Store module writer lock - 22 Oct 2026

TECHNICAL RELEASE VERIFIED. Final automatic email test remains BLOCKED; dispatch OFF.

Source and main CI

PR #3044 merged 5c8ccf5e. Source CI 39819376016: 3899 server + 8 backup PASS, zero failures/skips. Exact main CI 39821105794: 3916 server + 8 backup PASS, zero failures/skips. Native PostgreSQL parent and all six subcases executed PASS.

Installed revision

Ordinary guard 39822773699 / job 119978211519: Trigger and Wait SUCCESS, resolved runtime 5c8ccf5e. Render dep-dbd4faff3r2c739b9rpg LIVE at 17:33:32 UTC. Independent public health 17:45:48 UTC: HTTP 200, ok=true, exact 5c8ccf5e.

Remaining final-test gates

Verified recipient, consent, authorization grant, persistence, trusted SMTP acceptance, scheduler and retained lifecycle/restore suppression contract remain OPEN. Request #2833 comment 6346383862; central #2704 comment 6346828045. No final functional LAB/USER PASS inferred.

Next action and protected scope

Retained lifecycle and recipient/platform owners settle published contracts and exact writer handoff before further integration. No real email, restore, production data/config/schema/billing/financial action or accepted-test replay. Earlier source and claim records are historical. Latest global tracker PDF preserved.
