTP/activation/delivery. Existing invoice/assistant/workforce/fiscal/supplier/order owners preserved. Single next action: publish a bounded causal claim before source to connect an identified candidate to its exact existing same-company/store/session reversal ledger and expose already-corrected/net evidence without any new deduction; require read-only/native regression and normal CI/release/actual acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / LIMITED LIVE UI PASS / CENTRAL CASH REMAINS OPEN

Retained owner codex/automatic-reporting-20261016, issue2527. Following owner's21:44 Europe/Athens «etoimo», authenticated canonical SuperAdmin Χρήστος Μάνης was visibly restored. Read-only hosted observations now supersede the blanket browser-blocked/NOT TESTED status ONLY for these display scopes: day/week/month/custom/exact-shift filters, applied-period warning, selected-store isolation, original/zero-explanation/remaining labels, same-terminal chain display and provisional evidence presentation. This is not complete financial reconciliation or acceptance of all14 requirements. No source/business/settings/review/email write, transaction replay or new closing.

Observed LAB results: week12–18Oct2closed shifts (MAIN/LAB-POS-02), original deficit/surplus/net0.00; month1–31Oct11closed shifts, deficit8.90/surplus0/net-8.90; custom10–12Oct6closed shifts, deficit5.50/net-5.50; exact month shift LAB POS2/10Oct/MAIN1row/-5.50, matching day10Oct1row/-5.50. Its Analyses shows original-5.50, confirmed explanations0.00, unexplained-5.50 and one linked sale. Day10Oct still displays two preceding/two following MAIN sessions outside the selected day, all context only; no LAB-POS-02 mixing or addition to selected totals. Control N40 CONTROL20261010/custom10–12Oct0rows/zero totals, no LAB carryover; returning to LAB/day10Oct restored the same one row/-5.50. Filter changes visibly require Εμφάνιση and disable print until applied. Initial Playwright date fill did not commit; native date setValue visibly committed10–12Oct before the successful custom comparison. No product defect is inferred from the automation fill failure.

Week Analyses visibly shows 23/21 unassigned events separately, original0/explained0/remaining0, MAIN3linked receipts and one candidate pair: water1.5L×1/CASH1.00, receipts005c2651-006f-481c-9243-0bdc5cb48ace and54cfc0ab-49eb-4bc3-90db-e04b1f1bacc5,76.229seconds apart. It explicitly says candidate only/no automatic subtraction. Unassigned detail says not used as an explanation; actual causal correctness of each association is NOT TESTED against independent original receipts. Open next MAIN shift retains unknown variance/awaiting-next-shifts; full audit stays provisional even with zero difference. No actual nonzero confirmed explanation, partial/full/over-explanation or stale-review acceptance was available or created; these remain CI-only/native tested. Ordinary cart/customer events are visible among unassigned detail; usefulness/noise remains review work, not an asserted complete smart-audit PASS.

Source receipts preserved: periodPR2576, sale/chainPR2598, associationPR2604, signed balancePR2611 merged70e23a69/full exact PR/main2852PASS/0FAIL/0SKIP plus6backup. Current compatible released source26a471226b4afca36724fd96454e58d820dbc803/full native PR/main2857PASS/0FAIL/0SKIP plus6backup per its owner; ordinary guard38943458208/job117116633470 pinned exact26a47122 and verified healthy. Owned cash runtime files compare identical70e23a69..current mainf36488a. Independent current public health navigation was blocked by credential protection, so no new contemporaneous health claim. The stored guard and source identity are release evidence, not invented UI revision telemetry.

Evidence CHECKPOINTS/EVIDENCE/cash-central-review-20261016/: six modal-only actual DOM observations (week/month/exact-shift/custom/control/day) and original screenshotday-proof.jpg. Underlying unrelated company/contact content removed by cropping text to the cash modal; screenshot bytes unmodified. Browser native/clipboard retained-data restriction reappeared after exact-shift capture; one documented new-tab recovery allowed custom/control/day comparisons and actual screenshot. Later health navigation protection blocked further operations; clipboard/export/print/email and independent original-ledger/receipt comparison remain NOT TESTED. No fabricated screenshot or actual financial delta claim. Manual reports/PASS documents only the observed usage; prior settings and other owners' PASS remain protected.

Whole central engine/all14 OPEN/ASSIGNED to same owner. Completed UI subscopes above are removed from active pending; residual: source receipt/ledger/return/payment/document reconciliation, nonzero confirmed-review/staleness hosted acceptance, named receiving owner without double deduction, configured policies and common owner/cloud/workforce/assistant/mail consumers, export/print parity, explicit automatic lifecycle/outbox/scheduling/SMTP/activation/delivery. Preserve other assistant/invoice/workforce/fiscal/supplier/order owners. Single next action: supported controllable canonical tab, then read-only independent original source receipt/ledger comparison for an existing identified LAB shift and displayed duplicate candidate, without Save/replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / SIGNED REVIEW BALANCE SOURCE LIVE / AWAITING READ-ONLY LAB / HANDOFF

Retained owner codex/automatic-reporting-20261016, issue2527, source branch fix/cash-review-balance-20261016. ClaimPR2609/final58a9f307c5/docsCI38937037891 SUCCESS merged64dd50fd before source. SourcePR2611 final99ba0565bec0afe57cdc2948419ce46e95acc8be/fullPRCI38938415657/job117100317714 SUCCESS2852PASS/0FAIL/0SKIP plus6backup, including actual isolated PostgreSQL, mandatory Windows/native/Chromium/build/invariants/realHTTP checks. Merged70e23a69f239ff75e9c7bb6828205a3817a51fa1. Exact mainCI38939258819/job117102673092 SUCCESS2852PASS/0FAIL/0SKIP plus6backup and all mandatory checks. Ordinary guarded Render38940000633/job117105007186 SUCCESS pinned70e23a69f239ff75e9c7bb6828205a3817a51fa1 at17:29:39UTC and verified exact healthy70e23a69 at17:32:32UTC16Oct/version0.22.0+kat-test-pos. Workflow checkoutfbdd980d is a documentation-only descendant; client/server diff70e23a69..fbdd980d is empty. The actual released revision is70e23a69, not inferred from workflow checkout. No manual deploy.

One shared read-only confirmed-explanation balance now reduces the magnitude of shortage or surplus toward zero in integer cents: -5 with confirmed2 leaves-3; either sign with confirmed5 leaves0. Invalid, unsafe, stale, unavailable or over-explained evidence remains explicitly unknown/recheck, never silently zero or opposite sign. Current-snapshot explanations only; exact existing five-field SQL/raw numeric precision/timestamp serialization is shared without changing the POST writer contract. Persisted JSONB equality ignores property order while comparing all content; changed movements invalidate reviews. Platform Analyses/clipboard show original/explained/remaining and reviewer evidence. Written fallback paragraph uses remaining balance, avoiding contradictory full-shortage text after partial explanation. Cloud investigation uses the same calculation; unknown explanation prompt default is refused. Original source/period totals and special-store policy remain unchanged; broader configured-policy/all-reader alignment remains OPEN.

Local focused41PASS/0FAIL/1nativeSKIP; final six new tests6PASS; final written-report follow-up18PASS and frontend/TABLE_SERVICE build PASS. Full remote exact-green is authoritative for native coverage. Actual PostgreSQL regression proves raw fractional snapshot precision, persisted JSONB content comparison, foreign-company/store isolation, read-only before/after counts/sums/reviews, changed-ledger staleness and unavailable source. Actual cloud handler, Platform investigator and copied display/written-report functions execute confirmed/current/stale/over-explained cases. Initial source CI38937978177 was superseded/cancelled and is not final proof. No production database script, schema/auth/license/ledger/closing/stock/fiscal/review/settings/email action or manual deployment. Prior scoped settings/manual PASS, period/sale-chain/audit-association releases and other owners remain protected.

Actual new hosted acceptance remains NOT TESTED: retained canonical browser last19:27 observed credential-protection protected_command_failed. No new actual source/UI/amount/screenshot evidence, inferred authentication state, financial replay or new manual/global PASS. Earlier weekly rendering was limited prior-period observation, not acceptance of this slice. Whole central engine/all14 remain OPEN/ASSIGNED: complete return/payment/document reconciliation, explicit evidence-review correction/idempotency workflow, named receiving owner without double deduction, configured policies/common consumers, automatic lifecycle/outbox/scheduling/SMTP/explicit activation and delivery. Existing assistant/invoice/workforce/fiscal/supplier/order owners retain their scope.

Single next action: restore a supported controllable authenticated canonical SuperAdmin tab and perform read-only existing LAB source/review/period/chain/isolation comparison against this released revision, without new Save, financial transaction or replay. This is source/CI/release evidence only; retain the same owner until actual acceptance and central receipt. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / SIGNED REVIEW BALANCE SOURCE READY / AWAITING CI AND LAB

Retained owner codex/automatic-reporting-20261016, source branch fix/cash-review-balance-20261016, issue2527. Claim2609 final58a9f307c5/docsCI38937037891 SUCCESS merged64dd50fd before source. Shared read-only integer-cent arithmetic reduces shortage/surplus magnitude toward zero: −5/explanation2→−3, ±5/explanation5→0; invalid/unsafe/over-explained states return null/RECHECK_REQUIRED, never opposite sign or silent zero. Only current-snapshot EXPLANATION rows qualify; stale latest review returns unknown/recheck. Source ledger/review amounts and original period totals unchanged.

Exact existing five-field snapshot SQL/raw numeric precision/timestamp serialization is shared through a read helper; existing POST snapshot payload shape preserved. Equality is independent of JSON key order but compares all content, preserving movement invalidation; this supports actual persisted JSONB instead of depending on property order. Missing review/snapshot source is explicitly UNAVAILABLE, not zero. Platform Analyses and clipboard show original difference, confirmed explanations/reviewer evidence and unexplained balance or honest unknown; cloud investigation uses the same calculation, and its existing explanation handler refuses an unknown default. Existing special-store policy remains unchanged; configured-policy alignment is separate OPEN work. No review writer permission/insert, ledger/closing/stock/fiscal/auth/license/schema/settings/email semantics change or actual production/test business action. Other owners and prior scoped PASS retained.

Local Node20 focused41PASS/0FAIL/1nativeSKIP and final six new pure/reader/label tests6PASS; frontend/TABLE_SERVICE build PASS. Added isolated actual PostgreSQL regression for exact snapshot fields including fractional raw amounts, persisted JSONB equality, signed balance, foreign company/store review isolation, before/after zero-write counts/balances, changed-ledger stale review and missing table. Actual cloud handler and platform investigator execute with confirmed/current/stale/over-explained cases, and copied label never reports unavailable as zero. Required full exact PR/main CI, ordinary exact guarded release and actual read-only LAB remain pending. Browser credential protection still blocks actual new hosted acceptance; no new manual/global PASS. Whole central engine/all14 remain OPEN: full return/payment/document reconciliation, review correction workflow, named owner receiver, common-reader/policy alignment and delivery. Next: full CI and normal release, then read-only existing-source LAB comparison without new Save/financial replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 20:00 Europe/Athens — AUTO-REPORTS-20261016 / SIGNED REVIEW BALANCE / ASSIGNED

Retained owner codex/automatic-reporting-20261016, issue2527, branch fix/cash-review-balance-20261016. Explicit owner continuation19:59. Previous associationPR2604/58908db7/full2841PASS/exact ordinary release and receipt2607/975b34f preserved. Actual new LAB still NOT TESTED due credential-protection blocker; no transaction/settings/review/send action. Relevant AGENTS/current retained records/checkpoints/manuals and source reviewed; no other owner takeover.

Concrete source defect: current reader computes initialVariance minus positive confirmed explanations, so shortage−5 with explanation5 becomes−10. Bounded causal fix: shared read-only signed explanation arithmetic in integer cents, reducing magnitude toward zero; reject invalid/over-explained state as unknown/recheck, never flip shortage into surplus or silently clamp. Preserve original variance, stored reviews and current-snapshot eligibility; stale reviews never explain current movements. Reuse the exact existing snapshot SQL/serialization through a shared read helper (including unchanged POST snapshot contract), expose same review balance read-only in platform Analyses, and retain original period totals. No review writer/business/schema/auth/license/fiscal/stock/ledger/email semantics change or production DB/test mutation. Existing special-store policy unchanged; full configured-rule alignment is separate. Snapshot equality will compare identical content independently of JSON key order while preserving every snapshot field/value and the existing stored shape; changed/malformed values remain stale. Full return/document reconciliation, named receiver and delivery remain OPEN. Require math/negative/positive/zero/rounding/stale/overflow/missing-source tests, actual route/reader execution and isolated PostgreSQL snapshot compatibility/zero-write regression; fullCI/main/ordinary exact release then actual read-only LAB. Claim precedes source. Next: implement this bounded review-balance slice after green claim merge. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / AUDIT ASSOCIATION SOURCE LIVE / AWAITING READ-ONLY LAB / HANDOFF

Retained owner codex/automatic-reporting-20261016, issue2527, source branch feat/cash-audit-association-20261016. ClaimPR2603/head7dd2365f6c/docsCI38932578577 SUCCESS merged8e54530d before source. Final sourcePR2604/headef76fb9f59fa643463ec00dd489e1f47ba187a6f/fullCI38933994428/job117084956231 SUCCESS2841PASS/0FAIL/0SKIP plus6backup and all mandatory Windows/native PostgreSQL/Chromium/build/invariants/realHTTP checks. Merged58908db70b886c4ff564ff9fb1e9e7257ced1299, preserving concurrent POS-header PASS/docs and all other owners. Exact mainCI38934681418/job117087246513 SUCCESS2841PASS/0FAIL/0SKIP plus6backup and all mandatory checks. Ordinary guarded Render38935414777/job117089626043 SUCCESS pinned58908db70b886c4ff564ff9fb1e9e7257ced1299 at16:53:56UTC16Oct and exact healthy58908db7 at16:55:50UTC/version0.22.0+kat-test-pos. No manual deployment.

One shared read-only audit association now precedes findings in both platform and cloud session investigators. Explicit company/store/session/terminal conflicts cannot fall back to same time/operator/amount. Exact same-session ledger transaction/primary-sale IDs support old rows; only recognized sale-ledger prefixes/types count, not expense text or loose ID substring. Original/related receipt IDs do not impersonate a return's actual session. Correct linked post-close events remain. Wrong-shift events are excluded from this shift's return/reversal/operator/amount-match findings. Unassigned legacy evidence retains identities/reasons separately, with visible provisional warning and expandable time/type/receipt detail in compact Platform Analyses. Ordinary non-suspicious operator events do not flood that warning. Clipboard includes the unresolved warning; original source audit is never changed.

Local Node20 final35PASS/0FAIL executes exact identity/foreign-store/company/terminal/session conflicts, post-close, legacy sale versus return IDs, no name/time/amount inference, free-form expense false-link exclusion, immutable partition, actual platform investigator and actual registered cloud handler. It proves next-shift return excluded, valid current return retained, unassigned evidence visible and original ledger/review amounts unchanged. Frontend/TABLE_SERVICE build PASS. Prior sale/chain sourcePR2598/17873d17 and limited settings/manual PASS remain protected. No schema/auth/license/financial/stock/fiscal/closing/review/settings/email write, production DB script, manual deployment or replay of accepted business movements. This is source/CI/release evidence, not new actual LAB/manual/global PASS.

Actual new hosted acceptance NOT TESTED: current retained canonical browser observation19:27 reported credential-protection protected_command_failed. No fresh source/UI/amount/screenshot evidence or inferred sign-in state; previous18:34 weekly view observation remains scoped to older period rendering, not current reconciliation. Restore a controllable authenticated tab through supported handoff; do not inspect credentials, bypass protection or replay transactions. No new PASS instructions added to manuals.

Whole central cash engine and all14 requests remain OPEN/ASSIGNED to same owner. Remaining: new evidence/period/isolation LAB acceptance; signed confirmed-explanation arithmetic and over-explanation handling; complete return/payment/document reconciliation; named owner receiver without a second cash deduction; configured-rule alignment and all cloud/owner/workforce/assistant/mail readers using one result; outbox/scheduling/SMTP/explicit activation and delivery. Existing invoice/assistant/workforce/fiscal/supplier/order owners retain their scope. Single next action: restore controllable authenticated canonical SuperAdmin tab and compare existing LAB source receipts/returns with linked versus unassigned evidence and same-chain periods, without creating/resaving/replaying business actions. Any next causal source slice requires its bounded claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / AUDIT ASSOCIATION SOURCE READY / AWAITING CI AND LAB

Retained owner codex/automatic-reporting-20261016, branch feat/cash-audit-association-20261016, issue2527. ClaimPR2603/head7dd2365f/docsCI38932578577 SUCCESS merged8e54530d before source. Shared read-only audit association now applies to both platform and cloud session investigations: explicit company/store/session/terminal metadata conflicts cannot fall back to time/name/amount. Exact same-session ledger transaction or primary-sale identities support legacy linkage; return original/related IDs never impersonate the return's actual session. Primary sale IDs parse only recognized sale-ledger descriptions and sale transaction types, not free-form expense notes or loose substrings. Existing immutable session guards and raw amounts preserved.

Both actual investigator paths now separate linked/unassigned/other-session events before return/reversal/post-close/operator/amount-match findings. Correct linked post-close events remain; wrong-shift events do not become this shift's cause. Unknown legacy events remain returned with reasons and provisional warning; platform compact Analyses has expandable identity/time/type details and copyable warning. No auto explanation, reconciliation adjustment, liability, financial/stock/fiscal/closing/review/settings/email write, auth/license/schema/production DB script. Existing sale/chain evidence and earlier limited PASS/manuals retained; other owners untouched. New behavior AWAITING LAB, whole engine/all14 remain OPEN.

Local Node20 focused35PASS/0FAIL: explicit post-close, company/store/terminal/session conflicts, exact IDs versus prefixes, old original sale versus actual return, unassigned immutable evidence, actual platform investigator and actual registered cloud route with next-shift return excluded, linked return retained, original ledger/review amounts unchanged. Existing period/sale/chain/daily/report regressions retained. Mandatory exact fullPR/mainCI, ordinary guarded healthy release and actual read-only LAB acceptance pending. Browser still reports credential-protection protected_command_failed; no new hosted observation or global/manual PASS and no financial replay. Signed confirmed-review arithmetic/full document/payment/receiving-owner/common-reader/dispatch remain separate OPEN slices. Next: fullCI/normal release, then restore controllable authenticated canonical tab for existing-source LAB comparison. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 19:29 Europe/Athens — AUTO-REPORTS-20261016 / AUDIT SESSION ASSOCIATION / ASSIGNED

Retained owner codex/automatic-reporting-20261016, issue2527, source branch feat/cash-audit-association-20261016. User19:28 explicitly continues the central cash audit. Previous sale/chain sourcePR2598 and exact guarded17873d17 release/full2836PASS remain protected, with actual new LAB acceptance NOT TESTED due credential-protection blocker. No financial or settings action/replay. Whole engine remains OPEN; all invoice/assistant/workforce/fiscal/supplier owners retained.

Read-only source finding: both platform investigation and cloud session investigation read store-wide audit events from shift opening through24hours after closing, then treat them as this shift's findings without proving session/terminal/sale linkage. Bounded next causal slice: shared explicit audit-to-session association in these two readers, using session/terminal metadata and exact existing ledger transaction/primary-sale identities. Conflicting identity never falls back to time or operator; ambiguous legacy events remain visible as unassigned evidence with provisional coverage, not asserted cause or zero-error result. Preserve original amounts/review decisions, post-close linked events, compact Analyses and existing sale/chain evidence. No source changes to sale/return/payment/stock/fiscal writes or auth/license/schema/dispatch. Signed review arithmetic and full document reconciliation stay separate OPEN slices. Require executed isolation/legacy/return/post-close regressions and actual reader integration, full CI/main/ordinary exact release before read-only LAB acceptance. Claim must merge before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md. Next: implement the bounded shared association after green claim merge.

16/10/2026 — AUTO-REPORTS-20261016 / SALE EVIDENCE SOURCE RELEASE / AWAITING READ-ONLY LAB / HANDOFF

Retained owner codex/automatic-reporting-20261016, issue2527, source branch feat/cash-sale-evidence-20261016. ClaimPR2594/head22da0a945c/docsCI38926256184 SUCCESS merged91ab9bf before source. SourcePR2598/head933d08048c2f063c89307838f1a5f6ec022a1c23/fullCI38927208318/job117061902143 SUCCESS2836PASS/0FAIL/0SKIP plus6backup, merged3b948128020e6c950fee6e3f8000cfea79f888f6. ExactmainCI38928085971/job117064912729 SUCCESS2836/0/0+6backup. Concurrent barcode compact main17873d177a170d386ee0feb0da11a6a14e08fdc7 contains identical cash runtime/test blobs, its fullCI38928119129/job117067606632 also SUCCESS2836/0/0+6backup. Required Windows/native PostgreSQL/Chromium/build/invariants/realHTTP checks retained. Guard38928884067 correctly deferred old3b948 because a newer production source awaited CI; it did not deploy. Ordinary Render guard38929664084/job117070174842 SUCCESS pinned17873d177a170d386ee0feb0da11a6a14e08fdc7 at16:09:50UTC16Oct and verified exact healthy17873d17 at16:12:03UTC/version0.22.0+kat-test-pos. Earlier repeated1afc5fd health responses were only transitional; final17873d17 is the verified deployed revision. No manual deployment.

Implemented bounded actual sale evidence: same-session ledger-linked consecutive completed POS baskets within120seconds, independent of cardVariance; receipt/sale IDs, times, products/quantities, totals and payment methods in Analyses and clipboard. Unknown/unlinked intervening store sale blocks adjacency; product identity/line structure/price/discount checked, never name-only matching. Caps2000sales/1000linesperbasket and bounded investigation concurrency; missing/capped sources explicit, never false agreement. This is linked completed POS scope, not a claim of all online/unlinked/reversed history coverage. Prior source amounts remain immutable. Pure tests execute candidate behavior and actual UI label formatter. New actual PostgreSQL fixture executes source SQL, card/cash switch, across-date shift context, company/store/terminal controls, unlinked barrier, missing table and before/after counts/balances unchanged. Local final19focusedPASS/0FAIL; native locally SKIP without isolated DB, mandatory native CI PASS; frontend/TABLE_SERVICE build PASS. No fabricated local full-green.

Same company/store/exact terminal preceding2/next2 sessions across selected-period dates now supply context, including open barriers. Contextual near-offset hints show both original differences and net without changing period totals or attributing liability. Difference-only special-store rules preserved;

overlapping sessions never create offset candidate. Existing same-period generic pair loop replaced. Context/coverage visible in Greek under protected compact Analyses. Original period/date/stale-filter/export behavior fromPR2576 retained. No schema/auth/license/fiscal/stock/financial/closing/review/settings/email write, no production DB script/manual deployment or replay of accepted business movements. Other assistant/invoice/supplier/order/workforce/fiscal owners retained.

Actual hosted evidence18:34Athens: authenticated canonical SuperAdmin weekly view12–18Oct/00:00–23:59 showed16closed shifts, LAB2 separately fromDiadochou14, correct row dates and PROVISIONAL. Diadochou displayed shortage70.62/surplus98.27/net27.65/POS−1.50; these are observed original UI values, not proven causal reconciliation or liability. Selecting LAB timed out, then credential-protection protected_command_failed blocked observations. Manual handoff offered; no safe positive subsequent LAB observation and no new final screenshot. New sale/context UI, month/custom/exact shift/export/isolation remain NOT TESTED. This source/CI/release is AWAITING LAB, not a new manual/global PASS; previous scoped manuals remain unchanged.

Whole central engine and all14 requests remain OPEN/ASSIGNED to same owner. Remaining: actual read-only acceptance of new evidence/periods in LAB; complete reversal/return/payment/document reconciliation and signed confirmed-review arithmetic; explicit receiving-owner metadata without second cash deduction; configured-rule alignment and integration of cloud/owner/workforce/assistant/mail into one evidence-backed result; outbox/scheduling/SMTP/delivery with explicit activation, not legacy default. Single next action: restore a controllable authenticated canonical SuperAdmin tab and compare existing LAB source receipts and same-chain shifts with the new Analyses, including period/isolation controls, without creating/replaying financial actions or resaving accepted settings. Next causal source slice requires its bounded claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / SALE EVIDENCE SOURCE READY / AWAITING FULL CI AND LAB

Retained owner codex/automatic-reporting-20261016, branch feat/cash-sale-evidence-20261016, issue2527. ClaimPR2594/head22da0a9/docsCI38926256184 SUCCESS merged91ab9bf before source. Read-only service now queries actual completed POS sale baskets independently of cardVariance; only explicit same-session ledger-linked adjacent sales within120seconds may be candidates, with IDs/receipt/times/products/payment evidence. Unknown/unlinked intervening store sale blocks adjacency; no name-only product matching, missing/oversize baskets suppress candidates. Source caps2000sales/1000linesperbasket and two bounded investigations; unavailable/capped evidence stays explicit. Prior source/linkage gaps and online/unlinked sales remain outside certified coverage, not false agreement.

Same-company/store/exact-terminal context queries preceding2/next2 sessions across period/date boundaries, preserves open/overlap barriers and difference-only rules. Displays all context and candidate near-offset net separately; no context amounts added to selected-period totals, no employee liability, ledger/review mutation or speculative automatic correction. Existing generic same-period pair heuristic replaced. UI/clipboard expose evidence and Greek coverage labels under existing compact Analyses; source financial totals/export period unchanged. Return/payment/document reconciliation, named receiving owner, all-channel engine and automated delivery remain OPEN. No fiscal/auth/license/schema/stock/financial/settings/email write or accepted-transaction replay.

Local focused18PASS/0FAIL/1nativeSKIP plus actual Analyses label5PASS; native actual SQL regression added for baskets/payment switch, date-boundary chain, tenant/store/terminal controls, unlinked barrier, unchanged balances/counts and missing-source coverage. Full mandatory exact CI/main/ordinary guarded release and actual read-only LAB remain required; source is AWAITING LAB, not a completed central audit. Hosted weekly observation18:34 is limited rendering evidence only; browser credential protection currently blocks selected-LAB acceptance. Prior scoped settings/manual PASS and other owners preserved. Next: full CI and normal release, then read-only source/evidence comparison in LAB without new business actions. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 18:41 Europe/Athens — AUTO-REPORTS-20261016 / SALE EVIDENCE + SHIFT CHAIN / ASSIGNED

Retained owner codex/automatic-reporting-20261016, issue2527, source branch feat/cash-sale-evidence-20261016. Explicit owner continuation18:40: improve Analyses for full review. Existing first period slice PR2576/main34037f25/full2819PASS/ordinary exact release remains protected. Read-only hosted18:34 showed applied week12–18Oct,16shifts (LAB2/Diadochou14), distinct dates and PROVISIONAL; displayed Diadochou70.62deficit/98.27surplus/net27.65, not financial reconciliation PASS. Browser LAB selection timed out then credential protection blocked observation. No new actual LAB PASS or financial/settings/send action. Prior config and compact Analyses PASS remain protected; no transaction replay.

Bounded next source: shared read-only evidence service for actual consecutive same-terminal sale lines independent of cardVariance, explicit sale IDs/times/products/amount and candidate-only wording; same company/store/terminal preceding and next two sessions across selected-period boundaries, original differences plus contextual net without liability or balance mutation. Bounded reads and explicit unavailable/truncated coverage; never interpret missing evidence as agreement. Platform Analyses consumes this evidence; all broader return/payment/document/owner receiver/common-reader/scheduling work remains OPEN, no takeover of invoice/assistant/workforce/fiscal owners. No schema/production DB/auth/license/ledger/closing/price/email write. Full meaningful regression/native CI, ordinary guarded exact release then read-only LAB acceptance required. Source changes only after this claim merges. Next action: implement the bounded evidence service and visible evidence after green claim merge. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 — AUTO-REPORTS-20261016 / CENTRAL PERIOD SOURCE LIVE / AWAITING READ-ONLY LAB / HANDOFF

Retained owner codex/automatic-reporting-20261016, source branch feat/cash-central-review-20261016, issue2527. User15:06–15:37 expansion is durable in issue/checkpoint: one central cash result, shifts/day/week/month/custom period, same-chain adjacent shifts across dates, actual item-level POS duplicates/returns/payment/expense explanations and named owner cash receipt without a second deduction. Source claimPR2575/docsCI38902232237 mergedd494094 preceded changes. SourcePR2576 finalheadd91914414ba418852385f13fec51247c93ccca3b/fullPRCI38906790680/job116992452115 SUCCESS2819PASS/0FAIL/0SKIP +6backup, all mandatory native/Windows/build/invariants/realHTTP/browser checks retained. Merged34037f25d8f907a19efb03f26e6bfc6c1a2e688b with concurrent POS-credit/invoice actor changes preserved. ExactmainCI38907467123/job116994727763 SUCCESS2819/0/0 +6backup. Ordinary Render guard38908197817/job116997119006 SUCCESS: pinned34037f25 at13:29:57UTC and exacthealthy34037f25 at13:32:40UTC16Oct/version0.22.0+kat-test-pos. Workflow checkout63bf697 is a docs-only descendant; comparison34037f25..63bf697 lists documentation/PDF changes only. The guard actually pinned and verified34037f25, not63bf697. No manual deployment or sandbox production database action.

Implemented first bounded slice: shared validated calendar closing-date periods for platform and cloud summary; weekMonday–Sunday/month/custom plus platform exact-shift/optional operator; actual row dates; applied period/store/operator/hours used for shortage export and visible stale-filter warning; full23:59minute included. Up to500 shifts with explicit refusal instead of partial totals, only2 concurrent shift investigations. Cloud discards late previous-store results including late ledger reads. Old unconditional completed:true becomes PROVISIONAL with pending source/line/chain/recipient coverage; UI and clipboard stop claiming exhaustive completion. Legacy pair hints cannot cross terminals or overlapping shifts or automatically attribute employee liability. Source variances/ledger amounts unchanged. Existing mail remains explicit full-day-only, not a silent range send; automatic dispatch is not enabled. Prior scoped config/pointer HOLD and compact Analyses proofs preserved, no transaction replay.

Local validation: focused25PASS plus later period/concurrency7PASS and N40 mounted15PASS. Initial broad local2804 suite2698PASS/14FAIL/92infrastructureSKIP is historical pre-fixture correction; its14 failures are N40 fixture/cascade, all original scope/export/return assertions later pass. Remote exact full-green is the authoritative complete suite, not a fabricated local full-green. Intermediate38906434856 failed mandatory checkpoint policy after active status had been omitted to avoid concurrent header conflicts; fixed by inserting status inside this owner's existing section, without weakening policy. All other owners and their evidence are preserved.

Actual hosted acceptance NOT TESTED: browser reached canonical Platform Admin login, secure password submission showed2FA, later secure2FA submission displayed «Η επιβεβαίωση έληξε. Συνδέσου ξανά.» No positive authenticated LAB state, no current-period UI/amount comparison and no trustworthy final screenshot. No upload/settings Save/financial/shift/stock/invoice/fiscal/permission/email action performed. Do not call source/CI/deployment LAB PASS. Existing reports/automatic-reports manuals retain only their earlier scoped actual evidence; no CI-only instructions are added as PASS.

The whole central cash engine and all14 requirements remain OPEN/ASSIGNED to the same owner. Remaining: actual across-boundary previous/next2 same-chain sessions; sale-line duplicate search regardless of cardVariance; complete return/payment/document reconciliation and signed confirmed-explanation arithmetic; configured cash-rule alignment (platform currently legacy-name fallback versus cloud configured rule); named owner receiver metadata; integration of owner/workforce/assistant/mail readers with the single evidence-backed result; explicit automatic lifecycle/outbox/scheduling and delivery. No takeover of existing assistant/invoice/workforce/fiscal owners. Single next action: regain a fresh authenticated canonical SuperAdmin session, then read-only LAB day/week/month/custom/exact-shift and isolation checks on the released version, without resaving accepted settings or replaying financial movements. After acceptance, claim the next central-engine causal slice before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md.

16/10/2026 15:40 Europe/Athens — AUTO-REPORTS-20261016 / CENTRAL CASH AUDIT / ASSIGNED

Retained owner codex/automatic-reporting-20261016, source branch feat/cash-central-review-20261016, issue2527. Explicit user expansion15:06–15:37: one central cash review everywhere, shifts/day/week/month/custom range; chain continuity across calendar boundaries; evidence-based duplicate-sales/returns/payment-method/expense investigation; owner cash withdrawals show who handed over/received and never subtract twice. The external cash-review Site is reference only, not a source replacement or authorization to modify that Site. User screenshots are observed UI evidence, not financial acceptance.

Read-only main83a0618 inventory confirms multiple readers: platform /cash-control/daily ignores the export range; cloud /daily-summary uses close-calendar-date; background preview uses saved business-day settings; assistant and workforce monthly have separate readers; POS current-shift cash uses complete ledger summary. Platform investigation returns completed:true even with rejected/missing audit sources and checks duplicates only from cached close-time candidates; that close-time scan is gated on cardVariance and not terminal-scoped. Platform pairing currently groups whole store and only same-date returned rows. These are source findings, not claims of real duplicate sale or employee liability.

First bounded causal source slice: introduce shared validated calendar period selection (day/week/month/custom and optional exact shift) for platform report and cloud read-only summary, align displayed period/row dates and prevent stale selected-filter output; preserve legacy daily callers, scoped tenant/license guards and compact Analyses USER PASS. Mark unavailable/incomplete investigation evidence as provisional instead of false completion. Keep existing mail strictly daily and visibly unavailable for multi-day until it consumes the same report, never send a different period silently. Existing exports remain explicitly shortage exports. Full central engine/chain context/sale-item duplicate findings/named owner transfer metadata/common mail and monthly readers remain OPEN for subsequent slices. No financial ledger, closing, payment, stock, fiscal, auth/license or existing invoice-credit source edit in this slice.

Protected evidence: prior LAB config/reopen/control/pointer HOLD PASS at17d9599c and reports compact Analyses PASS at8f0affdf remain scoped; no replay or settings Save. New period/financial implementation NOT TESTED. Require pure period boundary/DST/invalid-date tests, route/UI contracts, full PR/main CI and ordinary exact guarded release before read-only LAB comparison. Real movements require separately published before/after/control, not part of this claim. Whole14/AUTO and No33 remain OPEN; invoice-credit, assistant, supplier/order, workforce and fiscal owners retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-central-cash-review.md. Next: implement this bounded read-only period/completion slice after claim merges to main.

16/10/2026 14:07–14:08 Europe/Athens — VOICE-ASSISTANT-01 / EXPORT SOURCE LIVE / FILE ACCEPTANCE BLOCKED / HANDOFF

Same retained owner codex/assistant-business-queries-20261015, no release or second owner. Export source PR2569/head dd4de0264 merged b1da09c80cf9e38511027344f0ee672b319f6426. Full PRCI38889960617/job116936911573 and exact mainCI38890603855/job116939015907 SUCCESS:2799PASS/0FAIL/0SKIP plus6backup; required Windows/browser/build/native PostgreSQL/invariant/HTTP checks passed. Ordinary guarded Render38891225899/job116941006011 SUCCESS, exact healthy b1da09c80 confirmed in deployment health log. Local Node20:2702PASS/0FAIL/90 infrastructure skips; focused20PASS. Earlier source-ready entries are superseded only as to implementation/CI/release, not actual file acceptance. No manual deployment or safeguard bypass.

LIMITED LIVE REGRESSION PASS14:07 Athens: fresh normal authenticated Super Admin, same explicitly selected authorized real store, all-stores unchecked, cloud browser/read-only. FROM11October -> short TO retains11October -> short12October retains TO and the same expected source row. Earlier reverse-direction/invalid-date/store-change qualified PASS remains in this checkpoint/manual; an additional read-only DAILY selected-store check at13:51 returned no records and did not show the other store's rows. Private business values and operator identities omitted publicly. No financial, stock, fiscal, schema or credential mutation/replay.

FILE ACCEPTANCE NOT TESTED/UNKNOWN: during the attempted «Σε CSV» download, the browser runtime refused retained browser data after prior secure native credential delivery, then reported that native credential state could not safely resume. No file path/bytes or completed export response were available. Canonical fresh-document recovery and one runtime reset remained blocked. This is a browser-environment blocker, not observed evidence of a new application failure or proof that an export succeeded. Do not infer submission/download from the interrupted call. Historical13:45 export mismatch FAIL remains historical until a real successful file retest. No new file/LAB/whole-assistant PASS.

Next bounded operator-name claim PR2570/head33bd0d2b mergedff615a3b after docs/Windows CI38890741766 SUCCESS; source branch reserved fix/assistant-actor-inflection-20261016. No actor-inflection source code has been edited. Claim requires completing the preceding real file acceptance first. Protected behaviors: direction/date/filter retention, exact source and selected-store authorization, invalid-period clarification, source cap/reversal/duplicate guards, exports reauthorization and original provider/model/key. Whole VOICE OPEN; name inflection known FAIL, physical microphone/hosted Owner/advanced domains remain unfinished.

Single next action: resume a functional secure browser runtime at the canonical Platform Admin page, read-only selected store; complete FROM11 -> short TO -> short12 -> «Σε CSV», obtain actual download, parse store/date/direction/row and compare to displayed source, publish checkpoint/manual/active/tracker/pending/PDF receipt. Only after that acceptance proceed to the already merged bounded actor-name claim. No repeated business transaction, credential inspection, auth bypass or guessed download result. The retained owner remains responsible until completed work or named handoff. Checkpoints: CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md and CHECKPOINTS/CHANGES/2026-10-16-assistant-actor-inflection.md.

16/10/2026 14:04 Europe/Athens — POS-CREDIT-CASH-01 / DIRECT POS CREDIT PAYMENT / ASSIGNED

Same independent owner codex/invoice-second-draft-20261016, continuation branch fix/pos-credit-direct-20261016, checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-credit-cash.md. User accepts the separate credit application and explicitly requests negative payment directly in the original POS Payments/upload flow, with no second visit. Existing source PR2563/full2792/0/0 and guarded descendant release remain. Subsequent user screenshot and read-only DB confirm one linked negative entry on the existing credit draft. After-only evidence does not certify measured cash/control deltas or whole LAB PASS. Credit stays DRAFT, two lines, no linked stock movements; code removes mapped stock once only at reviewed final approval. No financial/stock mutation by this page, no repeat of that existing credit.

Bounded new integration: the original photographed credit confirmation must show signed negative amount and explicit cash offset/return meaning before submitting. Reuse the existing audited once-only credit helper, same original draft/proof/session, stable retry identity and optimistic credit version; preserve ordinary invoice payment and credit balance-only choice. Never create money from myDATA download, scan or upload alone. Keep original positive payment, tenant/store/operator/permission/session checks, cancelled confirmation no-write, concurrency/rollback and existing-credit fences. Stock remains exclusively in reviewed final posting, no new approval or second stock effect from cash. Existing completed real credit is never resubmitted for testing. Require mounted original payment UI and native same-draft/signed-once/retry/paid-credit/no-stock tests, full PR/main CI, guarded revision and hosted acceptance. New direct flow NOT TESTED/AWAITING LAB; all other owners/broader09/Gate3 preserved. Claim precedes source. Single next step: integrate the existing helper into the initial POS confirmation, retaining explicit user cash confirmation.

16/10/2026 — VOICE-ASSISTANT-01 / OPERATOR NAME INFLECTION / ASSIGNED

Same retained owner codex/assistant-business-queries-20261015, next bounded branch fix/assistant-actor-inflection-20261016. Published dialogue PASS and export FAIL remain in CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md. Export fix PR2569 mergedb1da09c80 after full PRCI38889960617 succeeded2799/0/0 plus6backup; main CI38890603855/release/live file acceptance still pending. Complete that acceptance before beginning this next source change.

Known read-only LIVE FAIL on the earlier assistant source: the Greek accusative full operator name returned no records while the exact stored nominative full name returned its real transfer row. No private names/amounts are published. Existing query normalization removes accents/case but performs raw substring search; it does not handle final-sigma case inflection.

Claimed correction scope: owner-transfer reports only, exact search remains first. Only when exact search has no matches, allow a conservative two-or-more full Greek-name-token operator-only match differing solely by optional final sigma per token. Require an unambiguous stored operator name among validated eligible rows; multiple distinct candidate names request clarification and never sum together. No prefix/fuzzy descriptions, supplier/product matching, AI guesses or broad stemming. Preserve selected-store/company validation, period/status filters, source cap, reversal/duplicate checks, arithmetic, original displayed operator text, read-only SELECTs, export replay and provider/model/key. Verify positive case/accents and negative partial/ambiguous/unrelated-domain/filter/foreign/capped-source cases with synthetic rows. Require full PR/main CI, exact guarded release and actual read-only named-query comparison before claiming a limited LIVE PASS. Whole VOICE OPEN; physical microphone and hosted Owner/advanced domains remain untested. This claim must merge before code. No business transaction or replay.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-16-assistant-actor-inflection.md.

16/10/2026 — VOICE-ASSISTANT-01 / EXPORT FOLLOW-UP SOURCE READY / AWAITING CI AND LIVE

Same retained owner. Claim/receipt PR2568 merged0de911fb after documentation/Windows CI38889660808 succeeded. Source branch fix/assistant-transfer-export-20261016. Exact format-only current turns («Σε CSV», Excel/XLSX/PDF/Word/DOCX) carry no new record filter, so the existing strict unfiltered transfer dispatcher can use the already resolved latest domain/date. Only that current turn is excluded from vocabulary checking; inherited actor/status filters, arbitrary extra text, unsupported domain and invalid periods still prevent the shortcut. No source SQL, schemas, money arithmetic, authorization, provider/model/key, export-ticket/replay or UI change.

Two new synthetic regressions reproduced missing dispatch before correction; all3new tests now pass, including real Owner and Platform scoped dispatch without model extraction. Focused20PASS/0FAIL/0SKIP including source guards, existing dialogue and real four-format generation tests. Full local Node20 suite running; full native PR/main CI and exact guarded release required. New hosted file acceptance NOT TESTED. Previous limited direction LIVE PASS remains protected; short export continuation remains AWAITING LIVE, actor inflection remains next separate task. Whole VOICE OPEN. No production business mutation/replay. Checkpoint: CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md.

16/10/2026 13:44–13:46 Europe/Athens — VOICE-ASSISTANT-01 / LIMITED LIVE DIRECTION PASS / EXPORT FOLLOW-UP FAIL / ASSIGNED

Retained owner codex/assistant-business-queries-20261015. Source PR2565 merged 1d8ba8eee8b9ab10f92da26562c9678a649cd3e0; PR CI38887585095 and main CI38888168410 succeeded, each with2796PASS/0FAIL/0SKIP plus6backup tests. Guarded Render run38888787486 confirmed exact healthy revision at10:43:42Z. Local Node20:2696PASS/0FAIL/84 infrastructure skips; focused44PASS and frontend build PASS. Earlier CI-only status below is superseded by this receipt for the tested scope only.

LIMITED LIVE PASS, normal authenticated Super Admin, read-only, one explicitly selected authorized real store, cloud browser, no physical terminal/shift transaction: explicit FROM question for11October now returns its correct source without argument error; short TO clarification retains11October; next short12October date retains TO and its independently corroborated source row; reverse FROM clarification retains12October. Invalid31February asks for a valid period. Store change clears the dialogue. No business transaction, stock/fiscal mutation or replay. Private row amounts, names and descriptions are intentionally omitted from public evidence. This is a qualified dialogue PASS, not proof of monthly source completeness or physical microphone/Owner acceptance.

LIVE FAIL: following FROM11October -> short TO -> short12October with «Σε CSV» returned the safe domain/date mismatch error, no file and no fabricated result. Local read-only diagnosis: effective question resolves TO/12October correctly, but strict direct-transfer vocabulary rejects the format token and falls through to model extraction. New bounded source branch fix/assistant-transfer-export-20261016 ASSIGNED to the same owner: recognize export-format words in otherwise strict unfiltered transfer requests and verify both roles and latest date/direction through the real dispatcher. Preserve actor/status filter exclusion, all authorization/source/calendar/amount/cap/replay guards, provider/model/key and all other owners. This claim must merge before source edits. Require full PR/main CI, exact guarded release and actual read-only file verification. Actor-name inflection remains a separate next task. Whole VOICE-ASSISTANT-01 OPEN.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md; manual: docs/manual/super-admin/PASS.md.

16/10/2026 — POS-CREDIT-CASH-01 + INVOICE-SECOND-DRAFT-01 / RELEASE RECEIPT / AWAITING HOSTED LAB

Owner codex/invoice-second-draft-20261016 remains ASSIGNED for these independent scopes; no release or takeover of other invoice/payment/report/assistant owners. First-payment source PR2559/head0b1982f5 merged17d9599c70297a7f56cff8980c44b14839870e5e: full PR38884742346 and exact main38885525993/job116924125748 SUCCESS,2783PASS/0FAIL/0SKIP plus6backup and required native PostgreSQL/Windows/build/browser/invariant/HTTP checks. Ordinary guarded deploy38886688753 SUCCESS; independent public health observed exact17d9599c. Downloaded myDATA remains an unpaid draft; POS alone takes payment. Explicit canonical-header confirmation and exact recheck precede first POS payment; populated rows, prior payments and one original draft remain protected. Empty photographed original queues the existing reader once without Backoffice refresh. No new real receipt/payment was submitted for verification.

Credit claim PR2561/b2987ebb mergeda76151b5 before source. Source PR2563/headc1c1e7a60d2907f63c69b1df192c3490383cb025 mergedb6ae42a1f8585b1f586d2b640529d7026155d080. Full PR38886780922/job116926456320 and exact main38887472511/job116928781485 SUCCESS:2792PASS/0FAIL/0SKIP plus6backup and all required native/HTTP/browser/Windows/build/invariant checks. Ordinary guarded deployment 38888787486/job116933002067 SUCCESS; independent public health at 16Oct2026 13:44 Europe/Athens confirmed healthy exact1d8ba8eee8b9ab10f92da26562c9678a649cd3e0, a descendant containing the unchanged credit source. Earlier deployment38888130578 correctly skipped b6ae42a1 because newer production source was on main; effective revision full CI38888168410/job116931066151 SUCCESS2796PASS/0FAIL/0SKIP plus6backup before ordinary guarded release. No manual deploy, migration or safeguard bypass. Local Node20 combined2695PASS/0FAIL/90infrastructureSKIP; final mounted/schema3PASS/0FAIL/6nativeSKIP and frontend/TABLE_SERVICE build PASS. Native coverage uses synthetic originals, signed till totals, immutable positive payment/document rows/stock/control, concurrent once-only retries, duplicate padded credit, rollback, optimistic stale data, closed/reversed/foreign/permission/excess cases and correction/reversal pair guards. This is CI evidence, not a real LAB payment PASS.

New POS credit use is explicit OFFSET of an existing current-till cash invoice payment or actual CASH_RETURN. Upload/myDATA by itself remains noncash. One negative supplier-payment transaction, credit-document link and attributable Greek audit commit together; original positive payment, document faces/status/rows and stock remain unchanged. Same credit cannot be applied twice; offset never opens drawer as a fictitious cash return. Full-row version and original/payment/remaining amounts must still match. No production financial or document mutation was executed by this page. Latest targeted read-only source check found the existing positive payment unchanged and the credit draft unlinked; private business values/identities/IDs are intentionally omitted from public evidence.

Hosted browser opened canonical Platform Admin and normal Backoffice; both require sign-in in this new browser session. No credential was read, entered or submitted. Consequently the new hosted POS form, physical terminal/mobile, new first-payment receipt and actual negative entry remain NOT TESTED/AWAITING LAB. No new LIVE usage PASS or full Gate3/09 closure. Earlier qualified preview PASS stays historical in its exact scope; latest read-only refresh finds both original myDATA aliases MERGED and one unchanged active payment per canonical POS draft. The newer independent manual reconciliation records automatic=false/paymentChanged=false/stockChanged=false; one canonical order is NEW and the other INVOICED. This page performed neither merge nor posting; this after-only state is not a newly measured LAB financial/stock PASS. Do not replay a real invoice/payment or approve/delete/post stock to obtain evidence.

Single next acceptance action: resume an authenticated isolated MYWORKSTATION LAB POS with identified store/terminal/operator/active shift and recorded cash/card/IRIS/total/stock/audit baseline plus control terminal; preview/cancel first, then test one separately identified synthetic credit offset with explicit confirmation and read back the one signed entry, net expense, immutable positive original, same draft, zero stock delta and unchanged control. Test actual return separately with a fresh baseline. Real-store credit application remains unexecuted for the operator; no historical replay to fill evidence. Same owner retained until completed acceptance or named handoff. Central registries, manual status note and both generated PDFs synchronized in this receipt; preserve all other owners and broader residuals.

16/10/2026 — VOICE-ASSISTANT-01 / TRANSFER DIALOGUE IMPLEMENTED / AWAITING CI AND LIVE

Same retained owner. Claim PR2564/c62c0da3 merged075b54e0 after applicable CI38887057898 succeeded. Source correction follows the published bounded scope: recognize short owner-direction fragments only within an existing transfer topic; carry latest direction across date and export follow-ups; retain original actor/status filters; refuse inheritance across unrelated reports. Add στις/σε to period-only vocabulary and strict direct transfer vocabulary. Existing source SQL, permissions, provider/model/key, schemas, money arithmetic, source caps and export replay untouched. No production business mutation or transaction replay.

Synthetic regression reproduced all three gaps before correction. New four tests pass, including actual Owner and Platform scoped source execution and negative unrelated-topic/filter-retention cases. Existing targeted43PASS/0FAIL/0SKIP before final both-role test addition; frontend build and TABLE_SERVICE verification PASS. Full local Node20 suite running. Full mandatory PR/main native CI and ordinary exact guarded release still required; new hosted acceptance NOT TESTED. Whole VOICE OPEN, operator-name inflection remains next bounded task, not fixed by this change. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md.

16/10/2026 — VOICE-ASSISTANT-01 / DIALOGUE CORRECTION / ASSIGNED

Same owner codex/assistant-business-queries-20261015; source branch fix/assistant-dialogue-20261016. User approved continuing assistant corrections. Whole VOICE remains OPEN. Other owners and earlier qualified evidence are preserved.

Bounded source scope: transfer-direction fragments in an existing transfer conversation; latest date follow-ups; preserve inherited filters and refuse unrelated-topic inheritance. Add the date preposition στις to the strict unfiltered vocabulary. Reproduce with synthetic dialogue FROM -> TO clarification -> next-day question; no real business records in fixtures or public evidence. Actor inflection remains a separate next task.

Keep provider/model/key, source SQL, schemas, permissions, licensing, selected-store scope, money arithmetic, 500-row cap, exports and existing sales/stock/cash/consumption behavior unchanged. No production transaction or replay. Require focused regressions, full PR/main CI, ordinary guarded exact release and subsequent read-only acceptance. This claim must merge before source edits. No new whole-assistant PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-dialogue.md.

16/10/2026 — INVOICE-SECOND-DRAFT-01 / POS FIRST PAYMENT SOURCE READY / AWAITING CI AND LAB

Same owner retained. Continuation claim PR2558/0c20af21 mergedafe9ec53 with all applicable documentation/Windows CI success before source. New read-only proposal requires one existing unpaid NEW/DRAFT myDATA original with verified same VAT/day/type/positive near-total, no existing linked/original-number/canonical-number payment, no received/allocated/deleted source and no separate POS candidate. POS displays both numbers, amounts/date/MARK and asks explicit original confirmation before money; cancellation does nothing. Confirmation repeats the existing exact precheck, then uses the established POS-only transaction and same-draft receipt linkage. An exact selected invoice no longer fails solely because another number shares the amount/day/supplier. Strict creation/stock/cross-supplier/date-discrepancy protections remain; no amount-only automatic reuse.

Photographed first receipts now use the existing guarded empty-original reader queue as well as selected-PDF receipts: populated/reviewed rows and replays remain untouched, empty original starts once without Backoffice refresh. Synthetic tests execute actual client and route handlers for proposal/cancel/exact-recheck/stale/racing-existing-payment/credit mode and empty/populated/replay scheduling. Native fixtures test unique/ambiguous/paid/unlinked-payment/received/deleted/pre-existing POS/foreign/type/date/amount, same draft/rows/stock and one immutable payment across concurrent receipt retries. Local final focused13PASS/0FAIL/4nativeSKIP; prior full Node20 2691PASS/0FAIL/84infrastructureSKIP and frontend build succeeded before final queue-path addition. Native/full exact PR/mainCI and hosted LAB remain required; not fixed/PASS from local tests alone.

New user steering also requests POS credit offset/return support. Exact cash amount was clarified privately; targeted reads show a positive invoice payment and an unlinked credit draft. No financial correction executed. This is a separate queued causal subtask, to claim/implement after this first-payment change, preserving invoice faces, original payment audit, net cash, credit-once idempotency and no stock/fiscal approval. Never treat all credit documents as actual returned cash; distinguish offset from cash refund and do not replay the real payment. Public evidence is generic/synthetic only. Broader owners preserved; whole task remains OPEN.

16/10/2026 13:01 Europe/Athens — POS-CREDIT-CASH-01 / ASSIGNED / USER REPORTED NET-CASH FAIL

Independent continuation owner codex/invoice-second-draft-20261016, branch fix/pos-credit-cash-20261016, checkpoint CHECKPOINTS/CHANGES/2026-10-16-pos-credit-cash.md. User reports a POS credit note offset against a supplier invoice, with net cash paid lower than the recorded positive invoice payment, and explicitly confirmed the exact net cash privately. Existing read-only evidence finds the positive payment linked to its invoice and a separate unlinked credit draft. No real payment/negative adjustment/approval or stock/fiscal action executed by this page. Public records omit business identities, values and source IDs.

Bounded new POS operation: explicitly select an existing credit original and distinguish OFFSET of an existing positive cash payment from actual CASH_RETURN. Preserve the original positive transaction; create exactly one negative supplier-credit movement in the matching active till, linked to the credit document and full audit. Offset must identify the original payment/invoice and show gross, credit and net; credit cannot exceed the remaining gross payment or apply twice. Balance-only credit uploads/myDATA downloads remain noncash. No silent approval of credit stock, no new purchase, no bank/external refund and no automatic cash entry solely from a downloaded or uploaded document. Preserve tenant/store/operator/terminal/session/permission boundaries, stable idempotency, optimistic original amounts and transaction rollback. Reuse existing signed ledger and document/audit schema; no manual production migration.

Claim precedes source. Require meaningful native ledger/once-only/concurrent/rollback/cross-scope/closed-shift/paid-credit/credit-limit/unchanged original and stock controls, mounted API permission tests and actual POS UI selection/net/cancel/confirmation tests; full PR/mainCI, guarded exact revision and read-only hosted preview. Real cash application remains unexecuted; this page must not silently alter the reported store's money or replay the invoice. No whole LAB PASS. Other invoice-prevention first-payment PR2559 and historical-pair/Gate3/payment/report owners retained. Keep this independent subtask OPEN until accepted or named handoff.

16/10/2026 12:46 Europe/Athens — INVOICE-SECOND-DRAFT-01 / POS FIRST PAYMENT CORRECTION / ASSIGNED / USER LIVE FAIL

Same owner codex/invoice-second-draft-20261016; continuation branch fix/invoice-pos-first-payment-20261016, baseline maine2412a2. User clarified that myDATA download creates an unpaid Backoffice draft and payment is made only by POS. The previous near-header prevention incorrectly blocks a legitimate first POS payment when OCR and myDATA numbers differ. This overrides any interpretation that a downloaded myDATA original is evidence of payment; prior strict identity, review/stock and once-only payment protections remain required.

Bounded correction: a unique unpaid existing myDATA draft with matching verified VAT/day/type/positive near-total may be offered for explicit POS original/header confirmation. No payment occurs while proposing or cancelling. After confirmation, recheck the canonical header through the existing exact flow, record payment only through the existing POS transaction route and link the same existing draft/photo, never a second purchase. Paid/received/allocated/deleted/ambiguous/cross-supplier candidates and pre-existing POS duplicates remain held. An exact selected original must not be rejected solely because another legitimate invoice has a coincident supplier/day/amount. No automatic number/date correction or permissive amount-only linking.

Targeted production reads show the newly reported invoice subsequently received one active POS payment linked to its existing myDATA draft; do not replay it or publish business identities/values. No real payment, delete, approval, merge, stock/fiscal action authorized for this page. Current implementation USER FAIL / NOT TESTED for the revised behavior. Require native unpaid/paid/ambiguous/both-arrival/race/original-row/payment preservation tests and actual POS submit-flow tests for confirmation/cancel/exact recheck; full PR/mainCI, guarded release and read-only hosted acceptance. Preserve broader09/Gate3, historical-pair and automatic-report owners. Publish this continuation before source; owner remains assigned through completion/handoff.

16/10/2026 10:58 Europe/Athens — INVOICE-SECOND-DRAFT-01 / SOURCE LIVE / LIMITED READ-ONLY LIVE PASS / OPEN LAB

Owner codex/invoice-second-draft-20261016 retained. Continuation claim PR2551/de6292b2 merged476de3b8 before source. Source PR2552/e920fbbdacde05fe1a947e00aa4ace5d04ffd62f mergedfa8e183d2db089b905b76b3723174615abb84998. Full PR38868384331/job116866556285 and exact main38869077589/job116868771548 SUCCESS:2751PASS/0FAIL/0SKIP plus6backup and required native PostgreSQL/Windows/build/browser/invariant/HTTP checks. Local Node20 full2666PASS/0FAIL/78infrastructureSKIP; an npm registry403 prevented an initial launcher attempt, then the already installed Node20 binary ran successfully without source/test weakening. Ordinary guarded deploy38869682809/job116870634308 SUCCESS; Render deploydep-db8tej2jnfac73bctfr0 LIVE and independent public health confirmed exactfa8e183d2db089b905b76b3723174615abb84998. No manual deploy/migration or real business POST from this page.

LIMITED LIVE PASS: signed-in Super Admin desktop, explicitly selected existing store, original inbox and review GETs only. The formerly missing long grouped-numeric pair now displays its existing POS candidate, both originals, discrepant stored dates, original populated POS rows and original single payment. Header/original certification and reason untouched; merge disabled; closed without submission. Original photograph visibly corroborates the myDATA date rather than the stored POS date; no stored date was corrected. Targeted before/after database fingerprints confirm both documents and the linked payment of this pair unchanged. Both targeted original payment rows across the two reported cases also retain their complete pre-deploy fingerprint. A final selected-store, Greece-day supplier audit finds one active payment per reported supplier and no reversal, without publishing any business amounts or identifiers.

The other reported pair cannot honestly be described as four wholly unchanged drafts: during this active business session, the application audit records an independent nonautomatic reviewed merge and subsequent registration using the existing operator account. This page did not submit those actions. Current review correctly reports already registered and offers the existing purchase instead of new creation/payment/reading. The original source and historical alias remain; the new registered document and order/line changes are concurrent business evidence, not our test actions or a global financial/stock invariant. Do not repeat that merge/payment to obtain evidence. No new real supplier/store/operator/invoice/MARK/payment details, values or screenshots published here.

Whole prevention acceptance remains OPEN / AWAITING LAB: native both-arrival/concurrency/posting/unchanged-state regressions passed, but no new hosted POS receipt/payment/posting was submitted, no actual reviewed merge of the remaining pair, and no mobile/other-role acceptance. The limited PASS covers detection/read-only guards and scoped unchanged fingerprints only. Same owner retains this independent subtask until completion or named handoff; historical broader09/Gate3 and other pair owners unchanged. Next action: a separately scoped synthetic LAB receipt acceptance with fresh before/after controls, without replaying either real invoice/payment. Existing date correction or historical-pair merge remains outside this read-only task. Manual, numbered09 residual and both status PDFs synchronized; CI is not LAB PASS.

16/10/2026 — INVOICE-SECOND-DRAFT-01 / DATE-MISMATCH SOURCE READY / AWAITING CI AND LIVE

Same owner retained. Continuation claim PR2551/de6292b2 merged476de3b8 after all applicable documentation/Windows CI succeeded, before source. Added review-only long numeric whitespace/leading-zero full-key corroboration for differing stored issue dates, requiring nonempty same VAT/type/positive totals within0.05. Strict series/number reuse remains unchanged; same-date missing-series acceptance preserved. Candidate discovery, inbound pre-payment/locked handoff and both posting entry points cover the bounded evidence. Explicit header/original confirmation still required; no silent date correction, automatic merge, schema change or real business action.

Synthetic regressions include an empty myDATA line table and cross-year date discrepancy in both arrival orders/concurrent retry; existing pair review and both document/order posting paths must preserve every row, file, job, payment, stock and control. Wrong scope/VAT/type/amount/nonnumeric series/different full key are excluded. Local Node20 focused6PASS/0FAIL/18nativeSKIP; full local suite running. Full native PR/mainCI, exact ordinary guarded release and hosted read-only preview required. No LAB PASS or whole regression closure. Original dates require independent source review; do not submit either real merge/delete/approval/payment. Public text contains synthetic/general evidence only.

16/10/2026 10:33 Europe/Athens — INVOICE-SECOND-DRAFT-01 / SAME OWNER / STORED DATE MISMATCH / OPEN

Owner codex/invoice-second-draft-20261016 retained; follow-up branch fix/invoice-grouped-date-review-20261016. After explicit workspace confirmation, targeted read-only database queries confirmed that the remaining long grouped-number pair has different stored issue dates across years, with matching verified supplier VAT/type/positive header amount and one existing active payment on the POS document only. No evidence yet certifies which original date is correct; do not silently correct either source. Previous source be233c64 remains released, first pair detected, whole regression OPEN.

Bounded follow-up: numeric-only long full-number equivalence after whitespace/leading-zero normalization, together with same nonempty supplier VAT/type/positive near-total, may surface an issue-date mismatch for explicit header/original review and hold second creation/payment/posting. It must never authorize automatic reuse, change strict series identity, or match letters/punctuation/short numbers, foreign scope, other supplier/type/amount or cancelled documents. Preserve all previous owners, original files/rows, existing payment and once-only stock safeguards. No schema or production writes; no real merge, delete, approval, upload or repeated payment. Generic public record only; synthetic regression fixtures. Require native both-arrival/concurrency/posting and unchanged-record tests, full PR/mainCI, ordinary guarded release and read-only hosted preview. New follow-up NOT TESTED / AWAITING LAB. This continuation record must merge before source changes.

16/10/2026 — INVOICE-SECOND-DRAFT-01 / SOURCE LIVE / PARTIAL HOSTED OBSERVATION / OPEN

Same owner codex/invoice-second-draft-20261016 retained. SourcePR2549/head8e9416123f0707033971c6f409e1fe65756d5bec mergedbe233c64a5236daf2e323fe56b5c6bc40a078f98. FullPR38864087963/job116852932004 and exactmain38864700655/job116854861317 SUCCESS:2748PASS/0FAIL/0SKIP plus6backup, all required native PostgreSQL/Windows/build/browser/invariant/HTTP checks. Ordinary guarded Render38865167931/job116856238432 SUCCESS; exact healthybe233c64 independently confirmed through public health. No manual deploy/migration/provider/financial/stock/fiscal or existing-pair mutation.

Properly prepared localNode20 full2665PASS/0FAIL/76infrastructureSKIP; focused18/0/20nativeSKIP and both source/frontend builds succeeded. An initial localNode24 full run before Prisma generation failed module initialization; resolved by normal server preparation and Node20 rerun, not source/test weakening. Native four new regression cases actually passed in fullCI, including both arrivals/concurrency, mismatch review, posting holds and complete money/stock/row/file/control preservation. These are isolated proofs, NOT a newly submitted LAB receipt or production payment.

Hosted read-only selected-store SA review before release showed no candidate for either reported pair. After exact release the misread short-number pair shows the existing POS candidate, both originals, original payment, two existing row tables, explicit header-correction review and disabled merge. All certification/row-choice/reason fields left untouched; closed without POST. The long grouped-numeric pair STILL shows no POS candidate. Thus the whole user regression is OPEN, not fixed/PASS. Four existing inbox records remain visible; no claim of independent DB row hashes or global financial invariance during active business.

Do not repeat upload/payment, approve, merge or post either real pair. Need independent read-only stored header/date/type/supplier/source-link diagnosis for the unresolved grouped-number case before another causal source change; do not speculate or loosen automatic identity. Render get_selected_workspace returns no selected workspace and explicitly requires the user's workspace choice before queries. list_workspaces exposes one named My Workspace; no workspace/database selected, no SQL or credential access. User confirmation of that workspace is the single blocking next action; then use request-scoped workspaceId to inspect only the existing target pair. No sensitive new real supplier/store/invoice/payment identifiers, values or screenshots are published here. Broader and historical-pair owners/PASS remain unchanged; this owner remains assigned until completion/named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-invoice-second-draft.md.

16/10/2026 — INVOICE-SECOND-DRAFT-01 / SOURCE READY / AWAITING NATIVE CI AND LIVE

Same independent owner codex/invoice-second-draft-20261016. Claim PR2548/headb23a96ca, all applicable documentation/Windows checks SUCCESS, mergedf350463 before source. Existing historical reviewed-merge and broader invoice/payment owners retained.

Expanded same-company/store original candidate lookup and POS pre-payment/transactional handoff check to include same verified supplier VAT, issue day, document type and positive header totals within0.05, even when the OCR number is completely different or numerically grouped. This is review evidence only: exact invoice-number/series rules unchanged, no automatic merge or supplier correction from similar amounts. Unknown/missing VAT is not equivalent to a verified supplier. POS-first original acquisition returns reconciliationRequired before a new shell; myDATA-first precheck/locked job reuse refuses before a second draft. Existing mismatched candidates require explicit original/header review and retain existing one-table choice/version/payment safeguards. Both order and document-only posting paths hold unresolved same-receipt candidates. A legitimate different invoice with coincident supplier/day/type/amount may require human review; it must never be automatically combined.

No production records changed, no historical-pair merge, payment, upload, stock/fiscal/finalization/provider replay. Synthetic tests only, no new real business data in public files. New native tests exercise both arrivals and concurrent retries, empty-table number mismatch, explicit review/posting holds, full original-file/job/row/payment/stock/control snapshots, and foreign/supplier/day/type/amount/cancelled negatives. Existing exact-reuse and missing-series acceptance remain unchanged. Local Node20 targeted18PASS/0FAIL/20nativeSKIP; frontend build/TABLE_SERVICE PASS. Full local suite and mandatory full Node20 native PostgreSQL/HTTP/browser/Windows/invariant PR/mainCI remain required. Native SQL/hosted behavior NOT TESTED locally; no isolated PostgreSQL available. New behavior AWAITING CI/LIVE, not fixed or LAB PASS. Next: full CI, exact ordinary guarded release, read-only original-pair preview; do not submit real historical invoice/merge/payment for evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-invoice-second-draft.md.

16/10/2026 09:44 Europe/Athens — INVOICE-SECOND-DRAFT-01 / ASSIGNED / USER LIVE FAIL

Owner codex/invoice-second-draft-20261016, source branch fix/invoice-second-draft-20261016. Independent newly reported prevention regression; preserve historical reviewed-merge owners codex/inbox-consistency-20261015 (146066/846666) and codex/invoice-cross-supplier-duplicate-20261014 (505/17113), broader09/Gate3 and payment/OCR/retail owners. No takeover or automatic historical cleanup.

User reported two independent POS/myDATA duplicate-draft cases. Read-only inspection found four separate drafts and did not identify repeated payments for the reported cases. New public documentation intentionally omits real supplier, store, operator, invoice, MARK, payment identifiers, timestamps and amounts. Existing original records and all previous owners remain unchanged. Observed duplicate-draft FAIL; original identity and full financial invariants not certified. No mutation, approval, merge or replay performed.

Baseline main9263e37; current AGENTS, active/tracker/pending/manual, prior common/cross-supplier/inbox-consistency checkpoints and history read. Current parser splits whitespace numeric grouping into a false series; inbound guard restricts SQL to trailing numeric identity and misses completely misread numbers. Bounded source scope: conservative same-supplier/day/type/near-header-total REVIEW candidates across number mismatch in both arrival orders; uncertain candidates must hold new draft/payment and never qualify for automatic merge. Preserve existing exact reuse, different-series identity, tenant/store/date/type bounds, original files, deleted-draft fences, row choices, immutable existing payment and once-only posting. Existing-pair repair remains unexecuted.

New behavior NOT TESTED. Require actual helper/native SQL tests for both arrivals, mismatched/grouped numbers, same-amount legitimate ambiguous documents held for review, negatives, concurrency and payment/stock/row/file preservation; full Node20 PR/mainCI and exact ordinary guarded release. CI is not LAB PASS. No production data, invoice/payment/stock/fiscal or provider mutation. Claim must merge before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-invoice-second-draft.md. Owner retained until completion or named handoff.

16/10/2026 02:27 Europe/Athens — VOICE-ASSISTANT-01 / MULTILINE SOURCE LIVE / ACCEPTANCE OPEN

Retained owner codex/assistant-business-queries-20261015. Claim2544/head6e840b3/docs checks SUCCESS mergeda20ac4c before source. Source2545/head2ab70940e8a381f6c0fdf9ff6cf6066ac0b070af mergedd889bb3cbdc64ac02027499bb347dac1bb436a78. Full PR38821608777 attempt2/job116720910777 and exact main38822667721/job116722804426 SUCCESS2743PASS/0FAIL/0SKIP plus6backup, all native PostgreSQL/Windows/build/browser/invariants/realHTTP checks complete. Attempt1 passed2743/0/0 but Chromium Target.createTarget timed out before header flow; unchanged failed-job rerun passed, no test/guard changes. Local correct-CWD full2664PASS/0FAIL/72native-environmentSKIP; final41focusedPASS and frontend build/TABLE_SERVICE verified. These are isolated CI evidence, not hosted file/source acceptance.

Ordinary guard38823228101/job116724575509 SUCCESS actually deployed pinned d889bb3cbdc64ac02027499bb347dac1bb436a78; exact health23:26:06UTC15Oct and independent public /api/health oktrue/version0.22.0+kat-test-pos/same d889bb3. Workflow head720205860 differs only in independent BusinessPicture documentation/evidence/PDF paths; no assistant/runtime source difference. No manual deploy, migration, auth/key/model/service/license or financial/stock/fiscal mutation/replay. Current main records and independent owners preserved.

Released shared parsing keeps every current question line/CRLF and separates generated topic/period without discarding later filters. Own dates/domain/direction override old context; inherited user text is quoted on one line. Actor/status/payment constraints anywhere in current/topic/period prevent unfiltered shortcut. Operator Χρόνης/Χρόνη no longer mistaken for a year. Old exact transfer/date/source/Owner/session/module/export/sales/stock/cash/consumption/caps/source arithmetic regressions retained. New actual dispatcher, Owner handler and Platform session tests cover multiline source and scoped authorization. Signed real XLSX/CSV/PDF/DOCX fixture replay rechecks scope/filter/auth, changes isolated source10.10→20.20 after ticket issuance and parses each real file to prove fresh20.20, not cached10.10/private data; five source reads and fresh authorization boundaries. No real-store query or hosted download is inferred from fixtures.

Hosted browser remains blocked by native credential safe-resume restriction; no reset/new-session/token/credential workaround. Original01:05 natural-period2rows/2178.28 remains limited observed response only; independent original transfer-list comparison, live chronological/filter/role tests and four downloads still NOT TESTED. No manual or numbered full PASS. Whole assistant OPEN/ASSIGNED; broader application-source parity and physical/mic acceptance unchanged. User does not need more screenshots.

Read-only Render connector fallback was investigated under render-postgres skill: get_selected_workspace reports no workspace selected and explicitly requires asking user which workspace to use, do NOT pick one; list_workspaces returned one My Workspace. No workspace selected, database listed/queried, SQL executed or credential inspected. This is a required connector choice, not a new broad permission request and not a database failure. Single next action retained here: obtain user's explicit My Workspace choice, then independent read-only existing Diadoxou transfer-row/count/amount comparison with observed answer; continue permitted hosted dialogue/file acceptance when browser allows it. Do not declare 'σαν ChatGPT' or whole VOICE complete from CI/source release. Existing conditional readiness notification checks only recorded completion and performs no coding. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-multiline-context.md.

16/10/2026 02:15 Athens - BUSINESS-PICTURE-MAXIMIZED-02 + EXPENSE-DRILLDOWN-03 / LIMITED LIVE PASS

Same owner feat/business-picture-readability-20261016 completed both requested independent follow-ups. Actual fresh selected LAB SA desktop after exactbbfd32b2 release: maximized dialog/scrollpane contained x0y0/right1348/bottom936 vs prior18px overflow; bottom scrollbar visible, normal/restore/full disclosure usable,20px amounts and original monthly/total values preserved. MissingVAT count month5/day3/footer12 and warning12 open exactly5/3/12 original expenses; row opens stored expense context and return preserves report/scrollLeft2022. No business writes or fixture replay. SourcePR2542/headb4c3b766 fullCI38820457611/main38821167994 each2737/0/0+6backup; ordinary guarded Render38821769686 SUCCESS23:11:25UTC15Oct and independent health exactbbfd32b2bea45ea5132dc4518fc2c9cbb0d37435 before reload. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-business-picture-maximized.md; manual docs/manual/profitability/PASS.md; actual evidence CHECKPOINTS/EVIDENCE/business-picture-maximized-20261016/. Supersedes own max USER FAIL/AWAITING LAB only. Wholefinancial27/numbered25 OPEN with codex/task27-resume-20261005; Owner/mobile/physical/financial and N51/assistant/reporting/audit assignments preserved. Completed own pending claims removed.

16/10/2026 02:02 Europe/Athens — VOICE-ASSISTANT-01 / MULTILINE CONTEXT SAFETY / ASSIGNED

Same retained owner codex/assistant-business-queries-20261015; branch fix/assistant-multiline-context-20261016; user02:00 continuation. Same existing key/provider/model approval retained. Original natural-period source2532/7a507c1/full2728/ordinary guard38813496668 and actual01:05 response preserved. Whole assistant OPEN. Native credential browser observation still refuses safe resume; no reset/new-session/credential workaround. No new hosted acceptance, numerical/source/file or full ChatGPT-like PASS. No more user screenshots requested.

Read-only code inspection identifies a bounded gap: current business domain/calendar/direct shortcut uses first line only. A multiline date may be missed; an actor filter on a later line must never enter unfiltered direct shortcut. Generated history also must preserve all lines of the user topic/period without old-date contamination. Implement shared current-versus-generated-context segmentation, flatten only quoted inherited user context, inspect full user text for shortcut eligibility, and preserve latest period/domain boundaries. No new SQL/domain/model/key/permissions/schema or business writes. Preserve existing500cap, source/reversal arithmetic, Owner/native scopes/modules, signed export replay and sales/stock/cash/consumption behavior. Isolated actual both-role route/source/filter/replay/file regression and full PR/mainCI/guarded exact release required; LIVE source/file acceptance stays separate. No payment/stock/fiscal/old transaction replay. Other owners/partial PASS protected. Claim merged before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-multiline-context.md. Next publish this claim then implement and verify bounded context correction.

16/10/2026 01:57 Europe/Athens - AUDIT-READABLE-DAY-01 / LIMITED LIVE READ-ONLY PASS

Owner codex/audit-readable-day-20261016 completed the requested daily/hour/Greek readable/larger-text projection. SourcePR2539 final62f00cbe merged4464e31eecd0895be271e3889244f3b5ec82b9c0; fullPR CI38816797392 SUCCESS2737/0/0 plus6backup/build/native/HTTP/invariants/Windows. First CI38816233997 caught3 test-harness/expected-label failures; corrected without weakening scope assertions. MainCI38817381597 and ordinary guarded Render38817931405 SUCCESS; independent public health exact4464e31e verified after22:49UTC.

Actual authenticated SuperAdmin Χρήστος Μάνης, desktop1348x926,16Oct01:50-01:56Athens: central Events opens16Oct→16Oct; selected Diadoxou; keyboard hours00:56-00:58 produce17rows and only00:56/57/58. Real source rows show OCB ΜΕΓΑΛΟ ΤΖΙΒΑΝΕΣ, HELL CLASSIC, ΝΕΡΟ500ML, canonical quantities/prices/totals and ΝΤΙΝΟΣ ΠΑΝΑΓΙΩΤ; Greek stock label and explicit missing historical stock baseline. Central cell16px measured and screenshot. Existing central initial200-row cap remains; time search narrows onserver. Automated fill alone does not trigger React controlled-time state in this browser; real keyboard changes did and retained filters.

Actual Backoffice selected Diadoxou→Εμπορική λειτουργία→Λοιπές→Αναφορές→Συμβάντα/Audit resets old month range to16Oct→16Oct. Hours00:56-00:58 return17events/5categories:6cart-add,4stock-sale,3completion,3cash-sale,1qty-change. Refresh retains dates/hours/17rows. Visible OCB qty1→2/value2→4, actorΝΤΙΝΟΣ ΠΑΝΑΓΙΩΤ, full Greek reasons/missing reason, raw IDs collapsed; body16px measured. Screenshots CHECKPOINTS/EVIDENCE/2026-10-16-audit-readable-day/central.jpg and store.jpg. CSV/collapsed detail expansion passed mounted local/nativeCI only; final live export/detail action was blocked by native credential retained_data_restricted and is NOT TESTED live. No global or physical/mobile/maximize/export acceptance claim.

Read-only UI and source diagnostics only: no sale/payment/stock/shift/fiscal/migration/historical audit rewrite. Broader smart-Audit34/No33 and other owners remain OPEN unchanged; existing report/expense/permanent-price/tenant/video/invoice PASS preserved. Missing historic facts remain explicitly unavailable, never fabricated. Manual docs/manual/reports/PASS.md and numbered32/Tracker34 synchronized; own completed pending claim/source entries removed. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-audit-readable-day.md.

16/10/2026 01:24 Athens - BUSINESS-PICTURE-READABILITY-01 / LIMITED LIVE VISUAL PASS

Independent requested Business Picture readability completed, owner feat/business-picture-readability-20261016. Actual selected LAB SA desktop: table370px higher, body/day20px, totals22px, headers16px; compact visible warnings and collapsed/openable full explanations. All21columns, monthly/totals and11expanded-day row strings identical; VAT display and maximize/restore preserved. No business writes. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-business-picture-readability.md; manual docs/manual/profitability/PASS.md; before/after evidence in CHECKPOINTS/EVIDENCE/business-picture-readability-20261016/. Supersedes own earlier AWAITING LAB only. Whole financial27/numbered25 remains OPEN with codex/task27-resume-20261005, independent Owner/mobile/physical/other financial residuals unchanged; N51/assistant/automatic reporting owners and protected PASS preserved. Own completed pending claim removed; no layout residual.

16/10/2026 01:08 Europe/Athens — VOICE-ASSISTANT-01 / NATURAL PERIODS LIVE / ACCEPTANCE INCOMPLETE

Retained owner codex/assistant-business-queries-20261015. Claim2530/heada2905cd/docs checks green merged17c2078 before source. Source2532/head09e76cf1c745861c8544a852391ed3b5bbdd3b7f merged7a507c1f4fb9a02ffc95b7b50463c5d21a1c0b7b. Full PR38812050970/job116687607054 and main38812818025/job116690170739 SUCCESS:2728PASS/0FAIL/0SKIP plus6backup, native PostgreSQL/browser/build/invariants/realHTTP all completed. Guard38813496668/job116692352114 actually deployed pinned7a507c1, exact healthy21:58:20UTC15Oct and independent public health confirmed after22:04UTC. Later independent reporting/readability source/claims73ff575 are preserved, not part of this assistant's acceptance.

Released Athens current/previous week/month/year, rolling1..366days, Greek named month/day, dotted/slash/ISO dates and latest user-period follow-ups. Current period ends today, week begins Monday; ambiguous/mixed/partial/invalid intervals clarify without model/source guesses. Current direction beats old topic, inherited actor filters do not enter unfiltered direct shortcut, unrelated topics/assistant-authored dates do not supply business period. Fixed500cap/source SQL/cent arithmetic/tenant/license/personnel/existing sales-stock-consumption-export/key/model behavior retained. Local final corrected server-CWD suite2646PASS/0FAIL/70native-environmentSKIP (2716tests before last added focused case); final18targetedPASS, frontend build PASS. Earlier root-CWD18path errors are not code failures or waived assertions. No production payment/stock/fiscal/business mutation/replay or schema/auth/key change.

User00:55 explicitly requested agent-run checks and notification only when assistant is ChatGPT-like; no more screenshot requests. Secure browserAuth email/password then2FA submitted normally; fresh visible canonical Admin identified SuperAdmin Χρήστος Μάνης. Reloaded deployed UI, opened Βοηθός and selected Diadoxou, all-stores unchecked. Actual question at01:05 'Πόσες μεταφορές στον ιδιοκτήτη έγιναν αυτό τον μήνα και ποιο είναι το συνολικό ποσό;' returned source Μετρητά προς ιδιοκτήτη,2026-10-01..2026-10-16,2rows/2178.28; rows12Oct09:23:53 amount678.28 and11Oct14:30:53 amount1500, operator/description/date columns and4file buttons. Incomplete current-day marker/asOf22:05:48.070UTC retained. Visible result matches prior screenshot but this is NOT independent original-list numerical comparison, actual file-download verification or whole assistant PASS.

Before screenshot capture/Excel action, browser native credential protection refused observation: retained_data_restricted; kernel reset. Exact existing-tab recovery refused 'native credential state cannot be safely resumed'. Stopped browser; no credential reads/reconstruction/new-session workaround. Screenshot not saved, Excel button not clicked/download not started. Independent normal movement-list BEFORE/AFTER, chronological live follow-up/direction tests, file bytes and normal Owner/physical mic/revocation remain NOT TESTED. UI-derived result above is recorded honestly as limited observation, not manual/numerical PASS. No manual/checklist closure or fake assurance 'answers everything'. Advanced schedules/payroll/liabilities/profitability/stock-history/all-store new domains and multiline/freeform robustness remain OPEN with existing owners/guards retained.

Single next action retained here: restore permitted normal hosted inspection for read-only original transfer-list comparison then same selected-store latest-period/direction/actor-filter and4format download acceptance; do not repeat financial transactions or alter access. User does not need to provide further screenshots. Complete actual acceptance and required manual/tracker/PDF PASS record before declaring agreed assistant coverage ready. Whole VOICE OPEN/ASSIGNED until completed or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-natural-periods.md.

16/10/2026 00:35 Europe/Athens — VOICE-ASSISTANT-01 / NATURAL BUSINESS PERIODS / ASSIGNED

Retained owner codex/assistant-business-queries-20261015, branch feat/assistant-next-20261016; explicit user continuation00:34, same existing key/model/provider reuse already approved. Prior release2523/6627739/full2721/guard38807011579 preserved. Visible user00:27 screenshot now shows selected Diadoxou report2 transfers678.28+1500=2178.28 with rows/files; this is visible source-routing evidence only, not independent original-list comparison or export PASS. Two00:30 screenshots unavailable locally; do not infer their contents. All earlier protected sales/stock/cash/consumption/tenant/module/source/export behavior and other owners retained. Whole assistant OPEN.

Bounded next implementation: deterministic Athens calendar periods for existing business_records (current/previous week/month/year, rolling up to366days, Greek named months) and chronological business follow-ups that keep domain and latest supplied period without mixing old/new dates. Ambiguous/mixed/invalid periods clarify before source/model; model cannot replace recognized dates. No new business data domain, automatic scheduling/email, all-store grants, schema/key/model/auth/license/financial/stock/fiscal write or replay. Existing500row cap and source arithmetic unchanged. Require isolated period/DST/leap/rollover/ambiguity/history/actual dispatcher/export regression, full PR/mainCI and ordinary exact guarded deployment before user acceptance. New functionality NOT TESTED; original numeric comparison/roles/files/advanced domains remain open. Claim publishes before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-natural-periods.md.

16/10/2026 13:30 Europe/Athens — AUTO-REPORTS-20261016 / LIMITED LAB CONFIGURATION + HOLD-PREVIEW PASS / AUTOMATION OPEN

Retained owner codex/automatic-reporting-20261016/issue2527. SourcePR2557/head2c75f058/fullPR38881306706/job116908627932 and exactmain38882013750/job116910928640 SUCCESS2772/0/0 plus6backup, released e2412a28 via ordinaryguard38882640740. Actual one LAB Save/reopen PASS is retained, no replay. Pointer FAIL root cause was published with manual in claimPR2560/docsCI38884042753 merged968fe021 before fix. FixPR2562/finalhead20ca0f893030998a647f06bde5e8329133e079f6/fullPRCI38884820066/job116920061260 and exactmain38885430170/job116922084942 SUCCESS2772/0/0 plus6backup, merged2650c957. New actual Chromium regression reproduces original background click, then verifies one preview/no background action at1348x936,1024x768,390x844; synthetic evidence is not physical-device PASS.

Ordinaryguard38886079165 correctly deferred2650 because newer invoice source17d9599c included this same report fix. Preserve that owner's source and claims. Incorporating exactmain17d9599c70297a7f56cff8980c44b14839870e5e/fullCI38885525993/job116924125748 SUCCESS2783PASS/0FAIL/0SKIP plus6backup, including the new Chromium check/all original native/Windows/build/invariants/realHTTP. Ordinaryguard38886688753/job116926080190 SUCCESS: pinned17d10:22:25UTC, exacthealthy10:24:17UTC/version0.22.0+kat-test-pos. No manual deployment or sandbox production DB script. Bootstrap adds only the report-settings table; no cash-rule/recipient/domain mutation by this feature. Draft2534 closed as superseded by integrated source2557, historical proofs retained.

Actual authenticated cloud desktop SuperAdmin at canonical Platform Admin, selected MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ/cmtpopbgo000trhb5ng9ytiru; control ΕΡΓΑΣΤΗΡΙΟ ΑΠΟΜΟΝΩΣΗΣ ΕΤΙΚΕΤΑΣ/cmuk8gxui000ppabfykdxwb1y. BEFORE both independently0terminal rows/default07/15/23/FULL-DELIVERY/save-first/previewdisabled; closed-cash16Oct summaries both0closed/all displayed totals0, recipients blank. Exactly ONE target Save at e2412a28: MAIN slots1/2/3,07/15/23, rule confirmation; saved/no-email message and same fields after reopen. After final17d release, another ordinary reopen retained same values; normal POINTER click now showed loading then15Oct sourceCount1/settingsversion1/HOLD for ambiguous/previous unfinished source, missing MAIN shifts1/2/3, and no fabricated financial totals. No Video Events setup opened. Report modal DOM parentz1010 confirmed. Control AFTER again0rows/save-first/previewdisabled/no inherited MAIN or result, closed without Save. No second Save, upload, shift, payment, invoice, stock or fiscal action; physical POS/operator shift/SKU/payment/stock delta N/A to this config/read-only flow. Global financial invariance is not certified from these UI-only observations.

LIMITED LAB PASS: configuration persistence/reopen, selected-store control isolation, actual pointer access and incomplete-source HOLD display. Earlier pointer FAIL closed only for this flow. Ready-day numerical totals/employee liability, ordinary Owner/other roles live, other companies live, physical/mobile/touch, other custom schedules and SMTP delivery remain NOT TESTED. No automatic worker/outbox/enable/send exists. Screenshots repeatedly timed out or returned unrelated background despite current functional DOM, so no trustworthy image was saved/published or visual PASS invented; functional observations and source/CI/release evidence are recorded in acceptance.json. Relevant native/mounted tests independently cover permissions/tenant/version/rule/concurrency/data preservation; they do not become live acceptance claims.

Completed configuration/preview implementation and this pointer retest are removed from active pending, with manual docs/manual/automatic-reports/PASS.md and trackerPDF synchronized. AUTO-REPORTS and all broader14 requests stay OPEN with same owner; assistant/invoice/supplier/order owners and earlier PASS unchanged. Single next bounded action: durable per-recipient report outbox/lifecycle with fresh role/store/license/current-recipient checks and duplicate/SMTP-uncertainty handling, then explicit per-store scheduling/enable and delivery acceptance. Weekly/monthly cash by employee, expenses/payroll, stock/draft/margin/supplier/order/turnover/workload readers and retained-owner assistant coordination remain open. Never enable or silently backfill recipients from the old default close-email flag. No further LAB Save or accepted transaction replay is needed to continue.

16/10/2026 — AUTO-REPORTS-20261016 / LIMITED LAB SAVE-REOPEN PASS / PREVIEW LIVE FAIL / LAYER FIX ASSIGNED

Same owner codex/automatic-reporting-20261016/issue2527, follow-up fix/automatic-report-dialog-layer-20261016. SourcePR2557/head2c75f058 merged e2412a28c60226890f60dd87e64145d8e9771348; PRCI38881306706/job116908627932 and exactmainCI38882013750/job116910928640 SUCCESS2772PASS/0FAIL/0SKIP plus6backup. Ordinaryguard38882640740/job116912831534 SUCCESS pinned09:46:07UTC, healthy09:48:10UTC exacte2412a28/version0.22.0+kat-test-pos. Draft2534 closed as superseded after integration, original proofs retained.

Actual authenticated desktop SuperAdmin target ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ/cmtpopbgo000trhb5ng9ytiru and control ΕΡΓΑΣΤΗΡΙΟ ΑΠΟΜΟΝΩΣΗΣ ΕΤΙΚΕΤΑΣ/cmuk8gxui000ppabfykdxwb1y. BEFORE each independently opened report settings:0terminal rows/default07/15/23/FULL/DELIVERY/save-first/previewdisabled. Existing16Oct closed cash summaries independently refreshed both0rows/all displayed totals0; store recipients blank. Exactly ONE target Save: MAIN slots1/2/3/07/15/23, confirmation checked. Returned saved/no-email message, Previewenabled. Close/reopen fetched same MAIN/slots/hours, no save-first message and Previewenabled. LIMITED LAB PASS only persisted configuration/readback; no actual preview or numerical/financial PASS yet. Config/control baselines recorded before Save; physical POS/operator shift/SKU/payment/stock N/A, no financial transaction replay.

Actual PREVIEW FAIL: clicking its visible semantic button opened the underlying control-store Video Events setup. Closed that unrelated setup without editing/saving/connecting anything. Read-only DOM hit test at preview center identified that Video Events button; new report modal parentz50, existing video launcher fixedleft32/bottom32/z1002, integrationslauncherz1004. Thus lower controls can be covered. Existing source/native/mounted tests passed but did not test actual CSS stacking. Screenshot clipping timed out; native screenshot showed unrelated background rather than matching current dialog. No trustworthy screenshot delivered/published and no visual PASS inferred. Current DOM confirms dialog visible/hit-testable at its top but bottom preview obstructed.

Bounded same-owner follow-up: raise ONLY the new report modal above existing launchers and add actual Chromium causal regression at desktop/mobile widths, with real pointer clicks and a reproduced lower-layer control. Do not change video/integration launchers, permissions or any financial/rule/recipient logic. Publish this record and the tested Save/reopen manual before source fix; new preview remains FAIL/OPEN. Require fullCI, merge/exact guarded release, then existing target read-only preview and unchanged control without another configuration Save. Same owner/other domain owners remain retained; dispatch/outbox/SMTP and broader14 requests OPEN. Manual docs/manual/automatic-reports/PASS.md records only actual Save/reopen and this known obstruction.

16/10/2026 — AUTO-REPORTS-20261016 / SETTINGS + SAVED PREVIEW SOURCE READY / AWAITING CI AND LAB

Retained owner codex/automatic-reporting-20261016/issue2527, source feat/automatic-report-settings-20261016. Continuation claimPR2556/head1bcba0ad/full applicable docsCI38880092551 SUCCESS merged32023f775656 before source. Incorporates already-tested draft2534 policy/source and adds AutomaticReportSettings additive bootstrap table with version/updatedBy, strict explicit per-store terminal/slot/hour configuration, fresh database SUPER_ADMIN and active company/store matching. GET/PUT/report-settings and POST/preview are mounted after existing platform auth/SA guard; request bodies cannot override scope or preview configuration. Save confirms actual effective cash rule without changing it; shared pure legacy fallback preserves ESTIA/PETROUPOLI/GALATSI difference-only behavior. Both save and preview reject a changed settings version/rule. Reader rechecks source/config version inside repeatable-read snapshot. No endpoint sends email or enables a worker.

Selected company → stores → Αναφορές ταμείων opens a separate keyed dialog: explicit hour/terminal/slot fields, actual rule confirmation, versioned Save, saved-settings-only date preview, Greek readiness holds, original employee differences and per-day/POS/delivery offset/net display. Dirty drafts disable preview; Refresh discards changes; stale load/preview responses after store switch are ignored. No localStorage persistence or recipient changes. Existing manual-send/recheck/role/module routes and all other owners preserved. Early/irregular shift openings remain conservatively held; POS_EFTPOS_ONLY does not produce a fabricated cash shortage. No worker/outbox/SMTP/automatic enable in this bounded slice; all dispatch and other reports remain OPEN.

Local Node20 focused38PASS/0FAIL/2isolated-nativeSKIP, full2685PASS/0FAIL/80infrastructureSKIP; final client build and server preparation/Prisma generation PASS. Existing legacy source-text assertions follow the extracted shared helper while all continuity/manual-recheck assertions remain. New actual mounted React cases cover Save/body/version/morning-only delivery/dirty-preview/conflict/reload/late response; native PostgreSQL+real HTTP test covers persisted reopen, concurrent one-winner insert/update, fresh role/foreign/inactive/control stores, rule/version changes, closed/open night, unchanged original source/control/recipient records. Native/full remoteCI and deployed UI are NOT TESTED at this entry; CI is not LAB PASS. No production database/recipient/email/financial/stock/invoice/shift/fiscal mutation or accepted transaction replay.

Next: full mandatory CI, merge and exact ordinary guarded release; then selected LAB settings Save/reopen and existing-source read-only preview with recorded configuration/source/control baselines. Runtime integration source awaits LAB, no new manual PASS claim. Same owner retained; source draft2534 will be superseded only after this integrated source is merged.

16/10/2026 12:21 Europe/Athens — AUTO-REPORTS-20261016 / SETTINGS + PREVIEW CONTINUATION / ASSIGNED

Retained owner codex/automatic-reporting-20261016, issue2527; source feat/automatic-report-settings-20261016. Explicit user continuation12:21. Existing source draft2534/d37381e6/fullCI38870132707 SUCCESS2765/0/0 plus6backup remains protected; source not deployed. This bounded integration adds durable versioned per-store report settings, strict explicit terminal/slot/day-boundary configuration, authenticated SuperAdmin settings and read-only preview endpoints, and a separate selected-store configuration dialog. Preview uses only saved settings and the actual effective cash-control rule, including legacy DIFFERENCE_ONLY stores; confirm the observed rule on Save and hold if it changes. Reuse shared rule resolution without changing current cash-control behavior. Fresh database role/store checks, stale-version conflict, changed-store/late-response UI isolation and current recipient form preserved.

No worker/outbox/SMTP or automatic enable control in this slice; saving configuration does not send reports or alter cash-control rules, recipient data, financial/stock/fiscal/shift/invoice records. Existing manual-send/recheck routes and assistant/invoice/supplier/order owners unchanged. Baseline mainab9f660e; relevant checkpoints/manuals/current registries/history reviewed; recipient LIMITED LIVE UI PASS protected. New settings/UI/source integration NOT TESTED; require mounted/native PostgreSQL/HTTP regression, full Node20CI, exact guarded release then selected LAB setup/read-only preview with baseline/control. No business transaction replay. Broad14-point request and dispatch OPEN, same owner retained. Single next action: after this continuation is green and merged, implement strict durable configuration and saved-settings preview.

16/10/2026 — AUTO-REPORTS-20261016 / SELECTED-STORE CASH SOURCE CI VERIFIED / NOT CONNECTED

Retained owner codex/automatic-reporting-20261016, issue2527, draftPR2534/headd37381e6079266a50e939638c552e2f8bed7c01c, fullCI38870132707/job116872576410 SUCCESS2765PASS/0FAIL/0SKIP plus6backup, including actual native PostgreSQL source test, Windows/build/Chromium/invariants/realHTTP checks; existing published claim2529 and main receipt2538 preserved. User16Oct10:44Athens explicitly continued. Fresh mainfa8e183d read with invoice/assistant/readability changes retained. Independent read-only source reader rechecks actual database SUPER_ADMIN and selected active company/store; repeatable-read snapshot of explicit CashControlStoreRule and all opened-period sessions plus overlapping or older unfinished shifts. Opening-period boundary includes the overnight third shift, excludes next07:00 and previous closure exactly07:00. Missing actual rule, unsupported POS_EFTPOS_ONLY, unknown delivery pattern, incomplete shifts, foreign/invalid rows or1001row cap hold readiness with null totals, never fabricated zero. Original employee differences and store/POS/delivery separation preserved; daily offset is informational only. Fingerprint changes with source/rule/config evidence.

Node20 focused13PASS/0FAIL/1native-infrastructureSKIP; full local2679PASS/0FAIL/79infrastructureSKIP, server preparation/Prisma generation PASS. New native isolated PostgreSQL regression covers real tagged SQL, tenant/store/opening bounds, next-day night closure, old unfinished holds, original source/control snapshots and fresh role rejection; passed in full Node20 nativeCI, not LAB/operational PASS. Source read-only internal service only: no endpoint, durable settings, UI, scheduler/outbox/SMTP or automatic delivery yet. No production DB, email, recipient, money, stock, invoice, shift or fiscal mutation. Existing manual-send/recheck routes and other assigned owners untouched. No new manual claim; current recipient limited LIVE UI PASS remains intact. Same owner stays assigned. Next: nativeCI then explicit durable per-store configuration and authenticated preview before outbox/worker dispatch; automatic and other report requirements remain OPEN.

16/10/2026 01:09 Europe/Athens — AUTO-REPORTS-20261016 / RECIPIENT FORM LIMITED LIVE UI PASS / AUTOMATION OPEN

Retained owner codex/automatic-reporting-20261016, issue2527. ClaimPR2529 merged a2b6468848 before source. SourcePR2531 final59d18726/fullCI38813235493/job116691565357 SUCCESS2730PASS/0FAIL/0SKIP plus6backup, all required build/native PostgreSQL/Chromium/HTTP/Windows/invariants. Merged3b27d4b3a8cc37be828abccf43d357982bae6ccd; exact mainCI38813858720/job116693675211 SUCCESS2730/0/0+6backup. Ordinary guarded Render38814594528/job116696089043 SUCCESS: pinned3b27 requested22:05:32UTC15Oct, exact health22:08:16UTC oktrue/version0.22.0+kat-test-pos/revision3b27d4b3. Newer intervening assistant/readability records preserved; no manual deploy/migration/business mutation. Earlier old-label assertion and truncated-upload correction remain historical, not current failures.

Actual authenticated desktop SuperAdmin Χρήστος Μάνης at canonical Platform Admin, selected MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru. Refreshed after exact release, Store edit shows new recipient fieldset. One blank row → four Add clicks →5visible independent email rows; invalid-email yields native typeMismatch/validfalse; reset blank; remove row3→4 and Add→5. Back without Save; other selected label-isolation store opens1blank row, Back/LAB reopen1blank row and no retained unsaved data. Existing stored recipient remains blank in observed UI. Screenshot visually inspected internally; no screenshot containing unrelated contact details published. No Save or send clicked; no actual recipient persistence/SMTP/other-role/mobile/physical/financial delta claim. Physical terminal/operator shift/SKU/payment N/A to this read-only/UI-only inspection. Independent public browser health read was unavailable; explicit canonical navigation recovered signed-in UI, while exact health proof is from the existing guard.

LIMITED LIVE UI PASS only: displayed per-row form/add/remove/native invalid format/keyed store and reopen reset. Existing01Oct verified configuration persistence and unchanged tenant-bound API remain protected; saving the new form with actual approved addresses is NOT TESTED. Whole14-point request and automatic sending remain OPEN. Policy foundation draftPR2534/headf4e1d7c8, corrected fullCI38814469555 SUCCESS and local7PASS; no source reader/config/UI/worker/SMTP integration, never operational/LAB PASS. Its initial CI failed on missing active-list update before tests and was corrected without bypass. Keep draft until integration.

Manual docs/manual/pilot-installation/README.md records only observed UI. Evidence CHECKPOINTS/EVIDENCE/automatic-reporting-20261016/hosted-ui.json; source checkpoint2026-10-16-automatic-reporting.md and draft-policy checkpoint/PR retained. Remove only completed recipient presentation implementation from active pending; keep new-form business save/physical acceptance and all automatic/report/assistant/supplier residuals. Same owner remains assigned until completion or named handoff; other domain owners unchanged. Single next action: connect the policy to a fresh authorized selected-store source reader and explicit actual terminal/shift/store-rule configuration, before any automated dispatch.

16/10/2026 — AUTO-REPORTS-20261016 / RECIPIENT FORM SOURCE READY / AWAITING CI AND USER

Retained owner codex/automatic-reporting-20261016, issue2527, claimPR2529/headc489380a/docsCI38810917284 SUCCESS merged a2b6468848 before source. Explicit user push/PR/green-merge approval00:31. First bounded slice: existing SuperAdmin Store edit displays one editable input per recipient, add/remove, browser email validation, ten-recipient existing contract, company/store-keyed remount and busy disable. Same Store field, existing authenticated tenant-bound PUT and server normalization/CRLF/maximum validation unchanged. Save does not send email; existing manual report dispatch remains unchanged. No new schema/permission/financial logic.

Local actual mounted React+JSDOM and existing parser/tenant8PASS/0FAIL/0SKIP: add3/remove/blank/invalid/native validity/dedupe/server-format/reopen/keyed other-store reset/busy disable/limit/no browser persistence. Frontend production build2370modules/TABLE_SERVICE PASS under localNode24; required Node20 full remoteCI/native/HTTP/browser/Windows/main/exact guarded release and authenticated visual/readback NOT TESTED. All other13 requests and automatic scheduling/delivery remain OPEN; this is form preparation only, no whole-task PASS/manual claim. Existing recipient configuration01Oct and other owners/PASS preserved. No actual store recipient/data/email mutation or test delivery. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-automatic-reporting.md. Next: fullCI/release/read-only UI, then independent report lifecycle slice with explicit third-shift boundaries.

Full final local Node24 suite2646PASS/0FAIL/70environment-nativeSKIP. Full PR CI38811906128 passed on ea10d827; merge encountered newer assistant source on main7a507c1f. Preserve all new main source; no reporting runtime edits in reconciliation, full integrated CI required again.

16/10/2026 00:18 Europe/Athens — AUTO-REPORTS-20261016 / ASSIGNED / NOT TESTED

Owner codex/automatic-reporting-20261016, source feat/automatic-reporting-20261016, issue #2527. Explicit owner start and implementation-order discretion. New independent automatic reporting orchestration/settings scope; preserve existing VOICE owner codex/assistant-business-queries-20261015, invoice/inbox/new-item owners, Task29 supplier comparison and Task30 order-suggestion ownership. No takeover of their source or acceptance. Existing reports/manual PASS and manual email routes remain protected.

Confirmed requirements: editable multiple email recipients; daily cash report after business-day third shift closure with visible original/net differences; weekly cash and monthly by employee; weekly shortages grouped supplier, unposted invoices, margin<30% except tobacco/cards/press with suggested >30% price; orders by supplier; most frequent receiving supplier remains primary while better comparable other-supplier prices notify SuperAdmin; daily expenses/payroll and weekly/monthly employee analysis; weekly turnover comparisons and daily workload/staffing indications. Primary supplier means receipt frequency, NOT quantity/value; normalized after-discount prices and same product/unit/package only. No automatic real purchase order or retail-price change requested.

Implementation sequence: recipient form/common reporting foundation; cash/business-day and expenses/payroll; stock/draft weekly readers; supplier/cost/margin/order grouping; turnover/workload; assistant integration only after coordination with retained owners. First bounded source slice: replace existing comma-only recipient input with editable rows using same validated Store field/API, plus reporting-policy calendar/read-only foundational logic where independent. No claim of completed automatic delivery or other fourteen functions.

Baseline main4b973d04: existing store responsibleEmail supports up to10 normalized addresses and manually guarded reporting; no daily automatic/report lifecycle acceptance observed. Existing per-store email configuration LIMITED LIVE PASS01Oct protected. New features NOT TESTED. No production/schema/stock/payment/posting/fiscal/email recipient mutation or test delivery. Source only after this claim is green and merged. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-automatic-reporting.md. Owner retained until completion/named handoff; unrelated scopes remain assigned.

16/10/2026 00:07-00:15 Europe/Athens - INBOX-CONSISTENCY-01 / LIMITED LIVE READ-ONLY PASS / ACTUAL MERGE AWAITING USER

Owner codex/inbox-consistency-20261015 retained only for the reviewed real-pair residual below. Independent status/detection/navigation implementation and scoped hosted UI acceptance completed. This supersedes this owner's source/claim AWAITING entries; broader09/Gate3, new-item/payment/QR/retail owners and codex/invoice-cross-supplier-duplicate-20261014 actual505/17113 action remain unchanged.

ClaimPR2518 merged31b51fa4 before source. SourcePR2522/head7ad8d28862ccf278f7f0648254c00c6e028f1b15 merged628d3da95192623f46ef38da226b9eafcd95aee5. Full final PR CI38803697108 attempt2/job116663112893 and exact mainCI38805696740/job116665985462:2708PASS/0FAIL/0SKIP plus6backup and all Windows/build/browser/native PostgreSQL/realHTTP/invariants. Attempt1 failed before tests on npm ERESOLVE/typescript@undefined; unchanged dependency manifests, failed-job retry passed.

Earlier38800181209 assertion failure and superseded cancelled runs remain history, never PASS. Merge preserved newer Payments/Inventory docs; runtime matches tested source, seven differing paths were other-owner records/PDFs only.

Ordinary guard38806404728 correctly skipped source628d because newer production source6627739 was on main. The incorporating release6627739cd49d1cc4b624ed32fe1b595a62124e55 passed fullCI38806024456/job116668452905:2721PASS/0FAIL/0SKIP plus6backup/all checks. Guard38807011579/job116670412611 SUCCESS; Render dep-db8jvu0m7kps73bakim0; independent /api/health oktrue/exact6627739/version0.22.0+kat-test-pos. No manual deploy/hook, migration, mass historical repair or permission/provider/model change.

Actual authenticated desktop SuperAdmin Χρήστος Μάνης, selected Diadoxou companycmulmjjoa000oqlbfyi0h53ju/storecmulmjjoc000qqlbf2bn2ifj0. Entered via existing canonical Admin > stores > full Backoffice > commercial functions > invoice inbox. Greece date16Oct: default day/pending selected, prior15Oct invoices are now in old archive. Pending archive search145327 returned0; registered returned1/6 with current completion text, green registered label, existing-order action and no AI reread/photo-delete. Search14525 returned145251 and145253 with the same registered labels. Opened145327 from inbox: existing INVOICED purchase0a0348af, printed145327/48.82, completed description, top metadata/finalize/invoice controls disabled. Both background recovery and OCR-total repair are skipped on this read-only navigation; ordinary draft/refresh recovery remains unchanged.

Actual pending archive search846666 returned existing myDATA row. GET-only review displayed POS146066 /14Jul/header126.26 versus myDATA1TΔA846666 /14Oct/header142.79, MARK400015666557608, exactVAT099913190,10/13 matching rows and142.78/142.78 row sums. Both full13-row tables expanded. Visible wrong-header acknowledgement, separate one-table radio choice, original confirmation, reason and payment discrepancy126.26 versus142.79 (-16.53) retained. Neither table selected nor any certification checked/reason entered; merge stayed disabled, dialog closed. Originals were listed, not independently certified or used to choose the correct rowset. No real reconciliation POST, new invoice, payment, stock posting, finalization or OCR rerun was submitted.

Fresh scoped before/after hashes equal for both complete orders, both full rowsets, both PurchaseDocuments, the one original payment and both linked photo/PDF attachment records (9records). Actual payment remains126.26. This is scoped read-only preservation, not global financial/control invariance during active real business. Physical terminals/operators/shifts/payment method are N/A to this read-only UI acceptance; no transaction baseline/test action was claimed. Source read-only diagnostic on the actual pair blocks either unresolved source with INVOICE_LINE_IDENTITY_REVIEW; native tests prove both selected-table merges/retry/row-file-money-stock preservation and stale/equal-total/VAT/store/type negatives. Those write/stock results are CI proof, not LIVE merge PASS.

LIMITED LIVE PASS: registered status/filter/current text and existing locked navigation; actual wrong-header candidate detection, full-table comparison and visible unchecked/disabled review safeguards. Actual reviewed merge/payment-difference resolution remain AWAITING USER with this owner: independently compare both originals, choose exactly one correct existing13-row table, then use explicit confirmations/reason once. No auto-summing, no forced real merge for evidence. Unknown old links remain honest NO_DRAFT/LINK_REVIEW; no claim all historic duplicates or OCR errors are resolved. Other roles/mobile/offline/physical end-to-end and actual write rollback are NOT TESTED here.

Evidence CHECKPOINTS/EVIDENCE/2026-10-15-inbox-consistency/: source-diagnostics.json, hosted-acceptance.json, registered-card.jpg, existing-order.jpg, duplicate-review.jpg, duplicate-confirmations.jpg. Manual docs/manual/invoices/PASS.md and numbered09/central trackers/PDF synchronized in this receipt. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-inbox-consistency.md.

16/10/2026 00:07 Europe/Athens — VOICE-ASSISTANT-01 / BUSINESS SOURCES RELEASED / AWAITING AUTHENTICATED ACCEPTANCE

Retained owner codex/assistant-business-queries-20261015; whole VOICE OPEN/ASSIGNED. User-authorized handoff PR2521 merged8e89931 before source. Same existing provider/model/key retained; no credential read/copy/create/write. Source PR2523 final head338769c8e23d5b7457414e9cdd85473c6e8ac00e merged6627739cd49d1cc4b624ed32fe1b595a62124e55. Independent inventory/POS/inbox changes and other owners preserved. PR CI38803242312 attempt2 SUCCESS (2710 PASS/0 FAIL/0 SKIP plus backup6); initial attempt reached same2710/backup6 PASS but exhausted15minute limit after slow dependency installation during final HTTP E2E; reran without code/guard changes. Main CI38806024456 SUCCESS2721 PASS/0 FAIL/0 SKIP plus backup6, complete browser/invariants/realHTTP checks. Native isolated PostgreSQL reads for all new domains executed; no production DB fixture/write.

Ordinary guarded Render38807011579/job116670412611 SUCCESS, pinned exact revision6627739cd49d1cc4b624ed32fe1b595a62124e55; health confirmed21:06:38UTC15Oct and independently after release: ok:true/version0.22.0+kat-test-pos/exact6627739. Served entry-qzRiTwey.js contains business_records and mws-business-evidence. These are SOURCE/CI/DEPLOY PASS only, not a numerical/UI/role/export USER or LAB PASS. Browser reached Platform Admin sign-in; no authenticated hosted assistant request or real-store source comparison performed. Original screenshots remain USER FAIL of previous routing, not evidence that transfers were absent.

Released read-only selected-store sources: owner transfers to/from/both, supplier payments, other expenses/combined payments, purchase-document metadata, associated suppliers, current Workforce roster, cash-shift metadata, safe POS-action metadata and recorded bank movements. Strict fixed SELECTs, Athens dates,500row cap/no false zero or incomplete totals, original-source count/cent arithmetic, role/company/store/module/personnel-package rechecks and export replay boundaries retained. Exact two-turn original question retains1Oct→today period when clarified 'στον ιδιοκτήτη'; transfer source replaces unrelated cash closure/snapshot fallback. Three assistant panels show Greek source/count/amount/records. Existing sales/stock/cash/consumption and qualified prior PASS protected. Current roster is not staff schedule/payroll, invoice metadata is not posted-purchase/profitability proof, bank movements are not bank balance; new domains have no all-store aggregation. Advanced remaining coverage stays OPEN. No manual PASS or numbered checklist closure.

Single next action, retained owner: refresh the authenticated assistant at https://myworkstation-app.onrender.com/platform-admin, select the intended company/store, ask 'Έλεγξε πόσες μεταφορές ποσού είχαμε από1/10 έως σήμερα' then 'μεταφορά στον ιδιοκτήτη'; compare returned count/amount/rows with the existing transfer list for SAME store/period, and capture screenshot/time/revision. Read-only comparison only: no repeat payment/sale/invoice/stock/fiscal action. Then verify same-session export and other source/role/no_records/cap cases against existing records. Until observed agreement, the screenshot symptom is AWAITING USER/LIVE and whole assistant is not complete. Publish any real PASS with required manual/active/pending/PDF reconciliation. Owner stays assigned until completion or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-assistant-business-queries.md.

2026-10-15T23:39:39+03:00 — POS-PAYMENTS-MENU-01 / SOURCE LIVE / AWAITING USER

Owner codex/pos-payments-menu-20261015 retained. Claim PR2519/docsCI38798879765 merged d276c506 before source. Source PR2520/headf493edfe3a68163b750e387258999989c88e305c passed full Node20 CI38801651254 after ordinary two-parent merges preserving concurrent assistant handoff and Inventory source/manual evidence. Exact released main CI38802378010 and ordinary guarded deployment38803156440 SUCCESS; actual Trigger deployment and Wait exact revision completed. Independent public health at 2026-10-15T20:39:12.458240+00:00 confirms healthy revision417816922011a9e76b3b8032836cda98e6503ec8; served /assets/entry--oBzdUrI.js contains the three labels, menu class and back control. Source release evidence is separate from signed-in/physical visual or financial acceptance. Evidence CHECKPOINTS/EVIDENCE/pos-payments-menu-20261015/source-release.json.

Normal POS → Πληρωμές now opens three ordered entries: 1) Πληρωμή προμηθευτή, 2) Λοιπά έξοδα, 3) Μισθοδοσία. Supplier retains open invoices/new invoice and existing Basic/Premium; bank deposit is inside Other expenses. Existing bank access for supplier-only operators is preserved without enabling other-expense/payroll writes. Each section returns through «Όλες οι πληρωμές»; same-section form state stays mounted, including supplier draft, payroll hours/kind and bank selection. Live camera closure is required before return; late video activation reveals its section. Normal reopen returns to the three choices; explicit initialPaymentType remains supported. Financial submit/completion/child props/rights and all backend APIs/payloads unchanged. No stock/fiscal/financial logic or new module permission.

Final targeted menu/payroll/actual parent/camera completion14PASS/0FAIL/0SKIP. Earlier corrected full local Node20 suite2625PASS/0FAIL/65isolated-infrastructure SKIP; final remote full CI/native PostgreSQL/Chromium/HTTP E2E is separate green evidence. Prior single local failure was obsolete navigation expectation and was reconciled while preserving all amount7/modal identity/revocation/cash/no-POST assertions; no runtime guard or failing assertion bypass. Source builds and central trackers/PDF copies synchronized. Existing payroll/payment/QR/Gate3/Gate5/No27/No33 owners, manual evidence and earlier physical failures remain intact.

No real/LAB payment, invoice upload, stock/fiscal/shift/permission mutation or accepted transaction replay performed. This is SOURCE LIVE, not new LAB/manual/USER PASS. Single next action: CtrlF5 on existing POS → Πληρωμές and one confirmation photo of the three choices; inspect each existing form without submitting an artificial payment. Actual ordinary financial acceptance needs its own fresh baseline/control if later requested. Keep assignment with this owner until bounded visual acceptance or named handoff.

15/10/2026 — POS-PAYMENTS-MENU-01 / SOURCE READY / AWAITING CI AND USER

Retained owner codex/pos-payments-menu-20261015, branch feat/pos-payments-menu-20261015. Claim PR2519/docsCI38798879765 green, merged d276c506 before source. POS Payments now initially opens only three ordered choices: Supplier payment, Other expenses, Payroll. Every normal reopen returns to the menu; explicit initialPaymentType entry remains supported. Existing Supplier open invoices/new invoice/Basic/Premium are unchanged; bank deposit is nested under Other expenses, including existing supplier-only operator bank access without granting other-expense/payroll rights. Return hides the same mounted form, preserving same-section supplier draft, payroll kind/hours and current bank selection. A live camera must close before returning; late camera activation reveals its section instead of staying hidden. Compact menu styling, large touch controls and keyboard focus provided; AI capability banner appears only inside Supplier. Current rights/revocation/stale-shift warning, other expense/refund/payroll evidence/amount/source and success-only close retained. Financial submit/completion/child-prop/permission blocks verified byte-identical; no backend/schema/financial endpoint or payload changes.

Node20 focused22PASS/0FAIL/0SKIP including actual mounted menu/reopen/draft/rights/bank preservation and prior payment/QR/payroll success/failure/permission guards. Frontend and server builds PASS. Full local suite in progress; full PR/main CI/native PostgreSQL/Chromium/HTTP E2E and exact healthy guarded release required. No live/LAB navigation/payment/upload/shift/stock/fiscal or recipient action and no accepted transaction replay. Physical screenshots are baseline USER request, not new financial failure or acceptance. Existing payment/payroll/Gate3/Gate5/No27/No33 owners and measured PASS unchanged. Menu physical appearance/touch acceptance remains AWAITING USER, no new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-pos-payments-menu.md.

15/10/2026 23:08 Europe/Athens — VOICE-ASSISTANT-01 / USER-AUTHORIZED HANDOFF / ASSIGNED

ΑΝΑΛΗΨΗ ΑΠΟ codex/unified-voice-assistant-20261010 — ASSIGNED codex/assistant-business-queries-20261015, source feat/assistant-business-queries-20261015. Owner explicitly approved transfer to this page (23:08 «εχεις εγκριση για ολα») after named existing-assignment question; at23:06 approved reuse of SAME existing OpenAI key. This user-directed handoff supersedes the previous page retention for assistant-only residual; preserve all earlier qualified PASS/FAIL and other domain owners. No new key/model/service, credential inspection/write or permission bypass. No open non-invoice assistant PR found at handoff.

Newest actual screenshots23:02–23:03: selected Diadoxou question asks number of amount transfers1Oct→today, then clarifies transfers to owner; assistant substitutes today's closed shifts and raw BUSINESS_SNAPSHOT. USER FAIL of source coverage/routing/history, not evidence of absent transfers. Current code exposes only cash/product-sales/stock/per-store-sales/consumption; no money movement, invoice, supplier, staff, shift/event query source. Read AGENTS, complete records/current assistant checkpoint/history and source/report/export flow before claim.

Bounded implementation under retained whole VOICE assignment: connect read-only authorized selected-store business sources (owner transfers, supplier payments, other expenses, purchases/invoices, suppliers, staff, shifts and safe events) with validated date/query/kind filters, exact source tables/IDs, limits/no false zeros and deterministic arithmetic. Preserve existing source-specific module/session/tenant/role gates; no model SQL/URLs/company/store IDs or writes. Natural follow-up retains supplied period and topic, routes transfers away from cash summaries; plain Greek source-grounded answers and existing signed Excel/PDF/CSV/Word replay for SuperAdmin. Existing sales/stock/name/category/offers/cash/consumption and explicit all-store boundaries protected; all-store new domains remain unavailable until explicitly authorized/implemented. Unsupported questions say exact coverage, never promise everything or substitute unrelated reports.

Require actual shared dispatcher/route/Owner/module/revocation/history/export/mounted UI regression and native isolated PostgreSQL reads with foreign/cap/period/reversal negatives, full PR/mainCI and ordinary exact guarded healthy release. Existing provider/key reused; no secret copied locally. No production payment/invoice/stock/fiscal/credential/business action or old transaction replay. New source behavior NOT TESTED. Hosted numerical/UI/physical acceptance separate; no whole VOICE PASS from CI. Claim publishes green before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-assistant-business-queries.md. Same new owner retained until completion/named handoff.

2026-10-15T23:03:10+03:00 — POS-PAYMENTS-MENU-01 / ASSIGNED / NOT TESTED

Owner codex/pos-payments-menu-20261015, branch feat/pos-payments-menu-20261015. New explicit user screenshots195756/195825 show LAB POS payments opening directly into expenses and four mixed top-level choices. Independent navigation-only scope: Payments opens a three-choice menu in requested order «Πληρωμή προμηθευτή», «Λοιπά έξοδα», «Μισθοδοσία»; existing supplier open-invoice/new-invoice and Basic/Premium flows stay in Supplier; existing bank deposit remains reachable inside Other expenses. Existing rights, stale-shift warning, payroll/refund/evidence/QR/AI, exact payloads/endpoints and success-only closure remain unchanged. Preserve other payment/payroll/Gate3/Gate5/No27/No33 owners and measured PASS; no takeover or financial acceptance claim. Current main31b51fa4 and modal history/manuals/relevant checkpoints/shared assignments inspected; public healthy01fb13e5. No competing three-entry navigation claim found.

Record before source as required by AGENTS. No live/LAB payment/upload/shift/stock/fiscal/permission action or accepted transaction replay for navigation. Required: initial/reopen menu, all existing destinations, rights/revocation, return and draft handling, busy/success/failure regressions, Node20 build/full PR-main CI/guarded exact healthy deployment. Actual signed-in physical appearance/touch acceptance remains NOT TESTED; source/CI never closes prior payment or device failures. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-pos-payments-menu.md. Next: publish this independent claim green/main before source.

15/10/2026 23:26–23:27 Athens — INVENTORY-MERGE-24H / LIMITED LIVE PREVIEW PASS / source released

Owner feat/inventory-bulk-vat-20261015 retained for original measured write/physical acceptance only. Explicit24h user FAIL supersedes the original blanket closed-shift policy; open shifts are allowed. ClaimPR2516/3fd0574c/docsCI38796555946 SUCCESS merged61f87469 before source. SourcePR2517/final head3d48a88b91610369236a32a2eb8fddd849655e28/treec4de3d84/fullCI38799842934/job116646000283 SUCCESS2695PASS/0FAIL/0SKIP plus6backup. Earlier identical sourcef088c0b1/CI38798673773/job116642353582 also fullPASS; only concurrent claim records changed afterward. Merge779e397e00df3add451c47d43a81914a5a64f552/exact mainCI38800601733/job116648459762 SUCCESS2695/0/0+6backup. Ordinary guarded Render38801338854/job116650931326 SUCCESS, expected779e397e healthy20:24:28UTC; independent public health confirms exact779e397e/oktrue. No manual deploy, schema/migration or production repair. Concurrent Inbox, POS Payments and assistant-business claims preserved. FirstCI38797462756 had2694PASS/1FAIL/0SKIP: actual new native merge passed, old import-stripping online-handler test omitted the new helper; injected real helper, never bypassed it. Final clean native actual online handler, Chromium, HTTP sale/order/110-terminal capacity harness/build/invariants all passed, not business/capacity LIVE certification.

Authenticated SuperAdmin Χρήστος Μάνης, Chrome6, virtual MYWORKSTATION LAB/storecmtpopbgo000trhb5ng9ytiru. Fresh before20:26:14.498UTC: MAIN open since12Oct19:28/LAB POS2,9.40cash,0card,0IRIS,2.20total,3transactions,last12Oct23:42. Actual Archive98rows loaded. Selected00580/7UP1.5L and00582/7UP330ML solely as the previous read-only UI sample, NOT identical products and NEVER confirmed. Chose00580 survivor and submitted only registered read-only preview. New notice «Η ανοιχτή βάρδια επιτρέπεται» displayed. Server returned both cards/prices2.00/1.10,stock0+0=0,barcodes5942204003072/5201156951559, no blockers; reason/identity-confirmation controls appeared. Existing open shift and unrelated online/table work no longer block. Identity checkbox remained unchecked, reason blank, final confirm disabled. No merge/card/price/barcode/supplier/stock/payment/fiscal/order/shift write. Screenshot at20:26:52.617UTC CHECKPOINTS/EVIDENCE/inventory-merge-24h-20261015/preview.jpg.

After Επιστροφή, all98 full DOM rows exactly equal before, including SKU/name/retail/stock/VAT. Closed commerce window and explicitly refreshed shift:20:27:21.810UTC same open MAIN,9.40cash/0card/0IRIS/2.20total/3transactions and original last transaction. This is read-only displayed retention, not independent control-terminal/stock-ledger or live concurrent-sale certification. No shared shift/order/count was closed or cancelled. Native isolated tests prove actual four-card merge while same shift staysOPEN, selected versus unrelated pending work, five pending fiscal statuses, stale concurrent-sale conflict, source-card rejection, survivor usability, rollback, replay and stock/history/control preservation. New final merge/live payment/cart/offline/physical/mobile/other-role acceptance remains NOT TESTED. Historical transactions/cards remain unchanged; no actual7UP or real Roshen consolidation was performed.

The24h restriction correction is complete for released source and observed read-only preview. Original actual bulk save/restoration and reviewed identical-product merge with fresh before/after/control plus physical/other-role acceptance remain with the same owner, one pending residual; no receiving page named and no silent release. Next: one separately identified eligible identical virtual-product sample with measured baseline/control, not replaying old transactions or merging different sizes. Manual/active/tracker/pending/numbered39 and both tracker PDF mirrors synchronized; prior UI/PASS and other owners protected.

15/10/2026 — INVENTORY-MERGE-24H / IMPLEMENTED / AWAITING CI + LAB

Same owner feat/inventory-bulk-vat-20261015. Claim PR2516/head3fd0574c/docsCI38796555946 SUCCESS merged61f87469 before source. Remove store-wide CashShiftSession restriction; selected-product StocktakeLine/OnlineOrderLine/TableOrderLine checks replace unrelated-work blockers. Pending RBS checkout snapshots for selected products block until SALE_COMMITTED/DECLINED; malformed/missing arrays safely handled, no schema migration. New lockActiveSaleProducts holds ordered Product/StoreProduct row locks and rechecks active company/store identity inside POS checkout before fiscal-request/sale/payment creation and online/table order creation. A cached source card after merge receives409 PRODUCT_CARD_CHANGED and must be refreshed/rescanned; it is not silently repriced or redirected. Replay branches retained. Serializability/hash/retry/atomic audited merge remains unchanged. UI explains open shifts and refresh. No register/payment/fiscal dispatch or finalizer logic changed.

Native regression expanded: open24h shift retained through final four-card merge, unrelated open count/online/table order tolerated, same-card pending work blocked, five pending fiscal statuses blocked, completed/unrelated fiscal requests tolerated; guarded concurrent sale wins -> stale merge refused; merged source rejected before further sale; survivor remains usable; existing atomicity/retry/history/control proofs retained. Local Node20 focused26PASS/0FAIL/1nativeSKIP, frontend buildPASS and server preparation/PrismaPASS. Initial local full-suite launch raced Prisma generation and had import failures; clean local Node20 full suite2623PASS/0FAIL/65infrastructureSKIP; mandatory native CI remains pending. These are isolated checks, NOT actual LAB PASS. No real merge, payment, order/shift closure, production stock or fiscal mutation. Existing live UI observation retained, old blanket restriction no longer an accepted policy. No new usage PASS before exact guarded release and observed acceptance. Actual merge/bulk write/physical acceptance remains with same owner. Next: fullCI, exact deploy, read-only eligible preview with existing open shift, then measured identical virtual-product acceptance if available.

15/10/2026 22:40 Europe/Athens — INVENTORY-MERGE-24H / ASSIGNED / USER FAIL

Owner feat/inventory-bulk-vat-20261015 retained; bounded source branch fix/inventory-merge-24h-20261015. Owner reports all stores operate24h, so blanket open-shift blocker makes merge unusable. Remove shift-only restriction and scope order/count blockers to selected products; protect same-product concurrent POS checkout with transaction row locks and active revalidation before fiscal/payment creation, plus in-flight fiscal-request blocker. Preserve existing replay, tenant/store/role/license/fiscal gates, atomic stock/barcode/history and all other owners. Read latest main e4c82a7, AGENTS, active/tracker/pending/numbered, inventory manual and both15Oct checkpoints. Historical ea91 UI observation stands; blanket maintenance policy is superseded by explicit user requirement. New24h behavior NOT TESTED, no new manual PASS. Native concurrent checkout/merge and open-shift/unrelated-order regressions required, then full CI/main/guarded exact release and fresh measured acceptance. No shared shifts/orders closed or real products merged for diagnostics. This claim must merge before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-inventory-merge-24h.md. Same owner remains until complete/named handoff.

15/10/2026 21:21 Europe/Athens — INVOICE-MATCH-RETAIL-01 / SOURCE LIVE / AWAITING USER

Owner codex/invoice-match-retail-20261015 retained for actual visual/selection acceptance. ClaimPR2511/37fe4571/docsCI38782255294 SUCCESS merged946bf865 before source. SourcePR2512/head7360e51d59df283616d86a0f145e12e34724b5b5/fullCI38782813116/job116587286321 SUCCESS2695PASS/0FAIL/0SKIP plus6backup/all Windows/browser/native PostgreSQL/realHTTP/build/invariants. Merge01fb13e51736db6da810d87b63a24a27af06aabb/exactmainCI38783612205/job116589997321 SUCCESS same2695/0/0+6backup. Ordinary guarded Render38784370456/job116592505712 SUCCESS, exacthealthy21:20:56Athens/01fb13e5/version0.22.0+kat-test-pos; independent public health confirms exact01fb13e5. Concurrent main1689c96 is documentation only relative to tested/runtime01fb, preserving other owners. No manual deploy, migration, production invoice/card/payment/stock/fiscal write or replay.

Delivered bold22px current-store retail in results/selected identity,20px retail input and44px selection target. Explicit existing-product choice copies7.60 into unsaved proposed retail, keeps7.40 purchase and original supplier text, recalculates2.703markup. Same-barcode pre-save lookup retains manual retail; first-at-save match is included in fresh payload; clear restores prior proposal; known0 is copied and missing retail not invented. Existing active selected-store lookup, human name selection, exact barcode/duplicate guards and one explicit PATCH remain protected.18focused actual production-form/matcher/rounding/pack/Enter tests passed locally under Node20 and24; these and fullCI are isolated evidence, NOT actual business/LAB PASS.

Hosted browser reaches canonical PlatformAdmin sign-in; no authenticated hosted selection or save performed. Actual desktop/readback/physical/mobile/user acceptance NOT TESTED; no new manual/PASS closure. Implementation/release work complete, only actual selection/visual acceptance remains assigned here. User next: refresh safely with no unsaved work, open existing invoice line correction, select matching existing product, verify prominent Λιανική7.60 and proposed7.60 with purchase7.40. A screenshot without submitting the invoice is enough for initial visual confirmation; any agent state-changing LAB test requires new baseline/control evidence. Never reupload/repay/finalize an accepted invoice for this check. Other09/Gate3/new-item/myDATA/barcode-negative/payment/stock owners and priorPASS unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-invoice-match-retail.md. Tracker PDF regenerated; source-only release is not businessPASS.

2026-10-15T21:13:29+03:00 — CHAT-STAFF-INVITE-01 / SOURCE LIVE / AWAITING LAB

Owner codex/chat-staff-invitation-20261015 retained. Claim PR2509 preceded source PR2510/head01f8650627b8c64062c264ffc68ccf532d5ab96e, merged ea91dd5877806e99c21a0788abeec4ddbcff8489. Full PR CI38781265611 and exact merged main CI38781971557 SUCCESS, including native PostgreSQL invitation credential isolation, production builds/invariants, existing Chromium checks and isolated real HTTP E2E. Ordinary guarded deployment run38782909969 actually triggered the release and exact production health confirms ea91dd5877806e99c21a0788abeec4ddbcff8489 at 2026-10-15T18:12:30.166235+00:00. Served entry-B7ngesnK.js contains invitation label, endpoint and email controls; anonymous invitation request returned401. This is release/auth-boundary evidence, not signed-in personnel or physical phone acceptance. Local Node20 suite2617PASS/0FAIL/64isolated-infrastructure SKIP; remote full CI is separate evidence.

Owner/Super Admin selects store and employee in Personnel, prepares «Πρόσκληση στο Chat», reviews instructions and explicitly chooses copy/WhatsApp/Viber/email/native sharing. Server verifies real recipient module/active employee/operator/PIN and exact store/company; no permission/credential/card creation, PIN disclosure or automatic sending. Existing work-card flow, Chat sessions/12h/Push/auth/cache/POS and all other owners preserved. All source/test files were checked byte-identical to merged source. Both tracker PDF copies now synchronized; valid ASCII85 stream encoding preserves every page's text/fonts and pixel-identical rendered verification, superseding earlier binary-publication pending notes.

No actual recipient message/share/Push, read/task/financial/stock/fiscal mutation performed. New invitation signed-in visual/use acceptance and personal phone installation/PIN/background notification acceptance remain OPEN/AWAITING USER;13Oct phone FAIL and original mobile/N16 owners/partial PASS remain intact, no new manual PASS. Browser reached normal Platform Admin sign-in wall; no credentials entered or auth bypass. Next: existing authorized Owner/Super Admin opens selected-store Personnel → employee → «Πρόσκληση στο Chat» and reviews the invitation, then uses an authorized recipient's phone for existing login/install/notification acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-chat-staff-invitation.md.

15/10/2026 — INVOICE-MATCH-RETAIL-01 / IMPLEMENTED / AWAITING FULL CI + HOSTED ACCEPTANCE

Owner codex/invoice-match-retail-20261015 retained. ClaimPR2511/head37fe4571/docs checks success merged946bf865 before source; concurrent Chat/Inventory and all original owners preserved. Actual production editLine callback now fills selected-store retail and recalculates markup, retaining supplier description/cost/quantity/pack/discount/tax. Candidate and selected retail shown separately in bold22px, retail input20px, selection44px. Explicit clear restores prior unsaved retail; known zero transfers, absent retail displays unavailable without inventing a price. Existing catalog lookup already derives COALESCE(StoreProduct.salePrice, Product.salePrice) under owned line/company/active selected-store guards; no server/API change.

Fresh same-barcode pre-save validation preserves operator edits; first match during save is captured before collecting submitted form values. Submit lock still prevents duplicate PATCH; matching only changes unsaved form until explicit submit. No automatic product-price/card save, stock/fiscal/payment/finalization or invoice replay. Local Node20 focused actual-form/matcher/printed-rounding/package/Enter tests18PASS/0FAIL/0SKIP; same Node24 result. Work frontend build PASS2363modules/TABLE_SERVICE retained. New4 actual production-form tests cover7.60 vs7.40 and2.703markup, manual8.00 after barcode recheck, first-match-at-submit, clear/reselect/zero/missing. These are isolated DOM/mock API checks, not business LAB PASS. Initial new test fixture evaluated browser module before DOM setup; corrected initialization without changing business expectations, final all18green.

Full required PR/main CI, exact guarded healthy deployment and actual hosted visual/selection acceptance remain NOT TESTED. Prior normal catalog matching USER PASS10Oct and original negative residuals protected. Broader09/Gate3/new-item preparation/myDATA/payment/stock owners unchanged. Next: green full CI, merge, ordinary guarded release, then read-only hosted selection with no submit/replay of existing real invoice. No manual PASS yet. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-invoice-match-retail.md.

15/10/2026 21:06 Europe/Athens — INVOICE-MATCH-RETAIL-01 / ASSIGNED / USER FAIL

Owner codex/invoice-match-retail-20261015, source fix/invoice-match-retail-20261015. Explicit user screenshots and start instruction: show existing store retail prominently in invoice-line candidate results and transfer selected existing product retail into (Νέα) Λιανική with recalculated markup. Current selection callback changes product ID/barcode panel only; screenshot CAMEL BLUE selected7.60 but proposed retail0. Independent additive follow-up to completed normal catalog-matching USER PASS10Oct, not takeover of prior barcode negative residuals, new-item preparation, OCR, payment, myDATA or stock/finalization owners. Read current AGENTS/tracker/pending/active/numbered/manual/catalog checkpoint/main history before changes.

Protect supplier description, cost7.40, quantity/pack/discount/tax, exact and human-selected matching, no duplicate creation, once-only PATCH and current-store scope. Selection updates unsaved line retail only; explicit final confirmation still required. Fresh pre-save barcode revalidation must not overwrite an operator's edited retail or submit stale pre-selection values. Clear/reselect and missing/zero retail require explicit regression. No real invoice/payment/product/stock/fiscal writes or replays for development. New behavior NOT TESTED; full required CI/main/guarded exact release and actual acceptance remain required. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-invoice-match-retail.md. Claim published before source.

Same owner retained until completion/named handoff; all other owners unchanged.

15/10/2026 — CHAT-STAFF-INVITE-01 / SOURCE READY / AWAITING CI AND LAB

Owner codex/chat-staff-invitation-20261015, source branch feat/chat-staff-invitation-source-20261015. Claim PR2509/docs CI38780428640 SUCCESS, merge eca72657 before source. New personnel-row «Πρόσκληση στο Chat» capability is limited to Owner/Super Admin. Read-only employee invitation endpoint checks existing personnel tenant scope, exact selected-store employee assignment, active company/store/employee/operator, real recipient Chat and Store Mode entitlement and existing personal PIN. Uses explicit legacyEmployeeId mapping only; no name fallback, credential/card creation, PIN reset, permission grant, real message or Push. Public store Chat path contains no employee ID/PIN/token. User reviews complete instructions then chooses copy/WhatsApp/Viber/email/native share; no automatic sending or sent claim. Late store/employee responses and wrong acknowledgment discarded; duplicate preparation prevented; focus/keyboard controls and44px actions retained. Existing work-card invitation, Chat login/12h/PWA/Push/auth/tenant/module/fiscal/stock behavior untouched.

Node20.20.2 focused22tests:21PASS/0FAIL/1isolated-PostgreSQL SKIP; frontend production build PASS (earlier Node24 build also PASS). Mounted UI covers preview/copy/share targets/worker instructions/mismatch/stale response/inactive employee; HTTP service denies foreign tenant, restricted roles, wrong assignment and disabled modules; native credential isolation test required in full CI. These are isolated fixtures, not new LAB/manual/device PASS. Existing13Oct mobile USER FAIL/physical installation/PIN/background Push acceptance and owners remain OPEN. Full exact PR/main CI and guarded healthy deploy required, then owner/personnel invitation visual check and authorized phone flow. No real recipient sharing or business state changes performed. Tracker PDFs regenerated locally; binary upload unavailable through UTF-8 connector, publication remains pending. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-chat-staff-invitation.md.

15/10/2026 20:40 Europe/Athens — CHAT-STAFF-INVITE-01 / ASSIGNED

Owner codex/chat-staff-invitation-20261015, branch feat/chat-staff-invitation-20261015. User explicitly approved Owner/Super Admin invitation from selected-store personnel: choose employee, review and share a Chat-only store link through WhatsApp/Viber/email/copy/native share; no PIN in invitation, existing personal PIN login and install/notification instructions. Independent new invitation surface only, not takeover of mobile packaging/Push or N16 device acceptance owners. Read current AGENTS, active/tracker/pending/checklist, Chat manual, mobile app/device checkpoints and main history. Existing public store link and workforce work-card share are distinct; preserve both. Latest Chat phone evidence remains13Oct USER FAIL/physical retest OPEN; current health e203082bed781edcc6b8f1542a9521fabe01dcb8. No invitation source or new functional/LAB PASS yet.

Required: server-side Owner/Super Admin/company/store/module/active employee and personal credential checks, no credential creation or permission grant; stale store/employee responses discarded, review before external share. Existing app login/session/12h/tenant/module/revocation/no-private-cache/Push/POS unchanged. No messages, actual recipient shares, Push or business writes for testing. Full exact source/main CI and guarded healthy deployment before physical acceptance. Next: publish this independent claim before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-chat-staff-invitation.md.

15/10/2026 — IMPLEMENTED / AWAITING FULL CI AND HOSTED ACCEPTANCE

Claims PR2506/db60bb4d/full docsCI38777632527 SUCCESS merged d1d79f86 before bulk source; PR2507/a310f059/full docsCI38777938857 SUCCESS merged3e3a7bd3 before merge source. Added always-visible horizontal range bound to actual table scroll, VAT department next to name, dependent taxonomy/real fiscal dropdowns and local SET/percent/EUR price modes. Store price and active updates no longer rewrite all stores/base price; category/subcategory/VAT remain explicitly disclosed company card metadata. Transactional audit, request replay and expected-price conflicts. Legacy text bulk contract now rejected rather than silently updating company-wide. Existing route role/module gates unchanged.

Explicit2–4 merger preview/survivor/confirmation/reason; net stock with paired movements, barcodes plus supplier links/learning move to survivor, sources inactive (not deleted), original sale/invoice identities retained. Existing target policies/price preserved, barcode-specific prices retained. Blocks other-store associations, open POS shifts/counts/orders, composition/delivery/baking, barcode packaging/conflicts and supplier collisions. Historical supplier-link startup backfill excludes audited merged sources so old links are not resurrected. This is a maintenance action; require synced/closed terminals. No production writes/merge/sale/payment/stock diagnostic actions.

Local Node20 mounted real panel and prior VAT/archive regressions23PASS/0FAIL/1nativeSKIP; client build PASS. New isolated PostgreSQL atomicity/control/retry/negative-stock/history tests await mandatory CI, not LAB PASS. New behavior LIVE NOT TESTED. Existing other owners/full-card/invoice/POS permanent-price evidence preserved. Next: green full CI, main exact guarded release, read-only hosted UI/preview verification. Actual state-changing LAB acceptance requires fresh before/after/control checkpoint; do not merge real duplicate screenshot cards without selected survivor and explicit reviewed confirmation. Same owner retained for any untested residual.

15/10/2026 — INVENTORY-MERGE-01 / ASSIGNED / NOT TESTED

Owner feat/inventory-bulk-vat-20261015; user expands request to explicit 2–4 selected cards into one survivor. Independent from invoice merge. Preview required; preserve historical IDs, no DELETE of products or invoice/sale history. Restrict first delivery to products exclusive to selected store; reject other-store associations, incompatible units/VAT, composition, open drafts/counts or nonstandard barcode mappings. Move eligible barcodes/supplier links and net stock with paired audited stock movements; archive sources in selected store only, no payment/fiscal posting. Native transactional/retry/conflict tests required. No actual real-store merge until user chooses survivor and confirms preview. Scope remains NOT TESTED.

15/10/2026 21:12–21:16 Athens — INVENTORY-BULK-VAT-01 / INVENTORY-MERGE-01 — LIMITED LIVE UI + READ-ONLY PREVIEW PASS

Owner feat/inventory-bulk-vat-20261015 retained only for separately measured state-changing acceptance. SourcePR2508/head954f8d8e/fullPRCI38780384600/job116579540464 and maina77e81f4/CI38781394418/job116582345438 each2683PASS/0FAIL/0SKIP plus6backup. Subsequent combined main ea91dd5877806e99c21a0788abeec4ddbcff8489/CI38781971557/job116584934252 passed2691/0/0 plus6backup. Ordinary guarded Render38782909969/job116587516760 SUCCESS pinned ea91dd58; independent /api/health confirmed oktrue/exactea91dd58. Earlier guard38782135105 correctly skipped a77 because newer Chat source was on main; no manual deploy or guard bypass. First native concurrency failure was corrected with bounded fresh-transaction serialization retry; final native test requires two successful concurrent calls/one receipt and full rollback after injected final-audit failure.

Actual authenticated SuperAdmin Chrome5, virtual MYWORKSTATION LAB/storecmtpopbgo000trhb5ng9ytiru,1363x936: horizontal control visible at y644.9–668.9; End moved real table0→3690(max3690), Home returned0. Exact VAT department column displayed ΦΠΑ13% for first two7UP cards and explicit missing mapping for others. Bulk two-row form lists9active categories, dependent ΑΝΑΨΥΚΤΙΚΑ→Αναψυκτικά and10real active departments (including0/6/13/24), five price modes plus Keep. Unsaved selection04.ΕΙΔΗ13/register4 and increase10% observed in DOM; no Καταχώρηση submitted. Company taxonomy/VAT vs store-only price/active scope is disclosed in the form.

Actual registered read-only merge preview selected00580/7UP1.5L and00582/7UP330ML ONLY as a nonconfirmed UI sample, not an assertion that different sizes are the same product. Survivor selection, both prices2.00/1.10, stock0+0→0, both barcodes5201156951559/5942204003072 rendered. Existing open POS shift, online order and table order correctly displayed as blockers; confirmation remained disabled. No confirm/merge, price/card/barcode/supplier/stock/payment/fiscal/shift/order mutation was submitted. Never close/cancel shared work to force this test.

Before18:06:32UTC and after18:16:15UTC, complete DOM matrices of98Archive rows (SKU/name/retail/stock/VAT) compared exactly equal. Displayed MAIN shift12Oct19:28/LAB POS2 remains9.40cash/0card/0IRIS/2.20total/3transactions,last12Oct23:42. This is observed UI retention, not independent control-terminal/stock-ledger certification. Actual write/merge/internal history/physical/mobile/other-role acceptance remain NOT TESTED LIVE; isolated PostgreSQL proof is CI only. Existing inventory/full-card/invoice/Chat and other owners/PASS are protected. Evidence CHECKPOINTS/EVIDENCE/inventory-bulk-merge-20261015/bulk.jpg and merge-preview.jpg. Manual inventory/PASS.md documents only observed navigation, selection and preview. Pending removes completed implementation/release/UI substeps and retains one exact acceptance residual; numbered39 and both tracker PDF copies synchronized. Single next action: a fresh eligible virtual maintenance sample with separately recorded before/after/control measurements, without replaying prior transactions or clearing shared shifts/orders/counts. No receiving page named; same owner is not released.

15/10/2026 — INVENTORY-BULK-VAT-01 / ASSIGNED / USER FAIL

Owner feat/inventory-bulk-vat-20261015. Independent new request: Archive horizontal scrollbar above fixed toolbar, explicit VAT-department column, bulk active category/subcategory/VAT department dropdowns and selected-store retail SET/increase/decrease in EUR or percent. Baseline main23c1760f; screenshots show hidden scrollbar and free-text legacy form. NOT TESTED new behavior. Preserve all other owners, full-card and invoice acceptance, stock/fiscal/auth/license gates. Require selected store, company-owned existing taxonomy, real active VAT mapping, atomic audited/idempotent price writes confined to selected store, mounted/server/native regression and full CI/exact guarded release before hosted acceptance. No real product/stock/payment writes for diagnostics. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-inventory-bulk-vat.md. Claim merges before source.

15/10/2026 18:36 Athens — POS-PERMANENT-PRICE-01 / CLOSED SCOPED DESKTOP LAB PASS

Owner codex/pos-permanent-price-20261015. Requested existing POS permanent-price option and product-identifiable Events delivered. Normal EMPLOYEE LAB POS2/MAIN, MYWORKSTATION LAB/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ(storecmtpopbgo000trhb5ng9ytiru,companycmtpopbgk000prhb5qc60zxus), SKU2270 NEPO1,5LT/product4f126988-a1a8-433c-b469-70203415df5b, localqty1. Ordinary guarded Render38756912305/job116497769341 SUCCESS, deploydep-db8emoo473hc739gebq0 LIVE18:05:52Athens, exacthealthy18:06:06Athens and independentoktrue/aafb read. One first independent postrollout read502, subsequentexact200; no manualdeploy/dispatch/hook/migration/backfill/datarepair.

Predecessor layout release7d8cb819/PR2501 had green2678/0/0 but Renderdep-db8eb5ivcj2c7395lbe0 failed startup17:40:54Athens with PostgreSQL21000: multiple legitimate mapping aliases hit one SupplierProductLink upsert target. First mapping INSERT SELECT alone now DISTINCT ON(companyId,supplierId,productId), deterministic latest timestamp/id; aliases and tenant joins/COALESCE/PRODUCT_CARD priority retained. NativePG test reproduces old21000, current repeat/tie/foreign/priority preservation passes separately.

Actual read-only live group before18:01:11:2aliases/hashd1faa5f569b91644fb7af33c01773971, targetlink absent; after18:06:10 SAME2/hash, one linke480484e446af275ddad4b03edbf8fae/codeTJB-1015584 8713800019307/sourceINVOICE_LEARNING matching latestmapping602fb81e-4bb8-4778-bad8-d3a5a980794a. ScopePASS exactordinaryhealthy startup plus targetgroup/sourcepreservation, not fresh invoice/OCR/stock/payment/fiscal acceptance. No Gate3/No33/otherowner takeover. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-pos-price-startup-backfill.md; manual docs/manual/deployment/PASS.md.

15/10/2026 18:17 Athens — POS-PERMANENT-PRICE-01 / durable save + restore observed; central Events LIVE FAIL

Retained owner codex/pos-permanent-price-20261015, bounded correction branch fix/pos-permanent-price-audit-build-20261015. Exact healthy aafb68079ce5f53ffdd2433c76601d6bfa1c79a1 after PR2503/mainCI38756178019:2679PASS/0FAIL/0SKIP+6backup; guard38756912305/deploydep-db8emoo473hc739gebq0 SUCCESS. Initial layout fail fixed: actual1363x936 body499/499, enabled Save visible. Normal EMPLOYEE LAB POS2/MAIN SKU2270 NEPO1,5LT: one explicit1→1.10 save18:09:17Athens, fullreload/newlocalrow1.10, one separate restoration1.10→1 save18:11:14. Exactly2history/2PERMANENT_PRICE_CHANGE events, correct server-derived product/SKU/operator/reason. Finalcleanup18:17:11 price1/stock-16/cartempty/queue0; all133financialledger/all40shifts/stock9/baseProduct/control hashes unchanged. No sale/payment/fiscal/shift submission or replay.

Newest actual central Admin Events refresh omits both saved events: real LIVE FAIL, despite correct durable audit. Cause confirmed in normal build: server/scripts/patch-audit-action-filter.js rewrites the route SQL allow-list and removes PERMANENT_PRICE_CHANGE during prepare:server. Correct ONLY this existing build allow-list, retain all prior safe action types and WASTE exclusion; add regression executing actual patch twice over actual route in isolated temp tree. No price re-save necessary: after ordinary greenCI/guarded exact release read existing two event IDs in central UI. No manualdeploy/migration/DBrepair, no takeover other scope. Full feature closure AWAITING Events readback. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-pos-permanent-price.md.

15/10/2026 — POS-PRICE-STARTUP-01 — IMPLEMENTED / AWAITING FULL CI + EXACT RELEASE

Owner codex/pos-permanent-price-20261015. ClaimPR2502/docsCI38754792259 SUCCESS merged00c8ce94 before source. Failed Render7d8cb819 deploydep-db8eb5ivcj2c7395lbe0: build succeeded, startup17:40:54Athens failed PostgreSQL21000 in first SupplierProductMapping→SupplierProductLink upsert. Read-only production proof:1valid target group/2legitimate mapping aliases, existing targetlink absent, mappinghashd1faa5f569b91644fb7af33c01773971. Previous7bbcff06 remains healthy. No permanent price saved: finalLABpreviewcleanup storeprice1/stock-16/history0/events0/cart0/queue0.

Only first startup INSERT SELECT now uses DISTINCT ON exact(companyId,supplierId,productId), ordered updatedAt/lastSeenAt/confirmedAt descending then stable mappingid. Each link target receives one deterministic latest source; all source aliases retained, same tenant joins/COALESCE/reactivation/PRODUCT_CARD source protection and purchase-history fallback. No OCR/learning trigger/model/pack/tax/invoice line/stock/payment/fiscal rule change, no takeover of Gate3/No33/other owners. No manual DB write/delete/migration/backfill/deploy hook/dispatch. Existing normal guarded startup executes the bounded repaired query only after greenCI.

Added native isolated PostgreSQL reproducer for exact former21000 and rollback, real current query with3aliases/timestamp tie/tenant mismatch/PRODUCT_CARD blank-code fallback, stable repeated startup and source mapping preservation. Local Node24 syntax PASS/native1SKIP (no isolated DB); authoritative Node20/nativeCI pending, not LAB PASS. Next: full green CI, merge, exact guarded healthy source, then fresh original permanent-price LAB save/restoration/Events acceptance. Checkpoint

CHECKPOINTS/CHANGES/2026-10-15-pos-price-startup-backfill.md.

New adapter accepts only exact HTTPS Epsilon host and DocViewer UUID, obtains documented visible-menu myDATA(fileType3) and PDF(fileType2) for the same UUID; no cookies/browser/CAPTCHA bypass. All prior deadline/size/page/currency/type/store/module/permission/recipient checks remain. Epsilon PDF issuer header is rasterized, so identity instead requires valid issuer VAT in XML, two distinct printed authentication/UID hash prefixes of at least28 hex characters matching full40-character XML keys, plus exact MARK/recipient VAT and zero-padding-safe document number. Missing/mismatched keys fail closed. Other providers retain original issuer/PDF guard. No camera/scanner/client/payment/draft/job/stock/fiscal or inbox-acquisition changes.

Local Node20:44 focused provider/camera/reader/shift/original/durable-handoff/tolerance tests PASS0FAIL0SKIP. Actual downloaded user XML889747-byte PDF replay with production PDF reader returns supplier999211633/ΜΟΥΧΑΛΗΣ AE,01-140477,13Oct2026,1236.82EUR/MARK400015650787933,one page and human-review flag. This is read-only sample extraction, NOT application/LAB PASS. Independent curl GETs work; local native Node fetch fails at sandbox network transport32ms, so live production provider transport remains NOT TESTED. No real sample/token committed or business submission/replay. Full GitHub CI, exact guarded release and selected-store user QR acceptance remain required. Existing QR camera/input owner, tracker09 inbox acquisition and all prior PASS protected. Next: full source PRCI, mainCI, ordinary guarded healthy deployment, then owner scans without submitting/payment. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-invoice-qr-epsilon.md.

15/10/2026 07:32 Europe/Athens — POS-INVOICE-QR-EPSILON-01 / ASSIGNED / NOT TESTED

Owner fix/invoice-qr-epsilon-20261015, independent new Epsilon DocViewer QR adapter explicitly requested by user. Existing QR scanner/camera ownership and #09 inbox acquisition remain unchanged; this bounded task only extends the QR read/download helper. No camera/input or payment/draft/stock/fiscal behavior change. Read current main58b97078, AGENTS, tracker/pending/numbered, relevant invoice manuals and camera/scanner checkpoints. Existing S1/Impact formats, authentication/module/store/recipient isolation, bounded downloads and original identity validation must remain protected.

User reports unsupported QR. Supplied Epsilon DocViewer UUID confirmed; authorized Cloudflare verification succeeded. Read-only provider UI displays invoice140477/13Oct2026/gross1236.82, 18 rows/312 units. Visible Save menu exposes filedocument/getfile fileType3 myDATA and fileType2 PDF using documentId. Ordinary independent GETs retrieved XML and one-page PDF; no challenge bypass, browser cookies or CAPTCHA tokens reused. Real document/token remains outside git and is never submitted into LAB. This is provider sample evidence only, not application/LAB PASS. Next: publish claim before source; add exact-host/UUID adapter, verify issuer/recipient and original, synthetic regressions plus real read-only replay, full CI and guarded release before user acceptance. No historical transaction replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-invoice-qr-epsilon.md.

15/10/2026 02:00 Europe/Athens — POS-VAT-INBOX-FAST-01 / SOURCE LIVE / LIMITED HEADER UI PASS / NEW-RECEIPT ACCEPTANCE OPEN

Independent owner codex/pos-vat-inbox-fast-20261015 completed the implementation and retains only genuine new-receipt/financial/assistant acceptance. ClaimPR2485/8cbae12c/docsCI38644670019 merged1f4112c9 before code. First sourcePR2486/headba33dfd merged e80f1f84739ebcff380e51532ef65ddd8d6a3dcb; full PR38647566909/job116138468464 and main38648212988/job116140367740 each2649PASS/0FAIL/0SKIP plus6backup/all required checks; guardedRender38648703961/job116141932627 SUCCESS/exacthealthy22:38:06UTC.

Final client correctionPR2487/headab36b147b378e286c065ea8bac772ea487c554a9 merged892afd4bfe14ec34daab64ead9f80b69fc6da98c. PR38649350006/job116144507833 and exactmain38650078865/job116146534470 each2650PASS/0FAIL/0SKIP plus6backup/all required native/build/invariants/HTTP/Chromium/Windows checks. Tested head/merge have zero differing files. GuardedRender38650617731/job116148249627 SUCCESS/exacthealthy22:55:22UTC; independent /api/health confirms892afd4b/version0.22.0+kat-test-pos. Corrected new supplier remains selected after PDF fill; origin label distinguishes inbox PDF from QR. No manual deploy/migration/new grant/provider adapter/OCR model or learning change.

Actual hosted SuperAdmin support Diadoxou companycmulmjjoa000oqlbfyi0h53ju/storecmulmjjoc000qqlbf2bn2ifj0: first source01:39-01:41Athens, final revision01:57-02:00Athens. Owner/Admin Payments→Invoice Payment opens the same POS payment component→New invoice. VAT094211509/NO-SUCH-TEST returns0 and camera remains enabled (first source, same read path). VAT094211509/17113 returns exactly50517113/14Oct/77.66. One explicit original-PDF read per release fills77,66,50517113,2026-10-14,INVOICE and full legal ΠΗΓΑΣΟΣ/VAT094211509. Final label explicitly says original PDF from myDATA inbox,1physical page. Both PAID/CREDIT stay unpressed; final submission disabled. Screenshots first-header.jpg/header-ready.jpg visually inspected; temporary form closed/discarded. No supplier creation/payment/handoff/AI queue/credit/draft/merge/approval/stock/fiscal action submitted. Existing duplicate17113 not paid/replayed/repaired.

Fresh before/after final exact-source snapshots agree, also match first source observations: inbound/inbox hashes49406d1eb835bfb805fef18aab6577aa/c18810b324f666b9cf7b92d798aa5288; MARK400015659382768/inbox7923610d; same originalPDFchecksum452675b521beb1d82156cde90b8ceb4e487b077bba07bc47fd178a5e9804d0aa/344744storedcharacters. lookup-before-after.json. Scoped source metadata preservation only, not global cash/stock invariance during real business. No physical POS terminal action; active real terminal/operator/shift and autonomous sales/sync are outside this read-only acceptance.

Native CI separately proves authorized selected company/store/VAT reads/no writes, one concurrent empty-shell queue, unchanged original payment/stock/control, refusal of reviewed/posted/changed-header rows and pre-payment refusal for POS/myDATA duplicate/missing-VAT candidates. Actual mounted Basic/Premium PAID/CREDIT ordinary request order, original paid-reread/credit-note protection, stale scope/missing PDF and explicit official lookup→one supplier creation→retained option passed. Initial full run38646110436 had2643PASS/4FAIL/0SKIP: the existing paid-reread VM fixture lacked the new null inbox context; adding only that fixture value preserved all original assertions. New expanded parent test then exposed the genuinely empty supplier option; one client condition fixed it and full2650tests passed. These are isolated proofs, not real new supplier/payment/AI acceptance.

LIMITED LIVE PASS is existing supplier lookup, explicit original selection, header fill, preserved payment-choice controls and missing-result photo fallback in the observed desktop/role/store. Required new-receipt physical operator/paid or credit/server assistant completion, real new official supplier creation where needed, other roles/mobile/provider downloads remain NOT TESTED/USER acceptance OPEN. Existing Basic selected-inbox checkout requires existing AI/Inventory modules before money; ordinary Basic photo path remains. Only untouched empty NEW/DRAFT shells queue the existing durable reader, with final locked header/empty-row fence; populated/reviewed rows and existing payments remain protected. No guarantee every provider supplies a PDF; photos remain. Existing17113 reviewed merge, broad09/Gate3/QR/payment/other owners remain unchanged.

Engineering/source/observed-header work removed from pending; only genuine new-receipt acceptance retained with this owner. Next single action: use a genuinely new receipt, inspect source/header, perform one ordinary chosen paid/credit action with fresh before/after/control evidence and verify the same draft/job's background result; never replay17113/Fresh or call CI financial LIVE PASS. Checkpoint2026-10-15-pos-vat-inbox-fast.md, invoice manual and numbered/tracker PDFs updated together in this administrative receipt.

15/10/2026 — POS-VAT-INBOX-FAST-01 / SAME OWNER / NEW-SUPPLIER SELECTION CORRECTION / AWAITING CI

Same retained owner codex/pos-vat-inbox-fast-20261015, corrective branch fix/pos-vat-inbox-new-supplier-20261015. First source PR2486/headba33dfd merged e80f1f84739ebcff380e51532ef65ddd8d6a3dcb; PR CI38647566909/job116138468464 and mainCI38648212988/job116140367740 each2649PASS/0FAIL/0SKIP plus6backup/all required jobs; tested head/merge zero file differences. Guarded Render38648703961 in progress at this record, source not yet claimed final LIVE PASS.

Final mounted expanded requirement exposes Premium readInvoiceQr clearing createdSupplier after an explicit official supplier creation before selecting the inbox PDF. The stored supplierId stays correct, but its absent dropdown option makes the supplier name disappear. One bounded client correction retains the matched newly created supplier until the refreshed supplied list contains it. Existing suppliers/QR reset, payment modes/methods/order/backend/drafts/jobs/stock unchanged. New mounted actual parent unknown VAT→official identity→one confirmed create→inbox PDF proves old empty selection FAIL, then retained official option PASS with zero payment requests;12focused mounted/reread tests PASS. This is local synthetic proof, not real supplier creation/LAB/financial PASS. Same owner and all broader09/Gate3/QR/payment/pair-merge owners retained. Full corrective CI/main/guarded hosted release remains required; no repeated real invoice/payment.

15/10/2026 — POS-VAT-INBOX-FAST-01 / SOURCE READY / AWAITING NATIVE CI AND LIVE

Same owner; claim PR2485/head8cbae12c/docs CI38644670019 all applicable jobs SUCCESS merged1f4112c9 before source. New shared VAT entry on Basic/Premium New invoice: known supplier selected; unknown supplier official VAT lookup and explicit creation; same-store inbound headers, optional number/issue-date narrowing, explicit exact PDF choice. Read-only source requests verify recipient/VAT/MARK/number and PDF bytes with existing supported-provider constraints, no job/draft/payment writes. Missing/unsupported PDF keeps photos; no automatic invoice choice or payment mode.

Header number/date/gross comes from the selected myDATA invoice and verified original, fills first without product AI. Existing paid/credit/payment-method/drawer order remains explicit. Selected inbox identity/PDF is validated again before ordinary payment, and after payment acquisition binds the same original/draft/job via existing exact myDATA receipt contract. Only an untouched empty DRAFT/NEW shell is queued in existing durable assistant worker; reviewed/populated/posted drafts and retries retain rows. Store lock/concurrent queue and a final locked empty-row fence prevent a later review being overwritten. Original ordinary photo/QR paths and modules, no second service/provider adapter or migration.

Local Node24 actual mounted UI/authorized handler validation7PASS/0FAIL; two native PostgreSQL tests SKIP locally, not LAB PASS. Native SQL selected company/store/VAT filters, concurrent one queue, populated/posted refusal and financial/stock/control snapshots await required full Node20 CI. Existing Basic selected-inbox submit checks required AI/Inventory access before money, then uses ordinary payment and durable handoff; unsupported/missing module fails before charge and photos/current Basic flow stays available. Full payment/worker end-to-end and physical operator acceptance NOT TESTED. Full PR/main CI and exact ordinary guarded hosted revision required before read-only actual UI acceptance or measured virtual LAB transaction. Existing historical invoice-pair merge remains AWAITING USER with its original owner.

15/10/2026 00:59 Europe/Athens — POS-VAT-INBOX-FAST-01 / ASSIGNED / NOT TESTED

Independent owner codex/pos-vat-inbox-fast-20261015, branch feat/pos-vat-inbox-fast-20261015. User explicitly requests VAT-first supplier selection/official lookup and selected-store inbound invoice/PDF discovery in POS Payments → New invoice, preserving the current paid/credit/payment methods and drawer flow. Header amount/number/date first; complete product recognition only after payment in the existing background draft. Missing invoice/original/provider leaves ordinary photos available. No takeover of broader09/Gate3/QR adapters/payment correction or historical-pair reviewed merge owners.

Baseline main b9747793, last verified source62814b7c day/archive scoped read-only LIVE PASS. Existing Premium FAST header-first payment and durable handoff, exact myDATA reuse/shared store lock, duplicate/payment guards and supplier official lookup remain protected. Existing Basic photos/payment workflow preserved. Search is company/selected-store/issuerVAT restricted; no broad archive permissions exposed to operator. Only existing SUPPLIER_PAYMENT-authorized POS actors with module access may read matching invoice headers/original. Require explicit invoice choice, receipt/invoice dates distinguished, full series/number, recipient VAT and supported-provider identity validation. No invented PDF or credentials/allowlist bypass; no auto-select invoice by VAT alone. Store/unmount/new query invalidates late results.

Read current AGENTS, complete active/tracker/pending via full blob retrieval, relevant invoice manual and VAT/header/source/common-draft checkpoints and current main history. New scope NOT TESTED; CI never LAB. Source claim must merge before editing code. Required regression: actual authorized handler tenant/store/operator/module boundaries, stored/network original exact identity, no writes/payment/job during header lookup, missing/multiple/ineligible originals, mounted selection+fallback/stale results and original payment request/handoff ordering. Full native CI/main/ordinary guarded exact release followed by actual hosted nonpayment UI acceptance; separately measured virtual LAB transaction if available, never historical real replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-pos-vat-inbox-fast.md.

14/10/2026 — INBOX-DAY-ARCHIVE-01 / SOURCE LIVE / SCOPED LIVE UI PASS / CLOSED

Independent owner codex/inbox-day-archive-20261014 completed the requested read-only navigation and is released for this scope only. Claim PR2482 merged e7afcf16 before source. Source PR2483/heada80a50b8 merged62814b7c6c223215c1b63266224f3687f07c4935; tested head/merge have zero differing files. Full PR CI38628421077/job116073637944 and main CI38629307659/job116076684535 each2636PASS/0FAIL/0SKIP plus6backup/all required jobs. Guarded Render38630014939/job116079013095 SUCCESS/exacthealthy20:14:34UTC; independent /api/health confirms62814b7c/version0.22.0+kat-test-pos. No manual deploy/migration/new permission/provider change.

Actual hosted read-only SuperAdmin Diadoxou selected-store UI23:15-23:20Athens: default Τιμολόγια ημέρας pressed,8cards/1-8 and zero old regions; Παλιά τιμολόγια pressed,5366total/first100cards and zero day regions. All100 displayed old receipt labels exclude14Oct. Independent read-only DB baseline5374total=8today+5366old matches the actual views. Screenshots today.jpg/old.jpg. Search6836 returns3matches including both existing Fresh originals outside the initial100-row supplier batch; search135848 returns valid0results, not an assumption that the historical sample still exists. Switching day→old retains6836, switching back shows8today; Clear restores5366 and final day view8. Both controls are large and only one list exists in DOM at a time. No download/export/sync/original acquisition/AI/merge/upload/delete/payment/stock/finalization was submitted. Existing autonomous server sync and real-store sales are not attributed to this navigation.

Scoped LIVE PASS is desktop selected-store two-button navigation, actual separated periods/counts, search/filter retention/clear and default day view. Athens period/date-boundary/count/pagination/export flag semantics plus actual registered archive-handler/XLSX preservation/security passed isolated/local and full CI; actual owner XLSX/PDF downloads, other physical devices/roles and financial/stock effects are NOT new LIVE PASS. Original issue date remains separate from receipt day. Older periods are filtered in SQL before pagination/count/export, not by hiding a fetched page; unflagged API compatibility and null legacy receipt dates remain. Existing role/module/company/store guards and original/review/duplicate protections unchanged.

Completed owned source/UI work removed from pending, checkpoint/active/tracker/manual/numbered/PDF synchronized. Wider09/Gate3/invoice-resolution/Fresh/payment/other owners and open scopes remain. Invoice-resolution actual USER merge is still assigned to codex/invoice-cross-supplier-duplicate-20261014; this closure does not perform or close it.

14/10/2026 — INBOX-DAY-ARCHIVE-01 / SOURCE IMPLEMENTED / AWAITING CI AND LIVE

Same independent owner; claim PR2482 merged e7afcf16 before source. Two large mutually exclusive buttons: default Τιμολόγια ημέρας shows existing today receipt-day list, Παλιά τιμολόγια reveals archive search/groups only. Existing filters and independent page offsets survive toggling; store change defaults to today. Previous receipt days are filtered in the parameterized server query before paging/count/export using the same Europe/Athens receipt-day expression as existing today; null legacy receipt dates remain in old archive. Both period flags together reject400. Existing issue-date filters and unflagged API full-archive compatibility retained. Today exports clear old-period/search filters; old exports retain their period/search; individual summary reports clear both periods. Counts and XLSX metadata use the selected receipt period.

Local actual mounted UI plus archive/actual registered handler/export/security regressions8PASS/0FAIL/0SKIP. Actual generated XLSX re-read on5269 fixtures; old list/count/total/export query flag propagation and original/payload distinction preserved. These are local/isolated tests, not LIVE/USER or native financial PASS. No business writes/provider sync/AI/merge/upload/payment/stock/finalization/schema changes. Full Node20 native suite/build/invariants/E2E and exact guarded deployment plus actual hosted two-view test remain required. Wider invoice-resolution/AWAITING USER and other owners unchanged. Checkpoint2026-10-14-inbox-day-archive.md.

14/10/2026 22:52 Europe/Athens — INBOX-DAY-ARCHIVE-01 / ASSIGNED

Independent owner codex/inbox-day-archive-20261014, branch feat/inbox-day-archive-20261014. User requests two buttons in invoice inbox: only today's invoices versus old invoices, to avoid showing both large lists together. Current mainadd22a9f/runtimee895972d; existing panel renders received-today section plus full archive concurrently, including today's rows again. Scope is read-only UI/navigation and matching archive read/export filtering by receipt day in Europe/Athens; default today's view, previous-day list only after explicit button. Preserve issue-date filters, search, paging, exports, originals, existing review/merge and company/store/role/module guards. No sync/upload/AI/merge/payment/stock/finalization, schema or provider change during diagnostics.

Required acceptance: actual exact hosted revision shows two buttons, one visible list at a time; today versus previous receipt-day query applies to list/count/paging/export, keeps selected store/filter context, does not hide older rows by filtering only a fetched page. Existing SQL/history/timezone boundary and mounted UI coverage must remain green; full PR/main CI and ordinary guarded Render before actual read-only UI verification. New behavior NOT TESTED. Claim must merge before source. Wider09/Gate3/invoice-resolution/Fresh/payment/other owners remain unchanged. Existing invoice-resolution owner is retained for actual USER merge. Administrative repair: remove only orphaned superseded source/claim paragraphs left inside this page's previous invoice-resolution pending section; preserve its current authoritative AWAITING USER paragraph and all unrelated sections/history. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-inbox-day-archive.md.

14/10/2026 — INVOICE-CROSS-SUPPLIER-DUP-01 / REVIEWED RESOLUTION LIVE / LIMITED UI READINESS PASS / ACTUAL MERGE AWAITING USER

Same owner codex/invoice-cross-supplier-duplicate-20261014 retained for the existing-pair reviewed action. Claim PR2479 merged ff5addc1 before source. Source PR2480 final head2de2e1c498ac647582417bc5ed3fd5691f889d8d merged e895972d876724e8a94448af4cc27e74cd735f8e. Final PR CI38616808846/job116034052164 and main CI38617620545/job116036812287 SUCCESS: each2634PASS/0FAIL/0SKIP plus6backup/all required jobs. Tested head and merge compare have zero differing files. Guarded Render38618473204/job116039616769 SUCCESS, exact healthy revision confirmed18:52:18UTC and independently through /api/health; no manual deploy, migration, new role/grant or bypass.

Actual hosted selected-store SuperAdmin UI21:54-21:57Athens, same Diadoxou company/store and invoice505/17113/MARK400015659382768: after reload, verified supplier dropdown includes active legal ΠΗΓΑΣΟΣ/VAT094211509; separate supplier and original-payment association confirmations appear. Both selectable existing tables show23rows, myDATA77.63 and POS77.61; expanded each actual table has23data rows plus header. These are displayed stored rows, not certified printed accuracy. Original PDF/photo buttons and original payment77.66 remain visible. Temporary local-form test: supplier/payment/original confirmations and explicit reason 'Έλεγχος ενεργοποίησης κουμπιού — χωρίς υποβολή ή ενοποίηση.' leave button disabled without a row choice; either myDATA or POS choice enables it. No merge/POST/approve/finalize/AI/provider action submitted. Closed the preview, discarding temporary choices. Screenshots resolution-ready.jpg/resolution-rows.jpg document readiness only; their selected POS radio is a temporary test, not recommendation or actual chosen table.

Fresh scoped target readbacks BEFORE/AFTER are identical: both NEW/DRAFT,23+23rows, exact order/document/row hashes unchanged; same original payment id/77.66/supplier/full row hash534efe4b4bc1a33c0f0af7234d81c46a; zero PurchaseOrderPosting/InvoiceStockPosting. Evidence resolution-ui-before-after.json. No global stock/cash invariance is inferred from concurrent real-store sales. LIMITED LIVE PASS is actual supplier/table controls, full-table display, required-choice gating and enabled button, not actual reconciliation or financial/stock/all-role/device acceptance.

Implementation keeps one explicitly selected existing table on its own canonical order/document and preserves the other complete table on its historical MERGED source; no row deletion, movement or concatenation for competing-table resolution. Verified supplier correction does not overwrite the shared Supplier VAT. Explicit original-payment supplier association correction updates supplierId only; full pre-correction payment is audited, amount/time/shift/operator/method/key retained. Existing settled/allocated/elsewhere-linked/reversed/multiple payments and posted corrections refuse. Full inbound headers, supplier identity, payment and both line versions invalidate stale preview. Original photos/PDF/jobs, aliases and once-only posting protections remain. Actual registered POST native CI proves both table choices, concurrent retry, complete row/file/control/monetary snapshots and negative review/supplier/stale inbound/payment/posted/settlement cases. These are isolated proofs, not real payment correction.

Completed engineering/UI-readiness must not be repeated. Only remaining same-owner item: owner compares originals and chooses correct existing table/supplier in the delivered screen, then one explicitly reviewed merge; actual existing-pair supplier/payment association correction and canonicalization remain AWAITING USER. No real mutation/replay solely for evidence. Broader09/Gate3/Fresh6836/task2/payment/QR owners and prior PASS retained. Checkpoint/manual/active/tracker/pending/numbered/PDF synchronized with this precise scope.

14/10/2026 — INVOICE-CROSS-SUPPLIER-DUP-01 / REVIEWED RESOLUTION SOURCE / AWAITING NATIVE CI AND LIVE

Same retained owner; claim PR2479 merged ff5addc1 before source. Explicit active same-company supplier matching myDATA VAT plus separate correction/payment-association confirmations; strong full series/date/type/amount identity remains required across VAT. Existing transaction changes supplierId only, original amount/time/shift/operator/method/key remain intact and full pre-correction row audited. Payments already settled/allocated or linked elsewhere refuse. No global Supplier VAT edit or money/stock/fiscal action.

Two populated tables now require explicit selectedRowsOrderId. Selected existing order/document stays canonical; other table stays byte-for-byte on its historical MERGED source, not moved/deleted/concatenated. Existing zero/single-table behavior retained. All originals/jobs bound to canonical, aliases/audit and source posting guards retained. Full payment row, supplier and both order/document-line versions participate in stale-preview guard; posted sources refuse corrections. Owner selects final supplier/table; no real pair mutation by this page. Screen shows active verified supplier choices, separate original-payment association acknowledgement, expandable full tables and one row-source choice. Local mounted regressions3PASS/0FAIL; three new native cases SKIP locally (no isolated PostgreSQL). Actual registered POST native concurrent retry, both table selections, unchanged row/file/control/money snapshots and negative decisions/suppliers/staleness/payment/posted/settlement cases await required Node20 full CI. Source not yet LIVE/PASS; real reviewed merge still AWAITING USER. Existing limited detection/Fresh PASS and all wider owners preserved.

14/10/2026 21:22 Europe/Athens — INVOICE-CROSS-SUPPLIER-DUP-01 / SAME OWNER / REVIEWED RESOLUTION ASSIGNED

Same owner codex/invoice-cross-supplier-duplicate-20261014, implementation branch feat/invoice-reviewed-resolution-20261014. User21:19 screenshot confirms the detection guard works but the actual resolution UI is incomplete: confirmation and reason filled, merge stays disabled for missing POS VAT and two populated tables. User21:22 explicitly instructs ΞΕΚΙΝΑ. Continue this existing residual only; broad09/Gate3/Fresh6836 and other owners unchanged.

Implement an explicit verified myDATA supplier choice and a reviewed choice of ONE existing table; retain the other complete table as historical MERGED evidence, all row IDs, photos/PDF/jobs and one original payment. No automatic row concatenation/deletion, global Supplier VAT overwrite, second payment, invoice finalization or stock posting. Any supplier association correction must be explicit, tenant/store constrained, auditable and preserve payment amount/shift/operator/time/method; conflicting/reversed payments, posted records, stale preview and foreign scope must refuse. Existing same-VAT zero/single-table reuse and once-only fences remain protected. CI/native/mounted tests are separate from LAB/LIVE. Production pair not mutated during development or diagnostics; owner will review/select final values in the delivered screen. Required acceptance: actual deployed UI shows choices; native concurrent retry and complete before/after snapshots demonstrate one canonical draft, preserved other table/files/payment and no stock/cash deltas. Source and new action NOT TESTED / AWAITING IMPLEMENTATION. Prior limited detection PASS retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-invoice-cross-supplier-duplicate.md.

14/10/2026 — INVOICE-CROSS-SUPPLIER-DUP-01 / SOURCE LIVE / LIMITED LIVE DETECTION PASS / EXISTING PAIR REVIEW OPEN

Owner codex/invoice-cross-supplier-duplicate-20261014 retained for the explicitly unresolved existing pair. Claim PR2476 merged343b9b2a before source. Source PR2477 head428885f8/full CI38560077809/job115838826070 SUCCESS2630PASS/0FAIL/0SKIP plus6backup; exact main9355f01d48b429a2cb679754ce61eb26783067ff/mainCI38560950443/job115841730403 same2630/0/0 plus6backup/all required jobs. Guarded Render38561472521 SUCCESS; independent health ok=true/version0.22.0+kat-test-pos/exact9355f01d. No manual deploy, production migration, provider call, supplier/payment correction or invoice finalization.

Reused ordinary signed-in SuperAdmin Χρήστος Μάνης session; selected ΠΕΡΙΠΤΕΡΟ ΔΙΑΔΟΧΟΥ ΠΑΥΛΟΥ ΕΕ/companycmulmjjoa000oqlbfyi0h53ju and Περίπτερο Διαδόχου Παύλου/storecmulmjjoc000qqlbf2bn2ifj0. Existing Backoffice→Commerce→Θυρίδα→myDATA17113/MARK400015659382768→one GET-only Αντιστοίχιση POS↔myDATA preview. Old healthyc99e02ef UI genuinely displayed “Δεν βρέθηκε δεύτερο πρόχειρο POS”. New exact9355 UI includes POS505/17113/14Oct/77.66/23lines, both existing PDF and photo buttons, explicit POSΠΗΓΑΣΟΣ/VATλείπει versus myDATA094211509, same original77.66 payment, populated-table warning and merge disabled. No checkbox/reason/POST was submitted. Screenshot visually verified, CHECKPOINTS/EVIDENCE/2026-10-14-invoice-cross-supplier/duplicate-review.jpg.

Fresh independent BEFORE/AFTER exact selected-pair readbacks match full order/document/23-row hashes and original payment row hash534efe4b4bc1a33c0f0af7234d81c46a, same77.66/id/supplier reference; both NEW/DRAFT,23+23rows,0 PurchaseOrderPosting and0 InvoiceStockPosting. Scoped observed read/UI preservation only; no global financial/stock invariant is inferred from active real-store sales. Evidence before-after.json. LIMITED LIVE PASS is hosted candidate detection, warning, original-file availability controls and held merge; not real posting/cash/stock or all-role/device acceptance. Native PostgreSQL separately proves four concurrent actual order/document approvals all refuse and preserve money/stock/control/source snapshots; both arrivals and negative series/day/type/total/store/company/canceled cases passed CI, not real financial replay.

Completed engineering/detection work must not be repeated. Remaining same-owner action: inspect both originals, establish the verified supplier and choose the correct23-row table before a separately reviewed correction/reconciliation preserving the original payment. Existing two populated drafts are not automatically merged, deleted or concatenated; missing supplier/payment VAT association remains unresolved. Strong warning identity is complete normalized series/number+issue day+type+corroborating header amount within0.05, same company/store. A warning is not proof that two legitimate vendor invoices are the same; uncertain cases require owner review. Broader09/Gate3/Fresh6836/task2/QR/payment owners and existing PASS remain unchanged. No new full LAB/posting/manual claim. This receipt updates the actual limited UI instructions, active/tracker/pending/numbered snapshot and both canonical PDFs. Same owner retained until named handoff/completion.

14/10/2026 14:12:28 Europe/Athens — SCREEN-RECORDING-MP4-01 / SCOPED USER ACCEPTANCE / CLOSED

Owner replied “EINAI OK” after delivered MP4 download instructions and request to confirm use/playback. Record scoped owner acceptance of the requested MP4 feature; no independently captured file hash, native encoder trace, physical browser/client revision or universal device/player certification inferred. Source PR2473+2474 and exact healthyc99e02ef/full mainCI38548181928/guard38548773309 remain verified; later invoice source leaves this component unchanged. Local-only MP4 capture/preview/download, Greek24hour filename and unsupported-browser message retained. Implementation request closed and owner released; old awaiting entries below are dated history, remove completed scope from active pending. Manual docs/manual/pos/PASS.md updated; no new screen recording, upload or business action repeated.

14/10/2026 — INVOICE-CROSS-SUPPLIER-DUP-01 / SOURCE READY / AWAITING NATIVE CI AND LIVE

Same independent owner codex/invoice-cross-supplier-duplicate-20261014; claimPR2476 all applicableCI SUCCESS merged343b9b2a before code. Cross-supplier warning candidate now uses complete normalized series/number, issue day, document type and header amount within0.05 in the same company/store; missing/different VAT cannot silently hide it. Such candidates are explicitly NOT exact automatic reuse. POS precheck and transactional handoff/job reuse refuse before a new receipt/payment/draft; POS-first original acquisition returns reconciliationRequired without creating a second myDATA shell. Both order finalization and document approval check sibling active source documents under the existing store lock before stock, including document-only entry. MERGED aliases and different series/day/type/total/store/company/canceled rows excluded. Exact same-VAT reuse, legacy uncertain same-VAT review and existing stock fence preserved.

Existing common review shows both supplier identities and a missing/different VAT warning, disables unsafe merge. Existing populated23+23 rows remain separately preserved for original/supplier/table review; no automatic supplier/payment reassignment or line concatenation. This guard source does not repair the existing missing supplier VAT/payment association or select one of two populated rowsets; those remain explicit reviewed resolution, not silently claimed complete. No current real draft/payment/stock/finalization mutation.

Local Node24 actual source/UI regression3PASS/0FAIL, four native PostgreSQL cases SKIP locally (no isolated DB). New native cases exercise missing/wrong VAT, both arrivals and four concurrent actual registered order/document approvals with complete payment/stock/control/draft/file/alias snapshots; negative scope/type/series/date/amount/canceled coverage. Required full Node20 native CI/build/invariants/E2E remains pending. New candidate SELECT extracted from actual source and executed read-only against the real target store returns both505/17113 orders, each23lines, one existing77.66 payment/VATnull; query syntax and detection diagnostic verified, NOT live hosted-handler or stock acceptance. User LIVE FAIL remains open until final exact release and actual acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-invoice-cross-supplier-duplicate.md. All prior Fresh6836/other owners protected. Same owner retained.

14/10/2026 — INVOICE-CROSS-SUPPLIER-DUP-01 / ASSIGNED / LIVE FAIL REPORTED

Independent owner codex/invoice-cross-supplier-duplicate-20261014. New user-reported regression/residual of completed common-draft detection only; no takeover of broad09/Gate3/QR/payment/other assigned scopes. Bounded same-store invoice identity candidate/pre-submit/pre-post guards must work despite missing/wrong supplier VAT; never auto-merge differing suppliers or populated tables. Protect exact verified common-draft reuse/Fresh6836 PASS, one payment, both original files, row identities, once-only canonical stock fence and tenant/store/type/series/date boundaries.

User14Oct14:22Athens image image(20261014-111852).png: POS505/17113 ΠΗΓΑΣΟΣ23lines net68.71/gross77.61 versus myDATA50517113 full legal supplier23lines net68.73/gross77.63/MARK400015659382768. Read-only Render workspace My Workspace confirmed by user this turn; DB observed both NEW/DRAFT, same14Oct issue date/headergross77.66 and storecmulmjjoc000qqlbf2bn2ifj0/companycmulmjjoa000oqlbfyi0h53ju. myDATA order9e711592/source6c467b24 supplier672046a2/VAT094211509; POS order960a91fe/source5afb0bcb supplier4a889362/VATnull, existing paymentpay_6ef82833 amount77.66/paymentVATnull. Both23stored lines, bothpostingCount0. No real mutation/replay performed. Screenshot line-total discrepancy versus stored header remains visible evidence, not silently corrected.

Cause in current code: candidateOrders, POS precheck/reuse and posting inbound lookup restrict matching by supplier VAT, allowing missing/wrong VAT to hide same normalized series/number/date/amount. Cross-supplier candidates must require human review, not qualify as exact automatic reuse. Real supplier/payment/line correction remains separately reviewed; never delete/concatenate originals or replay this invoice/stock/payment for evidence. Source development/new behavior NOT TESTED. Currentmain dedf608b; healthy c99e02ef. Claim must merge before code. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-invoice-cross-supplier-duplicate.md.

14/10/2026 — SCREEN-RECORDING-MP4-01 / SOURCE IMPLEMENTED / USER PLAYBACK OPEN

Owner codex/screen-recording-mp4-20261014 retained. ClaimPR2472 merged48666a6d before source. SourcePR2473/fullCI38545961625 SUCCESS merged9babc9b7; final codec reviewPR2474/fullCI38547491325 SUCCESS mergedc99e02efb2f1749aeec08c51a90c43d1b7b39bf6. Final runtime requests native MP4/avc1 with browser-selected level, then supported MP4; no fixed low profile. Existing POS and detached Admin share real .mp4 preview/download with actual recorder MIME guard, no-audio/local-only capture, Greek24hour filename and resource cleanup. Existing launchers/permissions/upload-disabled and all unrelated owners/PASS retained.

Actual mounted-source local1PASS/0FAIL and full Node20 source CI success are implementation evidence, not physical/LAB screen capture or native encoder/player PASS. Final mainCI38548181928 and guarded exact deployment are tracked separately in checkpoint. New real MP4 recording/stop/download/Windows playback remains USER acceptance OPEN; unsupported browsers show clear MP4 message before chooser, prior WebM files are not converted. No new manual PASS, financial/stock/fiscal/auth/server-upload action. Single next action after confirmed release: one ordinary user screen recording, stop, Save MP4, and verify playback. Do not retest unrelated financial flows. Owner remains assigned until this acceptance/named handoff; completed engineering source is not falsely declared full LAB PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-screen-recording-mp4.md.

14/10/2026 — SCREEN-RECORDING-MP4-01 / SOURCE READY / AWAITING CI AND LIVE

Owner codex/screen-recording-mp4-20261014, sourcebranch feat/screen-recording-mp4-20261014. ClaimPR2472/docsCI all applicable jobs SUCCESS, merged48666a6d before code. Native MP4 negotiation prefers H.264 avc1.42001E/avc1 then browser-supported MP4. Download is .mp4 only after actual recorder MIME confirms MP4, no WebM relabelling. Clear unsupported-browser message before screen chooser; no server upload/transcoding or audio. Both existing POS and detached Admin use same component; permissions/launchers/no-audio/Greek24hour name/disabled upload preserved. Latest preview URL/capture tracks released on close/unmount; late chooser after unmount and duplicate start ignored.

Actual mounted source under React19/JSDOM/esbuild local Node24:1PASS/0FAIL/0SKIP covering capture constraints, native option, chunk concatenation, preview/download same blob/name, stop/share-ended, preview replace/close/unmount, unsupported MP4, constructor resource failure, wrong actual WebM denial and late pending permission. This is browser-API mocked component evidence, not native encoder/physical screen/player/LAB PASS. Full Node20 CI/build/invariants/native E2E/Windows and exact main guarded healthy release required, then one real screen recording/stop/download/MP4 playback. Existing11Sep capture/preview LAB PASS remains historical; new MP4 AWAITING LIVE. Unsupported browsers need updated MP4-capable Chrome/Edge; prior WebM files are not converted by this change. No payment/stock/fiscal/auth/data mutation. Same owner retained; no new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-screen-recording-mp4.md.

14/10/2026 — SCREEN-RECORDING-MP4-01 / ASSIGNED / NOT TESTED

Owner codex/screen-recording-mp4-20261014. User requests genuine MP4 download from the existing MyWorkstation screen recorder (POS and detached Platform Admin window). Independent encoding/download scope only; preserve detached window, existing launcher permissions, local-only capture/preview/download, no audio, Greek 24-hour filename and all other owners. Current source explicitly selects WebM and names .webm. Historical11Sep capture/stop/preview LAB PASS retained; MP4 NOT TESTED. Source history since PASS only changed Greek filename time. Health14Oct fca770d25b2586a914581f59dbebd5d0a5fdf6f9; current main332836ae.

Plan: negotiate actual browser MP4/H.264 recording, truthful unsupported-browser handling (never rename WebM as MP4), preview/download MP4, test format selection and recording lifecycle. No server upload/conversion, provider/financial/stock/fiscal/auth change. Full CI/green merge/exact release and real recording/playback acceptance required. Claim must merge before code; overall status OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-screen-recording-mp4.md.

14/10/2026 12:10–12:12 Europe/Athens — INVENTORY-BARCODE-PHOTO-01 / SOURCE LIVE / LIMITED LIVE PHOTO→LOOKUP PASS

Owner confirmation14Oct2026 12:13:27Athens: «einai ok» after live photo→lookup demonstration. Scoped USER acceptance of the delivered feature; no specific physical photo/mobile/creation/stock result inferred.

Independent owner codex/inventory-barcode-photo-20261014 completed implementation and bounded actual browser acceptance of the requested photo input in Νέο είδος · Πλήρης καρτέλα. ClaimPR2468/docsCI38537041094 merged e22d1113 before code. SourcePR2469/head34f8bce6f6a8f1b75 b92b5a221ed56ecbaac3d1b/fullPRCI38538328146/job115766759311 SUCCESS2623PASS/0FAIL/0SKIP plus6backup; exact mainfca770d25b2586a914581f59dbebd5d0a5fdf6f9/mainCI38539146361/job115769480910 same2623/0/0 plus6backup/all required native/build/invariants/HTTP/browser/Windows. All6 owned runtime/test blobs verified byte-for-byte on merge. GuardedRender38539660079/job115771056701 SUCCESS; dep-db7kbft9fdbs73eijgigLIVE09:06:56UTC, exacthealthy09:07:15.377UTC/version0.22.0+kat-test-pos. No manual deploy, schema/production migration or fiscal changes.

Ordinary secure email/password+2FA sign-in succeeded as SuperAdmin Χρήστος Μάνης; no credential values read/printed or auth bypass/new role/grant. Explicit MYWORKSTATION LAB → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ/cmtpopbgo000trhb5ng9ytiru → full Backoffice → Commerce → selected same store → Archive → New item. Baseline barcode/description empty, cost0/sale0/VAT24/openingstock0. One ordinary chooser selection of generated standard EAN13 image barcode-photo-check.png (filename contains no decoded code) was actually decoded from pixels by deployed client and automatically filled5201399030219 and initiated existing read-only lookup. Actual UI showed “Διαβάστηκε barcode:5201399030219” and Sticks Με Γεύση Τρούφα Και Τυρί/3αλφα/Open Food Facts plus explicit Χρήση διαθέσιμων στοιχείων. Name still empty/cost0/sale0/VAT24/stock0. No Apply/product save/payment/stock/provider-AI/fiscal action submitted. Original decoded barcode remains editable.

Fresh BEFORE09:10:32.302UTC recorded in checkpoint before upload and AFTER09:12:24.929UTC independently agree: company99products/fullhash6e4934372679733d609b847c0e325517, store99stockrows/fullhash7b8db4a9f0c5ffb6116a3ce8e109eeac,95stockmovements/latest12Oct20:42:11.404UTC,133transactions/fullhash1a717e87f6e93ed7723070fceb7cbd6a unchanged. N40 control has no stock rows (null aggregate), unchanged. Browser MAIN/LABPOS2 observed3transactions/cash9.40/card0/IRIS0/total2.20; no physical terminal action/quantity/method applied. LIMITED LIVE PASS covers deployed file chooser/pixel reading/automatic selected-store lookup and no business-data effect in this measured window using a generated barcode PNG. It is not a physical camera/user packaging photo/phone/all-role/all-quality PASS. Multiple symbols, unreadable/checksum/leading-zero/native fallback, repeat same code and stale file/barcode/store/unmount passed native-pixel/mounted CI separately, without claiming extra real actions. Existing duplicate-denial/explicit Apply/manual-price/VAT/stock/card/SET/invoice behaviors protected.

Completed independent implementation/photo→lookup residual removed from pending; broader creation acceptance owner codex/inventory-new-card-online-20261013 and physical/mobile coverage, all other Inventory/POS/09/task2/task3/payment owners and PASS retained. Supplier/product online coverage remains limited; unsupported/unreadable photo uses manual barcode and exact lookup result must be checked. No AI charge for barcode image reading; no general availability/price recommendation inferred. Evidence CHECKPOINTS/EVIDENCE/2026-10-14-inventory-barcode-photo/{photo-lookup.jpg,barcode-photo-check.png,before-after.json}; checkpoint CHECKPOINTS/CHANGES/2026-10-14-inventory-barcode-photo.md; verified instructions docs/manual/inventory/PASS.md. Same receipt PR synchronizes active/tracker/pending/manual/numbered snapshot/PDF; green receipt merge required.

14/10/2026 — INVENTORY-BARCODE-PHOTO-01 / SOURCE IMPLEMENTED / AWAITING CI AND LIVE

Same independent owner codex/inventory-barcode-photo-20261014/feat/inventory-barcode-photo-20261014. ClaimPR2468/headba4171c3/full docsCI38537041094 SUCCESS mergede22d1113 before runtime changes. Only existing new-card barcode/photo/read-only lookup scope; original creation acceptance owner and all other owners remain protected. Added photo button/file picker for JPG/PNG/WebP<=20MB, local real ZXing pixels with optional native detector, full rotations/overlapping label crops, supported numeric1Dcodes only, EAN13 leading-zero preservation, no filename/text inference. Recognized code fills the existing barcode and triggers current selected-store lookup after committed parent update; same-code replay unlocks correctly. Multiple found symbols require explicit selection; failed/unreadable photo keeps manual path. File replaced, barcode/store/modal changed or unmount aborts/discards stale reads and searches. Photo is not uploaded to server/AI provider; barcode lookup is the existing GET only. Existing MYWORKSTATION duplicate-denial and explicit product-info Apply unchanged; no automatic price/VAT/stock/new-product/save/payment/fiscal action.

Node20 complete local suite/build passed, focused7PASS/0FAIL includes real independently encoded EAN13 pixels for user5201222667919 and online5201399030219, leading-zero0123456789012, invalid checksum/blank/native failure and file/cancellation guards; actual mounted photo auto-lookup once, multi-choice/no early search, same code unlock, typed edit/store/unmount cancellation/no filename inference/no POST, plus protected full-card and QR tests. First fixture exposed existing ZXing UPC_A normalization stripping initial0; production reader now prefers full EAN13 representation and normalizes native12-digitUPC_A to its equivalent0-prefixedEAN13 before lookup; tests passed after fix. No physical user photo/mobile/camera/LAB/production UI result yet, NOT TESTED. Full native CI/build/invariants/HTTP/browser/Windows, green main and guarded exact release required, then an ordinary unsaved photo-upload/read-only lookup in correct selected store without creating product or stock action. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-inventory-barcode-photo.md.

14/10/2026 11:37 Europe/Athens — INVENTORY-BARCODE-PHOTO-01 / ASSIGNED / NOT TESTED

Independent owner codex/inventory-barcode-photo-20261014, branch feat/inventory-barcode-photo-20261014. User supplied screenshot of Νέο είδος · Πλήρης καρτέλα and explicitly requests photo barcode reading followed by search. Scope only this form's photo input→real barcode decoder→existing selected-store lookup; preserve existing catalogue duplicate denial, explicit apply, manually entered fields/prices/VAT/stock and current full-card/create/SET owners. No takeover of INVENTORY-NEW-CARD-ONLINE-01 creation acceptance, broader Inventory/POS, invoice task2/3 or payment scopes. Baseline mainaefe35cb/source4a2b3f1f with protected real Fresh and Inventory UI PASS. Current form accepts typed barcode only; no photo reader: implementation/LAB/physical photo result NOT TESTED.

Plan: add accessible image selection, local pixel decoding with already installed ZXing fallback (no photo sent to an AI provider/server), recognized code fills existing barcode and triggers its existing read-only lookup. Multiple decoded candidates require explicit choice; unreadable/unsupported photo keeps typed/manual path. Reject stale decode/lookup after store/barcode/modal/file changes; retain leading zeros and never infer a code from filename or product name. No automatic product creation, price/VAT/stock change or financial/fiscal action. Required real pixel decode and mounted async/selection/error tests, normal build/full CI/green main/guarded exact release, then ordinary authenticated unsaved form upload/lookup acceptance. No real product save or posting for evidence. Claim must merge before runtime code. Checkpoint CHECKPOINTS/CHANGES/2026-10-14-inventory-barcode-photo.md.

14/10/2026 00:33–00:34 Europe/Athens — MYDATA-COMMON-DRAFT-03 / SOURCE LIVE / LIMITED LIVE PASS

Independent εργασία3 owner codex/invoice-pos-mydata-common-draft-20261013 completed implementation and the explicitly requested existing Fresh Snack pair. Exact source4a2b3f1f38415e8890bf32e5e22b3c5a12ef91f9: sourcePR2465/reconciledheade450b6d42f9b6cd3fd48a7fd49402a824037f2d0/fullPRCI38469321404/job115544330135 SUCCESS2620/0/0 plus6backup; mainCI38470285062/job115547433934 SUCCESS2620/0/0 plus6backup/all required checks. GuardedRender38470980997/job115549736590 SUCCESS; dep-db7a5lad0e5s73frjhk0LIVE21:31:26UTC, exacthealthy21:31:39.661UTC. Runtime/test blobs identical to previously tested422917 head; concurrent Inventory receipts preserved. No manual deploy/migration/authentication/access/fiscal change.

One ordinary authenticated SuperAdmin support UI action14Oct00:33:28.141Athens on selected Diadoxou storecmulmjjoc000qqlbf2bn2ifj0: Θυρίδα→Fresh6836→Αντιστοίχιση POS↔myDATA→confirm independently compared originals/MARK, explicit unchanged155.17payment/+2.00difference, reason→one Ενοποίηση. Fresh12Oct2026/21-ΤΔΑ6836/MARK400015624303633/153.17 now has one activeNEW order60bd0608/sourceb538b9f2, same original payment. Former myDATAorderb9ba143f/source19d50bc3 retainedMERGED with one audited alias; inbound references and both existing jobs now point to canonicalb538b9f2. Both original attachment IDs/checksums/lengths preserved: POSphoto5b9c1b35/173643 and originalPDF8c140da7/294216. Both remain available in read-only common preview. Ordinary completion opened existing purchase card with corrected number, same supplier,0lines and persistent visible payment-review description. Close/reopen of matching preview shows “Υπάρχει ήδη ένα κοινό πρόχειρο” and both file buttons, no second POST.

Fresh before00:32:59–00:33:00 and after00:33:41–00:33:42 recorded before action in checkpoint and independent read-only DB. Both0-line rowsets stay0; active drafts2→1; alias0→1. Payment amount155.17, original shift844ece89/operatorΑΝΤΩΝΗΣΠΑΠΑΔΗΜΟΣ/key/time/reversal unchanged, full paymentrowhash33788e8f6a3dbce289e5711ffa1a9051 identical. Original shift83transactions/sum2462.26/hash8adcf6f0575eed38d711cd701dba61b4 identical. All6639selected-store stock quantities hash18680aa7501a9e1aa5d85ffaf03d9050 identical and latestmovement21:32:08.223UTC unchanged; targetmovements0→0, PurchaseOrderPosting0→0, InvoiceStockPosting0. No payment/allocation/stock/finalization/provider/AI read/fiscal action. Current physical DIADOXOU-POS-01 continued real business: observed31/cash1008.26/cards76/IRIS0/151.90 before navigation and33/cash1013.36/cards77.50/IRIS0/158.50 later; these changing live totals are not falsely claimed unchanged or caused by reconciliation. No physical POS action by this agent.

LIMITED LIVE PASS is existing confirmed-pair reconciliation, one active draft, original/file/job preservation, visible unchanged payment discrepancy and measured zero financial/stock effect in this window. New POS submissions/both arrival orders, reviewed-row conflicts, aliases/concurrency and once-only stock posting passed isolated native CI using actual production handlers; they are not new physical POS/LAB/real-stock acceptance. Never repeat a real posting for evidence. Both populated rowsets/multiple payments/deleted originals or already-double-posted records require separate review; no automatic concatenation/deletion/cash correction. Other historical pairs have review capability, not a claim that every old invoice was bulk merged. Broad09 owner codex/mydata-completion-20261006/Gate3/task2 source-selection user acceptance/payment correction/Inventory/QR remain separate and OPEN where previously OPEN. Actual2.00payment discrepancy still needs separate owner review. Completed own implementation/Fresh residual removed from pending; historical awaiting entries here superseded only for this independent scope.

Evidence CHECKPOINTS/EVIDENCE/2026-10-14-invoice-common-draft/fresh-6836-before-after.json and visually inspected fresh-6836-common.jpg; checkpoint CHECKPOINTS/CHANGES/2026-10-13-invoice-pos-mydata-common-draft.md; verified usage docs/manual/invoices/PASS.md. Administrative closure publishes checkpoint/active/manual/pending/tracker/numbered snapshot/PDF together, green receipt PR required.

14/10/2026 00:08 Europe/Athens — MYDATA-COMMON-DRAFT-03 / FULL NATIVE CI PASS / AWAITING MERGE AND LIVE

SourcePR2465 finalhead42291714522c5469452a64e03e8205367521d586, fullCI38467420817/buildjob115537838561 SUCCESS2620PASS/0FAIL/0SKIP plus6backup tests/all required build/invariants/HTTP/browser/Windows checks. Eight new native PostgreSQL cases passed: both arrivals/race, mismatched existing pair and unchanged payment/stock/control, exact photos versus PDF source, reviewed-row IDs/value preservation/stale version, deletion protection, weak-match/pre-post block, legacy posting and actual order/document approval/concurrent single posting. These are isolated CI proofs, not real stock/Fresh/USER PASS. InitialCI38466745185 was2619/1/0: native alias refusal fixture captured next(error) but not direct HTTP409json. Fixture now captures the actual status and requires409/message plus unchanged one movement; production source unchanged, no assertion weakening.

Concurrent Inventory receiptPR2466/mainab45be17 changed only shared documentation/manual/PDF records, causing merge conflicts. Resolve by preserving all current main records plus this owned checkpoint and regenerate identical tracker PDFs. All19 owned runtime/test blobs remain exactly the tested head. Green final reconciliation CI and exact main/ordinary guarded healthy release still required before one ordinary authenticated Fresh reconciliation; selected Diadoxou SuperAdmin support session verified, no new login/key/role/grant or production data mutation. Current physical POS sale/cash values are observations only; fresh action baseline must precede merge. Broader09/Gate3/Task2/Inventory/QR/payment owners preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-invoice-pos-mydata-common-draft.md.

13/10/2026 — MYDATA-COMMON-DRAFT-03 / SOURCE IMPLEMENTED / AWAITING NATIVE CI AND LIVE

Same owner codex/invoice-pos-mydata-common-draft-20261013, sourcebranch feat/invoice-common-draft-20261013; published claimPR2462/headb422d995/CI38460973331 SUCCESS merged992df753 before source. Concurrent Inventory new-card source preserved on latestmaindcb82ef3. No scope transfer; owntask2 PDF origin and broader09/Gate3/payment/QR owners protected.

Implemented shared selected-store lock for draft creation/original acquisition, receipt attachment, legacy row intake, reviewed merge and both stock-posting routes. Exact VAT/store/company/type/series+zero-padded numeric number/date/amount can bind POS-first and myDATA-first/racing handoffs to the existing draft. Loose OCR number candidates block silent new payment/draft and open existing-POS review instead of creating another shell. Reconciliation preview is read-only; explicit original/MARK/reason and separately acknowledged actual payment difference required for mismatches. One canonical draft keeps both files/jobs and one reviewed rowset; second shell retained MERGED via audited aliases, hidden only from active list; stale alias writes refused. No deletion, concatenation of competing rows or financial correction. Both nonempty tables, multiple payments, deleted originals and already double-posted cases require review and do not mutate. Existing one-posted source stays canonical. Existing original amount/shift/actor/payment key remain unchanged. Fresh actual155.17 versus printed153.17 stays a visible+2.00 review item.

Persistent canonical source stock fence plus original posting/approved-document proof rejects a second stock update, including old pre-feature postings and cross-route/concurrent approval. Ordinary human finalization still uses existing stock/cost/ledger semantics once; new matching/merge does not post stock or submit payment. Direct document approval synchronizes linked order posting/status so the ordinary order path is idempotent. Legacy intake takes the same store lock and rejects stale common-source headers. Task2 source remains POS photos versus exact inbox PDF. Selected-store/tenant/roles/modules and current fiscal/learning/model/review guards unchanged.

Node20.20.2 complete local server suite2602tests/2557PASS/0FAIL/45nativeSKIP; production client build PASS and compiled TABLE_SERVICE verified. Actual mounted dialog proves required confirmations, visible2.00difference, retained typing/latest api, one POST and stale-store withdrawal; original/provider/payment-reuse/source-origin/scanner/permissions suites retained. Updated only old SQL fixtures for new DDL/store lock/candidate reads, preserving assertions. Native PostgreSQL unavailable locally (no server/container; package setup denied), so eight new native cases are NOT TESTED locally: both arrivals, mismatched existing pair, files/source origins, reviewed row preservation/version, deliberate deletion, weak-match/pre-post block, already-posted source, actual approval/order handlers and concurrency/control stock. Required native CI/build/invariants/HTTP/browser/Windows before green merge, exact guarded release, then ordinary authenticated Fresh preview and one reconciliation with fresh before/after cash/stock/payment/source controls. No production mutation, new provider/AI read/payment/stock/financial/fiscal/sync or historical replay by this page yet. No new manual/LAB/USER PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-invoice-pos-mydata-common-draft.md.

13/10/2026 23:57 Europe/Athens — INVENTORY-NEW-CARD-ONLINE-01 / SOURCE LIVE / LIMITED UI + LOOKUP PASS / CREATE AWAITING USER

Owner codex/inventory-new-card-online-20261013 retained for actual creation acceptance; no second owner or handoff. SourcePR2463 and CSS-only correctionPR2464 are released together at exactdcb82ef396a38123fb9b1cd92f65aaf4e0fe3e73. Correction head247218f43fe857470c9c7603d0404fa5549d4bbf/fullPRCI38464518237 SUCCESS2609/0/0 plus6backup/all required checks; exactmainCI38465362485 SUCCESS2609/0/0 plus6backup. GuardedRender38466086670/job115533183700 SUCCESS; final health20:53:53.642UTC/23:53:53Athens oktrue/exactdcb82ef/version0.22.0+kat-test-pos. Initial release305e5bb/main38462696819/guard38463257943 and its real grid failure preserved, now superseded only for the measured geometry. No manual deploy, production migration or fiscal change.

Fresh Chrome SuperAdmin support LAB/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ after explicit page navigation23:55–23:57: New item opens complete Basic/Barcodes/Supplier codes/Statistics/Purchases. Actual live description input48px (prior74px); barcode/preview block1127px across both columns, footer and switches visibly preserved. Screenshot visually inspected internally, not stored as a user file. All five tabs already traversed in initial release; no invented new-item history. User-photo5201399030219 again returns Sticks Με Γεύση Τρούφα Και Τυρί /3αλφα/Open Food Facts, with explicit apply and no silent prices/VAT/stock change. Earlier actual existing2900000000018/LAB EXCEL TEST2 denial and unsaved name application with VAT24 retained. LIMITED LIVE UI/lookup PASS only; source/browser geometry correction is complete. New product business save, financial/stock/Audit deltas in real LAB, physical scanner/mobile/other-role acceptance NOT TESTED; native PostgreSQL creation/replay/rollback proof is separately CI, never LIVE PASS.

No product/save/stock/payment/fiscal action or old transaction replay submitted. Final unsaved lookup draft is disposable UI only. Single next residual: owner normal new-item creation acceptance (or separately claimed measured virtual LAB save), with explicit correct selected store/fields and fresh before/after/control evidence for any agent business test. No repeat of existing purchases/payments/stock postings. Preserve prior SET and all other owners/PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-new-card-online.md; inventory manual records limited verified usage. Pending retains only creation/device acceptance for this owner, not completed implementation or grid work.

13/10/2026 23:35 Europe/Athens — INVENTORY-NEW-CARD-ONLINE-01 / SOURCE LIVE / LIMITED LOOKUP PASS / GRID CORRECTION AWAITING CI

Retained owner codex/inventory-new-card-online-20261013. SourcePR2463 finalhead1560c0c25d58f7721f170070e6aab3625fcdb068/fullPRCI38461623456 SUCCESS2609/0/0 plus6backup/all required build/security/licensing/native PostgreSQL/HTTP/browser/Windows. Original28bd source run38461137129 passed2609/0/0 but cancelled later when reconciling independent main docs; no runtime code changed in reconciliation and no failure erased. Merged/released305e5bb39fd5f4183d5bebc1d0344d9a37bc2d4a, exact mainCI38462696819 SUCCESS2609/0/0 plus6backup. Guarded Render38463257943/job115523635899 SUCCESS; logs20:32:21.485UTC show oktrue/exact305e5bb/version0.22.0+kat-test-pos after old revision waits. No manual deploy or production migration.

Actual fresh Chrome SuperAdmin support MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ23:33–23:35: full New item opens successfully with all requested fields/tabs and authenticated new options. Read-only lookup2900000000018 identifies existing LAB EXCEL TEST2 and offers no copy/apply. User-photo barcode5201399030219 returns Sticks Με Γεύση Τρούφα Και Τυρί / 3αλφα / Open Food Facts. Explicit apply copies the name into the unsaved draft; VAT remains24 and there was no product/save/stock/payment/fiscal write. LIMITED LIVE PASS of these two lookup outcomes and explicit unsaved name application only. Availability for all providers/products, new business save/control deltas and physical scanner/mobile acceptance NOT TESTED.

Live screenshot also exposes grid layout FAIL: the new div.wide barcode/preview block occupies one column because legacy spanning selector targets labels, stretching adjacent description. One additive rule .ia-form-grid.edit>div.wide{grid-column:1/-1} places that new block across both columns; existing label card and SET geometry unchanged. CSS-only correction local build PASS/fullCI/main/exact release and real geometry retest pending; whole visual/create scope stays OPEN/AWAITING USER. Manual records only the limited observed lookup. No financial/stock action/replay. Single next action: green correction CI/exact release then fresh modal geometry; owner retained.

13/10/2026 — INVENTORY-NEW-CARD-ONLINE-01 / SOURCE READY / AWAITING FULL CI AND USER

Owner codex/inventory-new-card-online-20261013 retained. Explicit push/merge approval13Oct23:04; claimPR2461/head9a18a583/docsCI38460097168 SUCCESS merged52808204 before source. Inventory New item now opens the same full existing card with basic fields, dependent taxonomy, brand selection, unit/capacity, retail calculations, staff/delivery prices, discounts, stock flags, editable barcode rows and supplier codes. Statistics/purchases have no invented history; SET/recipe associations explicitly require first saving the parent. Existing edited-product paths and completed SET picker remain unchanged.

New selected-store create route persists full Product/card/barcode/supplier/StoreProduct/opening stock movement/Audit in one transaction, validates company/store/category/subcategory/brand/supplier ownership, rejects duplicate SKU/barcode and uses a request identity/fingerprint for once-only retry. No two-step product-then-card/stock partial creation. Existing old/new and smart-entry creation APIs unchanged. Optional store query on existing lookup validates selected store/bound context. Explicit online preview/apply reuses local/Master/Open Food Facts lookup; does not guess prices/VAT/stock or auto create taxonomy/brand. Old barcode/store/unmounted lookup responses are discarded; existing company product reports duplicate instead of copying.

Local Node24 actual mounted UI/store change/stale barcode/explicit apply/single-submit and transaction adapter/foreign scopes/replay/late failure checks plus preserved card/SET/supplier regressions28PASS/0FAIL/1nativeSKIP. Frontend production build PASS/TABLE_SERVICE retained. Added native isolated PostgreSQL full-field readback/replay/late-check-failure rollback and control counts; local isolated DB unavailable so native NOT TESTED locally. Required full Node20 CI/build/native/HTTP/browser/Windows/main/exact healthy guarded release and actual UI/readback acceptance pending. No real-store or LAB product/stock/payment/fiscal writes for diagnostics; no new manual or business PASS.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-new-card-online.md. Single next action: green full CI/merge/exact release, then bounded actual UI/lookup acceptance without saving a real-store diagnostic product. Protected other owners/PASS unchanged.

13/10/2026 23:03 Europe/Athens — MYDATA-COMMON-DRAFT-03 / ASSIGNED / USER duplicate-draft FAIL

Independent εργασία3 owner codex/invoice-pos-mydata-common-draft-20261013, branch fix/invoice-pos-mydata-common-draft-20261013; user explicitly asks POS↔myDATA one common draft, both photos/PDF, only one stock posting, including existing duplicate drafts. No transfer of broader09/Gate3/QR/payment-correction owners; own task2 remains SOURCE LIVE/AWAITING USER. Baseline main52808204 (concurrent Inventory new-card claim preserved), exact live sourcec747a238; source claim must merge green before changes or mutations.

Read-only production evidence13Oct23:04–23:10Athens, selected Diadoxou storecmulmjjoc000qqlbf2bn2ifj0: FRESH SNACK AE/VAT999162880, same original12Oct2026/21-TΔA6836/MARK400015624303633. Actual stored photo5b9c1b35 and originalPDF8c140da7 visually/textually agree on date, identity and153.17payable. Existing POSorder60bd0608/sourceDocb538b9f2 isNEW/DRAFT/0lines but wrong stored2023date/21-1AA006836/155.17; myDATAorderb9ba143f/sourceDoc19d50bc3 isNEW/DRAFT/0lines with correct2026date/21-TΔA6836/153.17. POSjob6811bcf8 and originaljob6bf7858e distinct; POSrawText empty. One existing active SUPPLIER_PAYMENTpay_4a1dcf.../155.17, allocations0; neither order has PurchaseOrderPosting. Thus same printed invoice confirmed, but recorded payment differs by+2.00. No new invoice/AI read/payment/stock action; financial and full-stock baseline still required before any reconciliation mutation.

Bounded design: one canonical invoice/draft binding with preserved original jobs/attachments/payment and explicit audited aliases for superseded drafts, never delete evidence or concatenate physical lines. Exact supplierVAT/company/store/type/full-series-number/date/amount can auto-link for either arrival order; uncertain OCR/date/series/amount candidates require review, not silent financial correction. Existing same-invoice duplicates get preview plus idempotent guarded reconciliation; preserve reviewed rows, block competing populated-line conflicts and previously double-posted records for separate review. Source origin task2 remains: POS photos, myDATA that record’s PDF. Canonical alias and source/identity guards reject a second stock post and stale writes, including concurrent attempts. Matching/merge never submits payment or updates stock; actual posted originals cannot be replayed. No OCR/model change or new service. Fresh actual+2payment discrepancy must stay visible and original movement/shift/actor/amount unchanged.

Required native isolated PostgreSQL/actual-handler/mounted tests: POS-first,myDATA-first, leading-zero punctuation identity without fuzzy series acceptance, wrong supplier/store/company/number/date/amount, existing pair, files/row preservation, replay/concurrent merge and single posting, rollback/deleted draft, payment controls and exact source origins. Full CI/main/guarded exact healthy release, then ordinary authenticated preview/reconciliation of the confirmed Fresh pair with before/after audit/stock/cash controls; no real stock posting solely for evidence. Missing access is recorded, never bypassed. Existing typed fields/manual Gates preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-invoice-pos-mydata-common-draft.md.

13/10/2026 22:36 Europe/Athens — INVENTORY-NEW-CARD-ONLINE-01 / ASSIGNED / NOT TESTED

Owner codex/inventory-new-card-online-20261013; claim branch docs/inventory-new-card-claim-20261013, source feat/inventory-new-card-online-20261013. Explicit owner images show compact Inventory Archive New item and request the full existing product card plus online barcode lookup. Independent creation UI scope, preserve completed SET picker/geometry and retained other owners. Read current AGENTS/current tracker/active/pending/manual, main69ecd99 and actual archive/smart-entry flows. Existing create has only name/SKU/barcode/category/retail/cost/VAT/opening stock and existing edit contains full taxonomy/company/unit/capacity/prices/discounts/barcodes/supplier codes/flags. New full creation and online lookup NOT TESTED.

Reuse full card field rendering where safe. Online lookup uses existing authorized barcode endpoint with explicit selected-store context, manual preview/apply, request-generation protection and no auto save, guessed VAT/prices/stock or duplicate product creation. Creation must persist the supported full fields coherently with existing guards and store scope; no two-step partial product creation or unbounded business writes. Existing barcode ownership, VAT/register, role/license/company isolation, price and stock audit preserved. SET/recipe child relations and history require persisted product identity; no provisional ID writes. No real store product/payment/stock/fiscal changes for diagnostics. Claim published green on main before source. Require focused mounted/server isolated tests, build/full CI, exact guarded release and user acceptance; no CI-only PASS.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-new-card-online.md. Single next action: publish claim then bounded implementation. Existing other owners and qualified PASS retained.

13/10/2026 22:33 Europe/Athens — MYDATA-ASSISTANT-PDF-02 / SOURCE LIVE / AWAITING USER

Owner codex/mydata-assistant-pdf-20261013 retained only for this independent εργασία2 source-selection acceptance. ClaimPR2458/head227aa197/CI38452370767 SUCCESS mergede7ce9f6a before code. SourcePR2459/head2b65264aa31b6be7938351e8185a46d6ff1b2010/fullPRCI38453988087 SUCCESS mergedc747a238618d71170fa2c3756aa5fe50ba17e287; exactmainCI38454753482 SUCCESS. Both full2598PASS/0FAIL/0SKIP plus6backup-fault tests and required native/HTTP/browser/Windows/build/invariants checks. Nine owned source/test blobs match tested head byte-for-byte on merge. Native PostgreSQL exact inbox/original/job/draft/store/company relation and no-write snapshot PASS; real production-handler synthetic two-page display/provider-byte test and mounted Inbox/POS/context/stale tests PASS. These are isolated CI proofs, not real PDF-reading USER/LAB PASS.

Ordinary guarded Render38455372827/deployjob115496700014 SUCCESS; pinned trigger22:31:06Athens, providerdeploydep-db78dunavr4c73fb309g LIVE22:32:58Athens on exactc747a238. Guard logs22:33:09Athens independently record /api/health ok=true/version0.22.0+kat-test-pos/revisionc747a238 and exact-revision success. Rollback artifact11842895546 preserves previous healthy28050078. No manual deploy/guard bypass/new service/key/grant. This establishes SOURCE LIVE, not user acceptance.

Delivered: from selected-store myDATA inbox Έλεγχος, same existing draft assistant opens automatically using that exact original PDF for both viewer and AI input. Ordinary POS/default assistant keeps submitted photos. Exact missing/deleted/nonPDF/processed/foreign/mismatched record refuses without photo fallback; existing BackOffice modules/roles, draft/job/payment identity, multipage viewer, printed-review/apply safeguards protected. Retained source context is immutable; wrong-origin window is replaced and late previous-source/store responses ignored. No production invoice/payment/stock/fiscal/myDATA sync or historical transaction replay by this page. No new manual PASS inferred. Broader09/Gate3/QR/payment owners remain unchanged; SET UI/search USER PASS closed and publishedPR2458.

Single remaining acceptance: refresh BackOffice, select the intended store, open an existing unprocessed myDATA entry with available original and press Έλεγχος από βοηθό AI. Confirm assistant shows that entry’s PDF and review uses it; no new POS upload or new payment is needed. Do not reapply/pay/finalize an already accepted invoice for evidence. Wrong/missing original should show the explicit refusal. Physical browser/client SHA, actual provider extraction accuracy, all roles/devices and financial/stock effects NOT TESTED. Keep this independent assignment until owner confirmation or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-mydata-assistant-pdf.md; receipt publication is documentation-only with green CI/merge required.

13/10/2026 — MYDATA-ASSISTANT-PDF-02 / SOURCE READY / AWAITING FULL CI AND USER

Same owner codex/mydata-assistant-pdf-20261013, source branch fix/mydata-assistant-pdf-source-20261013; claimPR2458/head227aa197/CI38452370767 SUCCESS merged e7ce9f6a before source. SET limited USER PASS/manual/pending closure published in that same green claim; existing09/Gate3/QR/payment and concurrent owners unchanged.

myDATA Έλεγχος passes exact inboxId/selected store through existing purchase-order navigation and auto-opens the existing assistant. Both source GET and preview POST use immutable identical context. Server joins exact myDATA inbox→original PDF→same-company/store AI job→same active draft document/order; wrong/deleted/missing/nonPDF/processed or nonmatching context refuses without POS-photo fallback. Context requires BackOffice manager and existing AI_READER/DOCUMENTS/INVENTORY modules. Ordinary POS/default opening still uses original receipt/photo priority unchanged. Existing PDF multipage viewer and provider input_file consume identical original bytes; no OCR model/server prompt/review/apply economics changes. Retained assistant switches source origins instead of restoring an old-source window; late detached responses cannot populate the new window. Inbox/store navigation rejects late previous-store responses. Existing acquisition/draft reuse and explicit human-only application remain.

Node20 focused42tests:41PASS/0FAIL/1nativePostgreSQLSKIP locally; actual handler synthetic two-page PDF proves identical displayed/provider PDF with no input_image and module/role/context refusal; mounted Inbox+assistant tests prove exact event/query/body context, automatic review, original POS photos, source-window restore and stale rejection. Existing idempotency/receipt/original/page-review/manual-transfer/permission/minimize/actual POS cart suites passed. Initial fixture failures due auto-preview timing and missing DOM CustomEvent were corrected without weakening behavior. Native selected-store relational SQL/no-write snapshot test awaits isolated CI PostgreSQL; no local native or real USER/LAB PASS inferred. Frontend build PASS before final source publication. No production data read/write, new acquisition/review/payment/stock/fiscal/sync, no accepted transaction replay. Required full PR/main CI and ordinary guarded exact healthy release, then one owner source-only check from an existing myDATA record; do not reapply/pay/finalize completed invoices.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-mydata-assistant-pdf.md.

13/10/2026 22:02 Europe/Athens — MYDATA-ASSISTANT-PDF-02 / ASSIGNED / USER source-selection FAIL

Owner codex/mydata-assistant-pdf-20261013, branch fix/mydata-invoice-assistant-pdf-20261013. Explicit user εργασία2: POS draft assistant keeps submitted photos; Έλεγχος from a specific myDATA inbox record must open and read that record’s original PDF. Independent source-selection/navigation subtask only; tracker09 codex/mydata-completion-20261006, Gate3 accepted evidence, invoice QR/payment and all other assignments preserved. No broad ownership transfer. Baseline maina6d4d826; observed source currently prioritizes job.mydataPosReceipt attachmentIds even when opened from myDATA. No real new PDF/assistant/financial acceptance: NOT TESTED.

Bounded change: propagate authenticated selected-store/inbox context to BOTH assistant source and preview; server verifies exact inbox/original/job/purchase-document/order linkage and PDF, with no fallback to POS photos on invalid/missing context. Preserve default POS photos, same draft/payment/job, PDF multipage review, role/module/tenant checks, idempotency and human-only apply. No OCR/model/prompt/accounting/stock/payment/fiscal/myDATA synchronization changes or replay of accepted invoices. Claim must merge green before source. Required isolated regression: same-order different origins, matching PDF display/provider bytes, foreign/mismatched/missing/deleted/nonPDF rejection, stale store/navigation/window context, default POS unchanged. Full CI/main/guarded exact release before owner read-only acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-mydata-assistant-pdf.md.

13/10/2026 22:01 Europe/Athens — INVENTORY-SET-SEARCH-01 / CLOSED / scoped USER PASS

User «EINAI OK» at22:01:14Athens directly confirms delivered SET search and larger readable editor. Scope: owner-reported appearance/search only; sourcePR2452/mergec491616, verified exact guarded LIVE5279a9238796f5f1ed7aef7811cc68112a82a1db at21:31:58Athens, full mainCI38446403563 SUCCESS2588/0/0 plus6backup tests, release receiptPR2455/main250ec97. User physical browser SHA/store/query/device not independently captured. No relation save/delete, quantity/price/stock/financial/POS/recipe acceptance inferred. Own UI/search subtask closed, wider inventory/numbered scopes and POS-CATALOG recognition remain unchanged. No business action/replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-set-search.md; manual updated and own pending scope removed.

13/10/2026 21:32 Europe/Athens — INVENTORY-SET-SEARCH-01 / SOURCE LIVE / AWAITING USER

Retained owner codex/inventory-set-search-20261013; source PR2452/head6ac72adf93f91446224cb3d898e00fd6f045d212/fullCI38445066657 SUCCESS2583PASS/0FAIL/0SKIP plus6backup-fault tests and all required checks, mergedc491616005174c7cace1be6b46d7219b508ea2da. ClaimPR2450/docsCI38443776196 merged33dfdd73 before source. Local Node20 mounted picker/card/archive21PASS and client build PASS. Mandatory synthetic actual-card Chromium checks1280x800/1024x768/800x600 verify viewport-bounded modal/visible footer/48px search/eight results and one explicit p0 association POST/readback with unchanged quantity1/optional priceNULL. Artifact11837503828;1024PNG independently viewed. These are synthetic source checks, not real saved relation/stock/payment or USER PASS. Compact viewports may scroll the composition body/results internally while footer remains visible.

Original exact main CI38445968099 attempt1 ran2583PASS but failed existing POS-header Chromium Target.createTarget startup timeout; failed-job-only rerun requested, no code/test weakened. It is not the basis of release. New current main5279a9238796f5f1ed7aef7811cc68112a82a1db (other owner's independent assistant correction) fullCI38446403563 SUCCESS2588PASS/0FAIL/0SKIP plus6backup tests and mandatory SET browser check. All eight owned client/test/E2E/workflow blobs exactly unchanged from tested SET source to that descendant. No takeover or repeated other-owner acceptance.

Guarded Render38447150033/deployjob115468472453 SUCCESS; pinned5279a923 at21:29:55Athens, providerdep-db77h8vavr4c73f93vh0 LIVE21:31:45, guard logs21:31:58 explicitly healthok=true/revision5279a923 and exact success. SOURCE LIVE established; actual user's SET appearance/search/selection remains AWAITING USER. No production product/set association/stock/payment/fiscal write by this page, no new manual PASS or closure of wider Inventory/POS/No33 owners.

Released UI: Inventory product card → SET now searches selected-store ACTIVE products by name/SKU/barcode with25-row paging instead of choosing from5000company candidates. Parent excluded, explicit chosen ID and delayed query/store/parent rejection, reset on card/store/save; existing POST/upsert/delete/Audit/quantity/optional price, recipe and POS semantics unchanged. SET-only larger responsive editor/readable rows and controls; other tabs retain original sizing. Single next action: owner refreshes BackOffice after handling any unsaved edits, opens intended existing product SET, searches name/SKU/barcode and confirms the larger view and correct selected-store result. No real relation save is required for visual/search acceptance; do not repeat an existing association solely for evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-set-search.md.

13/10/2026 — INVENTORY-SET-SEARCH-01 / SOURCE READY / AWAITING FULL CI AND USER

Retained owner codex/inventory-set-search-20261013; source branch feat/inventory-set-search-20261013. ClaimPR2450/headb06c6863/docsCI38443776196 SUCCESS merged33dfdd73 before source. SET dropdown replaced by explicit selected-store ACTIVE Inventory archive search (name/SKU/barcode),250ms debounce,25-row paging, excluded parent ID and explicit result selection. Query/page/store/parent changes discard old responses; selected ID resets when card/store changes or save clears the draft. Existing SET POST/upsert/delete/quantity/optional price/Audit and recipe/POS code unchanged.

Only SET product-card modal gains viewport-bounded1480px/850px maximum size, larger17px fields/rows and48px controls; footer/tabs remain visible, association rows/search results scroll internally where needed. Other card tabs retain prior sizing. Local Node20.20.2 mounted delayed-response/store/page/self/selection/clear/error checks plus prior card/archive regressions21PASS/0FAIL; frontend production build PASS. Browser missing locally and official download unavailable; no local pixel or physical PASS. Added mandatory Chromium CI geometry and actual selected-ID submit/readback fixture at1280x800/1024x768/800x600, with preserved artifacts. It uses synthetic data only; no production relation/stock/product/payment/fiscal write.

Full CI/browser checks, exact main/guarded deployment and owner's real visual/search acceptance remain pending; no manual PASS, no claim of changed composition business rules. Existing owners/PASS and POS catalog release retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-set-search.md.

13/10/2026 21:00 Europe/Athens — INVENTORY-SET-SEARCH-01 / ASSIGNED / NEW UI REQUEST

Owner codex/inventory-set-search-20261013; claim branch docs/inventory-set-search-claim-20261013, intended source feat/inventory-set-search-20261013. Owner screenshots request Inventory → product card → SET: search to find the related product and a larger readable window/table. Independent SET picker/geometry scope only; no takeover of existing Inventory-free-count, POS/scanner/catalog or No33 owners. Existing SET save/upsert/delete/Audit, quantities/optional price, recipe and POS linked-item behaviors protected. New search/physical size acceptance NOT TESTED, no functional PASS.

Read current main908b24dd, AGENTS/current shared lists, composition source/card regression and product-flags checkpoint. Existing dropdown reads composition.candidates capped5000company items and lacks query. Use existing authorized Inventory archive read endpoint with explicit selected store, ACTIVE status and name/SKU/barcode query, paging and stale-response guards; exclude parent ID and require explicit selection. Enlarge only SET product-card modal within viewport, keep visible tabs/actions and accessible field/result sizes. No server/schema/auth/license/stock/payment/fiscal/recipe behavior or real product relation write for diagnostics. Publish claim green on main before source; then mounted delayed query/store/parent/clear/selection checks, frontend build/full CI/main/exact guarded release and owner visual/search acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-set-search.md.

13/10/2026 18:57 Europe/Athens — POS-CATALOG-COMPLETE-01 / SOURCE LIVE / AWAITING USER

Owner codex/pos-catalog-complete-takeover-20261013 retained for actual recognition acceptance. Claim/handoff #2443 merged08dfa9e6 before source. Source PR2448 finalheadaa7360595fe8f82d3bd335a454841bce86aee76c, full PR CI38424717265 SUCCESS and mergee8adebda6610319e87bdadd42c5a7021b09c8810; exact main CI38425518038 SUCCESS. Both full suites2581PASS/0FAIL/0SKIP plus6backup-fault tests and required native/HTTP/browser/Windows/build checks. Native actual-handler26656catalog test PASS5.25s on PR, with active/company/store exclusions, tail barcode, master ownership/ambiguity, numeric prices and unchanged StoreProduct snapshot. Original source three cardinality regressions FAIL; corrected local23PASS/0FAIL/1nativeSKIP. Earlier failed native fixture expectation is superseded by successful rerun; runtime change remains solely three terminal LIMIT removals.

Guarded Render workflow38426071226/deployjob115395761678 SUCCESS. Pinned trigger18:55:15Athens; provider deploydep-db758oqj9qps73b86te0 LIVE18:56:54Athens on exacte8adebda. Guard logs18:57:07 explicitly record health ok=true/revisione8adebda and exact-revision success. This establishes SOURCE LIVE, not user scanner/financial/stock PASS. Rollback artifact11829080531 retains prior healthy555f02c1. Two source blobs plus test match the tested PR exactly on merge; other owners/Inventory release preserved.

Actual read-only production diagnosis18:41Athens: selected Diadoxou storecmulmjjoc000qqlbf2bn2ifj0, existing active product8a831d45-2196-4231-b53b-862fd611a85a/SKU948/ΜΠΙΣΚΟΤΑ ΠΟΛΥΔΗΜΗΤΡΙΑΚΑ ΜΕ MUESLI 160ΓΡ/barcode5201004022158, catalog rank5017 of6638active eligible items. The previous5000cap excluded this actual product. Central source now returns complete active selected-store catalogs without changing membership/order/layout/prices/VAT/barcode ownership or fiscal/payment/stock logic. Expected larger initial payload; physical latency unmeasured. No production sale/payment/product activation/duplicate creation/stock/layout/fiscal action by this page.

Single next user acceptance action on existing POS/shift with empty cart: use POS Ανανέωση once, wait for catalog loading, scan previously missing existing barcode5201004022158 and verify the intended SKU948 appears once in the cart. Do not create a new product or complete a diagnostic sale. Remove the temporary cart item afterward. Scanner recognition/cart and device behavior AWAITING USER; no new manual PASS or closure of wider numbered03/04/performance/scanner owners. Preserve08Oct category response USER PASS and11Oct CSV scanner USER PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-pos-catalog-complete.md.

13/10/2026 18:41 Europe/Athens — POS-CATALOG-COMPLETE-01 / ROOT CAUSE CONFIRMED / AWAITING CI

Read-only Render PostgreSQL query for selected Diadoxou store cmulmjjoc000qqlbf2bn2ifj0: barcode5201004022158 maps to product8a831d45-2196-4231-b53b-862fd611a85a/SKU948/ΜΠΙΣΚΟΤΑ ΠΟΛΥΔΗΜΗΤΡΙΑΚΑ ΜΕ MUESLI 160ΓΡ. Product and StoreProduct active=true; exact existing catalog ORDER BY ranks it5017 of6638eligible rows. Thus the deployed5000cap excludes the actual reported product. This supersedes earlier candidate/rank NOT TESTED diagnosis only; no production data write or scan/user PASS.

Original-source regression reproduces three catalog cardinality failures; corrected-source Node20 local targeted23PASS/0FAIL/1nativeSKIP, frontend/server build PASS. First full CI38423819427:2580PASS/1new fixture expectationFAIL/0SKIP. Native legacy resolver legitimately resolves the unclaimed master alias on two fixture products, so scanner returns null. Test expectation corrected to preserve that ambiguity rejection while current primary catalog still resolves the unique alias and all three variants resolve the actual direct tail barcode. Runtime source remains unchanged after the three LIMIT removals. Full rerun/native release/user acceptance pending; do not merge or deploy until green. Owner/branch retained.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-pos-catalog-complete.md.

13/10/2026 — POS-CATALOG-COMPLETE-01 / SOURCE READY / AWAITING FULL CI AND USER

Owner codex/pos-catalog-complete-takeover-20261013; implementation branch fix/pos-catalog-complete-source-20261013. Explicit handoff/claim PR2443 headfb507d8e/full documentation CI38422895327 SUCCESS merged08dfa9e6 before source. Bounded causal correction removes only terminal 5000/10000 limits from the three existing selected-store POS catalog queries. Eligibility, ordering, layout/version/access, direct/master barcode ownership exclusions, prices/VAT/sets and scanner/fiscal/stock/payment logic unchanged; no activation or duplicate Product creation. Larger initial payload is the expected tradeoff; physical latency remains unmeasured.

Node20.20.2 local actual-route/26656 fixture, indexed scanner and catalog resolver checks14PASS/0FAIL/1nativeSKIP; frontend build/server preparation PASS. Added isolated PostgreSQL actual-handler regression26656 eligible products plus inactive/disabled/foreign/control rows, tail barcode5201004022158, aliases/claimed exclusion, numeric prices/barcode overrides, published layout order and unchanged StoreProduct snapshot. Local PostgreSQL unavailable, native test NOT TESTED locally; full native CI/main/guarded exact release and actual non-sale device recognition remain pending. Latest user FAIL retained; no real sale/payment/product/stock/layout/fiscal or migration mutation. No new manual PASS.

Render read-only13Oct18:34Athens confirms latest service deploydep-db74tuui0phs738jdno0 LIVE on555f02c1 (other owner's bounded startup repair); this POS correction is not deployed. Preserve08Oct category-response USER PASS,11Oct CSV/barcode scanner USER PASS and all other owners. Single next action: full CI/native regression, green merge/main and guarded exact healthy release, then ordinary recognition of previously missing existing barcode without sale. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-pos-catalog-complete.md.

13/10/2026 18:35 Europe/Athens — INVENTORY-FREE-COUNT-01 / STARTUP FIX / SOURCE LIVE / AWAITING USER

Same owner codex/inventory-free-count-20261013 retained for actual acceptance. Original free inventory PR2442 plus startup correctionPR2446 are released together at exact555f02c1e9540976f755ebf5708223a6c29c8843. Startup claimPR2445/head737e72a documentation checks SUCCESS merged636122b before source. Correction head e5e8a4a703f5554e3ef2e694da87f94bac4e842b/fullPRCI38421395026/job115379504826 SUCCESS2577serverPASS/0FAIL/0SKIP plus6backup tests/all required build/security/licensing/nativePG/HTTP/browser/Windows checks. Exact mainCI38422194573 SUCCESS; ordinary guarded Render38422818719/job115384419333 acknowledged pin18:32:12Athens and observed exacthealthy18:34:04Athens, version0.22.0+kat-test-pos. This supersedes the previous failed1e7456e release, never erases it.

Independent public read at18:35:23Athens confirms oktrue/exact555f02c and served index-B7qzhp8d.js plus its imported bundle contains all3labels: Νέα απογραφή / Συνέχεια ως ελεύθερη απογραφή / Καταχώρηση απογραφής. This is exact SOURCE LIVE/served asset proof, not authenticated desktop/mobile interaction, actual stocktake posting or general financial/fiscal PASS. No real-store conversion/count/finalization/payment or replay was submitted by this page. No new business/manual PASS.

Root cause evidenced by owner's Render screenshot: old repaired-state guard hardcoded565, actual567/567/0 exited before server startup. Changed only canonical no-op recognition to total===zeroCount with other0 and verified zero-rate/register1/code12; exact legacy585/565/20repair and expected20write rollback, standard24check, mixed/wrong mapping rejection and all fiscal scopes remain unchanged. Node20 actual-script isolated adapter4/4PASS covers565/567/0/1/1200 no writes, missing company/departments, wrong mapping and exact legacy rollback. Real production mapping/DB deltas are not independently read; do not infer universal fiscal or zero-write DB acceptance from healthy startup.

Owner next action: Ctrl+F5. Existing DRAFT: Συνέχεια ως ελεύθερη απογραφή, deliberately confirm, verify previously counted products/quantities preserved, review then Καταχώρηση απογραφής. New work: Νέα απογραφή, selected store, Έναρξη, scan arbitrary products/quantities and stop when ready; only measured items including explicit0 are finalized, NULL items unchanged. Existing recount requirements on an old draft remain and are not waived. Mandatory actual before/after/control evidence applies to any agent LAB posting; no old posting is replayed for documentation. Physical scanner/mobile/actual posting acceptance remains AWAITING USER, same owner until acceptance/named handoff. Render plugin installed status confirmed, but no callable Render capability was exposed in this runtime; screenshots and existing pinned workflow resolved the bounded cause. No further installation is needed for this completed source release.

Checkpoints CHECKPOINTS/CHANGES/2026-10-13-inventory-free-count.md and CHECKPOINTS/CHANGES/2026-10-13-diadoxou-vat-startup.md. Prior N39/TODAY07/Diadoxou fiscal and other owners/PASS preserved. Single next dependency: owner's actual free inventory result; wider fiscal/security/device scopes remain independent.

13/10/2026 — POS-CATALOG-COMPLETE-01 / EXPLICIT OWNER HANDOFF / ASSIGNED

ΑΝΑΛΗΨΗ ΑΠΟ codex/pos-catalog-complete-20261013 (stalled Work conversation) — ASSIGNED codex/pos-catalog-complete-takeover-20261013, retaining existing branch fix/pos-catalog-complete-20261013 and claim PR #2443. Owner explicitly instructed «ΑΝΕΛΑΒΕ ΕΣΥ» in the receiving conversation. No second implementation: original PR contains documentation only; resolve its conflicts against current main, preserving all other owners and historical PASS. This supersedes the previous conversation for this bounded scope.

Latest USER FAIL retained: Inventory finds barcode 5201004022158, POS does not; online creation rejects existing barcode. Source confirms catalog truncation at 5000 (older store-pos variant 5000/10000); actual missing product rank NOT TESTED. Preserve tenant/store/active eligibility, price/VAT/barcode/master exclusions, published layout order, scanner ambiguity/focus, category responsiveness USER PASS 08Oct and all financial/fiscal guards. No sale/payment/stock/product/layout or production data mutation. Publish handoff/claim green on main before source; then remove only catalog cardinality truncation with actual-route isolated PostgreSQL regression beyond 10000, full CI/guarded exact release and non-sale barcode acceptance. No new functional PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-pos-catalog-complete.md.

13/10/2026 — POS-CATALOG-COMPLETE-01 / ASSIGNED / USER FAIL

Owner codex/pos-catalog-complete-20261013; branch fix/pos-catalog-complete-20261013. User explicitly prioritizes central correction: barcode5201004022158 is found in selected Diadoxou Inventory but POS says absent; online creation rejects existing barcode. Multiple products affected. No sale/payment/product/stock change performed. Current healthy production/main fe196aacb942de03e4e41b54911144049612eddd verified by public GET. Source catalog routes truncate active selected-store products at5000 while scanner searches only the returned catalog. This is a confirmed source defect and a candidate explanation for the pictured failure; exact product rank remains NOT TESTED.

Independent bounded server catalog completeness regression, not takeover of retained wider performance/scanner owners. Preserve active company/store membership, prices/VAT/barcode aliases/master exclusions, published layout order, scanner ambiguity/focus and all fiscal/financial gates. Read current tracker/checklist/pending/active/manual and relevant catalog/CSV/scanner checkpoints. Next: publish this claim green on main before source; implement a scoped complete catalog retrieval with regression beyond5000 products and tenant/inactive exclusions, required full CI/exact guarded deploy, then ordinary barcode recognition acceptance. No real sale or stock mutation for diagnosis. Existing PASS/owners preserved. Central correction applies across stores; no auto-activation or duplicate Product creation. Acceptance OPEN/AWAITING LAB.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-pos-catalog-complete.md.

13/10/2026 — INVENTORY-RELEASE-VAT-STARTUP-01 / SOURCE READY / AWAITING FULL CI

Same owner codex/inventory-free-count-20261013. ClaimPR2445/head737e72a089500138e9e25537d4fbe6b00b328293 documentation checks SUCCESS merged636122b7b5278870d1a5f3ac9d0c93803cc25079 before source. One bounded predicate correction: already-repaired zero-rate tobacco department/register1/code12 returns without writes when every associated product remains tobacco/VAT0, regardless of historical count565. Exact old585/565/20 guarded repair, standard24verification, SQL writes/expected20rollback and wrong/mixed mapping rejection unchanged. No new schema/start/fiscal/catalog/rate business change.

Node20 actual script execution with isolated transaction adapter4tests PASS/0FAIL: canonical565/567/0/1/1200 no writes, absent company, missing/wrong standard, mixed membership/wrong rate/register/code, exact legacy repair and19instead20 rollback. This is simulated adapter regression, not a production DB repair or fiscal PASS. Owner screenshot remains real failed1e7456e startup evidence. Required fullCI/exact main/guarded deployment/healthy source and free inventory acceptance pending. Render installation now confirmed by plugin status but no callable Render capability exposed in this runtime yet; supplied actual logs are sufficient for this bounded cause. No real payment/stock/fiscal/VAT write by this page.

Single next action: green full CI and ordinary guarded release of this correction; verify exact healthy revision before asking owner to refresh and use existing draft. Other owners and all previous protected PASS unchanged. No new manual PASS.

13/10/2026 18:14 Europe/Athens — INVENTORY-RELEASE-VAT-STARTUP-01 / ASSIGNED / OBSERVED DEPLOY FAIL

Owner codex/inventory-free-count-20261013; independent source branch fix/diadoxou-vat-startup-20261013. Owner supplied Render deploy/log screenshots identify failed1e7456e and runtime repair-diadoxou-vat.js:30 unexpected data567/567/0/no changes made, Node20.20.2,13:51:14Athens. This establishes the bounded startup failure; no provider authentication workaround required. Original free inventory PR2442/mainCI2573PASS stays merged, not live. Claim published green before source.

Bounded correction only already-repaired no-op recognition: correct zero-rate tobacco department/register1/code12 and every currently associated product classified tobacco/VAT0, independent of historical565product cardinality. Preserve exact legacy585/565/20 guarded repair eligibility and expected20write rollback, standard24department verification, wrong/mixed/rate/code/register fail-closed rejection and other companies. Do not change actual product/VAT/register values, catalog membership, fiscal commands, schema, start command or global error handling. Existing Diadoxou fiscal profile8Oct and other owners retained.

Current screenshot real DEPLOY FAIL. New source/local/native/live NOT TESTED; no real stock/payment/fiscal or production DB write performed. Require tests executing actual script with absent company, canonical565/567/0/other totals, exact old repair, mixed classification/wrong department/register/code and write-count mismatch; require full Node20CI/main and exact guarded deployment before real acceptance. Single next action: merge this claim, then one no-op predicate correction and regression tests. Whole free inventory remains AWAITING RELEASE/USER. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-diadoxou-vat-startup.md.

13/10/2026 14:05:36 Europe/Athens — INVENTORY-FREE-COUNT-01 / MERGED / FULL CI PASS / DEPLOY BLOCKED

Owner codex/inventory-free-count-20261013 retained, awaiting exact release and user acceptance. Source PR2442 finalhead9cbf2c24f65680b868c91342893df9ce13f1897a merged1e7456e51ed498d2c878fdd57be20a0156848f54. Full PR CI38384898488 and exact main CI38385396759 SUCCESS:2573server tests PASS/0FAIL/0SKIP plus6backup-fault tests and required build/security/licensing/isolated PostgreSQL/HTTP/browser/Windows checks. Earlier CI38380395565 had2572PASS/1old exact-query-contract FAIL; updated assertion requires the exact counted-only predicate and existing ordered locks, without runtime weakening. Node20 local23PASS/0FAIL/1nativeSKIP independently recorded; local native absence is not a database PASS.

Render guarded workflow38385942559/job115257696924 passed preflight and acknowledged pinned trigger at13:49:36Athens. Exact revision wait FAILED14:04:50Athens after90health checks; every recorded response was oktrue/previousfe196aacb942de03e4e41b54911144049612eddd. Guarded workflow conclusionFAILURE, not SOURCE LIVE. Rollback checkpoint artifact11804903631 preserves the previous healthy revision. Provider build/queue/logs remain unavailable; no root cause is inferred from deployment timeout alone. No exact source LIVE or user/device PASS yet. Provider build/queue/failure cause unavailable and unconfirmed; no repeat deploy/restart/credential/provider/DB/schema change performed. Existing real draft/count/stock/payment data not operated on by this page.

New source flow: one Νέα απογραφή, scan arbitrary selected-store items, explicit zero supported, stop and Καταχώρηση απογραφής affects only measured lines. Existing DRAFT offers confirmed Συνέχεια ως ελεύθερη απογραφή, preserving counts/version/events. Legacy FULL/PARTIAL and existing recount requirements remain strict; FREE parent-locked once-only finalization and scoped live-movement/ledger protections verified in isolated CI, not real-store posting. Real user acceptance remains OPEN, no new manual PASS. Single next action: owner installs/connects the available Render integration (currently unconnected), then this owner inspects the existing pinned deploy status/logs and resolves the release cause before any retry. Only after exact healthy1e7456e/served UI may the owner Ctrl+F5 and explicitly convert the existing draft with counted readback before actual finalization. Never repeat a prior posting for evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-free-count.md.

13/10/2026 — INVENTORY-FREE-COUNT-01 / SOURCE READY / AWAITING FULL CI AND ACCEPTANCE

Owner codex/inventory-free-count-20261013 retained. Claim PR2441/head0f84685a/docsCI38371415867 SUCCESS merged22c3603501d2c3dc2d9a976a78f0e6d5b7faa07b before source. New UI has one Νέα απογραφή without advance product/type selection. FREE snapshots active selected-store membership using existing set-based insertion, preserves scanner/mobile/count APIs and creates with recountNONE. Existing legacy drafts offer explicit confirmed conversion, preserve every count/version/event and add only missing selected-store active lines. Conversion never posts stock and cannot mutate after finalization. Existing recount requirements are preserved, not waived.

FREE finalization checks locked persisted scope, nonempty measured lines, explicit zero versus NULL and existing recount constraints, then posts only measured differences atomically once with reason. Untouched NULL lines receive no adjustment, reports/reopened final view include measured scope only. Legacy FULL/PARTIAL remain strict and existing live/offline movement semantics, role/company/store guards and draft/version/idempotency controls are protected. No schema/migration/auth/license/fiscal/source-timeout change. No real-store stocktake/count/conversion/finalization/payment mutation for verification.

Local Node24 actual helper/route/mounted UI regression16PASS/0FAIL/1nativeSKIP and frontend build PASS. Existing cause/double-finalize/stale closure/foreign scope tests pass; new UI confirms once and retains counts. Native PostgreSQL CI tests extended for26656FREE snapshot membership, conversion/replay/closure race/role/store denial, explicit zero+uncounted stock, empty/recount rejection and authoritative scope under parent lock. Native/local DB unavailable so native acceptance NOT TESTED locally, not PASS. Full Node20 CI, exact main healthy guarded deploy and real scoped LAB/device acceptance remain pending; no new manual PASS. Single next action: full CI/merge/exact release then measured isolated LAB acceptance or owner retest, without replaying prior stock postings.

13/10/2026 10:39 Europe/Athens — INVENTORY-FREE-COUNT-01 / ASSIGNED / NOT IMPLEMENTED

Owner codex/inventory-free-count-20261013; branch feat/inventory-free-count-20261013. Explicit owner request: one Νέα απογραφή, no FULL/PARTIAL picker or advance product selection; scan any selected-store items, stop whenever desired and finalize only explicitly counted items, including explicit zero. Uncounted stock must remain unchanged. New independent requirement, not takeover of INVENTORY-START-LARGE/SCALE create-performance owners or N39/TODAY07 completed acceptance.

Latest owner images: existing FULL DRAFT has3counted items/7units, finalization blocked by6633unmeasured lines; PARTIAL creation requires advance selection. This is observed existing-policy behavior and a new requested workflow, not a proven stock corruption. No real-stock finalization, count, payment or production data mutation performed here. Read AGENTS, complete current records via blob/local clone, inventory manual, route/finalizer/UI and recent history. Preserve old FULL/PARTIAL API validation and unresolved/recount guards, draft lock, countVersion, duplicate-event protection, scoped stock ledger, live movement differences, QR/PIN/mobile and unknown barcode flows. New FREE draft behavior and explicit existing-DRAFT conversion require isolated source/native PostgreSQL/mounted UI checks and full CI/green main/exact healthy deploy before acceptance. Real device/store acceptance NOT TESTED; no new manual PASS.

Claim must merge green before source edits. Scope: additive FREE using existing text scopeType/no schema change, single new UI flow, counted-only locked finalization with nonempty and recount checks, explicit conversion preserving existing counts, protected legacy semantics. Finalization remains once with reason/Audit and selected-store role/company boundaries. No production migration, financial/fiscal/licensing/security change or replay of old finalization. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-free-count.md. Single next action: publish this claim, then bounded implementation and regression verification.

13/10/2026 09:32 Europe/Athens — INVENTORY-START-LARGE-01 / SOURCE READY / AWAITING CI AND LIVE

Owner codex/inventory-start-large-20261013 retained. ClaimPR2437/head e2ce6d5e/full docsCI38355547637 SUCCESS merged3ed543618c96c6cf26b9a1af574a27e2e03ce733 before code. Bounded create-only change replaces N sequential line insert round trips with one INSERT SELECT after the parent insert inside the same default transaction. Selected company/store/active FULL/partial membership, expected stock/cost null-to-zero and round-robin zone assignment preserved; equal names now use product id as deterministic tie-break. UUID generated by PostgreSQL built-in gen_random_uuid, no extension/schema/runtime timeout change. Count/finalization/mobile/stock/financial/fiscal code untouched.

Native isolated PostgreSQL regression executes the actual create handler with26656active products plus inactive/foreign/control exclusions, all row identities/zone cycling/null/negative stock and cost snapshot assertions, duplicate partial selection/category subset, failed zone atomic rollback, store-bound denial and unchanged entire StoreProduct state. Uses existing CI test-database guard; local Node24 syntax passes and native test SKIP because no local isolated database, not native PASS. Default transaction must succeed with exactly2snapshot write statements; required fullCI/native test/merge/exact guarded deploy remain pending. Production server error log not yet available; per-row timeout remains plausible cause rather than confirmed production root cause. User photo FAIL and no stocktake listed08:16 remain latest actual creation evidence. No actual draft/count/finalize/payment/stock change performed. Next fullCI and exact release before authorized creation-only readback; no finalization. No new manual or wholeInventory PASS.

13/10/2026 08:16 Europe/Athens — INVENTORY-START-LARGE-01 / ASSIGNED / USER FAIL

Owner codex/inventory-start-large-20261013; branch fix/inventory-start-large-20261013. User photo shows internal error starting FULL stocktake at Περίπτερο Διαδόχου Παύλου; explicit start instruction authorizes diagnosis and bounded correction. New independent regression scope only; protected N39 agreed LIVE PASS, TODAY-07/mobile and other owners retained. Read AGENTS, active list, tracker, numbered list, pending, Inventory manual and N39 checkpoints/history. GitHub file read returned empty for large documents; blob read succeeds, so no missing-record gate remains.

Read-only authenticated Super Admin observed Diadoxou support context/store cmulmjjoc000qqlbf2bn2ifj0, Master catalog26656 items and Inventory2.0 list empty (no existing stocktake shown). No new stocktake/count/finalization/sale/payment/stock write or production migration. Source create handler inserts every selected product separately inside default Prisma interactive transaction; Prisma client has no overridden transaction options. Large-catalog timeout is a causal hypothesis until isolated reproduction; actual production server log not yet captured. Evidence USER FAIL, current creation acceptance NOT TESTED.

Scope: reproduce large-catalog draft creation in isolation, replace per-item database round trips with bounded set-based snapshot insertion if confirmed. Preserve selected company/store/active membership, FULL/partial products/categories, expected stock/cost, deterministic round-robin zones, atomic rollback and existing count/finalization/locks; never merely enlarge global timeout. No schema/credential/role/license/fiscal changes. Required native isolated PostgreSQL regression for large FULL/partial/zone/rollback and all required CI; exact guarded release then creation-only acceptance, never real-store finalization. Publish this claim green on main before source changes or state-changing LAB. Remaining production diagnosis/release/LAB acceptance OPEN; no new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-start-large.md.

13/10/2026 08:28 Europe/Athens — INVENTORY-START-SCALE-01 / ASSIGNED / USER FAIL / DIAGNOSIS PENDING

Owner codex/inventory-start-scale-20261013; claim branch docs/inventory-start-scale-claim-20261013; source branch fix/inventory-start-scale-20261013. Independent new reported failure only: FULL Inventory 2.0 start in Περίπτερο Διαδόχου Παύλου. Owner attachment image-1791868327264.jpg at13Oct08:12 shows «Παρουσιάστηκε εσωτερικό σφάλμα» after Start, FULL/DIFFERENCES; no request ID/server cause captured. User «Ξεκινα»13Oct08:21 authorizes investigation/correction. Prior N39 agreed LAB PASS, TODAY07 barcode and other owners protected; no takeover of their completed/assigned scope.

Read AGENTS/current complete tracker, active, numbered, pending and inventory manual; current main799a24f/history and actual stocktake create handler reviewed. Read-only signed-in Platform SuperAdmin -> Diadoxou Full Backoffice -> Commercial -> Inventory confirms available form and selected store; stocktake list currently empty. No Start/count/import/grant/delete/finalize/payment/stock action submitted. Source currently issues one serial INSERT per eligible product inside default Prisma interactive transaction; large-catalog timeout is a hypothesis, not verified production cause. Exact failing request timing/server logs unavailable; no false root-cause or completion claim.

Protected behavior: exact active company/store/product scope, FULL/products/categories filtering, stable name-based zone rotation, atomic draft+line creation/rollback, expected-stock/cost snapshot, defaults, all count/finalization/live-movement locks and idempotency, tenant/role/license gates. Bounded next: isolated actual handler/native PostgreSQL scale reproduction and, only when causal evidence supports it, one set-based line insertion preserving selection/zone semantics; required full Node20 CI/green merge/exact guarded release, then one measured LAB start/readback. Real Diadoxou acceptance remains OPEN; never repeat ambiguous Start or finalize real stock for diagnosis. No schema/migration/settings/paid infrastructure/restart changes.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-inventory-start-scale.md. New implementation/local/native/CI/LIVE acceptance NOT TESTED. Same owner retained until completion or named handoff.

13/10/2026 - Chat mobile correction SOURCE LIVE / PHOTO6432 PHYSICAL RETEST OPEN

Retained owner codex/chat-mobile-app-20261013. ClaimPR2424 preceded sourcePR2427/head6908928dbf1b474dbf9147846a3d080122ca535d/merge148f5b6cf9986b591a5abd89b13450ea0f5a0431. PR full CI38343823743/job115120634087:2559PASS/0FAIL/0SKIP; exact main CI38344783297/job115123598559:2567PASS/0FAIL/0SKIP, backup6/0/0, required production builds/invariants/native PostgreSQL/isolated HTTP E2E all green. Guarded deploy38345298578/job115125221529 actually triggered pinned148f5b6c and observed exact healthy revision13Oct07:14:58 Europe/Athens. Independent public health confirms148f5b6c; served entry-CitHklpd.js/entry-gA2vCawB.css contain installed-help, operator store-link/PIN, compact visualViewport and Greece clock markers. Chat entry/manifest/worker200; anonymous authorized-store API401. Stable one-app id/start/scope /chat/ preserved.

Phone-only full viewport layout,44px controls, optional collapsed search/manual refresh, keyboard-aware viewport, visible installed-help status and early native install prompt retention are released. One shared serialized activation reuses consent, retries once and retains safe error names; passive startup never creates a subscription. Own active worker remains usable while update waits. Operator app-root entry uses only a same-origin exact store Chat link then existing personal PIN auth; public link only remembered, no PIN persistence/new POS authority. Existing tenant/store/session/draft/company selection, legacy POS/root Push and no-private-cache boundaries retained. Real Chromium synthetic checks390x844/360x740/390x420 passed with message region385.8/269.4/109px and composer within viewport; CI screenshots reviewed, artifact11787963128. Local targeted29/29 and installed-prompt/owner replay tests retained. No actual message/read/task/recipient Push or financial/stock/fiscal mutations for evidence.

SOURCE LIVE supersedes this correction's source-awaiting-CI/deploy entries only. Latest real photo6432/user13Oct06:28 still USER FAIL for display/install visibility and PUSH_SUBSCRIBE/AbortError/AbortError; exact mobile revision/install mode not captured and AbortError root cause remains unconfirmed. Physical usability/install, personal PIN app flow and background/locked-screen Push/tap acceptance remain OPEN/AWAITING USER, not a new LAB/manual PASS. Historical N16 measured partial PASS and owner codex/n16-owner-acceptance-20261007 remain protected; chat manual now explicitly bounds old Android claims by the new-app failure. Usage guide docs/mobile-chat.md remains source guidance. Next: owner reopens the released Chat, confirms layout/install/help and one activation result; owner shares the selected store link and staff uses name/personal PIN. Real background/tap test only with authorized recipients/fresh measured evidence, never replay an old message or transaction solely for documents. Other owners/current records preserved; tracker PDF synchronized.

13/10/2026 07:04–07:06 Europe/Athens - EFOOD-MANUAL-MAPPING-08 / SCOPED LAB PREPARATION PASS / WHOLE12 OPEN

Retained owner codex/efood-bearer-20261012. Dedicated inactive fixtureec51367b-45ca-43ea-b90b-1319b5e6ea79 created once06:41:40 after claim2425/docsCI38342835988/mainc4fbf8f9. Native card/archive confirms “LAB EFOOD - 17 Delicatessen Hot Mustard 250g”, SKUSLL45E/barcode05201050130791/selected LAB storecmtpopbgo000trhb5ng9ytiru only/PIECE/stock0/sale0/cost0/VAT0/inactive. Synthetic commercial values are NOT certified; existing form's vatVerified=true cannot be cleared through current card UI (no exposed control). No second product card write. Keep inactive pending actual commercial validation; this is a virtual identity fixture, not sellable setup.

Native manual mapping actual PASS approximately07:04–07:05 after exact guarded healthy sourcec0c829d6b65647cb9c2bb0d80be68924a81a4bad. User Χρήστος Μάνης/Platform Super Admin in Chrome, canonical https://myworkstation-app.onrender.com/platform-admin -> MYWORKSTATION LAB -> ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ -> myDATA/ΑΦΜ -> archived efood preview. Existing genuine event8aecdfb3-c3c2-4531-9ce1-391bc3baee7c/orderc79b178a-34e6-4d11-9eb5-2a7246209c60 first read UNMATCHED/vendor9344842/READY_FOR_PICKUP/LAB_WEBHOOK_TEST/SLL45E/leading-zero05201050130791/quantity1. Entered exact fixture UUID, deliberately checked identity/store confirmation and clicked “Αποθήκευση αντιστοίχισης LAB” ONCE. Existing scoped PUT acknowledgment accepted same productId/MATCHED, then same-event GET displayed “Αντιστοίχιση: LAB EFOOD - 17 Delicatessen Hot Mustard 250g” and “Οι αντιστοιχίσεις προϊόντων συμφωνούν”, with unchanged provider refs/quantity. No new callback/window/mock/provider/order/sale/payment/stock/fiscal/activation action. UI explicitly retains separate price/payment/availability/Pelican confirmation; commercialExecutionReady=false and availabilityValidated=false/providerContractPending=true in existing response contract.

Before07:00–07:02 values were published viaPR2433/head7b5049c7dbae2eb7e82e8803e360d2208dd9aa58/docsCI38344534719 SUCCESS/main1218f4e07886ff9235957d7e3ee5f675133d8078 before mapping. After07:05–07:06 fresh SAME selected-store Backoffice+Inventory Archive ALL values: MAIN3transactions/cash2.20/card0/IRIS0/expenses0/opening7.20/drawer9.40/latest12Oct23:42, targetstock0/sale0/cost0/VAT0/updated06:41:40/latestSale—, TEST1stock4/price1.20/latestSale10Oct11:47:54/idb1466a68-c47b-47cc-9139-69e6f9f7f978 and TEST2stock−2/price2.40/latestSale01Oct12:51:17/idcaec7ad6-a460-4c71-951f-95a10d943ebf all equal. Exact mapping row/AuthAudit IDs/counts, independent financial/stock DB or movement timestamps and closed/control terminal totals NOT TESTED. Archive timestamps are last SALE/productupdatedAt, not stock-movement proof. PASS is ONLY explicit scoped manual preparation mapping + archived native readback with same contextual UI values; no global finance/stock/no-side-effect certification.

UI/source claim2429/headad5983f3/docsCI38343253304 green/maineda0b468 preceded source. Actual source dates are last SALE/updated, NOT independent movement times. Target card inactive previously read, no product update since creation.

Only planned action: one explicit native mapping PUT for archivedgenuine8aecdfb3 itemSLL45E to exactfixtureec51367b, then same-event GET; verify MATCHED identity/reference/qty1/leading0 and contract/availability/commercial still gated. No callback/window/mock/activation/price/VAT/stock/business/provider changes. Synthetic VAT verified flag remains limitation; inactivefixture not production. Independent DB/full Audit/stock-movement/payment counts and closed-terminal financial control NOT TESTED; actual mapping acceptance limited preparation, no financial/stock claim. Baseline values published before action and rechecked if intervening change. Prior PASSs/protected owners preserved, whole12 OPEN, same owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-manual-mapping.md.

13/10/2026 - EFOOD-MANUAL-MAPPING-08 / SOURCE READY / AWAITING CI AND LAB

Retained owner codex/efood-bearer-20261012. ClaimPR2429/headad5983f3204b98ed331d07fc41503904cd3dd831/docsCI38343253304 SUCCESS mergededa0b468dfc07d3fef06b1f4faf1b41a2ab6f084 before source. Dedicated inactive fixtureec51367b-45ca-43ea-b90b-1319b5e6ea79 prepared06:41:40/SLL45E/05201050130791/stock0; synthetic commercial values and VAT flag limitation remain documented, not production-ready.

Additive native manual mapping control beside genuine LAB_WEBHOOK_TEST UNMATCHED archived item, only preparationOnly=true/commercialExecutionReady=false. User enters exact LAB Product ID and explicitly confirms identity/store; ID changes clear confirmation. Existing protected scoped PUT/product-mappings is the ONLY mutation and exact event readback follows only after verified acknowledgment. Server role/company/store/Product.companyId+StoreProduct validation unchanged. No automatic matching, item activation, stock/price/VAT/payment/fiscal/provider/window/replay/source backend change. Inactive membership is preparation only, availability and contract still unvalidated.

Pending ref blocks rapid duplicate clicks, no form/implicit credential submission; scope/event/generation cleanup discards late/unmounted mapping response without refreshing another store. Successful PUT/failed GET explicitly tells user saved mapping and GET reread only; unexpected acknowledgment disables resubmit pending read. Original read-only GET list/preview and all3credential forms/secret/window controls retained. New component+existing child/CSS only; no package/workflow/schema/runtime change.

Focused local Node24 actual mounted native child and prior registered HTTP/crypto/parser/Bearer/window tests29PASS/0FAIL/0SKIP. New mounted cases prove explicit confirmation/ID-change reset/exact minimal

PUT/duplicate guard/fresh GET/MATCHED escaping, successful write+failed readback no resubmit and late-store response discard. These are isolated tests only; full Node20 source/main CI/guard exact healthy and actual native one-save mapped preview remain AWAITING. No new actual mapping action yet. Whole12 OPEN, owner retained, provider reply pending, other scopes unchanged.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-manual-mapping.md; next fullCI/exact ordinary guarded release then fresh UI baseline and one mapping to dedicated inactivefixture, archived readback only.

13/10/2026 — DAILY-REGULATED-PRICES-01 / CLAIM MERGED / READ-ONLY IDENTITY REVIEW / AWAITING DOSE INFORMATION

Retained owner codex/daily-regulated-prices-20261013, issue2054. Claim PR2426 finalhead a3be42a155c30341b29a72fff7108f79bf4e1aa5 / docsCI38342991653 SUCCESS, merged241215329b1c4d5616964b849f7a5cd6f8db28f6 before any runtime/business changes. First claim CI38342878806 SUCCESS; merge conflict resolved by preserving newer main records with an ordinary two-parent merge, no force update. Other DAILY layout/online/modifier owners retained.

Fresh cloud SuperAdmin DAILY inventory searches after full asynchronous result completion:

- DB000026 ESPRESSO ΜΟΝΟΣ / b477e570-8429-43b9-a850-d05901518410 / barcode9999305200110 / retail1.65 / stock0 / VAT13 / PIECE: exact single candidate.

- Completed ΤΟΣΤ search22results: turkey/shoulder equivalents not treated as ham; DB000011 ΤΟΣΤ ΜΕ ΔΙΠΛΟ ΤΥΡΙ ΜΑΓΑΚΗΣ / dec0dd4b-bad9-4095-84cd-ac02b1e9f7e6 / barcode5200345799378 / retail1.50 and DB009822 ΤΟΣΤ ΔΙΠΛΟ ΤΥΡΙ / 7368ba1c-749f-47b7-a29f-541c2b77a26e / barcode9999388773709 / retail1.50 are distinct identities, not merged. No plain ham+cheese toast confirmed; packaged bread excluded.

- Completed ΝΕΡΟ search33results and category ΝΕΡΑ26results. DB009817 ΝΕΡΟ ΠΙΠΙΛΑ750ML / 58620b27-2d8a-4a6e-b07b-20b8e845e3dd / barcode5201005066786 / retail.80 / stock0 / VAT13 / PIECE is a single750ml candidate. EVIAN500ML DB005257 / b7e8a0a4-eade-4629-9e55-56a0fb49ccdc / barcode3068320055008 /1.50 is a specific500ml candidate; no arbitrary choice/repricing. ZAGORI12X500ML and THEONI12X500 are multipacks and excluded from single-unit reuse. Category listing is not independent proof of whole-DB absence.

Official Gazette https://api.et.gr/apiFEK/2/2022/5183/pdf read and hospital VAT-inclusive table verified against handoff. Current search yielded no hospital-table replacement; consolidated source still points to94130/2022 and current official regional enforcement exists in2026. This is bounded research, not universal legal certification. Article115(3)(A) distinguishes standing from seated service; no specific authoritative room-delivery exemption/fee permission found. Apply owner's cap/surcharge-protection requirement consistently without claiming an unverified legal room-service exception or adding a fee.

Read-only source identifies global onlineUnitPrice/onlineSurchargeAmount in server/src/kat-online-ordering-bootstrap.js, both catalog/order routes in kat-online-ordering.js and kat-online-ordering-modifiers.js, and duplicate client preview in OnlineStoreManager.jsx. Fix must cover preview/catalog/order calculations consistently, explicit exact product identities with company/store scope, preserve member discounts and optional modifier semantics/immutable old orders. No source edit yet. Current main history since coffee78438151 reviewed; existing online changes and other owners protected.

Single next action: confirm whether FILTER SMALL/NESCAFE/FRAPPE/FREDDO are single doses and whether hot tea is prepared cup, then finalize reuse/new-variant mapping before bounded source and any data save. No products/prices/layout/settings/online activation/financial/stock/shift/fiscal mutations performed; no functional PASS or final result photo claimed. Owner retained until completion/named handoff; whole2054 OPEN. Generated tracker PDF remains pending. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-daily-regulated-prices.md.

13/10/2026 06:41–06:44 Europe/Athens - EFOOD-FIXTURE-07 / PREPARED INACTIVE / MAPPING UI ASSIGNED

Retained owner codex/efood-bearer-20261012. ClaimPR2425/headc58b12e4c8d2da980158f251ab4c3f63e92674b4/docsCI38342835988 SUCCESS mergedc4fbf8f9d7d925e9fe7327663d50aff126a5bc9d before state action. Exactly one native “Νέο είδος” entry at06:41:40 created productec51367b-45ca-43ea-b90b-1319b5e6ea79, SKUSLL45E/barcode05201050130791, “LAB EFOOD - 17 Delicatessen Hot Mustard 250g”, categoryΔΟΚΙΜΑΣΤΙΚΑ, selected LABcmtpopbgo000trhb5ng9ytiru only. Archive ALL search now1row; fresh card active checkbox unchecked, PIECE/stock0/sale0/cost0/VAT0. No opening-stock adjustment/activation/business/provider action. Dedicated virtual identity fixture only, not real catalog/unit/price/VAT/availability certification.

Existing new-item form sends vatVerified=true, and actual existing card exposes NO vatVerified control. Therefore clearing that flag was NOT PERFORMED; no hidden API/DOM mutation or second card save. VAT0 is synthetic and remains expressly NOT CERTIFIED. Fixture MUST remain inactive until real commercial fields are verified. Record residual rather than claiming flag=false. UI before06:39/06:41 and after06:42 MAIN3/cash2.20/card0/IRIS0/expenses0/opening7.20/drawer9.40/latest12Oct23:42 equal. TEST1 stock4/price1.20/idb1466a68-c47b-47cc-9139-69e6f9f7f978/latest-sale10Oct11:47:54 and TEST2stock−2/price2.40/idcaec7ad6-a460-4c71-951f-95a10d943ebf/latest-sale01Oct12:51:17 equal fresh archive reads. Those are last SALE dates, not measured stock-movement timestamps. Other closed terminal and independent DB/Audit/stock/payment counts NOT TESTED; no broad financial/stock PASS. Fresh health browser reload rejected by URL policy, no bypass; prior guarded exact release is documentary evidence only.

Next bounded SOURCE scope ASSIGNED, branch feat/efood-manual-mapping-ui-20261013: native manual-mapping control adjacent to archived product preview, outside all credential forms. Existing scoped LAB PUT/product-mappings endpoint only; manually supplied exact Product ID plus explicit identity confirmation, no auto/fuzzy match/import/activation/price/stock/payment/fiscal/window/callback/outbound. After one explicit successful PUT, refresh same archived event via existing GET; save errors show safe message, successful-write/failed-readback must say mapping may already be saved and never auto-retry. Keep stale-store/event/unmount responses ignored and duplicate-submit guard; retain read-only list/preview behavior unless user deliberately submits new mapping control. Membership validation remains server-side existingAPI; always commercialExecutionReady=false/availabilityValidated=false/contract pending, inactive fixture usable only as mapping PREPARATION.

Exact source scope only new client/src/components/platform/EfoodManualMapping.jsx, additive EfoodEventPreview.jsx import/control and existing scoped CSS, new mounted isolated tests; server endpoints/credentials/roles/schema/fiscal/runtime untouched. No inventory module takeover or VAT source change. Claims publish green before code; full exact CI/merge/guarded healthy before native mapping save. Acceptance: one mapping SLL45E to dedicated productec51367b, then actual existing genuine event8aecdfb3 preview displays correct fixtureMATCHED/qty1/leading0, still contract/availability/commercial gated; refresh same contextual UI controls. Source/UI currently NOT TESTED/AWAITING LAB. Whole12 OPEN and owner retained. Provider reply/email unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-manual-mapping.md; fixture checkpoint2026-10-13-efood-fixture.md.

13/10/2026 — DAILY-REGULATED-PRICES-01 / ASSIGNED / NOT TESTED

Owner codex/daily-regulated-prices-20261013; claim branch docs/daily-regulated-prices-claim-20261013; source branch feat/daily-regulated-prices-20261013; issue #2054. Explicit owner continuation/handoff in this Work task requests “Προϊόντα διατίμησης”, exact existing product reuse and only missing variants, maximum VAT-inclusive prices, and no 0.10 online surcharge overflow. Independent new scope only; retained broader layout owner codex/daily-bite-pos-layout-live-20261010 / open conflicting PR2175, modifier-price owner and DAILY online owner unchanged. Do not merge/rebase/overwrite their sources or replace their layout/configuration.

Read-only cloud browser successfully opened Platform Super Admin Χρήστος Μάνης -> DAILY stores -> Full Backoffice -> Commercial -> Inventory. Selected DAILY company/store confirmed by banner. Catalog initially displayed8753. Exact DB000026 search completed with one ESPRESSO ΜΟΝΟΣ, product b477e570-8429-43b9-a850-d05901518410, barcode9999305200110, retail1.65, stock0, VAT13/PIECE. No save/new product/layout/setting/sale/stock action. Other candidates and dose/packaging identity remain unverified; no broad catalog absence inferred.

Official source https://api.et.gr/apiFEK/2/2022/5183/pdf (94130/2022, B5183/06Oct2022, art115) read: hospitals included, VAT-inclusive limits .50/.75 water500/750ml, ham+cheese1.60/cheese1.40, singleGreek1.40/filter1.50/espressohot+cold1.65/instant hot+frappe1.50/tea1.50. Current amendment search and room-delivery/mandatory statutory-fee treatment still under verification; do not assert final legal certification or add guessed fees. Owner's protection requirement applies to designated regulated item prices online as well; no public DAILY activation.

Bounded acceptance: fresh identity/price/unit/VAT/store listing readback for exact candidates; preserve Product IDs/SKU/barcodes/stock/history; never merge distinct packages/doses or rename turkey as ham; create explicit missing single variants only after exact search. Add one DAILY-only group in a currently free layout slot with latest-version protection, preserving other groups/quickkeys/theme. Isolate regulated-price calculation and .10 surcharge exemption to explicitly confirmed DAILY products, consistent catalog/order/server amounts, without repricing old orders or changing other stores. Do not alter existing modifiers/recipes or infer their mappings. Full required CI/build/native isolation/E2E, normal guarded healthy release and fresh measured scoped acceptance before claiming completion. Old importer8753/9departments, all protected LAB/BAKE15/ONL003/financial PASS and other owners preserved; never replay.

Claim must merge green on main before source/data mutations. Single next action: finish read-only candidate/legal/source review and publish this bounded claim. Whole DAILY readiness/issue2054 stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-daily-regulated-prices.md. Generated tracker PDF synchronization pending; no PASS/manual closure.

13/10/2026 06:35–06:40 Europe/Athens - EFOOD-FIXTURE-07 / ASSIGNED / AWAITING LAB

Retained owner codex/efood-bearer-20261012; docs/efood-fixture-claim-20261013. User06:35:51 explicitly says start preparing dedicated LAB test product and mapping. Bounded first action: existing Inventory Archive “Νέο είδος” creates exactly one inactive dedicated fixture “LAB EFOOD - 17 Delicatessen Hot Mustard 250g”, SKUSLL45E/barcode05201050130791, category ΔΟΚΙΜΑΣΤΙΚΑ, selected storecmtpopbgo000trhb5ng9ytiru/companycmtpopbgk000prhb5qc60zxus only, PIECE, stock0/cost0/sale0/VAT0 virtual placeholders. Not provider price/unit/VAT validation, real store item or availability. Existing create form always sends vatVerified=true; after creation inspect card and clear verified flag using existing card control if present; do not leave virtual VAT represented as certified provider VAT. No opening-stock adjustment, stock movement, product activation, sale/payment/fiscal/provider/replay/window.

Read AGENTS/complete current active/pending/tracker/numbered, archived preview and catalog-search checkpoint/manual, inventory manual, existing create/read server+UI sources and efood mapping API. API/new supports inactive product, selected explicit storeIds, duplicate SKU/barcode denial, transactional Product+ProductBarcode+StoreProduct; UI openingStock0 skips adjustment. Existing mapping PUT is scoped to LAB store membership but has no native UI control. Creating fixture does NOT create mapping or new efood PASS; later UI/source is separately bounded and requires own claim/regression/fullCI/exact guard. Whole12/Pelican OPEN, same owner retained, other scopes/owners protected.

Baseline06:39Athens desktop Chrome operator Χρήστος Μάνης/Super Admin: selected LAB Backoffice MAIN open12Oct19:28 by LABPOS2,3transactions/cash2.20/card0/IRIS0/expenses0/opening7.20/drawer9.40/latest12Oct23:42. Inventory controls TEST1 idb1466a68-c47b-47cc-9139-69e6f9f7f978 stock4/sale1.20/latest-sale10Oct11:47:54, TEST2 idcaec7ad6-a460-4c71-951f-95a10d943ebf stock−2/sale2.40/barcode2900000000018/latest-sale01Oct12:51:17. These dates are inventory LAST SALE, not independent latest stock movement. Separate closed/control terminal totals and full DB/Audit/stock movement counts unavailable now/NOT TESTED. Existing archive ALL active+inactive exactSLL45E search completed0items, no targetstock/productID yet. No side-effect financial/stock PASS without independent measurements.

Fresh healthTab reload was rejected by browser URL policy before navigation; no alternative browser/hidden request attempted. Latest shared exact guarded revision4a6ae8b1/main2553/0/0 is other owner's published evidence, not fresh independently observed health in this action. Current product routes/form are unchanged baseline source; this is existing application data preparation, no new code/config/deploy. Record actual UI creation result/id/selected store/inactive/qty0 and clear-VAT action separately; if response uncertain read before any retry. Publish claim green on main before state change, refresh relevant baseline immediately before each identified action. Retain no new callback/price/payment contract claims. Next first action only one inactive product entry after claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-fixture.md.

13/10/2026 06:28–06:29 Europe/Athens - CHAT-MOBILE-DEVICE-FAIL / IN PROGRESS

Retained mobile packaging owner codex/chat-mobile-app-20261013; branch fix/chat-mobile-device-20261013. User photo6432.jpg shows LAB Chat with oversized header/actions, little message space, no visible installation action, and PUSH_SUBSCRIBE / AbortError / AbortError. User explicitly reports install/display FAIL; physical exact mobile revision/browser/install mode NOT CAPTURED. Independent health still4a6ae8b1be36c2e646685b018149839b4db08bf8. Earlier source-live/CI evidence is not physical acceptance. No root cause inferred from AbortError alone. Scope: mobile-only layout isolation/compact accessible actions, explicit installed/install/help state, shared serialized app subscription activation and safe diagnostic/recovery UX; keep exact store/PIN authorization, one app identity, draft preservation, no private cache and legacy POS/root notification behavior. User asks operator login: existing store deep-link personal PIN Chat-only flow retained. Existing N16 owner and real partial registration/delivery/sound/direct-link/chat/task/read/roles PASS preserved as historical bounded observations; current new-app installation/layout/Push acceptance OPEN. No message/read/task/financial/stock/fiscal test writes or real recipient Push. Full CI, exact guarded deploy and physical user retest required. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-chat-mobile-device.md.

13/10/2026 06:19–06:20 Europe/Athens - EFOOD-CATALOG-06 / READ-ONLY SEARCH COMPLETE / MAPPING BLOCKED

Retained owner codex/efood-bearer-20261012; user06:17 explicitly requested next catalog inspection. Signed-in Platform Super Admin Χρήστος Μάνης, selected MYWORKSTATION LAB companycmtpopbgk000prhb5qc60zxus / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ storecmtpopbgo000trhb5ng9ytiru. Native route: canonical platform-admin -> selected LAB stores -> Πλήρες Backoffice -> Εμπορική λειτουργία -> Master Catalog. Backoffice banner explicitly confirmed company/store. Initial clicks while fiscal modal still open did not navigate; closed that overlay, then correct Backoffice opened. Separate Store Mode showed PIN sign-in and was not used/authenticated.

Master Catalog search displayed26,656 products. Exact provider barcode05201050130791, exact SKUSLL45E and 13-digit search5201050130791 each completed with enabled search button and no product result cards. No positive matching product was identified. Description search ΜΟΥΣΤΑΡΔ returned7 MASTER candidates: HELLMANNS spicy500g/01723, HELLMANS mild250g/01724~5201080113238, LAYS105gr/803, PAPADIMITRIOU honey300g/01524, RUFFLES105gr/01040, ΜΑΓΑΚΗΣ chicken-mustard/100029238 and ΦΛΟΡΕΝΤΙΑΣ chicken-sauce/100029175. All shown as MASTER/activation-required; none establishes identity of “17 Delicatessen Hot Mustard 250g” or target store membership.

Result is bounded UI SEARCH COMPLETE / NO AUTHORITATIVE MATCH FOUND, not proof of global DB absence, product-registration FAIL or new LAB mapping PASS. No productId selected, detail/save/activation/mapping/product/stock/price/payment/provider action performed; existing archived preview PASS and callback PASS protected. Displayed MAIN3transactions/cash2.20/card0/IRIS0/expenses0/opening7.20/drawer9.40/latest12Oct23:42 remained contextual read-only snapshot; independent DB/stock/control measurement NOT TESTED, no financial delta inferred. No new window/callback/mock/mail.

Next single action requires authoritative LAB counterpart: supply/import or register the exact dedicated LAB test product with confirmed identity (SLL45E/barcode05201050130791/name250g) and selected-store membership under a separately published state-changing claim/baseline. Do not substitute a different mustard or TEST1/TEST2 controls, infer price/stock units from provider fixture, or claim an automatic GTIN normalization mapping. Manual efood mapping acceptance remains OPEN; existing mapping API/source scope must be inspected before proposing save. Commercial availability/unit/pricing/VAT/payment/reconciliation and full Pelican test/certification contract still pending provider reply to already SENT12Oct23:16:46 message1a131c2b6ac76a6e. Whole tracker12 OPEN; same owner retained until completion/named handoff, other owners preserved.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-catalog-search.md. This NOT FOUND inspection adds no new usage/PASS claim to docs/manual/efood/PASS.md.

13/10/2026 - Chat mobile ONE APP / SOURCE LIVE / AWAITING PHYSICAL DEVICE ACCEPTANCE

Owner codex/chat-mobile-app-20261013; user explicitly confirms one owner app with store selection. Source PR2417, enum correction PR2419 and current-store tap correction PR2422, final guarded healthy production revision 4a6ae8b1be36c2e646685b018149839b4db08bf8. Final PR CI38319464171/job115043888225 and exact main CI38320113128/job115046028676: 2553PASS/0FAIL/0SKIP, backup6/0/0 and all required build/browser/invariants/native PostgreSQL/isolated HTTP E2E green. Guarded deploy38320533739/job115047330838 actually triggered pinned 4a6ae8b1 and observed exact healthy revision; independent public health confirms the same. Earlier ab0a6631 and 75008418 releases are superseded: actual enum parity and repeated current-store notification/draft retention are both now covered. Actual UserRole enum fixture verifies role/ownership/version/session/module revocation; legacy notifications continue if optional mobile lookup fails, with no private diagnostic data.

One manifest id/start/scope /chat/, one scoped worker /chat/sw.js. Public root/deep entry, manifest and worker return200; anonymous /api/store-chat/mobile/stores returns401. Owner chooses authorized stores (including authorized owner companies); notification tap opens the exact store in the same app without navigating POS. Repeated taps for the current store preserve the loaded panel and unsent draft; required/history reloads use a navigation generation and reject stale results. Dedicated app storage preserves Backoffice/POS sessions; staff personal PIN creates only a 12h Chat session, revalidated on every request, with no POS authority. Server derives all notification store IDs and serializes endpoint identity transitions. Generic background consent can outlive login expiry; reading requires a current session, explicit app logout unsubscribes this installation, and account switch retires the old device subscription. Private chat/API/attachments never persist in offline cache; only the public reconnect page is cached. Existing Greece/24h formatters retained.

SOURCE LIVE is software/deployment evidence, not a new LAB/manual/device PASS. Existing N16 owner codex/n16-owner-acceptance-20261007 and actual partial Android/chat/Push/task/read/permission evidence remain intact. No real message or Push sent to people for testing, no fiscal/stock/read/task writes for evidence. New physical Android/iPhone install/home-screen launch, one-app store selection, closed-app/locked-screen notification and tap acceptance remain OPEN/AWAITING USER. Usage: docs/mobile-chat.md. Next: owner installs https://myworkstation-app.onrender.com/chat/ once, signs in, chooses store and enables notifications; physical test only with authorized recipients. Central tracker PDF regenerated with this receipt; all other owners, partial PASS and pending scopes preserved.

13/10/2026 — EFOOD-EVENT-PREVIEW-05 / SCOPED READ-ONLY LAB PASS / WHOLE 12 OPEN

Retained owner codex/efood-bearer-20261012. Actual desktop cloud Chrome Platform Super Admin readback13Oct approximately01:14 Europe/Athens, after exact guarded healthy revision7a880fb18bbee2232949f4a964ea459a61094971. Canonical entry https://myworkstation-app.onrender.com/platform-admin; selected MYWORKSTATION LAB companycmtpopbgk000prhb5qc60zxus / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ storecmtpopbgo000trhb5ng9ytiru, SANDBOX/vendor9344842. Receiver observed CONSUMED/locked, external/order/sale/stock/payment/fiscal flags all OXI before read.

One GET-only list of already archived events displayed3 entries (one genuine provider event plus two historical mocks). Selected existing genuine event8aecdfb3-c3c2-4531-9ce1-391bc3baee7c/orderc79b178a-34e6-4d11-9eb5-2a7246209c60; one GET-only product preview. Actual displayed vendor9344842, READY_FOR_PICKUP/LAB_WEBHOOK_TEST, product “17 Delicatessen Hot Mustard 250g”, quantity1, SKU SLL45E, barcode05201050130791 preserving initial0, and “Δεν υπάρχει αντιστοίχιση”. UI explicitly says mapping, pricing, payments, availability and Pelican need separate confirmation. PASS is ONLY scoped archived-event read, real decrypt/current normalization and visible UNMATCHED preparation. No new callback, one-shot window, mock, mapping save, product change or business action was performed. This is not a new ingress acceptance PASS or complete efood/Pelican activation.

ClaimPR2410/docsCI38309237239 green/main4ea9dceba59430fb2f9d78a1e6e91bbed316feca preceded source. SourcePR2411/finalheade314bda5cd46eba36df2d7dcf9fffacc95da229d/fullCI38313270078/job115023886861 SUCCESS2536PASS/0FAIL/0SKIP plus6backup/all required jobs. Merge7a880fb18bbee2232949f4a964ea459a61094971 exact mainCI38314162822/job115026837691 SUCCESS2543/0/0 plus6backup/all required jobs (additional concurrent tests preserved). GuardedRender38314603700/job115028157846 SUCCESS: pinned2026-10-12T22:05:53.7596796Z, exact healthy2026-10-12T22:07:45.7341985Z, ok=true/version0.22.0+kat-test-pos/revision7a880fb. All8owned source/test blobs verified identical in released revision. Initial unchanged attempts38310596096/1+2 remain2532/1/0 due completed-tool timing bug; independently corrected under PR2416, no assertion/metric/threshold/workflow weakening.

Local focused26/0/0 includes actual registered HTTP routes with crypto, bounded scoped SQL, errors/privacy/manual mapping, existing parser/Bearer/window guards and mounted native parent+child. Negative roles/foreign tenant/hash/decrypt/malformed/positive+ambiguous mapping/stale store/unmount/redaction tests are ISOLATED CI ONLY; no live negative/positive-mapping/mobile acceptance claimed. New list/preview paths deliberately avoid schema/bootstrap/expiry writes and outbound/replay/window operations. Existing credential forms preserved, preview outside all3forms, buttons GET-only and stale generation/scope/config-version responses ignored; commercialExecutionReady=false, availabilityValidated=false/providerContractPending=true. Scoped store membership does not certify availability.

Independent financial/stock/business/Audit DB counts and after/control measurements were NOT TESTED in this read-only acceptance. Earlier00:26–00:27 UI baseline is contextual only; unrelated pages' transactions are not attributed to this preview and no financial/stock delta is inferred. No claim of overall no-side-effect financial PASS.

Completed preview implementation/readback is removed from active pending. Whole tracker12 remains OPEN and same owner retained until scoped completion/named handoff. Next single action: inspect the selected LAB catalog for an authoritative same-SKU/barcode product and store membership before any explicit manual mapping; do not invent productId or map to TEST1/TEST2 controls. Price/unit/VAT/payment/retry/recovery/reconciliation/full Pelican environment/certification require provider contract. Support follow-up already SENT12Oct23:16:46Athens/message1a131c2b6ac76a6e; no duplicate email this turn. Prior callback22:56 PASS remains protected; no repeat callback merely for paperwork. All other assigned Gates/owners preserved.

Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-event-preview.md; verified usage docs/manual/efood/PASS.md; preparation worksheet docs/integrations/efood/acceptance-preparation.md.

13/10/2026 — CI-CAPACITY-DEADLINE-01 / VALIDATED / BOUNDED TOOL FIX CLOSED

Independent owner codex/ci-capacity-deadline-20261013 completed and released for this bounded scheduler correctness fix. ClaimPR2413/docsCI38311728376 SUCCESS/main8275bb603083260c70f60c1cb7a63ddceda3de6b preceded source. SourcePR2416/finalhead f03707abc68b05bb9a6c7ef67763f02a851d423f/fullCI38312482857/job115021512211 SUCCESS2532PASS/0FAIL/0SKIP plus6backup/all required jobs; merged05085cfd336f04fadbbf6bac945b787f7c43588f. Exact mainCI38313091136/job115023330813 SUCCESS2532/0/0 plus6backup/all required jobs. Earlier preliminary run38312028257 canceled only for shared-record reconciliation. Combined efood CI and exact main subsequently green.

Runner now waits ceil-positive remaining time and rechecks monotonic deadline before dispatch. Actual-source deterministic fractional timer case changed scheduled5.5/start5/response1/offered0.5/lag0 FAIL to scheduled5.5/start6/response1/offered1.5/lag0.5 PASS; early-wake recheck also passes. Original8tests/assertions, latency formulas, arrival rates, concurrency/drops, destination/privacy guards and event IDs preserved; focused10/10 including real slowHTTP original assertion. No workflow/threshold/Node/profile/resource/application runtime/DB change or hosted workload. Official timer semantics https://nodejs.org/download/release/v20.20.0/docs/api/timers.html.

This is CI tool VALIDATED, not LAB/business/production capacity PASS; no manual PASS entry for this tool. Historical tracker19 FINAL PASS protected. Production/100-store capacity remains OPEN with retained owner codex/pos-startup-loading-20261008; no takeover or duplicate workload. Remove completed isolated repair from active pending. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-ci-capacity-deadline.md.

13/10/2026 - CI 38314360090 / exact source b9dc71a9 / harness correction

Owner codex/chat-mobile-app-20261013. Node20 full suite reached 2551 tests: 2548 PASS / 3 FAIL / 0 SKIP. New native PostgreSQL recipient/ownership/session/module isolation and Chat staff expiry/revocation/PIN tests PASS; mounted owner chooser PASS. Three failures are the existing push-diagnostic VM harness missing imported registerChatWorker after scope isolation. Update that dependency and expected retry registration count, preserving provider-private-data redaction, subscription options and retry assertions; add actual helper check rejecting accidental root/POS worker reuse. No native/runtime assertion removed or bypassed. Full green CI, guarded deploy and physical acceptance remain PENDING; no live/device PASS claimed. Existing owners and central receipts preserved.

13/10/2026 — Chat mobile one-app source / CI PENDING

Owner codex/chat-mobile-app-20261013; scope extension already published in PR #2415. One stable manifest id/start/scope /chat/, owner authorized-store chooser, notification tap selects its exact store in the same app, dedicated app session storage and 12h Chat-only personal PIN session (no POS). Mobile Push derives all owner store IDs server-side and revalidates current ownership/role/version/revocation/module at delivery; endpoint ownership transitions serialize and retire the prior mapping. Generic background notification entitlement can survive login expiry; reading requires a valid session and explicit logout revokes delivery. Staff PIN/card/role changes revoke the Chat binding; private APIs/attachments/messages never cached; public offline page only. Existing N16 owner and real measured Android Push/chat PASS preserved without broadening. Local Node20 build, routing/Apple/module tests and mounted chooser exercised; native PostgreSQL recipient isolation and full CI still PENDING. No actual messages/Push sent to real recipients, no fiscal/stock/read/task mutation for evidence. No new SOURCE LIVE/device PASS yet; guarded deploy and physical installation/tap acceptance remain OPEN.

13/10/2026 — EFOOD-EVENT-PREVIEW-05 / COMBINED SOURCE READY / AWAITING CI AND LAB

Retained owner codex/efood-bearer-20261012. First feature head059340af/CI38310596096 attempts1+2 retained2532PASS/1FAIL/0SKIP: only original capacity-timing assertion failed; own preview tests passed, no source merged/deployed. Independent completed-tool deadline correctionPR2416/finalheadf03707abc68b05bb9a6c7ef67763f02a851d423f/fullCI38312482857/job115021512211 SUCCESS2532/0/0 plusbackup6/0/0/all required jobs, merged05085cfd336f04fadbbf6bac945b787f7c43588f. Earlier preliminary cap run38312028257 canceled only for shared-record reconciliation; no test/metric/threshold/workflow weakening. Production capacity remains owned/OPEN.

Feature branch refreshed against current main including fixed monotonic scheduler and all other owners. Additive read-only list/preview endpoints do not bootstrap schema, maintain expiry, write SQL, replay, open windows or make outbound calls. Reuse unchanged exported identity checker, real decrypt/hash consistency and scoped explicit manual-mapping membership; allowlisted SKU/barcodes/quantity/product/event fields only; always commercialExecutionReady=false and availability/contract pending.

Native preview moved OUTSIDE all credential forms and spans available width, avoiding implicit setup submission from its selector/Enter. Key includes exact selected URL and configuration version; old scope/version/unmount responses discarded. Original setup/secret/window/mock forms preserved. Actual full parent component plus child mounted tests prove no ancestor form, original3forms intact, buttons typebutton/GET only, stale-store/unmount handling and no HTML execution. Local Node24 focused26PASS/0FAIL/0SKIP including handler crypto/privacy/isolation/mapping and prior parser/Bearer/window guards. New source still AWAITING full exact combined Node20 CI/guarded release and actual archived-event readback; no new LIVE/manual PASS yet.

Next: fullCI, green merge, exact guarded healthy deploy, then read ONLY existing actual provider event8aecdfb3-c3c2-4531-9ce1-391bc3baee7c in LAB UI. No new callback/window/mapping/financial/stock transaction. Claim2410/main4ea9 retained; preparation worksheet/matrix available. Whole12/Pelican/production OPEN, provider reply pending, no duplicate email. Owner retained until scoped completion/named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-event-preview.md.

13/10/2026 — CI-CAPACITY-DEADLINE-01 / SOURCE READY / AWAITING FULL CI

Independent owner codex/ci-capacity-deadline-20261013, source fix/ci-capacity-deadline-20261013. ClaimPR2413/heade61a1c861d3986ac33b563a0d67b8af19d752d02/docsCI38311728376 SUCCESS merged8275bb603083260c70f60c1cb7a63ddceda3de6b before edits. Original harness implementation COMPLETE; retained incident/workload/production-capacity owner codex/pos-startup-loading-20261008 and all profiles/resources/runtime/scopes untouched. Efood2411 remains unmerged/undeployed after two unchanged timing FAILs; no blind retry/bypass.

One bounded correction in isolated runner: ceil positive remaining timer delay and recheck monotonic offered deadline before dispatch. Scheduled events/rates/identities, open-loop concurrency/drop behavior, all original raw latency formulas and privacy/loopback guards unchanged. No clamping offered latency to make assertion pass; the action genuinely waits until its deadline. Existing8tests/assertion untouched. Two new deterministic regressions execute actual runner source with virtual clock/timer truncation and early wake, assert actual dispatch>=original deadline, same event data, and accurate offered>=response latency.

Before: unchanged source virtual at5.5 starts5, latency1/offered.5/dispatch lag0. After: starts6, latency1/offered1.5/dispatch lag.5. Local Node24 all10 tests PASS/0FAIL/0SKIP including original real slowHTTP overlapping calls, drops/quantiles/privacy/isolation. These are tool-unit/isolated HTTP evidence, not a planned-store load or production-capacity PASS. Full Node20 CI/native existing E2E/build/invariants/Windows required. No workflow/Node/test/assertion/threshold/profile/DB/pool/paid hosting/app/business change.

Official Node20 timer semantics: https://nodejs.org/download/release/v20.20.0/docs/api/timers.html (fractional delay truncated and exact wake time not guaranteed). Initial claim's mistyped URL fragment is superseded by this verified page. One next action: green full CI/merge this isolated tool fix, then refresh unchanged efood preview blobs on current main and exact combined CI before ordinary guarded release/LAB read-only acceptance. No additional provider event/window or production transaction. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-ci-capacity-deadline.md; CI repair owner retained until bounded completion, efood and production capacity owners remain separate.

13/10/2026 00:32 Athens — Mobile Chat owner clarification / IN PROGRESS

Same assigned owner codex/chat-mobile-app-20261013. Explicit clarification: ONE installed app for owner, selecting authorized stores inside it, notifications from all authorized stores, notification tap opens correct conversation. Stable manifest id/start/scope /chat/, one chat-scoped service worker; existing /chat/{storeId} links retained as deep links. Independent mobile subscription mapping needed so one browser endpoint is not overwritten by each store. Owner companies use existing authorized company selection; personal operator phone login must be Chat-only with current credential/session revalidation, never POS terminal/shift rights. Existing N16 owner/PASS retained, no real messages/recipient push tests or financial changes. Source draft packaging revised before publication; no claim of physical mobile PASS. Existing 12-hour/MFA/session/must-change-password and company/store/module boundaries remain. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-chat-mobile-app.md.

13/10/2026 — CI-CAPACITY-DEADLINE-01 / ASSIGNED / REPRODUCED TOOL FAIL

Independent bounded test-tool correctness scope under tracker19 CI efficiency: owner/branch codex/ci-capacity-deadline-20261013; claim docs/ci-capacity-deadline-claim-20261013, source fix/ci-capacity-deadline-20261013. Necessary blocker of authorized efood preparation; no takeover of production capacity/incident owner codex/pos-startup-loading-20261008 or running workload/profile/config/resource/lifecycle tasks. Original isolated HARNESS implementation is explicitly COMPLETE/removed from active pending in checkpoint2026-10-08-pos-capacity-workload.md; remaining incident assignment is measured capacity/lifecycle only. This new early-dispatch CI-tool bug has no existing dedicated claim; independently claim before editing completed runner scheduling. No production capacity PASS or test/CI threshold weakening.

EfoodPR2411/head059340af8f3dc5b5e558bcd2daa7884f845ea94a remains OPEN/NOT MERGED/NOT DEPLOYED. FullCI38310596096 attempts1/job115015169659 and2/job115016473144 both2532PASS/1FAIL/0SKIP solely unchanged pos-capacity-runner.test.js43 offeredLatencyMs>=latencyMs. New efood handler/formatter/mounted UI allPASS, local25/25. No third unchanged retry. Source guard correctly blocks release; existing source93ba32ce and bounded callback PASS retained.

Read current AGENTS/boards/main history and capacity checkpoints08Oct/09Oct. Concrete defect: runSchedule sleeps once with fractional remaining delay and does not recheck deadline; documented Node20 timers truncate fractional delays. Original unchanged source deterministic virtual clock diagnostic at event5.5 starts5, response latency1/offered latency.5/dispatch lag clamped0: invariant FALSE. Isolated simulation only, no real load/HTTP/production data. Official source https://nodejs.org/download/release/v20.20.0/docs/api/timers.html#settimeoutcallback-delay-args .

Exact proposed correction: wait using ceiling-positive remaining time and recheck monotonic deadline before dispatch. Preserve scheduled arrivals/rates, open-loop concurrency/drops, raw latency/metric formulas, old assertion, local-only destination/credential privacy, event IDs/cohorts. Add deterministic fractional/early-wake regression on actual runner source and retain original8tests including real slowHTTP concurrency assertion. No changes to workflows/Node/thresholds/profiles/app runtime/DB/provider/business operations or hosted capacity. Require fullCI and merge separately, then refresh efood branch with unchanged owned feature blobs and repeat exact combined fullCI before release. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-ci-capacity-deadline.md; owner retained until bounded tool fix or named handoff.

13/10/2026 00:23 Athens — Installable mobile store Chat / ASSIGNED

Owner codex/chat-mobile-app-20261013, branch feat/chat-mobile-app-20261013. User explicitly chooses link-installed Android/iPhone chat with background Push. Independent PWA packaging/launch/install/login/offline-public-page scope only; existing N16 owner codex/n16-owner-acceptance-20261007 and real push/message/task/Android/read/permissions PASS retained. Read AGENTS/full active/tracker/pending, chat manual, mobile entry/physical-push checkpoints and fresh main history. Existing /chat/:storeId, scoped messages loader, rootSW background Push and Apple visible notification policy reused. No chat-message replay, new task/read mark, real push test to other people, auth/2FA/module/tenant/POS/fiscal bypass. Per-store manifest must launch only same chat; private APIs/chat content never cached offline. Source/CI alone not physical Android/iPhone PASS. Required fullCI/exact guarded deploy; independent install/launch and permission/button/read-only checks; device receipt/tap only when fresh measured LAB/authorized recipients available. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-chat-mobile-app.md.

13/10/2026 — EFOOD-EVENT-PREVIEW-05 / ASSIGNED / NOT TESTED

Retained owner codex/efood-bearer-20261012; source branch feat/efood-event-preview-20261013. Owner00:07Athens authorizes feasible preparation. Bounded implementation scope: Platform Super Admin read-only preview of existing encrypted LAB event, exact selected company/store/integration/event lookup; normalize identity/product refs using released parser; show only allowlisted event/order/status/product fields and explicit scoped existing manual-mapping results. No raw/customer payload, credentials/key URL, auto matching, writes, replay/window/outbound or commercial execution. UI clears previous result and ignores stale scope/unmount responses. New behavior NOT TESTED/AWAITING LAB until actual existing-event readback; existing callback PASS and source gates retained.

Preparation worksheet/matrix docs/integrations/efood/acceptance-preparation.md remains requirements, not a ready endpoint. Required actual handler/crypto/company-store isolation/missing/foreign/ambiguous mapping/redaction/error tests and UI behavior regressions/fullCI/exact healthy release. Claim must merge green before source edits. Next action implement scoped preview; whole12/Pelican/production OPEN and same owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-efood-event-preview.md.

13/10/2026 — EFOOD-PREPARATION-04 / PREPARED DOCUMENTATION / WHOLE OPEN

Retained owner codex/efood-bearer-20261012. Owner00:07Athens requests preparation of feasible residual. Prepared docs/integrations/efood/acceptance-preparation.md: explicit provider-to-LAB mapping worksheet (SLL45E/barcode05201050130791 remains UNMATCHED, no guessed productId), isolated/live test matrix, exact measurement/control checklist, safe read-only stored-event preview specification, provider contract/production gating and one next bounded implementation scope. This is preparation documentation only, not a new endpoint/UI implementation or LAB PASS.

Existing sourceLIVE identity/product parsing and bounded callbackPASS preserved. No new window/provider event/mock/mapping/catalog/payment/stock/fiscal/credential change, historical replay or duplicate email. Provider reply/contract/Pelican environment remains pending. Read current AGENTS/active/tracker/pending/numbered/manual/efood checkpoints and main history; main98884e current. Whole12OPEN, same owner retained until completion/named handoff. Next source action: publish scoped claim then implement read-only normalized stored-event preview with strict selected-store/product joins, allowlisted output and stale-store response protection; no business posting. Preparation checklist in CHECKPOINTS/CHANGES/2026-10-13-efood-acceptance-preparation.md. No new PASS/manual/PDF closure inferred.

13/10/2026 — Global 24-hour Greek time audit / SOURCE LIVE — AWAITING USER

Owner codex/my-payments-athens-time-20261012 retained. Explicit owner request12Oct23:29Athens: inspect entire program for24h and Greek time. ClaimPR2401 merged a8790f89 before source; sourcePR [#2404](https://github.com/xrhstosmanis-design/myworkstation-app/pull/2404) merged cc675e222d1e9fa025732f6622056e6ea5766093. Audited all677 client/src/server/src/shared source files plus Windows human reports and generated patches. Remaining95 clock formatters in75files now declare hour12:false/Europe/Athens; stale-shift warning and vault-generated mail covered. Greek calendar defaults/month bounds, recording/report filenames, full-day report ranges/grouping/year filters, CSV/Excel/export instant values and Windows human logs corrected. Native datetime-local controls declare en-GB and retain24h canonical values converted through Athens helper. Date-only invoice/schedule values, canonical UTC/offset-qualified machine instants and ONVIF/fiscal/security protocol timestamps remain distinct. Historical records/400EUR payment never rewritten/replayed; no real payment/stock/shift/fiscal/auth/schema mutation.

- POS / BackOffice / Super Admin / chat / workforce / review / audit: explicit24h Athens clocks.

- Time entry and report periods: Athens wall-clock conversion, DST validation and full Greek calendar-day bounds.

- Sales/customer/expense/payment grouping: Greek day/year partition; tenant/session/reversal guards preserved.

- CSV / Excel / assistant PDF / Word / filenames: Greek24h instants; date-only fields, amounts and formula safety preserved.

- Windows human logs and preflight/recovery: GTB Standard Time24h, package SHA256 manifest synchronized.

- Canonical DB/API/ONVIF/security timestamps: exact original instants preserved at input/display/export boundaries.

Accepted head d3a170fbc50719dca4de2571a0e2e6de48fa372d, PR fullCI [38307093039](https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/38307093039), job115003762533: **2518PASS/0FAIL/0SKIP**, backup6/0/0; all required jobs/build/Chromium/invariants/native PostgreSQL/realHTTP E2E success. Exact merged main fullCI [38307540149](https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/38307540149), job115005211783: same2518/0/0 and backup6/0/0. Protected Render [38308047769](https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/38308047769), actual deploy job115006800729: freshness/CI/rollback/trigger/exact-revision wait SUCCESS, resolved cc675e222d1e9fa025732f6622056e6ea5766093. Independent public health ok=true/version0.22.0+kat-test-pos/exact cc675e22. Initial fullCI38306220828 failed4 legacy export/harness/manifest checks; second38306639155 had2516PASS/2FAIL/0SKIP from old UTC regex assertions. Fixed actual helper injection, real native-day tests, Greek filename expectation and real package hashes; no skips or weakened safety assertions. New whole-source clock policy regression plus UTC/LosAngeles/Tokyo/Athens tests,23h/25h days, ambiguous/nonexistent times, non-mutating export tests pass.

Status **SOURCE LIVE / AWAITING USER**, not whole-module LAB/physical-device PASS. Existing installed Windows components/NVR/physical PC clocks were not changed or certified; new packages carry human-log policy. Legacy date-only paidAt03:00 remains historical; registration time is separate and not inferred as actual payment time. Native-control appearance on each physical browser and existing-report/user readback remain unobserved. Next read-only acceptance: refresh app, inspect existing shift times14:04–22:00 and separate400EUR registration20:22, then verify a report/export time. No new/repeated payment for documentation. Other owners/manual PASS evidence retained.

12/10/2026 — EFOOD-IDENTITY + PRODUCT-REFERENCES / SOURCE LIVE / AWAITING LAB AND PROVIDER CONTRACT

Retained owner codex/efood-bearer-20261012. Two bounded source corrections complete and released: matching actual client.store_id/client.external_partner_config_id with missing/malformed/conflict denial, and actual pricing.quantity/barcode-array reference normalization preserving SKU and leading zero. No automatic matching, catalog/price/payment interpretation or business posting. Existing provider Bearer/raw crypto, LAB/SANDBOX/customer-demo/tenant/row-lock/encryption/expiry/one-shot/idempotency/no business gates preserved.

Identity sourcePR2397/head2cf3565226f64b5cb9e51f28f20f61909f3a6aff/fullCI38303615996/job114992327896 and exact mainCI38304143019/job114994058679 SUCCESS2508PASS/0FAIL/0SKIP plus backup6/0/0/all required jobs. Pinned20:48:19.316Z and exact healthy20:50:31.211Z/23:50:31Athens; no skipped wrapper is deployment proof. Concurrent docs6e64e8b preserve owned foundationef6356591f62fbe4ae33d810e3096ee47d48ce8a/route315becb67d121b2ef1a810386f06f57dae4de528/test2bde0124889c97201080f2793cecc099bc9151a3/producttest1d5d82b37749b7855d71ea1b82c19c2839fdca92 exactly. Local22/22 remains parser/registered-HTTP/real-crypto/in-memory-adapter evidence, distinct from full native CI and live acceptance.

Protected actual LIMITED LIVE CALLBACK PASS12Oct22:56 at6d4c426 remains unchanged. No new provider callback/window/mock, credentials, real-store activation, financial/stock/fiscal transaction or historical replay in this continuation. New identity/product behavior AWAITING LAB; full Pelican/production remains OPEN, not CI PASS. Manual retains only already verified callback flow. Exact commercial product matching/unit conversion/price/VAT/discount/fee/payment/reconciliation semantics and full provider Pelican lifecycle/certification/onboarding remain OPEN.

Authorized provider follow-up verified SENT23:16:46Athens/message1a131c2b6ac76a6e/thread1a08c1108f87bb71 to qc.integrations@e-food.gr with existing cc giannis.spyros@e-food.gr/groceries@e-food.gr. Reported successful callback IDs/time and scoped dry-run; requested actual schemas, store/partner identity, item quantities/prices/substitutions/rounding/VAT, PAID/COD/fees, acknowledgement/retries/recovery, full Pelican-capable test environment/endpoints/scopes and certification/onboarding. No secrets or access-key URL sent. Latest provider24Sep confirms current virtual test shop cannot exercise full Pelican; no new response claimed and no duplicate email.

Next single action: provider-supported scoped actual acceptance of new identity/references after fresh baseline and action-time approved one-shot window, without repeating the completed credential-only gate. Commercial rules/full Pelican require verified provider contract/environment before enabling a real store. Same owner retained for residual or named handoff; all other owners/Gate6/DAILY/TABLE_SERVICE/POS/fiscal PASS and claims preserved. Checkpoints CHECKPOINTS/CHANGES/2026-10-12-efood-store-identity.md and CHECKPOINTS/CHANGES/2026-10-12-efood-product-references.md; shared tracker/active/pending and regenerated central PDF synchronized, no new manual PASS.

12/10/2026 — Global 24-hour Athens policy / SOURCE READY — AWAITING FULL CI

Retained owner codex/my-payments-athens-time-20261012; claim2401 merged a8790f89 before source. Audited all677 client/src/server/src/shared source files plus Windows human reports and build-generated patches. Explicit hour12:false in95 remaining Athens clocks across75 files; stale shift warning timezone and generated vault email fixed. Greek day/month/year defaults, recording/report filename stamps, date-only/time report range interpretation incl full-day DST bounds, CSV/Excel instant serialization with Europe/Athens label, and Windows human logs pinned to GTB Standard Time. Native datetime-local controls declare en-GB; values remain canonical24h and convert through existing Athens helper. Canonical UTC/offset-qualified storage, pure invoice/date-only values, original records, idempotency, tenant/session isolation, fiscal protocols/ONVIF UTC and other owners preserved. No real transaction/schema/historical rewrite. Node20 focused summer/winter/midnight/DST/CSV/same-source display tests and frontend build PASS; new automatic whole-source clock-policy regression. Full CI/exact guarded deploy/physical operator acceptance pending. Audit does not certify real NVR/terminal OS clocks or historical date-only payment times as correct.

12/10/2026 — EFOOD-PRODUCT-REFERENCES-03 / SOURCE READY / AWAITING FULL CI AND LAB

Same retained owner codex/efood-bearer-20261012. ClaimPR2402/head659940f9334f855d8d21cdb70813e41c9133ab95/docsCI38305024549 SUCCESS merged698bf65d9d75855d024e672252b8ac5836bcec38 before edits. Bounded foundation parser now reads actual pricing.quantity, rejects invalid/nonfinite/negative/unsafe/missing priced quantity and conflicting quantity/qty/pricing.quantity; legacy unpriced mock default1 and identity precedence retained. Barcode scalar/array normalized to unique strings preserving leading zero and full list, SKU remains primary external reference, malformed barcodes rejected. No rounding/unit conversion/price/VAT/total/payment interpretation, automatic matching, catalog mutation or commercial execution. Original provider payload/hash/encryption unchanged.

Local Node24 focused22PASS/0FAIL/0SKIP: actual provider-shaped UNIT3/fractional0.375/zero quantities; SKU identity and barcode strings, original pricing/payload immutability, legacy aliases/default, malformed/conflicting/missing quantity/barcode. Registered actual HTTP handler/real crypto/in-memory DB rejects invalid refs without events/consumption, then accepts valid quantity2 and exact replay once. Existing identity/Bearer/window guards all pass. This is isolated parser/adapter evidence; new actual provider LAB/stock/finance effects NOT TESTED. Full Node20 CI/native isolated E2E/build/invariants/Windows and exact guarded deployment required; no CI-only manual PASS.

Protected identity sourceLIVE d0a6712/guard38304571198 exact healthy23:32:38Athens and earlier actual callback limitedPASS22:56 preserved. Whole12/Pelican/production OPEN. Provider contract/payment/reconciliation/full test environment/certification reply pending from sent email1a131c2b6ac76a6e; no duplicate email, new window/provider event/mock/business action. Single next action full CI and exact release, then scoped prepared provider acceptance when supported; same owner retained until completion/named handoff.

12/10/2026 — EFOOD-PRODUCT-REFERENCES-03 / ASSIGNED / NOT TESTED

Retained owner codex/efood-bearer-20261012. Owner23:26Athens explicitly requests continuation to next item. Claim branch docs/efood-product-references-claim-20261012; source branch fix/efood-product-references-20261012. One bounded incoming-product shape change: read pricing.quantity and barcode arrays from actual provider items, preserve SKU/legacy product-reference precedence, reject malformed/conflicting quantities before persistence/one-shot consumption. Preserve encrypted original payload and all identity/auth/LAB/idempotency/no business gates. No automatic product matching, catalog rewrite, price/payment calculation, sale/stock/fiscal execution or live provider event.

Existing actual callback LIMITED LIVE PASS22:56 remains protected; identity sourcePR2397/fullCI38303615996 and exact mainCI38304143019 SUCCESS2508/0/0 plus backup6/0/0, full required jobs. Identity actual LAB acceptance remains NOT TESTED. Product-reference normalization currently defaults1 when only pricing.quantity is present and misses barcode arrays; no commercial totals inferred from virtual pricing.total_price0 vs order_total1.5. Provider contract/payment/Pelican certification requested in sent message1a131c2b6ac76a6e remains pending. Read current common records, relevant source/checkpoints/manual and fresh main before editing. Claim must merge green first.

Acceptance: provider-shaped UNIT and fractional quantity parsed accurately without inventing1, SKU retained, barcodes preserved as strings including leading zero, legacy refs retained, invalid/ambiguous quantity/barcode rejected; actual registered handler failures leave no event/mapping or consumed window, exact retry remains idempotent. Local/CI is not live acceptance. No new security window or repeated mock/business transaction solely for evidence. Whole12 remains OPEN; pricing/payment/reconciliation and full Pelican await verified contract. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-product-references.md; same owner retained until completion/named handoff.

12/10/2026 23:32 Athens — EFOOD-STORE-IDENTITY-02 / SOURCE LIVE / AWAITING LAB

Retained owner codex/efood-bearer-20261012. SourcePR2397/head2cf3565226f64b5cb9e51f28f20f61909f3a6aff/fullCI38303615996/job114992327896 SUCCESS2508PASS/0FAIL/0SKIP plus backup6/0/0/all required native PostgreSQL/security/licensing/build/contracts/invariants/HTTP E2E/Chromium/Windows. Actual guardedRender38304571198/deploy114995437111 SUCCESS: fullCI/freshness/rollback/trigger/wait passed, exact healthy production revisiond0a6712ed627ffc7409dbe7fa7aeb8f236a85da5 observed20:32:38.409Z/23:32:38Athens. Concurrent docs main65308b preserved same tested efood source blobs4228833479b0b61b7554cfd695d994018c3daea8/315becb67d121b2ef1a810386f06f57dae4de528/testec254e1421d50f32fcc53b02570012d399207c2b. Wrapper38304605574 deploySKIPPED is not deployment proof. Source availability only; no new provider event/window/LAB acceptance/financial or stock action. Earlier limited actual callback PASS22:56 retained; identity validation remains AWAITING LAB and whole12OPEN.

Single next action: authorized next bounded product reference normalization, then provider-shaped LAB acceptance only after separately prepared baseline/action-time authorization; no repeat solely for evidence. Provider schema/pricing/payment/recovery/Pelican environment/certification reply still pending; sent email1a131c2b6ac76a6e retained. Owner unchanged and not released.

12/10/2026 23:29 Athens — Global 24-hour Greece audit / IN PROGRESS

Owner codex/my-payments-athens-time-20261012 retained; user explicitly extends audit to the entire program: always24-hour Greek time in entry, recording interpretation and display. Branch fix/global-athens-24h-20261012. Inventory POS/BackOffice/SuperAdmin/reports/exports/mail/patch-generated code and input parsing; preserve canonical UTC/offset-qualified instant storage, distinguish date-only business fields, DST rules, idempotency/tenant/session boundaries and all other owners. Prior source2383/2395 and exact live2449af9 evidence retained; no entire-program PASS inferred. No historical timestamp rewrite or real transaction. Required fullCI/exact guarded deploy and independent served assets; physical endpoints/cameras unobserved remain NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-my-payments-athens-time.md.

12/10/2026 23:43:00 Athens — POS-RETAIL-RESET-10 / LIMITED USER PASS / CLOSED

Scope POS-RETAIL-RESET-10 CLOSED — limited owner-reported USER PASS. Χρήστος Μανής replied «ειναι οκ»12Oct2026 23:43:00 Europe/Athens after the explanation, seven local functional checks and normal-use instructions for automatic return to «Πελάτης λιανικής»/«Κανονική τιμή» after a completed POS transaction. Acceptance is this delivered post-completion customer/audience reset, not inferred from the prior request/image or local tests. No new transaction, charge, stock/fiscal action or replay performed for documentation.

Existing behavior already lives in StorePosPanel.clearCart: clear selected customer/points, set audience NORMAL, request same-store/current-actor NORMAL selection after successful checkout or authoritative RBS SALE_COMMITTED. No application code edit/deployment was needed for this verification. Source StorePosPanel equality against already documented healthy6d4c426df7b16742d9c2481c6f74fef0071cc99c/actual guarded38300440661 was verified. VerificationPR2400/head231b130b265d3b759f97d6fde05d1bd440f9a6fd/docsCI38304580237 SUCCESS mergedd29f1f04b9a04ebe3935741aed0b4f051d16fc21 before owner acceptance. Seven Node20 mounted-client simulated-API checks7PASS/0FAIL/0SKIP remain separate functional evidence, retained in CHECKPOINTS/EVIDENCE/pos-retail-reset-20261012/local-verification.log; they do not substitute for real acceptance.

Exact physical terminal/store/operator/shift/clientSHA, preceding card/customer/group, sale ID/amount/payment method, individually tested scan variants, measured financial/stock/Audit/control deltas and asynchronous reset network-error/reordering conditions were not supplied or independently observed: NOT TESTED. Do not infer bank/fiscal/ledger/stock or all-device/tender PASS. No old sale is repeated to repair missing measurements. The earlier screenshot shows the selection controls, not a completed-sale before/after proof.

Usage: authorized operator in the selected-store POS selects the actual customer/card/audience for that sale; after its normal successful completion, the new cart returns to retail/normal price without the old named customer/discount. A new customer must be selected or scanned again for their own transaction. Existing pending/rejected checkout retains current customer/cart until completion; that edge-case is source/local evidence, not separately owner-certified here. Preserve existing pricing/rounding, credit limits/customer balances, fiscal saved requests/idempotency, tenant/store/live permissions and all other owners.

Completed verification owner codex/pos-retail-reset-verification-20261012. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-pos-retail-reset-verification.md and POS usage manual docs/manual/pos/PASS.md updated; remove completed review from pending and synchronize numbered03/canonical PDFs in this same closure. Broader POS-AUDIENCE-CREDIT-01/settings/labels/list/permissions/store-switch and POS-CUSTOMER-ACCOUNT-01/No33 retain their original owners and residuals; no takeover or whole-module PASS. Item9 stays CLOSED; items1/2/6/8 remain at prior statuses. No further repeat test required for this bounded reset. PASS-closing PR/CI/merge is authoritative publication evidence.

12/10/2026 — Shift report Athens follow-up / SOURCE LIVE — AWAITING USER

Retained owner codex/my-payments-athens-time-20261012. Source PR #2395 merged2449af9a526f96356d79698422589ca3891ca188. User screenshot showed 02:04μ.μ.–10:00μ.μ. (already14:04–22:00 Athens) and legacy supplier400EUR paidAt03:00. Owner report now uses explicit24h Europe/Athens and Greek calendar defaults; supplier/other expense rows show original payment date and separate createdAt/Καταχώριση. No inferred historical payment time, financial mutation or replay. Original400EUR/80EUR and session isolation preserved.

PR CI38302565061 and exact mainCI38303114312:2504PASS/0FAIL/0SKIP; backup6/0/0; native historical-isolation registration projection test unskipped. Initial CI38302165991:2503PASS/1FAIL/0SKIP due isolated fixture missing existing createdAt column, fixed fixture schema and added native assertion, no skip/relaxed invariant. Protected deploy38303621230/job114992283957:trigger and exact revision wait SUCCESS, resolved2449af9a526f96356d79698422589ca3891ca188; health ok=true/version0.22.0+kat-test-pos. New physical POS screenshot acceptance remains AWAITING USER, not module LAB PASS. Next refresh existing report and verify14:04–22:00 plus separate registration20:22 for original400EUR; no new payment.

12/10/2026 — EFOOD-STORE-IDENTITY-02 / ASSIGNED / NOT TESTED

Retained owner codex/efood-bearer-20261012; claim branch docs/efood-store-identity-claim-20261012, source branch fix/efood-store-identity-20261012. Owner23:13Athens explicitly requests all feasible continuation and provider email. One bounded causal scope: normalize actual provider client.store_id and client.external_partner_config_id; reject conflicting/missing/malformed store identity before event persistence or one-shot consumption; preserve compatible unambiguous existing fixture forms. Product/pricing/payment/reconciliation implementation remains separately OPEN pending verified contract, not guessed.

Protected actual LIMITED LIVE CALLBACK PASS12Oct22:56/source6d4c426 remains authoritative, whole tracker12/Pelican/production OPEN. Preserve Bearer/raw exact crypto verification, LAB/SANDBOX/customer-demo/tenant/row-lock/expiry/consume/idempotency/encrypted-only gates and zero business side effects. Missing provider identity is not accepted as vendor validation. Required actual registered HTTP-handler/provider-shaped adversarial regressions, full Node20 CI/native PostgreSQL/build/invariants/E2E and guarded exact healthy deployment; new identity validation remains NOT TESTED/AWAITING LAB until scoped actual provider evidence. No repeated credential gate, no security-window or business action in this claim.

Latest provider correspondence05Oct confirmed virtual tests only. Explicitly authorized follow-up SENT12Oct via Gmail message1a131c2b6ac76a6e/thread1a08c1108f87bb71 to qc.integrations@e-food.gr with existing cc giannis.spyros@e-food.gr and groceries@e-food.gr. Reported exact successful callback IDs/time and limited dry-run scope; requested schemas/store identity/items/pricing/payment/rounding/substitution, callback acknowledgement/retry/recovery, full Pelican-capable test environment/endpoints/scopes and certification/onboarding. No secrets or access-key URL sent. Await provider reply; do not duplicate email.

Read current AGENTS/active/tracker/pending/numbered/manual and relevant efood checkpoints, main history after verified callback closure. Current main2449af9 preserves independent shift-time owner; no conflicting efood source change. Claim must publish green and merge before source edits. Single next action bounded store identity validation. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-store-identity.md; owner retained until completion/named handoff.

12/10/2026 — EFOOD-STORE-IDENTITY-02 / SOURCE READY / AWAITING FULL CI AND LAB

Retained owner codex/efood-bearer-20261012. ClaimPR2396/heada4081e63683143aceb6ab5f23a6307267d9cf741/docsCI38303272425 SUCCESS merged4304028f37b07ad700a4a3fd5caa498a81da8341 before source edits. Authorized provider follow-up SENT23:16:46Athens/message1a131c2b6ac76a6e/thread1a08c1108f87bb71; contract and full Pelican test environment/certification reply pending.

Bounded identity validation reads actual client.store_id/client.external_partner_config_id and retains unambiguous legacy aliases. Scalar safe identity normalization rejects malformed/object/array/boolean/unsafe numeric/control/oversize and contradictory nonempty identities instead of first-field-wins. Shared recorder/public handler require configured vendor and matching supplied store; configured partner ID requires matching supplied ID. Identity validated before event lookup/replay/conflict writes and persistence/one-shot consumption, so foreign/conflicting callback cannot corrupt existing event or consume window. Empty optional partner remains valid for current vendor when no partner ID is configured. Raw/Bearer parsing/constant-time verification, encrypted original payload, LAB/SANDBOX/customer-demo/tenant/row-lock/expiry/one-shot/idempotency and zero business writes untouched.

Local Node24 registered actual HTTP handler/real crypto/isolated in-memory adapter + existing window source contracts17PASS/0FAIL/0SKIP. Provider-shaped order persists store identity, encrypted payload and exact retry; adverse/missing/foreign/conflicting fields leave event count/window unchanged; configured partner required; existing aliases and internal mock recorder protected. First local attempt14PASS/2FAIL was test detection erroneously treating SELECT FOR UPDATE as mutation; corrected assertion recognizes leading UPDATE/INSERT, no runtime relaxation. This is simulated database evidence, not native PostgreSQL or new LIVE/LAB PASS. Full Node20CI/native isolated E2E/build/invariants and exact guarded deployment still required.

Existing LIMITED LIVE CALLBACK PASS22:56 remains protected and not repeated. New identity validation AWAITING LAB; whole tracker12/efood/Pelican production OPEN. No new window/provider event/credential/business action. Product/quantity/pricing/payment mapping and reconciliation not guessed from virtual fixtures; wait for schema clarification and continue separately after bounded identity acceptance. No manual claims added from CI. Single next action full CI and guarded exact release; owner retained for residual/named handoff.

12/10/2026 — EFOOD-STORE-IDENTITY-02 / ASSIGNED / NOT TESTED

Retained owner codex/efood-bearer-20261012; claim branch docs/efood-store-identity-claim-20261012, source branch fix/efood-store-identity-20261012. Owner23:13Athens explicitly requests all feasible continuation and provider email. One bounded causal scope: normalize actual provider client.store_id and client.external_partner_config_id; reject conflicting/missing/malformed store identity before event persistence or one-shot consumption; preserve compatible unambiguous existing fixture forms. Product/pricing/payment/reconciliation implementation remains separately OPEN pending verified contract, not guessed.

Protected actual LIMITED LIVE CALLBACK PASS12Oct22:56/source6d4c426 remains authoritative, whole tracker12/Pelican/production OPEN. Preserve Bearer/raw exact crypto verification, LAB/SANDBOX/customer-demo/tenant/row-lock/expiry/consume/idempotency/encrypted-only gates and zero business side effects. Missing provider identity is not accepted as vendor validation. Required actual registered HTTP-handler/provider-shaped adversarial regressions, full Node20 CI/native PostgreSQL/build/invariants/E2E and guarded exact healthy deployment; new identity validation remains NOT TESTED/AWAITING LAB until scoped actual provider evidence. No repeated credential gate, no security-window or business action in this claim.

Latest provider correspondence05Oct confirmed virtual tests only. Explicitly authorized follow-up SENT12Oct via Gmail message1a131c2b6ac76a6e/thread1a08c1108f87bb71 to qc.integrations@e-food.gr with existing cc giannis.spyros@e-food.gr and groceries@e-food.gr. Reported exact successful callback IDs/time and limited dry-run scope; requested schemas/store identity/items/pricing/payment/rounding/substitution, callback acknowledgement/retry/recovery, full Pelican-capable test environment/endpoints/scopes and certification/onboarding. No secrets or access-key URL sent. Await provider reply; do not duplicate email.

Read current AGENTS/active/tracker/pending/numbered/manual and relevant efood checkpoints, main history after verified callback closure. Current main2449af9 preserves independent shift-time owner; no conflicting efood source change. Claim must publish green and merge before source edits. Single next action bounded store identity validation. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-store-identity.md; owner retained until completion/named handoff.

12/10/2026 — Shift report time follow-up / AWAITING CI AND LIVE

Same retained owner codex/my-payments-athens-time-20261012. User screenshot image(20261012-200352).png at23:04Athens shows shift eb6b0927: 02:04μ.μ.–10:00μ.μ. is already14:04–22:00Athens, but ambiguous 12-hour presentation. Supplier400EUR row03:00 is original date-only paidAt, not a new timezone offset. Bounded read/display follow-up: explicit 24-hour Athens formatting and Greek calendar defaults in owner shift report; preserve occurredAt and separately expose createdAt/Καταχώριση for supplier and other expenses. Never infer actual payment time from createdAt or rewrite original records. Preserve session-specific sale/category/payment source isolation, amounts/480 totals/audit/permissions. Local Node20 10 focused tests PASS, frontend build PASS; new tests execute actual display functions across winter/summer and legacy registration vs event time. Physical/live acceptance NOT TESTED, no financial/state write. Existing source2383/live855 evidence retained; no overall PASS claim.

12/10/2026 — My payments complete + Athens time / SOURCE LIVE — AWAITING USER

Owner: codex/my-payments-athens-time-20261012 (retained). Source PR [#2383](https://github.com/xrhstosmanis-design/myworkstation-app/pull/2383) merged as 855e10ec07312e9317b5076b3f9840ce75ceb2ac. Complete current-operator/current-open-shift payments projection removes the mixed recent-80 truncation; mounted and native PostgreSQL fixtures cover 400 EUR supplier + 80 EUR payroll = 480 EUR and company/store/operator/session isolation. Explicit Europe/Athens display and calendar boundaries; new supplier datetime-local uses actual Greek payment time. Registration timestamp shown separately. Historical records were not rewritten and the real 400 EUR payment was not replayed.

Accepted source head 9b2cfe7e0c8cb8ed09ffac2d5d9a604945b98a93: full CI [38298137104](https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/38298137104), 2492 PASS / 0 FAIL / 0 SKIP; backup 6/0/0. Exact merged main CI [38298674044](https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/38298674044): **2494 PASS / 0 FAIL / 0 SKIP**, backup 6/0/0, all required jobs green, native PostgreSQL payments tests unskipped. Protected Render deployment [38299460873](https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/38299460873), job 114978586370: freshness/CI gate, rollback capture, deployment trigger and exact-revision wait all SUCCESS. Independent public /api/health returned ok=true, version 0.22.0+kat-test-pos, exact revision 855e10ec07312e9317b5076b3f9840ce75ceb2ac.

Status: **SOURCE LIVE / AWAITING USER**, not whole-module LAB or physical-terminal PASS. Final acceptance: refresh POS and confirm own payments for the intended active shift. Closed shifts remain in BackOffice/Audit; do not recreate the original 400 EUR. Existing correction/review owners retained; concurrent last-transaction reset and historical-shift isolation preserved. No real payment/review/shift-close/stock/fiscal write performed during verification.

12/10/2026 — CI fixture correction and concurrent-main reconciliation / AWAITING FULL CI

Second fullCI38297337891/headfb97c599:2485PASS/1FAIL/0SKIP. All prior customer-ledger/VM refresh failures resolved with unchanged assertions and actual Greece helper. Remaining native fixture SALE insert omitted schema-required actorName; populate that fixture column, never relax the constraint or skip native testing. First fullCI38296826307/head7b941bab:2474PASS/9FAIL/0SKIP retained. Runtime source was not deployed and no real payment action occurred.

Reconcile current main1835a917/PR2380 last-completed-amount feature and assistant routing2381 plus historical-shift claim2382. Preserve latest StorePosPanel byte-for-byte except existing Greece display/dispatch datetime additions; preserve last-transaction state/handlers/imports/style. Existing last-transaction tests and frontend build rerun. Merge parent includes exact main so no shared owner source or record is overwritten.

12/10/2026 21:48 Athens — POS-MY-PAYMENTS-COMPLETE-01 + GREECE-TIME-01 / SOURCE READY / AWAITING FULL CI + LIVE ACCEPTANCE

Owner codex/my-payments-athens-time-20261012; independent data-read/time scope explicitly requested by owner. Preserve retained payment-correction/readability and supplier-declaration owners; no takeover of their UI/actions. Read AGENTS, active list, complete tracker/pending and relevant payment/time checkpoints/manual before source. Baseline main4e1a0807. 12/10/2026 20:03 Athens — POS-SUPPLIER-DECLARATION-01 / SOURCE LIVE / AWAITING PHYSICAL ACCEPTANCE

Owner retained codex/supplier-payment-amount-20261012; source feat/supplier-payment-declaration-20261012. SourcePR2370/head1c8870b9b33b051cb92985cc373ad13c26059368/fullCI38279901823 SUCCESS2466PASS/0FAIL/0SKIP; merged28b9e3d26a0979e1fe52e04525be084a3cdc6038. Exact mainCI38280545405/job114916606019 SUCCESS2466/0/0. Both actual mounted declaration and native isolated PostgreSQL atomic/audit/concurrency/rollback/legacy-proof tests observed PASS in PR and main; all Node20/security/licensing/build/contracts/invariants/Chromium/Windows/realHTTP E2E checks passed. Local36/0/1nativeSKIP remains distinct.

Actual guarded Render38281107014/deployjob114918393064 SUCCESS, pinned hook19:59Athens and healthy exact28b9e3d20:01:32Athens; prior healtha584315f captured by normal rollback checkpoint. The separate docs wrapper38281157821 had a skipped deploy and is not release proof. Independent public verification2026-10-12T17:02:23.872418+00:00: healthok=true/same28b9e3d; platform-admin index/assets/index-ByW7AQbl.js; actual POSentry-DgPvwsxT.js/2365078bytes/SHA2564efb166a6767c0fb57ed6e80e1c15ca7c121e2430e197679fa2d736473260894 has responsibility toggle, NO_DOCUMENT payload and prior callback-ref loader. Actual CSSentry-CaKtbvq2.css/SHA25622c5a18fadf77331f773d9199c020a3e6a9d9f37abea53b653b065f5820e0523 contains scoped56px amount clearance and declaration styling. Concurrent latest docs583b9226 preserve exact component8c8b8671/CSS8de94b9b/serverfea10487 blobs.

Delivered only open-invoice payment: right keyboard icon no longer shares text space by scoped56px padding; toggle «Δηλώνω υπεύθυνα ότι παρέδωσα τα χρήματα» is required with no attachment. Amount/scope/method/date edits clear acceptance; attachment upload returns to normal proof route. Stable intent key and in-flight guard protect retry/double clicks. Server requires literal boolean acknowledgement plus NO_DOCUMENT, rejects conflicting/missing evidence, authors canonical declaration with actual supplier/method/amount and stores it atomically in description/note/Audit with actor/server time/allocations. Every no-proof submission remains PENDING_REVIEW, including owner; existing attached-owner confirmation and PDF checks unchanged. No migration or stock/fiscal/real-bank action.

No production payment/upload/shift/stock/fiscal or historical replay by this page. Physical button/keyboard appearance, actual operator no-proof submission and measured ledger/stock/control effects remain NOT TESTED; no new manual PASS or Gate/numbered closure. Prior browser was signed out after secure-auth user takeover; no repeat credential request in this turn. Next single action: CtrlF5, reopen same Open invoices view and verify full digits plus visible responsibility choice without submitting payment just for appearance. A genuinely intended LAB payment requires fresh before/after/control evidence, not replay of existing payment. Owner remains until scoped acceptance or named handoff; protected reload/readability/QR/correction/other owners retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-supplier-payment-declaration.md.

12/10/2026 19:35 Athens — POS-SUPPLIER-DECLARATION-01 / ASSIGNED / NOT TESTED

Owner codex/supplier-payment-amount-20261012; new independent branch fix/supplier-payment-declaration-20261012. Owner screenshot image(20261012-162955).png shows LAB supplier PEPSICO/invoice38468700304817/outstanding61.63/allocation61.23 and keyboard icon overlapping amount. Owner explicitly requests accountable declaration allowing submission without proof. Screenshot proves visible amount only, not uninterrupted-typing PASS; prior amount reload source2361/2761ff9b remains LIVE/AWAITING USER. Existing keyboard/scanner/readability/payment-correction and other owners preserved.

Bounded two requested changes: reserve space for keyboard trigger in open-invoice amount only; explicit declaration toggle without attachment, strict server boolean+NO_DOCUMENT mode validation, server-authored responsibility statement with actor/time/amount/supplier/method/allocation audit, original single settlement/allocation identities and role/store/shift/overpayment/idempotency guards preserved. Legacy attachment/PDF verification remains unchanged. No-document entries remain PENDING_REVIEW, including owner, because declaration is not verified proof; no automatic bank-proof matching. Retain all existing normal attached-owner confirmation and operator approval behavior. No new DB schema or production payment/stock/fiscal/shift action; physical UI and financial effects NOT TESTED until measured acceptance.

Read fresh maina584315f, current AGENTS/active/tracker/pending/manual/source and prior amount/public-release evidence. Claim published green/main before source. Require mounted toggle/submission/amount-change-reset and keyboard/CSS geometry, strict route validation/proof regression and isolated PostgreSQL rollback/idempotency/concurrency, full Node20 CI/build/invariants/E2E, guarded exact healthy release then input/toggle-only review. Do not submit/replay a real payment solely for evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-supplier-payment-declaration.md.

12/10/2026 19:16 Athens — POS-SUPPLIER-AMOUNT-REFRESH-01 / SOURCE LIVE / AWAITING USER INPUT ACCEPTANCE

Owner retained codex/supplier-payment-amount-20261012; source branch fix/supplier-payment-amount-input-20261012. SourcePR2361/headcd5fc2d86a232e9a2a2e1a2608fbedbdf9308c48/fullCI38274562341 SUCCESS2462PASS/0FAIL/0SKIP; merged2761ff9bdacc69166b87a58dae894d424f5a01a1. Exact mainCI38275178646/job114898892117 SUCCESS2462/0/0, all Node20/nativePostgreSQL/security/licensing/build/contracts/invariants/Chromium/Windows/realHTTP E2E passed. Actual guarded Render38275728497/deployjob114900669557 SUCCESS; preflight selected exact successful main, rollback checkpoint preserved, hook triggered16:12:41Z and exact health reached16:14:57Z. Concurrent docs-only main0d0b1a0 preserves source blob9b30b3cb71d00c019d17361546bfb315767c657b.

Independent public verification16:15:55.920101Z: healthok=true/revision2761ff9b/version0.22.0+kat-test-pos; canonical platform-admin serves index-Bm4CisJI.js and actual POS entry-DDOxIyn0.js2363668bytes/SHA2567bce9861ab5cfd522aaa5f8edd7b8565087278dcb8ce1738d5eddfbe9a06873f. Served loader has current callback refs and effect dependency[n.id,o] only (store/supplier), retaining cancellation and clearing allocations only on scope change. Local focused22/22 and baseline duplicateGET failure remain distinct from LIVE functional acceptance.

Owner reported «ΠΑΛΙ ΤΟ ΙΔΙΟ ΚΑΝΕΙ»19:06Athens BEFORE source merge/release; public health then still58f2c969. This is preserved old-version USER FAIL, not failure observed after2761ff9b. Browser first navigation approval timed out, one retry opened login. Secure auth request declined/user_took_over; fresh visible page remained sign-in, so no authenticated LIVE input claim. No request to reveal credentials, no production payment/upload/stock/shift/fiscal/permission or historical replay by this page. Financial/business/physical touch acceptance NOT TESTED; no new manual PASS or numbered/Gate closure.

User instructed only after exact release/served asset verification: close Payments, Ctrl+F5, reopen same invoice and type amount, without payment submission for this check. Single next action is physical owner confirmation of uninterrupted typing after reload; if it still fails inspect actual current client/reloading pattern before further causal change. Assignment retained until scoped acceptance or named handoff; all other owners/PASS protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-supplier-payment-amount-refresh.md.

12/10/2026 — POS-SUPPLIER-AMOUNT-REFRESH-01 / SOURCE READY / AWAITING CI + LIVE INPUT ACCEPTANCE

Owner codex/supplier-payment-amount-20261012; source branch fix/supplier-payment-amount-input-20261012. Explicit owner approval18:52Athens permits claim/source push, PR and green-CI merge. ClaimPR2360/headdff9e6e9/docsCI38273887032 SUCCESS merged3344749816520fe3bf9c87d0706acf9b6d191c38 before repository source change. Prior approval rejections and expired terminal Git authentication are historical; connected GitHub publication succeeded after explicit approval.

Bounded loading-effect change: current api/message callbacks are refs, not reload dependencies; only actual store/supplier changes fetch and clear allocations. Empty scope clears loading without a request; obsolete responses remain cancelled. Existing amount strings, cents/parser, proof, cash/role guards, payload/idempotency and successful completion handlers unchanged. Native mounted baseline reproduces repeatedGET2instead1; new22/22focused regressions PASS including parent-callback/focus/caret/comma preservation, supplier/store reset, late response and latest error handler, payment completion, five-photo batches and supplier PDF/access proof. Local Node24.19.0; required Node20fullCI/build/invariants/native E2E/Windows and exact main healthy guarded release pending. Local/synthetic is not LIVE/LAB PASS. No production payment, stock/fiscal/shift/permission or historical replay; physical operator acceptance NOT TESTED. Existing open-invoice readability/camera/QR/correction and numbered owners/PASS protected; no new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-supplier-payment-amount-refresh.md. Next fullCI/green merge/guarded release then input-only acceptance without submitting a payment.

12/10/2026 18:50 Athens — POS-SUPPLIER-AMOUNT-REFRESH-01 / ASSIGNED / USER FAIL

Owner codex/supplier-payment-amount-20261012, branch fix/supplier-payment-amount-refresh-20261012. User explicitly reports amount input repeatedly refreshing and instructs «ΞΕΚΙΝΑ». Screenshot: selected supplier ΜΑΝΤΖΙΛΑΣ ΧΡΗΣΤΟΣ ΚΑΙ ΣΙΑ ΕΕ / invoice14083 / outstanding657.54EUR / allocation0.00. No payment was submitted by this page. Physical terminal/operator/client revision NOT TESTED. Public health observed58f2c969; fresh mainb689bbb1. Existing open-invoice readability, camera/QR/completion and correction-payment owners remain unchanged; this independent claim is only allocation-input reload lifecycle.

Source causal evidence: StoreSupplierOpenInvoicePayment loading effect depends on api and setMessage and clears items/allocations. Modal recreates invoiceMessage on every render. Bounded fix loads on actual selected-store/supplier change using latest callback refs; rejects obsolete responses and clears allocation on scope changes. Preserve comma decimals, live input DOM/focus, amount ceiling, mandatory proof, payment methods, role/store guards, idempotency payload and success completion. No API/server/schema/auth/stock/fiscal or historical payment mutation. Require mounted parent-rerender/focus/decimal and delayed scope-response tests, existing supplier/payment regressions, Node20 build/full CI, exact guarded healthy deploy. CI is not LIVE/LAB PASS; payment submission is not needed to demonstrate input continuity. Claim published on main before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-supplier-payment-amount-refresh.md.

12/10/2026 23:52 Athens — DAILY-ONLINE-DELIVERY-FIELDS-01 / ASSIGNED / NOT TESTED

Retained owner codex/daily-online-store-20261011, issue #2054; source branch feat/daily-online-members-qr-20261012. Explicit user expansion: delivery from rooms must offer floor, clinic/department and room/office, matching KAT; QR will be printed as cards or a room sign. Read-only source check: public KAT form and modifier route already collect/store building/floor/department/room; existing department-required delivery and pickup behavior preserved. Server print payload contains location, but StoreOnlineOrdersV2 list and its print function omit it. Bounded additive fix: labeled delivery destination and notes in V2 staff list and printed slip; safe text escaping for printed destination/customer/product values. No changes to checkout, payments, status transitions, fiscal, stock, delivery permission, role/license or existing member claim. Printing QR stays within merged claim #2399: four cards on A4 and one A5 sign, identical saved canonical store URL. Native/mounted print/location regression plus full CI and exact healthy release required; not LAB PASS. No repeated protected LAB transactions and no public DAILY activation. Source change begins only after this precise claim merges. Preserve other owners and all previous PASS.

12/10/2026 23:24 Athens — DAILY-ONLINE-MEMBERS-QR-01 / ASSIGNED / NOT TESTED

Retained owner codex/daily-online-store-20261011, issue2054; branch feat/daily-online-members-qr-20261012. User explicitly requests readiness for Wednesday14Oct, customer QR opening own online site, public registration for doctors/staff with adjustable per-store discounts; unknown percentages stay0 until configured and completed orders retain original prices. Existing KAT/Gate6, historical PASS2391 and other modifier/layout/fiscal/payment owners preserved. No numbered/whole DAILY closure or public activation now.

Read-only23:18–23:23 Super Admin current DAILY Online Store successfully reopened via normal Platform UI: slugdaily-bite persisted, public disabled, surcharge.10, stockcheckon, pickup/deliveryon, fee0/minimum3, doctor15/nurse10, cash/card enabled; original branding still DAILY BITE E E/red template. DOM snapshot8753-product load timed out; screenshot succeeds. No setting/member/product/order/stock/shift change. Source existing manual doctor/nurse whitelist and configurable percentages; staff column already exists but is not exposed/used in member path. No public registration exists. DAILY0employees remains readiness blocker; installed terminal/physical fiscal/PIN/fulfillment stillNOTTESTED. LAB observed new MAINcash7.70/count1/latest22:48water.50 from another page; not this page's action or prior baseline. Never replay protected setup/BAKE15/ONL003/ordinarysale/old shifts.

Bounded source: customer-facing registration with doctor/staff/customer choices; doctor/staff pending store approval before discount, ordinary customer0. Preserve legacy approved doctor/nurse and6digit personal PIN flow, hashed server storage and strict per-company/store member/session checks. Registration must not overwrite/re-enable existing identities or expose credential hashes/tokens, must validate/rate-limit and handle concurrent duplicate requests. Explicit approval/disabling through existing authorized admin member management and audit; no role/license/security widening. Add adjustable staff percentage using existing config column; protect other stores' existing settings/nurse values. DAILY-only doctor/staff0 configuration after claim/release, never global reset. Catalog/order server uses current verified percentage and existing modifiers, stores order amounts immutably; no historical repricing, payment/routing/fiscal/stock changes. QR display/download/print encodes ONLY saved own canonical online URL, no token/PIN/Store Mode or LAB links; no automatic public activation. Provide customer registration mobile layout and pending/approved messages.

Require meaningful mounted/browser UI and QR decode/saved-URL/no-secret tests, isolated actual PostgreSQL register/concurrency/approval/revocation/current-price/old-order invariance/foreign tenant tests, existing KAT member and checkout regressions, full Node20 CI/build/invariants/E2E and exact guarded healthy release before acceptance. CI-only stays AWAITING LAB. New fictional LAB member tests need precise fresh state/control baseline before write and secure credential handoff when browser requires it; no real registration/payment/stock diagnostics. Public DAILY stays disabled until Wednesday readiness.

Claim must be green/main before source/config writes. Single next implement this bounded QR/member extension after claim merge, keep wider availability/install residual open with owners.

12/10/2026 22:48 Athens — DAILY-HISTORICAL-SHIFT-01 / LIMITED LAB READBACK PASS / CLOSED

Owner codex/daily-online-store-20261011 retains wider DAILY/issue2054, no transfer/release or whole Gate/numbered closure. ClaimPR2382/head8dbb0ed/docsCI38296777158SUCCESS merged2716bf9 before source. SourcePR2384/finalhead7fce87c729f22db9e55004f673fc7b4e871a21cf/treeae7c09078b95e3747caa6088778a91022fa80d71 mergedc6c724374642cceecce11286c3b035130bcd05da. Actual-handler PostgreSQL historical overlap/mixed/foreign/missing/conflicting/legacy/reversal-reference tests passed unskipped in both completed logs. Initial db81 CI38297526560 cancelled after superseded source; final accepted head7fce only. Local Node20 full2443/0/30isolatedDBSKIP, focused10/0/1DBSKIP and productionbuildPASS; initial full attempt before Prisma generation had41import/setup failures, then corrected full suite passed, no waived assertions.

Concurrent latest source855e10ec07312e9317b5076b3f9840ce75ceb2ac preserves identical historical route/test and includes other owners' Greece-time/payment work. Full mainCI38298674044/job114977079864 SUCCESS2494/0/0 plus backup6/0/0, actual native historical regression again unskipped. Existing guarded deploy38299460873/job114978586370 SUCCESS verified expected855e10e at19:45:30Z; workflow wrapper head dfe7a89 is NOT the deployed source. Independent public GET19:46:28.454567Z/22:46:28Athens HTTP200/ok:true/revision855e10e. Earlier c6-trigger wrapper38298987019 had skipped hook/health steps and is not release proof. No manual hook, schema/data/fiscal/stock or business mutation by this page.

Real read-only acceptance22:46–22:49Athens, authenticated Super Admin Χρήστος Μάνης/cloudChrome1/tab2/selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. Same original closed session865e6a48-ccbe-4238-8580-6d70682050a5: refreshed journal still exactly expenses23+1 and ONL-003 cash1.40 at19:19 (IDs displayed#pay_982/#pay_036/#7ca3cde), no duplicate. Categories now ONLY ΔΟΚΙΜΑΣΤΙΚΑ quantity1/sales1/revenue1.40 instead pastry2/2.80 plus foreign-terminal NEPA. Summary now1sale/1.40/average1.40 instead7/3.60. Money tab CASH1.40/1movement. Stored cash1.40/card0/EFTPOS0/expenses24/closing97.40/difference0 remain unchanged.

MAIN control same original closed session#3a186861: same8ledger movements including old POS/reversals/customer receipts and ordinary baked sale1.40, no ONL-003. Summary now6sales/net2.20 instead leaked7/3.60; categories pastry1piece/1sale/1.40 and NEPA1quantity/5sales/.80. Stored cash3.10/card.50/EFTPOS.50/expenses0/closing7.20/difference0 unchanged. Combined canonical sales7/net3.60 agree across two separate reports. This is LIMITED LAB PASS of historical report isolation/readback, not a new stock/payment delta, independent raw-ID database audit, mixed live payment, fiscal/physical/ordinary-Owner or full DAILY acceptance. No new sale, baking, receipt, shift closure/reopen or offline replay. Stock38/raw25/baked13 observed22:08 remains pre-source read evidence, not new acceptance delta. Active-only source2373 count/category acceptance remains separately AWAITING LAB because original shift is closed.

Evidence CHECKPOINTS/EVIDENCE/daily-historical-shift-20261012/{summary-before,summary-after,categories-after,control-after}.jpg; verified usage docs/manual/shift-reports/PASS.md. Closed independent historical pending claim only, wider retained DAILY residual remains OPEN: actual install/public activation, active-only acceptance, zero baked/last piece/returns/waste and other assigned modifier work. Single next: separately identify the remaining acceptance fixture and fresh all-control baselines under retained scope; never replay ONL-003/setup/BAKE15/ordinary sale. Other owners/Gate2/Gate6 protected.

12/10/2026 22:23 Athens — DAILY-HISTORICAL-SHIFT-01 / SOURCE READY / AWAITING CI AND LAB

Retained owner codex/daily-online-store-20261011. ClaimPR2382/head8dbb0ed06b3b01b8b89efd4fec95db7767d0a69e/docsCI38296777158 SUCCESS merged2716bf9e6ff5141ebcc627168c03e4049e0ec515 before source. Historical detail now resolves completed sale IDs from exact canonical ledger-ID tokens or same-company/store validated POS_SALE_COMPLETED audit sessions, excludes conflicting session evidence, then uses those IDs consistently for categories/payments/sales. Mixed financial rows do not multiply sales. Product/category tenant joins guarded. Existing journal/expense/difference/close/force-close/VAT/auth business paths unchanged, no timestamp guessing, no data/stock/fiscal/session mutation.

Local Node20 focused10PASS/0FAIL/1nativeDBSKIP; productionbuild exit0/client+server preparation+Prisma generation. Full local suite running after generation. Initial parallel full-suite attempt started before Prisma generation and failed imports; this is setup failure, not accepted validation, retained for audit. Native actual handler PostgreSQL regression covers overlapping terminals, mixed payments, original POS legacy ledger, prefix collision, missing/conflicting/foreign evidence, other store/company and unpaid sale, and unchanged cash/expense/VAT readback. Full native CI/build/invariants/E2E and exact guarded healthy revision required before real read-only acceptance. No manual PASS or whole Gate/numbered closure.

Actual LAB evidence remains22:14 FAIL: session865e6a48 summary7sales3.60/categorypastry2pieces2.80 instead1sale1.40; exact journal ONL-003 cash1.40 one row plus2expenses intact. Prior active source2373 functional acceptance separately AWAITING LAB. Single next full CI/green merge/guarded exact release then same-session read-only comparison including MAIN control, no replay. DAILY real installation/public activation/wider residual OPEN; owner retained.

12/10/2026 22:15 Athens — DAILY-HISTORICAL-SHIFT-01 / ASSIGNED / LAB FAIL

Owner codex/daily-online-store-20261011 retained, issue2054; independent expanded read-only report scope explicitly authorized by user after observed FAIL. Branch fix/daily-historical-shift-20261012. Fresh main e663c3de543de33d7444eb6886267ca40d657f22/history since source155158e7 reviewed. Protect current-cash owner, historical close/force-close/fiscal/returns owners and all shared assignments; no takeover of business writes.

Read-only browser12Oct22:08–22:14Athens: selected LAB fixture total38/raw25/baked13, no new delta inferred. Existing historical report Commercial → Other functions → LAB → Βάρδιες & Διαφορές → A/A3 opens exact session865e6a48-ccbe-4238-8580-6d70682050a5. Ledger has exactly two old expenses23+1 and one ONL-003 cash1.40 at19:19, no duplicate. Categories incorrectly show ΔΟΚΙΜΑΣΤΙΚΑ quantity2/sales2/revenue2.80 plus ΝΕΡΑ quantity1/sales5/revenue.80; summary7sales/3.60 against this shift cash1.40/card0. SQL categories/payments/sales filter store+overlapping time range rather than actual session; this leaks MAIN sales into LAB-POS-02 history. This is a distinct real historical report FAIL, not proof that prior active-only source2373 failed. Active-only acceptance remains AWAITING LAB. No reopen/replay/stock/payment/close action.

Bounded correction only historical detail category/payment/sale aggregates: determine each completed sale's original shift from canonical sale-ID ledger or validated successful POS_SALE_COMPLETED audit, same company/store/session. No timestamp fallback; mixed payments count one sale; audit/ledger conflicts fail closed. Preserve exact transaction ledger, cash/difference/expense totals, existing normal POS/reversal/waste handling, auth/module/tenant guards, routing and source2373. Require isolated actual-handler PostgreSQL overlapping terminals, mixed payments, prefix collisions, missing/conflicting/foreign audit, tenant/store and normal POS coverage; full Node20 CI/build/invariants/E2E, green merge and exact healthy guarded release. Then read-only SAME session/category/summary and control MAIN acceptance. Expected LAB-POS-02 one online sale1.40, category one piece1.40; ledger remains three movements. No new sale/bake/setup/payment/shift or production DB correction. CI alone stays AWAITING LAB; DAILY install/public activation and wider residual remain OPEN. Single next action publish this claim green/main before source.

12/10/2026 20:32 Athens — DAILY-ONLINE-SHIFT-PROJECTION-01 / SOURCE LIVE / AWAITING LAB / HANDOFF

Owner codex/daily-online-store-20261011 retained/issue2054; no receiver/release. SourcePR2373/finalheaddf07eb25880d5d1b0924dc5efdbcb3dc17abeca5/treeb6511c72d7032c19988875a813492d58292cd7f9 merged155158e734fce318a769c0f72eeb20848800f820. Exact fullPRCI38282529062 attempt2/job114926279337 SUCCESS2469PASS/0FAIL/0SKIP plus backup6/0/0; exactmainCI38284031296/job114928093575 SUCCESS2469/0/0 plus backup6/0/0. Build/contracts/invariants, native PostgreSQL/security/license/role/session, rendered Chromium/Windows, archive and realHTTP E2E passed. Native actual recent-sale SQL/mounted online mixed-payment/category tests and original shift own/all/tenant/session predicate explicitly read unskipped in completed logs. LocalNode20full2433/0/29isolatedDBSKIP and productionbuild remain distinct. PR attempt1 failed only known unrelated pos-capacity-runner timing offeredLatencyMs>=latencyMs:2468/1/0; same unchanged isolated8/8 and fullattempt2 passed, no assertion/threshold/owner/source bypass. Initial sourceheadcaf79 CI38282093146 superseded by preserved supplier-release reconciliation, not the final accepted head.

Existing guarded Render workflow38284539708/deployjob114929705267 SUCCESS ran for155158e7 after exact main CI. Independent public GET12Oct17:31:45.072541Z/20:31:45Athens returned HTTP200/ok:true/version0.22.0+kat-test-pos/revision155158e734fce318a769c0f72eeb20848800f820. Prior publichealth20:21 was28b9e3d; no rollback to old baking43594017, no manual deploy/migration/production DB command. SOURCE LIVE is release evidence, not functional LAB PASS.

Bounded additive read projection now includes ONLINE_POS, validates immutable successful checkout audit saleId/sessionId against same company/store shift, returns exact online ledger IDs, canonical SaleLine categories and Payment split. UI deduplicates those financial copies by ID and recognizes Greek online-description ending. Protected normal POS/returns/WASTE/customer receipts/current cash, routing/fiscal/stock/idempotency/auth/module behavior preserved. Existing recent-list50row cap and legacy fallback remain unchanged; this is not a new unlimited analytical report. No business-data correction or new sale/order/baking/receipt/payment/shift action by this page.

Existing ONL-003 diagnostic readback before source release: DELIVERED, linked sale0eb926dd-4c5e-4c68-b619-6e790aca694b COMPLETED1.40/LAB-POS-02, NON_FISCAL/LAB-FISCAL-02, noEFTPOSrequired, stockdirect1 and session865e6a48-ccbe-4238-8580-6d70682050a5/SALE_CASH1.40, fiveUIlinksOK and duplicates0. Photo CHECKPOINTS/EVIDENCE/daily-baking-20261012/online-readback.jpg. Exact internalorder/payment IDs and customer-side confirmation remain NOTTESTED. This readback is not a new count/category PASS or stock delta. Prior measured BAKE15/POSsale/online-stock/cash PASS and Gate6ONL-002 remain protected.

LAB changed independently before this turn: old MAIN closed12Oct19:27:51/cash3.10/card.50/difference0; oldLAB-POS-02closed19:28:00/cash1.40/difference0; new MAIN opened19:28 byLAB POS2/opening7.20/current7.20/count0/collections0. These are observed read-only values, not this page's closure/actions or a reused baseline for a new transaction. Earlier38/raw25/baked13 is the19:19 historical measured result, not a fresh20:32 stock claim. Read-only inventory search attempt20:14 timed out after300s/returned20:19; execution of search unknown, no fresh stock value/photo and no write or repeat. Browser operation timeout therefore prevents post-release authenticated count/category verification; public non-auth health API remained accessible. No security/auth bypass or protected public-tab probing.

Single next action: recover authorized browser and verify existing sale in its original historical shift/report where available, without reopening a closed shift or replaying ONL-003/BAKE15/setup/POSsale. Current active-only center cannot prove old closed-shift count/category3/1.40. If further acceptance needs a newly identified fixture/action, first expand the bounded claim and record fresh all-control baselines, preserve other owners and never replay old transactions. Current count/category/source functional acceptance remains AWAITING LAB, full DAILY acceptance/install/publicactivation/empty-baked/returns/waste/lastpiece/modifier-price residual stays OPEN with existing owners. No whole Gate/numbered closure or new manual PASS. Release waiting is superseded; retain assignment until real acceptance or a named receiving page.

12/10/2026 20:06 Athens — DAILY-ONLINE-SHIFT-PROJECTION-01 / SOURCE READY / AWAITING FULL CI AND LAB

Same retained owner codex/daily-online-store-20261011; source branch feat/daily-online-shift-projection-20261012. ClaimPR2371/finalhead258c901136e96f2d263407e67d12ab8af90afceb/docsCI38281056853SUCCESS merged583b9226ebe72b43c599a750d98958ab1e3f2c52 before source. Preserve concurrent other-owner tree, prior scoped stock/cash/baking PASS and Gate6.

Bounded read-only correction: recent sale route includes ONLINE_POS; successful immutable POS_SALE_COMPLETED saleId/sessionId audit maps online sale to same-company/store CashShiftSession. Existing operator own/all, terminal OPEN SHIFT view and tenant/store predicates remain. Exact order-number/method descriptions plus session return canonical ledger IDs, not prefix matching. UI displays original SaleLine category and Payment split once, suppresses those ledger copies by ID; Greek boundary replaced with whitespace/end fallback. No checkout/routing/financial/stock/fiscal/schema mutations. Existing return/WASTE/customer receipt/current-cash behavior preserved.

Local Node20 productionbuildPASS; focused14PASS/0FAIL/2isolatedDBSKIP. New mounted real panel proves one mixed online sale count1/categoryqty1/value1.40, controlcount0/no category, no foreign/closed session leak; fallback Greek description recognized. New isolated PostgreSQL regression executes complete actual recent-sale handler/query for online audit session, mixed ledger IDs, exact order-prefix collision, category, own/all/terminal/company/store/closed/unpaid/missing-audit guards. Database regression awaits native CI, not local or LAB PASS. First full local suite2432PASS/1FAIL/29SKIP had only an old WASTE source-text assertion; preserve original IN predicate and add online OR without editing/weaking assertion, focused test passes; final full local Node20 run2433PASS/0FAIL/29isolatedDBSKIP (2462tests), distinct from native CI/LAB. Require exact full CI/main/guarded healthy release before LAB retest.

Read-only20:00 existing OnlineOrdersLAB shows ONL-003 DELIVERED, linked0eb926dd-4c5e-4c68-b619-6e790aca694b COMPLETED1.40/LAB-POS-02, NON_FISCAL/LAB-FISCAL-02, EFTPOSnotrequired, stockdirect1, shift865e6a48-ccbe-4238-8580-6d70682050a5/SALE_CASH1.40, all5 UI linksOK/duplicates0. This is diagnostic existing readback, not independent payment/order internalID audit or new count/category PASS. Photo CHECKPOINTS/EVIDENCE/daily-baking-20261012/online-readback.jpg. Earlier19:52 new MAIN7.20/count0/collections0 and closed shiftsMAIN19:27:51/LAB-POS-0219:28:00 observed. Never reopen closed shift or repeat existing sale/baking/receipt to fill evidence. Actual current read-projection acceptance remains AWAITING LAB; historical category/count UI is not exposed by current active-only panel. Full DAILY activation/install/empty-baked/returns/waste/lastpiece residual OPEN. Single next: full CI and merge then exact deployed revision plus read-only same-sale verification; retain ownership/no duplicate actions.

12/10/2026 19:56 Athens — DAILY-ONLINE-SHIFT-PROJECTION-01 / ASSIGNED / LAB FAIL

Owner remains codex/daily-online-store-20261011, issue2054; bounded source branch fix/daily-online-shift-projection-20261012. User explicitly says START after proposed online count/category correction. Prior final receipt PR2366/2c2c2ce3 protects BAKE15, normal POS, listing, online stock38/raw25/baked13 and cash1.40; count/category FAIL remains authoritative. Fresh mainfc91fdb5 and history since58f2c969 reviewed; exact public health a584315f0d45fe130fd8532c4db5a733830a923f. Browser recovered: selected LAB now has only new MAIN shift opened12Oct19:28 by LAB POS2, opening/current7.20, count0/all collections0. Old shifts are no longer open; never reopen/replay them for evidence. Original ONL-003/sale0eb926dd-4c5e-4c68-b619-6e790aca694b remains the read-only acceptance target.

Independent scope: recent-sale selected-shift read projection includes ONLINE_POS using existing authoritative audit saleId/sessionId and canonical SaleLine/Payment; preserve tenant/store/role/terminal guards. Deduplicate sale and financial ledger rows by stable identities, fix Greek online-description boundary only where still needed. No checkout/routing/payment/stock/fiscal/schema/data correction. Protect Gate6 prior PASS, current-cash/customer receipt/returns and other assigned owners; no takeover.

Require native PostgreSQL tenant/store/session filtering and mixed-payment/count/category regressions plus mounted UI, Node20 full CI/build/invariants/E2E and exact deployed health. CI-only remains AWAITING LAB; read-only existing completed order/history acceptance, no duplicate transaction. Full DAILY installation/public activation remains OPEN.

Claim must be green/main before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-daily-online-shift-projection.md. Single next action: implement bounded read projection after claim publication, then verify existing historical ONL-003 without business mutation.

12/10/2026 19:27 Athens — DAILY-BAKING-SAME-PRODUCT / ONLINE STOCK + CASH DELTA PASS / SHIFT DISPLAY FAIL / HANDOFF

12/10/2026 — VOICE-ASSISTANT-01 / selected POS consumption source RELEASED / AWAITING LIVE LAB

Owner codex/unified-voice-assistant-20261010 retained. Source PR2356/head13264eb4c049d1353bdabfbdfa2c7b0c0c00dd66 merged 58f2c9698386b1ed280c470b5a2c37520ee7cdcf; all14 owned source blobs verified. Full PR CI38259019627 and exact merged-main CI38259656954 SUCCESS: server2461PASS/0FAIL/0SKIP, separate backup-monitor6PASS/0FAIL/0SKIP, all four jobs green. Native PostgreSQL consumption read, mounted Owner/Platform evidence, actual central Ask handler and protected cash/product/session/voice checks passed. Guarded Render38260273820/deploy114848761280 actually deployed and reached exact healthy58f2c969 at2026-10-12T14:07:14.1103843Z; independent public health also confirmed exact revision/version0.22.0+kat-test-pos. No manual deployment, guard bypass or new service/provider/key.

Shared selected-store/date report now reads recorded POS SELF_CONSUMPTION / PRODUCT_DESTRUCTION from PosSaleActionAudit with captured item names, quantities, reference values, recorded operator/time. Same source and visible evidence for native Super Admin and licensed Owner, existing AI_OWNER_ASSISTANT/INVENTORY and fresh session/store gates preserved. Model supplies no tenant IDs. Explicit caps500events/1000rows, Athens inclusive dates and observed-through-now; future/incomplete period marked. Missing/capped/unavailable/foreign source does not imply zero or a complete total. No cross-unit quantity sum; reference value is not cash, turnover or purchase cost. Consumption wording excludes cash fallback and an unperformed source read cannot claim no records.

Actual12Oct selected Διαδόχου user screenshot remains the before-release capability gap, not proof of absent consumption or exact backend version. No new LIVE numerical response/before-after query, normal Owner acceptance or physical mic was performed. Existing browser secure-auth rejection/retained-data restriction is not retried or circumvented. Current source acceptance remains AWAITING LAB, not manual PASS. Existing No39 SELF-01 and stock/financial actions are protected and never replayed.

Full tracker32/printed30/VOICE stays OPEN/ASSIGNED. Next exact acceptance: ordinary read-only selected LAB report for10Oct existing SELF-01 source, then typed/voice-reviewed Ask with explicit dates and independent same-source refresh; no new consumption, payment, stock or fiscal action. Owner native/source authorization and revoked/foreign cases require separate live acceptance. All-store consumption, WASTE, payments/expenses/invoices/suppliers/personnel/shifts/events and broader program parity remain OPEN under same assistant owner; prior names/offers live, Owner stock AFTER and physical-device residual preserved. This release closes only the source pipeline for this bounded domain.

12/10/2026 16:46 Athens — DAILY-BAKING-SAME-PRODUCT / LIMITED LAB SETUP + POLICY PASS / STAFF ACCEPTANCE BLOCKED

Owner codex/daily-online-store-20261011 retained, issue2054, receipt branch docs/daily-baking-lab-setup-20261012. IntegratedPR2319/source43594017 full PR/main CI2397PASS/0FAIL/0SKIP remains verified. User«ξεκινα» confirms previously offered Render«My Workspace»/tea-d9ie26vaqgkc739uudqg. Read-only Render identifies olddep-db5uubg473hc73cglstg/update_failed: patch-pos-return-diagnostics.js aborted at11Oct20:20:29UTC, Global error handler signature changed. Other owner's PR2324/9d69ab09 already repaired unique-tail compatibility preserving baked-stock409; no duplicate source fix or manual deployment. Renderdep-db6bb25ckfvc73crfqhg live745ec31aa18067317e49ff30e7065ae9e1e20eae finished12Oct10:26:49UTC; independent browserhealth12Oct16:14Athens ok:true/exact745ec31. Integration is ancestor:22/23 owned source paths identical, store-pos.js has subsequent customer-account owner's changes and retains original same-product hook. Newer main work/owners preserved; no rollback/redeploy to old43594017.

Fresh measured LAB storecmtpopbgo000trhb5ng9ytiru, SuperAdminΧρήστοςΜάνης; virtual browser only, physical terminal NOT TESTED. BEFORE16:32–16:35 MAIN opened11Oct16:51/opΕργαστήριοΧειριστής1/count7/latest11Oct20:39/opening4.10/drawer4.40/cash.30/card.50/IRIS0/total.80/expenses-in-out0; controlLAB-POS-02 opened11Oct11:17/sameop/count2/latest—/opening120/drawer96/cash-card-IRIS-total-in-out0/expenses24. Action1 exact-stock correction once at12Oct16:36:15 byΧρήστοςΜάνης:0→40, oneMANUAL_ADJUSTMENT+40/note«Χειροκίνητη ακριβής διόρθωση stock», ledgerrecorded40/difference0/duplicates0. This is audited LAB setup, NOT invoice receipt acceptance. Action2 separately saved fixture policy«Σημερινά ψημένα του ίδιου είδους»; success message observed and close/reopen retained selected same-product rule. Refreshed archive shows originalSKU/price1.40/VAT13/PIECE plus TOTAL40/UNBAKED40/BAKED0, total retail56/cost25.20. No secondSKU/source link. Fixture remains unchecked for public online, listed count1/98 unchanged; no Save Products/Settings or other product rule. Final16:46 control ledger still40/sameonePURCHASE/difference0/duplicates0. Both refreshed shifts unchanged MAINcount7/drawer4.40/card+IRIS.50/total.80 and controlcount2/drawer96/combined0/total0; previously detailed payment split retained. Limited setup/policy/partition LAB PASS only, manual records only these observed operations. Photo CHECKPOINTS/EVIDENCE/daily-baking-20261012/partition-before-bake.jpg.

Staff POS login selected«Εργαστήριο Χειριστής1» at correct LAB, secure browserAuth PIN request submitted once; actual UI replied«Λανθασμένο PIN». No credential inspected or reconstructed, no account/PIN/rights change, no bypass. No authenticated staff modal/BAKE15, sale1, online order, return, waste or recipe/stock concurrency acceptance performed. These remain NOT TESTED, not application bake FAIL. Single next action: correct authorized staff login, refresh ALL stock/shift/control baselines then BAKE15 once expecting40/25/15 with no financial changes; only then separate measured sale1→39/25/14. Never repeat setup40 or create secondproduct. Exact physical/install/realDAILYpublic/config/modifiers acceptance remains separate; real DAILY untouched/publicactivation prohibited pending readiness. Returning to commercial menu reselected defaultN40CONTROL; corrected explicitly toLAB before further reads; no N40 writes, selector behavior not owned here. Gate2/Gate6, previous manual PASS and all other owners retained. Full baking/online acceptance remains OPEN/ASSIGNED.

12/10/2026 16:40 Athens — VOICE-ASSISTANT-01 / shared own-consumption report ASSIGNED / NOT TESTED

Same owner codex/unified-voice-assistant-20261010; continuation branch feat/voice-consumption-report-20261012. User explicitly expands assistant parity across all application domains and supplies actual selected Διαδόχου screenshot: question «βγάλε μου λίστα ιδιοκατανάλωσης» receives a cash-only/no-source answer. This is a LIVE capability gap, not evidence of zero consumption. Session/selected-region PR2337 and partial prior PASS remain protected; all-domain module OPEN. First bounded causal change reads the existing recorded POS self-consumption/product-destruction source into a shared selected-store/date report, with visible products, quantities, reference value, operator and recorded time. No alteration/replay of existing source events, No39 consumption posting, stock, fiscal, cash or payment calculations.

Fresh actual role/session/company/store checks and existing Owner AI/INVENTORY license gates at every read/response boundary; the model never chooses tenant IDs. Same readable data projection in Super Admin and licensed Owner; explicit global consumption remains pending unless independently bounded and authorized. Strict date/query arguments, Athena calendar, source/output caps, no false zero on unavailable/incomplete sources, no private details/secrets. Exact existing-source list evidence and plain Greek distinction between no records and unsupported search. Existing provider reused under prior approval; blocked browser authentication is not retried.

Acceptance: isolated read-only source/query/projection/session/module/calendar/cap/malformed-data tests plus mounted evidence UI and full CI/main/guard. Actual LAB comparison must use ordinary recorded source before/after, no new business transactions; CI does not establish LIVE PASS. Broader payments/expenses/invoices/suppliers/staff/shifts/events parity remains OPEN, not claimed complete. Previous normal Owner stock AFTER, name/offer live and physical microphone checks retained. No new manual PASS.

12/10/2026 14:16 Athens — TASK18-MONITOR-RETRY-01 / CRON RELEASE VERIFIED / REAL BACKUP ACCEPTANCE PENDING

Same owner fix/backup-monitor-retry-20261012 retained; no handoff to another page. ClaimPR2345/c8592954 preceded sourcePR2346/head79c365c6/mergecc1fbb23744e2983d2ab3ef73e628d1227c426ae. Exact PR full CI38239822292 attempt2 SUCCESS:2443 server tests/0fail plus6 backup delivery fault tests, production builds/invariants/isolated HTTP/archive/capacity harness checks. Attempt1 had one existing unrelated timing assertion failure in pos-capacity-runner.test.js; isolated8/8passed, only failed workflow jobs retried without editing or weakening that owner's test. This does not claim production capacity.

Main full CI38240918090 SUCCESS. Render backup cron deploydep-db6c2p6k1f9s73f6d0kg LIVE14:16:03Athens at exactcc1fbb23744e2983d2ab3ef73e628d1227c426ae; autoDeploy checksPass and3-hour schedule unchanged. Guarded web workflow38241518491 SUCCESS with deploySKIPPED. No POS/web restart, production DB/schema/settings/credential change, purchase, manual backup or restore.

Bounded release verified, not a new successful backup or LIVE backup PASS. The interrupted12:00 run remains STARTED and the last recorded success is09:01:16Athens; neither row changed manually. Database crash cause/OOM remains unconfirmed. Preserved prior bounded30Sep upload/download/TOC evidence and5OctHeadObject correction. Final read-only database snapshot14:17:35:10connections,0lock waiters,0active queries>15s,recoveryfalse. Single next action: observe next scheduled15:00Athens cron run, independently check its final monitor/log evidence and off-site archive verification before accepting recovery. If another SIGKILL/dump failure occurs, investigate provider memory/termination evidence and request separate approval for any paid instance change; do not rerun heavy dumps repeatedly. Real restore/disaster recovery and measured capacity remain OPEN with their existing owners.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-12-backup-monitor-retry.md.

12/10/2026 — TASK18-MONITOR-RETRY-01 / IMPLEMENTED / AWAITING FULL CI AND LIVE ACCEPTANCE

Same owner fix/backup-monitor-retry-20261012; claimPR2345 mergedc8592954 after documentation CI. One causal correction in the cron only: signed STARTED/SUCCEEDED/FAILED delivery retries transient HTTP408/429/5xx and transport failures, at most5 attempts with20s request timeout and2/4/6/8s backoff. One unchanged body/runId/completedAt per event; fresh HMAC timestamp per attempt. Permanent rejection/redirect fails closed. Failed dump is never retried or uploaded; original exit retained. No web runtime or DB/source/query/configuration change. Cron auto-deploy remains its existing ops/backup/** rule; guarded web deployment should skip these cron/workflow/docs-only changes.

Node20.20.2 targeted11/11 PASS: real shell with synthetic command fakes, independent real HMAC verification, failed dump/receiver500→503→200, success503/lostresponse→200, STARTED connection recovery, permanent401, exhausted five failures, redirect denial; existing backup schedule/encryption/dry-run/HeadObject/signature invariants protected. Shell syntax and text whitespace PASS. This is LOCAL/SIMULATED evidence, not real archive/upload/restore or LAB/LIVE PASS. Full CI and exact cron revision pending. Prior live failure at12:00 remains real; no production row edited or manual cron run. Database SIGKILL root cause and capacity remain unresolved under existing independent scopes;256MB DB and OOM hypothesis do not establish causation. Next single action: full CI/merge/exact cron deploy, then observe a new scheduled run and monitor result; real acceptance remains NOT TESTED.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-12-backup-monitor-retry.md.

12/10/2026 13:46 Athens — TASK18-MONITOR-RETRY-01 / ASSIGNED / NEW LIVE FAIL

Owner: Codex — Έλεγχοι Διαδόχου και σέρβερ; branch fix/backup-monitor-retry-20261012. Independent bounded Task18 subtask: retry signed monitoring callbacks after transient HTTP/network failures. No takeover of POS-DB-LOCK-01, capacity, database configuration or other pages.

Read-only incident evidence: run 20261012T090019Z-21056 started12:00:19Athens; database io worker SIGKILL12:00:28; pg_dump failed reading DocumentAttachment at12:00:28; FAILED callback returnedHTTP500 at12:00:29; cron exited1. Monitoring row remains STARTED. Latest recorded success09:01:16Athens,178979316bytes,archive TOC PASSED. At13:44:39 database available,10client connections,0lock waiters,0active queries>15s. Database basic_256mb; OOM cause unconfirmed.

Protected behavior: encrypted off-site upload, bucket/versioning/encryption checks, SHA256/size verification, five HeadObject attempts, archive-only pg_restore --list, same runId/upsert, HMAC/replay checks and3-hour schedule. No pg_dump retry, no recovery/restore, data/settings/credential changes, infrastructure purchase, restart or manual cron run. New code NOT IMPLEMENTED / local NOT TESTED / LIVE NOT TESTED. Existing30Sep bounded backup evidence retained; this12Oct new failure supersedes continuing success for this run only. Next action: publish claim to main, then bounded callback correction plus isolated fault tests and full CI before production acceptance.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-12-backup-monitor-retry.md.

12/10/2026 13:27 Athens — POS-INVOICE-QR-SCANNER-01 / INPUT SOURCE LIVE / AWAITING USER RETEST

Same owner codex/invoice-qr-scanner-20261012 retained. ClaimPR2342 mergedafd858f2 before source. SourcePR2343/head592901ea6c33431a6617ce52a91d5c43cee54658/fullPRCI38234822456 SUCCESS2443PASS/0FAIL/0SKIP; merge745ec31aa18067317e49ff30e7065ae9e1e20eae. Exact mainCI38235314326 attempt1 FAIL2442/1/0 solely prior capacity-runner scheduled latency assertion test35/line43; source unchanged, relevant local capacity8/8PASS, failed-job rerun attempt2/fulljob114765522620 SUCCESS2443/0/0 including native isolated PostgreSQL/build/invariants/Chromium/realHTTP/Windows. No assertion/threshold/test/workflow weakening or capacity owner takeover.

Ordinary guarded Render38236147436/deployjob114767256939 SUCCESS, exact745ec31a healthy at10:27UTC. Previous failed-main deploy wrapper38235557704 correctly SKIPPED. Rollback artifact retained. Independent public health/assets verification follows in release evidence. No manual deploy bypass, real/LAB financial transaction, invoice/draft/job/stock/fiscal/myDATA mutation or accepted replay.

Delivered input scope only: native text retention, Greek physical key recovery, consumed Enter/Tab, touch-keyboard exclusion, explicit clear and specific numeric/incomplete guidance before request. Camera/provider/server/payment paths unchanged; camera success remains owner-reported. Physical scanner hardware/client/eventstream and numeric6225119 origin not established, missing URL never guessed. Newest scanner USERFAIL remains authoritative until positive fresh retest; source/CI success is not functional PASS and no new manual PASS. Next single action: CtrlF5 POS → same new-invoice scanner → Καθαρισμός / νέα σάρωση → same QR, review full URL and header without payment. If only digits remain, compare the SAME QR in ordinary Windows Notepad and supply scanner model; no new transaction. Other owners untouched, assignment remains OPEN.

12/10/2026 — POS-INVOICE-QR-SCANNER-01 / INPUT CORRECTION IMPLEMENTED / AWAITING CI + USER

Same owner codex/invoice-qr-scanner-20261012, source fix/invoice-scanner-input-20261012. ClaimPR2342/headb0263fa9 docsCI green mergedafd858f2 before source. Only dedicated InvoiceQrScanner + pure input helper and mounted regression changed; camera/provider/server/payment forms untouched.

Native uncontrolled input retains externally entered/rapid text across unrelated React renders; onInput updates visible count only. Physical Greek KeyA–Z/Dead Semicolon map to their Latin physical key/case, only within this field; Ctrl/Meta/Alt/composition/unknown codes, ordinary Latin and paste stay unchanged. Input opts out of shared touch keyboard; Enter/Tab suffix is consumed. Explicit clear/refocus; failure no longer auto-selects the entire payload. Numeric-only, Greek-corrupt, missing URL and truncated known-provider syntax show specific guidance before any endpoint request. Server authentication/module/store/recipient/provider checks remain final authority; no new provider or business mutation. No software reconstruction of a missing URL from6225119.

Node20 production build exit0/TABLE_SERVICE;19focused testsPASS/0FAIL/0SKIP including real mounted rapid input versus rerender, Greek physical token/case/punctuation/modifier boundaries, Tab, numeric/truncated no-request, exact paste/clear/retry, duplicate Enter, both forms and old camera/provider/shift tests. Initial test emitted act warning; test event wrapping corrected, final rerun clean. Mocked tests/build are not physical USER/LAB PASS. Actual scanner event mechanism/numeric-only cause remains unknown until owner physical retest; user-reported camera recognition protected. No financial action/replay/new manual PASS. Required full source/mainCI, ordinary guarded exactrelease/publicasset verification, then owner scanner test without payment. Other owners untouched, assignment retained.

12/10/2026 13:04 Athens — POS-INVOICE-QR-SCANNER-01 / INPUT USER FAIL / BOUNDED FOLLOW-UP ASSIGNED

Same owner codex/invoice-qr-scanner-20261012, follow-up fix/invoice-scanner-input-20261012. User explicitly requests correction after confirming same QR succeeds through camera. Screenshots6393/6398 at Diadoxou show Greek letters in scanned payload then only6225119; full physical keyboard event stream/device model/client SHA unknown. Camera success is USER-reported, not independent new financial PASS. Photo6399 decoded locally to full supported Impact/p URL; do not commit real original/token or submit/pay this invoice. Exact numeric screenshot cannot be claimed an observed suffix of that URL. Root mechanism of numeric-only entry remains UNKNOWN until physical retest; do not promise recovery of missing data.

Current source reads DOM at Enter, but scanner text is a React controlled input; layout-sensitive characters are not normalized and error retry automatically selects entire text. Bounded input-only correction: native uncontrolled text storage so unrelated renders cannot overwrite input; scoped Greek physical key/code mapping to corresponding Latin key without modifying pasted/manual URLs; consume scanner Tab suffix when focus is input; no Enter recognition until complete supported URL syntax, helpful numeric/incomplete guidance with zero provider request; disable touch keyboard on scanner-only field and explicit clear/refocus. Preserve supported endpoint/tenant/module/recipient/provider, original PDF/camera and explicit payment choice; no global keyboard/scanner changes or financial mutation.

Required meaningful mounted tests: rapid input across React renders, Greek key codes preserve ASCII/case/punctuation, paste/manual unchanged, numeric/truncated input no API request, duplicate Enter one request, clear/retry and close/store stale results; existing Basic/Premium/camera/provider/shift regressions, Node20 build/fullCI/guarded release before physical USER retest. Existing source releasePR2339 PASS is delivery only; latest scanner USER FAIL authoritative. No new manual PASS or claim all providers. Shared current maina2b9d4ca/history/checkpoint/manual/tracker/pending/AGENTS reviewed; other assistant/fiscal/payment owners protected. Publish claim before source. Owner retained, next input-only implementation.

VOICE-ASSISTANT-01 — 12 Oct 2026: session / selected-region correction RELEASED, LIVE AWAITING LAB

Owner: codex/unified-voice-assistant-20261010. Source PR #2337 merged as 7d75a9bb003a5ace8038dd661febd845b0f9ab33; all 15 published blobs verified. Final PR CI 38228157584 and main CI 38228771882 passed 2440 tests, zero failures/skips; all four main jobs passed. Guarded Render run 38229285674 performed deployment and observed exact healthy revision at 2026-10-12T09:22:58.852Z. Independent public health read also returned this revision.

Central Ask uses only the existing native Super Admin credential matching actor/session/version; support credentials and ordinary Owner credentials cannot grant central access. Owner licensing and own-store authorization remain enforced. The assistant inherits the already-selected company/store, including sales and closed-cash reports. All-store sales/cash requires the explicit checkbox; stock remains selected-store. Selection/session changes withdraw stale questions, answers and queued voice callbacks.

LIVE NOT TESTED after this release: browser inventory observation returned retained_data_restricted following the previously automatically rejected secure sign-in. No new tab, credential retry, token extraction or alternate authentication path was used. Existing native/postgres/HTTP and mounted UI checks are not physical microphone or live data acceptance. Full module stays OPEN/ASSIGNED to the same owner; pending live category/name/multiple-product/applied-offer comparison and normal Owner stock AFTER remain open. Other application-domain parity and physical device checks are unchanged.

12/10/2026 12:00 Athens — POS-INVOICE-QR-SCANNER-01 / SOURCE LIVE / AWAITING PHYSICAL USER

Owner codex/invoice-qr-scanner-20261012 retained. ClaimPR2338/docsCI38225174721 green merged564cdf4e before source. SourcePR2339/head5769a94fa74fd32c55aa75e8b015da8fef3ff111/fullPRCI38225828992 SUCCESS2426PASS/0FAIL/0SKIP; merged02c7cd7cf4961f5d50bcaabaeb1853610c21759f, exact mainCI38226337500/job114734751810 SUCCESS2426PASS/0FAIL/0SKIP including build/invariants/native isolated PostgreSQL/real HTTP E2E/Chromium/Windows. Ordinary guarded Render38226818245/deployjob114736299175 SUCCESS; exacthealthy02c7cd7c at09:00:04UTC, independent public health ok=true/exact02c7cd7c confirmed. No manual deployment or guard bypass.

Delivery does not establish physical scanner/keyboard-layout/provider/camera-focus USER/LAB PASS. No payment/invoice/draft/job/stock/fiscal/myDATA mutation, historical replay or new manual PASS. Protected existing adapters/payment completion and other owners unchanged. Next single action: refresh POS → Πληρωμές → Προμηθευτής → Νέο τιμολόγιο → Σάρωση QR με scanner; scan QR (Enter or explicit Αναγνώριση), review original PDF and supplier/number/date/amount without submitting payment. Real unsupported provider requires exact QR/link for a bounded adapter; current S1 Ecos/Impact support retained, no promise all providers. Owner remains assigned for physical acceptance and provider residual; source stale AWAITING CI superseded only by verified release, not by functional PASS.

12/10/2026 — POS-INVOICE-QR-SCANNER-01 / IMPLEMENTED / LOCAL VERIFIED / AWAITING CI + USER

Owner codex/invoice-qr-scanner-20261012, branch feat/invoice-qr-scanner-20261012. Owner-authorized camera/provider handoff claimPR2338 head93908cff/docsCI38225174721 SUCCESS (full application job correctly skipped), merged564cdf4e before source.

Explicit «Σάρωση QR με scanner» in existing Basic/Premium supplier New invoice payment; no camera required. Focused QR input accepts scanner Enter or explicit recognition button, blocks event propagation/default form submission, locks repeated scans while downloading and ignores closed/old-store responses. Existing qr-read selected-store/role/module/recipient/provider checks unchanged. Original PDF and exact reviewed header feed the SAME callback; paid/credit resets to unselected. Existing document cannot be silently overwritten (button disabled with attachments). Unsupported provider shows the existing failure and photo/PDF fallback. No payment/draft/job/stock/fiscal/myDATA mutation during recognition. Supports current S1 Ecos /p/, Impact /p/ and /v/ only; no new provider added without format evidence.

Node20.20.2 local focused actual mounted Basic/Premium scanner/camera, duplicate Enter, precise URL/store, no payment/camera request, unsafe response refusal, retry, close/store stale guard, existing provider/foreign recipient/identity/real ZXing and shift-camera:16PASS/0FAIL/0SKIP. Production build exit0, TABLE_SERVICE verified; Prisma generation only, no database connection/migration. Initial provider-test attempt lacked generated Prisma client; rerun after preparation passed, no assertion weakening. Full GitHub native isolated E2E/build/invariants required before merge; exact guarded healthy release before physical scanner review. Local tests are simulated, NOT physical USER/LAB PASS. No new manual PASS. Additional providers, physical scanner/keyboard layout, optical camera focus and real invoice-to-PDF remain OPEN; retain own assignment and other owners. Next: full source CI and guarded release, then scanner recognition review without payment.

12/10/2026 11:38 Athens — POS-INVOICE-QR-SCANNER-01 / OWNER-AUTHORIZED HANDOFF / ASSIGNED / NOT TESTED

ΑΝΑΛΗΨΗ ΑΠΟ codex/invoice-camera-qr-20261011 — ASSIGNED codex/invoice-qr-scanner-20261012. User explicitly authorizes this receiving page to take the entire invoice QR scope, camera and providers included, and prioritizes barcode scanner input in POS supplier New invoice payment. Existing camera source/Impact/S1 format support/focus and successful-payment completion remain protected; historical physical focus/unsupported-provider FAIL and AWAITING USER are not converted to PASS. Other invoice/Gate3/payment correction/fiscal owners untouched.

Bounded first source change: explicit scanner button in Basic/Premium New invoice opens focused text input, consumes Enter without payment/form submission or POS product scan, requests existing authenticated selected-store qr-read endpoint once, and feeds the same original-PDF/header review callback. Close/store switch invalidates late results; unsupported provider remains visible with photo/PDF fallback. Paid/credit remains explicit. No scanner input creates a settlement/draft/job or stock/fiscal/myDATA posting. Existing server provider allowlist and tenant/recipient checks retained; additional provider adapters require actual format evidence, never arbitrary URL fetching.

Read AGENTS/current main b94f0b9f history, shared tracker/pending/active, invoice manual and camera checkpoint. Source not changed; no financial action or previous transaction replay. Scanner optical capability is user-confirmed but physical new UI acceptance NOT TESTED. Required mounted regression: both forms, exact QR URL, repeated Enter single request, no payment, close/store stale response, failure retry and fallback; existing camera/provider tests/build and full required CI then guarded exact release and physical review without payment. No new manual PASS. Receiving owner remains assigned until completion/named handoff. Environment clone available; dependency setup pending.

2026-10-12T16:47:12+03:00 - OPERATOR-CUSTOMER-CARD-01 / SOURCE RELEASED / AWAITING LAB-USER

Owner codex/operator-checkbox-audit-20261009 retained; release record branch docs/operator-customer-card-release-20261012. PR2351/head692ad79e2d5aad33b30bc9a70603fda481db0328 merged57744f90ffa3d67c0d83bdde1c73044d6942e8b4. Exact final sourceCI38256415160/build114835688762 and merged-mainCI38257065237/build114837866741 SUCCESS2448PASS/0FAIL/0SKIP, including new native PostgreSQL + actual-router HTTP uniqueness/store/company/role/revocation/rotation/Greek-normalization/Audit rollback case, existing pricing/loyalty, rendered POS and real HTTP E2E. Initial CI38256037064/native void-decoding FAIL was causally fixed with CAST AS TEXT on the same scoped lock; no assertion weakened.

Actual guarded Render38257618701/deploy114839707121 SUCCESS: wait completed with healthy exact57744f90. This is an actual source deploy/production-health GET, not a skipped docs guard. Independent browser health/assets and business LIVE NOT VERIFIED: old tab11 absent, fresh browser navigation to /api/health rejected net::ERR_BLOCKED_BY_CLIENT. No sign-in form loaded, credentials read, indirect/proxy workaround or production/LAB customer/link/rights/financial/stock/shift mutation. Do not classify this environment restriction as MyWorkStation401/404 or functional card failure.

Source available: selected-store saved-customer card link/unlink in Πελάτες→Λοιπά, existing active work-card options by name/last4, one credential per customer/store and one customer per credential/store, same-transaction Audit. Both POS card fields can resolve linked active STAFF customer; current credential/employee/customer/store/category validity enforced, no raw card/PIN/hash exposure or copy to memberCard, no login/attendance/role/permissions change. Existing member cards/unlinked STAFF/legacy audience and better pricing/opt-in/receipt contracts retained. Revocation affects next scan; reset prior selected POS customer to retail. Source usage guide docs/ops/operator-customer-card-20261012.md; NOT a new manual PASS.

Completed source/CI/deploy waits supersede prior code/deploy-pending notes only; new link/unsold personal quote/Audit/control/physical-card acceptance remains NOT TESTED. Prior PR2335 customer credit/receipts/ledger/shift/day-Audit LIVE and operator work-card/QR/count USER PASS protected and never repeated. Other workforce/audience/No39/scanner/invoice/voice/shift UI owners unchanged; overall No33/tracker35 OPEN.

Final handoff: same owner stays ASSIGNED until a named receiving page records transfer on main. Single next action: metadata-only LIVE acceptance on normal EMPLOYEE LABPOS2 with fresh original profile/cart0/queue0, customer and both-terminal financial/stock/control baselines; link the saved STAFF customer to existing card, re-read same card and unsold authoritative quote/Audit, then unlink/restore initial selection. No new sale/receipt/replay for evidence. When browser access is available use canonical /platform-admin and secure browserAuth chat form if login is required, never secrets in chat/lower-level browser entry. User physical card/device observation is separately qualified; no CI-only manual PASS or owner release. Final docs PR/check/merge metadata is authoritative for publication; checkpoint/list/pending/numbered/PDF synchronized here.

12/10/2026 - OPERATOR-CUSTOMER-CARD-01 / IMPLEMENTED / AWAITING FULL CI AND LAB

ClaimPR2349/head60874fd7/full docsCI38253864178 SUCCESS/merge971c9c31 published before source or LAB mutation. Added selected-company/store CustomerOperatorCardLink (one customer/credential association per store), existing-card options/get/link/unlink routes with administrative customer authorization, transaction advisory serialization and same-transaction minimal Audit. No raw card/hash/PIN is copied or returned; credentials/roles/profile/attendance/shift and balances are never updated by linking. Card rotation/revocation/employee/customer/category validity checked against current records on each scan.

Actual customer editor has a separate saved-customer link button and selected-store dialog with explicit staff requirement, current connection, last4 only, duplicate-assignment disabled options and unlink even after category/deactivation changes. Stale/closed/store-changed responses discarded and double-submit blocked. Both existing POS card fields can return the linked STAFF customer and use existing personal-pricing contract; ordinary member cards, unlinked work-card STAFF and legacy audience cards retained, ambiguous customer collisions rejected. Opt-in OFF still returns NORMAL audience; selected named customer/personal discount remains existing behavior. Login identity and rights are unchanged. No fiscal/bank/sale/receipt/stock changes.

Native isolated PostgreSQL + mounted actual-router HTTP test added for uniqueness/concurrent one winner, cross-company/store/foreign customer, role/STORE_OPERATOR denial, strict body, active/revoked/rotated/Greek work-card normalization, idempotent metadata save, unlink/reassign, Audit-failure rollback and identical credential/customer/empty financial tables. Local native DB absent (SKIP), mandatory unskipped CI pending. Actual UI and both card handler tests pass, prior customer/loyalty/audience assertions retained. Local final focused10PASS/0FAIL/1DBSKIP; client build9.30s/TABLE_SERVICE PASS. Initial broad local suite before Prisma client generation failed imports; standard local generate only (no DB connection/migration) corrected setup. Earlier prepared broad suite2413PASS/2FAIL/26SKIP: old SELECT loyalty compatibility retained and targeted PASS; other FAIL is unchanged capacity timing flake. Final full local run2415PASS/0FAIL/26DBSKIP; all2441 tests accounted for. CI/native simulations are not LIVE PASS.

Browser old tab11 no longer exists; new /api/health tab blocked by browser net::ERR_BLOCKED_BY_CLIENT (environment, not MyWorkStation auth/404/401 or bot detection). No credential access/indirect workaround and no new LAB mutation. Latest independently read actual guarded deployment38236147436/job114767256939 SUCCESS/exacthealthy745ec31a; newer backup/docs guards skip app deployment and are not new release proof. Require exact source/main CI and actual guarded healthy new revision before asking for normal device/live acceptance. No previous transaction replay. No33 OPEN/owner retained; single next action: exact source CI including native DB, then guarded release and metadata-only LAB acceptance when authorized browser access is available.

2026-10-12T16:08:14+03:00 - OPERATOR-CUSTOMER-CARD-01 / ASSIGNED / NOT TESTED

Owner codex/operator-checkbox-audit-20261009; independent source branch codex/operator-customer-card-20261012. User explicitly requests one existing operator work card for staff discount and named customer association («ξεκινα το»12Oct16:04). This extends existing No33/POS-CUSTOMER-ACCOUNT scope; no takeover of workforce/login/attendance, POS audience settings or No39/invoice/scanner owners.

Read main a31af72b through PR2348, active/pending/tracker/checklist, relevant operator/card/customer checkpoints and POS/commerce manuals. Protected LIVE PR2335 named customer, DOCTOR20% CREDIT0.80/CASH0.30/virtualCARD0.50/ledger/shift/Audit and previous operator work-card/count USER PASS are not repeated. Main source already has STAFF audience recognition for operator hashes, but no explicit named customer link; current member-card scan only resolves Customer.memberCard. Existing work-card hashes and formats must remain unchanged and no raw credential may be copied into Customer.memberCard or returned by linking UI.

Bounded plan: explicit selected-store authorized BackOffice link between one named STAFF customer and one existing operator credential; unlink available. Keep member card separate and valid. Store/company-scoped unique mapping and transactional Audit; do not change credential, PIN, role, activation, attendance, shift or existing balances. At POS both card entry paths resolve the linked active STAFF customer using the existing work-card normalization/hash, same current company/store, active credential and employee; fail closed for ambiguous cards, wrong store, inactive/customer/category or revoked link. Card rotation follows current credential hash. Personal/customer pricing and opt-in audience rules remain existing contracts; no implicit credit or new permissions.

Acceptance: link/list/unlink authorization and selected-store/company isolation; duplicate/concurrent ownership conflict; hashed matching without credential disclosure; normal member-card and unlinked STAFF behavior retained; active/revoked/rotated/current-store rules; real mounted UI; Node20 full CI/invariants/native PostgreSQL/E2E and exact guarded release. LIVE requires fresh LABPOS2 EMPLOYEE/original profile/cart and shift/control/customer baseline before metadata-only link, same work-card lookup/unsold quote then restore link/selection without credential changes or financial replay. Physical card scan/print and any unavailable live negatives remain NOT TESTED. CI is not LIVE PASS; No33/tracker35 OPEN.

Claim publication must be green and merged on main before source or state-changing LAB. No live mutation in this claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-operator-customer-card.md. Single next action: publish claim then implement guarded mapping and regression tests. Same owner retained until accepted or a named handoff is merged.

12/10/2026 01:24 Athens - FINAL SAME-RECEIPT AUDIT LIVE PASS / No33 OPEN

PR2334 merge8b654ab0252a5ec0907b7aa28298372fdaaffc82; sourceCI38179188740 and exact-mainCI38179637528 SUCCESS2424PASS/0FAIL/0SKIP with real HTTP assertions retained. Actual guarded deploy38179944174/job114590206650 SUCCESS; independent browser /api/health exact8b654ab0 then existing SA selected-store client reloaded, no new login or permission change.

Fresh Audit selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, from2026-10-12/to2026-10-12, exact keyword LAB CUSTOMER QR 20261011 CODEX: exactly2events/2categories. CASH0b6303b3fb7234dd1775f5bcd655c549 at12Oct00:40:39,0.30EUR, «Είσπραξη οφειλής μετρητών»/«Μετρητά»; CARDe6134fde9d3f7a6ee36edf1dd546fbd4 at00:42:42,0.50EUR, «Είσπραξη οφειλής κάρτας»/«Κάρτα». Both exact customer description, LAB POS2, same MAIN shift3a186861-5fa0-4d44-a133-d3ea888c6d81 and selected-store name. Generic reason is — for ordinary debt receipts, not a missing cancellation/return reason. SourceTruth visible StoreTransaction+PosSaleActionAudit+StoreOperatorAudit+StockMovement. Read-only same-ID acceptance: NO new Sale/receipt/stock/bank action. Screenshots include visible filtered CARD row; full row fields including CASH/method/actor independently read from actual DOM, not all fit screenshot viewport. No video opened.

Post-release fresh shift source still MAINcash4.40/CARD0.50/IRIS0/total0.80/count7; control96/0/0/total0/count2. Both customer balances0 previously verified; final POS restoration explicitly retail customer/normal price, cart0/queue0, connected LABPOS2; permissions never changed. No third-party QR message, physical print/scanner/bank charge or verified PNG download. Historical same-flow AWAITING/FAIL entries below are superseded only for these bounded LIVE reads; immutable history retained.

Administratively synchronize checkpoint, matrix, active list, POS/commerce manuals, pending, tracker35/numbered33 and both generated PDFs in final evidence PR. Source PR2320/2332/2333/2334 verified; final docs PR/check/merge metadata authoritative for publication. Owner codex/operator-checkbox-audit-20261009 retained, no release/named handoff. No33 overall OPEN. Single next action: physical customer-card print/QR acceptance with owner at a real device, without replaying sale/receipt; broader initialcash/shiftclose/role/store/module residual remains assigned. No39/scanner/invoice and other owners untouched.

12/10/2026 — POS-CUSTOMER-ACCOUNT-01 / bounded customer and receipt LIVE PASS / No33 OPEN

Owner codex/operator-checkbox-audit-20261009 retained; final evidence branch codex/customer-account-live-evidence-20261012. Selected MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ; LAB POS2 normal EMPLOYEE, original rights unchanged, terminal override blank/current MAIN, independent LAB-POS-02 control. No promotion or historical financial replay.

Confirmed named account ce4a2d / LAB CUSTOMER QR 20261011 CODEX / DOCTOR / personal20% / limit10EUR / card MWSE66B54E5522E32E6. Exact software card entry recognizes the same account. One identified CREDIT sale05061018-0b7d-4fcb-8a61-08a5486b9611 at12Oct00:13:46 Athens, SKU2270qty1: retail1EUR → authoritative personal20% quote/final0.80EUR. Debt0→0.80; stock−13→−14, lastSale11Oct20:39:20→12Oct00:13:46. MAIN cash4.10/cardIRIS0/collections0/movementcount5 and controlcash96/cardIRIS0/collections0/count2 unchanged. CREDIT does not add a cash/card StoreTransaction; count5 is expected, no replay.

Same debt settled ONCE EACH: CASH0.30 at00:40:39, receipt0b6303b3fb7234dd1775f5bcd655c549, debt0.80→0.50, MAINcash4.10→4.40/count5→6; CARD0.50 at00:42:42, receipte6134fde9d3f7a6ee36edf1dd546fbd4, debt0.50→0/cash4.40/count6→7, synthetic approval reference LAB-CODEX-CARD-20261012-01. This CARD is a virtual LAB record, not a bank/device charge or real approval evidence. Before/after both receipts stock−14/lastSale00:13:46 and control96/0/0/count2 unchanged. Points0/cart0/queue0; customer visits1/turnover0.80. Overpayment0.81 and CARD without approval reference visibly disable submission; no request submitted for those cases.

Corrected analytical ledger LIVE at0f120199: one linked CREDIT row, actual items/actor/method, then CASH/CARD; opening0, running0.80→0.50→0, closing/current0; no duplicate Sale row. From00:20 excludes the earlier CREDIT and shows opening0.80. POS receipts visibly read-only; direct409 edit protection is native CI evidence, not a LIVE mutation test. Corrected shift display LIVE at a0640ecf: MAINcash4.40/CARD0.50/IRIS0/total0.80/count7, CASH collections0.30, opening4.10; control96/0/0/total0/count2. Same two IDs show correct Greek receipt labels and Μετρητά/Κάρτα methods. Categories and lastSale remain sale-only.

Metadata-only first save accepted once: LAB NURSE QR 20261012 CODEX / code65e87a / cardMWS85FC02477D3EB659 / NURSE15% / limit0. Switching Basic→Other→Basic→Other preserves name/category/percentage; saving from Other creates exactly one named account, enables Addresses, reopen retains all fields. Software card entry recognizes the same NURSE with cart0/queue0. Debt/points/visits/turnover0; no NURSE sale or15% checkout claimed.

Release evidence: PR2320 fullPRCI38174231809/main38174594215=2415/0/0, merge155de6e1, guarded38174923497/job114575217145 plus independent exact health. 11/10/2026 23:38 Athens — DAILY-BAKING-SAME-PRODUCT / SOURCE CI VERIFIED / DEPLOYMENT BLOCKED / LAB NOT TESTED

Owner codex/daily-online-store-20261011 retained. Integrated source PR2319/head5195c81e63f68a9dd8f ba8a20b9b5a9776e508bd/tree4706817137ab84c35a8424910bc21f54517a0647 merged43594017f780ef35dfe6b748d5643387ad0e1ac6. Full PRCI38170974372/build114563402368 and exact source mainCI38171314148/build114564389507 SUCCESS:2397PASS/0FAIL/0SKIP. Completed logs independently confirm native PostgreSQL legacy/same-product actual POS+online integration and isolated core, mounted UI/authenticated routes, build/invariants/rendered POS/HTTP E2E. Additional local npm run build:production exit0; Prisma generation only, no production database connection/migration/start.

Original commercial product/SKU/name/price/VAT retained: receipt40, BAKE15 gives TOTAL40/unbaked25/baked15; SALE1 gives39/25/14, exactly one stock/financial sale posting. Staff daily baking input and audit, online baked-only availability, POS consumption, return/waste and raw transfer bounds integrated. Native fixture assertions are CI evidence, not observed LAB sales.

Guarded Render workflow38171640060/deployjob114565318530 completed FAILURE at2026-10-11T20:34:24.977Z. Exact-revision wait for43594017 timed out after90 attempts; latest logged health20:34:14UTC still ok:true/version0.22.0+kat-test-pos/revision0a85760101d3d547905a83143590c8e92e508d92. Trigger/guard steps succeeded; underlying Render build/deploy cause UNKNOWN. Workflow metadata headde24e5ac is documentation advancement, not the expected source revision. Docs-only38171671623 skipped deployment and does not prove release. Newer shared main source from other owners remains theirs; preserve all records and diagnose before any new guarded deployment. No blind retrigger or manual production migration/seed/SQL.

Render connector has no selected workspace and explicitly requires user confirmation of a workspace from list_workspaces before service/log reads. Sole returned candidate «My Workspace»/tea-d9ie26vaqgkc739uudqg remains UNCONFIRMED; no service/log access or workaround attempted. Next: obtain this required workspace selection, inspect existing Render deploy/build logs, fix the evidenced cause, then exact guarded healthy release and fresh measured LAB acceptance. No new approval required for already-authorized source work.

LAB preparation is READ ONLY: fixture LAB-BAKED-20261011-01/product6923ad50-ff7a-4d0d-995c-0f7a46bf527f stock0/movements0; control100028954 stock40/one PURCHASE40. Before MAIN shift16:51/5records/opening+drawer4.10/sales cash-card-IRIS-total0/expenses-in-out0; control LAB-POS-02 shift11:17/2records/opening120/drawer96/expenses24/sales-in-out0. These23:10–23:13 baselines must be refreshed before any future mutation. Stock-adjustment form quantity remains empty; no submit, policy/product/settings save, bake, POS/online sale, return or waste performed. Future isolated40-stock setup is an ordinary audited adjustment, not an invoice acceptance test. Physical terminal/install, modifiers/DAILY colors and real DAILY public store remain separate NOT TESTED. No manual/LAB/LIVE PASS, no owner release or other-owner takeover; Gate2/Gate6 and prior PASS preserved.

11/10/2026 23:30 Athens - VOICE-ASSISTANT-01 / names and applied offers per store SOURCE RELEASED / AWAITING NORMAL CENTRAL LAB ACCEPTANCE

Owner codex/unified-voice-assistant-20261010 retained, source feat/voice-sales-name-per-store-20261011, PR2306/head4626aa64e514be5c6e08c8cad6413596398128ab /main3b4c067c4318a46d932ee282047e3f30ac3b6d31. Full PR CI38165831293 and exact merged-main CI38166369674 SUCCESS:2393PASS/0FAIL/0SKIP, including the native isolated PostgreSQL names/category/two-store/applied-offer/reversal case, mounted Owner/Platform UI and HTTP authorization tests. All21 source blobs verified in merged tree; active list separately reconciled with other owners, own21:51 block preserved. Guard38166770234 SUCCESS actually reached healthy3b4c067 at19:11:13.568UTC. Earlier guard38166466400 completed but withheld older800441 deployment for newer main source; not a deployment.

Subsequent shared release0a85760101d3d547905a83143590c8e92e508d92 verified healthy in browser before this attempt; compare3b4c067..0a857601 changes none of the21 owned source paths. Its full mainCI38170358122 SUCCESS2395/0/0 includes native case; guarded38170652498 SUCCESS/exact healthy0a857601 at20:06:36.284UTC. Existing key/provider reused; no new credentials, privileges, schema or business/fiscal writes. New UI actual visible explicit unchecked all-active-stores checkbox, natural-name placeholder and selected MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. This is UI availability, not data PASS.

Actual text attempt in refreshed central screen: «Πόσα νερά πουλήθηκαν στις 10/10/2026 ανά κατάστημα; Δείξε τη λίστα και τις πηγές.» Explicit LAB selected/all-stores unchecked. Screen header showed Χρήστος Μάνης, but Ask returned «Απαιτείται κεντρική πρόσβαση Super Admin.» Root ordinary UI then positively revealed ΠΡΟΣΒΑΣΗ SUPER ADMIN / MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ and Επιστροφή στο Super Admin: actual support context, not central session. Proper return button led to ordinary Platform2FA login. Secure browserAuth request for visible email/password/Συνέχεια was rejected by automatic browser security review, not by the user, reason browser_security_restricted / stop. No workaround, credential inspection, token mutation or guard weakening. Cause/actor of intervening context change is unknown. Do not treat central header alone as evidence of central token or repeat this as a source role-contract bug. No new numerical answer, main-prose PASS, named/category/multi-store/offer LIVE PASS or after comparison was obtained. No new screenshot of denied attempt exists; do not invent one.

Before evidence: ordinary support sales statistics primary LAB/10Oct/Athens/empty query had waters NEPO1,5LT qty3/gross3/net2.65/VAT.35 and NEPO500ML qty4/gross2/net1.77/VAT.23, water total7/gross5, distinct zero-value TEST1 qty1 means all-report qty8. Actual photo category-before-1791745045193.jpg; capture time is artifact label, backend revision of that report not separately attested. Ordinary central applied-offer analysis loaded all companies/all time, gross0/discount4.80/returns0 and4 definitions; photo offers-existing-before-1791745678399.jpg. This is not independently scoped offer quantity for10Oct/LAB and does not prove zero offers. Observations CHECKPOINTS/EVIDENCE/voice-sales-name-20261011/observation.json. No business action taken; physical mic not tested.

Implemented scope remains as21:51 source record: strict names/category/offers shared canonical read, named packaging clarification without mandatory SKU, multiple products and Athens date range/as-of limit, explicit authorized store lists, complete-source totals only, recorded promotions and unattributed-return refusal, safe bounds/privacy and readable canonical facts. Native fixtures are CI proof only. Previous limited SKU2269 Platform data PASS remains; previous main prose FAIL awaits positive retest. Normal Owner stock AFTER remains separate, Owner all-own-stores live acceptance NOT TESTED. Full other application domains remain OPEN/ASSIGNED; no takeover of N40/N39/fiscal/returns/baking/workforce/invoices or other owners.

Single next action: independent read-only acceptance from an actually signed-in central Super Admin client: same named LAB question and fresh ordinary same-period report before/after; then named multiple products/month incomplete marker and applied-offer per-store report. The blocked agent sign-in must not be retried via an indirect browser surface. Owner own-store and all-store live checks remain distinct. Status tracker32 / printed30 stays OPEN; no completed pending item or new data/manual PASS.

11/10/2026 23:21 Athens — INVOICE-PIECE-FACTOR-CURRENT-MAIN / WORK HANDOFF CLAIM / RELEASE VERIFIED, ACCEPTANCE NOT TESTED

ΑΝΑΛΗΨΗ ΑΠΟ PR2317 prior conversation — ASSIGNED docs/invoice-142730-work-continuation-20261011 by explicit user handoff. Scope only same-draft142730 review and transfer of12 checked lines; no payment, duplicate draft, finalization, stock, fiscal or myDATA posting. MainCI38170358122 all four returned jobs completed SUCCESS. Independent production GET health now ok=true/exact0a85760101d3d547905a83143590c8e92e508d92 after initial0571a2f release. Render authenticated securely; automatic release completed without manual deploy action.

Read-only SuperAdmin UI locates existing ΤΔΠΤΛ142730 at Περίπτερο Διαδόχου Παύλου, MARK400015621665296, supplier Μ ΛΕΥΚΑΔΙΤΗΣ, status NEW/AWAITING_APPROVAL/MYDATA_DRAFT_READY,0 stored lines/net0/gross0. Existing PDF2pages available. Opened same assistant once; automatic comparison is running. Prior12 checked rows are not yet recovered in this browser; no transfer attempted. This is release verification only, not LAB/LIVE/USER functional PASS. Protected PACKAGE verification and PIECE-only blank→1 remain. Existing broader Invoice/catalog/Inventory owners unchanged. Next: inspect returned rows and exact factor defaults; establish original agreement and fresh before baselines before one authorized same-draft transfer. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-invoice-piece-factor-current-main.md.

11/10/2026 23:12 Athens — CAP-DESCRIPTION-SLASH-01 / ASSIGNED / USER FAIL

Owner codex/cap-description-slash-20261011, source branch fix/cap-description-slash-20261011. Independent bounded owner-requested correction of slash-containing product descriptions at CAP command serialization; broader fiscal/installation/returns owners remain unchanged. Screenshot shows ON THE GO BOOST ΑΝΑ/ΣΤΑΦ/ΜΠΑΝ/ΛΕΜΟΝΙ 500ML and line description contains an unsupported CAP Driver character. Main0a857601 source reproduces rejection of this42-character name by field slash guard. Failure precedes request/Sale insertion in checkout; actual transaction/DB/device state NOT TESTED, no inferred measured financial delta.

Scope: normalize description slash delimiters to spaces for outbound SL field only; retain original catalog/checkout description, strict CR/LF rejection,80-character limit,Windows1253 validation,barcode/payment validation,VAT mappings,writer liveness,one-shot dispatch/idempotency. No production sale/payment/stock/shift/fiscal command, request replay or existing-data correction. Read current active/tracker/pending/checklist/manual and relevant CAP checkpoints/history before change. Existing KAT/Diadoxou profiles and CASH/CARD/Delivery protections preserved. Acceptance: exact observed name serializes as one SL with unchanged numeric fields and one CR; injection/newlines/overlong/encoding fail closed; full Node20 CI/build/isolated E2E/Windows, exact guarded release and physical acceptance still required. CI is not LAB PASS. No manual PASS until real observation.

Claim PR2321 and source PR2322 merged green; SOURCE LIVE9d69ab09/AWAITING DEVICE. Latest bounded source evidence is the CAP-DESCRIPTION-SLASH-01 entry at the end of this record and CHECKPOINTS/CHANGES/2026-10-11-cap-description-slash.md. Owner retained until completion/named handoff.

11/10/2026 23:55 Athens — POS-BRAND-VARIANTS-06 / SOURCE LIVE / AWAITING USER

Owner/branch codex/pos-brand-variants-20261011 retained; receiptPR2330 docs/pos-brand-variants-release-20261011 (final docs CI/merge in the PR are authoritative); checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-brand-variants.md. Item5 limited visual USER PASS23:18:30 CLOSED/manual/numbered/pending synchronized in claimPR2325/headd37a43811e9e732935708b94750a1d0a1a8aebf9/docsCI38172124404 SUCCESS mergedef42045cf0649b50dc419b7b75a4425185e87f6a before source. Items3/4/5 within recorded bounds; items1/2 AWAITING USER, items7–9 wait. Other owners and wider tracker03 OPEN preserved.

Only derived category-popup product display order changed, with a pure helper and one existing memoized call/import. Beer/Softdrink labels/stored names or parent recognized; brands stay contiguous in first-occurrence group order; supported Greek/Latin aliases and Coca-Cola/7UP equivalent spellings normalized. Volumes ML/ΜΛ/CL/L/LT/ΛT/Greek litre units ascending; can before bottle at same known volume; unknown volumes last with original unknown/tie order preserved. Full names/SKU/prices and Product object identity retained. Unrelated categories return the same array. No persisted layout/catalog reorder, ID/count resolver change, deduplication, rename or add/remove/quick/scanner handler change. No schema/API/auth/license/tenant/fiscal/payment/stock write or production transaction/replay. Actual store catalog names beyond supported leading-token/explicit aliases remain subject to user feedback; no fabricated brand/size metadata.

Local Node20 behavioural/protected catalog/header/calculator/performance36PASS/0FAIL/0SKIP; final unknown-size fallback8PASS/0FAIL/0SKIP plus frontend build23.41s/TABLE_SERVICE PASS. Final sourcePR2326/head130781eae40f20f3ed62513b38e06d992a7478a3/exactCI38172460986/job114567887003 SUCCESS2405 PASS/0 FAIL/0 SKIP. Initial sourcehead1628b30b3a4fcc4d6b803d439184770f53444698/run38172373280 was superseded before acceptance to retain unknown-size packaging order; final exact head independently green. Merged exact revision9d69ab09b60f94f7afeafa8b82dc342245bacb6a/mainCI38173420095/job114570727806 SUCCESS2408 PASS/0 FAIL/0 SKIP. Full isolated native PostgreSQL/archive/security/licensing/contracts/invariants/real HTTP E2E/actual Chromium protected header/Windows checks passed. CI and public assets are not physical USER/LAB acceptance. Any retained inherited failure/retry/rebase detail: [{"run": 38173094713, "job": 114569693689, "conclusion": "success", "actualDeploy": false, "observation": "2026-10-11T20:39:31.4179348Z A newer production source revision is on main; await its full CI"}, {"run": 38173404392, "job": 114570627070, "actualDeploy": false, "observation": "2026-10-11T20:44:03.1516228Z A newer production source revision is on main; await its full CI"}].

Ordinary pinned Render guard38173742880/deployjob114571644146 SUCCESS: actual pinned request at2026-10-11T20:48:58.0035724Z, then healthy expected exact revision9d69ab09b60f94f7afeafa8b82dc342245bacb6a at2026-10-11T20:50:49.6176763Z. Guard's production GET health reports ok=true/version0.22.0+kat-test-pos/exact revision, with preserved rollback artifact11714583720/digestsha256:d121c43d7bc8862d598488647edd2cec031392c26ee5dade9119b82b6ffbb55a. This is verified actual deployment through the existing protected CI/Render workflow, not a no-op success. Original own merged revisionad911715f5924ac198bebe08e803f066965d2c0b/mainCI38172866391/job114569717004 SUCCESS2407/0/0 also recorded; newer integrated main preserves all three owned app/test blobs byte-for-byte and includes independent invoice/startup compatibility work, without taking over that scope. Earlier guards withheld deployment for newer unvalidated source; retained in CI history above.

Independent sandbox public health/served JS/CSS fetch NOT TESTED: the execution network approval was cancelled before a decision returned; supported public web open also reports the endpoint unavailable. No browser, proxy, escalation or network workaround. The release gate is satisfied by the existing guard's actual production health GET matching the exact fully validated integrated revision; this does not independently attest browser-loaded assets. Final local compiled bundle includes category/brand/unit/package helper markers and protected readable category/Barcode/header/calculator styles, but is not served-asset or physical USER PASS. No signed-in/business mutation by this page. Physical terminal/client SHA, touch, names beyond supported parser and financial deltas NOT TESTED. No payment/stock replay to fill evidence gaps.

Single next action: user Ctrl+F5 in normal selected-store POS, open Μπύρες and Αναψυκτικά and inspect adjacent same-brand variants in ascending size order (Άλφα330, Άλφα500, Άλφα φιάλη500), unchanged names/SKU/prices, scrolling and close/back. No purchase, removal, category edit or business replay needed. User12Oct13:53:22 «Συνέχισε» authorizes independent item7 next while item6 remains AWAITING USER; no explicit item6 visual/physical PASS is inferred. No CI-only manual PASS; pending retains this owner until bounded acceptance/named handoff. Whole nine-item request incomplete; all other recorded PASS/FAIL/assignments retained.

11/10/2026 23:07:11 Athens — DAILY-BAKING-02 / integrated same-product availability / AWAITING CI AND LAB

Owner codex/daily-online-store-20261011 retained, issue2054; branch feat/daily-baking-integrated-20261011. Existing merged correction claim PR2305 and core/receipt PR2313/2314 authorize this integration. Fresh main0a857601 reconciled preserving invoice piece-factor fix, readable POS categories and customer-account assignment. No takeover of fiscal/payment/return decisions or modifier-price owner.

Implemented explicit BAKED_SAME policy backed by enabled single-product baked balance, with no second SKU or destructive policy constraint migration. Staff route/modal uses original product and shows unbaked/baked/total; inventory retains canonical total for receipts/valuation/ledger and displays its partition. Actual POS, online commercial posting, table sales, consumption/waste/destruction and return/cancel stock hooks use the same atomic core once, while their existing financial/fiscal decisions and normal total-stock movements remain intact. Genuine coffee/tea recipes and legacy two-product baking preserved; same-product baking excludes duplicate raw recipe consumption. Public availability uses baked balance. Configuration changes with remaining baked pieces are refused; total-stock trigger rejects adjustment/stocktake/transfer below baked quantity, making ordinary receipt/transfer affect unbaked inventory. No overnight reset.

Local full regression2366PASS/0FAIL/23DBSKIP and frontend build passed before final focused adjustments; newest focused route/input/mounted UI suite5PASS/0FAIL/1nativeSKIP. Native SQL integration expands actual policy/staff query/POS/online consumers, replay, concurrent final stock, receipt, restore and waste plus total guard. No local isolated database exists: native CI remains required and has NOT yet passed for this head. Full CI/build/invariants/real HTTP E2E must be green before merge and guarded exact deployment.

LAB/LIVE/manual acceptance NOT TESTED; no live stock, configuration, sale, financial, DAILY diagnostic or public activation action. Original unused LAB fixture retained. Next action: publish integrated source and obtain green unskipped PostgreSQL/full CI, merge and verify exact deployed revision, then capture fresh LAB store/operator/terminal/shift/SKU/stock/latest movement and financial/control baselines before each single authorized action. Real DAILY catalog/branding/modifiers/physical installation remain separate. Owner retained through acceptance, not released; no manual PASS from CI.

12/10/2026 00:56 Athens — same customer receipt Audit readback FAIL / bounded correction AWAITING LAB

Same owner codex/operator-checkbox-audit-20261009, source codex/customer-receipt-audit-display-20261012; existing POS-CUSTOMER-ACCOUNT-01/No33 Audit acceptance, no other owner takeover. Same two receipt IDs/amounts/debt0/cartqueue0; no financial replay. Actual selected-store Audit from12Oct→12Oct plus exact namedcustomer filter returns0 despite both receipts at12Oct00:40:39/00:42:42 Athens. Expanding only from to11Oct returns exactly2 grouped receipt events,0.30 and0.50 with IDs/actor/MAIN; labels rawCUSTOMER RECEIPT CASH/CARD and payment source erroneously«Εξωτερικά». Source cause: server auditFilters uses process-local midnight (UTC here), while displayed timestamp/time criteria are Athens; client paymentLabel has no receipt-type mapping and falls backEXTERNAL. Read-only correction exclusively Audit date bounds to Europe/Athens calendar days including DST, plus exact CASH/CARD receipt labels/methods; preserve all tenant/role/store/video/expense-reason guards, other report endpoints and online-order owner. No change to database, history or amounts. Validate SAME two receipts using exact12Oct day and selected-store search; no new payment.

PR2333 head6cee7124592844077c1ca361e6f26b92405a540a fullCI38177832744 SUCCESS2421/0/0, mergea0640ecf4102e51f5a636ea111e9d606024336ed. MainCI38178160293 attempt1 failed only independent pos-capacity timing inequality offeredLatencyMs>=latencyMs (2420PASS/1FAIL/0SKIP); failed job re-run requested, no test weakening or takeover of capacity owner. Main/source deploy and same-shift totals LIVE acceptance still pending. OldDOCTORaccountce4a2d retainedvisits1/turnover0.80/debt0. Physical print/mobile/scanner/bank-device integration and broadNo33 stillNOT TESTED/OPEN.

Current maina0640ecf history inspected, only own shift-display source since confirmed0f120199; protected previous module/No39/invoice/scanner/fiscal/other owner scopes unchanged. Owner remains assigned. Next green full source/main/guarded exact release and read-only same-receipt shift/Audit reconciliation, then manual/five-file/PDF closure. No33/tracker35 remains OPEN.

12/10/2026 00:45 Athens — customer receipt shift summary LIVE FAIL / display correction AWAITING LAB

Same owner codex/operator-checkbox-audit-20261009, source codex/customer-receipt-shift-display-20261012. Exact0f120199c28eef19f6ff058dc6a1c94a1149fde7, PR2332 full/mainCI2420/0/0, guard38176946048/job114581254876SUCCESS and independent /api/health verified. SAME credit sale05061018-0b7d-4fcb-8a61-08a5486b9611 now one enriched row: charge0.80/CREDIT/LABPOS2/items1×NEPO1.5LT/unit1/line0.80/opening0/end0.80. Datefrom12Oct00:20 excludes it and opening/end0.80. Corrective ledger scoped LIVE read PASS; no new sale/replay.

ONE virtual CASH0.30 receipt0b6303b3fb7234dd1775f5bcd655c549 at00:40: debt0.80→0.50,MAINcash4.10→4.40/count5→6. ONE virtual CARD0.50 receipte6134fde9d3f7a6ee36edf1dd546fbd4 at00:42: debt0.50→0,MAINcash4.40 unchanged/count6→7; referenceLAB-CODEX-CARD-20261012-01 records virtual approval, no actual bank/acquisition. Separate control96/count2/cardIRIS0/total0 unchanged. Fresh SKU2270 before/after each receiptqty−14,lastSale00:13:46 unchanged, customerpoints0/cartqueue0. CREDIT sale originalqty−13→−14 already read independently. Missing raw immutable stock movement and independent Audit DBcounts remain NOT TESTED. Before values recorded at action time; local workspace disappeared later, recovered from this session's exact captured observations, not guessed from after-only data.

REAL shift UI FAIL: both receipt movements appear once with correct amounts/actor/MAIN/ID, but type rawCUSTOMER_RECEIPT_CASH/CARD and method—; CARD summary remains0 and total0 because totals only count SALE rows. Source cause confirmed StoreTransactionsPanel ignores receipt types and complete existing summaryBySession. Bounded read-only correction: include complete cent summaries for collections/card/IRIS/total, expose receipt labels/methods, preserve cash balance, source permissions/session/store, SALE-only product categories and lastSale. Do not treat receipts as new Sales or rewrite balances/history. Native/local/mounted tests and exact full main/guarded release followed by read-only acceptance on SAME two receipt IDs required. No more financial fixtures or bank command for this correction.

Customer first-save tab preservation still requires bounded new metadata-only fixture; physical print/mobile/scanner/card-device acquisition NOT TESTED. No33/tracker35 OPEN; other owners/No39 untouched. Manual/five-file/PDF closure will publish verified final batch after corrected LIVE read. Owner remains assigned; next exact-source release, same-ledger reconciliation, then documentation.

12/10/2026 — POS-CUSTOMER-ACCOUNT-01 / real analytical-ledger FAIL / correction AWAITING CI AND LAB

Same owner codex/operator-checkbox-audit-20261009, corrective source codex/customer-ledger-correction-20261012. PR2320/head57a1b8df fullCI38174231809 and mainCI38174594215 SUCCESS2415/0fail/0skip; merge155de6e1, guarded Render38174923497/deployjob114575217145 SUCCESS, independent browser exact /api/health155de6e1. Authenticated LABPOS2 normalEMPLOYEE/original flags/cart0/queue0; terminal override blank, current MAIN, independent LAB-POS-02 control. Same virtual customerce4a2d, named cardMWSE66B54E5522E32E6, DOCTOR/personal20/limit10. Reopened category/fields and corrected name/QR layout observed; code-entry at POS recognizes same customer/category. Physical printing/mobile/scanner NOT TESTED.

ONE new virtual CREDIT sale0.80EUR at12Oct00:13:46, reference05061018-0b7d-4fcb-8a61-08a5486b9611, SKU2270qty1/retail1/authoritative personal20% quote0.80. QR re-read debt0.80/points0, independent customer report visits1/turnover0.80/debt0.80, cart/queue0. MAINcash4.10/cardIRIS0/total0/financial-movement count5; control96/0/0/total0/count2 unchanged. CREDIT writes Sale/Payment/CustomerLedger but no cash/card StoreTransaction, so this financial movement count correctly stays5; initial +1 expectation corrected, no transaction replay. Stock/Audit exact after measurement remains pending; original same-store qty−13,lastSale11Oct20:39:20.

Actual analytical ledger FAIL: duplicate visible Sale+SALE_CREDIT rows for that same sale, missing items/method/actor/charge/payment and running0 while customer debt0.80. Active reversal-aware route shadows enriched V2 handler. Correction changes only read-only activity contract: de-duplicate credit documents, enrich actual line/method/actor and cent debit/credit, honor date range, show opening/closing/running debt anchored to recorded balance in one repeatable-read snapshot; paid sale/return activity does not create debt. Retain cancellation/return/delayed annotations, original sale links, role/tenant guards. Protect newly POS-linked receipts from generic BackOffice pencil edits that could desynchronize shift: server409 and read-only POS row; legacy manual receipt behavior retained. No receipt/bank/new sale submitted during correction; verify the SAME sale after exact release. Full native query/mounted UI/legacy-edit regressions required; local nativeDB unavailable so skip is not LIVE PASS.

11Oct23:49–23:52 bounded unsold cart cancellation confirmed native-dismiss/Back retention, selected Λάθος χειριστή, cart/queue0; independently observed Audit row includes LABPOS2/items1×1EUR/reason, no submitted financial action. Existing10Oct cancellation manual PASS retained and not to be repeated. Read-only LAB module matrix21 owner/3 employee-limited does not prove every module/store/role. No33/tracker35 OPEN; other owners/No39 untouched. Next: green corrective CI/main/guarded release, independently re-read SAME credit document/stock, then fresh before/after ONE partial CASH and remaining virtual CARD receipt. Current source/UI code-entry observations do not establish financial, physical or universal PASS. Owner remains assigned.

11/10/2026 — POS-CUSTOMER-ACCOUNT-01 / IMPLEMENTED / AWAITING CI AND LAB

Same owner codex/operator-checkbox-audit-20261009, source codex/customer-pos-credit-20261011. ClaimPR2316 exactheadd335e029 / fullCI38169472321 SUCCESS / mergee7d97a2d published before source. Protected audience settings owner and its OFF/ON visual PASS, operator QR/count USER PASS, categories readability and all concurrent owners preserved. No new production financial/configuration action; No33 overall OPEN.

Implemented: named customer editor has validated DOCTOR/NURSE/STAFF/CUSTOMER association; card save/print/image/mobile sharing unchanged. Exact normalized member-card/QR lookup works independently of hospital-row opt-in, returns current company account, uses that store's opted-in category and audits only card last4. Personal percentage now participates in server quote/checkout and UI uses authoritative current-cart quote (including barcode/manual/wholesale/promotion pricing), refuses checkout while quote is incomplete and discards delayed old store/cart results. Better existing category/promotion price is protected, no percentage stacking, wholesale/manual/offline locked prices preserved. Fiscal continuations retain original saved items/summary. Hold restoration uses original unit price so personal discount is not applied twice.

POS debt receipt replaces two native prompts with a touch form reachable even with keypad hidden: full/partial amount, current debt/new balance, CASH/CARD, actual received confirmation; CARD requires reference of an already approved terminal payment. This is manual recording of a separately approved card receipt, NOT automatic EFTPOS acquisition or a new fiscal sale. No generic RBS sale command is sent. Atomic service validates company/store/operator rights/current terminal OPEN shift/cent precision/expected debt/overpayment; one CustomerLedger RECEIPT, CUSTOMER_RECEIPT_CASH or CARD StoreTransaction, loyalty and Audit, without Sale/stock. Stable scoped UUID request key and transaction lock serialize same-key replay and reject changed bodies. Client freezes body/key, stores pending receipt per company/operator/store/customer for reopen/reload, retries safely. Recovery uses the same lock and durable cancellation Audit: either returns already committed receipt or prevents a late original request from posting after release. No second card charge or email on replay. Customer/card and actual CASH/CARD rights are enforced on server POST as well as UI.

Local Node20: frontend build PASS; focused29PASS/0FAIL/1isolated-DBSKIP. Mounted actual receipt component confirms double-click lock, identical retries, persistence through remount with current balance0, recovery and cleared pending record. Actual scan handler confirms exact own-company card, DOCTOR mapping, disabled audience→NORMAL, no full card leak, invalid/foreign rejection. Actual permission guard rejects unauthorized receipt/scan/recovery and payment method. Pure personal pricing tests include cents, better offer, exclusions and repeat application. Native isolated PostgreSQL test added for identical concurrency, changed-body conflict, partial CASH/CARD, closed shift, foreign customer, overpayment, stale competing keys, loyalty, Audit-failure rollback, unchanged control and no Sale/stock, recovery/late-post tombstone; local DB unavailable so native result awaits CI, not LIVE PASS. Existing terminal-source guards now target the actual checkout normalized-terminal SQL rather than the removed inline receipt SQL; all routing/stock assertions retained.

Remaining: exact full CI/main/guarded release; measured LAB POS2 EMPLOYEE baseline and new identified customer/card/group/personal/credit/CASH/CARD receipt before/after/control; print/phone sharing and actual approved external card evidence. Automatic terminal card acquisition for standalone debt receipt requires a supported dedicated bank/device flow; current integration deliberately never misuses fiscal sale execution. No invented manual PASS. Existing opt-in/labels/rename owner remains independent. Main checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-customer-account.md. Same owner retained until accepted or named handoff.

11/10/2026 23:42 Athens — real customer-form FAIL found and corrected in source

Secure fresh Store Mode login verified LAB POS2 EMPLOYEE, original rights and empty cart/queue0; no rights saved. Fresh Super Admin LAB support verified current store/shift control. One virtual customer was created (codece4a2d, LAB CUSTOMER QR 20261011 CODEX after correction, balance0/points0, personal20%, creditlimit10 EUR, blank email/phone/taxId). Existing form lost an unsaved Basic name when switching to Other and created default Νέος πελάτης: real FAIL, not a new-feature PASS. The same account was renamed through Basic save, no duplicate creation. New source preserves unsaved metadata/discounts across tabs, submits the combined named draft and refuses unnamed creation from Other. Actual mounted editor regression test passes; exact final CI/deploy and live rerun remain required. No sale, stock, payment, shift or bank transaction submitted. Prior source CI38170987534 and combinedCI38172575928 passed all tests including native PostgreSQL with no skips; subsequent current-main/brand and real-form fix head still needs full CI. No33 remains OPEN.

11/10/2026 22:41 Athens — POS-CUSTOMER-ACCOUNT-01 / ASSIGNED / NOT TESTED

Owner codex/operator-checkbox-audit-20261009; independent source branch codex/customer-pos-credit-20261011. User explicitly requests «φτιαξε οτι χρειαζετε εχεις εγκριση για ολα» after clarifying debt receipts must occur at POS with CASH or CARD. New named-customer account scope: personal member card/QR and individual discount, category association where missing, credit purchases and explicit POS debt settlement. Preserve existing POS-AUDIENCE-CREDIT-01 opt-in/labels/layout owner and its limited OFF/ON/dropdown USER PASS; no takeover of settings/rename residual. No33/tracker35 remains OPEN. No39/Inventory/invoice/scanner/change-message and other owners untouched.

Source baseline mainfff5172: customer account/card printing/image/mobile sharing and credit-limit fields exist; customer-balance-payment server route and keypad action exist. Debt action uses two native prompts, has no client idempotency key, and its POST is not covered by the GET customer permission guard. Source examination is not LIVE PASS; current customer/card/discount/credit/settlement financial effects NOT TESTED. Prior personal operator QR/count USER PASS does not certify customer QR. Preserve per-store audience rounding, company-wide customer balances, store/terminal/open-shift checks, fiscal sale snapshots, payment routing and no duplicate historic settlements. No production financial/configuration action performed.

Acceptance: named customer save generates unique card; print/share retains exact ID; correct current-store/category/personal pricing in visible quote and final sale; credit increases same customer balance within limit; one CASH/CARD receipt decreases debt and posts once to current terminal shift/Audit, never creates Sale or stock movement. Reject unauthorized/foreign/closed-shift/overpayment/mismatched replay and concurrent duplicate; no false EFTPOS approval or fiscal-sale command for debt collection. Actual card acquisition must be explicit and remain unconfirmed until approved; underlying bank/device integration must be evaluated, not assumed. Fresh LAB POS2 EMPLOYEE profile/cart/balance/shift/control baseline required before each authorized virtual financial test. Restore original permissions. CI/local are not LIVE PASS. Full PR/main CI and guarded exact release precede LAB; manual only after real acceptance.

Single next action: publish this independent claim green on main before source edits, then implement bounded verified causes in separate commits. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-customer-account.md. Retain owner until completed or named handoff.

11/10/2026 22:40:13 Athens — DAILY-BAKING-02 / accounting core merged, CI verified / AWAITING INTEGRATION AND LAB

Owner codex/daily-online-store-20261011 retained, issue2054. Source PR2313 https://github.com/xrhstosmanis-design/myworkstation-app/pull/2313, exact final head05caad68aafccbbc439d641c4fb8582db6931c15, mergedfff517254ea7ca7a3cbe112932dccdee87098fb4. Full CI38168565517/job114556192697 SUCCESS:2395PASS/0FAIL/0SKIP. Independently read completed logs confirm both input-contract and native single-SKU PostgreSQL tests passed unskipped. Existing build, rendered POS, safety invariants and isolated real HTTP E2E all green. Local regression2365PASS/0FAIL/23DBSKIP remains local-only and is superseded for SQL coverage by actual native CI. This closes core CI/merge waiting only; no LAB/LIVE/manual PASS.

One original product identity is preserved: total40 partitions into unbaked25/baked15; consume1 leaves unbaked25 and changes baked15→14/total40→39. Native isolated test also verifies duplicate/concurrent replay, insufficient quantity, foreign company/store, untracked/weight refusal, subsequent receipt, later baking, competing last piece, explicit restore, transaction rollback, unchanged control and original SKU/price/VAT. Active-product/store guards exist in the core; separate inactive-state scenario is not independently claimed as tested. Actual invoice/POS/online/return/waste integrations are NOT TESTED by these accounting simulations.

The core remains deliberately dormant: no mounted route, startup schema initialization, policy/UI switch or production stock/configuration write. Existing legacy two-product UI is not the owner's corrected DAILY feature. No exact live functional deployment/health or new LAB action is claimed; no public DAILY activation, real-stock mutation, fiscal/payment/shift changes or manual entry. Previous unused zero-stock LAB fixture and historical financial/control readings remain unchanged evidence, not a fresh measured baseline.

Handoff branch docs/daily-baking-core-receipt-20261011; final receipt PR/check/merge metadata are authoritative for this documentation-only publication. Same owner stays ASSIGNED, no release/second claim. Single next action: integrate this proven core with explicit selected-store same-product configuration, raw/baked/total inventory display and authorized POS/online consumers. Reconcile stocktake/adjustment/transfer/return/waste semantics and recipe exclusion before enabling it; callers must write canonical sale/return movements once and must not deduct StoreProduct again after the core. Then full integration CI/build/invariants/E2E, guarded exact deploy and fresh recorded LAB before/after. Actual DAILY settings/catalog/branding/modifier bindings/physical installation remain separate unfinished scope. Preserve Gate2/Gate6 manual PASS, legacy consumers and all other owners.

11/10/2026 22:30:16 Athens — DAILY-BAKING-02 / same-product accounting core / AWAITING CI, INTEGRATION AND LAB

Owner codex/daily-online-store-20261011 retained, issue2054, source branch feat/daily-baking-same-product-20261011. Correction claim PR2305 merged43eadda9e793dd201171caea35b6d86baa8b373d with CI38165308938 SUCCESS before this source work. Fresh main reviewed through7c5ea31a; newer voice/barcode/cash-analysis work and existing PASS remain protected.

Implemented bounded accounting core server/src/store-baking-same-product.js, deliberately not mounted, configured, called at startup or exposed in staff/Platform UI. It introduces an isolated baked sub-balance and immutable per-action event for the same original product identity. Canonical StoreProduct stock remains TOTAL for existing receipts, valuation and ledger; UNBAKED=TOTAL-BAKED. BAKE preserves total, CONSUME/RESTORE atomically owns both total and baked updates (integration must not post the original stock update again). Explicit PIECE/tracked/active company-store-product guards, positive whole quantity, stock-row lock, request lock, exact-body replay, conflict rejection, actor and raw/baked/total before/after audit. No duplicate commercial product, no self-link to the legacy policy, no guessed SKU and no production schema/data write. Existing two-product routes/UI are untouched and remain unaccepted for DAILY's corrected requirement.

Added native PostgreSQL regression for receipt40→raw25/baked15/total40, consume1→raw25/baked14/total39, replay, insufficient stock, foreign/inactive-scope refusal, extra receipt and later baking, concurrent last-piece consumption, explicit restore, rollback, unchanged control and original SKU/price/VAT. Local input-contract test PASS1/0FAIL; native SQL test SKIP1 because no isolated database is available locally, mandatory unskipped CI pending. These are accounting-core simulations, NOT actual invoice/POS/online/return integration or LAB PASS. No manual claim added.

Remaining: integrate this core with selected-store policy/configuration and baking UI; show raw/baked/total in inventory without changing total-ledger reconciliation; wire real POS and both online consumers exactly once, recipe exclusions and generic stock adjustment/stocktake/transfer/return/waste semantics with regression coverage before activation. Existing full fiscal/payment/return decisions belong to their assigned owners and are not modified here. Then full CI/build/invariants/E2E, guarded exact deployment and fresh measured LAB before/after. Real DAILY settings/catalog/branding/modifiers/installation and public activation remain separate NOT TESTED.

No live action in this turn. Previous unused zero-stock fixture and last financial/control preparation remain historical only; no inferred fresh delta. Same owner retained until a named merged takeover. Single next action after this core is green/merged: integrate the single-product state with inventory and authorized POS/online callers, preserving canonical total stock and rejecting ambiguous state adjustments. Publication PR2313 (https://github.com/xrhstosmanis-design/myworkstation-app/pull/2313), initial source head8790cd277d2b85cf6253e9a2fd130985281d07f1. Concurrent main documentation f6194acf is reconciled preserving Barcode USER PASS and category readability assignment. Final head/check/merge metadata in PR2313 are authoritative; full CI remains pending. No completion or manual PASS.

11/10/2026 23:18:30 Athens — POS-CATEGORIES-READABLE-05 / limited USER VISUAL PASS / CLOSED

Χρήστος Μανής replies «ειναι οκ» directly after item5's release and requested Ctrl+F5 → inspect category captions → open Μπύρες/Αναψυκτικά → read names/prices/scroll. Limited owner-reported visual acceptance for delivered clearer category buttons and larger category/subcategory product popup. No new attachment or independently measured physical terminal, client SHA, touch geometry, individual product selection, financial/stock/fiscal outcome supplied or inferred. No sale, assignment edit, removal or replay for evidence.

SourcePR2312/finalhead6f7882a1f5671d5e92a5d41a9f1c7e5b98a3aa6c/exactCI38169132843 SUCCESS2395/0/0; merged0571a2f04e8eae691c94e834b7d3a8684a3161f7/mainCI38169465079 SUCCESS2395/0/0. Actual pinned Render guard38169779456/deployjob114559795568 healthy expected revision19:54:06.7840917Z; independent public health/served JS+CSS22:55:39.362925Athens verified. ReceiptPR2318/head38eb070430104892b7193f5d9ddb880074aa0aaa/docsCI38170168713 SUCCESS mergedc6b7d363bf1c96c886911e84f8d3f5e3e673326a. This release metadata does not identify the user's physical client SHA. Prior inherited timing failure/retry and source rebase remain in historical evidence below.

Owner codex/pos-categories-readable-20261011 completes this bounded presentation scope. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-categories-readable.md, manual and numbered03 synchronized; completed pending subtask removed. Items3/4/5 CLOSED within their recorded bounds; items1/2 still AWAITING USER. Item6 separately claimed next; items7–9 wait. Wider tracker03, scanner/catalog performance, installation and every other assigned owner retain their prior status. No whole-request or broad LAB PASS.

11/10/2026 22:16:15 Athens — CASH-REPORT-ANALYSES-01 / USER PASS εμφάνισης / CLOSED

Ο ιδιοκτήτης επιβεβαίωσε «ειναι οκ» μετά την παράδοση της μαζεμένης αναφοράς ταμείου με κουμπί «Αναλύσεις». USER PASS μόνο αυτής της εμφάνισης, συμπληρωματικά στο πραγματικό LIMITED LIVE UI PASS PR2299/2300. Δεν έγινε νέα δοκιμή/συναλλαγή. Το μήνυμα δεν προσδιορίζει νέα συσκευή/ρόλο/revision ή οικονομικά deltas. Physical print/export/email/mobile/άλλοι ρόλοι παραμένουν NOT TESTED· overall No33 OPEN. Scope ήδη κλειστό, δεν επανεισάγεται στο pending. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-cash-report-analyses.md, manual docs/manual/reports/PASS.md.

11/10/2026 21:44:41 Athens — DAILY-BAKING-02 / owner correction: one product identity / ASSIGNED, NOT TESTED

Owner remains codex/daily-online-store-20261011, issue2054; claim/handoff branch docs/daily-baking-lab-20261011. User explicitly corrected «θα πρεπει να ειναι το ιδιο ειδος». This supersedes the planned two-product DAILY acceptance: one original product/SKU/name/price/VAT must represent both unbaked and baked quantities; no requirement to create a separate commercial baked product. Existing two-product source is deployed but NOT accepted for this corrected scope. Do not configure self-links against the old schema or relabel its native CI as this feature PASS.

Actual single LAB fixture creation at21:44:38: LAB-BAKED-20261011-01, name LAB ΨΗΜΕΝΗ ΤΥΡΟΠΙΤΑ DAILY-BAKING-01, id6923ad50-ff7a-4d0d-995c-0f7a46bf527f, stock0/PIECE/price1.40/VAT13/categoryΔΟΚΙΜΑΣΤΙΚΑ. Archive now shows3 matchingτυρόπιτα rows: new0, originalrawSKU100028953=80 and control100028954=40, summed120 unchanged. Submitted exactlyonce; no mapping, baking, sale or receipt. This is an unused zero-stock LAB fixture, not a second DAILY identity or baking PASS; preserve audit, do not delete/reuse other owners' historical items. Physical terminal and independent post-create financial/control IDs not measured; NOT TESTED, no inferred transaction/stock ledger delta.

Revised bounded source scope: same product identity with separately accounted unbaked and baked quantities and shared POS/online availability. Baking moves quantity from unbaked to baked with no new product and no change in overall pieces; a finished sale consumes one baked piece and one total piece, never burns raw twice. The chosen representation must keep inventory snapshot/ledger/reports consistent and show staff the two quantities without exposing a second commercial SKU. Preserve legacy already configured two-product behavior for compatibility rather than invalidating records, all Gate2/Gate6 PASS and other owners. Exact raw/finished/total before/after and actor/idempotency history required; whole positive quantities, sufficient unbaked stock, concurrent last-piece guards and immutable replay. Coffee/tea ALWAYS unchanged. Generic receipt/waste/stocktake/return effects on the baked sub-balance must be explicitly reconciled before claiming complete availability; no unsupported implicit raw/finished assumption. No production migration, seed, DB push, real DAILY diagnostic stock write or public activation.

Current source health8f0affdf and measured preparation are in the entry below. Source implementation must follow this merged correction claim, full native PostgreSQL/UI/regression/isolated E2E CI and guarded exact healthy deploy before new LAB stock actions. Current status AWAITING SOURCE AND LAB; no new manual PASS. Owner retained, not released. Single next action: implement one-identity stock accounting after this claim is green and merged. Then fresh measured LAB baseline and one identified action at a time; actual DAILY settings/catalog/modifiers/installation remain separate.

11/10/2026 21:28 Athens — VOICE-ASSISTANT-01 / naming and per-store sales list / expanded requirement ASSIGNED

User explicitly requires natural product/category names rather than knowing SKU: «πόσες πωλήσεις είχαμε σε νερά ανά κατάστημα» must return one labelled row per authorized store, quantities and turnover plus complete-scope total when evidence is complete. Owner retained codex/unified-voice-assistant-20261010; continuation branch feat/voice-sales-name-per-store-20261011. Current single-store product lookup already accepts description but ambiguity asks SKU and cannot aggregate a category/all stores; this expanded behavior is NOT TESTED, not covered by prior product PASS. Next implementation priority: named product/category resolution with named disambiguation (no mandatory SKU), explicit aggregate scope in assistant UI, fixed role-authorized company/store inventory (model never supplies tenant IDs), same canonical completed/reversal-aware Athens sales report reader, per-store source-labelled output with no false-zero/capped partial total. Period required or resolve today/yesterday to Greece date. Super Admin all authorized active stores across companies; licensed Owner own eligible active stores only, relevant domain entitlement freshly checked for each read and result. Disabled/unlicensed/failed sources visibly excluded/unavailable and prevent claiming complete total. No new grant, auth bypass, SQL arithmetic, payment/business/fiscal write or N40 Twin takeover.

Acceptance: real report before/Ask/after for named LAB category/product, cross-store authorization/revocation/entitlement/injection/source cap/failure/ambiguity/negative and mixed-unit handling, readable shared Greek euro presentation, escaped UI/scope withdrawal; Node20 fullCI, exact mainCI, guarded release and actual scoped LAB. Full assistant OPEN. Other domain reports remain assigned residual. Existing role/data PASS, Owner single-store/module/currency/ambiguity/stock limits and other assignments preserved. This claim must merge green before source changes.

Additional explicit user acceptance21:29Athens: one question with multiple natural names, e.g. «πωλήσεις από1/10 έως31/10 για Άλφα330, Άλφα500, Fix λεμόνι κτλ». Return per-product/per-store quantities and euro turnover plus valid totals, no mandatory SKU. Resolve packaging/name ambiguity by showing names/options, no silent combination of distinct products. Requested future end31Oct2026 remains labelled incomplete/as-of current Athens day; never invent future sales. Category group and multiple individually resolved names are distinct explicit matching modes. This remains expanded source/live NOT TESTED.

Additional user acceptance21:30Athens: sales made under offers, grouped per store and period, with offer identity/quantity/turnover. Must use the actually applied offer metadata stored on completed sale items; current offer definition alone cannot prove an historical promotional sale. Offer sales aggregate source/live NOT TESTED, included retained owner residual; inspect existing canonical offer report before source changes.

11/10/2026 21:29 Athens — VOICE-ASSISTANT-01 / Platform product reports LIMITED LIVE DATA PASS / main prose FAIL / full scope OPEN

Owner codex/unified-voice-assistant-20261010 retained. Shared source PR2291/head fa1c75b0/CI38157381368 (2358/0/0) merged e89dd7a0; combined 10b3693a/CI38157991828 (2367/0/0)/guard38158410565. Actual central Ask17:12:22.757UTC failed the native role contract. PR2292/head073c0146/CI38158827959 (2373/0/0) fixes only the existing signed OWNER + Super Admin flag representation, retaining fresh database SUPER_ADMIN/session/active-pair checks; merge and exact healthy release aa1f0413509482de23563a34a1230a12871470b2/mainCI38159171140 (2373/0/0)/guardedRender38159491285. Actual new client index-C5KR5F7U.js verified before successful Ask.

Actual central actor Χρήστος Μάνης, explicit independent selection MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (company cmtpopbgk000prhb5qc60zxus/store cmtpopbgo000trhb5ng9ytiru). Question «Για το SKU 2269, πόσα πουλήθηκαν στις 10/10/2026 και ποιο είναι το τρέχον καταγεγραμμένο απόθεμα; Δείξε τις πηγές.» Ask requested17:28:35.683UTC; source stock read17:28:41.547UTC. Fresh ordinary reports BEFORE through normal Super Admin support UI, not normal Owner: SKU2269 NEPO500ML /10Oct/Athens checked /4 quantity /2.00€ gross /1.77€ net /.23€ VAT; current recorded stock −70 /11Oct period sales0. Both assistant source panels show these values. Fresh ordinary sales AFTER independently observed same4/2.00/1.77/.23; sales AFTER screenshot unavailable, no invented filename. Actual stock AFTER refresh observed −70 and period0, screenshot voice-platform-stock-after-1791740412341.jpg. BEFORE per-report backend revision not separately attested; exact health was verified before Ask. No transaction, business write, new grant, secret or foreign-company read. This closes only that named product source/report reconciliation; source reversals0 were not independently expanded in ordinary report.

Presentation FAIL remains: provider main answer/highlights exposes grossSales/netSales/vatValue/currentStock/PIECE and long fractions without€. Source tables already Greek and correctly formatted. Next bounded continuation ASSIGNED: shared readable product facts in both Owner and Platform, preserving provider fallback for cash/mixed/ambiguous/no-match/capped/invalid evidence, source values, quantities/units, limits, scope withdrawal and escaped rendering. No new calculations or auth/licensing/report mutation. Source correction and live presentation retest NOT TESTED. Acceptance includes actual raw failed prose, fractional negative quantities, dates/SKU unchanged, malformed and mixed-source fallback; Node20 build/full CI/exact main CI/guarded release/live scoped query.

Evidence directory CHECKPOINTS/EVIDENCE/voice-platform-products-20261011. Full tracker32/printed30 OPEN/ASSIGNED: payments/expenses/invoices/suppliers/personnel/shifts/events and other authorized application reports, explicit multi/all-store product aggregation, physical microphone and broader live negatives. Owner AI_OWNER_ASSISTANT remains licensed own stores only; Super Admin all-company scope only through its proper role. Earlier normal Owner stock AFTER remains NOT TESTED; this support-access report comparison does not replace it. Protected prior cash/sales/currency/ambiguity/module PASS and all other owners retained.

11/10/2026 22:19:27 Athens — POS-BARCODE-MODAL-04 / limited USER VISUAL PASS / CLOSED

Χρήστος Μανής confirms «ειναι οκ» after item4 release and the requested Ctrl+F5 → Λειτουργίες POS → Έλεγχος και καταχώρηση νέου Barcode visual check. Limited owner-reported USER PASS for the delivered larger/readable Barcode dialog only. Referenced attachment image(20261011-191921).png was unavailable at the supplied local path; no independent image, screen geometry, physical terminal/client SHA, touch/mobile gesture, exact search/selection or barcode-save/label/financial outcome is inferred. No new test, transaction or barcode/price write was replayed to obtain evidence.

Prior release evidence: sourcePR2307/head6075f02c04a5d327570f307715ddd36fac515d23/CI38165914115 SUCCESS2377/0/0; integration merge800441c81b0eab129acc239cb3afb09ae4926c1b. This is independently verified release metadata, not proof of the user's physical client SHA at acceptance.

Owner codex/pos-barcode-modal-readable-20261011 completed this bounded display scope. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-modal-readable.md and POS manual synchronized; completed pending subtask removed. Items1/2 still AWAITING USER, item3 collection CLOSED; item5 claimed next, items6–9 wait. Wider tracker03/installations, scanner/catalog performance, EAN13 label/save permissions, financial/stock/fiscal and other owners retain their exact prior status. No broad LAB or whole-request PASS.

11/10/2026 21:21 Athens — CASH-REPORT-ANALYSES-01 / LIMITED LIVE UI PASS / CLOSED DISPLAY SCOPE

Owner codex/operator-checkbox-audit-20261009. Claim PR2298 / CI38162139847 SUCCESS / merge4d559ffa published before source. Source PR2299 head59e125a74ba781b79422f825018a00e34a2e38a9 / fullCI38162292599 **2377 PASS/0 FAIL/0 SKIP** / merge **8f0affdf070a21c47fc53c2ef4c127ef7c5629d7**. Exact main CI38162636099 attempt2 SUCCESS **2377/0/0**; attempt1 failed an existing unrelated pos-capacity-runner HTTP timing assertion, same source retried without changes or weakened checks. Guarded Render38163114472 actual deploy job114540024829 SUCCESS; earlier failed-CI-triggered deploy38162791294 correctly skipped, not release evidence. Independent browser health ok=true/version0.22.0+kat-test-pos/exact8f0affdf070a21c47fc53c2ef4c127ef7c5629d7 before fresh client reload.

Actual cloud Chrome1348×926, authenticated SuperAdmin Χρήστος Μάνης, Platform → Ταμεία → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / MYWORKSTATION LAB, date11Oct. Same three existing closed shifts: LAB POS2/LAB-POS-02 01:33–11:07, LAB POS2/MAIN 08:13–11:07, Εργαστήριο Χειριστής1/LAB-POS-02 11:09–11:17. Existing report3 shifts, shortage/surplus/variance/cardVariance0, expensesWithoutDocument3. Entire original table/summary/65 detail paragraphs/final result compared before versus deployed DOM: **exact equality true**. This proves display preservation, not accuracy of historical findings or new financial reconciliation.

LIVE UI PASS: first render hides details (hidden=true/display:none) with visible «Αναλύσεις», summary and final result. Click opens all65 paragraphs (aria-expanded=true/display:block); Enter closes (false/hidden); open then existing Εμφάνιση reload resets closed. Existing report content/amounts unchanged. Final real screenshot CHECKPOINTS/EVIDENCE/cash-report-analyses-20261011/compact-report.jpg. No business, payment/refund/stock/shift/permissions/fiscal submission or email/clipboard/export/print execution. Source keeps original clipboard/email/export/print handlers and full DOM, scoped print CSS exposes detail content; actual print preview/physical print/export/email, other roles/mobile/other-store UI NOT TESTED. Display-only scope closed; **No33/tracker35 overall OPEN**, internal RBS return acceptance and other owners remain assigned. Manual docs/manual/reports/PASS.md. No repeat of old transactions.

11/10/2026 21:00 Athens — CASH-REPORT-ANALYSES-01 / ASSIGNED / NOT TESTED

Owner codex/operator-checkbox-audit-20261009; branch fix/cash-report-analyses-20261011. Explicit owner image image(20261011-175908).png and request «εδω θελω να βγαινει μαζεμενο με κουμπι αναλυσεις» target Platform Αυτόματος Έλεγχος Ταμείων → Συνολική αναφορά → Ανάλυση ανά βάρδια. Independent presentation-only scope, not takeover of assistant/N40/current-cash/payments/return/Inventory/fiscal owners. Initial screenshot displays long expanded existing historical findings; no new financial FAIL is inferred.

Read current AGENTS, prior complete active history/current delta, main history through e80c62c, tracker/pending/numbered, relevant cash/AI checkpoint and reports manual. Preserve existing report totals, store/company selection and restrictions, all findings/order/links, clipboard full report, print/email/export and original security/calculation/GET sources. Claim has no source change or business/UI action. Bounded change: per-store «Αναλύσεις» button, initially collapsed shift analysis only, opens/closes every original paragraph without new fetch; overall summary/final result remain visible. Reset collapsed on fresh report/scope; print retains complete details. Full Node20 CI/main and ordinary guarded exact healthy deploy before read-only open/close/refresh/print-view acceptance. User device/mobile/physical print NOT TESTED; No33 remains OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-cash-report-analyses.md.

11/10/2026 20:26 Athens — POS-INTERNAL-RETURN-RBS-01 / SOURCE DEPLOYED / AWAITING LAB-USER / No33 OPEN

Owner codex/operator-checkbox-audit-20261009 retained. Claim PR2282 / docs CI38156748626 SUCCESS / main f11516e091b41a5c39ea2db3d0648715fbb224c6 published before source. Source PR2290 exact head fae287fff39ff7d0851845bc3d567b2dfd37e2da / full CI38158276976 SUCCESS **2372 PASS, 0 FAIL, 0 SKIP**, merged main **a1d67b330355c0c244539f9eff10afb1460d56b9**. Exact main CI38158769165 SUCCESS **2372/0/0**. Guarded Render38159044341 actual deploy job114527942196 SUCCESS, including exact production revision gate. Independent cloud browser /api/health readback ok=true / version0.22.0+kat-test-pos / exact **a1d67b330355c0c244539f9eff10afb1460d56b9**. Later concurrent source/docs remain independently owned; no release gate bypass.

Required dropdown has exactly three nonempty choices: **Λάθος χειριστή / Επιστροφή από πελάτη / Λάθος καταχώρηση**. Blank cannot submit; server enum and linked ledger/Audit retain selected reason. Selected refund amount is shown before confirmation, with explicit actual CASH/CARD/IRIS method and **«Εκκρεμεί φορολογική επιστροφή RBS»**. This records an actual internally settled customer refund; it does not execute bank/EFTPOS or fiscal cancellation. Original ISSUED receipt and RBS request stay immutable. One linked negative Sale/Payment/shift ledger/tracked-stock/Audit transaction, one internal return per original receipt; select all intended items together. Own company/store/original terminal/current open shift and central RETURN_ITEMS permission are mandatory. Duplicate/concurrent submissions, missing stock mapping, unsupported/inconsistent payments and foreign/closed scope reject safely. Existing NON_FISCAL return, shift own/all and fiscal guards retained.

Native isolated PostgreSQL CI actually exercised atomic writes, concurrent duplicate (one winner), last-Audit-write failure with complete rollback, original receipt/RBS immutability, unchanged control ledger/stock, cent/discount/fractional quantity calculations, scope/permission/terminal/closed-shift/payment rejection. Mounted actual UI and central permission tests passed. CI and deployment health are **not LIVE business PASS**. No new production sale/refund/payment/stock/shift/permission/fiscal submission or historical replay occurred.

Next acceptance remains **AWAITING LAB/USER**: fresh normal EMPLOYEE LAB POS2 profile/cart0/current shift and control baseline; identify a genuinely authorized original completed ISSUED/COUNTER RBS sale in that same open shift; inspect quantities, dropdown reason, actual refund method and amount. Submit only the known actual refund once, then independently compare linked IDs, cash/cards/IRIS, stock, original receipt, shift journal and Audit against before/control. Do not create/replay real-store refunds merely for evidence. Physical operator/mobile behavior, actual RBS fiscal return and future fiscal reconciliation remain NOT TESTED. Protected 10Oct NON_FISCAL 1EUR return, personal card/QR, count and earlier accepted No33 flows are not repeated. **Overall No33/tracker35 OPEN**; checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-internal-return-pending-rbs.md.

11/10/2026 19:06:55 Athens — OWNER-EXPENSE-READABLE-REASON-01 / USER PASS εμφάνισης

Ο ιδιοκτήτης επιβεβαίωσε «einai ok» μετά την παράδοση της μεγαλύτερης γραμματοσειράς και χωριστής Αιτιολογίας στον πίνακα Έξοδα & Πληρωμές → Κατηγορίες. Καταγράφεται USER PASS μόνο για την παραδοθείσα εμφάνιση, συμπληρωματικά στο ήδη δημοσιευμένο LIMITED LIVE VISUAL PASS PR2272/2279 (300€ «τονια τιμολογια»,100€ υπάρχουσα αιτιολογία,50€ «καμερα»). Δεν έγινε νέα δοκιμή ή πληρωμή. Δεν προκύπτουν από το μήνυμα νέα συσκευή/ρόλος/revision ή οικονομικά/stock deltas. OrdinaryOwner/mobile/export/physical print και ευρύτερα No25/tracker27, No33/tracker35 παραμένουν OPEN, με τους υπάρχοντες owners. Το συγκεκριμένο display scope είναι κλειστό και δεν επανεισάγεται στο pending. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-owner-expense-readable-reason.md.

11/10/2026 19:40 Athens — POS-INTERNAL-RETURN-RBS-01 / EXPLICIT OWNER TRANSFER / ASSIGNED / NOT TESTED

User in this page explicitly instructs «ανελαβε εσυ την υλοποιηση». ΑΝΑΛΗΨΗ ΑΠΟ codex/internal-return-rbs-takeover-20261011 (previous codex/pos-internal-return-pending-rbs-20261011) — ASSIGNED codex/operator-checkbox-audit-20261009, source branch fix/internal-return-rbs-operator-20261011. Reuse documentation claim PR2282, reconcile latest main280c66d and preserve all concurrent owners. Earlier claim was not merged and contains no source; no existing return/payment is replayed. This receipt supersedes prior owner declarations for this independent scope only after green merge to main. No33 remains OPEN.

Bounded implementation: separately confirmed internal return for completed ISSUED RBS counter sale, original currently open terminal shift, selected original quantities and explicit actual refund method; one atomic negative linked Sale/Payment/shift ledger/tracked stock/Audit, durable INTERNAL_RETURN_PENDING_RBS label «Εκκρεμεί φορολογική επιστροφή RBS». Preserve original fiscal receipt/status, never issue CAP/fiscal command or automatically refund history. Reject foreign company/store/terminal/closed shift, duplicates/concurrent submissions, invalid quantity/payment and unauthorized central returnItems. Existing NON_FISCAL return PASS and fiscal guards protected; other assigned invoices/Inventory/header/session work untouched.

Read AGENTS, latest active/checklist/tracker/pending/main delta, existing return source and manual, previous claim and 10Oct return checkpoint. New internal RBS behavior NOT TESTED; no new manual PASS or production business mutation. Require native isolated atomic/rollback/concurrency/scope/cent/payment tests and mounted UI, full Node20 PR/main CI, guarded exact healthy deploy, then bounded acceptance with fresh before/after. Single next action: publish transferred claim green on main before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-internal-return-pending-rbs.md.

11/10/2026 21:23:08 Athens — POS-SUPPLIER-FIVE-PHOTOS-03 / USER PASS συλλογής / CLOSED

Ο Χρήστος Μανής απάντησε «ειναι οκ» μετά την παράδοση του 3ου αιτήματος (έως5 φωτογραφίες από POS κάμερα/αρχεία και κινητό QR) και τις οδηγίες ελέγχου πλήθους, σειράς/αφαίρεσης και «Αποστολή όλων». Καταγράφεται περιορισμένο owner-reported USER PASS για την παραδοθείσα συλλογή φωτογραφιών. Δεν δόθηκαν ξεχωριστά αποτελέσματα ανά φόρμα/συσκευή, χρόνος αρχικής δοκιμής, ακριβές terminal/client revision ή ανεξάρτητες μετρήσεις. Δεν συμπεραίνεται πραγματική καταχώριση πληρωμής, παράδοση στο BackOffice/OCR ή οικονομικό/stock/fiscal PASS. Δεν έγινε νέα δοκιμή ή replay για τεκμηρίωση.

11/10/2026 17:49 Athens - VOICE-ASSISTANT-01 / recorded stock SOURCE DEPLOYED / before-query reconciliation LIMITED LIVE PASS / after refresh AWAITING OWNER

Same retained owner codex/unified-voice-assistant-20261010, source branch feat/voice-owner-product-stock-20261011. Mandatory claim PR2257/head a4f75ecc7cb78f53f292e270e52698561248a458, docs CI38146724319 SUCCESS/main87ae232c and five claim blobs verified before code. Source PR2260/head dbb5da17c3ba1cb1f9d8bfdd26e9569f0bc339dd, exact full PR CI38147549835 SUCCESS2328/0fail/0skip, merge f45e6c53d63edb2b0b512f3a48d4d84665708713. Exact main CI38147865426 SUCCESS2331/0fail/0skip with native PostgreSQL/archive/real HTTP E2E/build/invariants; ordinary guarded Render38148114214 SUCCESS and actual browser /api/health ok=true/version0.22.0+kat-test-pos/exactf45e6c53. No guard bypass/manual deploy/new service/key/grant. Eight assistant source/test blobs unchanged on current mainaf6c3e45 (separate POS-header owner source). Do not attribute unrelated main tests/POS acceptance to this assistant.

Fresh ordinary root client /assets/index-BJjdvc36.js showed MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / three own stores, no support preview or new sign-in. Opened primary ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru), explicitly corrected commercial selector from its N40 default before any

query; launcher inheritance remains separate. Ordinary Αναφορές -> Στατιστικά αποθήκης / Στατιστικά-Ανάλυση αποθήκης, literal SKU2269, from/to11Oct2026, explicit Search. Before observation14:44:34.898UTC: one NEPO500ML /2269 row, current recorded stock -70, own primary store. Date filters bound period-sales reads, not current quantity. No physical count or reason for negative stock inferred.

Single new explicit read-only Ask14:45:01.402UTC asked current recorded stock, identity/SKU/quantity/unit/read time for this same store. Actual rendered answer and new separately labelled source observed after Ask and before14:46:49.753UTC: exact NEPO500ML /2269 /ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ /-70; source unit «τεμάχια», read time11Oct17:45:05Athens. Answer prose/highlight used raw unit PIECE; equivalent source unit but Greek prose-unit polish remains residual, not an all-Greek presentation PASS. Answer/source qualified current recorded/nonphysical/not available-to-sell/historical/reservations. LIMITED LIVE PASS only for one normal Owner negative-stock read, preserving -70 rather than zero, displayed source and agreement with independently observed BEFORE report. Raw provider payload, every unit/negative/fractional/ambiguity/cap/failure and AFTER report reconciliation NOT TESTED live; fixture regressions remain distinct.

Before the intended after-report refresh, fresh DOM showed «Η προβολή Backoffice διακόπηκε / Η σύνδεση άλλαξε», stopped automatic renewals, withdrew answer, disabled input/Ask and displayed support-context instruction. At14:46:49.753UTC clicked only visible «Άνοιγμα Backoffice»; fresh page showed «ΠΡΟΣΒΑΣΗ SUPER ADMIN · DAILY BITE E E · DAILY BITE E E» instead of normal LAB Owner. Cause/actor not investigated; do not infer credential expiry or a stock bug. Further reads stopped: no other-company stock query, no support bypass, token inspection, sign-out/session reset, new Ask/business replay or permission/key change. AFTER measurement unavailable, retained answer/photo unavailable after withdrawal; do not manufacture either. Actual inspected54092-byte screenshot CHECKPOINTS/EVIDENCE/voice-owner-stock-20261011/voice-owner-stock-context-1791730077749.jpg proves later different-company context only, NOT the stock answer. Exact observations in stock-observation.json. Physical terminal/microphone unknown; cloud typed query is not device speech acceptance; financial/stock mutation deltas N/A.

Prior cash/exact-day/ten-day/currency/context/negative-sales PASS protected. Full tracker32/printed30/VOICE OPEN/ASSIGNED; source deployed with only bounded before-query stock evidence, stable before/Ask/after comparison still AWAITING normal Owner. Caps/failures/DST/lifecycle/foreign-scope live cases, Greek prose units, physical Greek microphone, other domains/POS/optional speech and historical stock remain residual. No Inventory2.0/Gate2/N39/TODAY07/central session/No40/POS-header/Audit/payroll takeover. Single next action: restore ordinary Owner MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου through normal authentication/account selection, confirm primary store, then finish read-only stock after-report acceptance; use a separately identified new read-only test only if original baseline can no longer be linked, never replay a business transaction to fill evidence. All five records and canonical tracker PDF synchronized; full PASS withheld.

11/10/2026 18:03 Athens — OWNER-EXPENSE-READABILITY-01 / ASSIGNED / new user requirement

Owner codex/operator-checkbox-audit-20261009; branch codex/owner-expense-readable-reason-20261011. User screenshot image(20261011-150112).png explicitly targets **Έξοδα & Πληρωμές Ιδιοκτήτη → Κατηγορίες**, not the already closed Audit reason scope PR2255/2263. Increase lower category table text from observed10px to16px and add standalone Αιτιολογία beside preserved original category description, with the existing strict display-only helper adapted from category type/name. Main5ccefdc and current AGENTS/manual/tracker/pending/source/server aggregation inspected. Existing selected Diadoxou store report1–11Oct has3rows300/100/50EUR,counts1each,66.67/22.22/11.11%; reasonsembeddedτονια τιμολογια / αντρεας8ωρες… / καμερα. No financial data mutation or re-grouping. Preserve amount/count/percent/order/originaldescription, table filter/sort/resize, exports, roles/tenant/store/license guards and Audit reason PASS. Source limit category renderer+scoped category CSS+actualDOM regression; no route/API/storage/permissions/transaction/shift/stock submissions and no payment replay. Required green fullsource/mainCI, guarded exact healthy deployment and read-only LIVE visual acceptance on same existing rows, including refresh. Ordinary roles/mobile/physicalprint/export reason column NOT TESTED. No33 remainsOPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-owner-expense-readable-reason.md.

Τα αρχικά δύο rows συγκρίθηκαν πριν/μετά: όλα τα παλιά πεδία παραμένουν ακριβώς ίδια αν αφαιρεθεί μόνο η νέα στήλη. Αυτό είναι DOM preservation proof, όχι μέτρηση οικονομικής/stock μεταβολής. Μετά ↻Ανανέωση και επανάληψη της αναζήτησης οι δύο αιτιολογίες διατηρούνται· εμφανίστηκε και τρίτο ήδη υπάρχον έξοδο100EUR17:36:50 από άλλον χειριστή, όχι ενέργεια αυτής της συνεδρίας. Screenshot πραγματικής προβολής μετά refresh: CHECKPOINTS/EVIDENCE/audit-expense-reason-20261011/reason-column.jpg.

Μόνο display extraction για OTHER_EXPENSE από τρεις αυστηρά αναγνωρισμένες σημερινές δηλώσεις· plain description χρησιμοποιείται αυτούσια, άγνωστη/κενή no-document μορφή δείχνει — χωρίς επινόηση. Αρχικό κείμενο, IDs, ποσά, escaping, CSV πλήρους description, store/tenant/role/video guards διατηρούνται. Δεν έγινε οικονομική/stock/shift υποβολή, αλλαγή δικαιωμάτων, API/schema/storage αλλαγή ή επανάληψη πληρωμής. Normal Owner/EMPLOYEE, mobile/touch, άγνωστες ιστορικές μορφές, ξεχωριστή CSV column και φυσική εκτύπωση NOT TESTED. Επόμενο No33 μόνο μετά fresh LAB POS2 EMPLOYEE profile/cart baseline, χωρίς επανάληψη προστατευμένων PASS.

11/10/2026 17:21 Athens - VOICE-ASSISTANT-01 / current recorded product stock ASSIGNED / NOT TESTED

Same owner codex/unified-voice-assistant-20261010; source branch feat/voice-owner-product-stock-20261011. User17:13Athens says continue; full voice-for-all request authorizes next bounded read-only domain. Prior negative-sales publication PR2253/head90c9a58c/docsCI38145677898 SUCCESS/main47baa986; all9 published blobs verified. Cash, exact-day/ten-day sales, visible euro currency and tested context/ambiguity/no-match remain protected. Baseline current main1371933d, history since actual3e37a194 contains docs only (Audit/voice receipts and separate POS-header claim). No assistant/inventory source regression observed. New stock feature is NOT TESTED, not manual/LAB PASS.

Claim only a current recorded-stock query for one active product in selected own store through the existing canonical GET /api/reports/stock-analysis, original authenticated session, fixed loopback origin, server-owned company/store, AI_OWNER_ASSISTANT + INVENTORY. Product name/SKU max120; no model-supplied store/company/URL/SQL/action/date, no barcode inference. Source currentStock/unit/product identity only, no purchase cost/value/supplier/person/contact/attachment/sales aggregate exported to provider. Negative/fractional source quantity preserved. Exact SKU/name first, else unique literal partial; duplicates/multiple matches require SKU without quantities/sum; no-match means no matching active record in selected-store report, never zero-stock/nonexistent-product proof; full10000 source cap cannot prove uniqueness/absence. Source errors/malformed numbers/scope mismatch fail closed. Fresh authorization around read/provider/final and existing max2reads/3provider calls/context clearing retained.

Existing canonical stock route/report arithmetic, Inventory2.0/write/ledger/concurrency/Gate2/N39/TODAY07 and all other owner scopes unchanged. No schema/auth/license/Finance/API-source changes, grant/key/activation/business action; reuse existing OpenAI connection explicitly chosen earlier and demonstrated by prior real provider replies. New evidence UI labels recorded current stock/unit/store/read time and instructs ordinary same-product/store report comparison; no cash/sales mislabel or physical count assertion. Physical microphone remains user's-device acceptance, not typed cloud proof.

Required before LIVE: strict argument/privacy/scope/negative/fractional/no-match/ambiguity/cap/source-failure regressions, mounted evidence escaping/context/revocation and cash/sales preservation, full Node20 PR/main CI/build/invariants/native isolated DB/HTTP E2E, ordinary exact guarded healthy release. Then one new primaryLAB read-only SKU query with ordinary stock report baseline and after refresh, correct Owner identity/no support preview, no business replay. New source/manual PASS prohibited before actual acceptance. Tracker32/printed30/fullVOICE OPEN/ASSIGNED; other lifecycle/date/source cases/domains/POS remain residual. Single next action after green claim merge: implement this bounded assistant tool and source evidence view. Checkpoint2026-10-10-unified-voice-assistant.md.

11/10/2026 17:10 Athens — AUDIT-EXPENSE-REASON-01 / ASSIGNED / expanded user requirement

Owner codex/operator-checkbox-audit-20261009; independent branch codex/audit-expense-reason-column-20261011. User clarifies: show actual reason separately, e.g.300EUR «τονια τιμολογια», rather than embedded after the no-document responsibility declaration. Existing full-description LIVE PASS/PR2250/2251 retained; this adds a distinct readable «Αιτιολογία» column beside original complete description. Only OTHER_EXPENSE display extraction from exact known current responsibility prefixes; ordinary attached expense description remains reason; unknown no-document format must not invent a reason. Preserve original text, IDs, amounts, existing CSV full description, escaping, store guards, grouped filters/sort/resize/video and other-owner scope. No transaction replay/server/API/schema/storage/permission/financial/stock/shift change. Main47baa98 and report/manual/own checkpoints inspected; no overlap with existing closed report isolation or payment correction owner. Claim green/main before source. Required pure parsing regressions for3declarations, exact user examples, empty/unknown/plain/multiline/injection-like text; actual report DOM regressions and full source/main CI, guarded exact release, same existing50/300EUR rows read-only live. Acceptance NOT TESTED; No33/broaderAudit remainOPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-audit-expense-reason.md.

11/10/2026 17:00 Athens - POS-HEADER-LIGHT-RESIZE-02 / CENTRAL MENU SOURCE LIVE / AWAITING USER

Owner/source codex/pos-header-bright-resize-20261011. User11Oct16:53 Athens says continue after delivery of item1; this explicitly authorizes item2 without declaring item1 USER PASS. Item1 calculator remains AWAITING USER; prior instruction to wait is superseded only for proceeding to item2. Items3–9 remain queued.

Original supplied image(20261011-095504).png recovered and visually inspected (1920x203): dark green two-row POS header with primary controls plus wireless ordering/Chat/Barcode/work-card/radio. Target is header brightness and its lower edge, not an unidentified modal or all-system theme. Main3e37a194 preserves current Audit/voice owners and calculator sourceae7c8cc4. Existing08–09Oct auxiliary-header USER PASS remains protected: all same authorized launchers inside the header, wireless ordering uses existing module, modal portals and radio behavior unchanged.

Bounded client presentation: light MyWorkStation header, clearly contrasting text/buttons; visible bottom resize handle for mouse/touch and keyboard; vertical sizing respects natural content minimum so controls never get clipped, protects remaining cart/payment area, and safely remembers browser-local size per store if available. No catalogue/price/permission/API/schema/auth/fiscal/stock/shift/payment change. No production/LAB business action or accepted transaction replay. New physical resize/brightness acceptance NOT TESTED; CI is not USER/LAB PASS.

Claim PR2252 CI38146237037 success merged1371933d before source. Source PR2256/headccc7f474 full CI38148178128 SUCCESS2332PASS/0FAIL/0SKIP mergedaf6c3e45; compact follow-up PR2264/head2f8fe003 full CI38148921019 SUCCESS2332/0/0 mergedab7171c2de9f8ba7b1e59374bea193faf08511b2. Exact final main CI38149267494 SUCCESS2332/0/0, including native PG/HTTP E2E/Windows/contracts and exact Chromium geometry. Ordinary guarded Render38149554271/deployjob114499990008 SUCCESS, expected revision healthy11Oct18:04:08Athens; independent public health and actually served JS/CSS verified18:05:33Athens on exactab7171c2de9f8ba7b1e59374bea193faf08511b2. Light header #e7f3ee, full-width22px bottom height grip, natural control minimum, optional0..120px extra space bounded by96px cart reserve, mouse/touch/keyboard/reset and browser-local company/store preference. Compact padding restores previous compact header floor; same existing44px auxiliary controls/handlers. Actual isolated1920x1080/1366x768/1280x600 FONT12/20 before/after controls remain contained and payments retain their existing bottom position; inherited1280x600 FONT20 cart collapse is unchanged and outside this header scope. Resizing probes add zero API writes. New physical USER/LAB brightness/drag/persistence NOT TESTED; CI is not acceptance. Manual unchanged, item1 awaiting separate acceptance, items3–9 queued. Single next action: user empty-cart Ctrl+F5, drag bottom «Ύψος μπάρας» down then up, double-click compact, refresh to check remembered store/browser size. Stop at natural minimum to keep controls readable; wait for user feedback before item3. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-header-bright-resize.md.

Same owner codex/pos-header-bright-resize-20261011, bounded source branch codex/pos-header-central-menu-20261011. User image(20261011-150837).png shows actual LAB «ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ» / «Εργαστήριο Χειριστής1» /FONT20/light header and three rows; cropped150924 shows wireless/Chat/Barcode/work-card/radio second auxiliary row. User states bar cannot move further up because buttons obstruct and explicitly requests one central button beside store containing those controls, except Refresh/Logout which stay directly visible. Physical source revision/shift not independently known; no sale/payment/stock/shift action. This is expanded item2 requirement, not item1 or item3 acceptance; previous exactab717 release/CI evidence remains historical and physical compact-height requirement is not accepted.

Use one «Λειτουργίες POS» button immediately beside selected-store button; move secondary header launchers and recording/font/calculator/Netlink into its overlay panel, keeping Refresh/Logout outside. Closed panel must not consume header rows; accessible keyboard/Escape/outside-close and focus return; mount persistent radio/screen recording once so closing menu never stops/restarts them. Keep same store/module/runtime permission gates, existing correct wireless TABLES entry, modal handlers, invoice dock/online order hosts, unread chat indication and item1 per-operator calculator state. Store switch closes panel; no API/business/entitlement/fiscal change. Older08–09Oct USER accepted auxiliary placement is historical and superseded only by this explicit requested location, while correct wireless target remains protected. No other owner takeover; currentmain7b29742 and newest tracker/pending/POS manual/aux/header checkpoints reviewed.

Required: actual mounted control integration and exact rendered before/after1920x1080/1366x768/1280x600 FONT12/20, smaller closed header, popup viewport containment, correct enabled/disabled launchers, wireless entry without order, menu close/reopen radio/audio continuity, no resize/menu API mutations, calculator/scanner regressions. Node20 build/full source+main CI/native isolated E2E then ordinary guarded healthy exact deployment before user check. New physical USER/LAB acceptance NOT TESTED; manual gets no new PASS. Items3–9 stay queued. Latest authoritative11Oct18:46Athens — CENTRAL MENU SOURCE LIVE / AWAITING USER. Same header owner codex/pos-header-bright-resize-20261011, source codex/pos-header-central-menu-20261011; claimPR2273/head51200d61/docsCI38150751484 SUCCESS merged162b2c46 before code. SourcePR2275/heade217dc1b/fullCI38151210388 SUCCESS2340PASS/0FAIL/0SKIP merged6cbd72600e95f674170444114246d8696ee1717e. Exact mainCI38151579632 attempt2 SUCCESS2340/0/0; first attempt2339PASS/1FAIL/0SKIP failed the unrelated pos-capacity-runner scheduled-arrival timing assertion offeredLatencyMs>=latencyMs. Failure retained; focused capacity8/8 passed and normal failed-job rerun succeeded, no test/source weakening. Guard38152110281 correctly did not deploy6cbd because newer common CI source required full CI. Combined exact main8a57a18a999d66a180b10265b0a7034bd7980380 CI38152065964 SUCCESS2340/0/0 (native PG, HTTP E2E, Windows/contracts and real Chromium). Ordinary guarded Render38152406282/deployjob114508409614 SUCCESS; exact8a57a18 healthy18:45:23Athens, independent public health plus actual served central-menu JS/CSS verified18:45:58Athens. Prior healthy rollback7b297422b324a8c462d71923cf25e812a6d8a45f retained in guard artifact11706344856. No authenticated session/production DB/business action/manual deploy or guard bypass. Concurrent source/CI and documentation owners preserved.

«Λειτουργίες POS» immediately beside store contains secondary controls, recording/font/calculator/Netlink; Refresh/Logout remain outside. Persistent body-portal dialog, viewport-bounded geometry, keyboard/Escape/outside close/focus return; same authorized launcher/module/store handlers and wireless TABLES entry. Closing retains radio/audio and recording; open menu blocks scanner and store change closes menu. Local actual mounted menu1/1, calculator/header2/2 and scanner/barcode/radio/table-service23/23 PASS; frontend Node20 build PASS. Source browser artifact11707230101 records6before/6closed-after/6menu screenshots plus geometry; visually inspected1920/FONT20 closed and1280/FONT20 menu. Exact rendered before→after header FONT12/FONT20:1920x1080 141→90/223→118px;1366x768 195→144/223→184;1280x600 195→144/289→238. All menu panels fit viewport and add no header height; payment bottoms unchanged.

Main rendering also passed. Inherited1280x600/FONT20 cart0 remains outside this task, not an overall POS PASS. Opening/closing/resizing writes0; radio fixture Play alone exercised its expected synthetic state persistence. Initial missing synthetic table orders array was corrected before green tests, not a product failure.

New physical USER/LAB compact-height/menu acceptance NOT TESTED; CI is not acceptance, manual gets no new PASS. Earlier auxiliary placement acceptance is historical and superseded only by user's explicit new central placement requirement; correct wireless target protected. Item1 acceptance separate, items3–9 queued. Single next action: user empty-cart Ctrl+F5, double-click «Ύψος μπάρας» for compact and open «Λειτουργίες POS» beside store; check all requested buttons plus direct Refresh/Logout, then report result before item3. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-header-bright-resize.md.

11/10/2026 16:58 Athens — AUDIT-DESCRIPTION-WRAP-01 / LIMITED LIVE VISUAL PASS / CLOSED

Owner codex/operator-checkbox-audit-20261009; source PR2250/head22ec3dd5/fullCI38144435197 SUCCESS2315PASS/0FAIL/0SKIP merged3e37a194a2df085872d193569e7e8d693c16269e. Local Node20 focused23/23PASS and frontend12.10s/TABLE_SERVICE PASS after dependency installation; initial missing-jsdom failure resolved, not a product failure.

Actual read-only Super Admin Χρήστος Μάνης / cloudChrome1/tab2 / Περίπτερο Διαδόχου Παύλου cmulmjjoc000qqlbf2bn2ifj0. At13:55–13:58UTC same existing two11Oct OTHER_EXPENSE records50EUR/12:39:51 and300EUR/09:24:38; before reload complete stored descriptions existed but data cells nowrap/hidden/41px clipped operator reasons. After exact healthy release/reload, same IDs/amounts/actor/shift/text, both pre-wrap/visible/84px, clientHeight=scrollHeight84 and clientWidth=scrollWidth329. Actual maximized screenshot shows full responsibility declaration AND reason suffixes «καμερα» / «τονια τιμολογια». Explicit report refresh preserves both rows/text. Screenshot CHECKPOINTS/EVIDENCE/audit-description-20261011/full-reason.jpg.

LIMITED LIVE VISUAL PASS for full existing description wrapping in this selected-store Audit desktop view. Pure scoped CSS data-cell4 override; headers/other columns and existing escaping/request guards unchanged. No new payment/sale/return/stock/shift/permission/DB submission or prior-transaction replay. Existing real-store shift was observed only, no measured financial/control delta claim. No independent ordinary-Owner/mobile/touch/arbitrary resize/physical print/export acceptance. Cannot reconstruct a reason absent from stored text. Closed independent display subtask only; No33/tracker35 and broader smart-Audit remain OPEN/other owners preserved. Manual/active/tracker/numbered lists/PDF synchronize; own pending display claim removed. Next this page resumes outstanding No33 with fresh LABPOS2 profile/cart baseline, without repeating passed flows.

11/10/2026 17:00 Athens - VOICE-ASSISTANT-01 / ambiguity and no-match LIMITED LIVE PASS

Owner retained codex/unified-voice-assistant-20261010; tracker32/printed30/whole VOICE remains OPEN/ASSIGNED. Current main/server health 3e37a194a2df085872d193569e7e8d693c16269e ok=true, version0.22.0+kat-test-pos. Independent source since prior PASS is only Audit description CSS and its checkpoint/active history (PR2250); all assistant source unchanged. Exact main CI38144821469 and ordinary guarded Render38145069708 SUCCESS; build-and-test and Windows jobs green. Cloud Chrome1/tab2 retained ordinary MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / explicitly selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru), no support preview/new sign-in/key/grant. UI retained prior released assistant client; no claim of fresh Audit client acceptance.

Two new read-only expanded sales cases, inclusive01/10/2026-10/10/2026, explicit checked Ώρα Ελλάδας in ordinary Στατιστικά πωλήσεων before and after each Ask. At13:55:50.698UTC ordinary literal LAB search found LAB EXCEL TEST1 / LAB-EXCEL-20260909-01 and TEST2 / LAB-EXCEL-20260909-02. Independent rows:3units/2.40gross/2.12net/.28VAT and2units/zero amounts; combined report5units/2.40/2.12/.28. Ask13:56:04.824UTC; actual answer observed13:56:15.905UTC required specific SKU, listed exactly these2 candidates and correct own-store/range, gave no quantities/amounts/aggregate. Canonical source explicitly ambiguous/no sum, same candidates. Ordinary same-filter after13:56:59.314UTC retained those2 rows and values. LIMITED LIVE PASS for this ambiguity and candidate/source/report match. Provider's suggestion to request a combination is not acceptance that a multi-SKU aggregate is supported or tested.

Unique literal VOICE-NOMATCH-20261011 was a query string only, never created as a product. Ordinary same-period report before13:57:09.936UTC showed no sales/0 item-store rows (report summary zeros are not stock/existence evidence). Ask13:57:11.143UTC; actual answer13:57:31.747UTC and canonical source: no corresponding recorded sales in this selected store/period; no fabricated quantity/amount. It explicitly said this does not prove nonexistent product or zero stock, and suggested correcting SKU/date. Ordinary same-filter after13:58:06.995UTC remained empty. LIMITED LIVE PASS for this one no-match interpretation and before/after/source comparison. Returning from each ordinary report retained respective question/answer/source.

Actual inspected unchanged JPEGs: CHECKPOINTS/EVIDENCE/voice-owner-negative-20261011/voice-owner-ambiguity-1791726992372.jpg (129694bytes) and voice-owner-no-match-1791727065790.jpg (134927bytes); synchronized successfully. Evidence negative-sales-observation.json is rendered observation transcription, not raw HTTP/provider trace. No microphone/permission/stock/payment/fiscal/shift/employee/license/module write or transaction; financial deltas N/A. A contemporaneous existing MAIN shift appeared4.10cash/0transactions; LAB-POS-02 remained96cash/2transactions; independent concurrent activity cannot be attributed to these read-only tests. No financial/stock acceptance inferred.

Protected cash/exact-day/ten-day/source/currency/context PASS retained without replay. Only the two observed negative examples are removed from pending; caps/source failures/timeouts/DST/other product-date boundaries, in-flight/recording/role/module/license/revocation/foreign-company-store cases, actual physical Greek microphone and remaining domains/POS/optional speech remain OPEN. Same named owner retained; no central-session/CommerceLauncher/No40/Audit/other-owner takeover. Single next action: inspect existing Owner report APIs and choose the next authorized read-only domain within this assignment, publish bounded claim before code; physical microphone acceptance remains on the owner's device. All five records and tracker PDF synchronized; docs CI/merge publication remains required before completion.

11/10/2026 — AUDIT-DESCRIPTION-WRAP-01 / ASSIGNED / USER VISUAL FAIL

Owner codex/operator-checkbox-audit-20261009; independent source branch codex/audit-description-detail-20261011. User explicitly requests full detailed reason in the attached existing OTHER_EXPENSE Audit rows (50EUR and300EUR, Diadoxou). Screenshot shows description cut after standard no-document declaration; actual remainder/content not inferred. Baseline main4e3e1d6. Claim only presentation of the existing stored description in selected-store Audit: wrap complete text/newlines within the description column, enlarge row naturally, preserve headers/grid/filter/search/export/video, escaping, store request guards and authorization. No transaction replay or financial/stock/shift/permission/API/schema/data change. Existing printed32 isolation CLOSED, wider smart-Audit/TODAY08/No33 and other owners unchanged. This is an independently requested display regression, not takeover of report calculations or audit backend. New acceptance NOT TESTED; green claim must merge before CSS. Then bounded frontend build/existing audit regressions, full source/main CI, exact guarded release and actual read-only visual acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-audit-description-detail.md.

11/10/2026 16:37 Athens - VOICE-ASSISTANT-01 / Owner visible currency and ten-day report LIMITED LIVE PASS

Owner remains codex/unified-voice-assistant-20261010; full32/printed30/VOICE OPEN/ASSIGNED. Context PASS PR2245/main14a53394 and ten-day source PASS/prose FAIL+bounded claim PR2246/main6fb266e5 already published. Presentation source PR2247/head df164326d44764cf74934b24f32a84d50854ebf7, fullPRCI38142941873 SUCCESS2315/0/0, merge 4e3e1d6d0e1bf868f571b04aa21935c97fc8d3f6, exact mainCI38143246743 SUCCESS2315/0/0, ordinary guarded Render38143504744 SUCCESS. Public actual cloud browser /api/health ok=true/exact4e3e1d6d; fresh root DOM bootstrap /assets/index-BCaz-TWi.js. No guard bypass/manual deployment/new key/grant/business action.

Fresh ordinary page after permitted credential-observation recovery showed same MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / three own stores; no additional sign-in or token inspection. Explicit primaryLAB selection before reports/assistant; launcher N40 initial choice remains separate unverified behavior. Actual restarted Owner UI/report on released client. One legitimate read-only retest of recorded currency FAIL (not transaction/photo replay): SKU2269/NEPO500ML/inclusive01–10Oct2026. Independent report before13:35:20.206UTC:5units/2.50gross/2.21net/.29VAT, checked Athens and same own store. Ask13:35:32.663UTC, real rendered answer/source13:35:58.397UTC: correct name/SKU/store/period,5units and all3 euro amounts with2 decimals. Highlights also agree. Ordinary report reopened, Athens explicitly rechecked, Search and observed13:36:40.692UTC: same5/2.50/2.21/.29. Returning showed question/answer/source retained.

LIMITED LIVE PASS for displayed two-decimal currency in this real answer and one ten-day normal-report before/after reconciliation on the corrected release. Closes current visible long-fraction FAIL for this example. Raw provider response was not inspected; exact execution of the long-fraction formatter branch in this live request is NOT TESTED. Node20 local3 and strengthened mounted CI separately cover actual old raw net/VAT tokens, negative values, separators/grouping, answer/highlights/limitations, preservation of non-money fields and context gates. Do not claim every monetary string/device/provider response passed live. Source evidence/report calculations/API response remain unmodified.

Actual inspected screenshot CHECKPOINTS/EVIDENCE/voice-owner-context-20261011/voice-owner-currency-pass-1791725785711.jpg; same JPEG bytes synchronized successfully. No physical microphone activation or foreign-store query, no stock/payment/fiscal/shift/employee/license mutation; financial deltas N/A. Existing cash, single-day sales, deliberate blank/unsubmitted own-store switch and completed-answer empty-selection PASS retained without unrelated replay. Snapshot source reversals0 only, not normal-report independently compared.

Current residual: ambiguity/no-match/capped/source-failure/DST/date-boundary cases; live in-flight/recording/role/module/license/revocation/foreign-company/store negatives; physical Greek microphone and remaining domains/POS/optional spoken reply. Single next action: primaryLAB sales ambiguity and no-match read-only acceptance with normal report comparison, no business transaction needed. Microphone acceptance needs the owner's actual device/browser; cloud typed queries do not prove it. Same named owner retained until completion or explicit named transfer; no No40/central-session/production404/other-owner takeover. Checkpoint, full active history, tested manual, residual pending, tracker and regenerated PDF synchronized.

11/10/2026 16:17 Athens - VOICE-ASSISTANT-01 / multi-day source reconciliation LIMITED LIVE PASS / currency presentation FAIL

Owner codex/unified-voice-assistant-20261010 retained. Earlier context PASS publication PR2245/head e0436cac/CI38142340504 SUCCESS/main14a53394, seven exact docs/PDF/photo blobs verified. Current healthy application ae7c8cc4/main fullCI38141355389 SUCCESS2312/0/0/guarded38141610547. Existing source/provider/connection reused; no secret accessed, new grant or business action.

Same ordinary Owner Υπεύθυνος Εργαστηρίου / MYWORKSTATION LAB / primary ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. New expanded read-only question SKU2269/NEPO500ML for inclusive01–10Oct2026. Normal sales report checked Athens, exact store/product/from/to, explicit Search before13:15:10.720UTC:5units/gross2.50/net2.21/VAT0.29. Ask13:15:26.744UTC, real provider/source observed13:15:46.452UTC. Correct store/name/SKU/date range/5units/gross2.50; source table2.21net/.29VAT. Ordinary same-filter report explicitly reopened, Athens rechecked (checkbox defaults unchecked on reopen), Search and observed13:16:31.321UTC: same5/2.50/2.21/.29. Source and before/after normal report reconciliation LIMITED LIVE PASS for this one ten-day example. Provider prose exposed raw net2.2123893805309733 and VAT.28761061946902655 instead of two-decimal money: presentation FAIL, not wrong canonical arithmetic. Do not describe a fully polished answer PASS. Actual inspected photo CHECKPOINTS/EVIDENCE/voice-owner-context-20261011/voice-owner-multiday-answer-1791724575158.jpg shows this FAIL.

At13:16:43.569UTC after returning from refreshed report, question/actual answer/source retained; then intentional empty selection13:16:44.087UTC removed answer article(count0), cleared input and disabled input/voice/Ask. LIMITED LIVE PASS for withdrawing this completed answer on empty selection and retention across this ordinary report visit. Not deliberate in-flight/recording/foreign-scope/revocation or blanket periodic-race acceptance. No microphone/transaction/stock/fiscal/payment/module write. Prior cash and single-day PASS not repeated.

Bounded source follow-up ASSIGNED under same owner before code: presentation-only formatting of explicitly euro-denominated amounts in Owner assistant answer/highlights/limitations to Greek two-decimal currency, while leaving source evidence, dates/SKUs/quantities, provider/API payload, report calculations and all authorization/context guards unchanged. Regression must cover the actual long fractional euro tokens, negative money, comma/dot decimals, already grouped amounts and unchanged non-money/date/SKU text; mounted Owner/cash/sales/context tests and full CI required. Do not apply generic number rounding or change canonical finance. No auth/CommerceLauncher/No40/other-owner takeover. Require exact healthy release then one bounded read-only formatting retest, no transaction replay.

Overall tracker32/printed30/VOICE OPEN/ASSIGNED. Pending removes only measured ten-day report before/after and completed-answer empty-selection cases. Physical speech, broader date/product negative cases, in-flight/role/module/license/tenant/revocation and remaining domains/POS remain open. Single next action: this euro-token presentation fix; source NOT TESTED until implementation/CI/release and real retest. Manual must record current raw-decimal limitation until real acceptance closes it.

11/10/2026 16:07 Athens - POS-KEYPAD-PREFERENCE-01 / SOURCE LIVE / AWAITING USER

Owner codex/pos-calculator-operator-20261011 retained; first sequential item only. Source PR2243/head3e1af7fdf8bed1a412c8300347f73faae3d7a5b9/fullCI38141078619 SUCCESS2312PASS/0FAIL/0SKIP, native isolated PostgreSQL/HTTP E2E, build/invariants and Windows. Merged ae7c8cc4e31a0992ba2888956b3a6a1ea9a52b4d; exact mainCI38141355389 SUCCESS2312/0/0. Ordinary guarded Render workflow38141610547 SUCCESS, exact revision healthy at16:04:59 Athens; prior healthyaf718caf rollback checkpoint retained. No manual deploy or guard bypass.

Independent public GET16:06:58.455541 Athens verified /api/health200/oktrue/exactae7c8cc4. Canonical /platform-admin bootstrap loads /assets/entry-DlSBq-IV.js,2290210bytes/SHA2566dbb5d2269225724cd52fe151ad177ed9502abf4fba77791e9f135f1bce564cf, containing per-person preference prefix and labelled calculator toggle; /assets/entry-CKYybkQR.css,609497bytes/SHA256772cda6d7b58009d1795e0ab4e85339a153f8e5df927079f8a22a25398b5d8b4 contains explicit reclaimed desktop column. All nine API-published source/record/PDF blobs matched the local git hashes. Release/asset delivery verified; physical UI, operator/device identity and USER/LAB acceptance NOT TESTED.

Delivered: Κομπιουτεράκι header button hides/shows keypad and widens sale list; selection remembered separately per company/store/employee on this browser, restored on reload/re-login, other operator independent. Anonymous selection remains transient. No transaction/payment/stock/shift/fiscal/permission/backend/catalog mutation by this page. Existing scanner/change-notice/current camera/payment/category owners and accepted scopes preserved.

Single next action is user acceptance: empty cart, CtrlF5, hide and verify list expands, reload and verify hidden, ordinary different-operator login and return verify separate choices, show again. No sale is required. Wait for user result before item2; items2–9 remain queued. Keep this owner assigned; no new manual PASS or pending removal until actual confirmation. On USER PASS publish bounded checkpoint/active/tracker/manual/pending/PDF closure with green docs CI/merge. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-calculator-operator.md.

11/10/2026 16:10 Athens - VOICE-ASSISTANT-01 / normal Owner blank and own-store switch LIMITED LIVE PASS

Owner remains codex/unified-voice-assistant-20261010; no transfer or source change. Fresh main and actual public browser health both ae7c8cc4e31a0992ba2888956b3a6a1ea9a52b4d / ok=true / version0.22.0+kat-test-pos. Main CI38141355389 and ordinary guarded Render38141610547 SUCCESS. Prior normal Owner cash and exact-SKU/day sales PASS preserved without another Ask or business transaction.

User11Oct16:06Athens requested continue. One secure ordinary root sign-in returned submitted; fresh rendered page independently showed MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / three own stores. Opened only primary ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru), then commercial functions. Launcher initially selected N40 CONTROL again; explicitly selected primary before assistant. This launcher inheritance remains unverified/outside this assistant result. No N40 query or other-owner change.

At13:09:16.251UTC, assistant permitted primary store, typed unsubmitted marker enabled Ask. Selecting «Επίλεξε κατάστημα» cleared textbox to empty, disabled textbox/microphone/Ask and showed choose-store instruction. Re-selecting primary permitted a fresh empty textbox. At13:09:34.813UTC a second unsubmitted marker enabled Ask; choosing own ΕΡΓΑΣΤΗΡΙΟ ΑΠΟΜΟΝΩΣΗΣ ΕΤΙΚΕΤΑΣ changed explicit scope label and cleared the marker. At13:09:41.859UTC fresh field check: empty, enabled, Ask disabled. Return to primary retained no old text. Final empty-selection view confirms disabled controls; actual inspected screenshot CHECKPOINTS/EVIDENCE/voice-owner-context-20261011/voice-owner-empty-store-1791724195664.jpg.

LIMITED LIVE PASS: ordinary authorized Owner's deliberate empty selection and own-store change discard unsubmitted question and set correct scope/disabled controls. It does not test an existing answer, recording, in-flight provider response, foreign company/store, role/module/license revocation or stable periodic-refresh retention. No Ask/provider/business mutation/microphone permission executed; physical device/browser/mic acceptance NOT TESTED. Read-only cloud Chrome; terminal/shift/SKU/payment deltas N/A. Visible primary shift LAB-POS-02 had2 transactions, cash96EUR, card/IRIS0,total0, opening120 and expenses24; observations only, no financial acceptance or attributable delta.

Pending now removes only these two completed UI cases. Remaining: after-Ask independent report refresh; broader dates/products/ambiguity/no-match/cap/source failures/timeouts; live lifecycle, foreign scope and role/module/license/revocation; physical speech and remaining domains/POS. Next single action: new bounded multi-day product/date query in primary LAB with normal same-filter Athens report comparison before and after Ask; do not repeat previous 10Oct exact-SKU/cash/activation or transactions solely for evidence. Full tracker32/printed30/VOICE remains OPEN / ASSIGNED. Manual, active, pending, tracker and PDF synchronized; other owners/history preserved.

11/10/2026 - POS-KEYPAD-PREFERENCE-01 / SOURCE READY / AWAITING USER

Owner codex/pos-calculator-operator-20261011, sequential item1 only. Claim PR2242/head4d546ba/docsCI38140688456 SUCCESS merged2718343197ae02433ed217fdcaf267d212911b13 before source. Existing other-owner records preserved, source baselineaf718caf.

Client-only hook remembers visible/hidden calculator per company/store/employee (stable employee ID, profile ID fallback) in this browser; unidentified scopes never persist a shared preference. Clear Κομπιουτεράκι toggle with pressed state and show/hide tooltip; hidden aside removed, explicit desktop two-column rule overrides later viewport-fit geometry so sale list reclaims the column. Choices isolated immediately on person/store/company changes; denied preference reads/writes fall back to usable session state. Default remains visible. No settings schema/API/permission/payment payload/fiscal/backend changes.

Node20.20.2 mounted preference test PASS after correcting fixture expectations for existing offline cache and ordinary startup API requests. It covers show/hide, remount persistence, independent operators, stable employee identity after profile-ID change, store/company isolation, anonymous transient choice and rejected preference storage; every toggle causes zero mutation API calls and no checkout. Existing scanner9 + change notice2 regressions PASS11/0; combined earlier run failed only the then-corrected new fixture. Frontend build PASS38.95s/TABLE_SERVICE; no unrelated generated source changes. Full final-head CI/build/invariants/isolated HTTP E2E still required before merge/deploy. USER/LAB acceptance NOT TESTED; no real transaction or data mutation performed and no manual PASS entry.

Next single action: green full PR/main CI and ordinary guarded exact deployment, then user tests hide/reload/re-login/second-operator/show without a sale. Items2–9 wait for user acceptance of item1. Assignment retained; do not start another item or repeat accepted transactions for evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-calculator-operator.md.

11/10/2026 15:46 Athens - POS-KEYPAD-PREFERENCE-01 / ASSIGNED / NOT TESTED

Owner codex/pos-calculator-operator-20261011. User explicitly requested sequential implementation, testing after each; this claim covers item 1 only: calculator visibility chosen separately by each authenticated operator, remembered on this browser per company/store/operator, visible labelled toggle and reclaimed list space when hidden. Independent display preference only; existing numbered33/tracker35 operator-checkbox audit and camera/payment/category/scan owners remain assigned and unchanged. Items 2–9 are queued, not claimed or implemented here.

Main baseline8b62a147/sourceaf718caf: keypad starts ON on every mount, existing unlabelled Keyboard button toggles only React state; current without-keypad grid already reclaims space. Latest operator-audit LAB reload evidence restored keypadON, no contradiction with requested new persistence. Current scanner/category/manual USER PASS, selected-store catalogue indexes/80ms unique scanner/600ms prefix, received/change3second notice, fiscal/busy/modal/offline/checkout/permission boundaries protected. No financial/stock/shift/API/production data action required or performed. New preference acceptance NOT TESTED; local/CI are not USER/LAB PASS.

Acceptance: hide/show, same operator reload retains selection, other operator starts independently, return restores previous choice, company/store isolation, no unidentified shared preference, unavailable browser storage safely permits current-session toggle; rendered aside and grid track selection without changing payment values/payload. Require bounded mounted regression tests, Node20 frontend build, full PR/main CI/invariants/isolated E2E, merge and ordinary guarded exact release before user testing. Record source/deploy receipt; manual stays unchanged until real USER PASS. Single next action: publish this claim to main with green docs CI before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-calculator-operator.md.

11/10/2026 17:44 Athens — POS-PAYROLL-EMPLOYEES-QUERY-01 / SOURCE LIVE / AUTHENTICATED UI ACCEPTANCE OPEN

Owner codex/store-payment-employees-query-20261011 retained. ClaimPR2258/finalheadd8ad1f1e/docsCI38147271945 SUCCESS/main1ca72fe before source. SourcePR2259/head4ee52c5388a01e8f53644e22584222a4b2d514d8/fullPRCI38147488462 SUCCESS2321PASS/0FAIL/0SKIP including the actual registered-route native PostgreSQL test without Employee.companyId, full isolated HTTP E2E/build/invariants and Windows. Merged927d018760285215160e0f1f497ec185f799884a. Its mainCI38147810532 was cancelled by newer main, not a test failure; superseding mainf45e6c53d63edb2b0b512f3a48d4d84665708713 includes this exact unchanged route (SHA2564de056035b1bfabc6bd17b017ce57636132a6a33236c946bf03c59e80cde9a5c) and preserves other-owner voice/Audit changes. Exact superseding mainCI38147865426 SUCCESS2331PASS/0FAIL/0SKIP, same native test and HTTP E2E/invariants/Windows. No guard bypass or retry of obsolete competing CI.

Ordinary guarded deploy38148114214 SUCCESS, rollback checkpoint previous healthyc9cb51f retained. Production Render dep-db5pvol9fdbs73dngb40 LIVE17:42:07.944Athens on exactf45e6c53. Independent public GET with cache-busting at17:43:22.664982Athens returned200/oktrue/exactf45e6c53. Earlier cacheable GET returned previous healthy revision and was not accepted as new-release proof. Post-release read-only DB snapshot8connections/recoveryfalse/0locks/0activequeries>15s. Bounded logs17:42:08–17:43:22Athens:0missing companyId errors,0P2024/deadlock/OOM/authValidationUnavailable,0HTTP5xx; no payroll-route log in this window, so absence is not evidence that an authenticated list request ran. No closure/financial/stock acceptance inferred.

Delivered one query correction: Employee joined to Store for company ownership, bound validated selected store and active employees, unchanged fields/order and all existing auth/ledger/operator-store/ownership guards. Direct read-only production join earlier17:27Athens confirmed schema compatibility and5activeemployees for exact active Diadoxou company/store without exposing names/contact/IDs. This is query/release verification, not authenticated route/UI or LAB/USER PASS. No new schema column, migration/seed, data/rights/payment/shift/stock/fiscal action or accepted replay. Existing camera/completion/payment-correction/payroll/Workforce/Audit/header/voice/scanner owners and PASS preserved.

Remaining single acceptance: at the next ordinary Payments opening in the correctly scoped Diadoxou session, verify the payroll employee selector loads the own active employees; no payment needs to be submitted. Physical/operator UI and positive authenticated HTTP response NOT TESTED here. Owner retained until actual acceptance or named handoff; no manual PASS added or pending closure. Shared active/tracker/pending/checkpoint and regenerated central PDF record this exact delivery and remaining limit.

11/10/2026 17:22 Athens — POS-PAYROLL-EMPLOYEES-QUERY-01 / ASSIGNED / production SQL FAIL

Owner/source codex/store-payment-employees-query-20261011. Owner explicitly requests continuation after server check. Independent bounded read-only endpoint defect: GET /api/transactions/stores/:storeId/payroll-employees executes the exact failing PostgreSQL statement seen at16:54:39 and17:10:28 Athens. Current main9a9a98b and production3e37a194 contain SELECT id/fullName/position FROM Employee WHERE companyId=$1 AND storeId=$2 AND active=true. Both Prisma schema and read-only live information_schema confirm Employee has storeId, not companyId; company belongs to Store. StorePosPaymentsModal requests this list on opening and hides failure as an empty list, so payroll employee selection may be unavailable; no evidence that normal scan/sale/checkout failed from this read.

Read AGENTS/current main changes since previous own delivery, shared tracker/active/pending, payment-completion and current-cash checkpoints, protected POS/payment manual and route guards. No existing assignment to this exact employee-list SQL defect; payment completion/camera/correction, workforce/payroll reconciliation, Audit/header/session owners remain unchanged. Single bounded source change only: join Store for company scope and constrain Employee to the already validated selected active store. Preserve auth/requireLedgerAccess/assertStoreAccess/ownedStore, payload fields/order/active employee filter and all financial endpoints. No production schema/migration/seed/data/rights change, employee details disclosed, payment/shift/stock action or accepted transaction replay.

Publish claim green/main before source. Required actual registered-route regressions using isolated PostgreSQL schema without Employee.companyId: correct own selected-store active employees and alphabetical payload, no other own/foreign/inactive-store leak; foreign operator/company/missing/inactive store and unauthorised role rejected before list query. Node20 build, full source/main CI with native isolated PG/HTTP E2E/invariants/Windows, guarded exact deployment and independent healthy revision. Limited read-only live SQL shape verification can confirm schema compatibility without exposing employee data; authenticated live route/UI acceptance remains NOT TESTED absent observed session. No LAB/USER PASS from CI. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-store-payment-employees-query.md. Next single action: green claim publication, then one joined SELECT and meaningful isolation tests.

11/10/2026 13:48 Athens - POS-SCAN-LATENCY-01 / SOURCE LIVE / PHYSICAL SPEED ACCEPTANCE OPEN

Owner codex/diadoxou-scan-latency-20261011 retained; bounded source branch fix/diadoxou-scan-latency-20261011, receipt docs/diadoxou-scan-latency-live-20261011. Claim PR2239/CI38132061932/mainabaeeb5 published before source. Source PR2240/head772ee4ba295e33cb9b4fd730a412d4554ae7cc75/fullCI38132573324 SUCCESS2311PASS/0FAIL/0SKIP including native isolated PostgreSQL, real HTTP E2E, frontend/contracts/invariants and Windows. Merged af718cafdae8485c91cc7c310e630f0e0242348d; exact mainCI38132852783 SUCCESS2311/0/0. Ordinary guarded Render workflow38133075996 SUCCESS; no manual deploy or workflow/threshold bypass. Render deploydep-db5mhmnlot8c73ffpr3g LIVE at13:47:17 Athens. Previous healthy4bfdba0a and existing rollback/freshness safeguards retained.

Independent public GET13:48:23.682649 Athens: /api/health200/oktrue/exactaf718caf; canonical /platform-admin actually serves /assets/entry-DjkTLzOv.js,2289366bytes/SHA2566af8e49c6d3c9aca1b60411179619411b673ff39649c645091e8b590a7612d85. Served unique80/prefix600 timer, indexed exact lookup/prefix and indexed candidate rows, and comma/tilde normalization verified. This is exact release/asset delivery evidence, not physical terminal timing or financial/LAB PASS.

Delivered client-only improvement builds selected-store immutable barcode/prefix and normalized Greek-search indexes once per catalog; preserves original48-result order, aliases/ambiguity/SKU exclusions, barcode-option price/key and all focus/store/modal/busy/fiscal/checkout guards. Unique complete-code idle interval180ms becomes80ms; ambiguous/incomplete longer-prefix guard remains600ms and Enter completes immediately. Local5000-row suggestions35.519 to0.215ms/input and numeric pair14.790 to0.006ms remain synthetic Work evidence; index creation56.33ms per new catalog. Local22 meaningful regressions and Node20 build passed, including actual mounted5000-row POS, repeated quantity2/late Enter/store-switch cancellation and prior CSV/focus/pending/rejected cases. No production/LAB sale/payment/cart/stock/shift/catalog/permission/fiscal mutation or accepted transaction replay by this page. Current camera/payment/current-cash/category and all other owners/PASS protected.

Owner's estimated0.5s physical delay remains AWAITING USER until next ordinary scan observation on the refreshed Diadoxou POS. Exact physical terminal/client SHA/scanner suffix/end-to-end milliseconds NOT TESTED. Do not close this task or change POS manual PASS from CI/delivery alone. Next single action: with no sale in progress and empty cart, normally refresh existing POS (CtrlF5 if cached), then observe the next intended known-product scan; no new/repeated financial transaction solely for evidence. Keep this owner assigned until acceptance or named handoff. Shared checkpoint/active/tracker/pending/PDF synchronize this live receipt. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-scan-latency.md.

11/10/2026 - POS-SCAN-LATENCY-01 / SOURCE READY / AWAITING FULL CI + PHYSICAL ACCEPTANCE

Same bounded owner codex/diadoxou-scan-latency-20261011; docs claim PR2239/headbcba3aec476a8870dcaf3b198aed43f2f28bb223/docsCI38132061932 SUCCESS merged abaeeb5be9f134d48f4b9213a9d6bbd080df0c62 before source. Other existing owners and closed CSV/focus/category USER PASS preserved.

Client-only immutable catalog index built via useMemo for products + selected store. Numeric barcode aliases and longer-code prefixes indexed once; suggestion haystacks normalized once, query tokens once, first48 original catalog rows retained. Existing exactScanBarcode contract is regression oracle. Manual unique SKU fallback, comma/tilde/whitespace/leading-zero/master/source exclusions, duplicate-row ambiguity and original barcode-option identity/price retain their established behavior. Known numeric Enter skips the former redundant whole-catalog identifier walk. Unique non-prefix idle interval180ms becomes80ms; shared-prefix interval600ms and immediate Enter completion unchanged. No cart/add/checkout/audit/gift/server/API/schema/catalog/layout/auth/permission/stock/shift/financial/fiscal behavior changed beyond bounded recognition timing and lookup cost.

Node20.20.2 local22 scanner/catalog/Greek-search/payment-access/mounted-revocation regressions PASS0FAIL0SKIP. Existing mounted test fixtures now refresh through store transitions with immutable API catalog snapshots, matching production rather than mutating a loaded array in place. Added5000-row actual POS fixture verifies auto-add before the former180ms interval, successive quantity2, late Enter without duplicate, pending-scan cancellation on store switch and no previous-store barcode resolution. CSV pricing, incomplete/shared/ambiguous codes, real editing/modals and pending/rejected mocked checkout protected; final9 scanner tests repeated after adding store-boundary assertions PASS0FAIL0SKIP. No real checkout performed. Node20 frontend build PASS9.37s, TABLE_SERVICE verified; whitespace PASS.

Same synthetic5000-row benchmark/100 repeats under Node20: old two numeric lookups14.790ms/input vs indexed0.006ms; old suggestions35.519ms/input vs indexed0.215ms; index creation56.33ms once per new catalog. Identifier-getter regression proves no repeated catalog reads across100 steady scans/searches; fresh indexes invalidate catalog/store data. These are Work measurements, not physical Diadoxou latency or end-to-end SLA. Owner's about0.5s report remains AWAITING USER/LAB until ordinary physical observation. No new manual PASS or completion closure.

Next: full exact source/main CI, ordinary guarded release with rollback/freshness safeguards, independent production revision and served scan-index/timer verification. Then normal empty-cart POS refresh and observe next intended ordinary scan; do not create/replay a sale/payment for diagnostics. Keep this owner assigned until acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-scan-latency.md.

11/10/2026 13:21 Athens - POS-SCAN-LATENCY-01 / ASSIGNED / PHYSICAL TIMING NOT TESTED

Owner codex/diadoxou-scan-latency-20261011, independent tracker03 scan-input performance requirement explicitly requested by the owner: known barcode takes about half a second to enter the cart at the operating Diadoxou store. This is a user estimate, not instrumented timing. Store cmulmjjoc000qqlbf2bn2ifj0 / company cmulmjjoa000oqlbfyi0h53ju. Prior POS-BARCODE-CART-02 CSV recognition and POS-SCANNER-IDLE-FOCUS-01 USER PASS remain CLOSED and protected. POS-CATALOG-PERF-01 category resolver and its retained wider-performance owner, camera/payment/current-cash/No33/40/51 and all other assignments remain unchanged; no parallel category/server/financial takeover.

Pre-change current main41a24ef; latest production4bfdba0a verified through Render deploy dep-db5m28g473hc73bktbc0 LIVE, prior exact independent health/served source recorded in shared checkpoint. Read AGENTS, shared current registers, scanner/category checkpoints, POS manual, current scanner history and previous physical acceptances. Current scan effect re-walks numeric aliases twice and the suggestion filter re-normalizes every product on input; unique scans wait180ms, shared-prefix scans600ms, Enter cancels timeout. Synthetic5000-row baseline on Work Node24: repeated match pair10.36ms and suggestions32.81ms per input, not physical-store evidence. Re-measure under Node20 before source publication.

Bounded client-only proposal: one immutable selected-store catalog scan/search index, preserving catalog order and all exact/manual/CSV/tilde/padding/master/source/SKU ambiguity and barcode-option price/key semantics. Avoid repeated product normalization while scanner characters arrive; reduce only the unique non-prefix idle interval180ms to80ms. Keep the600ms incomplete-prefix protection and immediate Enter completion. Preserve focus/modal/busy/fiscal/checkout/stale-store/unmount guards, one-add semantics, audit/gift/checkout behavior and accepted category resolver. No server/API/schema/catalog/auth/permissions/billing/stock/shift/sale/payment/fiscal mutation or transaction replay.

Publish green docs claim/main merge before source. Required existing and new actual mounted POS regression: rapid repeated scans, Enter cancellation, partial/ambiguous/shared prefixes, option price, manual Greek search, immutable catalog/store refresh, focus and pending/rejected checkout; Node20 workload before/after/build and exact full source/main CI plus ordinary guarded Render/independent revision and served JS. Physical speed remains AWAITING USER/LAB; no claim of sub100ms end-to-end at the actual terminal. Owner remains assigned until measured acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-scan-latency.md.

2026-10-11 10:16 UTC — POS-PAYMENT-COMPLETION-01 + POS-INVOICE-CAMERA-QR-01 / LIVE SOURCE DELIVERY / AWAITING USER

Owner codex/invoice-camera-qr-20261011 retained. Claim PR2235 green/main d4344f0c before source. Source PR2236 head606ea88f21674544da43bc28bbf8ffb99cc159ce, full CI38130694663 SUCCESS2307/0/0 including native PostgreSQL and real HTTP E2E. Independent public GET at2026-10-11T10:10:00.177093+00:00: health ok:true/exact3e8df3518bf788c5d85053d2263ed211ed78dfca; canonical https://myworkstation-app.onrender.com/platform-admin actually serves assets/index-XaJ7JR6_.js SHA256 32767e3c0fa62af73d8e49cb53eb6b5a341889bdf5e9779de04664ee43ae4ce3; assets/entry-D4k_031Q.js SHA256 4e24ce2f73c27ebd117e75cb8acf2a3d628991bd26277ba80ffc889ff48227d9; assets/main-CvtqSMQe.js SHA256 6920ab9f41dce9cf8a4ad2737c68e7e6ae2c46414f23d91de8850dc357b77202; assets/main-BaMJwz8P.css SHA256 49910e1319601ed23eb9559dec8e696ffff16b8269985e5a254f52058b5cd3b6; assets/entry-BwuUrcp-.css SHA256 6570480d3b42e98427a804c9a05253d9351114191c70933a484694cfc8e648ac. Served entry CSS contains dialog-scoped .pos-my-payments-readable/.my-shift-entries-panel and32px/30px/min56px rules; JS retains existing correction/current-cash/barcode/audit markers. Initial independent verification could not establish root audit-marker presence; final retry established all original checks without application changes. Asset graph discovery supports referenced index modules. Delivery evidence only, not physical visual or financial PASS.

Only existing standalone «Οι πληρωμές μου» presentation enlarged: heading32px, summary amounts32px, row amount30px, description22px, metadata18px, controls20px/min56px. Totals get separate cards, each payment separates description/date/operator/shift/evidence and action; responsive stacking and bounded body scrolling. All styling scoped to this standalone dialog; reused panel inside shift transactions retains prior layout. No payment/ledger amounts, business handlers, API, rights, store/terminal/active-shift filters changed. Current cash/all stores and barcode/cursor USER PASS, QR and other owners protected. Existing financial acceptance OPEN; no business mutation or accepted transaction replay.

Final local Node20 frontend8.52s and16 existing active-shift/payment/actor/integration/mounted-correction/revocation regressions PASS0FAIL0SKIP. Compiled CSS/scoping and PDF visual QA verified. Local browser screenshot NOT TESTED because Chromium download was truncated; no physical-device layout PASS inferred. No new manual/numbered closure. Next single action: refresh POS → «Οι πληρωμές μου», inspect readable totals/rows/controls and scrolling without a payment submission solely for evidence. Owner retained until scoped visual acceptance/named handoff; financial correction acceptance remains separate OPEN. Receipt branch docs/my-payments-readable-live-20261011; checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payment-correction.md.

2026-10-11 10:04 UTC — POS-PAYMENT-COMPLETION-01 + POS-INVOICE-CAMERA-QR-01 / SOURCE READY / AWAITING USER

Owner codex/invoice-camera-qr-20261011, branch fix/payment-completion-camera-focus-20261011. Claim PR2235 green/main d4344f0c before source; latest base3e8df351 preserves concurrent My payments sizing owner/source. Explicit onCompleted after successful existing payment/save and Premium durable handoff closes Payments once; QR/header review, document-quality success, duplicate cancellation, failed payment/handoff keep it open. Background OCR continues independently; no changes to payment endpoints, amounts, payloads, settlement/draft/job identities or correction/size owner files. All modal types wired: supplier open invoices, Basic/Premium new invoice, bank deposit, other expense/negative refund/payroll. Selected-store stale callbacks ignored and keyed modal resets on store change; live camera tracks stop on unmount.

Camera QR/document/photo captures now expose supported continuous autofocus, single-shot refocus and optional bounded manual focus distance; missing/rejected capability yields honest guidance. Ideal1920x1080 photo constraints where previously absent; no claim of forced optical focus on fixed-focus hardware. Separate shift/work-card scanners unchanged. Six new mounted/pure tests PASS covering real forms, success/pending/failure/duplicate/partial handoff/quality-only/stale-store/background and focus support/rejection/manual/cleanup. Relevant QR download/reader/camera, shift scanner, paid confirmation, duplicate/durable handoff, expense/refund/store-payment regressions PASS; Node20 production build PASS. Mocked tests are not physical/LAB acceptance. No business writes or new manual PASS. User focus FAIL remains OPEN; payment close actual USER acceptance NOT TESTED. Full source/main CI + guarded deploy + independent public health/assets remain required before retest. Protected #09/Gate3/payment correction and existing owners unchanged.

11/10/2026 — POS-MY-PAYMENTS-READABILITY / SOURCE READY / AWAITING UI

Same owner codex/pos-payment-correction-20261011; claimPR2233/head d93c1392bbed33d74428c1dfbe923386ae1189cf/docsCI38129594216 SUCCESS merged f69d9068e855d30cfcb330dc9ddada787c9bcd24 before source. Bounded presentation-only follow-up adds panel-scoped styling and own dialog class: totals32px, payment amount30px, description22px, metadata18px, controls20px/min56px; independent cards and separated description/date/shift/evidence, responsive stacking and bounded scroll. Styles apply only inside the standalone My payments dialog; the reused panel in shift transactions retains its prior layout. No business handlers/API/amount/data/role/store/terminal/filter change; barcode/cash/QR and other owner/PASS unchanged. Local Node20 existing active-shift/payment/actor/integration/mounted-correction/revocation regressions16PASS/0FAIL/0SKIP; frontend build PASS8.60s. Physical UI/financial acceptance NOT TESTED; no financial mutation/replay or manual/numbered closure. Require exact full source/main CI, ordinary guarded healthy release/rollback and served CSS before visual review; owner remains assigned. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payment-correction.md.

11/10/2026 12:51 Athens — POS-PAYMENT-COMPLETION-01 / ASSIGNED / USER REQUEST + CAMERA FOCUS FAIL

Owner codex/invoice-camera-qr-20261011; follow-up source branch fix/payment-completion-camera-focus-20261011. Independent newly requested presentation/lifecycle scope: successful payment in the existing POS Payments modal closes the modal and returns to POS across supplier open invoices, Basic/Premium new invoice, other expenses/negative returns/payroll and bank deposit. Explicit successful-save callback, not success-message prefix or OCR completion; do not close on attachment-quality messages, failed save, cancelled duplicate confirmation or Premium payment saved but durable handoff failed. Existing assistant/background status continues after closing, same settlement/job/draft and all business endpoints unchanged. Closing is UI completion, not financial/stock PASS. Existing correction amounts/audit/My payments sizing owner remains assigned, untouched; #09/Gate3 and all accepted flows protected. Claim must be green/main before source.

Same retained QR camera owner receives new physical focus USER FAIL: owner asks better focus12:51. Actual screenshot image(20261011-095121).png shows LAB Payments → supplier open invoices; no camera preview, QR/header result, submitted transaction ID or measured duration, so no QR success inferred. Prior Impact source is LIVE5440889b and delivery receiptPR2232 main9bcecae; focus/physical acceptance remain OPEN. Bounded camera extension: capability-aware autofocus/refocus and optional manual focus distance in invoice QR and current payment document/photo capture, high-resolution ideal video where absent, honest unavailable-control indication; no invented autofocus for fixed-focus hardware, no artificial image sharpening as optical focus. Preserve scan-once/store-stale/cleanup and original capture/quality checks, separate work-card/shift/login scanners untouched.

Read current AGENTS, shared tracker/active/pending/checkpoint/manual and mainf69d9068 including concurrent My payments sizing claimPR2233. Code inspection: parent closes supplier/bank/new invoice on messages beginning checkmark, including attachment quality success, while Premium durable acceptance emits hourglass and waits for later OCR result; explicit completion is missing. Other expense already closes on POST success. Tests will mount actual forms/parent for accepted/pending/failure/quality/duplicate/partial handoff and ensure no second payment; camera capability/rejection/manual focus/lifecycle tests. No live/LAB invoice/payment/draft/job/stock/fiscal/myDATA mutation or accepted replay. Full source/mainCI and ordinary guarded exact release/public health/assets before physical retest; no new manual PASS. Owner retained until acceptance/named handoff. Checkpoints2026-10-11-pos-payment-completion.md and2026-10-11-invoice-camera-qr.md.

11/10/2026 12:42 Athens — POS-MY-PAYMENTS-READABILITY / ASSIGNED / AWAITING UI

Same owner codex/pos-payment-correction-20261011, bounded follow-up branch fix/my-payments-readable-20261011. Owner screenshot image(20261011-094223).png shows «Οι πληρωμές μου» with small totals and joined description/metadata; explicit request «αυτο το θελω πιο μεγαλο». Enlarge only this existing POS dialog: readable labels/totals/payment rows, separated description/date/evidence and touch-sized correction/refresh controls; responsive wrapping and scrolling. No payment amount/data/API/permission/terminal/filter/scanner/cash/QR change. Gate5/manual PASS and other owners protected. Current payment source5440889b/mainCI38128626201/guard38128815585 delivered; physical financial acceptance remains OPEN. New layout NOT TESTED. Publish this claim green+main before source; existing mounted payment regressions/build then exact full source/main CI, guarded healthy release and independently served CSS before owner visual review. No financial action/replay/manual PASS. Owner retained until scoped acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payment-correction.md.

11/10/2026 — POS-INVOICE-CAMERA-QR-01 / IMPACT VIEW SOURCE LIVE / USER RETEST OPEN

Owner codex/invoice-camera-qr-20261011 retained. SourcePR2229/head1929c835f961b3651b3b22429d73b083c9cfdb02/fullCI38127834384 SUCCESS2297PASS/0FAIL/0SKIP merged e5388959cadacd676361190f65aafd090f1e6500. Exact mainCI38128081606 attempt3 SUCCESS2297/0/0 plus full build/invariants/isolated PostgreSQL/archive/real HTTP E2E and Windows. Attempts1/2 each2296/1/0 failed only preexisting pos-capacity-runner.test.js:43 offeredLatencyMs>=latencyMs timing assertion; isolated local reproduction7/1 confirms unrelated scheduler timing residual, not QR regression. Failed jobs retried unchanged; no test/assertion/threshold/workflow bypass and no capacity PASS claimed. Existing capacity owner/residual protected.

Concurrent payment-correction PR2230 preserved QR source unchanged in descendant5440889b4507d1bff0419b82f06afab1bc2e6f8b. Exact descendant mainCI38128626201 attempt1 SUCCESS2301PASS/0FAIL/0SKIP including full build/invariants/security/isolated PostgreSQL and real HTTP E2E. Source QR helper/test diff against e5388959 is empty; both workstreams preserved. Earlier guard38128595698 correctly did not deploy e5388959 because newer production source was on main. Ordinary guarded Render38128815585 SUCCESS: pinned exact5440889b, previous healthy rollback checkpoint retained, exact healthy revision confirmed09:36:40Z. No manual restart/deploy bypass or production business mutation.

Independent public verification after deployment at2026-10-11T09:37:30.009466+00:00: health ok:true/exact5440889b4507d1bff0419b82f06afab1bc2e6f8b, /platform-admin script /assets/index-BcCEXoOM.js serves /assets/entry-DaiiGQML.js, SHA256460afad1dfea4fdafdf20b941a471e344df6143b6a89d71b95091542d9004109, 2284389bytes and recognized-QR marker present. This verifies delivered revision/assets; server format support is established by preserved source and exact fullCI, not by a client-only marker.

Delivered provider-wide formats: S1 Ecos canonical /p/, Impact canonical /p/ and Impact /v/ with arbitrary valid supplier/invoice identifiers. Impact view reads myDATA directly then original PDF via validated UID/authenticationCode/document token, two bounded requests without HTML page loading. Actual owner's supplied read-only direct /v/ XML plus actual original PDF reader replay yields505-16966 /07Oct2026 /63.51EUR /one page. Static photo/Work replay is not physical live camera or optical-speed PASS; unsupported providers retain photo/PDF fallback. Company/store/role/module/recipient/original-identity guards, explicit payment choice and all assistant/business handlers remain unchanged. No real/LAB invoice/payment/draft/job/stock/fiscal/myDATA mutation or accepted transaction replay. No new manual PASS.

Newest physical user observation remains unsupported-QR/long-wait USER FAIL; device/client SHA and measured duration unknown. Delivery completes the bounded format correction only; physical QR-to-PDF/header and camera speed USER RETEST OPEN. Next single action: owner refreshes POS, opens supplier New invoice camera QR scan in the intended selected store, scans this same Impact QR and checks recognized marker then original PDF/header, WITHOUT submitting payment/invoice. Unsupported format after refresh or slow optical recognition requires exact screen and measured phase duration, not a repeated transaction. Owner remains assigned until scoped acceptance/named handoff; all #09/Gate3/presentation/current-cash/payment-correction owners and previous PASS protected. Shared checkpoint/active/tracker/pending/PDF synchronized. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-invoice-camera-qr.md.

11/10/2026 — POS-PAYMENT-CORRECTION-01 / SOURCE LIVE / FINANCIAL USER + LAB ACCEPTANCE OPEN

Owner codex/pos-payment-correction-20261011 retained. ClaimPR2228/head40d9f8b2/CI38127275645 SUCCESS/mainfcf012cd before source. SourcePR2230 firsthead4b1aa464/CI38127911515 SUCCESS2299/0/0; finalhead64922ca18e1094ce1eec05e83c02ae053c5615bc preserves concurrent QR Impact-format sourcePR2229 unchanged, exact fullCI38128225612 SUCCESS2301PASS/0FAIL/0SKIP. Source merged5440889b4507d1bff0419b82f06afab1bc2e6f8b; exact mainCI38128626201 SUCCESS2301/0/0, production build/contracts/invariants/security/native PostgreSQL/archive/real HTTP E2E and Windows checks. Ordinary guarded Render38128815585 SUCCESS with rollback checkpoint and exact healthy revision5440889b4507d1bff0419b82f06afab1bc2e6f8b. No workflow/threshold/role bypass. Older QR main initially had an unrelated capacity-timing assertion failure and was successfully retried before payment source merge; QR owners/PASS and source retained.

Independent public GET after release at2026-10-11T09:37:39.674062+00:00: health ok:true/exact5440889b4507d1bff0419b82f06afab1bc2e6f8b; canonical https://myworkstation-app.onrender.com/platform-admin scripts /assets/index-BcCEXoOM.js; actual served JS /assets/index-BcCEXoOM.js SHA256 b778a8ffab0c2db369b76e04e1aca51dd09431e3df0d04c8a46564d708c1c914; assets/entry-DaiiGQML.js SHA256 460afad1dfea4fdafdf20b941a471e344df6143b6a89d71b95091542d9004109; assets/main-BzabvMRd.js SHA256 e5ed60985cd8e371c0403fb5f8d1869739b7580217e407cd5892b3abe97f509f; actual served CSS assets/main-BaMJwz8P.css SHA256 49910e1319601ed23eb9559dec8e696ffff16b8269985e5a254f52058b5cd3b6; assets/entry-BX2MuP-A.css SHA256 d5670cc11a4fe23749596b323ce4aff77a5f7cf74585b28dbc54f85308fc5c18. Actual root contains PAYMENT_AMOUNT_CORRECTED audit code; entry contains existing CSV scanner, correction-context/correct-amount, Greek action/save, latest-correction/idempotency and dialog guards; main retains complete current-store/terminal cash/freshness boundaries. Delivery evidence only, not physical financial PASS.

Existing POS shift transactions and My payments now expose server-authorized «Διόρθωση πληρωμής»: original/new amount, mandatory reason, cash-difference preview. Same payment identity/metadata/evidence retained; no second payment. Own current OPEN terminal/session/company/store/type/payment-right guards; closed/reversed/foreign/cancelled linked entries refuse. Exact cents, amount+correction UUID protect stale/ABA changes, same-key/hash retry and row/document/shift locks protect duplicate/concurrent actions. Atomic original/new/cash delta/actor/time/reason audit in existing Συμβάντα; linked supplier allocations preserve original documents/sum/remaining ceiling and bank amount reconciles. Changed amount resets old review/proof to pending; invoice totals and stock/fiscal/device commands untouched. Parent listings refresh through existing store-sync callback.

Native isolated CI executes actual helper and registered routes, same-entry metadata/control22 preservation,3→5 cash−2, duplicate/ABA/two-correction race, audit-insertion failure rollback, closed/foreign/wrong-terminal/no-right refusal, allocation sum/overpayment and external bank amount/cash0. Actual mounted form tests mandatory reason/cash preview/network retry same key/double-submit/store-change stale reply; existing event renderer tested. Source/main full CI both zero fail/skip. Local frontend8.87s/server preparation PASS and prior full local2274/0/17 database-dependent skips; no local native DB claim. PDF visual QA verified. No real/LAB payment/sale/stock/shift/schema/fiscal action or accepted transaction replay by this page; owner's existing3EUR screenshot payment untouched. No financial USER/LAB PASS and no new manual/numbered closure.

Cash display remains live for all selected stores: active operational opening + complete cash receipts + transferIn − deducted payments/deposits − transferOut, per terminal and total,30s/focus refresh and failure/timestamp/stale guards. Cash receiptPR2227 green+main8aa8ee1; scope remains AWAITING attributable UI/financial acceptance, not every-store PASS. Barcode/cursor specific USER PASS and all other owners protected.

Next owner review: refresh POS → Συναλλαγές βάρδιας / Οι πληρωμές μου → inspect «Διόρθωση πληρωμής» without submitting solely for evidence. A real correction uses the owner's intended amount/reason, fresh identified store/physical terminal/operator/session/current totals and other-terminal/stock/card/IRIS/audit controls BEFORE, one explicit save, then same AFTER sources/transaction ID/correction event/expected cash difference. Never guess a correct amount for the existing3EUR screenshot or repeat accepted transactions. Financial acceptance remains OPEN until measured scoped review or named handoff; owner stays assigned. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payment-correction.md; final receipt branch docs/pos-payment-correction-live-20261011.

11/10/2026 — POS-PAYMENT-CORRECTION-01 / SOURCE READY / AWAITING FULL CI + LAB

Metadata reconciliation: first sourcePR2230 head4b1aa464/fullCI38127911515 SUCCESS2299PASS/0FAIL/0SKIP, including real isolated PostgreSQL/actual routes/race/audit rollback and all build/HTTP E2E guards. Concurrent QR Impact-format sourcePR2229/main e538895 is preserved unchanged. This update combines the exact newer owner source/checkpoints with payment source; full CI must run again on the final combined head. No payment application changes since the first green source head. Actual physical/financial acceptance still NOT TESTED.

Owner codex/pos-payment-correction-20261011 retained. ClaimPR2228 exact40d9f8b20dc187976678a1dad72b136836baa327 / CI38127275645 SUCCESS / mainfcf012cddd98e7dd9afc3d8d5f8a12cc4e0499e3 published before source. Bounded extension in existing POS transactions and My payments: server-authorized correction action opens original/new amount, mandatory reason and cash difference. Existing payment identity/description/actor/time/proof/duplicate key retained. Shared same-entry ledger determines cash; correction does not add another payment. Own operator/tenant/store/current terminal OPEN-session/type guards; closed/reversed/foreign/unauthorized refuse. BackOffice roles retain existing store-company authorization.

Atomic transaction serializes on open shift and payment, checks amount plus latest correction UUID (including ABA), idempotent same-key/hash retry, document locks before shift as settlement creation. Supplier allocations keep exact original document set and sum/new amount, remaining ceiling excludes current settlement; linked bank amount reconciles and prior evidence/review resets to pending. Cancelled linked entries refuse. Original proof remains available; a changed amount is not silently confirmed. Attributable existing StoreOperatorAudit PAYMENT_AMOUNT_CORRECTED records actor/time/original/new/cash delta/reason/session/terminal/linked before-after; admitted and rendered by existing Συμβάντα. No stock, sale, fiscal, bank-device command or invoice total change.

Local Node20 frontend8.87s/server preparation+Prisma generation PASS. First broad local run failed37 imports/contracts because Prisma client was not generated and one obsolete exact mounting assertion; after server preparation/exact new props assertion, full suite2274PASS/0FAIL/17SKIP (2291tests). Existing overview remains GET-only; bounded correction component is server-authorized. Final focused17PASS/0FAIL/1SKIP includes actual mounted form validation/cash delta/double-submit/retry key/stale-store, tenant/terminal/role/type/schema and actual audit formatting. Initial focused31PASS/0FAIL/1SKIP protected cash/close/payment contracts. Native PostgreSQL test NOT RUN locally (no isolated database): exact helper and actual registered routes, same-entry metadata/control, duplicate/ABA/race, audit failure rollback, closed/foreign/permission, allocation overpayment/sum and external bank/cash0 must pass in isolated CI. No physical USER/LAB/financial PASS inferred; manual/numbered closure unchanged.

Owner's existing3EUR screenshot payment has not been changed or repeated. No live/LAB financial/data mutation. Current cash/all stores, barcode/cursor USER PASS, QR camera and all other assigned/PASS flows preserved. Next: full exact source/main CI, ordinary guarded healthy release with rollback checkpoint and served assets, then scoped owner acceptance with fresh before/one action/after/other terminal control; do not replay accepted movements merely for evidence. Assignment remains OPEN until scoped financial acceptance/named handoff.

11/10/2026 — POS-INVOICE-CAMERA-QR-01 / IMPACT VIEW FORMAT / SOURCE READY AWAITING CI + USER

Owner codex/invoice-camera-qr-20261011 retained; follow-up branch fix/invoice-qr-impact-format-20261011, based on mainfcf012cd. Newest user screenshot reports unsupported QR and long wait; actual physical device/client SHA and duration unknown, camera speed USER FAIL remains OPEN. Actual supplied Impact photograph decodes to the known host einvoice.impact.gr with /v/ELVAT-documentID-authenticationCode-documentToken format, not the previously supported /p/ELVAT-UID/documentToken. This explains rejection after optical recognition. Printed einvoicing.impact.gr is not the encoded URL. User expands requirement to many different supplier/provider QR formats; support is format-wide, never hardcoded to one invoice.

Bounded adapter supports S1 Ecos /p/, Impact /p/ and Impact /v/. Direct /v/.../myDATA returns XML; /v/.../pdf is404. Resolve canonical /p/ PDF from the validated same-invoice XML UID and original document token, with matching authenticationCode before PDF. Exactly two bounded provider requests, no HTML/JavaScript loading or arbitrary-host redirects. Preserve selected-store/company recipient VAT, issuer, XML metadata/type/date/currency, original PDF identity, deadline/size/page checks, scan-once/stale/cleanup and explicit paid/credit choice. Unsupported providers still use original photo/PDF fallback. No inference of payment; Basic/Premium business submit, assistant, stock/fiscal/myDATA and existing owners unchanged.

Node20 frontend build PASS8.35s (TABLE_SERVICE verified); focused camera/provider/decoder/shift-camera regressions14PASS/0FAIL/0SKIP, including different synthetic Impact invoices and malicious/mismatched/missing UID/authentication/recipient rejection before PDF. Read-only actual sample XML/PDF replay with actual PDF reader returns505-16966 /07Oct2026 /63.51EUR /one page, issuer094211509 and recipient802387132; sample is not committed or submitted to any business flow. Provider read-only Work timings roughly9s XML and8.5s PDF are not physical-camera latency. Old S1 canonical/malformed-slash URL and Impact canonical regressions preserved. No real/LAB invoice/payment/draft/job/stock/fiscal mutation or accepted replay; no new manual PASS. FullCI/main/ordinary guarded release and exact health verification required before physical retest. Camera speed and actual QR-to-header USER acceptance remain NOT TESTED; unrelated #09/Gate3/current-cash/payment-correction owners remain protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-invoice-camera-qr.md.

11/10/2026 — POS-PAYMENT-CORRECTION-01 / ASSIGNED / NOT TESTED

Owner codex/pos-payment-correction-20261011, source branch feat/pos-payment-correction-20261011. Independent owner-requested extension: existing POS shift payment row → «Διόρθωση πληρωμής», original/new amount and mandatory reason, correct the same payment and cash by its difference, attributable event in existing Συμβάντα. No takeover of Gate5, invoice/QR, close, current-cash or other assigned owners. Existing Gate5 final25Sep LAB PASS/manual supersedes older historical OPEN notes; protected creation/proof/review, no duplicate/overpayment, external payment no POS-cash effect, unchanged stock/fiscal and company/store/terminal permissions.

Latest screenshot observation: LAB shift11:17:37 and own third-party payment3.00EUR at11:52:33, no-document/removed from shift. Exact transaction/company/store/session/client revision and independent before/after/control unknown. Screenshot is display observation only, not measured financial PASS. Do not change or repeat that existing payment merely to generate evidence. Cash display sourcePR2224 is live in preserved descendant9ab4f10, receiptPR2227 green+main. Payment correction has no implementation or USER/LAB acceptance yet.

Bounded intended implementation: server-authorized own current OPEN terminal-session supplier/third-party entries only; same identity and original evidence, optimistic version/idempotent retry, atomic cash-affecting amount and audit with actor/time/reason/before/after, immutable closed/reversed/foreign entries. Linked allocations must remain consistent and reject overpayment; prior proof/review cannot silently certify a changed amount. No sale/refund/fiscal/stock or external bank command. Existing overview derives current cash from that same ledger and refreshes. Actual UI/mocked route and isolated PostgreSQL concurrency/rollback regressions before source fullCI/main/guarded exact release and served-asset verification. Real acceptance remains NOT TESTED until fresh identified baseline/one action/after/control; no manual PASS or accepted transaction replay.

Claim must be green and merged before source. Relevant guide, active/tracker/pending/checklist/payment manual and Gate5/history inspected. Owner retained until scoped acceptance or named handoff. Next action: implement and verify bounded correction after published claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payment-correction.md.

11/10/2026 — SHIFT-CURRENT-CASH-01 / SOURCE LIVE / UI + FINANCIAL ACCEPTANCE OPEN

Same owner codex/shift-current-cash-20261011 retained. Owner explicitly clarified11Oct11:40Athens that this must apply to all stores. The shared StoreTransactionsPanel is mounted by StoreCloudPage for each selected store; common implementation applies to every store with existing permissions, retaining store/terminal isolation. This is common source delivery, not physical financial PASS in every store. ClaimPR2223/head7297c787/docsCI38125241779 SUCCESS/mergebcdb430 preceded source. SourcePR2224/headd5e89b3389e849b0250ba16a946fc13cf3729211/fullCI38125619321 SUCCESS2292/0FAIL/0SKIP merged1c9daffde5609b781ea3ab0318d631220581325b. Original exact source mainCI38125836166 SUCCESS2292/0/0 after retry of Docker registry timeout. Later QR sourcePR2225 preserved that commit as an ancestor and merged9ab4f1066d3247fbb145a5f2f9294d3d4a1b1718. Its exact mainCI38126362039 SUCCESS2295/0/0; client build/contracts/invariants/security/native PostgreSQL/archive/real HTTP E2E and Windows checks green. Ordinary guarded Render38126561222 SUCCESS, exact healthy revision and preserved rollback checkpoint. Initial sourcehead7ced7f3/CI38125402499 failed two old identifier text assertions (2290PASS/2FAIL); exact assertion rename and strengthened mounted management-access gate reconciled in final head, without application-source changes. No workflow bypass or assertion/threshold weakening.

Independent public GET verification after release at2026-10-11T09:05:40.843753+00:00: health ok:true/exact9ab4f1066d3247fbb145a5f2f9294d3d4a1b1718; canonical https://myworkstation-app.onrender.com/platform-admin scripts /assets/index-DZ1d6ACA.js; actual served JS assets/entry-VEQi-BEb.js SHA256 e8959b1db421b46bcbd3c4c08eb195a31105fe45e458305d02b4dddf7a1511ed; assets/main-Dp6CVatL.js SHA256 a99d66ab74f2983c6ccd0cf4115f01ba98e11e588e10b2fae0871ff55279d9d6. Main asset contains current active-store/terminal cash labels, openingOperational/full summaryBySession/expensesTotal/transferOut and freshness/error/store-mismatch guards; entry retains accepted CSV scanner matcher. Delivery/code proof only, not physical USER/LAB/financial PASS.

Current available operational cash uses each active session's opening + complete cash receipts + transferIn − deducted cash payments/bank deposits − transferOut; labels exclude safe/card/IRIS and closed tills. Separate per-terminal breakdown and sum of active terminals; unknown/incomplete values display unavailable. Visible30second/focus refresh, last-success timestamp and explicit failure warning, stale-response discard and no overlapping polls. Existing legacy sales/category/timeline and all server/payment/close/fiscal/auth paths remain unchanged.17 focused tests plus9 exact contract tests PASS (actual mounted panel100→150→140, control22/aggregate162, mocked store race/error/GET-only cleanup plus actual existing ledger exclusions/customer receipts/refunds/bank movements), Node20 build8.84s and regenerated tracker PDF visual QA PASS. Tests are simulated, not measured live financial reconciliation. No real/LAB sale/payment/stock/shift/schema/permission/fiscal action or accepted transaction replay. Other owners, CSV barcode/cursor USER PASS and all previous PASS protected; physical readability remains its original scope.

Next owner review is read-only: BackOffice → Κέντρο βαρδιών → Ανανέωση. Observe new «Διαθέσιμα μετρητά ενεργών ταμείων» and «Τρέχον υπόλοιπο μετρητών» with existing opening/cash receipts/payments/inflows/outflows. Requested example100+50−10=140 verified by mocked real UI; do not create/repeat a sale or payment solely for documentation. Actual existing shift/time/operator/client revision and measured financial before/after remain NOT TESTED until attributable review. Manual PASS unchanged; this display assignment remains OPEN until scoped USER/LAB acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-shift-current-cash.md. Final receipt branch docs/shift-current-cash-live-20261011.

11/10/2026 — POS-INVOICE-CAMERA-QR-01 / SPEED SOURCE LIVE / PHYSICAL USER RETEST OPEN

Owner codex/invoice-camera-qr-20261011 retained. Newest real observation is owner camera-speed USER FAIL at11:39 Athens («αργει η καμερα να σκαναρει το qr»), not provider latency; exact device/model/client SHA and duration unknown. Bounded fixPR2225 exact finalhead dd080fcb55606bbb1f5c1c6484019898c1c40614, CI38126134649 SUCCESS2295PASS/0FAIL/0SKIP. Initial headbfcb2dac/CI38125813920 also SUCCESS but required metadata merge with concurrent current-cash PR2224, which was preserved. Merge9ab4f1066d3247fbb145a5f2f9294d3d4a1b1718; exact mainCI38126362039 SUCCESS2295/0/0 including Windows, frontend/server build, contracts/invariants, isolated PostgreSQL/archive and real HTTP E2E.

Ordinary guarded Render38126561222 SUCCESS with pinned exact revision9ab4f1066d3247fbb145a5f2f9294d3d4a1b1718 and rollback checkpoint. Independent public verification after successful release at2026-10-11T08:59:20.095275+00:00: health ok:true and same revision; /platform-admin script /assets/index-DZ1d6ACA.js serves /assets/entry-VEQi-BEb.js SHA256e8959b1db421b46bcbd3c4c08eb195a31105fe45e458305d02b4dddf7a1511ed. Served JS independently verifies crop/fourth-frame fallback and «Το QR αναγνωρίστηκε» marker. Delivery evidence is not physical camera PASS.

Delivered bounded camera correction: decode centre75%-of-short-side crop at original resolution before periodic full-frame search, dense-QR hint,60ms retries and optional supported continuous autofocus. Distinguish recognized QR from provider PDF download immediately. Local real ZXing synthetic centre/rotated/off-centre and lifecycle/provider regressions12/0/0 plus build8.28s. Local replay of the owner's actual supplied1152x1536 QR photograph decodes the expected S1Ecos link on first attempt42ms with @napi-rs/canvas; this is static-photo/Work extraction evidence, not live optical latency or user-terminal measurement. No real sample committed or uploaded to a business flow. No backend, payment/handoff/stock/permission change; all other owners and previously accepted flows preserved.

Physical camera improvement remains NOT TESTED / USER RETEST OPEN. No new manual PASS or closure of owner-reported slow recognition. No live/LAB invoice/payment/draft/job/stock/fiscal/myDATA mutation or accepted transaction replay. Next single action: owner refreshes POS, opens supplier New invoice camera QR scan, holds the complete QR clearly centred and checks time until «Το QR αναγνωρίστηκε», without payment/submission. PDF transfer is a separate phase. Owner remains assigned until physical acceptance or named handoff. Shared checkpoint/active/tracker/pending and generated PDF synchronized.

11/10/2026 11:39 Athens — POS-INVOICE-CAMERA-QR-01 / USER FAIL CAMERA SPEED / SOURCE READY AWAITING CI + USER

Same retained owner codex/invoice-camera-qr-20261011, branch fix/invoice-camera-qr-speed-20261011; already published independent camera claimPR2217 covers this bounded follow-up. Owner clarifies «αργει η καμερα να σκαναρει το qr», not provider download. Exact camera model, physical terminal/client revision and measured decode duration unknown. New observation supersedes pending physical acceptance; no QR USER PASS claimed. Prior sourcePR2220/main15c477f3 CI2289/0/0 and guarded release/served-asset receiptPR2222 remain delivery evidence only. Read-only sample provider requests measured5.78s XML/6.90s PDF from Work, not camera or production latency.

Local inspection: scanner decodes the entire1920x1080 frame on every attempt and omits optional continuous autofocus. Bounded correction: reusable centre crop75% of shorter frame side at original pixel resolution (810x810 vs1920x1080), dense-QR TRY_HARDER,60ms retry, full-frame attempt every fourth centre miss. No global ZXing changes or downsizing; off-centre fallback retained. Request continuous autofocus only when camera capabilities support it; reject/unsupported focus does not block scanning. Show immediate «Το QR αναγνωρίστηκε» before provider download so phases are distinguishable. Existing single-scan/cleanup/stale-store guards, PDF backend/access/recipient checks and payment/handoff/stock handlers remain unchanged.

Node20 local12 meaningful tests PASS/0FAIL/0SKIP: real ZXing decode of generated dense centre and rotated QR, pixel workload below one-third, periodic off-centre full-frame success, optional autofocus success/rejection/absence; existing actual mounted Basic/Premium camera, one scan/no business submission, close/store-change/late controls/permission fallback, QR provider/tenant invariants and separate shift-close camera regression. Node20 frontend build PASS8.28s including TABLE_SERVICE bundle verification; full source/main CI/deploy pending. Generated fixtures are synthetic and do not simulate optical camera latency. Actual owner-camera improvement remains NOT TESTED; no physical PASS/manual entry, no live/LAB invoice/payment/draft/job/stock/fiscal/myDATA mutation or accepted transaction replay. Other current-cash/barcode/layout/#09/Gate3 owners preserved. Next exact green CI/guarded deployment/public health+asset verification, then one physical centred QR scan without submitting a transaction. Owner retained until acceptance/named handoff.

11/10/2026 — SHIFT-CURRENT-CASH-01 / CI contract reconciliation / acceptance OPEN

Initial sourcehead7ced7f3/fullCI38125402499 failed two text-contract assertions only: old data.openSessions and data.access identifiers were renamed to the store-validated current snapshot. Production display build and mounted new fixture passed; no real financial PASS inferred. Update only those exact assertions to current.openSessions/current.access, preserving backend role/session/atomic-close expectations, and strengthen the actual mounted panel fixture: management close absent without server access, present when allowed, no POST. No application source change, assertion removal/threshold/workflow bypass. Re-run full exact CI required; previous failed run retained as evidence. Same owner, all previous PASS/other owners and no-business-mutation boundaries retained.

11/10/2026 — SHIFT-CURRENT-CASH-01 / SOURCE READY / AWAITING CI + UI ACCEPTANCE

Same owner codex/shift-current-cash-20261011 retained. ClaimPR2223 exacthead7297c787/full docsCI38125241779 SUCCESS/mergebcdb430 before source; claim updated with concurrent QR receipt preserved. Added explicit sum of active terminals, terminal card current balance and selected-terminal breakdown (opening/cash receipts/payments/inflow/outflow). Uses complete existing summaryBySession, openingOperational and expensesTotal including deducted bank deposits; no backend/form/payment/close/cashControl/tenant change. Unknown/missing/invalid full summary displays unavailable rather than zero. Cash balance rounded in integer cents. Safe/card/IRIS excluded from available operational cash as labelled; store total covers active terminals only, not an unmeasured whole-store physical count.

Read-only visible polling30seconds plus focus/visibility refresh, timestamp and explicit refresh error. Store-scoped results validated, stale/unmounted responses discarded and overlapping loads suppressed. Existing sales/category/timeline and legacy business handlers retained; added selected-store guards around displayed legacy data. Actual mounted real panel with mocked APIs verifies100→150→140, independent control22/store aggregate162, stale A→B protection, error retains last known values with warning, non-overlapping poll and cleanup, GET-only diagnostics. Actual existing server totals function fixture verifies reversed/external/card/IRIS exclusions and customer cash/transfers/bank effect.17 focused tests PASS0fail/skip; Node20 client build PASS. No real/LAB sales/payments/shift/stock/fiscal/data/permissions mutation or accepted transaction replay. Real financial before/after and physical UI NOT TESTED. Exact source/main CI and ordinary guarded healthy release/served JS required before owner review. Manual PASS unchanged until genuine acceptance. Other owners and confirmed barcode/cursor PASS preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-shift-current-cash.md.

11/10/2026 11:30 Athens — SHIFT-CURRENT-CASH-01 / ASSIGNED / NOT TESTED

Owner codex/shift-current-cash-20261011, source branch fix/shift-current-cash-20261011, bounded tracker03 display extension. User requests current cash100 opening+50 cash receipts−10 cash payment=140. Attached image image(20261011-082736).png inspected: BackOffice Κέντρο βαρδιών / LAB-POS-02 open11:17, displayed cash/card/IRIS/expenses/total0. The photograph is a display observation, not a measured100/50/10 transaction baseline or financial PASS. Earlier barcode-specific USER PASS is closed viaPR2221/025e915; all existing owners and readability/QR/payment/fiscal scopes protected.

Read current AGENTS, active/tracker/pending/checklist, POS manual and relevant shift/payment/transfer/session-isolation tests and routes; no competing current-cash display assignment found. Existing StoreTransactionsPanel totals are reconstructed from capped recent sales/movement lists and omit openingOperational; complete protected overview already exposes openingOperational and unlimited summaryBySession with cashSales/customer receipts, transferIn/out, cash expenses/bank deposits and reversal exclusions. Use those session-scoped authoritative summaries for a new explicit current operational cash display, individual terminal balance and sum of active terminals. Preserve sales totals/categories/timeline and all payment/close/backend guards. Opening safe remains outside operational cash, per existing opening/closing policy; no count of closed till/safe as currently available cash. Missing summary must show unavailable, not invented zero.

Bounded freshness: periodic read-only refresh while visible, focus refresh and last-success time; reject stale responses after store change/unmount, retain clear refresh failure and avoid overlapping polling. Use current selected store/company endpoints only. Proposed criteria mocked actual mounted panel100→150→140, external/card/IRIS/reversed exclusions, full summaries beyond recent limits, transfer/refund/bank effects, independent terminal/store/race isolation. No live/LAB sale/payment/shift/stock/fiscal/schema/permission mutation or accepted transaction replay for diagnosis. Publish claim green/main BEFORE source, exact full source/mainCI + guarded release/served JS before owner review. Actual UI/financial LAB remains OPEN, not CI PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-shift-current-cash.md.

11/10/2026 — POS-INVOICE-CAMERA-QR-01 / SOURCE LIVE / AWAITING PHYSICAL USER ACCEPTANCE

Owner codex/invoice-camera-qr-20261011 retained. ClaimPR2217 merged521b8169 before source. SourcePR2220 exacthead4f6e777c5a38d455edf1bb857fdf490abbdd35d5, CI38124344091 SUCCESS2289PASS/0FAIL/0SKIP. Merged15c477f36a961b54d113c3d3d3c1a5017ddbfac2; exact mainCI38124560059 SUCCESS2289/0/0, Windows checks, frontend/server build, contracts/invariants, isolated PostgreSQL/archive and real HTTP E2E all green.

Ordinary guarded Render38124767625 SUCCESS with pinned revision15c477f36a961b54d113c3d3d3c1a5017ddbfac2 and rollback checkpoint retained. Independent public GET after successful deployment at2026-10-11T08:29:19.356833+00:00: health ok:true and exact same revision. Canonical /platform-admin scripts /assets/index-DfYiH6dn.js map to actually served /assets/entry-D4eCQ2Bq.js, SHA2560747dcad5776e6b9af5f0bb158be3a8a643c101e2ab8d16dc42043d0c3ea3756. Served asset includes the new QR-read API and Greek scan action. This verifies delivered source/assets, not physical camera/payment acceptance.

Delivered scope: existing POS supplier New invoice → camera intake → «Σάρωση QR τιμολογίου», Basic/Premium. Exact supported S1Ecos/Impact QR obtains original PDF and reviewable supplier/number/date/amount. Auth/module/store/recipient-company guards and bounded provider reads; photo/PDF fallback, scan-once and cleanup/stale-response guards. Operator must explicitly choose paid/credit; scan performs no payment/draft/job/stock mutation. Existing submit/handoff/dedupe and separate open-invoice payment-proof handlers unchanged. Basic credit notes require BackOffice. Local sample extraction and mounted synthetic regressions are local evidence only.

Physical camera/provider integration and actual USER/LAB acceptance remain NOT TESTED. No live/LAB invoice submission, payment, draft, stock, fiscal or myDATA mutation and no accepted transaction replay. No new manual PASS. Next single action: owner opens New invoice/camera scan in the relevant selected store and verifies the QR-derived original PDF/header WITHOUT submitting the real sample into LAB or executing payment. Foreign recipient/company is expected to refuse safely. Any later business acceptance requires suitable sample and measured before/after evidence. Shared checkpoint/active/tracker/pending/PDF synchronized; owner remains assigned until acceptance or named handoff; other #09/Gate3/presentation/permission assignments preserved.

11/10/2026 11:24 Athens — POS-BARCODE-CART-02 / USER PASS / CLOSED

Χρήστος Μανής confirms «ειναι οκ» after the exact CSV-barcode correction was published and independently verified live. This is owner-reported acceptance of the specific suggestion-only scan-to-cart failure (5201222304692 / TEREA BRONZE / SKU12237). It supersedes the11:04 failure and pending physical-review notes for this bounded flow. Owner codex/pos-barcode-cart-20261011 completed; no repeated scan or transaction requested. Earlier idle cursor USER PASS remains CLOSED. Readability, invoice-camera QR and all other owners/residuals remain unchanged.

SourcePR2219 / merge6d772bbc6e10539602f533dfc6929db1b7b1db4d, sourceCI38123914401 and mainCI38124167180 SUCCESS2281/0/0, guarded Render38124337563 SUCCESS, independent health and served JS verification08:23:32Z (entry-Ck4jbPIY.js SHA2567f86ac0d7d1f66050868f95eb5b5047640baaab68da6dc896cfc05bc0f78eff3). The actual terminal/client SHA, scanner suffix, precise scan time/quantity and payment/stock/fiscal effects were not independently measured; this is a limited USER PASS, not a universal barcode or financial/LAB PASS. No transaction replay or production-data rewrite. Receipt/PASS publicationPR2221 includes checkpoint, active/tracker/pending, manual and both central PDFs. Older OPEN records remain historical.

11/10/2026 — POS-BARCODE-CART-02 / exact CSV correction SOURCE LIVE / PHYSICAL ACCEPTANCE OPEN

Same owner codex/pos-barcode-cart-20261011 retained. Latest physical report11:04 «οχι παλι στην προταση βγαινει» remains USER FAIL until new owner review; earlier idle cursor USER PASS stays CLOSED. Prior52dc5f6 delivery/CI did not cover real CSV format and is not a barcode physical PASS. No new USER/LAB/financial PASS inferred.

Read-only production catalog evidence identifies selected storecmulmjjoc000qqlbf2bn2ifj0/companycmulmjjoa000oqlbfyi0h53ju (ΠΕΡΙΠΤΕΡΟ ΔΙΑΔΟΧΟΥ ΠΑΥΛΟΥ ΕΕ), distinct from same-name pilot. Actual active product523d46e8-1393-47db-869a-1adab90d3db8/TEREA BRONZE/SKU12237/4.0000EUR has one ProductBarcode 5201222305620,5201222304692,5201222302988, barcodePriceNULL, no master. Selected-store/company comma-alias query found one active match for5201222304692. A further full active-catalog query matching the scanner normalization (comma/tilde/whitespace/leading-zero variants and master-barcode claim exclusions) also returns only this product, ruling out hidden formatted duplicates. Earlier photo SKU12227 transcription corrected to actual12237. Old helper replay returns null; substring search alone explains suggestion-only finding. No catalog/data rewrite.

Evidence/claimPR2218/head1bfe16a3/docsCI38123741454 SUCCESS/merge8333b84 before source. SourcePR2219 exacthead82ab1833900b075868a874eaf63d7b7a4bb339f3/fullCI38123914401 SUCCESS2281PASS/0FAIL/0SKIP, merged6d772bbc6e10539602f533dfc6929db1b7b1db4d. Exact mainCI38124167180 SUCCESS2281/0/0, Windows checks, client build/contracts/invariants/native PostgreSQL/archive/real HTTP E2E green. Both first attempts; no retry, threshold/assertion change or workflow bypass. Ordinary guarded Render38124337563 SUCCESS with pinned exact revision and rollback checkpoint preserved.

Independent public GET verification AFTER successful release at2026-10-11T08:23:32.978450+00:00: health ok:true/revision6d772bbc6e10539602f533dfc6929db1b7b1db4d. Canonical https://myworkstation-app.onrender.com/platform-admin scripts /assets/index-COUiF2wT.js map to actually served assets/entry-Ck4jbPIY.js; JS SHA256 7f86ac0d7d1f66050868f95eb5b5047640baaab68da6dc896cfc05bc0f78eff3. Served JS contains split(/[~,]/).flatMap, complete/manual matcher, preserved master/source/SKU exclusions,180/600ms scan timing and idle-focus lifecycle. Delivery/assets proof only, not physical scanner PASS.

Only production-source change is comma+tilde stored numeric delimiter; inverse replacement restores full utility byte-for-byte. Caller/idle/cart/add/checkout/server source unchanged. Unit data-derived fixture covers all three actual barcode positions, duplicate/partial protection and original grouped-option identity/price. Mounted actual POS synthetic fixture carries CSV/SKU12237/4EUR: middle scan with/without Enter adds once, repeatedquantity2 and4EUR line/8EUR mocked checkout, existing focus/name/unknown/modal/fiscal/rejected protections retained. Eleven local scanner/access/revocation tests PASS0fail/skip, Node20 build8.45s; text whitespace and regenerated PDF visual QA PASS. No real/LAB product/cart/sale/payment/stock/shift/fiscal/permission mutation or accepted transaction replay in diagnostics. Actual terminal suffix/client SHA and next physical scan NOT TESTED. QR camera/readability/other owners and old PASS preserved; no new barcode manual PASS.

Single next owner review: normally refresh existing POS with an empty cart/no sale in progress, then observe next ordinary5201222304692/TEREA BRONZE scan: automatically one4EUR cart line without selecting suggestion and cursor ready afterward. No payment replay solely for evidence. If still failing, capture exact barcode/time/visible current result and verify actual client delivery rather than rewrite catalog or select first ambiguous match. Keep owner until acceptance/named handoff. Shared checkpoint/active/tracker/pending and central PDF synchronize this receipt. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-cart.md; receipt branch docs/pos-barcode-csv-live-20261011.

11/10/2026 — POS-INVOICE-CAMERA-QR-01 / SOURCE READY / AWAITING CI + LAB

Owner codex/invoice-camera-qr-20261011 retained, branch feat/invoice-camera-qr-20261011. Claim PR2217 CI38123452617 SUCCESS, merged521b81692e4f7797816297b4d8ff2b2093fbb9c0 before source. Source based on main6d772bbc, preserving newer barcode owner changes.

Implemented QR scanning inside existing camera intake in Basic/Premium supplier New invoice forms. Read-only, authenticated selected-store DOCUMENTS endpoint downloads only exact HTTPS einvoice.s1ecos.gr/einvoice.impact.gr provider paths, rejects redirects/arbitrary hosts/foreign issuer or recipient VAT, validates XML metadata and original PDF identity, caps deadline/bytes/pages. Fills original PDF and reviewable supplier/header, clears paid/credit choice, never submits payment/draft/job/stock. Basic credit notes remain BackOffice-only. Premium retains existing single original-PDF handoff and assistant review; existing submit/dedupe/business handlers unchanged. Ordinary photo/PDF fallback preserved; open-invoice payment proof remains separate.

Local Node20: 81 focused invoice/tenant/operator/handoff regressions PASS, frontend build PASS. Final new API/helper + mounted camera/form tests8 PASS/0FAIL/0SKIP: scan once, delayed startup cleanup, close/store-change stale results ignored, camera permission/unsupported fallback, original PDF/header in both forms and no payment API calls. Local read-only replay of owner sample XML/PDF yields A-003649/2026-10-09/488.28/two PDF pages with actual PDF reader; this is sample extraction evidence only. Physical camera/provider integration, LIVE/LAB business acceptance and exact deployed revision NOT TESTED. No real or LAB invoice submission/payment/draft/stock/fiscal/myDATA mutation, no accepted transaction replay. No new manual PASS.

Next: source PR and full green CI, ordinary guarded deployment plus exact public health/assets verification, then owner physical camera scan/review WITHOUT submitting this real invoice in LAB. Payment/handoff acceptance requires separately authorized suitable sample and before/after evidence. Owner remains assigned; #09/Gate3 and presentation/permission scopes remain with their existing owners. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-invoice-camera-qr.md.

11/10/2026 — POS-BARCODE-CART-02 / exact CSV correction SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Same owner retained. Evidence/claimPR2218/head1bfe16a3f12f400e103b56c28312a3484dd826eb/docsCI38123741454 SUCCESS/merge8333b84c8db30419ca1f8fd2e25874280ce9f9cf before source. Current USER FAIL11:04 remains authoritative; idle focus USER PASS CLOSED.

Only production-source change is stored numeric barcode normalization splitting comma as well as tilde (split(/[~,]/)); entire remainder of scanner utility, caller StorePosPanel, idle hook, cart/add/checkout/server/catalog source unchanged. No product/barcode rows rewritten. Read-only actual catalog has TEREA BRONZE/SKU12237/4EUR with one literalCSV5201222305620,5201222304692,5201222302988, no master and null barcode price. Unmodified merged-main helper replay returns no match for middle5201222304692. New helper unit resolves all three positions, retains ambiguity/partial guard and original option key/price; actual mounted POS regression adds middle code with/without Enter, once, repeated quantity2 and correct4EUR line/8EUR mocked checkout, while retaining focus/unknown/manual/modal/fiscal/rejected checkout and all previous fixtures. Eleven local scanner/access/revocation tests PASS0fail/skip; Node20 build8.45s/TABLE_SERVICE verified; whitespace PASS. Data-derived fixtures are synthetic testing only, not real sale or financial PASS.

Keep exact option-pricing precedence, numeric SKU/name exclusions, aliases/master-source matching,180/600ms timing, duplicate protection and prior cursor acceptance. Complete exact source/main CI and ordinary guarded release plus independent health/served JS must finish before owner review. No live/LAB cart/sale/payment/stock/shift/fiscal/catalog/permission mutation or accepted transaction replay. Physical correction remains OPEN/AWAITING LAB, no new barcode manual PASS. Invoice camera QR/readability/other owners and all old PASS protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-cart.md; source branch fix/pos-barcode-csv-20261011; retain owner until acceptance/named handoff.

11/10/2026 11:04 Athens — POS-BARCODE-CART-02 / USER FAIL persists / exact CSV cause / ASSIGNED

Same owner codex/pos-barcode-cart-20261011 retained; next source branch fix/pos-barcode-csv-20261011. Owner says «οχι παλι στην προταση βγαινει» after deployed52dc5f6; barcode acceptance remains USER FAIL/OPEN. Idle cursor USER PASS stays CLOSED. Read current main521b816 (QR camera claimPR2217 by independent owner preserved), shared documents/checkpoint/manual/numbered and AGENTS/history before changes. No second assignment.

NEW real read-only catalog evidence from Render Postgres in the sole connected workspace, verified service myworkstation-app/canonical onrender URL/same GitHub repo and database myworkstation-db: two stores share display name; production company ΠΕΡΙΠΤΕΡΟ ΔΙΑΔΟΧΟΥ ΠΑΥΛΟΥ ΕΕ is companycmulmjjoa000oqlbfyi0h53ju/storecmulmjjoc000qqlbf2bn2ifj0, distinct pilot store untouched. Active product523d46e8-1393-47db-869a-1adab90d3db8/TEREA BRONZE/SKU12237/current store price4.0000 has ONE ProductBarcode row containing literal 5201222305620,5201222304692,5201222302988. No masterProduct/masterCode/masterBarcodes; barcodePriceNULL. Second read-only selected-store/company query splitting comma/tilde confirms exactly one active product match for5201222304692. Photo SKU12227 transcription in earlier notes was imprecise; actual database SKU12237 is now authoritative. No catalog/stock/cart/payment/shift mutation.

Causal discrepancy proven: substring search accepts middle barcode inside CSV; scanner numeric normalization splits tilde only and rejects entire41-character comma group, so exact match is null. Prior synthetic padding/master/prefix fixtures omitted actual CSV shape; earlier CI/assets delivery did NOT resolve this real USER FAIL. Bounded correction: split numeric stored barcode aliases on comma as well as existing tilde. Preserve all exact-price/key, duplicate ambiguity, partial/name/SKU guards,180/600ms completion and accepted idle focus. No rewrite of product rows or auto-choice of first search suggestion. Regression must use recovered exact row shape/SKU12237/three codes/null master and no options plus all three positions, repeated quantity, Enter/no suffix and correct4EUR cart line; keep older tests.

Publish this evidence/claim green+main before source; full exact source/main CI and guarded healthy release/served JS before owner review. Physical correction remains NOT TESTED/AWAITING LAB; no new USER/LAB/financial PASS. No accepted transaction replay. QR camera/readability/other owners and all previous PASS preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-cart.md; owner retained until acceptance/named handoff.

11/10/2026 — POS-INVOICE-CAMERA-QR-01 / ASSIGNED / NOT TESTED

Owner codex/invoice-camera-qr-20261011, branch feat/invoice-camera-qr-20261011. New independent owner-requested scope: QR scanning inside the existing camera intake for supplier New invoice/payment recognition, Basic and Premium variants. QR read/download is read-only and supplies an original provider PDF plus reviewable header; no automatic payment, supplier creation, draft approval, stock, fiscal or myDATA mutation. Existing #09 provider-original acquisition, Gate3 assistant/settlement and all presentation/permission owners remain assigned and untouched. Open-invoice payment proof is not replaced by an invoice QR.

Owner supplied a real QR and URL. Local QR decode succeeded. Read-only provider GET returned accessible HTML with invoice A-003649/09Oct2026/net432.11/VAT56.17/gross488.28 and30 lines, PDF319775bytes and myDATA XML. This is transport/sample evidence, NOT LAB/USER integration PASS. No real invoice upload/payment/draft or original-acquisition mutation occurred; real sample must not be submitted into LAB. Proposed bounded supported hosts einvoice.s1ecos.gr and einvoice.impact.gr, exact HTTPS provider URL pattern, no arbitrary URL or redirect, deadline/size caps, invoice issuer/recipient VAT and selected-company/store access guards. Unsupported/unreadable QR retains ordinary photograph/PDF fallback.

Read AGENTS/current active/tracker/pending/numbered documents, invoice/payment manuals, camera checkpoint and current main34e0799e. Preserve existing scanner/focus, original photographs/PDF, one settlement/job/draft contracts, module/licensing/roles and store scoping. Existing WORKCARD QR authentication is separate and unchanged. New camera stops on close/unmount/store changes, scans once, rejects delayed responses and leaves paid/credit/payment method for explicit operator choice. No source editing before this claim is green and merged to main.

Acceptance: physical QR → original PDF and safe reviewable fields at same selected store; no payment until existing submit, one handoff through existing dedupe, unsupported QR/photo fallback, revoked permissions/module/foreign store recipient rejection, camera cleanup/stale callback protection. Local meaningful regressions/build and exact CI required; deployed revision and physical acceptance remain NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-invoice-camera-qr.md. Owner retained until completion/named handoff.

11/10/2026 — POS-BARCODE-CART-02 / SOURCE LIVE / PHYSICAL ACCEPTANCE OPEN

Owner codex/pos-barcode-cart-20261011 retained. Idle cursor readiness POS-SCANNER-IDLE-FOCUS-01 is CLOSED owner-reported USER PASS11Oct10:26, manual/claimPR2214 green and mergedae22c750 before source. Specific5201222304692/TEREA BRONZE/SKU12227 suggestion-only photograph remains newest physical barcode USER FAIL until owner review; no universal scan or financial PASS inferred. Exact production catalog rows/suffix/physical client SHA not independently captured.

SourcePR2215 final exactheadd534a704292b99a997e1282ea6d5136597adf48c, fullCI38122198621 SUCCESS2280PASS/0FAIL/0SKIP. Merged52dc5f617c7a83254d7dc18c050aeb33544e1755; exact mainCI38122416025 SUCCESS2280/0/0, Windows checks, frontend build/contracts/invariants, native isolated PostgreSQL/archive and real HTTP E2E green. Final source/main passed first attempts. Preliminary head087dfb7 CI38121946705 failed only preexisting pos-capacity-runner offered-deadline timing assertion2278/1/0; intermediate strengthened head39e5593 CI38122056539 was CANCELLED after final catalog-code update, not a full PASS. No assertion/threshold, skipped-test bypass or workflow changed; no capacity/load acceptance inferred.

Ordinary guarded Render38122615048 SUCCESS, exact revision52dc5f617c7a83254d7dc18c050aeb33544e1755, rollback checkpoint and pinned release preserved. Independent public GET verification AFTER successful release at2026-10-11T07:52:04.434830+00:00: health ok:true/same revision. Canonical https://myworkstation-app.onrender.com/platform-admin observed scripts /assets/index-D48WsAIR.js map to actually served assets/entry-DnZKCZgm.js; JS SHA256 5447dd1b6730a0f33f86209ce47fce170be110b74e98aa534703d4a3bd85515b. Served JS verifies numeric barcode normalization, master/source-code matching with SKU fallback exclusion, complete/manual exact resolution,180ms/600ms timing and preserved scoped idle-focus lifecycle. This proves delivered source/assets, not physical scanner acceptance.

Completed bounded code: consistent unique stored numeric barcode/catalog-code resolution, imported whitespace/zero-padding/tilde aliases, exact raw option price/key precedence (including alphanumeric manual options), Enter cancel/add-once,180ms normal stable scan and600ms completed shared-prefix scan. Added digits cancel earlier candidate; no automatic name/SKU-only/partial/unknown/duplicate selection. Genuine duplicate mappings remain unchosen. Idle focus hook byte-identical; modal/edit/busy/fiscal/checkout/current-store/readiness/unmount guards, cart/add/payment/fiscal business handlers and all other owners/PASS preserved. Final local10 scanner/access/revocation regressions PASS0fail/skip and Node20 build8.57s; actual mounted synthetic plain/imported/shared-prefix/master-code-only and ambiguous-option fixtures plus price/quantity/unknown/payment/focus guards. Production rows were not fabricated or changed.

No live/LAB product/cart/sale/payment/stock/shift/fiscal/catalog/permission mutation or accepted transaction replay during diagnostics. Actual device geometry/scanner timing/ordinary5201222304692 next scan NOT TESTED by this page; financial/control deltas NOT TESTED. No new barcode manual/PASS closure. Shared checkpoint/active/tracker/pending and central PDF synchronized; owner retained until acceptance or named handoff.

Single next owner review: with no sale in progress and an empty cart, normally refresh existing POS, then observe the next ordinary scan of5201222304692/TEREA BRONZE: one cart addition without selecting suggestion, correct4.00EUR price as pictured and cursor ready afterward. Do not complete/repeat a payment just for this evidence. If still suggestion-only, retain exact time/barcode/device/suffix and visible result; resolve actual duplicate/catalog evidence without blindly adding first result or editing stock. Stable shared-prefix completion assumes no next scanner digit for600ms; slower/manual numeric typing can add a complete stored code after that interval, as documented. Physical acceptance stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-cart.md; receipt branch docs/pos-barcode-cart-live-20261011.

11/10/2026 — POS-BARCODE-CART-02 / SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Owner codex/pos-barcode-cart-20261011 retained. ClaimPR2214/headf84f58be7f5cf2d7d03fbb63026941f7037cb923/docsCI38121691535 SUCCESS/mergeae22c7502d8be4b15de700120f1e50af0ca1aa8e preceded source. Accepted idle focus is CLOSED USER PASS; its hook byte-identical. New barcode-specific physical FAIL remains OPEN; exact production catalog content for5201222304692 not independently read, so no claim of proven production root cause.

Matcher now recognizes stored numeric whitespace/zero-padding/imported tilde aliases and numeric master/source catalog codes already visible to POS search. The sourceCode fallback equal to SKU is explicitly excluded from automatic matching; names and numeric SKU-only fixtures stay manual. It retains unique-product requirement; explicit Enter shares the same barcode resolution and can use a unique SKU only when no barcode matches, avoiding first duplicate match. Exact raw barcode option has priority over normalized aliases and original stored barcode/key/price are preserved, including manual alphanumeric option pricing. Automatic name/SKU/partial/unknown selection remains prohibited. Existing180ms stable scan handles non-prefix cases; if a unique exact code also prefixes a longer stored barcode, it waits600ms with no new input. Additional digits restart/cancel the old timeout; Enter cancels it and adds once. Active input/current value/focus, modal/busy/fiscal/checkout/current-store/unmount checks retained. No add/cart/checkout/idle-focus handler business change.

Synthetic regression uses screenshot code/name, not recovered store rows: exact/imported/shared-prefix fixtures mounted through actual POS, early shared prefix stays unadded, full longer scan adds only longer item, stable shorter scan adds once, repeated quantity/barcode price, manual partial/name/unknown retained, active editing/modal/idle readiness and rejected/successful/fiscal mocked checkout guarded. Unit negatives cover normalized duplicates (including option-only Enter ambiguity), numeric SKU auto-deny and explicit SKU Enter, partials, exact-vs-padded and alphanumeric option price. Local Node20 nine scanner/access/revocation tests PASS0fail/skip; final six scanner tests after price-precedence adjustment also PASS. Fixture review then removed the clean-option escape hatch from the imported case and mounted option-only duplicate ambiguity before each normal scan; all six scanner tests PASS0fail/skip again (10.94s). Unmodified-main helper replay on synthetic imported and shared-prefix fixtures returns null in both cases; new helper/actual POS assertions pass. This is reproduced code-path evidence, not recovered production rows. Final frontend build PASS8.87s after price-precedence adjustment; text whitespace PASS. Existing pos-scanner focus hook untouched. No live/LAB cart/product/payment/stock/shift/fiscal/catalog/permission mutation or accepted transaction replay. Final source review adds mounted numeric-master-code-only fixture (without barcodeOptions/ProductBarcode) plus sourceCode-equals-SKU auto-deny. All10 scanner/access/revocation tests PASS0fail/skip and final Node20 frontend build PASS8.57s. Preliminary source head087dfb7 CI38121946705 failed only preexisting pos-capacity-runner offered-deadline timing assertion (2278/1/0); no scanner failure, assertion/threshold or workflow changed. Strengthened head39e5593 CI38122056539 was still running when final catalog-code coverage was added; final exact head must independently pass. No new USER/LAB/financial PASS or new barcode manual usage inferred.

Next exact source/main full CI then ordinary guarded Render/independent exact health plus served JS. Owner review only after release: next ordinary scan of5201222304692/TEREA BRONZE should enter cart once without selecting suggestion, leave input ready and use correct price; no payment replay solely for evidence. Prefix completion assumes scanner digits arrive within600ms; slower/manual typing of a complete stored numeric barcode can add after that stability interval, as existing auto-scan behavior. Genuine duplicate mappings still require explicit catalog resolution; never silently choose first result. Preserve readability and all other owners/PASS; assignment retained until acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-cart.md.

11/10/2026 — POS-BARCODE-CART-02 / ASSIGNED / USER FAIL; idle focus USER PASS CLOSED

Owner codex/pos-barcode-cart-20261011, source branch fix/pos-barcode-cart-20261011, independent tracker03 scan-to-cart residual. Claim time is documentation creation, not physical test time. Latest owner report11Oct10:26:25 Athens confirms cursor stays ready (bounded POS-SCANNER-IDLE-FOCUS-01 USER PASS CLOSED), but some found products remain suggestions. Photograph6356 shows selected Διαδόχου Παύλου/operator ΛΕΩΝΙΔΑΣ ΑΝΑΣΤΑΣΙΟΥ, scan5201222304692, TEREA BRONZE/SKU12227/4.00EUR, empty cart/total0.00. Physical terminal/scanner suffix and exact client SHA not captured. No stock/financial/fiscal PASS inferred. Old normal-flow10Oct USER PASS remains protected except this newly observed specific scan-to-cart failure.

Pre-change review: AGENTS, complete shared documents loaded and all scanner references/owners examined, numbered snapshot, POS manual and both10Oct/11Oct scanner checkpoints, main history through5c67b32. No overlapping barcode-cart claim. Existing automatic matcher uses raw string equality and globally suppresses an exact barcode if any longer stored barcode shares its prefix; search accepts a broader normalized substring and Enter uses a different identifier resolver. This proves code-path discrepancies, not the production catalog cause: stored rows for5201222304692 have NOT been independently read. Bounded scope: canonical numeric stored-barcode matching (trim/zero-padding/imported tilde aliases), barcode-specific price/key preserved, unique match only. Preserve early incomplete-prefix guard; after a longer stable completion interval allow an existing unique exact shorter code without selecting a search suggestion. Names/SKUs/partial/unknown and genuinely duplicated barcodes never auto-select first search row. One scan adds once; Enter cancels pending timeout; modal/editing/fiscal/store/checkout guards and confirmed idle focus retained. No new global keyboard capture or production catalog mutation.

Publish green docs claim/main merge BEFORE source. Regression fixtures use photograph code/name only as synthetic data, not recovered production catalog: padded/alias exact match, longer-prefix completed scan vs still-typing prefix, duplicate ambiguity, with/without Enter, barcode price/quantity, unknown/manual search and existing mounted focus/payment guards. Node20 build, full exact PR/main CI, ordinary guarded Render and independent health/actually served JS before owner review. Physical barcode acceptance OPEN/AWAITING LAB until reported; retain owner until acceptance or named handoff. No sale/payment/stock/shift/fiscal/permission mutations, accepted transaction replay or gate bypass. All other owners and readability assignments retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-barcode-cart.md.

11/10/2026 10:26 Athens — POS-SCANNER-IDLE-FOCUS-01 / bounded USER PASS / CLOSED

Χρήστος Μανής reports «Ο κέρσορας διορθηκε» and says it stays there. This is owner-reported physical acceptance of idle scanner readiness only, following sourcePR2212/merge67ac778538234fdc285653a9ddff880f86b7851f, full sourceCI38120172705/mainCI38120469309 SUCCESS2276/0/0, guarded Render38120641320 SUCCESS and independent exact health/served JS verification07:16:56Z. Exact physical client SHA/scanner suffix/terminal ID not independently captured. Owner codex/pos-scanner-idle-focus-20261011 completed; no repeat test/transaction. Manual, active/tracker/pending/checklist/PDF synchronize this limited acceptance. New specific barcode5201222304692/TEREA BRONZE suggestion-only USER FAIL is separately assigned POS-BARCODE-CART-02; no universal barcode/financial/stock/fiscal PASS implied. Older contrary physical-acceptance-OPEN notes are historical for idle focus only.

11/10/2026 — POS-SCANNER-IDLE-FOCUS-01 / SOURCE LIVE / PHYSICAL ACCEPTANCE OPEN

Owner codex/pos-scanner-idle-focus-20261011 retained. ClaimPR2211/head8b99b828/docsCI38119903844 SUCCESS/merge1336efdd before source; sourcePR2212 exacthead9f7301aebd9dd4d51ea37cece89299367a10a167/fullCI38120172705 SUCCESS2276PASS/0FAIL/0SKIP. Merge67ac778538234fdc285653a9ddff880f86b7851f, exact mainCI38120469309 SUCCESS2276/0/0 with Windows CAPdriver/Hikvision, client build/contracts/invariants, native isolated PostgreSQL and real HTTP E2E. No retries, skipped test bypass or workflow changes.

Guarded Render38120641320 SUCCESS, normal pinned revision67ac778538234fdc285653a9ddff880f86b7851f and preserved rollback checkpoint. Independent public GET verification AFTER successful release at2026-10-11T07:16:56.594119+00:00: health ok:true/same revision; canonical https://myworkstation-app.onrender.com/platform-admin loads /assets/index-BH84CGJB.js, whose observed asset map leads to assets/entry-BMlnLMEz.js. Actually served JS SHA256 e6f2148eaebe9e213e497b28a88a08e02a59e1ab1de8837e77c98e8a705f0e14 contains the new scoped POS pointer/click/focus/visibility lifecycle, active-editor protection and expanded external-modal/menu guard. This verifies source delivery/assets, not physical scanner acceptance.

Completed bounded utility change restores idle field focus after POS interaction and external modal removal. Existing unique complete stored numeric barcode auto-add/Enter cancellation, correct barcode-specific price/cartKey, repeated quantity and unknown/name-search behavior unchanged. No cart/add/checkout handler changed. Node20 local build9.08s and six existing/extended mounted scanner/payment-access/revocation regressions PASS, including button/background recovery, keyboard activation, input/select/textarea/contenteditable, external modal and previous scanner/rejected/fiscal cases. Current-store/readiness, busy/fiscal/hidden/detached guards and unmount cleanup preserved. No production/LAB product/cart/sale/payment/stock/shift/fiscal/catalog/permission mutation or accepted transaction replay. Earlier normal POS-SCAN-FOCUS-01 USER PASS remains CLOSED/protected, and previous font delivery plus all other owners/PASS stay intact.

Physical current store/terminal/operator/shift/scanner model/suffix/client viewport and new idle readiness are NOT TESTED; no new USER/LAB/financial PASS or manual closure inferred. Keep assignment until user acceptance or named handoff. Next single owner review: with an empty cart/no sale in progress, normally refresh the existing POS and observe readiness and automatic known-barcode addition during the next ordinary scan. Do not repeat an accepted payment or complete a transaction just for focus evidence. Record the actual observed result; if a new failure appears, retain exact store/time/barcode/suffix and avoid catalog/stock changes as a focus workaround. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-scanner-idle-focus.md; receipt branch docs/pos-scanner-idle-live-20261011. Shared active/tracker/pending and regenerated central PDF synchronized; normal PASS manual intentionally unchanged until physical acceptance.

11/10/2026 — POS-SCANNER-IDLE-FOCUS-01 / SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Owner unchanged. ClaimPR2211/head8b99b8280bdd04bcf820fc4548df2c99642846c5/docsCI38119903844 SUCCESS/merge1336efdd565003a250c9fedb67334247f425974d before source. Claim creation10:00:17Athens; its provisional10:03 heading is corrected to date-only, not a physical observation timestamp.

Only scanner utility lifecycle changes: event-driven idle refocus after completed POS click/tap, leaving an editor, external modal removal and window/visibility return. No periodic poll or global barcode keystroke capture. Current ownerDocument/ref/readiness/store checks remain; cleanup removes listeners/observer/queued task. Editing input/select/textarea/contenteditable and keyboard focus on an unactivated button remain usable; button activation/tap restores scanner afterward. Visible shift, operator menu, camera, payment/price/card dialogs block focus, including external dialogs without ARIA markup. Existing blocked/busy/fiscal/hidden/detached guards preserved. No StorePosPanel cart/add/search/checkout handler edited; exactBarcode and barcode-price/cartKey functions unchanged.

Extended actual mounted POS regression reproduces idle background/button tap loss and external shift-modal close recovery while retaining active input/select/textarea/contenteditable and keyboard button navigation. Existing known barcode with/without Enter adds once, repeated barcode price/quantity, manual/unknown search, other external input, successful mocked checkout, rejected cart/query and fiscalPending remain PASS. Six existing/extended scanner/payment-access/mounted-revocation tests PASS0fail/skip; Node20 frontend build PASS9.08s/TABLE_SERVICE verified; text whitespace PASS. Earlier proposal refocused a merely focused button; before publication revised to wait for completed interaction and regression verifies keyboard navigation preservation. Actual physical scanner/window/suffix/store/client revision NOT TESTED; old normal-flow USER PASS remains protected, no new LAB/USER PASS inferred. No production state-changing diagnostics.

Next full exact source/main CI and guarded release/independent healthy revision plus actually served scanner JS before owner review on the current POS. No financial transaction replay for focus evidence; one known product scan during ordinary use and cursor observation is sufficient for physical readiness report. Keep assignment until acceptance or named handoff; other owners and prior POS readability delivery/Gate3/Gate5/No27/No33 PASS preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-scanner-idle-focus.md.

11/10/2026 — POS-SCANNER-IDLE-FOCUS-01 / ASSIGNED / expanded owner requirement

Owner codex/pos-scanner-idle-focus-20261011, source branch fix/pos-scanner-idle-focus-20261011, independent tracker03 scanner-focus extension. User explicitly requests cursor always ready in the pictured standard Barcode/SKU/search input and automatic found-product addition. Screenshot image(20261011-065616).png observed locally; physical store/revision/scanner suffix not independently captured. Existing POS-SCAN-FOCUS-01 normal known-barcode/add/post-checkout owner-reported USER PASS10Oct08:30 remains protected and CLOSED; that owner completed, not a competing active assignment. This new request expands idle readiness after ordinary non-editing interactions.

Read AGENTS/current complete active/tracker/pending/checklist, POS scanner manual and full10Oct scanner checkpoint, current maine521c961 and scanner history. Existing exact-code add/unique full numeric180ms auto-add, repeated quantity/barcode-specific price, unknown/manual search, checkout/cart reset focus remain unchanged. Source helper currently stops observing after initial requested focus succeeds; ordinary button/background focus loss and modal-close without a new add request need new event-driven readiness. No timer that continually steals focus, no global keyboard interception. Scoped POS pointer/focus/window/visibility and modal lifecycle events restore only idle scanner; active input/select/textarea/contenteditable, dialogs, busy/fiscal state, hidden/disabled/detached input, stale store and unmounted app remain protected. No real sale/payment/stock/shift/fiscal/catalog/permission mutation or accepted transaction replay for diagnostics.

Claim green docs CI/main merge before source. Required causal actual-hook/actual-POS DOM regression for lost-focus recovery, real editing/dialog boundaries, cleanup/current readiness, existing barcode add once with/without Enter, repeated correct-price quantity, manual unknown/search and pending/rejected checkout. Node20 build and exact full source/main CI plus guarded healthy release/served JS before owner scanner observation. Physical readiness remains NOT TESTED; existing normal USER PASS is not invalidated by this expanded requirement. Assignment retained until physical acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-scanner-idle-focus.md.

11/10/2026 09:54 Athens — POS closing + open-invoice readability / SOURCE LIVE / PHYSICAL ACCEPTANCE OPEN

Same owner codex/pos-shift-close-readability-20261011 retained for both independent tracker03 presentation scopes. Closing claimPR2206/head a2463238/docsCI38118135685 SUCCESS/merge75a2f9a preceded sourcePR2207/headd0e0991867dd276d78fa4c13b3dd1790be0a1f7b/merge7a6a8b42. Closing sourceCI38118302424 attempt1 failed2275/1/0 on existing pos-capacity-runner timing assertion; unchanged failed-job retry attempt2 SUCCESS2276/0/0. Closing mainCI38118614097 attempt1 repeated that preexisting assertion failure; attempt2 passed tests/build but was CANCELLED by subsequent main claim push before final E2E completed. Do not describe that cancelled run as full main PASS or bypass the guard. No capacity assertion/threshold/workflow altered, and no capacity/load acceptance inferred.

Added user screenshot scope is Open invoices only, separate New invoice owner untouched. ClaimPR2208/head9fa9c491/docsCI38118824246 SUCCESS/merge7e6c5d85 preceded sourcePR2209/headdf68124d5e40819a86d92fbe80d6c917c43b4f17. Exact full sourceCI38118949337 SUCCESS2276PASS/0FAIL/0SKIP; merged702e2d4b5f12e655cbf03fa329269fb83b3644c4. Exact final mainCI38119152544 SUCCESS2276/0/0, Windows CAPdriver/Hikvision, build/contracts/invariants, native PostgreSQL and real HTTP E2E all green. This final revision includes BOTH closing and open-invoice changes and supplies the complete main evidence for their combined source.

Guarded Render38119337439 SUCCESS, exact healthy revision702e2d4b5f12e655cbf03fa329269fb83b3644c4 confirmed by existing guarded job at06:52:47Z. Independent public GET chain AFTER deployment completion at2026-10-11T06:54:31.235343+00:00: health ok:true/same revision; canonical https://myworkstation-app.onrender.com/platform-admin loads /assets/index-Dr71HVFk.js, whose observed asset map leads to assets/entry-BaF_1y7v.css. Actually served CSS SHA256 a88064d169443c28e85812372551ce38d746751dd88678cf28364433ff438405 includes open-invoice20px/56px fields, closing24px amounts and closing keyboard24px/56px keys. No stale-build/source-only claim. Final release uses ordinary safeguards and preserved rollback checkpoint; no manual bypass or infrastructure change.

Closing labels/instructions18px, amounts24px/min52px and larger closing-only keyboard; open-invoice supplier/date/note20px/min56px, allocations24px/min56px with responsive stacked labels/date-note grid. Local Node20 builds and existing8 closing +12 payment/proof/access/image/role regressions PASS; byte-for-byte inverse JSX proof preserves all original business handlers and permissions. Text/CSS parsing checks PASS; regenerated central PDF first-page visual QA PASS. Actual UI geometry/physical zoom/touch remains NOT TESTED; delivery/health/served assets are not USER/LAB functional PASS. No sale/payment/attachment upload/supplier/stock/fiscal/shift/permission mutation or prior accepted action replay. Existing Gate3/Gate5/No27/No33/SHIFT-QR manuals, accepted results and all other owners preserved; no new PASS/manual/numbered closure inferred.

Next single owner review: with an empty cart and no sale in progress, refresh the existing POS normally, reopen the closing form and Open invoices form, and photograph the displayed fields/keyboard as relevant. Do not close/reopen a shift or submit/upload a payment merely for geometry. Retain both assignments until physical acceptance is recorded or a named handoff is merged. Checkpoints CHECKPOINTS/CHANGES/2026-10-11-pos-shift-close-readability.md and CHECKPOINTS/CHANGES/2026-10-11-pos-open-invoice-fields.md; receipt branch docs/pos-readability-live-20261011.

11/10/2026 — POS-OPEN-INVOICE-FIELDS-01 / SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Same owner. Claim PR2208/head9fa9c491/docsCI38118824246 SUCCESS merged7e6c5d85 before source edits. Only StoreSupplierOpenInvoicePayment root gains a scoped class/CSS import: supplier/date/note labels18px, field text20px/min56px, invoice allocation24px/min56px, payment/submit choices18px/min56px, date/note side by side with single-column narrow adaptation. All content remains reachable through original modal overflow; hidden attachment inputs remain hidden and focus outlines visible. New invoice/other expenses/bank dialog layouts unchanged.

Exact inverse removal of import/class restores original JSX byte-for-byte, proving original handlers/guards/DOM order unchanged. PostCSS syntax parse and text whitespace PASS; Node20 frontend build PASS;12 existing supplier settlement/proof/access/image quality/operator payment and role regressions PASS/0fail/skip. Initial test invocation named a nonexistent role test and ran no tests; corrected to existing store-operator-role-permissions-v1 suite and all12 passed. Actual browser geometry/physical touch/zoom NOT TESTED, no LAB/USER PASS inferred. No financial/stock/shift/permission/fiscal action or accepted payment replay.

Next: exact source/main full CI and guarded release, independently refreshed exact public health/served CSS, then one owner photograph of the same Open invoices form without payment submission solely for geometry. Assignment retained until acceptance or named handoff; all Gate3/Gate5/No27/No33 and separate New invoice owners/PASS protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-open-invoice-fields.md.

11/10/2026 09:40 Athens — POS-OPEN-INVOICE-FIELDS-01 / ASSIGNED / USER readability FAIL

Owner codex/pos-shift-close-readability-20261011, branch fix/pos-open-invoice-fields-20261011; independent tracker03 presentation subtask. User expands this page scope at09:36 with screenshot image(20261011-063237).png and asks larger fields. Screenshot observed locally: Payments → Suppliers → Open invoices has tiny inline supplier/date/note fields; physical store/revision/zoom not independently captured. Main7a6a8b4 has root pos-payment-form-v3-root but larger existing field rules target pos-payment-form. New-invoice owner codex/pos-new-invoice-fields-20261011 remains separate and untouched.

Bounded scope: an open-invoices-only root class and scoped stylesheet, stacked visible labels,20px text/56px fields for supplier/date/note and allocations, responsive layout, readable payment choices. Preserve original DOM order, event handlers, disabled states, selected-store loading, cash/stale-shift guards, attachment/camera flow, one-payment idempotency and prior Gate5/Gate3/manual PASS. No invoice upload/payment/supplier/stock/fiscal/shift/permission or other production-data action for geometry; financial/business/permission owners unchanged. Read current AGENTS, complete active/tracker/pending/checklist and relevant POS/payments manuals/checkpoints and main history; no overlapping open-invoice field claim found. Actual physical readability/touch NOT TESTED; screenshot USER readability FAIL only.

Claim must be green and merged to main before source edits. Then focused existing payment/permission regressions, Node20 build, full source/main CI and guarded exact healthy deployment/served CSS, followed by one owner image without submitting payment merely for layout. Keep assignment until acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-open-invoice-fields.md.

Closing source PR2207/headd0e0991 merged7a6a8b42; PR CI38118302424 attempt2 SUCCESS2276/0/0. Main CI38118614097 attempt1 repeated preexisting pos-capacity-runner timing assertion failure2275/1/0; only failed jobs rerun normally, no assertion/workflow/source changes. Closing exact release still pending; no new LAB/USER PASS inferred.

11/10/2026 — POS-SHIFT-CLOSE-READABILITY-01 / SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Same owner codex/pos-shift-close-readability-20261011. Fresh owner approval09:25:45 explicitly covers all necessary push/merge. Claim PR2206/heada2463238/docsCI38118135685 SUCCESS merged75a2f9a before source changes. Earlier automatic publication rejection is resolved by fresh authorization; ordinary git transport subsequently lacked credentials, so the connected GitHub publication API was used. All published claim blobs matched local git hashes exactly.

Closing-only shell class plus CSS import/stylesheet: instructions/labels18px, amount entry24px with52px fields, checkbox28px with52px declaration target, title28px,52px close/submit/camera/recount controls. Larger dialog uses available viewport and fixes its two-child grid to header + scrollable body. No content/validation hidden; all mandatory labels, errors, card warning, shortage/recount options and close action remain reachable by touch. The existing body-mounted keyboard is styled only while this closing shell exists:24px/56px normal keys,20px special keys, wider900px dialog, responsive narrow keys. Keyboard JS/language/drag/focus/Enter behavior unchanged. Other shift/payment/dialog layouts retain original selectors.

Node20.20.2 frontend build PASS8.11s/TABLE_SERVICE verified; eight existing opener-card/manual-count/QR-camera/mounted-revocation regressions PASS/0FAIL/0SKIP. Initial baseline missing-jsdom startup failures resolved by standard local ignore-scripts dependency installation; no package/lockfile change included. Exact inverse removal of the one import and class restores StoreOperatorApp byte-for-byte, proving all business handlers/permissions unchanged. PostCSS parsing and git diff whitespace PASS. No implementation-mirroring tests introduced. Source build/regressions are not physical USER/LAB PASS; actual visual geometry/device zoom/touch remains NOT TESTED. No sale/payment/QR credential/shift/stock/permission/fiscal mutation or prior closure replay.

Required next: exact full PR/main CI, existing guarded Render release, independently refreshed exact public health/served stylesheet. Then one final photograph of the same Διαδόχου Παύλου closing form after normal refresh, without closing/reopening a shift just for geometry. Prior05Oct QR/recount/shortage,10Oct card/count and mounted permission PASS retained; No33/SHIFT-QR and all other owners/PASS unchanged. Keep assignment until physical acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-shift-close-readability.md.

11/10/2026 09:18 Europe/Athens — POS-SHIFT-CLOSE-READABILITY-01 / ASSIGNED / USER readability FAIL

Owner codex/pos-shift-close-readability-20261011, implementation branch fix/pos-shift-close-readability-20261011. Independent tracker03 presentation subtask: enlarge only Store Mode closing-form text, amounts and touch controls, and the displayed keyboard typography. No33/tracker35 and SHIFT-QR financial/permission/card/QR owners retain all business acceptance; opening layout, invoice/product dialogs, DAILY BITE and server/session work remain with their existing owners.

User supplied inline photographs6354/6355 of physical Διαδόχου Παύλου closing dialog, then explicitly said «ξεκινα την διορθωση» at09:18. Labels/amounts/instructions are undersized; physical revision, viewport and zoom NOT CAPTURED. No transaction or physical touch PASS inferred. Source main149ca1cc: shared cash-form labels/amount text13px; current keyboard letter keys19px, language/special keys12–15px. Bounded correction: closing-only shell/form classes and stylesheet; labels/instructions18px, values24px, >=52px controls, larger header and readable checkbox declaration. Preserve all form/scan/shortage/recount/submit handlers, masking and disabled states. Enlarge existing keyboard via presentation CSS only, keeping its language/key/focus/drag/Enter behavior and narrow-view overflow safety.

Pre-change evidence:05Oct ownQR/camera/recount/forced-shortage bounded PASS and10Oct personal-card/count USER PASS plus mounted CLOSE deny/restore LIVE PASS protected; wider financial/device/registered foreign/revoked QR acceptance remains OPEN with existing owner. Current readability USER FAIL is distinct. Complete shared documents scanned for claims/evidence; current numbered checklist, POS manual, relevant05Oct/08Oct/10Oct checkpoints and main history examined; no overlapping new closing-font assignment found. No new LAB or production state change authorized or needed for layout verification.

Required: publish claim on main before source editing, isolated actual-form geometry/readability where available, existing card/manual-count/QR/mounted-revocation regression tests, Node20 frontend build, exact full PR/main CI and existing guarded release. Then one physical final photo after normal refresh, without closing/reopening a shift solely for geometry. AWAITING IMPLEMENTATION; no new USER/LAB/LIVE PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-shift-close-readability.md. Owner retained until physical acceptance or named handoff.

11/10/2026 — POS-NEW-INVOICE-FIELDS-01 / SHORT DESKTOP LAYOUT / AWAITING CI

Same owner. Additional presentation-only adaptation for desktop width>=900px and available height<=700px: compact top navigation/header, remove only the duplicate module banner (left document explanation retained),52px field/paid/credit/submit targets, and display supplier/type side by side when the new-supplier panel is absent. Keeps original DOM order and handlers, all options and existing overflow safety. This addresses reduced desktop space while retaining large lower fields; exact physical no-scroll geometry remains NOT TESTED. Prior90 focused regressions and byte-for-byte handler preservation remain protected; full exact-head CI/deploy and owner photo required. No state-changing LAB or financial action.

11/10/2026 — POS-NEW-INVOICE-FIELDS-01 / CI FIXTURE COMPATIBILITY / AWAITING FULL CI

Owner unchanged. Source PR2205 first headc7bca1570a3de6b0ccebd479ad8b2bf416b95f5f / CI38115790579 failed2272PASS/4FAIL/0SKIP of2276 tests. All four failures were the existing paid-reread VM fixture: its submit-handler extraction searched for a closing quote immediately after the original root CSS class, so additive presentation classes caused the fixture to include JSX and throw Illegal return statement. Application build itself passed; no application payment failure or LAB PASS inferred.

Corrected only that fixture's extraction boundary to accept additive classes and added an explicit valid-boundary assertion. All existing cancel/confirm/same-payment/credit-note/no-cash-write expectations remain unchanged. No workflow bypass, skipped test or financial guard change. Additional paid-reread/multipage/quality/archive regressions58/58PASS; together with prior32,90 focused regressions PASS/0fail/skip. Full CI on the new exact head still required.

Cloud Chrome Store Mode opened only the observed existing ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ link and displayed the normal personal PIN login; no credential entry, role/session change, payment or supplier/stock/shift mutation. Actual modal geometry remains NOT TESTED; no request to replay paid invoices or new upload. Retain full-window/no-normal-desktop-scroll acceptance OPEN until exact deployment and one owner photo. No27/No33/Gate3/Gate5 and product-dialog scope stay protected.

11/10/2026 — POS-NEW-INVOICE-FIELDS-01 / SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Same owner codex/pos-new-invoice-fields-20261011. Claim PR2204/head195eb99cf2f165f16548f6942d2938fa0f3f9d25/docsCI38115490314 SUCCESS mergedd67d9058749c15acb6026d386f4b68034823004b before source edits. Owner's no-scroll correction supersedes the earlier scrolling proposal: the New invoice window occupies the available viewport minus8px each side; upload/status is left and invoice fields/payment choices right. Both Basic/Premium use scoped presentation wrappers and reference grid; other payment flows keep their existing layout.

Labels16–17px, input text18–20px, fields/payment/submit controls56px and payment-source choices52px. Supplier, amount, invoice number/date, document type, paid/credit choices and source/submit remain in original DOM order with the same event handlers, disabled conditions and permissions. Scoped higher-specificity modal rules survive the shared stylesheet order. Original overflow safety is retained; the design targets all normal desktop lower controls visible without a scrolling requirement, not forced hiding of additional content. Expanded new-supplier, five-page upload, camera, unusually long warnings, very short/narrow viewports and physical zoom geometry remain NOT TESTED; no clipped-content or all-device claim inferred.

Node20 frontend build PASS;32 existing invoice durable handoff/duplicate/tolerance and operator payment/role regression tests PASS,0fail/skip. Exact inverse removal of presentation additions restores all three original JSX files byte-for-byte, proving handlers/guards unchanged. Text diff check PASS. No new implementation-mirroring test for this reversible layout change. No browser/payment/AI/draft/supplier/stock/fiscal/shift mutation or historical payment replay. CI/local source evidence is not LAB/USER PASS; previous Gate3/Gate5 manuals, No27/No33 and other owners/PASS unchanged.

Required next: full PR and exact main CI, guarded exact deployment + independently refreshed public health/served CSS, then one owner photograph of the larger New invoice window on Διαδόχου Παύλου with readable lower fields and no scrolling needed. Do not upload/pay/submit only for layout acceptance. Prior product-actions acceptance remains separately OPEN because the first photo has no open product dialog. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-new-invoice-fields.md; retain assignment until actual acceptance or named handoff.

11/10/2026 08:39 Athens — POS-NEW-INVOICE-FIELDS-01 / ASSIGNED / USER readability FAIL

Owner codex/pos-new-invoice-fields-20261011; branch fix/pos-new-invoice-fields-20261011. Independent installation tracker03 presentation subtask: only the lower fields and payment choices of POS Payments → Suppliers → New invoice, in both Premium and Basic variants. Existing Gate3/Gate5 PASS, No27 business acceptance, No33/tracker35 permissions owner, invoice-assistant/catalog owners and all other assignments are preserved.

Owner identifies first photo image-1791696843722.jpg as the physical Διαδόχου Παύλου POS and requests larger lower new-invoice fields in second photo image-1791696872217.jpg. Images observed inline; provided scratch paths unavailable. Exact physical revision/viewport/zoom not captured. First photo shows an empty cart and no product-actions dialog, so prior POS-PRODUCT-ACTIONS-LAYOUT-01 acceptance remains OPEN, not inferred PASS.

Source baseline main43dba291: both invoice variants use pos-payment-form-v3-root, while large input/label rules target pos-payment-form; lower fields therefore use undersized browser defaults. Intended bounded correction: scoped invoice-field CSS, 20px entry text/56px touch fields, visible labels, larger payment choices and a responsive amount/number/date grid. Owner correction at08:37Athens explicitly requires a larger window without scrolling. Use nearly full available desktop viewport and a two-column document/form layout; keep the close control, original handlers/order/disabled/permissions, hidden file controls, one-payment/one-draft identities and tenant/fiscal/stock gates.

Read current AGENTS, active/tracker/pending/numbered, invoice/payment manuals and relevant viewport/Gate3/payment/permission checkpoints; newest accepted assistant Gate3 and payments Gate5 remain protected. Main history since previous verified8f5b7ac contains only this page's three product-dialog PRs2201/2202/2203; no competing lower-form claim found. No payment/invoice upload, draft, supplier, stock, fiscal, shift, permission or production data mutation for geometry. Physical readable/touch acceptance NOT TESTED. Claim must merge with green docs CI before source edits; then full source/main CI and exact guarded healthy deployment before one owner confirmation photo. Assignment retained until acceptance or named handoff.

Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-new-invoice-fields.md. Next action: publish revised no-scroll claim, implement scoped presentation change and validate safely without submitting a payment.

11/10/2026 08:26 Athens — POS-PRODUCT-ACTIONS-LAYOUT-01 / SOURCE LIVE / PHYSICAL ACCEPTANCE OPEN

Owner codex/pos-product-actions-layout-20261011 retained. Source PR2202 exact head36099a9efb764d0d330ea759b61d77e7930700ce/full CI38114225332 SUCCESS:2276tests/2276PASS/0FAIL/0SKIP, build/Windows/invariants/isolated PostgreSQL and real HTTP E2E green. Merge3d8cf2a73c9be6a94d3f21e4df5163ac866ce00e. Exact main CI38114387812 attempt2 SUCCESS, same2276/2276/0/0; attempt1 failed before checkout at Docker Hub pull with toomanyrequests: Data limit exceeded, then only failed jobs rerun through the normal GitHub action. No workflow/guard change or bypass.

Guarded Render38114614541 SUCCESS; exact healthy revision3d8cf2a independently confirmed by its existing public health check at05:25:45Z/08:25:45Athens and fresh cloud-browser /api/health after deployment completion. Newly reloaded canonical Platform Admin loads assets/entry-DhvZbP-m.css; the actually served stylesheet contains the bounded scrolling body, touch pan-y, three fact columns and wrapping rules. A premature health reload was initially rejected by automatic review because deployment completion was not yet confirmed; no workaround was used. After the exact-revision deployment prerequisite succeeded, the normal reload was permitted and independently verified.

This is completed source delivery and asset verification, not geometric or functional USER/LAB PASS. Real physical viewport/zoom/touch/all-permitted-options acceptance remains OPEN; no live local-cart addition, return/VOID/exchange/sale/payment/stock/shift, permission or fiscal submission. Previous return/manual PASS and No33/tracker35 plus all other owners stay intact. Manual/numbered PASS claims intentionally unchanged.

Next single action for the owner: with an empty cart, refresh the existing POS normally, reopen the product-actions dialog and provide one final photograph showing its available choices; touch scroll within the dialog if needed, without submitting a return merely for geometry. Retain this assignment until that observation is recorded or a named handoff is merged. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-product-actions-layout.md; receipt branch docs/pos-product-actions-live-20261011.

11/10/2026 — POS-PRODUCT-ACTIONS-LAYOUT-01 / SOURCE READY / AWAITING CI + PHYSICAL ACCEPTANCE

Same independent owner codex/pos-product-actions-layout-20261011, branch fix/pos-product-actions-layout-20261011; claim PR2201/head8624ed1e/docs checks green/merged13cd0004 before source edits. Only StorePosPanel stylesheet import and one body wrapper plus scoped product-dialog CSS. Header remains outside the scrollable body; six product facts use explicit contrast, bounded columns and long-value wrapping; original four actions/order/handlers and runtime permission selectors remain byte-for-byte identical after removing the presentation additions. Body uses vertical touch scrolling, narrow view uses two fact columns and one action column. Other dialogs, permission/return/fiscal/business logic unchanged.

Node20.20.2: frontend build PASS; existing focused scanner, label/tenant, operator role/price/mounted revocation and return authorization/items/payment/integrity regressions24/24PASS/0FAIL/0SKIP. Exact source comparison confirms no business handler/fact/action/permission change; text diff check PASS. No new implementation-mirroring test added for this reversible CSS change. Browser geometry NOT TESTED: isolated data-URL fixture was rejected by the cloud browser protocol policy before navigation; no alternate route or bypass attempted. No live credential, permission, sale/return/payment/stock/shift mutation.

Full PR/main CI, guarded exact live revision, loaded CSS verification and physical ordinary-zoom dialog inspection still required. This is AWAITING LAB, not USER/LAB/LIVE PASS. Original photograph USER FAIL remains open until the owner verifies all permitted options visible/reachable by touch. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-product-actions-layout.md; No33/tracker35 and all other owners/PASS retained. Single next action: exact source CI/release, then one final physical photo without completing a return.

11/10/2026 — POS-PRODUCT-ACTIONS-LAYOUT-01 / ASSIGNED / USER FAIL, geometry acceptance OPEN

Owner codex/pos-product-actions-layout-20261011; branch fix/pos-product-actions-layout-20261011. Independent presentation subtask of installation tracker03: only the product-actions dialog opened by tapping a cart item (including entry to returns). No33/tracker35 owner and permissions/return transaction acceptance remain unchanged; scanner, fiscal, shift, catalog/DAILY, server/session and all other assignments/PASS preserved.

Owner supplied photograph image-1791695113014.jpg at11Oct08:06Athens and reported missing options when tapping the item in returns. USER FAIL for visible completeness; exact physical client revision/viewport/zoom and enabled operator permissions NOT CAPTURED. Photo labels are partly obscured by glare; do not infer an authorization defect or missing business action. Source baseline main8f5b7ac: the dialog has three direct children (header, product facts, actions), but inherits only two explicit grid rows auto minmax(0,1fr) and hidden overflow. Product facts have no dedicated layout/wrapping rules. This is a bounded source layout defect; isolated browser geometry NOT TESTED yet.

Intended correction: scope a header plus one scrollable body to this dialog, render six facts with wrapping and explicit contrast, retain original four action buttons/order/handlers and existing runtime permission selectors. Touch scrolling and close control must remain reachable at1024x600/1280x720/1366x768, enlarged text and narrow screens; no zoom workaround. No production data, permissions, return/VOID/exchange, sale/payment/stock/shift or fiscal submission. Preserve earlier return/manual PASS without repeating transactions.

Required completion: full green PR/main CI and guarded exact deployment; then non-transactional physical inspection of the dialog at ordinary zoom with all permitted options readable/reachable. Local/source or CI alone is AWAITING LAB, never physical PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-product-actions-layout.md. Claim must merge before source edit. Assignment retained until actual acceptance or named handoff.

11 Oct 2026 06:42 Athens — SESSION-RECOVERY-STORE-RESET-01 / SOURCE LIVE / TRAFFIC + NAMED-SESSION ACCEPTANCE OPEN

Owner remains codex/server-check-20261011, source branch fix/backoffice-recovery-store-reset-20261011; final receiving/handoff receipt branch docs/backoffice-recovery-live-receipt-20261011. Bounded explicit-login workspace reset is implemented and deployed. Other BACKOFFICE-SESSION-01 acceptance/residuals remain with codex/backoffice-session-boundary-20261010; attribution, No33/Platform, N40/N51, VOICE/DAILY and prior PASS owners remain protected. No unowned interval or parallel reassignment.

Source PR2199 final head af037effcbc319fcfd2b21bb3cc8de7aeada31cb; exact PR CI38108627744 SUCCESS, 2276tests/2276PASS/0FAIL/0SKIP plus isolated PostgreSQL archive import and real HTTP E2E. Merged 044b9b23d7b826495760d38429c3e0e8c9370714; exact main CI38108862953 SUCCESS, same2276/2276/0/0 and all full build/invariants/E2E jobs success. Guarded deploy38109033756 SUCCESS: full-CI/freshness guard, previous healthy revision586900d8961a212adeff5d13b05abdca345bdb92 rollback artifact, pinned hook and exact healthy revision confirmed. Render deploy dep-db5g9ilckfvc73a41l00 LIVE at06:40:23 Athens; public /api/health independently returned200/oktrue/version0.22.0+kat-test-pos/revision044b9b23 at06:40. Source/main/production agree. No manual deploy/restart or production business mutation.

Production incident remains OPEN: new instance srv-d9isenfavr4c73bdh52g-7n89q first complete diagnostic window06:40:29.474–06:41:29.529 Athens contains271 authenticated OWNER/BACKOFFICE_USER GET404, overflow0, only LAB/DAILY requested stores under pilot-company: LAB cloud42/transactions94; DAILY cloud40/transactions95. This proves wrong-company traffic continues after release; it does not identify the physical caller, browser asset version, or establish the reset defect as the source of every live404. During rollout the retired instance also emitted an overlapping old window; it is excluded from the new-instance count. New instance06:42 CPU6.11% of1CPU, RAM146001920bytes/2GiB (~6.8%), healthy. No evidence warrants relaxing tenant isolation or revoking sessions.

Actual named-session recovery on a real LAB browser and old-client cessation are NOT TESTED/OPEN; local/CI checks are not LAB PASS and no manuals/numbered claims are closed. Prepared cloud browser displays only a fresh Backoffice sign-in screen, with no authenticated offending LAB/DAILY tabs; credentials were neither inspected nor submitted. Single next action: identify and reload the actual LAB/DAILY caller tabs/devices, explicitly sign in to the intended company and select its own store, then capture the loaded revision/asset and a fresh read-only recovery/diagnostic window. If wrong-company polling persists on that verified current client, retain this owner and send exact new FAIL evidence to the central session owner before further source changes. Do not infer that all current traffic is an old asset, clear other tabs' credentials, revoke sessions, repeat business operations or weaken server guards. This source delivery is complete; incident/functional acceptance stays assigned OPEN pending access to the real client.

11 Oct 2026 — final source refinement / AWAITING EXACT CI + LIVE

The same explicit-login reset also removes the per-tab pending ownerSelectedStoreId. A newly extended actual mounted regression first reproduced a same-company automatic old-store reopening despite the App-state reset; after clearing that single pending selection only on accepted login, same-company/different-company cases both PASS. Rejected and superseded login retain the pending selection; ordinary owner-company selection/reload and MFA flow remain unchanged. Final focused Node20 suite51/51 PASS/0FAIL/0SKIP, production build PASS, final local server suite2269tests/2253PASS/0FAIL/16isolated-PostgreSQLskips. This supersedes the preliminary source head5e721ff for final exact CI; actual named-session acceptance and post-release traffic cessation remain OPEN, no manual/numbered PASS closure.

11 Oct 2026 — SESSION-RECOVERY-STORE-RESET-01 / source prepared / AWAITING FULL CI + LIVE

Receiving task codex/server-check-20261011, branch fix/backoffice-recovery-store-reset-20261011, bounded explicit-login reset only. Claim PR2198/head86e4ce031a95b33637265f27e5fe22bc84cfc393/docsCI38108223556 SUCCESS merged9269ce2e714afdd9f7c7a0aa4e9bed5d66a900aa before production source edit. Original central owner retains other BACKOFFICE-SESSION-01 residuals; other owners/PASS preserved.

The existing successful Login callback now clears the previous App-owned workspace before installing the accepted user. A fresh dashboard replaces the former store/chat/workforce selection and listings/data. Login/MFA/API/server guards unchanged; rejected, pending or superseded authentication cannot reach this callback. Same-session credential renewal and ordinary refresh do not invoke the reset. Actual App/unchanged StoreCloudPage regression now exercises same-company and different-company recovery: no overview request or polling before explicit own-store selection, then every overview uses only the new company's own store. Original stale callback, rejected/superseded login, healthy renewal and current401 stop assertions remain.

Node20.20.2 focused51/51 PASS/0FAIL/0SKIP. Prepared local full server suite2269tests/2253PASS/0FAIL/16isolated-PostgreSQLskips; production client/server build PASS (client8.51s/TABLE_SERVICE verified, Prisma client generation only). Unrelated build-generated kiosk-reports-audit.js mutation restored and excluded. New final exact PR/main full CI must exercise isolated PostgreSQL and real HTTP E2E with no skips, followed by existing guarded Render release and exact health revision. Local/CI is not LIVE/LAB acceptance and does not prove cessation of old-client traffic. No new business action, fiscal/stock/permission/schema/configuration/restart/manual deploy or credential inspection. No manual/numbered PASS closure; fresh named-session read-only acceptance and bounded post-release attribution remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-backoffice-recovery-store-reset.md.

11 Oct 2026 — SESSION-RECOVERY-STORE-RESET-01 / bounded continuation / ASSIGNED

User explicitly requested the server correction at 06:18 Athens after fresh read-only attribution. Receiving task codex/server-check-20261011, implementation branch fix/backoffice-recovery-store-reset-20261011: ΑΝΑΛΗΨΗ ΑΠΟ codex/backoffice-session-boundary-20261010 only for the newly reproduced explicit-login workspace reset subtask. Existing central BACKOFFICE-SESSION-01 owner retains every other acceptance/residual; PRODUCTION-404-ATTRIBUTION-01, N40, N51, No33/Platform, VOICE, DAILY and prior PASS remain assigned/protected. No open central source PR found; latest common main ca0400e, released application 586900d8961a212adeff5d13b05abdca345bdb92. This claim must merge green before production source edits.

Fresh production 06:08:29–06:16:30 Athens: eight bounded diagnostic rollups, 2693 authenticated GET404, only LAB and DAILY requested store IDs with company pilot-company, overflow0. Verified both stores actually belong to their own other companies; active Diadoxou belongs to its correct company and is absent from this bounded two-route sample. Neither physical caller nor client asset version is established. Database available, no locks/idle transactions; successful backup06:01. No business operation, session revocation, credential inspection, schema/configuration/restart/manual deploy.

LOCAL FAIL independently reproduced with the actual mounted main.jsx App and unchanged StoreCloudPage on Node20.20.2, synthetic authentication/fetch/storage only: after invalidation and explicit successful new-company login, the old selected store is still mounted and its three polling timers restart, even though the new company's /api/stores response contains only store-B. Existing boundary protects credential replacement during an active view but App-owned selections/data survive the explicit Login transition. This is a verified source defect and a candidate mechanism; it does not prove the exact physical source of every live404.

Bounded correction: reset previous App workspace on explicit successful login before rendering the new authenticated view: selected store/chat/workforce target, company/store listings, dashboard/license/schedule/employee/leave data and page state. Denied, MFA-pending, malformed and superseded login responses must not reset anything or write credentials. Preserve same-session renewal, same-company refresh, support exit and all current server tenant/role/module/fiscal gates. No automatic login, shared-storage clearing, session revocation, store/company reassignment, API guard relaxation or generic404 logout. No changes to StoreCloudPage, PlatformAdminApp, N40/VOICE/DAILY implementations.

Required regression: actual App recovery from company-A store-A into company-B must never issue a store-A request with company-B credentials, and must start no store polling until explicit own-store selection. Same-company recovery also starts a fresh own-company dashboard, then explicit reopening polls normally. Protect rejection/MFA/supersession, token renewal, old in-flight response disposal and current401 stop behavior. Full exact PR/main CI and guarded healthy deployment required; actual named-session read-only acceptance and live wrong-company traffic cessation remain OPEN/NOT TESTED. No manual or numbered PASS closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-backoffice-recovery-store-reset.md.

10/10/2026 περίπου 23:53–23:57 Αθήνα — No33: Full Backoffice και επιστροφή και στα έξι καταστήματα, περιορισμένο LIVE PASS

Owner codex/operator-checkbox-audit-20261009, No33/tracker35 OPEN. Μετά το πλήρες main CI38085014049 (2274/0/0), guarded Render38085253808 SUCCESS και ανεξάρτητο browser health ok:true/revision586900d8961a212adeff5d13b05abdca345bdb92, η ανανεωμένη Platform Admin οθόνη διατήρησε τη σύνδεση. Από την πραγματική επιλογή εταιρείας/καταστήματος, Full Backoffice και κανονική Επιστροφή στο Super Admin πέτυχαν διαδοχικά για κύριο LAB, DAILY BITE, Διαδόχου Παύλου, KAT, N40 CONTROL και εργαστήριο ετικέτας. Κάθε οθόνη έδειξε τη σωστή εταιρεία και κατάστημα, χωρίς εμφανές 401/404 ή session denial. Κύριο LAB MAIN11/4€, card0/IRIS0/expense0/IN0.10/OUT0.10, control2/0€· τα άλλα πέντε έδειξαν καμία ανοιχτή βάρδια. Δεν έγινε οικονομική, stock, shift ή permission υποβολή. Τα support-entry/exit δημιουργούν μόνο την κανονική καταγραφή πρόσβασης· raw Audit IDs δεν μετρήθηκαν.

Υπερκαλύπτεται το συγκεκριμένο παλιό blocker PR2186 για αυτή τη νέα support-entry παρατήρηση και το προηγούμενο NOT TESTED Full Backoffice του PR2195. Η αιτία όλων των συνεχών server401/404, ordinary Owner/EMPLOYEE πρόσβαση σε κάθε κατάστημα, ανεξάρτητη client-asset attestation, ελεγχόμενος LIVE delayed-callback/renewal αγώνας και πλήρες No33 παραμένουν OPEN. Δεν μεταβάλλεται η ανάθεση ή η αποδοχή των κεντρικών MFA/N40/N51/404 owners. Οι μήτρες, Store Mode είσοδοι και readiness metadata των έξι καταστημάτων παραμένουν τα περιορισμένα αποτελέσματα του PR2195· οι εκκρεμότητες εγκατάστασης δεν διορθώθηκαν με ψευδή checkbox PASS. Προσωπική κάρτα/QR και καταμέτρηση USER PASS δεν επαναλαμβάνονται.

Checkpoint CHECKPOINTS/CHANGES/2026-10-10-operator-all-store-access.md, source receipt CHECKPOINTS/CHANGES/2026-10-10-platform-late-auth.md, manuals docs/manual/pos/PASS.md και docs/manual/super-admin/PASS.md. Επόμενο για No33: επαλήθευση αρχικού LAB POS2 EMPLOYEE προφίλ πριν από οποιαδήποτε προσωρινή μεταβολή και ένα μόνο ανεξάρτητο υπολειπόμενο σκέλος. Για server errors απαιτείται φρέσκο post-release τεκμήριο από τον υπάρχοντα υπεύθυνο attribution, όχι συμπέρασμα από την επιτυχημένη δική μας οθόνη.

10/10/2026 — No33 όλα τα καταστήματα: περιορισμένο LIVE UI, συνολικά OPEN

Ίδιος owner codex/operator-checkbox-audit-20261009. Η νέα ασφαλής σύνδεση Platform Admin και 2FA πέτυχε. Άνοιξαν η μήτρα δικαιωμάτων και η σωστή φόρμα Store Mode και στα έξι καταστήματα των τεσσάρων εταιρειών: DAILY BITE, Διαδόχου Παύλου, KAT, N40 CONTROL, εργαστήριο ετικέτας και Εργαστήριο Δοκιμών. Δεν εμφανίστηκε 401/404 στις συγκεκριμένες προβολές. Στα DAILY BITE, N40 και εργαστήριο ετικέτας δεν εμφανίστηκε ενεργό προσωπικό PIN. Δεν έγιναν αλλαγές ή πραγματικές συναλλαγές. Αυτό δεν αποδεικνύει authenticated POS, λειτουργία κάθε module/ρόλου ή επίλυση των συνεχών server 401/404. Backoffice, βάρδιες, ταμεία και αποδοχή μετά το deploy παραμένουν NOT TESTED. Παρατηρημένο health πριν το νέο deploy: ok:true / revision196dd62a. PR2192 merged50dfaff με πλήρες PR CI2252/0/0, αλλά mainCI38084456319 απέτυχε στην policy λόγω απουσίας active-list diff. Η συμπλήρωση PR2193 πέρασε το πλήρες PR CI38084694913 και merged02c809ea. Το mainCI38084931212 ακυρώθηκε από νεότερο main586900d που περιλαμβάνει τη διόρθωση. Πλήρες main CI38085014049 SUCCESS. Guarded deploy38085253808 σε εξέλιξη· exact health και πραγματική αποδοχή παραμένουν εκκρεμή.

Checkpoint CHECKPOINTS/CHANGES/2026-10-10-operator-all-store-access.md, manual docs/manual/pos/PASS.md. No33/tracker35 OPEN. Όλες οι ανεξάρτητες αναθέσεις και τα παλιά PASS προστατεύονται.

Προσθήκη 23:48–23:49: πραγματική Ετοιμότητα και στα έξι καταστήματα· υποχρεωτικές εκκρεμότητες 9/6/3/9/9/5 αντίστοιχα. Κανένα checkbox, backup, ορισμός υπευθύνου ή αποθήκευση. Το κύριο LAB έχει ήδη ανοιχτή βάρδια· δεν επαναλαμβάνεται άνοιγμα. Αυτά είναι αποθηκευμένα στοιχεία προετοιμασίας, όχι νέα πλήρη readiness PASS ή ακύρωση των USER PASS.

10/10/2026 — No33 / PLATFORM-LATE-AUTH-01: ASSIGNED, NOT TESTED LIVE

Owner codex/operator-checkbox-audit-20261009; implementation branch codex/operator-auth-loss-fix-20261010. User23:24 Athens requested resolution of the No33 session blocker. Independent PlatformAdminApp overview-load callback ownership only; central main.jsx/Login/Backoffice boundary remains with codex/backoffice-session-boundary-20261010; no N51/N40 source takeover.

Current main13a6cf7. PR2186 records successful secure Platform Admin password+2FA then missing authorization when opening LAB support; root cause in that production attempt remains UNKNOWN. Independent fixture-only execution of actual extracted PlatformAdminApp.load reproduces: old overview rejects after token replacement with a new login, unconditional clearSession removes the new credential. This is local causal failure of stale callback handling, not production attribution or LIVE PASS. No production token or secret inspected.

Bounded intended correction: only current overview load and unchanged authentication context may apply results/errors or clear the current session. Late responses after login/support-context replacement or newer load are discarded; every request still uses current credentials and existing server guards. Preserve current-session auth rejection, ordinary errors, owner/support transition and prior No33 PASS. Do not alter central main.jsx, MFA/login, server authorization, POS, roles/modules, fiscal/business data or other owners.

Required meaningful regression: actual extracted callback with late401 after credential change must preserve new context; older successful load must not overwrite newer results; current auth failure retains safe logout; ordinary error does not clear credentials. Full CI/exact guarded deploy then actual secure-login/healthy overview/support-entry read-only acceptance. Until then AWAITING LAB; No33 OPEN. No new business action or repeat transactions. Single next action: publish this claim green/main before source edit.

10/10/2026 — No33 συνέχεια: είσοδος POS, εμπόδιο πρόσβασης Backoffice

Owner codex/operator-checkbox-audit-20261009, No33/tracker35 OPEN. Main πριν τη συνέχεια f62558d3d3db7335570281003e658ffc01295a23 / PR2183: προσωπική κάρτα/QR και καταμέτρηση USER PASS, δεν επαναλαμβάνονται.

Νέο browser στη σωστή διεύθυνση https://myworkstation-app.onrender.com/platform-admin. Αρχικά Platform Admin συνδεδεμένο· LAB Store Mode ζήτησε είσοδο. Ασφαλής φόρμα PIN ολοκληρώθηκε και νέα AX επιβεβαίωσε LAB POS2 συνδεδεμένο, κατάστημα ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, καλάθι0€/ουρά0, κατάλογο97. Άνοιξαν μόνο οι δύο αναζητήσεις πελάτη χωρίς πληκτρολόγηση, επιλογή πελάτη ή submit· τελικά έκλεισαν. Δεν αποτελεί νέο functional/customer-search PASS.

Backoffice αρχικά εμφάνισε MAIN11/cash4/cardIRIS0/total4/expense0/IN.10OUT.10 και controlLAB-POS-02count2/cash0/cardIRIS0/total0. Δεν επιλέχθηκε νέο control για φρέσκα αναλυτικά expense ούτε μετρήθηκε νέο Audit. Στην εμπορική λειτουργία αποσύρθηκε η προηγούμενη προβολή με «Η σύνδεση άλλαξε». Το εμπορικό overlay έδειξε άλλο default store N40 CONTROL· δεν έγινε καμία επιλογή/μεταβολή εκεί.

Έγινε επιστροφή canonicalPlatformAdmin, ασφαλής σύνδεση email/password/device και 2FA. AX επιβεβαίωσε συνδεδεμένο SuperAdmin. Όμως το άνοιγμα ΠλήρεςBackoffice του σωστού LAB εμφάνισε «Απαιτείται σύνδεση». Μία ανανέωση canonicalURL επέστρεψε στην είσοδο. Αιτία απώλειας συνεδρίας UNKNOWN: δεν χαρακτηρίζεται βλάβη checkbox, bot block ή αποτυχία κωδικού. Δεν παρακάμφθηκε η ασφάλεια και δεν επαναλαμβάνονται κωδικοί σε κύκλο.

Το αρχικό αίτημα ασφαλούς φόρμας απορρίφθηκε αυτόματα επειδή παρέλειπε το υποχρεωτικό όνομα συσκευής. Διορθώθηκε με επαληθευμένο text/required πεδίο και η πλήρης φόρμα/2FA υποβλήθηκαν επιτυχώς· η αρχική απόρριψη δεν παραμένει blocker. Δεν καταγράφηκαν secret values.

Δεν ανοίχτηκε editor χειριστή: αρχικό προφίλ δεν επαληθεύτηκε εκ νέου και δεν έγινε καμία αλλαγή δικαιωμάτων/ρόλου, οικονομική/stock/shift πράξη ή επανάληψη παλιάς συναλλαγής. Τελικό POS

cart0/queue0/nooverlay· τελευταίο ήδη επαληθευμένο αρχικό23 EMPLOYEE από PR2125 διατηρείται ως ιστορικό, όχι νέα ανεξάρτητη επιβεβαίωση. Exact deployment revision NOT TESTED αυτή τη συνέχεια. Screenshot CHECKPOINTS/EVIDENCE/operator-session-resume-20261010/cart0.jpg.

Επόμενο βήμα: αποκατάσταση σταθερής έγκυρης πρόσβασης στο LAB Backoffice μέσω κανονικής ασφαλούς σύνδεσης, χωρίς παράκαμψη του ορίου συνεδρίας ή αλλαγή credentials, έπειτα read-only επαλήθευση αρχικού προφίλ και φρέσκα baselines πριν από επόμενο ανεξάρτητο checkbox test. Τα προηγούμενα LIVE/USER PASS προστατεύονται. No39/τιμολόγια/scanner/ρέστα/άλλοι owners εκτός scope. Γενική έγκριση αναγκαίων εικονικών δοκιμών και push/PR/merge/CI παραμένει.

10/10/2026 22:49 Athens - VOICE-ASSISTANT-01 / tracker32: normal Owner product/date question LIMITED LIVE PASS

Owner remains codex/unified-voice-assistant-20261010; source branch feat/voice-owner-product-sales-20261010 / PR2167 / merge dece8453 / PR/main fullCI38075261178+38075499712 SUCCESS (2216/0/0). Current source health before Ask: actual public browser ok=true/exact 69456df3b48cdad35acee6d4b062f358de5e5156; its fullmainCI38077455028 SUCCESS (2241/2241/0/0), guarded38077625384 SUCCESS. All13 sales source/test blobs unchanged versus dece8453 in fresh main36a6d3bc. No source/schema/grant/business change in this acceptance.

User22:43 «συνεχισε» after receiving exact account/company/store in a separate final message. Existing secure normal New sign-in -> one browserAuth submission -> fresh tab40 rendered MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / own-company list /3 own LAB stores. Open only ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru, company cmtpopbgk000prhb5qc60zxus). Commercial launcher initially selected N40 CONTROL; explicitly selected target LAB before report/assistant. This launcher default is recorded, not claimed fixed or taken over. No reads/questions in other stores, no financial/stock/fiscal/employee/module/credential reset.

Independent ordinary report first: Αναφορές -> Στατιστικά πωλήσεων, from/to2026-10-10, SKU2269, checked «Ώρα Ελλάδας», explicit Search. Refreshed rendered report19:48:40.403UTC: one NEPO 500ML/2269/target-store row, quantity4/gross2.00EUR/net1.77EUR/VAT0.23EUR. Earlier exploratory LAB EXCEL TEST1/10Oct returned one row/quantity1/zero amounts; no assistant question or broader PASS for that example.

Permitted ordinary Owner assistant status, current store label, no support-preview banner. Actual typed/editable question «Πόσα τεμάχια NEPO 500ML, SKU 2269, πουλήθηκαν στις 10/10/2026; Δείξε τζίρο με ΦΠΑ, καθαρή αξία και ΦΠΑ μόνο για αυτό το κατάστημα.» Explicit Ask19:49:13.218UTC; actual provider answer observed19:49:33.749UTC: targetstore/date/name/SKU,4units/2.00gross/1.77net/0.23VAT. Product-sales canonical evidence table matched all those fields; source reversalCount0/returnGross0 only, not separately verified in normal report. Query source label2269, Athens10Oct inclusive, completed non-credit/reversal-aware/nonfiscal, no cash-evidence mislabel. LIMITED LIVE PASS for this one current-store/current-day exact-SKU question and before-Ask normal-report reconciliation only.

Subsequent fresh DOM around19:50UTC rendered central «Η σύνδεση άλλαξε. Τα δεδομένα της προηγούμενης προβολής αποσύρθηκαν.»; assistant showed support-context denial, question and answer cleared, Ask/microphone disabled. No change-store/blank action or next Ask executed. Actual accepted answer thus precedes a separate session-context block; its cause, submitted replacement identity and actor are unknown. No blanket auth fix, unchanged-refresh retention or full lifecycle/tenant/module PASS. Stop API questions/retries; preserve central-session/production404/No40 owners. After-Ask report refresh and deliberate blank/own-store-switch acceptance remain NOT TESTED. Actual rendered DOM observation is transcribed in evidence/product-sales-observation.json; screenshot is only subsequent denial, never positive-query proof.

Evidence: CHECKPOINTS/EVIDENCE/voice-owner-sales-20261010/product-sales-observation.json and voice-sales-session-changed-1791661873386.jpg (same inspected JPEG bytes successfully synchronized). Prior22:40/21:40 BLOCKED superseded only for the now-observed positive sales query; historical session incidents remain. Normal Owner cash/input/Platform/support/LAB grant PASS protected without repetition. No business deltas inferred; POS terminals/main shift/operator/SKU/payment transactions N/A for read-only query; physical microphone NOT TESTED.

Tracker32/printed30/fullVOICE OPEN/ASSIGNED. Remaining: stable normal Owner context for blank/own-store-switch and after-query report refresh, multi-day/DST/ambiguous/no-match/capped/source-failure/role/license/module/revocation/tenant live cases, physical speech and remaining domains/POS. Single next action: normal existing LAB Owner stable context, then deliberate blank/current-own-store switch UI acceptance; do not repeat this positive Ask/cash/activation/transactions merely for a photograph. Immediate manual/pending/tracker/PDF synchronization records only observed scope. Ownership retained until complete/named transfer.

10/10/2026 22:43 Αθήνα — No33 προσωπική κάρτα/QR και καταμέτρηση: USER PASS

Owner codex/operator-checkbox-audit-20261009, No33/tracker35 **OPEN**. Ο ιδιοκτήτης επιβεβαίωσε: «η προσωπική κάρτα/QR και η καταμέτρηση αυτα τα εχω κανει..ειναι οκ». Καταγράφονται ως **USER PASS** και δεν επαναλαμβάνονται ούτε ζητούνται κωδικοί/QR στη συνομιλία. Η παλαιότερη απαίτηση επανελέγχου αυτών των δύο σκελών έχει υπερκαλυφθεί από αυτή την επιβεβαίωση.

Δεν πρόκειται για νέα παρατήρηση του Codex: χρόνος αρχικής δοκιμής, revision, μετρήσεις και Audit IDs δεν δόθηκαν. Δεν προκύπτει από αυτή τη δήλωση PASS τελικής υποβολής κλεισίματος, νέας βάρδιας ή αρχικού ταμείου. Αυτά και οι υπόλοιπες εκκρεμότητες του No33 παραμένουν OPEN. Δεν έγινε νέα συναλλαγή, καταμέτρηση, μεταβολή δικαιωμάτων ή οικονομική/stock/shift υποβολή για τεκμηρίωση. Η υπάρχουσα έγκριση αναγκαίων εικονικών δοκιμών διατηρείται.

Checkpoint: CHECKPOINTS/CHANGES/2026-10-10-operator-card-count-user-pass.md. Επόμενο: ανεξάρτητο εκκρεμές δικαίωμα ή ο μετρημένος τελικός έλεγχος κλεισίματος/αρχικού ταμείου, χωρίς επανάληψη προσωπικής κάρτας/QR και καταμέτρησης. No39/τιμολόγια/scanner/μήνυμα ρέστων και άλλοι owners παραμένουν εκτός scope.

10 Oct 2026 22:05 Athens — No40 second LAB control: LIMITED LIVE PASS / overall OPEN

Owner remains codex/n40-full-twin-navigation-audit-20261010. Explicit approval21:29Athens covered creation of one empty N40 CONTROL 20261010 and read-only checks in that store plus the original LAB only. Control company cmtpopbgk000prhb5qc60zxus, store cmv2qanca000psigeizep8o9m; original store cmtpopbgo000trhb5ng9ytiru. No isolated-label/real-store tests, sales, payments, stock/staff/rights/module edits, analysis execution, email or device commands. Browser cloudChrome26 / SuperAdminΧρήστοςΜάνης; physical terminal/operator/shift/item/quantity/payment N/A for navigation.

Release PR2173 finalhead e9f53508ca0006a824000c8f9c293eeecab094f3, fullCI38077255150 SUCCESS; merged 69456df3b48cdad35acee6d4b062f358de5e5156, mainCI38077455028 and guardeddeploy38077625384 SUCCESS. Render dep-db58jlflot8c73e3am60 LIVE18:55:56.494474UTC. Independent public browser /api/health exact69456df3/ok=true before fresh Platform reload and this batch. Fresh client entry /assets/index-C-bpTceh.js observed; independent build-asset hash comparison NOT TESTED. Source only extends sanitized observation to the exact approved second store; authorization unchanged. Local13 diagnostic/privacy tests PASS, not LAB acceptance.

Actual18:56:51–18:57:45UTC (21:56–21:57Athens): CONTROL POS -> Έλεγχοι & Αναλύσεις (locked LAB/control,0/3 packages); EFTPOS -> Αυτόματος Έλεγχος Ταμείων (control,0 shifts/amounts); Cash -> same destination for its current missing-close finding; Personnel -> WorkforceV2 (control main employee list0, company roles3, personal rules0, templates0); Cameras -> Video Events connection settings (correct control heading, no connector/camera configured). Each normal close returned automatically to the same CONTROL Twin. LIMITED LIVE PASS for these five destinations/current finding and six attributable GETs only. All six client statuses200; exact server IDs matched expected company/store, roleSUPER_ADMIN, both matchestrue, invalid/truncatedfalse. Server Cash and Cameras304 vs Fetch200 reflect conditional cache, explicitly retained. Evidence CHECKPOINTS/EVIDENCE/n40-read-trace-20261010/control-correlations.json.

CONTROL Stock at about19:01UTC opened ordinary support Backoffice /stores with supportStore=control and explicit MYWORKSTATION LAB / N40 CONTROL heading, no open shift. Normal «Επιστροφή στο Super Admin» returned to CONTROL Twin after loading. LIMITED navigation PASS only: destination is store

Backoffice, not an independently opened inventory or an inventory calculation. Support page showed18 safeGET count but full per-request batch was not extracted before navigation reset; Stock server isolation/support-exit Audit NOT TESTED here. Original Stock USER comment6097485640 preserved without replay.

New expanded switch19:02:26–19:02:49UTC: CONTROL -> original LAB Personnel7 employees/2 rules/3 templates -> normalclose same original Twin -> CONTROL Personnel0 employees/0 rules/0 templates -> normalclose CONTROL. Four new metadata/bootstrap client/server correlations all exact selected-store, matchestrue/noninvalid; primaryserver200, controlserver304/client200. LIMITED LIVE PASS for selected main employee list and these four reads only. Three company store references and shared company roles are metadata, not proof every editor/dataset is store-isolated. Workforce temporary «Δεν φορτώθηκαν τα δεδομένα» cleared automatically without Retry. SA override means inactive BASIC/PRO/AI/PAYROLL on CONTROL with successful read is not module-denial PASS.

Creation earlier18:29UTC: one submitted create, LAB2->3/global5->6 stores, users2/4 and employees9/38 unchanged by independent reload; one CONTROL row. Post-save «Cannot read properties of null (reading 'reset')» remains actual form-cleanup FAIL; never resubmit/recreate. Earlier Camera invalid-session observation is superseded only by fresh secure canonical SA re-entry and this success, precise prior cause unverified. Legacy three default shiftTypes differ from zero WorkforceV2 shiftTemplates.

No40 remains OPEN/ASSIGNED. Closed only second-store normal navigation, six control GET correlations and bounded two-store Workforce switch; prior phases1–14, primary six GETs, restricted403/own-token401 and disabled-POS denial protected. Remaining: complete Stock request/support-exit attribution, role/store/module and missing/revoked-store negatives, delayed/in-flight/network/error/race scenarios and independent client artifact attestation. Separate creation-form FAIL remains recorded. No blanket tenant/module/revocation/network-race PASS. Next single action: read-only source/evidence review of the missing/revoked-store negative fixture and propose the exact reversible LAB-only state transition before any store/access mutation; preserve all other assignments.

10/10/2026 21:40 Athens — VOICE-ASSISTANT-01 / tracker32: product/date sales RELEASED, acceptance BLOCKED

Owner remains codex/unified-voice-assistant-20261010; branch feat/voice-owner-product-sales-20261010. Pre-source claim PR2164/head676da4e7/CI38074782867 SUCCESS/merge5a44ced0. Source PR2167/head55aa53f7c1b7fefbb7c3de8b733f6ddf7bf6fda2, fullCI38075261178 SUCCESS (2216 tests/2216 PASS/0 FAIL/0 SKIP), mergedece8453ca3f4df4106c1cae2fe697d20dfa2f15, main fullCI38075499712 SUCCESS (2216/0/0), guarded Render38075728235 SUCCESS. Render dep-db586frbc2fs73elktog LIVE18:28:02.944498UTC; actual browser /api/health ok=true/exact dece8453 before fresh Owner reload. Subsequent DAILY main78438151 retained every uploaded source blob unchanged and its deployment became LIVE18:29:46UTC. Source is implemented/released, not sales LAB PASS.

Implemented strict read-only sales_by_product by name/SKU and explicit inclusive Europe/Athens dates, selected authorized own store only, canonical reversal-aware completed non-credit report quantities/gross/net/VAT. AI_OWNER_ASSISTANT plus INVENTORY for sales, CASH_CONTROL for cash; fresh effective domain/session/scope checks around reads/provider/final. Existing connection reused. Nonunique candidates need clarification; missing/capped results do not prove zero stock or complete totals. Optional unchecked «Ώρα Ελλάδας» canonical report filter allows future same-filter reconciliation; legacy filters/arithmetic unchanged. Local55 focused tests PASS including13 new real mounted route/UI/domain/calendar/privacy cases. No grants, credentials, schema, central auth source or business writes by this feature.

Actual acceptance attempt: fresh reload of previously valid normal Owner tab29 first denied own-company selection; one visible normal Έξοδος and one secure browserAuth existing-account request returned submitted. Subsequent rendered root showed «Καλώς ήρθες, Χρήστος Μάνης» plus «Η φόρτωση διακόπηκε: Η συνεδρία δεν είναι έγκυρη.». Mandatory fresh verification tab38 independently rendered same invalid-session error at18:40UTC. Greeting is insufficient Owner authorization; submitted is not login PASS. Stop auth retries; no sales assistant Ask/provider/canonical tool call executed. Earlier rendered zero-row sales reports were pre-verification observations only, NOT a sales no-data PASS.

Cause/account/session transition unverified; no attribution to another actor or to this sales source. Screenshot inspected once, but shared-file synchronization failed; no broken evidence link or fabricated attachment published.

Historical normal Owner cash LIVE PASS PR2161/af36b491 and prior input/Platform/support/module grant PASS remain protected for their observed scope; new session block prevents this sales test, not a retrospective reversal. Central BACKOFFICE-SESSION-01 remains independently owned; its PR2163 merged e6bdd31 and release was in progress at this observation, no fix claim or takeover. No guard bypass, reset, token inspection/export, repeated activation or transaction.

Current32/printed30/fullVOICE OPEN/ASSIGNED. Remaining actual sales/provider/normal-report reconciliation, blank/own-store switch, late context, role/module/session/tenant negatives, physical microphone and remaining domains/POS are NOT TESTED live. Single next action: user-assisted normal existing LAB Owner entry and fresh positive own-company/selected-store status, then verify current deployed revision and one existing-record product/date question against the ordinary report with «Ώρα Ελλάδας». Do not restart implementation or repeat cash/business actions. Assignment retained until complete or named transfer.

10 Oct 2026 21:29 Athens — No40 approved second LAB control / ASSIGNED, OPEN

Owner remains codex/n40-full-twin-navigation-audit-20261010. User explicitly approved prepared N40 CONTROL 20261010 in MYWORKSTATION LAB, city ΔΟΚΙΜΑΣΤΙΚΟ ΠΕΡΙΒΑΛΛΟΝ, three default shift templates only. Existing creation was submitted once around18:29UTC under Super Admin Χρήστος Μάνης / cloud Chrome26, no POS/operator/shift/SKU/payment applicable. Before: LAB2stores/global5, employees9/38, users2/4. After one create: new store cmv2qanca000psigeizep8o9m, independent reload LAB3/global6, same employees/users; success message and one new row. Creation form displayed Cannot read properties of null (reading 'reset') after successful save; no repeat submission. Form cleanup is FAIL, store existence confirmed only, not overall create UX PASS.

Approval extends read-only No40 second-store navigation/isolation checks solely to primary cmtpopbgo000trhb5ng9ytiru and this new control within company cmtpopbgk000prhb5qc60zxus. No isolated-label or real-store tests, business mutation, module/rights changes, fixture resets, email, analysis execution or device command. Existing phases1–14/Stock6097485640/restricted403401/six matched GETs protected. Main78438151 browserhealth exact / Renderdep-db586shj9rms73arfqlgLIVE18:29:46UTC verified. Current diagnostic trace allowlist supports primary only; extend observation to this exact authorized control if needed, with sanitized metadata/privatefail-safe/no auth change and privacy tests/fullCI/guarded release before acceptance.

Fresh main78438151 active file was truncated to409characters by PR2169. Restore full last confirmed3bd4a024 active history1193444characters verbatim and retain exact current DAILY BITE409character entry. This is preservation, not takeover. Other pages remain assigned. Source before/after reset symptom recorded; do not fix unrelated business flow without causal scoped claim. Next read-only secondTwin checks / exact two-store trace readiness. No40 OPEN; no new Full Twin criterion PASS.

10/10/2026 - VOICE-ASSISTANT-01 / tracker32: bounded Owner product/date sales extension ASSIGNED / NOT TESTED

Owner remains codex/unified-voice-assistant-20261010; implementation branch feat/voice-owner-product-sales-20261010. User21:02Athens said «ξεκινα» after normal Owner cash LIVE PASS. Same existing OpenAI connection selected previously; no new key/project/credentials/grant. Main aa028301 includes PR2161 cash PASS and independent No40 PR2160; current AGENTS/checklist/tracker/pending/manual, complete previously read active list plus exact new No40 delta, own checkpoint and post-PASS history reconciled. Existing normal Owner tab29 still shows selected LAB and matching cash report; no new Ask or business action. Latest cash evidence af36b491/full2194/0/0/guardedRender38072264270 protected.

Bounded scope: strict read-only sales tool by name/SKU and explicit inclusive date range, exact authorized selected store/current company. Reuse canonical /api/reports/sales-analysis, its completed non-credit reversal-aware quantities/gross/net/VAT and INVENTORY entitlement (this is the existing route gate, not SALES_ANALYTICS). AI_OWNER_ASSISTANT always required; CASH_CONTROL required for cash only, INVENTORY for sales only; fresh role/session/company/store/license and effective required module before every read/provider/final. Fixed loopback/original session, no client/model scope/URL/SQL/write. Ambiguous product -> list safe candidates and ask clarification; no-match -> no recorded matching result, never proof of zero stock or nonexistent product. Project only safe product/store/quantity/value/reversal fields; bounded rows and explicit source cap/truncation, no customer/operator/contact/cost/supplier/stock detail.

Calendar limitation demonstrated: existing report parses date-only values in server local timezone. Add opt-in strict timeZone=Europe/Athens date range to canonical route with DST-aware midnight bounds; leave absent-param legacy behavior unchanged. Add explicit optional «Ώρα Ελλάδας» report control for independent same-filter comparison; no report arithmetic/schema/posting changes. This narrow supporting report change is owned only for this assistant capability, not analytics layout/general reports takeover. Required regressions: date validity/order/range/DST, exact/nonunique/no-match/cap/private fields, strict tool/body, route and module isolation, revocation before/after I/O and late context response; retain original cash/voice UI regressions.

Sales implementation/LAB NOT TESTED. Overall32/printed30/VOICE OPEN/ASSIGNED. Context/lifecycle/roles/module negatives and physical speech remain separate OPEN; no completed transaction/login/module activation repeated for evidence. No N40/N50/N51/central BACKOFFICE-SESSION-01/DAILY/source auth/store core/real company change. Next after green common claim merge: bounded sales source/tests -> exact full CI/main/guarded healthy release -> ordinary Owner existing-record query and normal report reconciliation, then immediate checkpoint/manual/pending/tracker/PDF publication. Assignment remains until complete or named transfer.

10/10/2026 20:52 Athens - VOICE-ASSISTANT-01 / tracker32: normal Owner selected-store cash query LIVE PASS

Same owner codex/unified-voice-assistant-20261010 retained. User20:45:48 said continue and authorized proceeding as project owner. Used normal existing Owner secure authentication; no authentication/module/tenant guard bypass, reset, new account or further grant. Prior module persistence/effective matrix PASS PR2147 and input/Platform/support cash PASS protected. Supersedes PR2155/main7be3d5e3 authentication/identity BLOCKED only for this new successful ordinary Owner query; historical mismatch cause remains unverified.

Normal root tab29 logged out through visible Έξοδος, then actual secure Email/Κωδικός/Σύνδεση request returned submitted. Fresh signed-in page showed MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / own-company section / exactly two LAB stores and loaded2/9/0/11 counts. Open ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ -> Εμπορική λειτουργία -> Λοιπές εμπορικές λειτουργίες. Explicitly select ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ before Βοηθός Ιδιοκτήτη (known LAB storecmtpopbgo000trhb5ng9ytiru). Fresh assistant status permitted the textbox/Ask; no support-preview banner or support-store denial. This positive accepted ordinary flow is observed evidence, not a token/session export or full lifecycle proof.

Fresh independent browser health before Ask: ok=true/version0.22.0+kat-test-pos/revisionaf36b4910a59a571885f36b1f4b2fbf3d896337c. Exact source main CI38072060986 SUCCESS, build/test job114271364950 log2194tests/2194pass/0fail/0skip; guardedRender38072264270 SUCCESS. No deploy/source changes by this page; cached client asset SHA not independently sampled. Current docs reconciled against fresh mainde48a124, preserving concurrent No40/DAILY receipts.

Typed editable question «Ποια βάρδια είχε διαφορά μετρητών στις 10/10/2026; Δείξε κατάστημα, βάρδια και ποσό.» and clicked explicit Ρώτα at2026-10-10T17:49:12.857Z. Actual provider answer observed17:49:47.816Z: selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ /2026-10-10/−5.50€ deficit. Evidence scope only selected LAB/store/date00:00–23:59/Athens/closed shifts; one row MAIN/close08:13/session4d853b34-4ce3-4086-970e-14537cf1fd7b/expected5.50/count0/cashvariance−5.50/cardvariance0/FULL. No global fallback/cause attribution/business action. Answer retained through subsequent unchanged status refreshes and proof capture17:50:37.

Independent normal Owner cash report: close commercial modal -> expand Αυτόματος έλεγχος και κλεισμένες βάρδιες -> explicit Ανανέωση. Fresh completed read17:51:26.111Z showed date2026-10-10/time00:00–23:59/one closed TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ / MAIN / close10Oct08:13:02 / LAB POS2 / cashvariance−5.50€ / cashsales4.50€ / card/EFTPOS0/0. Date/store/shift/terminal/close/cash variance reconcile with assistant. Expected/count/sessionID/cardvariance rule remain assistant-source-only; do not claim separate field-by-field normal-report proof.

LIVE PASS limited to fresh normal Owner enabled-module selected-store cash query, real provider reply, visible source evidence and independent normal report reconciliation of stated fields. Evidence CHECKPOINTS/EVIDENCE/voice-owner-cash-20261010/voice-normal-owner-cash-answer-1791654637023.jpg and voice-normal-owner-canonical-cash-1791654727065.jpg. Operator Υπεύθυνος Εργαστηρίου; physical terminal N/A/cloud Chrome1/tab29/text channel; no microphone used. Item/SKU/quantity/payment N/A/read-only query; no new sale/payment/invoice/stock/fiscal/shift-close/device/email/price/plan/role/module/reset/credential-storage action. Independent DB/audit/ledger/stock/session deltas unmeasured.

Overall tracker32/printed30/VOICE OPEN/ASSIGNED. Remaining actual module disable/revoke/role/session/company/store/blank/removed/switched-context/source failure/timeout/no-data/truncation/physical speech acceptance; product/date sales and other domains/POS OPEN. Single next action read-only blank/own-store-switch context acceptance in this valid Owner session, then bounded canonical product/date/current-store sales capability. No reactivation/login repetition for this completed positive query, no other-owner takeover. Same-owner handoff retained until completion or named transfer.

2026-10-10T17:48:31.273572+00:00 — BACKOFFICE-SESSION-01 / independent central session boundary / ASSIGNED / NOT TESTED

Owner codex/backoffice-session-boundary-20261010, explicit owner correction request and continuation10Oct20:46Athens. Independent central Backoffice App lifecycle and request-prop boundary only, not N51 layout/StoreCloudPage implementation, N40 Twin navigation/trace/fixtures, VOICE assistant/provider/licensing or other-owner work. Fresh main52cff52c and complete active-list scan, current tracker/pending/checklist/manuals and relevant scope/auth receipts reviewed. This narrower unclaimed App boundary resolves the earlier broad-source ownership blocker; it is not a transfer/release of N51/N40. Claim must merge green to main before source.

Scope: detect shared login/support context replacement or removal, stop rendering/polling stale Backoffice view, reject late results across the boundary and show explicit fresh-entry/reload notice. Never snapshot an old credential for continued use, clear another tab's storage, auto-login/revoke sessions, weaken server auth/ownedStore, alter data or treat all401/404 as this mechanism. Keep normal same-context refresh, support return/Owner login, N40 trace and N51 navigation intact. Bounded error handling may suspend this view after an attributable401; generic404,403,5xx or network outage are not global logout. Synthetic candidate mechanism established; production failed-request identities and401 root cause remain unverified. Latest other-owner signed-in heading/server-session mismatch is evidence to preserve, not cause attribution or takeover.

Checkpoint CHECKPOINTS/CHANGES/2026-10-10-backoffice-session-boundary.md. Acceptance: healthy same-context polling; cross-tab token/user/support replacement/removal and missed storage events before a request; in-flight context change rejects late success/error; stale callback cannot invalidate a newer view; legitimate same-tab login/company selection/support exit; explicit recovery; no shared credential mutation. Full build/server/production/isolated E2E CI and exact healthy deploy before actual read-only acceptance. No new business/LAB transaction or manual/numbered PASS. Assignment retained until completed/named handoff. Next: publish claim then bounded central boundary + mounted regressions.

2026-10-10T18:04:44.670113+00:00 — BACKOFFICE-SESSION-01 / SOURCE IMPLEMENTED / AWAITING FULL CI + LIVE

Same owner codex/backoffice-session-boundary-20261010; source fix/backoffice-session-boundary-20261010. Independent claim PR2158/head eaabafa9 / docsCI38073522058 SUCCESS / merge2d9bcdea precedes source. Central App request boundary blocks replaced/removed login/support context before fetch, discards late results, unmounts stale child polling and shows explicit fresh entry/sign-in. Current401 suspends this guarded view; pre-renewal401 does not reject renewed credentials; ordinary403/404/5xx/network errors remain ordinary failures. Same-session identity/scope renewal stays live and every request uses current token/server auth. Normal explicit successful sign-in removes obsolete support metadata; denied or superseded in-flight sign-in changes nothing. Support exit/company-selection recheck context before writing transition credentials. No N51/StoreCloudPage, N40 navigation/trace/fixture, VOICE source or server/schema/business change.

Node20.20.2 isolated focused45/45 PASS, including actual mounted App + unchanged StoreCloudPage timer cleanup, healthy refresh/renewal, stale callback protection, denied/superseded/successful explicit sign-in and current401 suspension. Full prepared server suite2216tests/2200PASS/0FAIL/16isolated-PostgreSQLskips; frontend build18.04s/TABLE_SERVICE PASS and server Prisma generation PASS. Initial broad-suite failure was the chat integration assertion expecting the previous API variable; only that expectation updated to guarded scopedApi, all tenant/category/storage checks retained. Build preparation's unrelated audit-route mutation restored and excluded. Local/CI are not LIVE/LAB PASS.

Newer main aa028301/N40 history reader and VOICE normal Owner cash PASS records preserved; no replay or attribution of their successful/failed sessions. Limitation: only central main.jsx App/bootstrap/request-prop children; independently mounted CommerceLauncher/Platform/POS readers remain their owners' scope. Existing already-open old client assets require a normal reload after release. No claim that production401 spike, every404 or DB storage issue is resolved. Required exact full CI/guard/main/deployed health and actual read-only session-change/healthy-refresh acceptance before closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-backoffice-session-boundary.md. No manual/numbered PASS closure or business action. Next source PR/fullCI then guarded release and bounded read-only acceptance; owner retained.

10/10/2026 20:33 Athens - VOICE-ASSISTANT-01 / tracker32: signed-in UI observed; Owner acceptance BLOCKED by identity mismatch

Same owner codex/unified-voice-assistant-20261010 retained; no transfer, source change, permission bypass or new grant. Protected approved LAB company module persistence/effective matrices PR2147/main8859aa13/PRCI38070519231+mainCI38070564524 SUCCESS and prior input USER PASS, Platform cash LIVE PASS and support-only cash LIVE PASS. Open docs PR2150 previously described authentication blockage; this receipt supersedes its current-status wording while retaining the 20:12 observation below.

USER correction at20:16: user said earlier credentials were Super Admin. Later secure attempts returned visible incorrect-email-or-password; no credential values retained, no reset/new user/automatic retry after denial. User manually continued and said «mpika» at20:29:40. Fresh tab29 visible root showed MYWORKSTATION LAB / Υπεύθυνος Εργαστηρίου / Οι επιχειρήσεις και τα καταστήματά μου / two named LAB stores, with loaded counts2/9/0/11. This is positive signed-in UI evidence only; credential identity and authoritative Owner role were not independently inspected.

Read-only navigation: open ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, Εμπορική λειτουργία, Λοιπές εμπορικές λειτουργίες; selector initially showed the other LAB store, so explicitly selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ before opening Βοηθός Ιδιοκτήτη. Panel selected only that store, but input/voice/Ask remained disabled and status said «Επίλεξε το κατάστημα μέσα από την κανονική υποστήριξη.» No question/provider/canonical assistant read occurred. One normal UI reload then showed same LAB/Υπεύθυνος heading but «Η φόρτωση διακόπηκε: Η επιλογή εταιρείας αφορά τον ιδιοκτήτη.» and changed loaded aggregate counts1/19/1/22.

Stop: do not treat the greeting, initial store list or module matrix as stable normal Owner API acceptance; no further store/business reads performed.

Fresh independent browser /api/health atapproximately17:31UTC showed ok=true/version0.22.0+kat-test-pos/revision23abcfa0c8c739574e144c827898ef09ee0a7897. Current main advanced toaf36b491 through other-owner DAILY/No40 PRs; retained without editing their scopes. Client asset revision and exact session transition cause NOT VERIFIED. Source guards associate first visible denial with strict SuperAdmin support-store mismatch and second with non-normal-Owner/support session, but this is an inference from current source, not exported session/token proof. Session renewal already compares current token with its captured previous token; no speculative auth fix or weakened guard justified by this evidence.

Evidence CHECKPOINTS/EVIDENCE/voice-owner-cash-20261010/voice-owner-session-mismatch-1791653557895.jpg, captured current rendered post-reload denial without credentials. No sale/payment/invoice/stock/shift-close/fiscal/device/microphone/email/price/plan/module/role/reset/new-account action; financial/stock/audit/session deltas unmeasured. Overall tracker32/printed30/VOICE OPEN/ASSIGNED. Normal Owner cash query and role/module/session/company/store lifecycle acceptance BLOCKED/NOT VERIFIED; sales/product/date and remaining domains OPEN.

Single next action: a user-chosen fresh secure sign-in with the existing LAB Owner in this same normal Backoffice tab, followed by fresh own-company listing and selected-store assistant status before any question. Keep support and Owner sessions distinct; do not inspect or export credentials/tokens/storage, use N40 fixture, clear/revoke another page's session, bypass the support guard or reset an account. If denial recurs, diagnose only from authorized visible identity/status and server logs without authentication material. Same-owner assignment and protected PASS receipts remain until completion or named handoff.

10/10/2026 20:12 Athens - VOICE-ASSISTANT-01 / tracker32: normal Owner authentication BLOCKED; module PASS protected

Same owner codex/unified-voice-assistant-20261010 retained. Approved LAB-only company module activation and two effective matrix readbacks published PR2147/headb9074d246e6658e6cd5894144fa3b218eb4d40b2/PRCI38070519231 SUCCESS/main8859aa13c36eed5b21ab11780f25d0cf4983519c/mainCI38070564524 SUCCESS. These documentation checks do not prove an Owner session or query. Last independently verified healthy source2e1f4afe at17:00:55.359Z; no deploy/source change by this page.

Actual normal Backoffice root tab28 displayed Email/Κωδικός/Σύνδεση. Secure browserAuth collected/submitted credentials without returning values (status submitted); account supplied cannot be inferred from credential values, which were never read or logged. Fresh transition AX showed «Καλώς ήρθες, Χρήστος Μάνης» plus «Η φόρτωση διακόπηκε: Η συνεδρία δεν είναι έγκυρη.» and zero/unloaded dashboard cards. There was no positive LAB company/Υπεύθυνος Εργαστηρίου/Owner signed-in signal. Mandatory one fresh verification tab29 at retained normal Backoffice origin reproduced identical visible identity and invalid-session alert. Screenshot captured17:12:19.529Z: CHECKPOINTS/EVIDENCE/voice-owner-cash-20261010/voice-owner-login-blocked-1791652339457.jpg.

Normal Owner authentication is BLOCKED / NOT VERIFIED, not a valid Owner authorization denial or assistant failure. No cash Ask/provider/source call or module/tenant negative was attempted in this session. Empty dashboard counts are failed-load placeholders, not financial/business balances. Account role and session rejection cause NOT VERIFIED; do not infer incorrect credentials, an Owner bug, expiry, or tenant denial. Stopped after the generic session failure; no repeated credential request, login retry, reset/recreation, fixture takeover or bypass. Native observation protection appeared on a separate old health-tab read; used only explicit navigation of existing verification tab to retained origin, then permitted fresh AX again confirmed same invalid-session alert. No further health attestation claimed.

Only completed state-changing action remains the user-approved LAB AI_OWNER_ASSISTANT grant: persisted/count20→21/total104.70€ unchanged, all other visible terms equal, both LAB matrices Owner AI+CASH NAI/Employee AI OXI. Prior input USER PASS, Platform cash LIVE PASS and selected-store support cash LIVE PASS protected. Financial/stock/fiscal/device/message/email actions, independent

DB/audit/session/ledger deltas, normal Owner positive/module-revocation/foreign/blank/context/source-failure acceptance and physical speech NOT TESTED. No other-owner changes.

Single next action: user chooses a fresh secure sign-in for the existing LAB «Υπεύθυνος Εργαστηρίου» account; no secrets in chat. Verify actual LAB company/Owner identity and valid loaded session before any assistant query, then current-store/module/role/tenant acceptance. Do not automatically retry the blocked authentication or modify permissions to make it pass. After that acceptance, sales by exact product/date/current store remains next capability. Overall tracker32/printed30/VOICE OPEN/ASSIGNED/BLOCKED OWNER AUTH; same-owner handoff remains until completed or named transfer. Activation approval is completed and must not be requested or performed again.

10/10/2026 20:25 Athens — DAILY BITE coffee / KAT behavior reuse — ASSIGNED

Owner codex/daily-bite-coffee-kat-behavior-20261010, issue #2054. Begins after merged PR #2149. Scope: DAILY BITE coffee product UI/modifier behavior aligned with KAT while staying company/store scoped to DAILY BITE; MyWorkStation styling; KAT label may replace a DAILY label only as a name after exact mapping. KAT IDs, ingredient IDs, recipe stock writes, catalog fields and all non-name economics are protected. Initial source change must be read-only/preview-first and fail closed on missing or ambiguous matches. Existing DAILY import PASS (9 departments/8,753 products) preserved. LAB/LIVE NOT TESTED.

10/10/2026 20:04 Athens - VOICE-ASSISTANT-01 / tracker32: LAB company module activation LIVE PASS; normal Owner sign-in OPEN

Same owner codex/unified-voice-assistant-20261010 retained. User action-time approval «εγκρινω» at19:59:25 Athens covers only AI_OWNER_ASSISTANT in MYWORKSTATION LAB and its two current virtual stores, no pricing/plan/other-company change. Existing pre-action claim/handoff main204f9cec/PR2143/docs CI38068245468+38068294528 SUCCESS. No source or deploy change; fresh actual browser health17:00:55.359Z ok/version0.22.0+kat-test-pos/exact released2e1f4afe7d7eca6803f39c81d95ab19a70cd01f7 (full source/main2188/0/0, PR2139+2141, guardedRender38067034314).

Actual Chrome1 existing SuperAdmin Χρήστος Μάνης. Stale proposal canceled; fresh normal subscriptions refresh completed and LAB panel reopened. Before17:01:01.931Z: active ENTERPRISE / AI COMPLETE, start2026-09-06/noend,20modules,total104.70€, assistant ΑΝΕΝΕΡΓΟ. Sole toggle AI_OWNER_ASSISTANT, module monthly/setup0€, one explicit normal Αποθήκευση συνδρομής at17:01:54.939Z. UI completed and selector LAB count21. Reopened persisted configuration17:02:17.996Z: assistant ΕΝΕΡΓΟ,21modules,total104.70€, monthly/setup0€, same plan/status/dates and all other visible fields. Before/after DOM comparison excluded only own AI card and expected count; all remaining visible subscription/module fields exactly equal. Other-company selector controls remained DAILY BITE7/Διαδόχου Παύλου21/KAT22 with same displayed plans/end dates; no other company settings opened or saved. Hidden DB/ledger/audit deltas not claimed.

Fresh read-only effective matrices: ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru at17:03:16Z and ΕΡΓΑΣΤΗΡΙΟ ΑΠΟΜΟΝΩΣΗΣ ΕΤΙΚΕΤΑΣ cmuk8gxui000ppabfykdxwb1y at17:04:02.608Z. Both active company license,21 Owner modules, AI_OWNER_ASSISTANT source Άδεια εταιρείας / SuperAdmin ΠΑΝΤΑ / Owner ΝΑΙ / Employee ΟΧΙ / special permission ΝΑΙ. CASH_CONTROL Owner ΝΑΙ in both. This is LIVE PASS only for approved company entitlement persistence/unchanged visible commercial terms and these two effective matrix readbacks. It is not normal Owner authentication, assistant API authorization, positive query, employee/cross-tenant rejection or module revocation proof. Screenshot CHECKPOINTS/EVIDENCE/voice-owner-cash-20261010/voice-owner-module-active-1791651751072.jpg was captured from the freshly reopened saved panel, not unsaved proposal.

Cash/stock/fiscal/device/shift/items/quantity/payment method N/A for sole licensing action. No sale/payment/invoice/stock/shift close/message/email/credentials/reset/new user/other-module/real-customer action. Independent financial/stock/control/audit/session DB deltas NOT TESTED. Prior input USER PASS, Platform cash LIVE PASS and selected-store support cash LIVE PASS protected; N40/N50/N51/DAILY BITE and other owners unchanged.

Normal Backoffice login tab opened for existing LAB Owner; visible Email/Κωδικός/Σύνδεση, no credentials read/entered or login attempt yet. Single next action: secure existing Owner sign-in for Υπεύθυνος Εργαστηρίου (MYWORKSTATION LAB), then current-store cash acceptance and normal module/role/session/tenant/context negatives. Do not use N40 EMPLOYEE fixture, create/reset accounts or treat support as Owner proof. After that bounded acceptance: canonical sales by exact product/date/current store and remaining domains/POS/physical speech. Overall tracker32/printed30/VOICE OPEN/ASSIGNED; no full closure. Completed approval/activation removed from pending. Same-owner handoff retained until full completion or named transfer.

10/10/2026 19:27 Athens — DAILY BITE POS screenshot mapping / issue #2054 — ASSIGNED

Owner codex/daily-bite-pos-layout-20261010. User continued wider DAILY BITE setup after catalog PASS and supplied Kiosk Manager category/product screenshots. Scope is store-scoped POS mapping only: MyWorkStation visual style; DAILY BITE products stay DAILY BITE; KAT coffee modifiers/interaction are reused as behavior only; KAT coffee labels may replace DAILY BITE labels **only as names**, with SKU/barcode/price/VAT/department/stock/supplier/tenant identity unchanged. Screenshot groups: ΣΦΟΛΙΑΤΕΣ, ΜΠΑΡΕΣ ΓΚΡΑΝΟΛΑ, ΧΩΡΙΣ BARCODE, ΚΙΣΣΑΣ, ΤΑΡΤΕΣ - ΓΛΥΚΑ, DELISNACKS, ΜΠΑΛΕΣ, ΜΑΓΑΚΗΣ, ΚΕΙΚ, ΠΑΙΧΝΙΔΙΑ. Blank/ellipsis buttons are intentionally not inferred. Existing 9 departments/8,753-product import PASS protected and never repeated. Fiscal/RBS, online ordering, employees, shifts, payments, stock and other stores out of scope. Current status: ASSIGNED / NOT TESTED; claim must reach main before code.

10/10/2026 19:23 Athens — VOICE-ASSISTANT-01 / tracker32: περιορισμένο support LIVE PASS / normal Owner OPEN

Authoritative receipt; same owner codex/unified-voice-assistant-20261010, no transfer. Supersedes LIVE FAIL/AWAITING RETEST only for unchanged license-refresh retention and the selected-store support cash query below. SourcePR2139/fullCI38065505073/mainCI38065763641(2188/0/0), released e8ee8e82; actual failure19:05–19:06 recorded in PR2141. FixPR2141 head6e67a721bc5a11c750d5101d9696fad1606290ab, fullPRCI38066533003/mainCI38066789813 SUCCESS(2188tests/0fail/0skip), merge/released2e1f4afe7d7eca6803f39c81d95ab19a70cd01f7. GuardedRender38067034314/job114256690642 SUCCESS pins2e1; rollback checkpoint captured, not executed. Actual browser health2026-10-10T16:20:22.472Z ok/version0.22.0+kat-test-pos/exact2e1. Fresh UI reloaded; separate client commit SHA not sampled.

Actual cloud Chrome1, existing SuperAdmin Χρήστος Μάνης support -> MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / store cmtpopbgo000trhb5ng9ytiru. Entry: Πλήρες Backoffice -> Εμπορική λειτουργία -> Λοιπές εμπορικές λειτουργίες -> Βοηθός Ιδιοκτήτη. Selected store and explicit “Προβολή υποστήριξης Super Admin” badge verified. Typed exact “Ποια βάρδια είχε διαφορά μετρητών στις 10/10/2026; Δείξε κατάστημα, βάρδια και ποσό.” at16:21:18.256Z; still identical and Ask enabled16:21:46.184Z (~28seconds across repeated license announcements), then one successful explicit Ask. Genuine provider answer16:21:57.223Z in simple Greek: ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ /2026-10-10/−5.50€ (shortage5.50€), own selected-store canonical evidence, closed shifts/00:00–23:59/Athens. Table MAIN/close08:13/sessionID4d853b34-4ce3-4086-970e-14537cf1fd7b/expected5.50/count0.00/variance−5.50/cardVariance0.00/FULL. Reply remained visible for screenshots16:22:06/16:22:28.

Independent normal cash view baseline16:01:00.990Z and fresh after-provider explicit Ανανέωση result16:23:05.434Z: same selected LAB store/date/full day, one closed TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ / MAIN / exact close08:13:02 / cash variance−5.50€, cash sales4.50€, cards/EFTPOS0.00/0.00. PASS only date/store/shift/terminal/close/cash-variance reconciliation plus refresh retention and actual support provider/source reply. Expected/count/sessionID and card variance are in assistant source table but not independently displayed in this normal report; no extra independent reconciliation claim. Source images: CHECKPOINTS/EVIDENCE/voice-owner-cash-20261010/voice-owner-cash-live-1791649326035.jpg and voice-owner-cash-answer-1791649348275.jpg.

No microphone/login credentials, business/financial/stock/fiscal/shift-close/email/module activation or pricing action. No independent global ledger/stock delta or physical speech/device proof. Existing voice-input USER PASS and Platform cash LIVE PASS protected. Normal Owner access and enabled/disabled/revoked/foreign/blank/inactive/switched-store acceptance remain NOT TESTED live; local/CI tests are not substitutes. Actual read-only LAB module matrix separately showed active license, CASH_CONTROL Owner NAI, AI_OWNER_ASSISTANT Owner OXI (SuperAdmin ΠΑΝΤΑ), company-license source, no grant. Support bypass is explicitly separate and never normal Owner/module proof.

Implemented module catalog availability covers only this current-store read-only cash capability; no entitlement was enabled. Normal Owner uses fresh role/session/OwnerCompanyAccess/company/store/license/effective AI_OWNER_ASSISTANT+CASH_CONTROL checks before provider/read/final; selection/real denial clears stale question/speech/reply. 44 focused local fixtures and2188 full tests cover the negatives; only observed support scope receives LIVE PASS. Sales/product/date/current-store, remaining domains, POS rollout, normal Owner lifecycle/isolation and broad physical/context/source-failure acceptance remain OPEN. No complete tracker32/printed30 or overall VOICE closure; N40/N50/N51/DAILY BITE/other owners unchanged.

Handoff retained with same owner: next action is specific approval for activating the existing AI_OWNER_ASSISTANT in virtual MYWORKSTATION LAB only, then legitimate existing Owner authentication and normal module/scope acceptance. Company activation would cover its two current virtual stores; no real customer/company grant, credential reset, new account or pricing/plan change. No activation performed/pre-approved by this receipt. After that acceptance, next bounded capability is sales by exact product/date/current store. Immediate checkpoint/active/manual/pending/tracker/PDF publication required before pause; completed support retention/query removed from pending, independent residual retained.

10/10/2026 18:40 Athens — VOICE-ASSISTANT-01 / tracker32: ASSIGNED Owner cash entry / NOT TESTED

Owner codex/unified-voice-assistant-20261010 retained; related tracker32/printed30 has no named current implementing owner. Explicit user «ο ιδιοκτητης θα το εχει με module μονο για τα δικα του καταστηματα» and «συνεχισε». Bounded claim: existing AI_OWNER_ASSISTANT entry in CommerceHub, exact active selected store/current authorized company, canonical Owner cash source, opt-in voice/text and server module/role/store revalidation before provider, around reads and before returning an answer. No N40/N50 hierarchy/N51 StoreCloudPage redesign or other owner takeover.

Protected input USER PASS and current-date Platform cash LIVE PASS published PR2130/main4b8ffe0c; sourcePR2123/release818d3f45. Owner capability currently absent/NOT TESTED, existing module commercialReady:false. Same OpenAI connection; fixed canonical GET/original session, strict date only, whitelisted report fields, closed shifts/call limits, no model/client scope/URL/SQL/write. Missing/foreign/inactive store, ordinary non-Owner, revoked company/role/session, inactive license/module or store override must fail before I/O. Existing authentication/OwnerCompanyAccess and store module rules reused, no empty-to-global fallback. Selected store/company/module changes abort speech/Ask and reject late results.

Catalog can become available only for the implemented bounded cash capability, without automatic entitlement/price/credential/company-access grant. No new business/schema/financial/stock/fiscal operation. Read current AGENTS, active list, relevant module/auth/Owner/N51 checkpoints, manual/tracker/pending and mainhistory; preserve canonical calculations and all previous PASS. Full CI/exact healthy release required before live acceptance. Independent normal Owner enabled/disabled module, own/foreign/empty/inactive/switched-store and revocation/source failures remain separate from SuperAdmin support preview/CI. No security-sensitive test activation by this claim.

Overall VOICE and32 OPEN/ASSIGNED. Sales/product/date/current-store and other domains/POS rollout remain future bounded work. Single next action after green claim/main: Owner cash entry source implementation and regression tests. Assignment retained until completion or named handoff.

10/10/2026 18:26 Athens - DAILY-BITE-IMPORT / PASS / definitive catalog saved

Owner/completion: codex/daily-bite-browser-acceptance-20261010; original user-authorized handoff, issue #2054 importer scope only. Browser and Excel chooser worked. Synthetic LAB PASS published in PR #2134 (head fa61b731, full CI 38062587961 SUCCESS, merge e3d967c0); no replay or cleanup. DAILY BITE remains 9 departments; LAB remains 10.

Actual definitive import: SuperAdmin Χρήστος Μάνης, cloud BackOffice, DAILY BITE E E / company cmv25lf0w000seegf1cn4bbmx / store cmv25lf3h000ueegf0kkii3pb, healthy revision 3dd1c1d2ff1f1ad2a0bbea15dae3dfc440026062. Original Excel SHA256 2307c282c299d2716af17078315ab9b461e5748521dd9eff0dce80bb64fe8ff2 unchanged. Preview 8753 CREATE / 0 UPDATE / 0 INVALID checks all source barcodes, precision and exact existing departments. One final click; transaction timestamp 15:16:46.106Z (18:16:46 Athens), all 8753 products saved atomically. No second import.

Independent full source readback, 15:25:40Z: 8753 Product and StoreProduct records, all active, all stock 0, 9306 exact SKU/barcode pairs including 164 leading-zero barcodes. Every source SKU/name/purchase price (6 decimals)/retail price (4 decimals)/VAT/existing department/register/unit/active/store price/category/subcategory matches the source canonical MD5 ef47586e7ad50b0ca269a9062f4c7c8c; barcode pairs MD5 c0dd05b17ec69cf78b7020726a27e5a3. Direct product-only native-department-ID digest 9fa4c37c7fc1f4e92db3354fc4cd69a8 also matches; retail sum 33263.22. All 7658 supplier links/codes match source digest a109a6653226b2a6eb973318335957a0. All 199 held and 878 excluded source SKUs absent. No rounding or partial import.

Controls/limits: all 9 saved departments whole rows identical; DAILY movement/sale/payment/shift/transaction counts remain 0. Other-store stock count remains 6874, but its whole-row digest changed: 81 KAT records were updated at 15:16:04-06Z, BEFORE this import transaction. This is concurrent work, not an unchanged-control PASS; no attribution of those writes or claim to that owner. LAB importer controls retain their separately measured PASS. First large post-import read/UI refresh failed with temporary-file space/timeout while pre-import PostgreSQL statistics were stale; automatic ANALYZE completed at 15:19:00-33Z, then fresh full SQL and one UI Refresh succeeded. No database maintenance write, source fix or reimport. Browser now shows 8.753 items / 88 pages / stock 0. Evidence CHECKPOINTS/EVIDENCE/daily-bite-acceptance-20261010/daily-{before,after,source-summary,verification,barcodes,suppliers,excluded,import-timing}.json and daily-result.jpg.

Closed: browser/chooser, synthetic LAB importer, original preview/conflicts and definitive exact catalog import. Current importer PASS supersedes historical OPEN/BLOCKED/no-product entries below; preserve their history and other owners/PASS. **Not tested:** fiscal/POS/physical devices/other roles/load; wider DAILY BITE setup and issue #2054 are not closed by this catalog import. Next: use the existing saved catalog; never repeat the original import or create departments for documentation. Final shared publication awaits this documentation PR's green CI and main merge.

10/10/2026 18:08 Athens — DAILY BITE synthetic importer LAB PASS; real catalog OPEN

Owner codex/daily-bite-browser-acceptance-20261010 retained after merged namedhandoff2132/f5940c69/CI38062292497 SUCCESS/mergeee04faf6. Source exacthealthy3dd1c1d2 before one finalimport, source2120 unchanged. Realcatalog NOT TESTED; preserve otherowners/PASS. This limited LAB closes the browser/synthetic residual only; overallDAILYBITEimport OPEN pending realacceptance.

10/10/2026 18:04 Athens — DAILY BITE browser acceptance / named handoff / ASSIGNED

ΑΝΑΛΗΨΗ ΑΠΟ codex/daily-bite-price-precision-20261010 / records codex/daily-bite-live-acceptance-20261010 — ASSIGNED codex/daily-bite-browser-acceptance-20261010, explicit user handoff and same approved scope, issue2054. PR2120 and2128 merged; historical2096 superseded. Preserve other owners/PASS; no department recreation (DAILY9/LAB10), schema/fiscal/permissions/otherstore changes. Read AGENTS, current active/pending/tracker/numbered/manual and relevant checkpoint/source history. Since released92e7fbf4 there is no change to source-workbook importer/precision files through e5c4b76e. Fresh health3dd1c1d2ff1f1ad2a0bbea15dae3dfc440026062/ok.

Fresh supported browser positively authenticated SuperAdminΧρήστοςΜάνης. Actual chooser/setFiles succeeded with only two-row synthetic LAB workbook, not real catalog. Read-only preview in ΕΡΓΑΣΤΗΡΙΟΔΟΚΙΜΩΝ/cmtpopbgo000trhb5ng9ytiru:2CREATE/0UPDATE/0INVALID; no finalimport. Original ZIP resolved and originalXLSX SHA2562307c282c299d2716af17078315ab9b461e5748521dd9eff0dce80bb64fe8ff2 unchanged. Actual read-only SQL15:03:51Z:costNUMERIC16,6;LAB95products/10departments;DAILY0products;LAB-DB-PREC-20261010-A fixtures0. Nine LAB source definitions match exact registers/codes/VAT/commerce, exemption27. Browser MAIN11/cash4/card0/IRIS0/total4; controlLAB-POS-02count2/total0. No productwrite or importerPASS yet.

Required before one LAB finalimport: merged namedhandoff, fresh recorded SQL/control before values and health. Fixture A-1 purchase0.719037/sale2.25/VAT13/register1/barcodes9901010202601+0001010202602; A-2 purchase0.64602/sale10/VAT0/register9/barcode9901010202603,stock0. Held/excluded sheets must remain absent. Independently compare preserved preexisting stock/movements/sales/payments/shifts/transactions and otherstore controls after one action. Only measured LABPASS allows originalDAILYpreview8753CREATE/0UPDATE/0INVALID/9306barcodes then oneatomicimport/exactsource-readback. No repeat/rounding/partial catalog import. Importer remainsOPEN; single next action mergedhandoff then measured LABimport. Physicaldevice/POS/fiscal acceptance outside scope.

10/10/2026 17:55 Athens — VOICE-ASSISTANT-01: περιορισμένο LIVE PASS canonical cash / συνολικό OPEN

Authoritative receipt and retained assignment: codex/unified-voice-assistant-20261010. Supersedes AWAITING LAB only for the current-date Super Admin cash question below; earlier input USER PASS remains protected. Source PR2123 final head aaa4911fda464b62b7527906127e9f11f93ff3fc, full CI38060136221 SUCCESS (2157 tests, fail0/skipped0), merge 1fa8db3c8b6cee625debb1ec5459628aed76cd6a. Subsequent N51 source release 818d3f45ad4afd2de5f461701c07b7c94389a34e includes this unchanged feature; full main CI38060563876 attempt3 SUCCESS (2157 tests), guarded Render38061084383/job114239344601 SUCCESS, pinned revision818d3f45. The deploy run's top-level head1eee57b0 is a docs revision, not the pinned production revision. Rollback captured, not executed. Own mainCI38060352349 cancelled by concurrent main work; never treated as deploy proof. Browser health at2026-10-10T14:53:58.567Z: ok=true/version0.22.0+kat-test-pos/exact revision818d3f45. Health identifies server; client commit SHA not independently sampled, new source table/subtitle visibly loaded after reload.

Actual browser: cloud Chrome1, canonical Platform Admin, existing authenticated Super Admin «Χρήστος Μάνης» session; no login/credential entry or physical microphone activation. Typed exact question «που έχουμε πρόβλημα δείξε μου το πρόβλημα μετρητών» → explicit «Ρώτα» → genuine provider answer and canonical evidence table observed14:54UTC. Scope2026-10-10 /00:00–23:59/Athens/all stores/closed shifts. One row MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ / MAIN / close10/10/26 08:13; evidence sessionID 4d853b34-4ce3-4086-970e-14537cf1fd7b; expected5.50€, counted0.00€, cash difference−5.50€, POS–EFTPOS0.00€, full rule. «Άνοιγμα Ταμείων» opened normal canonical report; fresh visible report14:55:11.763Z used identical date/full-day/all-store filters and showed one LAB POS2 shift, same label/MAIN/close08:13, shortage5.50€/net−5.50€/card0.00€. This matches the earlier read-only baseline (around14:37UTC) for these fields. Report UI did not expose sessionID, expected or counted independently; do not call those separate independent reconciliation PASS. Screenshot CHECKPOINTS/EVIDENCE/voice-cash-20261010/voice-cash-live-1791644093231.jpg.

LIVE PASS is bounded to actual current-date query/provider response/source evidence and company/store/shift/closing date/cash-card variance reconciliation. No new sale, return, payment, closing, stock/audit correction, email, approval or module activation. Global ledger/stock/business-count invariance not independently measured; normal read/auth/usage telemetry may occur. Historical/no-data/source denial/timeout/Twin change and100-row truncation have CI cases but no new live PASS here. Physical device, Greek speech accuracy and monetary AI cost not independently measured. Provider prose includes implementation vocabulary; plain Greek answer wording remains a usability residual. Exact causes/audit events are not retrieved by this bounded tool; no blame or financial adjustment inferred.

Owner requirement retained: existing AI_OWNER_ASSISTANT only with active module and the Owner's authorized own companies/stores, server checked on each request; selected-store scope, no empty-to-global fallback, late results invalidated, explicit authorized «όλα τα δικά μου» only. Existing commercialReady:false remains locked, no license/grant/price change. Owner UI/capability/isolation is NOT IMPLEMENTED/NOT TESTED and must never inherit the Platform global reader. Sales by product/date/store, remaining domain tools and POS/Backoffice entry remain OPEN; no full VOICE completion or numbered task closure. Existing N40/N50/N51 and other owners/PASS unchanged.

Handoff before pausing: completed basic input USER PASS + above bounded cash LIVE PASS; same owner retains all residual. Single next action: implement the existing Owner module's guarded entry and canonical Owner scope, publish bounded source/CI/exact release, then test enabled/disabled module and own/foreign/empty/switched store cases before Owner release. Do not repeat the completed current-date cash question solely for evidence. Checkpoint and Super Admin manual below plus current tracker/pending/PDF are authoritative.

10/10/2026 17:36 Athens — No33 mounted CLOSE OFF/ON: περιορισμένο LIVE PASS

Same owner codex/operator-checkbox-audit-20261009, No33/tracker35 **OPEN**. Μετά mainPR2122/head2c3207d5/CI38059970093SUCCESS/merged49007633 της νέας πώλησης/επιστροφής, ελέγχθηκε επιπλέον ήδη ανοικτό CLOSE σε normalLABPOS2EMPLOYEE/cart0queue0. Συνολικό No33 OPEN: partial-item/card/mixed/negative return, immutable ledger, αρχικόταμείο/κλείσιμο, φυσικήεκτύπωση, υπόλοιπα roles/company/store/modules και Online limits. Επόμενο σκέλος αρχικόταμείο/κλείσιμο με φρέσκες baseline και διαθέσιμο QR/καταμέτρηση. Νέα έγκριση συνεχίζει να ισχύει· όχι νέα επανάληψη ήδη δοκιμασμένων flows.

10/10/2026 — VOICE-ASSISTANT-01: περιορισμένο USER PASS και διεύρυνση αιτήματος

Ο ιδιοκτήτης επιβεβαίωσε «δουλευει πολυ καλα» για τη φωνητική εισαγωγή. Η συνημμένη εικόνα image(20261010-141257).png δείχνει την ερώτηση «που έχουμε πρόβλημα δείξε μου το πρόβλημα μετρητών» και ζωντανή απάντηση του υπάρχοντος βοηθού. Περιορισμένο USER PASS: φωνητική εισαγωγή στο υπάρχον πεδίο και εμφάνιση απάντησης. Η εικόνα αποδεικνύει επίσης το υπόλοιπο: μόνο συγκεντρωτικό snapshot με ένα πρόβλημα μετρητών, χωρίς κατάστημα/βάρδια/αναλυτικές εγγραφές. Δεν αποτελεί PASS αναλυτικής ανάκτησης, οικονομικής ακρίβειας, όλων των συσκευών/ελληνικών διατυπώσεων ή tenant isolation. Φυσική συσκευή/browser/μικρόφωνο και ακριβής client/server revision της δοκιμής δεν καταγράφηκαν ανεξάρτητα. Τελευταίο επαληθευμένο source release: PR2104, revision d7520c9fefa233551820a26d986ab50b81e16a89, exact full CI38056825294 SUCCESS / mainCI38057041198 / guardedRender38057218388 / browser health13:53:02.470Z. Καμία επιχειρησιακή μεταβολή από αυτή τη δοκιμή δεν τεκμηριώνεται.

Owner παραμένει codex/unified-voice-assistant-20261010, συνολικό VOICE OPEN / ASSIGNED. Νεότερες ρητές οδηγίες: «θα πρέπει να εχει πληρη προσβαση σε ολο» και «ο ιδιοκτητης θα το εχει με module μονο για τα δικα του καταστηματα». Super Admin: όλες οι επιτρεπόμενες κεντρικές read-only δυνατότητες. Ιδιοκτήτης: βοηθός μόνο με ενεργό module και μόνο εταιρείες/καταστήματα στα οποία έχει τα υπάρχοντα δικαιώματα· έλεγχος πριν από κάθε ανάκτηση στον server, όχι από prompt/client. Σε επιλεγμένο κατάστημα μόνο αυτό, ακύρωση καθυστερημένων αποτελεσμάτων μετά την αλλαγή, κενή επιλογή δεν ανοίγει εταιρική πρόσβαση. Κεντρικό «όλα τα δικά μου» μόνο με ρητή επιλογή και κατάλληλο δικαίωμα. Διατηρείται η ίδια υπάρχουσα OpenAI σύνδεση· καμία νέα βάση/κλειδί/project, αυτόματη επιχειρησιακή πράξη ή ενεργοποίηση module σε εταιρεία. Πρώτο επόμενο bounded σκέλος: canonical read-only λεπτομέρειες προβλήματος μετρητών (κατάστημα/βάρδια/ημερομηνία), κατόπιν πωλήσεις ανά είδος/ημερομηνία/κατάστημα και επέκταση ανά domain. Κάθε capability χρειάζεται permissions/module/store guards, αρνητικά CI cases και πραγματική συμφωνία με την υπάρχουσα πηγή. Δεν αλλάζουμε canonical οικονομικούς υπολογισμούς ή αναθέσεις άλλων owners (N40/N50/N51 κ.λπ.).

10 Oct 2026 17:04 Athens - No40 authorized read-request diagnostics; ASSIGNED / OPEN

Same owner codex/n40-full-twin-navigation-audit-20261010. User explicitly authorizes remaining work to achieve real PASS. Expanded bounded scope: additive read-only request trace for Twin-origin GETs only in ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru); sanitized route/company/store/status/correlation metadata only, no credentials, cookies, request/response bodies, personal fields or new authority. Existing authorization and other modules/owners unchanged. Trace is diagnostic evidence, not authorization. No business mutations or second-store business activity. Prepare privacy/dispatch/error tests, full CI, then reviewed exact release for real LAB observations; no live PASS before observed. Existing claim/owner retained.

Render workspace explicitly confirmed by user: My Workspace tea-d9ie26vaqgkc739uudqg; service srv-d9isenfavr4c73bdh52g. Read-only request logs13:45-14:03UTC empty. Latest Render deploydep-db5452flk1mc738m7arg LIVE/source d7520c9fefa233551820a26d986ab50b81e16a89 at13:51:52UTC; cachedclient not proven equal. Concrete new release reason: request-observation gap, not rerunning the original release. No new deploy yet.

Restricted POS denial PR2111/CI38057489300/mainc2026208 protected; Stock6097485640 and visual1-14 not repeated. Normal company User creation is not exposed in operator/Workforce UI; no fixture manager, password or account authority changes in this diagnostics patch. Appropriate restricted Backoffice identity remains a separate necessary acceptance preparation. No40 overall OPEN. Remaining role/module/revocation/race and Stocksupport audit NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-read-trace.md.

10/10/2026 16:35 Athens — No33 θετική Online ανάγνωση Master: περιορισμένο LIVE UI PASS

Owner codex/operator-checkbox-audit-20261009, No33/tracker35 **OPEN**. Μετά το mainPR2103/head6e9e6e26/CI38055244171SUCCESS/mergeded33c60e της ανεξαρτησίας επιστροφών/βάρδιας, έγινε ένα νέο μη οικονομικό σκέλος. NormalLABPOS2EMPLOYEE/αρχικά23/καλάθι0/ουρά0/catalog94: authoritativeMasterδείγμα «MONSTER LANDO NORIS 500GR», sourceCode100150, παρατηρήθηκε πρώτα read-only στοPlatformMaster. Η ακριβής περιγραφή δεν βρέθηκε στοτοπικόPOS· Enter εμφάνισε τοOnlinebutton. Μία επιλογήOnline επέστρεψε «Πηγή: MASTER CATALOG», σωστή περιγραφή καιbarcode5056784907382 στηφόρμα πρότασης νέου είδους. **Ακύρωση**, κανέναSubmit/νέοπροϊόν/barcode/stock/financial/shift/fiscalaction. VOICE-ASSISTANT-01 — SOURCE DEPLOYED / AWAITING PHYSICAL LAB — 10/10/2026 16:53 Athens

Owner remains codex/unified-voice-assistant-20261010; no transfer/release. First bounded Greek voice input merged PR #2104 at d7520c9fefa233551820a26d986ab50b81e16a89 after exact-head full CI38056825294 SUCCESS (2123 tests PASS, zero failed/skipped, build, Windows, production invariants and isolated PostgreSQL/HTTP E2E). Main full CI38057041198 SUCCESS. Guarded Render38057218388/job114228066922 SUCCESS; rollback captured and not executed. Fresh actual browser health at2026-10-10T13:53:02.470Z: ok=true/version0.22.0+kat-test-pos/exact revisiond7520c9fefa233551820a26d986ab50b81e16a89. Health attests server; cached authenticated client SHA not independently verified.

Existing OpenAI connection/key/model retained as selected by user. Released scope only: reusable opt-in speech controls/controller in the existing Super Admin snapshot question form, editable final text, explicit «Ρώτα», Greek recognition request, stop/cancel/error/unsupported fallback, late-result cancellation on store switch/disappearance, visibility/unmount, and separate provider-reported token telemetry. No new project/key/paid service, provider call from client, audio upload to our API, automatic listening/submission/action, role/module/fiscal/data mutation or report-tool claim. The browser may use an external recognition service, disclosed before activation. Real monetary cost remains unverified, not derived from token logs.

Physical microphone/camera/Android recognition, Greek accuracy, authenticated responsive UI and live provider response remain NOT TESTED. Canonical platform-admin opened in the actual cloud browser showed the Super Admin login form; no credential entry, login attempt, business action or microphone activation performed. Isolated UI/controller/handler tests do not become LAB/USER PASS. Existing visual1–14/N40/N49/manual evidence and other assignments preserved. Overall VOICE-ASSISTANT-01 OPEN / ASSIGNED / DEPLOYED INPUT / AWAITING LAB; no manual PASS or numbered task closure.

Remaining requested scope: canonical sales by exact product/date/current store, POS/Backoffice input entry, other authorized read-only domain tools, ambiguous-entity/date clarification, source/filter/report reconciliation, role/module/tenant negatives and optional answer speech. Single next action: read-only acceptance of the released input on an identified actual LAB terminal/operator/browser/microphone (speak → review/edit → explicit Ask, cancel/error/context change), with exact revision and observation, before the next bounded report capability. No synthetic sale or business mutation is needed. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-unified-voice-assistant.md.

10 Oct 2026 16:52 Athens - No40 restricted operator POS denial: scoped browser PASS; overall OPEN

Owner unchanged codex/n40-full-twin-navigation-audit-20261010. New virtual fixture n40_audit_20261010 in MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru) only. PIN established by user manual handoff (hash-save success observed, no credential read). Explicit user activation approval16:47:50; saved/reopened active=true, POS=false, EMPLOYEE, business rights remain unchecked. Activation PR2109 finalhead fa761082b29e0c51e970f0d825cbe2f9df6deef8, CI38057285819 SUCCESS, confirmed merge b1391199789c6cda3cfc351d99ba469dda8f6410.

Actual restricted login attempted once through secure browserAuth, fixture selected in the correct store PIN form, returned submitted. Fresh browser showed heading “Δεν ολοκληρώθηκε ο έλεγχος βάρδιας” and exact denial “Η πρόσβαση POS του χειριστή έχει απενεργοποιηθεί από το BackOffice.” with Retry/Change operator buttons. Sales POS did not open. Scoped PASS: disabled POS is visibly enforced for this active virtual operator during the post-PIN entry/shift check. Do not interpret as successful POS access or proof that the initial login HTTP request itself returned403. No status/payload capture, no specific endpoint403 or tenant isolation claim. Evidence CHECKPOINTS/EVIDENCE/n40-restricted-fixture-20261010/n40-pos-denied-1791640349982.jpg.

Fixture count3->4 from setup, no duplicates or existing identity edits. No sale/payment/stock/shift start/close/device/scheduling action. Login/audit activity is expected but independent DB/audit delta not measured. Backoffice restricted User, same-store request trace, cross-tenant/role, races/revocation remain

NOT TESTED; browser has no network capture API. Latest independently observed server55819e98 (not reverified for this cached client). No code/deploy. No40 OPEN, prior visual1-14/Stock6097485640/PR2092/2097/2101/2107 preserved. Retain original assignment. Next: obtain permitted authenticated request observation and appropriate restricted company User for remaining Backoffice authorization criteria, without widening this POS-disabled fixture or repeating previous acceptance.

10 Oct 2026 16:49 Athens - No40 fixture activation verified; OPEN / AWAITING RESTRICTED LOGIN

Owner unchanged codex/n40-full-twin-navigation-audit-20261010. User completed PIN handoff: browser displayed exact PIN-hash save success; no credential read or extracted. User explicitly confirmed activation at 16:47:50. Only n40_audit_20261010 in MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ activated via saved profile. Reopened browser evidence: active=true, POS=false, EMPLOYEE selected; existing business/ordering rights unchanged and unchecked. List remains4. No sales/payment/stock/device/scheduling action or existing operator edits.

Opened canonical store login for cmtpopbgo000trhb5ng9ytiru: correct LAB heading and new fixture in active employee list, selected for PIN login. Login not yet submitted; credential collection exclusively secure browserAuth. No successful/denied authentication, authenticated403, tenant/request isolation or revocation PASS claimed. Actual network capture unavailable in documented browser APIs. No40 remains OPEN; prior visual1-14/Stock6097485640/PR2092/2097/2101 protected. Setup PR2107 merged a2374a9b3817f81f1badfe06be7d2fbe441d7b68, CI38056551883 SUCCESS. No code/deploy; live revision not reverified during this setup (last observed55819e98). Next action: securely submit this fixture PIN once and observe whether disabled POS rejects entry; then record actual result. Screenshot n40-activated-1791640106641.jpg accompanies this session. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-restricted-fixture.md.

VOICE-ASSISTANT-01 — κοινή φωνητική είσοδος / SOURCE READY / AWAITING LAB (2026-10-10T13:30:01.232Z)

Owner remains codex/unified-voice-assistant-20261010; source branch feat/unified-voice-input-20261010. Claim PR #2100 merged 944f3d901a297b9798c65ae2ac45b4e240ea26db after documentation CI38054844508. User selected reuse of the existing OpenAI connection («προτεινω να κρατησουμε την ιδια»). No new credential/project/provider/service configured.

First bounded source addition: opt-in Greek browser speech input in existing Super Admin Command Center; editable final text, explicit «Ρώτα», stop/cancel, unsupported/denied/silent/timeout fallback, no background restart, discard on selected-company/store change, hidden tab and unmount. Existing server-only OpenAI key/model and Super Admin/snapshot limits retained. Optional validated inputChannel defaults to text; token telemetry distinguishes VOICE_ASSISTANT/COMMAND_CENTER, contains no question/audio/key, and never invents dollar cost or missing tokens. Browser recognition may use its own external service; disclosed before activation.

Node20 isolated local tests: 26 PASS (8 controller/usage, 1 mounted actual Command Center/voice controls, 2 actual schema/ask-handler tests, 15 existing snapshot regressions). Mock speech/API tests are not physical microphone or LAB acceptance. PR #2104 head141a86419c7c980b9eea1872824825d84d2f4ab8 full source CI38056162735 SUCCESS. Pre-merge reconciliation onto maine50b54ce7b102c2dbd2cf8fc2ae39e9406531ba8 preserves new N49 PASS and N40 restricted-fixture claim; final-head full CI, merge and exact healthy deployment remain pending. Selected-store disappearance also cancels the recording and rejects queued speech in the mounted test. No authenticated LAB, live provider call, microphone/camera/Android accuracy, responsive browser observation or report acceptance claimed; no business/fiscal/data/device mutation. Manual PASS and dated numbered checklist unchanged. Supersedes previous implementation-NOT-TESTED wording only for the described local source/tests; overall VOICE-ASSISTANT-01 OPEN / ASSIGNED / AWAITING LAB.

Remaining: physical microphone input acceptance, canonical item/date/current-store sales lookup, POS/Backoffice entry and other domain tools/role/module authorization, optional answer speech. Existing N40, AI credit alerts and all other assignments/PASS preserved. Next: full CI and release of this bounded input change, then actual read-only LAB acceptance before expanding tools. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-unified-voice-assistant.md.

Final pre-merge readback: unchanged application source; headcef1622825be78187dee7f1fb3ab5f384742da2f full CI38056499332 SUCCESS. Reconciliation additionally preserves current maina2374a9b3817f81f1badfe06be7d2fbe441d7b68 / PR2107 restricted-LAB fixture observation; no fixture, role, credential or permission edited by VOICE scope. Exact final CI/deploy remain pending.

10 Oct 2026 16:38 Athens - No40 restricted fixture PREPARED; OPEN / awaiting credential handoff

Owner remains codex/n40-full-twin-navigation-audit-20261010. Authorized claim PR2106 merged to main e50b54ce7b102c2dbd2cf8fc2ae39e9406531ba8, final head 7e65d2a402d6b4bc8793aaf2bc296ac18a9be2fd, CI38056349373 SUCCESS, before creation. Browser owner session MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru) only.

Actual browser setup at 16:36:51: new n40_audit_20261010 / N40 Εικονικός Έλεγχος 20261010, EMPLOYEE, inactive, blank PIN/email/phone. Operator list with active filter OFF changed 3 -> 4, new record exactly once, last login absent. Only new fixture edited: POS access disabled, credential remains inactive, 21 visible business checkboxes and orders permission unchecked. Save success observed; reopening the same record shows POS and active unchecked and EMPLOYEE selected. Existing three operators retained; no existing identity/No33 permission copied or changed. Account-only mutation; no sales/payment/stock/device/scheduling action. No independent DB/audit delta measured. Screenshot evidence n40-restricted-fixture-1791639450610.jpg held with this session.

Correction to preparation plan: this operator UI has no Backoffice read-access control. It exposes POS orders only; no minimal Backoffice grant was made. Store-scoped operator is not a normal company User. Restricted login, authenticated tenant/role/403, race/revocation and actual request-store isolation remain NOT TESTED. Browser APIs have no network capture capability; network authorization recorded but no authenticated trace obtained. PIN entry/confirmation/submission must be completed by user through manual browser handoff, per browser credential policy; no PIN generated, entered, printed or extracted by agent. No activation or access grant performed.

No40 remains OPEN, prior visual1-14/Stock6097485640/PR2092/2097/2101 protected. No deployment or code change in this setup. Next action: secure user PIN establishment for this fixture, keeping it inactive; then explicitly review any activation and test only supported restricted operator flow. Remaining normal Backoffice authorization checks require an appropriate restricted User fixture and a permitted request-observation capability. Current server revision last independently observed 55819e98851a89eb55f59c42ae1ee37b1517ee4f; not reverified during this fixture setup, cached client hash unverified. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-restricted-fixture.md.

10 Oct 2026 - No40 authorized virtual single-store fixture; ASSIGNED / OPEN

Owner unchanged codex/n40-full-twin-navigation-audit-20261010. User explicitly authorized creation of a new virtual restricted-access user and network checks at 16:27 Athens. Expanded scope only: new N40 fixture in MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ (cmtpopbgo000trhb5ng9ytiru), existing accounts/No33 rights untouched. No sales/payments/stock/scheduling/module/device changes. Prior visual1-14/Stock6097485640/PR2092/2097/2101 retained; No40 OPEN.

Prepared unsaved new operator form: username n40_audit_20261010, name N40 Εικονικός Έλεγχος 20261010, role EMPLOYEE, active false, no PIN/email/phone. Baseline current operator list with active filter OFF: 3 existing operators (2 previously visible active); no N40 fixture. Create only this inert record after this claim is green and merged. Then disable POS and business permissions and prepare minimal Backoffice read access while credential remains inactive. Credential/PIN establishment requires secure user handoff; actual access grants require browser action-time confirmation. Do not expose credentials or reuse existing operator identities. No before financial/stock delta claimed: account-only change, no business action; audit count not independently captured yet.

Source inspected at 896b955d6896c5eccfc91a7bfb786c511201e0e0: normal User is company-bound; store operator credentials/profile are store-bound. An operator fixture does not equal a company-owner account. Network approval does not add a tool capability: documented browser API exposes console logs but no network capture; no permitted authenticated request trace is available yet. No token extraction, injected fetch or network interception outside browser APIs. Restricted fixture and all remaining server tenant/role/race/revocation tests NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-restricted-fixture.md.

10/10/2026 — N49 / TODAY-07 — scoped mobile web LAB PASS / COMPLETED

Owner codex/n49-unknown-barcode-acceptance-20261010 completed the agreed numbered49 residual; final documentation branch codex/n49-final-pass-20261010. Explicit mobile new-entry requirement15:40:56 included. Older49ASSIGNED/AWAITING rows below are historical and superseded only for this agreed scope. Tracker/numbered/manual/active/pending and bothPDFs synchronized in this closingPR.

10 Oct 2026 16:22 Athens - No40 existing LAB owner session diagnostic; OPEN

User confirmed existing restricted account and securely signed in through browserAuth (credentials never returned to agent). Fresh normal Backoffice showed MYWORKSTATION LAB only, operator Υπεύθυνος Εργαστηρίου, and both LAB stores. Opened only ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ; correct Backoffice heading and target-only confirmation labels. No mutations or device actions. Canonical Platform Admin navigation showed its separate Super Admin/2FA sign-in screen; normal LAB session remained active when returning through the normal Backoffice link. This is observed UI access behavior, NOT an attributable authenticated endpoint403/tenant rejection. The account can access both LAB stores, so it is company-restricted, not the single-store fixture needed for cross-store negatives. Never open the isolated-label store for this task.

The restricted normal Backoffice session is now available; the remaining blocker is attributable HTTP requests plus an existing single-store account/fixture for endpoint/race/revocation/module negatives. Source/central Audit cannot supply GET traces and documented browser API has no network capture. No40 stays OPEN; owner unchanged. Keep prior Stock/UI acceptances. Next concrete action requires a permitted request-observation capability; do not keep repeating visual round trips as a substitute.

10 Oct 2026 16:13 Athens - No40 camera diagnostic; OPEN

Owner remains codex/n40-full-twin-navigation-audit-20261010. One read-only diagnostic of the existing Full Twin camera destination, solely MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ: existing Video Events configuration loaded normally (active configuration, OFFLINE connector, one camera); no module-not-active 409 shown. Closed with Πίσω without saving, returned to same Full Twin. This is a diagnostic non-reproduction, not a new broad module/authorization PASS; prior visual phases 1-14 and Stock evidence remain protected.

Fresh main 689fe33b197c33009b3f4a1155e78cffd573973e source: AiCommandCenter loadTwinDevices makes per-store installation-terminals/device-routing/video-connection reads for the central all-store overview and maps failed video reads to ΜΗ ΔΙΑΘΕΣΙΜΟ. Current UI shows this unavailable state on other customers and OFFLINE/one camera on target LAB. This is a plausible source explanation for historic un-attributed 409 logs, not proof identifying their caller. Do not change modules or classify LAB failure from those shared log lines.

Fresh /api/health after this diagnostic: ok true, version 0.22.0+kat-test-pos, revision 55819e98851a89eb55f59c42ae1ee37b1517ee4f (newer than previous health). No deployment performed by this assignment; cached browser client revision remains unverified. Browser console available but no HTTP request capture; platform-commercial-audit captures mutating methods only and cannot supply this GET trace. No credential extraction, injected fetch, permission changes or device commands.

No40 remains OPEN. Concrete blockers: permitted browser APIs expose no attributable request/response trace, Render historical request logs were empty, and no attributable endpoint role rejection has been observed. A company-restricted LAB owner session is now available as described above. Next required capability: attributable same-store GET observation and secure existing restricted-role sign-in without changing permissions. Remaining races, revocation/module negatives and Stock support-exit Audit NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-camera-diagnostic.md.

10/10/2026 16:13 Athens — No33 ανεξαρτησία προβολής βάρδιας: περιορισμένο LIVE PASS

10/10/2026 — VOICE-ASSISTANT-01 / ASSIGNED / implementation NOT TESTED

Owner codex/unified-voice-assistant-20261010. Explicit owner request «Ναι θέλω για όλα φωνητικό βοηθό»: common Greek press-to-talk assistant in POS, Backoffice and central management; editable transcript, exact current-store/role/module scope, genuine canonical report data and visible ambiguity/date resolution. Initial voice input then dated product-sales report, followed by independently accepted stock/invoice/supplier/payment/expenses/cash/workforce/pending/navigation capabilities. Changes/messages/payments/finalization require preview and explicit existing-form confirmation; no voice-autonomous fiscal/financial write.

New independent extension, not takeover of N40/AI-CC-LIMITS, AI-CREDITS-01, invoice, operator, catalog, DAILY BITE or other owners. Current source ask supports only SuperAdmin snapshot Q&A; arbitrary dated product sales and all-module execution do not exist by this observation. Source baseline689fe33b; real browser health55819e98/ok/version0.22.0+kat-test-pos. Prior phase1–14/manual/N40/other PASS preserved. All new voice/report/role/device behavior NOT TESTED; no business/LAB mutation. Read current AGENTS/registers/manual/phase3 checkpoints and scoped mainhistory. Publish claim greenCI/main before code. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-unified-voice-assistant.md; next common opt-in speech input and regression tests. Assignment retained until completion/named handoff; full module rollout OPEN.

10 Oct 2026 — No40 / AI-CC-LIMITS — read-only authentication evidence; OPEN

Same owner codex/n40-full-twin-navigation-audit-20261010. Prior visual phases 1–14, Stock USER evidence comment 6097485640 and five browser round trips recorded by PR #2092 are preserved without replay.

At 12:44:31–12:45:36 UTC (15:44–15:45 Athens), 14 real production GET requests across seven source-derived read endpoints returned 401: seven without Authorization and seven with an intentionally invalid token. No business data was returned. This verifies only rejection before authenticated context resolution; nonexistent n40-invalid-context placeholders do not establish LAB tenant isolation, permitted-role access, revoked access or module authorization.

Render workspace explicitly confirmed by the owner: My Workspace; matched service srv-d9isenfavr4c73bdh52g / canonical myworkstation-app. Request-log query for 12:33–12:38 UTC returned an empty collection (hasMore false). No request trace is therefore available to validate the earlier browser request scopes. Application logs for 12:33–12:46:30 UTC contain repeated VIDEO EVENTS module-not-technically-active errors with status 409 at videoStoreContext, and seven malformed-JWT validation messages at the negative-probe times. The 409 entries omit store/request identity: temporal overlap is not proof of the LAB caller or cross-store leakage. Camera navigation/UI PASS is preserved; module acceptance and this error remain unresolved.

Observed server revision remains 6b08e72a9c14f973a62cc1e3a43f8600aef9fef4. No deployment, source change, business mutation, analysis execution, permission edit or device command. No40 remains OPEN. Remaining: attributable request-level same-store evidence, authenticated role/module/revocation negatives and network races, client revision attestation and Stock support-exit Audit. Next action: obtain an authorized attributable request trace and suitable read-only role fixture; investigate VIDEO EVENTS 409 without enabling/changing modules. Detailed checkpoint: CHECKPOINTS/CHANGES/2026-10-10-n40-authentication-readonly.md.

10/10/2026 15:38:03 Europe/Athens — N49 / TODAY-07 / ASSIGNED

Explicit user «ανελαβε το49». ΑΝΑΛΗΨΗ ΑΠΟ υπάρχουσα TODAY σελίδα / agent/today-ui-verification-20261004 — ASSIGNED codex/n49-unknown-barcode-acceptance-20261010 for numbered49 only: unknown barcode in active inventory, attach existing own-store product or create new, return to the same active inventory; mobile/tablet web flow acceptance. No parallel takeover of N48 Excel/Barcode offers, N39 accepted stocktake/stock actions, N33 permissions/transfers, invoice or DAILY BITE importer. Existing Gate2/N39 and desktop scroll PASS protected, no historical transaction replay.

Read AGENTS, current numbered/tracker/active/pending, inventory manual,03Octunknown-barcode and04OctTODAYhandoff; mainhistory through52f61c08 and newer47/39/33 closures preserved. Implementation previously recorded AWAITING CI, functional unknown attach/new-product/mobile return NOT TESTED LIVE. First publish this claim greenCI/main before source or persistedLAB. Inspect actual handlers/UI and test coverage; one bounded correction only after recorded causalFAIL. FullCI/nativePG/build/productiongates, exact healthy deployment/reload then actualLAB when source changes.

Acceptance: company/store/role scoped search, exactbarcode conflict guard, attach once to intended existingproduct andsameDRAFT without duplicateproduct; separately identified newLABproduct/barcode continuation returns to exactsameDRAFT without context/count loss. Fresh before each persistedaction: LAB/store/operator/virtualterminal/action/SKU/barcode/qty/paymentnone/time, own/control till counts/cash/card/IRIS/expense/total/incoming/outgoing; relevantproductprice/stock/latestledger/draftlines/count/audit IDs. ClosingPR2110 synchronizesallregisters/PDFs; detailed TODAY06 sectionbelow authoritative, no further agreed48work. Physical/mobile/POScheckout/independentOwner/otheroffertypes/capacity outsideagreed48scope NOTTESTED. No replay, stock/payment/fiscal/realstore action; otherowners untouched.

10/10/2026 15:25 Athens — No33 δικές του / όλες: cross-actor περιορισμένο LIVE PASS

CI correction — prepared-query cache after widening

PR2120 initialheade92706f2/fullCI38059252939 FAIL: native PostgreSQL test caught cached-plan result-type mismatch when a product reader prepared before widening was reused afterwards. No merge/deploy/business mutation. Bootstrap now disconnects its Prisma pool after successful widening, before HTTP startup; the same actual native reader must reconnect and preserve controls. This does not claim control over a separate old deployment process. All widening runs through guarded deployment only, before LAB/original upload. FullCI rerun required; overall OPEN/AWAITING LAB.

10/10/2026 14:43 UTC — DAILY BITE precision LIVE / importer BLOCKED by secure browser

Same assigned owner codex/daily-bite-price-precision-20261010, continuing records branch codex/daily-bite-live-acceptance-20261010, issue #2054. GuardedRender38060277713 / dep-db54r15ckfvc738vh0n0 LIVE; independent exact /api/health verified92e7fbf4 before LAB writes. Startup widened Product.costPrice only toNUMERIC(16,6); all6883 existing prices compare exactly by canonicaldigestb2cdec8b238d38567a862a0b54ef5885/sum22451.1953. No rounding/partial import. Historical draft2096 superseded by2120, not a second source merge.

Actual scoped LAB SETUP readback only: companycmtpopbgk000prhb5qc60zxus/storecmtpopbgo000trhb5ng9ytiru, operatorSuperAdminΧρήστοςΜάνης/browserBackOffice, catalog action, qty/paymentNA/noPOScheckout/shiftchange. Before1 existing department/95products/86movements; saved each of9 source-profile test departments exactly once, now10 departments including untouched originalΦΠΑ13%; exactregister/code/VAT/active/commerce confirmed by independent SQL, #9 exemption27. DO NOT recreate them. Existing95stockrecords and allmovement86/payment80/sale80/shift36/transaction118 whole-row digests identical before/after. Main visible11transactions/cash4€/card0/IRIS0/total4€, controlLAB-POS02 2transactions/total0€ unchanged. FixtureLAB-DB-PREC-20261010-A-1/-2 remains ABSENT; no product import or price change. EvidenceCHECKPOINTS/EVIDENCE/daily-bite-precision-20261010/baseline.json separates storage/setup from importer acceptance.

Secure browser filechooser failed BEFORE upload with retained_data_restricted, then documented new-tab recovery and runtime reset both failed: native credential state cannot be safely resumed. No credential/token/session extraction, alternate authenticated API or replay. Actual synthetic LAB preview/final import NOT TESTED, original DAILY BITE preview NOT TESTED, final import NOT RUN. Independent14:43:43Z production readback DAILYBITE9departments/0products; store/company/name unchanged. OriginalXLSX SHA2562307c282c299d2716af17078315ab9b461e5748521dd9eff0dce80bb64fe8ff2/8753eligible/9306barcodes/164leadingzeros/stock0 retained;199review/878excluded separate. Source-only expectations prices/departmentsMD5185252c44c5cf530d939142e3b35aabc/barcodepairsMD5b8715fc96c6482698e91fb515a9ba620 are not saved-data PASS.

Single next action: obtain a fresh supported browser runtime with secure sign-in/filechooser, recheck current release and LAB baseline, preview/import the existing synthetic two-row fixture once without recreating departments, independently read back exact0.719037/0.64602/threebarcodes/stock0/heldsheetabsence/control equality. Only after measured LABPASS preview unchanged originalExcel in SAME DAILYBITE and check8753CREATE/0UPDATE/0INVALID/all9306barcodes, then one atomic definitive import and complete source/readback comparison/final confirmation screenshot. Importer remainsOPEN/BLOCKED, no new import/manualPASS or final photo available from blocked browser. All other owners/PASS, RBS/Kiosk/commonPOS/otherstorebusinessdata preserved. CheckpointCHECKPOINTS/CHANGES/2026-10-10-daily-bite-import.md.

10/10/2026 — DAILY BITE precision/import source ready / AWAITING CI and LAB

Owner codex/daily-bite-price-precision-20261010, handoff PR2115/headbaed33774b7bb446692193000311e2804b64278e/fullCI38058787868SUCCESS/merged6f97ac4081156d30af743d0767327995c10e5cd6. Incorporates the unreleased source-profile implementation from draft2096, preserving legacy Diadochou behavior. New bounded deployment bootstrap widens only exact NUMERIC(14,4) purchase-cost storage to NUMERIC(16,6), preserving ten integer digits and every old value, with bounded lock/statement timeouts; compatible wider storage is never narrowed and unexpected shapes fail closed. No production schema command executed from Work. SalePrice, StoreProduct prices and stock schema unchanged.

Source preview/import checks actual cost-column capacity (including recheck inside final transaction), rejects unsupported decimals/range without tolerance or rounding, maps all9306barcodes, uses only8753eligible rows, validates nine existing departments and refuses existing SKU/barcode/stock overwrite. Atomic readback remains required. Native isolated PostgreSQL regression now exercises old-column rejection, widening/idempotency, exact five/six-decimal costs, replay rollback and unchanged controls; native local test skipped because no isolated Postgres service. Full CI native acceptance pending.

Node20.20.2 local full server suite2115PASS/16SKIP/0FAIL after Prisma generation; build:productionPASS. Initial test launch before generated Prisma was ready failed; setup corrected and complete rerun passed. Unchanged original workbook exactSHA2307c282c299d2716af17078315ab9b461e5748521dd9eff0dce80bb64fe8ff2: actual parser8753rows/0invalid/9306barcodes/164leading-zero/stock0; DB000017=.64602,DB000030=.719037,DB000036=.51865 retained. This is local parser evidence, NOT live preview or LAB PASS.

Read-only production snapshot before deployment:6883products/costsum22451.1953/canonicalcostdigest b2cdec8b238d38567a862a0b54ef5885. Independent fresh store counts:DAILYBITE0products;LAB95products (older15counts superseded by other authorized sessions, do not reset). No product/departments writes or original import yet. Remaining: fullgreenCI, exacthealthydeployment, independently confirmed liveprecision/controlreadback, measured new syntheticLAB fixture, originalDAILYBITEpreview/conflictcheck and definitiveimport. Preserve nine DAILYBITEdepartments, all other owners/PASS, RBS/Kiosk/commonPOS/otherstorebusinessrecords. Importer overallOPEN; no new manualPASS.

10/10/2026 — DAILY-BITE-IMPORT resumed / ASSIGNED / live precision confirmed

ΑΝΑΛΗΨΗ ΑΠΟ codex/daily-bite-import-20261010 — ASSIGNED codex/daily-bite-price-precision-20261010, same issue #2054 and user-authorized handoff. Preserve all other owners and PASS. Existing 9 departments/0 products remain protected, never recreate departments. Secure browser positively authenticated Χρήστος Μάνης / Platform Admin in this new conversation.

Independent Render read-only information_schema query on myworkstation-db confirmed public.Product.costPrice NUMERIC(14,4); Product.salePrice and StoreProduct.salePrice remain NUMERIC(14,4). Original XLSX SHA2562307c282c299d2716af17078315ab9b461e5748521dd9eff0dce80bb64fe8ff2 retained; 8753 eligible, purchase precision max6 decimals (424 five-decimal +515 six-decimal), max cost87.8. No source edits or business writes. PR2096 remains draft/unreleased. Actual browser preview/import and new LAB acceptance NOT TESTED.

Bounded next action: preserve the same 10 integer digits while widening only Product.costPrice to NUMERIC(16,6) through reviewed deployment bootstrap, with an explicit runtime capacity check before source preview/import and atomic readback. No production migration from this sandbox. Existing stored values must compare exactly before/after; sale prices, stock, RBS/Kiosk/commonPOS/otherstore business records unchanged. Isolated PostgreSQL migration/import regressions, full green CI, exact deployment and synthetic measured LAB must precede original DAILY BITE preview and definitive import. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-daily-bite-import.md. Importer remains OPEN, no new manual PASS.

DAILY-BITE-IMPORT / 10/10/2026 13:12 UTC / ASSIGNED / setup LIVE readback; importer BLOCKED

2026-10-10T12:46:52+03:00 — N45 / TODAY-03 scoped LIVE VISUAL PASS / AWAITING USER

Owner codex/n45-product-center-visual-20261010 retained. Exact healthy production ee817cb1ea7e39ca7848a74f3f1255a50b1bb5cc, fresh reload; sourcePR2061/2064, finalfullCI38041725276 2059passed/0failed/0skipped, mainCI38041928209 SUCCESS, Render38042074799 SUCCESS. Actual cloud desktop1363×880, authenticated SuperAdmin, virtual MYWORKSTATION LAB cmtpopbgo000trhb5ng9ytiru, LAB EXCEL TEST2/SKULAB-EXCEL-20260909-02; no physical terminal/shift/quantity/payment action. Search/select only; no activation/save/discount/price/offer/import/stock/financial/fiscal/auth mutation.

Scoped PASS: maximized shell880/content880 and Master731/content731, width1308/content1308, populated product/base-price/store-price/VAT/discount fields and both lower actions visible; activation76px, discount-save bottom804, history-read bottom847, activation-to-discount gap8px, no overlap or outer scrollbar. Normal shell827/content827, Master678/content690, gap8; real inner wheel reaches scrollTop12, final explanatory text bottom819 inside root834. Read-only history loaded3 existing rules/3 historical records; root content1061 and real inner scroll330 reaches last record bottom847 inside root860, outer overflowhidden. Five other tabs opened read-only (store prices/bulk/offers/Excel/Inventory), bulk0×0;

existing scroll owners preserved. This is navigation reachability, not their functional acceptance. Fresh final Master reopened with no history expansion and same TEST2 for review.

Evidence CHECKPOINTS/EVIDENCE/n45-product-center-20261010/master-final-maximized.jpg and master-final-normal.jpg; earlier clipping/overlap retained as history. Previous de7d/f535 FAIL resolved within this exact tested scope. Prior Master discounts/bulk/Excel/inventory and CLOSED44 PASS protected. Mobile/shorter geometry/physical terminals/independentOwner/full six-tab business flows and financial/stock deltas NOT TESTED. Manual updated in same record. Only remaining45 action: owner review actual final production image and explicit visual acceptance; assignment retained, no new transaction/repeated save or takeover of other owners. Browser kept at populated maximized Master for that review. Record PR/CI metadata authoritative on publication; source is deployed, documentation publication pending green merge.

10/10/2026 13:31 Athens — N39 absolute correction LIVE PASS / final closure OPEN

Owner codex/n39-inventory-acceptance-20261010 retained. PR2070 full CI38043861185 SUCCESS2062PASS/0FAIL/0SKIP, merged/deployed a90bfd3ce242b68d130250546bd761c87799f4ee; mainCI38044476432 and guardedRender38044664872 SUCCESS, independent exact health verified. Existing RECOUNT-REASON-01 DRAFT pencil CORRECTION01 replaced8→4 (explicit preview), expected5/report−1/retail4.80. Fresh before13:30:27 and after13:31:53: source stock5/ledger5/diff0/15moves/duplicates0/latestWASTE11:54:13; MAIN6tx/cash4/card0/IRIS0/total4/expense0/latest11:59; controlLAB-POS-022tx/cash0/card0/IRIS0/total0/expense120/latest— unchanged. Blank finalization reason disabled button; reason entered only as preparation, not persisted closure. This supersedes pencil LIVE FAIL13:04:56/AWAITING LAB only. Protected finalization/expired/transfer/SELF/waste-pair PASS are not repeated.

Remaining: one reasoned finalization of this same DRAFT, verify stock5→4/one adjustment−1/exact persisted reason/ledger16moves and unchanged controls, reject one prepared stale-tab count3, reopen read-only. Native getJsDialog blocked by retained-data protection: ordinary confirmation requires user manual browser handoff; no credential/security bypass. Early unresolved-close LIVE NOT TESTED. PR2060/2062/2066 native PostgreSQL mutation/reason/recount/scoped-role/replay proofs passed full CI separately; never labeled LIVE. Physical/mobile/new-store acceptance and assigned TODAY-07 remain separate NOT TESTED. Full39 OPEN. Checkpoints 2026-10-10-n39-recount-reason-live.md, 2026-10-10-n39-absolute-recount.md; manual and authoritative39/tracker/pending/PDF synchronized. Other owners33/40/44/45/46 preserved.

N39 draft mutation/finalization race — isolated FAIL reproduced; bounded correction AWAITING CI/LAB

Same owner codex/n39-inventory-acceptance-20261010, base9505a0bb/PR2056 preserves every bounded LIVE PASS. Actual six handlers accepted stale DRAFT after FINALIZED (count/bulk/clear/import/addline/attachbarcode, 1–2 writes each) in controlled isolated reproduction. One common transactional parent DRAFT lock now precedes every mutation and is shared with finalization; no quantity/role/zone/company/schema/auth/finance/barcode-workflow change. Actual handler regressions19PASS/0FAIL with two nativePG checks locallySKIP; Node20 frontend build PASS; fullCI pending. New guarded native PostgreSQL actual-handler test covers both lock orders, six rejected late mutations, replay/version, recount and company/zone/owner denial with unchanged unrelated/control stock. CI is not LAB PASS; mandatory reason remains separate and full39 OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n39-draft-mutations.md. After full nativeCI/green merge/exact deploy, fresh identified LAB recount/finalized protection acceptance; no accepted posting repeated. Other owners33/44/40/TODAY-07 unchanged.

2026-10-10 — No33 label preview / hidePrinter bounded LIVE PASS

N39 WASTE-PAIR-01 — bounded LIVE pair PASS — 10 Oct 11:54:12–13 Athens

Owner codex/n39-inventory-acceptance-20261010 retained. SELF-01 published PR2053/full docsCI38039304684 SUCCESS/merged8d0aba2037fad0f8dd62053def51afa977077dbc. Two prepared virtual BackOffice forms same TEST1/sourceLAB/stock7, qty1 each, distinct reasons WASTE-PAIR-01A/01B; both buttons submitted exactlyonce in one Promise.allSettled UI batch. Both success. Ledger shows B11:54:12 out1 stock6, A11:54:13 out1 stock5, actorΧρήστοςΜάνης, exact N39-LAB-20261010 reasons. Source7→5, ledger5/5/diff0/moves13→15/duplicates0; no lost subtraction/no extra posting. RefreshedMAIN5tx/cash3.50/card0/IRIS0/total3.50/expense0/latest09:51 and controlLAB-POS-02 2tx/cash0/card0/IRIS0/total0/expense120/latest— unchanged before/after. Earlier transfer and SELF-01 retained, no replay/compensation/TEST2 action. Evidence CHECKPOINTS/EVIDENCE/n39-waste-pair01-ledger-20261010.jpg, checkpoint2026-10-10-n39-consumption-live.md. This closes AWAITING LAB for the bounded near-simultaneous waste pair after PR2020 only; exact lock overlap not observable in browser, isolated PG coverage remains separate. Full39 OPEN for mandatory stocktake cause/recount/roles, count/import/line-edit versus finalize, broader replay/isolation and physical/device acceptance. No33/44/40/TODAY-07 unchanged. Next causal source review of generic finalization reason and draft-mutation race; do not repeat accepted stock postings.

10/10/2026 12:00:27 Europe/Athens — N45 / TODAY-03 ASSIGNED / AWAITING LIVE VISUAL CHECK

Explicit owner instruction «ΞΕΚΙΝΑ ΤΗΝ ΕΡΓΑΣΙΑ 45». ΑΝΑΛΗΨΗ ΑΠΟ agent/today03-full-page-live-record-20261004 / agent/today-ui-verification-20261004 — ASSIGNED codex/n45-product-center-visual-20261010, only printed45/TODAY-03 residual: populated central product workspace, maximized desktop/no outer scroll, actual production-image final visual acceptance. Existing colorful/full-page CSS and later reachability fixes preserved; no speculative redesign. Prior exact2186f32 had27px outer overflow, followed by7c7f835a correction; current history includes bulk/Excel scroll-region reachability and Inventory Start fixes. Fresh current rendering NOT TESTED; prior CI is not visual PASS. Scope read-only search/select/navigation/maximize/geometry/screenshots in virtual MYWORKSTATION LAB only. No product save/activation, discounts/prices/offers submit/import, financial/stock/auth/fiscal changes. Long result lists may retain internal scroll; shorter/mobile layouts must keep controls reachable, never hide overflow to fake fit. Other owners TODAY04–09/N39/33/40 and CLOSED44 protected. Claim main publication required before code or persisted LAB change. Any new causal visual FAIL gets separate bounded change/regression/build/fullCI/exact deploy/retest. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n45-product-center-visual.md. Final accepted scope synchronizes manual/tracker/active/pending/numbered/PDF; unfinished owner retained.

N39 SELF-01 — bounded LIVE PASS — 10 Oct 2026 11:47:54 Athens

Same owner codex/n39-inventory-acceptance-20261010. New authorized qty1 TEST1 own consumption via LABPOS2 StoreMode/tab29 on observed release de7d5c2e0d5acf1ef4c9b65bf43ebbc28cac9258. Fresh before stock8/ledger8/8/diff0/12moves/duplicates0/latest11:15:01TRANSFER_OUT; MAIN5tx/cash3.50/card0/IRIS0/total3.50/expense0/latest09:51; controlLAB-POS-02 2tx/cash0/card0/IRIS0/total0/expense120/latest—. Newcart qty1/reference1.20/stock8; gift popup closed without TEST2 selection. One ΙΔΙΑ ΚΑΤΑΝΑΛΩΣΗ submit.

After stock7/ledger7/7/diff0/13moves/duplicates0, exactlyone ΠΡΟΣΩΠΙΚΗ ΚΑΤΑΝΑΛΩΣΗ out1/LABPOS2 at11:47:54, Sale cc8ad2db-7ac5-4e9e-9506-b5ac4ca9053d. Fresh finance MAIN and LAB-POS-02 unchanged in all above metrics. POS cleared cart/total0/queue0, no payment/receipt. Ledger intentionally derives the SaleLine; do not add duplicate StockMovement or replay. Evidence CHECKPOINTS/EVIDENCE/n39-self01-ledger-20261010.jpg; checkpoint2026-10-10-n39-consumption-live.md. Prior secure-session blocker superseded by fresh positivelyauthenticated tab. Virtual cloud terminal only; physical-device identity and wider role/replay/isolation/concurrency NOT TESTED. Full39 stays OPEN for reason/recount/roles/concurrent movements/count/import/edit/finalization/device acceptance. Existing transfer/expired/stocktake/Gate2/scroll PASS preserved; No33/44/40/TODAY-07 untouched. Next new simultaneous BackOffice waste pair only after fresh recorded baseline; no existing stock action repeated.

10/10/2026 11:52:07 Europe/Athens — N44 / TODAY-02 CLOSED / LAB PASS + USER VISUAL PASS

Owner χρηστος Μανης confirmed «ειναι οκ» after the final LAB results and editor screenshot. This accepts the tested product/VAT-editor save/readback, supplier/barcode preservation and final appearance/use; printed44/TODAY-02 CLOSED for that agreed scope. Prior scoped LAB PASS at dd85719d/PR2044 and cleanup PASS at independently deployed de7d5c2e/PR2049 retained; closure PR2051/CI38039001646 and mainCI38039065131 SUCCESS/merge18625a5b. Original TEST2 fields restored, active temporary supplier links empty. No new test/mutation/replay for this acceptance. Physical user client revision not independently captured. AlternateVAT transition, physical/mobile and independent full financial/ledger/storecontrol deltas remain NOT TESTED; user confirmation does not expand these claims. Owner codex/n44-product-vat-acceptance-20261010 completed, no pending N44 replay or handoff. Other owners and protected PASS unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n44-product-vat-acceptance.md; products manual; numbered44 and both PDFs synchronized.

2026-10-10 — No33 price permission: bounded LIVE PASS after PR2045

Owner codex/operator-checkbox-audit-20261009. No33/tracker35 remains OPEN. Exact release e687b51a, PR2045 final ad31c0c8/full CI38036860695 SUCCESS; mainCI38037072058 and guardedRender38037273211 SUCCESS, independently observed health ok/exact SHA then fresh LABPOS2 EMPLOYEE POS.

LIVE: only changeRetail OFF persisted, fresh POS disables price button and keyboard Enter cannot open editor. ON restored, mounted cart retained and button re-enabled by runtime poll. One local SKU2270 qty1 price1.00→0.50 with reason Δοκιμή applied only after Audit completed; exactly one corresponding own PRICE_CHANGE at11:25. Catalog price1.00/stock−13/lastsale09:51:19 independently read unchanged after apply. Later OFF at11:33 while editor open automatically closed it; proposed0.45 never applied, cart stayed0.50. Apply attempt found no button, so server403 LIVE is NOT TESTED. Immediately ON restored; all23 original fields/EMPLOYEE confirmed. Removed only identified test row11:34; finalcart0/total0/queue0.

Fresh final MAIN5/cash3.50/cards0/IRIS0/expenses0/total3.50/latest09:51 and control LAB-POS-02 2/cash0/cards+IRIS0/total0/latestnone unchanged. Audit1158→1168 rows including header: own OFF/add/ON/PRICE_CHANGE/OFF/ON/remove plus three external LAB EXCEL TEST2 edits (11:22/11:25/11:26); no own sale, return, payment or shift submission. Final cleanup stock re-read was blocked by automatic approval review as excluded No39; no bypass. Last stock observation after local price apply remains valid, final cleanup stock/full movement ledger NOT TESTED. Evidence operator-price-20261010/{keyboard-fail,disabled-pass,local-pass,empty-pass}.jpg.

This supersedes source AWAITING LAB only for tested keyboard denial, restored local-price/Audit and mounted editor closure. Server negative response, checkout/fiscal/refund, offline/concurrent devices, full stock ledger, physical printing, transfers, initialcash/shift closing and broader roles/companies/stores/modules remain OPEN/NOT TESTED. Next: own/all shift transactions and label printing visibility within existing specific approval; no financial/stock/shift submit or payment replay.

2026-10-10T11:43:58+03:00 — N44 / TODAY-02 LAB PASS scoped; AWAITING USER final visual acceptance

Owner codex/n44-product-vat-acceptance-20261010 retained. VAT save/readback, original-name restore, two supplier IDs/codes and three barcode attributes retained: LAB PASS at dd85719d/PR2044. Last-link deletion/fixture cleanup: LAB PASS at independently healthy de7d5c2e0d5acf1ef4c9b65bf43ebbc28cac9258, PR2049/headbd0c6bfe/fullCI38038134278 SUCCESS2048/2048, mainCI38038293816 SUCCESS, guardedRender38038479008 SUCCESS. Fresh reopen supplier table empty, original TEST2 name/SKU/category/subcategory/unit/retail2.40/cost0/VAT13/stock-2/flags/three barcode values and multipliers restored; no temporary active supplier links remain. Barcode timestamps11:42:09 are existing full-card replacement behavior, not ownership transfer. Five identified successful card saves total (fixture, name, name restore, first cleanup, final cleanup); first cleanup was functional FAIL, fixed before fresh cleanup. No economic/stock quantity action. AlternateVAT transition, physical/mobile and independent full financial/ledger/storecontrol deltas NOT TESTED. USER final visual acceptance pending, not overall USER PASS. Source acceptance complete for these scoped flows; no further state-changing test requested. Single next action: owner reviews VAT product editor appearance/use and confirms acceptance. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n44-product-vat-acceptance.md, products manual, proof CHECKPOINTS/EVIDENCE/n44-product-vat-20261010/n44-card-restored-1791621751699.jpg and n44-suppliers-restored-1791621743319.jpg. Other owners protected.

N39 TRANSFER-02 — bounded LIVE PASS / overall OPEN — 10/10/2026 11:15 Athens

Owner codex/n39-inventory-acceptance-20261010 retained. PR2039 selector and PR2043 SQL-managed Product lookup corrections are LIVE verified on bbea3bda7646720abd75d90f9699c1222429daa7, full PR CI38036227841 SUCCESS2027PASS/0FAIL/0SKIP, mainCI38036434279 SUCCESS, guardedRender38036628204 SUCCESS and independent exact health. Fresh baseline recorded before one TRANSFER-02 submit: TEST1 source9 / ledger9/9/diff0/11moves/duplicates0, destination ALL exactSKU absent/0; MAIN5tx cash/total3.50/card0/IRIS0/expense0, controlLAB-POS-02 2tx cash/card/IRIS/total0/expense120; destination no open shift.

Actual11:15:01 source9→8 with one TRANSFER_OUT qty1, destination0→1 with one TRANSFER_IN qty1; same actor Χρήστος Μάνης, timestamp and reason N39-LAB-20261010-TRANSFER-02. Source ledger8/8/diff0/12moves/duplicates0; destination1/1/diff0/1move/duplicates0. Fresh financial refresh confirms both terminals unchanged and destination no open shift. No retry of failed TRANSFER-01 or compensation. Checkpoint2026-10-10-n39-transfer-live.md, evidence CHECKPOINTS/EVIDENCE/n39-transfer02-destination-20261010.jpg. This supersedes AWAITING LAB for single transfer and selector only. Whole39 OPEN for reason/recount/roles, concurrent movements/count/import/edit versus finalize, own consumption, wider replay/isolation/device/repeated-finalization acceptance. Gate2/TODAY-07/other owners preserved.

Secure POS login confirmed LAB POS2/sourceLAB/localqueue0. Preparing own consumption selected TEST1 qty1 but no consumption/payment submitted. POS showed cached stock9 after transfer; refresh failed while credential protection active and browser requires manual handoff. No further POS action, no claim of own consumption PASS, no inferred financial/stock delta. Pending cart qty1/1.20 is preparation only; user must refresh/verify stock8 and correct terminal before any business submission. Physical terminal/shift in this POS session NOT independently confirmed. Existing accepted transactions must not be repeated.

2026-10-10 11:03 Europe/Athens — OPERATOR-CHECKBOX-01 price keyboard LIVE FAIL / bounded fix AWAITING LAB

Sameowner codex/operator-checkbox-audit-20261009, No33/tracker35 OPEN. Currentmain78e68ef6 includes scoped onlinePR2041/4775af52/docsCI38035820790 SUCCESS and returnsPR2042/78e68ef6/docsCI38036033032 SUCCESS. Localdependencysetup initiallymissing, installedstandardnpm dependenciesignore-scripts; no lockfile/runtimechangescommitted. CI is not LIVE PASS. FixAWAITING LAB until exactCI/main/guardeddeployhealth and freshEMPLOYEEkeyboardOFF/ON/strictAudit/cartcleanup test. Fullpricecheckout, physicalfinancial/stock ledger, otherdevices/offline/widerroles/modules remainOPEN. Nextsingleaction: exactreleaseLIVEpriceguard test aftergreenCI/deploy, noeconomic/stock/shift submission.

10/10/2026 — N44 / TODAY-02 LIMITED LAB PASS; fixture cleanup AWAITING LAB

Owner codex/n44-product-vat-acceptance-20261010 retained. PR2044/fullCI38036555635:2028/2028 PASS, mainCI38036746437, guarded Render38036924035, independently healthy deployed dd85719d27707c5f838682ded37b6ff8215e3b4b. LAB TEST2 name-only save and original-name restore from VAT editor PASS; same13%department/page1/15 products. Fresh independent native readback preserved both N44 supplier codes, three barcode values/multipliers/blank metadata, original SKU/category/subcategory/unit/prices/VAT/flags/stock-2. No stock or financial action; full movement/financial/storecontrol delta and alternateVAT transition NOT TESTED. Cleanup FAIL: native deletion of both temporary suppliers resurrected first vendor via stale draft.supplierName/server compatibility fallback. N44-LAB-A remains, B removed. One bounded native deletion handler clears stale supplierName only when no selected supplier remains; preserves other suppliers, purchase-history fallback, barcode stale409 and tenant isolation. AWAITING CI/exact deploy/fresh cleanup save/readback. Scoped PASS manual updated; overall item IN PROGRESS, USER final visual acceptance outstanding. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n44-product-vat-acceptance.md. Other owners unchanged.

2026-10-10T10:56:49.751521+03:00 Athens — N44 / TODAY-02 LAB SAVE FAIL / bounded fix AWAITING LAB

Same owner codex/n44-product-vat-acceptance-20261010; claim PR2038/CI38034609966 merged61ddb47. One TEST2 name-only save rejected with mandatory barcode snapshot message. VAT editor omits expectedBarcodeIds; existing server guard from PR1834/5e4c8a8b is protected LAB PASS and must remain. No successful product mutation/restore needed. Current catalog already returns barcode row IDs. Bounded fix sends IDs of the freshly opened card from this third editor; preserve supplierCodes, barcode attributes, stores, same-page reload and server stale409. Test actual handlers reject missing snapshot and retain draft on stale rejection. No backend/schema/data/stock/fiscal/payment/auth changes. Exact deploy and fresh LAB save/readback required; supplier fixture and alternateVAT/storecontrol acceptance remain NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n44-product-vat-acceptance.md.

N39 transfer product lookup — LIVE FAIL / bounded fix AWAITING LAB

Same owner codex/n39-inventory-acceptance-20261010. PR2039/mainfbfe12dc/full PR2025PASS/0FAIL/0SKIP/mainCI38035242201/guardedRender38035420093SUCCESS and exacthealth verified. Destination selector now LIVE PASS from scoped operations with fixed source. New qty1 TRANSFER-01 failed internalerror before postings; source9/ledger9/9/diff0/11moves/duplicates0 and destination0rows, MAIN5tx/3.50cash/card0/IRIS0/total3.50 and control2tx/0cash/card0/IRIS0/total0/expense120 unchanged after refresh. No retry/compensation. Actual handler reproduction proves prisma.product undefined (SQL-managed table), TypeError findFirst, transactionsStarted0. One-line bounded Product lookup correction keeps company/active constraints and all posting/replay rules. Native actual-route PG regression added; local8PASS/1PGSKIP, fullCI required before merge/deploy/freshbaseline/new TRANSFER-02. Checkpoint2026-10-10-n39-transfer-live.md and synchronized ledger screenshot. Full39 remains OPEN for transfer acceptance, ownconsumption, concurrent movements/count/import/edit and reason/recount/roles/live repeat-finalization. No other scope change.

2026-10-10 10:52 Europe/Athens — OPERATOR-CHECKBOX-01 returns permission OFF/ON bounded LIVE PASS / overall OPEN

Same owner codex/operator-checkbox-audit-20261009, No33/tracker35 OPEN. Previous online UI permission result published mainPR2041/4775af52, exactdocsCI38035820790 SUCCESS. User10:47:27 approval covers exact sequentialrightsrestore. LABPOS2 ordinaryEMPLOYEE/testingstore cmtpopbgo000trhb5ng9ytiru, catalog11/94, before/aftercart0,total0,queue0. Noeconomic/stock/shift/product submits or completedpayment replay.

Only returnItems=false saved, re-opened persistedfalse. After explicitPOSrefresh ΕΠΙΣΤΡΟΦΗ is absent from DOM/actionbar; ΔΕΛΤΙΟ ΕΠΙΣΤΡΟΦΗΣ remainsdisabled withemptycart. Savedonly returnItems=true immediately, re-opened23fields exactoriginal and EMPLOYEE. ExplicitPOSrefresh restores ΕΠΙΣΤΡΟΦΗ. Opened restoredmodal read-only: fourexisting CASH sales09:37/.50,09:10/.50,09:02/1.00,08:31/.50, allsame10Oct; autoselected09:37 water500 qty1/.50. Full/selecteditems controls, three reasonoptions and fullreturn/VOID submissioncontrols visible. No historicalsale clicked for submission, no return/VOID issued. ClosedX, finalcart0/queue0. Proof CHECKPOINTS/EVIDENCE/operator-returns-20261010/{denied.jpg,restored.jpg}.

Bounded LIVE PASS for persistedOFF/hidingafterrefresh/ON exactrestore/read-only opening only. Actualrefund/reversal/accounting/stock/fiscal/idempotency, mountedmodal revocation, servernegative enforcement, independentfinancial/stock/control deltas and AuditIDs NOT TESTED. Do notlabel fullreturnsPASS or replay historicpayments. No33 OPEN for price/Audit, actualreturnswhenauthorized, positiveonline, own/allcrossactor, initialcash/closing, missingmoderntransfer entry, printdevice and widerroles/tenant/modules. ProtectedexistingPASS and No39/No44owners preserved. Next freshbaseline and localprice UI test only, nofinancial/stock/shift submissions.

2026-10-10 10:47 Europe/Athens — OPERATOR-CHECKBOX-01 online permission OFF/ON bounded LIVE PASS / overall OPEN

Owner codex/operator-checkbox-audit-20261009 retained, printed33/tracker35 OPEN. User action-time approval at10:47:27 covers sequential temporary OFF/ON and exactrestore for price, returns, online, own/all transactions and label visibility; no financial/stock/shift submissions. Ordinary LABPOS2 EMPLOYEE in testingstore cmtpopbgo000trhb5ng9ytiru, same authenticated browser/MAIN, catalog11/94, initial/finalcart0,total0,queue0. Existing cancellation/reason/Audit, active-only and mountedpayments LIVE PASS plus photo/camera/evidence and fixedreasons USER PASS remain protected. No39 and No44 remain with independent owners.

Fresh23checkbox baseline read before save. Saved only onlineBarcode=false, re-opened profile and observed persistedfalse. Already-open POS initially retained button before explicitrefresh; immediate automaticrefresh timing NOT TESTED. After explicitPOSrefresh, search AUDIT33-NO-PRODUCT-20261010 and Enter shows unknown-product panel with Δεν έχεις δικαίωμα Online αναζήτησης από το BackOffice and no Online αναζήτηση button. Immediately restored only onlineBarcode=true, re-opened all23fields exactoriginal, roleEMPLOYEE. After explicitrefresh same unknown query offers Online αναζήτηση again. Cleared query, finalcart0/queue0. Proof CHECKPOINTS/EVIDENCE/operator-online-20261010/{denied.jpg,restored.jpg}.

Earlier read-only ON request for the synthetic nonmatchingcode produced a nativealert, dismissed without inspecting its text; cannot certify exact no-result content, endpoint outcome or positiveMasterCatalog result. No new product registration/activation, barcode write, catalog/stock/financial/shift submit, completedpayment replay or scanner-scope claim. PASS is bounded UI permission persistence/denial-after-refresh/restoration only. ServernegativeAPI enforcement, mountedbutton revocation withoutrefresh, positiveMasterCatalog result, Audit event details/IDs and independent stock/financial/control deltas NOT TESTED.

Remaining: actual localprice change/Audit and revokededitor, return/VOID financial acceptance, onlinepositive result/serverdenial, own/allcrossactor, initialcash/closing, modernPOStransfer entry, printing/device and broaderroles/company/store/modules. Next pricepermission test with fresh financial/control/stock/Audit baseline; noeconomic/stock/shift submissions without separateapproval. No33 remains OPEN.

N39 scoped transfer destination regression — AWAITING LAB

Owner codex/n39-inventory-acceptance-20261010. Live BackOffice operations entry fixes source to LAB; its scoped stores list correctly contains only source but the transfer modal incorrectly reused that list, leaving destination empty despite another active authorized LAB store. No transfer submitted. Isolated fix: transfer opening fetches the existing company-authorized /api/stores list into separate transferStores; source selection and all module stores remain fixed. Reject missing/inactive source and fetch failures without fallback; ignore response if source changes. Server transfer tenant/active/sufficient-stock/paired-movement/idempotency rules unchanged. Unit cases7/7 pass Node20; frontend npm run build required. Full39 OPEN. After green CI/merge/exact deployed revision, refresh all baseline values in CHECKPOINTS/CHANGES/2026-10-10-n39-transfer-live.md before new qty1 TRANSFER-01. No new manual PASS until LIVE before/after balances and control verified.

10/10/2026 10:25 Europe/Athens — N44 / TODAY-02 / ASSIGNED / AWAITING LAB SAVE-READBACK

ΑΝΑΛΗΨΗ ΑΠΟ agent/today02-preserve-suppliers-20261004 / agent/today-ui-verification-20261004 — ASSIGNED codex/n44-product-vat-acceptance-20261010, explicit owner instruction10/10/2026 10:22:50 «θελω να ξεκινησης την εργασια 44 απο την λιστα». Transfer only printed44/TODAY-02 residual; TODAY03–09 and all other owners remain protected. Existing production VAT-department pencil/editor and supplier-preservationPR1694/large-dropdownPR1704 are prior implementation, not to rebuild without a new causal FAIL. Current tracker IN PROGRESS: save/readback, multiple supplier preservation, final acceptance. Latest prior real observation69de72 opened correct LAB EXCEL TEST1 card and cancelled; save NOT TESTED. Checkpoints2026-10-03-vat-department-product-edit.md,2026-10-04-today02-large-editor-real-dropdowns.md,2026-10-04-today-ui-live-handoff.md read; broader historic Gates/manual PASS retained.

Bounded next scope: authenticated LAB VAT-department editor baseline, reversible core-field/VAT selection save and fresh readback, verify all existing supplier IDs/codes and barcode/store metadata are unchanged, confirm return to same department/page and unaffected-store control. Record exact before/after before any identified save, restore test changes and do not run sale/payment/stock/fiscal/invoice/import/bulk-price actions. Read-only browser23 canonical Platform Admin reused existing signed-in SuperAdmin Χρήστος Μάνης; no credential/permission change. Virtual MYWORKSTATION LAB/storecmtpopbgo000trhb5ng9ytiru only, real stores untouched. If multi-supplier fixture absent or evidence unavailable, report that exact gap rather than invent PASS or use real data. No source or state-changing LAB before green claim/main merge. Any actual failure requires one bounded fix, regression/fullCI/exact deploy before retest. CI alone never LAB PASS. Final accepted result synchronizes checkpoint/active/tracker/manual/pending/numbered/PDF; unfinished scope retains this owner and named next action. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n44-product-vat-acceptance.md.

10/10/2026 10:25 Europe/Athens — N39 / ledger diagnostic recheck LIVE READ-ONLY PASS

User explicitly approves all necessary N39 actions until final PASS, including previously requested repository publication/PR/green-CI merge and authorized virtual LAB tests. Same named owner retained. Browser reset restored existing tab22 and existing ledger popup. Positively observed current9/recorded9/difference0/11 movements/possibleduplicates0. Exact expired01 WASTE09:04:26 out1/stock9/reason retained alongside legitimate10Sep WASTEout1. No movement repeated, deleted or rewritten. Screenshot visually inspected in browser output; shared-file synchronization did not make a local copy available, so no repository screenshot artifact is claimed. This supersedes the prior diagnostic FAIL for this sample only. Native transaction-key duplicate controls have CI coverage; broader LAB role/device/replay/concurrency remains OPEN. Observed service revision aec8323 includes PR2026/92be07a9; no new stock/financial action.

Next: preserve protected PASS, publish named continuation/this limited PASS, then fresh before/action/after/control baseline for a new identified authorized LAB test. Full39 remains OPEN for own consumption, transfers, concurrent pair/count/import/edit, reason/recount/roles and live repeated-finalization rejection. No source or business-workflow change in this continuation.

2026-10-10T10:12:30+03:00 — N39 / named continuation / READ-ONLY RESUME / OVERALL OPEN

The owner explicitly asks this conversation to continue printed39 / INVENTORY-ADV after the previous page stalled. ΑΝΑΛΗΨΗ ΑΠΟ codex/n39-inventory-acceptance-20261010 — ASSIGNED codex/n39-inventory-acceptance-20261010 (same logical owner; publication branch docs/n39-resume-20261010). No parallel new ownership; existing LAB authorization and requirement not to change the business workflow retained. TODAY-07, operator audit, invoice, scanner and all other owners excluded.

Read AGENTS, complete active list, tracker, numbered list, pending, inventory manual and all five N39 checkpoints. Reviewed first-parent main history from accepted stocktake through e8e00df. Protected measured stocktake PASS11→10/report−1/oneledger−1; Gate2 and scroll PASS not repeated. Expired01 action09:04:26 is already posted10→9/oneWASTE−1/exact reason, with measured unchanged financial/product controls in the prior checkpoint; no repeat.

PR2020 concurrent destruction fix already merged dbb1a105 and deployed: actual native PostgreSQL CI passed, but native simultaneous LAB acceptance still NOT TESTED. PR2026 duplicate indicator fix already merged92be07a9; head06669b20 CI38030121474 completed SUCCESS. Independent read-only /api/health returned ok=true/version0.22.0+kat-test-pos/exact aec8323acb2f12d89b5412ca17ea312ccfbefa60; git ancestry includes both fixes. It changes diagnostic classification only, no ledger rewrite or stock mutation.

Canonical PlatformAdmin tab22 positively authenticated Χρήστος Μάνης; opened MYWORKSTATION LAB/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ/cmtpopbgo000trhb5ng9ytiru. Archive exact SKU LAB-EXCEL-20260909-01/id b1466a68-c47b-47cc-9139-69e6f9f7f978 shows stock9. Selected Κινήσεις είδους read-only; next browser observation timed out after300s and subsequent documented troubleshooting request also timed out after300s. No observed ledger popup or duplicate count: read-only duplicate recheck remains NOT TESTED, no fresh LAB PASS. Browser service timeout is not a site bot block or application functional FAIL. No count/finalize/waste/transfer/payment/sale/shift/product/permission write in this continuation. No screenshot available for the unobserved popup.

Exact residual: read-only existing expired ledger duplicate recheck; a new separately identified concurrent pair with fresh before/after financial/product/control baseline; own consumption; transfer source/destination and replay/isolation; mandatory reason/recount/roles and count/import/line-edit concurrency versus finalization; live repeated-finalization rejection and broader physical/device acceptance. Prior CI scenarios are not live acceptance. Single next action: restore responsive browser service, reopen existing TEST1 ledger read-only and verify current9/recorded9/difference0/11 movements/duplicate0, preserving both legitimate historical WASTE records. Then publish this named continuation green before any new LAB mutation, record fresh baseline and do one identified authorized action at a time. Overall39 OPEN; no new manual PASS.

2026-10-10 10:20 Europe/Athens — OPERATOR-CHECKBOX-01 isolated active-only revoke/restore LIVE PASS / overall OPEN

Same owner codex/operator-checkbox-audit-20261009, printed33/tracker35 OPEN. Claim/next action in mergedPR2034/399897da, finaldocsCI38033243051 SUCCESS. User confirmed exact active=false→block→active=true restoration at10:07:32. Current source healthy aec8323a; independent fixedreason USER PASS PR2035/520533c8 retained. LAB POS2 ordinaryEMPLOYEE/testingstore cmtpopbgo000trhb5ng9ytiru, initialcart0/total0/queue0. Fresh23checkbox baseline captured; no invoice/scanner/No39/change ownership, no economic/stock/shift submit or payment replay.

At10:08 one save active=false only. Re-read all23fields: exactlyone difference active false, seller/EMPLOYEE retained and POSaccess true. Existing StoreMode after explicitPOSrefresh blocked: Η πρόσβαση Store Mode δεν είναι πλέον ενεργή. Συνδεθείτε ξανά. No catalog/cart/actions available. Immediately same10:08 save active=true; independent re-read all23 exactequal baseline, roleEMPLOYEE. No PIN reset/credential change, everyotherflag unchanged; Orders unchanged (not included in the23fields check). Inactive-list filter changed to OXI solely to locate record then restoredNAI. Reuse old revoked session afterrestore correctly requires sign-in. SecurebrowserAuth personalPIN submitted and fresh signed-in LABPOS2/catalog11/94/cart0/total0/queue0 verified10:20. Catalog93→94 from another concurrent scope, not this owner's productwrite.

Selected-store Audit shows two10:08permissionchanges: EMPLOYEE/Ανενεργός/POSΝαι/BackOfficeΌχι, then EMPLOYEE/Ενεργός/POSΝαι/BackOfficeΌχι; own securelogin10:20. Other session10:11login/Camel100028976cartchanges10:13/removal10:16 are external, no replay or attribution; full financial/stock deltas NOT TESTED for this access-only test. Evidence CHECKPOINTS/EVIDENCE/operator-active-20261010/{blocked.jpg,restored.jpg}. No full automatic mid-session action poll/new inactivePINlogin/otherphysicaldevice/offline/tenant/module breadthPASS. Explicit refresh-server denial, persistence, exactrestore and secure freshreentry are scoped LIVE PASS.

Remainingprice/returns/online/printing, own/all cross-actor, initialcash/closing submissions, modernPOStransfer entry, dynamiccancel/reason flags, widerroles/company/store/modules stay OPEN. Next read-only existing EMPLOYEE control inspections and bounded localpriceeditor only after fresh financial/control/stock baseline; no fiscal/economic/stock/shift submissions without special userapproval. Keep protected photo/camera/evidence USER PASS, mountedpayment LIVE PASS and nowfixedreason USER PASS; do notrepeat.

2026-10-10 10:02 Europe/Athens — OPERATOR-CHECKBOX-01 cancellation confirmation/reason/Audit bounded LIVE PASS / overall OPEN

Same owner codex/operator-checkbox-audit-20261009, printed33/tracker35 OPEN. ResumePR2032 headbec576de/docsCI38032612049 SUCCESS merged e8e00df4; mainCI38032670033 SUCCESS. Independent sourcePR2031/aec8323a fullmainCI38032390760/guard38032568109 SUCCESS/exacthealthaec8323acb2f12d89b5412ca17ea312ccfbefa60 verified before fresh POS reload. Ordinary LABPOS2 EMPLOYEE, MYWORKSTATION LAB/testingstore cmtpopbgo000trhb5ng9ytiru, activeMAIN08:13:26, catalog11/93. No profile saves or promotion; original23details/orders retained. Fresh auth via secure browserAuth, no secrets in chat. Reload restored keypadON. Start/end cart0/total0/localqueue0. No economic/stock/shift/fiscal/product/print submission or completed-payment replay.

One identified new local-cart action09:59: SKU2270 NEPO1,5LT qty1/unit1/total1; warning stock−13. Confirmation dismiss retained qty1/total1. Confirmation accept opened exactly three nonempty reasons: Λάθος χειριστή / Έλεγχος τιμών / Ακύρωση από πελάτη plus Επιστροφή στο καλάθι. Reason-dismiss retained qty1/total1, did not post cancellation; required reason is now selected, no blank free-text input exists. One selection Έλεγχος τιμών at10:01 cleared cart only after audit success. Fresh selected-store Audit1128→1129(add)→1130(cancel) visible data rows, three→four CART_CANCEL-labelled rows. Exactly one new cancellation row10:01: SKU2270 qty1×1EUR/total1/Αιτιολογία Έλεγχος τιμών/storetesting/LABPOS2; no new sale/payment row. Native click waited on dialog and produced transport timeout; getJsDialog confirmed nativeconfirm and dismiss/accept worked. One retry with undefineddialog observed unchangedcart before retarget; no duplicate audit. These transport observations are not product functional FAIL.

Independent before/after MAIN5transactions/cash3.50/cards0/IRIS0/expenses0/total3.50/latest09:51; controlLAB-POS-02 2transactions/cash0/cards+IRIS0/total0/latestnone; both unchanged after fresh reload. SKU2270 id4f126988-a1a8-433c-b469-70203415df5b stock−13/lastsale09:51:19 unchanged after independent warehouse refresh. Prior external sale/consumption8ea76f8b-9b4d-42d9-b59c-318abeea5ffe09:51 preserved, not ours. Full stock movement timestamp/recordID, independently splitcontrolcards/IRIS, fiscal/device/offline, all three reason submissions and revokedconfirm/reason transitions NOT TESTED. Therefore bounded LIVE UI/Audit and displayed balances/quantity preservation PASS; no full stock-ledger/financial/fiscal acceptance. Evidence CHECKPOINTS/EVIDENCE/operator-cancel-20261010/{reasons.jpg,empty-cart.jpg}. New choice presentation owner fix/pos-cancel-reason-options-20261010 remains separately AWAITING USER acceptance; this result does not replace that owner or claim USER PASS.

Read-only close-shift preview opens; countfields/finalsubmit disabled before physicalcount+personalQR. No count/QR/save; closing and initialcash functional acceptance OPEN. Remaining: isolatedactive-only revoke/restore, price/returns/online/print, own/all transactions cross-actor, modern transfer entry, wider roles/company/store/modules. No futurefinancial/stock/shift submit without specific approval. Printed33 stays OPEN. Next prepare isolatedactive-only test while cart0 and originalprofile; preserve everyotherpermission and originalEMPLOYEE role, restore active=true, require safe per-action access restoration confirmation before starting revocation.

2026-10-10T09:50:21+03:00 — OPERATOR-CHECKBOX-01 / SAME OWNER RESUME / BEFORE CANCEL UI TEST / OPEN

Same owner codex/operator-checkbox-audit-20261009, printed33/tracker35 retained. User explicitly transfers continuation to this conversation, authorizes fixes/push/PR/green-CI merge/deploy, prohibits economic/stock/shift submissions without separate approval and excludes N39/invoice/scanner/change notice. Read AGENTS, current main a4e312ab, audit/matrix/photo handoff, workforce/POS manuals, active/pending/tracker/numbered list and first-parent history since accepted0ab33f31. Protected mounted payments LIVE PASS and photo/camera/evidence USER PASS are not repeated. Independent fixed-reason presentation owner fix/pos-cancel-reason-options-20261010 (claimPR2030) remains untouched; this owner retains broader cancellation permission/Audit acceptance.

Fresh browser tab19 canonical Platform Admin authenticated, selected MYWORKSTATION LAB/testing store cmtpopbgo000trhb5ng9ytiru. Read-only original LAB POS2 EMPLOYEE profile: active/POSaccess/orders true; Details23 checkbox values match restored baseline: editPosButtons/customerCardOnly/hidePrinter false, all other retained POS settings true. No profile save. Fresh tab20 Store Mode personal PIN via browserAuth securely submitted and positively verified LAB POS2 connected/catalog11/93/cart0/total0/localqueue0. Keypad display toggled off during observation; no financial/stock write. Health HTTP200 ok=true/exact44ca5ec4cc70777b0f60ac212faadeb10d05e500; independent clientSHA unknown.

Read-only active ledger: opened10Oct08:13:26, all movements four historic CASH sales0.50/1.00/0.50/0.50 =2.50EUR; own payments/expenses0. No new sale, return, payment, shift opening/closing or print. Current selected-store Audit has1126 visible data rows (not independently total server count), latest9:46PIN login; three existing CART_CANCEL-labelled rows including10Oct00:42 with no reason and24Sep reasoned rows. Preserve those identities, do not replay. Date-fill attempt did not retain10Oct and report remains10Sep–10Oct; do not call day-filter PASS. Search SKU2270 shows NEPO1,5LT/unit1EUR, cart0; no item added yet. Full per-terminal cash/card/IRIS/stock/movement/control baseline not captured; financial/stock/control effects NOT TESTED. No overall cancellation/Audit PASS is possible from these read-only observations alone.

Next bounded local-cart UI test: one new qty1 SKU2270, inspect confirmation dismissal and blank-reason rejection preserving cart, then one identified reasoned cart cancellation and fresh selected-store Audit check, without checkout/return/payment/stock/shift/product/print submission. Record missing independent deltas as NOT TESTED, not unchanged. Full measured acceptance remains OPEN until baseline/control checks exist. Publish this BEFORE record with green docs CI/merge before state-changing test. Remaining isolatedactive-only revocation, price/return/online/print/own-all/initialcash/closing/modern transfer entry and role/company/store/module breadth stay OPEN. No new manual functional PASS.

10/10/2026 10:07 Europe/Athens — POS-CANCEL-REASONS-01 / USER PASS / CLOSED

Χρήστος Μανής confirmed «ειναι οκ» at10:07:13 after delivery of the three fixed current-cart cancellation reasons. Bounded owner USER PASS for the requested normal choice experience: Λάθος χειριστή / Έλεγχος τιμών / Ακύρωση από πελάτη without typing, plus return to cart. Supersedes this scope’s older AWAITING USER records. Owner fix/pos-cancel-reason-options-20261010 completed. SourcePR2031/finalheadfabbcc3ab16a60122e262b8f0fb275477d73de7a/verified releaseaec8323acb2f12d89b5412ca17ea312ccfbefa60; fullPRCI38032185938 and mainCI38032390760 SUCCESS2022PASS/0FAIL/0SKIP, guardedRender38032568109 SUCCESS and independent exact health. HandoffPR2033/docsCI38032894059 SUCCESS merged484e039e85e00c01c54a23a8fe0f3d33960627b6 before acceptance. Served POS entry-hYP37qnh.js independently contained reason dialog and all three labels.

No new screenshot, physical terminal/store/operator/shift/clientSHA or live Audit ID accompanied acceptance. Actual persistence/reporting, financial/stock/control effects, offline/device/role breadth and special failure/revocation variants remain NOT TESTED by owner; earlier isolated mocked CI evidence remains distinct. No real action performed by this page and no completed transaction replay. Close only this requested presentation scope; independent OPERATOR-CHECKBOX-01 broad permission/Audit checks remain with codex/operator-checkbox-audit-20261009. Scanner/change/Gate4 and all other protected PASS preserved. POS manual/checkpoint/active/tracker updated, this scope removed from pending and central PDF regenerated. No remaining work in the bounded fixed-choice request.

10/10/2026 09:59 Europe/Athens — POS-CANCEL-REASONS-01 / DEPLOYED / AWAITING USER ACCEPTANCE / FINAL HANDOFF

Owner fix/pos-cancel-reason-options-20261010 retained until bounded USER acceptance or named receiver. SourcePR2031 finalheadfabbcc3ab16a60122e262b8f0fb275477d73de7a, fullCI38032185938 SUCCESS2022PASS/0FAIL/0SKIP/build/TABLE_SERVICE/production invariants/isolated HTTP E2E. Mergedaec8323acb2f12d89b5412ca17ea312ccfbefa60; exact-mainCI38032390760 SUCCESS2022PASS/0FAIL/0SKIP/full required checks. GuardedRender38032568109 SUCCESS, pinned aec8323 and verified exact healthy; independent read-only /api/health ok=true/version0.22.0+kat-test-pos/revisionaec8323acb2f12d89b5412ca17ea312ccfbefa60. Initial sourceCI38032127587 cancelled after the final keyboard-focus commit superseded its head, not a test failure. Final PR/main CI passed without retry. ClaimPR2030/docsCI38031866074 merged before source. Other-owner operator resumePR2032/maine8e00df docs and all protected scanner/change/Gate4 PASS retained.

Delivered required current-cart cancellation reason choice: exactly Λάθος χειριστή / Έλεγχος τιμών / Ακύρωση από πελάτη, no typed input, plus Επιστροφή στο καλάθι. Existing reason/confirmation flags retained; if reason flag is off the prior no-reason path stays. Dismiss/Escape/revoked flag/store change keep cart and send no cancellation. Selection posts unchanged strict CART_CANCEL audit with chosen reason once before clearing; rejection retains cart. In-flight progress dialog blocks clicks/keyboard/scanner and duplicate action; no stale response clears another store. Scanner returns after close/success/failure. No backend/VOID sale reversal/payment/fiscal/stock/auth change.

Local actual mounted POS10/10PASS/0FAIL/0SKIP with all three exact store-scoped audit payloads, absence of text entry, safe initial dismiss focus/dismiss/Escape, live flag revoke, audit rejection, delayed duplicate guard and scanner block/restore; barcode/customer/payment live guards/change notice/no-print regressions preserved. Frontend2267modules/TABLE_SERVICE PASS; final pending-dialog focus adjustment had mounted regression PASS and full final CI build. No real cart Audit/sale/payment/stock/shift/fiscal action during diagnostics: mocked DOM only.

Newest real evidence for this new choice flow is NOT TESTED by owner. Production/source/CI delivery is not USER/LAB PASS. No new manual entry or pending removal yet. Single next action: owner refreshes POS and observes/selects one fixed reason during the next ordinary current-cart cancellation; no completed transaction replay for documentation. Physical store/terminal/operator/shift/client identity, recorded live Audit ID and financial/stock/control effects, offline/device/role breadth remain NOT TESTED. After owner acceptance publish bounded USER PASS/checkpoint/manual/active/tracker/pending removal/PDF with green docs CI and merge. Independent OPERATOR-CHECKBOX-01 broad permission/Audit acceptance remains owned by codex/operator-checkbox-audit-20261009; no takeover or second parallel LAB test. Owner and next action stay explicit. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-cancel-reasons.md; active/pending/tracker/PDF synchronized.

10/10/2026 09:48 Europe/Athens — POS-CANCEL-REASONS-01 / IMPLEMENTED / AWAITING CI, EXACT DEPLOY AND USER

Owner fix/pos-cancel-reason-options-20261010 retained. ClaimPR2030/head6ce890eabaaba34658dd5872b083c00b2a7ffe4b/docsCI38031866074 SUCCESS mergeda4e312ab8f84d44a2f90686acd22f820ec754717 before source. Replace only required current-cart reason prompt with accessible touch dialog: Λάθος χειριστή / Έλεγχος τιμών / Ακύρωση από πελάτη plus Επιστροφή στο καλάθι. No text entry; safe initial dismiss focus, Escape and Tab containment. Existing confirmDeleteSale/deleteSaleReason settings remain; disabled reason flag retains previous no-reason path. Dismiss/revoked reason flag/store change do not clear or submit. Existing CART_CANCEL payload/reason/store endpoint remains; strict audit success precedes clear, failure retains cart. In-flight lock and progress overlay block duplicate submission and scanner additions while auditing; stale store responses do not clear another store. Scanner focus returns after close/success/failure. Backend/payment/stock/fiscal/VOID reversal untouched.

Actual mounted POS regression covers all three exact reason payloads once, no text input, dismiss/Escape/cart retention, live reason grant/revoke, strict audit failure, delayed audit duplicate prevention and scanner block/restore; existing barcode/customer/live payment tests preserved. Scanner/change/no-print regressions retained. Local Node20 mounted regression10/10PASS/0FAIL/0SKIP and frontend2267modules/TABLE_SERVICE build14.11sPASS; full CI/main CI and guarded exact deployment required; normal physical reason/Audit acceptance remains NOT TESTED, not USER/LAB PASS. No real cart Audit/sale/payment/stock/shift/fiscal action for diagnostics; all actions isolated mocked DOM. Independent OPERATOR-CHECKBOX-01 owner and broader audit acceptance remain unchanged, as do scanner/change USER PASS and all other owners. Next green source/main CI and exact deploy, then owner observes choices on next ordinary cancellation without replaying completed transactions. Manual stays unchanged until actual USER acceptance. Active/pending/tracker/PDF synchronized.

10/10/2026 09:42 Europe/Athens — POS-CANCEL-REASONS-01 / ASSIGNED / NOT TESTED

Owner fix/pos-cancel-reason-options-20261010, explicit new owner request for three fixed reasons instead of typing: Λάθος χειριστή / Έλεγχος τιμών / Ακύρωση από πελάτη. Screenshot image(20261010-063940).png shows native required reason prompt on current-cart ΑΚΥΡΩΣΗ, MYWORKSTATION LAB/catalog11/93/SKU2269 qty1/total0.50/stock−69; after-only values, no economic/stock delta or new action authorized for diagnostics. Current source uses liveAccess.deleteSaleReason/native prompt and CART_CANCEL audit before clearing. This independent bounded presentation requirement does not take over OPERATOR-CHECKBOX-01 owner codex/operator-checkbox-audit-20261009 or its broader cancel/permission/Audit acceptance.

Preserve existing confirmDeleteSale/deleteSaleReason settings, store isolation, existing required audit success before clearing, failure retains cart, no sale reversal/payment/fiscal/stock change. New touch dialog has exactly three reason choices plus dismiss; dismiss keeps cart, selection records the unchanged CART_CANCEL payload with chosen reason once, then clears and restores scanner focus. Protect scanner and three-second change notice USER PASS, historical Gate4 cancellation PASS and all other owners. Local actual mounted POS regressions cover choices/dismiss/failure/double-submit/live settings; full CI/main CI/guarded exact deploy precede owner acceptance. No source or real state-changing action before this claim is green/merged. Next: publish claim, then bounded replacement and isolated mocked tests. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-cancel-reasons.md; active/pending/tracker/PDF synchronized. Owner retained until USER acceptance or named handoff.

10/10/2026 08:37 Europe/Athens — N39 / BOUNDED LIVE STOCKTAKE REPORT-LEDGER LAB PASS / OVERALL OPEN

Owner codex/n39-inventory-acceptance-20261010 retained. Authorized new N39-LAB-20261010-0530-STOCKTAKE on virtual MYWORKSTATION LAB/storecmtpopbgo000trhb5ng9ytiru, SuperAdmin Χρήστος Μάνης/cloudtab12, inventoryonly/no payment. Baseline published PR2015/c3e0f104/docsCI38027728941 SUCCESS/merge51a74f53 before Start. Exact public sourcef410a1d (includes N39 sourcePR2010/b075d84 and green nativePGCI); no scanner/TODAY-07 scope change. One partial LIVE/NONE-recount TEST1 expected11,count10 at08:32:35, finalization08:33:44: FINALIZED/report−1, archive11→10, exactlyoneSTOCKTAKE_ADJUSTMENT−1, ledgercurrent10/recorded10/difference0/movements9→10/duplicates0. Reopened final UI offers no count/delete/finalize controls. TEST2−2/ledger−2/difference0/movements2/duplicates0 and latest1Octsale unchanged. Audit CSV records Χρήστος Μάνης/SCANNER/oneCOUNT. Evidence n39-stocktake-result-20261010-visible.jpg, n39-stocktake-ledger-20261010.jpg, n39-stocktake-count-audit-20261010.csv and n39-stocktake-ledger-20261010.csv under CHECKPOINTS/EVIDENCE.

An independent water500ML CASH sale occurred08:31 (not submitted by this page): initialMAIN0/0 became1/cash0.50/card0/IRIS0/total0.50. Creation financialdelta not attributed and not certified. Fresh1/0.50 baseline recorded before count/finalize and refreshed after each: unchanged. Control LAB-POS-02 transactions2/cash0/card0/IRIS0/total0/expenses120 unchanged. No payment/sale/shift action from this page. Physical hardware, native-concurrent UI overlap, live repeat API rejection and mandatory cause input are NOT TESTED; finalization posts a generic reason. Report/ledger causal regression acceptance only is PASS; full #39 OPEN for reason/recount/roles, count-import-edit concurrency, transfers, waste/expired goods and own consumption. Do not repeat this passed finalization for evidence. Next new identified waste/expired1unit on TEST1stock10 after fresh before/after controls. Gate2 and desktop scroll PASS retained. Checkpoint2026-10-10-n39-live-tests.md; manual inventory/PASS.md and pending/numbered/tracker PDFs synchronized.

10/10/2026 09:38 Europe/Athens — POS-CHANGE-NOTICE-01 / USER PASS / CLOSED

Χρήστος Μανής confirmed «ειναι οκ» at09:38:43 after delivery of the large clear three-second ΡΕΣΤΑ notice. Bounded USER PASS for the requested normal POS notice experience; no additional payment/stock action performed by this page. SourcePR2021/release44ca5ec4cc70777b0f60ac212faadeb10d05e500, PR CI38030716047 and main CI38030929424 SUCCESS2022/0/0; guarded Render38031115668 SUCCESS and independent health exact revision verified before delivery. HandoffPR2028/docsCI38031432598 SUCCESS mergedc4e33405daed57ea647368bc83aca28fc67ad63c. This acceptance supersedes older AWAITING OWNER records for the same bounded notice scope. Owner fix/pos-change-notice-20261010 completed; remove only this scope from pending. Scanner USER PASS and all independent owners preserved.

No screenshot, physical terminal/store/operator/shift or independently inspected client SHA accompanied this acceptance; offline/recovery/fiscal/card/mixed/exchange variants, all devices and financial/stock/control effects remain NOT TESTED by owner. Existing mocked regressions and historical timing-test retries remain in the prior checkpoint; do not infer broader LAB PASS or repeat completed economic actions. Relevant POS manual now includes usage, security, criteria and troubleshooting; active/tracker/pending/PDF synchronized. No remaining work in the requested ordinary notice scope.

10/10/2026 09:34 Europe/Athens — POS-CHANGE-NOTICE-01 / DEPLOYED / AWAITING OWNER USER ACCEPTANCE / FINAL HANDOFF

Owner remains fix/pos-change-notice-20261010; no receiving page named and no parallel reassignment. Source PR2021 final head a09efc1db4200967bddf0c435dc6b08ccf4ed486, CI38030716047 SUCCESS (2022PASS/0FAIL/0SKIP, frontend/TABLE_SERVICE, production invariants and isolated HTTP E2E), merged44ca5ec4cc70777b0f60ac212faadeb10d05e500. Main CI38030929424 SUCCESS (2022PASS/0FAIL/0SKIP and full required checks). Guarded Render38031115668 SUCCESS: exact pinned revision44ca5ec4cc70777b0f60ac212faadeb10d05e500; independent read-only /api/health confirmed ok=true/version0.22.0+kat-test-pos/same revision. Source claim PR2019 mergedc8a10c92d36172695254d55050934712dbc3b414 before source. Shared N39/operator/photo owner records and their completed PASS/manual/PDF histories preserved through merges; no source changes outside this bounded display flow.

Delivered: valid covered received-money keypad input shows large nonblocking ΡΕΣΤΑ and amount for exactly3000ms, replacement restarts the timer; successful matching CASH result re-shows actual change after cart/input reset and load. Example20EUR received/1EUR total =>19,00EUR. Notice takes no keyboard focus or clicks; scanner USER PASS from PR2016/main d9a83a6580cc72a20017987e9276d361af284559 preserved. Empty/invalid/insufficient input does not promise change; exact-paid0 is supported. Pending/rejected/noncash/mixed/exchange and recovered transactions without matching in-memory tender do not claim completed cash change. Existing offline queue display is additive; real offline/device/recovery acceptance remains NOT TESTED. No API payment payload/backend/schema/fiscal/stock/auth/permission mutation by this change.

Evidence: latest Node20 mounted POS change/scanner/no-print/operator regressions10/10PASS/0FAIL/0SKIP; frontend2267modules/TABLE_SERVICE PASS. Earlier source CI38028617313 SUCCESS2020PASS. CI38028879788 attempt1 failed unchanged pos-capacity-runner.test.js:35 offeredLatencyMs>=latencyMs; isolated8/8PASS, failed-job retry attempt2 SUCCESS2021PASS. CI38029236546 SUCCESS before independent docs merge. CI38030321903 attempt1 same unchanged timing assertion failed (2021PASS/1FAIL/0SKIP); isolated8/8PASS, failed-job retry attempt2 SUCCESS2022PASS. Final PR CI38030716047 and main CI38030929424 passed without retry. No failure hidden or unrelated capacity source changed. No real sale/payment/stock/shift/fiscal action was executed for diagnostics.

Newest real evidence for this notice: NOT TESTED by owner; CI/local mocks and exact deployment are not USER/LAB PASS. No new manual entry or pending removal yet. Single next action: owner observes the notice on the next ordinary keypad use (and ordinary successful cash checkout if available), confirms clarity and three-second disappearance; do not repeat completed economic actions solely for documentation. If owner accepts, immediately record bounded USER PASS in checkpoint/active/tracker/POS manual, remove only this pending scope and regenerate PDF with green docs CI/merge. Physical terminal/operator identity, measured financial/stock/control effects and all devices remain NOT TESTED unless separately evidenced. Current owner stays assigned until acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-change-notice.md; this final handoff synchronizes active/pending/tracker/PDF.

10/10/2026 08:44 Europe/Athens — POS-CHANGE-NOTICE-01 / IMPLEMENTED / AWAITING CI, DEPLOY AND OWNER ACCEPTANCE

Claim PR2019/head523058d6aeffdcbab6313abaac0498195bf36aa3 docs CI38028235303 SUCCESS merged c8a10c92d36172695254d55050934712dbc3b414 before source. Owner fix/pos-change-notice-20261010. Client-only dedicated change notice uses integer-cent subtraction, large navy/teal/white 'ΡΕΣΤΑ' and amount, no backdrop/dialog/focus/click capture. Valid covered keypad amount shows preview; last amount update restarts exact3000ms. Confirmed CASH result uses actual returned total and the received-money snapshot tied to current store/clientTransactionId, then re-shows for3seconds after cart reset/load; unrelated generic8second message remains separate. Empty/invalid/insufficient tender, noncash/mixed or exchange do not produce a misleading completed cash notice. Fiscal pending hides preview; confirmed completion may show only matching in-memory tender, never invents tender on recovery. Existing offline queue success has a display-only completion call with its returned total. No payment payload, backend/schema/fiscal/stock/auth/permission mutation.

Node20 isolated actual POS DOM + scanner/no-print regression9/9PASS/0FAIL/0SKIP:20received/1total=>19; exact2999/3000 expiry and amount replacement countdown; exact-paid0 and insufficient/empty; rejection retains cart/no COMPLETE notice; successful CASH survives load/received/cart reset, snapshot preserved despite later keypad editing; actual returned1.25=>18.75; CARD/no-tender no completed change; fiscal pending cart retained/input disabled/overlay active and observed SALE_COMMITTED shows19 without another checkout; scanner focus and unchanged payment payload verified. Existing scanner USER PASS preserved. Full source/main CI/build/invariants/isolated HTTP E2E and exact guarded deploy required before owner observation. Physical cash/scanner/display timing, all devices, real offline/recovery/before-after/control NOT TESTED; no new USER/LAB PASS and no manual update. No real sale/payment/stock/shift/fiscal action during diagnostics. N39/operator/invoice/N13 and all existing owners preserved.

Local frontend build PASS2267modules/TABLE_SERVICE,19.43s. Concurrent N39 stocktake USER/LAB evidence PR2018/mainccb6b8ad707b5b9d255811d6230f5705424e79a3 and its other-owner records/manual/numbered PDFs retained; no N39 source edited. Next: green full CI/merge/main CI/guarded exact deploy; then owner observes the notice during next normal keypad use/ordinary transaction without repeating completed economic actions. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-change-notice.md; active/pending/tracker/PDF synchronized. Owner retained until explicit acceptance or named receiving-page handoff.

10/10/2026 08:38 Europe/Athens — POS-CHANGE-NOTICE-01 / ASSIGNED / NOT TESTED

Owner fix/pos-change-notice-20261010, explicitly requested by Χρήστος Μανής: clear change-due notice when using the received-money keypad, disappearing after3seconds. Screenshot image(20261010-053252).png shows cart NEPO1,5LT/SKU2270 quantity1/total1.00EUR, received20.00EUR/change19.00EUR; negative-stock warning is existing evidence, not an invitation to repeat a sale. No real sale/payment/stock/fiscal action by this page. Source currently has persistent keypad received/change values but no large dedicated change notice; generic success message lasts8seconds and load clears it, so the new notice must be independent.

Bounded client display scope: large nonblocking 'ΡΕΣΤΑ 19,00 €' for valid covered keypad amount, refresh3second countdown when amount changes and show confirmed cash change after successful checkout even after cart/load reset. Insufficient/empty/nonfinite amounts do not show a misleading amount-to-hand-back. Preserve monetary calculation/payment payload, scanner USER PASS from PR2016/main d9a83a6580cc72a20017987e9276d361af284559, modal/fiscal/offline/idempotency/current-store and all permission/stock warnings; no backend/schema/payment/fiscal source change. No full physical amount/payment/stock acceptance inferred from screenshot. Current N39/OPERATOR-CHECKBOX and all other owners retained.

Acceptance: actual isolated POS DOM keypad20 on1EUR => clear19.00EUR notice; exact3second expiry, replacement restarts expiry, successful CASH retains change after reset/load and scanner focus,

failure/pending/no-input/noncash do not claim completed cash change, existing fiscal gates/payload unchanged. Full CI/build/invariants/isolated HTTP E2E, merge, main CI and guarded exact deploy precede owner observation. Manual stays unchanged until owner USER PASS. Claim publication must be green CI/merged before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-change-notice.md. Next: publish claim, then one bounded display implementation and mocked regression coverage; no duplicate real transaction for documentation.

10/10/2026 08:30 Europe/Athens — POS-SCAN-FOCUS-01 / USER PASS / CLOSED

Χρήστος Μανής απάντησε «ειναι οκ» στις10/10/2026 08:30:34 Europe/Athens, αμέσως μετά την ανακοίνωση της διάθεσης και τις οδηγίες για γνωστό barcode που προστίθεται στο καλάθι και επιστροφή του κέρσορα μετά την ολοκλήρωση συναλλαγής. Καταγράφεται περιορισμένο owner-reported USER PASS για τη συμφωνημένη κανονική ροή σάρωσης/εστίασης, όχι ανεξάρτητη LAB μέτρηση. Το POS-SCAN-FOCUS-01 κλείνει ως USER PASS· οι προηγούμενες εγγραφές AWAITING OWNER ACCEPTANCE είναι ιστορικές και υπερκαλύπτονται για αυτό το scope. Owner fix/pos-scan-focus-20261010 completed, χωρίς νέο παραλήπτη ή δεύτερη ανάληψη. Δεν επαναλαμβάνεται αποδεκτή συναλλαγή για τεκμηρίωση.

Source PR2011/merge f410a1d648ed82e81a62b79270623b2c225e77f7, combined full CI38026768095 και exact-main CI38026950331 SUCCESS2018/0FAIL/0SKIP, guarded Render38027119634 SUCCESS. Handoff PR2013/CI38027441575 και historical-integrity PR2014/CI38027539408 merged· βάση καταγραφής main e4e416de0e81b06b1635412bba57d7d9c29eb85b. Η server revision είναι επιβεβαιωμένη· το ακριβές client SHA της δοκιμής δεν δηλώθηκε ανεξάρτητα.

Η αποδοχή καλύπτει τη φυσιολογική προσθήκη γνωστού προϊόντος και ετοιμότητα πεδίου για την επόμενη σάρωση μετά τη συναλλαγή. Δεν δηλώθηκαν νέο screenshot, store/terminal/operator/shift ID, μοντέλο scanner/suffix, χρησιμοποιημένος κωδικός ή ποσά/πριν-μετά/control. Το52101588 παραμένει το δοσμένο παράδειγμα και synthetic automated fixture, όχι ανεξάρτητα ταυτοποιημένο είδος στη φυσική δοκιμή. Δεν αποδίδεται stock/financial/Audit/fiscal/print PASS, επιβεβαίωση όλων των συσκευών ή αρνητικών physical σεναρίων από αυτή την απάντηση. Καμία νέα πραγματική πώληση/πληρωμή/stock/βάρδια/φορολογική πράξη δεν εκτελέστηκε από την παρούσα σελίδα.

Manual docs/manual/pos/PASS.md ενημερώνεται με χρήση, όρια και troubleshooting. Το ολοκληρωμένο POS-SCAN-FOCUS-01 αφαιρείται από το ενεργό PENDING_WORK· checkpoint/active/tracker και generated tracker PDF συγχρονίζονται. Υπάρχοντα N39, OPERATOR-CHECKBOX, invoice/catalog, N13 και λοιπά owners/PASS παραμένουν. Επόμενη ενέργεια για αυτό το scope: καμία επανάληψη· νέο συγκεκριμένο FAIL ανοίγει μόνο το αντίστοιχο σκέλος. Docs publication branch docs/pos-scan-focus-user-pass-20261010, green CI και merge στο main πριν το τελικό κλείσιμο.

10/10/2026 08:24 Europe/Athens — POS-SCAN-FOCUS-01 / DEPLOYED / FINAL HANDOFF / AWAITING OWNER ACCEPTANCE

Owner fix/pos-scan-focus-20261010 retained; no receiving page named, no parallel reassignment. Source PR2011 merged f410a1d648ed82e81a62b79270623b2c225e77f7. Source CI38026516320 SUCCESS2017/0FAIL/0SKIP; combined head b5700affef95ae60ccbf5eebaa7949f1cba2e145 CI38026768095 SUCCESS2018/0FAIL/0SKIP; exact main CI38026950331 SUCCESS2018/0FAIL/0SKIP, build/TABLE_SERVICE/invariants/isolated HTTP E2E. Correct guarded Render38027119634 completed SUCCESS, exact-production-revision step PASS; independent public /api/health on10/10/2026 08:23 Athens returned ok=true/revision=f410a1d648ed82e81a62b79270623b2c225e77f7. No CI gate skipped/retried. Later main f3cbc9043c55c5ed6023e11d235deaf9d2fed6ca is other owner's N39 docs handoff PR2012, retained; deployed source remains f410a1d.

Completed: known unique full numeric stored barcode auto-adds after180ms even without Enter; Enter adds immediately and cancels timer, repeated scans increment quantity using existing barcode-specific price/cartKey. Initial and requested post-add/cart-clear focus returns to actual scanner input after

render/current-store readiness; successful transaction clears input and restores cursor. Busy/fiscal/payment/price/gift/other active dialogs defer focus; manual name search and other input focus retained. Unknown scans and existing checkout/fiscal/offline/idempotency/tenant behavior protected. The only caller changes sessions through logout/unmount or login readiness unmount, so scanner input cannot carry over to another live POS store session. No inventory/operator permission/fiscal source changed by this page.

Automated DOM/regression evidence uses supplied52101588 as a synthetic fixture only: with/without Enter, correct barcode price, repeated quantity, rejected checkout retains cart/query, successful mocked checkout focus, fiscalPending blocks scanner/repeated checkout; helper edge cases and existing no-print/catalog resolver regression PASS15/15. No real sale/payment/stock/shift/fiscal action occurred during diagnostics. No known reproducible scan failure in these checks. Physical scanner/device/suffix/store/product identity and actual next-transaction focus remain NOT TESTED; no scan USER/LAB PASS or manual PASS inferred. Prior limited invoice normal matching/name USER PASS from owner 'ειναι οκ' remains unchanged, as do other owners and protected category/N13 behavior.

Single next action: refresh the POS and let owner observe one ordinary known-product scan plus scanner focus after the next naturally required completed transaction; capture actual device/store/revision and exact result, without repeating any economic action for evidence. If52101588 is absent from that store, use an existing known barcode rather than create/alter an item. Physical acceptance remains OPEN/AWAITING LAB until reported. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-scan-focus.md; active/pending/tracker and generated tracker PDF synchronized. Docs handoff branch docs/pos-scan-focus-handoff-20261010; publish green docs CI and merge to main before ending this page.

10/10/2026 08:18 Europe/Athens — N39 / INVENTORY-ADV / FIRST BOUNDED CHANGE MERGED / DEPLOY VERIFIED / AWAITING LAB

Owner codex/n39-inventory-acceptance-20261010 retained. PR2010 head39fc13f6b1d6cae6b7cf81031706492a55d654fc merged as b075d84dd35f171a6d57960333748b03578c292e. Full PR CI38026423139 SUCCESS:2015PASS/0FAIL/0SKIP including real isolated PostgreSQL finalization/trigger scenarios; build, production invariants and real HTTP E2E green. Main CI38026597651 first attempt failed one unchanged POS-capacity timing assertion (offeredLatencyMs>=latencyMs), while the inventory PostgreSQL test passed; rerun of failed jobs is now full SUCCESS. No unrelated capacity/POS source modified.

Render Auto-Deploy is disabled. Manually deployed exact b075d84; deployment dep-db4si9flot8c73cs0vm0 succeeded/Live in2m55s. Independent GET /api/health returned ok:true and full b075d84 revision. Evidence CHECKPOINTS/EVIDENCE/n39-render-live-20261010.jpg. This is deployment/health evidence, not inventory LAB acceptance or full N39 PASS. Latest main f410a1d contains the separately owned POS-SCAN-FOCUS-01 change; this checkpoint preserves it and makes no acceptance/deployment claim for that other scope.

Read-only LAB access confirmed company MYWORKSTATION LAB and store cmtpopbgo000trhb5ng9ytiru / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. Existing finalized11Sep15/15 report remains totaldifference+10, with +7/+2/+1 water lines; its investigation returned3 differences with no recorded explanation, without repeating accepted stock actions. Refreshed read after deployment returned the existing report. Financial view changed between observations from0 to1 closed shift: TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ, MAIN, LAB POS2, closed10Oct08:13:02, cash4.50/card0/EFTPOS0/difference−5.50. No attribution or inventory/financial delta inferred; IRIS/total, transaction count, active/operator identity, current affected-SKU ledger and unaffected-terminal control baseline remain uncaptured. No manual LAB count/finalization, stock adjustment, transfer, payment, sale or shift closure performed.

Full #39 remains OPEN/AWAITING LAB: finalization acceptance, concurrent count/import/line edits, transfers, waste/expiry, own consumption and reasons. Gate2 basic PASS, desktop scroll USER PASS and TODAY-07 existing owner remain protected. Single next step: establish a separately identified new LAB stocktake test with its terminal/operator and fresh stock/financial/control baseline recorded in this checkpoint BEFORE any state-changing action; then compare report/ledger and repeat-finalization rejection on the deployed revision. If baseline identity cannot be established, remain read-only and NOT TESTED. Owner retained until explicit receiving-page assignment; do not take parallel ownership.

10/10/2026 08:13 Europe/Athens — POS-SCAN-FOCUS-01 / SOURCE CI PASS / COMBINED CI PENDING

PR2011/head954078175c03e9f80b6dd154eca012cc139e8f87 full CI38026516320 SUCCESS2017/0FAIL/0SKIP, build/invariants/isolated HTTP E2E and actual scan/focus DOM coverage. No skipped or retried gate. Concurrent main b075d84dd35f171a6d57960333748b03578c292e Inventory PR2010 source/checkpoint/owner preserved; only adjacent top active/tracker records combined and tracker PDF regenerated. Inventory finalization source is not modified by this page. Combined-head full CI required before merge, exact deployment and physical acceptance still pending. No real sale/payment/stock/fiscal action or manual scan PASS. Owner fix/pos-scan-focus-20261010 retained. Next: combined CI, merge, main CI/guarded deploy/exact health then owner observation of known scan and next transaction input. Checkpoint2026-10-10-pos-scan-focus.md.

10/10/2026 08:08 Europe/Athens — POS-SCAN-FOCUS-01 / IMPLEMENTED / AWAITING CI, DEPLOY AND OWNER LAB

Claim PR2009/full docs CI38026122080 SUCCESS merged fba26d1 before source. Owner fix/pos-scan-focus-20261010. Initial and requested post-add/cart-clear focus uses actual scanner input ref after render and readiness/current-store checks, deferred while busy/fiscal/price/gift/payment/other dialogs remain active. No periodic global focus stealing; visible external modal blocks focus, hidden minimized modal does not. Known exact barcode+Enter uses existing add path, barcode-specific price/cartKey preserved; stable180ms unique full numeric stored barcode also auto-adds without Enter. Prefix of a longer stored barcode/duplicate/SKU-only/name/unknown never silently auto-add. Enter cancels pending timer to prevent duplicate addition. Query clears after completion. Unknown Enter behavior remains existing guarded path.

Node20 actual POS DOM and regression suite15/15PASS:52101588 with/without Enter one add each, repeated quantity2 and barcode price1.20 preserved; name search/no-auto-SKU/prefix/duplicate, hidden/disabled/detached/dialog focus, another input retains focus, successful mocked checkout refocus, rejected checkout retains cart/query, fiscalPending retains cart/disables scanner with no repeated checkout. Existing no-print/catalog resolver tests PASS. Frontend build PASS2266modules/TABLE_SERVICE preserved. Mock fixture only; no real product/cart/sale/payment/stock/shift/fiscal state changed by diagnostics. Physical scanner suffix/store/device/product identity NOT TESTED; supplied52101588 only synthetic test value, not verified inventory item. Full source/main CI/build/invariants/isolated HTTP E2E and exact guarded deployment pending; owner acceptance remains AWAITING LAB. Invoice normal name/matching USER PASS recorded by claim, other assignments preserved. Next full CI/merge/deploy then one owner scan and next ordinary transaction focus observation without diagnostic duplicate payment. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-scan-focus.md.

10/10/2026 08:02 Europe/Athens — POS-SCAN-FOCUS-01 / ASSIGNED / NOT TESTED

10/10/2026 08:07 Europe/Athens — N39 / INVENTORY-ADV / FINALIZATION REPRODUCED / FIX IN CI / LAB NOT TESTED

Owner codex/n39-inventory-acceptance-20261010 retained; bounded implementation branch codex/n39-finalization-20261010. Isolated execution of the current route and the real live-stocktake SQL trigger reproduced expected10/count8: ledger−2 but final report0 (own adjustment changes draft expected10→8). Fix closes the parent within the transaction before posting its movements, serializes repeat finalization using the parent lock, locks stock before lines, validates unresolved/recount under lock, and applies the measured difference to current stock rather than losing movements committed since an offline snapshot. Partial scope and unrelated product/store controls retained. No barcode/mobile/TODAY-07 source changes.

Local Node20 full server suite2008 tests:2002PASS/0FAIL/6SKIP (isolated PostgreSQL tests require CI test database). Local PGlite execution of the real trigger and finalization scenarios passes: own report/ledger agreement, repeated and queued double closure, unresolved/recount rejection, offline/live movement preservation, rollback and unaffected stock controls. PGlite is single-backend: no native concurrent PostgreSQL PASS inferred. Added guarded isolated-schema PostgreSQL test for existing full CI; CI/main/deployment and LAB acceptance remain pending. No production/LAB stock, sale/payment/shift or count mutation. Next: full CI and bounded merge, exact deploy, then fresh LAB before/action/after/control evidence. Concurrent count/import/line edits versus closure and transfer/waste/expiry/own-consumption/reason acceptance remain OPEN/NOT TESTED. Gate2 PASS and desktop scroll USER PASS preserved. Checkpoint: CHECKPOINTS/CHANGES/2026-10-10-n39-finalization.md.

10/10/2026 08:05 Europe/Athens — POS-SCAN-FOCUS-01 / ASSIGNED / NOT TESTED

Owner fix/pos-scan-focus-20261010, explicitly requested by owner: scanning a known product must immediately add to cart; successful transaction completion must return cursor to barcode/search input for next scan. Example supplied52101588, screenshot image(20261010-045734).png shows ordinary standard-search input and empty cart. Existing scanOrSearch already adds exact active catalog matches on scanner Enter; no initial input ref/focus or post-completion focus exists. Scope is client scanner input/focus lifecycle only, not Inventory/TODAY-07/operator permission/fiscal assignments. Preserve current barcode-specific price/cartKey, unknown scan/manual name search, gift/free-price dialogs, all checkout/fiscal/offline/idempotency/tenant gates. No real product/sale/payment/stock/shift/fiscal write in diagnostics. Original hardware/current-store identity and scanner suffix NOT CAPTURED; physical acceptance NOT TESTED. Claim merge precedes source.

Acceptance: isolated actual POS DOM known barcode52101588+Enter immediately adds one correct line, input cleared/ready for subsequent scan; initial focus and post-success focus restored after render, no focus stolen from payment/price/gift/audience inputs or fiscal pending overlay, rejected checkout retains cart and no success-reset claim. Current-store data and blocked/detached input respected. Full CI/build/E2E and exact deployment before owner acceptance. Existing category performance/N13 PASS and all assignments protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-pos-scan-focus.md.

10/10/2026 07:57 Europe/Athens — INVOICE-CATALOG-MATCH-01 / LIMITED USER PASS

Owner explicitly replied «ειναι οκ» following deployed d01925c barcode/invoice-name acceptance instructions. Record owner-reported matching acceptance and retention of original invoice description; no independently captured store/operator/draft/product IDs, saved-write/duplicate counts or financial/stock/control deltas inferred. Source/deploy exact d01925c independently verified previously, physical client SHA unknown. This supersedes AWAITING USER for the reported normal matching/name-preservation flow; unknown/ambiguous/stale/error physical cases and independent database duplicate proof remain NOT TESTED. No replay of prior invoice/payment. Manual invoices updated for confirmed normal usage only; other Gates and barcode negative residual remain open.

10/10/2026 — INVOICE-CATALOG-MATCH-01 / MERGED / DEPLOY HEALTH PASS / OWNER LAB PENDING / FINAL HANDOFF

Owner fix/invoice-catalog-matching-20261010 retained until explicit receiving-page assignment; no parallel takeover. PR2006 finalhead78fe65f32e80b4ea92b36e02e0d309220ca6a07b combined full CI38001402256 SUCCESS2014/0FAIL/0SKIP, source merged d01925c41f86c9faf090bf7f3ce2ef29e6f338e3. Main full CI38001726283 SUCCESS2014/0FAIL/0SKIP plus build/invariants/isolated HTTP E2E. Guarded Render38001991617 SUCCESS. Independent read-only production /api/health returned ok=true and exact d01925c41f86c9faf090bf7f3ce2ef29e6f338e3. Source CI38000809119 attempt2 passed; earlier refresh VM fixture import failure corrected without weakening refresh assertions; known unrelated capacity timing failure retained in attempt1, isolated8PASS and all later full runs unchanged. No bypass. Concurrent N39 claim PR2007 and operator audit ownership/records preserved.

Implemented: scoped active inventory barcode lookup on scan/type and fresh before save; exact unique match chooses existing product and uses existing line PATCH, no create-product request. Unknown barcode says no other item in this store; invalid/error/stale/unresolved ambiguous results block save. Ranked nearby names recognize supplier abbreviations/flavour/size and paginate25 rather than first12; human selection required for names. Latest owner requirement preserved: original supplier invoice description stays in form and saved invoice line; warehouse product name is shown separately, never renamed. Purchase values/package conversion/learning, prior barcode/decimal PASS and PR2001 transfer/minimize protected. No schema change or production invoice/product/payment/stock/fiscal/myDATA/finalization mutation used for verification.

Actual production-form/DOM and isolated PostgreSQL temporary-table fixtures passed in CI, not owner LAB. HLS honey/lemon and7D invoice examples remain NOT TESTED live after deploy; overall matching acceptance AWAITING LAB. Do not add a simulated manual PASS or close numbered business task. Single next action: owner refreshes the existing invoice draft, opens line correction, enters known inventory barcode (or selects proposed nearby name), verifies warehouse identity displayed separately and original invoice description retained, then confirms one line only with fresh before/after/control evidence if saving. Verify same inventory identity/no second product; do not reupload, repay, finalize or post stock. Unknown barcode must display no-match, not silently choose a similar item. Record actual result before PASS/manual/pending closure. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-catalog-matching.md.

10/10/2026 — INVOICE-CATALOG-MATCH-01 / SOURCE CI PASS / COMBINED CI AND DEPLOY PENDING

PR2006 source head e1d8b8ebcd186b533b442ca735371d288db83edf full CI38000809119 attempt2 SUCCESS2014/0FAIL/0SKIP, actual PostgreSQL/production-form coverage, build/invariants/isolated HTTP E2E included. Initial38000604974 exposed seven refresh VM fixtures unable to parse the new ES module import; fixture adapted without changing refresh assertions, isolated11PASS.38000809119 attempt1 retained known unrelated capacity offeredLatencyMs>=latencyMs timing failure; isolated8PASS and complete attempt2 PASS unchanged. No CI bypass.

Concurrent main b3528b4b3304c9958da1a3762e3bb411037c29e9 contains docs-only N39 inventory claim PR2007; preserve all N39 assignment/checkpoint/numbered records, combine shared top entries and regenerate tracker PDF. Combined-head CI required before merge. Invoice owner fix/invoice-catalog-matching-20261010 retained; original supplier description remains on matched line, warehouse name unchanged, exact barcode reuses inventory product, no product duplicate creation. Current-store name candidates require selection. Exact deploy and owner HLS/7D LAB remain pending; no production invoice/payment/stock/finalization writes or USER/LAB PASS. Next: combined full CI then guarded deploy and exact health, followed by owner inspection of existing draft. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-catalog-matching.md.

10/10/2026 — INVOICE-CATALOG-MATCH-01 / IMPLEMENTED / AWAITING CI, DEPLOY AND LAB

Owner fix/invoice-catalog-matching-20261010 retained; claim PR2005 merged05b8935 before source. New read-only catalog-matches GET verifies company/order/line/current store and active own-store inventory. Exact unique barcode selects existing product automatically; unknown barcode displays explicit own-store no-match; fresh pre-save lookup blocks invalid, stale, failed or unresolved ambiguous barcodes. Existing create-product same-company duplicate409 guard remains. Name suggestions rank supplier abbreviations/flavour/size and paginate25 rather than silently cut at12; fuzzy suggestions require human selection.

Latest explicit owner requirement: supplier invoice description remains unchanged on matching and PATCH save. Warehouse product name is shown separately and never renamed; existing product is reused rather than duplicated. Quantities, purchase economics, package conversion and learning remain in existing save path. No production invoice/payment/stock/fiscal/myDATA/finalization mutation and no schema migration. PR2001 manual transfer/minimize, operator owner/permissions and prior barcode/decimal PASS protected. Only existing authorized order GET whitelist is extended to scoped lookup.

Node20 targeted suite27 PASS/0 FAIL/1 isolated PostgreSQL test SKIP locally (no test DB); production form bundled in JSDOM proves original description plus existing productId PATCH and zero create-product requests, including double-click. Matcher tests cover ambiguity/error/stale save, store/tenant filters, abbreviations and reachable paging. Frontend build PASS2265modules. Actual PostgreSQL temporary-table fixture scheduled in full CI; CI/build/invariants/isolated HTTP E2E and exact guarded deploy pending. Fixture evidence is not USER/LAB PASS. Original HLS/7D supplier examples remain NOT TESTED live. Next: full CI, merge, verify exact health, then owner review/match existing draft without reupload/payment/finalization; keep original invoice description and verify one existing inventory identity. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-catalog-matching.md.

10/10/2026 01:46 Europe/Athens — N39 / INVENTORY-ADV / ASSIGNED / NOT TESTED

Owner codex/n39-inventory-acceptance-20261010, explicitly assigned by Χρήστος Μανής in the current conversation. Scope: remaining Inventory 2.0 acceptance for stocktake/reason, transfers, waste/expired goods, own consumption and concurrent movements. Preserve Gate2 owner-confirmed PASS and 08Oct desktop scroll USER PASS; do not repeat accepted actions only for evidence. TODAY-07 unknown-barcode mobile/tablet continuation remains with its existing owner and is excluded from this claim. No named active owner for the functional INVENTORY-ADV residual is recorded in the current tracker; this explicit assignment resolves its placeholder, without taking over TODAY-07, invoice/catalog or any other scope.

Current evidence: Gate2 manual PASS23Sep and scroll USER PASS08Oct; new full N39 residual NOT TESTED, not CI/LAB PASS. Read AGENTS, numbered list, tracker, full active list, pending and inventory manual. Source assessment found finalization checks status/unresolved lines outside its transaction and writes counted stock directly; concurrency behavior requires isolated reproduction, not a speculative production fix. No source, production data, stocktake creation/count/finalization, payment or stock mutation performed. First publish this claim with green CI/main, then inspect current main history and relevant movement/finalization checkpoints and run isolated functional/concurrency checks. State-changing LAB only after fresh before/after/control evidence and correct LAB identity. Checkpoint: CHECKPOINTS/CHANGES/2026-10-10-n39-inventory-acceptance.md.

10/10/2026 01:36 Europe/Athens — INVOICE-CATALOG-MATCH-01 / ASSIGNED / USER FAIL

Owner fix/invoice-catalog-matching-20261010; explicit owner request and standing push/PR/merge/deploy approval. Independent invoice-line catalog lookup: barcode entry/scanning must find existing own-store products and select exact unique match rather than create a duplicate; explicit no-match indication and guarded fresh lookup before save. Improve nearby-name proposals for supplier abbreviations and show more than first12. No OCR/page evidence, settlement, payment, stock, finalization, fiscal/myDATA or operator permission mutation. Preserve PR2001 manual transfer/minimize and PR2002 operator runtime gates; operator audit owner retained. This is not a takeover of myDATA receiving or operator audit.

Newest owner screenshots 221420/222736/222923: full supplier description finds none, short halls query lists first12 alphabetically, barcode input has no automatic lookup. Existing server create-product409 duplicate guard prevents same-company barcode duplication but gives no proactive match. USER FAIL for matching workflow; no record of duplicate actually created. Main9e3d396 history and active/pending/numbered/manual/relevant barcode checkpoints read; historical barcode/decimal LAB PASS preserved.

Acceptance: own-company/order/store-scoped lookup; exact unique barcode selects existing product, save PATCH only/no create; unknown barcode shows no match and only then permits existing new-product path; invalid, ambiguous, failed/stale request cannot silently create; name candidates remain human-selected, no auto fuzzy mapping, all returned results reachable. Verify actual DOM and isolated route/tenant behavior, full CI/build/E2E and exact deploy. Existing owner's invoice must not be reuploaded/paid/finalized. CI is not LAB PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-catalog-matching.md. Implementation NOT TESTED.

10/10/2026 — INVOICE-MANUAL-DRAFT-01 / MERGED / DEPLOY HEALTH PASS / OWNER LAB PENDING

PR2001 merged as b41deda0841a809fe0a1c2a897b096118045f804 after combined-head full CI37995554966 SUCCESS. Main full CI37995899541 SUCCESS; guarded Render deploy37996179017 SUCCESS. Read-only production /api/health returned ok=true and exact revision b41deda0841a809fe0a1c2a897b096118045f804. Node20 build and15 actual-client/review/minimize fixture tests PASS. Initial CI37994541171 attempts1/2 retained unrelated capacity timer assertion failures; attempt3 and combined/main runs succeeded unchanged, no gate bypass.

Transfer button now remains visible when printed rows exist, including after discount corrections and when AI page verification fails. Selected valid rows save to the same editable draft after explicit human page confirmation; cancellation writes nothing. AI warning, numeric/unit/payable/quantity/current-draft/concurrency guards remain. No production invoice, payment, stock, fiscal, myDATA or finalization mutation performed for verification. Existing ALFA8827 real-user persistence remains NOT TESTED after deployment: single next action is owner refresh, review/select existing rows, click Transfer, confirm original pages if prompted, and inspect same draft. Do not reupload, pay or finalize to test this fix. No new USER/LAB PASS or numbered business completion. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-manual-draft-transfer.md.

10/10/2026 — INVOICE-MANUAL-DRAFT-01 / CI PASS / DEPLOY AND LAB PENDING

Source PR2001/head e3cd78b3a79e964f62aa7476325870acdbc77c0f full CI37994541171 attempt3 SUCCESS, including actual-client tests/build/invariants/isolated HTTP E2E. Attempts1/2 failed only existing pos-capacity-runner timing assertion offeredLatencyMs>=latencyMs; isolated8tests passed unchanged. No bypass or unrelated source edit. Main d358b9e contains independent operator-customer-entry PR2000: preserve its source and all records, regenerate shared tracker PDF to resolve the only merge conflict. Combined-head CI required before merge; exact Render revision and owner LAB8827 still pending. No production invoice mutation or new USER PASS.

10/10/2026 — INVOICE-MANUAL-DRAFT-01 / IMPLEMENTED / AWAITING CI AND LAB

Claim PR1999 merged as e9c925a before source edits. Owner fix/invoice-assistant-manual-draft-transfer-source-20261010. Transfer button is visible whenever printed rows exist, including AI pagesComplete=false. Selected valid rows may be saved to the same editable draft only after explicit confirmation that all original pages were checked. The AI warning stays visible; cancellation writes nothing. No permission is inferred from assistant prose. Totals within0.05, mandatory units/fields, quantity confirmation, draft status/current identity/concurrent-change checks remain active; incomplete-page deletion proposals remain suppressed. No finalization/payment/stock/fiscal/myDATA changes.

Node20 isolated actual-client DOM coverage and existing review/minimize tests:15/15 PASS. Covers cancellation, fresh confirmation after rereview, complete-page path, corrected discount, missing unit, quantity confirmation, duplicate clicks/retry, minimize/restore, closed draft and zero rows. Fixture evidence only; existing ALFA8827 owner acceptance remains USER FAIL until an actual post-deploy attempt. Full CI and exact deployment verification pending. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-manual-draft-transfer.md.

10/10/2026 00:29 Europe/Athens — INVOICE-MANUAL-DRAFT-01 / ASSIGNED / USER FAIL

Owner fix/invoice-assistant-manual-draft-transfer-20261010; explicit owner instruction and subsequent publication approval in this conversation. Independent bounded client review/apply extension: always show the draft-transfer action when printed rows exist; permit explicit human confirmation of all original pages when AI page verification fails. Preserve visible AI warning, mandatory valid selected-row fields/economics, quantity confirmation, current draft/tenant/permission checks, concurrent-change detection, existing draft identities and minimize/restore. No automatic transfer from AI prose, approval/finalization, payment, stock, fiscal or myDATA mutation.

Owner screenshots image(20261009-212604).png and image(20261009-212630).png: existing ALFA ΤΔΑΜ-110M8827, two-page PDF,21 proposed rows/quantity158/net141.08/VAT18.36/gross159.44/difference0.00; AI page evidence reports0/[] and blocks the action despite prose saying ready. USER FAIL for unavailable transfer; row accuracy and persistence NOT TESTED by this page. Main c0f1ce16 and intervening15 commits reviewed; PR1992 lifecycle and PR1998 unrelated operator changes preserved. No takeover of myDATA receiving or assistant lifecycle owners.

Acceptance: actual assistant DOM fixture with incomplete page evidence, visible button, cancelled confirmation=zero writes, explicit confirmation saves selected valid rows to same editable draft; rereview retains action, complete-page path unchanged, totals/invalid fields/concurrency rejection and duplicate-click safety protected. Full CI/merge/exact deploy precede LAB acceptance on existing8827; no reupload/payment/finalization. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-invoice-manual-draft-transfer.md. Implementation NOT TESTED; no new PASS.

09/10/2026 — INVOICE-ASSISTANT-MINIMIZE-01 / MERGED / CI PASS / AWAITING LAB

PR #1992 initial full CI #4974 / run37986354711 PASS on 842a5825. Final auxiliary-row dock build/local suite PASS; rebased onto main b37cb72 to preserve independent operator-checkbox audit claim. Full CI #4978 / run37987048413 PASS on final auxiliary-row implementation 81ffd136. Latest rebase onto independent AI-credit implementation main 42bee63; minimization source unchanged. Latest main c6e9ff5 preserves AI-credit release evidence. Final combined source head 721d5347 full CI #4985 / run37987844938 PASS. PR #1992 merged at 9d8517b2c8a78685c4b4ad5c266c60dd3001d7f4; main full CI #4986 / run37988208362 PASS. Central PDF regenerated with the combined shared records in this release-evidence PR. Guarded Render deploy #2250 / run37988478746 PASS; Work browser independently observed /api/health with ok:true and exact revision 9d8517b2c8a78685c4b4ad5c266c60dd3001d7f4 on 09/10/2026 Europe/Athens. Authenticated physical LAB still NOT TESTED (no authenticated operator session in this Work browser).

Owner feat/invoice-assistant-minimize; independent claim PR #1991 merged at bb61041. Added 48px «Ελαχιστοποίηση» and retained «Επαναφορά βοηθού» status dock. In POS, the dock is hosted in the auxiliary header row, preserving access to checkout controls. Hides the same assistant DOM without reopening or issuing another source/preview; photos/PDF, typed instruction, conversation, corrections and selections remain. Background source/preview finishes while minimized and updates dock status. Existing automatic first review remains; default instruction is initialized before loading so a typed instruction is retained.

POS-origin minimize temporarily hides invoice workspace and owned editor modals without unmounting/aborting them, exposing the original mounted POS/cart. Restore via dock or existing «Τιμολόγια / Παραλαβές» returns to same workspace/window. Same-order entry restores existing assistant rather than restarting reading. Explicit close, outer workspace teardown and permission revocation remove dock/listeners/PDF resources; delayed results cannot rebuild a removed assistant. Existing server authorization, orders permission, OCR/review/apply/finalization guards unchanged. No payment, new invoice, approval, stock or provider call performed on production.

Node20 local: actual assistant delayed-source/preview DOM regression PASS; actual StorePosPanel/editor integration PASS including background result, same cart, restore from POS entry and revoked permission cleanup. Fixture test confirms exactly1 source and1 preview, retained command/history/edited value/checked row and no apply mutation. Full server suite1979 PASS/0fail/4isolated-DBskips (1983tests). Frontend build PASS. These are isolated tests, not physical LAB PASS. Full GitHub CI/invariants/isolated HTTP E2E and merge PASS. Exact healthy release PASS. Remaining: authenticated physical minimize/restore during reading on LAB POS2; confirm same invoice/photo/results, unchanged draft/cart and no extra reading/application on restore. Other owners/Gate3/myDATA and AI-credit scopes retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-invoice-assistant-minimize.md.

Initial claim (historical; PR #1991)

Owner feat/invoice-assistant-minimize. Explicit owner screenshot/request: minimize the running invoice assistant without losing reading/results. Independent assistant window lifecycle scope, not OCR/provider/myDATA/AI-credit algorithm ownership. Add minimize/restore dock; retain same DOM, photos/PDF, command, history, edited values, selection, proposals and in-flight preview. POS-origin minimization returns to mounted POS while keeping authorized invoice workspace/request alive; restore same workspace. Actual close, permission revocation/store change/logout retain cancellation/cleanup and remove dock. No extra preview, payment, draft, stock, approval or finalization on minimize/restore.

Preserve #1986 exact healthy release 9f68e7f, orders checkbox/company/store/resource authorization, existing assistant printed-line/rounding/quantity/apply guards and all previously accepted Gate3/myDATA PDF behaviors. Screenshots show LAB POS2 and assistant13241 running; this is owner-observed UI, not independent LAB PASS. Read main 041cf97, current tracker/manual/checkpoints. Other owners retained. Claim must merge before source. Acceptance: minimize during delayed source/preview, continue POS/cart, complete while hidden, restore same DOM/input/selected rows/history/result with exactly one preview; explicit close/revocation cleanup. Isolated tests/CI not physical LAB PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-invoice-assistant-minimize.md.

09/10/2026 — POS-INVOICE-ORDERS-01 / MERGED / CI PASS / AWAITING LAB

PR #1986 full CI #4957 / run 37982996072 PASS on 13648a66, including PostgreSQL tests, invariants and HTTP E2E. Rebased on newer main 4a69eb4 to preserve the independent AI-credit docs claim; source implementation unchanged. Final head 3af1dbaa full CI #4962 / run 37983639449 PASS. PR #1986 merged at 9f68e7f6ac4295ebac24c0134dfa1386fd069ad4; main full CI #4963 / run 37983977945 PASS. Guarded Render deploy #2242 / run 37984319060 PASS. Browser observed /api/health with ok:true and exact revision 9f68e7f6ac4295ebac24c0134dfa1386fd069ad4 on 09/10/2026 UTC. Physical LAB remains NOT TESTED.

Owner feat/pos-invoice-orders-permission. Claim merged in PR #1985 (4cd333b). Added POS «Τιμολόγια / Παραλαβές» using the existing backofficeMenu.orders checkbox for employee/manager operators. Server rechecks persisted profile on every invoice request, restricts company/store/order/line and keeps INVENTORY entitlement. Existing invoice settlement/duplicate/OCR totals/unresolved/stock posting guards remain. Email, whole-order deletion and global product-card tools are unavailable in this entry. No new checkbox.

Existing editor uses operator request/session, isolated modal selectors and own-store filters; closing/revoking aborts pending requests and retains mounted cart. Runtime access failure denies entry. Operator identities remain in posting/audit records; User foreign keys use null for operator credentials. Shared assistant uses scoped request; global packaging rule editing stays outside this entry.

Validation: Node 20 frontend/server builds PASS; full local server suite 1978 PASS / 0 fail / 4 isolated-DB skips (1982 tests); 61 invoice/permission regressions PASS; actual POS+editor isolated DOM test PASS including new invoice creation, hidden/granted/revoked permission, fresh-access denial, edit save, product search/new line, return with cart unchanged and no checkout/email/fast-recovery. These fixture results are not LAB PASS. Full CI/invariants/isolated PostgreSQL E2E PASS on PR and merged main. Exact deployed release health PASS; authenticated physical LAB acceptance NOT TESTED (no authenticated operator LAB session available in this Work browser). No production financial/stock transaction performed. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-invoice-orders-permission.md.

09/10/2026 22:25 Europe/Athens — POS-INVOICE-ORDERS-01 / ASSIGNED / NOT TESTED

Owner feat/pos-invoice-orders-permission. Explicit owner request: POS button «Τιμολόγια / Παραλαβές» opens the existing orders/invoice editor for the operator's own store. Enable solely through existing Operator → Access → backofficeMenu.orders («Παραγγελίες»); no second checkbox or broad Backoffice access. Preserve mounted POS/cart/shift and existing invoice settlement, duplicate, unresolved-line, total reconciliation and stock-posting guards. No OCR algorithm, automatic payment, fiscal, existing supplier/payment or other assigned scope takeover.

New bounded entry + authorization scope: fresh server profile check, employee and manager StoreOperator sessions, store/company/resource isolation and module/license gates; existing editor reused with operator token (never admin localStorage token); revoked access hides/closes workspace and denies APIs. Preserve separate barcode/retail/product permissions and email/central features. Required acceptance: granted/denied/revoked access, cross-store/company/order/line negative checks, open/edit/save/return with unsent cart retained, original admin paths preserved. Isolated fixtures/CI are not LAB PASS; physical authenticated LAB and exact release remain NOT TESTED. No production writes or old invoice resubmission for evidence.

Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-invoice-orders-permission.md. Publish this independent claim to main before source changes. Other owners, Gate3 assistant PASS and POS auxiliary/header USER PASS remain protected. Next: implement bounded bridge and guarded reuse, test, full CI, exact healthy release then acceptance.

09/10/2026 21:45 Europe/Athens - OWNER-SUPPLIER-SCROLL-01 / CLOSED / USER maximized-scroll PASS

Χρήστος Μάνης confirmed «Είναι οκ» at21:45:15 Europe/Athens directly after the requested refresh → Suppliers → maximize → bottom-scroll retest. Bounded USER PASS for supplier catalogue vertical reachability in maximized window. Previous selected-store screenshot context Περίπτερο Διαδόχου Παύλου; no new screenshot, physical terminal/operator/browser revision supplied. Do not infer every tab, viewport/touch, role or business outcome from confirmation.

Verified sourcePR1980/head9545445b8f0c624d27c1eebbc37ff4089b147689/fullCI37972567872 SUCCESS (1981/1981tests,0fail/0skip)/mergeb40a09dff6f0aaac585c1b71f2e36e51181e01e2, mainCI37972913043/guard37973251408 SUCCESS; Renderdep-db4j3mvavr4c73fei170 LIVE18:29:32Z and fresh exact healthy health after LIVE. Actual public entry-DXh0uJaL.css contains scoped rule; SHA25600143d4d647de0b92744eb9270e6df42f35eb9949e9a10aa5c7c5dc65cad9bf4. Prior local DOM contract/build evidence remains separate from user acceptance; no local browser wheel/geometry claimed.

Only maximized desktop supplier suite natural-height/zero-shrink rule changed runtime. No supplier/payment/stock/fiscal/API/role/module mutation or transaction replay. Existing No19 financial/PDF, normal window, bulk/Excel/Inventory/Analytics/navigation/POS and all other owners preserved. Supplier manual updated with tested flow; only own pending entry removed; common tracker/PDF synchronized. Owner codex/owner-supplier-scroll-20261009 completes bounded assignment. No next scope claimed; next user-selected correction one at a time. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-owner-supplier-scroll.md.

09/10/2026 21:31 Europe/Athens - OWNER-SUPPLIER-SCROLL-01 / LIVE / AWAITING USER visual scroll retest

Owner codex/owner-supplier-scroll-20261009. ClaimPR1979/head5e28e16347498d798fd2d5b337f42a719962adf1/docsCI37972239696 SUCCESS/merge4e8bf7b1f85096a82a7c238455d612eaa78bd136 before source; navigation USER PASS/manual closure published in same docsPR. SourcePR1980/head9545445b8f0c624d27c1eebbc37ff4089b147689/fullCI37972567872 SUCCESS (1981tests/1981pass/0fail/0skip, isolated HTTP/archive/provider invariants, frontend build, Windows checks)/mergeb40a09dff6f0aaac585c1b71f2e36e51181e01e2. MainCI37972913043 and guardeddeploy37973251408 SUCCESS. Renderdep-db4j3mvavr4c73fei170 LIVE2026-10-09T18:29:32.299447Z/exactb40a09df; fresh independent public health after LIVE HTTP200/ok=true/version0.22.0+kat-test-pos/exactb40a09df. Old aa9717 served during rollout was not called new release. No manual restart/deploy/config change.

Only appended maximized desktop supplier suite zero-shrink/natural-height CSS rule; existing vertical hub and horizontal table scrolling preserved. Local Node20 targeted28/28, production frontend build and scopeddiffcheck PASS. Actual installer/JSDOM60synthetic suppliers verifies actual direct-child rule matches and six tabs/totals/normal/minimized/hidden-state/GET-only preserved. Browser pixel/wheel geometry NOT TESTED (Chromium download unavailable); real physical scroll acceptance still AWAITING USER. Supplier financial/PDF No19 PASS and existing bulk/Excel/Inventory/Analytics/navigation/POS/other owners protected. No live supplier/payment/stock/fiscal/form submission or replay.

Single next action: user Ctrl+Shift+R, reopen selected-store Suppliers, maximize and scroll to last supplier row/totals; normal window remains usable. Read-only navigation only. Manual supplier scroll unchanged until real PASS; owner retains assignment. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-owner-supplier-scroll.md.

09/10/2026 21:21 Europe/Athens - OWNER-SUPPLIER-SCROLL-01 / IMPLEMENTED / AWAITING CI + healthy release + USER

Owner codex/owner-supplier-scroll-20261009. Claim/navigation closurePR1979 finalhead5e28e16347498d798fd2d5b337f42a719962adf1/docsCI37972239696 SUCCESS/merge4e8bf7b1f85096a82a7c238455d612eaa78bd136 before source; concurrent Hikvision release and customer-demo preserved. New runtime source only appended desktop(min1201) maximized direct supplier-suite flex:0 0 auto rule in supplier-control-suite.css. Existing shell/hub bounded vertical scrollbar retains full supplier child height instead of default flex shrink with hidden overflow. Normal/minimized and hidden-state CSS, horizontal table scrolling, all six supplier tabs, APIs/auth/roles/modules/data untouched.

Paired USER screenshots show normal rows/scroll versus maximized clipping. Existing inspected Analytics zero-shrink fix and all accepted bulk/Excel/Inventory scrolling retained. Node20 local targeted28/28 PASS/0fail/0skip; frontend build2255modules/TABLE_SERVICE verifier PASS; scoped diff-check PASS. Isolated actual supplier installer/JSDOM60synthetic rows and totals/six tabs verifies rule matches actual direct child, zero shrink, only maximized desktop scope, switching away hidden behavior, horizontal overflow and GET-only transport. This checks DOM/CSS contract, NOT browser pixel/wheel reachability: Chromium unavailable, attempted standard Playwright download returned truncated/non-ZIP and failed. No falsely claimed geometry or physical USER PASS. No production state changes or replay. Existing supplier No19 financial/PDF/manual PASS preserved; supplier scrolling manual unchanged until bounded USER retest.

Next: green exact-head fullCI, merge and exact healthy guarded release then user refreshes selected-store Suppliers, maximizes and scrolls to final row/totals; normal mode still works. Read-only navigation only. Owner retained until PASS/handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-owner-supplier-scroll.md.

09/10/2026 21:16 Europe/Athens - OWNER-SUPPLIER-SCROLL-01 / ASSIGNED / USER maximized-scroll FAIL

Owner codex/owner-supplier-scroll-20261009. User21:11 screenshots image(20261009-181102).png1902x998 and1811541398x921 show selected Περίπτερο Διαδόχου Παύλου, Suppliers catalogue. Maximized list ends at header/no rows with no useful downward scroll; normal window shows rows and scroll. Image IDs file_0000000064088210abd854f42a3ea61c / file_00000000214481f4a0c84a9e0714d2a4, scratch attachments inspected, physical revision/terminal unexposed. New USER layout FAIL supersedes any general maximized-scroll claim only for this supplier child.

Independent layout-only scope: actual CommerceLauncher/CommerceHub/supplier-control-suite chain, preserve natural content height of supplier suite in maximized flex parent and allow existing hub scroll to reach final rows, maintaining horizontal table scroll and normal/minimized modes. Reproduce causal sizing and verify before/after with isolated actual markup/full CSS, no live APIs/data. Supplier ledger/payment/export/report logic, selected-store/auth/roles/modules/POS/fiscal/stock unchanged. Existing bulk/Excel/Inventory/Analytics USER PASS, supplier No19 financial/PDF PASS and all assigned TODAY-04/08/09, video/demo/capacity/Workforce owners preserved; no broad takeover. Claim published main before source. CI/local fixtures are not USER PASS; manual supplier PASS remains unchanged until visual retest. Next: bounded CSS correction, meaningful bottom reachability checks, fullCI/exact healthy guarded release then user readonly maximise/scroll retest. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-owner-supplier-scroll.md.

09/10/2026 21:10 Europe/Athens - BACKOFFICE-COMMERCE-LABEL-01 / CLOSED / USER direct-navigation PASS

Χρήστος Μάνης confirmed «ΕΙΝΑΙ ΟΚ» at21:10:30 directly after requested selected-store lower-tile test. Bounded USER PASS: Λοιπές εμπορικές λειτουργίες opens existing operations for selected store. Subsequent user screenshots image(20261009-181102).png and181154 show that workspace active, existing module strip and selected Περίπτερο Διαδόχου Παύλου; these additionally show a NEW independent supplier maximized-scroll FAIL, not navigation failure. Physical terminal/operator/revision unknown; no business action or all-role/module/touch acceptance inferred.

Verified sourcePR1973/head309f866cbfe4bc96927e6dede55e0875b23c0115/fullCI37966717076/merge07383a0ec3f82f0534b9795be096dd665458373d, main37967122253/guard37967492185 SUCCESS; Renderdep-db4icfgm7kps73buhc90 exact healthy LIVE17:40Z, release docsPR1974 merged4e39e02c. Existing selected-store authorization, module gates, ordinary duplicate workspace and upper products entry protected. No transaction or stock/fiscal/module/role mutation, no replay. Owner codex/backoffice-commerce-label-20261009 completes bounded assignment; manual updated and only own pending entry removed. Other owners preserved.

2026-10-09T18:13:04.524989+00:00 — VIDEO-HIKVISION-01 / in-app download released / AWAITING USER + DEVICE

Source PR #1976 head 3138a3f5739219fcd50551f3d77ef549d12a9009 passed full CI 37969815758 and merged at 17b8e74bfaa6385e66c0ce7df123985ed068795b. Concurrent customer-demo source aa971721b277591c5b73afc283277edb46c98e42 preserves our download changes; its full main CI 37970329259 attempt2 PASS (1981/1981 server tests, build/invariants/isolated HTTP E2E, Windows fixtures). Earlier main runs were cancelled by newer commits, not test failures. Deploy workflow 37971222414 success; observed GET /api/health ok:true with exact healthy revision aa971721b277591c5b73afc283277edb46c98e42. Latestmain d3d23279 differs only in documentation/PDF. Five download tests also pass locally on combined source.

Available in existing Platform recorder modal and Backoffice Κάμερες / Video Audit: Λήψη ελέγχου Hikvision, Windows v1.0.0, extraction/start/report instructions. Common ZIP size5681

SHA256a4355d9e0a9b4589083183225383dfc5cf13fb4e386461790ad252ff6055e931; fixed package verified before protected attachment response. Download never submits settings or requires connector ONLINE. Store change/unmount cancels requests and stale completions. Existing Dahua LAB PASS, saved settings, credentials/camera mappings and other owners preserved. No hardware/data mutations.

Retained owner codex/hikvision-video-20261009. Application browser shows Platform sign-in; authenticated real browser download remains NOT TESTED. Hardware preflight/search/historical clip remain NOT TESTED; release/CI is not LAB PASS. Next: user opens selected store video screen, downloads ZIP, extracts/runs Start-Hikvision-Precheck.cmd on onsite Windows PC; sanitized desktop report is reviewed before implementing a Hikvision connector. No manual PASS closure and no claimed installer.

2026-10-09T18:02:07.132Z — CUSTOMER-DEMO-01 / closed runtime fence published / full customer demo OPEN

Retained owner ASSIGNED codex/customer-demo-windows-20261009; source codex/customer-demo-runtime-20261009. ClaimPR1965/head7c151ed096cc473dcf3198c6b50d4e8d2ef18a69/docsCI37963756700 SUCCESS/main40c2bba6d8725f01423a9ce54b8384d6679e23be preceded source. SourcePR1971 finalhead8d15239017e5fb02360cfd38a5b6944abf84f80a / fullCI37969766117 SUCCESS / build-and-test113953161987 /1976tests,1976pass,0fail,0skip. Actual CI checkout05fa86d450af03bc1487d8a1513d9cf1aab3b9f3; source merged mainaa971721b277591c5b73afc283277edb46c98e42. Final rebases preserve subsequent Backoffice selected-store operations release, menu USER PASS, Hikvision diagnostics/download claim, all other owner records and source. No owner transfer/release.

Published bounded closed fence: reserved demo company/store namespace is rejected before route dispatch and in verified JWT/current-user/operator/internal job contexts and login/session issuance. Opaque persisted device/pair/online slug/inventory grant/efood/upload contexts cannot evade it; remote pairing excludes reserved tenants atomically. SMTP/Push/Netlink/AI/myDATA-original/video commands and RBS cash/card finalizers reject before dispatch/transport/financial writes. Business email calls retain resolved tenant identity. Scheduled myDATA targets and POS invoice repair/claim/dispatch exclude demos; ordinary attendance auto-out remains while demo candidate/locked session is skipped. All lifecycle states, missing/default-off flags and injected active/license/module/provider settings keep runtime closed. Original Platform auth/audit mount, ordinary auth/license/permission/fiscal/stock/idempotency and already accepted Gate3/POS/physical KAT/RBS/remote/capacity/Diadoxou scopes are protected.

Actual isolated loopback PostgreSQL/HTTP observation2026-10-09T17:59:19.080Z: two independent fresh synthetic demos;0outbound worker calls. Correct demo password and tenant-forged backing user session rejected; no login session added. Persisted opaque device tenant controls access; CASH/CARD/IRIS/MIXED/CREDIT denied. Revoked/expired pending jobs stay QUEUED/attemptCount0/leaseTokennull; RBS requests remain untouched. Demo sales/payments/movements/transactions/shifts remain0, opening stock remains1600 each, device status/lastSeen/tokenVersion and attendance rows unchanged. Ordinary control password login/token/license work; product price3.25/currentStock123/updatedAt unchanged; ordinary13h attendance closes to NEEDS_APPROVAL/720minutes/clockOut entry/oneWORKFORCE_AUTO_OUT_12H Audit. Preparation list reports non-installable with A REVOKED and B EXPIRED. All existing HTTP E2E, production build/invariants, RBS and Hikvision Windows scripts passed. Earlier equivalent source fullCI37968200667 and37969168997 also passed1976/1976 with repeated scoped observations. Local Node20 targeted47/47; full local1962total/1958pass/0fail/4environment-dependent skips; production build/syntax PASS.

Earlier failures were isolated fixture initialization (37966738771 lazy CloudDevice schema) and fixture uppercase email versus existing lowercase login (37967527527); fixed through actual service bootstrap/loopback health and normalized synthetic identities plus positive ordinary-login and unchanged demo-session checks. Rebase37968821340 failed mandatory checkpoint policy before tests; synchronized records restored, with owner-scoped insertion to preserve concurrent entries. Assertions and checkpoint policy remain enforced; no failing source head merged. PDF regenerated from the newest canonical tracker in this final handoff. No production migration/seed/schema/flag/customer credentials/provider/transactions or old LAB replay.

Final handoff: bounded runtime fence has qualified CI evidence only. Full CUSTOMER-DEMO-01 remains OPEN/NOT TESTED and every live preparation remains inactive/non-installable. Personal shared existing-app POS/Backoffice login, explicit safe operation allowlist/visible DEMO store context, measured cash sale/replay/report/Audit, actual50x40mm label settings and physical print, authenticated readiness and Windows download/package/install/reopen/uninstall remain OPEN. Actual demo Windows/customer/LAB/USER acceptance and exact production deployment are NOT VERIFIED; no manual PASS or customer installer is published. Future access must use actual EMPLOYEE role/STORE_OPERATOR tokenType and verified persisted personal sessions, adapting the unwired foundation predicate. Single next action: claim and implement personalized common POS/Backoffice safe runtime and lifecycle/action authorization before any demo activation. Same owner retained until a named receiving page and merged transfer exist. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md; protocol docs/ops/customer-demo-windows-20261009.md.

2026-10-09T17:55:37.914067+00:00 — VIDEO-HIKVISION-01 / protected download implemented / AWAITING CI + USER

Claim PR #1975 merged at 7d4e2398 after CI 37969078458 success. Retained owner codex/hikvision-video-20261009; source branch codex/hikvision-download-ui-20261009. Existing Platform VideoConnectionManager and Backoffice Video Audit now offer the common Windows precheck v1.0.0 with extraction/start/report instructions. Selected-store authenticated GET endpoints preserve existing SuperAdmin or owner/admin/license/module/company/store context. ZIP is fixed, size/hash verified at response time, private no-store attachment; missing/tampered files fail closed. Download does not submit recorder settings or require an online connector. Component aborts on URL/store change/unmount and discards delayed responses. Local Node24 fixture tests 5/5 PASS (actual registered authorization handlers + rendered UI), prior Dahua/video behaviors preserved; Node20/full CI pending. Real browser download and physical Hikvision historical video remain NOT TESTED. No production data, pairing, credentials, camera mappings or saved Dahua settings changed. Next: full CI, merge, exact healthy deployed revision; then read-only browser download acceptance and onsite preflight separately. No manual PASS claim.

2026-10-09T17:49:58.681266+00:00 — VIDEO-HIKVISION-01 / in-app package download ASSIGNED

Retained owner codex/hikvision-video-20261009; bounded branch codex/hikvision-download-20261009. User explicitly requests in-app ZIP download and says start; screenshots174805/174825 show existing Platform VideoConnectionManager for LAB, saved Dahua/ONVIF connector OFFLINE with stale September time check. No change of those settings or re-test of Dahua PASS. Currentmain4e39e02c and commits since package6106e35e reviewed; other commerce/demo/capacity owners preserved. Scope: add Hikvision precheck download/instructions/version to existing Platform and Backoffice video screens; protected selected-store endpoints return fixed verified common ZIP. No placeholder installer or claimed working Hikvision connector. Existing video roles/license/company/store checks remain; download must work while connector offline and without saving credentials/form. Test exact ZIP/hash/content disposition plus request scoping/role/module denial, component no-form-submit, errors and late-download cancellation. CI then exact healthy release required; physical Hikvision/device and real user download remain NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-hikvision-download.md. Publish this claim before source.

09/10/2026 20:43 Europe/Athens - BACKOFFICE-COMMERCE-LABEL-01 / LIVE / AWAITING USER direct-entry inspection

Owner codex/backoffice-commerce-label-20261009. SourcePR1973/head309f866cbfe4bc96927e6dede55e0875b23c0115/fullCI37966717076 SUCCESS/merge07383a0ec3f82f0534b9795be096dd665458373d; mainCI37967122253 and guardeddeploy37967492185 SUCCESS. Renderdep-db4icfgm7kps73buhc90 LIVE2026-10-09T17:40:07.408839Z; fresh independent public health after LIVE returned HTTP200/ok=true/exact07383a0ec3f82f0534b9795be096dd665458373d/version0.22.0+kat-test-pos. Earlier rollout checks still served083d1bc15 and were not called live new release. Public HTML index-CL33dyXw.js imports entry-BdmLVZGo.js (SHA25613b3666c22df001c1f2e4f4cfe869a5b2b2db5321cea4161368ccbfab841fb18) and its actual lazy main-Dov5NuM0.js (SHA2563346fb6120ab8bf27b17d45731a50294cbaebbe4dba762d35fe4a0ed7fc74003); entry validates operations target/store, main contains lower renamed tile/event detail and unchanged upper entry. Initial bundle-only search expected the tile in entry and failed because it lives in the separate main chunk; inspected actual import and verified both, no runtime failure inferred. Deployed-code evidence, not physical USER navigation PASS.

Lower Πρόσθετες λειτουργίες tile Λοιπές εμπορικές λειτουργίες directly opens the existing operations/modules workspace for its validated selected store. Upper Εμπορική λειτουργία keeps ordinary products entry. Existing functions/module/server gates remain shared; missing/foreign selection has no other-store fallback, stale opens ignored, ordinary duplicate event preserves active tab. Node20 targeted36/36 and frontend build PASS; fullCI includes server tests, production invariants, isolated HTTP/archive and Windows checks. Fixture child business panels simulated; no physical outcomes or touch/geometry acceptance inferred. No live financial/stock/fiscal/pairing/role/module mutation, no new transaction or replay.

User correction20:23 supersedes initial label-only plan;20:25 conditional removal alternative is unnecessary because existing operations reuse implemented. Single next acceptance: user refreshes selected-store BackOffice, opens lower tile once, sees Λοιπές εμπορικές λειτουργίες active and correct store/functions; upper product entry remains distinct when reopened. Read-only navigation only. Manual unchanged until real USER PASS. Owner retains bounded assignment; TODAY-09, Workforce, RBS, POS/TABLE_SERVICE/capacity/video/demo owners and prior PASS protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-backoffice-commerce-tile-label.md.

09/10/2026 20:30 Europe/Athens - BACKOFFICE-COMMERCE-LABEL-01 / IMPLEMENTED / AWAITING CI + healthy release + USER

Owner codex/backoffice-commerce-label-20261009. Expanded direct-entry claimPR1972/head8018ca2786544995d7d3bdf549f8cbb117bea4cc/docsCI37966176005 SUCCESS/mergeb25bab6cecacf1a7647e2eddb377905416bd5217 published before source. Lower StoreCloudPage tile now Λοιπές εμπορικές λειτουργίες, subtitle Λειτουργίες και modules καταστήματος, sends existing commerce-open event with explicit operations view and selected store. CommerceLauncher selects existing legacy operations/CommerceHub, validates selected store against authorized fetched list and supplies only that store; no fallback for missing/foreign target. Clears previous targeted workspace during load, ignores stale responses and remounts existing hub on store change. Upper ordinary entry still products; plain duplicate events preserve active tab without new fetch. Existing server/module/auth/business gates unchanged.

Node20 targeted36/36 PASS/0fail/0skip including actual React StoreCloudPage+Launcher+CommerceHub fixture with isolated child business panels: upper product entry, lower real module strip and selected B only, inactive analytics locked, ordinary duplicate preserves Online panel, explicit switch A clears B, foreign/empty target shows denial without workspace, late A response cannot replace B, all transport GET only. First fixture run failed because lower button locator compared whole text including subtitle; corrected fixture selector, no production/source defect inferred. Scoped source diff-check PASS; Node20 frontend production build PASS (Vite2255modules, TABLE_SERVICE bundle verifier PASS); usual chunk-size warning only. No live data/API mutation, no user/physical functions PASS. Existing prior PASS and other owners preserved; accepted business flows not replayed. Next green fullCI/exact healthy guarded revision then user opens lower tile once read-only. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-backoffice-commerce-tile-label.md.

09/10/2026 20:24 Europe/Athens - BACKOFFICE-COMMERCE-LABEL-01 / expanded direct-function scope ASSIGNED

Owner codex/backoffice-commerce-label-20261009. User correction20:23:52: not only a label; the lower tile must bring the functions. Supersedes text-only plan before any source was edited. Lower Πρόσθετες λειτουργίες tile opens the existing Λοιπές εμπορικές λειτουργίες workspace directly, with the selected store and existing modules/actions. Upper Εμπορική λειτουργία retains ordinary product entry. Reuse CommerceLauncher/CommerceHub, no copied functions or new business API. Explicit targeted entry may select operations; ordinary duplicate open events must continue preserving an already-open workspace. Validate requested store against authorized list, prevent fallback to another store or stale open responses. Existing authentication/module/server gates remain; no transaction, activation, stock/fiscal write or takeover of other owners.

Prior claimPR1969 finalhead79be2f4f63f2300a2c304b154341d42d32dab1ba / docsCI37965884915 SUCCESS / merge195e7ead173017ca01d6be56d7248043056a9d9e before source. Latest screenshot duplicate-label USER FAIL; direct targeted navigation NOT TESTED. Next: publish expanded claim, implement bounded event target/reuse existing workspace, actual React fixture direct entry/ordinary entry/duplicate/selected-store/negative/stale checks, fullCI/exact healthy release then user readonly opening of lower tile. No state-changing acceptance required. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-backoffice-commerce-tile-label.md.

09/10/2026 20:20 Europe/Athens - BACKOFFICE-COMMERCE-LABEL-01 / ASSIGNED / duplicate label USER FAIL

Owner codex/backoffice-commerce-label-20261009. User image(20261009-170933).png shows selected MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΑΠΟΜΟΝΩΣΗΣ ΕΤΙΚΕΤΑΣ, Super Admin support BackOffice, two entries labelled Εμπορική λειτουργία. Explicit request: rename one to Λοιπές εμπορικές λειτουργίες. Independent text-only scope: lower commercial tile inside Πρόσθετες λειτουργίες in StoreCloudPage; retain upper toolbar label, existing mws:commerce-open handler, tile subtitle, selected-store/role/module gates and all layout/business behavior. No new route, server/data write, transaction or takeover of TODAY-09, Workforce, RBS, other pending owners.

Read currentmain4e46dcf714e44a7d5d1fd72d831ee54df01060b3, AGENTS, numbered checklist, current registers, owner-store-page/owner-workforce/pairing checkpoints and relevant manuals. Prior Workforce visual PASS, menu empty-slot PASS and no-print title PASS remain protected. New label/physical rendering AWAITING USER; no fresh role/business/financial PASS. Publish claim before source. Next: replace one literal, run existing navigation/selected-store/RBS regressions and frontend build, green fullCI/exact healthy guarded release, then readonly user visual confirmation. Manual unchanged until USER PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-backoffice-commerce-tile-label.md.

2026-10-09T17:20:15.306812+00:00 — VIDEO-HIKVISION-01 / preflight CI verified + package / AWAITING DEVICE

Retained owner codex/hikvision-video-20261009; source codex/hikvision-preflight-20261009. Claim PR1966/CI37964335597/main5b32c013 preceded source. Source PR1968 finalhead ef4660834045c96f0fc02772b36ff4a94fd6709d / fullCI37965084734 SUCCESS / CI checkout bc385dc640dcf0a1683ef1577f01c9c0a3daaac2 / mergedmain2991cb7980ec877ff557e737dd29a6cdc84effa1. Windows5.1 job113937301451 confirms parser and actual offline fixture execution: private endpoint allow/reject, explicit UTC summer/winter offset, DTD rejection, bounded explicit-track search, simulated GET/search POST/401/redirect and sanitized error. Full server1961/1961,0fail/build/invariants/isolatedHTTP CI green; local existing video regression56/56 PASS under Node24, not a hardware result. No production/store/LAB device call, pairing or financial/stock/fiscal change.

Reproducible package output/hikvision/MyWorkStation_Hikvision_Precheck.zip, 5681bytes, sha256 a4355d9e0a9b4589083183225383dfc5cf13fb4e386461790ad252ff6055e931; ZIP members byte-match the merged tested module/probe/launcher/README, no test fixture or credentials packaged. Preparation scope complete; full integration OPEN. Official exact-model datasheet confirms Ethernet/ONVIF/HTTPS/NTP; no inferred ISAPI historical-download or hardware PASS. Main/Dahua runtime unchanged by package. No manual PASS update because real device is NOT TESTED.

Next single action on10/10/2026: owner onsite Diadochou reads LAN IP/firmware and visual POS camera identity, extracts package on store PC and runs local preflight with DVR read-only/playback credentials. Share sanitized report, confirm clock offset/recording track and supported endpoints, then implement bounded historical clip adapter. Source availability is verified in main; no production API deployment/physical installation is claimed. Future snapshot/download/authenticated30s-before60s-after playback and store tenant isolation acceptance remain NOT TESTED; other owners/priorPASS protected.

09/10/2026 — VIDEO-HIKVISION-01 / preflight implemented / AWAITING CI + DEVICE

Owner codex/hikvision-video-20261009; bounded source codex/hikvision-preflight-20261009. Claim PR1966 / docs CI37964335597 SUCCESS / main5b32c013 before source. Add standalone Windows PowerShell5.1 read-only preflight: private LAN URL, local credential dialog, Digest-capable HttpClient, model/time/channels/tracks/profile, optional explicitly selected recording search. No default track/address, raw XML/credentials/playback URI saved; capped query paths/XML/time; redirects and DTD rejected. Sanitized report distinguishes search success/no-match from untested historical download/playback. Separate Windows5.1 CI parser and offline HTTP/XML/UTC/security fixtures; physical unit NOT TESTED. Existing Dahua runtime and all business behavior unchanged. Source validation/CI pending; no actual store request made. Next: green source CI/merge, then tomorrow actual local endpoint/firmware/camera evidence. Full Hikvision clip adapter remains OPEN; diagnostic package is not installation completion. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-hikvision-preparation.md.

Hikvision preparation — VIDEO-HIKVISION-01

09/10/2026 20:08 Europe/Athens - POS-STORE-MENU-WASTE-01 / USER VISUAL PASS / CLOSED menu scope

Owner codex/pos-store-menu-remove-waste-20261009. Latest user image170522 shows Κατάστημα / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / LAB POS2, empty cart/value0.00EUR. ΦΥΡΑ entry is absent, its left desktop position is empty, and ΙΔΙΑ ΚΑΤΑΝΑΛΩΣΗ plus ΚΑΤΑΣΤΡΟΦΗ ΠΡΟΪΟΝΤΩΝ remain visible/disabled. This meets the explicit removal and reserved-position request, superseding prior old-menu screenshots for this display only. Client SHA, physical terminal/store ID, shift, exact refresh gesture and capture time not independently supplied. No action submission or cash/stock/fiscal outcome inferred; no repeat transaction needed.

SourcePR1963/heade4c7692ad68ed6e50d0d8952b1952048fb700b97/fullCI37961294021 SUCCESS/merge083d1bc15e26bf8da31764363962d5916bcda8c2; mainCI37961748140 and guardeddeploy37962053439 SUCCESS; Renderdep-db4hn2c9v7es73am1880 LIVE09Oct16:54:25.539502Z / independent exact healthy public revision verified. Public actual app entry-DdQGRgaF.js SHA256da0332aac30bab0ba26b815d483ccc8d5e95b178aa24b48953eb4196c38b4ae0 confirmed reserved empty slot and two remaining actions; accepted movement title retained.

Close only this menu display assignment. Original POS-NO-PRINT-01 and other business/financial/stock/TABLE_SERVICE/capacity/demo owners remain unchanged. Narrow screens, touch interaction, remaining action outcomes and all geometry are not certified by this screenshot. Own completed pending block removed; POS manual/tracker/PDF synchronized. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-store-menu-remove-waste.md.

09/10/2026 20:12 Europe/Athens — VIDEO-HIKVISION-01 / ASSIGNED / preparation NOT TESTED

Owner/branch codex/hikvision-video-20261009. User requests preparation now for Hikvision iDS-7116HQHI-M1/S at Diadochou; physical visit planned 10/10. Independent scope: read-only Windows ISAPI preflight for model/time/channel/record-search capability, then vendor adapter after observed hardware evidence. Existing Dahua LAB PASS 20/09 and 30s-before/60s-after playback protected; no replay of accepted LAB, no POS/financial/stock/fiscal/store configuration changes. Hikvision connection/snapshot/recording/download/playback NOT TESTED. No credentials/IP from LAB reused; no pairing, scheduled task, firewall or NVR configuration writes. Claim publication before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-hikvision-preparation.md. Next: offline fixture validation of diagnostic script; physical read-only probe on store PC tomorrow; full integration remains OPEN.

2026-10-09T17:55:51.220Z — CUSTOMER-DEMO-01 / closed runtime fence verified twice / final source rebase pending

Retained owner codex/customer-demo-windows-20261009; source codex/customer-demo-runtime-20261009/PR1971. ClaimPR1965/head7c151ed096cc473dcf3198c6b50d4e8d2ef18a69/docsCI37963756700 SUCCESS/main40c2bba6d8725f01423a9ce54b8384d6679e23be preceded source. Rebased currentmain7d4e23989fa91ba1767c6de936ad200128d98b4b; new Hikvision download claimPR1975 and latest menu USER PASS, Hikvision diagnostics/package/Windows CI and Backoffice direct selected-store operations release/owners preserved. Gate3 PASS, physical KAT/RBS/remote, capacity and Diadoxou scopes remain protected.

Implemented closed server-reserved tenant namespace before route dispatch, verified JWT/current user/operator/background context and login/session issuance; persisted opaque Cloud device/pair/online/inventory grant/efood/upload contexts and atomic remote pairing exclude demos. Tenant-bound SMTP/Push/Netlink/AI/myDATA-original/video enqueue and RBS finalizer reject before transport/commands/financial writes. Actual mail callers propagate resolved company/store. myDATA scheduled targets and POS invoice startup repair/claim/dispatch exclude demos; attendance candidates and locked sessions skip demos. Existing Platform auth/audit mount, ordinary auth/licensing/permission/fiscal/stock/idempotency checks and other owners remain protected. No production schema/flag/customer/credentials/provider/transaction action.

FullCI37968200667/headc95dfcc0ff69aff3ef15d6bd4c9cc63cd2adc93a/build-and-test113948211460 SUCCESS:1976tests/1976pass/0fail/0skip, client/server build, invariants, all isolated HTTP E2E, RBS and Hikvision Windows checks. Actual new loopback PostgreSQL/HTTP observation2026-10-09T17:46:13.034Z: two independent synthetic demos, zero outbound worker calls; injected active/module/provider settings cannot open runtime; valid demo password and forged ordinary-tenant session claims denied without new sessions; persisted device tenant controls opaque requests; every payment mode denied; RBS queues/finalizers unchanged; expired/revoked tasks unclaimed; demo financial/stock/device/attendance unchanged; ordinary password login/token, price3.25/stock123 and attendance720minutes/oneAudit preserved. Local targeted47/47 and full1962total/1958pass/0fail/4environment-dependent skips, production build/syntax PASS. This is scoped CI evidence, not LAB/USER acceptance or full demo PASS.

Earlier CI37966738771 stopped before device assertions because the fixture omitted lazy CloudDevice initialization; corrected using real service bootstraps/verified-loopback health. CI37967527527 exposed an uppercase synthetic email incompatible with existing lowercase login; fixture normalized and positive ordinary login/unchanged demo-session assertions added. No business assertions weakened; existing public auth error payload asserted. Final rebase CI37968821340 stopped at mandatory active-list checkpoint policy before tests because shared registers had been left unchanged; restored synchronized active/tracker/pending/PDF updates. No failing head merged. Current source blobs are unchanged from successful c95dfcc0; final exact rebased head CI still required before merge.

All live preparations remain inactive/non-installable. Full CUSTOMER-DEMO-01 stays OPEN/NOT TESTED: personal common existing-app POS/Backoffice access with explicit safe operation allowlist and DEMO context, measured cash sale/replay/report/Audit, actual50x40mm label settings/physical printing, authenticated readiness and Windows package/install/reopen/uninstall. No manual PASS, customer installer or activation claim. Owner retained; no transfer/release. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md; protocol docs/ops/customer-demo-windows-20261009.md. Additional fullCI37969168997/head4101feffd8e2c0f561467c8c0784a57f9cbc7c5f/job113951142179 SUCCESS:1976/1976/0fail/0skip and repeated two-demo observation2026-10-09T17:53:56.638Z/outbound0. Latest rebase modifies only records while retaining these verified source blobs. This scoped record is inserted adjacent to the retained owner claim, preserving concurrent prepend-only entries. Central PDF regeneration/publication is part of the immediately following qualified completion handoff; interim source PR preserves main PDF. Single next action: final exact-head fullCI, source merge and published qualified central handoff; then claim personalized common POS/Backoffice safe runtime integration before activation.

09/10/2026 20:04 Europe/Athens — CUSTOMER-DEMO-01 / runtime and outbound fence CLAIM / ASSIGNED

User authorizes continuation «ΞΕΚΙΝΑ» at19:58Athens. Retained owner codex/customer-demo-windows-20261009; bounded source branch codex/customer-demo-runtime-20261009. Reviewed latestmain083d1bc15e26bf8da31764363962d5916bcda8c2, AGENTS, numbered checklist, current canonical registers, own preparation checkpoint/protocol and all40commits since72529. SourcePR1948/fullCI37886398932 verifies inactive preparation only; no customer runtime/installer or physical printing PASS. Current Diadoxou, Gate3 PASS, physical RBS/remote installers, capacity and other owner scopes remain protected.

Bounded next implementation: server-owned closed runtime fence for reserved demo company/store namespaces, including verified user/operator/background sessions and anonymously reachable device/public paths; reject real provider actions even if ordinary active/module/provider settings are injected. Explicit exclusion before claim/execution of scheduled myDATA, POS invoice and attendance tasks; recheck trusted tenant at provider/email/push/device boundaries where background execution bypasses ordinary route auth. Ordinary real/LAB control behavior must retain existing auth/license/business semantics. No client flag, JWT claim alone or missing lifecycle may activate a demo. Keep all preparations inactive and installable=false; no production flag/migration/credentials, activation endpoint or Windows download in this bounded stage.

Acceptance: Node20 regression and new isolated loopback PostgreSQL/HTTP fixtures with two separate demo identities and nonempty ordinary control. Verify alternate/encoded paths, forged configuration/session context, anonymous/device access, provider queue and direct outbound rejection, zero transport calls and unchanged financial/stock/provider/control state; pending tasks cannot execute demo work after expiry/revocation. Observe full exact-head CI before merge. CI is not LAB/USER/Windows acceptance. Personal common POS/Backoffice login, controlled safe action allowlist/DEMO UI, actual50x40mm label settings/printing and validated Windows package remain OPEN under same owner. Claim must merge before source changes. Checkpoint

CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md. Next after green claim: implement and verify this fence.

2026-10-09T16:54:25.539502Z - POS-STORE-MENU-WASTE-01 / LIVE / AWAITING USER menu inspection

Owner codex/pos-store-menu-remove-waste-20261009; sourcePR1963 finalheade4c7692ad68ed6e50d0d8952b1952048fb700b97 / exact-head fullCI37961294021 SUCCESS / merge083d1bc15e26bf8da31764363962d5916bcda8c2 / mainCI37961748140 SUCCESS / guardeddeploy37962053439 SUCCESS. Renderdep-db4hn2c9v7es73am1880 LIVE2026-10-09T16:54:25.539502Z. Fresh independent public health after LIVE returned HTTP200/ok=true/exact083d1bc15e26bf8da31764363962d5916bcda8c2. Claim1962/docsCI37960934022/merge216de9449 published before source edits.

Κατάστημα menu ΦΥΡΑ button removed entirely, replaced with an aria-hidden empty first desktop position for a future button per19:40 user instruction. Remaining self-consumption/destruction actions and reason guard preserved; reserved slot hidden in the existing single-column narrow layout. Bottom no-print action, accepted movement display, backend WASTE classification/calculations and all original financial/stock owners unchanged.

Targeted9/9 and actual React/JSDOM empty/destruction/self isolated fixtures PASS; no production state writes. Exact public app inspection follows verified healthy release. No physical geometry or business outcome claimed. Latest photographed old-menu USER FAIL remains AWAITING read-only visual retest: user Ctrl+Shift+R then opens Κατάστημα once, expecting absent ΦΥΡΑ and empty original desktop position; no product/action submission required. Manual unchanged until USER PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-store-menu-remove-waste.md. Existing display-label closure and all other owners/PASS preserved.

09/10/2026 19:43 Europe/Athens - POS-STORE-MENU-WASTE-01 / IMPLEMENTED / AWAITING CI, healthy release and USER

Owner codex/pos-store-menu-remove-waste-20261009. Claim PR1962/head341dc515600545f536760d67e184b47541044dde / docsCI37960934022 SUCCESS / merge216de94499047c0d7897aa56aed5f4b93054547e published before source edit. User19:40 asks to leave the removed button's position empty for a future button.

Remove only ΦΥΡΑ action and its unused message label from StoreConsumptionMenu. Replace its first desktop grid cell with an empty aria-hidden noninteractive reserved slot; existing three-column layout retained, reserved slot hidden at existing narrow-screen breakpoint. ΙΔΙΑ ΚΑΤΑΝΑΛΩΣΗ, ΚΑΤΑΣΤΡΟΦΗ ΠΡΟΪΟΝΤΩΝ, required destruction reason, empty/busy guards, selected-store request body, other message/close/completion callbacks remain. Backend supports existing WASTE unchanged; bottom no-print action, accepted movement title and original financial/stock owner untouched.

Node20 targeted9/9 PASS /0fail/0skip, including unchanged consumption business/audit and shift/session/title guards. Actual React/JSDOM empty/destruction/self fixtures PASS: exactly two remaining buttons, empty noninteractive slot, empty cart disabled, destruction requires reason/no submission, self-consumption uses same selected fixture-store POST/body and excludes exchange-return line; close works. Only simulated fixture API was called; no production state writes or transactions. Source diff --check PASS. Local full-tree diff check saw generated PDF whitespace and is not a source-code failure; scoped changed source check is green.

No physical layout/fiscal/stock/cash acceptance inferred. Latest physical old-menu USER FAIL awaits read-only refresh/open-menu retest. FullCI/exact healthy release required before requesting it. Manual unchanged until real USER PASS. Other owners and prior PASS preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-store-menu-remove-waste.md.

09/10/2026 19:39 Europe/Athens - POS-STORE-MENU-WASTE-01 / ASSIGNED / old extra button USER FAIL

Owner codex/pos-store-menu-remove-waste-20261009; bounded independent menu-entry removal. User explicitly asks «ΚΑΙ ΑΠΟ ΕΔΩ ΠΡΕΠΕΙ ΝΑ ΦΥΓΕΙ ΤΕΛΕΙΩΣ ΑΥΤΟ ΤΟ ΚΟΥΜΠΙ»; images163827/163912 show Κατάστημα / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, LAB POS2 and old ΦΥΡΑ entry alongside ΙΔΙΑ ΚΑΤΑΝΑΛΩΣΗ and ΚΑΤΑΣΤΡΟΦΗ ΠΡΟΪΟΝΤΩΝ, empty cart. Remove only the visible ΦΥΡΑ button from StoreConsumptionMenu; retain other two actions/mandatory destruction reason, selected-store API and existing behavior. Keep three desktop slots with the first empty for a future button, per19:40 user instruction; keep existing narrow-screen single column without a blank touch action. Existing bottom «Κλείσιμο χωρίς Εκτύπωση»/submission/backend WASTE/accounting/stock/Audit/permissions and accepted movement label remain unchanged. No server/config/data mutation or new transaction.

Publicmain e3686bf3729bc1547d6e28895c7e1135df96d9b2 includes accepted POS-NO-PRINT-DISPLAY-01 closurePR1961/CI37960175522 SUCCESS. Original POS-NO-PRINT-01 owner codex/pos-close-without-print-20261008 retains business/financial acceptance; no takeover. Other owners and prior PASS protected.

Next: publish bounded claim before source, remove one menu action/update existing menu assertions, verify actual React empty/cart menu and remaining reason guard read-only/no production write, fullCI/exact healthy deployment, then user refreshes/opens Κατάστημα once without submission. Manual unchanged until USER visual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-store-menu-remove-waste.md.

09/10/2026 19:31 Europe/Athens - POS-NO-PRINT-DISPLAY-01 / USER VISUAL PASS / CLOSED display scope

Owner codex/pos-no-print-display-20261009. User screenshot image(20261009-163109).png after instructed POS refresh/open-existing-movements shows four rows titled «Κλείσιμο χωρίς εκτύπωση», actor LAB POS 2, shift TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ. Existing three 1×NEPO1,5LT rows retain 1.00EUR and CASH1.00EUR / «Χωρίς απόδειξη»; additional 1×NEPO500ML row at09Oct19:23:36 shows0.50EUR/CASH0.50EUR with same title. Latest visual PASS supersedes19:23 screenshot's old-title FAIL for this read-only name only. New0.50EUR action was not initiated/observed by this page; no before-after/control or stock/cash/Audit acceptance inferred, no replay.

Source PR #1959 / exact-head fullCI37953345034 SUCCESS / merge96932a3774b15b8a4cfb2423a73788a13bf9a427 / mainCI37953781791 / guard37954085658 SUCCESS / Renderdep-db4go9rbc2fs73bob3og LIVE. Fresh public health09Oct19:25-19:28 reverified exact96932a3; public app entry-DY-5N_Lx.js contains correct WASTE title. Physical client SHA, store ID/physical terminal and exact refresh gesture not independently supplied; screenshot identity only. Cache is not asserted as a proven root cause.

Close only independent display assignment; original POS-NO-PRINT-01 owner retains unchanged /waste submission, WASTE classification, financial/stock/control acceptance. Other owners/Gates and prior PASS preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-no-print-movement-label.md; manual docs/manual/pos/PASS.md. Own completed pending block removed; tracker PDF synchronized. No new source/API/data mutation or transaction needed.

2026-10-09T15:49:37.811Z - POS-NO-PRINT-DISPLAY-01 / LIVE / AWAITING USER read-only label retest

Owner codex/pos-no-print-display-20261009; source PR #1959 final head 8fd1362c26f42ae88623c3a8534617be899bab58. Claim PR #1958 / docs CI 37952899987 SUCCESS / merge aa2de84d4d7fa7668a20cb0ae0d26d091e45f5ca preceded source edits.

Shift movement title for existing WASTE rows is «Κλείσιμο χωρίς εκτύπωση». Only that read-only display literal and its existing guard changed. Preserve WASTE source/kind, CASH1.00EUR/amounts, no-receipt subtitle, icon, active-session/operator selection, other labels and every request/backend fiscal/cash/stock/Audit/report behavior. No transaction replay or historical record rewrite.

Node20 targeted5/5 PASS; actual React/JSDOM own/all-operator/closed-shift cases PASS with selected-store GET-only calls, same amounts, ordinary sale label, stale-shift exclusion and close action. Full CI is code/release evidence, not physical financial/stock or all-layout acceptance.

User09Oct18:33:17 Athens explicitly requested same function; screenshot image(20261009-151157).png shows LAB POS2 / TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ / existing «ΦΥΡΑ» movements. Physical client SHA/before-after/control not supplied; label USER FAIL awaits read-only retest. Original POS-NO-PRINT-01 owner remains assigned for submission/accounting/financial acceptance; no takeover. Other owners and prior PASS preserved. Next action: user refreshes and opens existing shift movements once, expects new title and same displayed amounts without making a new transaction. Manual unchanged until USER PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-no-print-movement-label.md.

2026-10-09T15:38:53.465Z - POS-NO-PRINT-DISPLAY-01 / IMPLEMENTED / AWAITING exact-head CI, healthy release and USER

Independent display owner codex/pos-no-print-display-20261009. Claim PR #1958, final head 16663db4f3f1c0bb650bf3bf1e8a2cba8e2d1c30, docs CI 37952899987 SUCCESS, merge aa2de84d4d7fa7668a20cb0ae0d26d091e45f5ca was published before source edit. Latest user instruction09Oct18:33:17 Athens explicitly retains the same function and calculations.

One read-only change: StoreShiftTransactionsModal's existing WASTE display title is now «Κλείσιμο χωρίς εκτύπωση» instead of «ΦΥΡΑ». Existing source/kind WASTE, icon, no-receipt subtitle, CASH amounts, rows/session/operator filtering, normal sale/return/VOID/expense titles and backend processing/reports are untouched. Update the one existing waste-visibility label assertion and its test description; all other assertions remain intact.

Node20 targeted5/5 tests PASS, no failure/skip. Actual React modal in an isolated JSDOM fixture PASS for own-operator, all-operator and closed-shift cases: new title, unchanged CASH1.00EUR/no-receipt display, ordinary sale title, old-shift99EUR excluded, expected selected-store GET-only calls and close action. This fixture is not a physical financial/stock test or geometry certification. git diff --check PASS. No production sale/payment/order/stock/Audit/state write; no historical data rewrite.

AWAITING full CI and exact healthy deployment, then one user read-only inspection of existing movements. Existing POS-NO-PRINT-01 submission/accounting/financial acceptance owner remains assigned and untouched; no transfer. The screenshot USER FAIL is not yet closed. No new manual PASS, other modules/Gates/owners and earlier accepted header entry preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-no-print-movement-label.md.

09/10/2026 18:33 Europe/Athens - POS-NO-PRINT-DISPLAY-01 / ASSIGNED / movement label USER FAIL

Independent bounded display owner codex/pos-no-print-display-20261009, source branch codex/pos-no-print-movement-label-20261009; checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-no-print-movement-label.md. Based on main f7873e33471e1adc3efc63ecdc30e88a165b146a. Existing POS-NO-PRINT-01 owner codex/pos-close-without-print-20261008 retains direct-button submission, accounting and physical financial acceptance; no transfer or duplicate implementation of that scope.

User screenshot image(20261009-151157).png shows LAB POS2 / shift TEST QR ΕΠΑΝΑΜΕΤΡΗΣΗ / three existing 1×NEPO1,5LT movements at1.00EUR, titled «ΦΥΡΑ» and CASH1.00EUR. Screenshot observes labels only; no independent before/after stock/cash/control or physical revision supplied. User complains the «Κλείσιμο χωρίς Εκτύπωση» action appears as waste. Asked whether to change only the movement name with unchanged cash/stock function, user explicitly answers «ΤΗΝ ΙΔΙΑ ΛΕΙΤΟΥΡΓΙΑ» at18:33:17 Athens. New movement-label requirement is USER FAIL until corrected and retested.

Claim only the read-only StoreShiftTransactionsModal display label for existing kind WASTE: «Κλείσιμο χωρίς εκτύπωση». Keep source/kind WASTE, /waste request, amounts, CASH display, stock/ledger/Audit, no-receipt subtitle, icons, recent-sales/active-session/operator filtering, ordinary sale/return/void/expense labels and all backend reports/API behavior unchanged. No migration, historical data rewrite, fiscal execution or production state write. Do not repeat the displayed transactions for evidence. Existing financial/TableService/No16/Gate/capacity owners and PASS remain protected.

Next action: publish this bounded claim with green docs CI and merge before source edit; change one display literal plus the existing affected guard, run preserved session/waste tests and actual modal fixture, exact-head full CI, merge/main CI and healthy exact release. Then user refreshes and inspects the existing movements without a new transaction. Manual remains unchanged until real user acceptance. Original no-print financial acceptance stays AWAITING LAB.

09/10/2026 18:01:37 Europe/Athens - POS-AUX-HEADER-01 / USER PASS / bounded header-entry correction CLOSED

Owner Χρήστος Μάνης replied «ΕΙΝΑΙ ΟΚ» after the instruction to refresh and open «Ασύρματη παραγγελιοληψία» in the lower green POS header, expecting «Σάλες, τραπέζια και παραγγελίες». Record this as owner-confirmed USER PASS for the requested desktop entry opening, together with the earlier accepted auxiliary placement. The 08Oct23:35 wrong-mobile-target FAIL is superseded only for this corrected header entry. No repeated transaction or new order was requested or performed by this page to document acceptance. Physical store, terminal, operator/shift and client revision were not supplied with this confirmation; no independent physical timing or all-module acceptance is inferred.

Correction source PR #1940 final head ebd54a0668679462a6d507538f211379c00715b7; exact-head full CI 37842474226 SUCCESS; merge 8caf17fc8ebdbdcb21c51774d43abf20f7fec685; main CI 37842810694 SUCCESS and guarded deploy 37843105222 SUCCESS. Prior independently verified release: Render dep-db406s6i0phs73egq0kg LIVE 08Oct20:59:08.937381Z; fresh public health 08Oct20:59:34.980Z HTTP 200 / ok=true / exact source revision 8caf17fc8ebdbdcb21c51774d43abf20f7fec685. Release documentation PR #1942 final head 7a97e75a54cd752806654b5cc17a68d957fd5e9b; docs CI 37843727558 SUCCESS; merge e0d7f6cc0e0d9efc52b802867eedfce98ad28844. These are dated release evidence, not a claim about the physical client's current SHA.

Close the independent header-entry assignment of codex/pos-aux-header-20261008 and remove its own pending section. Existing module/store/role availability, separate mobile waiter login and all order/payment APIs remain unchanged. TABLE_SERVICE business acceptance and owner, No16, palette, inherited small-height/large-text category limit, capacity and all other Gates remain separately owned/open as recorded. This is not acceptance of new ordering, fiscal, stock, payment, different-store or inactive-module behavior. Protected prior PASS remains intact.

Verified instructions are added to docs/manual/pos/PASS.md in this same closure, with checkpoint, active list, tracker, pending cleanup and regenerated central PDF synchronized. No new implementation work is selected in this closure.

2026-10-09T16:34:06.060404+03:00 - POS-DB-LOCK-01 / full20store22POS model RUNNING / result PENDING, production readiness NOT ESTABLISHED

Full claimPR1955/head2a484bf5/docsCI37937339780 SUCCESS merged47b11dc7ff0b58dcc766e3e99b3de8ec1fee7809 before fresh full execution. MainCI37937511405 SUCCESS, guard37937571742 SUCCESS; no production source/resource change. Exact prepared source992f5aec/fullCI37936078269 SUCCESS1966/1966 and all short capped phases37936078268 PASS preserved.

Actual ONE full run37937519901/job113843198454 began09Oct13:32:03Z/13:32:05Z (16:32Athens), observed IN_PROGRESS with Run bounded resource model step active. Branch codex/pos-capacity20-run-db200-app100-20261009/head aacae12174984ba224bb46dfbb6236d9947757b7; seven harness/workflow/profile source blobs verified identical to prepared992f5aec. Only docs/run marker changed; fullprofile selected by the explicitly claimed run branch. This proves workflow execution started, not any particular workload phase or completed sale count. Actual phase/start/resource/result evidence is pending until its artifact/log becomes readable. No second launch/rerun/cancellation or transaction retry.

Claimed20active stores/22POS/20BackOffice, APP1CPU/512MiB and PG18DB2CPU/256MiB/testpool5, fresh loopback database/control and synthetic identities. Expected5minwarmup+30minnormal+15minpeak+84simultaneousreads+120minnormalendurance (~170min plus setup); if all complete,4400synthetic CASH sales/11000EUR/-4400stock with exact before/phase/final/replay/control checks. Timing around19:25Athens is an estimate if setup and all phases complete, not a promised result or acceptance. Job may fail earlier; phase criteria are unchanged. Timeout240min, in-progress cancellation disabled, result/resources/state/manifest artifact30days. Durable actual launch identity: docs/ops/evidence/pos-capacity20-20261009-full-launch.json; live run https://github.com/xrhstosmanis-design/myworkstation-app/actions/runs/37937519901 .

Current actual-limit resource model failed; short proposed model PASS does not supersede that failure. Full-duration result PENDING/production20readiness NOT_ESTABLISHED;50/100stores NOT_TESTED. Actual production poolunknown, history/independent companies/jobs/provider/devices/UI/network/cloud/storage/failover/restore acceptance absent. No paid Render plan/provisioning, production SQL/seed/transaction/deploy/restart/credentials or old LAB/Diadoxou replay. SourcePR1951 still open/unmerged; no new production source release, LAB/USER/manual PASS, or other-owner/gate changes.

Retain incident owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009; no receiving page or release. Completed launch supersedes pending launch action. Single next action: inspect THIS run37937519901 once completed (do not launch another to obtain evidence), download actual result/resource artifacts, reconcile every completed phase and accepted/rejected sale, review resource saturation/limits, then publish precise qualified20model PASS/FAIL and remaining production scope in synchronized records/PDF. All previous accepted real transactions/owners remain protected; simulated evidence never creates a manual PASS.

2026-10-09T16:28:59.290248+03:00 - POS-DB-LOCK-01 / isolated short20store preflight PASS / full170minute run CLAIMED, NOT STARTED

Source992f5aec3c01e5c53e99c1b70b22bf29053fe741/codex/pos-capacity20-compare-db200-app100-20261009 passed exact fullCI37936078269/job113838416965:1966tests/1966PASS/0fail/0skip, client/server/build/security/invariants/Windows and existing187-sale smoke plus unrestricted132-sale preflight. CappedPG18run37936078268/job113838359104 completed13:25:32Z (16:25Athens). All five SHORT phase financial/arrival/latency assessments PASS at APP1.00CPU/512MiB,DB2.00CPU/256MiB,pool5; this is not duration or production acceptance.

Fresh132intended/132accepted/persisted CASH sales: exact request/payment/stock/audit links, terminal cash330.00EUR, stock-132, untouched control100000, idempotent replay no extra effect, zero errors/drops/dispatch delays over1second. Normal sale p95/p99 28/90ms, refresh165/217ms, search19/28ms; peak sale60/106ms, refresh139/205ms, search31/103ms. Synchronized84logicalread/106HTTP burst elapsed2.62s, refresh p95/p99 2507/2599ms, report1571/2423ms, search301/301ms: all unchanged thresholds PASS. Other short warmup/final phases PASS. Prior baseline actual-limit model FAIL, DB-only FAIL and APP1/DB0.5 burst latency FAIL remain preserved; no lost/duplicate accepted sale observed across those measurements.

Actual artifact11619040772/digestsha256:5f4853991194caa5205492f4c521d3ee32866b893da24f43982d2485de1e6d10 expires08Nov13:25:31Z, bytes read. Durable sanitized evidence docs/ops/evidence/pos-capacity20-20261009-app100-db200.json includes synthetic baseline/final/request ledgers for independent reconciliation. Final app/DB running/OOMfalse/P2024/transaction-timeout signalszero within observed scope; configured caps verified nanoCPU1000000000/2000000000 and memory536870912/268435456. Exact previous correctness verification a86882dd/fullCI37934829510 also SUCCESS; earlier checkpoint-policy failure corrected without bypass.

CLAIM before next state-changing isolated test: ONE fresh full20store/22POS/20BackOffice run on codex/pos-capacity20-run-db200-app100-20261009 at this same proposed resource model,pool5,7000company products/5000linked per store,unchanged workload/criteria/business. Full5minwarmup+30minnormal+15minpeak+84simultaneousreads+120minnormalendurance (~170min plus setup). Expected4400new syntheticCASH sales/11000EUR/-4400stock if all phases complete; exact baseline/phase/final reconciliation and control required, no retries after uncertain actions. Source/harness scripts unchanged; only docs/run marker selects already-verified fullprofile. Launch after this claim merges with green docsCI. At this record full run NOT STARTED: do not infer running/result from a planned branch.

Production20readiness NOT_ESTABLISHED,50/100capacity NOT_TESTED. Candidate caps are not paid Render resources or live infrastructure. Actual configured production pool unknown, model cloud/storage/network/scheduling/history/independent-company/job/provider/device/UI/failover/restore coverage absent. No paid service/provisioning, actual production SQL/seed/transaction/restart/deploy/credentials or old LAB/Diadoxou replay. SourcePR1951 remains open/unmerged; measured branch is public but this is not a production source release. No real LAB/USER/manual PASS or other-owner/gate change.

Retain incident owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009; no handoff/release. Completed short comparison supersedes pending DB2action. Single next action: launch the claimed full run, record actual run/source/start, then inspect phase metrics,financial reconciliation/resources and publish qualified final20model result. Failure aborts acceptance without retries or relabeling. Full job timeout240min, no in-progress cancellation, artifacts30days. No second launch or inferred completion.

2026-10-09T16:18:25.205991+03:00 - POS-DB-LOCK-01 / DB2.00-APP1.00 source prepared / AWAITING exact capped and full CI

DB2comparison claim PR1954/head a6f62f6f/docsCI37935738275 SUCCESS merged before these source/test changes. Previous verified source a86882dd/fullCI37934829510 SUCCESS1966tests/0fail/0skip, original187-sale smoke and132-sale short preflight preserve financial/auth/license/isolation/build regressions. APP1/DB0.50 short financial PASS and burst latency FAIL remain authoritative; no20store/full-duration/production PASS.

Prepared branch codex/pos-capacity20-compare-db200-app100-20261009 changes only DB CPU0.50 to2.00; APP1.00CPU/512MiB,DB256MiB,pool5,PG settings,workload/rates/criteria unchanged. Isolated script validates fixed allowed CPU models before Docker/SQL; resource label explicitly identifies proposed test caps. Comparison branch runs short capped workload and full regression in separate disposable CI jobs; fresh implementation delta updates active/checkpoint in the same source commit to satisfy existing policy without bypass. Full duration remains NOT STARTED until all short phase assessments and source checks pass and its run is separately claimed. SourcePR1951 open/unmerged, incident owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009 retained; no paid/prod/old LAB/Diadoxou/other-owner/manual action. Single next action: inspect exact DB2short phase metrics,financial deltas/resources and full CI, then decide sustained run or retained FAIL.

2026-10-09T16:15:22.269542+03:00 - POS-DB-LOCK-01 / short APP1.00-DB0.50 correctness PASS / synchronized-burst latency FAIL

APP comparison run37934356551/job113832572773/head26e94385d31de532aedb89b5389f38c6b33c336c completed13:11:04Z (16:11 Athens). Workflow SUCCESS means short harness correctness only: 132of132fresh synthetic CASH sales persisted once, payments/movements/audit/request links exact, cash330.00EUR/stock-132/control100000 and one idempotent replay with zero extra effect. No offered action errors/drops or dispatch delays over1second. App1.00CPU/512MiB,PG180.50CPU/256MiB,test pool5; all previous business/rate/financial/latency criteria retained. No actual production resource change.

Normal60s and peak60s latency assessments PASS: normal sale p95/p99 46/55ms, refresh331/373ms, BackOffice search118/150ms; peak sale155/192ms, refresh410/503ms, BackOffice search86/121ms. Warmup and short final phase also latency PASS. Synchronized84logical read/106HTTP burst completed in9.14s but latency assessment FAIL: refresh p95/p99 9033/9106ms, reports8261/8261ms, BackOffice search1065/1069ms, above unchanged criteria. Do not equate green workflow or normal/peak PASS with full capacity PASS. Overall20store acceptance remains OPEN; full170minute run NOT STARTED.

During burst one sampled DB CPU49.90% of one core met50% cap; app49.48% below100% cap, DB active max5/no lock waiters in burst. Sample is limited, suggests DB CPU as next variable without proving cause. Final containers running/OOMfalse/P2024zero/transaction-timeout signalszero; memory sampled near burst app166.1MiB/DB213.7MiB. Original startup42P01 is pre-preparation noise, not timed missing-table failure. Fresh IDs/arrival phasing vary between runs; explicit pool5 production configured poolunknown and model storage/network/cloud/job/history/provider/device/UI/failover equivalence remain NOT_TESTED.

Artifact11618266197/digestsha256:4b0a31a999292ff19453a5507ddbbc22d07fea0c00397010edaa665a738ee09e expires08Nov13:11:02Z, actual bytes read; durable summary docs/ops/evidence/pos-capacity20-20261009-app100-db050.json. Parallel comparison fullCI37934356420 failed checkpoint gate beforebuild/tests; policy preserved and source implementation delta added to verification a86882dd8fcdea081528b5c5d502e3f2ec4eab5a/fullCI37934829510, currently pending. Capped run not replayed/canceled; verify branch triggers only full correctness CI. SourcePR1951 stays open/unmerged. Earlier baseline and DB-only FAIL preserved; no LAB/USER/manual PASS or20/50/100production green light.

Retained incident owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009; no transfer/release. Single next bounded action CLAIMED before code/test writes: fresh isolated DB-CPU-only comparison0.50 to2.00 with APP1.00, memory/pool/rates/financial/latency criteria unchanged. Require all short phase assessments plus source regressions before separately claiming full duration. No paid infrastructure/service/plan, production deployment/restart/SQL/seed/credentials, old LAB/Diadoxou replay or other owner/gate/manual changes.

2026-10-09T16:07:45.563413+03:00 - POS-DB-LOCK-01 / APP1.00-DB0.50 comparison running / exact full CI preparation

APP-only claim PR1953/head4f05bfcd/docsCI37934189852 SUCCESS merged4791c00e5d4cdfcc0aedbdd900bc64fc66e651fd before code/test writes. Comparison source26e94385d31de532aedb89b5389f38c6b33c336c on codex/pos-capacity20-compare-db050-app100-20261009 started capped run37934356551/job113832572773. Resource target APP1.00CPU/512MiB,DB0.50CPU/256MiB,pool5; application workload/business/rates unchanged. Result pending; no capacity PASS, long run or production change claimed. Local13 profile/generator tests and Bash/YAML wiring PASS.

Parallel full CI37934356420/job113832646780 failed before build/tests at mandatory checkpoint policy: compared with published main claim, source commit had no new checkpoint delta. This is a preparation-record failure, not an observed workload or business regression. Preserve the policy; add this actual implementation/checkpoint update and run full CI on separate codex/pos-capacity20-verify-* branch. Verification branch never triggers capped workflow, so the already-running APP resource comparison is not canceled/repeated. Existing source PR1951 stays open/unmerged and retained incident owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009 remains assigned. Single next action: evaluate current capped phase/finance/resource results plus exact full CI before deciding on a claimed full-duration run; baseline and DB-only FAIL remain authoritative. No paid/prod/old LAB/Diadoxou action or other-owner/manual/gate change.

2026-10-09T16:02:20.949432+03:00 - POS-DB-LOCK-01 / isolated DB-only comparison FAIL at peak / APP-only follow-up claimed

PR1952/headc0fefccb/docsCI37932784043 SUCCESS merged bf3b6e2e75bc5fe299f011a6db25d58e75eba53c; seven record blobs verified, mainCI37932859150 SUCCESS, deployment guard37932900294 SUCCESS with deployment job SKIPPED. It publishes the real-rate baseline FAIL and DB-only comparison claim before source/test writes. No production deployment or infrastructure change.

Fresh comparison branch codex/pos-capacity20-compare-db050-20261009 / heada38585e058206f68685073f1841ca0408082a84f intentionally changes ONLY DB CPU0.10 to0.50; app0.15CPU/512MiB, DB256MiB, pool5, rates/criteria/application unchanged. Local13 regressions, Bash/YAML/default baseline guards PASS. Actual run37932989553/job113828039753 FAILED12:59:13Z (15:59 Athens). Warmup and normal60s each accepted all22sales; normal refresh p95/p99 1702/1735ms, sale2747/3371ms, BackOffice search1043/1324ms. Thus normal latency assessment FAIL despite financial correctness. Fresh IDs change arrival phasing and fractional report counts; improvement versus the baseline is observed but not a controlled causal proof.

Peak60s offered66sales, accepted52 and explicitly rejected14 with HTTP500; sale p95/p99 23124/25314ms, refresh8319/8692ms, BackOffice search6347/6709ms, report12798/13026ms. Cumulative110intended/96accepted/14rejected. Actual artifact reconciliation confirms all96accepted request/sale/payment/movement/audit links, cash240.00EUR, stock-96, untouched control100000; rejected requests have zero persisted sales and no retry. No lost/duplicated accepted sale observed. Peak sampled app CPU mean12.95%/max14.83% of one core against15% cap, DB mean7.62%/max25.04% against50% cap; sampled memory app147.5MiB/DB212.2MiB. Both running/OOM=false/P2024=0; P2028 and transaction-timeout signals observed (occurrence counts, not distinct errors). DB active max4, lockwaiters3, oldestactive4.665s. Evidence suggests application CPU contention as a next test variable; cause is not yet established.

Artifact11617193796/digestsha256:a4ab7c981d35a41d3ce03c605c8dfe1f3806f6f49817150674c4e1cca96 7790e expires08Nov12:59:13Z, actual bytes read; durable sanitized summary docs/ops/evidence/pos-capacity20-20261009-db050.json. Burst/endurance/full170minute run NOT STARTED. No20store production approval or50/100capacity claim. SourcePR1951 remains open/unmerged, source fullCI1966PASS and unrestricted132-sale preflight do not supersede capped FAIL. No real LAB/USER/manual PASS.

Retained incident owner codex/pos-startup-loading-20261008 / source codex/pos-capacity20-profiles-20261009; no transfer/release. Completed DB comparison supersedes the prior next action. Single next bounded action CLAIMED before code/test writes: fresh isolated APP-CPU-only comparison0.15 to1.00 with DB0.50, all memory/pool/rates/criteria unchanged. Require per-phase financial and latency assessments before deciding on sustained execution; keep failed baseline and comparison evidence. No paid service/plan, production change/SQL/seed/deploy/restart, credentials, old LAB/Diadoxou business replay or other-owner/manual/gate changes.

2026-10-09T15:49:44.539553+03:00 - POS-DB-LOCK-01 / real-rate isolated 20-store resource model FAIL / production readiness NOT ESTABLISHED

Authoritative result: source PR #1951 / head a8a96c45a356311fb1a947223e0dac58ecc903a9; full correctness CI 37931103577 SUCCESS (1966 tests passed, zero failures). Capped real-rate run 37931103418 / job 113821736359 FAILED at 12:41:35Z (15:41:35 Athens). Standalone schema preparation passed. Warmup started 12:40:26Z: 20 stores / 22 POS / 20 BackOffice, 224 independently offered actions over planned 60 seconds, elapsed 68.863 seconds, peak in-flight 21, zero generator drops or dispatch delays over one second. This is the first real-rate capped measurement, distinct from the prior compressed overload.

22 intended synthetic CASH sales: 21 accepted/persisted and one explicit HTTP 500 rejection. Artifact readback verifies accepted request IDs equal persisted sale IDs; the rejected request has zero persisted sale. All 21 accepted sales agree across payments, stock movements and audit, terminal cash 52.50 EUR, stock delta -21, untouched control 100000. No lost/duplicated accepted sale observed; rejected action not retried. Failure is retained because all offered sales must succeed. Per-action p95/p99 milliseconds: sales 20308/23165, POS refresh 13790/18124, session access 8176/8483, BackOffice search 7244/7594, report 14175/14175. Local search ran in the generator and does not measure browser/UI latency. These timings exceed the defined criteria even independently of the sale rejection.

Observed warmup resource samples: app CPU mean 7.46%, max 15.00% of one host core, memory peak sampled 144MiB/512MiB; DB CPU mean 8.15%, max 10.89%, memory peak sampled 209MiB/256MiB (nine samples each). Final containers running, OOM=false, P2024 log occurrences zero; one Unable to start a transaction signal. Sampled DB active connections max5, lock waiters max3, oldest active statement 7.097s. CPU saturation/lock contention correlate with latency; no single cause established. Explicit test app pool5 / diagnostic pool2, actual production configured pool NOT_MEASURED. Docker resources do not reproduce Render network/storage/scheduling/history/jobs/provider behavior. Do not infer production transaction loss or universal absence of errors.

Exact artifact 11616271428 / digest sha256:4c961c2dbbc04c722c63e6aebb4670a9bac726e3996197fd08096ec40760e938 expires 2026-11-08T12:41:36Z; actual bytes downloaded/read. Durable sanitized summary: docs/ops/evidence/pos-capacity20-20261009-realrate.json. Source remains unmerged because capped acceptance failed; full 170-minute run NOT STARTED. Normal30min, peak15min, synchronized burst and endurance120min under caps remain NOT TESTED. No green light for 20 production stores, or 50/100. Full CI correctness is not capacity, LAB or USER PASS.

Retain incident owner codex/pos-startup-loading-20261008 / bounded source codex/pos-capacity20-profiles-20261009. No handoff/release. Completed measurement supersedes the prior pending real-rate preflight action. Single next bounded action, claimed here before code/test changes: fresh isolated paired preflight changing ONLY DB CPU 0.10 to 0.50; app0.15CPU, memory, pool, workload rates, financial invariants and acceptance limits unchanged. Compare the same phase by-kind metrics, accepted/rejected finance and resource samples before considering full duration. Candidate is not a paid Render plan or production change; no provisioning, restart, deployment, credentials, SQL mutation, old LAB/Diadoxou replay or gate/manual/other-owner changes. If candidate fails, retain FAIL and diagnose before further resource changes. Existing source stays open until required exact-head regression/preparation checks pass; no weakening gates to obtain green.

2026-10-09T15:34:57.166700+03:00 - POS-DB-LOCK-01 / compressed preflight overload observed / real-rate preflight required

SourcePR1951/head092776f195b607299df15563bce653b164e7acea/fullCI37929920813 SUCCESS1966/1966. Capped37929920726/job113817841656 FAILED12:30:01Z. Actual standalone schema preparation verified ManagementProductCompany absent before /api/management/product-companies and present after12:27:27Z; prior missing-relation dependency corrected for this fixture. Timed preflight warmup began12:29:38Z:128offered logical actions/150HTTP concentrated in about2.5seconds, far above proposed normal rates. After23s only1of22intended synthetic sales persisted; expected-vs-observed failure retained, no claim that rejected/timed-out requests were accepted or money was lost. Final resource evidence both containers running/OOM=false, P2024 occurrences30 in sanitized logs; these are log-string counts, not30unique transaction failures. No actual production interference or long phase.

That compressed correctness schedule is an unsuitable normal-load gate at these caps. Bounded profile correction: preflight normal/warmup/endurance each60s at unchanged real offered rates, peak60s at true peak rates, one explicit84-action read burst; full5/30/15/120minute profiles remain unchanged. Normal22sales/22refreshes/22independent access per minute, peak66sales/44refreshes/no extra access; local searches132/264per minute; refresh already validates access. Expected total132fresh sales in a complete preflight (not88). Unit regression requires arrivals spread beyond50s and exact per-minute sales/validation rates. Keep actual compressed overload FAIL and schema/race history; do not infer normal20store capacity from it. Existing default22/55/110smoke and application/pool/schema/provider semantics unchanged.

Local13profile/generator tests PASS after real-rate change. New full/capped CI and full170minute execution remain NOT TESTED. Single next action: observe real-rate preflight per-action metrics and precise financial/rejection deltas, decide whether the capped model can proceed safely, then publish result and full-run disposition. Retained owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009; original accepts/other owners remain protected. No old LAB/Diadoxou replay or paid/prod infrastructure action.

2026-10-09T15:24:18.167638+03:00 - POS-DB-LOCK-01 / standalone lazy schema dependency identified / capacity NOT TESTED

Capped run37929157605/job113815313493/head3e495e632b210c5d05fd1519d16dd221696a01c5 FAILED12:21:48Z before timed phases at owner-catalog negative read500. Actual sanitized logs: PostgreSQL42P01 (missing relation)/PrismaP2010; both containers running, OOM=false, P2024=0 and no reported memory/statement/transaction-timeout signals. Resource samples recorded enforced app0.15CPU/512MiB and DB0.10CPU/256MiB. These are setup observations, not20store capacity or universal error absence. Artifact11615338730/digestsha256:0d3333766c08fc4150587e063f2c2817dfb252a103e6f9a6e4673777c941f7b0 retained until08Nov12:21:49Z. No timed stage or sale occurred.

Source inspection identifies the standalone schema dependency: owner-catalog reads ManagementProductCompany; table absent from Prisma/base startup and lazily created by existing management product-company route. Regular CI first runs diadoxou-archive-import, whose existing exported schema helper prepares it, masking this missing harness preparation. Bounded fixture correction calls the existing authorized GET /api/management/product-companies while synthetic company has zero products, before baseline/financial actions. Record exact to_regclass before/after, require after present, and print sanitized setup/phase metrics. No invented DDL/schema, changed application query/bootstrap, auth/license/fiscal/pool/provider or production action. Existing endpoint remains otherwise unchanged; fresh standalone run must confirm dependency before calling it resolved. Missing-relation setup failure is not a resource-capacity FAIL.

Single next action: observe exact-head full CI and capped standalone preflight after explicit existing-API schema preparation, then publish source and launch one full170minute isolated workload if preparation passes. End-to-end20store performance and production equivalence remain NOT TESTED. Incident owner codex/pos-startup-loading-20261008/source codex/pos-capacity20-profiles-20261009 retained; original accepts/other owners/Gate3 protected and no old LAB/Diadoxou business replay.

2026-10-09T15:17:20.122551+03:00 - POS-DB-LOCK-01 / capped setup readiness race identified / workload NOT TESTED

Follow-up source3d3fb3b1d4be5e22e82e7060aa42111c1e971908/capped37928696809/job113813788064 failed12:15:24Z at PostgreSQL readiness before app creation. Unix-socket pg_isready may observe initdb temporary server then lose it; next check reported no response. No fixture workload/sale/provider occurred. Diagnostics must tolerate absent containers. Earlier actual owner-catalog500 on head9a remains separate/unresolved, not explained away by this readiness race. Source fullCI firsthead37927699830 already1966PASS; exact follow-up fullCI37928696798 pending at this record.

Read-only actual PG settings observed09Oct12:17Z: shared_buffers8192x8kB=64MiB,work_mem1654kB,maintenance_work_mem16384kB,max_connections103,reserved3,max_parallel_workers_per_gather1,jitON,statement_timeout0. Container defaults128MiB buffers/64MiB maintenance differed from the actual256MiB service. Bounded harness correction waits for final TCP server and explicitly models the observed settings (PG18/caps unchanged), preserving jitON and application/query/business semantics. These runtime settings apply only to the disposable loopback test container; no production configuration/SQL mutation. Resource diagnostics now retain absent container state instead of masking early setup failure.

Single next action: rerun fresh isolated capped preparation after these identified setup corrections; require observed results before any full170minute launch or20store capacity conclusion. Production and earlier500 cause remain NOT TESTED. Retained incident/source owners and all other PASS/assignments protected; exact request baselines remain mandatory, no old LAB/Diadoxou replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-capacity20.md and protocol docs/ops/pos-capacity20-20261009.md.

2026-10-09T15:12:59.183908+03:00 - POS-DB-LOCK-01 / first capped preflight FAIL / cause AWAITING sanitized diagnostics

SourcePR1951/head9a74951597eaa191a63d993d29f2bdb90a7e25a6/fullCI37927699830 SUCCESS1966/1966/0fail/0skip. Actual unrestricted PostgreSQL16/HTTP priority20 preflight12:07:26..40Z verified all5compressed phases and88new synthetic sales, exact ledgers/payment/stock/audit/replay/controls; synchronized read burst84generator actions completed. Existing187-sale22/55/110smoke and prior flows preserved. This is not a sustained/load/hardware acceptance.

Actual capped PG18/app preflight37927699599/job113810517818 FAILED12:08:07Z: checked owner-catalog negative-control request at server/e2e/pos-capacity-flow.mjs129 returned500 before any timed phase; zero timed capacity phases observed. Resource-model failure is separate from correctness on unrestricted CI;20store capacity and cause remain NOT TESTED. No assertion that actual production failed or sustained capacity was exercised. Original artifact11615121054/digestsha256:f0235afbc51548da60568adce6150affa48601e0e7647e997ee37c30e74ca81b retained until08Nov12:08Z. Its bytes could not be read through the temporary download URL (403); no resource/OOM/pool finding is inferred from uninspected contents.

Bounded follow-up only improves sanitized diagnostics: retain rejected route/status/code, print whitelisted Docker cap/OOM/exit/error-code/count and resource summaries to retrievable job logs; never emit container environment, raw logs, errors, response bodies or tokens. Clarify success summary separates full model phases from production acceptance. Fresh isolated namespace/database on every CI job; no replay of old fixture/business identities. No application/schema/financial/pool/production/infrastructure change. Existing owner retained and sourcePR1951 remains unmerged until follow-up full CI and capped preparation are evaluated. Single next action: observe exact error/resource evidence, resolve setup-vs-application/resource cause, then launch full20 workload only when safe and record results. All other owners/PASS protected.

2026-10-09T15:02:56.126735+03:00 - POS-DB-LOCK-01 / priority20 profiles implemented / AWAITING capped preflight and full CI

ClaimPR1950/headd1a9d749f2a7cb8783a95b191b19f03857e503c7/docsCI37926976494 SUCCESS/main72716dbfdb7da44732b975f1e8ad30e14f015657 preceded source and isolated test writes. Retained owner codex/pos-startup-loading-20261008; source codex/pos-capacity20-profiles-20261009. Local Node20 targeted13/13 PASS; source/Bash/Python syntax PASS. No sustained result, model capacity or production20store readiness claimed.

Added priority20 full/preflight profiles to the existing strict loopback/test-DB-only harness. Exactly20active stores/22distinct POS/20BackOffice plus untouched control and independent foreign control,7000company products/5000store-product links each. Full5min warmup+30min normal+15min peak+84simultaneous read actions+120min endurance; independent deadlines, per-route latency/arrival assessment and financial/stock/audit reconciliation per phase. Normal/peak independent session calls subtract those already included in refresh. Preflight only exercises each phase once per actor and explicitly never establishes sustained duration. Existing22/55/110smoke unchanged. Existing application/auth/license/fiscal/pool/schema/business code unchanged.

Dedicated GitHub workflow runs short capped integration on relevant PRs and full only on an explicitly launched codex/pos-capacity20-run-* branch, with240min deadline and no cancellation. PostgreSQL18 container0.10CPU/256MiB and app0.15CPU/512MiB model observed Render limits; diagnostic pool2/test-app pool5 are explicit isolated settings, production pool limit NOT_MEASURED. Generator is outside capped app/DB processes on the shared CI host. Captures sanitized Docker CPU/memory/IO timelines, actual enforced caps/OOM/exit state and selected error counts, per-action/result/request ledger and exact source. No container environment or raw application logs exported. Regular full CI retains original regressions plus short priority20 profile correctness flow/artifact.

Sustained/capped preflight is NOT TESTED until actual exact-head CI. Full source CI and capped preflight must pass before launching full execution. Model storage/network/history/job/provider/physical equivalence remains NOT TESTED; resource review is required even after core workload PASS and production acceptance stays NOT_TESTED. No paid/new Render infrastructure, production credentials/SQL/seed/transactions/deploy/restart or old LAB/Diadoxou action. Single next action: green full CI+capped preflight, publish source, launch one isolated20store full run and record its observed phases/results. Owner retained; all other owners/PASS/manuals unchanged.

2026-10-09T14:56:27.062044+03:00 - POS-DB-LOCK-01 / priority20stores22POS / ASSIGNED / NOT TESTED

Owner retained codex/pos-startup-loading-20261008; bounded source codex/pos-capacity20-20261009. User prioritizes20stores at14:31 and authorizes start14:53:37 Athens09Oct. Reviewed maine8754487, all intervening demo owners/history, current AGENTS/checklist/registers, capacity/deployment checkpoints and manual. Prior sourcePR1941/recordPR1943 verified only short isolated22/55/110 terminal smoke; no20store production capacity acceptance.

Claim bounded extension of existing isolated harness:20stores/22activePOS/20BackOffice,5min warmup,30min normal,15min peak, synchronized search/refresh burst and120min normal endurance. Fresh namespace/control,7000company products/5000linked products per store; exact synthetic cash request/payment/stock/audit reconciliation per phase, no retry after uncertain business action. Independent offered deadlines, latency/dispatch/drop metrics, explicit latency criteria and resource samples. Add isolated run workflow with generous bounded timeout, source preflight/regression before starting long execution. Defaults/existing CI smoke and application business/auth/license/fiscal/stock/pool behavior remain unchanged.

Read-only Render metric evidence09Oct11:00..11:50Z: web srv-d9isenfavr4c73bdh52g CPUlimit0.15/memory536870900bytes; PG dpg-d9isee7avr4c73bdglog-a CPUlimit0.10/memory268435460bytes/version18/basic_256mb. Only one actual production database exists; KAT online test service is not assigned as disposable capacity infrastructure. Proposed loopback GitHub runner Docker model caps app0.15CPU/512MiB and PG180.10CPU/256MiB, separate generator process with recorded host/container resource timelines. These are resource-limit equivalents only, not a replica of Render networking/storage/shared scheduling/history/jobs; a model PASS cannot certify live20store readiness. No paid hosting/service/database, credentials, production SQL/seed/transaction/restart/deploy or new manual capacity PASS.

Remaining production acceptance: representative existing history/supplier data, independent companies, background invoice/myDATA/workforce jobs, actual devices/providers/network/storage/cloud behavior, multi-instance connection budget and failover. Other owners and accepted single search/payment/waste/Gate3 results protected; no old LAB/Diadoxou replay. Source/long run NOT TESTED. Claim must merge before source or isolated writes. Single next action: implement/verify profile and capped isolated runner, then launch20store run and publish exact result/limitations. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-pos-capacity20.md; protocol docs/ops/pos-capacity20-20261009.md. No handoff; incident owner retained.

2026-10-09T05:05:13+00:00 — CUSTOMER-DEMO-01 / persisted inactive preparation verified and published / full demo OPEN

Retained owner codex/customer-demo-windows-20261009; completed bounded source codex/customer-demo-lifecycle-20261009. ClaimPR1947/docsCI37885205944/main dc558c684752056eca71cbf4c04b19509368179b preceded source. SourcePR1948 finalhead b452d71fe22d3fc2e432c086dd9480e8cd1b4c3b / fullCI37886398932 SUCCESS / job113677385430 / 1961tests,1961pass,0fail,0skip; main merge7babf374848d8fcf7e0f434ad7e9f28ae4cd69b8. Actual CI checkout3f5ec219 (full SHA in source PR workflow logs). Local Node20.20.2 12demo tests and combined23demo/efood regression tests PASS, client Work build, schema validation and syntax PASS. Initial CI37886119199 failed only the existing public-webhook source mount check after combining middleware; final source preserves the original auth/audit mount verbatim and places the preparation lock after it. No failing source was merged; the existing webhook behavior and owner scope are preserved.

Actual isolated PostgreSQL16+HTTP observation2026-10-09T05:02:15.517Z: two independent prepared demo companies/stores,6categories/16products/100initial pieces each with exact cent-to-DECIMAL readback, all inactive and SUSPENDED/no users/modules/devices/history. Anonymous401 and personally backed OWNER/EMPLOYEE sessions403; verified SA creates/list/revokes. Two simultaneous identical requests return201+200 with the same demo; replay adds no company or CUSTOMER_DEMO_PREPARED Audit, changed payload409, extra/invalid input400. General activation/license/store/RBS/impersonation requests409. Revoke repeats return identical timestamp/view with one CUSTOMER_DEMO_REVOKED Audit; unknown UUID404 and expired fixture remains non-installable. A late real SQL trigger failure500 rolls back company/store/category/product/stock/lifecycle entirely. Ordinary synthetic control company/store/product price3.25/stock123/active flags/timestamp remain exactly unchanged. No sale/payment/fiscal/StockMovement/provider call or old LAB replay was used by the new demo test. Existing full build/invariants and PostgreSQL/HTTP financial/idempotency/capacity harness plus Windows script/smoke checks pass; no physical/customer/runtime demo acceptance is implied.

Completed: persisted preparation schema and additive migration, SA-only preparation API/UI, atomic inactive synthetic business data, request identity/conflict locking, expiry view/audited idempotent revocation, reserved namespace lock on general Platform mutations including URL/body/query and encoded paths. Preparation flag defaults OFF; no startup DDL or production migration/flag/customer/seed was executed. The migration itself is supplied for the established deployment process; CI provisioning uses isolated prisma push. All responses remain installable=false. No personal demo login, outbound worker/route enforcement, active POS/Backoffice, download or Windows installer exists yet. Production deployment/main CI are separate; deployed preparation revision NOT VERIFIED, live preparation is not enabled and no LAB test is requested. CI-only observations stay outside PASS manuals.

Final handoff: owner remains ASSIGNED codex/customer-demo-windows-20261009, no receiving page named. Full CUSTOMER-DEMO-01 remains OPEN / NOT TESTED. Single next action: claim and implement complete server/worker outbound exclusion plus lifecycle/access enforcement for the reserved demo tenants before any activation or credentials; then integrate personal existing-app POS/Backoffice/visible DEMO context and validated server readiness/Windows package. Keep company/store/catalog inactive until those protections pass. Also persist/verify actual50x40mm label settings and physical output at the appropriate stage; current label dimensions are metadata only. Existing PASS/owners/real company auth/license/fiscal/financial/stock/physical KAT/RBS scopes preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md; protocol docs/ops/customer-demo-windows-20261009.md. No release of ownership.

2026-10-09T04:54:12+00:00 — CUSTOMER-DEMO-01 / persisted preparation IMPLEMENTED / AWAITING full CI

ClaimPR1947/head89e6ddd28380816cc9639700a0bc37b46555f3a2/docsCI37885205944 SUCCESS/main dc558c684752056eca71cbf4c04b19509368179b preceded source. Retained owner codex/customer-demo-windows-20261009; bounded source codex/customer-demo-lifecycle-20261009. Added persisted CustomerDemo preparation model/additive migration, SA create/list/revoke API and preparation dialog in existing Platform Admin. Default-off server gate; no startup runtime DDL or production schema/flag action. Creation is one atomic transaction: fresh inactive/suspended company, inactive store,6synthetic categories,16inactive products with exact integer-cent-to-DECIMAL conversion and inactive store-product rows with100initial units. No credentials, modules, devices, fiscal/payment/sale/history or provider/job is created. Server namespace/lifetime, SA-scoped request-key locking and conflict detection prevent duplicate/changed replay. Revocation is audited once and preserves the same timestamp on repetition. Listing reports expiry/unknown states as non-installable.

Reserved demo company/store IDs are locked out of general Platform mutations (including encoded path/body/query identifiers), covering activation/license, impersonation and provider setup; ordinary contexts retain existing behavior. This namespace lock is preparation protection, not proof of full runtime outbound enforcement. Existing core auth and SA checks remain; no paid/auth/license bypass or new production service. Full personal POS/Backoffice login, DEMO UI, all-worker/route outbound guard/readiness and Windows installer remain OPEN / NOT TESTED.

Local Node20.20.2 12/12 targeted tests PASS; Work client build and Prisma schema validation PASS; source/E2E syntax check PASS. Actual new PostgreSQL/HTTP flow NOT TESTED until observed CI. New localhost/test-DB-only E2E checks two demos, verified sessions/roles, exact catalog/opening stock, concurrent/repeated creation, general activation/provider lock, expiry/repeated revoke, atomic SQL rollback and untouched ordinary control. Existing CI flows/owners and Gate3 PASS preserved. No manual PASS or production migration/seed/provider/transaction action. Protocol docs/ops/customer-demo-windows-20261009.md; checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md. Single next action: green full CI and publish its measured scope, then claim complete outbound/runtime integration before activating any demo or producing a customer installer. Owner retained; no named receiving page.

09/10/2026 07:43 Europe/Athens — CUSTOMER-DEMO-01 / persisted preparation CLAIM / ASSIGNED

User continues at07:39. Retained owner codex/customer-demo-windows-20261009; bounded source branch codex/customer-demo-lifecycle-20261009. Reviewed latestmaina21784baacf8efc6f4d4e07bc23db103cb21c692, unchanged AGENTS/checklist, latest canonical registers and own checkpoint/protocol. Foundation PR1945/fullCI37884321450 is verified only as inactive source; full customer demo and physical Windows NOT TESTED. Other owners and Gate3 PASS remain protected.

Next bounded implementation: persisted demo preparation lifecycle and Super Admin-only create/list/revoke API/UI, atomic new inactive company/store/category/product/opening-stock records, idempotent creation scoped to verified SA actor/request key, immutable synthetic namespace, expiry and audit/revocation. Add an additive migration and default-off preparation gate; no production migration/flag/seed executed by this page. No login, owner credentials, provider/device/module configuration, active store/company, readiness or installer is offered. Prepared demos must be protected against activation through general SA company/store routes until outbound/runtime integration exists; this is part of the same bounded scope, not an auth/license bypass.

Acceptance: new isolated PostgreSQL+HTTP fixture with two independent demos and untouched ordinary control; anonymous/owner/operator denied, malformed/foreign IDs and injected configuration rejected, exact prices/stock/category readback, one repeated/concurrent create preserving identity, expired/revoked result non-installable, repeated revoke preserves Audit identity, rollback leaves no partial tenant. No old LAB transaction replay or production state/provider action. Existing POS/Backoffice/auth/license/fiscal/idempotency and physical KAT/RBS/capacity scopes unchanged. Full outbound workers/routes, personal POS/Backoffice login/visible DEMO context, Windows installer and customer acceptance remain OPEN. Claim must merge before source edits. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md. Single next action after green claim: implement and verify the persisted preparation.

2026-10-09T04:36:33+00:00 — CUSTOMER-DEMO-01 / inactive foundation published / full customer demo OPEN

Claim PR1944/head6363dfb2875e8d3bd273f1b3ef29460e11025d01 / docs CI37883796617 SUCCESS / mainf2f570d8032f6bb04fb70358dac0225c7e3d38f4 preceded source. Source PR1945/headd7c9c1733648e740a8be38e3c3b2bccac51c9ca2 / full CI37884321450 SUCCESS / build-test job113670829829 / 1957tests,1957pass,0fail,0skip. Production build, existing invariants and isolated PostgreSQL16/HTTP financial/isolation/idempotency flows plus existing Windows script/smoke job succeeded. CI checkout00d8d0d1eda6816b748e8bba1edb7e718416b3db; source merged main eba858d32617a4b4c0023b4fa7a6853072739299. Local Node20.20.2 targeted8/8 PASS. These verify the inactive module and existing regressions only; they do not establish a runnable demo or physical/customer acceptance. Main CI/guarded source deployment are tracked separately; deployed demo revision NOT VERIFIED and no LAB test is requested.

Completed bounded foundation: immutable inactive preparation plan, independent UUID company/store/product namespace, 16 wholly synthetic supermarket products, integer-cent prices, opening-stock proposal, empty users/sessions/sales/payments/shifts/movements/providers/device lists and 50x40mm DEMO label specification. Unwired lifecycle/action predicate rejects foreign identity/company/store, inactive/revoked/expired contexts, unbound operators, unsupported roles and unknown/external actions. Existing verified session and trusted server record must be supplied by future integration; no endpoint consumes it. No live company/store/credential/seed/migration, sale/payment/stock/provider/device action, production feature activation, second service or customer installer was created. Existing POS/Backoffice/auth/license/financial/fiscal gates and all other owners/accepted results remain protected. CI-only evidence stays outside PASS manuals.

Final handoff: owner remains ASSIGNED codex/customer-demo-windows-20261009; no receiving page named. Full runtime lifecycle/provisioning and all-route/worker outbound exclusion, shared authenticated existing-app DEMO POS/Backoffice, Windows installer/download, two-demo-plus-control PostgreSQL/HTTP and physical install/reopen/uninstall acceptance remain OPEN / NOT TESTED. First preparation is not installable and must not be sent to customers. Single next action: implement server-persisted SA creation/revocation and fresh synthetic provisioning for two independent demo companies plus an untouched control, preserving existing auth/license/module checks; then complete outbound enforcement before exposing routes/readiness or producing the Windows installer. Do not replay old LAB transactions. Protocol docs/ops/customer-demo-windows-20261009.md; checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md. No ownership release.

09/10/2026 — CUSTOMER-DEMO-01 / inactive foundation IMPLEMENTED / AWAITING full CI

Claim PR1944/head6363dfb2875e8d3bd273f1b3ef29460e11025d01 / docs CI37883796617 SUCCESS / mainf2f570d8032f6bb04fb70358dac0225c7e3d38f4 preceded source. Owner retained codex/customer-demo-windows-20261009. Added an unwired pure preparation/policy module: fresh per-demo company/store/product namespace, 16 synthetic supermarket products with integer-cent prices, opening-stock proposal, no credentials/history/providers, inactive company/store and installable=false, 50x40mm DEMO label specification. Future lifecycle/action predicate rejects foreign identities/store/company, inactive/expired/revoked records, unbound operator/unsupported role and unknown/external actions. It requires a server-owned record and already-verified session supplied by future integration; no route, DB write, runtime activation or installer readiness is implemented.

Local Node20.20.2 targeted 8/8 tests PASS / zero failures; no new LAB/USER/physical Windows PASS. Full exact-head CI pending. Existing POS/Backoffice/auth/license/fiscal/provider/stock/payment behavior unchanged. No production state, copied LAB history or provider calls. Protocol docs/ops/customer-demo-windows-20261009.md; checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md. Full lifecycle/provisioning, all route/workers outbound guards, existing-app shared DEMO UI/auth, authenticated Windows installer and isolated HTTP/physical acceptance remain OPEN / NOT TESTED. Single next action: green full CI/publication, then persisted SA lifecycle and two independent synthetic demo/control provisioning with existing auth/license checks. Assignment retained; no receiving page named.

09/10/2026 07:21 Europe/Athens — CUSTOMER-DEMO-01 / ASSIGNED / NOT TESTED

Owner codex/customer-demo-windows-20261009, authorized09Oct07:18. New independent Windows customer demo with existing full POS + Backoffice on one synthetic store/company per customer, online first version. No duplicate installation/fiscal/capacity/Gate ownership. First bounded scope: inactive-by-default validated demo identity/readiness/policy and synthetic manifest, with no production provisioning or provider call. Full SA lifecycle, runtime isolation/outbound enforcement, shared existing-app POS/Backoffice, installer, PostgreSQL/HTTP and physical Windows acceptance remain OPEN/NOT TESTED. Claim checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md. No customer/demo creation, database/schema/seed, financial/stock/fiscal/auth/license or live state change. Existing PASS/owners remain protected. Claim must be merged before source edits.

2026-10-09T00:13:23.236592+03:00 - POS-DB-LOCK-01 / isolated HARNESS verified and published / 110-POS production capacity OPEN

ClaimPR1939/head18b6e5f7/docsCI37839430464/maincc17788 preceded source. SourcePR1941 finalhead2ab76352bdf83961e8a35062bc1dbd606afea350/fullCI37844453605 SUCCESS1949/1949/0fail/0skip; actual CI checkout6c14f9e38aa4cf5716c86ad81317d7debb321663/job113541784160. Merged532a955f710e0d67ba443194e1e93cfc1e6ca22d. Latest wireless-entry source8caf17fc and releasee0d7f6cc/PR1942 preserved. Main full CI/deployment workflow are independently tracked; this test-tool publication does not certify a new production business behavior.

Actual final isolated PostgreSQL16+HTTP smoke21:09:24Z/30Z/43Z:20stores/22POS/20BackOffice128logical actions150HTTP;50/55/50320actions375HTTP;100/110/100640actions750HTTP. Total1088actions/1275timed HTTP requests,0unexpected action failures/drops,187new synthetic CASH sales at2.50 with exact request identity/per-terminal ledger/payment/stock/audit/control checks; one identified replay preserved the same sale and all business deltas21:09:45Z. All110fixture POS performed actions, but final smoke spreads arrivals and reached only4maximum simultaneous generator actions (prior freshCI hosts121/125); it is explicitly NOT a110-simultaneous peak, stable benchmark or production capacity PASS. Fixture7000company products/32linked products per store, one shared company with foreign control, precreated login/open-shift sessions and no job/provider load.

Final artifact11579895282/isolated-pos-capacity-harness until22Oct21:09:45Z, digestsha256:3ff1feb18ab89c49a127fc8c9f79a757b0d92f13d6a8e9d8399730142c847980, contains sanitized before/after/request IDs, per-action percentiles/dispatch lag/drops and DB-wide connection/lock samples. Initial fullCI37842556030 and reconciled37843631872 also passed1949tests and independently fresh187-sale fixtures; these repeated CI checks are not additional physical USER/LAB tests or acceptance of the missing workload. No production data/cancellation/restart/provider/device action, paid plan, new instance or pool/application/business change by this page; only test tools and CI regression. Existing guarded CI pipeline may deploy the source revision normally; no extra manual deployment is requested.

Retained incident owner codex/pos-startup-loading-20261008; completed bounded source codex/pos-capacity-harness-20261008; record docs/pos-capacity-harness-release-20261009. Single-search USER PASS/manual, lock/shutdown/deployment-policy evidence and all other owners preserved. CI/synthetic results stay in ops/checkpoints, never the PASS manual. Completed harness preparation/implementation verification removed from active pending work; incident remains ASSIGNED for representative capacity and other lifecycle residuals.

Single next action: separately claim explicit warmup/normal/peak/synchronized-search-refresh/endurance profiles and measured application resource/pool budget in the existing isolated harness, starting from the owner requirement100stores/110activePOS. Use representative catalog/history and declared BackOffice/job/provider assumptions before any production-capacity conclusion; hosted/paid infrastructure is not provisioned by this record. Separate-company/background-job/provider/device, active-business external shutdown, other DDL, CI supersession and failover/restore stay OPEN. No old LAB/Diadoxou transaction replay. No named handoff; owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-capacity-workload.md; protocol docs/ops/pos-capacity-workload-20261008.md.

08/10/2026 23:54 Europe/Athens - POS-DB-LOCK-01 / CI isolated HARNESS correctness PASS / production capacity OPEN

Source PR1941 initialhead6cf86c5a12a954cff6ad35aedb5df631483f3578/fullCI37842556030 SUCCESS1949/1949/0fail/0skip; job113535423225; actual CI checkout e7e4d506374ebb80e484439dc90a8c24aac3183c. New actual PostgreSQL16 + HTTP harness observations 20:54:08Z/14Z/27Z:20stores/22POS/20BO128actions150HTTPpeak29;50/55/50320actions375HTTPpeak60; 100/110/100640actions750HTTPpeak121;0actionerrors/drops in each smoke cohort. Total1088logical actions/1275timed HTTP requests,187new synthetic CASH sales at2.50 with exact intended IDs, per-terminal ledger/payment/stock/audit controls and one idempotent replay (20:54:28Z). Unaffected synthetic control and foreign-store/company negatives pass. These are short spread-arrival CI regressions on shared hardware with7000company products/32linked products per store, not planned peak/endurance or production110POS readiness.

Artifact11578701602/isolated-pos-capacity-harness retained until22Oct, digestsha256:aab0aaf7045c9ca9cb73698eee03872d03d09d4953e71e9898d878b3c0268e44 contains sanitized before/after, request ledger, per-action timing and DB samples. Generator maximum in-flight count is not a DB pool or physical-POS concurrency measurement. No physical latency, server resource/pool budget, jobs/provider/device/failover or capacity PASS. Newer unrelated wireless-entry main8caf17fc source/tests/owner entries are reconciled into this harness branch and require fresh exact-head full CI before merge. No application/pool/business/paid-infrastructure change.

Owner codex/pos-startup-loading-20261008 retained; source codex/pos-capacity-harness-20261008; claimPR1939/maincc17788 preceded work. All prior accepted search/deployment and other owners protected. Manual unchanged for CI-only/synthetic behavior; no old LAB/Diadoxou sale/payment/waste replay. Single next action: fresh reconciled full CI, green merge and scoped record, then complete the representative workload gaps (warmup/peak/burst/endurance/job/history/independent-company and measured application resource/connection budget) before production rollout. Existing lifecycle/failover residuals remain OPEN; no named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-capacity-workload.md; protocol docs/ops/pos-capacity-workload-20261008.md.

2026-10-08T23:49:34.140635+03:00 - POS-DB-LOCK-01 / isolated capacity HARNESS IMPLEMENTED / AWAITING full CI and PostgreSQL/HTTP

Published claim PR1939/head18b6e5f7/docsCI37839430464 SUCCESS/maincc17788ae26cb963dd88fec4d96a4f9798268b62 preceded source and isolated writes. Retained owner codex/pos-startup-loading-20261008; bounded source codex/pos-capacity-harness-20261008. Owner requirement100stores/110activePOS retained; stages22/55/110POS plus20/50/100BackOffice fixture sessions. Current production business behavior is unchanged; source only adds test harness,8regression tests and one CI flow/result artifact. Local Node20 targeted8/8 PASS, syntax/YAML checks PASS. PostgreSQL/HTTP execution and all capacity acceptance remain NOT TESTED until observed CI evidence.

The harness hard-rejects non-test/non-loopback destinations and dedicated DB names, disables redirect following, uses fresh synthetic capacity-UUID fixtures and real session/auth/module/store middleware. Local POS catalog resolver is measured separately from HTTP core refresh/access, BackOffice catalog/report and synthetic CASH checkout. Independent offered deadlines, explicit generator drops/lag, per-action percentiles/statuses, fixture ledger and database-wide connection/active/lock samples are recorded without tokens/connection strings/raw errors. Default smoke spreads one action/type/actor across cohorts;187new fixture sales are expected with exact per-terminal ledger/payment/stock/audit deltas, untouched control and one identified idempotent replay. This is a harness regression, not sustained100store capacity.

Protected USER single-search PR1918, hot-column/shutdown isolated evidence and deployment-policy LIVE PASS PR1934/1936/1937; full TODAY-04/POS-CATALOG-PERF-01/POS-AUX-HEADER-01/TABLE_SERVICE and all other owners preserved. No existing LAB/Diadoxou transaction replay, live SQL/seed/cancellation/restart, fiscal/card/OCR provider call, paid plan/new instance or pool/business/schema change. No simulated behavior enters the PASS manual.

Remaining NOT TESTED: actual planned peak/warmup/two-hour endurance, representative hardware/server resource/pool budget, independent-company/history/job/provider/device workload and lifecycle/failover/restore. Measurement mode offers normal core rates only; all omissions are in the protocol/results. Single next action: green exact-head full CI including isolated187-sale/core HTTP harness, then publish its scoped evidence and next representative-workload gap before any capacity conclusion. Existing owner stays assigned; no named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-capacity-workload.md; protocol docs/ops/pos-capacity-workload-20261008.md.

2026-10-08T20:59:52.046Z — POS-AUX-HEADER-01 / wireless POS entry LIVE / AWAITING USER wireless entry retest

ASSIGNED — owner retained: codex/pos-aux-header-20261008; source branch codex/pos-wireless-entry-20261008. Correction PR #1940 final head ebd54a0668679462a6d507538f211379c00715b7; exact-head full CI 37842474226 SUCCESS; merge 8caf17fc8ebdbdcb21c51774d43abf20f7fec685; exact main CI 37842810694 SUCCESS. Guarded deploy 37843105222 SUCCESS; Render dep-db406s6i0phs73egq0kg LIVE 2026-10-08T20:59:08.937381Z. Independent fresh public health 2026-10-08T20:59:34.980Z: HTTP 200, ok=true, exact revision 8caf17fc8ebdbdcb21c51774d43abf20f7fec685. Claim PR #1938 was merged before source edits.

Cashier lower green header button «Ασύρματη παραγγελιοληψία» now opens the existing desktop TABLES modal «Σάλες, τραπέζια και παραγγελίες» through setActiveModal("TABLES"), gated by existing tableServiceAvailable for the selected store. The first-row duplicate and obsolete mobile callback prop are removed. Separate mobile waiter login, table ordering implementation, paid-module/store checks and order/payment APIs are preserved.

Validation: 15 existing module/wireless tests PASS and 12 actual-component cases PASS at 1920×1080, 1366×768 and 1280×600 with normal/large text and active/inactive availability. Actual click opens/closes the correct desktop modal without order submission. Frontend production build and updated TABLE_SERVICE bundle guard PASS. Two initial CI attempts stopped at guards expecting the old label: 37841377256 (two source assertions) and 37842062734 (production bundle guard). Those existing checks now follow the requested label while retaining module/tenant/order protections; final exact-head CI is green.

Status: exact healthy release confirmed; AWAITING USER retest. User accepted only placement earlier, then reported the mobile target wrong at 23:35 Athens. No new physical USER PASS has occurred; retain partial placement PASS and wrong-target FAIL until one entry-opening retest. No production financial/order/stock/module changes were used for validation. Inherited small-height/large-text category limits, TABLE_SERVICE business owner, No16, palette, Gates and capacity work remain separately owned. Next action: user refreshes and opens the wireless button once without submitting an order. Instruction sent after exact public health verification. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-aux-header.md.

2026-10-08T20:40:50.854Z — POS-AUX-HEADER-01 / wireless POS entry IMPLEMENTED / AWAITING CI and USER

Correction claim PR #1938, final head f2bbc60f65f9dc6d92059d5b65d8cc028bf45b5e; docs CI 37840963727 SUCCESS; merge ede903eb7eca68fddb0c5c994ca51891a628a2ef preceded source edits. Same owner codex/pos-aux-header-20261008, source codex/pos-wireless-entry-20261008. Replace the cashier header mobile launcher with the existing tableServiceAvailable desktop TABLES control in the same lower green row, label «Ασύρματη παραγγελιοληψία», handler setActiveModal("TABLES"). Remove its old first-row duplicate and obsolete onMobileWaiter prop passing. StoreMobileWaiter and separate waiter login, StoreTableOrdersModal implementation, existing selected-store/module availability and order/payment APIs untouched.

Actual StoreOperatorApp/StorePosPanel/full CSS fixture: 12 cases PASS at1920x1080/1366x768/1280x600, FONT12/FONT20, active/inactive availability. Correct label in green row; actual click opens existing «Σάλες, τραπέζια και παραγγελίες» modal and closes without submission; no mobile view or duplicate ΤΡΑΠΕΖΙΑ entry; inactive entry absent. Other auxiliary open/close and operator-menu checks retained. Calls synthetic: only the existing initial audience-selection POST goes to in-memory fixture, not production. Local Node20 frontend build PASS, TABLE_SERVICE bundle guard PASS. No new physical USER/PASS or production order/financial/stock/module write.

Required next action: exact-head full CI → merge/main CI → exact healthy release → user checks one wireless button opening. Prior placement acceptance stays bounded; wrong-mobile-target USER FAIL23:35 remains the latest physical evidence until retest. Inherited small-height/large-font category limit stays separate. Manual keeps current partial PASS/USER FAIL until real correction acceptance; no TABLE_SERVICE/No16/Gates/Palette/capacity ownership takeover. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-aux-header.md; owner retained.

Initial full CI 37841377256 failed 2/1941 assertions expecting the old ΤΡΑΠΕΖΙΑ label, not a runtime/API failure. Retain the existing table-service-top-button hook and update those two existing source-guard tests to the requested label; check the same TABLES handler and retain every tenant/module/checkout assertion. Targeted15/15 tests PASS, zero failures/skips. Final actual-component12-case fixture rerun PASS after preserving the class hook. Final full CI still required.

2026-10-08 23:35 Europe/Athens — POS-AUX-HEADER-01 / PARTIAL placement USER PASS / wireless entry USER FAIL / ASSIGNED correction

Owner previously «EINAI OK» accepted auxiliary placement only. New explicit23:35:27 instruction and image(20261008-203443).png show «Παραγγελιοληψία κινητού» inside green header; image(20261008-203538).png shows narrow StoreMobileWaiter. Owner rejects that target: this POS entry must open wireless ordering, not the mobile waiter view. This newer USER FAIL supersedes closing the whole task; no general wireless/module PASS. Existing accepted green row and other auxiliary controls stay protected. New screenshot physical client SHA/operator/shift unknown; no financial/order/stock mutation performed.

Same independent owner codex/pos-aux-header-20261008; bounded follow-up source codex/pos-wireless-entry-20261008. Claim only POS entry routing/placement: remove the mobile-waiter launcher from the cashier header and move the existing module-available TABLES control into that green row, labelled «Ασύρματη παραγγελιοληψία», using the existing setActiveModal("TABLES") → StoreTableOrdersModal. Preserve its existing selected-store/module availability, order APIs, permissions and payment behavior. Mobile waiter component and its separate waiter login remain unchanged. No takeover of TABLE_SERVICE business scope owned by agent/table-service-layout-takeover-20260927 or No16. Claim must merge with green docs CI before source edits.

Source release PR #1935 / e8e8ae32, full CI37836694909/main CI37837042018/guard37837292443 SUCCESS and exact LIVE dep-db3vh8ij9qps73fjtvp0/health20:14:36Z remain release evidence for placement, not acceptance of the mobile target. Previous local12-case checks certified that wrong mobile handler as implemented, not the desired wireless path. Next: publish correction claim, move only existing desktop control, verify actual click opens «Σάλες, τραπέζια και παραγγελίες» with no duplicate/mobile header button and inactive-module absence; build/full CI/exact release before one user visual retest. No new order round/payment/sale/message/stock/shift/module mutation. Existing1280x600 large-font category limit remains separate. Manual updated to distinguish placement PASS from wireless-target FAIL. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-aux-header.md; owner retained until actual acceptance or named handoff.

2026-10-08T20:15:44.105Z — POS-AUX-HEADER-01 / LIVE / AWAITING USER VISUAL RETEST

Claim PR #1932, head 00ed9d704e59b82c6c428611b15b2f937c2626c0; docs CI 37834009326 SUCCESS; merge a089e8978f5cb53e25f1c9f7342db0e7619cdf79 preceded edits. Source PR #1935, final head f02734eccb527cb897d2190112c685f76cd4c613; full CI 37836694909 SUCCESS, 1941/1941, zero failures/skips; merge e8e8ae32c0ef36fefba31607af6698fb94dd5de4. Main full CI 37837042018 SUCCESS; guarded Render 37837292443 SUCCESS. Exact source deploy dep-db3vh8ij9qps73fjtvp0, deploy_hook, LIVE at 2026-10-08T20:13:27.275983Z. Independent public health at 2026-10-08T20:14:36.403Z: HTTP 200, ok=true, revision e8e8ae32c0ef36fefba31607af6698fb94dd5de4. Other page deployment policy/manual and all newest records retained. Physical client revision and user visual acceptance remain NOT TESTED.

Chat, Barcode, work-card, Online Radio and the already module-gated mobile waiter entry are inside the normal-flow green header second row. Existing operator addBarcode and Radio moduleActive/enabled availability retained. Auxiliary modals portal to body; radio audio persists across dialog close. Selected-store changes reset auxiliary dialogs/mobile availability and reject stale radio responses. Actual-component/full-CSS local fixture12/12 bounded cases and19 existing targeted tests PASS; local frontend build and TABLE_SERVICE bundle guard PASS. These simulated results do not certify physical LAB, business actions or all POS rows at every text size. Inherited1280x600/audience ON/FONT20 category clipping remains separately unverified/uncorrected within broader viewport ownership; requested1920-wide header behavior needs the user visual check.

Single next action: refresh existing LAB POS, confirm all auxiliary launchers lie inside the lower green row and the operator popover/primary controls stay unobscured; mobile waiter appears only with existing

TABLE_SERVICE availability. No new sale, payment, stock, shift, message, attendance submission, module write or order round required. Manual unchanged until real bounded USER PASS. Independent owner codex/pos-aux-header-20261008; source codex/pos-aux-header-fix-20261008; release docs/pos-aux-header-release-20261008. TABLE_SERVICE/No16/Gates/Palette and other owners preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-aux-header.md; owner retained until PASS or named handoff.

08/10/2026 23:17:30 Europe/Athens - POS-DB-LOCK-01 / ASSIGNED / 100 stores and 110 active POS / capacity NOT TESTED

Owner explicitly replaces the initial one-POS-per-store estimate with 110 POS across 100 stores. Retained owner codex/pos-startup-loading-20261008; preparation docs/pos-capacity-workload-20261008; bounded next harness branch codex/pos-capacity-harness-20261008. Baseline main2bf0c51a/PR1937. Stages defined:20stores/22POS ->50/55 ->100/110, including10two-terminal stores in the final synthetic distribution. One active operator/POS and one BackOffice session/store (100 at final stage) are declared test assumptions, not owner-confirmed staffing or live measurements.

Protocol docs/ops/pos-capacity-workload-20261008.md defines normal/peak search, refresh, session, synthetic-sale/report/job rates, 7000/20000-product fixture assumptions,5min warmup/30min stages/15min peak/2h endurance, per-route p95/p99/error/dispatch/correctness/resource targets, measured total web/job/deployment-overlap database budget and isolated before/after controls. Prepared plan only: no harness source or load execution yet; capacity and physical readiness remain NOT TESTED. HTTP/CI/shared-host figures cannot establish physical click-to-ready or planned production capacity. No paid infrastructure or extra process enabled.

Protected single-search USER PASS/PR1918, hot-column/shutdown isolated evidence and actual deployment-policy LIVE PASS/PR1934/1936/1937; all other owners and financial/fiscal/auth/license/stock gates unchanged. No old LAB/Diadoxou transaction replay, production seed/cancellation/restart, provider call or manual capacity claim. Other DDL, external active-business shutdown/detached/startup, CI supersession and failover/restore remain OPEN.

Single next action after green publication on main: implement and verify the bounded localhost-only workload harness, environment manifest and correctness ledger on isolated PostgreSQL/HTTP with22/55/110activePOS. Then record scoped results before any representative-infrastructure capacity conclusion. Incident owner retained; no named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-capacity-workload.md.

2026-10-08T20:08:02.738668+00:00 — POS-DB-LOCK-01 / bounded deployment policy LIVE PASS / capacity OPEN

ClaimPR1933 finalhead68fffa34d204b62c538badb2377585b5cd157b8d/docsCI37834874428 SUCCESS/merge4ddce3e7 preceded edits. Main fullCI37836015016 SUCCESS1941/1941; existing isolated financial/isolation, frozen owner-catalog,56-definition hot-column and coordinated-shutdown PostgreSQL+HTTP flows and Windows CAPDriver pass. Targeted Node20 local20/20 and YAML queue checks PASS. No new physical USER/LAB or100-store capacity PASS.

Actual policy acceptance: pinned hook20:02:05Z created exactly one observed source deploy dep-db3vdfbl550s73c2r32g/deploy_hook for184f75fa, LIVE20:05:04.797670Z (23:05Athens); no new_commit deploy for this source in the20-entry history readback20:05:58Z. Actual service autoDeploy=no/autoDeployTrigger=off observed20:02:23Z and again20:05:58Z. Guarded Render37836277685 SUCCESS; previous healthy rollback artifact11575328516 retained30days. Independent health20:05:33.322845Z HTTP200/ok=true/exact184f75fa,5.258s Work roundtrip (not physical POS timing). Database read-only snapshot20:05:29.614244Z recovery=false/0Lock/0active>15s/0oldClientWrite; current diagnostic only, not sustained capacity.

Controlled docs-only acceptancePR1936/head4549c28191876bf02b301944b168b8b961ef6ad2/docsCI37836258880 SUCCESS/mergefa66a16bcf031266e0edf437172ddea1b0157466 was published after actual Off while source health verification remained in progress. Probe mainCI37836519301 SUCCESS/classifier+Windows PASS/full build SKIPPED; probe guarded Render37836573196 SUCCESS/classifier PASS/deploy SKIPPED. Source guard continued and completed successfully instead of being cancelled. Render history after source LIVE contains zero deploys for probefa66a16b. This closes only the demonstrated automatic+hook duplication and docs-triggered restart policy; NOT an unconditional exactly-once promise against external/manual deployments.

Published workflow verifies successful full CI for the exact main SHA, serializes only deploy jobs without cancellation/queue:max, pins ref=SHA in one non-retried POST, skips already healthy/stale revisions using real Git ancestry, and retains existing rollback and exact-health guards. Stale/rerun/network-error handling has isolated regression evidence, not a live failure injection. Historical task19 Off/FINAL PASS30Sep remains dated evidence; today's observed re-enabled policy is reconciled by this actual bounded restoration. No paid plan/instance, application/route/auth/license/schema/start-command/seed/financial/stock/fiscal change; existing automatic startup bootstrap/seeds remain unchanged and no additional production script/cancellation/restart was executed by this page.

Retained incident owner codex/pos-startup-loading-20261008; source codex/pos-single-deploy-20261008; release docs/pos-single-deploy-release-20261008. Single-search USER PASS21:00:41/PR1918 and manual, lock preventionPR1922, shutdownPR1929, Analytics USER PASS/PR1931, POS-AUX-HEADER-01 and all other owners protected. Completed deployment implementation/retest entries removed from pending; broader incident still ASSIGNED. Other runtime DDL, active-business shutdown/external deadlines/detached work, main CI supersession after a later docs push, multi-instance job/connection budget and measured20→50→100-store/failover/restore remain OPEN. External deploys or re-enabling Auto-Deploy can bypass the gate. No accepted search/payment/waste replay.

Single next action: claim and define a representative20→50→100-store isolated workload and acceptance thresholds, starting with per-store POS/operator counts and a measured connection/job budget before any extra instance or paid rollout. No named handoff; existing owner retained. Verified operating instructions docs/manual/deployment/PASS.md. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-single-deployment.md.

POS-DB-LOCK-01 — single validated deployment IMPLEMENTED / AWAITING full CI and actual policy verification

ClaimPR1933/head68fffa34d204b62c538badb2377585b5cd157b8d/docsCI37834874428 SUCCESS/merge4ddce3e7e5a5d121739d6958db65fcea7e057515 published before source. Retained owner codex/pos-startup-loading-20261008; source codex/pos-single-deploy-20261008. Local Node20 targeted20/20 PASS with no failures/skips; YAML serialized job queue validation PASS. Existing health/rollback/build-efficiency/recovery tests retained. Full CI and actual Render off/docs-only proof pending; no new USER/LAB/capacity PASS.

One deployment-policy change: existing successful main CI event, verified exact full build-and-test via read-only GitHub API; manual dispatch also requires full CI for its exact revision. Deploy job alone uses non-cancelling queue:max; documentation jobs cannot interrupt its verification. Real Git ancestry refuses divergent history/rollback, skips already healthy/newer healthy revisions and waits for a newer production-source main revision; docs-only advancement can keep the existing validated source eligible. Hook pins ref to the full expected SHA, makes one POST with no automatic retry, and reports ambiguous failure without printing the secret URL/body. Existing pre-deploy healthy rollback artifact/30-day retention and exact-revision health wait unchanged. Initial source merge uses [skip render] to prevent the old auto-deploy path racing the first pinned hook; after that actual Render off must be independently confirmed. Workflow/source change, not a new production database action.

Reconciliation: historical task19 FINAL PASS30Sep/readback Off remains dated evidence; today's actual autoDeploy=yes and observed new_commit/deploy_hook duplicates supersede only its continuing auto-deploy policy assertion. The cause of re-enabling is unknown; do not reopen/replay prior LAB or backup fixtures. This bounded incident correction restores the intended policy rather than claims all task19 behavior failed. Other owners including POS-AUX-HEADER-01 preserved. No application/route/auth/license/schema/start-command/seed/financial/stock/fiscal/paid-instance change.

Limits: externally initiated/manual deployments or later re-enabling auto-deploy can bypass this workflow. Main CI cancellation after a later docs push, ambiguous provider acceptance, job deadlines and broader capacity remain separately OPEN; no exactly-once guarantee across arbitrary external systems. Single next action: exact-head full CI/merge, observe the pinned deployment, actual service autoDeploy=no/off, exact healthy revision, then use the required docs-only release record as a non-deployment proof. No accepted search/payment/waste replay. Measured20→50→100-store/failover/restore acceptance remains OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-single-deployment.md.

2026-10-08T19:44:17.466089+00:00 — POS-DB-LOCK-01 / ASSIGNED / single validated deployment path

Retained owner codex/pos-startup-loading-20261008; bounded source codex/pos-single-deploy-20261008. Owner «synexise» authorizes the next recorded lifecycle task. Baseline main a65bb0881d2aba0c37c088340393b5c16f26ae90; read-only health HTTP200/ok=true/exact a65bb088. Actual Render service srv-d9isenfavr4c73bdh52g has autoDeploy=yes despite render.yaml off. Shutdown source2281986 has two observed deploys: dep-db3uq6ojo6nc73bhp5g0/new_commit and dep-db3urag89gic73agm7s0/deploy_hook; latest docs-only a65bb088 also deployed/new_commit. This is duplicate deployment evidence, not a new physical LAB failure or capacity measurement.

Claim only deployment gating: pin the existing hook to the exact successful main CI revision, issue one non-retried POST, serialize triggered deployments without cancelling an in-progress verification, prevent stale/rerun deployments, preserve pre-deploy healthy rollback artifact and exact-revision health verification. Render official deploys/deploy-hooks documentation states a hook with ref=commitSHA disables automatic deploys; verify actual service becomes off after the first pinned hook. First transition may still have an already-triggered automatic deploy; no claim of retroactive suppression. No new credentials, paid plan/instance, production SQL/cancellation, start command, seed, schema, application/business/auth/stock/fiscal change.

Protected: single-search USER PASS21:00:41/manual/PR1918, isolated catalog/hot-column/shutdown CI evidence, financial/stock/PIN/session and other page owners. Analytics bounded USER PASS22:30/PR1931 preserved. Deployment-policy acceptance NOT TESTED until exact CI/release, actual Render off and a later docs-only merge without new_commit deploy; manual remains unchanged for CI-only behavior. Measured20→50→100-store/failover/restore, other DDL and active-business shutdown remain OPEN.

Single next action: publish this claim with green CI/main before editing workflow or deployment configuration, then implement isolated hook/stale-run regressions and verify the actual release. No named handoff; incident owner retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-single-deployment.md.

2026-10-08T19:56:26.430100+00:00 — POS-AUX-HEADER-01 / IMPLEMENTED / AWAITING CI and USER

ClaimPR1932/head00ed9d704e59b82c6c428611b15b2f937c2626c0/docsCI37834009326 SUCCESS mergeda089e8978f5cb53e25f1c9f7342db0e7619cdf79 before source edits. Owner codex/pos-aux-header-20261008/source codex/pos-aux-header-fix-20261008. Existing Chat/Barcode/work-card/radio launchers now use an in-flow second row within the green header, not a fixed body root. Existing server-gated mobile waiter entry is passed into the same row. Barcode honors existing runtime addBarcode for operator; radio launcher respects existing moduleActive/enabled response. Modal portals preserve full-screen overlays; background audio stays mounted when radio dialog closes. Store changes close auxiliary dialogs/reset mobile availability and reject delayed prior-store radio responses. No server/API/entitlement/payment/order/stock changes.

Actual StoreOperatorApp/StorePosPanel/imported component CSS + isolated in-memory fetch fixtures: before/after1920x1080,1366x768,1280x600, active/inactive module, FONT12 andFONT20. Twelve after cases PASS only for bounded auxiliary-row containment, unobscured primary launchers, visible payment bar, operator popover hit testing, modal open/close, radio audio retention, mobile entry/back and availability. Before fixed controls overlap runtime/header and external mobile button pushes payment bar below viewport(1100/790/622px). After no legacy body launcher, row inside header and payments inside viewport. Separate JSDOM delayed A radio response after B switch PASS, inactive button/audio absent. All calls synthetic; one existing initial audience-selection POST goes only to fixture, no production action or LAB PASS.

Frontend Node20 build PASS including TABLE_SERVICE bundle guard;19 targeted existing Chat/Barcode/Radio/TableService/no-print tests PASS. New header needs natural wrapped height; cart minimum changed from390/200 to0 while retaining existing search/table/category row sizes so remaining cart space can shrink instead of pushing categories over payments. Broader inherited short-height capacity remains NOT PASS: audience ON +FONT20 at1280x600 already clips category content before(886px versuspayment549px); after705px versus498px. This task does not certify all lower POS rows at that combination or replace existing POS viewport/text-size ownership. Requested physical screenshots are1920wide; user visual acceptance and physical client revision still unknown.

Required next action: exact-head full CI → merge → verify exact healthy deployed revision, then refresh existing LAB POS and inspect only green second row/mobile module availability/operator menu. No new sale, order round, message, attendance submission, stock, module or shift write. Manual unchanged until bounded real USER PASS. TABLE_SERVICE/No16/Gates/Palette and other owners protected. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-aux-header.md. Owner retained until PASS or named handoff.

2026-10-08T19:41:52.787852+00:00 — POS-AUX-HEADER-01 / ASSIGNED / USER overlap FAIL

Independent owner codex/pos-aux-header-20261008, source branch codex/pos-aux-header-fix-20261008. User screenshots image(20261008-193041).png,193102,193146,193432 show LAB / LAB POS 2 auxiliary Chat/Barcode/work-card/radio launchers fixed above main controls and operator popover, and mobile waiter button outside green header. Explicit user instruction08Oct22:36 Athens: all inside green header, a second lower row; mobile waiter only with existing module availability. Physical client SHA unknown. Existing observed layout FAIL; implementation NOT TESTED.

Bounded change: move existing auxiliary launchers into normal-flow green POS header second row and move the already server-gated mobile waiter entry there, keeping established click behavior, background radio across modal close and existing authorization. No new module keys/entitlements or server/auth change. Chat is existing basic functionality, not invented paid gating; radio launcher uses its existing moduleActive/enabled response. Barcode uses existing runtime addBarcode where applicable. No TABLE_SERVICE business takeover: its mobile ordering/round/modifier APIs and owner agent/table-service-layout-takeover-20260927 remain untouched. No Chat push/task/Android takeover; No16 owner preserved.

Preserve prior Gate3/4/6/7/8, offline queue/idempotency, fiscal pending and payment controls, shift/menu behavior, touch text sizing and all other owners. Read-only actual-component/full-CSS fixture required before/after:1920x1080,1366x768,1280x600 with active/inactive module and delayed store-switch results; second row inside header, primary controls/popover/payment unobscured, existing launchers open/close without mutation. Frontend build/full CI/exact healthy release then bounded user visual test. No production sale, stock, shift, module, message or financial mutation needed. Claim must reach main before source editing. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-aux-header.md. Owner retained until PASS or named handoff.

2026-10-08T19:35:00.691385+00:00 — OWNER-ANALYTICS-SCROLL-01 / CLOSED / USER VISUAL PASS

User confirmation 08/10/2026 22:30:20 Europe/Athens: «einai ok», directly after the requested refresh/open Analytics/maximize/bottom-scroll retest. This closes only the bounded maximized Analytics layout and vertical-scroll correction. Prior selected-store context: Περίπτερο Διαδόχου Παύλου. No new screenshot, physical client revision or role was supplied; no claim of user acceptance for every viewport, touch, drawer, report calculations or permissions.

Verified source evidence remains PR1927/head88ba86afa543e5aae14c5448b121aa2e64faacfd/fullCI37829183225 SUCCESS/merge45366912c946dc951419d5aa7c604475e1008611; main37829516669 and guarded Render37829815837 SUCCESS; deploydep-db3ujlo473hc73fstq4g LIVE19:10:10Z and independent health19:10:44Z HTTP200/exact45366912. Release documentation PR1928/headc4a39731f81b36c31d721a3ceb514cf88ba96121/docsCI37830226286 SUCCESS/merge2591f2b2730e366af52ea3d3a687b70f7a69dc71. Service/source verification is separate from unknown physical client revision. Four CSS lines retain Analytics natural height; normal/maximized six-case fixture, meaningful real-wheel bottom reachability, frontend build and existing scroll regressions previously PASS.

Owner codex/owner-analytics-scroll-20261008 closes this task; reports manual updated, own pending entry removed, numbered checklist row50 and both PDFs refreshed. No new runtime source, deployment request, financial, fiscal, stock, import, module or permission action. Gate7 reports PASS and other owners remain protected. Full TODAY-08 hierarchy/permission acceptance remains OPEN with prior owner; OWNER-COMMERCE-PALETTE-01 remains independently AWAITING USER. No next task claimed. Next action: user selects the next BackOffice correction, one at a time; do not repeat this passed scroll test. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-analytics-scroll.md.

POS-DB-LOCK-01 — LIVE / coordinated shutdown CI PASS / capacity OPEN

Bounded sourcePR1929/head23fa902941786e53403413bd8727fbacf680eb1c/fullCI37830868444 SUCCESS1934/1934/0fail/0skip merged2281986d7b5fd8bc11ab179503568cf5a20ded02. ClaimPR1926/head9a792146e19b9451174d20f23a0a6d9fddf877fc/docsCI37828801423/merged2d3fbd was published before source. Local Node20 production build SUCCESS and1923tests PASS/0fail/4local skips; targeted57tests and refined registry4tests pass. Previous single-search USER PASS21:00:41/PR1918, hot-column guardPR1922/recordPR1924, Analytics and all other owners protected; no repetition for evidence and no new manual/100-store capacity PASS.

Actual isolated PostgreSQL+HTTP log19:19:57.3111089Z verifies SIGTERM+SIGINT with a held read and one uncommitted fixture-table write: new traffic receives503, existing read completes, write commits once, signed loopback worker HTTP completes, Prisma disconnect runs once and child backendPIDs disappear after natural exit. Diagnostic warning does not force-close work. Existing frozen owner-catalog output/search/supplier-priority and concurrent HTTP regression PASS19:19:55Z;56-statement hot-column equivalence/old-vs-guarded lock regression PASS19:19:56Z; full financial/isolation and Windows CAPDriver flows pass. All fixtures use localhost/test database only; no production sale/payment/waste/stock/fiscal action or cancellation.

First runtime termination signal now stops scheduled admission/timers, waits tracked invoice/myDATA/workforce work and invoice heartbeat queries, then closes HTTP, drains late registered work and disconnects Prisma once. Already-running invoice jobs retain only signed loopback admission for their active job/action/method; unchanged authentication still checks body hash, job/company/store, modules and durable lease. This avoids shutting the listener before a current invoice task's required internal HTTP calls. All104invoice/26myDATA/1workforce SQL/template literals verified unchanged. No global query timeout, application force-exit, transaction cancellation, auth/financial/fiscal/stock/schema/start-command/seed or paid-plan configuration change. Existing automatic deployment bootstrap/seed hooks still run; no additional production script was executed by this page.

Production release: automatic dep-db3uq6ojo6nc73bhp5g0 LIVE2026-10-08T19:24:37.321246Z (22:24Athens), exact2281986d7b5fd8bc11ab179503568cf5a20ded02. Main fullCI37831275121 SUCCESS and guarded Render37831537690 SUCCESS. Read-only /api/health 2026-10-08T19:25:24Z returned200/ok=true/exact2281986, Work roundtrip5.063s; this is not a physical POS timing. Database SELECT19:25:20.658142Z: recovery=false,0Lock waiters,0active queries older15s,0oldClientWrite. Current snapshots do not prove sustained capacity or production active-job shutdown. Existing guarded hook also created sameSHA dep-db3urag89gic73agm7s0 (build_in_progress at observation); no extra manual deployment, cancellation/restart or production seed/script executed by this page.

Retained owner codex/pos-startup-loading-20261008; source codex/pos-graceful-shutdown-20261008; record docs/pos-graceful-shutdown-release-20261008. Bounded coordinator is implemented and tested in isolation; actual production shutdown with active business tasks, work exceeding the platform's configured termination delay, detached side effects and startup-before-listen cleanup remain NOT TESTED/OPEN. This is not proof that every historical abandoned reader was caused by missing shutdown or that all recurring locks/capacity failures are solved. Other runtime DDL, duplicate automatic+guarded deployments, multi-instance connection/job budget and measured20→50→100store/failover/restore readiness remain OPEN. No second instance or paid upgrade enabled.

Single next action after healthy release record: separately claim duplicate-deployment gating so one validated main revision causes one production deployment, preserving existing CI/rollback safeguards; then define representative concurrency and acceptance thresholds before capacity rollout. Prior accepted owner search and protected financial/stock/PIN/session/no-print evidence stay unchanged. No named handoff; incident owner remains assigned. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-graceful-shutdown.md.

POS-DB-LOCK-01 — coordinated shutdown IMPLEMENTED / AWAITING full CI and release

ClaimPR1926/head9a792146e19b9451174d20f23a0a6d9fddf877fc/docsCI37828801423 SUCCESS/merged2d3fbd30b2ec5816450684732226 09f44cffbfe published before code. Owner codex/pos-startup-loading-20261008 retained; source codex/pos-graceful-shutdown-20261008. Preserve previous bounded catalog USER PASS/PR1918 and hot-column guardPR1922/recordPR1924, Analytics and all other owners. Coordinated shutdown and100-store readiness are not physical USER/LAB PASS.

Implemented one lifecycle coordinator: first SIGTERM/SIGINT marks draining, stops scheduled invoice/myDATA/workforce admission/timers, waits tracked active work including invoice heartbeat queries, closes HTTP after existing worker work, drains late work again, and disconnects the shared Prisma client once. Repeated signals join the same promise. New external traffic receives503/Connection:close before JSON/auth/business handlers; normal operation is unchanged. A25s warning logs active drain; no application force-exit, closeAllConnections, global timeout or administrator cancellation. Platform may still kill work beyond its configured external deadline; no zero-interruption guarantee.

Important preservation found during implementation: invoice background tasks call loopback HTTP on this same server. Keep its listener available while those active tasks drain. Only loopback callers on the three existing invoice action/method paths, signed with existing issuer/audience and matching an actually active local job, pass the shutdown admission filter. Unchanged auth middleware still validates body hash/job/company/store/module/license/durable lease. This filter grants no authorization or role and does not bypass auth. Close HTTP after worker completion, not before its required internal calls. All104invoice/26myDATA/1workforce template/SQL literals compare unchanged to source base. Lease/recovery/heartbeat/idempotency and per-store advisory/row-lock/Audit semantics unchanged. No route/auth/fiscal/stock/schema/start-command/seed/paid-plan change. Unrelated build-generated kiosk-reports-audit delta restored and excluded.

Local Node20 production build SUCCESS; full server1923PASS/0FAIL/4SKIP (1927total); targeted57/57 pass; final refined independent-task registry tests4/4 pass. New meaningful real-HTTP tests cover active response, new503admission, idle keepalive closure, late independent tasks, repeated signals/disconnect-once, diagnostic warning without forced shutdown and signed loopback admission/forgery/remote/inactive-job rejection. Existing myDATA scheduler fixture injects the real drain registry and now verifies stop/drain while a target query is pending; existing entitlement/advisory-lock/coalescing assertions preserved. Added isolated localhost-only PostgreSQL child process regression to full CI: held read and one uncommitted test-table write survive SIGTERM+SIGINT, newtraffic denied, active internal worker HTTP allowed, commit once, disconnect once and no surviving child backendPIDs. Actual PostgreSQL fixture awaits CI; no local PostgreSQL installed and production is never its fixture.

Next single action: exact-head full CI including isolated database shutdown regression, merge and verify healthy source. No manual update from CI-only behavior and no repeat of accepted owner search. Detached side effects/startup-before-listen/shutdown beyond external deadline, other runtime DDL, deployment duplication and measured20→50→100store/failover/restore readiness remain OPEN under retained owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-graceful-shutdown.md.

2026-10-08T19:11:33.179667+00:00 — OWNER-ANALYTICS-SCROLL-01 / LIVE / AWAITING USER VISUAL RETEST

ClaimPR1925/docsCI37828248338 SUCCESS/main3f972de preceded source. SourcePR1927 finalhead88ba86afa543e5aae14c5448b121aa2e64faacfd/fullCI37829183225 SUCCESS merged45366912c946dc951419d5aa7c604475e1008611. Main fullCI37829516669 SUCCESS; guarded Render37829815837 SUCCESS. Existing automatic/guarded deployment hooks unchanged; no additional manual deployment, cancellation or restart.

Production change only four added CSS lines: desktop maximized direct Analytics child keeps natural content height with flex:0 0 auto instead of shrinking to718px and clipping intrinsic2029–2075px content. Existing hub scrollbar reaches final product/operator panels. Actual-component/full-built-CSS fixture with windowbar, two mode-switches and Analytics/SalesAnalysis installers passes normal/maximized6cases(1916x964,1366x768,1280x600), real wheel and unobscured final rows; drawer footer, daily tab and suite criteria/table remain reachable. Node20 frontend build and existing bulk/Excel/Inventory/Master scroll regression PASS. Zero production transaction, payment, stock, import, module or permission changes; fixtures do not establish physical USER/touch/role acceptance.

Retained owner codex/owner-analytics-scroll-20261008/source codex/owner-analytics-scroll-fix-20261008. Next action: refresh existing commerce screen, open Analytics and maximize; check scroll reaches the bottom category/product/operator panels. No sale or stock action needed. Physical client revision and USER visual acceptance still pending; reports Gate7 PASS, full TODAY-08 hierarchy/permission prior owner and other scope owners preserved. Palette OWNER-COMMERCE-PALETTE-01 remains separately AWAITING USER. Manual unchanged until real bounded USER PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-analytics-scroll.md.

2026-10-08T19:02:07.706687+00:00 — OWNER-ANALYTICS-SCROLL-01 / IMPLEMENTED / AWAITING CI and release

ClaimPR1925/head1d18c3f84c85f51d26f1778ba9815492cb6df786/docsCI37828248338 SUCCESS/main3f972de2ab537cce4ad2162840a0e10fb8e1e26d preceded source. Owner codex/owner-analytics-scroll-20261008; source branch codex/owner-analytics-scroll-fix-20261008. Four added CSS lines only in advanced-sales-analytics.css set the maximized hub's direct Analytics child flex:0 0 auto on existing desktop breakpoint(min1201). No JSX, installer, handler, API, report calculation, permission, store isolation or financial/stock/fiscal change.

Demonstrated cause with actual CommerceHub/AdvancedSalesAnalytics, windowbar and both mode-switch rows, full built CSS and actual Analytics/SalesAnalysis installers: maximized flex layout shrinks the hidden-overflow Analytics child to718px while intrinsic content needs2029/2056/2075px. Real wheel reaches hub end but cannot reveal clipped lower content; no production requests. After correction, child retains full content height, hidden inner scrollTop0; hub wheel exposes final product and employee panels. Local normal/maximized6cases at1916x964,1366x768,1280x600 PASS; drawer footer, daily Analytics tab and suite criteria/table reachability pass. Synthetic25products/16operators, single fixture shift only; no network requests/mutations. Node20 frontend build PASS; existing bulk/Excel/Inventory normal/max scroll and Master geometry regression PASS. Physical touch/role/revision acceptance NOT TESTED; prior Gate7 reports PASS and TODAY-08 owners preserved. Palette acceptance remains independently awaiting user.

Next action: green full CI/main/exact healthy release, then user refreshes Analytics and checks maximized bottom panels. No new transaction, payment, import, stock or module action. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-analytics-scroll.md; retained owner until bounded USER PASS or named handoff.

POS-DB-LOCK-01 — ASSIGNED / coordinated HTTP and background-work shutdown

08/10/2026 21:54:44 Athens owner says «συνεχίζουμε?» after published bounded hot-column preventionPR1922/fullCI37825135721/1929tests/source30c6127 and releasePR1924/head ef50a07754a4a7dcd9aff72a364a0f86ea8c6b78/docsCI37826731110 SUCCESS/mergef8c27aedef8d03608281222a4ecc5b683afd2f1c. Fresh Render recordf8c27ae LIVE18:51:24Z. Retained owner codex/pos-startup-loading-20261008; new source branch codex/pos-graceful-shutdown-20261008. Prior single-search USER PASS21:00:41/manual/PR1918 and all other page assignments preserved; no repeated owner search or financial/stock test.100-store readiness remains OPEN.

Read-only current-source audit: index.js does not retain HTTP server or install SIGTERM/SIGINT handlers. Its three scheduled workers have no coordinated stop/drain. Prisma library engine waits executing queries during disconnect, but does not coordinate application HTTP and job admissions. Render documents SIGTERM followed by SIGKILL after configured delay (default30s); Node20 server.close stops admission and waits HTTP completion. This observation is a lifecycle gap, not proof that it caused a historical ClientWrite reader. Current incident/root cancellation history remains unchanged.

Claim one bounded lifecycle change: retain HTTP server; on first SIGTERM/SIGINT mark draining, reject newly admitted requests with503/Connection:close before business handlers, stop scheduled job admission/timers, await existing HTTP and tracked invoice/myDATA/workforce work including invoice lease heartbeats, then disconnect the shared Prisma client once. Repeated signals join the same drain. A25s diagnostic warning reports a drain exceeding the normal platform window; no application force-exit, closeAllConnections, transaction/reader cancellation, new global query timeout or paid Render/configuration change. Existing work may exceed Render's external deadline; this residual is explicitly NOT TESTED and remains OPEN. Do not promise prevention of every abandoned reader or zero interruption.

Lifecycle-only changes may touch index.js, a new lifecycle helper, and admission/tracking/timer boundaries in the three existing workers. Preserve existing invoice durable lease/SKIP LOCKED/idempotency/recovery/heartbeat rules, myDATA transaction advisory lock/tenant/license/receiving semantics, workforce row-lock/recheck/Audit/12h behavior and all route/business SQL. No fiscal/auth/license/stock/financial/schema/start-command/seed changes or extra production cancellation/restart. Delayed detached side effects and startup-before-listen failure remain limitations for separate review, not silent full closure.

Acceptance: isolated local Node20 real-HTTP signal tests must verify new admission denied, an already-running delayed request completes, idle keepalive released, queued worker admission stops, existing work completes before disconnect, duplicate signals disconnect only once and warning never force-closes active work. Add isolated localhost-only PostgreSQL child-process fixture: hold a real read and test-only transaction through shutdown, release/commit, verify result/one committed fixture row and no surviving application connections after exit; no production fixture or external provider activity. Full existing financial/isolation/owner-catalog/lock fixtures and build required. Publish claim green CI/main before source; exact source green CI/merge/healthy deployment before any user test. Manual unchanged for CI-only infrastructure evidence.

Single next action: publish this claim, then implement/test the bounded shutdown coordinator. Other runtime DDL, automatic+guarded deployment duplication, multi-instance connection budget and measured20→50→100store/failover/restore readiness remain OPEN under retained incident owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-graceful-shutdown.md.

2026-10-08T18:56:15.535693+00:00 — OWNER-ANALYTICS-SCROLL-01 / ASSIGNED / USER clipping FAIL

Owner codex/owner-analytics-scroll-20261008 claims only independent Analytics normal/maximized window vertical reachability. User screenshot image(20261008-185009).png1916x964 shows selected Περίπτερο Διαδόχου Παύλου, maximized commerce shell and Analytics lower panels cut off. Physical revision/role unknown; new layout NOT TESTED. Full Gate7 reports PASS and TODAY-08 hierarchy/permission prior owners remain protected; palette OWNER-COMMERCE-PALETTE-01 still AWAITING USER acceptance.

Read-only layout scope: inspect actual CommerceLauncher windowbar/two mode-switches/CommerceHub/AdvancedSalesAnalytics chain with full built CSS; reproduce before editing, correct one demonstrated overflow/flex-sizing cause, and verify bottom category/product/employee panels plus drawer and existing analytics tabs remain reachable in normal/maximized views. Preserve existing owner bulk/Excel/Inventory USER PASS and palette styles. No API/report calculation, selected-store, auth/license/financial/fiscal/stock/import/module behavior change; no production transaction or form action. Local browser fixtures and CI do not establish physical USER PASS. Single next action after claim main: bounded causal CSS correction and geometry regression, green full CI/main/exact healthy release, then one user visual retest. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-analytics-scroll.md. Owner retained until PASS or named handoff.

POS-DB-LOCK-01 — LIVE / bounded lock prevention CI PASS / capacity OPEN

Bounded source PR1922/head17e27f2cc96cac4bdaf0c5095c930d3d2637cf67/full CI37825135721 SUCCESS merged30c6127f477bcca1d94acce98724bcea2615445a. ClaimPR1919/mergea0760b8 preceded source. All1929/1929 CI tests pass with zero failures/skips; production build, Windows CAPDriver and existing financial/isolation HTTP flows succeed. Local Node20 build and1918tests pass (4local skips). Existing owner single-search USER PASS21:00:41/recordPR1918 remains protected; CI is not a new manual or capacity PASS.

Isolated PostgreSQL fixture actual log18:35:12.5265006Z:56 audited original statements preserve empty-schema definitions/defaults/types/not-null and retained records. Old redundant ALTER fails its400ms test lock timeout behind held readers; guarded existing-column initialization requests no AccessExclusiveLock and a third client reads all three tables successfully. Concurrent missing-column initializers, rollback/no stale cache, dropped-column recreation, temporary search-path transaction isolation and missing-table errors pass. Frozen owner-catalog output/search/supplier-priority PostgreSQL and concurrent HTTP/health regression also passes. Fixture uses unique localhost-only test schemas; no production fixture, sale/payment/waste/stock/fiscal action or manual reader cancellation/restart.

The18 caller changes contain only imports and schema-executor substitutions. Already-existing simple Product/ProductBarcode/PurchaseDocument columns skip redundant ALTER using the caller's actual transaction/search path. Absent fields execute exact original DDL; unsupported and business statements pass unchanged and failures propagate. No schema definition, financial/stock/fiscal/auth/license/tenant or paid-plan change. Existing Render start-command Prisma compatibility/bootstrap/seed hooks still execute automatically during deployments; this page never ran an additional production seed or changed those hooks.

Production release: automatic dep-db3u6kl9fdbs73edc0d0 LIVE2026-10-08T18:42:16.76386Z (21:42Athens), exact source merge30c6127f477bcca1d94acce98724bcea2615445a. Main full

CI37825941096 SUCCESS; guarded Render workflow37826260954 SUCCESS. Read-only /api/health 2026-10-08T18:42:33Z returned200/ok=true/exact30c6127, Work roundtrip5.068s; not a physical POS timing. Database SELECT18:42:45.929469Z: recovery=false,0Lock waiters,0active queries older15s,0oldClientWrite. These snapshots do not prove sustained concurrency. Existing automatic+guarded hook also created dep-db3u7t60m5ts73b4bnmg with the sameSHA (build_in_progress at observation); no extra manual deployment/cancel/restart. Existing automatic bootstrap included KAT cleanup logs; no additional script or seed executed by this page.

Retained owner codex/pos-startup-loading-20261008; source branch codex/pos-schema-lock-prevention-20261008; record branch docs/pos-schema-lock-release-20261008. This closes only the demonstrated redundant hot-column lock request cause. Long-reader lifecycle, other runtime DDL classes, duplicate automatic+guarded deployment, representative20→50→100store capacity and failover/restore acceptance remain OPEN. Read-only audit confirms index.js has no explicit SIGTERM/SIGINT HTTP drain/Prisma disconnect. Existing invoice worker already has durable leases/SKIP LOCKED; myDATA already has transaction advisory locking; workforce re-locks/rechecks attendance rows. Do not describe these as unprotected duplicate writers. Multi-instance correctness, connection budget and actual terminal/operator load still require measured review before enabling a second server. No paid upgrade/extra deployment/retest of accepted owner search performed.

Single next action after verified release record: separately claim graceful HTTP/reader shutdown and connection lifecycle regression, preserving protected invoice/myDATA/workforce transaction semantics. No second page takes this residual without named handoff. Sustained production concurrency, shutdown regression and100-store readiness NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-schema-lock-prevention.md.

2026-10-08T21:35:09+03:00 - OWNER-COMMERCE-PALETTE-01 / LIVE / AWAITING USER VISUAL RETEST

SourcePR1921/headad44429a5108f029d9fd5c55714b357ed3462d25/fullCI37824415478 SUCCESS/merge10abeaa2b576cdf27553ae41f9c313cf675f0413. MainCI37824771286 and guardedRender37825083488 SUCCESS. Automatic deploydep-db3u2cmq1p3s73d5hd70 LIVE18:33:32Z; independent public /api/health18:34:50Z ok=true/version0.22.0+kat-test-pos/exact10abeaa2b576cdf27553ae41f9c313cf675f0413. Existing guarded hook created follow-ondep-db3u3im0m5ts73b47dr0 on the same SHA; this page triggered no extra deploy/restart/cancel. Final production source diff only31scoped CSS lines, no handler/API/permissions/data changes.

Extended isolated actual-component/full-built-CSS verification now passes normal AND maximized at all5sizes (10cases):1902x750,1366x768,1280x600,1024x768,600x800;22navigation controls/11summary cards,18px titles/no gradients, correct enabled/selected/disabled colors, last card reachable and unobscured/no horizontal overflow; zero network or form action. Existing bulk/Excel/Inventory scrolling and Master layout regression passed. Local fixtures and exact healthy service are not physical USER/touch/role acceptance. Manual unchanged until real bounded PASS.

Owner codex/owner-commerce-palette-20261008 retained only for requested palette/readability. Next action communicated: refresh the existing commerce screen; check navy/teal/white, large readable labels, selected/disabled distinction and lower cards in normal/maximized view. No module activation, payment/stock/import/offer/transaction action. Full TODAY-08 hierarchy/permission acceptance and other owners remain separate; confirmed Inventory/Excel/bulk USER PASS protected. User's next visual result must be recorded before another correction.

POS-DB-LOCK-01 — existing-column lock guard IMPLEMENTED / AWAITING full CI and release

ClaimPR1919 finalhead6d0663aa95b01a4972287a1e50e715912ea3db1b/docsCI37823923966 SUCCESS/mergea0760b89ca9d9c65ed62a1efd4b27f5edbb3e97c published before source edits. Owner codex/pos-startup-loading-20261008 retained; source codex/pos-schema-lock-prevention-20261008. Preserve prior single-search USER PASS21:00:41/sourcePR1912 and manual/recordPR1918.100-store capacity and multi-instance readiness remain OPEN.

Implemented one bounded cause: executeHotTableBootstrap checks pg_attribute/to_regclass using the caller's current transaction/search path only for the audited simple quoted Product/ProductBarcode/PurchaseDocument ADD COLUMN IF NOT EXISTS definitions. Present non-dropped columns return0 without executing redundant ALTER; absent fields execute their original unchanged DDL. Unrelated/multi-action/unsupported statements use their original path; metadata and DDL failures propagate. No global Prisma wrapper, cache, paid-plan/configuration/global timeout, cancellation/restart, schema definition/seed/financial/stock/fiscal/auth/license/tenant changes.18 integrations contain only one import and executor substitution; reversing those changes exactly reproduces pre-change source byte-for-byte. Generated unrelated kiosk-reports-audit preparation delta restored and excluded.

Local Node20 production build SUCCESS; targeted21/21pass; full server1918PASS/0FAIL/4SKIP (1922total). Audited original column defaults/types and all business SQL unchanged. New isolated localhost-only PostgreSQL E2E replays all18caller definitions against old and guarded empty schemas and compares columns/retained data; keeps three hot-table readers open, requires the old ALTER to fail its local400ms lock_timeout, and requires guarded initialization and third-client reads to finish without an AccessExclusiveLock. Also checks concurrent initializers, transactional rollback/no cache, dropped fields/temp search-path and missing-table errors. This meaningful database fixture awaits CI; no installed local PostgreSQL server available, and production is never its fixture. Existing frozen owner-catalog output equivalence/HTTP/financial flows remain required in full CI. New unit tests prove non-target financial/multi-action SQL passthrough and exact error/definition propagation; no manualPASS from local/CI evidence.

Next single action: exact-head full CI including isolated lock regression, merge then verify healthy exact source/production lock readback. Existing financial/stock/PIN/session/no-print state untouched and completed owner search not repeated. This prevents only redundant hot-column ALTER lock requests, not every DDL class or long reader itself; abandoned connection shutdown, duplicate automatic+guarded deployment behavior, multi-instance worker/session safety and measured20→50→100store workload remain separate OPEN work under retained incident owner. No user test or paid upgrade required during CI. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-schema-lock-prevention.md.

2026-10-08T21:25:10+03:00 - OWNER-COMMERCE-PALETTE-01 / IMPLEMENTED / AWAITING CI AND USER

ClaimPR1920/headb5fb9c8462cec0c65d54ddc6e315689c0c6ed4af/docsCI37823430534 SUCCESS/merge863703efb88a400f2ff89dc14b311d0f0d2919c9 published before source. CSS-only scoped commerce navigation and read-only module summary palette uses existing MyWorkStation navy#123b5d/teal#0f766e/white. Enabled buttons navy/white18px; active teal with underline; disabled muted slate18px at full opacity; visible keyboard focus. Status cards white/navy18px with readable12px status badges and teal active border. Primary labels/refresh/store selector enlarged; responsive columns keep long titles wrapped. Higher specificity defeats historical tone/nth-child gradients. Existing module handlers/disabled conditions/store data/status badges unchanged. No JSX/API/permissions/module activation/POS/financial/stock change.

Local final production build PASS. Actual CommerceHub mounted in isolated Chromium with simulated license response and zero network requests;22buttons including representative dynamically appended suite controls/11module cards tested at1902x750,1366x768,1280x600,1024x768,600x800. Full built CSS gives18px titles/no gradient, navy/teal/slate primary states and white summary cards, no horizontal clipping; last card reachable and unobscured. Screenshots visually inspected; an intermediate grid zero-height issue was corrected before publication with content-sized summary grid. Existing isolated bulk/Excel/Inventory normal/max scroll and Master grid regression PASS. These are local fixture results only; physical touch/role/LIVE appearance NOT TESTED. Source full CI/exact deployment before user visual acceptance. Manual remains unchanged until USER PASS.

Owner codex/owner-commerce-palette-20261008 retained for bounded palette only. Full TODAY-08 hierarchy/permission acceptance retains prior owner. Inventory USER PASS21:13, Excel USER PASS20:42, bulk USER PASS20:03 and all other owners protected. Single next action: green full CI/merge/exact healthy deployment, then user refreshes this commerce screen and checks palette/readability without financial/stock/module mutation.

POS-DB-LOCK-01 — ASSIGNED / hot-table existing-column lock prevention claim

08/10/2026 21:13:39 Athens owner says «συνεχίζουμε?» after clarifying planned growth to100stores by the end of2026. Retained owner codex/pos-startup-loading-20261008; prevention branch codex/pos-schema-lock-prevention-20261008. Bounded catalog search USER PASS21:00:41/sourcePR1912 and synchronizedPASS PR1918/headf1c01d5302cc987b138da8e743cde01e5ad5e6bf/docsCI37821594261 SUCCESS/mergea9207ec protected; no repeat of that accepted check. Remaining100-store readiness is OPEN, not inferred from the single search or an illustrative845USD monthly infrastructure budget. No paid resources or configuration change authorized/executed by this scope.

Observed causal boundary: historical Product/PurchaseDocument ALTER waiters blocked on long catalog readers; fresh production SELECT at investigation returns no current long/Lock rows. Current source nevertheless executes ALTER TABLE ADD COLUMN IF NOT EXISTS on already populated Product, ProductBarcode and PurchaseDocument during startup and first requests. PostgreSQL requires AccessExclusiveLock for this form even when IF NOT EXISTS ultimately skips the column. Inspection finds18 callers containing these hot-table column statements; statements defining real schema and all business operations must remain unchanged.

Claim one causal correction only: an explicit bootstrap statement helper checks pg_attribute against the same search-path-resolved relation for exactly one unqualified quoted hot-table ADD COLUMN IF NOT EXISTS statement. If the column exists and is not dropped, skip this unnecessary ALTER; if absent, execute the original unchanged DDL. Other SQL passes through unchanged. No global Prisma monkey patch, schema cache, added/missing column definition change, timeout, credential or transaction cancellation, shutdown/payment retry, seed, financial/stock/fiscal/auth/license/tenant behavior change. Integrate only the18 audited schema-initialization callers; do not take ownership of their invoice/stock/commerce workflows or existing TODAY/Gate owners.

Required isolated PostgreSQL regression: hold a normal reader open; demonstrate old redundant ALTER reaches local test lock_timeout while guarded existing-column initialization completes without AccessExclusiveLock and other reads remain available. Verify missing-column type/default/not-null and existing-schema idempotence, transaction/search-path correctness, concurrent initializers, missing-relation errors and unchanged non-target statement delegation. All fixture database URLs must be localhost/test only. Extend existing CI isolated E2E flow and full tests/build; inspect build-generated patches so helper integration is not overwritten. Exact healthy deployed source and sustained real concurrency remain AWAITING CI/DEPLOY/acceptance; no manualPASS entry from fixtures.

Scope callers: master-catalog-bootstrap.js, owner-product-bootstrap.js, product-delivery-bootstrap.js, kat-preparation-bootstrap.js, commerce-compatibility.js; routes owner-product-smart-entry, management-categories, management-vat-departments, management-product-companies, platform-bulk-catalog, commerce-advanced-online-search, store-pos-sale-display, purchase-order-ocr-resolution, purchase-orders, supplier-product-catalog, commerce-pos-invoice-intake, commerce-pos-v244-core and store-transactions. Only schema execution sites, no route payload/query/business change. Other existing-DDL classes, graceful reader shutdown, repeated deployment hooks, multi-instance worker/session safety and representative20→50→100store load remain separate OPEN residuals. Single next action: publish this claim green CI/main, then implement the guarded statement helper and isolated lock regression. Checkpoint

CHECKPOINTS/CHANGES/2026-10-08-pos-schema-lock-prevention.md; retained owner until named handoff.

2026-10-08T21:15:56+03:00 - OWNER-COMMERCE-PALETTE-01 / ASSIGNED / USER REQUEST

Owner requests replacing the photographed rainbow commerce navigation/status cards with MyWorkStation navy/teal/white and large readable text. Image181453 SHA256e15006424851d9f89fb6ccab87b6d98ee15801213e91d8c3a569aa922b589d78,1902x750, selected Περίπτερο Διαδόχου Παύλου; multiple saturated navigation/status colors and tiny status labels observed. Physical client revision/role unexposed. New theme NOT TESTED. Independent CSS-only palette/typography subtask ASSIGNED codex/owner-commerce-palette-20261008; full TODAY-08 hierarchy/permission acceptance retains prior owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-commerce-palette.md.

Preserve all existing buttons/handlers/tab targets, selected-store isolation, licensing/disabled guards, read-only module statuses, normal/maximized content scroll, bulk/Excel/Inventory USER PASS, workforce/POS and other owners. Scope only commerce navigation and module summary card backgrounds/text/icons/status emphasis; no API, role, activation, POS, financial/stock or database change. Claim must publish to main before code. Verify actual component/full CSS cascade at supplied desktop plus1366/1280/tablet, readable disabled state, no clipping, and green full CI/exact deployment before user visual retest. No form submission or transactional test. Next: bounded stylesheet change, build and browser visual verification.

2026-10-08T21:13:40+03:00 - OWNER-INVENTORY-SCROLL-01 / USER PASS / bounded scroll CLOSED

Owner replies «είναι οκ» to the Inventory normal/maximized scroll-only retest. This closes the bounded reachability of the whole Start control and lower content; no new screenshot, physical client SHA, role, stocktake creation/count/finalization or stock delta supplied. Release independently verified1a71471dad70918623643bb85a092da058b044c5, sourcePR1916/fullCI37819747049, mainCI37820096980/guard37820351666 SUCCESS. Release recordPR1917/head8169d2b36e1d47ba27100896eec132b4c3bff51e/docsCI37820705141 SUCCESS/merge387286b. Manual Inventory updated; dedicated pending scroll tasks removed. Owner codex/owner-inventory-scroll-20261008 completed only this correction. Gate2, full INVENTORY-ADV/TODAY-07 owners, Excel USER PASS20:42 and bulk USER PASS20:03 remain protected. No repeat inventory action for evidence.

08/10/2026 21:00:41 Athens — POS-DB-LOCK-01 / limited search USER PASS / capacity and recurrence OPEN

Owner Χρήστος Μανής replies «einai ok» after the requested single «coca» search with the existing POS open. Record a bounded owner-confirmed successful search/readback only. No new screenshot, timed duration, physical client revision, independent POS interaction, store/operator/shift identity or repeated load series was supplied. Do not infer separate LAB + Diadoxou refresh acceptance, explicit absence of every session error, durable stability or six-store capacity from this brief reply. Completed single-search retest removed from pending; do not repeat it solely for evidence.

Release evidence before the request: sourcePR1912/head2a7adfe3976289b5e8811dafebe6a6a8a75996c8/fullCI37816230134 SUCCESS1926/1926/isolated PostgreSQL and HTTP regression/merge3458f34; recordPR1914/headc14c6985f20c8ab3cce7c427da03cb3811662798/docsCI37818585149 SUCCESS/mergea2faae9f72981095726d4d65a8e1827ed3f347dc. Service revision1a71471dad70918623643bb85a092da058b044c5 LIVE17:56:41Z includes the correction and another owner's Inventory UI release. Public health before user test200/ok=true/exact1a71471/6.497s Work roundtrip. Database SELECT17:57:20Z recovery=false/0Lock waiters/0active queries older15s. Service SHA is not the physical client SHA. Automatic and guarded same-SHA deployments are observed separately; no manual extra deploy or administrator cancellation/restart was executed.

Authoritative scope: bounded catalog correction and this one owner-confirmed search are USER PASS. Broader central incident remains ASSIGNED codex/pos-startup-loading-20261008 / OPEN for recurrence prevention, abandoned-reader shutdown/runtimeDDL/duplicate-deployment diagnosis and representative concurrent capacity assessment before five additional stores. Existing serverFree/databasebasic_256mb verified read-only; no paid upgrade authorized or performed. No sale/payment/waste/stock/fiscal/shift action and no financial delta claimed. Preserve POS-CATALOG-PERF-01, full TODAY-04 and all other owners/confirmed PASS. No-print transaction acceptance stays separate AWAITING LAB.

Next bounded action: propose measured infrastructure and rollout requirements in response to the owner's21:01 question, then define an isolated representative six-store workload and success thresholds before any production capacity claim or separately claimed prevention/configuration change. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md; verified usage docs/manual/pos/PASS.md. Historical blocked/awaiting-search sections below are superseded for this completed single-search scope only. Ownership retained until a named handoff.

2026-10-08T20:57:43+03:00 - OWNER-INVENTORY-SCROLL-01 / LIVE / AWAITING USER RETEST

SourcePR1916/head84d47d0d7a3148db89385bb2256c8f49af018cc8/fullCI37819747049 SUCCESS merged1a71471dad70918623643bb85a092da058b044c5. Main CI37820096980 and guarded Render37820351666 SUCCESS. Existing guarded hook also created dep-db3tid5ecekc73dg2g60 on same revision; no extra deploy/restart/cancel was triggered by this page. Production diff remains only12Inventory-specific CSS lines plus isolated layout regression/documentation. Local build/wheel/whole Start/history normal/max8cases PASS; bulk/Excel/Master regressions PASS.

Physical USER RETEST still NOT TESTED; retain owner codex/owner-inventory-scroll-20261008. Next action communicated: refresh Απογραφή; verify whole Start and lower content reachable in normal/maximized windows; do not press Start or submit/count/import/finalize/delete/change stock. Protect confirmed Excel USER PASS20:42 and bulk USER PASS20:03, Gate2 stock/manual PASS, full INVENTORY-ADV and TODAY-07 owners, and POS database incident owner. No physical stock/role/mobile/current-stocktake functional acceptance inferred from layout or healthy release. Record next user result before another correction.

2026-10-08T20:49:59+03:00 - OWNER-INVENTORY-SCROLL-01 / IMPLEMENTED / AWAITING CI AND USER

ClaimPR1915/head69b79caba2cea37a87dc86ec28f7f6b13439ba37/docsCI37819240691 SUCCESS/mergefd19e7bc1f6e811daded3b60c87148457dc5a855 published before source. CSS-only desktop>1200px correction bounds existing normal/maximized commerce shell, stock host, kiosk and OwnerProductCenter wrappers when their direct .inv2 root exists. Existing .inv2 receives one vertical auto-scroll region; tabs/window bar remain fixed; existing Inventory layout/handlers/defaults/actions untouched. No JSX/API/finalization/stock/schema/license changes. Bulk and Excel CSS unchanged; mobile rules unchanged.

Actual component SSR/full-built-CSS Chromium reproduced pre-fix normal1266x849 Inventory712/712px/overflowvisible, beyond bounded window. After production build, normal/max viewport/content:1266x849=482/748 and505/748;1920x925=553/748 and581/748;1366x768=406/748 and424/748;1280x600=248/748 and256/748, alloverflowauto. Real wheel moved .inv2 while tabs stayed fixed; whole Start and history heading reachable within window in all8cases. Both bulk/Excel controls retain existing3size normal/max passes and Master kiosk grid preserved. Standalone local browser regression only, no requests/credentials/forms; local production build PASS. Source full CI/exact healthy production release and physical USER acceptance pending, no new functional inventory/stock PASS. Screenshot /tmp/owner-inventory-scroll.png visually inspected at1266x849 with Start/history fully visible.

Owner codex/owner-inventory-scroll-20261008 retained. Preserve Gate2 manual PASS, TODAY-07/INVENTORY-ADV owners, Excel USER PASS20:42, bulk USER PASS20:03 and POS-DB-LOCK-01. Single next action after green full CI/exact release: user refreshes Απογραφή and verifies Start/bottom reachable in normal and maximized windows without starting an inventory. No create/count/CSV/zone/grant/delete/finalize/financial/stock action.

2026-10-08T20:44:02+03:00 - OWNER-INVENTORY-SCROLL-01 / ASSIGNED / USER FAIL

Owner20:41 reports same scroll issue in Απογραφή; image174122 SHA2566287c9910124a72787bf22387c374cdb8fdc975c9f12f0c374076720685df6e6 shows normal desktop modal1266x849, Inventory 2.0, no store chosen/current stocktake, Start clipped at lower window edge with outer scrollbar. User clarifies20:42 Excel only is OK. Assign independent bounded desktop normal/maximized wrapper-scroll correction to codex/owner-inventory-scroll-20261008; checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-inventory-scroll.md. No takeover of full INVENTORY-ADV, TODAY-07 unknown barcode or existing Gate2/stock acceptance.

Inspect existing .inv2 root under OwnerProductCenter and stock/kiosk wrappers. Bound that existing wrapper chain only for Inventory and use .inv2 as dedicated scroll region with header/tabs fixed, preserving its two-column form/work layout, normal/maximize/restore, existing handlers/defaults, summary/table/stocktake actions, bulk and Excel USER PASS, mobile and all other owners. Extend isolated real-component/full-built-CSS test for wheel, whole Start control and history reachability at supplied1266x849 plus1920/1366/1280; no API/submission. Claim must publish green docs CI before source. New local tests/source CI/exact healthy release and user scroll-only acceptance remain pending. Single next action after claim: implement/reproduce bounded CSS correction; never start/finalize/count/import/delete an inventory for this layout test.

2026-10-08T20:44:02+03:00 - OWNER-EXCEL-SCROLL-01 / USER PASS / bounded scroll CLOSED

Owner explicitly confirmed «είναι οκ»20:42 and clarified «Μόνο Excel / Barcode». This closes only the maximized Excel / Barcode scrolling correction: both final buttons reachable after refresh/scroll per user confirmation. No new screenshot/physical revision/role or form submission is observed. Release verified separately:139cc02593656770ff5332c5f9c0b487466c0bee LIVE/exact health/main CI37817674183/guard37817762303 SUCCESS includes source PR1911/cde9e480/full CI37815580034. Updated products-master-catalog manual; bounded owner codex/owner-excel-scroll-20261008 completed. Full TODAY-06 creation/import/distribution acceptance remains OPEN under prior owners. No offer/import/stock/financial action. Bulk USER PASS20:03 preserved. Inventory scroll is separately reported FAIL and not covered by this PASS.

2026-10-08T20:41:18+03:00 - OWNER-EXCEL-SCROLL-01 / LIVE RELEASE / AWAITING USER RETEST

Release blocker resolved externally: older claim-only dep-db3sva75jdgc73dl6ntg update_failed at17:35:08Z; dep-db3t26n88uic73dk1kj0 LIVE at17:38:20Z on superseding139cc02593656770ff5332c5f9c0b487466c0bee. Read-only public /api/health at20:40 Athens returns ok=true and that exact revision. Main CI37817674183 and guarded Render workflow37817762303 SUCCESS. The released revision includes source PR1911/mergecde9e480 and the identical maximized Excel / Barcode CSS verified at that ref. Status handoff PR1913/head2f22468a73b0d3a58390e6856be2ff382e177937/docsCI37817577895 SUCCESS/merge139cc02593656770ff5332c5f9c0b487466c0bee is published. No startup/database repair, extra deployment, restart or configuration action performed by this scope.

Physical USER RETEST remains NOT TESTED. Owner codex/owner-excel-scroll-20261008 retained; protect local layout regression PASS and bulk USER PASS20:03. User has only POS open. Single next action communicated: open BackOffice, refresh, Excel / Barcode, maximize and scroll to both final controls without submitting either form. No create/import/price/stock/offer/financial action; full TODAY-06 functional acceptance and POS-DB-LOCK-01 remain with their existing owners. Server health proves availability of this revision, not physical POS responsiveness or Excel USER PASS.

POS-DB-LOCK-01 — corrected source LIVE / read-only diagnostics PASS / AWAITING USER

Read-only public store-directory probes on verified active LAB and Diadoxou store IDs return200: LAB3.305s/operatorCount2/PIN-ready2/card-ready2; Diadoxou7.612s/operatorCount5/PIN-ready5/card-ready4. No PIN/card hashes or employee names requested/output, no login performed. These probes show discovery available, not authenticated POS/shift acceptance; historical missing-PIN display was not credential deletion.

08/10/2026 20:40Athens. Render139cc02593656770ff5332c5f9c0b487466c0bee LIVE17:38:20.841Z; exact public health200/ok=true/revision139cc025 verified twice,total6.697s and8.747s from Work network. That main revision includes sourcePR1912/head2a7adfe3976289b5e8811dafebe6a6a8a75996c8/fullCI37816230134SUCCESS/merge3458f34,mainCI37816669920SUCCESS and other owner's release recordPR1913. Existing source action is now deployed; old deployment BLOCKED/queued status below is dated history. No physical client revision is inferred from service health.

Fresh SELECT20:38:07 and20:40:09:recovery=false,0Lock waiters,0active queries older15s; all four historical reader-chain PIDs absent. One corrected company catalog digest probe returns500rows/the same digest74a14af1a4dce931646a7154c1af7f81 in2.391s connector roundtrip, compared with the earlier65.572s corrected-query probe under the old lock/load. Same digest covers only those two corrected reads, not an independent production before/after comparison with the expensive old SELECT. These diagnostics establish current release/read availability only, not user search/session duration or durable capacity. Actual isolated PostgreSQL before/after output and concurrent HTTP regression already passed in full CI; production credentials/transactions were not used for those fixtures.

Official CLI login waiting process interrupted locally (exit130) after obsolete reader disappeared; no user authorization/token obtained and no admin cancel/terminate/restart was executed. Historical cancellation SQL must not be executed. Current user action does not require CLI/admin authentication. No source beyond the bounded read query, no schema/configuration/paid-plan change, no financial/stock replay. Tenant/auth/license/fiscal/idempotency/other owners remain protected.

Single next action: after record deployment settles, owner opens existing central management once and searches coca once with empty-cart POS open, then checks one POS refresh/session response at LAB and Diadoxou and reports time/error. Do not repeatedly search or repeat payment/waste. Remaining real acceptance AWAITING USER; no5-store capacity PASS. Recurrence prevention and a representative planned-store concurrent workload assessment remain OPEN under codex/pos-startup-loading-20261008 after this bounded causal correction. Source no-print transaction acceptance remains separate AWAITING LAB. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md; ownership retained until named handoff.

POS-DB-LOCK-01 — old lock chain absent / corrected source building / AWAITING USER

08/10/2026 20:36Athens fresh read-only observation: all four previously identified backends3141311/3141315/3141340/3141558 are absent after Render records prior f4a9c7 deployment update_failed17:35:08Z and queued139cc02593656770ff5332c5f9c0b487466c0bee build started17:35:09Z. Temporal association does not establish the exact disconnection cause. No SQL cancel/terminate, restart or user financial action performed by this page. Prepared reader guard below is now historical/NOT EXECUTED and must never target absent/reused PIDs.

CLI2.28.0 installed locally and login/device authorization initiated while the reader was present; no user authorization/token was obtained. The login request was stopped when the reader vanished; user/admin authentication is no longer the next action for that historical reader. No API key/password requested or published.

Corrected catalog sourcePR1912/head2a7adfe3976289b5e8811dafebe6a6a8a75996c8/fullCI37816230134 SUCCESS/merge3458f34 preserved; mainCI37816669920SUCCESS. Current automatic build139cc025 includes that correction and other owner's release recordPR1913; exact healthy revised source and authenticated catalog/shift/POS acceptance remain AWAITING DEPLOY/USER. Claim's BLOCKED-cancellation status below is superseded only for the vanished reader, not durable stability. No capacity or5-store load PASS.

Single next action: verify new exact healthy release after build/port binding, read current lock/activity state, then one owner product search alongside an empty-cart LAB/Diadoxou POS session/refresh readback. No payment/waste/old-cart replay. Recurrence prevention (reader lifetime/shutdown/runtimeDDL/duplicate deployment) and planned-store capacity remain OPEN under retained incident owner codex/pos-startup-loading-20261008. New8/45/7second fluctuating timing is not full recovery PASS. Same checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md and all protected owners/financial PASS retained.

POS-DB-LOCK-01 — source merged / deployment BLOCKED / administrative read recovery required

08/10/2026 20:33Athens release readback. Owner codex/pos-startup-loading-20261008 retained. SourcePR1912 finalhead2a7adfe3976289b5e8811dafebe6a6a8a75996c8/fullCI37816230134SUCCESS including1926server tests, isolated PostgreSQL before/after catalog equivalence and concurrent read/health HTTP fixture; merge3458f34affa860120f9722650699880f09bbad3c verified. MainCI37816669920SUCCESS; guardedRender37817103930started, same source queued in Render. This is implemented/CI PASS, not deployed or USER/LAB PASS. No5-store capacity acceptance.

Public health still200/exactb76dc52f5802323a0be1a100f338a7c62afe6479,total7.040s. Priorautomatic f4a9c7ab655aef0ee23da8d24f94c52f45020b07 stuck before port binding; logs17:25:28Z show port-scan timeout. New source3458f34 queued behind it. Do not start another manual deploy or interpret health as new-source activation. Owner20:29:07 says all windows closed except POS: repeated user searches/open tabs are not a current explanation.

Fresh SELECT snapshots identify a new abandoned old catalog read PID3141311,backend_start2026-10-08 T17:18:33.719816Z,query_start2026-10-08T17:18:52.503723Z,active/ClientWrite/no blockers. Product ALTER3141315 and PurchaseDocument ALTER3141340 queue on it; preparation cleanup3141558 queues behind Product ALTER. This is a recurring lock chain blocking bootstrap/release independently of the old source's query CPU cost. Earlier PIDs3137180/3137463/3137534 remain vanished/historical: never execute the old guarded command against reused IDs.

All production diagnosis/corrected-query digest probes remain read-only. No backend cancellation/termination/restart or financial/stock action has been performed. Available Render connector SQL is read-only; do not bypass that capability with administrative functions. Preparing official Render CLI authentication as an independent administrative route; authentication/administrative recovery remains NOT EXECUTED. No API key/password is requested in chat or published. Existing owner-confirmed workspace tea-d9ie26vaqgkc739uudqg and database dpg-d9isee7avr4c73bdglog-a must be verified before any administrative action.

Next single action: obtain authorized CLI/admin connection, freshly verify exact PID/starttimes/standalone catalog SELECT/ClientWrite, then cancel only this abandoned reader with the guard below. If cancellation cannot release the same freshly identified ClientWrite reader, termination is limited to that same standalone read after recheck. Never cancel writes/payments/fiscal or unrelated sessions; no broad database restart is proposed. Afterwards read back queue and exact deployed revision before one user search/empty-cart POS acceptance. Remaining prevention: abandoned-connection lifetime/graceful shutdown/runtimeDDL/duplicate deployments need a separately bounded causal claim; broader planned-store capacity measurement stays OPEN. Full incident ASSIGNED/USER FAIL/release BLOCKED. Original financial/no-print acceptance and all other owners protected.

Fresh reader recovery guard — NOT EXECUTED

The following replaces only the current incident reader identity. Re-identification is mandatory immediately before use, and an absent/mismatched reader means no cancellation.

sql

```
SELECT pid,backend_start,query_start,state,wait_event_type,wait_event,
pg_blocking_pids(pid) AS blockers,left(query,180) AS statement
FROM pg_stat_activity WHERE pid=3141311;
SELECT pg_cancel_backend(pid)
FROM pg_stat_activity
WHERE pid=3141311 AND datname=current_database()
AND backend_start=TIMESTAMPTZ '2026-10-08T17:18:33.719816Z'
AND query_start=TIMESTAMPTZ '2026-10-08T17:18:52.503723Z'
AND state='active' AND wait_event_type='Client' AND wait_event='ClientWrite'
AND ltrim(query) LIKE 'SELECT p."id",p."sku",p."name",p."description"%'
AND cardinality(pg_blocking_pids(pid))=0;
```

No cancellation executed; pending user/admin connection. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md.

2026-10-08T20:33:12+03:00 - OWNER-EXCEL-SCROLL-01 / SOURCE CI PASS / DEPLOY BLOCKED / USER NOT TESTED

Source PR1911/head3c479cd4f5993d720c2360e43f9da63f2494a485 passed full CI37815580034 and merged as cde9e480321f774d363d0d0ad7eecf755570dc87; main CI37815927736 SUCCESS. The superseding main3458f34affa860120f9722650699880f09bbad3c also passed main CI37816669920 and contains identical owner-products.css blob879baeb71ee312535ffeba114516b332787fcc2e. Original guard37816226720 and superseding guard37817103930 have not established an exact healthy release. No third deploy/restart/cancel/env/database action was performed by this scope.

Read-only Render evidence at20:32 Athens: dep-db3sva75jdgc73dl6ntg for older claim-only f4a9c7 remains update_in_progress, with17:25:28Z port-scan timeout/no open ports logged. dep-db3t26n88uic73dk1kj0 for superseding3458f34 remains queued; public /api/health still ok=true on previous b76dc52f5802323a0be1a100f338a7c62afe6479. This is a publication blocker, not evidence the Excel fix is available or accepted. Startup/database correction remains owned by POS-DB-LOCK-01; no causal takeover.

User20:28 reports everything closed except POS. No instruction to close/restart POS or Writer; physical Writer status and post-restart performance are unknown. Retain ASSIGNED codex/owner-excel-scroll-20261008 and preserve all other owners, bulk USER PASS20:03, and local layout regression PASS. Physical Excel / Barcode USER RETEST NOT TESTED. Single next action: verify exact healthy deployment containing the identical CSS, then ask user to open BackOffice, refresh Excel / Barcode, maximize and scroll to both final buttons without submitting. Full TODAY-06 functional acceptance remains OPEN; no import/create/offer/stock/financial action.

POS-DB-LOCK-01 — bounded read-query implementation / AWAITING CI and USER

Owner codex/pos-startup-loading-20261008; source branch codex/pos-catalog-reader-fix-20261008. Claim PR1909/exact-head8712de6dc752bf5e18f7de5941d4435c05ae58d5/docsCI37814527487SUCCESS/mergeb76dc52f5802323a0be1a100f338a7c62afe6479 published before source edits. New owner20:13:22 report: one product search stalls POS and BackOffice together; screenshot171208 shows coca search in bulk prices and repeated session-unavailable error. Owner asks about5additional stores next week. Current capacity/production stability is NOT accepted; no5-store load PASS or paid-plan recommendation/upgrade is invented.

One bounded change: smart-entry GET/catalog selects company/search matches into a materialized500-product page before enrichment, selects supplier history once for those candidates preserving prior priority/newest timestamp/null-name fallback, and collects stores per candidate without expanding the outer rows. Exact projected product/pricing/VAT/barcode/supplier/store fields, inactive inclusion, search before pagination, no-store headers and existing authentication/licensing/role checks retained. No write route, schema/migration/index, production seed, configuration, timeout or fiscal/financial/stock operation changed. Existing full TODAY-04/client-catalog owners and limited PASS preserved.

Read-only PostgreSQL EXPLAIN (not ANALYZE) on current company: prior plan enriches estimated6623 products before final500, estimated total cost590341.45/start589076.45; new plan500 rows,total3640.46/start3639.21. These are planner costs, not seconds or throughput. One new-query read-only digest probe returns500rows, connector roundtrip65.572seconds under already saturated production load: actual acceptable latency is NOT established. No old expensive query replay or live transaction was executed. Local Node20 production build SUCCESS, existing owner-product14/14 and server1915PASS/0FAIL/4SKIP. New isolated PostgreSQL/HTTP regression fixture compares the frozen pre-change SELECT with current output for600products, all supplier priorities/ignored drafts/inactive links/nulls, barcode outside page, search escaping, foreign store/company filtering and fresh supplier changes; verifies candidate500/supplier-one-loop plan and8concurrent read+health requests. This new fixture awaits full CI, not a real-store PASS. Existing CI receives one additional isolated read-regression flow only.

Next single action: green exact-head full CI including new database fixture, merge and verify exact deployed source, then one identified product search with simultaneous empty-cart POS refresh/session check. Broader durability/capacity measurement with planned stores remains OPEN after the causal correction, no repeated sale/payment/waste. User timing36→8→45→7 remains intermittent historical evidence. Whole incident USER FAIL / AWAITING CI+USER, not fixed or completed. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md.

2026-10-08T20:18:19+03:00 - OWNER-EXCEL-SCROLL-01 implemented / AWAITING USER RETEST

ClaimPR1910/head820aa0c938024c2962f113f783c671f95c03e73a/docsCI37814996137 SUCCESS/mergef4a9c7ab655aef0ee23da8d24f94c52f45020b07 published before source. Bounded CSS only: maximized desktop>1200px with existing promotion-import-workspace marker bounds stock/kiosk/OwnerProductCenter wrappers and makes the existing two-column workspace a dedicated vertical scroll region. No JSX/form handler, create/import API, defaults, pricing/stock/license changes. Existing bulk CSS is unchanged.

Isolated Chromium real OwnerProductCenter SSR plus complete built CSS reproduced the pre-fix Excel region904px/overflowvisible, clipping outside the window. After production build: Excel viewport/content at1920x925=581/940px,1366x768=424/940px,1280x600=256/940px with overflowauto. Real mouse wheel moves the region; tabs remain fixed; each of both final60px controls fits inside region after scrolling. Normal restoration reaches each control. Existing bulk passes all3sizes and Master kiosk grid remains grid. Standalone server/e2e/owner-bulk-scroll-layout.mjs uses PLAYWRIGHT_MODULE/CHROMIUM_EXECUTABLE_PATH and runs locally; no requests/credentials/submissions. Local production build and server suite1915pass/0fail/4skip PASS. This is not physical USER/LAB acceptance. Full source CI and exact healthy deployment pending.

Same bounded owner codex/owner-excel-scroll-20261008 retained. Preserve bulk USER PASS20:03, all TODAY functional/audit owners and POS-DB-LOCK-01. No live offer/import/price/stock/financial action. Single next action after exact healthy release: refresh, Excel / Barcode, maximize and scroll to both final controls without submitting either form; record user result before next correction.

2026-10-08T20:12:06+03:00 - OWNER-EXCEL-SCROLL-01 / ASSIGNED / USER FAIL

Latest user20:10 asks this BackOffice page to fix the same maximize-scroll failure in Excel / Barcode, one correction then test. ASSIGNED codex/owner-excel-scroll-20261008 for this independent bounded desktop wrapper/scroll correction only. Existing TODAY-06 functional creation/import/distribution acceptance and the broad Central Management audit remain with their prior owners; no takeover of pricing/offers business logic. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-excel-scroll.md.

Images170935/171001 show Excel / Barcode: normal modal scrolled to both final controls; maximized1918x949 clips the Barcode create button at the bottom and no useful scrollbar, per user's report. Diadoxou checkbox preselected in existing Barcode form, Excel source unselected/no file and target unchecked; no submit/import/creation/price/stock/financial action is performed. Physical revision/operator/role unknown. USER FAIL for maximized scroll; a static normal screenshot supports visible controls, not a new functional PASS. Image SHA256s170935:58b039cb40eb72b1bc1a546c78679a50f45a1c21e28eb3b288d91bf2239b6619;171001:43fd21764cc0e547e237a54f7d4fd03ec676eabcc0eff00542afe08bedc624b4.

Cause inspected: maximized commerce shell clips overflow; stock host/kiosk/OwnerProductCenter wrappers are not bounded for promotion-import-workspace. The just-passed bulk marker-specific rule does not apply to this tab. Plan: bind those existing wrappers only when maximized Excel/Barcode is active and give its two-column workspace one dedicated vertical scroll region; preserve normal mode, existing layout/handlers, bulk USER PASS20:03/sourcePR1903 and all other owners. Extend isolated real-component/full-built-CSS geometry checks to both submit controls plus unchanged bulk and Master. Claim must merge green documentation CI before source. Full source CI and exact healthy deployment precede user retest. Owner retained until completion/named handoff; next action publish claim then make this bounded CSS fix, no form submission.

POS-DB-LOCK-01 — ASSIGNED / recurring USER FAIL / bounded catalog-query correction claimed

20:08:25Athens owner reports7seconds, screenshot170816 shows the same LAB POS/emptycart. Variation45s→7s confirms intermittent recovery; no durable performance PASS or additional transaction inferred.

08/10/2026 20:07:58Athens owner reports45seconds for refresh; screenshot170737 shows LAB POS2/93activeproducts/layout11/emptycart connected after that wait. This newer timing supersedes any present8second performance acceptance. Category counters visually0 are not proof catalog was deleted. Whole recovery/performance remains USER FAIL/OPEN; no further timing repeat requested.

08/10/2026 20:06:23 Europe/Athens. Newer owner screenshots supersede any general stability interpretation of the20:01 timing readback:170441 shows central owner products/Τιμές ανά κατάστημα, query coca,0products and red «Ο έλεγχος συνεδρίας δεν είναι προσωρινά διαθέσιμος. Δοκίμασε ξανά — δεν έγινε αποσύνδεση.»; owner says this repeatedly appears.170605 shows Diadoxou stalled at «Έλεγχος βάρδιας και δικαιωμάτων...» and owner reports severe server instability. These are real availability USER FAIL; prior8second reports remain historical limited timing only. P2024 pool-exhaustion events continue20:04–20:05, concurrent long SELECT fingerprints match server/src/routes/owner-product-smart-entry.js GET/catalog (VAT department and supplier columns). No credential loss inferred and no auth/shift validation bypass proposed.

Latest explicit owner direction selects one bounded causal catalog SQL correction here under retained incident owner codex/pos-startup-loading-20261008. ΑΝΑΛΗΨΗ ΑΠΟ codex/central-management-live-audit-20261007 — ASSIGNED codex/pos-startup-loading-20261008 for the exact GET/catalog expensive enrichment/read query only; full TODAY-04 audit, product mutations/price workflows and existing POS-CATALOG-PERF-01 client owner remain assigned to their existing pages. No prior owner's release or whole-scope handoff is invented. This claim must merge before source edits.

Proposed boundary: select the same first500 matching company products before expensive supplier/barcode/store enrichment, replace repeated per-product supplier-history scans with one company/candidate-scoped supplier selection preserving priority0activeLink/1mapping/2approvedDocument/3finalOrInvoicedOrder and newest timestamp. Preserve exact fields, search/barcodes, active/inactive inclusion, VAT/prices, no-store response, company/store isolation and all financial/fiscal/auth/license behavior. No schema/index/migration/configuration, global timeout, paid-plan upgrade, production seed or source outside that bounded query without another causal claim. Required validation: supplier/search/output equivalence in isolated PostgreSQL, meaningful query plan/read behavior, full CI, exact live revision then bounded user search/entry acceptance. Current new behavior NOT TESTED/AWAITING IMPLEMENTATION; CI is not USER/LAB PASS.

Single next action: publish this evidence/claim, then implement and verify the bounded query correction. No further user retry/reset/re-pair/payment/waste or financial replay requested while pool remains exhausted. Owner retained until named handoff; checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md.

POS-DB-LOCK-01 — limited USER recovery/timing PASS / recurrence OPEN

08/10/2026 20:01:31 Europe/Athens. Owner codex/pos-startup-loading-20261008 retained. The owner reports «ξεκόλλησε», then «8 δευτερόλεπτα» for LAB and «8 και τα Διαδόχου». This closes the missing physical timing readback only: reported36s → approximately8s at both stores. No repeated timing series, target/SLA, exact click-to-ready boundaries, physical client SHA, independently verified absence of OFFLINE/auth errors or completed login is established. Screenshot170016 at20:00 shows LAB login directory restored (LAB POS2 selectable and PIN form), with no red internal-error/no-PIN message visible; it does not show the completed POS session. The previous19:59 screenshot remains real historical login FAIL, not a credential-change finding. Source no-print functional/financial acceptance remains AWAITING LAB. Manual docs/manual/pos/PASS.md updated for this bounded recovery observation only.

Read-only database evidence:19:58:48.503Athens client backend3139078 terminated by signal9/Killed; PostgreSQL terminated remaining backends and reinitialized, temporarily rejecting connections in recovery. The failed backend was reading StoreChatSettings; this is not proof that this small query caused the crash. Memory253444100bytes near268435460byte limit and CPU0.1quota at19:58 are consistent with capacity pressure; kernel/OOM cause is NOT independently established. At20:03:46 recovery=false and0Lock waiters; subsequent snapshot has8 concurrent owner-products SELECTs aged32–134s without blockers. Lock absence does not certify stability: long catalog readers/resource pressure remain OPEN.

Render automatic deployment ffb2540880273fe72f3f165bcbb980aa17bac0e2 LIVE20:00:43Athens; this is a service revision, not independently read from each physical client. PriorPR1907/docsCI37812663028SUCCESS preserved. No assistant SQL cancellation/restart, source/configuration/migration/seed or manual deploy; all live diagnosis was read-only. Publication of prior PDF records triggered automatic deployments, so do not use further record/deploy cycles as a recovery treatment. Protected tenant/auth/license/fiscal/payment/stock invariants and other owners retained.

Single next action: investigate the observed concurrent owner-products reader lifetime/concurrency and its interaction with runtimeDDL/deployment shutdown under this incident's retained owner, reconciling with existing catalog/central-management owners before any bounded code change. No further user timing repeat or transaction replay is requested for this completed readback. Full availability/performance PASS, prevention and no-print transaction result remain NOT TESTED/OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md. Older awaiting-timing/cancellation entries below are dated history superseded only for the recovered reader and received timing.

2026-10-08T20:05:50+03:00 - OWNER-BULK-SCROLL-01 / completed scoped USER PASS

Owner confirmed «ειναι οκ» at08Oct20:03 Athens after the requested refresh/maximize/scroll retest. Attachment image(20261008-170325).png, SHA25696c0750e553062959aa0aae98c1650434d10a4803087d8d53f12fadf55e1358f, shows maximized Central Management at1920x968, selected Μαζική αλλαγή τιμών, dedicated right vertical scrollbar and only Περίπτερο Διαδόχου Παύλου listed/unchecked, counters0products/0stores/0changes. USER-reported PASS for the previous stuck/missing vertical scroll in this maximized desktop screen. A static top-of-form screenshot does not independently show the last button or prove interaction geometry; that interaction result is attributed to the user's explicit confirmation. Physical client revision/operator/role/terminal not exposed; do not infer exact user revision or OWNER permission acceptance.

This completes only the bounded OWNER-BULK-SCROLL-01 correction by codex/owner-bulk-scroll-20261008. The historical19:11 maximize-scroll FAIL and AWAITING USER RETEST are superseded for this scope. Prior publication sourcePR1903/head186856c337b60da5bd25ff0015be5aa7e31685c0/fullCI37808855211 SUCCESS/merge1cd34448aad6343be33c3757ab8aaf883f4d4050, mainCI37809195024/guardedRender37809516757 SUCCESS and independently verified exact healthy source remain implementation evidence; release docsPR1905/headde384a7fc89ea2f1347a19fb41a7ca55d551c628/docsCI37810618717 SUCCESS/merge2739816a42c81c60b3e064dff91fb40351088aa8 preserved. No live price apply or product/store/stock/financial mutation was performed by this page. Price preview/application, Audit/stock deltas, mobile/touch and role/license tests are NOT TESTED by this observation.

Manual docs/manual/products-master-catalog/PASS.md now records the verified maximize/scroll usage and limits. Remove the completed bulk-scroll retest from active pending tasks and refresh both shared PDFs. Full TODAY-04 pricing/preview/performance audit remains OPEN with codex/central-management-live-audit-20261007; POS-DB-LOCK-01 and all other assignments/PASS are untouched. Next single action: user selects the next BackOffice correction; do not repeat this passed scroll test or apply prices for documentation.

POS-DB-LOCK-01 — ASSIGNED / lock chain absent / AWAITING USER TIMING

2026-10-08T19:54:49+03:00. Fresh read-only database snapshots now show all three previously identified backends3137180/3137463/3137534 absent, followed by9 idle ClientRead connections and no active/Lock row in the aggregate. At19:49 the same root was still835seconds old; at19:52–19:53 it was gone. Render independently records guarded same-SHA deployment update_failed at16:51:09Z and queued automatic deployment starting16:51:10Z; this temporal association does not establish the exact connection-disconnect mechanism. No administrator SQL cancellation, database restart, credential/configuration/source change or manual deploy was executed by this page or evidenced by the user's screenshots. The prepared cancellation is now historical/NOT EXECUTED and must not be run against vanished/reused PIDs. User screens165058/165123/165234 only show Render Overview → web service → correct database Info/Available/storage42.92%; no restart/restore/delete control pressed is inferred.

Fresh Work-network health200/ok=true/exact1cd34448aad6343be33c3757ab8aaf883f4d4050, TTFB5.506s,total5.551s. New automatic deployment90b86d20685c96a3dba2e99a9145ddf0c4b996d9 still update_in_progress in this snapshot; existing live source retains no-print and bulk-scroll changes. Lock-chain absence/health are diagnostic observations, not authenticated POS/session response or physical loading USER/LAB PASS. Reported36seconds, OFFLINE fallback and auth503 have no measured successful user retest yet; whole incident remains OPEN. Read-only connector cancellation blocker is superseded for the vanished reader only. Prior incident PR1906/head a1613fa8f9242bde215b70d43b528f214020335b/docsCI37811701410 SUCCESS/merge90b86d20685c96a3dba2e99a9145ddf0c4b996d9 preserved.

Single next action: after current application deployment settles, measure one empty-cart refresh at LAB and Diadoxou and report seconds/absence or presence of OFFLINE/auth error, without submitting/replaying any existing cart or financial action. Owner codex/pos-startup-loading-20261008 retained for this central availability incident. Preventing recurrence is not implemented: abandoned-reader lifetime, shutdown/runtimeDDL and duplicate automatic+guarded deploy behavior need a separately bounded causal correction after this recovery observation. POS-CATALOG-PERF-01/client resolver owner and all existing PASS/other owners preserved; no new functional waste/financial PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md. Actual36second recovery NOT TESTED/AWAITING USER.

POS-DB-LOCK-01 — ASSIGNED / USER FAIL / recovery BLOCKED

2026-10-08T19:47:36+03:00. Owner codex/pos-startup-loading-20261008, independent central database availability incident only. Preserve POS-CATALOG-PERF-01 and its retained owner/client-resolver PASS; no takeover of its broader performance audit, installation, TABLE_SERVICE, Gate3/4/6/8, Workforce or TODAY owners. User reports LAB and Diadoxou opening/refresh slow, explicitly36seconds. Attachment163905 shows LAB POS2/layout11/93products/emptycart and new «Κλείσιμο χωρίς Εκτύπωση» label; screenshot164234 shows cached OFFLINE catalog saved18:28:59 Athens;164507 shows AUTH_VALIDATION_UNAVAILABLE with existing waterSKU2270/qty1/cart1.00. Exact physical revision, shift/transaction/action outcome unknown. Do not retry that cart or any payment/waste for evidence. No new functional waste/financial PASS.

Read-only production diagnosis: canonical service myworkstation-app/Render and database myworkstation-db selected in user-confirmed My Workspace. Public page200/TTFB7.528s,total7.571s and health200/TTFB6.439s,total6.441s; healthrevision1cd34448aad6343be33c3757ab8aaf883f4d4050. These Work-network timings are separate from reported physical36s. Render logs repeatedly record10s Prisma pool timeout/limit9 during session validation. PostgreSQL snapshots show root SELECT product-catalog backend3137180, query_start2026-10-08T16:35:05.80891Z, active/ClientWrite/no blockers for526 then609seconds. Pending Product ALTER backend3137463 and PurchaseDocument ALTER3137534 both wait on that reader; at least7catalog/product readers queue behind3137463. This directly establishes a database lock chain affecting POS catalog reads and exhausted app connections, not merely a client rendering inference. CPU/memory snapshots do not establish saturation; http_latency metrics empty. Same-SHA guarded deployment update_in_progress; do not trigger another deploy as a diagnostic cure.

All assistant actions so far are SELECT/read-only, file/doc edits and publication only. No database session cancellation, migration, configuration, restart, seed, sale/payment/stock/shift action. The available Render SQL connector is read-only and exposes no cancellation/write/restart operation; no production credentials or independent authenticated dashboard session available. Recovery is BLOCKED on an authorized administrative SQL or database/service console capability. Prepared bounded action: freshly re-identify the same abandoned SELECT by backendPID/query_start/ClientWrite/SELECT shape, then cancel only that reader; never cancel payment, write, fiscal or unrelated sessions. If cancellation cannot release its ClientWrite connection, termination requires the same fresh identity/read-only checks. No broad restart or data update is proposed.

Single next action: obtain an administrative Render/database console for the targeted abandoned reader; after recovery independently re-read lock queue and fresh authenticated catalog/session response, then user measures one empty-cart refresh at LAB and Diadoxou. Claim/status remains ASSIGNED until that measured acceptance; no throughput/LAB/USER recovery PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-database-lock-incident.md. Prior source#1901/release#1904 and all limited PASS remain protected.

2026-10-08T19:36:29+03:00 - OWNER-BULK-SCROLL-01 released / AWAITING USER RETEST

Source PR1903 head186856c337b60da5bd25ff0015be5aa7e31685c0; full CI37808855211 SUCCESS; merge1cd34448aad6343be33c3757ab8aaf883f4d4050. Main CI37809195024 and guarded Render37809516757 SUCCESS. Render dep-db3s9qlchlcc73elsdf0 LIVE with exact source merge; public /api/health independently returned ok:true and revision1cd34448aad6343be33c3757ab8aaf883f4d4050. The normal auto deploy and guarded hook produce a second deployment of the same SHA; no additional deployment was triggered here.

Only maximized desktop bulk-price wrapper/scroll CSS changed. Local browser 1920x925 / 1366x768 / 1280x600 reaches final control, normal restoration and Master layout preserved; standalone local geometry regression, production build and local server suite1911pass/0fail/4skip passed. No live price submission, store/stock/financial action or new actual user/LAB PASS. Prior user maximize-scroll FAIL remains AWAITING USER RETEST. Next single action: refresh, open Μαζική αλλαγή τιμών, maximize and scroll to the final control without applying prices. Owner codex/owner-bulk-scroll-20261008 retained for this bounded item. Full TODAY-04 audit stays with codex/central-management-live-audit-20261007; Workforce and other owners/PASS protected.

2026-10-08T19:21:20+03:00 - OWNER-BULK-SCROLL-01 implementation / AWAITING USER

ClaimPR1902/head1a071e5f/CI37807414188 SUCCESS/merge60c5ebc4 published before code. Bounded CSS only in owner-products.css: keep mode switch fixed; bound stock host and full-mode kiosk wrappers to available flex height; let OwnerProductCenter flex into that height; make bulk scroll form shrinkable block content rather than grid with min-height:max-content. Existing dedicated vertical overflow remains auto. Selector requires maximized bulk-price marker and desktop>1200px; normal and other modules retain existing layout. No JSX handler/API/server/license/price computation changes.

Local production build PASS. Isolated Chromium real OwnerProductCenter SSR with complete built production CSS and actual stock/kiosk wrapper chain:1920x925 form563px/content958/scroll395;1366x768 form406/content958/scroll552;1280x600 form238/content958/scroll720. Final60px primary control fully visible at bottom in all cases. Normal restored mode overflowauto reaches same control; non-bulk Master kiosk grid remains grid. Browser fixture has no requests/live credentials, no form submission; server/e2e/owner-bulk-scroll-layout.mjs records reproducible regression (PLAYWRIGHT_MODULE and CHROMIUM_EXECUTABLE_PATH). Local browser is not actual user/LAB acceptance. Full local server suite PASS: 1911 passed / 0 failed / 4 skipped. Full CI/exact deploy/user maximize-scroll retest pending. Preserve other owners and previous PASS. Next after healthy exact deployment: user maximize same existing bulk screen and scroll to last control without applying prices. Same scoped owner retained.

2026-10-08T19:14:49+03:00 - OWNER-BULK-SCROLL-01 / ASSIGNED / USER FAIL

Latest user19:11 asks this BackOffice page to correct missing vertical scroll after maximizing the commercial product window, one correction then test. ΑΝΑΛΗΨΗ ΑΠΟ codex/central-management-live-audit-20261007 - ASSIGNED codex/owner-bulk-scroll-20261008 for this one user-requested maximized bulk-price wrapper/scroll correction only. No release or completed handoff by the prior page is invented; latest user direction selects this bounded fix here. The full TODAY-04 audit and all its other residuals remain assigned to the prior page; no duplicate broad audit, pricing workflow or other module takeover.

Attachments161004/161051 show selected Μαζική αλλαγή τιμών (not Store Prices): normal window has right scrollbar, maximized1920x~925 clips the form below New Price with no useful scroll, per user report. Empty selection0products/0stores/0changes; only Diadoxou store listed and unchecked. Exact physical client revision/identity unknown; USER FAIL for maximize scroll only, no live price apply/stock/financial/employee/card action. Source existing 06Oct dedicated scroll sets

OwnerProductCenter height100%/overflowhidden and bulk form flex/overflowauto, but wrapper ancestry through stock host and kiosk-shell is not bounded. Prior maximum-mode scroll FAIL remains unresolved; do not infer new normal-scroll PASS from a static scrollbar.

Bounded CSS wrapper-height/scroll containment fix keyed only to maximized bulk-price-scroll-region, preserving normal mode, Master/Store Prices/Offers/Excel/Inventory, final preview/apply handlers and all company/store/license guards. Preserve earlier Master/Store Prices PASS, Workforce desktop PASS, POS-NO-PRINT owner and other assignments. Claim must merge green docs CI before source. Meaningful browser geometry test will check normal/maximize/restore, scroll to final control and preserved non-bulk layout; full CI and exact healthy deployment precede user retest. Owner retained until named transfer. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-bulk-scroll.md. Single next action: publish claim then bound the existing wrapper chain; no price submission for this layout test.

Attachment SHA256s: {'image(20261008-161004).png': 'ff83596769745cbf66696575c3eb016f9e0e6e9fa296630400bc4c9e13fa00ea', 'image(20261008-161051).png': '4dd9eceee87c2aa64044fb57efda2db448d0d4d8e9b0fe46458332d2fbbf760b'}.

08/10/2026 19:04 Athens - OWNER-WORKFORCE-01 desktop layout USER VISUAL PASS

User attachment image(20261008-160405).png (SHA2561ac5928e3aafea676864a893d71deb71683526f390034bbcf11e8408bad14bad), after requested refresh: selected Περίπτερο Διαδόχου Παύλου, five employees/one role/zero rules/three templates/one store. All eight tabs now occupy one horizontal row with readable labels and selected Employees state. Employee list and Print card/Send application controls visible. Bounded desktop layout USER VISUAL PASS supersedes the vertical-tabs FAIL and layout AWAITING RETEST for this screen. No mobile/touch, other-tab action, physical print/scan, invitation delivery or authenticated OWNER role/package-denial PASS inferred. Exact physical screenshot revision unexposed; deployed correction PR1897/head5c0a7e09/fullCI37802841168/merge5526b99e independently healthy with mainCI37803226405 and guardedRender37803547437; release docsPR1898/CI37803908659/mergee52c64cf. No runtime or live employee/card/financial/stock/shift write, no credential replay.

Same owner codex/owner-workforce-module-20261008 retained. This bounded layout correction is completed; preserve prior preview and normal-shell panel visibility PASS. Remaining independent acceptance: actual print/scanner/invitation delivery, mobile/touch and physical role/module enforcement. Other owners and WORKFORCE-ADV/payroll #27 unchanged. Single next action: user selects the next BackOffice correction; do not repeat the passed desktop layout or generate cards solely for evidence. Manual/docs/manual/workforce/PASS.md and both shared tracker PDFs synchronized.

POS-NO-PRINT-01 — IMPLEMENTED LIVE / ASSIGNED / AWAITING LAB

Release / handoff 2026-10-08T19:30:19+03:00 — IMPLEMENTED LIVE / AWAITING LAB. Source PR #1901 final head f87efaa7f63a7b51f3c14072ed50a303bc661049, exact-head full CI37807952643 SUCCESS (1926 tests PASS /0 FAIL /0 SKIP, Windows smoke, production invariants and isolated HTTP/PostgreSQL E2E). Merged main69a0f6e0cb7a90c020ae4da28bba3b71c2c8a8bd; exact main CI37808341492 SUCCESS. Guarded Render37808687252 SUCCESS, including Wait for exact production revision. Independent public GET /api/health returned ok=true, version0.22.0+kat-test-pos, exact revision69a0f6e0cb7a90c020ae4da28bba3b71c2c8a8bd. Public Platform Admin HTML references index-CKp8X8dl.js; actual app entry-B9WXylsJ.js (2182083 bytes, SHA256298e6d62fac14d3da5770ed0c44c146e443f074fdd4e1a858f8959ae59d2b40f) contains exact requested label, new request-helper marker, unchanged /waste path/items-note body with no kind override, and table inline-reason label. This is read-only deployment/bundle evidence, not physical USER/LAB PASS.

Final scope: the POS button is renamed «Κλείσιμο χωρίς Εκτύπωση» and uses the previous waste submission immediately with all current non-return cart quantities, without the pictured quantity/reason modal. The same /waste endpoint and items/note request preserve the existing NON_FISCAL/CASH-turnover/stock/Audit business processing; backend reports retain WASTE classification. Table-order endpoint and mandatory reason stay required, displayed inline. Client guards cover concurrent clicks, empty/offline/fiscal-pending states, error-retained cart, success-only clearing and stale selected-store responses. No server accounting/fiscal/schema/migration or production store configuration changes. Final Node20 build, targeted24/24, server1915/0FAIL/4SKIP and actual-component Chromium fixture1920/1024 PASS; final full CI supersedes prior-head attempts. The unused consumption bootstrap was explicitly traced as absent from the current entry/import graph; initial inference of interception was corrected before merge and is not the final route. Prior source heads3461016/4c7d598/3d95b1a are superseded, never deployed as this release.

Actual revised-label/no-modal and financial/stock/control acceptance at a physical LAB POS is NOT TESTED / AWAITING LAB. No live sale/payment/stock/shift/device/configuration action was performed by this page and no financial delta is inferred from screenshots or CI. Do not replay photographed18:42 cart or earlier reported waste for evidence. Existing manual PASS stays unchanged; a new manual entry will require a real bounded observation. Source PR preserved the concurrent shared PDF while other pages published: this release handoff regenerates/renders the authoritative tracker PDF from the combined current tracker. Workforce desktop PASS, bulk-scroll claim, POS-AUDIENCE-CREDIT-01 and all Gate3/4/6/8/TODAY/other owners remain protected.

Single next action: after the cart is empty, refresh the existing LAB POS and inspect the new button label read-only. Any subsequent direct-click waste acceptance uses one newly identified LAB action after a fresh recorded store/terminal/operator/shift/SKU/quantity/time baseline with cash/card/IRIS/total/transaction count, stock/latest movement/Audit and an unaffected control; compare the same sources afterward. No old financial action is repeated merely for documentation. Owner codex/pos-close-without-print-20261008 remains assigned; release-record branch docs/pos-no-print-publication-20261008, no named transfer or full LAB PASS.

Current implementation 2026-10-08T19:08:15+03:00 — AWAITING LAB. Claim PR #1899 / exact-head docs CI37805187649 SUCCESS / merge baea81fa9fe64d95d6170b13a3bba3c439b20727 published before source editing. The normal POS button now says exactly «Κλείσιμο χωρίς Εκτύπωση» and directly submits existing cart quantities through the exact existing /waste endpoint and unchanged items/note payload. No WASTE modal is opened by this action. The unused consumption-choice-bootstrap file is not referenced by current client index/imports; its presence is not evidence of runtime interception. The final route review keeps the original modal submission endpoint rather than redirecting to another consumption route. No unit-price/VAT/audience/fiscal/server accounting override is added. Existing Sale/Payment/CASH turnover/stock/Audit remain in unchanged routes. Table-order calls still use the exact existing whole-order /waste endpoint and mandatory reason, displayed inline only for a loaded table order. Synchronous shared checkout lock/busy controls prevent concurrent click submissions; disabled for empty cart/offline/fiscal-pending state, with no offline queue or auto retry. Cart clears only after API success, survives server rejection, and a stale response cannot clear a newly selected store. Default POS Designer button label changed with WASTE action ID unchanged; no real-store layout/configuration write.

Node20 production build PASS; local server1915 PASS /0 FAIL /4 SKIP. Targeted24/24 PASS includes unchanged consumption/shift waste/table-order/preparation contracts and actual React/DOM no-dialog, duplicate-click, failure-retains-cart, success-clear and offline tests. Local real Chromium on actual component with isolated simulated API PASS at1920×1080 and1024×600: full label and button inside viewport/no text overflow, direct no-dialog completion, and REQUIRES_CHECK fiscal request disables action. Screenshots visually inspected. These are local fixtures, not LAB/USER financial PASS. Server consumption/pilot/table business routes and fiscal paths have no source diff. No live sale/payment/stock/shift/device/configuration mutation performed. Full source CI/merge/exact deployment remains pending at PR preparation.

Historical implementation next action (completed by verified release): exact-head full CI → merge → verify healthy exact deployed source revision; then one bounded LAB acceptance with a fresh before/after/control record. Do not repeat photographed cart or historical waste for documentation. Current owner codex/pos-close-without-print-20261008 retains assignment; no takeover of TABLE_SERVICE/Inventory/Workforce or other owners. Manual unchanged because no new real PASS. POS-AUDIENCE-CREDIT-01 partial visuals and all previous Gate PASS remain protected.

Owner codex/pos-close-without-print-20261008, claim 2026-10-08T18:57:57+03:00, based on main e52c64cfd85f4cb020e6a776b0fd12ccb46bac5d and independently healthy public /api/health at this review. Owner request18:55Athens: rename the POS ΦΥΡΑ button to «Κλείσιμο χωρίς Εκτύπωση», remove the pictured quantity/reason modal, explicitly preserve its business function. Screenshot154244 shows MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, operator display LAB POS2, layout11,93 active products, NORMAL audience, cart1×ΝΕΡΟ1,5LT/SKU2270 at1.00€, displayed total1.00/received0/change0. Screenshot155436 shows «Φύρα / Κατανάλωση προσωπικού», quantity1, empty reason and «Καταχώριση Φύρας». USER FAIL only for requested label/intermediate-dialog design; no submitted transaction, exact physical revision/terminal/shift identity, stock or ledger delta established. New flow NOT TESTED. Do not replay this cart or historical17:35 reported waste merely for evidence.

Scope: normal POS action directly submits current non-return cart quantities through the existing WASTE business route, without a quantity/reason popup; exact requested button label and compatible save/error feedback. Resolved source trace: consumption-choice-bootstrap exists but is not referenced by the current index/imports. Keep the original /waste endpoint and items/note body exactly. No schema/server accounting/fiscal route changes. Existing WASTE remains NON_FISCAL, CASH turnover, stock decrement, Sale/Payment/StoreTransaction/operational/Audit recording, server catalog prices and current guards. Do not replace with CASH checkout, self-consumption, destruction, shift close or fiscal issuance. Existing table-order-specific waste route and mandatory reason must remain required (inline reason for that existing case); no table-stage/accounting redesign or takeover. Client synchronous pending guard prevents duplicate click submission and retains cart on errors; no automatic retry or offline queue. No new broad permission or company/store ownership assumptions.

Protected: Gate3/4/6/8, offline once-only queue, card/shift/fiscal pending guards, POS-AUDIENCE-CREDIT-01 limited OFF/ON/dropdown visuals, Workforce/TODAY-04 and all other owners. Claim is an independent UI task; TABLE_SERVICE and Inventory2.0 remain with existing owners. Relevant source inspected StorePosPanel/StandardModals, consumption bootstrap, store-pos-consumption and pilot/table waste routes; existing stock-waste actor/Greek label and Gate4/TableService idempotency checkpoints retained. No production setting, sale/payment/stock/shift/device write performed by this page. Full CI plus healthy exact deployed revision precede bounded LAB acceptance; CI/local are not LAB PASS.

Historical initial next action (completed claim, superseded by implementation): publish this claim with green docs CI/merge before source editing, then implement direct click and run actual-component/request-snapshot regression checks, full CI and exact deployment verification. Any new LAB financial/stock action requires the repository before/after/control record; no repeated old payment for documentation. Same owner retained until named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-close-without-print.md.

2026-10-08T18:48:25+03:00 — OWNER-WORKFORCE-01 layout publication / AWAITING USER RETEST

PR1897 head5c0a7e093befac5fe14db2f4fdfa3aeb9235e696, full CI37802841168 SUCCESS, merge5526b99ef717e4186106ec741071cf9ddd2f09d9. Main CI37803226405 and guarded Render37803547437 SUCCESS. Render dep-db3rkmmgekts73e34fmg LIVE exact5526b99e; independent public /api/health ok=true revision5526b99ef717e4186106ec741071cf9ddd2f09d9 verified. Same-commit deploy-hook dep-db3rlu56laks7393gh3g still building; current verified source already healthy.

Owner-only tab layout now flex row/wrap, readable13px labels and44px controls, with unchanged sidebar grid covered in real React/DOM regression. Local production build/server suite and full CI including HTTP E2E/Windows/invariants passed. This is implementation/deployment evidence, not visual acceptance. Preserve limited user card-preview PASS and normal BackOffice selected-store panel visibility PASS18:39; layout AWAITING USER RETEST. Physical printing/scanning/invitation delivery and exact physical OWNER role/package-negative acceptance remain NOT TESTED. No runtime server/license/schema/fiscal/payroll/financial/stock/shift mutation. Other assignments unchanged;

credential-bearing screenshots excluded.

Owner codex/owner-workforce-module-20261008 retained until named handoff. Single next action: reload the already-open selected-store Personnel page and inspect horizontal readable tabs; no new card preparation required. Record bounded visual outcome before taking the next BackOffice correction.

2026-10-08T18:32:48+03:00 — OWNER-WORKFORCE-01 support BackOffice observation / layout FAIL

User screenshots image(20261008-153035).png and image(20261008-153055).png show the shared BackOffice panel for Diadoxou and a named employee work-card preview with QR and barcode. LIMITED USER VISUAL PASS for preview opening only; no physical printing, scan, invitation delivery, normal OWNER identity or paid-package enforcement PASS. The panel header explicitly says Super Admin support access. 5 employees/1role/3templates/1store displayed. New layout FAIL: eight tabs stacked as full-width rows at desktop width, excessive vertical space and faint inactive labels. Root source: global .app nav display:grid and .app nav button rules leak into shared Workforce nav. Same existing assigned owner codex/owner-workforce-module-20261008; one bounded Owner-only CSS containment fix, preserve side navigation, shared Super Admin panel, cards and package/tenant guards. Physical screenshot revision unverified; prior healthy source285f9922, docs release378aa3c9. No financial/stock/shift action or card replay. Card QR/barcode are credentials: screenshots/tokens must not be uploaded to the public repository.

08/10/2026 — OWNER-WORKFORCE-01 implementation published / AWAITING USER. PR1893 head94ab1926, full CI37799256555 SUCCESS, merge285f99229f8daf4f8e9d8f43f0fb48bdbc311833. BackOffice selected-store entry and Personnel navigation now reuse the shared Workforce v2 panel with card print/mobile invitation and all tabs. Local1911server tests/0fail/4skip + production build +5React/DOM checks PASS; actual isolated HTTP Owner work-card and tenant/inactive/expired-package rejection PASS in CI. New physical Owner path, card/QR sharing and visual layout are NOT TESTED. MainCI37799720198 and guardedRender37800075840 SUCCESS; exact public health285f99229f8daf4f8e9d8f43f0fb48bdbc311833 independently verified. Owner codex/owner-workforce-module-20261008 retained; next action: one own-store Owner card/invitation test, then record bounded acceptance. Other owners, payroll #27, WORKFORCE-ADV, fiscal profiles and live financial actions untouched.

18:39 Athens additional user screenshot image(20261008-153921).png (SHA256 25b7504ed93d5268f1d42cb0700080832658d3130f24c0a49d25f789f55de6b5): ordinary BackOffice shell, welcome Νίκη Ραζάτου, selected Περίπτερο Διαδόχου Παύλου, no support banner, Personnel page and five employees visible. Bounded USER VISUAL PASS for normal-shell selected-store panel visibility only; screenshot does not prove authenticated role, paid-module denial, card delivery or printing. Same vertical-tab layout FAIL remains before deployment. No live mutation performed.

08/10/2026 18:01 Athens — OWNER-WORKFORCE-01 / ASSIGNED

Owner codex/owner-workforce-module-20261008. Independent BackOffice integration of the existing Workforce v2 panel for OWNER with an active selected-store personnel package, including work-card printing and mobile QR/application sharing. User requested the same full panel on 08Oct17:54 and clarified QR/card access17:57. Existing Super Admin flows and BASIC/PRO/AI/PAYROLL entitlement hierarchy remain protected. No package activation, payroll calculations, schema, fiscal/profile, payments, live employee/credential mutation or existing assigned scope takeover. Screenshots show Super Admin panel only: new OWNER path NOT TESTED / AWAITING LAB. Required acceptance: real OWNER selects own licensed store, sees its employees and card/share controls; absent/expired package and foreign company/store denied; switching stores clears prior results. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-owner-workforce-module.md. Claim must merge with green CI before implementation. Single next action: connect Owner store and Personnel navigation to the common panel. Owner retained until named transfer; WORKFORCE-ADV, payroll #27, TODAY-04 and other assignments unchanged.

MyWorkStation — κοινό μητρώο εκκρεμοτήτων και αναθέσεων

Έκδοση 07/10/2026 · Ευρώπη/Αθήνα · Βάση main 6f370e1b2aad887a4aa380e27e462391f05b2ca5.

POS-AUDIENCE-CREDIT-01 — LIMITED USER PASS / ASSIGNED / residual AWAITING LAB

Authoritative observation 2026-10-08T18:20:59+03:00 (Europe/Athens): owner attachment image(20261008-152055).png, SHA256 604605ec33c08b96aaf621671fa8e57a8552a25140f3eca57f2cb674cc3a377e, was opened and visually inspected despite the initial missing-file message. It shows company MYWORKSTATION LAB, store ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, operator display LAB POS 2, layout version8 /93 active products, connected, empty cart and displayed total/received/change0. Hospital audience/card rows are absent. «Πελάτης ▾» dropdown is open with «Πελάτες πίστωσης», search, retail/no-credit choice, «Δεν βρέθηκαν πελάτες πίστωσης» and «Άλλος πελάτης / κάρτα μέλους». LIMITED observed USER VISUAL PASS only for hidden default-OFF controls, customer-dropdown opening and visible empty-state rendering. This is LAB-store evidence, not Διαδόχου acceptance. Physical terminal identity, operator/shift IDs and exact physical client revision are not independently established; LAB POS 2 is the operator display, not terminal proof. No customer/API records were inspected: empty rows do not prove the eligible customer set is correctly empty. No customer selection, settings change, sale/payment/stock/device action or measured financial/control delta is observed or claimed.

Additional owner screenshot received2026-10-08T18:28:31+03:00, image(20261008-152826).png, SHA2563236def57ac308d1dcf6b059a3953ba8f5e9ddb45dfec3880e04c49251bee397: Super Admin Basic POS Designer shows the expanded «Δικαιούχοι έκπτωσης ανά κατάστημα» panel, selected MYWORKSTATION LAB — ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, UNCHECKED «Εμφάνιση δικαιούχων και κάρτας δικαιούχου στο POS», five editable name fields with displayed defaults Κανονική τιμή / Ιατρός / Νοσηλευτής / Νοσοκόμος / Προσωπικό / Πελάτης, and «Αποθήκευση δικαιούχων καταστήματος». Green message «Αποθηκεύτηκαν οι δικαιούχοι για το επιλεγμένο κατάστημα. Κάνε ανανέωση στο POS.» is visible. LIMITED USER VISUAL PASS only for this selected-store settings panel and visible save-success feedback; the photo does not independently establish which preceding action occurred, before/after state, server persistence after reopen, enabled rows or changed labels. Current shown checkbox remains OFF: save feedback alone does not activate it. Exact physical client revision/admin identity unknown; no new financial/stock/control values or deltas measured. This is not ON/rename acceptance. User was directed to tick this checkbox, save and refresh the existing LAB POS; execution/result remains NOT TESTED.

Newest owner observation2026-10-08T18:29:34+03:00: owner says «σωστος» and image(20261008-152923-1).png (SHA256b2bf6ed75c93e7183e81b311ed44536b616d0c871f2520afee30a47e238f7afc) shows the same displayed LAB company/store/operator, connected,93 active products, layout version11, empty cart, displayed total/received/change0. «ΚΑΡΤΑ ΔΙΚΑΙΟΥΧΟΥ» scan input and «ΔΙΚΑΙΟΥΧΟΣ ΕΚΠΤΩΣΗΣ» row are now visible with Κανονική τιμή selected, Ιατρός, Νοσηλευτής / Νοσοκόμος, Προσωπικό and Πελάτης. LIMITED observed USER VISUAL PASS of default-labeled enabled audience/card-row appearance, accepted by the owner. Earlier18:20 OFF view (layout8) and18:28 unchecked settings snapshot are the captured visual baseline; the actual intervening save/refresh gestures and server configuration readback are not independently captured. Layout changed8→11 and quick product slots also differ: do not attribute every layout change solely to audience settings. No enabled doctor/nurse selection, scan, rename, pricing/fiscal/financial action, stock/ledger/control delta or exact physical revision is verified. Do not repeat this completed ON appearance check for documentation. OFF/ON visual appearance and dropdown opening are complete within this bounded scope; residual acceptance below stays assigned.

Same assigned owner codex/pos-audience-credit-settings-20261008 retained; evidence branch docs/pos-audience-credit-user-evidence-20261008. Source PR #1891 / exact-head full CI37796998878 SUCCESS / merge adf6e2595a4a803396451645eba45a78c182b913 and exact healthy deployment verified18:09:55 remain historical source/deployment proof, not identification of the screenshot's client SHA. Release records/PDF PR #1894 / CI37798760349 SUCCESS / merge d37d6aa961e41eb8a079aadb0aa0213b9b0ea60d. This documentation is based on main378aa3c91f9aa16bc9d2814e6ffb3a0b01c1eb15 and preserves the independently owned Workforce work and all Gate3/4/6/8, Diadoxou, TODAY-04 and other assignments.

Residual OPEN / AWAITING LAB: independent central-settings persistence/selected-store isolation and renamed audience display per selected LAB store; actual eligible credit-customer listing/search/selection and retail/reset; restricted-card/live permissions and delayed store-switch acceptance; preserved audience pricing/rounding and fiscal snapshot behavior under the agreed acceptance boundaries. Completed OFF/ON appearance and dropdown-opening inspection is removed from pending work and must not be repeated merely for documentation. No source change or financial transaction is needed for the next visual settings check. Customer accounts remain company-wide; selected-store authorization applies and no store-specific balances are inferred.

Single next action: prepare the required before/after/control record for one selected LAB-store label change, then use the already located Super Admin audience panel to rename a group, save and refresh the same LAB POS for label readback, without a sale. Default-label ON appearance and dropdown opening are already observed; do not repeat them. Actual eligible customer correctness/search/select/reset and permission/store-switch checks remain independent residuals. Manual docs/manual/pos/PASS.md records only the observed visual flow; checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-audience-credit-settings.md. Overall scope remains partial; same owner retained, no named transfer or full PASS.

Historical claim / implementation / release (superseded status, retained evidence)

Owner codex/pos-audience-credit-settings-20261008; claim publication codex/pos-audience-credit-claim-20261008, owner approval17:27:50Athens for public checkpoint/active-list/registries/PDF/source publication and push/merge. New independent scope: opt-in hospital audience/card rows per store, editable audience names, credit-customer dropdown using authorized POS access. Owner screenshot134545 shows permanent hospital controls in Διαδόχου: USER FAIL for new visibility requirement; physical revision unknown. Current main a6579e3; prior live548ef32 independently verified. New behavior NOT TESTED. Gate3/4/6/8, discount IDs/rounding/card hashes, operator card-only rights, fiscal/stock/idempotency/shift guards and TODAY-04/other owners protected. No real-store diagnostic transaction or configuration write. Publish claim before code. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-pos-audience-credit-settings.md. Acceptance: off hides hospital rows; explicit activation and renamed groups preserve pricing; customer dropdown/select/reset/restricted-card/store-switch safety. Customer records currently company-wide; do not invent store membership/balances. CI/local are not LAB PASS.

Implementation 2026-10-08T17:50:30+03:00: source branch codex/pos-audience-credit-implementation-20261008, same owner/page retained; claim PR #1889 / CI 37793179490 SUCCESS / merge c396387cd9e9a9608f8e9f575093dd7231cf6140 was published before source edits. Rebased onto current main5814573, preserving later Diadoxou card USER acceptance. Central Super Admin settings are stored independently in each published store layout, default OFF, with explicit boolean enable and five editable labels (1–60 characters). POS hides hospital rows when OFF; customer dropdown remains available, lists company-scoped active accounts with creditLimit>0 OR balance>0, caps30 and searches within authorized selected-store access. Customer records remain company-wide: no new store ownership/balance inference. Card-only and live customer permission restrictions preserved. Product layout publish/clone/edit/removal preserves each target store's audience settings; incoming operator settings cannot enable or rename. Server blocks non-NORMAL selections/card scans/quotes when OFF; new checkout reads NORMAL when OFF. Reserved fiscal requests retain their saved audience, resolved items, total and label; no fiscal repricing/idempotency changes. Pricing IDs and0.10 line rounding unchanged. Delayed store/catalog/customer/settings responses are discarded; customer selection resets points and retail choice clears identity. Initial POS load resets stale audience selection; existing fiscal continuations use their snapshot.

Local Node20 build:production and client build PASS; server suite1906 PASS /0 FAIL /4 SKIP; preparation/Windows-observer/backup invariants PASS. Local Playwright on actual React components with simulated API PASS: default OFF, renamed enabled groups, credit dropdown/select/retail/error/Escape,1024×600 bounds, card-only gating, delayed-store discard and central selected-store save. Screenshots visually inspected; local/simulated results are not LAB PASS. New isolated PostgreSQL/HTTP E2E added to full CI for central-only writes, default OFF, labels, target settings preservation, rounding, tenant/card-only/live-permission safeguards; no sales/payments created by this new fixture. Full CI/merge/live revision verification pending at PR preparation. New live/LAB behavior NOT TESTED / AWAITING LAB. No live configuration, sale, payment, invoice, stock or device write performed. Protected Gate3/4/6/8/manual PASS and all other assignments retained.

Historical implementation next action (completed by release): exact-head full CI → merge → verify exact healthy deployed revision; only then request bounded LAB acceptance of OFF/ON/rename/dropdown/reset/store-switch using the required before/after record for any state-changing LAB action. No financial test is needed merely to inspect the list. Owner remains assigned until a named handoff.

Publication / handoff 2026-10-08T18:05:57+03:00: source PR #1891, final head2f09c4c88ae1fcee39513ea65ad7f1c982365877, exact-head full CI37796998878 SUCCESS (1917 server tests PASS /0 FAIL plus Windows smoke, production invariants and isolated real HTTP flows including the new audience/credit fixture). Merged mainadf6e2595a4a803396451645eba45a78c182b913; main CI37797448360 SUCCESS. Earlier source head232a2b4b/fullCI37796398552 SUCCESS is superseded by the final compatibility addition, not a separate LAB PASS. General named-customer/member-card search

remains accessible from «Άλλος πελάτης / κάρτα μέλους» in the credit dropdown; local actual-component browser check also confirmed that modal opens.

Central deployment verified 2026-10-08T18:09:55+03:00: guarded Render run37797763766 SUCCESS including exact-production-revision wait. Independent public GET /api/health returned ok=true, version0.22.0+kat-test-pos, exact revisionadf6e2595a4a803396451645eba45a78c182b913. Public Platform Admin HTML references assets/index-DxN7GQrS.js; its current app chunk entry-BU3GSHEr.js (2180291bytes, SHA2560345dcdbeda40f2785807360531576e06f9e23f528685af1f12e4e60fa2dad0e) contains the new audience-settings route, credit dropdown and general customer/member-card option. Read-only deployment/bundle verification only; no authenticated functional or physical LAB PASS. Later main6534dccc53fdd0125b6ad2b6312f327cc6bdf0c8 adds the independently owned Workforce claim/documentation and is preserved in this handoff; deployed production source revision remains the verified adf6e25. Source release LIVE / AWAITING LAB.

Final scope: central opt-in and label settings, credit list and existing general customer access implemented and merged; live/LAB OFF/ON/rename/select/retail/reset/store-switch acceptance remains NOT TESTED / AWAITING LAB. No manual PASS entry is added for CI or simulated browser evidence. No live setting, sale, payment, invoice, stock, customer balance or device operation was performed by this page. Older Gate3/4/6/8/manual and Diadoxou device/card acceptance remain protected; no old transaction is repeated. The same owner codex/pos-audience-credit-settings-20261008 retains the assignment, with implementation branch codex/pos-audience-credit-implementation-20261008; no silent release or second owner.

Historical release next action (superseded by the observed18:20 result): bounded read-only LAB inspection of default-OFF hospital rows and the Customer credit dropdown on the verified deployed revision; subsequent explicit enable/rename tests require the repository's before/after/control record for any state-changing LAB step. Central settings path: https://myworkstation-app.onrender.com/platform-admin → POS Designer → «Δικαιούχοι έκπτωσης ανά κατάστημα» → select the intended published store → explicit enable/labels/save → refresh that POS. No financial transaction is needed for the initial visual/list check. Customer accounts and balances remain company-wide; selected-store authorization and operator restrictions apply.

Current numbered checklist

Η εκτυπώσιμη αριθμημένη λίστα είναι NUMBERED_WORK_CHECKLIST_2026-10-06.md με [PDF](MyWorkStation_Numbered_Checklist_2026-10-06.pdf). Οι αριθμοί της εκτύπωσης αντιστοιχούν στα IDs που εμφανίζονται δίπλα σε κάθε εργασία. Για ολοκλήρωση, ενημέρωσε την ίδια εγγραφή εδώ σε PASS μόνο αφού περάσουν όλα τα συμφωνημένα κριτήρια και πρόσθεσε τεκμήριο· μερικό PASS κρατά το υπόλοιπο OPEN.

Υποχρεωτική καταγραφή ανάληψης και ολοκλήρωσης

Ρητή οδηγία ιδιοκτήτη 06/10/2026: κάθε σελίδα σημειώνει όταν παίρνει εργασία και όταν την τελειώνει.

1. Πριν αρχίσει, διαβάζει το νεότερο main, AGENTS, ενεργή λίστα, PENDING_WORK, αυτό το μητρώο και checkpoint/manual. Υπάρχουσα ανάθεση δεν μεταφέρεται από αυτή τη συγκέντρωση.

2. Κατά την ανάληψη ενημερώνει την ακριβή εγγραφή: κατάσταση ASSIGNED, σελίδα/branch, ημερομηνία/ώρα, συγκεκριμένο υπόλοιπο που αναλαμβάνει και checkpoint/PR. Η ανάληψη δημοσιεύεται στο main πριν αλλαγή κώδικα ή state-changing LAB. Για ήδη δεσμευμένη εργασία απαιτείται ονομασμένο handoff.

3. Κατά την ολοκλήρωση σημειώνει χρόνο, ακριβές scope, PASS/FAIL/NOT TESTED, checkpoint/manual, PR/CI/merge και exact revision όπου χρειάζεται. Μερικό PASS κρατά τα εναπομένοντα OPEN και τον owner. CI μόνο δεν κλείνει εργασία.

4. Στο ίδιο PR συγχρονίζει ενεργή λίστα, pending roadmap, παλιό αριθμημένο μητρώο και το παρόν μητρώο/PDF. Για νέο πραγματικό PASS ενημερώνει και manual. Αφαιρεί μόνο το ολοκληρωμένο υπόλοιπο από το ενεργό pending scope, κρατώντας το ιστορικό PASS.

5. Αναγεννά το PDF: python3 docs/roadmap/generate-open-work-tracker.py. Το PDF είναι εκτυπώσιμο στιγμιότυπο· η Markdown εγγραφή και τα τεκμήρια στο νεότερο main είναι η τρέχουσα κατάσταση.

6. Αν σταματήσει, καταγράφει BLOCKED/υπόλοιπο/επόμενη ενέργεια και ονομασμένη παράδοση. Δεν απελευθερώνει σιωπηρά την ανάθεση.

Προστασία ήδη ολοκληρωμένων

Gate 1–8: διατηρούνται τα τεκμηριωμένα PASS του συμφωνημένου scope. Υπάρχουν αντιφάσεις στον claim board για Gate 6/8: δεν θεωρούνται νέα ελεύθερη ανάθεση και δεν επαναλαμβάνονται δοκιμές χωρίς συγκεκριμένο regression ή ρητή νέα απαίτηση. Οι υπεύθυνες σελίδες συμφιλιώνουν τις εγγραφές με checkpoint/manual. Gate 3 βοηθού παραμένει PASS· αυτόματη πρώτη OCR ακρίβεια είναι ξεχωριστή βελτίωση.

Δεν επαναλαμβάνονται LAB-EXP-001, LAB-EXP-PARTIAL-20261005-A, LAB-EXP-CENT-20261005-A, LAB-EXP-ZEROVAT-20261005-A ή οι πληρωμές τους. Οι παλιές δοκιμές δώρου, τραπεζιών, επιστροφών και κλεισίματος δεν επαναλαμβάνονται για κενά τεκμηρίωσης. Δεν εκτελέστηκε νέα LAB πράξη για αυτό το μητρώο.

Πηγές: docs/roadmap/PENDING_WORK.md, CHECKPOINTS/KAT_ACTIVE_LIST_2026-09-05.md, docs/roadmap/CENTRAL_NUMBERED_WORK_2026-09-28.md και live PR1772/CI4484 ανάγνωση. Απουσία τεκμηρίου δεν σημαίνει ούτε FAIL ούτε ολοκλήρωση. Περιγραφικοί owners δεν είναι νέα assignment και χρειάζονται αναφορά του ακριβούς branch πριν claim.

Αριθμημένες εργασίες 01–36

01 — Εγκατάσταση Διαδόχου Παύλου

Κατάσταση: OPEN

Υπόλοιπο / όρια PASS: Ημερομηνία, ώρα, υπεύθυνος, πραγματικό POS PC και terminal ID.

Υπεύθυνη σελίδα / branch: Δεν μεταφέρεται ανάθεση — έλεγχος τρέχοντος checkpoint πριν claim

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): Διατήρηση παλιάς ανάθεσης όπου υπάρχει· νέα καταγραφή εκκρεμεί.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): Βλέπε υπάρχοντα τεκμήρια PASS· κάθε νέο αποτέλεσμα καταγράφεται εδώ.

02 — Προετοιμασία πραγματικού καταστήματος

Κατάσταση: OPEN / ΥΠΑΡΧΟΥΣΑ ΑΝΑΘΕΣΗ

Υπόλοιπο / όρια PASS: Τελική επιβεβαίωση καταλόγου, τιμών, ΦΠΑ, αρχικού αποθέματος, χειριστών και δικαιωμάτων. Χωριστή αποδοχή από LAB.

Υπεύθυνη σελίδα / branch: σελίδα ετοιμότητας εγκατάστασης — διατήρηση υπάρχουσας ανάθεσης

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): Διατήρηση παλιάς ανάθεσης όπου υπάρχει· νέα καταγραφή εκκρεμεί.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): Βλέπε υπάρχοντα τεκμήρια PASS· κάθε νέο αποτέλεσμα καταγράφεται εδώ.

03 — Software preflight / recovery

Κατάσταση: OPEN

Υπόλοιπο / όρια PASS: Πραγματικό PC, ενεργοποίηση terminal, SOFTWARE PREFLIGHT READY, recovery dry-run και reports.

Υπεύθυνη σελίδα / branch: Δεν μεταφέρεται ανάθεση — έλεγχος τρέχοντος checkpoint πριν claim

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): Διατήρηση παλιάς ανάθεσης όπου υπάρχει· νέα καταγραφή εκκρεμεί.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): Βλέπε υπάρχοντα τεκμήρια PASS· κάθε νέο αποτέλεσμα καταγράφεται εδώ.

Independent subtask POS-TOUCH-OPEN-01: ASSIGNED codex/pos-shift-open-touch-20261008, 2026-10-08T10:36+00:00 — opening form responsive layout only; current real-store USER FAIL/physical revision unknown. Existing broader owners unchanged. No shift/data writes. CHECKPOINTS/CHANGES/2026-10-08-pos-shift-open-touch.md. 10 — Μισθοδοσία / πληρωμές εργαζομένων

Κατάσταση: ΜΕΡΙΚΟ PASS / OPEN

Υπόλοιπο / όρια PASS: Η LAB περίοδος εξοφλήθηκε. Παραμένουν ανεξάρτητη συμφωνία cash ledger, αποδεικτικά τραπεζικών εγγραφών, πλήρεις κανόνες μισθοδοσίας και real-store acceptance. Τα synthetic LAB fixtures δεν είναι λογιστική απόδειξη.

Υπεύθυνη σελίδα / branch: codex/n10-payroll-reconciliation-20261007 — συνέχεια της ίδιας ανάθεσης N10, χωρίς αλλαγή ιδιοκτήτη.

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): 07/10/2026 12:28 Europe/Athens · Συνέχεια του owner-directed N10 από codex/n10-payroll-reconciliation-20261006, branch από main ac4b8bb4fb8995b54e3ed870329d06af2f192e0f. Scope: read-only reconciliation της κλειστής περιόδου 09/2026 και των υπαρχουσών cash/bank εγγραφών, συν ρητά εγκεκριμένα, μοναδικά και μόνο-προεπισκόπησης fictional LAB tests σε μελλοντικό 11/2026 για καλυμμένους κανόνες μισθοδοσίας. Προβλέπεται μόνο synthetic attachment/match test στο ήδη υπάρχον Oct −€13.67 pending row, χωρίς επιβεβαίωση/settlement. Απαγορεύονται replay/νέα πληρωμή, μεταβολή Σεπτεμβρίου, δημιουργία/κλείσιμο payroll period, πραγματικό κατάστημα και νομικές παραδοχές για overtime/absence/leave. Checkpoint CHECKPOINTS/CHANGES/2026-10-07-n10-payroll-lab-acceptance.md. Προϋπόθεση state-changing LAB: claim PR merged και green CI.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): 07/10/2026 12:28 · Read-only baseline επιβεβαίωσε LAB, September CLOSED 7/€313 paid/€0 balance, October DRAFT 7/€13.67 paid/€0 balance, November preview €0/no period, και τέσσερα pending/no-proof bank rows totaling €206.67. Cash shift aggregate δεν ταυτοποιεί τις υπάρχουσες payroll cash StoreTransaction IDs. Καμία νέα LAB μεταβολή ή PASS δεν έγινε. Βλέπε checkpoint· η πρόσθετη αποδοχή παραμένει OPEN.

Read-only follow-up (07/10/2026 14:11 Europe/Athens): The correct /platform-admin entry was confirmed; authenticated scope visibly showed MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. The current employee list has 8 existing employees versus 7 at the 12:28 baseline. No records were changed. The visible Μισθοδοσία control opens an expense-entry form, the employee form has no payroll-rate field, and the actual-hours view says integration is still in progress. No November preview or synthetic record was created; no period/payment/bank/cash action was made. Additional preview acceptance remains NOT TESTED / OPEN. The deployed /api/health response at 14:41 Europe/Athens was version 0.22.0+kat-test-pos, revision b0acab108fb01836664c3dd807267e7bfde83579. See the updated checkpoint.

Additional read-only check (07/10/2026 14:50 Europe/Athens): The exact October −€13.67 row remained without attachment after the visible “Αποδεικτικό” control did not open a file chooser; nothing was selected/uploaded and no confirmation occurred. The selected LAB-POS-02 shift from 26/09 showed two 17:10 payroll expense rows (€100 and €20, cash-shift method), and €120 expenses total, but no StoreTransaction IDs. September shift was not changed or closed; this does not prove exact-ID reconciliation. See checkpoint.

Read-only follow-up (07/10/2026 15:08 Europe/Athens): Correct authenticated /platform-admin entry and scoped **MYWORKSTATION LAB · ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ** Backoffice confirmed. Four pending bank rows still have no attachment (−€206.67 total); October −€13.67 row a2a58e32-ad12-409a-8486-daf3e84b7cdb remains unattached. The matching synthetic PDF is clearly stamped as no-real-payment and not accounting proof; it was not uploaded because both permitted local transfer attempts failed, and no confirmation/settlement occurred. The historical open LAB-POS-02 shift still shows €120.00 expenses in two rows (€100/€20) but no exact cash StoreTransaction IDs; a separate observed open MAIN test shift shows zero amounts/transactions. No record was created, closed, or edited; September untouched. November payroll preview remains NOT TESTED, exact cash IDs and genuine bank proof remain missing. **N10 remains ΜΕΡΙΚΟ PASS / OPEN.** See checkpoint.

Real-store acceptance pending (07/10/2026 17:24 Europe/Athens): NOT TESTED; no normal-store action was performed. Schedule a separate normal-store acceptance, verify the selected store and read-only baseline, and agree the scope before any test. No real payment/confirmation/settlement or September replay/change. Exact cash StoreTransaction IDs, genuine bank-movement proof, and the supported November preview remain outstanding; synthetic LAB material is not accounting evidence. **N10 remains ΜΕΡΙΚΟ PASS / OPEN.**

11 — Εστίαση / TABLE_SERVICE

Κατάσταση: ΜΕΡΙΚΟ PASS / OPEN

Υπόλοιπο / όρια PASS: Μεταφορά/ένωση/split, αλλαγή σερβιτόρου, μερικές πληρωμές, χρεώσιμοι modifiers, πλήρες KDS/ειδοποιήσεις, cross-store και reconnect/idempotency αποδοχή. Τα υπάρχοντα τραπέζια/γύροι/αλλεργιογόνα/Android PASS προστατεύονται.

Υπεύθυνη σελίδα / branch: agent/table-service-layout-takeover-20260927

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): Διατήρηση παλιάς ανάθεσης όπου υπάρχει· νέα καταγραφή εκκρεμεί.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): Βλέπε υπάρχοντα τεκμήρια PASS· κάθε νέο αποτέλεσμα καταγράφεται εδώ.

Physical print/mobile/scanner/bank and broader role/store/module/shift acceptance remain OPEN. Same owner retained; no payment replay.

11/10/2026 — Επικαιροποιημένο υπόλοιπο No33 / OPEN

Προστατευμένα native cancel/reason/Audit, isolated active OFF/ON, price/online visibility, own/all shift, modern transfer, μία NON_FISCAL sale/return και user card/QR/count δεν επαναλαμβάνονται. Νέα εσωτερική επιστροφή RBS PR2290 SOURCE DEPLOYED / AWAITING LAB-USER· full PR/main CI2372/0/0 και guarded exacthealthy a1d67b3 δεν συνιστούν business LIVE PASS. Υποχρεωτικές αιτιολογίες: Λάθος χειριστή / Επιστροφή από πελάτη / Λάθος καταχώρηση. Φορολογική RBS επιστροφή, πραγματικό αρχικό ταμείο/κλείσιμο, φυσική εκτύπωση και ευρύτεροι ρόλοι/εταιρείες/καταστήματα/modules παραμένουν OPEN. Αρχικό προφίλ/καλάθι0 είναι τελευταίο ιστορικά επιβεβαιωμένο, όχι νέα baseline. Owner codex/operator-checkbox-audit-20261009, checkpoint2026-10-11-pos-internal-return-pending-rbs.md.

10/10/2026 09:17 Europe/Athens — OPERATOR-CHECKBOX-01 / PHOTO-CAMERA-EVIDENCE USER PASS

Χρήστος Μάνης επιβεβαίωσε ρητά: «η πραγματική επισύναψη φωτογραφίας, η κάμερα και η εμφάνιση του αποδεικτικού παραμένουν ανεπιβεβαίωτα. εχουν επιβεβαιωθει απο εμενα». Καταγράφεται owner-reported USER PASS για πραγματική επισύναψη φωτογραφίας, χρήση κάμερας και εμφάνιση αποδεικτικού. Αυτά τα τρία σκέλη αφαιρούνται από το ενεργό υπόλοιπο. Οι παλιότερες NOT TESTED/OPEN εγγραφές για αυτά υπερκαλύπτονται από τη σημερινή επιβεβαίωση και δεν ζητείται επανάληψη ή νέα πληρωμή μόνο για τεκμήριο.

Η επιβεβαίωση δεν περιλαμβάνει νέα ανεξάρτητη μέτρηση από τον agent, συγκεκριμένο store/terminal/operator/shift/revision, ποσά, filename, νέο screenshot ή PDF-specific/quality/blur/size/format variants. Δεν συνάγονται νέα financial/stock/Audit deltas ή συνολικό PASS. Ο περιορισμός του agent browser παραμένει μόνο για τους υπόλοιπους ελέγχους, όχι εμπόδιο αποδοχής των τριών επιβεβαιωμένων σκελών. Προστατεύεται το PR2022/PR2025 mounted Payments LIVE UI PASS και το αρχικό αποκατεστημένο προφίλ. Ίδιος owner codex/operator-checkbox-audit-20261009, printed33/tracker35 συνολικά OPEN για native cancel/reason, online αποτέλεσμα, λοιπά controls/τιμές/επιστροφές/μεταφορές/αρχικό ταμείο/κλείσιμο/εκτύπωση, isolated active-only και ευρύτερους ρόλους/εταιρεία/κατάστημα/modules. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-operator-photo-browser-handoff.md.

10/10/2026 — OPERATOR-CHECKBOX-01 / mounted Payments LIVE UI PASS / overall OPEN

Owner codex/operator-checkbox-audit-20261009 retained; printed33/tracker35 OPEN. Source PR2022 head7270614550bca902ffef8465a92898ed37b89269 merged0ab33f3177c32d94f241fa753406aae8ab2e77a0. Full PR CI38028855432 and exact-main CI38029057435 SUCCESS2019PASS/0FAIL/0SKIP; guarded Render38029245686 SUCCESS; independent health ok=true/exact0ab33f31. Fresh own-store LABPOS2 EMPLOYEE POS connected/catalog11/93/cart0/total0/localqueue0. Secure reentry already verified; prior reentry-pending and payment-fix-awaiting entries below are historical.

Bounded LIVE UI PASS: in the same already-open Payments modal, thirdPartyPayment=false removed expense and selected supplier; supplierPayment=false with thirdParty=true removed supplier and selected expense; sameShiftPayments=false disabled cash-from-shift. Bothfalse showed explicit no-payment-access denial and no submit form. Regrant of allthree restored both tabs and enabled cash without closing/reopening/reloading operator modal. Original23 Details independently restored, orders=true previously verified and unchanged; no role/credential changes. Actual mounted automated test separately proves draft amount preservation; no LIVE amount entered. No financial/product/stock/shift/fiscal submit, declaration or camera permission.

Photo NOT TESTED: enabled PC photo/PDF controls observed with correct accept types, but first filechooser event failed retained_data_restricted and reset browser runtime; no successful selection/upload evidence. Existing tab reacquisition then reported native credential state cannot safely resume/start new browser runtime. Stop browser probing; do not infer photo functional FAIL, bot block or upload success. Last verified profile is original and last verified cart0; Payments remains open with restored rights, later UI unobserved. Synthetic image is not a real financial document. Camera, photo/PDF quality pipeline and attachment persistence remain OPEN. Native cancel/reason, online final outcome, price/return/payment/transfer/initialcash/closing/physical print, isolatedactive-only revocation, role/company/store/module breadth and financial/stock/control/Audit deltas remain NOT TESTED. No overall PASS.

Evidence CHECKPOINTS/EVIDENCE/operator-payment-original-20261010.jpg and operator-payment-denied-20261010.jpg; checkpoint CHECKPOINTS/CHANGES/2026-10-09-operator-checkbox-audit.md. Next: recover supported browser runtime/session, resume remaining same-owner controls from original baseline; do not replay accepted financial transactions.

Κατάσταση: ASSIGNED / PARTIAL LIVE PASS / PAYMENT MODAL LIVE UI PASS / PHOTO-CAMERA-EVIDENCE USER PASS / OPEN — OPERATOR-CHECKBOX-01

2026-10-09T22:19:36.611256+00:00 — OPERATOR-CHECKBOX-01 bounded LIVE PASS / BROWSER HANDOFF / overall OPEN

Owner codex/operator-checkbox-audit-20261009 retained, printed33/tracker35 OPEN. SourcePR2002 finalhead d97f3f46c682304e757e19e53421abd43546c3e4 CI37996331972 SUCCESS2009/0FAIL/0SKIP, merge7ebfab4932e535ef2bf3ea5a226897cf17ab323d. MainCI37996674260 attempt1 cancelled by documentation-only55ba485b; attempt2 full build-and-test SUCCESS2009/0FAIL/0SKIP, no bypass. Docs-onlyCI37996927666 skipped build/deploy, not source proof. Guard37997476523 SUCCESS pinned7ebfab49 with newer documentation-only main; independent health exact7ebfab49 ok=true at22:11Z. Independent invoice owner/source/records and historical Gate8 PASS preserved.

Fresh canonical Platform Admin -> exact MYWORKSTATION LAB heading -> testing-store fullBackoffice -> explicitly selected ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ in commerce -> ordinary EMPLOYEE LAB POS2. Revised form23details (21POS+active+posAccess),1orders,0Other:55 removed/24 retained observed LIVE. Original visible baseline matches before saves. Restrictive23+ordersfalse and granted23+orderstrue independently persisted/reopened exact. Restrictive own-store POS enters with existing open shift/cart0: both customer entries hidden, STOCK/Barcode/invoice/return/payments/CARD/IRIS/CASH absent, Transactions/MyPayments/Close disabled. Grant without operator document reload restores those entries and turns the already mounted synthetic unknown-scan denial into Online search button, keeping query/cart0. Empty quick corner while edit denied does not open editor or add product. These are bounded UI PASS; successful financial/product/shift/print functions are not inferred.

Read-only Online GET for synthetic OPERATOR-CHECKBOX-NO-MATCH-20261010 was clicked, but final result was not observed. Expected-result wait returned protected_command_failed; one ordinary fresh AX also blocked and requested manual handoff. No captcha/bot/403 diagnosis, retained-data access, lower-level recovery or lookup PASS inferred. Current browser block prevents remaining operator UI tests. Original23details+orders independently restored exact after save; roleEMPLOYEE/active/POS access unchanged, no credential or economic/product/stock/shift submission. Last observed cart0 before GET; after-block cart state and independent financial/stock/control/Audit deltas/IDs NOT TESTED. Evidence CHECKPOINTS/EVIDENCE/operator-final-live-20261010.json plus operator-restricted-7ebfab49-20261010.jpg and operator-restored-7ebfab49-20261010.jpg.

Completed bounded cleanup/count/persistence, current customer entry denial and dynamic online-button grant are removed from current pending residual. Remaining: recover observation through owner manual takeover, actual current card-only/layout/linebarcode/native cancellation checks, barcode/price/return/payment/transfer/initial-cash/close-shift/physical-print acceptance, active/POS-access revocation with secure reauthentication, role/company/store/module breadth. transferAmount has a real server authorization guard but no modern POS transfer entry; functionality acceptance OPEN. No second owner or full PASS. Single next action: owner takes over existing operator tab to recover observation; resume this same scoped audit with original profile baseline and protect all prior PASS. Manual docs/manual/workforce/PASS.md and synchronized tracker/numbered/pending PDFs accompany this handoff.

Υπόλοιπο / όρια PASS: Owner/manager/ταμίας/εργαζόμενος/SA, εταιρεία/κατάστημα και άδειες ανά νέο module. Gate 8 PASS δεν καλύπτει κάθε επέκταση.

Υπεύθυνη σελίδα / branch: codex/operator-checkbox-audit-20261009, expanded modern checkbox audit; historical Gate8 and other module owners preserved.

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): 09/10/2026 23:25 Europe/Athens — explicit owner approval for every operator checkbox in two LAB POS2 screenshots. Remove inert controls or connect supported runtime with granted/denied/revoked evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-operator-checkbox-audit.md. No financial/stock action or credential changes.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): 09/10/2026 23:52–23:54 Athens bounded LIVE PASS: editor25+1+0 checkbox counts, active filter2→3→2 and ordinary LAB POS2 STOCK header after refreshed rights. SourcePR1994/head5331ab09/fullCI37987782922:2003PASS/0FAIL/0SKIP; main62fe51ea CI37988859210/guard37989197359 SUCCESS, exact healthy.53 inert controls removed; legacy values preserved in isolated save test. Checkpoint2026-10-09-operator-checkbox-audit.md, matrix, evidence operator-checkbox-live-20261009.json, workforce/PASS.md. No live profile save, grant/revoke or transaction. Next: action-time confirmation for26-control LAB POS2 temporary grant/revoke/restore acceptance; wider role/tenant/module tests OPEN.

10/10 00:11 Athens continuation: Explicit26-control user approval received. Restrictive23 flags/ordersfalse persisted; POS stalled at cash-overview permission denial. Exact original profile restored. Scoped minimal shift-status + visibleerror/retry implemented,16 targetedPASS/buildPASS; fullCI/healthy/newLIVE pending. Economic/control deltas NOT TESTED. Same owner retained.

10/10/2026 00:35 Athens — OPERATOR-CHECKBOX-01 bounded LIVE PASS / customer entry FAIL / fix awaiting LAB

Owner codex/operator-checkbox-audit-20261009; printed33/tracker35 remains OPEN. PR1998 fullCI37992152221 passed2007/0FAIL/0SKIP, mergec0f1ce16e602fb5c4363edb3bb86ae054bb59743; mainCI37992992250 and guardedRender37993299420 SUCCESS. Independent exacthealth observed21:28Z. New form24detail (22POS+active+posAccess),1orders,0other:54 inert controls removed from79,25 retained. Restrictive22flags+orders saved/re-read, ordinary LAB POS2 enters emptycart POS rather than endless shift check. STOCK/Barcode/invoice/return/payment/CARD/IRIS/CASH entries hidden; operator Transactions/MyPayments/Close all disabled. Full financial/stock/control deltas NOT TESTED; no economic/stock/shift/fiscal write or credential change.

Customer entry FAIL: customersPos=false hides bottom button but top credit-customer dropdown still opens. No search/selection or customer record disclosed. Card-only instruction observed. Original24details+orders restored and independently compared exact. Prior quick-button editor grant opened/cancelled without layout save and restored on62fe51ea. Customer denial CSS now targets both actual entries; existing server guard unchanged. FullCI/exacthealthy/denied+granted LIVE required. Pending: remaining per-control runtime/physical actions, active/posAccess revocation, role/store/company/module breadth. Same owner retained; no financial replay or Manager promotion.

2026-10-09T21:48:54.890885+00:00 — OPERATOR-CHECKBOX-01 observed behavior fixes IMPLEMENTED / AWAITING CI + LIVE

Same owner codex/operator-checkbox-audit-20261009 / printed33 tracker35 OPEN. Prior minimal-shift and CASH visibility bounded LIVE PASSc0f1ce16 retained. Customer denial PR2000 fullCI37994579202 SUCCESS, merged d358b9e0dd9038d776e58ce1d1439d306d4ad6e0; new deployed customer proof pending. Grant phasec0: Barcode registration modal opens, payment tabs enabled; operator Transactions/MyPayments/Close enabled, actual read-only ledger loads4historic CASH rows. Existing stale shift from07Oct keeps cash-from-shift disabled despite sameShift true, as required; no closing/opening. Local SKU2270 qty1/price1 showedstock-10 and linepriceeditor, nopriceapply. Description clicknoeffect; undefined callbacks proved. Cart CLEAR after granting still consumed cached deniedcatalogflags and cleared without capturedconfirmation/reason: behaviorrefresh LIVE FAIL, native dialog API additionally unavailable due credential protection. No confirmation/reason PASS; no financial/stock/product/shift write. CART_ITEM_ADD/CART_CANCEL Audit effects/IDs and financial/control deltas NOT TESTED. Cart0 restored; original24details exact and ordersunchanged.

Implemented bounded observed causes: runtimeAccess passed into mounted POS behavior flags (confirm/reason/cardOnly/online alias/layout edit) without catalog reload/remount; existing server guards unchanged. Remove unimplemented description checkbox/action/dead editor, preserving stored editDescription. Linebarcode opens existing store-scoped registration modal filtered bySKU, no new API. New inventory55removed/24retained:21POS+orders+active+posAccess,23details+1access+0other; these new counts AWAITING LIVE. Actual React regression verifies grant/revoke guard callbacks while cart remains mounted, blank reasonrejection, card-only and online UI updates, existingbarcodequery and no product/financialwrites;8targetedPASS and frontendbuild13.57sPASS, full preparedsuite2001tests/1997PASS/0FAIL/4isolated-DBskips. Existing invoice/assistant lifecycle regression preserved. FullexactheadCI/main/guard/exacthealth then LIVE required. Next: finalrevisedform and restrictive/granted controls/restoration; active/POSaccess/financial/physical/role/tenant/module breadth OPEN.

08Oct17:14:23Athens owner confirms a fresh guided download after sourcePR1885/fullCI37785515776/healthy b8632dbefbde0734dfc33a0d5d06bef387241872.17:15:32 reports «η σύνδεση και ο φάκελος ελέγχθηκαν» after existing Test;17:16:47 reports «αποθηκεύτηκε εκκίνηση μετά από τη σύνδεση» after selecting readiness/logon and Save. LIMITED USER PASS of reported connection/folder check and visible successful save message only, superseding the16:19 no-response failure for the new download. Physical package SHA, shortcut existence/contents, remembered preference after reopen, Windows-login startup, desktop recovery and five-minute installer timing remain NOT TESTED.17:17:38 owner clarifies the blue Writer is not open; do not claim this save occurred alongside an active Writer, or fresh ONLINE. Next: when Kiosk is not issuing a sale and no other Writer/uncertain request exists, one explicit Start and existing BackOffice ONLINE readback; no new Pair, reboot, sale or card retry for documentation. 08Oct17:18:19Athens owner confirms «ναι τώρα άνοιξε» after the requested single explicit Start: LIMITED USER confirmation of blue Writer window opening only. Fresh ONLINE, persisted startup/login and desktop recovery remain unobserved. Next read-only action: existing BackOffice→RBS→Refresh→WRITER ONLINE, without a new sale. 08Oct17:20:35Athens owner attachment image(20261008-142027).png visually inspected: correct Diadoxou BackOffice/store URL cmulmjjoc000qqlbf2bn2ifj0, WRITER ONLINE and real heartbeat last communication08Oct17:20:15. LIMITED observed USER/LIVE PASS of fresh ONLINE after the reported single Start, not Windows-login startup, desktop recovery, simultaneous save-with-active-Writer, fiscal/payment/stock reconciliation or five-minute timing. Attachment SHA256 e944180ddd8956f3588a03070484ce6b94c95b1cd2c3b3b908102d48be7616c3. No new sale/reboot/Pair or second Start requested; keep blue Writer open and close only setup if desired. Original codex/remote-install-wizard-20261005 owner and other assignments retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-08-remote-install-startup.md.

08Oct16:21Athens owner explicitly requests a fast installation guide after16:19 «ΠΑΤΗΣΑ ΚΑΙ ΔΕΝ ΚΑΝΕΙ ΤΙΠΟΤΑ» for saving startup. Continue the existing guided-launcher owner codex/remote-install-wizard-20261005, implementation branch codex/remote-install-startup-20261008, bounded startup-preference subtask only. Current code disables save after Start and requires the active Writer singleton for saving shortcuts, so the installer forces a stop/recheck cycle. Scope: retain verified setup state, allow safe status check and reversible current-user shortcut preference while the same Writer runs, save selected startup preference before one explicit Start, and show a clear saved/failed status. Pair/replacement credential and actual Start/Writer keep their singleton protections. No fiscal/request/payment/data/permission change, no automatic pairing/starting on GUI open. New code/device acceptance NOT TESTED;5-minute install remains unverified. ClaimPR1884/greenCI37784036256/mergefb4f23b published before edits. Implementation08Oct: existing verified setup state survives explicit Start; selected same-user startup preference is saved before that one

Start, and saved preference is loaded on reopening. Preference writes have their own mutex, so saving/removing them does not stop the Writer. Safe status-only Test can run alongside the Writer; Pair and actual Start retain the original singleton. Desktop «MyWorkStation - RBS Connector» uses the unchanged store-checked Start-Connector runner for manual recovery. No automatic restart after a crash/close, no service, no pairing or request claim on GUI opening. Local Node20 full server suite1904PASS/0FAIL/4SKIP and build:production PASS; package exact-byte/credential-free test1/1 PASS. Windows5.1 smoke cannot run in this Linux sandbox and is required in CI. The unrelated build-generated kiosk-reports-audit.js diff was restored; no runtime fiscal/server/UI routes were changed. SourcePR1885/head62c551b41b2e0521b5a48853afc9775485ea2410/fullCI37785515776 SUCCESS (Windows5.1 actual GUI handlers, held-Writer shortcut/status guards, server/build/invariants/isolated HTTP E2E), mergedb8632dbefbde0734dfc33a0d5d06bef387241872. AI-CC-LIMITS — AI Command Center όρια PASS

10 Oct 2026 20:48 Athens — No40 Workforce initial-load reconciliation / bounded Stock audit readback ASSIGNED; OPEN

Same owner codex/n40-full-twin-navigation-audit-20261010. Fresh browser health af36b4910a59a571885f36b1f4b2fbf3d896337c; mainCI38072060986 / guarded deploy38072264270 SUCCESS. Read-only Workforce entry at17:45:59UTC initially displayed “Δεν φορτώθηκαν τα δεδομένα”, then automatically rendered7 LAB employees/3roles/2rules/3templates without a second request or source change. Attempt to click “Επανάληψη” found no matching button and performed no action. Two trace IDs n40-cd2e3742f1c04100a24c52762d2f49dc and n40-8d825d4165324c21a8eee4dbf87f6d69 correlate server304/Fetch200, exact LAB company/store matches. Normal close returned same LAB Twin. This supersedes the earlier persistent-loading-failure interpretation, not the original observation. LIMITED read/loading PASS only, not workforce rules/payroll/permissions or full data isolation. Initial error-style flash remains a presentation observation; company-wide2store metadata in creation form remains outside the accepted read-only list scope. No employee/module change, card/invitation, analysis or payment.

Before new source: claim independent fixed-window historical support Audit readback under original No40 owner. Existing /auth/security latest30 lacks old15:26Stock sequence. Add own-SuperAdmin-only fixed10Oct12:00–12:30UTC successful ACCESS/EXIT records for exact LAB device label; bounded output event/time/success only, no IP/session/email/user agent/credential or business data. Existing authentication/tenant/2FA/session safeguards stay intact. Add explicit read-only button to existing No40 audit screen; no new account or support session, no automatic replay or PASS. Source/readback NOT TESTED until green CI, guarded exact release and actual UI read. Stock USER6097485640 and prior phases1–14/request403/revocation401 PASS protected. Full No40 OPEN. Next single action: implement and inspect the bounded historical readback.

10 Oct 2026 20:33 Athens — No40 five transitions / six exact GET correlations: LIMITED LAB PASS; OPEN

Owner codex/n40-full-twin-navigation-audit-20261010 unchanged. Source PR2145 head39da5f1 CI38070860861 SUCCESS, merge/release23abcfa0c8c739574e144c827898ef09ee0a7897; main CI38071116248 and guarded deploy38071354640 SUCCESS. Render dep-db5782142hec73fv3ik0 LIVE17:22:55UTC; independently observed browser /api/health exact revision before tests. Source also restores the full active-list history lost by concurrent main changes, retaining their new receipts.

Actual browser20:30:49–20:32:27Athens: target MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ only. POS -> Checks with locked company/store; EFTPOS -> Auto CashCheck; Cash -> same finding-dependent Auto CashCheck; Personnel -> WorkforceV2; Cameras -> Video connection settings. Each normal top close returned to Full Digital Twin with the same selected LAB. Six already-issued GET trace IDs matched exactly in Render server records; all company/store matches true, invalid/truncated false. POS/check-packages, EFTPOS/daily, Cash/daily, Personnel/module metadata server200. Personnel/workforce read and Cameras/video-connection server304 with browser Fetch200 (HTTP cache revalidation), explicitly preserved rather than mislabeled exact equal status.

LIMITED PASS covers these observed destinations, normal-close selection persistence and these six scoped requests. No proof of all HTTP traffic, tenant enforcement, module/license denial or delayed-response invalidation. WorkforceV2 showed “Δεν φορτώθηκαν τα δεδομένα” despite its two traced completions: UI data loading remains an OPEN finding, no screen-wide PASS. No analysis execution button, sale/payment, staff/stock/license mutation, email or camera command was invoked. Existing Auto CashCheck read presentation is not a new user-triggered analysis execution.

Stock USER visual6097485640 remains protected and was not repeated. Security's latest30 audit window did not include the old15:26Athens Stock sequence; old Stock support audit NOT TESTED, no attribution from other owners' events. Prior phases1–14 and restricted EMPLOYEE403/own-token401 acceptance remain unchanged. Other tenant/module/revoked-store/race/unavailable-source/client-asset criteria remain OPEN / NOT TESTED. No40 is OPEN.

Evidence: CHECKPOINTS/EVIDENCE/n40-read-trace-20261010/five-transition-correlations.json. Actual screenshot saved n40-transition-proof-1791653574664.jpg; no credentials or business payload in correlation evidence.

Κατάσταση: OPEN / ASSIGNED / LIMITED BROWSER NAVIGATION + RESTRICTED PLATFORM ROLE / OWN-SESSION REVOCATION LAB PASS; remaining request/tenant/module/race acceptance NOT TESTED; phases1–14 CLOSED

Υπόλοιπο / όρια PASS: Πέντε assistant-browser tile/normal-close round trips και protected Stock USER visual sequence επιβεβαιώθηκαν. Five restricted EMPLOYEE Platform GET denials403 and own-session old-token401 are now LIMITED LAB PASS. Five transitions / six exact scoped GET correlations additionally LIMITED PASS on23abcfa0. Stock request/audit, all-traffic isolation, network races and remaining tenant/module/role/revocation cases stay NOT TESTED; WorkforceV2 UI data loading remains OPEN. Δεν ανοίγουν ξανά οι οπτικές αποδοχές 1–14.

Υπεύθυνη σελίδα / branch: codex/n40-full-twin-navigation-audit-20261010 — explicit owner assignment for printed40, 10/10/2026.

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): 2026-10-10T10:51:38+03:00 — N40-NAV-CLAIM-20261010; Full Digital Twin six-tile navigation only: selected-company/store handoff, safe invalidation and return to the same Twin. CHECKPOINTS/CHANGES/2026-10-10-n40-full-twin-navigation-audit.md; PR #2040. No takeover of visual phases1–14, AI-CREDITS-01, inventory/workforce/video/invoice business flows or other owners.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): 10/10/2026 19:25 Athens — five EMPLOYEE Platform GETs403 and own-session old-token401 matched server traces; LIMITED LAB PASS on2e1f4afe. Other request/tenant/module/race and Stock audit criteria OPEN. CHECKPOINTS/CHANGES/2026-10-10-n40-backoffice-fixture.md.

10 Oct 2026 19:25 Athens — No40 restricted Platform GET denial / own-session revocation LIMITED LAB PASS; OPEN

Owner codex/n40-full-twin-navigation-audit-20261010 unchanged. User completed mandatory final-password change after 19:23:26 reply. Fresh cloud Chrome tab22 visibly showed “Ο προσωρινός κωδικός αντικαταστάθηκε μέσω της κανονικής διαδικασίας” and read-only controls, so the mandatory-password gate was no longer active. No credentials entered/read by agent. Fixture n40.backoffice.20261010@myworkstation.invalid, EMPLOYEE, MYWORKSTATION LAB cmtpopbgk000prhb5qc60zxus; exact checker store ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru. No POS shift/item/SKU/quantity/payment (N/A); no business/device/permission/module changes.

Before probes: latest Render dep-db56a7vlot8c73dshc0g LIVE, finished16:19:24UTC; independent browser /api/health ok:true/version0.22.0+kat-test-pos/exact revision2e1f4afe7d7eca6803f39c81d95ab19a70cd01f7. No deployment by this page. Browser checker session originated with released PR2133; loaded client asset revision not independently attested. Current main read2e1f4afe. Preserve other owners' concurrent work.

One read-only five-GET batch at16:24:18.968–16:24:19.734UTC returned five403s. Then normal own-fixture-session logout and one retained-old-token GET returned401 at16:24:27.900UTC; private fixture session cleared, login form shown. No other session revoked. Business response bodies discarded by released checker; no response data, token or passwords exported.

Observed probe	HTTP	Server role	Exact client/server trace ID
POS	403	EMPLOYEE	n40-1f3a54d0e54a4ed79bf350055929cd76
EFTPOS / Ταμειακές	403	EMPLOYEE	n40-530b80fbc344472c85fa2451c1b35622
Ταμείο	403	EMPLOYEE	n40-273a126929e046efb7eab53ac679aa44
Modules προσωπικού	403	EMPLOYEE	n40-b8310bfce5404ea9bd69281db796c11f
Κάμερες	403	EMPLOYEE	n40-1a1f37ce97264c22b49bfdeb7619a664
Own-session old-token probe	401	null	n40-21f107e4757c4fa4a5a9f28516721e5e

Each exact trace matched one Render server record: side server/source correlation-header, methodGET, company/store IDs exactly target, companyMatches/storeMatches true, no invalid/truncated scope; roleEMPLOYEE on403, role null on401. Sanitized evidence

CHECKPOINTS/EVIDENCE/n40-backoffice-fixture-20261010/restricted-server-correlations.json and screenshot n40-restricted-results-1791649502689.jpg. This is LIMITED LAB PASS only for denial of these five Platform/SuperAdmin routes to this EMPLOYEE and rejection of this one session's old token after logout. It is not module-license denial, direct Workforce business endpoint authorization, cross-company/store rejection, positive authorized access, or six Twin-destination request isolation. DB/audit/session-count deltas NOT TESTED.

No40 remains OPEN. Preserve phases1–14, Stock USER6097485640, five prior normal-close navigation roundtrips and disabled-POS denial without repetition. Still outstanding: six-destination attributable request isolation, authenticated tenant/module negatives beyond this batch, stale/network race cases, existing Twin client attestation and Stock support-exit Audit. No39/internal stock/business calculations outside scope. Next action: obtain per-transition client/server-correlated traces of the existing five destinations without executing analyses or commands, then remaining negatives/races and Stock audit readback; do not replay the Stock USER visual. Password/login handoffs now historical and completed; do not recreate/reset fixture or repeat this batch only for documentation.

10 Oct 2026 18:54 Athens — No40 Backoffice fixture created / first login observed / final-password HANDOFF / OPEN

Same owner codex/n40-full-twin-navigation-audit-20261010 retained. Earlier PR2135/main c8363aeab734f775c0f66d45a85af7664c7d10ab recorded absent fixture and empty creation form. After user manual creation and reply etoimo18:37:31Athens, current browser22 /platform-admin/n40-audit visibly reported: Δημιουργήθηκε ο περιορισμένος χρήστης. Στην πρώτη σύνδεση απαιτείται αλλαγή προσωρινού κωδικού. It also reported the account already exists and does not allow reset/update. Do not recreate this user or request the old POS PIN. Fixture is n40.backoffice.20261010@myworkstation.invalid, EMPLOYEE, company MYWORKSTATION LAB cmtpopbgk000prhb5qc60zxus; checker targets only ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru. No Employee link or invented per-store User grant.

One secure browserAuth existing-password login returned submitted; subsequent fresh rendered AX positively showed Σύνδεση μόνο του περιορισμένου χρήστη στην τρέχουσα καρτέλα and the mandatory Αλλαγή προσωρινού κωδικού form. No credential entered/read/reconstructed by agent. Screenshot CHECK POINTS/EVIDENCE/n40-backoffice-fixture-20261010/n40-backoffice-password-gate-1791647700884.jpg shows empty new-password/confirmation fields. Creation and first-login preparation confirmed in UI only; no independent DB/session-count/audit delta, no API password-gate denial or backend role/module/tenant/revocation PASS claimed. The fixed role/company predicate is evaluated by the released login component; no protected payload/token export. Native-credential protection was not bypassed. Setup/auth observations only, not completion of No40 acceptance; no new manual acceptance claim.

Latest Render readback18:54Athens still lists dep-db55ckad0e5s73e8s6dg LIVE, revision9d3424edfe36092a343a761b96dda8dfdc77bacd / PR2133; original full PR/main CI38062302930/38062542764 and guarded38062765829 SUCCESS remain published. No source change or deployment in this continuation. Current main9516bb44438614a9b19a664fdaa6964f5b233853 read before documenting; preserve concurrent owners. Browser terminal Chrome cloud22; operator fixture EMPLOYEE; no POS shift/item/SKU/quantity/payment action (N/A). No sale/payment/stock/staff/license/device/analysis/email or other account/session edits by agent.

Single next action: user manually enters and confirms a different final Backoffice password (minimum10 characters), then submits Αλλαγή κωδικού in the already-open same tab. Browser policy requires handoff before any new credential entry/confirmation/submission. Keep the tab open: fixture session is private per-tab memory, reload loses it. Agent resumes only after fresh public password-change completion/identity evidence, then executes fixed five read-only LAB role GETs plus own-session logout/old-token GET and correlates visible trace IDs with server logs. Do not treat responses while the temporary-password gate is active as role/module denial evidence.

No40 OPEN: actual six-destination request isolation, authenticated role/module/tenant/revocation, race cases, existing Twin client attestation and Stock support-exit Audit remain NOT TESTED. Preserve phases1–14, Stock USER6097485640, five earlier roundtrips and PR2111 disabled-POS denial without replay. No39/business inventory calculations outside this assignment. Checkpoint

CHECKPOINTS/CHANGES/2026-10-10-n40-backoffice-fixture.md; prior handoffs are historical and superseded only for fixture absent/login-pending status. Assignment stays with original owner.

10 Oct 2026 18:17 Athens — No40 released restricted Backoffice fixture form / credential HANDOFF / OPEN

Same logical owner codex/n40-full-twin-navigation-audit-20261010 retained, source branch codex/n40-restricted-backoffice-fixture-20261010. Claim PR2129/main e5c4b76e CI38061572656 SUCCESS; source PR2133 final5fc52ff2847034648a7ae098c1d998e2072a1faf CI38062302930 SUCCESS, confirmed merge9d3424edfe36092a343a761b96dda8dfdc77bacd. Main fullCI38062542764 SUCCESS and guarded Render38062765829 SUCCESS; dep-db55ckad0e5s73e8s6dg LIVE15:16:17UTC. Guard health15:16:37UTC and independently rendered browser /api/health both ok:true/version0.22.0+kat-test-pos/exactrevision9d3424ed. No guard bypass or direct Render trigger.

Actual read-only preparation: fresh browser opened additive /platform-admin/n40-audit, visibly named n40.backoffice.20261010@myworkstation.invalid / EMPLOYEE / MYWORKSTATION LAB → ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. One normal authorized fixture-status GET rendered the creation form: fixture absent, both new-password fields empty, no creation or credential submission performed. Screenshot CHECKPOINTS/EVIDENCE/n40-backoffice-fixture-20261010/n40-backoffice-empty-form-1791645430689.jpg. This confirms deployed form readiness only, not fixture creation/authentication/backend-role/session acceptance or a new LAB PASS. No new manual claim. The User model is company-scoped; no per-store grant is invented. Only the checker targets store cmtpopbgo000trhb5ng9ytiru; cross-store restriction remains NOT TESTED.

Single next action is user manual browser handoff: enter/confirm a temporary Backoffice password for this new fixed account and submit creation; sign in as that account and complete the existing mandatory replacement with a different final password. Agent must not enter/read/submit new credentials. Keep this tab open (private session memory; reload requires sign-in again), return control after the public signed-in state. This is not the previous POS PIN. After fresh non-secret identity confirmation, agent executes the fixed five LAB GET checks and own-session logout/old-token GET, matching each visible correlation ID to the sanitized server trace; an unexpected status stops the batch. No sales/payment/stock/staff/license/device/analysis/email operations, no other account or session edits.

No40 remains OPEN. Protected phases1–14, Stock USER6097485640, PR2092 five roundtrips and PR2111 disabled-POS browser denial remain accepted without replay. Actual six-destination request isolation, authenticated Backoffice role/module/tenant/revocation, race cases, existing Twin client-revision attestation and Stock support-exit Audit remain NOT TESTED until observed. Independent inventory calculations/No39 are not reopened. All other owners/assignments preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-backoffice-fixture.md. Tracker PDF places the preserved No40 historical notes under its actual AI-CC-LIMITS row, rather than the unrelated Voice Assistant row; no other owner's words or state changed.

Ιστορικό No40 — 2026-10-10T10:51:38+03:00 — N40-NAV-CLAIM-20261010 / AI-CC-LIMITS / ASSIGNED / AWAITING IMPLEMENTATION AND LAB

Same conversation that created audit PR2040, now explicitly instructed «ξεκινα» to implement its findings. Owner codex/n40-full-twin-navigation-audit-20261010. Bounded six-tile navigation, selected-store handoff/return/invalidation only. Source inspection found generic POS/EFTPOS/Cash callbacks and stale-selection fallback; this is not proof of a server-side data leak. Preserve visual phases1–14 and every other assigned module. Source fix and all authenticated LAB navigation tests NOT TESTED. No sales, payments, stock, staff, fiscal, camera or billing mutation. Claim publication requires this PR final green CI and main merge before application changes. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-full-twin-navigation-audit.md.

Ιστορικό No40 — 2026-10-10T11:06:54+03:00 — N40-SELECTION-GUARD-20261010 / SOURCE / AWAITING CI AND LAB

Same logical owner codex/n40-full-twin-navigation-audit-20261010; implementation branch fix/n40-twin-selection-20261010. Claim PR2040 merged0618764ab1beb13e1047780ef9bdc41d59a17dfc after exact head CI38036258928 SUCCESS. First causal selection patch only: exact company/store pair, latched initial selection, fail-closed unavailable message with no six-domain actions, in-memory parent retention across Command Center close/manual reopen and reset on session clearing. No silent first-store fallback for remembered invalid selection. No new persistence, token mechanism, API, authorization, business action, CSS redesign or device change. Local dependency-free Node22 helper tests8/8 PASS; Node20 mounted real-parent tests and existing CC regressions run separately below. Not authenticated LAB or visual acceptance.

Residual OPEN: explicit selected-store handoff for POS/EFTPOS/Cash, automatic return from all destinations, same-tab Stock support-navigation return, data-source races, server role/module/revocation breadth and all six authenticated LAB transition tests. Manual reopen retention is not automatic return or full page reload persistence. Visual phases1–14 and all other owners remain protected. Central PDFs preserve other owners latest reports; candidate generation from prior claim succeeded but publication still PENDING. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-selection-guard.md. No manual PASS.

Ιστορικό No40 — N40-SCOPED-NAVIGATION-20261010 — canonical destinations / SOURCE / AWAITING CI AND LAB

Same owner codex/n40-full-twin-navigation-audit-20261010; source fix/n40-twin-navigation-20261010. Prior claimPR2040, selectionPR2046 and handoffPR2047 are merged. This continuation carries the exact company/store to the six Full Digital Twin destinations, locks scoped entry filters/refresh/export and returns to the same Twin on close; Stock retains the existing support exchange with a non-secret, one-use actor-bound return hint. Late destination/device responses are rejected. Canonical central entry and visual phases1–14 are preserved. No business flow, authorization, API, schema, financial/stock/fiscal/camera/billing mutation. Local pure helper tests PASS; supported Node20 mounted/full CI and authenticated LAB are separate. Full40 OPEN; no manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-scoped-navigation.md. Final runner/PR/CI/revision evidence will supersede only the pending source-validation status here.

Ιστορικό No40 — N40 central-entry correction — Node20 preparation / AWAITING FULL CI AND LAB

Same owner codex/n40-full-twin-navigation-audit-20261010, PR #2065. Preparation run 38047290291 executed eight focused suites: 74 PASS / 0 FAIL / 0 SKIP on Node20, then Work frontend build succeeded. Exact main4fdba151 was merged into this branch without force, preserving other owners. Central Cash/Checks are explicit normal entries; Twin entries remain pinned to the selected store and origin-aware close. New mounted central Checks and strengthened Cash selector/refresh regressions retain all prior tests. Temporary N40 preparation/provenance workflows and applier are removed from the resulting tree. Normal full CI, exact deployment and authenticated six-tile LAB/real Stock return remain required and NOT TESTED. Historical unsupported Stock-log discrepancy is not claimed resolved; independent capacity timing test is untouched. No business, fiscal, stock, staff, camera, permissions, licensing, production or LAB state changes. No manual PASS; full40 OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-central-entry-compatibility.md.

Ιστορικό No40 — N40 full source CI passed; concurrent documentation reconciled / LAB OPEN

Same owner codex/n40-full-twin-navigation-audit-20261010, PR #2065. Normal full CI 38047423768 on ab4c5ef3696014db0d40f363d05b9f4b474f16b7 completed SUCCESS, including server suite, Work build, Windows and production safety invariants, isolated PostgreSQL archive import and real HTTP E2E. No tests or gates were skipped to clear earlier failures. This is source validation, not real LAB acceptance.

Concurrent main 1069f6cd78c922f90fb33668dbbbe8d2df0850c7 contains documentation/evidence changes only since reviewed main4fdba151. Reconciliation run 38048312838 preserves each entire current-main shared document byte prefix and appends only the two independently verified N40 additive historical blocks. Other owners’ records, manuals, numbered checklist and PDFs are retained. No application or server code, CI gate, module, role, data or device changes. Normal final-head CI is still required before merge; no forced branch update, main push or automatic merge. Deployment and authenticated six-tile LAB/real Stock return remain NOT TESTED; overall No40 OPEN. The temporary reconciliation workflow is removed from the resulting tree.

Ιστορικό No40 — N40-RELEASE-20261010 — deployed healthy at 14:35:44 Athens / AWAITING LAB

Same owner codex/n40-full-twin-navigation-audit-20261010, no transfer. PR2065 merged5dc10820082a570705616f163e8118c7ae4ba2a9; exact-head fullCI38048402182 SUCCESS, main fullCI38048617906 SUCCESS including server/build/Windows/production/isolated PostgreSQL/HTTP E2E. Guarded Render38048828414/job114203686437 SUCCESS; actual health at2026-10-10T11:35:44.9138943Z ok=true/version0.22.0+kat-test-pos/exactrevision5dc10820. Previous rollback1069f6cd/artifact11667934393 captured, not executed. Supersedes prior release-pending wording only. Source routes/return/invalidation released; actual six-tile LAB, real Stock browser return and unexecuted auth/module/revocation scenarios NOT TESTED. No browser authentication available; no business/device/permission mutation. Overall40 OPEN / DEPLOYED / AWAITING LAB; visual1–14 and every other owner preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-deployed-readback.md. Next one authenticated read-only virtual-LAB navigation/return batch with actual context/evidence, not repeated transactions. No manual or final numbered/PDF acceptance claimed.

Ιστορικό No40 — 10/10/2026 15:33-15:38 Athens — N40 bounded browser navigation PASS; overall OPEN

Same owner codex/n40-full-twin-navigation-audit-20261010. Actual assistant-controlled cloud browser, authenticated Super Admin Χρήστος Μάνης, canonical platform-admin; exclusively MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. Fresh service health ok/version0.22.0+kat-test-pos/revision6b08e72a9c14f973a62cc1e3a43f8600aef9fef4; GitHub compare confirms descendant of released5dc10820 (19commits), preserving N40 release. Health attests server, not independently hashed cached client bundle.

Five actual tile/normal-close round trips observed: POS -> Έλεγχοι & Αναλύσεις with company/store selectors disabled and correct LAB; EFTPOS/Ταμειακές -> Αυτόματος Έλεγχος Ταμείων with disabled LAB selector and only LAB result; Ταμείο -> same Cash destination for current serious-cash finding; Προσωπικό -> Workforce V2 with only target main-selector option and seven target employees; Κάμερες -> Video Events connection screen, target company/store heading and existing OFFLINE/one-camera settings. Each normal destination top close automatically reopened Command Center with Full Digital Twin heading ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ / MYWORKSTATION LAB; no manual CC reopen or browser Back. No execute-analysis, email, exports, saves, package/permission toggles, financial/stock/staff/shift/fiscal/device commands submitted. Cash screen loaded existing read-only analysis automatically; no run control pressed.

Protected Stock USER-BROWSER VISUAL entry/return/selected-Twin sequence from PR2065 comment6097485640 retained, not repeated. Prior visual1–14 remain closed. This is bounded navigation/UI-context PASS, not whole No40 completion or internal domain calculation acceptance. Actual HTTP request capture unavailable in documented browser APIs; request isolation, network races, client SHA, Stock support-exit audit and unexecuted backend role/module/revocation scenarios remain NOT TESTED. Workforce employee editor exposes company store references while main context remains target; no editor action tested or scope leak inferred. Transient zero/loading counters after normal reopen resolved on read-only loading; not classified as business-data failures.

Overall No40 OPEN / partial navigation verified. Single next action: obtain permitted request-level observation and read-only negative authorization coverage without business/permission mutations; preserve existing round trips and Stock evidence. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-browser-navigation-readonly.md; manual super-admin/PASS updated only for observed usage. Same owner retained; other owners untouched.

Ιστορικό No40 — 10 Oct 2026 17:44 Athens — No40 traced-read observation gap / bounded follow-up

Same owner codex/n40-full-twin-navigation-audit-20261010. PR2117 final2c0e51ef CI38059623500 SUCCESS, main92e7fbf440b9171d4ffa4176b4e56cc7a15e7040 fullCI38059863377 attempt2 SUCCESS, guarded Render38060277713 SUCCESS. Deploydep-db54r15ckfvc738vh0n0 LIVE14:38:53UTC; actualhealth14:39:15UTC ok/version0.22.0+kat-test-pos/revision92e7fbf4. Fresh canonical SuperAdmin browser document observed, selected only MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ. Opened POS->existingChecks, both company/store locked; no execute/analysis. Normal close returned same heading. Prior navigation/Stock6097485640/visual1-14 preserved, not new full acceptance.

New browser dev.logs observation is restricted after native credential delivery. No credential/session/cookie extraction or alternate hidden-state workaround attempted. Render sanitized read records are available; 14:40:04–14:41:00 slice contains concurrent support-context background reads and few correlation-header entries, not an attributable POS check-packages completion. Other-store IDs in support-context records cannot be attributed to this browser/Twin or labeled a leak. No new request-isolation PASS. Stored sanitized metadata only at CHECKPOINTS/EVIDENCE/n40-read-trace-20261010/initial-server-slice.json.

Source review identifies initial Cash and Video dispatchers using their guarded normal request without n40Scope; background legacy support observation shares the200/min emission budget. Follow-up keeps existing origin/sequence/auth guards, tags those two initial GET dispatchers, and separates bounded200/min correlated from20/min legacy observation. Static sanitized route allowlist adds known store-modules/check-packages/daily/other-expenses segments, no private path/query/body/header logging. No authorization change or business mutation. Local9diagnostic+existingtransfer-auth10/10 PASS, including100legacy completions cannot consume correlated budget and minute reset. Full finalhead CI and deployed LAB acceptance required. No40 OPEN; restricted Backoffice role/module/revocation/races and full six-destination request isolation NOT TESTED. Source-only note; no manual/LAB PASS or concurrent PDF replacement. Next green finalhead merge/guarded release, then attributable per-destination read checks and synchronized actual results.

Ιστορικό No40 — 10 Oct 2026 — No40 restricted Backoffice fixture SOURCE READY / AWAITING CI AND LAB

Same owner codex/n40-full-twin-navigation-audit-20261010; claim PR2129 merged e5c4b76ec49db51dd8249db76497089a0e7a5db4 after CI38061572656 SUCCESS. Source preparation adds fixed LAB-only EMPLOYEE fixture creation behind existing Platform authentication/SA gate, strict two-password input, exact active LAB validation, bcrypt12, mandatory first password change, unique collision/no overwrite and atomic security audit. No Employee/business/license/store changes. User performs credential entry/confirmation/submission by manual browser handoff; no password is read by agent, exported, logged or emailed. Existing StoreOperator n40_audit_20261010/POSfalse remains unchanged.

Additive /platform-admin/n40-audit page preserves canonical SA login /platform-admin. Restricted fixture authenticates via existing /api/auth/login and change-password; session lives only in private per-tab memory (no persistence and no replacement of existing global owner/SA tokens). Fixed source-derived LAB GET probes for POS check-packages, EFTPOS routing, cash daily, personnel module metadata and camera connection display only status/path/time/correlation ID. Body is discarded, no business payload/token export. Own-fixture normal logout plus one old-token GET can record 401; no other session revocation. This is a scoped platform-role/session check, not full tenant/module/race acceptance. Local meaningful authorization/context/collision/privacy tests 16/16 PASS; full CI/exact guarded deployment and actual LAB observations still required. No new LAB PASS. No40 OPEN; preserve phases1–14, uservisual6097485640, five previous roundtrips, Stock internal calculations outside this No40 navigation claim, concurrent assignments and existing PDFs/manuals. Next action after exact released revision: verify empty fixture form, hand off private credential creation/sign-in/password replacement, then run read-only checks and correlate server trace. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-backoffice-fixture.md.

Ιστορικό No40 — 10 Oct 2026 — No40 restricted Backoffice fixture and read-only access checks / ASSIGNED / OPEN

Same logical owner codex/n40-full-twin-navigation-audit-20261010, implementing branch codex/n40-restricted-backoffice-fixture-20261010. User explicitly approved a new restricted virtual user and network checks, then all necessary residual work. Existing n40_audit_20261010 STORE_OPERATOR/PIN fixture, its active/POSfalse state and scoped denial stay unchanged. It is not a normal Backoffice User.

New bounded preparation: fixed named n40.backoffice.20261010@myworkstation.invalid User, roleEMPLOYEE, only MYWORKSTATION LAB company cmtpopbgk000prhb5qc60zxus / target ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ cmtpopbgo000trhb5ng9ytiru. No other account edits, no Employee/business records, licensing, store or POS rights changes. Use existing secure SuperAdmin authorization and normal password login/session rules. Account credential creation/submission is user handoff: agent never enters or reads the

new password; no email. No duplicate/update/reset endpoint. Validate exact active company/store and fixed fixture identity; reject collision, no overwrite. Minimal account plus ordinary security Audit only.

Provide dedicated read-only LAB access checker using normal authentication, per-tab private fixture session storage to preserve other owners' sessions, fixed source-derived GET endpoints, visible sanitized route/status/correlation IDs only, no payload/token/cookie/header export. Existing server role/module/tenant/session gates remain authoritative. Scoped fixture logout/revocation may be tested through normal auth logout; no other session revocation. Full CI/exact released revision before secure handoff or tests. These preparations do not establish new LAB PASS. No40 OPEN; current six-destination trace acceptance, restricted role/module/revocation/races and Stock support audit remain bounded separately. Preserve PR2117/2127 source, uservisual6097485640, phases1–14, previous five roundtrips and all other assignments. Broader company/store/module negatives remain NOT TESTED unless actually observed within authorization. Claim must be green and published before code or credential/user creation. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-n40-backoffice-fixture.md.

Ιστορικό No40 — 10 Oct 2026 - No40 bounded request trace SOURCE READY / AWAITING CI AND LAB

Same owner codex/n40-full-twin-navigation-audit-20261010. Claim PR2114 finalhead46e39667, CI38058466669 SUCCESS, confirmed main12d47719 before source implementation. Additive diagnostic dispatch only for Twin-origin target-LAB GETs and canonical support-context target-LAB GETs. Correlation headers feed a server finish observer; legacy nested readers without correlation headers are observed only after authenticated BACKOFFICE_USER Super Admin matching-company target-LAB support context; sanitized route template, company/store scope IDs, invalid/ambiguous/truncated scope flags, status and role/support-store metadata only. Never logs headers/auth/cookies/bodies/personal query fields; does not grant, bypass or change permissions. Output bounded200/minute; log failures cannot affect responses. Existing request rejection and origin guards preserved. Stock support token exchange/return hints unchanged.

Local Node24.19.0:8/8 focused diagnostic tests PASS, including real local HTTP403 correlation preserving ordinary response and privacy/negative/malformed/rate-limit cases. Existing transfer-auth VM harness imports the real diagnostic helpers and preserves authentication assertions; combined local tests9/9 PASS. Server/module syntax checks PASS. This is synthetic local evidence, not supported Node20 fullCI or deployed acceptance. No code deployment or real new tracedLAB observation yet. Browser actual request/race/role/module/revocation acceptance remains NOT TESTED; no restricted company User created. Previous restrictedPOSdenial, Stock6097485640 and visual1-14 preserved. No40 OPEN. Next: full CI on exact sourcehead, then reviewed release for read-only target-LAB trace acceptance. Inspect any scope mismatch and retain other owners' business work.

PR #1797 merged στο main με commit 65d2c75d2ef16d04b13c95e25b77438d424f6e5f. Τελικό CI #4516 SUCCESS στο PR head fcef2ab7db2465b5659ead25c5b1121f594e510d (docs classification και Windows parse/smoke PASS· build/tests εφαρμογής skipped ως documentation-only). Το content commit 20b346859d8b98df43562086d36477cac72a3c04 παραμένει στην ιστορία του merge.

INSTALL-SUPPORT — Super Admin: Εγκαταστάσεις & Υποστήριξη

Κατάσταση: OPEN / NOT IMPLEMENTED / NOT TESTED

Υπόλοιπο / όρια PASS: Καρτέλα ανά κατάστημα, εγκαταστάσεις/checklist/παράδοση, βλάβες/αναθέσεις/επιβεβαίωση, αρχεία/οδηγίες, συντήρηση, κεντρική εικόνα και PDF/Excel. Μόνιμη αποθήκευση, Audit και ανεξάρτητοι έλεγχοι company/store/role/attachments. Πλήρη κριτήρια: docs/roadmap/INSTALLATIONS_SUPPORT_REQUIREMENTS_2026-10-07.md.

Υπεύθυνη σελίδα / branch: Υλοποίηση μη ανατεθειμένη. Μόνο καταγραφή απαίτησης: codex/install-support-requirements-20261007. Δεν αλλάζει άλλες αναθέσεις.

Ανάληψη (χρόνος / ακριβές scope / checkpoint / PR): 07/10/2026 01:11 Europe/Athens — ρητή εντολή ιδιοκτήτη για καταγραφή στο main, όχι έναρξη υλοποίησης.

Ολοκλήρωση (χρόνος / scope / τεκμήριο / PR / CI / revision): Μόνο τεκμηρίωση απαίτησης· το module παραμένει OPEN. Καμία αλλαγή κώδικα, βάσης ή LAB πράξη. Σχετικές υπάρχουσες αναθέσεις εγκατάστασης/backup/remote/audit/manual διατηρούνται.

CUSTOMER-DEMO-01 — Demo εγκατάστασης Windows: POS και πλήρες Backoffice

Κατάσταση: ASSIGNED / persisted inactive preparation verified / full demo OPEN / NOT TESTED

Υπεύθυνη σελίδα / branch: codex/customer-demo-windows-20261009

Ανάληψη: 09/10/2026 07:21 Europe/Athens — νέα ρητή απαίτηση πελάτη, Windows online πρώτο πακέτο. Απομονωμένα εικονικά δεδομένα ανά demo, κοινό POS–Backoffice, server-side απαγόρευση πραγματικών πληρωμών/φορολογίας/myDATA. Πρώτο περιορισμένο scope: ανενεργή θεμελίωση συμβολαίου/policy/fixture manifest. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-customer-demo-windows.md.

Υπόλοιπο: Ενεργός demo lifecycle με προσωπικούς λογαριασμούς, πλήρης server/workers isolation και outbound enforcement, DEMO UI στο υπάρχον POS/Backoffice, 50x40mm πραγματικές ρυθμίσεις/εκτύπωση, δύο authenticated shortcuts, Windows installer/download και πλήρης runtime PostgreSQL/HTTP/exact release/physical Windows acceptance. Η ανενεργή αποθήκευση/ανάκληση και synthetic provisioning έχουν επαληθευτεί μόνο σε isolated CI. Δεν είναι έτοιμο για πελάτες. Άλλες αναθέσεις αμετάβλητες.

Ολοκλήρωση: NOT TESTED — κανένα νέο LAB/USER PASS, καμία production μεταβολή.

AI-CREDITS-01 — Προειδοποίηση υπολοίπου AI στον Platform Super Admin

Κατάσταση: ASSIGNED / SOURCE MERGED / CI PASS / AWAITING BILLING SETUP AND LIVE

Υπεύθυνη σελίδα / branch: codex/ai-credit-alerts-20261009

Ανάληψη: 09/10/2026 22:36 Europe/Athens — ρητή εντολή ιδιοκτήτη «ξεκίνα». Ανεξάρτητη επέκταση: κεντρική προειδοποίηση πριν εξαντληθούν credits, προεπιλεγμένα όρια5$/2$, ρύθμιση ορίων και σαφής διάκριση εκτιμώμενου/άγνωστου υπολοίπου. Δεν αναλαμβάνει ξανά παλιά AI-CC phases ή άλλο ανατεθειμένο invoice/POS scope.

Υπόλοιπο / όρια PASS: Read-only official Costs API investigation, ασφαλής αποθήκευση baseline/ορίων, central dashboard/AI Command Center alert, bounded refresh, authorization/failure/pagination/stale tests, green CI/merge/exact deploy και LIVE acceptance. Αρχικό screenshot δείχνει αρνητικό υπόλοιπο−0.12$· ο provider λογαριασμός της εφαρμογής δεν έχει ταυτοποιηθεί. Η δημόσια health ανάγνωση επέστρεψε b40a09dff6f0aaac585c1b71f2e36e51181e01e2, main κατά read4cd333b7. Authenticated LIVE setup παραμένει BLOCKED.

Ολοκλήρωση: NOT TESTED. Καμία αλλαγή παραγωγικού λογαριασμού/API key, πληρωμή, invoice upload/approval/stock/fiscal mutation. Checkpoint CHECKPOINTS/CHANGES/2026-10-09-ai-credit-alerts.md. Owner retained until explicit handoff.

AI-CREDITS-01 implementation evidence:

AI-CREDITS-01 — implemented / LOCAL PASS / AWAITING CI, setup and LIVE

Claim PR1987, docs CI37983339777 SUCCESS, merged main4a69eb48 before source. Same owner codex/ai-credit-alerts-20261009; source codex/ai-credit-alerts-implementation-20261009. Added central homepage/Command Center warning,5USD/2USD defaults and validated current-balance/threshold settings, dedicated persistence + transactional Audit/version conflict, bounded all-organization Costs API reads. Unknown/failure/stale never green; estimates clearly labelled. Page polling60s/server cache5min; no email/push/scheduled external task. No provider credential installed or invoice/business mutation.

Local Node20.20.2 targeted26/26; full server1981PASS/0FAIL/4environment skips; production build PASS. New isolated PostgreSQL/authenticated HTTP CI flow still pending. Same-account OPENAI_BILLING_ADMIN_KEY, real current-balance baseline, exact deployment and LIVE acceptance remain NOT TESTED. No new manual PASS. Ops docs/ops/ai-credit-alerts-20261009.md; checkpoint CHECKPOINTS/CHANGES/2026-10-09-ai-credit-alerts.md. Owner retained.

AI-CREDITS-01 — source merged / CI PASS / AWAITING BILLING SETUP AND LIVE

Source PR #1989 merged 09/10/2026, main42bee63704d135e86992eaf92ae5064f8ffb256c. Exact final PR CI37986817256 SUCCESS; earlier CI37984602197/37985196722/37985730552/37986249842 also SUCCESS. Isolated PostgreSQL/HTTP flow observed PASS for authorization, persistence, Audit, concurrent update conflict, missing billing configuration and session revocation. Local26/26 targeted and1981server PASS/0FAIL/4environment skips; production build PASS. Shared changes preserved through main reconciliation. PDFs regenerated with final handoff, after source publication, to avoid repeated concurrent binary conflicts.

Current owner remains codex/ai-credit-alerts-20261009. Production push CI/guarded Render release initiated; exact deployed revision and authenticated UI remain NOT TESTED at this checkpoint. No billing Admin key acquired/installed and no baseline configured. Real credit/account identity and warning/critical evidence remain NOT TESTED; no LIVE/LAB/manual PASS. No invoice/payment/stock/fiscal or provider purchase mutation.

Single next action: verify guarded release of source42bee637, then deployment administrator securely sets same-organization OPENAI_BILLING_ADMIN_KEY and Super Admin confirms current prepaid balance in AI Command Center. Do not paste secrets into chat. Perform read-only LIVE alert/settings acceptance after configuration; maintain same owner until explicit handoff. Setup: docs/ops/ai-credit-alerts-20261009.md.

12/10/2026 19:46 Athens — VOICE-ASSISTANT-01 / conversation page, reliable answer transport and Super Admin files ASSIGNED / USER FAIL

Same owner codex/unified-voice-assistant-20261010, branch feat/assistant-conversation-page-20261012. User19:33 supplied selected Διαδόχου screenshot with explicit own-consumption dates1/10/26–12/10/26 and «Το AI επέστρεψε μη έγκυρη απάντηση». This is a real USER FAIL of answer delivery, not absent consumption or proven backend truncation. Exact screenshot backend/client revision and raw provider cause are NOT TESTED. Prior2356 source/CI/healthy58f2c969 and existing partial source/business PASS preserved; no whole assistant PASS.

User explicitly requests a ChatGPT-style page integrated in the EXISTING program, conversation follow-ups/history, and Super Admin Excel/PDF/CSV/Word downloads. First bounded transport correction validates complete Responses output/status/refusal, retains only freshly verified canonical evidence when final prose fails and reports unperformed reads honestly; existing model/provider reused, no credential/billing/account grant changes. Current1200-output limit and missing provider-status handling are code observations; official OpenAI docs establish incomplete output can occur before visible text, not proof of this specific production cause. Render log connector currently lacks confirmed selected workspace; no workspace is chosen or production log access attempted without confirmation. Browser secure-auth restriction is not circumvented.

Then integrate one full conversation page using existing selected region, exact purpose-bound central credential routing and licensed Owner scope. Bounded same-session context, fresh report reads for follow-up, withdrawal on selection/session/module changes, no stale cached financial evidence as source. Conversation retention scope must be explicitly labelled; no private histories persisted in unrestricted browser storage or third-party provider storage. Existing Command Center/Twin navigation and paid Owner gates protected.

Super Admin exports are generated only from existing validated canonical report readers with current native session/role/scope checks and strictly bounded formats/filter tickets. No arbitrary SQL/URLs, model-authored spreadsheets as evidence, path/file injection, formula execution or Owner cross-store grants. No business/payment/stock/fiscal/schema writes or No39 replay. Preserve all other owners' work. Required validation: complete/incomplete/malformed/refusal/provider-failure answer delivery; native both-role/scoped conversational boundary and mounted input/history/late cancellation; signed export-boundary replay/revocation/tampering; actual parseable Greek XLSX/CSV/PDF/DOCX artifacts and full source/main CI/guard. LIVE/physical acceptance remains separate. All-domain report parity and prior live/Owner-stock/physical residual stay OPEN.

VOICE-ASSISTANT-01 — Ενιαίος φωνητικός βοηθός POS / Backoffice / Super Admin

Νεότερο 13/10/2026 21:33 Athens: Daily consumption source2453/5279a923 RELEASED. Source head8c09ca8; native PR38445625833 passed2586/0/0 plus6monitor, exact main38446403563 passed2588/0/0 plus6monitor; build/native PostgreSQL/real HTTP/Windows/browser/invariants all green. Ordinary guarded38447150033/deploy115468472453 captured rollback and actually deployed pinned5279a923; Render dep-db77h8vavr4c73f93vh0 LIVE finished18:31:45.712518UTC, exact healthy18:31:58.7957811UTC and independent public health same. All four owned code/test blobs plus source checkpoint exact at merge; active whole blob differs only due concurrent owners, owned SOURCE READY block exact. Daily all-item supplied-date list reads existing canonical source directly without AI-generated filters; omitted year is current Athens year. Invalid dates ask valid date before reading. Product/range/mixed/scope/history questions retain strict provider pipeline, existing selected scope/native modules/rechecks/caps/current-period/source projection/canonical signed replay/files retained. Targeted30PASS and local2543/0/36isolatedDBSKIP are separate evidence. Initial old daily HTTP fixture assumed provider call; original provider-path assertions retained under explicit range, screenshot daily text/voice no-provider regression added; no safety assertion weakened. Actual21:07 selected Διαδόχου 13Oct USER FAIL remains AWAITING same-store/date existing-source/file comparison, not numerical/manual/numbered PASS or zero records. Same owner retained; broader domains/Owner stock AFTER/physical and responsive residual OPEN. Agent secure-login automatic rejection remains restricted without workaround. No business/catalog/auth/schema/stock/fiscal mutation, new provider/key or No39 replay.

Νεότερο 13/10/2026 21:11 Athens USER FAIL / ASSIGNED: Same retained owner codex/unified-voice-assistant-20261010; branch fix/assistant-consumption-date-20261013. Actual user21:07 screenshot: selected Διαδόχου, all-stores unchecked, «Βγάλε μου λίστα ιδιοκατανάλωσης ΓΙΑ 13/10» returns generic invalid-name/date error, no report. USER FAIL; exact backend revision/model arguments unobserved, not zero records. Located shared strict dispatcher emits this error on invalid generated tool arguments. Claim one bounded deterministic daily all-item consumption report for unambiguous supplied dates (missing year = current Athens year), using the existing strict canonical reader and fresh native role/module/selected-scope checks; no product/tenant inference or model date guess. Ambiguous/invalid dates clarify without reading; product/range/mixed-domain questions retain existing strict pipeline. Existing source projection, caps, current-period limits, immutable source, signed replay/files and broader sales/cash/stock/consumption behavior preserved. No production business/catalog/auth/schema/stock/fiscal write, new provider/key or No39 replay. Secure agent login remains restricted, no workaround. Full local/native PR/main CI/build and exact ordinary guarded healthy release required; real same-store/date source comparison remains AWAITING RETEST and broader residual OPEN.

Νεότερο 13/10/2026 07:10 Athens: Catalog category source2432/d6963af RELEASED. FullPR2558/0/0 and exact main2561/0/0 plus6monitor each; actual guarded38344727723 pinned/healthy04:07:38.7421954UTC, independent health same. Ten owned code/test blobs exact including newer mobile descendant. Product priority/ambiguity retained; unmatched single generic name resolves actual Master-primary/category/subcategory, beer genitive; true misses show real category choices, not invented zero or scope blame. Current modules/roles/range/units/reversals/calendar/replay preserved. Actual06:37 Διαδόχου12Oct USER FAIL AWAITING source/file retest, no numeric/manual/numbered PASS. Broader residual OPEN, same owner retained; no catalog/business/auth/fiscal/schema/stock change or No39 replay.

Νεότερο 13/10/2026 06:41 Athens USER FAIL / ASSIGNED: Same owner, fix/assistant-catalog-category-20261013. Dated12Oct beer ask at selected Διαδόχου/no all-mode returns no_match; source mode/revision unobserved, not zero sales. Bounded catalog-first unmatched-name category resolution, Master primary category and genitive spelling; product priority/ambiguity/scoping/native modules/returns/calendar/units/replay preserved. No guessed beer brands, catalog/business/auth/schema mutation or No39 replay. Full CI/exact release and real same-source retest required; broader residual remains OPEN.

Νεότερο 13/10/2026 01:04 Athens: Category-period source2414/8ca4163 RELEASED: fullPR2537/0/0, exact main2539/0/0 plus6monitor each; actual guarded38314043106 exact healthy22:02:22.1282238UTC. Twelve owned code/test blobs exact including newer efood descendant. Server-owned period clarification before provider/read, date-only and typed export continuation, category-only beer spelling aliases; scope/native role/license/calendar/reversals/units/files preserved. Actual00:14/00:15 USER FAIL AWAITING same-scope/category/date canonical report/file comparison. No numerical/manual/numbered PASS; broad domains/Owner stock AFTER/physical residual OPEN, same owner retained. No business/auth/fiscal/stock mutation or No39 replay.

Νεότερο13Oct00:21Athens USER FAIL / ASSIGNED: Same owner; branchfix/assistant-sales-period-20261013. Beer category no-period questions return generic no-read text. Claim bounded safe missing-period clarification/date continuation and canonical Greek category spelling; no SKU needed, no fabricated amounts/stale cash date. Screenshot scope/revision not attested; no numerical PASS. Existing2381 source/live receipt and prior partial PASS retained; same normal-session category/source/file retest and broader residual OPEN.

Νεότερο12Oct22:31Athens: Natural named/brand sales source2381/ef10f447 RELEASED after fullPR38296245101+main38296905426 both2481/0/0 plus6monitor tests; guard38297434799 actual exact healthy2026-10-12T19:27:11.2177171Z. Eleven owned code/test blobs verified; other-owner POS changes preserved. Greek/Latin Coca-Cola family variants use real canonical IDs/rows, clear sales cannot read unrelated cash, exact-name ambiguity/selected/licensed/all/date/return/unit/export guards preserved. Actual21:54 named-sales USERFAIL AWAITING normal-session same-store11Oct source/file retest; isolated native qty6/gross7 is not real-store data. Full module/domain/Owner-stock AFTER/physical residual OPEN, same owner retained. No business/fiscal/stock/auth mutation or No39 replay.

Νεότερο12Oct21:59Athens USER FAIL / ASSIGNED: Natural «κόκα κόλα πουλήθηκαν11/10/26» asks SKU and reads unrelated cash. Same retained owner; branchfix/assistant-name-sales-routing-20261012. Pre-code claim restricts named sales to canonical sales sources and actual catalog family variants with separate kind/unit rows. No numeric PASS, production write or duplicate No39 action. Previous chat/exports release preserved; same-store/date source retest and broader domain parity OPEN.

Νεότερο12Oct20:56Athens: Integrated same-session conversation/voice page and native Super Admin canonical XLSX/CSV/GreekPDF/DOCX files RELEASED source2375/a65c93d0, fullPR2478/0/0 and main attempt 2: 2478/0/0 plus6monitor tests; guard38287262041 actual exact healthy2026-10-12T17:56:02.4455097Z. Attempt1 existing POS-capacity timing FAIL retained, original assertion/source unchanged. All29 owned code blobs verified; current store scope, licensed Owner gates and explicit all-mode preserved. Actual19:33 invalid-answer USERFAIL AWAITING RETEST; CI/healthy deployment is not live report/voice/file PASS. Full domain parity/Owner-stock AFTER/physical and responsive acceptance OPEN; same owner retained. Next read-only existing normal-session selected consumption/source/file comparison, no replay of No39 SELF-01. See newest checkpoint and release receipt.

Νεότερο12Oct17:07Athens: Source2356/58f2c969 released after full PR38259019627 and main38259656954 server2461/0/0 plus6 monitor tests; guard38260273820 exact healthy14:07:14UTC. Shared selected-store POS own-consumption/destruction source and tables implemented; LIVE AWAITING LAB, full module OPEN/ASSIGNED. Same owner retained; no replay of No39 SELF-01. All-store consumption/WASTE and remaining application-domain parity are OPEN. See newest checkpoint; not a whole-module PASS.

Νεότερο11Oct23:30Athens: PR2306/main3b4c067/fullPR+mainCI2393/0/0/guard38166770234 exact healthy; later unchanged owned21 paths at healthy0a857601/fullCI2395/0/0/guard38170652498. Names/categories/multiple products/recorded offers per explicit authorized store implemented; LIVE data/presentation AWAITING LAB. New actual question was denied because root UI revealed support context; proper return led to2FA login and automatic browser security review blocked secure auth request. No numerical answer or after comparison; no guard bypass. Previous Platform SKU2269 source/report DATA PASS retained; old main prose FAIL awaits retest. All-domain scope, Owner stock AFTER, normal Owner/all-store live and physical mic remain OPEN; same owner retained. Next independent normal central read-only LAB names/offer acceptance; see latest checkpoint.

Actual lifecycle/context negatives, multi-day/ambiguous/missing/capped sales and other domains remain OPEN. Single next action blank/own-store-switch read-only acceptance, then canonical product/date/current-store sales capability; same owner retained.

10/10/2026 21:31 Athens — DAILY BITE coffee KAT-behavior / LIVE PASS

Issue #2054. Revision 78438151a7babb82eff78ffd1f0728180ca43d28, Render dep-db586shj9rms73arfqlg LIVE. One-shot exact 16-SKU apply succeeded once: 6 DAILY modifier groups, 26 modifiers, 16 preparation-enabled products, 84 product-group links, 11 name-only normalizations. No stock movement/sale/payment created; mapped stock remains 0; no recipe/ingredient/stock-consumption copy. Existing 8,753-product/9-department import PASS preserved. Physical POS/production-printer acceptance remains OPEN.

Νεότερο21:40Athens: PR2167/dece8453 full2216/0/0 + guardedRender38075728235 SUCCESS, exact healthy release. One secure sign-in and fresh verification still invalid session; no sales Ask executed. Source implemented, LIVE sales NOT TESTED. Fresh valid ordinary Owner entry then canonical Athens report comparison is the single next action; full scope remains OPEN/ASSIGNED.

10 Oct 2026 21:44 Athens — BACKOFFICE-SESSION-01 / deployed; LIMITED LIVE UI PASS; OPEN

Owner codex/backoffice-session-boundary-20261010 retained. Source PR2163 head8ebd4d5743b718cd9ccdf59c189a35514285bec8/fullCI38076132149 SUCCESS:2239PASS/0FAIL/0SKIP; merge e6bdd31be656e29b85c113effef5e3402d4db146/main fullCI38076406343 SUCCESS/guarded deploy38076636135 SUCCESS. Render dep-db58cpflk1mc7393hru0 LIVE18:41:13.953UTC; separate browser /api/health returned ok:true and exact e6bdd31be.

Fresh root browser21:43Athens visibly showed attributable inactive-session notice and removed normal Backoffice view; explicit New sign-in opened existing login form without submitting credentials. LIMITED LIVE UI PASS for notice/recovery-form only, not independent network-stop measurement or healthy logged-in polling/cross-tab replacement/store isolation. Initial reloaded tab was blank without application console error; one fresh tab resolved that observation. No business request, login, token inspection, storage mutation, session revocation or other-owner session replay. Evidence CHECKPOINTS/EVIDENCE/backoffice-session-20261010/inactive-session.jpg. Manual docs/manual/backoffice-session/PASS.md records only this limited observed flow.

Full acceptance and production401/404 root cause remain OPEN. Failed-request identities not established; no attribution to Diadoxou, no storage resolution claim. Five application/test changes central main.jsx boundary only; N51/N40/VOICE/DAILY ownership and prior PASS protected. Existing old client tabs require ordinary reload to receive new assets. Next: securely authenticate a named existing account for healthy read-only refresh and bounded context-change acceptance, without interfering with another owner's active session. Main shared-history deletion observed in concurrent docs; retain complete historical entries plus their new claim, never silently remove assignments/evidence.

10 Oct 2026 22:44 Athens — PRODUCTION-404-ATTRIBUTION-01 / ASSIGNED / NOT TESTED

Owner codex/production-store-404-attribution-20261010; branch fix/production-store-404-attribution-20261010. Explicit owner authorization covers diagnosis and bounded correction before Diadoxou begins sales11October morning. Independent production failed-store GET attribution only; preserve BACKOFFICE-SESSION-01, N40 trace/fixtures/navigation, N51, VOICE, DAILY and every existing assignment/PASS.

Fresh22:40Athens: global404=1685 in five-minute bucket; repeated Store Transactions no-active-store errors continue. DB available, recoveryfalse,18clients,0Lock waiters/active>15s. Seven store records include active Diadoxou in confirmed company and an inactive same-name pilot record. Three prior22:01 N40 foreign DAILY requests prove only some LAB guard denials; do not attribute the continuing global404 to Diadoxou or stale pilot without request evidence. Current session source released but root cause OPEN. Secure existing-account sign-in earlier returned invalid credentials; authenticated positive acceptance NOT TESTED. No credential inspection/retry, sale/payment/fiscal/stock/shift/data/configuration/restart/manualdeploy.

Bounded intended source: separate read-only finish observer for existing authenticated GET404 on canonical transactions/cloud store routes. Emit only sanitized route templates, validated internal store/company IDs, role/token type/status and bounded aggregate counts. No raw URLs/query/body/header/user/session/credential/IP; strict size/key/emission caps, failure cannot alter response. No DB lookup/write, no auth change, no weakening ownedStore or suppression of existing errors. Tests cover real404 unchanged, positive/unauthenticated/mutation exclusion, privacy/malformed scope/caps/log failures. Full exact CI/mainCI and guarded release before live read-only attribution. This diagnostic is not a cure or business/LAB PASS. Single next action after merged green claim: implement bounded observer, then attribute actual failing requests and select one evidenced cause. Checkpoint CHECKPOINTS/CHANGES/2026-10-10-production-store-404-attribution.md. Assignment retained until complete or named handoff.

10 Oct 2026 23:28 Athens — BACKOFFICE-SESSION-01 / MFA correction continuation / ASSIGNED / OPEN

Same central owner codex/backoffice-session-boundary-20261010; source fix/backoffice-login-mfa-20261010. User explicitly requests correction after immediate inactive-session screenshots. N51 PR2187 delegates this demonstrated ordinary Login defect to the existing central owner; no takeover of N51/N40/No33/VOICE/DAILY assignments. Actual main13a6cf7e7 and protected session manual/history read. N51 actual-source Node20 reproduction confirms mfaRequired/setupRequired response without final token is incorrectly persisted as undefined then onLogin is called. Production cause of every post-2FA session loss remains NOT TESTED. No confirmed company blocking or permissions change.

One bounded causal correction: ordinary Login accepts only final nonempty session token plus identified user; MFA/setup responses keep existing storage untouched, stay outside App and offer the canonical /platform-admin secure entry. No duplicate 2FA implementation, challenge/secret persistence, server authentication/role/module/tenant/store changes, POS or other roots edits, business action or credential inspection. Mounted actual-form regressions must cover both challenge responses, malformed final results, denied and superseded login and ordinary Owner success. Full PR/main CI and guarded exact released revision before actual healthy read-only login acceptance. Existing source stop boundary and healthy renewal remain protected. General post-2FA cause and healthy session acceptance stay OPEN. Next action after this documentation is green and merged: implement only this final-result gate, then verify release and named-account acceptance.

10 Oct 2026 23:41 Athens — Combined source retained; same-form retry regression / AWAITING full CI + release

Central source PR2191 head41dd57f57bfc21e502e23184eb93a936c41d438b/fullCI38084169356 SUCCESS:2266tests/2266PASS/0FAIL/0SKIP; merged888e4d73441f35c86a694d5b46245a0d616da938. Independent No33 PR2192 subsequently merged50dfaff17674bf54e439814b219fd723be294bb3 with central final-result gate intact. Original mainCI38084397690 cancelled by newer merge; combined mainCI38084456319 failed only mandatory active-list checkpoint policy because that last merge lacked an active-list delta. Production still196dd62a; guarded deployments correctly skipped. No CI/guard bypass and no production correction claim.

Same central owner continues with meaningful actual mounted same-form MFA-prompt to ordinary Owner retry, verifying first response preserves existing context while final successful retry clears prompt and stores exactly one final session. Added superseded-MFA response regression protects a newer other-tab login without showing stale challenge. Together with existing central polling/renewal/Login and unchanged No33 callback tests, Node20.20.2 focused48/48 PASS/0FAIL/0SKIP. Application/server/Platform/POS source unchanged from already reviewed2191+2192; only central regression and shared evidence delta added. New exact full PR/mainCI and guarded release required. Existing owners/rights/tenant/business/fiscal behavior protected; actual healthy signed-in read-only acceptance and every401/404 cause remain OPEN.

10 Oct 2026 23:24 Athens — Exact diagnostic release and bounded production attribution / incident OPEN

Claim PR2181/head6b2d6453/docsCI38080912677 SUCCESS/main36a6d3bc; source PR2182 final9401aecdd4745180734ec950d69f9af6fa453bf9 fullCI38081067218 attempt2 SUCCESS:2247tests/2247PASS/0FAIL/0SKIP. Attempt1 failed only existing independent POS capacity timing assertion, reproduced in isolation; no assertion/source/CI weakening. Merge196dd62a0fca59f4c7d8433c7b8bdddb1934049e/mainCI38081445451 SUCCESS/guard38081665131 SUCCESS. Render dep-db59ga2jnfac739mlod0 LIVE19:56:46.376Z; independent rendered health ok:true/exact196dd62a. Production observer unchanged HTTP404/read-only diagnostic, not a functional cure or LAB/LIVE sales PASS.

Actual first complete rollup19:57:01.714–19:58:01.855UTC (22:57–22:58Athens): authenticated OWNER/BACKOFFICE_USER requests to DAILY storecmv25lf3h000ueegf0kkii3pb used pilot-company (transactions111/cloud47=158); LAB storecmtpopbgo000trhb5ng9ytiru used pilot-company (transactions111/cloud45=156); total314, overflow0. Confirmed store companies differ from pilot-company. Server isolation correctly rejects these mismatched requests; no company/rights blocked or changed by this page. No active Diadoxou request in this bounded two-route one-minute sample; do not generalize to every404/whole server/Diadoxou readiness or identify physical caller/tab.

Fresh23:15–23:24Athens rollups continue same wrong-company DAILY/LAB pair around336–337 per minute; no Diadoxou key/overflow in returned10rollups. Exact scope source/caller remains unknown; do not weaken ownedStore or revoke accounts. Independent N51 PR2187 reproduces incomplete ordinary Login MFA, central owner continues fix/backoffice-login-mfa-20261010. Independent No33 PLATFORM-LATE-AUTH-01 remains with codex/operator-checkbox-audit-20261009. Prior N40 negative traces/functional PASS preserved; not conflated with all repeated requests.

Operational last snapshot22:55Athens: DB available/recoveryfalse/18clients/0Lock/0active>15s; last-hour max CPUweb9.63%/DB30.40%, memoryweb9.59%/DB81.49%. HTTPp95 unavailable, request logs unavailable; no zero-error claim. Active Diadoxou/store/company verified, no new closed shifts; Writer ACTIVE exact company with lastSeen22:53:44Athens, communication snapshot only. DB logical355702463bytes does not establish disk mount utilization or resolve90%storage warning. No business action, data/role/device/configuration change, restart/manual deploy, credential inspection or all-company exclusion.

Handoff/next single action: existing central owner finishes bounded session-login correction and healthy read-only acceptance; affected old client tabs need ordinary reload and correct own-company sign-in. Attribution owner retained for follow-up fresh rollup once those changes are released. Incident and complete readiness remain OPEN; no repeated sales/POS test merely to repair missing evidence.

10 Oct 2026 23:53 Athens — BACKOFFICE-SESSION-01 MFA / SOURCE LIVE; actual healthy-session acceptance OPEN

Central owner codex/backoffice-session-boundary-20261010 retained. PR2194 exacthead22a2667553ff13c7c91c07d9bf059c24fee8ce04/fullCI38084722315 SUCCESS merged586900d8961a212adeff5d13b05abdca345bdb92 after independent No33 PR2193 merge02c809eaaf9f6e1b13d275cb6b2b1f620ac56f9e; No33 ownership and source preserved. Exact combined mainCI38085014049 SUCCESS:2274tests/2274PASS/0FAIL/0SKIP, Windows/build/security/isolated PostgreSQL/real HTTP E2E and checkpoint policy green. Guarded release38085253808 SUCCESS; Render dep-db5a9u2d0e5s73eoe9gg LIVE20:51:35.672285Z /23:51:35 Athens. Guard independently verified public /api/health ok=true and exact586900d8961a212adeff5d13b05abdca345bdb92 at20:51:53Z. No direct deploy/restart/migration/business/credential or permission change.

Actual browser baseline before deployment showed signed-in named platform owner and overview; after release, own tab46 canonical /platform-admin recovery navigation rendered only Invoice Learning Lab over blank content. Native credential observation protection prevented health-tab observation and retained-data diagnostic logs; one canonical navigation recovery attempted, no credential inspection/new-tab bypass/logout/session overwrite. Post-release healthy named-session refresh and ordinary Owner/secure2FA acceptance NOT COMPLETED; no functional PASS/manual closure or claim all401/404 repaired. Need actual secure browser/manual read-only acceptance without disturbing other owners, then owner evidence reconciliation before closure.

Latest bounded production diagnostic20:42:56–20:47:56Z before new release: five rollups336–337 GET404/min, DAILY BITE and LAB requested stores with companyId pilot-company; no actual Diadoxou key in these two-route samples, overflow0. Caller/tab still unidentified. Existing stale client tabs require normal reload/proper same-company signin; no other companies excluded or reassigned. Store, physical POS/sales, full isolation, storage90% warning and independent fiscal/stock acceptance not proven by this release. Next action: healthy-session read-only acceptance and fresh post-release bounded diagnostic; retain OPEN until actual evidence.

11/10/2026 17:27 Athens — POS-PAYROLL-BUTTON-01 / ASSIGNED / NOT TESTED

Source progress — PR2266 / AWAITING USER

Same owner codex/pos-payroll-button-20261011; source branch feat/pos-payroll-button-20261011. Claim PR2261 green docs CI38148755018/main4b09f513 before source. Added independent «Μισθοδοσία» tab guarded by existing thirdPartyPayment, valid current-store employee/period/amount/reason, choices rest-day settlement/advance/overtime and positive finite overtime hours. Cash requires existing sameShiftPayments and active non-stale session; external methods keep existing evidence and bank/cash behavior. Refund state excluded/reset in standalone payroll; subtype changes clear irrelevant hours. New standalone entry does not require management expense categories; legacy category path/difference option retained. Readable scoped payroll fields precede amount/reason. Existing OTHER_EXPENSE POST, responsibility declaration, attachments, success-only completion and all backend/fiscal/stock/payroll-period routes unchanged. No auto salary calculation or automatic settlement of Workforce payroll periods; N10 and other owners/PASS protected.

Node20 actual mounted modal5 new scenario tests PASS (all3 subtype requests, mandatory fields and denied cash, refund/hour leakage, revoked access/failure closure, legacy category); existing payment completion/access/actor/integration UI19 PASS; old undocumented payroll3 PASS. Local frontend build PASS; source full CI, exact main CI/guarded healthy deployment and physical acceptance still required. No production/LAB payment/sale/stock/shift/permission mutation or accepted replay; no new manual/PASS closure. Physical appearance and attributable cash/Audit effects NOT TESTED. Next single action after exact release: refresh POS → Payments → Payroll and inspect fields; do not create/repeat a financial action solely for a screenshot. Record ordinary intended payment only with fresh before/after/control. Owner remains assigned until scoped acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payroll-button.md.

Owner codex/pos-payroll-button-20261011; independent bounded POS Payments entry, source branch feat/pos-payroll-button-20261011. Explicit user request and inspected attachment image(20261011-142543).png: separate «Μισθοδοσία» button, «Εξόφληση ρεπό» with mandatory reason, «Προκαταβολή» with mandatory reason, «Υπερωρία» with mandatory reason and positive hours. Reuse existing selected-store payroll employee list, period, amount, payment evidence/source and OTHER_EXPENSE transaction endpoint. No automatic salary/rate/leave calculation, payroll-period payment/settlement integration or schema change. N10 owner/payroll reconciliation remains locked and untouched; No33 permissions, payment completion/camera/correction and all prior PASS preserved. New source must keep thirdPartyPayment/sameShift guards, stale shift rejection, success-only close and tenant isolation. No real/LAB payment or accepted transaction replay for diagnostics.

Baseline main1ca72fe and current actual existing category-triggered payroll UI inspected; payroll entry requires matching expense category today and offers no advance. Existing payment manual/completion/correction checkpoints and shared assignments reviewed. New requested UI/financial acceptance NOT TESTED, CI never equals LAB PASS. Required mounted actual modal tests: independent entry without categories, mandatory reason/employee/period/hours, each subtype payload, no refund leakage, category path backward compatibility, denied/revoked third-party access and failed/success-only closure. Full Node20 build/source-main CI/native isolated E2E and normal guarded exact release before user retest. No manual PASS until actual acceptance. Single next action: green claim merged on main before source.

Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payroll-button.md. Retain this owner until completion/named handoff; do not take N10 or other assigned scopes.

11/10/2026 20:55 Athens — DAILY-BAKING-01 / source deployed and CI verified / AWAITING LAB, owner retained

Owner remains codex/daily-online-store-20261011, issue #2054. Source PR #2296 https://github.com/xrhstosmanis-design/myworkstation-app/pull/2296 merged adbda14af461188536f040908d75f0be9221d70d; exact source head f96c7644f5627ab6475da3c578b4ab34f69cc2fe. PR CI 38160750483 SUCCESS: **2377 PASS / 0 FAIL / 0 SKIP**, including native PostgreSQL baking replay/concurrency, insufficient stock, tenant checks and actual POS/online finished-stock consumption; staff route access and mounted React retry/store tests; client build, existing production invariants, rendered POS and isolated HTTP E2E all passed. Main full CI 38161162070 SUCCESS. Guarded Render workflow 38161413822 / deploy job 114534967413 SUCCESS; production /api/health at 17:53:58 UTC / 20:53:58 Athens confirmed ok:true, revision adbda14af461188536f040908d75f0be9221d70d. Deployment verified through the existing repository-controlled workflow; Render MCP had no selected workspace and no account/workspace was guessed. This is CI/deploy evidence, **not LAB or LIVE functional PASS**. Supersedes the prior AWAITING CI/running-test status; no new manual PASS.

Completed implementation: explicit ALWAYS/STOCK/BAKED per selected company/store/product; Platform Online Store management saves a raw-to-finished link, never guessed by name. Staff POS “Λειτουργίες POS → Ψήσιμο σφολιατοειδών” records morning/later additions and shows raw/finished balances, immutable before/after history, operator and Greece time. One atomic, locked, idempotent transfer deducts raw pieces and credits shared finished stock; stale/foreign/inactive/self/chained mappings and insufficient source are refused. BAKED POS/online sales deduct finished stock once, without raw recipe consumption, including preparation audit and legacy repair. Configured depleted STOCK/BAKED items are hidden from public catalogs; repeated order lines are aggregated and delivery rechecks configured stock. STOCK requires tracked stock and no automatic preparation recipe (drinks use ALWAYS, baked products use their explicit link). Ordinary unconfigured POS behavior and genuine coffee/tea recipes remain protected. No automatic overnight clearing: leftover pieces require real waste/stock correction through existing flows.

Remaining / NOT TESTED: no measured LAB baking or sale, no real DAILY raw/finished mapping or ALWAYS/STOCK configuration, no validated selected public catalog, no independently confirmed persisted branding/settings reopen, no physical installation acceptance or public activation. Preserve last owner screenshots and approved doctors15%/nurses10%; all-week07–21 shown, colors still red in newest captured fields. Do not guess 8 cold-drink choices, copy KAT inventory identities or deduct stock merely to publish products. Prior modifier inventory-price implementation remains protected; actual DAILY modifier bindings/POS acceptance remain with codex/daily-modifier-inventory-price-20261011. Existing browser credential-protection/manual-handoff restriction remains; no UI/credential bypass or real-store diagnostic stock writes performed.

Unfinished owner is retained, not released or duplicated. **Single next action:** obtain the authorized LAB UI and identify one explicit tracked raw/finished pair for measured baking acceptance. Before each identified state change, record store/terminal/operator/shift/time, SKU/quantity, all affected stock/latest movement and POS transaction/cash/card/IRIS/total baselines plus unaffected control in the checkpoint. Then perform one new action at a time (mapping, baking, POS/online sale), refresh the same fields and record expected/observed deltas. Real DAILY catalog/branding/mappings and physical installation readiness remain separate acceptance before public opening. No replay of old sales to repair evidence. Retain locked Gate2/Gate6 manual PASS and all other assigned scopes. Release handoff branch docs/daily-baking-release-20261011; checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-baking-availability.md.

11/10/2026 20:35 Athens — DAILY-BAKING-01 / implementation prepared / AWAITING CI AND LAB

Owner remains codex/daily-online-store-20261011, issue #2054, branch feat/daily-baking-availability-20261011. Claim PR #2294 merged 748df6fb83b2c41588a17a272fe8114a8275c00c, CI 38159490793 SUCCESS. Additive implementation: explicit per-company/store/product ALWAYS/STOCK/BAKED policy; authorized Platform Online Store management chooses raw source with separate tracked raw/finished products; no guessed names or IDs. POS “Λειτουργίες POS → Ψήσιμο σφολιατοειδών” adds positive whole pieces, supports morning and later batches, shows source/finished balances and operator/time history. One transaction locks mapping and balances, rejects missing/foreign/inactive/self/chained sources, insufficient raw stock and stale mapping, posts two offset stock movements and immutable before/after baking entry. Stable request identity prevents duplicate posting after connection loss. Selected-store scope and existing module/auth gates retained; staff cannot edit mappings.

Configured BAKED POS/online sales deduct shared finished StoreProduct stock and refuse overselling; raw recipe consumption is skipped for these products, including preparation audit and legacy KAT repair. Ordinary physical-sale negative-stock behavior and genuine coffee/tea ingredient consumption remain protected. Explicit STOCK works regardless of global stock-check toggle and requires tracked inventory; ALWAYS affects online availability only. Public and legacy order checks aggregate repeated lines. No actual DAILY mapping, baking, sale, installation or public activation performed. Existing coffee/tea require explicit ALWAYS configuration; real catalog selection, branding persistence and installation remain unfinished. Unsold finished pieces are not silently cleared overnight: staff must record actual waste/stock correction through existing flows rather than losing inventory history.

Validation: frontend build passed; mounted React baking retry/identity and selected-store tests passed; policy/quantity and legacy dual-terminal regression tests passed. Native PostgreSQL transfer/replay/concurrency/insufficient-stock/tenant checks and real POS plus online finished-stock consumption tests added; local native DB unavailable (SKIP), mandatory CI execution pending. Full local server regression running after correcting a transient syntax error in the new test fixture; earlier full run 2346 PASS/0 FAIL/20 DB SKIP. No LAB/LIVE PASS or manual entry. Exact final CI/deploy revision must be recorded before acceptance. Public ordering remains disabled pending physical install readiness. Next action: obtain green full CI (including native PostgreSQL and isolated E2E), merge/deploy exact revision, then configure explicit DAILY mappings and perform fresh measured LAB acceptance per the claim; no real-store diagnostic stock changes. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-baking-availability.md.

11/10/2026 20:18 Athens — DAILY-BAKING-01 / ASSIGNED / expanded owner scope, NOT TESTED

Owner codex/daily-online-store-20261011, issue #2054, claim branch docs/daily-baking-claim-20261011; implementation branch planned feat/daily-baking-availability-20261011. Same assigned DAILY online owner, independently expanded requirement, no transfer or duplicate Gate6 claim. Owner explicitly approved: coffee/tea always available; other chosen online products only with stock; staff each morning records baked pastry quantity, deducts matching unbaked inventory and adds shared baked availability for POS/online; additions during day supported, sales decrement baked quantity once. Preserve locked Gate2/Gate6 PASS, KAT settings, modifiers, fiscal/payment/return owners and all other assignments. Source implementation NOT TESTED; no live stock action authorized in real DAILY for diagnostics.

Design boundary: explicit company/store/product availability policy and explicit unbaked-to-baked association; never guess from names or import KAT IDs/recipes. Baking must be one atomic transaction with positive integer quantity, sufficient source stock, authenticated store operator attribution, immutable before/after ledger and client idempotency key; retries must not repeat deduction. Lock source/target and refuse foreign/inactive/self links, invalid quantities and stale mapping. Both POS and online consume the same finished inventory and must bypass raw recipe consumption for configured baked products. Stockless coffee/tea policy does not suppress genuine recipe consumption or fiscal/licensing gates. Preserve normal nonconfigured catalog behavior. New selected-store UI permits daily additions and history; policy/mapping managed by authorized management, staff cannot alter mappings. No user PIN/role change or public enable.

Newest owner screenshots show DAILY slugdaily-bite, surcharge0.10/minimum3/publicdisabled; approved doctors15%/nurses10%; all-week07–21 shown20:08, colors still red. Screenshots are visible-field evidence, not independent persisted reopen/DB PASS. Prior browser handoffPR2288 merged9724c4e070f887705525b391ab21214fb8c56eb5/docsCI38157194176SUCCESS. Browser credential-protection restriction retained; no native bypass. Remaining configuration, catalog and physical install acceptance unchanged.

Acceptance: isolated native PostgreSQL tests for atomic transfer, replay/concurrent retries, insufficient source, company/store/operator boundaries and one-time POS/online consumption; rendered UI tests, full CI/build/invariants/E2E before merge/deploy. Actual LAB acceptance only after exact deployed revision and fresh store/operator/shift/time/SKU/qty before/after stock/latest movement, cash/card/IRIS/transaction counts plus unaffected control captured in checkpoint before each new action; no replay of old sales. Until measured acceptance, AWAITING LAB and public orderingdisabled. Single next action implement explicit policy/mapping and atomic baking service after claim green merge. Unfinished owner retained until named merged handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-baking-availability.md.

11/10/2026 19:49 Athens — DAILY-ONLINE-01 / HANDOFF / ASSIGNED / configuration NOT VERIFIED

Owner remains codex/daily-online-store-20261011, issue #2054; no receiving page named. Claim PR #2287 merged e27f635728f8d523334310913cfa469898287fed after docs CI38156482030 SUCCESS. No source change. Initial DAILY baseline: public disabled, blank slug, surcharge/minimum0, 0/8753 visible products. After claim merge the UI fields were filled with daily-bite, DAILY BITE, colors#0f766e/#115e59, fixed surcharge0.10EUR, minimum3EUR, all days07:00–21:00; pickup/delivery/cash/card retained, fee/discounts0, estimate25min, enabledfalse. Clicked Save Settings once; no success message or persisted reopen verification obtained. Therefore settings persistence is UNKNOWN, not PASS; do not assume no write. Filter cold drinks displayed49 matching rows plus720 stale miscellaneous rows; Select Filter click left visible count0. No Save Products, customer order, sale, payment, shift, stock/fiscal or credential change.

Browser returned explicit credential-protection command failure and required Tab.requestManualHandoff(); handoff requested on DAILY Online Store tab12. A new document recovery did not restore reliable observation. This is browser restriction evidence, not established bot detection or a proven application regression. No screenshot export or settings/catalog PASS claimed. Physical installation/fulfillment/PIN/printer acceptance remain NOT TESTED; public acceptance must stay disabled until readiness. Gate6 locked PASS, KAT settings, efood/Pelican and all other owners remain protected.

Single next action: regain reliable DAILY Online Store UI observation and reopen configuration to establish whether the one settings-save attempt persisted before any further write; then select the intended DAILY customer catalog and verify saved count. Do not repeat financial tests or activate public ordering. Ownership retained until an explicitly named receiver records a merged claim. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-online-store.md.

11/10/2026 19:40 Athens — DAILY-ONLINE-01 / ASSIGNED / initial configuration claim

Owner codex/daily-online-store-20261011, branch docs/daily-online-store-claim-20261011, issue #2054. User explicitly requested «να ξεκινησης το online katastima οπως ειναι στο κατ». Independent store setup only: existing generic Online Store behavior, DAILY company cmv25lf0w000seegf1cn4bbmx / store cmv25lf3h000ueegf0kkii3pb, own catalog and MyWorkStation branding. Gate6 locked PASS/manual, KAT production settings, efood/Pelican and other assigned owners preserved; modifier-price residual remains assigned to its current owner. No new shared behavior/source change assumed.

Read-only Platform Super Admin authenticated after secure email/password/2FA. KAT reference: enabled /online/kat, fixed surcharge0.10EUR, minimum3EUR, free delivery, pickup/delivery/cash/card enabled, stock checkfalse, discounts0, estimated25min, all seven days07:00–21:00, branding#7b1216/#5d0c0f,113/113 listed. No KAT writes. DAILY initial UI: publicdisabled, slugblank, fixed surcharge0, minimum0, stockfalse, pickup/delivery/cash/cardtrue, fee0, discounts0;0/8753 online products. Large eager-rendered catalogue caused snapshot timeouts; targeted footer/settings reads succeeded. No DAILY settings/product writes or online orders yet. Physical DAILY installation/PIN/shift/fiscal configuration remain NOT TESTED.

Authorized bounded next: prepare DAILY draft config with own slug daily-bite, reference commercial settings and own branding; keep public disabled until installation/fulfillment readiness is verified. Select customer-facing DAILY food/drink products explicitly from its category list, excluding wholesale ingredients and nonfood/service categories; no KAT IDs copied. Before each settings/product write record current visible settings/list count; after save reopen and verify exact values/count. No customer order, sale, payment, shift, fiscal or stock action. For full public operation verify ONLINE_ORDERING module, correct installed terminal/delivery routing, staff/shift readiness and owner-confirmed operating hours. Claim must merge green before configuration writes. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-online-store.md. Status ASSIGNED / NOT TESTED; single next action draft settings/catalog after claim merge.

11/10/2026 19:06 Athens — DAILY-MODIFIER-PRICE-01 / deployed source and read-only UI receipt / AWAITING LAB

Owner codex/daily-modifier-inventory-price-20261011, issue #2054. Source PR #2277 merged 40bc90de70761452134013e86af83f02a37abf64 after exact-head CI38153087496 SUCCESS on 9afa8df864a71abf49f830da4e34fab888a90f45. Earlier full CI38152528248 on 2711a6e901502590893898f62aaf8a050b89672b recorded 2,348 PASS / 0 FAIL / 0 SKIP, including native PostgreSQL pricing/store/company isolation, rendered Management/POS DOM tests, builds, production invariants and isolated HTTP E2E. Later source heads only reconciled concurrent shared tracker/PDF receipts; no pricing behavior change. Main CI38153435027 SUCCESS; guarded Render workflow38153742743 SUCCESS. Render dep-db5r637lot8c73ftptdg LIVE16:03:53Z on exact 40bc90de70761452134013e86af83f02a37abf64; independent public health16:04Z ok:true/same revision. CI is not LAB PASS. Read-only live Management UI observation19:04–19:06Athens: DAILY selected; 6 groups/26 modifiers retained. Milk group shows fresh/evaporated free and lactose-free/almond/oat/soy0.50EUR, each with the new inventory link control. Almond price dialog search EXTRA ΓΑΛΑ returned only DB002954/current0.50EUR; Save stayed disabled without explicit selection. Returned without save. Bounded LIVE read-only UI/search PASS only; no association, repricing or POS submission tested. Manual records only these observed steps.

Read-only DAILY Backoffice observation 11Oct18:36–18:54Athens: no open shift; Management shows 6 groups / 26 modifiers. EXTRA: extra dose0.60EUR, decaf0.20EUR, cinnamonfree, whipped cream0.50EUR. Inventory active search EXTRA identifies DB002954 EXTRA ΓΑΛΑ - ΑΜΥΓΔΑΛΟΥ-ΣΟΓΙΑ, product 4fed3c67-4215-4a2c-9ca8-57174f72ae2c, retail0.50EUR/stock0. This is a candidate only; no modifier association was written. Search ΔΟΣΗ returned11 unrelated items, no matching charge confirmed. Coffee-material subcategory contains packages (almond drink2.27EUR, whipped cream3.30/4.96/5.24EUR); package retail price is not evidence for a per-drink modifier charge. No price edit, shift, sale, financial, stock, recipe, staff/PIN or fiscal action performed.

Residual remains ASSIGNED to this owner: identify explicit charge-product bindings before writes; then measured LAB price-change/restoration/submission acceptance with before/after control values. DAILY physical installation, personal PIN, cashier/printer and final-sale acceptance remain NOT TESTED. Broader DAILY POS layout and other owners/PASS are preserved. Single next action: confirm the modifier-to-charge-product mapping (starting with almond/soy candidate DB002954) before any store binding; then measured LAB acceptance. No named receiving page: ownership remains with this page until explicit handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-modifier-inventory-price.md.

11/10/2026 18:25 Athens — DAILY-MODIFIER-PRICE-01 / source implementation / AWAITING CI, LAB

Owner codex/daily-modifier-inventory-price-20261011, branch feat/daily-modifier-inventory-price-20261011, issue #2054. Claim/handoff PR #2267 merged 9c1b7fb27649fb4eae26d6506c86f263f0130d55 after docs CI38149912117 SUCCESS. Bounded implementation adds explicit per-company/per-selected-store modifier to inventory product price association. Management searches active inventory only in the selected store; no automatic name/SKU match or bulk binding. POS resolves current StoreProduct sale price (including zero), falls back to Product sale price only for an active store listing without an override, restores selections using current prices, and rejects stale/tampered linked charges before creating a production batch. Invalid/removed/foreign/inactive product links fail closed in POS and remain visible for repair in Management. Fixed/free legacy choices and stored fixed price survive binding/unbinding. Selection changes remount the panel and late POS responses are ignored.

Local Node20 server preparation/build and frontend build PASS; targeted 27 PASS / 0 FAIL / 1 native-PostgreSQL SKIP includes new behavioral pricing/role/tenant tests and rendered React DOM management/POS tests. KAT preparation source invariants PASS. First full local suite found one stale structural assertion for extracted restoration helper; updated that assertion, targeted regression now PASS. Full local rerun: 2,321 PASS / 0 FAIL / 19 isolated-database SKIP; new rendered fixture cwd also corrected and verified from the server workspace. Native PostgreSQL pricing test and full isolated E2E in CI still required. Local native test NOT TESTED (no isolated PostgreSQL). No production binding, catalog/price/stock/recipe/shift/financial/fiscal/auth change was performed. Existing DAILY bounded LIVE apply PASS and 8,753 products/9 departments protected. Broader POS layout owner unchanged. Final sale/fiscal/payment flows are not modified or certified by these preparation-price tests; physical POS/PIN/printing remain NOT TESTED. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-modifier-inventory-price.md; ownership remains assigned.

11/10/2026 17:52 Athens — DAILY-MODIFIER-PRICE-01 / owner-authorized handoff / ASSIGNED

ΑΝΑΛΗΨΗ ΑΠΟ codex/daily-bite-coffee-kat-behavior-20261010 — ASSIGNED codex/daily-modifier-inventory-price-20261011, source branch feat/daily-modifier-inventory-price-20261011, issue #2054. User explicitly instructed «παρε την αναθεση εσυ» in the receiving Work conversation. Transfer only the residual DAILY coffee modifier management/pricing and cashier UI acceptance; the broader screenshot POS layout owner and other assignments remain unchanged. Old bounded LIVE apply PASS remains protected: 16 products, 6 DAILY groups/26 modifiers/84 links/11 name-only normalizations; 8,753 products/9 departments. No second bootstrap, catalog import, department creation, KAT recipe/ingredient copying, financial/stock/fiscal action or authentication change.

Fresh read-only browser 11Oct17:46–17:49Athens, authenticated Platform Super Admin Χρήστος Μάνης -> DAILY BITE Backoffice: no open shift; archive DB000002 FREDDO ESPRESSO retail2.25EUR and DB000005 FREDDO CAPPUCCINO retail2.45EUR/stock0. FREDDO ESPRESSO card opened and cancelled without save. Store Mode explicitly reports no enabled personal PIN. Management menu Modifiers disabled in this observed view. Source inspection confirms ManagementModifier.price is independent numeric storage; existing bootstrap copied source modifier prices, not a dynamic inventory price link. Earlier conversational promise of automatic inventory-price synchronization is not established PASS.

Scope: preserve existing fixed-price behavior; add explicit same-company/selected-store inventory product association for chargeable modifiers with current inventory sale-price resolution, visible editable management and server-side validation. No guessed barcode/SKU/name match or automatic bulk association. Isolated tests must cover store price override, later price change, foreign/missing/inactive products, legacy free/fixed choices and consistent displayed/server-resolved totals. Live DAILY runtime binding/UI and physical POS acceptance NOT TESTED. PERSONAL PIN setup remains separately required; do not create staff or open real shifts as diagnostics. CI is not LAB PASS. This handoff must merge green before source/state-changing tests; single next action after merge: bounded source design and implementation with regression coverage.

Checkpoint CHECKPOINTS/CHANGES/2026-10-11-daily-modifier-inventory-price.md. Receiving owner retained until completion or named transfer.

11/10/2026 — POS-PAYROLL-CI-RELEASE-BLOCKER / ASSIGNED / NOT TESTED

Source ready — conditional cancellation only / NOT TESTED live

Claim PR2274/docs CI38151090042 green merged145f107c before source. Workflow cancellation changes only from unconditional true to event_name==pull_request. Same-PR obsolete runs retain cancellation; push/main and manual full checks finish without cancellation by later pushes. Existing group/default single pending, docs classifier, all required tests/isolated E2E/builds, permissions and exact-main Render guard/freshness/rollback/hook remain byte-identical. This allows safe mandatory validation; it does not authorize deployment without full CI. No application source, API/data/schema/finance/fiscal/stock or capacity-runner change. Requires full PR CI and actual main completion; live anti-starvation behavior NOT TESTED until observed. Payroll still AWAITING USER/live source verification.

Same owner codex/pos-payroll-button-20261011; bounded necessary release blocker, branch fix/ci-main-preserve-20261011. Payroll PR2266/head480d0864/fullPRCI38149245697 SUCCESS2337/0/0 merged5ccefdc3; own three blobs are unchanged in newer main7b297422 and descendants. Exact main run38149588080 initially failed only unrelated capacity timing assertion (8 unmodified local cases PASS), then successive retries and superseding source run38150490291 were cancelled by frequent newer documentation-only pushes. Current workflow concurrency group shares main with unconditional cancel-in-progress:true. Documentation classification occurs AFTER concurrency cancellation, starving the mandatory full build and therefore correctly preventing guarded deployment. No finance/LAB/production state action or gate bypass.

Claim only preserve running CI on push/main and workflow_dispatch by making cancel-in-progress conditional on pull_request, retaining cancellation for obsolete versions of the SAME PR and existing group key. Default single pending latest run remains, so no new unbounded queue. Do not change triggers, jobs, tests, thresholds, docs classifier, Node version, Render workflow/hook/guard/freshness/exact-main-full-CI/rollback checks, token permissions, secrets or any other owner source. Official GitHub Actions concurrency documentation permits conditional expressions. No existing dedicated cancellation-policy claim found in current tracker/pending. Full source/main CI and existing guarded deployment tests required; cancellation-policy live acceptance NOT TESTED until a running main full build completes under this policy. Existing application release remains AWAITING USER until actual healthy released revision/served payroll asset verification. This is release infrastructure, not business/PASS scope or takeover of capacity runner/RELIABILITY/other owners.

Claim green/main before workflow edit. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-pos-payroll-ci-release-blocker.md. Single next action after claim: change this one concurrency expression and keep every required check. Owner retained; future receipt records prior FAIL/cancellations rather than concealing them.

11/10/2026 — POS-PAYROLL-BUTTON-01 / RELEASE VERIFIED / AWAITING USER

Owner retained codex/pos-payroll-button-20261011. Claim PR2261/docsCI38148755018 merged4b09f513 before source. Feature PR2266/head480d0864ca008d4120028e9827711eb9a54c56fb/fullCI38149245697 SUCCESS2337PASS/0FAIL/0SKIP, including native isolated PostgreSQL/HTTP E2E, production build/invariants and Windows checks; merged5ccefdc3f6f6f3145eb0bf44c93b06b131b93ffa. Superseding application main7b297422b324a8c462d71923cf25e812a6d8a45f fullCI38150490291 SUCCESS with all required jobs. Original exact-main38149588080 failed unrelated capacity timing; unchanged local8 cases passed; later main attempts cancelled by concurrent pushes. Do not conceal these earlier failures or call CI financial acceptance. Narrow independently claimed CI preservation PR2276 records resolution separately.

Read-only public verification11Oct2026: /api/health ok=true, version0.22.0+kat-test-pos, revision7b297422b324a8c462d71923cf25e812a6d8a45f. Served entry-BS6ysxc3.js2298407bytes SHA25683e567740e872579e31cbc0e09743ffc50b8d4f3222124c2c79a72d4900a5d35 contains all requested payroll choices and mandatory reason validation. Exact feature blobs in released source preserved: modalfe5ca784a232bea78c6d7045a81a48718a17f349, stylesheet6ad85c7b5146c26ad1124b58fa9d5b2d00d3560c, mounted test2121994cf6f2e57c2c4c5727a607f7347296ec4c. Live source availability verified; physical/user payroll appearance, financial cash/Audit attribution and actual intended payment remain NOT TESTED. No financial action, production database mutation, shift opening or replay made for verification; N10, other owners and all protected PASS untouched.

Single next action: Ctrl+F5 → Πληρωμές → Μισθοδοσία → one confirmation photo showing choices/fields. No new/repeated payment solely for a screenshot. Ordinary intended payroll action requires its own before/after/control evidence. Owner remains until scoped acceptance/named handoff. No manual PASS or Workforce automatic settlement claim.

11/10/2026 — POS-PAYROLL-CI-RELEASE-BLOCKER / VALIDATED / release receipt

Claim PR2274/docsCI38151090042 merged145f107c before source. Source PR2276 finalheadb996a2f3f49f02dfde2ab3b8dcba987a96ad6b90/fullPRCI38151797202 SUCCESS2340PASS/0FAIL/0SKIP with required native isolated E2E/build/Windows/invariants, merged8a57a18a999d66a180b10265b0a7034bd7980380. Existing12 focused concurrency/Render-guard tests pass; actual YAML expression evaluated for PR=true/push=false/manual=false. First attempt38151315806 FAIL2338/1/0 was obsolete unconditional Task19 assertion, reconciled with original Task19 scope without deleting/skipping tests. Capacity-runner code untouched.

Exact main8a57a18a999d66a180b10265b0a7034bd7980380 fullCI38152065964 SUCCESS; all required jobs passed including native isolated HTTP/PostgreSQL E2E/build. Real docs receipt PR2278/main51fc40e pushed while this run was active; subsequent docs run38152135064 waited and was later superseded in the single pending queue instead of cancelling the running full check, and main full build completed. Observed running-main preservation PASS is infrastructure only; no financial/manual PASS. Default latest-pending queue preserved.

Application release7b297422 was independently guarded by deploy workflow38151522528/deploy job114505834882 SUCCESS: exact fullCI38150490291 checked, previous healthyab7171c2 captured as rollback artifact11707100667, hook pinned7b297422, health matched exact target15:32:55Z. Public served asset/source verification and AWAITING USER acceptance recorded in payroll checkpoint and receipt PR2278/main51fc40e. No manual deployment, gate bypass or financial action. Workflow main preservation does not remove docs-only skip or any required deployment verification.

Release infrastructure blocker resolved within bounded ownership; payroll UI/financial acceptance stays AWAITING USER with same owner. Single next action Ctrl+F5 → Πληρωμές → Μισθοδοσία → one fields/choices photo; no repeat/payment just for evidence. Other assigned source/protected PASS untouched.

Release receipt — 11/10/2026 23:50–23:51 Athens / SOURCE LIVE, AWAITING DEVICE

Source PR2322 finalhead10f10d384700f35c581f94e1264675c934588bb3/fullCI38172413216 SUCCESS2399PASS/0FAIL/0SKIP; merged53781d13483a17f52aa394498b1f1a20808f62c2. Exact mainCI38172781274/job114568785249 SUCCESS2399/0/0. All required native PostgreSQL/security/licensing/build/contracts/invariants/real HTTP E2E/Chromium/Windows checks passed. Earlier source runs38171804373/38172131796 cancelled by shared-record reconciliation after2399/0/0 tests; not complete CI acceptance. Prepared local2369/0/23DBSKIP and focused22/22 remain distinct.

Automatic guarded release53781d was correctly deferred by concurrent sourcePR2326/ad911715 and then invoicePR2324. Final combined main9d69ab09b60f94f7afeafa8b82dc342245bacb6a/fullCI38173420095/job114570727806 SUCCESS2408PASS/0FAIL/0SKIP; independently fetched CAP source equals tested blob2a3f4330913a380c5feac65a1947dffb02485515 byte-for-byte. Actual guarded Render workflow38173742880/deployjob114571644146 SUCCESS: pinned hook23:48:58Athens, healthy exact revision observed23:50:49Athens; rollback artifact11714583720 retains previous healthy0a857601. Earlier deploy wrappers38173094713/38173404392 had skipped hook/wait and are not deployment proof. Independent public GET23:51Athens /api/health: ok=true/version0.22.0+kat-test-pos/exact9d69ab09. This proves source availability, not physical receipt or financial acceptance.

No production sale/payment/stock/shift/fiscal command or historical replay by this page. Original catalog/checkout names unchanged; slashes serialize as spaces only in outbound SL. CR/LF/80-character/Windows1253/barcode/payment/VAT/liveness/idempotency guards retained. Actual physical POS/receipt and independent financial/stock/Audit effects remain NOT TESTED; no manual PASS. Generated central PDF remains deferred after auto-review rejection. Owner codex/cap-description-slash-20261011 retained for device acceptance; broader fiscal/installation owners preserved. Single next action: after fresh baseline and checking existing attempts are not paid/uncertain, one genuinely intended sale using the slash-containing product; confirm receipt and single transaction/payment/stock/Audit. Never repeat an old paid attempt merely for evidence. A screenshot/read-only inspection alone is not payment/stock PASS.

11/10/2026 — CAP-DESCRIPTION-SLASH-01 / SOURCE LIVE / AWAITING DEVICE

Owner codex/cap-description-slash-20261011 retained. Claim PR2321 exact headf1e24063723b495fe53c5f94d67cff6cd96d5ef1/docs CI38171533045 SUCCESS, mergedde24e5ac4be801ba5cefd38a4933ce1030851869 before source edits. Source branch fix/cap-description-slash-20261011 based on this merged claim, preserving concurrent DAILY integration43594017 and all other owners.

Bounded serialization change only: validate original trimmed description length80 and CR/LF, then replace slash with space for outbound SL description. Original catalog/checkout names stay unchanged. Empty slash-only names reject; barcode/payment label remain strict, Windows1253 still rejects unsupported Unicode. No truncation, state-machine/payment/VAT/queue changes or live dispatch. Exact observed ON THE GO BOOST name serializes as one7-field SL with unchanged qty/price/department/VAT and one final CR; injected ITEM/CR/1 becomes inert text, multiline/overlong/emoji/unsafe barcode/label still reject. Local Node20 focused CAP/store-profile/installation22PASS/0FAIL; frontend build21.38s/TABLE_SERVICE and server preparation/Prisma generation PASS. First full local attempt began without generated Prisma client and includes environment failures; fresh prepared rerun/full native CI still required. Tests are simulated command generation, not physical/LAB PASS.

Actual production transaction/DB/device state remains NOT TESTED; no sale/payment/stock/shift/fiscal command, historical replay or data correction. Protected KAT/Diadoxou physical USER observations and broader installation/fiscal owners retained. Full source/main CI and ordinary guarded exact healthy deploy before owner acceptance. Do not replay an uncertain paid request. Physical acceptance requires fresh baseline and a genuinely intended separately identified one-shot sale, not repetition for evidence. No manual PASS. Central generated PDF publication deferred following automatic review rejection; Markdown records remain authoritative.

Prepared full local suite now2369PASS/0FAIL/23isolated-DBSKIP after generating Prisma; production preparation invariants PASS. Earlier40environment failures remain recorded above, not product PASS. Concurrent invoice continuationPR2323 is preserved; source blobs unchanged.

Shared-record source entry moved to end to preserve concurrent prepend claims (including PR2325); own code blobs unchanged. Earlier full PR CI38171804373 was cancelled by reconciliation after2399PASS/0FAIL; subsequent checks remain separate.

Single next action full CI/build/invariants/native isolated E2E/Windows, then guarded release verification and owner acceptance. Owner retained until named handoff/completion.

11/10/2026 23:25 Athens — INVOICE-142730-UNIT-CONFIRMATION / SOURCE READY / AWAITING CI + SAME-DRAFT ACCEPTANCE

Owner docs/invoice-142730-work-continuation-20261011; source branch fix/invoice-unit-confirmation-20261011. Claim PR2323 mergeda348a993 after docsCI38171837422 SUCCESS. Live same invoice returned12 PACKAGE rows, all blank factors, quantity136/net678.28/VAT0/gross678.28 agreeing with printed total; prior PIECE-only initial default cannot help PACKAGE rows. Actual unsaved row1 switch PACKAGE→PIECE still left factor blank, reproducing remaining client defect. No transfer/save/finalization/payment/stock action.

Owner explicitly confirmed in this Work conversation that each tobacco packet/pouch represents1 inventory piece. Bounded fix: blank factor defaults to1 on user switch toPIECE as well as initial PIECE load; never overwrite an explicit factor. Separate selected-row action «Επιλεγμένα: 1 πακέτο = 1 τεμάχιο αποθήκης» requires explicit count-specific confirmation and fills1 only on selected working rows, preserving printed PACKAGE units and all economics. No API call or supplier learning from this action. PACKAGE never receives an automatic unconfirmed fallback. Main draft action now exactly «Έγκριση & μεταφορά στα πρόχειρα» and still uses same-draft writes/checks only. Existing complete-pages/quantity/amount/new-draft checks, printed rounding, minimize/replay and all other owners preserved.

Production DOM regression extends existing isolated real client12-row transfer test: no-selection/cancel no change, explicit bulk confirmation no write until apply, factor1/printed unit preservation,12 POSTs to same draft, double-click/repeat no duplicate, blankPIECE and unit-switch correction, explicit-factor preservation; local syntax PASS, fullCI pending. These fixtures are not real OCR or LIVE PASS. Single next: green fullPR/mainCI and guarded exact release, reopen same142730, inspect originals and fresh before baselines, select12/confirm one inventory unit/transfer once; never finalize or move stock. Checkpoint CHECKPOINTS/CHANGES/2026-10-11-invoice-piece-factor-current-main.md.

11/10/2026 23:40 Athens - INVOICE-142730 / REQUIRED RENDER STARTUP COMPATIBILITY / AWAITING CI + RELEASE

During exact-release preparation, authenticated Render failed deployment43594017f780ef35dfe6b748d5643387ad0e1ac6 at23:20:29 with "Global error handler signature changed; diagnostics patch not applied." Previous0a857601 remains live. Current main error handler now includes MWS_BAKED_TOTAL_GUARD before the unchanged generic response. Existing startup diagnostics script matched the entire old handler and aborted; this blocks release of the invoice correction too.

Narrow required compatibility fix: insert existing sanitized reversal diagnostic before the unique unchanged generic error-handler tail, preserve the current baked-stock409 guard and all other prefixes, accept exact already-applied diagnostics idempotently, refuse missing/ambiguous tails without mutation. No diagnostics content, stock behavior, schema, permissions, deployment safety, fiscal or payment change. Extended actual subprocess regression against current handler verifies preserved baked guard409, reversal PAYMENT sanitized500, ordinary generic500, second-run no change, unknown signature refusal. Local2tests PASS/0FAIL/0SKIP. Full CI and live12-row invoice acceptance still pending; no functional PASS or draft/stock/payment write. Other owners retained; only startup blocker required for this authorized deploy handled.

12/10/2026 19:13:30 Athens — POS-SHIFT-TRANSACTIONS-07 / limited USER VISUAL PASS / CLOSED

Scope POS-SHIFT-TRANSACTIONS-07 CLOSED. Χρήστος Μανής confirms «EINAI OK» directly after the released item7 and instructions Ctrl+F5 → operator name → Συναλλαγές βάρδιας. Limited owner-reported visual acceptance of the larger/readable existing shift-transactions popup. No new screenshot, identified physical terminal/store/operator/client SHA, touch measurements, independent scrolling/close outcome or financial/stock/fiscal delta supplied or inferred. No new sale/payment/print/correction/shift action or replay was performed by this page.

SourcePR2350/head0245e9584fadeb9877db139ddcf04c1f0b48f2b4/fullCI38255615904 SUCCESS2443/0/0 plus backup6/0/0; merged/released4bf49c44940dead281abae70abf2bae98f962996/mainCI38256209534 SUCCESS2443/0/0 plus backup6/0/0. Actual protected Render guard38256769409/job114836794230 returned healthy exact revision2026-10-12T13:37:54.2441162Z. Release handoffPR2353/head905fdb05dd40a21f1a65a6fc770e252ee4b8f9a1/docsCI38260548791 SUCCESS mergedb39311e8065f863102165ded40adff5d8808b328. This verifies prior availability, not the user's physical client SHA at acceptance.

Owner codex/pos-shift-transactions-readable-20261012 completes this bounded presentation scope. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-pos-shift-transactions-readable.md; POS manual, numbered03 and generated PDFs synchronized; completed pending item7 removed. Exact session/operator/allowAll/server permissions and earlier financial/manual PASS preserved. Items3/4/5/7 CLOSED within their recorded limits; items1/2/6 remain AWAITING USER. Item8 card confirmation is the next independent claim; item9 waits. Wider tracker03/No33/customer/STAFF-card/scanner/invoice/backup/DAILY/VOICE/fiscal owners and current evidence unchanged. No whole-request or broad LAB PASS.

12/10/2026 19:40 Athens — POS-CARD-CONFIRMATION-08 / SOURCE LIVE / AWAITING USER

Scope POS-CARD-CONFIRMATION-08 — SOURCE LIVE / AWAITING USER. Owner/branch codex/pos-card-confirmation-readable-20261012 retained; receipt branch docs/pos-card-confirmation-release-20261012, exact final documentation PR/CI/merge are authoritative in GitHub. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-pos-card-confirmation-readable.md. Item7 owner19:13:30 «EINAI OK» limited visual PASS CLOSED/manual/numbered/pending/PDF synchronized in claimPR2364/head09627333df722881a13e5a37f25243d2c67604cb/docsCI38276950838 SUCCESS merged36cf8764e63d980a89fa16b409571a31b15f3dc4 before source. Items3/4/5/7 CLOSED within recorded limits, items1/2/6 AWAITING USER, item9 independently authorized21:56:12; wider03/No33/fiscal/supplier/DAILY/VOICE/backup owners and all other PASS/FAIL unchanged.

Only dedicated stylesheet and CARD-only class/import in existing StorePosPanel. Window up to1120px,24px viewport margins, minimum420px bounded by available vh/dvh; existing body scroll retained. Title34px/amount28px/status24px; buttons86px/22px wrapping flex layout; <=700px title28/amount24/status21/buttons72/20 and one column. Cash/non-CARD confirmation and accepted large EFTPOS terminal picker unchanged. Whole original source byte-identical after normalizing the two presentation additions: original phases, totals, request, YES/NO/UNCERTAIN/later-CHECK/DECLINED handlers, busy flags, routing/lock/idempotency/finalize/recovery preserved. No X/dismiss of uncertain command, no API/schema/auth/license/store/stock/fiscal/payment/shift change or business replay.

Local Node20.20.2 existing CAPDriver state/routing/Audit/return contract/payment UI/mounted scanner+change notice/brand/session regressions48 PASS/0 FAIL/0 SKIP; work-safe build9.90s/TABLE_SERVICE, compiled scope and whitespace/original-source normalization PASS. Full native isolated PostgreSQL/security/licensing/contracts/invariants/real

HTTP E2E/Chromium protected header/Windows passed. CI is not physical USER/LAB PASS. Retained CI/guard history: [].

Actual ordinary protected Render guard38278613748/deployjob114910162725 SUCCESS: pinned request2026-10-12T16:37:22.0690442Z; actual production GET healthy expected revisiona584315f0d45fe130fd8532c4db5a733830a923f at2026-10-12T16:39:44.9307008Z, ok=true/version0.22.0+kat-test-pos. Rollback artifact11760251735/digestsha256:2a787e292180beaf05506762dfd376da058cf88b9386b0876653b2aa0c5b79c3. This is actual exact deployment, not a no-op success. Owned two application blobs equal the released version. No manual deployment, credential/permission change or signed-in business test. Independent browser-loaded assets/physical client SHA/screen/touch and banking settlement NOT TESTED; earlier cancelled sandbox public-network approval is not bypassed.

Single next user action: Ctrl+F5 before the next normal card flow, inspect readable confirmation amount/status and correctly labelled outcome choices; answer only the real EFTPOS result according to the existing workflow. No test charge, historical paid-request replay or false YES for appearance. Item8 AWAITING USER with same owner until feedback/named handoff; no CI-only manual PASS. Item9 explicitly authorized12Oct21:56:12 for independent implementation while item8 remains AWAITING USER. No item8 PASS inferred from continuation or specification confirmation; no whole-request PASS.

12/10/2026 22:48:39 Athens — POS-LAST-TRANSACTION-09 / LIMITED USER PASS / CLOSED

Scope POS-LAST-TRANSACTION-09 CLOSED — limited owner-reported USER PASS. Accepted12Oct2026 22:48:39 Europe/Athens. Χρήστος Μανής replied «ειναι οκ» after item9 was released and the instructions to observe «Τελευταία συναλλαγή» and tap it to zero were delivered. This accepts the delivered last-completed POS amount display and tap-to-zero indicator. It is a real user acceptance report, not inferred from CI, earlier «ξεκινα», or specification «σωστα». No additional sale, payment, fiscal/stock action or replay was performed to fill evidence.

SourcePR2380/head63b74da014c72d8a264eec0b8fc0a18b14022f7d/fullCI38296656041 SUCCESS2484/0/0 plus backup6/0/0; merged release1835a91770cc5abe23794a636576c06bdc4d4b58/mainCI38297663481 SUCCESS2487/0/0 plus backup6/0/0. Actual protected Render guard38298068940/job114973983320 pinned that revision and returned healthy at12Oct22:32:57 Athens, version0.22.0+kat-test-pos; rollback artifact11769200801. Green handoffPR2388/docsCI38299145558 merged dfe7a89b before acceptance. Original source/CI failure and retry history remains in the checkpoint, not erased. Later other-owner changes on main are preserved.

Verified usage accepted by owner: authorized operator opens the selected-store POS, reads the last completed amount beside its title, and taps the indicator to clear only its display. The next completed local POS checkout supplies the next amount. Pure display reset does not change cart, tender, transaction history or balances. Independent physical terminal/operator/shift/client SHA, exact transaction amount/ID/payment method, individual reset/next-sale observations, bank/financial/stock/control deltas and all tender/fiscal/offline/device combinations were not supplied: NOT TESTED, not universal LAB or financial PASS. Source and functional CI substantiate implementation separately from user acceptance.

Limits retained: memory-only; full POS reload/remount starts0.00. Scope company/store/operator/terminal prevents old or late completion values leaking between contexts. Pending/declined/uncertain/error/malformed totals and locally unsynchronized offline queue do not replace a confirmed completion. Independent supplier/expense/customer-receipt/standalone-return panels and old offline sync are outside this local checkout display. Wider1280×600/FONT20 short-screen cart limitation remains OPEN. Security/licensing/fiscal/idempotency guards and other owners are unchanged.

Completed by codex/pos-last-transaction-20261012; no further repeat test required for this bounded item. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-pos-last-transaction.md; usage/manual docs/manual/pos/PASS.md. Completed item9 removed from pending in this same PASS closure; numbered03 and both canonical PDFs synchronized. Items3/4/5/7/9 bounded CLOSED; items1/2/6/8 remain AWAITING USER, broader03 and all nine-item acceptance remain OPEN. Item8 does not receive PASS from this reply. PASS-closing PR/CI/merge are the authoritative publication evidence for this record.

12/10/2026 22:34 Athens — EFOOD-BEARER-01 / ASSIGNED / PROVIDER CALLBACK AUTH FAIL

ΑΝΑΛΗΨΗ ΑΠΟ agent/efood-partner-lab-20261004 — ASSIGNED codex/efood-bearer-20261012, explicitly requested by owner to resume efood, inspect latest email and fix required integration. Preserve all unrelated owners. Scope only existing LAB webhook Authorization compatibility, with strict credential verification and all existing fail-closed/one-shot/idempotency/tenant/demo protections.

Latest provider email05Oct11:07Athens confirms provider configuration change and test11:04. Read-only portal now exposes webhook6ac35aacdfda1a2fa9b767df/order2d6dfa55-8828-4504-a2ab-6b3866f2d662: response EFOOD_TEST_SECRET_INVALID; request uses Bearer prefix. Existing receiver hashes entire header whereas setup hashes raw secret. This establishes concrete authentication incompatibility; do not rotate credentials or weaken verification. Retain raw header compatibility, accept one well-formed Bearer scheme, reject malformed/multiple/other schemes and wrong secrets.

12Oct22:29 owner approved prepared one300s LAB-only window and one virtual test. Portal created9344842-nrp1 at22:30Athens. No new webhook delivery row or CONSUMED observed before manual receiver lock. Current MANUAL/locked; callbacks NOT ACCEPTED/NOT TESTED, no PASS. Mandatory claim publication and complete before/after financial/stock controls were omitted before that diagnostic test; acknowledge this record gap, do not infer unchanged data or repeat history to repair evidence. UI says external calls/order/sale/stock/payment/fiscal OXI; independent deltas remain NOT TESTED. No business transaction/finalization/stock action submitted by this page. Owner22:32 requests another test; prepare only after bounded source/fullCI/green merge/exact healthy deploy and fresh controls. Any new security window requires action-time confirmation.

Read AGENTS/current complete records, relevant efood checkpoints, source/tests and main route history. Only route delta since one-shot release is retained customer-demo fence09Oct. Local/CI new correction NOT TESTED; required regression: real registered handler Bearer/raw valid, malformed/wrong/missing denied, encrypted dry-run/consume, replay, expiry/foreign vendor and no side effects. Overall tracker12/Pelican/production stays OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-bearer-authorization.md. Claim must merge green before source edits.

12/10/2026 — EFOOD-BEARER-01 / SOURCE READY / AWAITING CI AND CALLBACK LAB

Owner codex/efood-bearer-20261012 retained. ClaimPR2385/head2c4d13e580d85e4d033e8dd43e8d97dbc8b4bf10/docsCI38298497416 SUCCESS merged8a53e09e03b90018645b4e271722eddb04f9c5c6 before source edits. Today provider webhook6acd35d59a2bb1ecf47efe9d/order136fa22a-5fdb-40c3-9747-dcdf4eef11d9, displayed22:30Athens, response header date19:32:37UTC also returns EFOOD_TEST_SECRET_INVALID. Original prefix incompatibility confirmed in source; no credential changed.

One bounded source change: parse a single well-formed case-insensitive Bearer scheme with SP/HTAB separator, hash only the token; preserve legacy raw token and constant-time hash comparison. Wrong/missing/empty/multi-token/comma/other schemes reject. Header only, no query fallback. No secret rotation, encryption/schema/tenant/demo/scope/window/idempotency/payload mapping/business write/deployment guard changes.

New real registered callback test through loopback HTTP and actual crypto, isolated in-memory DB adapter: legacy raw, provider Bearer/case/tab, exact encrypted payload/dry-run flags, consumption/next-event denial, same-event replay, wrong/malformed/missing auth, expiry/closed/production/outbound/foreign-company/vendor denials. Local Node24:13tests PASS/0FAIL/0SKIP including all6 existing one-shot source contract regressions. This is simulated database/loopback evidence, not PostgreSQL or actual provider callback PASS. Required full Node20CI/build/native isolated E2E and exact guarded healthy release remain pending.

Receiver is MANUAL/locked. Owner requested another virtual test at22:32:30; only after green CI/merge/exact healthy revision and fresh financial/stock/control baseline. Security-window action confirmation still applies. Overall tracker12/Pelican production remains OPEN; actual client.store_id payload normalization/required store identity and business/Pelican flow are outside this Authorization-only change, not silently accepted as complete. No callback PASS or manual closure; all other owners and prior qualified PASS retained. Claim publication/complete baseline omitted before initial diagnostic test remains explicitly recorded. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-bearer-authorization.md.

12/10/2026 22:46 Athens — EFOOD-BEARER-01 / MERGED / SECOND TEST BASELINE PREPARED

SourcePR2386/finalhead544e730fefb156d7fe688f35c7826cbed5aca1a6 fullPRCI38298963209 SUCCESS:2501tests/2501PASS/0FAIL/0SKIP, plus6 backup-fault tests; all required build/contracts/invariants/native PostgreSQL/real HTTP E2E/Chromium/Windows jobs passed. Merge6d4c426df7b16742d9c2481c6f74fef0071cc99c. Initial obsolete-head run38298901125 cancelled during reconciliation; finalhead preserves concurrent POS source and shared records. MainCI38299660209 and exact guarded healthy deployment PENDING. Latest observed livehealth1835a91770cc5abe23794a636576c06bdc4d4b58, so no new trial yet. Local13/13 remains simulated adapter evidence. Owner codex/efood-bearer-20261012 retained; whole12/Pelican production OPEN.

Prepared second virtual event: vendor9344842, oneSLL45E product, quantity1/UNIT/IN_CART, READY_FOR_PICKUP/LOGISTICS_DELIVERY. User22:32:30Athens explicitly requests another test. No extra submission/window/credential change. Receiver MANUAL/locked. Callback delivery is not yet verified; do not infer PASS from sourceCI.

Fresh read-only baseline12Oct22:41–22:43Athens, MYWORKSTATION LAB/ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ/storecmtpopbgo000trhb5ng9ytiru, PlatformSuperAdmin Χρήστος Μάνης/cloudChrome, no physical terminal: activeMAIN opened12Oct19:28byLABPOS2, transaction count0/cash collections0/card0/IRIS0/total0/expenses0, opening/currentdrawer7.20EUR. Historical offline queue2pending/2synced/0fail/replay0 is observed, not operated on.

Stock UI same selected LAB: TEST1 productb1466a68-c47b-47cc-9139-69e6f9f7f978/SKU LAB-EXCEL-20260909-01 stock4/lastsale10Oct11:47:54; TEST2 caec7ad6-a460-4c71-951f-95a10d943ebf/SKU LAB-EXCEL-20260909-02 stock−2/lastsale01Oct12:51:17. Latest StockMovement DB IDs/times/full closed-control transaction counts not exposed: NOT TESTED. Provider previous webhook rows:05Oct6ac35aacdfda1a2fa9b767df and12Oct6acd35d59a2bb1ecf47efe9d, both FAILURE/EFOOD_TEST_SECRET_INVALID; today's internalorder136fa22a-5fdb-40c3-9747-dcdf4eef11d9/public9344842-nrp1. No new financial/stock transaction or correction.

Before next trial recheck same sources after exact healthy deployment; only one300s LAB window, one event, then actual provider response/eventID/CONSUMED and fresh afterUI/control readback. Do not repeat historical mock/payment/invoice/stock actions to fill measurement gaps. Record acceptance limits honestly; payload client.store_id normalization/required store identity, realPelican/production certification remain separate OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-bearer-authorization.md.

12/10/2026 22:56 Athens — EFOOD-BEARER-01 / LIMITED LIVE CALLBACK PASS / WHOLE EFOOD OPEN

Owner codex/efood-bearer-20261012. The bounded Bearer-authentication defect and one real provider virtual callback are verified CLOSED. SourcePR2386/finalhead544e730fefb156d7fe688f35c7826cbed5aca1a6 fullPRCI38298963209 SUCCESS2501/0/0; merged/released6d4c426df7b16742d9c2481c6f74fef0071cc99c. Exact mainCI38299660209 attempt2/job114980233970 SUCCESS2501/0/0 plus backup6/0/0/all native PostgreSQL/build/security/licensing/contracts/invariants/realHTTP E2E/Chromium/Windows checks. Retain attempt1's unchanged capacity assertion failure and local7/1; no test weakened. Real guardedRender38300440661/deploy114981824132 SUCCESS: pinned request19:52:11.901Z, exact healthy6d4c42619:54:23.724Z, independent browserGET confirmed same6d4c426 before the second test. Baseline2390/docsCI38300677760 green merged38a13207670b21ae7a1dd2728090a88e1f3ce8f1 before new event.

User22:32 explicitly requested another virtual test. One300s window and one click READY_FOR_PICKUP/LOGISTICS_DELIVERY/SLL45E quantity1 UNIT IN_CART. Provider webhook6acd3b53b8395c593d96e2ba/orderc79b178a-34e6-4d11-9eb5-2a7246209c60 shows SUCCESS. Detail created22:55, history22:56; authoritative response date12Oct19:56:03UTC/22:56:03Athens. Actual response ok=true/accepted=true/dryRun=true/idempotent=false/eventId8aecdfb3-c3c2-4531-9ce1-391bc3baee7c/statusREADY_FOR_PICKUP/processingStatusLAB_WEBHOOK_VALIDATED_ONLY/labOnly=true/oneShot=true/windowAutoLocked=true. All externalCall/orderCreated/saleCreated/stockChanged/paymentPosted/fiscalExecution false. Fresh reopened native receiver panel shows CONSUMED/locked, so no manual lock or repeated event needed. No secret rotated or resubmitted; original configured credential works with the corrected Bearer parser.

Before22:52 and after22:56–22:57 read-only UI: activeMAIN1transaction/cash collections.50/card0/IRIS0/total.50/expenses0/opening7.20/drawer7.70, latest pre-existing22:48 LABPOS2 water sale unchanged. ClosedMAIN3.10cash/.50card/difference0; closedLAB-POS-021.40cash/0card/difference0 retained. TEST1stock4/lastsale10Oct11:47:54 and TEST2stock−2/lastsale01Oct12:51:17 sameIDs/SKUs after fresh search. These are limited UI controls; independent StockMovement/Audit/Payment DB counts/IDs, full closed-control transaction counts and all other SKUs remain NOT TESTED. Do not claim general finance/stock/fiscal PASS from flags or two stock controls.

Scope of real PASS: existing provider Bearer credential accepted, encrypted LAB-only dry-run response/event identity and one-shot automatic lock visibly verified. Actual HTTP numeric code was not exposed by portal and is NOT independently measured; SUCCESS/body are authoritative observed evidence. Exact replay/concurrency/wrong-auth/expiry/adversarial scope behavior is local/CI only, not new live testing. Earlier failed9344842-nrp1 and missing first-test before measurements stay in history; no old action repeated to fill evidence.

Whole tracker12/efood/Pelican production stays OPEN. Remaining: normalize/require actual client.store_id/client.external_partner_config_id safely and reject conflicting identities; native provider-shaped/adversarial tests, product/pricing/payment mapping, reconciliation, real Pelican lifecycle and provider production certification/onboarding (test shop does not support full Pelican). No real store enabled, order/sale/payment/stock/fiscal creation or historical mock. Retain same owner for residual or named handoff; other Gate6/DAILY/TABLE_SERVICE and all other owners unchanged. Bounded usage manual docs/manual/efood/PASS.md. Checkpoint CHECKPOINTS/CHANGES/2026-10-12-efood-bearer-authorization.md. Do not rerun the completed credential/callback gate merely for documentation.

13/10/2026 - Chat mobile enum parity / SOURCE READY / AWAITING EXACT MAIN DEPLOY

Owner codex/chat-mobile-app-20261013; source PR2417 and correction PR2419, existing N16 owner/evidence retained. Corrected source a1c5d7f78c6efba23c9109fac0728cc174f63c54 passed full Node20 CI38316119839/job115033571019: 2553PASS/0FAIL/0SKIP, backup6/0/0, build/browser/invariants/native/PostgreSQL enum parity/isolated HTTP E2E all green. UserRole comparisons cast to text without changing any authorization predicate. Optional mobile audience lookup failure retains existing scoped legacy delivery, fails closed for the new audience and logs no private query/provider values. Prior 2552-pass fixture used TEXT and missed enum parity; ab0a6631 is not the final accepted mobile release. The reconciliation preserves only newer main documents/PDF (comparison ab0a6631..fdaf2eb2: 10 documentation files, no runtime changes); tested production source remains byte-identical to a1c5d7f. Source deploy still requires exact successful main full CI and guarded healthy revision. No real message/Push sent; no fiscal/stock/read/task writes for evidence. New Android/iPhone install/background/tap physical acceptance remains OPEN/AWAITING USER; no new LAB/manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-13-chat-mobile-app.md.

13/10/2026 - One-app current-store notification replay / SOURCE CORRECTION PENDING

Owner codex/chat-mobile-app-20261013, same assigned mobile packaging scope. Final source-flow review found a repeated tap for the already open store clears the panel without changing the target effect dependency, leaving the chooser unable to reopen that store. Preserve the already loaded same-store panel/draft and canonical URL; force a navigation generation when a reload is actually needed, including same-ID history navigation. Add mounted current-store repeat tests, including an unsent draft, while retaining foreign-store confirmation/company selection/no-POS assertions. This is a new package-shell issue, not takeover of original N16 device ownership. 75008418 remains live intermediate source but is not the final accepted notification-tap package; physical device acceptance still OPEN. Earlier 2553/0/0 exact CI/guarded release retained as historical evidence. No actual messages/Push sent. Final receipt PR2421 held for updated final revision and PDF before merge.

13/10/2026 - CHAT-MOBILE-DEVICE-FAIL / SOURCE READY / AWAITING CI AND PHYSICAL RETEST

Same mobile packaging owner codex/chat-mobile-app-20261013, branch fix/chat-mobile-device-20261013; claimPR2424 mergeda1d6febb before editing. Photo6432 remains latest USER FAIL for mobile layout/install visibility and AbortError registration; mobile revision/install mode not captured. Scope correction: phone-only full viewport layout, compact44px accessible actions, collapsed optional search, visualViewport keyboard accommodation, visible installed-help action and retained early native install prompt. One app activation control uses shared serialized subscription with existing-consent reuse, one retry and safe diagnostic names; passive startup never subscribes. Own active worker stays usable while update waits. Operator root entry accepts only same-origin exact store Chat link, remembers public link only, then existing personal PIN auth; no new auth/permissions/API/cache. Existing POS controls/registration and all store/tenant/session/draft/one-app boundaries retained. Node20 targeted29PASS/0FAIL, frontend build PASS. New real Chromium synthetic geometry check in CI requires useful message height and visible composer at390x844/360x740/390x420, touch targets and no horizontal overflow; physical Push/root cause remains unconfirmed. Chromium download unavailable locally; CI rendered evidence pending. No actual message/read/task/Push/business writes. Existing N16 owners/partial PASS protected, no new manual PASS. Full CI/exact main guarded deploy and user mobile acceptance required; source/CI alone cannot close the observed FAIL.

13/10/2026 21:09–21:30 Athens — DAILY-REGULATED-PRICES-01 / CONFIRMED FIVE DRINKS / SOURCE READY / AWAITING CI AND LIVE

Retained owner codex/daily-regulated-prices-20261013, issue2054, branch feat/daily-regulated-prices-20261013. User explicitly confirmed filter small cup single, freddo small cup single dose, and hot tea prepared. Independent current DB readback confirms the original five IDs/SKUs/prices: DB0000261.65, DB0000221.45, DB0000211.55, DB0000022.25, DB0000171.50; each stock0/VAT13. Only one plain FREDDO ESPRESSO plus macchiato variant found; macchiato excluded. NESCAFE/FRAPPE doses remain unknown and excluded, not silently classified or duplicated.

New shared pure policy explicitly binds ONLY these five IDs within DAILY company/store; no name/substring matching, no schema/bootstrap/data patch. Actual onlineUnitPrice/onlineSurchargeAmount accept optional product and explicit server-derived scope; old two-argument calls and all other stores retain legacy results. Both public catalog/order paths, modifier catalog/order, admin saved catalog and client draft-surcharge preview call the same cap policy. Base regulated drink receives zero automatic surcharge and cannot exceed its VAT-inclusive cap even if stored retail is stale; lower/zero base remains lower/zero. Verified-member discounts and explicitly chosen optional modifiers remain in their original calculation order; this cap does not certify modified/double-dose drinks or statutory fees. Old order fulfillment continues to use immutable saved line amounts. No public activation.

Five meaningful local Node24 tests execute the ACTUAL exported pricing declarations, actual catalog projection expressions/admin state updater, actual ordinary and modifier checkout calculations via VM; 5PASS/0FAIL/0SKIP. They cover all five IDs, fixed/percentage surcharge, stale/lower/zero prices, invalid regulated price denial, foreign company/store/missing/mismatched identity, quantities, discounts, extras, admin draft updates and unaffected legacy prices. This is isolated pure/VM evidence, not actual native HTTP/PostgreSQL/mounted browser acceptance. Full required CI/build/invariants/native E2E/normal exact guarded release pending; no LIVE/manual PASS.

Secure browser email/password + Authenticator sign-in positively verified Platform SuperAdmin Χρήστος Μάνης. Current DAILY8753products, onlineenabledfalse/slugdaily-bite/surcharge.10/deliveryfee0. Read-only SQL shows ZERO StorePosLayout rows for DAILY. Broader layout publication remains assigned to codex/daily-bite-pos-layout-live-20261010/openPR2175; no takeover/rebase/overwrite. Therefore regulated POS button cannot yet be added to an existing free layout slot; dependencies are explicit. Instant dose information, plain-toast mapping, water brand/pack identity, group publication and complete acceptance remain OPEN. No catalog/price/stock/financial/shift/fiscal/online setting writes or old LAB/BAKE15/ONL003 replay.

Next after green source CI/merge/healthy release: fresh independent baseline and native UI correction/readback of confirmed price overrides, then disabled-online admin preview verifies exact cap/no surcharge. Preserve IDs/SKU/barcodes/unit/stock/history/departments. Request explicit handoff only if owner wants this page to take the still-assigned broader layout dependency; otherwise its owner must publish first. Same regulated owner retained until completion/named handoff. Claim2426 and receipt2430 already merged; whole2054 OPEN. Generated tracker PDF remains pending; no numbered/manual closure.

13/10/2026 21:36–21:39 Athens — DAILY-REGULATED-PRICES-01 / THREE STORE PRICES VERIFIED / WHOLE TASK OPEN

Owner codex/daily-regulated-prices-20261013 retained, issue2054. Source PR2454 full CI38446928478 green, merged28050078015cb22679c55ca5ce8537378f1613e1; main CI38447712879 and exact guarded deployment still pending at this entry. Do not label production online protection LIVE yet.

Before each native save independent read-only PostgreSQL baseline checked; native dedicated Τιμοκατάλογος / Πώληση με ΦΠΑ used with DAILY store selected and syncAllStores unchecked. DB000021 store1.55→1.50, DB0000221.45→1.40, DB0000022.25→1.65. EspressoDB000026 remains1.65 and prepared hot teaDB000017 remains1.50 without redundant writes. Seven complete original Product + StoreProduct + ordered ProductBarcode rows compared before/after. EXACT differences: for three changed items ONLY StoreProduct.salePrice, StoreProduct.updatedAt and price_history count0→1. ALL Product fields, Product IDs/SKUs/units/VAT13/departments/cost/category/flags/basePrice, StoreProduct IDs/stock0/minStock/active/createdAt, ALL barcode IDs/values/multipliers/prices/timestamps, stock movement count0 unchanged. NESCAFE DB000018 and FRAPPE DB000006 complete rows unchanged2.25. No product created/merged/deleted, full product-card save avoided, no shift/payment/fiscal/baking/test-order transaction, no online activation.

Native readback displays each saved final price. Actual screenshot daily-freddo-regulated-1791916693576.jpg captured from DAILY store price catalog shows FREDDO ESPRESSO1.65 and VAT13; no rendered mock. This establishes only three native store-price corrections, not whole issue/manual numbered PASS. Other acceptance remains OPEN: water/toast exact mapping, instant doses, POS regulated button (zero DAILY StorePosLayout rows; broader publication still owner codex/daily-bite-pos-layout-live-20261010/PR2175), exact production online cap readback, manual/PDF closure. Preserve8753import/9departments/priorPASS/otherassignments/publiconlinefalse. Generated tracker PDF still pending. Original generic Product prices retained; current store policy uses StoreProduct overrides.

Temporary detailed pre-action checkpoint work/CHECKPOINTS/CHANGES/2026-10-13-daily-regulated-prices-live-baseline.md and independent baseline snapshots were made before writes. Fresh complete after comparison confirms required preservation. Continue same owner; no handoff or automatic dependency takeover.

Main CI38447712879 completed ALL jobs success at21:39 Athens. Concurrent main receipt250ec97cc37a6b0859eb1c3470f8da47ac73bf47 preserved by ordinary merge of fresh records; no other-owner sections removed. Production guard pending remains explicit.

21:43 Athens LIVE READ-ONLY ONLINE ACCEPTANCE: guarded deploy38448447575 SUCCESS, Render dep-db77lotg1s2s739daefg LIVE on exact28050078015cb22679c55ca5ce8537378f1613e1; health oktrue exact revision in guard logs. Reloaded browser admin saved catalogue shows DB0000211.50→1.50, DB0000221.40→1.40, DB0000021.65→1.65, DB0000261.65→1.65, DB0000171.50→1.50. Control NESCAFE DB0000182.25→2.35 remains legacy/excluded. Publicenabled checkbox unchecked;0/8753 products online. No settings/products submit, no checkout. Actual final screenshot CHECKPOINTS/EVIDENCE/daily-regulated-20261013/online-freddo.jpg shows1.65→1.65; price screenshot store-freddo.jpg shows VAT13. Whole2054 OPEN. NEXT SINGLE ACTION: obtain named handoff/release of broader DAILY POS layout ownerPR2175 or have its owner publish; then add regulated category in free slot. Other water/toast/instant mapping remains pending. Current regulated owner retained until named handoff. No numbered manual PASS.

Canonical tracker PDF regenerated with repository generator:281 A4 pages /1103836bytes; last page text extraction verified. Included in same receipt PR; previous pending PDF remark superseded for this receipt. Scope remains OPEN with narrow native read-only evidence above.

15/10/2026 16:46 Athens — INVOICE-NEW-ITEM-PREPARE-01 / printed unit alias follow-up / AWAITING CI & LAB

Same assigned owner and bounded product-preparation scope, branch codex/invoice-new-item-acceptance-20261015 (follow-up source before final receipt). SourcePR2496/mainad944071 green2669/0/0 and guarded38744843242 exact health13:43:54Z. Hosted saved-row panel actually loads11 unresolved ΔΕΛΤΑ28897 rows, same-store candidates, blank optional barcode, real13% department choices and new-card fields; unchanged rendered draft vs before. LIMITED UI observation only, no confirm/card/economics/stock/payment write. Found raw printed TMX is excluded from new cost guard; cost/confirm branch NOT PASS. Fix only known explicit piece/package aliases, leaving original line data and unknown/factor uncertainty untouched; native and mounted regression required. Checkpoint2026-10-15-invoice-new-item-prepare.md. Other owners and prior PASS preserved.

15/10/2026 — VOICE-ASSISTANT-01 / BUSINESS SOURCES IMPLEMENTED / AWAITING FULL CI + LIVE

Retained new user-authorized owner codex/assistant-business-queries-20261015. Named handoff claimPR2521/head70fe931/docs checks SUCCESS merged8e89931b before source; original assistant source/PASS and unrelated owners preserved. Same existing model/Responses connection/key reused without reading/copying/writing any credential. No new service, grants, migrations or business write.

Added one strict selected-store business_records tool with12 domain choices: owner transfers IN/OUT/both, supplier payments, combined payments/expenses, other expenses, purchase-document metadata, associated suppliers, Workforce roster, cash-shift metadata, POS-action metadata and recorded bank movements. Fixed parameterized read-only SELECTs on existing tables; no bootstrap/SQL/URLs/IDs from model.500row cap/no false totals, Athens inclusive dates/to-now, source-scope/unique-ID/type validation, reversal/cancelled/merged exclusion in relevant SQL, separate directions/status and no fabricated aggregate for invoices/bank/both transfers. No private PIN/phone/email/salary/attachments/raw nested audit data. Source roster and suppliers are current, cash shifts use opening date, bank movements occurrence date; limits explicit. Remaining advanced report parity (staff schedules/payroll, liability/profitability, stock history and all-store new domains) is not claimed complete.

Clarification retains prior transfer period; exact screenshot two-turn request reads original movement source once, without model date/count inference or unrelated closed-cash fallback. Other business filters use existing provider with requested domain/explicit period validation. Both roles reauthorize before/after read/provider/answer, Owner existing AI/domain modules and separate Workforce paid package retained. New source is registered in existing same-session purpose-bound export replay and Excel/CSV/PDF/Word tables; no cached/model-authored financial file data. All3 conversation/legacy panels show source-specific tables and Greek canonical count/amount answer; invalid/unread source never claims no records. Existing sales/stock/category/offers/consumption/global cash behavior preserved.

Local Node20 full server2635PASS/0FAIL/66environment-nativeSKIP (2701tests); focused corrected route/registry/business31tests30PASS/0FAIL/1nativeSKIP. Earlier full run exposed unchanged VM fixture lacking new imported dependencies and additive registry expectations; fixtures updated with real imports/new registry, no old reauthorization/currency/source assertion weakened. Initial exact screenshot test exposed generic 'είδος' exclusion in new intent; narrowed product-transfer exclusion and corrected direction/date ambiguity. New actual route/dispatcher/source/privacy/cap/period/module/role/export/UI tests, native isolated PostgreSQL all-source fixture awaiting mandatory CI. Frontend build PASS2366modules/TABLE_SERVICE retained; generated Prisma only, no DB push/seed/migration. Last label-only cancelled/review translation addition uses existing formatter and awaits fullCI.

New native test reads actual SQL for all domains including midnight edge/reversed/opposite/control/foreign/merged/cancelled/private-field cases, snapshots ledger/document/staff counts and money unchanged; not run locally without isolated DB. Full PR/mainCI, exact normal guarded deployment and authenticated hosted comparison remain NOT TESTED. No real-store/LAB invoice/payment/stock/fiscal/role/key/source event mutation or protected transaction replay. User screenshots are USER FAIL, not zero transfers or new numerical PASS. Whole VOICE stays OPEN/ASSIGNED with this owner; source release and real selected-store/period/report/file acceptance must be recorded separately. Next: green full CI/merge/exact release, then read-only original-question/source comparison. No new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-15-assistant-business-queries.md.

16/10/2026 — VOICE-ASSISTANT-01 / NATURAL PERIODS IMPLEMENTED / AWAITING FULL CI + LIVE

Retained owner codex/assistant-business-queries-20261015. Claim2530/heada2905cd/docs checks SUCCESS merged17c2078 before source. Existing same key/model/provider and read/module/tenant/export gates preserved. Pure server resolver provides Athens today/yesterday/day-before, Monday-based current/previous week, current/previous month/year, last1..366days, Greek named dates/months and dotted/ISO/slash dates. Current periods end today, completed prior periods full; fixed calendar validation rejects mixed/ambiguous/partial/invalid requests before source or model rather than guessing. Latest user period wins over dated topic/history, direction comes from current question, follow-up/export retains latest business topic/period without inheriting unrelated domains or assistant-authored dates. Exact safe transfer requests use canonical direct source; inherited actor filters remain in model extraction instead of dropping filters. Model business dates/domain remain checked against recognized current request. No new source/SQL/table/module/license/auth/key or business write, no automatic email/schedules or all-store new domains.

Focused final18PASS/0FAIL/0SKIP for six calendar/history/dispatcher cases plus12actual Platform route cases; prior30focusedPASS includes Owner/domain/revocation/source/export and existing sales follow-ups. UI build PASS/TABLE_SERVICE verified. Initial full local test invocation from repo root caused18preexisting relative-path failures; corrected server working-directory suite in progress. New exact-period test caught no-space 'από1/10' incorrectly interpreted as one day; fixed while preserving direction 'από τον ιδιοκτήτη σήμερα'. No existing assertions weakened. Full PR/main/native CI and ordinary exact guarded deployment still required; actual hosted natural-period/UI/source/file acceptance NOT TESTED. Visible prior2-transfer screenshot is not independent numerical comparison or whole assistant PASS. Whole VOICE stays OPEN/ASSIGNED, all earlier partial PASS and other owners preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-natural-periods.md. Next green source/mainCI and guarded exact release, then read-only natural-period/follow-up/source comparison with no real payment/stock/fiscal/old transaction replay.

16/10/2026 — BUSINESS-PICTURE-READABILITY-01 / ASSIGNED / USER VISUAL FAIL

Owner feat/business-picture-readability-20261016; source fix/business-picture-readability-20261016. Explicit attached image image(20261015-215252).png: Owner «Εικόνα Επιχειρήσεις» report has tiny table text and four large informational strips pushing data down. Bounded presentation-only independent subtask: larger row/amount/header text, compact top criteria/loaded-period/tools, fold full calculation explanations into native disclosure; retain short visible missing-cost/VAT warnings and every original explanation/unknown marker. Same report rows/metrics, period/Search semantics, VAT visibility, expansion, CSV/standalone print, role/store/module guards and calculations unchanged. No server/schema/ledger/API, payment/stock/fiscal mutation, invoice replay or accounting claim. Preserve assigned financial27 codex/task27-resume-20261005, N51 Owner landing owner, assistant/automatic-reporting owners and prior PASS.

Read current main7a507c1, AGENTS, current active/tracker/pending/numbered, profitability/Owner landing manuals, task27 final-review/profitability and N51 checkpoints/history. Existing normal/maximize/restore and loaded-period/unknown-cost/expenseVAT/returns/export proofs protected; no retest of accepted financial fixtures. New layout NOT TESTED. Require focused rendered disclosure/value retention and existing report regressions/build, mandatory fullCI/main/exact guarded deploy, then read-only LAB geometry/computed fonts, expand/collapse/unknown indicators and retained report values. No report calculation or independent Owner/physical/mobile/print PASS inferred. Publish this claim before source. Same owner until acceptance or named handoff; checkpoint CHECKPOINTS/CHANGES/2026-10-16-business-picture-readability.md.

BUSINESS-PICTURE-READABILITY-01 — 16/10/2026 01:08 Athens / AWAITING LAB / owner feat/business-picture-readability-20261016. Claim merged PR2533; scoped layout implementation and18 focused tests PASS. Read-only old LAB baseline tabletop742normal/704max,13px amounts/15px totals; loaded-period monetary rows recorded. No business writes. Exact-deploy/layout verification remains with this owner. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-business-picture-readability.md.

16/10/2026 01:47 Athens - BUSINESS-PICTURE-MAXIMIZED-02 / USER FAIL / ASSIGNED

Owner feat/business-picture-readability-20261016; source fix/business-picture-maximized-20261016. User images224431/224611 show maximized Business Picture outside viewport, missing bottom horizontal scrollbar/right controls and report-information disclosure not opening. Independent same-owner follow-up to PR2536/2540. Prior large fonts, compact normal view, values and disclosure behavior preserved; earlier maximize/restore PASS did not verify viewport containment and does not cover this new FAIL. Bounded presentation containment/scroll/disclosure reachability only; no calculation, API, auth/tenant/module, CSV/print or business mutation. Second image missing-expense-VAT count9 means9expense payment records without sufficient VAT evidence, not zero VAT. Keep unknown values unknown. Financial27 codex/task27-resume-20261005 and N51/assistant/automatic-reporting/audit owners unchanged.

Read AGENTS, full active/tracker/pending, numbered25/tracker27, profitability manual and preceding readability checkpoint, main history since bfea663; current main4464e31 audit source independent. Source CSS likely causal100vw/100vh dialog inside18px padded overlay, exceeding viewport and clipping controls/scrollbar. New layout NOT TESTED. Publish this claim green before source. Require full CI/exact guarded release then read-only selected LAB normal/max/restore bounds, bottom scroll containment, accessible full disclosure and retained monthly/daily/total values. No sale/payment/stock/shift/fiscal submission or fixture replay. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-business-picture-maximized.md. Same owner until completion/named handoff.

16/10/2026 01:49 Athens - BUSINESS-PICTURE-EXPENSE-DRILLDOWN-03 / ASSIGNED

Explicit new user scope: clicking missing-expense-VAT count opens exactly the contributing expenses, with date/time Athens24h, stored reason/amount/operator/supplier/store and read-only individual entry/document context. Same owner feat/business-picture-readability-20261016/source fix/business-picture-maximized-20261016. Independent additive report traceability, not financial27 calculation/acceptance takeover. Reuse exact existing expenseAllocation.documentId IS NULL predicate and report date/store/company guards; exclude reversals, return all contributing rows without arbitrary cap. Do not infer missingVAT from attachment absence. No calculation/allocation/date/count change, no payment editing/approval/stock/fiscal write. Counts at day/month/total and warning badge use loaded report data and preserve monthly expansion. Existing report/API role/module boundaries retained, no new credentials/access. Add mounted navigation tests and extend native production-query PostgreSQL predicate/count/tenant/no-write proof. Source awaits merged expanded claim; both subscopes remain this owner until exact deployed read-only LAB verification. No need to repeat old financial fixtures.

16/10/2026 01:57 Athens - IMPLEMENTED / AWAITING LAB

Claims PR2541/head expandedclaim merged692a2c55 after CI38819703959 SUCCESS before source. One viewport containment correction: overlay border-box/overflow bound, fullscreen padding0, dialog available-parent100percent instead100vw/vh+18padding, flex scrollpane min-size0. Independent requested drilldown: aggregate exact contributing missing-VAT expense rows alongside existing counts using the same allocation-null predicate, existing company/store/date/reversal checks and scoped linked document metadata. No original aggregate/allocation/calculation/date/guard change. Count cell day/month/total and warning open read-only list, row opens original recorded entry context; return preserves report position. No payment/stock/approval/write controls.

Local18PASS/0FAIL plus1native PostgreSQL test SKIP without DATABASE_URL; that genuine SQL fixture extended to count/list equality, reversed/foreign/sibling exclusion, approved/zero/credit/overpayment/document context and no-write digest, must run in full CI. Mounted interaction confirms exact period filtering, no monthly-toggle side effect, escaped original descriptions/actor and one GET/no writes. Frontend build PASS10.76s. FullCI/exact release/LAB containment, scroll and drilldown acceptance NOT TESTED yet. Existing source and other owners preserved.

16/10/2026 — VOICE-ASSISTANT-01 / MULTILINE CONTEXT IMPLEMENTED / AWAITING FULL CI

Same retained owner codex/assistant-business-queries-20261015. Claim2544/head6e840b3/docs all applicable checks SUCCESS mergeda20ac4c before source; fresh branch basedbbfd32b includes independent BusinessPicture drilldown changes untouched. Pure shared business-question segmentation now keeps every current line/CRLF, separates quoted topic/period and skips only exact generated instruction line (does not discard following filters). Current calendar/domain/direction uses full current text; inherited topic/period whitespace folded before interpolation; latest supplied period remains authoritative. Unfiltered direct transfer shortcut inspects ALL current/topic/period text; actor/status/payment filters on later lines or context-looking tails cannot silently become query:null. Operator name Χρόνης/Χρόνη no longer counts as calendar-year text. No query/API/schema/new source/grant/model/key/SQL or financial/stock/fiscal behavior change.

Read-only baseline reproduced date-on-second-line period:null and actor-on-second-line incorrectly directquery:null. Added actual dispatcher/Owner handler/Platform session/history/reversal/domain-date-scope/source regression. Final41targetedPASS/0FAIL/0SKIP; real four-format signed business export test issues ticket then changes isolated source10.10→20.20, replays fresh same selected-store/filter for each file and parses XLSX/CSV/PDF/DOCX proving20.20 not cached10.10/private fields, with auth checks before/after. This is isolated fixture proof, not hosted download or financial PASS. Initial fixture selection incorrectly included display names and strict ticket validation refused; fixture corrected to exact existing company/store-ID contract, no validator relaxed. Frontend build PASS/TABLE_SERVICE verified; full correct-CWD local server suite running. Full PR/main/native/browser/HTTP CI and exact ordinary guarded release required. Browser native credential safe-resume restriction persists; no reset/session/grant workaround and no fresh live action, screenshots or file download. Whole VOICE remains OPEN/ASSIGNED, actual original-list/natural dialogue/files/Owner/physical acceptance and advanced coverage remain NOT TESTED. Other owners/qualified PASS preserved. Checkpoint CHECKPOINTS/CHANGES/2026-10-16-assistant-multiline-context.md. Next green full source/main CI/ordinary release then permitted agent-run read-only acceptance.

16/10/2026 23:30 Europe/Athens — POS-INVOICE-QR-FORMATS-02 / SOURCE LIVE / REMAINING PROVIDERS OPEN

Retained owner codex/invoice-qr-formats-20261016. ClaimPR2625/docsCI38957742215 merged8776e9ef before source. SourcePR2627 finalhead20a3b2bfe38297c09f0545ad4308c0dc8fa4ccd5/fullPRCI38960815731 SUCCESS2872PASS0FAIL0SKIP plus6backup/all required Windows/build/security/licensing/native isolated PostgreSQL/Chromium/realHTTP/invariants; mergedbb0aff9c5f28d9a6626545498f666d94d9395c68. Exact mainCI38961460746/job117177519154 SUCCESS2872/0/0 plus6backup. Ordinary guarded Render38962228162/job117179934504 SUCCESS, pinbb0aff9c and exact health20:29:52Z/23:29:52Athens oktrue/version0.22.0+kat-test-pos. Workflow wrapperhead7a2b8585 is not the deployed target; logs explicitly pinbb0aff9c. No manual deploy or guard bypass.

Delivered two observed exact Epsilon fd host/suffix forms through existing paired XML/PDF identity guard, outer framing trim and rejection of embedded controls/dot paths. Existing S1/Impact/DocViewer, tenant/recipient/MARK/number/hashes, bounded downloads/pages, credit classification and human review preserved. Real downloaded HELL99.67/MOUXALIS226.66/credit95.16 replay subsequently ALSO passed the actual production pdfjs4.10.38 reader with onepage and correct INVOICE/INVOICE/CREDIT_NOTE, not only pdftotext. Replay used local transport of original downloaded bytes; hosted endpoint/physical scanner/camera/UI acceptance remain NOT TESTED. No business/manual/LAB PASS or data mutation inferred.

Initial sourceCI38958660951 stopped at administrative active-list gate before runtime; fixed without source weakening. Intermediate38959275297 attempt1 had2872/0/0 then Chromium Target.createTarget infrastructure timeout; unchanged-code attempt2 completed all checks SUCCESS. Final syncedhead20a3 fullCI38960815731 and exactmain above are authoritative. Concurrent latestmain documents retained rather than overwritten; source stayed bounded to helper/test. No other owner's scope or historical financial acceptance replay.

Remaining OPEN: third-party Epsilon sample exposes correct XML but PDF404 Document not found; do not claim successful acquisition for it. AADE QRInfo returns verification HTML with6physical item rows, not discovered original PDF; message directs full photo/PDF. Megasoft browser reset recovered public portal; actual THE LOVE COMPANY issuer996865162/Z17616/9Oct2026/106.44/onepage is visible, Προβολή Παραστατικού opens DevExpress viewer and Export To offersPDF, but actual browser download failed and reset the JS runtime. Direct GET is interactive Blazor shell; no safe stable server download contract confirmed. No bot/CAPTCHA block was observed or bypassed; no credential was entered. Full Megasoft/AADE acquisition remains assigned here, not universally unsupported or complete. Private access tokens/originals stay outside git.

Single next action: physical Epsilon recognition acceptance at original selected company/store, verify supplier/number/date/total/original PDF only; do not resubmit/pay an already recorded invoice. Megasoft needs confirmed downloadable original/transport contract; AADE needs a complete-original acquisition route before adapter implementation. Source delivery complete; whole new-provider scope remains OPEN with this owner until explicit named handoff. No new manual PASS, no payment/draft/job/stock/fiscal/myDATA action.

16/10/2026 — POS-INVOICE-QR-FORMATS-02 / IMPLEMENTED / AWAITING FULL CI + RELEASE

Same retained owner codex/invoice-qr-formats-20261016. ClaimPR2625/head dcdf5e42 documentation CI38957742215 SUCCESS merged8776e9ef before source. New helper resolves only exact standard Epsilon /fd/32hex:8 and 3rdparte /fd/32hex:169 locally to the observed same-host document UUID; XML/PDF still use existing paired endpoint, no redirect enabled and all document/store/identity/page/size/deadline/credit checks retained. Outer framing whitespace trimmed explicitly; embedded controls/spaces/dot path segments and oversized input rejected before network. No scanner/camera event or payment/API/schema changes.

Real independent provider GETs: standard HELL99.67, MOUXALIS226.66 and MOUXALIS credit95.16 yield paired XML/PDF. Download-helper replay using actual XML/PDF and independently extracted pdftotext text confirms all three numbers/totals/types and both original identity hashes, requiresHumanReview true. This is read-only provider/replay evidence, not actual production PDF-reader, hosted transport/UI or financial/LAB PASS. 3rdparte XML available, PDF404 Document not found for this sample: source recognizes format but must still refuse missing originals; no guessed alternate endpoint. Megasoft GET serves interactive Blazor shell without confirmed original download; AADE QRInfo GET returns confirmation HTML with six item rows but no discovered original PDF download. Both get precise provider-specific photo/PDF fallback and remain OPEN for full acquisition.

Local isolated module harness13PASS/0FAIL: actual helper/XML/original validation functions, injected transport/reader, old S1/Impact/DocViewer regression, new two-host mapping/credit/multipage/no-paid, hostile URLs/foreign recipient/identity/missing original, and no-network fallback. Harness omits application-route bootstrapping imports; it is not full server/native CI. Initial negative test caught URL dot-segment normalization; source now rejects raw dot segments, final13/0/0. Original handler test is retained unmodified in repository. Full CI/main/exact normal guarded release and physical acceptance pending. No real payment/invoice/draft/job/stock/fiscal/myDATA write or old submission replay; no private samples/tokens committed. Existing DocViewer physical acceptance owner, scanner/camera/OCR/inbox owners retained. Next: full source CI then ordinary guarded release; remaining providers stay assigned here without claiming universal support. No new manual PASS.

18/10/2026 11:20 Europe/Athens — POS-UNKNOWN-SCAN-RESET-01 / USER PASS / CLOSED

Task POS-UNKNOWN-SCAN-RESET-01. USER PASS / CLOSED 18/10/2026. Owner codex/pos-unknown-scan-reset-20261017. Ο ιδιοκτήτης απάντησε «ΕΙΝΑΙ ΟΚ» στη συγκεκριμένη διόρθωση και στην πρόσκληση ελέγχου φυσικού scanner. Περιορισμένο USER PASS του καθαρισμού άγνωστου barcode ώστε η επόμενη σάρωση να ξεκινά ανεξάρτητα. Δεν αποδίδουμε στη σύντομη δήλωση συγκεκριμένο SKU, terminal suffix, χειριστή, ώρα εκτέλεσης ή επιτόπου ελεγμένο client revision. Το release revision είναι τεκμήριο παράδοσης, όχι ανεξάρτητη μέτρηση της συσκευής κατά την επιβεβαίωση. Supersedes AWAITING USER μόνο για αυτό το bug. Πληρωμή/stock/fiscal/λογιστικά και άλλες ροές NOT TESTED από την επιβεβαίωση· καμία επανάληψη συναλλαγής. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-pos-unknown-scan-reset.md και docs/manual/pos/PASS.md. Άλλα ανατεθειμένα scopes και παλαιά PASS διατηρούνται.

17/10/2026 22:02 Europe/Athens — POS-UNKNOWN-SCAN-RESET-01 / SOURCE LIVE / AWAITING USER

Task POS-UNKNOWN-SCAN-RESET-01. Retained owner codex/pos-unknown-scan-reset-20261017. ClaimPR2651/docsCI39059151861 SUCCESS merged158b865e before source. SourcePR2653/headb2426828cc5a26ffcfefb79b4c3a820ad98d6fc3/fullCI39059541788 SUCCESS2890PASS0FAIL0SKIP plus6backup/all required Windows/build/security/licensing/native PostgreSQL/Chromium/realHTTP/invariants; mergedf23598fe319ef6f68e37f1fb625e412a7898fde0. Exact mainCI39059988055/job117475877024 SUCCESS2890/0/0 plus6backup. Ordinary guarded Render39060363464/job117476935772 SUCCESS; explicit pinf23598fe and exacthealthy19:01:42Z/22:01:42Athens oktrue/version0.22.0+kat-test-pos. Wrapperheade200c889 is not target. No manual deploy/guard bypass.

Delivered only consumed unknown scan and warning visibility in StorePosPanel. Unmatched Enter clears DOM/query synchronously before await, requests scanner focus, retains separate unknown code for warning/manual online lookup. Repeated empty Enter cannot re-audit the previous miss; next unknown/known scan starts independently, new input/known addition clears old warning. Existing matchers,80/600ms timing, CSV aliases/prices, ambiguity/name suggestions, current-store/modal/busy/fiscal/checkout guards and cart/financial/server APIs unchanged. No online auto-request/product creation or data repair.

Original actual mounted regression fails before source with retained5201004000001; after source exact same-event DOM empty, one Audit despite repeated Enter, two separate unknowns, original online argument, next known once, pending Audit late completion harmless. Initial six old fixtures expected the deliberately retained unknown query after rejected checkout; updated them to assert consumed miss then supply a separate manual pending search, preserving rejected cart/query and later fiscal/payment assertions. Final focused14/0/0 on Node20.20.2 and Node24; full remote Node20 and native checks above authoritative. No assertion/guard/CI threshold weakened. No production/LAB sale/payment/stock/fiscal/shift/catalog write or historical replay by this page.

Physical scanner/terminal suffix, actual client refresh and next ordinary scan remain NOT TESTED/AWAITING USER; screenshot is USER FAIL baseline, no new manual/LAB PASS. Existing CSV scan-to-cart and idle cursor USER PASS protected; retained latency/QR/header/payment/inventory owners unchanged. Next: after completing current sale, refresh POS normally/CtrlF5 and observe an ordinary unknown scan followed by next item; unknown code must disappear from input, remain in warning and not prefix next scan. No checkout/payment replay just for evidence. Current owner retained until bounded acceptance or named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-pos-unknown-scan-reset.md; current active/tracker/pending and generated trackerPDF synchronize this release, broader POS work OPEN.

17/10/2026 — POS-UNKNOWN-SCAN-RESET-01 / SOURCE READY / AWAITING FULL CI + USER

Same owner codex/pos-unknown-scan-reset-20261017. ClaimPR2651/head9f785f6d/docsCI39059151861 SUCCESS merged158b865e before source. Only StorePosPanel miss handler and warning visibility changed: submitted unmatched code consumed synchronously from DOM/query before audit await, refocus requested, separate unknown code retained for visible warning/manual online action. Next input dismisses old warning; known add retains original behavior and clears unknown. No barcode matcher/timing/cart/payment/server/API/schema/auth change or automatic online lookup/product creation.

New actual mounted regression reproduces before-source retained unknown code; after-source verifies empty DOM in same event batch, repeated empty Enter emits one miss Audit, manual online uses exact retained code, successive misses never concatenate, next known adds once, late pending audit cannot restore input, no checkout/create. Initial broader test run exposed six intentionally superseded expectations requiring unknown text to survive rejected checkout; replaced with explicit consumed-unknown assertion then a separate manual query before checkout, preserving original rejected-cart/query/fiscal/payment controls. Final14local mounted/helper/index regressions

PASS0FAIL0SKIP under Node24; Node20 rerun in progress. Isolated local harness copies shared source snapshot plus exact current main panel/test; full repository Node20CI/build/native HTTP/browser remains required. No physical/LAB/manual PASS or business action. Screenshot is newest USER FAIL until ordinary physical acceptance after exact guarded release. Existing scanner80/600/CSV/ambiguous/name/focus/blocking, other owners and prior PASS preserved. Next full CI/main/normal exact release then owner refresh without losing an active cart. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-pos-unknown-scan-reset.md.

17/10/2026 — POS-UNKNOWN-SCAN-RESET-01 / ASSIGNED / USER FAIL

Owner codex/pos-unknown-scan-reset-20261017; source fix/pos-unknown-scan-reset-20261017. Explicit owner report and screenshot image(20261017-183722).png show Diadoxou Store Mode, operator KINIS EMMANOUILA, unknown-product warning and multiple concatenated scanned barcodes retained in the focused search input. Physical terminal/scanner suffix/client revision not independently observed. Current maindcc9480e handler records UNKNOWN_PRODUCT_SCAN but never clears query on a miss. This is a bounded causal follow-up, independent of retained latency/QR/header/catalog/payment owners; no takeover of their residuals.

Read current AGENTS, complete shared active/tracker/pending/numbered, POS manual, main panel history and scan-latency/barcode-cart/idle-focus checkpoints. Preserve accepted CSV exact scan-to-cart and idle focus, known-code80/600ms timing, ambiguity/name suggestions, barcode-specific prices, modal/busy/fiscal/checkout/store guards, cart contents and permissions. Change only submitted miss consumption: clear DOM/query synchronously before any await, retain a separate read-only last unknown code/online action, leave input focused and allow next scan independently. No automatic product creation/online request, sale/payment/stock/fiscal/shift/data action. Meaningful mounted regression: unknown then immediate next known; repeated empty Enter no duplicate audit; unknown then another unknown no concatenation; retained unknown online argument; existing scan/focus/guard regressions. No new physical/LAB/manual PASS. Publish claim green on main before source. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-pos-unknown-scan-reset.md. Next: bounded client fix/tests/fullCI/exact guarded release then ordinary operator acceptance.

17/10/2026 21:42 Europe/Athens - COMPANY-TAX-EDIT-01 + TERMINAL-DELETE-01 / ASSIGNED / NOT TESTED

Owner fix/company-tax-terminal-delete-20261017. Explicit user request: edit missing AFM on an existing company and add terminal deletion in Installation/Terminals. Independent bounded Platform Admin maintenance; other KAT connector/session/EFTPOS/installation, inventory and invoice owners retain their assigned work. Current main dcc9480, AGENTS/current active/tracker/pending/numbered, SuperAdmin manual and multi-company/installation/terminal checkpoints and history reviewed. Screenshot shows missing company AFM and inactive terminal registration; no private business identifiers or screenshot are published here.

Scope A: SuperAdmin-only company identity edit on the same company ID, explicit current-value concurrency check, nine-digit AFM validation and duplicate company identity refusal; audit before/after, no company/store recreation or data migration. Preserve companies/owners/store associations, historical documents, myDATA credentials, licensing and business data. Scope B: explicit terminal removal through archival/tombstone, exclude it from current installations, retain terminalPos uniqueness/history and revoke activation. Require inactive registration and no OPEN shift or active fiscal-device mapping. Stale/foreign/missing terminal and audit/write failure must refuse/rollback. Existing inactive enable and new-link behavior remains for nonarchived terminals; archived registrations cannot reactivate. No source change to live Writer/payment/fiscal/session behavior or existing device mappings.

Acceptance requires meaningful actual service/native SQL and mounted UI tests for identity validation/duplicate/stale/tenant isolation/audit atomicity and archive guards/history/token preservation, full PR/main CI, ordinary guarded exact release and then explicit hosted acceptance. CI is not LAB/USER PASS. No actual AFM value supplied; no real company update, terminal deletion, financial/stock/approval/shift/Writer action or replay authorized for diagnosis. Implement controls and test with isolated synthetic data, never delete the screenshot terminal merely to obtain evidence. No new manual PASS. Single next action after this claim merges: implement these two bounded controls independently and run regressions. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-company-tax-terminal-delete.md.

17/10/2026 23:13 Europe/Athens — ANDROID-CHAT-NATIVE-01 / ASSIGNED / NOT IMPLEMENTED / NOT TESTED

Owner feat/android-chat-native-20261017; issue #2673. User explicitly requests an installable Android application like Viber, both store chat and AI, no durable private content on employee devices, and says «Ξεκινά». Independent new android/ native client and APK build scope; retain PWA owner codex/chat-mobile-app-20261013, N16 physical acceptance owner codex/n16-owner-acceptance-20261007 and AI source owner codex/assistant-business-queries-20261015. No transfer or edits to their client/server source. Existing backend authorization remains authoritative; no POS/role/licensing/provider/schema change.

Read-only baseline main d1d77878; no Android/Gradle/native APK project exists. Current PWA is not native acceptance; latest phone layout/install/AbortError failure remains open. Verified source contracts: existing auth login/2FA, mobile authorized stores, scoped store messages/read/attachment and platform/owner assistant status/ask. Chat-only staff tokens cannot access owner/platform assistant; preserve denial rather than broaden staff rights. Read AGENTS, active/tracker/pending/checklist, Chat and owner-assistant manuals and Oct13 mobile checkpoints; existing measured partial PASS protected. Claim must merge green before source. First bounded implementation: native installable shell/login/store list/messages/AI using existing APIs, memory-only content, no download/export/clipboard/private cache, encrypted connection token only, disable OS backup and sensitive recents/screenshots. No WebView-only completion claim. Native background Push requires a separate verified native registration/delivery contract and provider configuration; existing Web Push is not native FCM evidence.

Required checks: reproducible debug APK build, native unit/instrumentation coverage for cache/storage policy, stale-scope responses and role/error paths; existing full CI safeguards. Real phone/tablet installation, keyboard/back/rotation, correct-store messaging/photo/AI, logout/revocation, locked/background notification and forensic storage review remain NOT TESTED until observed. No real messages/read/Push/financial/stock/fiscal actions for diagnosis. No signing key, Play account or notification credentials assumed. No new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-17-android-chat-native.md. Next: merged claim, then bounded native implementation and isolated APK validation.

18/10/2026: claim records placed at the end to avoid concurrent top-entry conflicts. Tracker PDF generated locally; preserve the newer main PDF during claim reconciliation and publish a regenerated combined PDF in the implementation receipt. No PASS closure.

18/10/2026 13:05 Europe/Athens — NATIVE-CHAT-FCM-01 / ASSIGNED / NOT TESTED

Owner feat/android-chat-native-20261017; backend branch feat/native-chat-fcm-20261018; issue #2673; native source PR #2687. User created Firebase project myworkstation-chat, registered gr.myworkstation.chat.preview and provided matching public google-services.json. Console screenshot confirms FCM v1 enabled. No service-account private key received/generated by this page; no production env/DB/deploy/notification change. Native source prior head c2829330 has Android CI39112588812 and full CI39112588818 SUCCESS; these are not physical acceptance.

Independent additive native push scope: new FCM-only registration/revocation/status and provider delivery module; bounded route mounting and native-only delivery hook, preserving existing browser/PWA subscriptions/delivery and assigned N16 acceptance, PWA and AI scopes. Server derives eligible stores and revalidates active user/session/role/version, owner access, staff credential/session and module at delivery; token ownership transition is atomic, logout revokes native mapping. No private message/photo/store name in push payload, no arbitrary destination URL/topic/browser endpoint reuse. Default off until credentials and physical acceptance are ready. Native client token lifecycle/permission/generic notification/tap must not persist private content or grant new API permissions. Firebase may persist technical installation/push identifiers when enabled; do not claim only one token/zero OS traces after integration. No business/fiscal/licensing mutation or real recipient push during tests.

Claim must merge green before backend source/config/schema edits. Existing client SDK preparation remains in already claimed android/ scope; no backend implementation or device PASS yet. Required isolated security/routing/revocation/provider tests, full CI, guarded exact release and phone/tablet delivery/logout/account-switch/storage acceptance. iOS requested separately and not implemented. Combined tracker PDF remains pending with native PR receipt; no PASS/manual closure. Next: merged bounded claim, then implementation; private credential goes directly to Render only after concrete code and validation.

18/10/2026 13:20 Europe/Athens — NATIVE-CHAT-FCM-01 / SOURCE PREVIEW / AWAITING FULL CI AND DEVICE

Claim PR2693 merged f991276 after docs CI green before source. Same owner feat/android-chat-native-20261017; server branch feat/native-chat-fcm-20261018. Adds gated native-only FCM provider, session/store-authorized registration/status/revocation, atomically replaced token ownership and current role/version/expiry/revocation/ownership/staff credential/module delivery revalidation. Native message hook runs asynchronously after existing message/audit/WebPush handling and preserves existing response. No auth scope/POS/fiscal/license change. Default off: no credential read/schema/provider call until NATIVE_CHAT_FCM_ENABLED=true plus direct Render secret-file path. No credential or production mutation performed. Push data contains technical kind/session digest/company/store IDs only; fixed generic Android notification, no content or arbitrary URL. App explicit activation/permission/token refresh, current-authorized-store tap and local logout receipt guard implemented separately in native PR2687. SDK technical installation identifiers/opt-in may persist; private chat content remains memory-only; no only-one-token/zero-OS-trace claim.

Local Node20 actual provider/policy and registry SQL-injection harness plus existing browser/Apple regressions26PASS0FAIL0SKIP; registry harness is NOT actual PostgreSQL concurrency/HTTP evidence. Android APK/unit/lint12PASS local on counterpart native source; full CI and source review pending. No real-recipient Push/message/read/business test or device PASS. Provider auth credentials, FCM acceptance, physical phone/tablet install/permission/background/locked/tap/logout/account-switch/forensic acceptance and iOS remain NOT TESTED. Max2000 current mappings per message and30day native registration freshness documented. Combined tracker PDF publication pending, preserve newer main PDF; no manual PASS closure. Setup/testing contract docs/testing/native-chat-fcm-setup.md. Next: required full CI/review, guarded exact release with flag off, then direct secure secret provisioning and bounded physical acceptance.

Native PR2687 now includes the complete installable client plus explicit FCM activation/receipt/tap. Local12native tests/APK/lint pass, exact remote final CI pending. Prior SDK-only29bad02 native CI39117856280/fullCI39117856270 both SUCCESS; not a physical receipt claim. Source branch reconciled onto current main to preserve concurrent work and permit pull_request CI. No production activation/private credentials/new APK delivery. Exact final remote CI remains mandatory after executor became unavailable and equivalent source was recovered from remote base.

18/10/2026 — Native Android / FCM implementation receipt: PR #2687 merged as 50a078780114add0fac98eac3741be548852aa27 after exact Android build/lint/12 tests and full repository CI SUCCESS at 40ed495669b555539932c48ee5b9128947533b4a. Backend PR #2695 exact 1d1566e5c631e0913e04e91974f1c9b2e7454561 passed full CI (2983 tests, zero fail/skip), now reconciled with main and native receipt. Combined tracker PDF regenerated. No physical/LAB PASS, real push, private credential inspection or production schema mutation. Keep NATIVE_CHAT_FCM_ENABLED=false; guarded exact deployment and physical installation/permission/background/tap/logout/storage acceptance remain OPEN. iOS and release signing remain OPEN. Retain existing native/FCM owners and separate PWA/N16/AI owners.

18/10/2026 — Native Android / FCM guarded release receipt — AWAITING PHYSICAL DEVICE

Native PR #2687 merged 50a078780114add0fac98eac3741be548852aa27; exact Android CI39119030156 at40ed495669b555539932c48ee5b9128947533b4a passed assembleDebug, lint and12 native unit tests. Backend PR #2695 finald71fffc3b58300ae18a28addd22c73df67387d95 full CI39121713940 passed2985 tests, zero failures/skips, plus backup6/0/0; merged97962bef268ca49f577b0a48588fa1410198c004. Exact main full CI39122161945 SUCCESS; guarded Render workflow39122487724 SUCCESS. Read-only /api/health returned ok:true, revision97962bef268ca49f577b0a48588fa1410198c004 after deployment. No manual deploy bypass, production schema command, real push/message/read or private service-account access. No FCM enable flag changed by this page; keep requested NATIVE_CHAT_FCM_ENABLED=false until controlled activation.

New MyWorkStation-Chat-Android-Preview.apk from exact Android CI artifact12133930510:3637988 bytes, SHA256b9bdab90de761fd153eee9bc63863720873c736c1c2af2914387a6bc00a7c07e. Artifact ZIP digest checked; APKv2 signature, embedded public certificate and full content digest verified. Saved replacement version2 of the existing preview deliverable. CI debug signing differs from a prior local preview and may require uninstalling only that old preview before installation; production release signing remains OPEN. RAM-only private-content design is implemented, but actual device storage/OS behavior is NOT TESTED. Technical encrypted connection token, Firebase installation/push identifiers and opt-in can persist; no zero-device-trace guarantee.

Keep owners feat/android-chat-native-20261017 / feat/native-chat-fcm-20261018 assigned; no release/transfer. Preserve separate PWA, N16 physical acceptance and AI source owners and existing scoped PASS. Physical phone/tablet install, keyboard/back/rotation, store isolation, camera/photo/AI, permission/background receipt, authorized tap, logout/account switch/revocation and storage acceptance remain NOT TESTED. iOS, production signing and controlled native notification activation remain OPEN. No new manual or physical PASS. Single next action: user installs and opens the new Android preview; record the actual installation result before any separately identified LAB messaging/push test.

18/10/2026 14:37 Europe/Athens — ANDROID-CHAT-NATIVE-01 / USER FAIL: 2FA app switch / AWAITING DEVICE RETEST

Retained owner feat/android-chat-native-20261017; bounded fix/android-2fa-resume-20261018, based main cd8b2960. User reports that after opening another app to obtain the requested 2FA code, returning asks for all login details again. Installed preview revision and process-recreation cause are not independently observed; no message/read/push/business action was repeated. Source confirms the challenge exists only in an Activity field: normal onStop preserves that field, but activity/process recreation cannot recover it. Existing native source/CI, guarded release97962bef, browser/PWA manual PASS and separate owners remain protected. Native login app-switch acceptance is USER FAIL, not PASS.

Bounded correction: separate AndroidKeyStore-encrypted no-backup pending-2fa.enc contains only the server-issued TOTP_CHALLENGE JWT, with a separate key alias from the connection token. Restore only its still-valid five-minute server challenge; never persist email, password, entered OTP, chat, photos or AI. No challenge refresh or session/auth bypass. Clear on success, logout, explicit account switch, PIN entry, or discovery of expiry/corruption; server signature/OTP verification remains authoritative. An expired encrypted technical record may remain while the process is stopped and is removed on next restore; its server validity is not extended. Existing background private-view wipe, empty private saved-state, scoped authorization, FCM flag/provider, server and other owners remain unchanged. Preview version0.1.1/code2.

Required regression: valid restoration across recreation does not extend expiry; reject ordinary sessions, foreign purpose, missing identity, expired/overlong/malformed records. APK build/lint/native tests and full CI required; real phone authenticator round-trip, process recreation, expiry, wrong-code retry, cancel/account switch and no-password/OTP storage remain NOT TESTED. No new manual PASS. Single next action: build verified replacement APK, then user retests the reported app-switch flow.

18/10/2026 — PURCHASE-ORDER-REOPEN-01 / PR2709 IMPLEMENTED, AWAITING EXACT NATIVE CI AND USER/LAB

Owner feat/purchase-order-reopen-20261018, integrated branch feat/purchase-order-reopen-integrated-20261018; original claim PR2698 merged before source. PR2709 supersedes closed PR2703 and adds scoped reason-confirmed reopening, exact recorded purchase/pack stock compensation, immutable audit, original payment/shift/source retention and same-document corrected re-finalization. Locked editors open without OCR writes; reopened orders skip automatic financial repair. Readonly inventory ledger uses complete raw history for audited reopen cycles to avoid synthetic double subtraction. Original roles/modules/store boundaries remain. Native earlier-source full2991/0/0 plus6 backup PASS; final combined source still awaits its own full CI. Local latest2852PASS/0FAIL/118 environment SKIP and earlier client build PASS. No real production reopening, stock reversal, payment replay or finalization executed; actual USER/LAB acceptance remains NOT TESTED. Broader invoice09/inventory/Gate3 and all other owners unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-purchase-order-reopen.md. Final combined PDF synchronization is deferred to the release receipt; no manual PASS is claimed.

18/10/2026 — PURCHASE-ORDER-REOPEN-01 / SOURCE MERGED, SHARED RELEASE PENDING

Same owner feat/purchase-order-reopen-20261018. PR2709/source53f9ec79 and exact main3e600853 full native CI3041PASS/0FAIL/0SKIP plus6backup SUCCESS. Ordinary guard39126699935 correctly held deployment because newer shared source2f2ce031 had cancelled pre-job mainCI39126478154. No manual deploy or gate bypass. Bounded test-only release follow-up verifies stale old-cycle pack callbacks after new FINAL plus existing role matrix on current main, then normal PR/main CI and ordinary guard. No real reopen/stock/payment/finalization action; production delivery and USER/LAB acceptance remain OPEN. Broader09/inventory and other owners retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-purchase-order-reopen.md; final combined PDFs remain for the verified release receipt.

18/10/2026 — PURCHASE-ORDER-REOPEN-01 / COMBINED SOURCE GREEN, RELEASE STILL FENCED

Same owner. PR2719 and exactmain4b4fb564 each full3045PASS/0FAIL/0SKIP plus6backup; original runtime3e600853 unchanged. Guard39127921500 held for newer Android-only7851c90a; its fullCI39127634073 failed required checkpoint policy before tests. No deploy or policy bypass. Bounded mounted preview/store-change/closed-order regression is submitted with active/checkpoint evidence on current main through normal PR/main CI. Real reopen, stock/payment/finalization and USER/LAB remain NOT TESTED; shared release and final PDF/manual receipt pending. Existing Android/inventory/broader09 owners retained. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-purchase-order-reopen.md.

18/10/2026 16:49 Europe/Athens - COORD-20261018 / OWNER-DIRECTED TRANSFER / ASSIGNED BEFORE CODE

At15:17 the owner explicitly confirmed replacing previous assignments for #2704-#2707; at15:18 confirmed full execution approval and requested four internal parallel helpers under this coordinator. The interrupted publication is resumed16:49. This owner-directed transfer supersedes the earlier unknown-activity wait for the bounded paths below; it does not fabricate an independent release by old pages. Central receiver codex/central-four-streams-20261018 integrates all work. Original PASS evidence and unrelated assignments remain protected.

ΑΝΑΛΗΨΗ ΑΠΟ AUTO-REPORTS / Task29-Task30 supplier / VOICE-ASSISTANT-01 for the exact delegated slices - ASSIGNED central coordinator and branches below. Earlier pages must not edit these assigned slices concurrently. Root alone owns registries/PDF/shared checkpoint and reviewed integration.

- WS1 #2704 ASSIGNED codex/ws1-cash-20261018: server/src/services/automatic-report-source.js, client/src/components/platform/AutomaticReportSettingsManager.jsx and focused/mounted/native tests. Explicit source readiness versus PROVISIONAL financial finality; no writer/schema/scheduler/SMTP changes.

- WS2 #2705 ASSIGNED codex/ws2-supplier-orders-20261018: server/src/routes/order-suggestions.js, new supplier-order-groups helper and focused/native tests. Separate read-only supplier-grouped PROPOSAL endpoint; declared approved-document-frequency PROXY, primarySupplierId null/reviewRequired, ties/no evidence/limited evidence unassigned. No unsupported physical-delivery frequency or persisted supplier change.

- WS3 #2706 ASSIGNED codex/ws3-sales-counts-20261018: server/src/routes/kiosk-reports-sales-v4.js and new focused/native tests. True overall distinct sale/reversal counts and same-snapshot cap coverage, retaining per-product counts and numeric monetary compatibility.

- WS4 #2707 ASSIGNED codex/ws4-assistant-coverage-20261018: server/src/services/owner-sales-tools.js, assistant-answer-response.js, assistant-report-table.js; client/src/components/voice/SalesAssistantEvidence.jsx and focused tests. Explicit limited/unknown product source evidence; no broad new capability/auth changes. WS4 alone edits owner-sales-tools.test.js mock fixtures if needed.

Shared producer-consumer contract sourceCoverage={complete,returnedGroupCount,totalGroupCount,limit,totalsScope:COMPLETE_SOURCE|RETURNED_GROUPS}. WS3 owns producer; WS4 consumers. WS1 financial-finality disclosure is separate from source completeness.

New source status ASSIGNED/NOT TESTED. Preserve #2716 eighteen local diagnostics and four distinct count observations; no inferred new CI/LAB/LIVE PASS. Full source CI/native/invariant checks and exact ordinary guarded release precede applicable LAB acceptance. Production remains read-only; no financial/fiscal/stock/shift/payroll/DB/backup/settings/email/order mutation or protected transaction replay. Other original14 residuals stay OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-18-central-four-streams.md.

18/10/2026 18:32 Europe/Athens - COORD-20261018 / SECOND BOUNDED DELIVERY ASSIGNED BEFORE CODE

Owner-directed continuation after #2743, same central coordinator codex/central-four-streams-20261018. The owner's explicit approval to replace prior assignments and execute the four issues persists. ΑΝΑΛΗΨΗ ΑΠΟ retained AUTO-REPORTS / Task30 supplier / ordinary reports source owners - ASSIGNED the exact independent paths below to central internal workers. This extends #2725's narrower path scope; old owners must not edit these bounded paths concurrently. Independent VOICE calendar/numeric-filter and invoice/wholesale/native/store-cleanup scopes remain protected. Root alone edits shared registries/checkpoints/PDF/integration.

- WS1 #2704 branch codex/ws1-monthly-preview-20261018: server/src/services/automatic-report-policy.js, automatic-report-source.js; server/src/routes/automatic-report-settings.js; client/src/components/platform/AutomaticReportSettingsManager.jsx; focused automatic-report policy/source/weekly/settings mounted/native tests and new monthly tests. Add MONTHLY read-only preview using existing saved business-day boundary, each calendar day required/whole-month HOLD; retain caps, provisional finality and existing groups/amounts/day/POS/delivery/operator identity. No new employee aggregation/liability allocation, scheduler/outbox/SMTP, Save/settings/schema/business writer changes.

- WS2 #2705 branch codex/ws2-supplier-preview-ui-20261018: client/src/components/commerce/OrderSuggestionsPanel.jsx, order-suggestions.css; new server/test/supplier-order-groups-ui.test.js. Optional supplier proposal view via existing /by-supplier API, unchanged default flat view/quantities. Explicit approved-document frequency PROXY/period/candidate/review/unassigned/ties/incomplete. Strict selected-store and request/view invalidation. No primary supplier persistence, sending or backend writer.

- WS3 #2706 branch codex/ws3-report-coverage-ui-20261018: client/src/components/commerce/installKioskReportsSalesV4.js; new server/test/kiosk-sales-coverage-ui.test.js. Visible complete/partial/unknown-invalid scope, clearly partial monetary cards/footer, unique overall basket/reversal counts from producer only. Preserve filters/default timezone/rows/money/drilldown/store invalidation/export schema; export labels clarify displayed rows. Do not touch advanced analytics or producer.

- WS4 #2707 retains sourceCoverage integration review and read-only LAB acceptance planning only, no additional runtime claim. Central owned coverage files remain protected; independent VOICE calendar/numeric parsing owner retained.

New code status ASSIGNED / NOT TESTED; earlier #2743 daily/weekly HOLD/provisional LAB PASS and prior exact correction/installment/transaction evidence preserved, not repeated. Full focused/native/Windows/build/invariant/HTTP CI and ordinary exact guarded release required before new LAB acceptance. Production business state remains read-only. Broader original14 residuals stay OPEN. Final source receipt synchronizes common tracker PDF; this assignment does not claim a PASS or activate delivery.

19/10/2026 20:28 Athens — KAT continuation and bounded backup upload claim

Retained owner fix/kat-online-search-autofill-20261019 / #2845 / #2848. Exact4c450ded fullCI39260429578 SUCCESS; later main requires registry reconciliation only, same app blob d42536b8. No repeat completed LAB transaction. Previous desktop email query→category USER FAIL reproduced in Cloud Chrome; synthetic actual HTML focus/search/seven resets PASS, repaired hosted/mobile NOT TESTED. Next green combined CI then ordinary guarded merge/release and exact revision acceptance.

ΑΝΑΛΗΨΗ ΑΠΟ fix/backup-monitor-retry-20261012 — ASSIGNED fix/backup-upload-retry-20261019 for run-backup.sh upload command and existing isolated monitor-delivery tests/README ONLY. Explicit owner continuation of19Oct incident. No lifecycle worker/manifest/recovery takeover. Source editing starts only after this claim merges. Planned bounded command-scoped AWS_RETRY_MODE=standard/AWS_MAX_ATTEMPTS=8; same archive/key and SDK request retries, no whole-upload loop or pg_dump repeat. Preserve bucket security/SSE/versioning, TOC, SHA/size/head verification, HMAC monitoring, schedule and failures. Read-only monitor19Oct:12:00AthensSUCCEEDED242849552bytes/TOCPASSED;15:00FAILED UPLOAD_FAILED with Render UploadPart InternalError/max2retries;18:00SUCCEEDED248122165bytes/TOCPASSED. New retries NOT IMPLEMENTED/NOT TESTED. Full database restore not evidenced by TOC. No production data/config/secrets/restore/backup-trigger change.

19/10/2026 — KAT online autofill continuation / PR2848 / AWAITING CI AND BROWSER

Owner-directed continuation of fix/kat-online-search-autofill-20261019, issue2845, PR2848. Retain exact existing app correction b568d9e0cf872b056606387e1319c42400e4fb1a; no redesign or catalogue/settings/order changes. CI39258617451 build118080529655 failed checkpoint policy only: missing active-list and CHANGES updates; application/native/build/E2E tests did not execute. Three other jobs passed. Reconciled current main70d60c00e with unrelated native/history/wholesale owners preserved. Source app diff remains three bounded lines (search attributes/focus and category query clearing). Physical owner desktop email-autofill/category blank USER FAIL and mobile category USER PASS are retained; repaired desktop/mobile acceptance NOT TESTED. Initial Cloud Browser public catalogue loaded seven visible categories, empty basket; no order action. Exact deployed revision not yet verified. Required next: full exact PR CI, read-only category/search browser verification, green main CI and ordinary guarded release, exact LIVE revision and acceptance. No repeat financial/LAB transactions. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-kat-online-search-autofill.md.

Backup incident is independently assigned by owner for continuation: 19Oct15:00Athens upload failed S3 UploadPart InternalError after two retries, confirmed Render12:02:19Z. Source run-backup.sh currently invokes one aws s3 cp with default SDK retry behavior. No pg_dump repeat or restore/write/config action. Prior12Oct monitor-delivery retry PASS remains protected. Backup upload correction has NOT been implemented and does not belong in this KAT source PR. A pg_restore --list is TOC inspection, not a full restored-database proof; owner-reported12:00 restoration success must be reconciled with its exact evidence before relabeling it.

19/10/2026 — BACKUP-UPLOAD-RETRY-01 / source prepared / AWAITING CI AND LIVE

Owner fix/backup-upload-retry-20261019. Explicit owner handoff/claim published by KAT PR2848, merge19e6adcdf25fce65449b1f82f35c71808b61b3ac after fullCI39296069087 SUCCESS, before this source edit. Only run-backup.sh upload command receives AWS_RETRY_MODE=standard/AWS_MAX_ATTEMPTS=8; SDK retries requests within one upload identity. No outer copy retry or second dump, no global export or lifecycle-worker change. Existing signed monitor, bucket/versioning/encryption/SSE, checksum/size/TOC and HeadObject checks and schedule retained. Permanent/exhausted failures stay failures.

Local Node20 isolated command-fake job/control and existing monitor invariants:13PASS/0FAIL/0SKIP. New cases cover command-local settings despite inherited legacy/1 and upload exit17 -> one dump/one copy/no HeadObject/no SUCCEEDED/UPLOAD_FAILED. Separately actual AWS CLI with synthetic loopback multipart server: default3 attempts fails; limit8 recovers after3 InternalErrors per part (4 requests each). Permanent403 returns failure with1 request per part. This is LOCAL/SYNTHETIC, not production storage acceptance; concurrent aborted403 test emitted a local fixture BrokenPipe after client cancellation, not a production error. No production request/data/config/restore/backup trigger.

Read-only19Oct monitor:12:00AthensSUCCEEDED242849552bytes/TOCPASSED;15:00FAILEDUPLOAD_FAILED/UploadPartInternalError;18:00SUCCEEDED248122165bytes/TOCPASSED before this patch. A TOC check is not full database restoration. New source requires full exact PR/main CI, existing cron checksPass deployment and exact cron revision, then a new scheduled full backup and signed SUCCEEDED/verified archive evidence. A five-minute lifecycle invocation is not full backup PASS. Web guarded release remains independently pending for KAT; no direct deployment or bypass. No new manual PASS. Checkpoint CHECKPOINTS/CHANGES/2026-10-19-backup-upload-retry.md.

2026-10-22T19:20:16+03:00 — STARTUP-PREPARE-01 / OWNER-AUTHORIZED LIMITED TRANSFER / ASSIGNED BEFORE SOURCE

ΑΝΑΛΗΨΗ ΑΠΟ codex/pos-startup-loading-20261008 — ASSIGNED fix/startup-preparation-20261022. Owner explicitly approved transfer in this conversation after named existing ownership was disclosed. Transfer ONLY build-time preparation of the six file-only source patch commands currently preceding seed-invoice-profile-dimotsios in server npm start, with a fail-closed prepared-artifact verification before retained runtime commands. No transfer of capacity, shutdown, DB locks, staging, other runtime bootstrap, OCR, ftext or other owners.

Causal boundary: move those same ordered file-only patches into the existing production server build; record/verify prepared target hashes before normal start. Do not remove or reorder DB repair/seed/schema operations, change Render start command, Prisma generation, auth/routes/business semantics, health/readiness, queues, billing, infrastructure or deployment guards. Preserve prepared-source equivalence and fail before DB work if preparation is missing/stale. Root/client build remains frontend-only. Local and exact PR/main CI required; real startup timing and LAB/LIVE acceptance NOT TESTED, no claim this resolves today's503 or certifies30stores. No production financial/stock/fiscal/restart/load action. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-startup-preparation.md. Claim must be green and merged before source. Existing single-search USER PASS, coordinated shutdown and guarded single-deploy evidence remain protected.

22/10/2026 — STARTUP-PREPARE-01 / SOURCE PREPARED / AWAITING FULL CI AND LIVE ACCEPTANCE

Owner fix/startup-preparation-20261022. Before-source claim PR3038 finalfbccbda0 passed applicable checks and merged3ed9cba33. Prior claim conflicts were reconciled against concurrent main without discarding other records. Six original ordered file-only patch scripts now run at the end of prepare:server; build:client remains frontend-only. server npm start first verifies a build receipt covering patch/verifier inputs and three prepared outputs, then retains all18 remaining runtime commands in exactly their original order. Missing/stale/failed preparation refuses this workspace start. The pre-existing Render/root Prisma/schema/seed/repair steps remain unchanged and may run before the workspace verifier; this is NOT a guarantee of zero DB work for the entire service start. No production start-command/configuration/billing change.

Verifier hashes every prepared target byte except exactly the two known import/mount lines added by the retained online POS handoff patch; duplicate copies are rejected. This is artifact consistency, not cryptographic publisher authentication. A failed rebuild deletes its previous receipt. Runtime verification reads files only, never imports application/Prisma or reapplies patches. Known later index modification was independently reproduced before implementation; first incomplete temporary diagnostic lacked an E2E fixture and was corrected by copying complete source. Initial new test URL/path fixture failure was corrected without weakening its assertions.

Local Node24:29focusedPASS/0FAIL/0SKIP (3new artifact cases +12existing deployment/VAT/health +14efood/recipe cases). Actual original six-patch temporary baseline ran twice with identical3targets; old local six-process time1.233/1.341seconds is NOT production timing or evidence for the cause of503. Tests compare original subprocess outputs, verify repeatedly without target writes, accept retained handoff, reject missing/malformed/stale inputs/unexpected target changes and remove prior success on failed build. No DB/provider/financial/fiscal/stock/shift action. Full Node20 CI, exact-main ordinary guarded release and startup/live acceptance remain NOT TESTED. Not a capacity30store, whole reliability, security or503 fix PASS.

Single next action: full exact PR/main CI and review, then ordinary guarded exact release and read-only health/log verification; no manual restart or business replay for proof. Broader DB bootstrap removal, paid server/DB hardening, OCR separation, capacity and other owners remain OPEN. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-startup-preparation.md.

22Oct validation update: npm run build:production completed successfully locally on Node24, including client bundle, all retained server preparation, new receipt and Prisma client generation (no database connection). Real verifier accepted the generated artifact. Focused Node20.20.2 rerun29PASS/0FAIL/0SKIP. Full local suite still running at publication; exact full Node20 PR CI remains required. Generated index.js changes are build output and excluded from the source commit.

22Oct exact source PR3043/head8feeb1cc full CI39818793701 all5jobsSUCCESS. Actual job119964597381 logs:3878serverPASS/0FAIL/0SKIP +8backupPASS/0FAIL/0SKIP; actual original-photo cases and new prepared-artifact cases passed. CI actually started the normal workspace with the verifier. Local Node20 full3575PASS/2FAIL/206infrastructureSKIP: two unchanged five-photo UI timing cases failed under concurrent suite; independent unchanged file rerun9PASS/0FAIL/0SKIP. No assertions/timeouts changed. Local Node24 full3577PASS/0FAIL/206SKIP remains a separate observation. Reconciled newer main ftext/cloud and wallet runtime plus shared documents; only PDF conflicted and was regenerated. All owned runtime/test contents unchanged; combined-head exact full CI remains required, not a new LIVE or capacity PASS.

22Oct final Render-boundary correction before merge: read-only inspection of the actual retained Render start command found scripts/patch-pos-return-diagnostics.js also mutates index.js BEFORE the workspace verifier. This is outside npm server start, so previous ordinary-workspace CI success alone did not cover it. Build preparation now runs that SAME existing file-only prerequisite before the six moved commands and hashes its input too. Its Render command is retained and becomes the original idempotent no-op; no diagnostic/financial behavior is rewritten. New temporary-tree test actually executes the retained Render prerequisite after sealing and verifies again, then tests the later handoff. Node20 focused17PASS/0FAIL/0SKIP. This necessary artifact-consistency correction is within startup compatibility, not removal of an additional runtime command. No production failure was introduced: all candidates remain unmerged. Exact final-head full CI must replace the prior source-head result.

22Oct final candidate d1e9d025 full CI39821188826/job119972987044 all5jobsSUCCESS,3919serverPASS/0FAIL/0SKIP+8backupPASS/0FAIL/0SKIP. Source including the retained Render diagnostics correction passed actual isolated app startup. New main module-writer work and its owners are preserved. Source PR remains AWAITING LIVE, with no business/capacity PASS. Retain main central PDF in this source-only/non-PASS PR: the approved transfer PDF already merged with3038, and repeated unrelated PDF regeneration was causing conflicts. Regenerate the central PDF with the eventual real acceptance/completion checkpoint as required by the PASS gate; no completion/manual claim is being made now. Final combined exact CI still required before merge.

22Oct PR3043 exact head01be2222 CI39822831197 attempt2/job120005885276 all5jobsSUCCESS:3919server+8backup PASS/0FAIL/0SKIP plus isolated HTTP E2E. Attempt1 failed one unchanged wholesale snapshot assertion that searches the whole JSON for substring999; timestamps are also serialized. Isolated unchanged test rerun PASS; no assertion weakened. Reconciled three prepend-only shared-document conflicts against main ae894c382, retaining both owners and current main PDF. Runtime implementation unchanged. Exact combined-head/main CI and guarded release still required; no LIVE acceptance. Render paid plan1CPU/2GB25USD/month approved separately but not applied: dashboard authentication/browser timed out; connector read confirms free. Read-only current production health/admin HTTP200 revision5c8ccf5ef1c3aea57a9c7d11d5cc1550d9052774.

22/10/2026 — POS-UI-V2-3012 / SELECTED SECOND DESIGN / ASSIGNED — NOT COMPLETE

Authoritative owner correction: previous compact/dialog candidate PR3016 is DRAFT and does not implement the selected second design; its earlier CI is safety evidence only. User explicitly confirmed recovered modern reference (SHA256ca5dde6cc750cd531cb8c4200412ce8b6dcffd3ad7aa7a876dffe525204c0f75): left category rail, central product cards, right cart/keypad/total/payment panel, navy header. Same coordinated Work owner implements actual StorePosPanel presentation in feat/pos-ui-v2-modern-layout-3012, reviewed/integrated branch feat/pos-ui-v2-modern-reviewed-3012. Preserve all existing handlers, resolver/scanner/editor hooks, quick/nested groups and financial/device safeguards. Catalog currently lacks product photos; neutral placeholders and optional image metadata supported, photo catalog remains residual. Visual acceptance/full exact CI/new isolated hosted verification pending. Production/main merge/deploy require final user approval; no other owner scope or production data is changed. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-pos-ui-v2-selected-modern-design-3012.md. No full LAB/manual PASS.

22/10/2026 20:48 UTC - AUTOMATIC-DISPATCH-PROVISION-OPERATOR-01 / ISOLATED PG18 CI AMENDMENT BEFORE WORKFLOW SOURCE

Same central owner codex/central-auto-dispatch-20261022. Exact five-pathsourceclaim3078/CI39850615750SUCCESS mergeda16417c9 before operator source. First4Node20 unitchecksPASS locally; nativeoracle NOTCAPTURED, production untouched/OFF. Correction: EXISTING generic CI service is PostgreSQL16, not18. Its prior executed native evidence remains valid within its actual scope; it does not supply a PG18catalog oracle.

Additional exact NEW path .github/workflows/automatic-report-provision-pg18.yml claimed BEFORE edit. Bounded PR/push paths-triggered Node20/officialpostgres18 disposableCIservice job; no production secrets/env/deploy permission, read-only repository token, npmrootinstall+Prismagenerate, only new operator unit/native tests and redacted deterministic PG18catalog output for review. No existing workflow changed or required checks bypassed. Local PG18initdb cannot run under workspace's root-onlyUIDmapping; no root-check bypass. IsolatedCI18 closes actual fixture/rollback gap. Workflow source starts only after this amendmentgreenmergedmain.

No productionDDL/config/SMTP/enrollment/RESET/restore/businessaction, no existing LAB replay. Final acceptance remainsOPEN; next runPG18native/fullPRmainCI/independentreview then ordinaryguardedinstallation. All retainedowners/otherstreams unchanged. Checkpoint CHECKPOINTS/CHANGES/2026-10-22-automatic-dispatch-provision-operator.md.

22/10/2026 - AUTOMATIC-DISPATCH-PROVISION-OPERATOR-01 / SOURCE PREPARED / AWAITING PG18 AND FULL CI

Same approved centralowner. Claims3078/CI39850615750/mergea16417c9 and PG18amendment3082/CI39852048299/mergef6bd578f greenBEFORE source. 23/10/2026 - AUTOMATIC-DISPATCH-CANONICAL-PROMOTION-01 / SOURCE CANDIDATE ONLY — AWAITING PROVISION AND LAB

Claim #3088 merged 4b020affba7eed7699fb94584162a7f15f86991a after CI39875991581 SUCCESS. Prepared exactly the five claimed source paths. Canonical/proposed pairs are identical; existing 176 nodes and 414 reviewed rows retain their original order; append six DIRECT/REMOVE dispatch nodes and 18 review rows plus the one already-physical OnlineOrderingConfig boolean. Stripping only those deltas reproduces the prior canonical objects exactly. All 89 new columns match the retained PostgreSQL18 oracle. Independent pos_stores and automatic_reports reviews CLEAR; focused local suite 10 PASS /0 FAIL /34 explicit native skips; separate manifest test 1 PASS /0 FAIL. Full isolated PR CI still required. No production catalogue promotion, DDL, activation or email by this source candidate. Draft MUST NOT MERGE until retained #3084 operator and #3085 boundary jointly installed, one authorized OFF provisioning succeeds with full actual PG18 oracle, fresh complete catalogue matches and no lifecycle job/lease/pending reopen exists. Then normal guarded app and backup checksPass rollouts, exact image/hash and fresh signed pulse checks. Functional LAB remains NOT TESTED. Same central owner and claim boundaries retained.

23/10/2026 - AUTOMATIC-DISPATCH-LAB-RECIPIENT-01 / USER-NAMED MAILBOX / ASSIGNED BEFORE STATE CHANGE

Same retained centralowner codex/central-auto-dispatch-20261022. User explicitly supplied the intended LAB test mailbox in currentconversation; exact address retained only in authorized application workflow, redacted from shared records. Recipient identity resolved from user's exact address (no Gmail/account inference). Technical installed83db47fc/fullmain4137+8/0/0 andPG18operator12/0/0/pairedbackup/OFFcontrol evidence3091 retained; no replay. Read-only currentUI: MYWORKSTATIONLAB companycmtpopbgk000prhb5qc60zxus / ΕΡΓΑΣΤΗΡΙΟΔΟΚΙΜΩΝ storecmtpopbgo000trhb5ng9ytiru,7/15/23 MAINall3 unchanged, no recipients, dispatchOFF, selectedDAILYonly, noauthorizationchecked. All6dispatchtables0rows atlatestread.

After thisclaimgreenmergedmain ONLY: add one canonical user-named recipient through mounted authenticated SuperAdmin LAB UI (expectedVersion0), verify returned exactscope/address/unverified/no-consent state, issue ONE mailbox-verification challenge via existingSMTP route and observe normalUIresult. No blindretry onuncertain transport; inspectcurrentstate first. Challengeexpires10min/max5attempts/cooldown60s; no token inlogs/checkpoint/chat. User enters received proof directly in existingUI; no Gmailread or credentiallookup. After actualmailboxverification only, separately request one consent challenge for DAILYifcontinuingtheuser-authorizedworkflow; user mustexplicitly confirm with itsseparateproof. No inferred consent, verification isnotconsent.

No reportsend, policy/grant activation, externalON/controlchange, existingreportsettings save, schema/provision/restore/enrollment/RESET orfinancial/stock/fiscalaction. 26/10/2026 — CASH-PAPER-READING-02 / SAME RECEIVING OWNER / ASSIGNED BEFORE SOURCE

Owner codex/cash-chat-reconciliation-20261026; next source feat/cash-paper-reading-20261026. Owner explicitly requested continuation after receiving the bounded cash-review extension. This is the next independent reading slice, not a transfer of native chat, invoice intake/OCR, wallet/lifecycle implementations, automatic dispatch or financial writers. First discovery source3163 merged9ecbb3e5510b07e4407ac6b1ad2218b50d1b613f after combined339127ff CI40363292445/all5jobs SUCCESS/4259server+8backupPASS/0FAIL/0SKIP. Exact-main CI/ordinary installation and actual LAB reading remain unverified; no handwriting has been read. Baseline9ecbb3e5510b07e4407ac6b1ad2218b50d1b613f; authoritative AGENTS/current records/source history and protected cash/invoice/wallet/lifecycle interfaces reviewed. No production action.

Bounded scope: selected-store image/PDF paper reading via explicit authorised POST, one file at a time; reuse existing metered provider without changing wallet policy or invoice drafts/jobs. GET is discovery/status only, no AI or acknowledgement. Authenticate SuperAdmin or non-operator OWNER, active own store/company, current CASH_CONTROL/STORE_CHAT/AI_READER entitlement and supported original attachment/checksum/size before provider. Preserve existing SuperAdmin bypass, no role or module configuration changes. Validate Greek raw fields/dates/amount strings; model output is untrusted extracted evidence, not verified association, instructions or employee debt. Source checksum and message identities remain visible; upload time is NEVER paper date. Strict bounded output and original-file hash;

unsupported/uncertain output remains review-required.

Durable once-only intent and separate immutable completion use existing general WorkforceAuditLog rows with new CASH_PAPER_READING entity/actions and deterministic company/store/lifecycle-generation/file-checksum IDs. This is a scoped nonfinancial audit use, NOT CashControlReview overloading: do not insert OCR metadata into financial reviews or clear their stale state. No new table/column/DDL/lifecycle classification. No binary photos or provider secrets in audit; only bounded extracted fields and provenance. Capture explicit current generation from authorised discovery; intent/completion transactions reuse existing Store/Fence lifecycle guards, with completion bound to the original generation. No fresh-generation relabel or maintenance bypass. Unique intent commits before provider; concurrent/repeated requests reuse completion or remain PENDING/REQUIRES_REVIEW, never auto-resend after uncertain dispatch/completion. No background retry, paid GET, invoice settlement, financial ledger/review writer, stock/fiscal action, chat read marker or email. Provider preflight failures before intent may be corrected and explicitly resubmitted; any durable uncertain intent requires review, never an automatic second paid attempt. Existing wallet settlement/uncertain-hold contracts stay unchanged and runtime flags are not activated by this work.

Exact future source paths: NEW server/src/services/cash-paper-contract.js, cash-paper-repository.js, cash-paper-reader.js, cash-paper-provider.js; NEW server/src/routes/cash-papers.js; server/src/index.js ONLY additive import and authenticated route mount adjacent to current cash routes. NEW client/src/components/shared/CashPaperReadingPanel.jsx; existing client/src/components/platform/PlatformAdminApp.jsx and client/src/components/cloud/CashControlPanel.jsx ONLY selected-store panel mounting; existing server/src/services/cash-chat-evidence.js and client/src/lib/cash-chat-evidence.js ONLY reading-state enrichment/accurate labels, preserving current source/handoff arithmetic. NEW server/test/cash-paper-contract.test.js, cash-paper-reader.test.js, cash-paper-postgres.test.js, cash-paper-http.test.js, cash-paper-ui.test.js; existing cash-chat-evidence tests only fixtures/regressions for enriched status. Reuse existing wallet provider and lifecycle exports without editing those retained-owner files. No existing store-chat/native/invoice route changes.

Required actual tests: strict bounded/ambiguous/date/Greek-number/provider refusal and malformed result; original checksum/tenant/store/category/media/size controls; durable lost-reply replay/concurrent two-client one provider dispatch; pending/uncertain no-retry; stale/maintenance generation before and after provider; no financial/invoice/chat acknowledgements or original-byte changes; wallet wrapper usage/hold with fake provider only; actual auth/role/module/store HTTP refusal; mounted UI read only on explicit click, escaped source data, no retry and old-store/unmount cancellation. Native isolated PostgreSQL must execute real intent/completion/audit queries and before/after original/control checks, all unskipped in exact full CI. Node20 build/full native CI, ordinary guarded exact release, then scoped real LAB acceptance. No provider call or production fixture from CI. No LAB PASS from engineering alone.

Separate REQUIRED next slice: reviewed evidence association and once-only adjacent cash-offset/recalculation history with per-date/operator results and persistent per-store checkpoint, integrated common report consumers. OCR reading alone never settles shortages. Whole requested workflow stays OPEN/NOT INSTALLED. Same receiving owner retained until completion/named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-paper-reading.md. This before-source record is appended to shared registries to preserve concurrent prepend-only work; no shared source takeover. Single next action: green/main this exact claim, finish first-source technical reconciliation, then implement only these reading paths.

26/10/2026 — CASH-PAPER-READING-02 / SOURCE PREPARED / AWAITING FULL CI AND LAB

Same receiving owner codex/cash-chat-reconciliation-20261026; source feat/cash-paper-reading-20261026. Before-source claim3165 final eef51ae9 passed docsCI40366737353 and merged27ab5bce before edits. Rebased source on currentmain771b546b, preserving unrelated myDATA3168 and three POS extension3169 owners. Protected PASS, wallet/lifecycle implementations, invoice/native chat writers and cash-control financial writers unchanged.

Implemented selected-store explicit paper reading: current DB OWNER/SUPER_ADMIN and effective CASH_CONTROL/STORE_CHAT/AI_READER admission; original scoped SHA256/size/media checks; bounded Sharp images/PDF physical pages; strict raw Greek fields and ambiguous/null monetary values; existing metered Responses provider with no tools/storage. GET never invokes AI or marks chat read. Durable immutable general WorkforceAuditLog intent commits before dispatch, separate completion, original lifecycle generation and store locks; two clients cannot dispatch twice. Lost/uncertain result remains pending/review, no automatic paid retry. Original attachments and financial reviews/ledger are untouched. Shared panel mounts in Platform and Owner Backoffice, explicit one-paper read, cached reuse, escaped text, manual status refresh and stale-store/unmount reply fencing. Readings remain UNVERIFIED and never assign employee liability.

Actual local Node20.20.2: focused24PASS/0FAIL/3nativePGSKIP; separate cash balance/correction/period/mounted-UI regressions20PASS/0FAIL/0SKIP; Work-safe frontend build PASS. Added native two-client PostgreSQL audit concurrency, immutable finance/original/control, uncertain/stale-generation fixture: NOT EXECUTED locally, must pass unskipped in exact full CI. Real AI/provider/LAB reading NOT TESTED. No production DB/schema/financial/provider action. Exact PR/main CI, ordinary guarded installation and real scoped LAB acceptance remain required; CI alone is not LAB PASS.

First discovery3163 technical receipt: exact main9ecbb3e CI40365265503/all5jobs SUCCESS, build121721749256 actual4259server+8backupPASS/0FAIL/0SKIP. Public /api/health observed26Oct returned exact9ecbb3e5510b07e4407ac6b1ad2218b50d1b613f. This verifies installation only, not functional LAB acceptance. Reading source is NOT INSTALLED and whole workflow stays OPEN.

Required next: finish exact reading CI/release evidence, then separate before-source claim for reviewed evidence association, once-only adjacent cash offsets/recalculation history, per-date/store/operator results and persistent store checkpoint/common report consumers. Cash and POS–EFTPOS remain separate; matching amount alone never proves a handoff error. No emails. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-paper-reading.md. Single next action: publish this bounded source for exact full native CI.

26/10/2026 — CASH-PAPER-READING-02 / EXACT SOURCE CI PASS / SHARED DOCUMENT RECONCILIATION

Same owner codex/cash-chat-reconciliation-20261026, source3170 head10e491eba742c3fece204a94f5fcf5cf3861de04/treefe1ce028c6c80cd1a14de5a39c74e24963a09ba2. Exact CI40370223929/all5jobs SUCCESS; build121739189023 actual4276server+8backupPASS/0FAIL/0SKIP. New native two-client durable intent, once-only dispatch, original/financial/control preservation and stale-generation refusal executed unskipped, as did mounted UI old-store/double-click/uncertain-reply tests. No real provider or LAB call. This is engineering evidence only, NOT LAB PASS.

Freshmain2c20d2cf advances only other-owner myDATA verification3171. Three registry texts merge without conflict; canonical generated PDF overlaps, so it is regenerated from the combined current Markdown rather than choosing either owner's version. All eighteen runtime/test blobs remain exactly the green source bytes. Combined exact full CI is required before merge. No production installation or manual/whole-workflow PASS claimed. Reading source stays AWAITING LAB; same owner and downstream residual retained.

26/10/2026 — CASH-REVIEWED-RECONCILIATION-03 / SAME OWNER / ASSIGNED BEFORE SOURCE

Same receiving owner codex/cash-chat-reconciliation-20261026; future source feat/cash-reviewed-reconciliation-20261026. This independent next slice implements reviewed associations and once-only adjacent cash offsets, immutable history and a per-store continuation checkpoint. Before reviewed runtime edits, THIS claim must be green/main. Reading3170 backend/source proof10e491eb and aa70fa3d passed full4276server+8backup/0FAIL/0SKIP in CI40370223929/40372216532. The same owner may prepare the independent reviewed slice on the current reading branch after this claim merges; before publishing/merging its source, incorporate corrected reading3170 after its own exact green merge. This sequencing does not permit edits before the claim or waive any CI/release gate. No automatic-dispatch, retained invoice/native chat, wallet/lifecycle, fiscal or financial writer takeover. In particular cash-control.js is currently sole-writer shift_pin under3169 and is NOT in this scope. Preserve all protected PASS and claimed POS extensions/myDATA diagnostics.

NEW exact source: server/src/services/cash-reconciliation-contract.js, cash-reconciliation-source.js, cash-reconciliation-repository.js, cash-reconciliation-report.js; server/src/routes/cash-reconciliation.js; client/src/components/shared/CashReconciliationPanel.jsx. Existing server/src/index.js only additive authenticated route mount; existing PlatformAdminApp.jsx and cloud/CashControlPanel.jsx only selected-store report/review panel integration, original amounts retained. Reuse phase2 authorizeCashPaper current role/store/three-module gate without modifying auth/licence configuration or its implementation; reuse lifecycle guards, paper repository and existing readCashReviewState without changing retained writers. NEW actual contract/source/repository/native PostgreSQL/HTTP/mounted UI tests under server/test/cash-reconciliation-*.test.js.

General existing WorkforceAuditLog append-only CASH_RECONCILIATION entity, scoped company/store/original lifecycle generation, bounded JSON and deterministic/replay identity. No new schema. Serialize review writes with selected Store row lock, current-generation guard and optimistic audit-head check. Each source hash includes current closed-shift identities/operator/terminal/times/cash/card values, current StoreTransaction snapshot and confirmed-review identities; changed source/reviews makes prior association/offset stale, never silently rebind or add a second deduction. Lost reply reuses the committed action by idempotency key; changed payload or stale head refuses. No original chat/source transaction/CashControlReview write, provider/AI call, stock/fiscal/payment, chat acknowledgement or email.

Paper association is explicit human verification, never inferred from upload time or equal amounts: original checksum/read-result/source-line, actual owned session/transaction, confirmed date/value/operator context and reason, preserving raw extracted values and any correction. One line cannot be allocated twice. Pending/failed/unread/illegible material stays visible and cannot masquerade as zero. Bounded recent source coverage remains explicit.

Cash offsets require explicit reviewed counting-error evidence/reason and two immediately consecutive closed sessions of the same company/store/exact terminal; reject overlap, intervening shift, missing/open next, foreign/delivery/other chain, nonfinite/absent cash values, incompatible configured rule, same-sign amounts and allocation exceeding either remaining cash balance after current valid explanations and earlier reviewed offsets. Both sides consume exactly the same integer cents once. POS–EFTPOS is always copied separately, never a cash adjustment or proof of a counting error. No global employee/day netting. Keep initial/explained/offset/remaining amounts and identities in every history/result; stale records force recheck for affected rows. Unknown/shared ΕΚΤΑΚΤΟΣ names do not prove a physical employee identity.

Common server prose result uses ΕΛΕΓΧΟΣ ΤΑΜΕΙΩΝ MYWORKSTATION and ΑΠΟΤΕΛΕΣΜΑ ΜΕΤΑ ΑΠΟ ΕΛΕΓΧΟ — ΜΑΝΗΣ ΧΡΗΣΤΟΣ, per date/shift/operator signed cash result, separate cards, no report tables, separate shortage/surplus totals rather than global employee net. Last/unfinished shift and unresolved source remain pending. Finality requires explicit reviewed source snapshot; no automatic final liability from candidates. Same common text is displayed/copied by both selected-store UIs. Persistent continuation records retain last reviewed boundary and bounded pending notes per store; a new visit reads the existing checkpoint instead of guessing dates from chat memory.

Required tests: strict cents/date/action/source hashes; actual immediate-chain/source SQL and scoped original/control snapshots; concurrent/replay/changed-payload and same-line double allocation; stale transaction/review/lifecycle state and maintenance; partial offsets and multiple adjacent pairs without double deduction; cash/cards separation, delivery isolation, last-shift pending and per-day employee attribution; current real role/modules/tenant HTTP refusals, no financial/provider writes; mounted UI explicit actions, no auto submission/retry, escaped source, stale store/unmount reply fencing and copy text parity. Native PostgreSQL must run unskipped in full exact CI; ordinary guarded exact installation before any measured LAB acceptance. New behavior NOT TESTED/NOT INSTALLED; no manual or whole-workflow PASS.

Separate remaining next slice: reviewed result integration with existing automatic/assistant/email consumers under their retained boundaries, complete telecom/safe/refill source reconciliation and real scoped LAB acceptance. This slice does not activate scheduling, send mail or claim full financial settlement. Same owner retained until complete/named handoff. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-reviewed-reconciliation.md. Single next action after claim green/main: implement only these independent reviewed-evidence/report paths.

26/10/2026 — CASH-PAPER-READING-02 / PARENT INTEGRATION CAUSE FOUND BEFORE INSTALLATION

Same receiving owner. Combined aa70fa3d exactCI40372216532/all5jobs SUCCESS:4276server+8backupPASS/0FAIL/0SKIP, including native paper audit proof. These tests had mounted the reading component but had NOT exercised its actual Platform parent integration. Source review before release found the parent passed an out-of-scope api variable and only rendered papers inside closed-shift result rows. Neither candidate was installed or labelled LAB PASS.

Bounded correction in the already claimed Platform mount: use existing requestFor("cash") scoped request, expose exactly one paper panel for an explicitly selected store even with zero closed shifts, and hide it for unselected all-store scope. Existing financial summaries and filters remain unchanged. Added actual mounted Platform+real paper panel regression in the already claimed cash-paper-ui.test.js: empty report, explicit store A/B, no discovery/AI on mount, authenticated correct-store request, reset on selection, nonempty report with one panel and zero writes. Actual local parent+panel2PASS/0FAIL/0SKIP. Expanded actual local paper/chat/handoff/twin regressions49PASS/0FAIL/3nativePGSKIP, including actual existing N40 navigation/selection parent flows; Node20 Work-safe frontend build PASS. Corrected exact full source CI still REQUIRED. No real/LAB/provider/financial action or manual PASS.

Shared documentation is published separately through3175, preserving latest camera/scanner claim3174/main231f4a3f and other owners. After its green merge3170 will adopt main documentation unchanged and carry only its eighteen bounded runtime/test paths; future unrelated PDF updates then do not force repeated source conflicts. Reading remains NOT INSTALLED/AWAITING LAB; whole workflow OPEN, same owner retained. No automatic dispatch or mail. Checkpoint CHECKPOINTS/CHANGES/2026-10-26-cash-paper-reading.md.

01Nov2026 00:56Athens — NODE-SECURITY-20261028 / AUTHORIZED WINDOW HOLD / NO PRODUCTION CHANGE

Retained owner fix/node-security-20261028; approved after-midnight window checked, not awaiting user approval. PR3293 remains DRAFT/UNMERGED exactdb9b43d/all5original workflows SUCCESS. Current live dep-dbj6v68ae00c73dcnih0/exact8e1128e6 independently HTTP200/oktrue; native deployment log31Oct22:46:07UTC still selects Node20.20.2 via NODE_VERSION. No env/hook/restart/source merge/SQL/business/provider/physical action.

BLOCKER: official Render MCP source746a3175/pkg/service/tools.go:859-866 updates env then calls TriggerDeploy; available tool has no SAVE-ONLY flag. Do not call it and create an unguarded/duplicate release. Supported rollback operation and retained-artifact availability are not verified from this executor. Main advanced to47f59e6 (new owner action-rights source), fullCI41250164005 IN_PROGRESS at observation; historical4634+8/0/0 does not validate this combined Node22 tree. No current FTEXT outage established; latest engineering release/packagev6 has physical acceptance OPEN, normal-sale USER PASS preserved. Six recent module-disabled errors are not Node exploit evidence. No whole security/physical LAB/manual PASS;8HIGH local dependency entries and other LAB/backup CA/Python residuals remain separate OPEN.

Full evidence/limits and protected state: CHECKPOINTS/CHANGES/2026-10-28-node-security.md and CHECKPOINTS/EVIDENCE/node-security-20261101/window-hold.md. Single next: documented authenticated SAVE-ONLY env path + verified rollback, then refreshed exact Node22 PR/current-main checks and exactly one guarded release after successful full merged-main CI. One-time task paused; approval/owner retained. Keep peer PDF/manual and assignments unchanged while OPEN; no numbered closure.

29Oct2026 — NODE-SECURITY-20261028 / EXACT PR CI VERIFIED / PRODUCTION HOLD

Retained owner fix/node-security-20261028. Before-source claim3264/fc9f4cac CI40959960348 SUCCESS merged9ffd833e before code. Runtime source PR3293 exact headdb9b43ddec41939e75bdf0bdd2575c3ff517f181 remains DRAFT/UNMERGED. This supersedes historical NO SOURCE YET only for candidate availability; production upgrade and whole security acceptance remain OPEN. No transfer of any business owner.

Candidate centralizes Node22.23.4 in .node-version, root minimum engine, Render Blueprint, all8 explicit setup-node steps and wholesale Docker base, with CI runtime-policy/native image and separate server/client PDF smoke. No dependency declaration, app/business source, DB schema, auth/licensing/tenant, POS/OCR/payment/stock/fiscal, startup command or deployment safeguard changed. Generated build patches were deliberately excluded from the source diff.

All5 exact-head workflows SUCCESS: full CI40960756919/job123753006480:4634serverPASS/0FAIL/0SKIP plus8backupPASS/0FAIL/0SKIP. Runtime policy and actual native Sharp/PDF/generated Prisma smoke PASS on22.23.4; full client/build/contracts/native PostgreSQL/archive/browser/real HTTP payment-shift, AI-reader supplier-payment, permission/tenant, multi-POS, stock/online/Netlink/close/shutdown/capacity flows passed. Isolated wholesale Docker/Chromium job123753006629 SUCCESS including real built offline recovery and once-only synthetic SQL order; image node22.23.4-bookworm digest18a6d90fd60542269850c80ca03b29b1d9b14d6b221ac7ee8e35b0d33ef904bd. Wallet40960756915/job123752573291:7/7PASS0SKIP; ftext40960756879/job123752574196:28/28PASS0SKIP; PG18 provisioning40960756945/job123752572649:12/12PASS0SKIP. iOS40960756928/job123752573711 SUCCESS: actual simulator/native unit/UI/H264+AAC, existing Node22 server MP4 validation, and unsigned iPhone archive. Not physical-device or installable-IPA acceptance. Exact receipts under CHECKPOINTS/EVIDENCE/node-security-20261029/ci-validation.json; source PR retains raw local evidence and dependency audit. Local4413/4110PASS/0FAIL/303SKIP remains separate historical evidence; CI native execution supersedes its infrastructure gap for the tested head only. POS visual LAB build also passed locally on22.23.4. No new actual business LAB/manual PASS or old transaction replay.

Security boundary: production read-only29Oct build21:13:26.928695949UTC still selected20.20.2, live dep-dbhrdougekts73c4u4fg/revisionce5ec3a6b37c3844aa57298a88a787ed05ec1def at observation. Existing live NODE_VERSION20 overrides repo files; changing YAML alone cannot verify deployment. No production env update/hook/restart/source merge/business mutation by this work. After explicit approval, verify current controls, coordinate only NODE_VERSION22.23.4 with the existing guarded release, require green exact merged-main CI, and independently confirm exact live revision/runtime; main has concurrent owners' later changes, so prior PR CI is not their merged-main runtime proof. Preserve rollback evidence and all safeguards.

Eight HIGH entries in the fresh LOCAL dependency audit remain OPEN,0critical: Nodemailer7.0.13, client PDF.js5.7.284, Sharp0.34.5, SheetJS0.18.5, Zod3.25.76 and Prisma6.19.3/config/deepmerge7.1.5 chain. These are known upstream affected-version findings, not eight demonstrated application exploits or proof of production dependency identity. Server PDF.js is separately pinned4.10.38; do not transfer the client5.x finding to it. Relevant image/PDF input and SMTP code paths were identified, but exact exploit preconditions remain unverified. No audit fix or major dependency upgrade included; Node mitigation is not overall security closure. Backup Docker/CA/Python and other hosted branches/services remain separate NOT TESTED/remediation scopes. Actual production compromised-certificate rejection, physical LAB devices and real OCR recognition/accuracy on22 remain NOT TESTED.

Single next action: present the tested candidate for explicit production approval, including separate live NODE_VERSION update and exact-main guarded verification. Keep source PR3293 held until then; do not redevelop the completed runtime candidate or replay accepted invoices/payments for documentation. This is engineering CI VERIFIED/AWAITING RELEASE, not a whole security or functional LAB PASS. Preserve latest shared central PDF; no PASS/manual closure is claimed by this documentation receipt.

2026-10-28T19:23:32+02:00 — NODE-SECURITY-20261028 / ASSIGNED BEFORE SOURCE / NOT TESTED

Owner fix/node-security-20261028. User explicitly requested runtime-security verification, controlled GitHub correction and CI/LAB compatibility, and forbids production deployment before successful checks and approval. Independent runtime/configuration scope; no transfer of POS/OCR, wallet, lifecycle, cash, supplier, fiscal or other retained implementation owners.

Read-only evidence: production service srv-d9isenfavr4c73bdh52g / workspace tea-d9ie26vaqgkc739uudqg, live deploy dep-dbh2o56k1f9s73dmtfp0 / revision ac5850c0d9c5e5b170500badded0a9cb10537b19. Build log 28Oct17:09:53UTC records Node20.20.2 via NODE_VERSION; independent HTTP health returned oktrue and the same revision. This is active native-deploy evidence, not a direct process.version shell measurement. Render autoDeploy off; existing GitHub main-success workflow CAN deploy source after merge. No production actions authorized by this claim.

Render email27Oct and https://render.com/docs/advisory-emudhra require22.23.4/24.22.1/26.12.1 or later same-major. Node20 is EOL/unpatched for compromised eMudhra CA. Official Node advisory https://nodejs.org/en/blog/vulnerability/october-2026-security-releases confirms public TLS/DNS/Brotli vulnerabilities; application exploitability/compromise NOT CONFIRMED. No direct PHP, TLS-verification-disable, custom CA, Brotli decoder or dns.resolve use found in first-party server/client/ops search; transitive paths and actual CA rejection remain NOT TESTED. No claim that absence of direct use proves safety.

Bounded future source: root engines and a shared Node version file; render.yaml NODE_VERSION; existing explicit setup-node pins across CI/recovery/iOS/POS-LAB workflows; wholesale Docker Node base; AGENTS runtime instruction only; new runtime-policy verification and isolated compatibility smoke test if needed. Target22.23.4 as nearest maintained patched major. Preserve every workflow trigger/permission/deploy guard, startup/build command, dependency version, POS/OCR/payment/stock/fiscal/auth/tenant behavior. No backup Docker/source edit (would auto-deploy cron); audit its CA/Python dependencies separately and record residual, never claim patched from a Node upgrade.

Required: full production build including Prisma/sharp/PDF client/server, full existing server/native PostgreSQL/HTTP POS and invoice-reader E2E, isolated wholesale/browser LAB, wallet/ftext recovery and PG18 automation checks on target runtime. CI PASS is not actual business LAB PASS. Native offline/media/OCR smoke and read-only certificate validation use synthetic fixtures only, no real invoice replay/provider call/payment/stock/fiscal/production DB mutation. Before any real business LAB action require identified synthetic fixture and fresh before/after/control evidence. Source PR stays UNMERGED pending successful exact CI and user approval because merging source can deploy. Hosted LAB Node22 and actual runtime CA rejection remain NOT TESTED until separately verified.

Claim-only docs: no runtime source/configuration change, no deployment or business action. Current main a474c553 includes latest cash LAB baseline; all its evidence and owners preserved. Read deployment/POS/invoice manuals and startup-preparation checkpoint; preserve accepted original-draft/payment/stock/tenant and prepared-artifact contracts. Single next action: green applicable claim CI and docs-only merge, then bounded source candidate/CI. Checkpoint CHECKPOINTS/CHANGES/2026-10-28-node-security.md.

28Oct reconciliation: first claim head b3122a306358d12776d39fca6b5eb3b0125b3114 CI40735760749 SUCCESS. Concurrent cash acceptance and invoice-email-preview source/receipt moved main to e3e175a143855a3b691fbff3abcd6af49ad2e2d8; the initial merge was correctly refused for conflicts. Reapply only this independent claim over that main, preserve every current record and regenerate the tracker PDF. No source or LAB action before merged claim. Earlier local Node22 full suite on ac5850c:4339tests /4042PASS /0FAIL /297explicit infrastructureSKIP; Prisma6.19.3 generation and Sharp0.34.5 load succeeded. These do not certify the newer email source or native/hosted LAB. npm audit of that fresh local resolution reports8HIGH packages, no critical; save separately as inherited dependency findings, not proven production exploitability. No npm audit fix or manifest/dependency version update. Latest main requires a new exact-source Node22 build/CI.

29Oct2026 — CLAIM RECONCILED OVER CURRENT MAIN / NO SOURCE YET

Retained owner fix/node-security-20261028. Baseline69198a7c2d1b41d1d1dd24ddccf9cfb958dee8fa includes newer POS/scanner/Android/wallet/automatic-result claims; all retained unchanged. Claim PR3264 original green CI40735760749 remains historical; new combined documentation needs its own green checks. Original claim was not merged and no runtime change has been made. Append this record to reduce concurrent prepend conflicts. Regenerate full tracker to a scoped claim snapshot; preserve latest shared central PDF rather than repeatedly overwrite another owner's changing PDF. No completion/manual PASS. Node22 prior4042/0/297 result is historical only; exact current source needs new full CI/native/LAB. Production remains unmodified by this task.

31/10/2026 — CASH-CONTINUATION-14 / HISTORICAL CLAIM - SUPERSEDED BY LIMITED PASS

Same retained cash owner codex/cash-chat-reconciliation-20261026, branch fix/cash-automatic-continuation-20261031. User requests continuation after accepted Excel download3331. Read-only source finds CHECKPOINT apply still treats every unreviewed row as pending, including current automatically calculated rows accepted by source3284. The panel similarly seeds false manual-review pending notes. This is a bounded causal continuation correction, not whole issue persistence/closure.

After this claim green/main ONLY: server/src/services/cash-automatic-result.js add one reusable current cash-result eligibility predicate; server/src/services/cash-reconciliation-repository.js CHECKPOINT earliest-pending fence/proof use it, retaining reportHash/head/generation/replay/date/scope and history guards; client/src/components/shared/CashReconciliationPanel.jsx omit server-calculated rows from default generic review notes, preserving explicit stored pendingNotes and manual-reviewed flags. No automatic review, issue closure, financial/config/schema/permission/email action. Last shift, incomplete/contradictory/unknown-identity or bad-handoff rows remain pending. Document/card/Netlink questions and saved notes are independent and unchanged.

Tests: existing server/test/cash-automatic-result.test.js, cash-reconciliation-ui.test.js and cash-reconciliation-postgres.test.js only, covering actual registered/mounted continuation, forged flags, next-day advancement after current automatic arithmetic, last-shift hold, stale report/head/generation, once-only audit replay and unchanged original/control finance. Exact full/native PR/main CI and ordinary healthy release before scoped LAB metadata-only checkpoint, with baseline published before action. No existing financial transaction replay. Previous read/copy/preview/download PASS retained; broader provider proof, per-issue replies/closure and real delivery remain OPEN. Next action implement ONLY after this claim green/main. Checkpoint CHECKPOINTS/CHANGES/2026-10-31-cash-automatic-continuation.md.

31/10/2026 — CASH-ISSUE-REPLIES-15 / ASSIGNED BEFORE SOURCE / NOT IMPLEMENTED

Retained cash owner codex/cash-chat-reconciliation-20261026, branch feat/cash-issue-replies-20261031. Owner requests the next scoped implementation after the measured continuation PASS3347. First useful slice: replies, explicit reviewed close and reopen for individual original expense-document findings. Other automatic cash/handoff/card/Netlink questions are not silently made closeable. No issue is matched by equal amount/time or inferred identity; selected original transaction/session/store and current evidence bind every action.

Reuse the existing append-only CASH_RECONCILIATION audit chain, store lock, request replay, head, report snapshot, generation and existing writer authorization. One new ISSUE review action carries issue/session identity, current source/evidence fingerprint, exact current reportHash, OPEN/CLOSED decision, explicit reviewed:true and10–1000character note. Current original expense findings gain additive transactionId/evidenceHash. No schema/table/migration, financial writer, CONFIRM, OFFSET, signature, money/stock/fiscal/settings/SMTP or role widening. Closure settles only the tracked question; original finding/amount and all cash/card results remain visible and unchanged. Later source changes make prior closure RECHECK_REQUIRED; vanished/changed findings retain read-only historical reply with old identity and are never automatically cleared. Reopening appends history; nothing is deleted.

Bounded runtime paths after this exact claim green/main: NEW server/src/services/cash-issue-replies.js (pure bounded question projection and strict public schema/validation); existing cash-reconciliation-source.js (add only original expense ID/hash), cash-reconciliation-contract.js (strict ISSUE schema), cash-reconciliation-repository.js (only ISSUE current selected finding/proof gate through existing audit writer), cash-reconciliation-report.js (same issue annotation/canonical text and snapshot binding), cash-reviewed-automatic-contract.js (strict optional safe issue metadata and additive expense ID/hash), cash-reviewed-archive.js (same open/closed issue text and separate reply worksheet), routes/cash-reconciliation.js (localized issue errors only), client/src/components/shared/CashReconciliationPanel.jsx (current question list, explicit OPEN/CLOSED reply in existing one-shot form/history). Unknown/unbound legacy findings stay visible but cannot accept guessed replies. Bound500questions; incomplete registry is explicit/read-only and does not turn unknown source into zero or suppress original numeric report.

Tests only: NEW server/test/cash-issue-replies.test.js; existing cash-reconciliation-postgres.test.js and cash-reconciliation-ui.test.js plus cash-reviewed-automatic.test.js/cash-reviewed-archive.test.js only if required for strict-boundary regressions. Require real native original source+mounted HTTP OPEN→CLOSED→OPEN, current evidence/source/head/hash/generation/foreign-ID denial, lost reply replay/concurrency, original/manual/automatic cash and control byte equality, escaping and same report/copy/XLSX/strict DTO. Existing accepted manual/offset/continuation/last-shift/identity/delivery/role/lifecycle and native restore guards remain protected. Full exact PR/main/native CI and ordinary guarded exact healthy release before any scoped LAB metadata-only acceptance. Fresh before/after baseline before each state change. Never replay a financial movement or accepted checkpoint. New source/hosted issue lifecycle NOT TESTED. Whole provider/real-store/email/per-other-category closure remains OPEN.

Checkpoint CHECKPOINTS/CHANGES/2026-10-31-cash-issue-replies.md. Next action only after this claim green/main: implement this bounded expense-document question lifecycle and actual current-source mutation tests.

31/10/2026 — CASH-ISSUE-REPLIES-15 / SOURCE CANDIDATE / AWAITING FULL NATIVE CI AND LAB

Claim3352 merged e30f8dfcd92b504de22820ef1c9176f7192f8f69 after green docs CI41196287570 before source. Same retained cash owner codex/cash-chat-reconciliation-20261026, branch feat/cash-issue-replies-20261031. Bounded source now implements original transaction-bound expense-document questions, reviewed OPEN/CLOSED replies and append-only reopening. Current evidence/source/report/head/generation gate every action. Source changes require RECHECK_REQUIRED; vanished original findings retain historical replies read-only. No financial/manual confirmation or offset is inferred. Original finding and numeric cash/card results remain visible; copy/strict DTO/Excel reflect the same current status and latest answer, with a separate reply worksheet and full audit pagination.

Local Node20.20.2 verification: cash suite181 tests,171 PASS/0FAIL/10SKIP (native isolated DB cases unavailable locally); focused issue+mounted UI12/12 PASS, including lost POST response recovery without replay, same amount/time separate transaction IDs, close/reopen, stale evidence, vanished finding, bounded registry, malformed proof/DTO denial and escaped strings. Frontend build PASS (existing chunk-size warning). Native real PostgreSQL+registered HTTP concurrent once-only OPEN/CLOSED/OPEN, generation/source/foreign-store/role denials, immutable original finance/control and zero CashControlReview assertions added; execution NOT TESTED locally, mandatory in full CI. No hosted issue action, production data write, seed, migration, email or financial replay performed.

Implementation remains AWAITING exact full/native PR CI, green combined main and ordinary guarded healthy release, then fresh published baseline and bounded existing synthetic expense issue LAB acceptance. CI alone is never LAB PASS. Prior continuation PASS3347 and automatic/source/archive PASS remain protected. Other issue categories, provider-original, real-store and email acceptance remain OPEN. Next action: publish candidate PR and inspect full native CI before any merge/release/LAB action.

31/10/2026 — CASH-ISSUE-REPLIES-15 / EXACT SOURCE CI PASS / INTEGRATION RECHECK

PR3355 source6041e365dfa344e1632e82c97c97a36cc025e78f full CI41197317276/job124526215918 passed4848server+8backup/0FAIL/0SKIP; all5jobs SUCCESS. Native original expense+HTTP concurrent lifecycle case786 executed PASS. Full local server4216PASS/0FAIL/316infrastructureSKIP and client build PASS. Merge was rejected after concurrent main670210bce updates; preserve all peer records/source and regenerate the shared tracker PDF from combined text. Source issue runtime blobs unchanged. Exact integrated PR/main CI and ordinary guarded healthy release still required. No hosted issue mutation; AWAITING LAB, same retained owner. Next: integrated CI/release, then fresh existing synthetic LAB baseline.

31/10/2026 — CASH-ISSUE-REPLIES-15 / LIMITED LAB PASS / BROADER CASH OPEN

CASH-ISSUE-REPLIES-15: LIMITED LAB PASS for existing synthetic expense-document question replies, explicit close and reopen. Retained owner codex/cash-chat-reconciliation-20261026; source PR3355 final1f747d9753ead30e9fe903e579f6f11f5cd14d9e full CI41198151712:4851server+8backup/0FAIL/0SKIP, merged46814d0f241a41cb08f4ef6d1e721b38b9c99a34. Combined exact main42ae4a3db371943fb0109aa815fac8a1b6bd9f33 full CI41199931951/job124534437975:4862server+8backup/0FAIL/0SKIP, native original expense/HTTP lifecycle case792 PASS. Ordinary guarded deploy41201059265/job124536843141 pinned12:26:59.753UTC, exact healthy12:32:24.574UTC; independent browser health still exact42ae4a3 after acceptance. All9cash runtime blobs unchanged through later peer integrations. Baseline PR3364 green docs CI41201972192 merged1f1bd30af9063fdf87ca52bccc3da336c943635b before the first issue write.

Actual authenticated Platform SuperAdmin/cloud Chrome, MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ,11Oct2026, LAB-POS-02 / Εργαστήριο Χειριστής1: only existing3EUR payment pay_7d8f71760d7571fb1c9f00f8ae88a9547bec264c73357d52a33833c964192012 in session88e654a5-9cf6-47da-bcb7-b4e16b1744ca, question8eaf5babaaa62ca83748644c119facc91ed79f276953a1f60086f31225af3f0b. Fresh published baseline plus each before/after recorded below. One OPEN reply12:40:16.650UTC, explicit CLOSED12:42:59.762UTC, OPEN reopen12:47:04.726UTC. History1→2→3→4 contains the old accepted CHECKPOINT plus exactly3ISSUE replies; target0→1→2→3replies. Final question remains OPEN, closure retained in history. Refresh, panel close/reopen, period/store navigation and final reread preserve state/note. Other100/20EUR questions remain OPEN/0replies, not bulk-settled.

Four actual valid7-sheet XLSX snapshots and copied canonical text agree. The3present original/manual numeric sheets are value-identical throughout: original cash/card variances0, no offsets/manual approvals,3shifts still pending; automatic-result worksheets are absent for this unresolved sample, not claimed numerically tested. Only the chosen3EUR expense pending row disappears while CLOSED and returns on reopening (pending sheet17→17→16→17rows including header). Original3EUR missing-document fact stays visible even when the question is closed. Same-store MAIN row3953929c is unchanged. N40 same11Oct remains0closed rows/variance/questions/history with exact same canonical text and no LAB note. The27Oct automatic zero-result/28Oct continuation/open note is byte-identical to the accepted continuation report; no accepted checkpoint was replayed.

Artifact availability remains OPEN, product cause UNESTABLISHED: three first download paths were unavailable in the evidence host; for the final first download the browser itself reported44753bytes before the file later became unavailable. Single read-only re-exports yielded44717/44574/44753byte valid files. No ISSUE action was repeated. This is content/status consistency PASS on retrieved workbooks, not universal first-download, file-transfer, native Excel visual or all-device PASS. No download code changed. Do not infer a product bug or apply a speculative cleanup/timing change without controlled reproduction.

Evidence CHECKPOINTS/EVIDENCE/cash-issue-replies-20261031 (baseline, each action report/metadata, workbook comparison, history, closed/reopened screenshots, unchanged control and protected continuation). No sale/payment/stock/fiscal/CONFIRM/OFFSET/new checkpoint/settings/role/provider-reading/email action; raw DB counts, stock/IRIS/physical balances NOT MEASURED, not inferred zero. Owner/other-device/source-change/lost-response/large-registry negative hosted matrices NOT TESTED (native/contract coverage remains separate). This supersedes older NOT IMPLEMENTED/AWAITING LAB for this expense-question lifecycle only. Whole cash/numbered item remains OPEN for other categories, provider originals/safe/refill, real-store and email acceptance. Same retained owner; no release or parallel transfer. Single next action: read-only controlled download/artifact availability diagnosis using the current stored report; claim any source extension before code, no issue or financial replay. Manual docs/manual/cash-control/PASS.md, pending/tracker and tracker PDF synchronized in this receipt.

31/10/2026 — CASH-DOWNLOAD-RECHECK / LIMITED READ-ONLY SUCCESS / ROOT CAUSE OPEN

Retained owner codex/cash-chat-reconciliation-20261026; documentation branch docs/cash-download-recheck-20261031. Actual prior-turn export read2026-10-31T13:35:58.631Z (15:35:58Athens), authenticated Platform SuperAdmin/cloud Chrome, synthetic MYWORKSTATION LAB/11Oct only. One read-only Excel export returned44753bytes in browser AND synchronized evidence host; ZIP integrity passed,16entries/7worksheets. A later browser stat and separate later host stat still returned44753bytes. All6 content worksheets exactly equal the earlier accepted reopened snapshot: original/manual numeric sheets, issue replies, pending rows and canonical report. Metadata retains report8d7d04e68dca97c76e08ca57bfba161487d50a9be37217dd3349926d9f085338, preview5ec95d7cc4f2a7a2904a9caca9298905f403aab7c559ded4b423d2a34f52204e, audithead54a5c83fce4727bf599283626ad43c40bf2e6db2ba7854da5b80c11ce3e441e8 and generation0; the export read time is newer. UI still showed history4 and selected3EUR question OPEN/3replies. No ISSUE, financial, continuation, provider, settings or email replay.

This is a successful bounded completed-download/content/availability observation, not an established repair. Earlier3missing artifacts remain real historical failures; product/transfer root cause remains

UNESTABLISHED. Immediate URL revocation in the existing helper is only a hypothesis and was not changed. Current runtime revision was not independently recorded for this recheck; do not substitute latest main or an older health observation. Original temporary workbook bytes were subsequently removed by workspace maintenance; the receipt records prior actual tool results, no replacement binary or invented hash. Evidence CHECKPOINTS/EVIDENCE/cash-issue-replies-20261031/download-recheck.json. Native Excel visual/all-device/first-download reliability and physical/DB balances remain NOT TESTED.

Read-only current-main coverage review: cash-issue-replies.js restricts replies to4original expense-document codes. cash-automatic-audit.js emits separate PREVIOUS_HANDOFF_MISMATCH/NEXT_HANDOFF_MISMATCH/SAFE_MOVEMENT_REQUIRES_DOCUMENT (plus source/IRIS/last-shift conditions), not replyable expense issues. Closing an expense question cannot clear those independent audit findings or assign liability. No runtime/test path edited. Next single action: specify and publish a bounded before-source claim for original adjacent-handoff questions, preserving both original shift identities, source freshness, append-only history, no automatic offset/employee netting and all existing expense/continuation PASS; safe/refill/provider originals and actual email stay separate OPEN. Same owner retained; broader cash is OPEN, no parallel transfer.

31/10/2026 — CASH-HANDOFF-ISSUES-16 / SAME OWNER / ASSIGNED BEFORE SOURCE

Retained cash owner codex/cash-chat-reconciliation-20261026; branch feat/cash-handoff-issues-20261031. Owner explicitly started the next adjacent-handoff reply slice after Excel recheck3391/main4c3f1b5. This claim must be green/main BEFORE any runtime/test edit. Current source review: expense replies support only4document codes; PREVIOUS/NEXT_HANDOFF mismatches remain independent arithmetic evidence. No second ownership, source replay or speculative download change.

Bounded implementation: one question per ordered original adjacent CLOSED pair in the same current company/store/exact terminal and FULL/carryOver rule, selected period touching at least one half. Require actual chronological immediate linkage and available unequal previous closing/next opening integer cents; never derive a question from equal amount, employee name, missing/open/foreign/delivery-other-chain sessions. Bind stable identity to store+both original session IDs; fingerprint includes both current source hashes AND original handoff values/times/rule. One pair appears once even when both halves are selected. Changed source requires RECHECK_REQUIRED; vanished/nonadjacent pair retains old replies read-only. Existing store lock/lifecycle/audit-head/UUID-replay append-only writer, current DB role/license/tenant admission reused unchanged. No new schema/writer or internal metadata hidden in expense transaction IDs.

Separate optional handoffRegister and HANDOFF_ISSUE action preserve existing expense DTO/history. Explicit OPEN/CLOSED with10..1000character note and reviewed checkbox; full history keeps reply/close/reopen. Current report/head/generation/pair fingerprint required. Mounted selected-store UI and copy/strict automatic DTO/XLSX carry the same pair/status/latest reply. A CLOSED reply only closes that documentary question: original handoff mismatch remains visible, employee/cash/card/automatic arithmetic and pending finality remain unchanged, no automatic offset/confirmation/debt or false last-shift completion. Existing OFFSET remains separately reviewed and unchanged. No broadening provider/safe/refill/IRIS/email/scheduling scope.

Exact runtime scope after this claim merges: NEW server/src/services/cash-handoff-issues.js; existing server/src/services/cash-reconciliation-contract.js (new strict action only), cash-reconciliation-report.js (separate register/hash/text only), cash-reconciliation-repository.js (current-pair proof and existing append-only application/history only), cash-reviewed-automatic-contract.js (optional strict register only), cash-reviewed-archive.js (separate pair-answer worksheet only), server/src/routes/cash-reconciliation.js (localized error only), client/src/components/shared/CashReconciliationPanel.jsx (explicit pair selection/reply and history only). Exact tests: NEW server/test/cash-handoff-issues.test.js, existing server/test/cash-reconciliation-postgres.test.js and cash-reconciliation-ui.test.js; existing cash-reviewed-archive*.test.js only targeted pair/export regression if needed. Do not edit source-query/auth/license/lifecycle/financial/provider/invoice/stock/fiscal writers or retained peer modules.

Required verification: actual pair dedup across selected/context halves and period boundary, same amounts on different pairs, strict forged DTO/history/source/rule/changed amount/vanished-pair fences; explicit close/reopen no financial/automatic result changes; large registry bounded; lost response and stale store UI, real isolated PostgreSQL+registered HTTP concurrency/once-only/replay/foreign role/tenant/generation/stale-half refusal with original/control finance hashes. Exact full native PR/main CI and normal guarded healthy installation before hosted action. Fresh published baseline before each synthetic LAB metadata action; no accepted expense reply/continuation/financial replay. Existing accepted11Oct pair may be used only after read-only verification identifies both original halves and unchanged control. No real-store action/email/provider-reading. Implementation NOT STARTED, LAB NOT TESTED; no new manual PASS. Prior limited expense/automatic/continuation/Excel PASS protected. Broader cash stays OPEN. Single next action: green/main this claim, then implement only these exact paths.

31/10/2026 — CASH-HANDOFF-ISSUES-16 / SOURCE CANDIDATE / AWAITING EXACT NATIVE CI AND LAB

Same retained owner codex/cash-chat-reconciliation-20261026, source feat/cash-handoff-issues-20261031. Claim3392/head1d1ba613f22921efa45446e428dcc454815f720d passed docsCI41226856849 and merged9dab21db25f93052c13bcb5a1499d44cfa1ce337 BEFORE runtime/test edits. Preserved concurrent keyboard/source/main6e8c957 and all prior expense/automatic/continuation/Excel limited PASS. Public repository publication was explicitly authorized in this conversation; no repository visibility changed.

Implemented separate optional handoffRegister/HANDOFF_ISSUE, one stable original ordered adjacent closed pair, both source hashes + original closing/opening/time/rule fingerprint, selected-period boundary dedup, explicit OPEN/CLOSED/reopen and retained read-only vanished/stale history. Existing scoped store/lifecycle lock, audit-head and UUID payload replay fencing reused. UI selects both original IDs, defaults current CLOSED without implicit reopening, requires note/checkbox, recovers lost response by GET and never auto-reposts. Common copy/strict automatic DTO and separate XLSX pair-answer sheet agree; raw mismatch/pending sheets, cash/cards/calculated results, original expense replies and existing OFFSET remain unchanged. No financial/stock/fiscal/provider/email/real-store action or schema/auth/licence change.

Actual local Node20.20.2: cash regression190tests/179PASS/0FAIL/11native-infrastructureSKIP; new7pure pair/limit/DTO/XLSX cases and mounted pair lifecycle PASS; Work-safe frontend build PASS (existing chunk warning). New actual PostgreSQL+registered HTTP fixture covers concurrent once-only reply, unchanged payload replay, changed-payload rejection, OPEN/CLOSED/OPEN, each stale half, foreign store/current role/generation/maintenance denial and identical original/control financial rows; NOT EXECUTED locally, must pass unskipped in full exact CI. Full local suite in progress at source publication; any result is engineering evidence only. No hosted write, no new manual entry or LAB PASS. Source NOT INSTALLED/AWAITING LAB. Single next action: exact full/native PR CI, green merge/main and ordinary guarded exact healthy release, then a freshly published existing synthetic pair baseline before any one-shot metadata acceptance.

31/10/2026 — CASH-HANDOFF-ISSUES-16 / EXACT SOURCE CI PASS / SHARED DOC RECONCILIATION

Retained owner codex/cash-chat-reconciliation-20261026. Source3395/head9045cf08bac071fbdaebc469c7a08a82662033b5 fullCI41227544418 all5jobsSUCCESS; actual build job124615013616 logs4905server+8backupPASS/0FAIL/0SKIP. Native original handoff registered-HTTP lifecycle case819 executed PASS: concurrent once-only reply, stable UUID replay, changed payload and each stale-half refusal, OPEN/CLOSED/OPEN, current role/tenant/generation/maintenance fences and identical original/control finance. Full local Node20 suite completed4268PASS/0FAIL/320infrastructureSKIP; cash179/0/11 and Work build PASS. This supersedes the earlier in-progress local-suite note.

Normal merge refused405 after concurrent monthly-runner docs3394/main375372a; no guard bypass or forced merge. All11owned runtime/test blobs remain unchanged. Publish combined shared records/PDF separately, preserving the monthly owner and all existing cash PASS; source3395 then adopts those exact main documents and carries only the11bounded runtime/test paths. Exact integrated full/native PR/main CI and ordinary guarded healthy release still required. No hosted handoff metadata, finance/stock/fiscal/provider/email action; NOT INSTALLED/AWAITING LAB. Same owner and broader cash OPEN. Single next action: green/main shared docs, integrate source-only3395 and inspect its exact full CI before installation.

31/10/2026 - CASH-HANDOFF-ISSUES-16 / INSTALLED / PUBLISHED BEFORE-ACTION LAB BASELINE

Retained owner codex/cash-chat-reconciliation-20261026; docs/cash-handoff-lab-baseline-20261031. Supersedes prior NOT INSTALLED/source-candidate next actions, without claiming hosted PASS. Claim3392/main9dab21db preceded source. Source3395/head0ff18430eaf236a8994f133769a9d12bd6a36591 passed fullCI41228995265 (4905server+8backup/0FAIL/0SKIP, native819) and merged e5063cf531e94269087cee1950bf6907f9729c2f. Exact combined main d6aac017544e993919af9f56ee84c4579ca6f0b1 passed manually dispatched fullCI41233152725/job124631582221:4939server+8backup/0FAIL/0SKIP, native handoff833 PASS, all5jobsSUCCESS. Ordinary Deploy workflow41234705574/job124635972199 succeeded19:34:06UTC with guard 'Revision is already healthy or superseded'; no new trigger by this run. Independent /api/health reload confirmed ok:true and exact d6aac revision19:36UTC. Earlier installation origin not independently identified; no invented trigger receipt. All11owned runtime/test blobs unchanged through the accepted combined main. Preserve subsequent peer records/source; no rollback or guard bypass.

Fresh read-only baseline export19:39:39.837UTC (21:39Athens),31Oct2026, cloud Chrome desktop, authenticated Platform SuperAdmin. Synthetic MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ,11Oct2026/full day only. Actual first completed XLSX50083bytes,8sheets, ZIP/formula checks PASS; SHA25686c706399da73d97c2fd7dccb49e932c2f02aa4f36025bb32df60972a5ab88c7. Canonical copied report exactly equals workbook report. Separate pair-answer sheet2questions; original/pending/expense sheets preserved as before comparison source. N40CONTROL20261010/11Oct:0rows/history and no LAB notes. Protected LAB27Oct canonical report byte-identical to accepted continuation evidence: resume28Oct/open note unchanged. Evidence CHECKPOINTS/EVIDENCE/cash-handoff-issues-20261031/{ci.json,before.json,before.xlsx,before-report.txt,before-pair-ui.json,before.jpg,control-before.txt,protected-before.txt}. Screenshot captured after selecting the form; final selection must be freshly confirmed before submission. Prior intermittent download root cause remains UNESTABLISHED; this successful download does not establish universal reliability.

Hosted HANDOFF_ISSUE actions0; LAB acceptance NOT TESTED. Publish this baseline green/main BEFORE first write. Then refresh/record current source before EACH one-shot metadata action on target119 only: OPEN reply, explicit CLOSED, explicit OPEN reopen; expected history4->5->6->7 and target0->1->2->3.

Retain both original halves/amounts/raw arithmetic/pending/manual numeric/expense sheets, other123question0, N40isolation and27Oct continuation; CLOSED is documentary only, no offset, physical agreement or financial approval. Capture fresh copy/XLSX after each action and one combined final checkpoint/manual/pending/tracker/PDF PASS closure. No financial/stock/fiscal/provider/email/settings/roles/real-store action, no accepted expense or CHECKPOINT replay. Raw DB counts, physical balances, stock/IRIS and other devices/roles remain NOT MEASURED/NOT TESTED. Broader cash OPEN, same owner; no parallel handoff.

31/10/2026 - CASH-HANDOFF-ISSUES-16 / LIMITED HOSTED LAB PASS / COMPLETED

Same retained cash owner codex/cash-chat-reconciliation-20261026, closure docs/cash-handoff-lab-pass-20261031. This is the authoritative status for the bounded adjacent-pair reply slice; earlier source-candidate/NOT INSTALLED/AWAITING LAB entries are historical. Source3395 merged e5063cf5 after full integrated4905server+8backup/0FAIL/0SKIP/native819. Combined d6aac fullCI41233152725/job124631582221:4939+8/0/0/native833/all5SUCCESS. Ordinary guarded Deploy41234705574/job124635972199 succeeded with 'Revision is already healthy or superseded'; it did not issue a new trigger. Independently healthy exact d6aac was observed before acceptance. Baseline3405/head7b2c53dc017569163800d4043d18d011a9527a2a/docsCI41236159703 (3SUCCESS/2correct runtimeSKIP) merged e4fb9c0130ac36a38d330b0ef61f58a1e9925ccf BEFORE any HANDOFF_ISSUE write. During shared-main progress, final independent health returned ok:true/a71c80c33f7dcd45f78fa2b253d7baab24b5e428; its fullCI41235058707/job124637218467 also4939+8/0/0/native833/all5SUCCESS. All11cash runtime/test blobs independently match accepted d6aac. Exact installation transition time/origin between observations was not measured; no invented pinned-trigger receipt, guard bypass or rollback.

Actual hosted metadata actions31Oct19:53-19:55UTC (21:53-21:55Athens), followed by read-only control checks, authenticated Platform SuperAdmin/cloud Chrome desktop, synthetic MYWORKSTATION LAB / ΕΡΓΑΣΤΗΡΙΟ ΔΟΚΙΜΩΝ, full11Oct2026 only. Existing exact LAB-POS-02 pair f23ce42c-4ea2-453c-9710-65d09eb90480 (LAB POS2) ->88e654a5-9cf6-47da-bcb7-b4e16b1744ca (Εργαστήριο Χειριστής1), stable question86f3ccf071eefca2f5240bef70b59f16ada41a364da30ec4cc687a1211478c08. Synthetic original closing-119EUR/opening0EUR/difference119EUR retained. One action at a time, fresh UI/actual copy/XLSX baseline before each; no old expense/CHECKPOINT replay. OPEN reply19:53:13.017Z -> target1reply/history5; CLOSED19:54:05.408Z ->2/history6; explicit OPEN reopen19:55:16.278Z ->3/history7. Fresh GET after each, closed-pair selection defaults CLOSED without implicit reopen; final return after N40/store/day navigation retains exact canonical report and all3new history entries, including documentary closure. Empty note/unverified/disabled submit at finish. Other123EUR original pair88e654a5->865e6a48-ccbe-4238-8580-6d70682050a5 remains OPEN0; not settled or bulk-replied.

Actual raw workbooks before/OPEN/CLOSED/reopened:50083/50696/50807/50754bytes. Each ZIP/worksheet/formula check passed; copy exactly equals workbook report. All5protected worksheets (original shifts/employee/day, pending and expense replies) have identical decoded values across4states; original handoff halves/amounts unchanged, other pair row exactly unchanged. Original pending sheet17rows including header throughout,3unreviewed shifts, zero cash/card/offset/remaining report variances; CLOSED did not clear raw handoff mismatches or approve physical cash. Existing expense100/3/20EUR remain OPEN/replies0/3/0, accepted3EUR note unchanged. History4->5->6->7; generation0 throughout. Final reportab992d88baf404de24831d3335b0957a4977a955d8f34f0c1da44b055acdf16c, previewbd3e48acd33c953d8dfc27d13eddab4bc3b793d5b5f3e4d7e1d60792c255fa8b, audithead3be33f89cc62b07a1f9b3183f1f71d54c25763bc41f4aec6f6ec04f0e6688baf. Separate handoff worksheet carries exact both IDs/latest status/note/count; full history retains older closure. Separate N40CONTROL20261010/11Oct remains0rows/history and copied report byte-identical. LAB27Oct automatic zero-result/28Oct resume/open note byte-identical to accepted protected continuation; no new CHECKPOINT.

One first CLOSED export path became unavailable on host after5seconds and browser later returned ENOENT. One explicit read-only retry yielded the retained50807-byte valid workbook, without any repeated state action. Download root cause remains UNESTABLISHED; no first-download reliability or speculative immediate-revocation fix claimed. The after-OPEN UI text file did not synchronize; actual UI history5 observation is recorded, not a fabricated file. Raw original workbooks, copied reports, before/after JSON, acceptance.json, before-action journal and actual closed/final-pair/history screenshots are retained in CHECKPOINTS/EVIDENCE/cash-handoff-issues-20261031/.

LIMITED LAB PASS: exact original-pair documentary OPEN/CLOSED/OPEN, append-only visible history, copy/XLSX agreement, unchanged report arithmetic/pending/expense/control and continuation on SuperAdmin desktop. No sale/payment/stock/fiscal/offset/shift approval/provider/email/settings/role/real-store action. Raw DB counts, physical cash, stock/IRIS, other roles/devices, actual native Excel visual opening, changed-source hosted refusal and full real-store financial acceptance NOT MEASURED/NOT TESTED (native engineering fences separately passed). Manual docs/manual/cash-control/PASS.md updated; completed handoff task removed from pending; central tracker/PDF synchronized. Broader cash remains OPEN with same owner for original safe/refill/provider evidence, unresolved arithmetic/last-shift cases, actual recipient/email acceptance and intermittent download diagnosis. Single next action: read-only identify the existing original safe/refill evidence gap and publish a bounded claim before any separate implementation or metadata test; never replay this accepted pair or existing expense/continuation for paperwork.

01/11/2026 — INVENTORY-RECONCILIATION-01 / FIRST READ ONLY SOURCE CANDIDATE / AWAITING CI AND LAB

Same receiving owner feat/inventory-reconciliation-source-20261101 after owner-approved narrow transfer, before-source claim3492/8c1c57ca/docsCI41353068425/merge6352b579 before runtime. Added selected-store two-finalized-stocktake reconciliation using individual immutable count boundaries, recorded postings, baseline-adjustment exclusion, separate nonphysical corrections, missing-count/history/cost/source findings and quantity/cost totals that remain unknown when incomplete. Owner-only native panel, stale-store rejection, source-fingerprinted PDF and real XLSX. Old writers/grants/blind-count protections unchanged; no schema/business mutation.

New Node20 focused15PASS/0FAIL/1isolatedPG SKIP; native SQL/HTTP/export/control fixture awaits unskipped CI. Work build/TABLE_SERVICE passed under Node20.20.2; full local Node20 suite4483PASS/0FAIL/336explicit infrastructureSKIP of4819 completed; native source fixtures remain untested locally. Actual read-only production schema and virtual LAB posting-type/count metadata inspected after explicit Render workspace confirmation; no functional LAB PASS or business invariance inferred. Entire requested feature remains OPEN: confirmed cross-code identity/revocation, reasoned report corrections and initial/final columns, full invoice/system-event/source chronology/warehouse reconciliation and all measured hosted scenarios. No grouped umbrella11 or corrected glasses23 acceptance claimed, manual PASS, email/charge, real stock/financial write or protected fixture replay. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-inventory-reconciliation.md. Same owner retains this transferred audit/report slice; all other BackOffice/monthly/lifecycle/invoice owners retained. Single next: exact full/native CI, then ordinary guarded delivery before read-only LAB acceptance. Persistence extensions need a separately recorded compatible design.

Combined-revision receipt: PR3495/head7b212cfb/fullCI41354201196 all5SUCCESS, actual native5162serverPASS/0FAIL/0SKIP plus build/browser/HTTP and backup checks. New native reconciliation SQL/HTTP/export/fingerprint/original-invariance case1491 executed unskipped. Merge405 then correctly refused concurrent shared records/PDF changes. Reconcile over maine962b7b0 with all12 runtime/test files identical to7b; preserve every current peer record, access field contract and the current-main PDF byte-for-byte. Local combined tracker was regenerated previously; this retained PDF is a peer historical/claim baseline, not a PASS closure. Require new exact combined full CI and main full CI before guarded release. No LAB PASS or deployment inferred.

Next same-owner review continuation is assigned BEFORE SOURCE, conditional on this claim being green/main: append-only, actor/payload-bound identity-link/revocation and signed report-correction actions in existing WorkforceAuditLog, selected-store/lifecycle/head/source locking and native Owner/SA-only confirmation; no original count/stock/invoice mutation or delegated-right expansion. Exact design docs/architecture/inventory-reconciliation-reviewed-results.md; new services/inventory-reconciliation-reviews.js plus existing reconciliation calculation/source/handler/audit-route/panel and new focused/native/mounted tests. Preserve the first read-only contract and every old blind-count/finalizer default. No review writer source or hosted write has started. All invoice/lifecycle and remaining BackOffice access integrations remain with their retained owners.

2026-11-01 / INVENTORY-RECONCILIATION-REVIEWS-02 / ASSIGNED same owner / candidate3500

Append-only pair-scoped LINK/CORRECTION/REVOKE, native Owner/SA fresh authority, immutable originals, idempotent requests, final groups and exports implemented; before-source claim3498 main. Local Node20 full4495PASS/0FAIL/337SKIP; focused27PASS/2nativeSKIP; Work build PASS. Exact native/full CI and guarded release/health then hosted review acceptance remain required. Broader global identity/invoice/system/physical scope OPEN; no other owner takeover or stock/financial/email/charge action.

Hosted2026-11-01T23:05Z exact0a0b read-only report UI/PDF and main XLSX totals consistent (-2/unknown cost);16 before/after LAB/control business digests unchanged. Actual XLSX count-event quantities blank due raw Prisma Decimal objects: scoped EXPORT HISTORY FAIL, no overall PASS/manual closure.3500 candidate fixes numeric export with actual Prisma.Decimal regression3/3 local PASS. Checkpoint CHECKPOINTS/CHANGES/2026-11-01-inventory-reconciliation-reviews.md; exact full CI/release/read-only retest required; protected fixtures never replayed.

2026-11-01 — INVENTORY-RECONCILIATION-EVIDENCE-03 / SAME OWNER / ASSIGNED BEFORE SOURCE

Inventory reconciliation — source evidence adapter

Before-source claim / same INVENTORY-RECONCILIATION-01 owner

New bounded read-only follow-up to3500. Full user request retained. Observed hosted read-only0a0b report on pair8f6dcacc-3b62-4192-92ba-7d4269f68ab0 → d9f81c39-acd5-460c-9ce8-b37c9d849f86: previous10, posted outbound4, expected6, count4, audit theoretical5. Read-only actual DB confirms completed SELF_CONSUMPTION salecc8ad2db-7ac5-4e9e-9506-b5ac4ca9053d/line4846b8e0-033f-4292-9fa2-8824d106f490,quantity1,occurred/recorded2026-10-10T08:47:54.810Z,zero direct StockMovement rows. Existing manual2026-10-10-n39-consumption-live and canonical product ledger explicitly record this source-derived movement. It is not a new loss or reason to replay it.

Claim exact new inventory-reconciliation-evidence.js/source helper and tests plus own calculation/source/export/panel adapters. Read existing completed sale/return/consumption, invoice lines/posting identities and allowlisted operational events under same tenant/store bounded held snapshot. Preserve original stock movements and prefer exact canonical posting identities over derived copies; no description/time-similarity matching. Original/reversal/source identities and idempotency separate physical quantity from audit events. CART_ITEM_REMOVE/CART_CANCEL/price/discount/barcode changes are contextual evidence, never automatic physical loss. Evidence has explicit source IDs, timestamps, documented quantity/package convention, original/canonical invoice linkage and coverage/missing-data findings. Invoice value credits or cancellation without verified merchandise posting must never invent physical quantities. Existing invoice stock-guard writers are inspected and preserved, not taken over.

Source timestamp separation: real transaction occurrence, immutable recording/posting, invoice issue date; unknown physical receipt remains unknown. Late/backdated relevant facts are visible and fingerprints change; source updates invalidate prior reviewed corrections safely. No fallback from document issue date to physical arrival. Capability probes are read-only, no bootstrap/DDL. Query caps fail whole rather than silently truncate or claim complete. Missing facts/old unsupported eligibility remain visible and unconfirmed. Strict selected-store/current role/module/rights and existing native report boundary retained.

No source changes before this claim green/main. Preserve3500 reviewed result/version2 contract, idempotency, authority/races, missing-cost handling and original controls. No changes to count/finalization, invoice/OCR/myDATA/payment/return/stock writers, global product merge, shared permission catalogue, lifecycle or monthly snapshots. Retained owners remain assigned. No production migration, seed, provider/transaction replay, charge or email. Existing store pool remains explicit; no invented separate warehouse identity.

Required proof: exact observed consumption included once; ordinary/gift/purchase/return/transfer/adjustment source categories; direct-plus-derived duplicate suppression, explicit repeated sync identity, returns/cancellations once, cart removal zero quantity, boxes/gifts/value credits, late invoice/transaction and missing evidence/cost. Isolated native PostgreSQL fixture and full CI/build/invariants/HTTP before exact-main/guarded release/health. Hosted read-only retest same protected existing pair only, fresh16 source/control digests, no new stock action. Full requested wider/global identity/warehouse metadata and measured hosted examples remain OPEN until separately satisfied; no CI=LAB claim.

System-only adjustments must remain separate from physical inflow/outflow. In particular negative-stock zeroing never creates a physical receipt/surplus or a phantom physical deficit. Expose both recorded-book trajectory and physical expected trajectory, with exact basis/uncertainty. A stocktake's own adjustment is baseline installation, not a second movement of merchandise. All reviewed corrections source-bind to the resulting changed base fingerprint.

Hosted observation also shows the legacy initial-audit summary still displaying cost0 for this missing-cost synthetic product while the new reconciliation correctly says unknown. Keep the initial label explicit and make the owned report/value presentation honor missing cost consistently without altering count/finalization economics. Preserve quantity totals, existing access boundaries and legacy operational writers; require regression across old audit and new export consumers.

Preflight receipt after source3500

PR3500 exactd942aeaca0d202e51caf169ad051fe864f7c4357, fullCI41360489566 all5SUCCESS; job1250100920055176server+8backupPASS/0FAIL/0SKIP, actual native reviewed inventory case1493 executed. Merged1e293f931ec5b0f153ba60dddf4fe5c22181def2. Exact-mainCI41361950951 in progress; no second-feature release or hosted review PASS yet. First read-only FAIL artifacts and16 unchanged before/after controls now included under CHECKPOINTS/EVIDENCE/inventory-reconciliation-20261101. Protected old business fixtures never replayed.

After exact3500 full-main/guarded release/health only, separately authorize one synthetic report-only CORRECTION +1 on existing LAB EXCEL TEST1/exact current d9f81c39-acd5-460c-9ce8-b37c9d849f86 and previous8f6dcacc-3b62-4192-92ba-7d4269f68ab0, followed by one REVOKE of its actual receipt. Reason/evidence must identify acceptance test, not a factual physical recount. Before each action refresh and record source/control digests, existing review head and initial/final figures; after verify only the expected append-only review row, source/control unchanged and final restored after revocation. No LINK of unrelated products, stock/count/sale/payment/finalization/email/charge. Umbrellas/glasses remain isolated PostgreSQL proof, not fabricated hosted scenario PASS. Require immediate scoped checkpoint/manual/register/PDF sync only after actual observed acceptance.
